LA

Just so you know I have to leave at 2:45 for a meeting downtown. Lyle Artz

2:33 PM

Based on each question, compared to today, would each imagined future be much worse, worse, same as today, better, or much better?

Hudgens, John (Unverified) 2:42 PM

JH

There also a significant number of elderly that rely on friends / families to provide car transport to doctors appt. and other services.

3:01 PM Meeting ended: **1h 4m 20s**

ROUNDTABLE DISCUSSION: SMALL GROUP DISCUSSION NOTES

Car-Oriented City

- What benefits do you see in a car-oriented transportation network for daily travel and economic activity?
- What are other considerations that should be considered if Aurora invests in this imagined future?
- Do you think the benefits of a car-oriented city outweigh the negatives?

Group 1:

Benefits:

- No waiting
- Leave whenever/schedule
- Packing your items with you
- Freedom/flexibility
- Privacy
- Longer distances?

Considerations:

- Age of driving
- Robo-taxis/AI
- Distance/proximity
- Limited land use
- Gas costs
- Maintenance
- Nighttime driving
- pollution

Group 2:

Benefits:

- Faster to move around
- Familiarity
- Ability to be spontaneous
- Convenient
- Independence
- Practical/Easy
- Already have the infrastructure

Considerations:

- Safety
- Congestion
- Emerging micro-mobility conflict
- Will need more parking
- Charging infrastructure

Benefits Outweigh Negatives?:

- No, not yet

Group 3:

Benefits:

- Autonomy to plan your own day
- Convenient and efficient if you have a car/carpool
- Easier to combine chain trips
- Take whenever you want
- Go beyond Auora
- Don't have to carry groceries
- Mix – park and ride still an option

Considerations:

- Safety measures and enforcement; plan for more vehicle volume
- Self-driving, future tech changes, charging for EV
- What would older adults choose? Self-driving cab, transit, accessi-ride
    - Voucher uber vs send bus for medical ride

Group 4:

Benefits:

- Control over schedules
- Self-centered model
- Bad for traffic environment
- Benefits for individual
- Convenience/Access
- Opportunities for innovation
    - Car sharing

Considerations:

- Disabled/cannot drive/older population
- Fear/hesitation
- Accessibility
- Combative driving
- Weather/bad sidewalks
- Increased populations

- Technology

Group 5:

Benefits:

- Control over transportation
- Feel safer than when on transit
- Control speed and get there faster

Considerations:

- Cost of upkeep
- Environmental impacts
- Density of land uses
- Growing population
- More congestion
- Need safer traffic laws

Benefits outweigh negatives?

- No
- Greenhouse gases
- Accessibility is a priority

Group 6:

Benefits:

- Cars are convenient and here to stay for older adults
- Accessibility concerns with transit

Benefits outweigh negatives?

- Yes
- Cars will be more energy efficient
- Need more bike and e-bike only areas
- Need to still design for all modes

Group 7:

Benefits:

- Faster speed/convenient
- Time/flexible
- Freedom
- Goes where buses don't

Considerations:

- Could take money away from transit
- Would need to update street systems
- Car tech rapidly evolving

- Suitable for less dense areas
- Carpooling with those who can't drive

Transit-Oriented City

- How could a transit-oriented approach improve or change your daily travel experience?
- What types of transit services or features would encourage you to use public transportation more often?
- What challenges might arise when trying to implement a robust transit network?

Group 1:

How could a transit-oriented approach improve or change your daily travel experience?

- Travel experience
- Slowing down
- No longer the driver

What types of transit services or features would encourage you to use public transportation more often?

- Accessibility
- Safety
- Free
- Build it underground
- Coffee shops/boutique stores
- 1 bus trip
- Events/concerts

Challenges:

- Strict time schedule
- Safety
- Homeless population
- Cleanliness
- Private highways (E-470) and rapid development

Group 2:

How could a transit-oriented approach improve or change your daily travel experience?

- In a better transit-oriented city, faster by transit than by car

What types of transit services or features would encourage you to use public transportation more often?

- Free is good
- Reliable
- Frequent

- Safe
- TOD
- Accessible
- Comfortable
- Stops/stations weather protection

Challenges:

- Language barrier
- Cost (construct & operate)
- System legibility
- Political will

Group 3:

How could a transit-oriented approach improve or change your daily travel experience?

- More set schedule, planning required, less spontaneous
- Large service caps now
- Free and how it is funded

What types of transit services or features would encourage you to use public transportation more often?

- Public safety
- Better destination options
- Media, education, tech to navigate 1st/last mile

Challenges:

- Cost
- Incentivize/shift use
- May be more viable than neighborhood oriented

Group 4:

How could a transit-oriented approach improve or change your daily travel experience?

- Disability/aging population
- Affordability/faster access (lane dedications, bike and bus lanes)
- Expanded train service will attract
- They have to go where people want to go
- Air quality
- Increased traffic on major streets
    - Contributing to poor air quality
    - Traffic type on roads

What types of transit services or features would encourage you to use public transportation more often?

- Rail

    - More comfortable
    - Climate controlled
    - Expanded transit for disabled
    - Wi-Fi
- Safety
    - Make people feel comfortable
    - Vulnerable populations
- Challenges
    - Community buy-in and engagement

Group 5:

How could a transit-oriented approach improve or change your daily travel experience?

- Avoid traffic
- Save money
- Cost of living
- More equal
- Increased access
- Decreased traffic

What types of transit services or features would encourage you to use public transportation more often?

- More privacy – rooms
- Stations more frequent and comfortable
- Cleaner
- Access to information

Challenges:

- Costs
- Drivers and maintenance
- Infrastructure to support

Group 6:

How could a transit-oriented approach improve or change your daily travel experience?

- Would help with downtown traffic
- Parking is confusing

What types of transit services or features would encourage you to use public transportation more often?

- Accessibility
- Less transfers
- Less stops/quicker

Challenges:

- Cost effective solutions are difficult out east

Group 7:

How could a transit-oriented approach improve or change your daily travel experience?

- Greater penetration of transit into neighborhoods

What types of transit services or features would encourage you to use public transportation more often?

- Need access to more places (open spaces and parks)

Challenges:

- High density housing (good and bad)
- Need to force developers to put in essential services

Neighborhood-Oriented City

- How would a neighborhood-oriented approach impact your travel behaviors?
- What amenities or infrastructure would you prioritize to support a neighborhood-oriented approach?
- How might this imagine future affect economic opportunities and housing affordability in different parts of Aurora?

Group 1:

Travel Behaviors:

- Walking more
- More community based, connecting with neighbors
- Bike more
- Shorter trips

Amenities:

- Small local shops
- Wi-fi use
- Creativity spaces (like Rino in Denver)
- Gardens for fresh produce
- Shopping
- Children playgrounds
- Music, parks

Future econ opportunities:

- Sustainable impacts (solar, less gas), more desirable to live
- Hot pocket cultural blocks (distinctive neighborhoods)

Group 2:

Travel Behaviors:

- Walk to restaurants
- See our neighbors
- Kids' freedom
- Organic sense of community

Amenities:

- Better walking/biking infrastructure
- Safer crossings
- Places/infrastructure that is not on major arteries
- Better zoning to encourage smaller businesses
- Common gardens
- Density supports economic investment

Group 3:

Travel Benefits:

- More apt to walk/bike with good priced fun – convenience
- More focus on local businesses
- Time savings, slow down, European model. Show public new model.

Amenities:

- Infill vs new development
- Wide sidewalks
- Green space
- Lighting, safety, comfort
- Seasonal use based on weather

Future econ opportunities:

- Housing, encourage density
- Community building land uses

Group 4:

Travel Behaviors:

- Walking more
- Increased community/socialization
    - Consider personal safety
- Disabled—how to get around

Amenities:

- Ice cream/food/fun
- Urgent care/safety

- Sidewalks are well lit and consistent
- Lighting/perceptions of safety
- Bike racks/small golf carts
- Public art

Future econ opportunities:

- Dense housing/less expensive
- Noise complaints rise
- Police enforcement/transit police
- Increased small businesses

Group 5:

Travel Behaviors:

- Reduce long distance
- Walk more
- Healthier
- Build community

Amenities:

- Wider sidewalks
- Smaller roads
- Redevelop areas
- Grocery stores and hospitals
- Recreation centers and parks
- Schools

Future econ opportunities:

- More affordable
- Get a job easier

Group 6:

- Need to maintain parking ability
- Concern taking out or repurposing lanes
- Market will drive conditions
- Like neighborhood feel
- Interest in areas that support events

Group 7:

- Services closer to where people live
- Easier to cross major streets

Final Round of Discussion

- Are there key elements from each scenario that you feel should be prioritized, regardless of the chosen direction?
- How might each imagined future impact the identity and character of Aurora?
- What potential unintended consequences should be considered for each imagined future?

Group 1:

Question 1:

- prioritize safety
- affordability
- centralized
- trustworthy transport

Question 2:

- unified community
- uniqueness
- friendliness

Question 3:

- weather disasters
- breakdowns of infrastructure
- language barriers

Group 2:

Question 1:

- Affordable housing
- Density that supports small/neighborhood-oriented businesses
- Construction defect reform
- Mixed use neighborhood
- Mix of housing types
- Walkable schools

Question 2:

- COC: no change
- TOC: attract younger people, make immigration transition easier
- NOC: more social, more vibrant

Question 3:

- Political Will

Group 3:

Question 1:

- Safety, accessibility, technology, community vision, buy-in

Question 2:

- Not under shadow of Denver
- Small town feel
- Protect quality of life
- Prevent overcrowding
- What are planned demographic change
- Protect environment, open space, air
- Integrate people, places, culture

Question 3:

- Too dense, but still want vertical
- Different desire across generations
- Where does funding go
- Affordability

Group 4:

Question 1:

- Safety
- Disability access
- Affordability/budget/cost
- Weather/sidewalk health
- Beautification/community art
    - Creativity through grants
- Open spaces

Question 2:

- How we define it
- Neighborhood/transit approach could change perception
- Big city operating as a small city
- Generational perception
- Better infrastructure will bring more transits
- Language barriers
- Driving intelligence and changes

Question 3:

- Cultural enclaves
    - Pockets of communities
- Increased population
- unaffordable

Group 5:

Question 1:

- community, equity, safety, timeliness, accessibility

Question 2:

- more unique
- more friendly and community-based
- more trust in transportation

Question 3:

- construction
- costs
- land impacts

Group 6:

- need to support all modes
- roundabouts
- crashes
- neighborhood feel would be improved w/ neighborhood scenario

Group 7:

- need a “main street” in Aurora where you could park once and walk/bus to a lot of different places
- require diversity of land use
    - one size doesn’t fit all
    - example: Fallbrook, Nebraska
- peaks and valleys of density (good)
- access to open space
- access to key needs close by
    - grocery store

GIFT CARD WINNER

A random drawing of survey participants was conducted to select a gift card winner at the end of the Virtual Town Hall. The winner was sent their gift card via email. The winner was Ella G.

MAP COMMENTS

Latitude	Longitude	Address	Category	Comment
39.6093210037681 4	- 104.711020588874 82	5850 South Southlands Parkway, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118492	Bicycle	Connecting the path along the new housing developments to the path along Southlands Parkway in the mall, and upgrading the cycle lane to a cycle track in the mall for safety would make taking a bicycle or walking to the mall a much more attractive option and make the mall fell more connected to the community. Possible implementation pictured.

				 Image link

39.616135650679 01	-104.696883202123	5550 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118525	Car	This is a worthless and pointless intersection. Very little traffic on Alexander (which was NEVER supposed to be a major connector according to the original 2000-2005 master plans). The important intersection is Orchard/Harvest which according to that plan was supposed to be an important connector (2 lanes each way without residential neighborhood traffic) connecting Aurora Parkway and Harvest. This traffic light should be removed.
39.609073865792965	-104.69659994880206	South Powhaton Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118526	Car	There should be a traffic light here. This was supposed to be a major intersection according to the 2000-2005 master plans and was supposed to connect to the entrance to the Aurora Reservoir on the east but was never done. The 3-way stop is dangerous and confusing. The road should be completed to the east to connect to the Aurora Reservoir entrance and a stop light put in to replace the 3-way stop signs.
39.616400128621 02	-104.698144906433 3	5550 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118527	Bicycle	Original plan in 2005 was for bike paths from neighborhood trails to the west to connect to the Aurora Reservoir trails. 20 years later, nothing has been done. Need to complete the connection of bike paths to the Aurora Reservoir path.
39.630195102561 81	-104.697540878987 65	4605 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118528	Bicycle	Bike paths were supposed to be installed to connect east from the Tollgate Crossing paths to the Arapahoe County fairgrounds and the Aurora Reservoir. This still has not been done. Instead we have a worthless trail the County put in along the Xcel power lines from Gun Club to Quincy that doesn't connect well so no one uses it. High quality bike path needs to be installed to connect east to the Aurora Reservoir.

39.6236991704497 4	-104.717250831308 79	5101 South Gun Club Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118529	Bicycle	Many years ago, the County and City planned for a bicycle/pedestrian overpass at E-470 and Belleview to allow trails to connect to the County bike path on the west side of E-470 and the Copperleaf subdivision. In the transportation master plan circa 2010 this was given high priority but nothing was ever done. If a bike/pedestrian overpass was put in, would allow much better bike transportation from neighborhoods east of E-470 with the trail along E-470 as well as access from neighborhoods to the west with the Aurora Reservoir, middle school, fairgrounds, etc. AND improve safety as Gun Club and Quincy are very dangerous for bike traffic.
39.6162827659728 7	-104.689448118078 87	25400 East Alexander Drive, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118530	Car	The dead end here is really absurd - this should connect to the entrance to the Aurora Reservoir, as was originally planned (from Orchard/Harvest to the east). Neighborhoods to the south and west have to travel all the way north to Quincy and then around to Powhaton and then south again to enter the reservoir by car. This road was put in not for good planning or logic but just as a cheap fix. Spend some money to connect to the entrance and do it right, as you promised would be done nearly 20 years ago.
39.6383866598263 5	-104.698772549563 74	24805 East Quincy Avenue, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118531	Car	Quincy should have been widened to 4 lanes divided highway from Gun Club to at least the Aurora Reservoir entrance at Powhaton many years ago, especially when the Quincy/Gun Club interchange project was done. This narrowing of Quincy to 2 lanes is an embarrassment to Auroa as we saw when the 2015 Rocky Mountain Air Show disaster occurred. The traffic nightmare caused by poor city planning caused Aurora to lose millions of dollars in future revenue that we could have had... Time to do it now. People will die in accidents if you don't spend money to widen it NOW.
39.6101781385750 6	-104.684145927167 28	25941 East Orchard Drive, Aurora, Colorado 80016, United States http://engageaurora.org/connect	Bicycle	Aurora reservoir bike path was supposed to be extended many years ago to connect to the west with Harvest/Orchard and then go north along Harvest to Belleview and the east again to connect back to the reservoir bike trail. This would provide a valuable recreational resource to the several thousand people

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-118532		living in the neighborhoods to the west of the Aurora Reservoir.
39.657083822481689	-104.84489011178314	I 225, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119281	Pedestrian/Mobility Device	The bike path connects to downtown Denver, Golden, commerce city. This it is very important that any bike path system in Aurora MUST connect to this already established network of bike paths that do not cross any roadways or highways
39.6577534039266 8	-104.84566211160134	I 225, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119282	Transit	The light rail connects to Golden, the airport, downtown denver. Any bike path or alternate transportation should connect to this already established railsystem. It would be great if one could exit a plane and take a train to Aurora southland or highlands or south Havana steet.
39.6676143636604 05	-104.86194494697195	11000 East Yale Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119368	Bicycle	This is a really terrible intersection or bicycles. I have been hit by a pickup truck while in the crosswalk by a pickup truck that was turning right from Yale westbound to Parker northbound. This is a really scary place and I try to cross in the car lanes when I can because the pedestrian crosswalk is so dangerous.
39.6675771997997 1	-104.86365066815787	2719 South Parker Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	The bushes overlap the sidewalk making it hard to ride a bike here

		location?reporting=true#marker-119369		
39.674753582835415	-104.82795408461627	14001 East Iliff Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119375	Pedestrian/Mobility Device	Poor Visibility for pedestrians at and around the on ramps here
39.756886601928926	-104.81946229934694	2731 Sable Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119376	Car	Modifications to intersection increasing close calls and danger of intersection your ADA compliance does not imply make it worse for everyone else.
39.682639165962444	-104.783680560399	1853 South Sedalia Circle, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119757	Pedestrian/Mobility Device	There is no pathway at this location, although students from the nearby schools often use it to access the neighborhood. A fence blocks access to this area except for a 4 foot wide opening, which itself is blocked by a deep ravine (about 24" deep) that creates a hazard and prevents access for disabled people. This property is owned by the city of Aurora. This would be a perfect place for a paved pathway that would allow access to the Powerline Trail from the neighborhood to the north.
39.682372644312315	-104.78551824219124	1897 South Pitkin Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119758	Pedestrian/Mobility Device	This area is a mess. On the map it looks like there is a pathway from the Powerline Trail to the paved trail through the townhomes to the north, but in reality the pathway is blocked by high shrubbery. Students from the nearby middle school have worn a path in the dirt, and have completed access by creating an opening in a fence. This opening, however, isn't sufficient for a wheelchair to get through, and barely wide enough for a pedestrian. Completing this walkway with a

				paved surface would allow much easier access for pedestrians.
39.684115621047	-104.78541970252992	1842 South Quintero Way, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119759	Pedestrian/Mobility Device	The dotted line on this map is a pathway worn in the dirt, mostly by students from the nearby schools. It allows access from Mrachek Middle School to the neighborhoods to the north, but is not paved. This runs behind my house and is used quite often by pedestrians, mostly students and occasionally by bicyclists accessing the Powerline Trail from E Mexico Ave. A paved pedestrian/bicycle trail would be perfect here.
39.682247349766875	-104.78151975964605	1888 South Telluride Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119760	Bicycle	This is an odd situation. The Powerline Trail, which is heavily used by bicyclists and pedestrians, crosses S Telluride St at this point which is a fairly heavily used collector street. There is no marked crossing at this location. However, about 300 feet to the north there is a marked Abbey Road type crossing and signage. Presumably this crossing is for students at the nearby middle and high schools, but it's actually farther away from those schools than the Powerline Trail crossing. It would make much more sense to eliminate the marked crosswalk at the nearby intersection, and replace it with a marked crossing and signage at the Powerline Trail crossing.

				 Image link
39.607142984543688	-104.68970775604245	6171 South Wheatlands Parkway, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119817	Car	This intersection should be a 4 way stop. Traffic moves over the posted speed limit to a large degree and the vast majority of traffic is guilty of speeding through this intersection. There is a YMCA facility at this corner and a public park. A 4 way stop provides a heightened level of safety for pedestrians and bicyclists.

39.797656051230 91	-104.688827991485 61	East 56th Avenue, Aurora, Colorado 80022, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119818	Car	Jackson Gap should be extended south of 56th down to I70 as the planned community growth in this area is substantial. Introducing a major north/south arterial from I70 to Pena Blvd will ease traffic demand toward the west (E470, Pena Blvd west of E470, etc)
39.744603356033 86	-104.828258038032 81	13529 East 17th Place, Aurora, Colorado 80045, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119910	Transit	Add an R Line light rail station at 17th Place so more destinations on the Fitzsimons/Anschutz campus can be walkable
39.657565439999 274	-104.845110357273 38	I 225, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119911	Other	The map clearly shows that the Nine Mile park-and-ride lies within city limits, but half of the bus loop and the station itself are outside the city. Aurora should annex the entire station so it can be managed effectively.
39.6450634524551	-104.879329707473 53	3897 South Dallas Street, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119912	Other	This parcel was recently de-annexed from Greenwood Village. Aurora should annex the property to create transit-oriented development on the site that would offer more housing within walking distance of high-quality transit.
39.638678312163115	-104.807773232460 04	15555 East Quincy Avenue, Aurora, Colorado 80015, United States	Pedestrian/Mobility Device	Better lighting of the sidewalk approaching the intersection of Chambers Way and Quincy Ave is needed to increase visibility and reduce cars turning

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119931		onto Quincy hitting pedestrians and bicyclists crossing here. Moving the stop limit line back further from Quincy and making it more clearly marked should also help with this.
39.653032206720894	-104.73741352558137	East Hampden Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120178	Pedestrian/Mobility Device	No safe way to cross conservatory parkway on Hampden as a pedestrian and there is no connecting sidewalk to get to Piccadilly Road.
39.665814440312113	-104.80978484422396	15330 East Yale Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120180	Bicycle	Pedestrian push button to cross this intersection takes a very long time to get a green light response. Please address this.
39.665772663666665	-104.810053110122 7	2799 South Chambers Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120181	Pedestrian/Mobility Device	Cars turning right from Yale to Chambers are not yielding to peds / bicyciles on green light. Please have the peds crossing light up a few seconds before the cars traffic light turns green so that cars see pends and cyclists in the crosswalk.
39.667523658055598	-104.80477463105598	16002 East Yale Avenue, Aurora, Colorado 80010, United States	Pedestrian/Mobility Device	Crossing this intersection for kids and adults is a challenge as cars speed though this area. Traffic from Chambers side is hard to see due to the curve and speed factor makes this area unsafe to cross.

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120183		Would like to see a crosswalk + some sort of traffic calming option at this intersection.
39.634946490313084	-104.79141704595438	4450 South Buckley Road, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120190	Bicycle	While Buckley is marked as a Bike route; there is no safe way for a cyclist to use this route when cars go 50+ MPH and there is no protection for bikes. If you need to go south there is no other trail as Tollgate creek ends trail ends at Quincy.
39.653908128979744	-104.83225631401173	South Parker Road, Aurora, Colorado 80134, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120198	Pedestrian/Mobility Device	Often time lots of trash on Parker E Trail trail, broken glass, unsafe conditions
39.652957863305424	-104.8310548067093	7995 East Hampden Avenue, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120199	Other	Often time lots of trash on this trail, broken glass, unsafe conditions when trying to get to Cherry Creek trail.
39.6248213965175	-104.787774682045	17200 East Smoky Hill Road, Aurora, Colorado 80015, United States	Pedestrian/Mobility Device	The pedestrian crossing on Wagon Trail Parkway at the intersection with Smoky Hill is very poorly lit, making it difficult for drivers turning off of Smoky Hill to see pedestrians and bicyclists at night.

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120256		
39.6383273296173	-104.67450284879307	28102 East Quincy Avenue, Aurora, Colorado 80138, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-120661	Transit	This is a facility with over 200 Aurora employees but no public transit within about 5 miles, and then that is only a very slow regional bus. The closest otherwise is at AMC or the airport. However public transit in this general area would also benefit anyone recreating at the reservoir, pronghorn area, or the fairgrounds.
39.671615555950325	-104.8058580995418	Wheel Park Cir, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123345	Bicycle	Wayfinding sign needed

		location?reporting=true#marker-123350		
39.741662840848511	-104.79136884212495	Airport Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123402	Bicycle	As the earlier comment states a lighted underpass where the High Line Canal trail crosses Airport Blvd would be an amazing safety improvement. If that's not financially feasible a traffic signal would improve this crossing too. Traffic is often fast moving and thick on Airport so the current uncontrolled crossing is unpleasant and dangerous.
39.748716038461744	-104.791792631149 3	2150 Airport Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123403	Other	This is the only area in Aurora I ever see people riding horses, adding modal filters to this trailhead on Sand Creek Trail for pedestrians, bicyclists and horseback riders should help keep most unauthorized users (offroading trucks/ATVs ect.) out of the this recreational area and make it more attractive to authorized users while reducing noise for those living nearby.
39.764733601328883	-104.796169996261 61	16358 East 33rd Drive, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123420	Pedestrian/Mobility Device	No sidewalks on the north side of 33rd Dr
39.6099037259467	-104.697325229644 79	South Powhaton Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123440	Car	The cars on Harvest Road and Powhaton Road are consistently going far over the posted speed limit of 40 mph. The drivers in this area drive with no regard for anyone outside of their own vehicle, and the wide roads with no traffic calming measures reinforces this driving style.

39.6260196294302	-104.69769001007081	South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123441	Bicycle	Improvements to bicycle facilities needed along Harvest Road as the current unbuffered painted lane is right next to traffic regularly going over 40mph and dipping tires into the bicycle lane. Crossing the street is also fraught for those outside of cars and trucks. The current bicycle lane only serves to make the road wider for cars and encourage speeding.
39.609655759661685	-104.69271183013916	5903 South Jamestown Court, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123442	Bicycle	A cycle and pedestrian path connecting Orchard Rd to Aurora Reservoir would be a boon to the area and help reduce the current disconnected nature of the cycleways in Southeastern Aurora.
39.7523372243077	-104.67721939086915	East 26th Avenue, Aurora, Colorado 80019, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123443	Transit	Developing the remaining unpaved sections of Powhaton Rd into a straight line up to at least 64th Ave and maintaining at least one lane in each direction for transit could address Northeastern Aurora's gap in transit in a meaningful way. It could also ensure those in Aurora who live right next to the airport wouldn't be required to drive and find parking in order to use/work at the airport if that potential bus route then used Jackson Gap St to access the airport. It would also make it an attractive route for those cycling to the airport from these neighborhoods, as a straight shot without being a meandering cycleway that makes them have to go farther to go the same distance.
39.7291055376578	-104.6773910522461	26500 E 10th Ave, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Transit	Building the sections of Powhaton Rd that are being redeveloped into a straight line up to at least 64th Ave and maintaining at least one lane in each direction for transit could address Northeastern Aurora's transit gap in a meaningful way. It could also create transit to the Airport from neighborhoods that are currently restricted to driving.

		location?reporting=true#marker-123445		
39.685970867914336	-104.78307008743288	17591 E Oregon Pl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123533	Bicycle	The intersection of Mexico and Telluride is heavily trafficked by walking students and is an intersection of bike lanes. Creating safer intersection for all users and a buffered cycle track next to the sidewalk on the south side of Mexico/Uravan would reduce conflicts and make for a safer more pleasant environment. It could also be an education opportunity for interested students as Mrachek Middle and Rangeview High School on Telluride by inviting their input/involvement in the process.  Image link
39.650141014397773	-104.78551089763643	17292 E Jarvis Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123646	Pedestrian/Mobility Device	The sidewalk is overgrown on the west side of Richfield St north of Kenyon Dr.
39.607647200022222	-104.71147656440736	Best Buy, 5999 S Southlands Pkwy, Aurora, CO, 80016, USA	Transit	Best Buy's old location in Southlands seems like a good spot for a transit center for the underserved southern Aurora and northern Parker area. It has potential to allow for a grade separated route along

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123670		the tollroad connecting to the airport, is close to a lot of new development and could even serve as a location for a cycle and foot bridge across the E-470 connecting to the High Plains Trail and Saddle Rock Markeplace. As an further incentive for Southlands the old Office Depo and neighboring empty Southlands lots could be upzoned to TOD, allowing them to build a tall building with storefronts on the bottom level and apartments or lofts on the upper levels. Before RTD is ready to redevelop the site they could rent out the existing building (maybe to a bunch of small local vendors so that RTD can use parts of the building for itself still?) so that it brings them income in the meantime.
39.607105788174444	-104.70966875553131	23864-23894 E Orchard Rd, Aurora, CO, 80016, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123695	Bicycle	While there is a bicycle lane on Southlands Parkway it does not connect to most of the mall, and is a stripe of paint as protection from multiple lanes of traffic. Turning that bicycle lane into a cycle track and better connecting it to the rest of the mall while possibly adding some traffic calming along longer straight segments of the parking lots would be an improvement. Part of possible implementation pictured.  Image link
39.708569171563106	-104.81907337903979	14555 E Centrepoint Dr, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Transit	If there is ever funding available to grade separate the rail through the Aurora Transit Center such an opportunity should be jumped on. Not only would it reduce conflicts with cars and pedestrians it would also be a chance to making the turns less sharp so the train wouldn't have to to tip toe through this section and be an opportunity to make a better

		location?reporting=true#marker-123697		station for passengers with protection from the elements and some form of ticket gates. This would also create an opportunity to create better bicycle facilities along Exposition, Sable and Ellsworth by freeing up a bit of ground along the right of way.
39.7111979365952 9	-104.819094836711 91	E Alameda Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123698	Transit	As pedestrian crossing at Alameda and Sable is unpleasant enough just contending with cars having the train tracks grade separated at this intersection would be wonderful.
39.7033195953672 6	-104.828426241874 71	685-753 S Abilene St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123700	Transit	Grade separating this rail line to allow for a much more gradual tun (through the location of the Wallmart parking lot) would improve the train's speed and functionally in addition to eliminating conflicts with cars and pedestrians along this stretch.
39.7041656625533 86	-104.865934252738 97	S Havana St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123701	Pedestrian/Mobility Device	Havana is not a pleasant street to cross, and for those with mobility issues it is very difficult to cross. An underpass where the High Line Canal Trail crosses it would be appreciated.
39.6711613558891 2	-104.865869879722 61	S Havana St, Denver, CO, 80231, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	The slip lane connecting northbound traffic turning from Parker Rd to Havana is exceptionally fast, unnecessary and dangerous to pedestrians and cyclists. Replacing it with a turn lane would be an improvement.

		location?reporting=true#marker-123702		
39.675946822870 74	-104.780044555664 08	2209 S Telluride Ct, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123703	Bicycle	Creating a protected bicycle lane or cycle track along Telluride St from its intersection with Mexico Ave to the intersection with Tower including protected intersections at Iliff and Tower will create a safer environment for the students of the four schools along this stretch and better connect the schools to their surrounding neighborhoods and the nearby Recreation Center to which children already ride their bicycles and scooters despite the lack of a safe way to do so. Interested students could be involved in the process, possibly fundraising to speed up implementation of parts of the infrastructure. It would also be an opportunity to introduce traffic calming infrastructure along Telluride to slow the speeding traffic.
39.634828070249 66	-104.787704944610 61	S Pitkin St, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123704	Bicycle	Pitkin St between Quincy Ave and Wagontrail Parkway could use some bicycle lanes/cycle tracks and traffic calming as it is a wide street with room for bike lanes that connects two areas heavily used by those on bicycle, but is currently a magnet for speeding. The intersections along Pitkin could also use better lighting to ensure drivers can see pedestrians and cyclists.
39.638868340012 12	-104.797339439392 1	4257 S Naples Way, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123705	Bicycle	Please extend the West Toll Gate Creek Trail south to Pheasant Run Parkway, including an underpass at Quincy. This could be developed as a relation to the future park site along Quincy near the proposed underpass. As I have witnessed the aftermath of cyclists getting hit by cars along Quincy it is not a street I feel safe cycling alongside yet that is where the mixed use path ends.
39.638719622609 51	-104.825009107589 72	14055 E Quincy Ave, Aurora, CO, 80014, USA http://engageaurora.org/connect	Car	Quincy Ave's current wide straight design encourages speeding, and there is frequent speeding leading to cars crashing into fences, walls, and people. Whatever traffic calming measures are possible for this street should be implemented in

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-123706		addition to incentivizing and improving transit options in the area and safety for pedestrians and cyclists.
39.650739914168466	-104.77248072624208	S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123707	Bicycle	Please implement a protected intersection at the Jefferson Ave & Tower intersection as it is frequented by pedestrians, cyclists and skateboarders, especially shortly after Horizon Middle School gets out. This would also be an opportunity to involve students from Horizon Middle in the process since they are frequent users of the intersection.
39.650772956763442	-104.77119326591493	3594 S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123708	Bicycle	A protected bicycle lane on Jefferson Ave leading to Tower would be appreciated.
39.638694836344644	-104.78010356426244	17852 E Purdue Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123715	Pedestrian/Mobility Device	There is pretty much always debris on the stairs connecting the sidewalks of Quincy and Purdue just east of Uravan. The drainage ramp next to the stairs also invites cyclists and others on wheels but is at an angle that can create a speed issue when joining the Quincy sidewalk and trying to keep out of the street for some as there is no buffer between the sidewalk and car traffic.
39.638480021677008	-104.77693319320668	E Quincy Ave, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123717	Bicycle	Creating a buffered cycle track along Quincy at Quincy Reservoir (moving the fence back would make room for one) would be a huge safety improvement for the many cyclists in the area. It would also improve safety and comfort for pedestrians.

				 Image link
39.6605570004085	-104.78300034999849	17600-17630 E Columbia Ave, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123718	Bicycle	The bicycle parking corral at Columbia Middle is great.
39.63852546329702	-104.78245854377748	E Quincy Ave, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123722	Bicycle	If possible an underpass connecting Toll Gate Creek trail to the south side of Quincy and to Quincy Reservoir Trail would be a great improvement, and create an opportunity to extend Toll Gate Creek Trail to the east. Creating a buffer between car traffic on Quincy and the many cyclists and pedestrians in the area would improve safety.

				 Image link
39.6385812325170 3	- 104.776694476604 48	E Quincy Ave, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123749	Pedestrian/Mobility Device	Improving the crossing on Quincy at Summit Elementary, moving the sidewalk back from the street and separating pedestrian and bicycle traffic into the sidewalk and a cycle track would greatly improve safety for students and their parents/guardians. Planting some trees in the verge created by buffering the sidewalk from the street may help slow down car traffic as it passes the school due to the visual indication that the way is narrower.  Image link

39.712724001531112	-104.86587626561987	160-170 S Havana St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123770	Pedestrian/Mobility Device	Close the short gap in the Westerly Creek Trail between Expo Park and Lowry Wetlands. Signage at both ends, improved crossing for Alameda and Havana, improved sidewalk (and plowing), and put a ped-friendly gate/passage in the fence -- if we can walk the perimeter trail from the inside, why can't we cross between the street and the trail? And why not close this short gap in an otherwise decent trail?
39.697149793284115	-104.86038170553574	11083 E Mississippi Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123771	Pedestrian/Mobility Device	Crossing Mississippi here is far more risky and difficult than it needs to be. Most of the other street crossings are off-grade (even if they need to be brought up to ADA standards), but this one is not. It is among the most dangerous/difficult streets to cross along Westerly Creek and is one of the only crossings that is at-grade. Why are neighborhood streets off-grade but this one is not, and how can we make it so all street crossings are off-grade?
39.689851376003745	-104.84712198779329	12102 E Florida Dr, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123772	Pedestrian/Mobility Device	The trail crossing at Florida/Peoria is at-grade, while most other crossings (except Mississippi) are either off-grade or on quieter streets. This intersection is a little 'easier' than the Mississippi crossing, but does need to be taken below-grade. Peoria is a busy street and Florida is no slouch. Having an off-grade option would greatly improve general safety, and would make it much more appealing for neighborhood residents to let kids walk/roll to Village East, would give older students a better way to get to/from the rec center and Overland High School, etc.
39.683448767150062	-104.83982852437917	12950-12978 E Colorado Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	This trail is marked as public on maps, but on the ground it is just an informal trail worn into the ground by foot traffic. It is not maintained in winter. Either it is or it is not a public trail. Move the trail to the north side of the ravine so the sun can help warm/clear it in winter, and improve it to

		location?reporting=true#marker-123773		standards for a 6' multi-use trail, and include a small trailhead / 'landing space' on both ends.
39.686060928688306	-104.83494743351831	1675 S Victor St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123774	Bicycle	I love Jewell Wetlands and want to keep it preserved as an intermittent wetland. It is a valuable double-duty green space and flood infrastructure. But there is an issue/question. What is the route we are suppose to take when moving between somewhere like Overland/Prairie, Utah Park, or adjacent areas and the train station at Florida Station? Or the Medical Center? A signed route around or through the wetlands would be fantastic, right now it's unclear and ad hoc and often feels a bit awkward if the Wetlands are part of your route rather than your destination.
39.6651454635855	-104.84059730622553	12432 E Amherst Cir, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123775	Transit	Two issues in this 'corner' of the city. How do neighborhood residents get to/from Nine-mile Station without a car? And how do people who need a bus/train from Nine-mile get to/from destinations on Westerly Creek Trail? If the trail can't continue as a trail, can it continue as a marked multi-use sidewalk between the current trail terminus at Yale and Nine-mile Station? There seem to be trails internal to each 'block' in this development/neighborhood. Can something similar be organized that would serve to move traffic from this neighborhood to the trail and to Nine-mile without having to take a circouitus run-around?
39.72068165739434	-104.81862732284624	291 N Dearborn Way, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	A ped/bike friendly improvement/connection between the trails here, with signage guiding people along the route where it runs along streets. Right now the walk/roll option to transit between these two options takes you a couple miles past city hall and around DeLaney Farms. Why not a marked multi-use sidewalk route between the two?

		location?reporting=true#marker-123777		
39.708745549062116	-104.8050576758265	High Line Canal Trl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123779	Pedestrian/Mobility Device	1 - the canal and creek trails have a terrible intersection insofar as signage and ADA are concerned, can we shift the Canal trail off-street (off the sidewalk) onto a separate bridge with a current-standards intersection to the creek trail? This mess is a trick even being able bodied and knowledgeable about the area, it needs improvements in the worst way. 2 - Connection to the trail/creek thing to the east (that is, can we connect Centrepointe Park, Global Village Academy, and the DeLaney Farm areas along the street here?
39.713159212493777	-104.80034538620073	High Line Canal Trl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123780	Pedestrian/Mobility Device	I don't remember off-hand if this creek segment is a trail. Why not close the gap across this space with a multi-use trail (if there isn't one already)?
39.683448218995866	-104.79903512325379	16206 E Utah Pl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123781	Pedestrian/Mobility Device	Is there an option to use the greenspace adjacent to Jewell & Potomac & 225, and the T-intersection to the east (Jewell & Abilene) to put in a ped bridge or tunnel?
39.744615699654117	-104.8814922413785	1745 N Beeler St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	This short gap in the trail along Westerly Creek needs to be closed. If it can't be a proper trail, could we do some traffic calming circles or diverters, speed cushions, etc. to turn this into a signed/improved connection between the two longer trail segments? This would go a long

		location?reporting=true#marker-123782		way to improving multi-modal recreation and transportation in the neighborhood. This should cross Colfax in a way that is in proximity to a BRT station, that would be a proverbial "two birds with one stone". Right now, driving is the only practical option in the immediate area of Colfax/Montview and Westerly Creek. Improving a trail connection and making it accessible to the new BRT would retain the option to drive while empowering other modes in safe & practical ways.
39.762499076786 28	-104.852398089535 13	3251-3385 Nome St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123783	Pedestrian/Mobility Device	A walk/roll route between Peoria Station and Sand Creek Trail (and Anschutz) would be fantastic. Right now it's sketchy, both on street and getting from the street to/from the trail. And once on the trail you are routed a decent distance out of your way to cross the creek, if your destination is south of the creek.
39.757225161494 59	-104.830606390123 14	3008 N Wheeling St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123784	Bicycle	Walk/roll bridges across Sand Creek are desperately needed. What good is a trail if I can see it 100 meters away across a creek, but have to travel a mile or more to reach a destination only 100m away? The trail is great, but access points are desperately lacking.
39.757104340591 525	-104.819333561826 55	3000-3198 Sable Blvd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123785	Pedestrian/Mobility Device	Agreeing with the person who posted the orange 'car' pin. The intersection is crashes waiting to happen for cars and nearly unusable for anyone on the trail. For the intersection, a stoplight or all-way stop would help prevent backups on 29th that are tens of cars long. Left turns are particularly rough.

				For trail users, crossing Sable here is all but impossible with even modest traffic. There is ample space under the bridge (along the creek) for an underpass. Drop the trail crossing off-grade. Consider Sable Elementary just south of here, and running a trail spur or multi-use sidewalk south to the campus so parents and/or kids can walk or roll to school.
39.754597275714005	-104.82268135024418	2590 N Billings St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123786	Pedestrian/Mobility Device	Run a short trail or multi-use sidewalk between Cottonwood Park and the school campus, either between properties if homeowners are amenable, or along 25th and/or 26th. There is no reason someone living on Zion shouldn't be able to schooch down to the park, through the park on foot or bike, and then to school. And to do so without taking the risk of being on bike/foot along a busy street. Add a similar multi-use sidewalk connection along Billings between the ditch and the creek as well, with proper trailheads/ramps to/from the trails on both ends of this segment of Billings so families can close the last hundred-odd meters in an otherwise perfectly amenable walk-roll route to/from school and the park. Of course cars need to retain access, but it is silly that we would de facto require someone to drive when there are other options for such a short trip, building a safe and practical multi-use sidewalk along Billings and 25th/26th would be a very inexpensive way to turn this into a wonderful mutli-modal neighborhood without having to remove a single parking spot or do any sort of intrusive construction. A traffic circle or two along this bit of Billings would help discourage rat-runners trying to make a 'shortcut' and improve safety even further without hindering local vehicle or foot traffic.

39.754647194888 41	-104.775125968316 12	17953-18003 E Smith Rd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123787	Bicycle	How involved would it be to run a ped/roll underpass to carry the High Line Canal Trail under the tracks and under Smith Road? I'm not tagging most of the Canal street crossings as most are in a long-term plan by the Conservancy, but this particular stretch is not appropriate to have along Tower -- a challenge that is compounded by the combination of industrial land use, rough/dangerous street crossings or parallels, and the fact that the tracks are difficult to cross with most bikes and are private property to boot. A long trench with underpass portions at the streets and tracks would be a wild improvement. The wonderful new bridge to take the Canal across I-70 will increase walk/roll traffic in this Canal segment significantly. Note: an alternative to a trench-tunnel combo here would be another long pedestrian bridge similar to what is over 70. This (bridge) may be easier, and may be preferable: it would avoid disturbing the tracks and weight-related engineering for heavy trains, and it would allow design to bypass the private property concerns by placing the supports on Canal property outside the track ROW. Whether a tunnel or a bridge, place the on-ramps north of 28th and south of Smith.
39.744486921632685	-104.784676212206 86	17594 E 18th Pl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123788	Pedestrian/Mobility Device	Why: (1) is there no practical foot path between the two developments/properties here? And (2) Sand Creek Trail is on the north side of the creek here and these dozens of homes have zero access to it. That is ridiculous. If private property/ownership issues prevent a decent foot path between the two developments, can each at

				least get a walk/roll bridge across the creek to Sand Creek? Or, alternatively, a second segment of trail on the south side of the creek with at least one crossing to the north side?
39.740534331908485	-104.7890993740861	High Line Canal Trl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123789	Pedestrian/Mobility Device	How do the homes north of Colfax here have no decent connection to the Canal? I believe improved crossings for the Canal to cross Airport / Colfax is in the mid-term future plans, but is there a safe multi-use path connection to/from the trail to the two developments that are literally adjacent and yet effectively risk their lives to access the trail? This is an easy fix, how is it still an issue decades later?
39.7729212227079	-104.82845074861191	I-70 W, Denver, CO, 80239, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123790	Pedestrian/Mobility Device	A walk/roll connection to move people across 225 and 70 would go a long way to making this area slightly better to live in and move through. Even a connection just between 32nd to 42nd and a way to cross east/west over 225 on each side of Smith would solve a lot of problems (eg. a ped/roll bridge connect 32nd, and another connecting 35th/39th). This area won't be a pedestrian haven anytime soon, but that doesn't mean we have to make it hell on earth, either.
39.693613235774606	-104.83145882350229	1300-1318 S Potomac St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123791	Bicycle	Going south of Florida Station on foot/bike isn't too bad, and east over 225 and along Florida is doable. But north to where the shops/etc are (at Mississippi & Potomac) is no fun, and there is no dice going west through/beyond the medical center.
39.689505144972826	-104.80675888076209	1415-1499 S Idalia St, Aurora, CO, 80017, USA	Pedestrian/Mobility Device	All the myriad neighbors along this stretch have no access to the creek trail. Why isn't there a walk/roll bridge (or several) providing access to the trail? Forcing people to walk/bike out to a busy street to get

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123792		on the trail is silly, especially considering everyone on the east side of the creek has several trailheads. If the city purchases just two properties in parallel to Florida when they go up for sale at some point (even if a decade or three from now) that would be a great additional trailhead for the neighborhood but, more importantly, a way to provide access across Chambers for the schools and parks there, and to connect that bike lane (on Florida) all the way from the light rail to the creek trail and points east. That said, there may be enough contiguous neighbors willing to sell 3-5 feet of their properties for a little footpath to close that bit of walk/roll opportunity along Florida.
39.6825694820689 2	-104.791051728573 65	S Buckley Rd, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123793	Pedestrian/Mobility Device	An underpass for walk/roll traffic to cross Buckley would be a massive boost to increasing multi-modal transportation as well as improving options for general recreation. Schools to the east and trails to the west, destinations along Buckley in the shopping center.
39.6825027139135 6	-104.800986809523 69	Horseshoe Park, Aurora, CO, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123794	Pedestrian/Mobility Device	There is literally a multi-use trail running east/west here on both sides of the creek...and no bridge over the creek. This is a stupidly simple fix, how did we go this long without having a bridge here?
39.7303579555221 94	-104.842269251111 49	875 N Revere St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	Hoffman Blvd is a very good potential walk/roll connection between Tollgate Creek and High Line Canal, as well as the high school /elementary school right here, Del Mar Park, etc. The current "bike lane" is not productive in its current form.

		location?reporting=true#marker-123795		And to the south of Del Mar Park, an improved connection to the High Line Canal is desperately needed.
39.726068728436076	-104.84690701950505	Metro by T-Mobile, 606 Peoria St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123796	Pedestrian/Mobility Device	Connecting the segments of neighborhood inside Del Mar Circle is needed. Being at the park, pool, etc. and want to walk over to grab a bite? Have fun crossing 6th and navigating along Peoria, across the sidewalk, etc. Or if you live in one of the homes/apartments inside the circle, why should you feel as though you have to drive for even something as simple as taking a walk in the park that is literally across the street, or the Canal immediately south of the park? Or over to Hoffman Park if you live in the s/e quadrant of this circle? Sure, people may need to drive to the King Soopers, etc; cars aren't going away -- but if I want lunch or something, the only 'safe' option right now is to drive literally across the street, and that's silly.
39.7493009069629	-104.8292048656231	2204-2254 N Fitzsimons Pkwy, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123797	Bicycle	Tollgate Creek Trail passes campus for a significant distance around the perimeter of the campus. Why no trailheads? And why no simple, safe connection between the Colfax Station and the Trail, and a simple/safe connection between Fitzsimmons station and the (Sand Creek) trail? Take the R to both stations and try to get on/off the trails, neither is practical. And neither is getting into/out of campus from either trail.
39.75116608032725	-104.82662948530313	I-225 N, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123798	Pedestrian/Mobility Device	Is there an option to cross I-225 here connecting the trails on both sides of the freeway? There is a corridor on both sides but no way to connect between them.

39.576395436622225	-104.73643183708192	State Highway 470, Aurora, CO, 80016, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123799	Bicycle	Please update the bicycle infrastructure guidelines so that new roads fit current best practices. With (new) roads that have more than two lanes or a speed limit over 40 requiring a setback cycle track and sidewalk at implementation to improve safety and connectivity for all future users. This also creates a verge which can be planted to create a more attractive streetscape.
39.740392363609666	-104.84566211700441	12111-12117 E Colfax Ave, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123866	Transit	Hope Aurora works with RTD to get the planned BRT line on Colfax to at least reach the Anschutz Medical Campus with a proper dedicated bus lane.
39.740429488276778	-104.84684228897096	1514 N Peoria St, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123867	Pedestrian/Mobility Device	The slip lane at Peoria and Colfax ought to be just fine as a turn lane, this would ensure cars are not zipping through the crosswalk at such high speeds while the pedestrians have the right of way, shorten the total crossing distance and be a chance to add a bicycle track on a section of Peoria.
39.754774612376586	-104.84689056873323	N Fitzsimons Pkwy, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123868	Pedestrian/Mobility Device	The dangerous slip lanes at the intersection of Peoria with Martin Luther King Blvd/Fitzsimons Pkwy really need to go. This entire intersection needs a redesign to make is safer for those outside of cars and seems to be an optimal spot for implementing a protected intersection given the proximity to mixed use trails and a light rail station.
39.761018221495118	-104.84694957733154	3114-3116 Peoria St, Aurora, CO, 80010, USA	Car	It's great that Peoria narrows down to two through lanes in each direction as it goes south over the bridge, having it be six through lanes would only serve to make this corner of Aurora more loud and

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123869		dangerous for everyone and encourage even more people to drive here as though it were a highway instead of a city street.
39.747445691266866	-104.84695225954057	Montview Blvd, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123870	Bicycle	Montview's paint buffered bicycle lane does not feel like sufficient protection from traffic along here. An upgrade to a cycle track with protected intersections would make the route safer and more inviting to more users.
39.740466612923991	-104.82861399650575	13681-13699 E Colfax Ave, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123892	Bicycle	A cycle track next to the sidewalk along the north side of Colfax from Peoria to Colfax station buffered from Colfax by a verge with protected intersection treatments at Fitzsimons Pkwy, Wheeling St, Aurora Ct, Quentin St and Peoria St would greatly improve the safety of cyclists. This would provide better transit connections, move pedestrian traffic that little bit further from car traffic, and reduce conflicts between pedestrians, bicycles and cars along this stretch making it more attractive to those who might otherwise be hesitant to ride a bicycle here.
39.738177222275334	-104.82825458049776	1368-1392 Potomac St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123893	Pedestrian/Mobility Device	A long stretch of Potomac St south of the substation appears to have room to buffer the sidewalk with a planted verge along the powerline easement, creating a much more pleasant environment for pedestrians than the current one. This sidewalk could be widened enough for use as a mixed use path or run alongside a bike track to provide improved and expanded access to Colfax station for everyone outside of a car.
39.648872981900375	-104.78234052658082	17800-17898 E Kent Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-	Pedestrian/Mobility Device	Please add a bridge connecting Toll Gate Creek Trail to Cimarron Elementary and Summer Valley Park for wheelchair and bicycle accessibility.

		by-location?reporting=true#marker-123897		
39.653383271859446	-104.73101377487184	22175-22497 E Hampden Ave, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123898	Bicycle	Paving a nice sidepath along Hampden at the Plains Conservation Center to connect to the High Plains Trail would make that trail accessible to more Aurora neighborhoods.
39.694251580109324	-104.81384038925171	14866 E Alabama Pl, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123899	Bicycle	A nice lighted mixed use path with grass or other plants on each side connecting Gateway High School to the Village Green Rec Center and Village Green Plaza would be a great connectivity and safety improvement for this neighborhood. Interested students from the school could be involved in the planning process and perhaps students could be involved in some trail maintenance long term as they are likely to be the trail's most frequent users and the first to notice any changes which may need to be addressed.
39.682428764524995	-104.80094432830812	Horseshoe Park, Aurora, CO, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123903	Bicycle	Please extend the finished portion of Powerline Trail across the creek, Chambers and Tierra Park.

		location?reporting=true#marker-123904		
39.68353517530666	-104.8192584514618	1824-1856 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123957	Bicycle	Whatever can be done to add a bicycle lane on Sable between Mexico and Florida ought to be done for connectivity. This would be great for the students of Jewel Elementary & Gateway High, with the bike lane being a cycle track right at the schools to prevent people from parking or driving in it and make it safer for kids to actually use to get to and from school.
39.71843580806472	-104.80816483497621	15301-15413 E 1st Ave, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123958	Bicycle	Protected bicycle lanes or cycle tracks along 1st Ave to connect between the High Line Canal Trail and Toll Gate Creek Trail would help make the area more connected and accessible to those outside of cars.
39.7155638587384	-104.80957567691804	2-80 N Chambers Rd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123959	Bicycle	Since DeLaney Farm is City property adding a cycle track to the east side of Chambers along it shouldn't have too many barriers, and such a cycle track would greatly improve connectivity around City Center and to the Municipal Center and Aurora Metro Station.
39.708152356604394	-104.81966614723207	423-499 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123960	Pedestrian/Mobility Device	A pedestrian walkway over Sable Blvd connecting the mall to Aurora Metro Station would make using transit a more attractive option here. Would be even better if the train tracks were elevated to allow for a station platform only accessible to those with a ticket and to create a more gradual curve above the parking lots so that the train could move at a more desirable speed to and from the station.

39.7105706736616 7	- 104.799474477767 94	S Memphis Way, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123963	Pedestrian/Mobility Device	Please create a pedestrian/cycle path connecting the High Line Canal Trail to Alameda Pkwy where it intersects with Norfolk Way along this stream/drainage so that the space can be better utilized and appreciated by the community.
39.6792167701131	- 104.740905761718 75	21059-22009 E Jewell Ave, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123964	Bicycle	Extending Powerline Trail along Jewel to the High Plains Trail would make High Plains Trail more accessible, and help cyclists who don't want to risk mixing with the high travel speed of cars on Jewel as this stretch currently indicates cyclists are meant to try and ride in car traffic. This would also connect to Conservatory West Trail, Great Plains Park, and Dunkirk St which currently has bicycle lanes.
39.7194673698659 95	- 104.847249984741 23	Peoria St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123968	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections, from Fitzsimons Pkwy, through Del Mar Park to Parker Rd at 9 Mile Station would create a safer and ore attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. This would also make it safer for students at Overland High and Prairie Middle School who commute by bicycle. In places where implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions to at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route more functional.
39.6968685079059 4	- 104.847174882888 81	1085-1101 S Peoria St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections, from Fitzsimons Pkwy, through Del Mar Park to Parker Rd at 9 Mile Station would create a safer and ore attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. In places where

		location?reporting=true#marker-123969		implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions for at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route even more functional.
39.6815617884651 7	-104.847239255905 17	S Peoria St, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123970	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections would create a safer and more attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. This would also make it safer for students at Overland High and Prairie Middle School who commute by bicycle. In places where implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions to at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route far more interesting and a boon to private property owners along its route.
39.7097246850140 5	-104.828345775604 26	359-359 S Potomac St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123971	Bicycle	Instead of having the bicycle lanes on Potomac peter out just north of Nevada Pl they could transfer to cycle tracks that run up by the sidewalks through a protected intersection at Alameda, along Bicentennial Park and up to connect with the High Line Canal Trail where it crosses Potomac. This may require widening the ROW a little bit into some existing parking lots, but at least along the park the land required to make this upgrade is already in city hands.
39.7110555649166 34	-104.826819598674 79	E Alameda Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	Crossing the bridge over the 225 on Alameda is a deeply unpleasant and unsafe feeling experience outside of a car. Creating a dedicated pedestrian and cycle bridge next to the Alameda Ave bridge on at least one side would make for a safer and less uncomfortable crossing experience.

		location?reporting=true#marker-123972		
39.6385874290942 65	-104.788187742233 29	4267-4309 S Pitkin St, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123973	Bicycle	The Pitkin & Quincy intersection is frequented by bicyclists and pedestrians and could use some alterations to make both more visible to cars as they approach. If possible creating a protected intersection to limit conflicts between users here would be preferred, though it may require extending the ROW on Quincy into two existing backyards and/or the grassy strip between the sidewalk and some signage by several feet.
39.6241892169988 9	-104.783982038497 94	17532 E Bellewood Cir, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123974	Pedestrian/Mobility Device	Making the sliver of path connecting the Smoky Hill & Richfield Bus Stop to Telluride St wheelchair accessible would be great.
39.6268955658792 95	-104.780511260032 65	4928 S Sedalia Way, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123975	Other	This dirt path along the drainage behind Meadow Point Elementary is frequented by motorcycle users, kicking up dust and making a racket for nearby homeowners. Some form of modal filtering to reduce this usage would be great, and paving the section of path between the existing paved path leading to the school and the point at which the path crosses the stream/drain would cut down on the dust issues.
39.6279243638688 5	-104.780371785163 9	17577 E Chenango Dr, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123976	Pedestrian/Mobility Device	The trees and bushes along this corner of Chenago & Sedalia are very overgrown, making the sidewalk completely inaccessible.

39.661341646323443	-104.75939154624939	Flanders Park, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123977	Other	There are many places (mostly in parks) where existing mixed use paths are not marked on the Aurora Bike Map, discouraging potential users. Updating the map to include smaller paths instead of only "regional" ones as well as keeping it up to date with new bike lanes may make more people feel comfortable riding as they can see more places where there is infrastructure for them when they check online.
39.657678512532044	-104.84508275985719	Nine Mile Station, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123978	Transit	If the city could annex the rest of the 9 Mile Station grounds and enforce rules to keep encampments out of those grounds it would make the station a much more appealing option for many.
39.668105750588112	-104.7590160369873	19712 E Villanova Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123979	Car	When people are parked on the curve of Flanders street leading to the intersection of Flanders, Vassar & Villanova it is very difficult for those headed west on Villanova to see when it is safe to cross the intersection, especially since it tends to be larger vehicles like trash trucks and a car hauler parked there. Perhaps extend the no parking zone along this side of Flanders street.
39.669223746178005	-104.77066218852998	18602 E Water Dr, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123980	Bicycle	There is a fence instead of a gate across this path. This seems to be a place where the city approved building a path that would connect to the sidewalk and bicycle path on Sterling Hills leading to the Rec Center, and then the property manager made it unusable. If this can be addressed it ought to. This would also be a good location to shift the bicycle lane to a bicycle track leading to the intersection with Tower for better cyclist safety through the busy intersection and connecting to the path under the powerlines along Tower.

39.672622011354896	-104.75428193807603	20089 E Dickenson Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123981	Pedestrian/Mobility Device	Please widen the paved path connecting Dickenson Place to Halifax Way by about a foot or so. It is currently to narrow to walk next to a wheelchair or pass bicycle going in the other direction without stepping off the path.
39.667763018861822	-104.765625	19053 E Linvale Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123982	Pedestrian/Mobility Device	Please pave and light the path between Tower and Flanders for wheelchair accessibility to the Unnamed Creek Trail pedestrian crossing to the Rec Center and the bus stop at Tower & Telluride. The current path runs through a bunch of prairie dog coteries and has many holes in it, turning it into a mixed use path would make it much more functional. A gravel or dirt path could run alongside it for the dog walkers and runners that use the current holey path due to liking a softer trail.
39.696645618867564	-104.77781295776369	S Uravan St, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123983	Bicycle	Please create a protected intersection at Uravan & Mississippi to bring the bike lanes through the intersection more safely. With the current set up cars regularly use the bike lane as a turn lane, moving bicyclists away from the cars as they approach the intersection would stop this from happening.
39.706311737665324	-104.81920480728151	520-658 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123986	Pedestrian/Mobility Device	Better lighting needed on Sable sidewalk between Exposition and Centerpoint Dr. Eventually grade separating the rail line through this busy section of town would also make for a more pleasant pedestrian experience since RTD could rent the space out to small pedestrian oriented stalls, widen the sidewalk, put in a cycle track or put greenery there instead of pedestrians being sandwiched between heavy traffic and a metal fence.
39.709708177815311	-104.81481134891511	Aurora City Government Cultural Services, 15051 E Alameda Ave, Aurora, CO,	Car	While it is apparent that only one lane is straight only when exiting the Municipal Center on Alameda Dr the signage is incredibly poor and appears at first glance

		80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123987		to indicate all lanes are straight only, through the intersection with Alameda Ave. This kind of poor signage results in drivers having to spend time sorting out the reality of the lanes available to them that should be spent looking for pedestrians, cyclists and other things on the roadway.
39.67756530095637	-104.7724485397339	S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123988	Transit	Tower really doesn't need 3 through lanes in each direction, and the current configuration encourages speeding. If it's possible to turn the curb lanes into bus & bicycle only lanes with personal vehicles only allowed to enter those lanes right before a right turn it may alleviate some speeding and make the street safer.
39.631758464202626	-104.7950702905655	16550 E Pheasant Run Pkwy, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123989	Bicycle	Please widen the path through Wagon Trail Park so that it is functional as a mixed use pat/add a cycle path alongside the footpath, especially since there is no sidewalk on the other side of the street and this is the only approach for walking or bicycle riding students of Independence Elementary from the east and a route for students of Smokey Hill High.
39.630700802574445	-104.79148685932161	S Buckley Rd, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123990	Bicycle	Please create a protected intersection at Buckley & Wagontrial Parkway instead of having the bicycle lanes peter on on approach. This would make crossing Buckley safer for pedestrians and cyclists.
39.750992705994285	-104.8764216899872	2277-2299 Dallas St, Aurora, CO, 80010, USA http://engageaurora.org/connect	Bicycle	A well lit separated bicycle track up the west side of Dallas St to connect Stanley Marketplace to the Arts District on Colfax would make North Aurora safer and easier to transverse by bicycle.

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-123991		
39.729798641632215	-104.87553119659425	ATM at John Dollar Mini Mart, 818 N Dayton St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123992	Bicycle	Improve sidewalk on the west side of Dayton to include a dedicated bike lane along Lowry to make the area more accessible to those on a bicycle and reduce conflicts between bicyclists, pedestrians and cars.
39.675269693235784	-104.76243853569032	19298 E Caspian Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-124020	Bicycle	Creating a protected intersection at the Wesley Dr and Dunkirk St intersection would improve safety for pedestrians and cyclists.
39.667587523042663	-104.79434877634005	16594 E Yale Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-124021	Pedestrian/Mobility Device	The West Toll Gate Creek trail crossing on Yale Ave needs some serious safety upgrades, and Yale itself could use a road diet by getting rid of a continuous through lane in each direction, possibly by turning the curb lane into a bus only lane with personal vehicles only allowed to enter right before a right turn, or at the more extreme end by eliminating the curb lane altogether to create a verge buffered bicycle track and sidewalk. Pictured with bus lane on westbound Yale & verge buffered cycle track on eastbound Yale.

OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the Visualize Phase or Milestone 3, conducted April 1-May 2, 2025. The engagement period was extended by one week to allow community members more time to provide feedback. The Visualize Phase involved extensive public outreach to gather feedback on four visionary networks (Transit, Bikeway, Sidewalk, and Streets) and 10 investment categories (Complete Streets, Street Capacity Improvements, Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, High-Capacity Transit, Pedestrian Improvements, Bikeways & Trails, Traffic Technology, Streetscape Enhancements, and Infrastructure Maintenance). In this phase, community members shared whether they supported or opposed the visionary networks and how they would disperse limited funding across the investment categories. This phase provided the planning team more clarity on how the community wants Aurora to prioritize its transportation investment in the future. Their input informs the final stage of the plan including project prioritization, policies and programs, and implementation.

ENGAGEMENT OVERVIEW

A variety of engagement tactics were used to gather feedback from the Aurora community on proposed visionary networks and investment categories. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers

TOUCHPOINTS	ONLINE VISITS	ACTIVELY ENGAGED
*366K+	*2.2K+	1.6K+

**The figure of 366,000+ touchpoints indicate the cumulative number of interactions or exposure to the project. This is a broader measure compared to the 1,400+ online visits, which represent more direct engagement with the project's online presence.*

Engagement Activities

Throughout Milestone #3 the project team used several different activities during the community pop-up events, roundtable table discussion, Engage Aurora Live, the virtual public meeting, and online open

house to gather input from the public. Some variation was made to fit the meeting context which is noted in the summaries below.

Comment Map

Participants were able to provide detailed comments on the visionary network maps both in-person and virtually. At Engage Aurora Live and the Roundtable Discussion, roll plots of each network were available to make comments. The online meeting featured a comment map for each visionary network to collect input.

How would you invest $100 across the investment categories?

In Person: Participants were given 10 jellybeans to represent a total of $100 and asked to distribute them however they liked across 10 investment categories. Each category included a description of the types of investments being considered. The purpose of this exercise was to better understand how much the community wants funds allocated for transportation projects.

- Complete Streets
- Street Capacity Improvements
- Transit Service Expansion
- Transit Amenity Upgrades & Personal Safety
- High-Capacity Transit
- Pedestrian Improvements
- Bikeways & Trails
- Traffic Technology
- Streetscape Enhancements
- Infrastructure Maintenance

Online: Participants were asked how much they would invest across the 10 investment categories in increments of $5 using a sliding scale.

Investment category descriptions and full activity instructions can be found in Appendix B: Jellybean Funding Activity.

Level of Support for the Visionary Networks

In Person Events: Participants were asked whether they believed the visionary network would improve their quality of life. They could answer “yes” or “no” using sticky dots.

Online Meeting: Participants were asked to rank each visionary network (Transit, Bikeway, Sidewalk, and Streets) on a scale from “Strongly Oppose” to “Strongly Support,” with options of “Oppose,” “Neutral,” and “Support” between the two end options.

Engagement Events

ROUNDTABLE DISCUSSION | APRIL 22, 6:30-8:30 P.M

A roundtable discussion was held on April 22, from 6:30-8:30 p.m. All City of Aurora board and commission members were invited to attend, as was the general public. There were **30 people** in attendance. Attendees were asked to RSVP online and were provided dinner. The roundtable began with a presentation from the project team, followed by breakout sessions focused on each visionary network. Attendees learned more about each network from a project team member and were encouraged to provide location-specific comments on each network map.

ENGAGE AURORA LIVE!

On Saturday, April 19, the City of Aurora hosted Engage Aurora Live!, a family friendly event designed to gather feedback on multiple critical projects impacting Aurora's future, with food and activities available for attendees. As part of this citywide open house, Connecting Aurora gathered feedback from many of the **150 to 200 event attendees** on the visionary networks and investment categories

VIRTUAL TOWN HALL

A virtual town hall was hosted on Zoom the evening of Wednesday, April 9, from 5:30-7:30 p.m. **97 community members** attended. The town hall was open to the public and attendees could register via the Engage Aurora website. Throughout a presentation from the project team, attendees were asked to answer polling questions identical to the survey questions to gather their thoughts on the visionary networks and investment categories. Following the presentations, attendees were invited to ask questions and provide feedback via the Q&A function or verbally.

ONLINE OPEN HOUSE

A self-guided online open house was hosted on ArcGIS StoryMaps, linked via the Engage Aurora website (engageaurora.org/ConnectingAurora). Community members could learn more about the project, make comments directly on the visionary network maps, and take the survey. The survey gathered feedback to gauge support for the visionary networks and how community members would like to see limited funding dispersed across potential investment categories. The data below represents engagement between April 1-May 2.

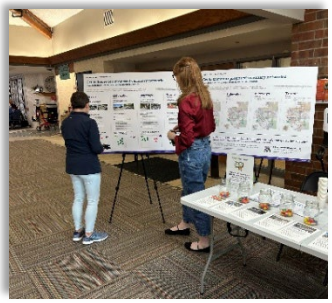
- Total visits: 2,292
- Survey responses: 203
- StoryMap comments: 126

A complete record of map comments can be found in Appendix C: Map Comments.

ONLINE COMMUNITY SURVEY

The StoryMap included a survey to gather feedback from community members after they explored the different network and improvement areas. The survey gauged support for the four visionary networks and 10 potential investment categories and received **203 responses**. The survey was available in English and Spanish and other languages upon request. A copy of the complete survey can be found in Appendix B: Survey.

COMMUNITY POP-UP EVENTS



Pop-up events were held at various locations across Aurora to gather feedback on the visionary networks and investment categories. Events were spread across Aurora to reach as many populations and communities as possible. **200 community members** were engaged over the course of these pop-up events.

Pop Up Event Locations, Dates, Times, and Participation

AURORA CENTER FOR ACTIVE ADULTS	STANLEY MARKETPLACE FIRST FRIDAY	HOFFMAN HEIGHTS LIBRARY	SOUTHEAST RECREATION CENTER	MISSION VIEJO LIBRARY
Wednesday, April 2, 10 a.m.-2 p.m.	Friday, April 4, 6-9 p.m.	Saturday, April 5, 12-3 p.m.	Tuesday, April 8, 8 a.m.-12 p.m.	Wednesday, April 9, 2-4 p.m.

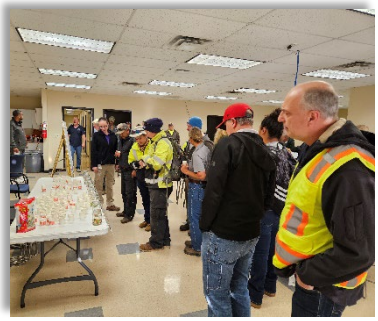
9 PARTICIPANTS	**10 PARTICIPANTS**	**17 PARTICIPANTS**	**56 PARTICIPANTS**	**10 PARTICIPANTS**

STAKEHOLDER GROUP

A virtual meeting with the Connecting Aurora Stakeholder Group was held the afternoon of March 26. The meeting was attended by **13 stakeholders** and began with a review of public engagement thus far. Stakeholders were then asked to review the four visionary networks and provide feedback on each via verbal discussion or the chat function. Because this meeting took place prior to the engagement period, the stakeholders were asked to promote the Milestone 3 events, online StoryMap, and survey to their communities.

CITY OF AURORA EMPLOYEE ENGAGEMENT



Presentations on Milestone 3 were given to employees across the city at maintenance facilities and during an employee town hall. Coffee and donuts were provided, and attendees were asked to provide feedback on the visionary networks and investment categories. About **133 employees** participated.

City Staff Event Locations, Dates, Times, and Participation

EMPLOYEE TOWNHALL	BLOCK CAPTAINS	CENTRAL PROS	CENTRAL HEAVY MAINTENANCE	SEAM
Tuesday, April 8	Wednesday, April 16	Thursday, April 17	Friday, April 18	Tuesday, April 22
~50 EMPLOYEES	**~8 EMPLOYEES**	**~35 EMPLOYEES**	**~15 EMPLOYEES**	**~25 EMPLOYEES**

FOCUS GROUPS & SPECIAL PRESENTATIONS

Throughout the engagement period, specialty presentations and focus groups were held for two organizations in Aurora: Project Worthmore and Developmental Pathways. The Connecting Aurora project team presented to four English learning classes of different levels, adjusting the content to fit the needs of each class. Attendees participated in a simplified version of the investment categories jellybean funding activity. The project team also hosted several focus groups with Developmental Pathways, a local organization that provides support and services to individuals with disabilities and their families. Attendees of these focus groups were guided to the online survey following the meetings.

PROMOTION

A variety of promotional materials were used throughout Milestone 3 to inform the community about the newest phase of Connecting Aurora and how to provide feedback. For details and examples of materials used, go to Appendix A: Milestone 3 Promotional Materials.

News Releases and Media Coverage

Three news releases were distributed to a comprehensive local media list, including media targeting non-English speakers. As a result, there were four news stories. For a list of news stories, go to Appendix A: Media Coverage.

Social Media

Extensive social media efforts were undertaken to promote the project and to engage the public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Additionally, Facebook posts were boosted for the most common languages: English and Spanish. Each boosted post was $50, for a total of $100 spent on social media ads.

- Total posts (including ads): 31
- Total reach/impressions (views/shown): 93K+
- Engagement (clicks/likes/comments): 1.3k

Newsletters

Several city and community newsletters distributed Milestone 3 project information, reaching over 182k community members.

- Engage Aurora emails: 3 emails were sent to the 181 Connecting Aurora project subscribers on Engage Aurora, one of which was sent to all 2,388 registered participants on Engage Aurora.
  - City of Aurora Employee Newsletter (5,001)
  - This is Aurora City Newsletter (+7,000 subscribers, 7 articles and/or mentions)
  - News Aurora (68,000 recipients)
  - Aurora TV Weekly News Program Newsletter (+1,500 subscribers, 2 stories)
  - Road Construction Roundup (490 subscribers)
- Aurora Library Branch Newsletters: Information on Connecting Aurora Milestone 3's online feedback opportunities were included in branch newsletters across the city, reaching a total of 97,470 subscribers.
  - Central: 60,683 subscribers
  - Chambers Plaza: 512 subscribers
  - Hoffman Heights: 4,275 subscribers

  - Tallyn's Reach: 16,203 subscribers

Website Traffic

Below is a breakdown of traffic on EngageAurora.org throughout the engagement period. Visitors to the website were directed to follow a link to the interactive Milestone 3 StoryMap, where they could provide comments on a map of Aurora, learn more about the networks and investment categories, and take the survey to provide feedback.

Bill Insert

An article was included in two News Aurora issues, which was distributed in water bills in March. Approximately **80K homes** received each bill insert.

Bus Benches

Bus bench ads were placed at three locations throughout Aurora:

- 14875 E. Colfax Ave. & Altura
- 17175 E. Smoky Hill Road & Wagon Trail Parkway
- 00280 S. Chambers Road & Alameda

Photos of bus bench ads can be found in Appendix A: Bus Bench Ads.

Outreach

Outreach was conducted with various community stakeholders as described in the following sections.

STAKEHOLDER GROUP

One email was sent to the Stakeholder Group with promotional materials for Milestone 3 engagement.

STAKEHOLDER EMAILS

The project team sent emails to many stakeholders with the project information and ask them to share with members of their organizations.

  - Homeowner's Associations/Neighborhood Leader Newsletter: +1,150 subscribers
- Aurora Boards and Commissions
  - Department of Pediatrics, University of Colorado School of Medicine/Children's Hospital Colorado
  - Aurora Chamber of Commerce
- Project Worthmore
- Developmental Pathways
- Be Well
- Havana BID/On Havana Street
- Village Exchange Center
- Aurora Public Schools
- Community College of Aurora
- RISE Colorado
- Bicycle Aurora
- Painted Prairie Neighborhood
- Aurora Highlands Neighborhood

FEEDBACK RESULTS

The results described below are a compilation of the various feedback tools. Sources for each chart or fact are indicated as well as the number of respondents.

Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

Who We Heard From

- A variety of people who live, work, commute through, or visit Aurora.
- Individuals of all ages, from students to seniors.
- Individuals and families of varying backgrounds.

DEMOGRAPHIC INFORMATION

Demographic information was collected by online survey participants. A breakdown of the demographics is in the following charts. Entering demographic information was optional.

Wards

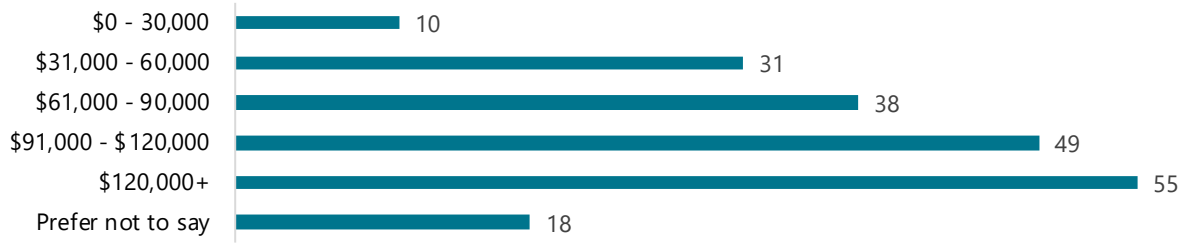
One hundred ninety-five of the 203 survey takers provided information about which Ward they live in. The engagement by Ward was generally evenly split; however, a large share of participants did not know their Ward or were not a resident of Aurora.

Online Survey Participants by Ward

Income

Two hundred and one of the 203 surveys takers provided information about their income. Most participants earn more than $120,000 per year.

Online Survey Participants by Income Level



Area Median Income

Area Median Income was calculated based on household size compared to size. Sixty percent of AMI is widely considered as poverty level. The results in the chart below are approximate as income was presented in a range. The ranges often fell in between the 60% AMI, in which case households were assumed to be above 60% AMI. AMI was calculated for 183 of the 203 survey responses.

Online Survey Participants by Approximate Area Median Income

Gender

Two hundred and one of the 203 survey takers provided information about their gender.

Online Survey Participants by Gender

Feedback by Demographic

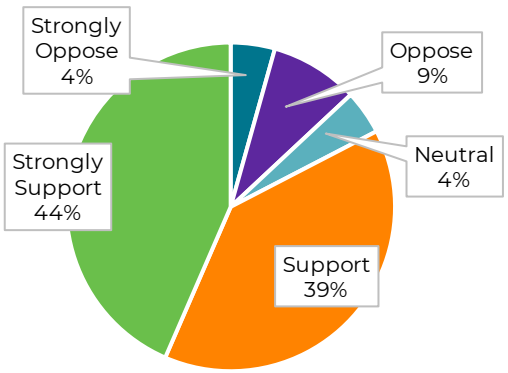
FEEDBACK BY WARDS

The online survey asked for information about which Wards participants lived in. The data in the following charts shows responses to the five survey questions based on Ward. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate $100 worth of funding to the investment categories they wanted to see most prioritized in the future. The investment Categories graphs show the average amount of money allocated to each category based on Ward.

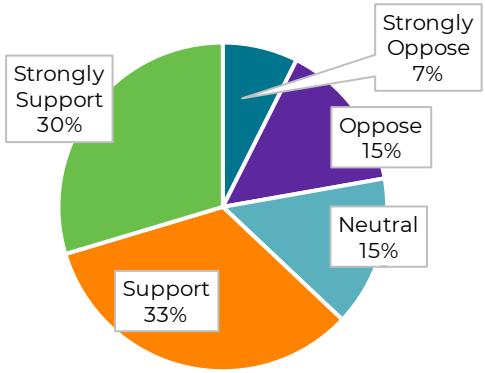
Bikeway Network

Do you support the visionary bikeway network?

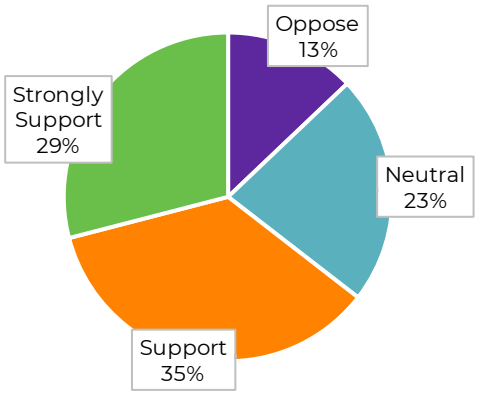
Ward I - Bikeway Network



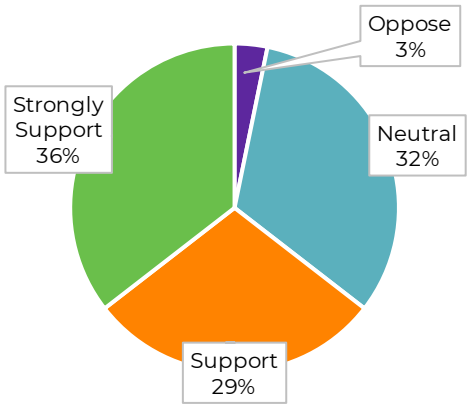
Ward II - Bikeway Network



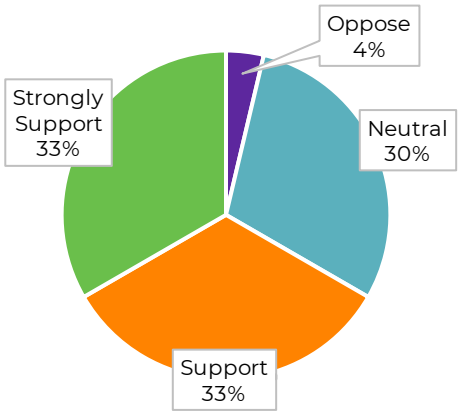
Ward III - Bikeway Network



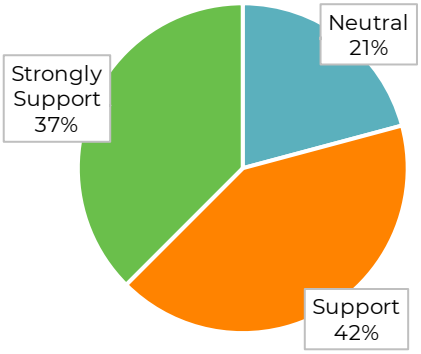
Ward IV - Bikeway Network



Ward V - Bikeway Network



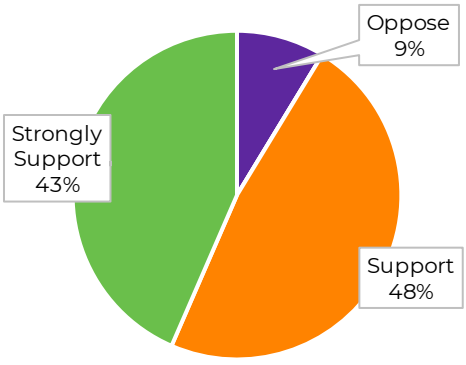
Ward VI - Bikeway Network



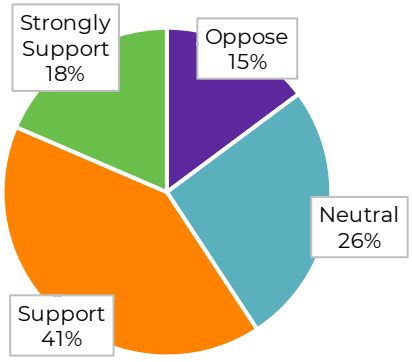
Transit Network

Do you support the visionary transit network?

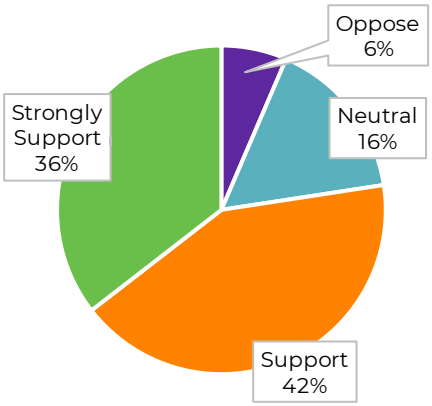
Ward I - Transit Network



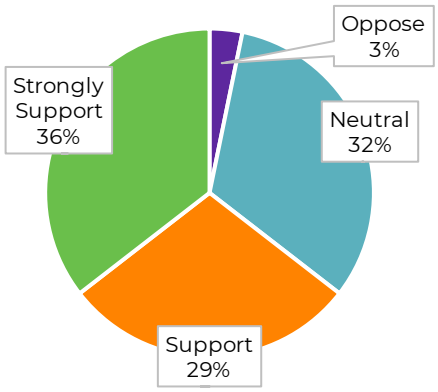
Ward II- Transit Network



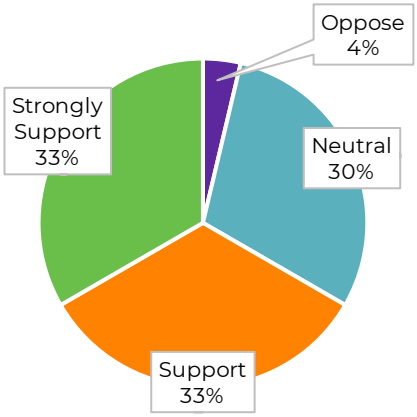
Ward III - Transit Network



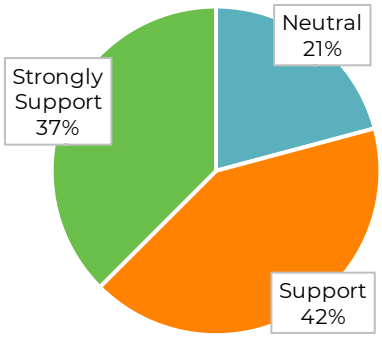
Ward IV - Transit Network



Ward V - Transit Network



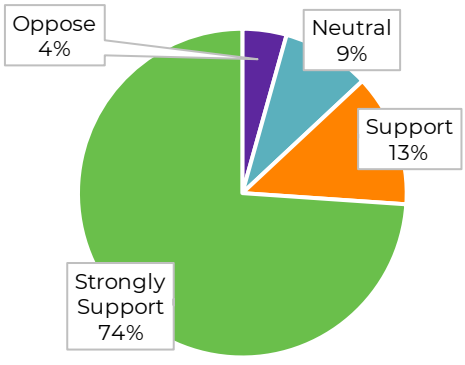
Ward VI - Transit Network



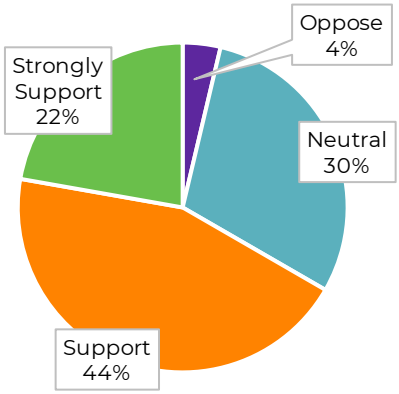
Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?

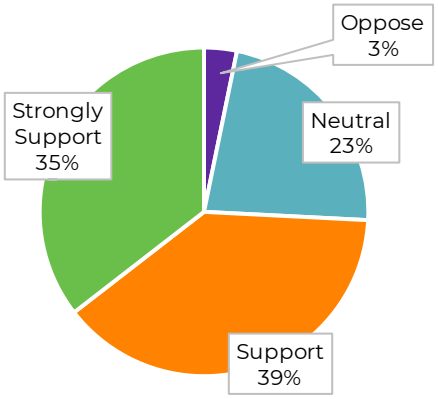
Ward I - Sidewalk Improvements



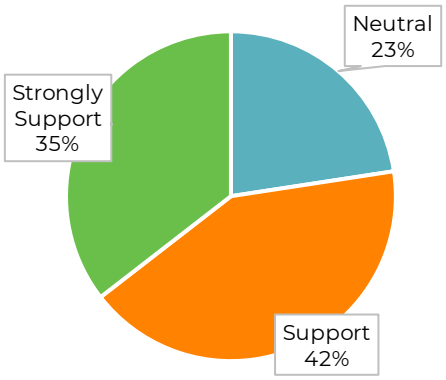
Ward II - Sidewalk Improvements



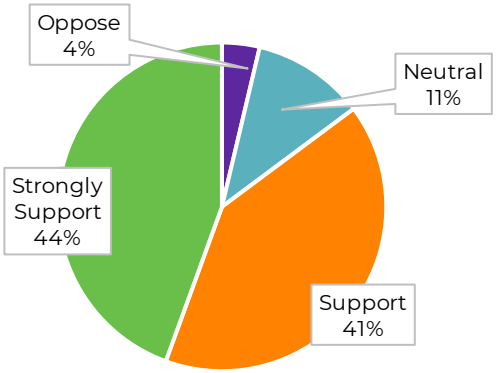
Ward III - Sidewalk Improvements



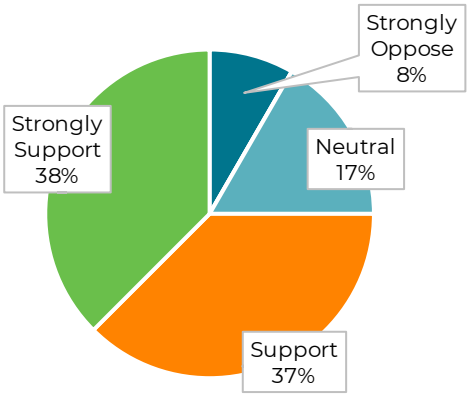
Ward IV - Sidewalk Improvements



Ward V - Sidewalk Improvements



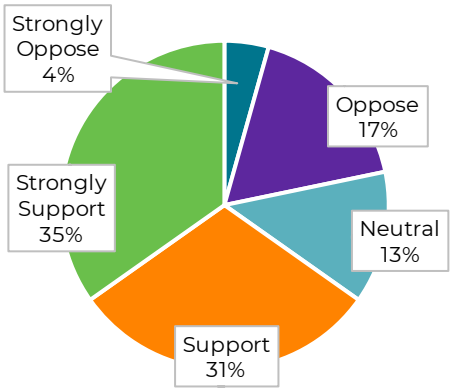
Ward VI - Sidewalk Improvements



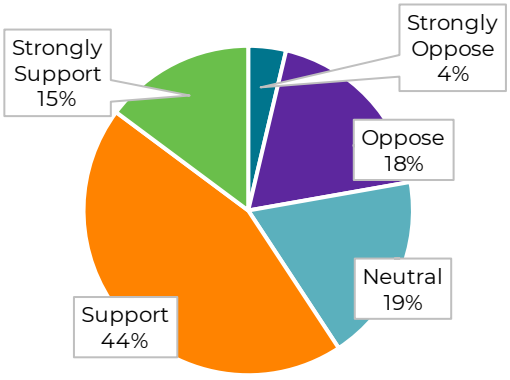
Street Improvement Areas

Do you support the street improvements areas?

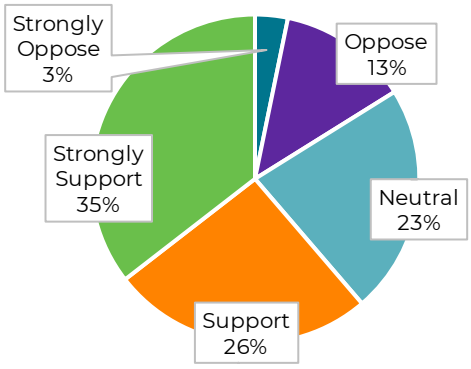
Ward I - Street Improvements



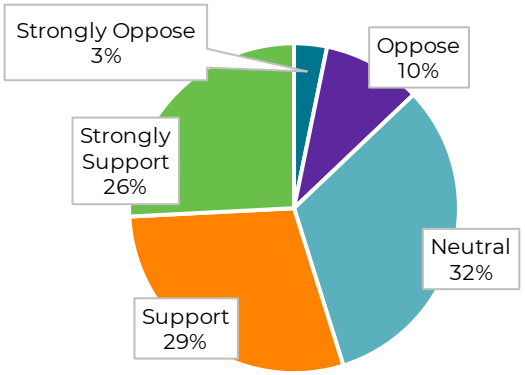
Ward II - Street Imrpovements



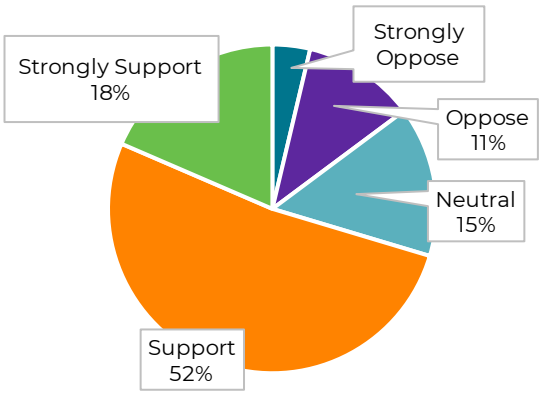
Ward III - Street Improvements



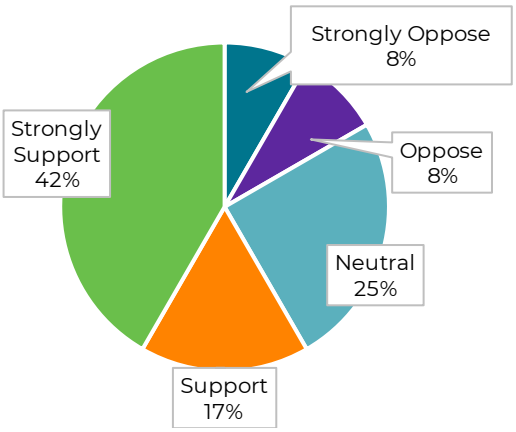
Ward IV - Street Improvements



Ward V - Street Improvements



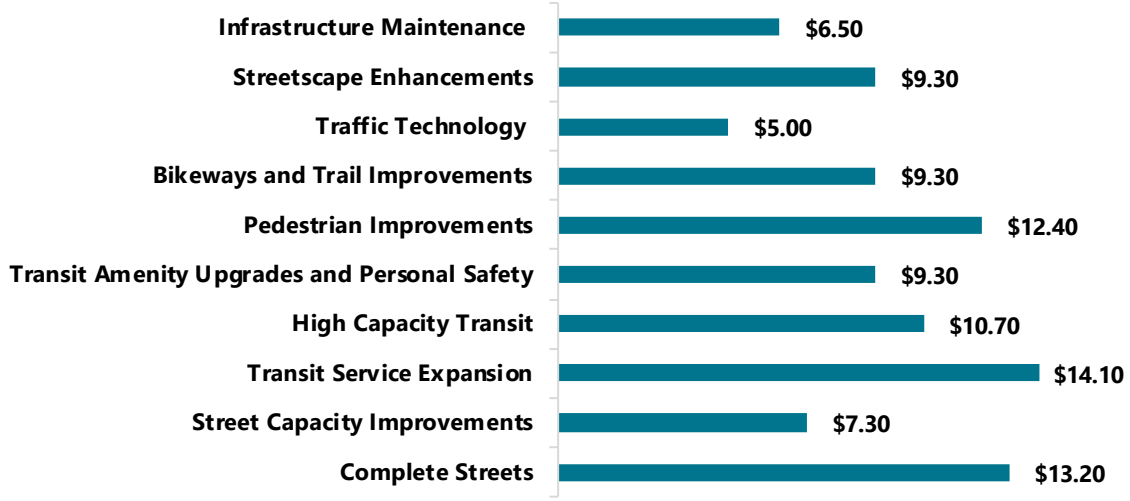
Ward VI - Street Improvements



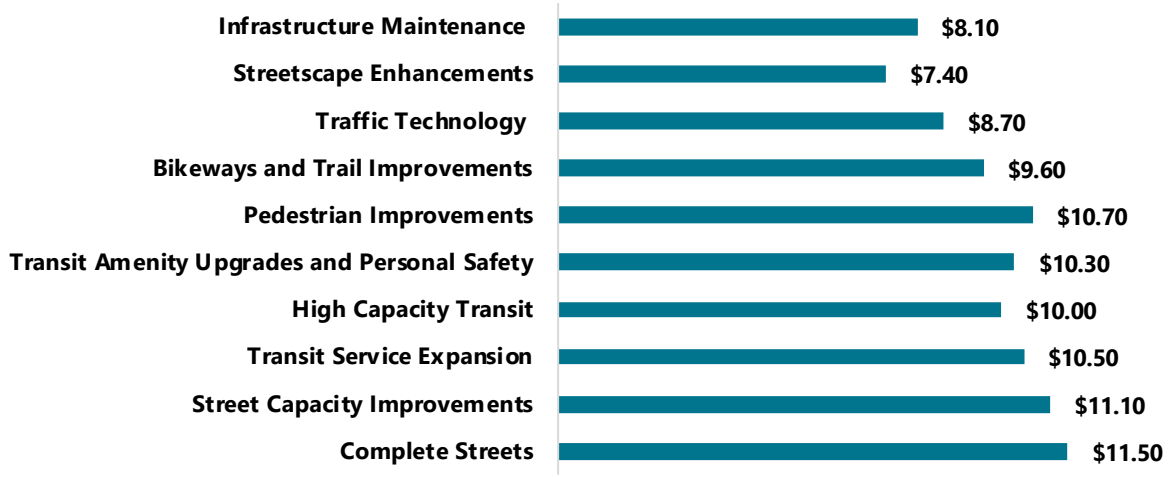
Investment Categories

The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."

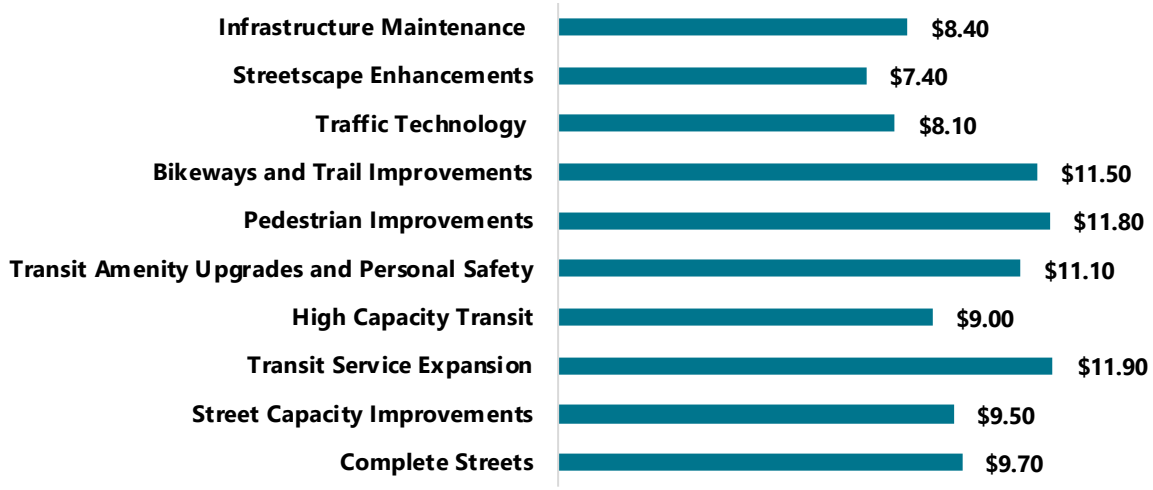
Ward I - Investment Categories



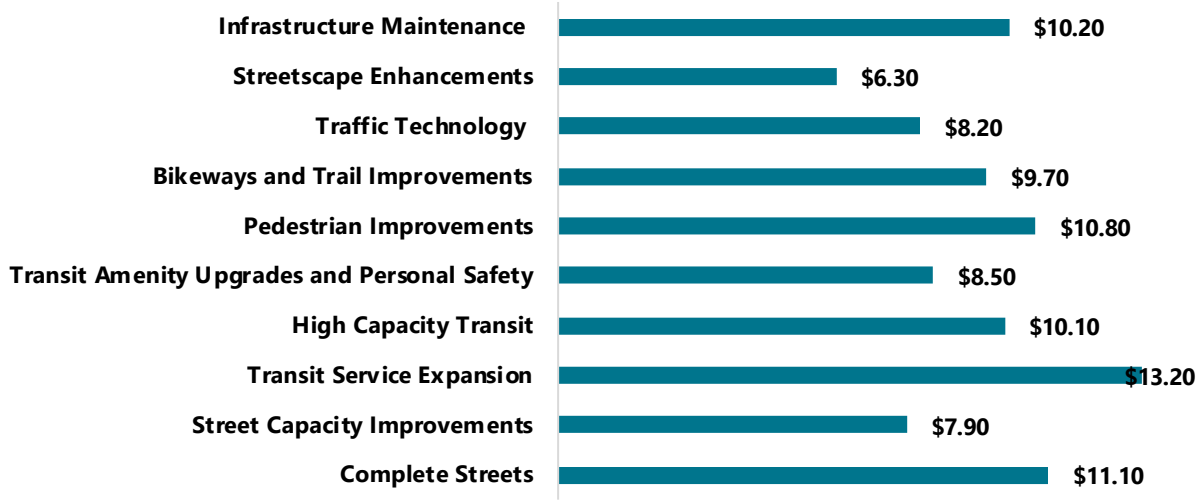
Ward II - Investment Categories



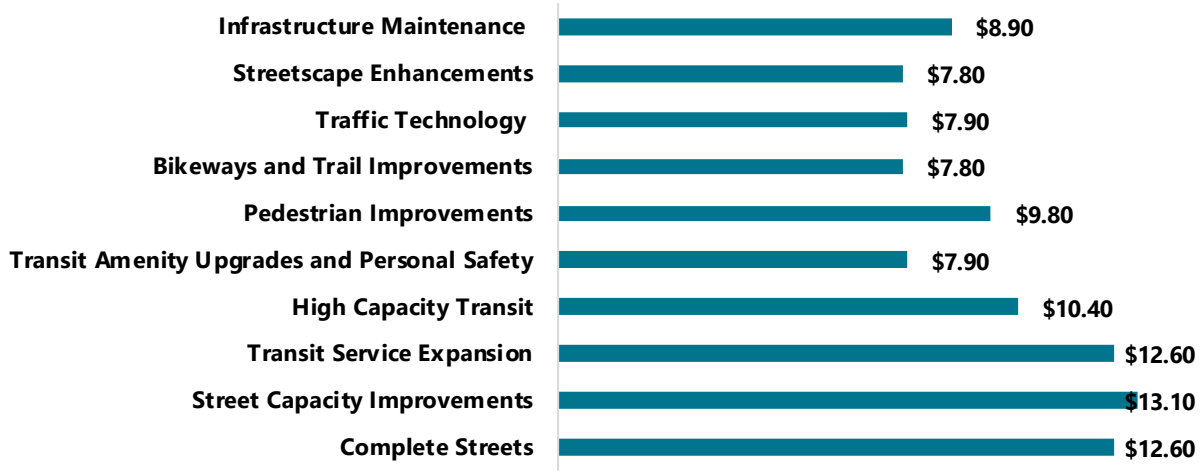
Ward III - Investment Categories



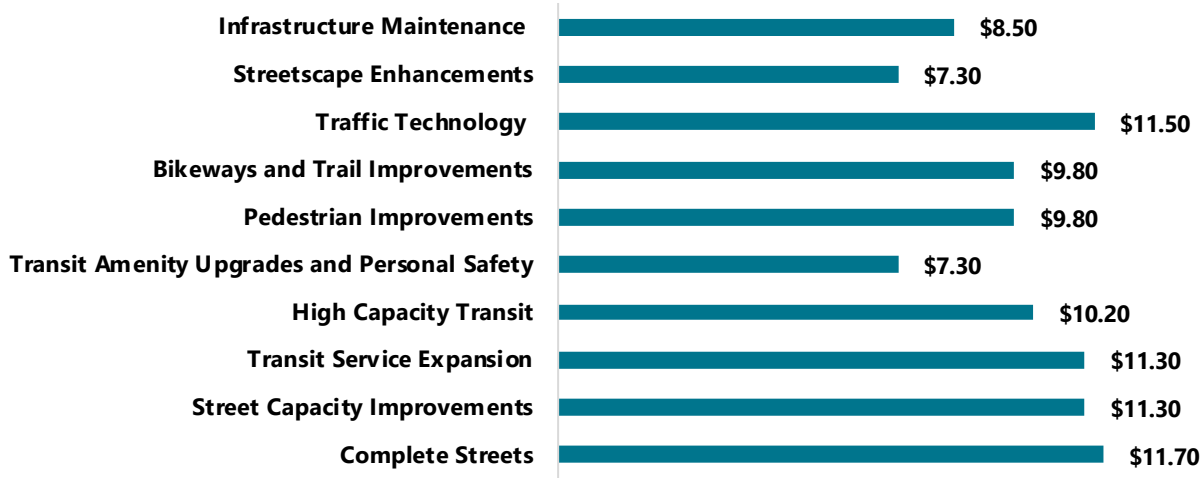
Ward IV - Investment Categories



Ward V - Investment Categories



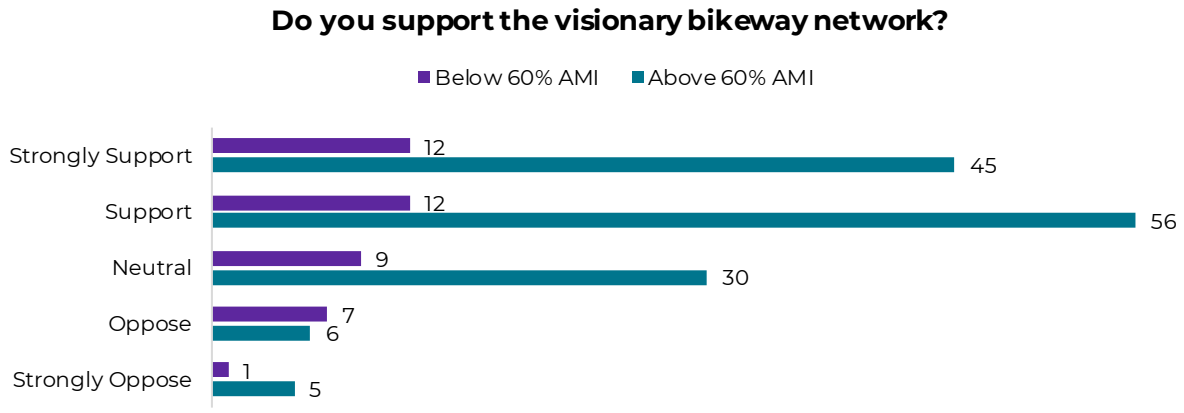
Ward VI - Investment Categories



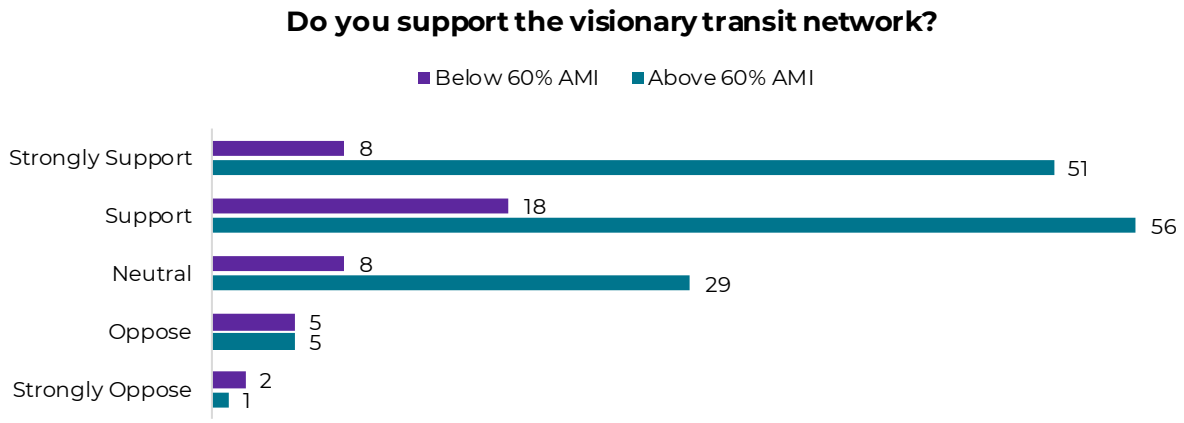
FEEDBACK BY POVERTY LEVEL

The online survey asked for information on income level and number of people per household. Based on these two questions, respondents were grouped into being either above or below 60% of the area median income. The data in the following charts show responses to the five survey questions based on poverty level. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate funding to the investment categories they wanted to see most prioritized in the future.

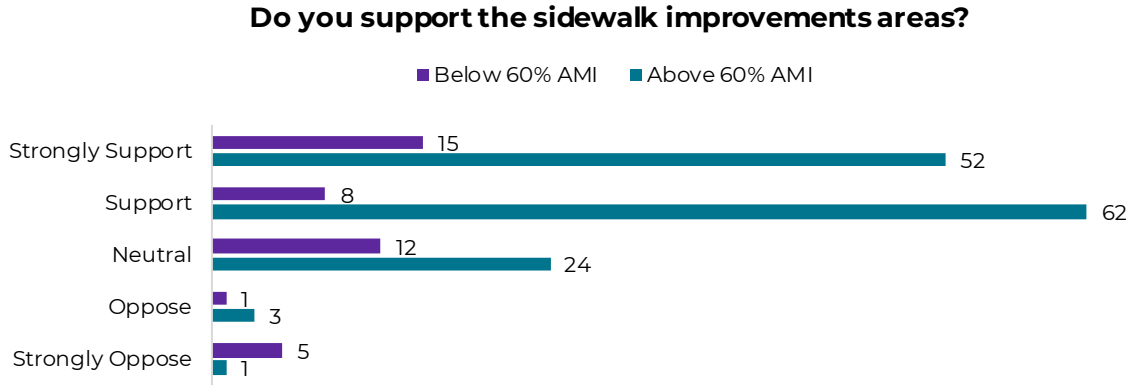
Bikeway Network



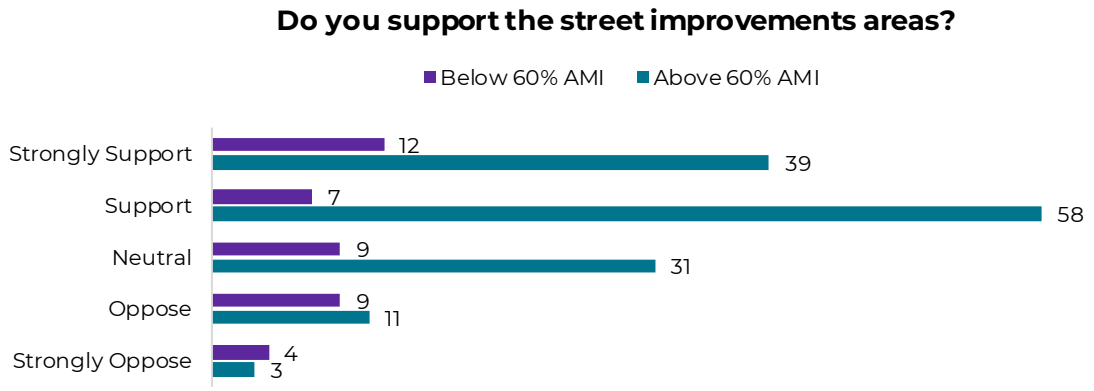
Transit Network



Sidewalk Improvement Areas

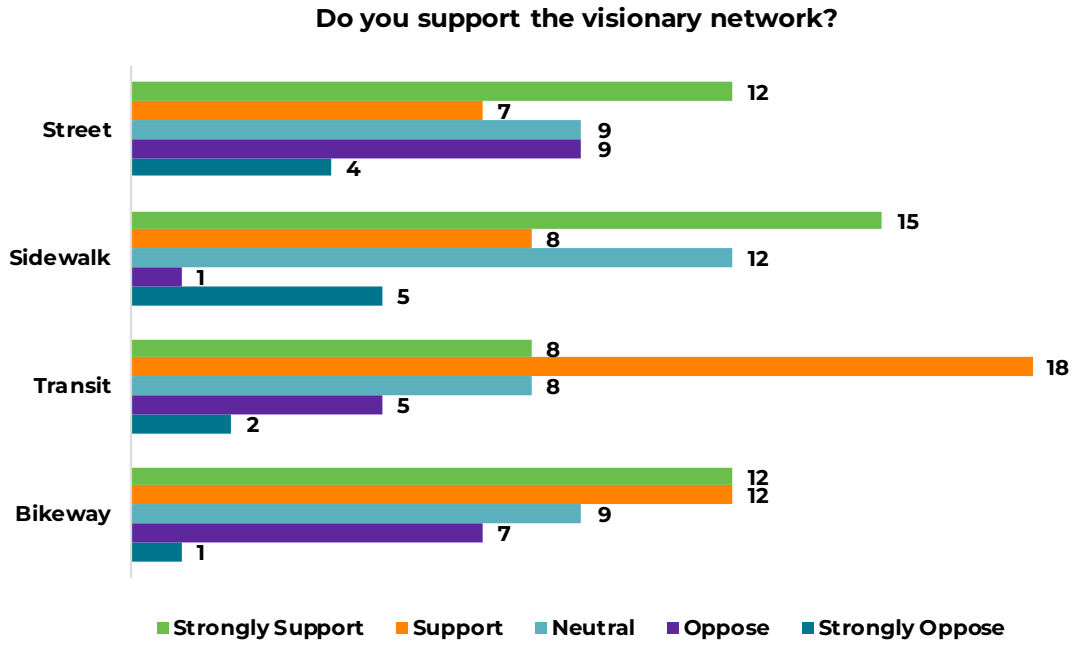


Street Improvement Areas



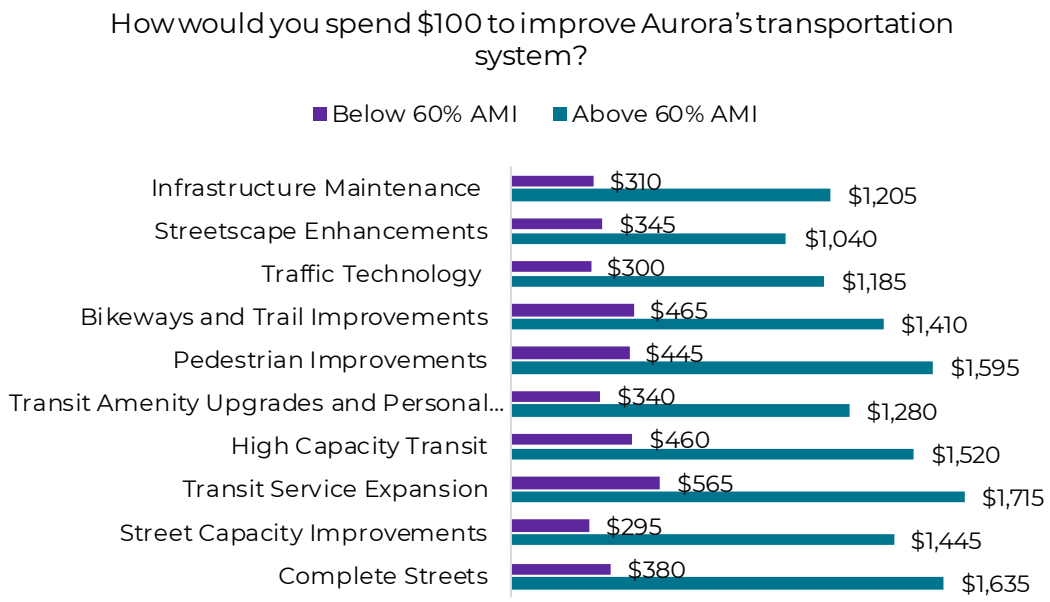
Visionary Networks – Below 60% AMI

In a closer look at the data above, participants below 60% AMI showed general support for each network, with the most support shown for the transit and bikeway networks and the most opposition shown for the street and sidewalk networks.



Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



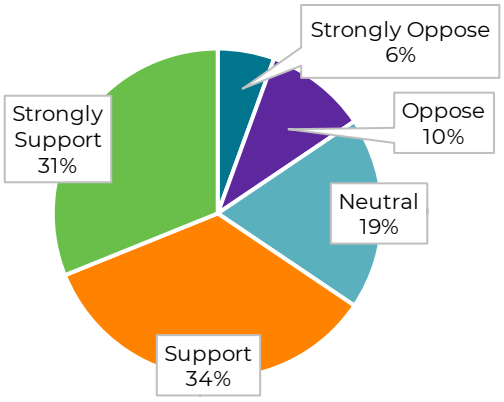
FEEDBACK BY GENDER

The online survey asked participants to signify their gender. The data in the following charts show responses to the five survey questions based on gender. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate funding to the investment categories they wanted to see most prioritized in the future. The investment Categories graphs show the average amount of money allocated to each category based on gender.

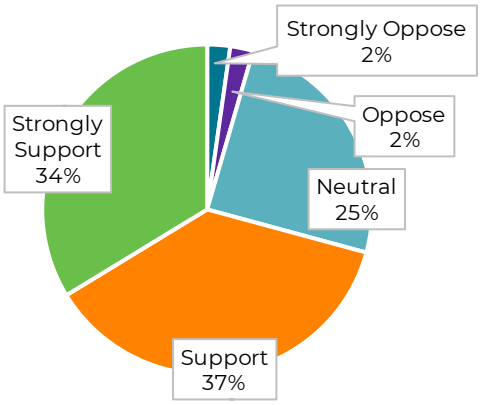
Bikeway Network

Do you support the visionary bikeway network?

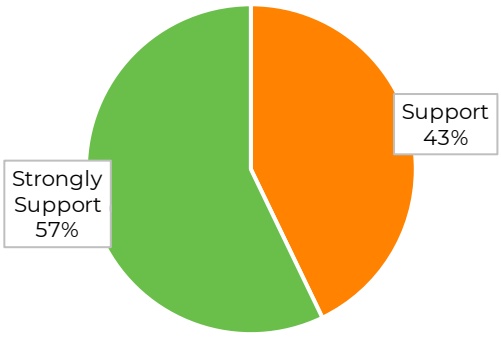
Female - Bikeway Network



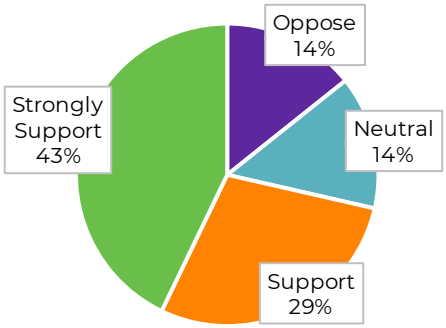
Male - Bikeway Network



Non-Binary -Bikeway Network



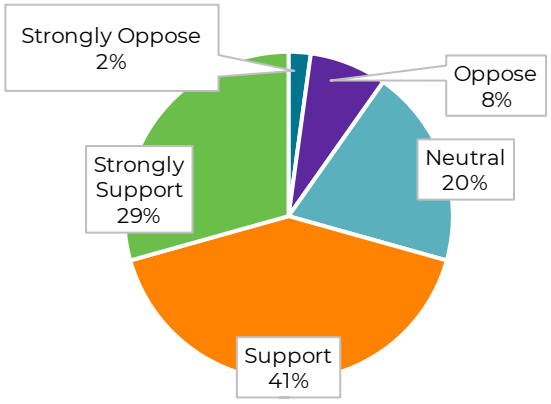
Prefer to Self-Describe/Prefer Not to Say - Bikeway Network



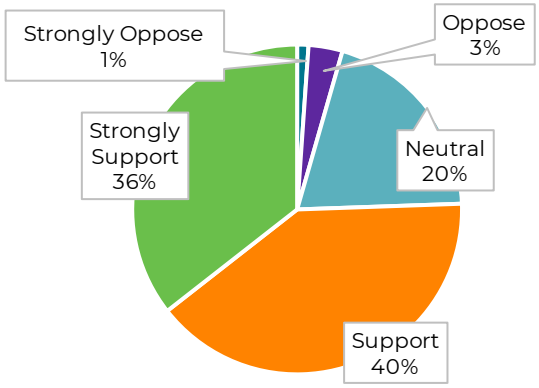
Transit Network

Do you support the visionary transit network?

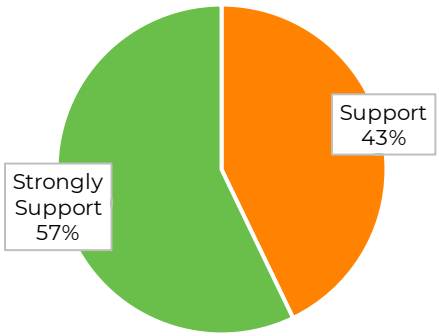
Female - Transit Network



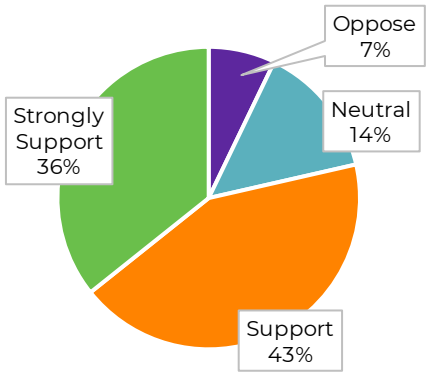
Male - Transit Network



Non-Binary - Transit Network



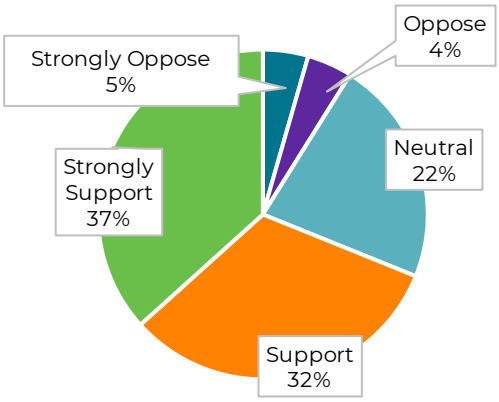
Prefer to Self-Describe/Prefer Not to Say - Transit Network



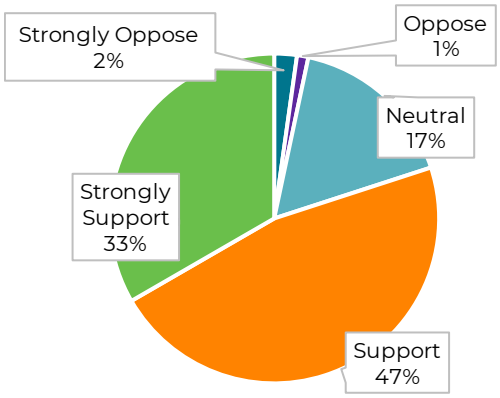
Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?

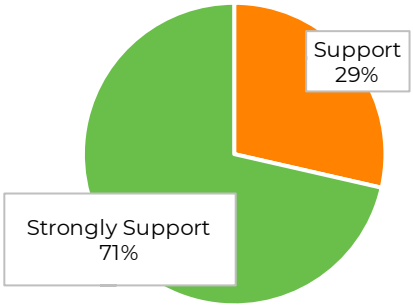
Female - Sidewalk Network



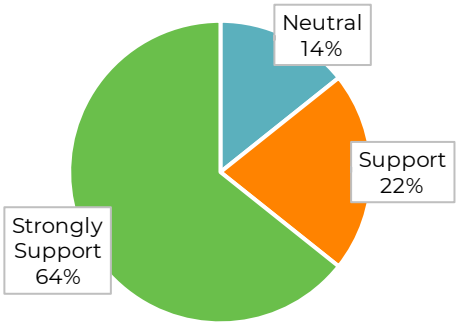
Male - Sidewalk Network



Non-Binary - Sidewalk Network



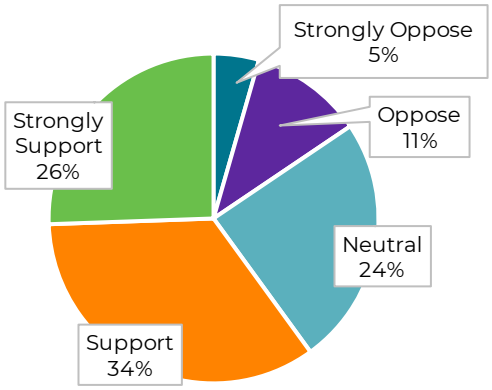
Prefer to Self-Describe/Prefer Not to Say - Sidewalk Network



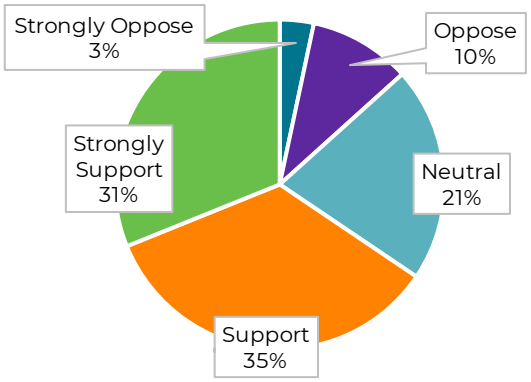
Street Improvement Areas

Do you support the street improvements areas?

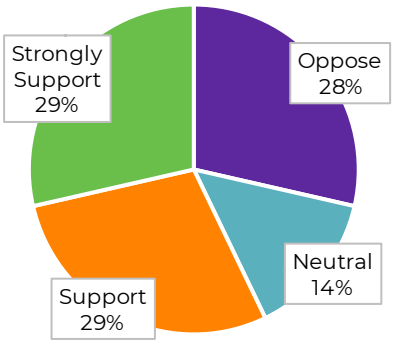
Female - Street Network



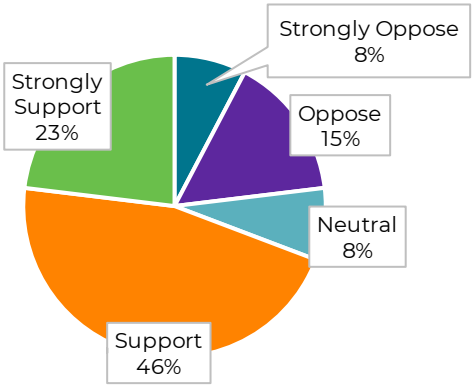
Male - Street Network



Non-Binary - Street Network



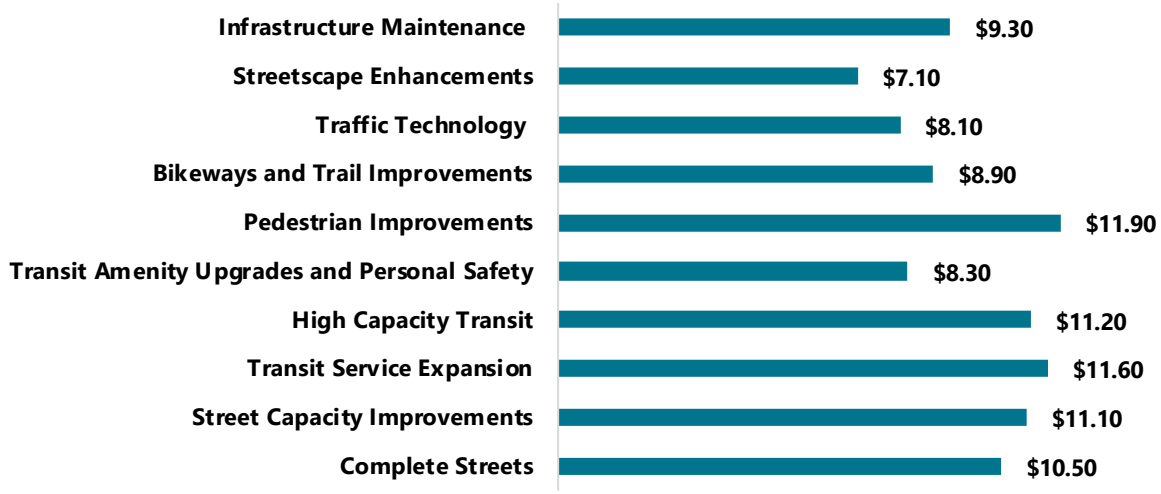
Prefer to Self-Describe/Prefer Not to Say - Street Network



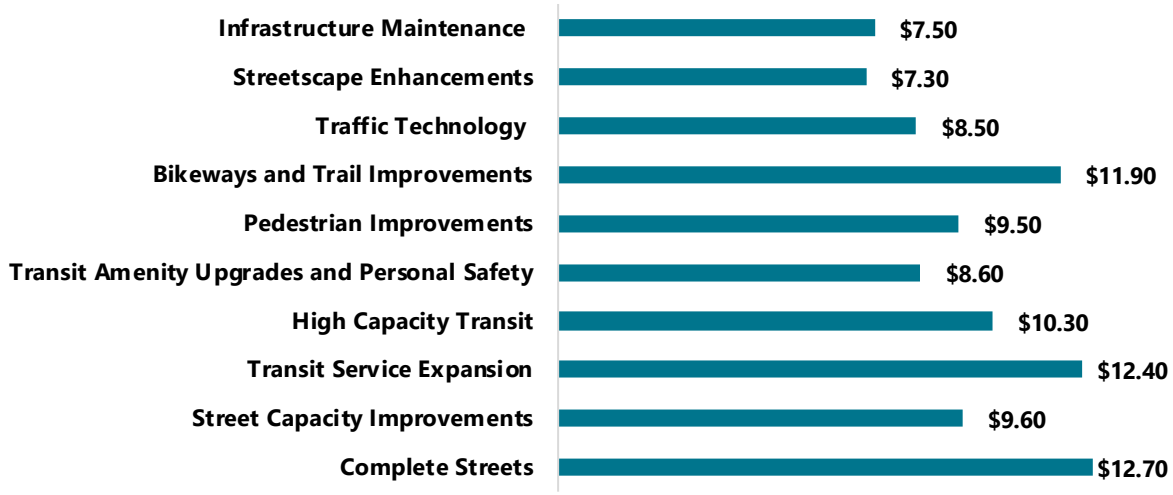
Investment Categories

The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."

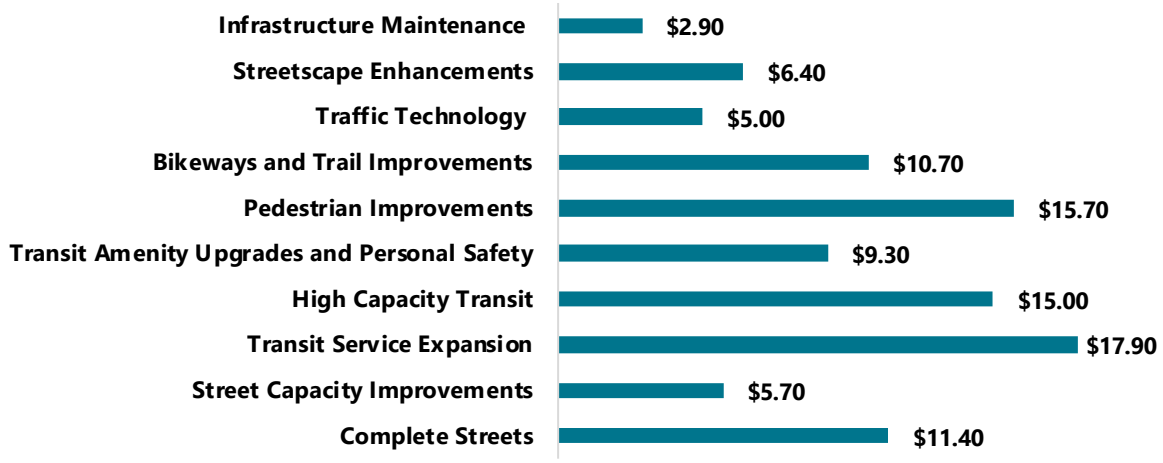
Female - Investment Categories



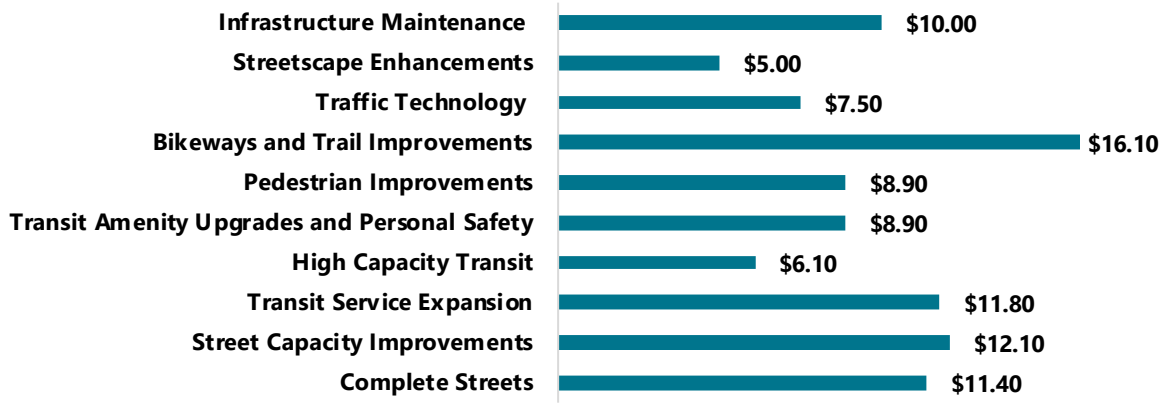
Male - Investment Categories



Non-Binary - Investment Categories



Prefer to Self Describe/Prefer Not to Say - Investment Categories



Online Feedback

ONLINE SURVEY RESPONSES OVERALL

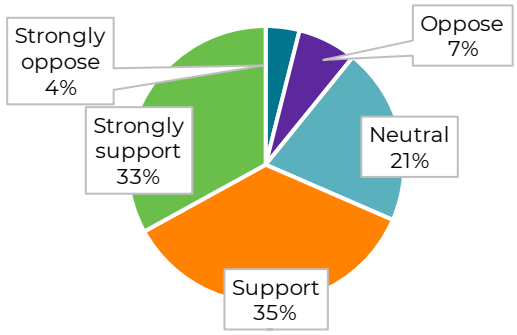
Throughout the course of Milestone 3, community members were invited to take a survey to gauge public opinion on the visionary networks and investment categories. The survey was available online on the StoryMap site via Engage Aurora. The survey consisted of three demographic questions, four visionary network questions, and one question that asked participants to allocate funding to the different investment categories. The fifth graph shows the average amount of funding allocated to each investment category.

As seen in the breakdown of each question below, the majority of participants either "support" or "strongly support" all four visionary networks, with the most support for the Sidewalk and Transit networks by a narrow margin.

The top three highest funded investment categories by participants were **Transit Service Expansion, Complete Streets, Bikeways & Trails, with Pedestrian Improvements** coming in close as the fourth highest funded category.

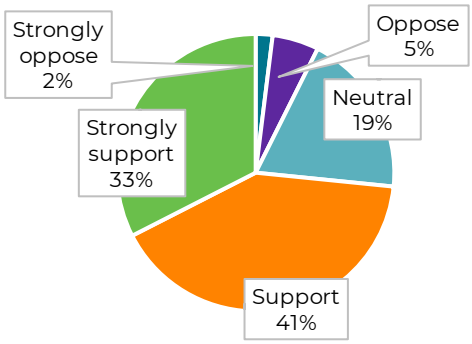
Bikeway Network

Do you support the visionary bikeway network?



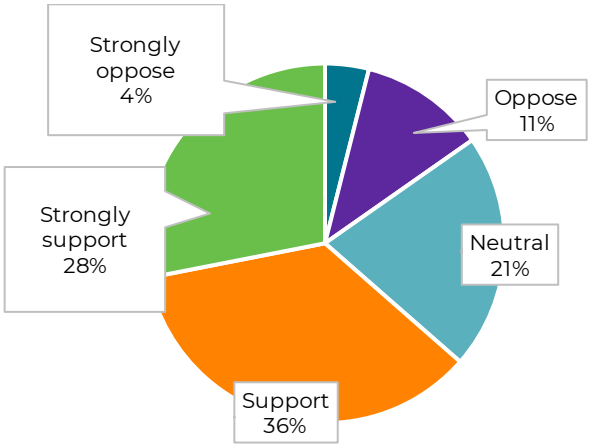
Transit Network

Do you support the visionary transit network?



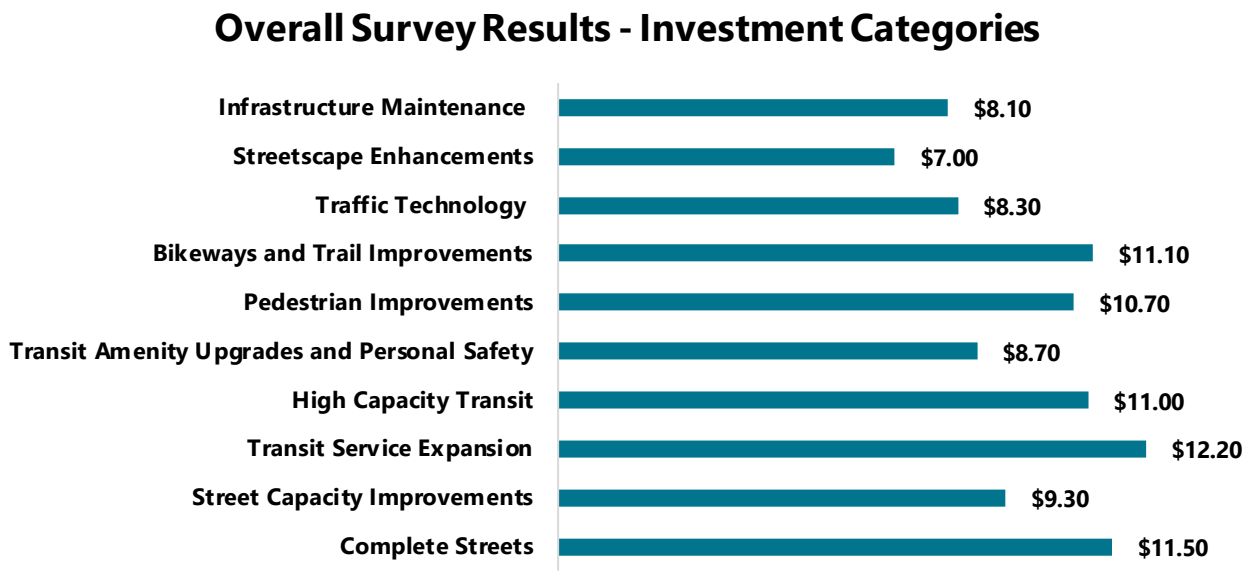
Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?



Investment Categories

The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."



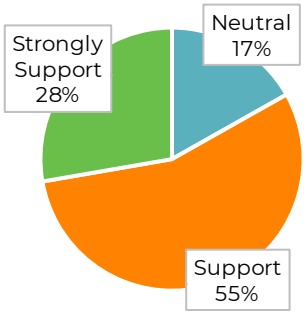
VIRTUAL TOWN HALL

- Wednesday, April 9, 2025
- Zoom
- 97 attendees
- Top 3 Investment Categories:
    1. Infrastructure Maintenance
    2. Complete Streets
    3. Pedestrian Improvements

Throughout the virtual town hall, attendees were asked to participate in four polls. These polling questions were identical to the questions asked in the Milestone 3 survey regarding support for the visionary networks. Attendess were then directed to fill out a brief survey identical to the investment category portion of the Milestone 3 survey. The town hall had a total of 97 attendees, and each poll question averaged around 17 respondents. As seen in the graphs below, most respondents during the virtual town hall showed support for all four visionary networks. The three highest funded investment categories were Infrastructure Maintenance, Complete Streets, and Pedestrian Improvements.

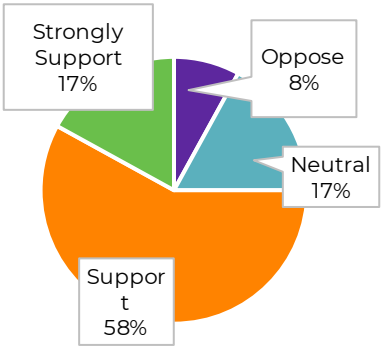
Bikeway Network

Do you support the visionary bikeway network?



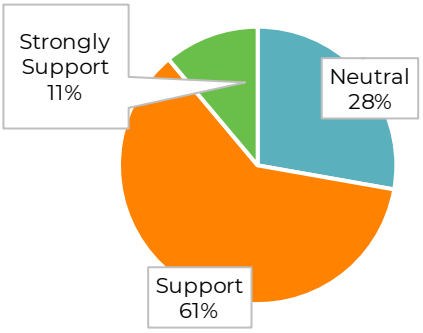
Transit Network

Do you support the visionary transit network?



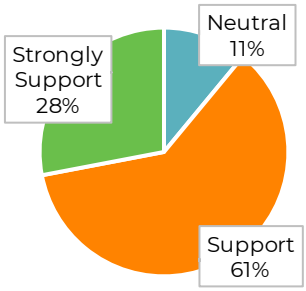
Street Improvement Areas

Do you support the street improvements areas?



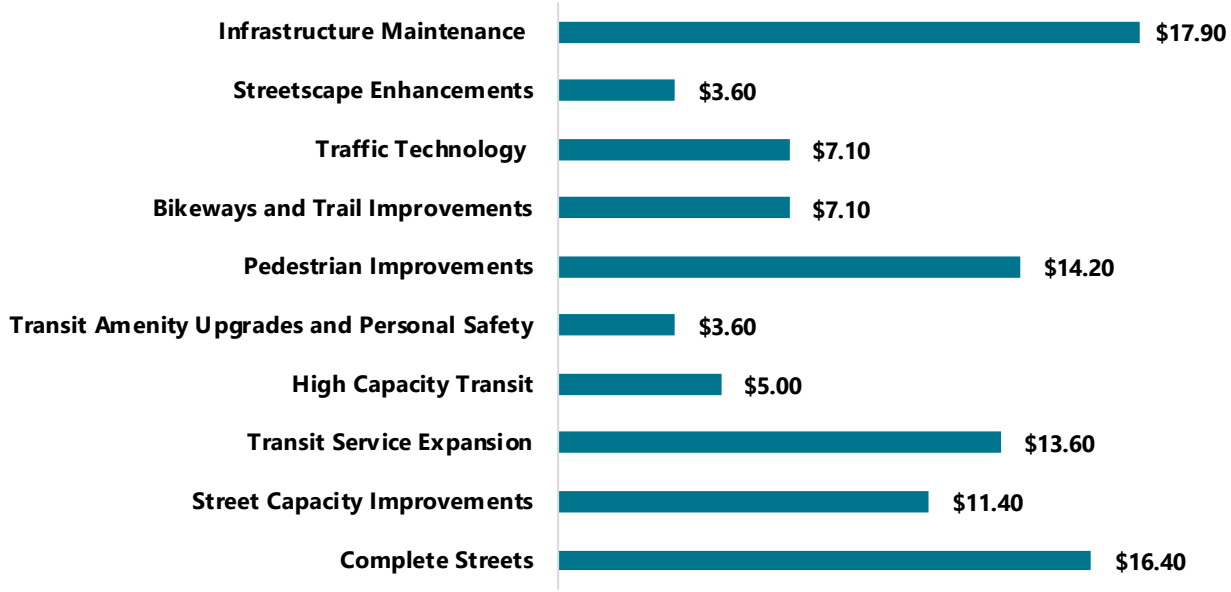
Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?



Investment Categories

The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."



Feedback by Event

ROUNDTABLE DISCUSSION

- Tuesday, April 22, 2025
- Aurora Central Library
- 30 attendees
- Top 3 Investment Categories
    1. Transit Amenity Upgrades & Personal Safety
    2. Complete Streets
    3. Traffic Technology

During the Roundtable Discussion, attendees were asked to provide their feedback on the visionary networks and investment categories through two different activities. Attendees provided feedback on their support or opposition of each visionary network through a dot board activity that prompted them to answer "yes" or "no" as to whether the network would improve their quality of life. They also voted on investment categories by dispersing ten jellybeans across investment category jars to represent how they would spend $100 of funding. Of the 30 attendees, 23 participated in the jellybean activity and 16 participated in the dot activity. The graph below shows the funding totals for each category.

Based on the evening's discussions and the polling results shown below, attendees showed support for all four visionary networks. The top three highest funded investment categories were Transit Amenity Upgrades & Personal Safety, Complete Streets, and Traffic Technology.

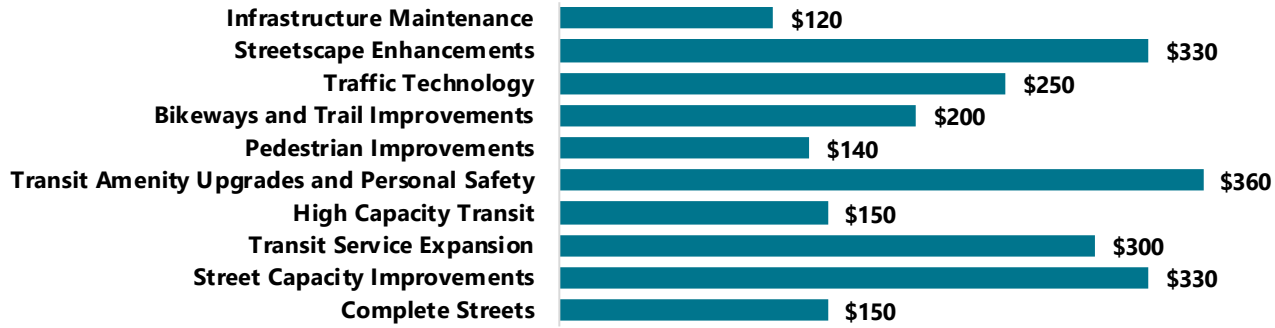
Attendees were also provided with an opportunity to leave comments on the visionary network maps using sticky notes. A complete transcription and photos of handwritten map comments can be found in Appendix C: Roundtable Discussion Map Comments.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



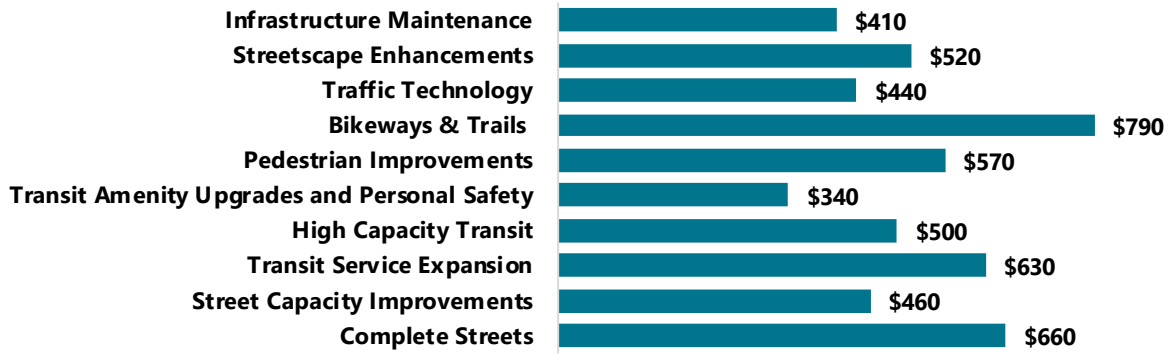
ENGAGE AURORA LIVE!

- Saturday, April 19, 2025
- Aurora Municipal Center
- 200 attendees
- Top 3 Investment Categories
    1. Traffic Technology
    2. Complete Streets
    3. Transit Service Expansion

Attendees of Engage Aurora Live!, a family friendly event designed to gather feedback on multiple critical projects impacting Aurora's future, were asked to provide feedback on the visionary networks and investment categories. Of the event's 200 attendees, 53 participated in the investment category jellybean funding activity. The graph below shows the funding totals for each category. The top three most funded categories by participants were Traffic Technology, Complete Streets, and Transit Service Expansion.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



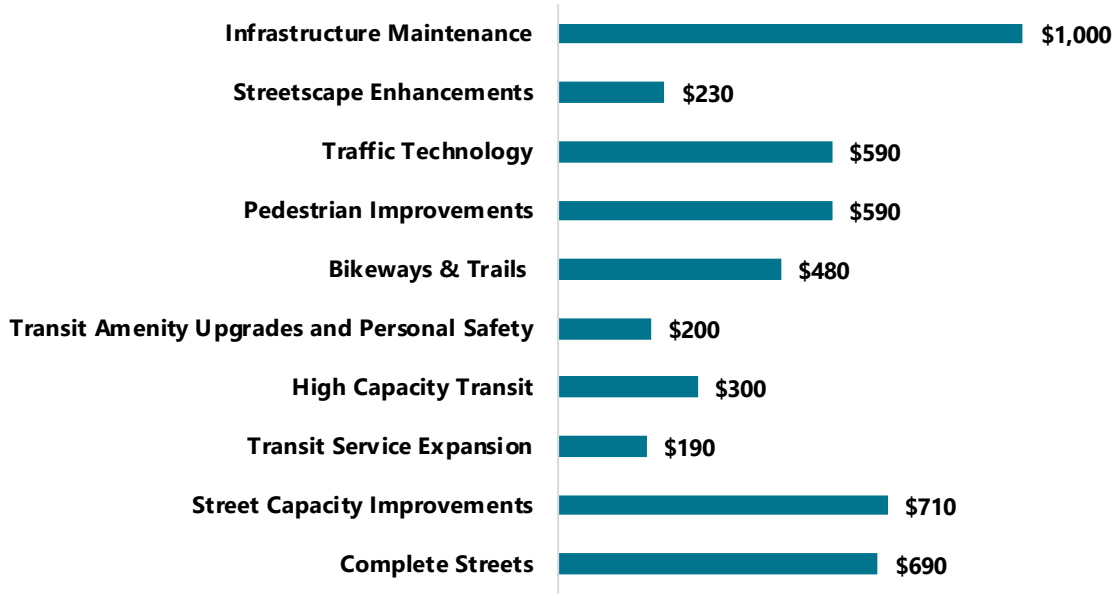
EMPLOYEE ENGAGEMENT – EMPLOYEE TOWN HALL

- Tuesday, April 8, 2025
- Aurora Municipal Center
- 50 attendees
- Top 3 Investment Categories
    - Infrastructure Maintenance
    - Street Capacity Improvements
    - Complete Streets

City of Aurora employees in attendance at the Employee Town Hall were asked to participate in the jellybean funding activity. The Connecting Aurora project team also passed out flyers directing town hall attendees to the StoryMap via Engage Aurora where they were encouraged to make comments and provide feedback on the visionary networks. The graph below shows the funding totals for each category. The top three highest funded categories were Infrastructure Maintenance, Street Capacity Improvements, and Complete Streets.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



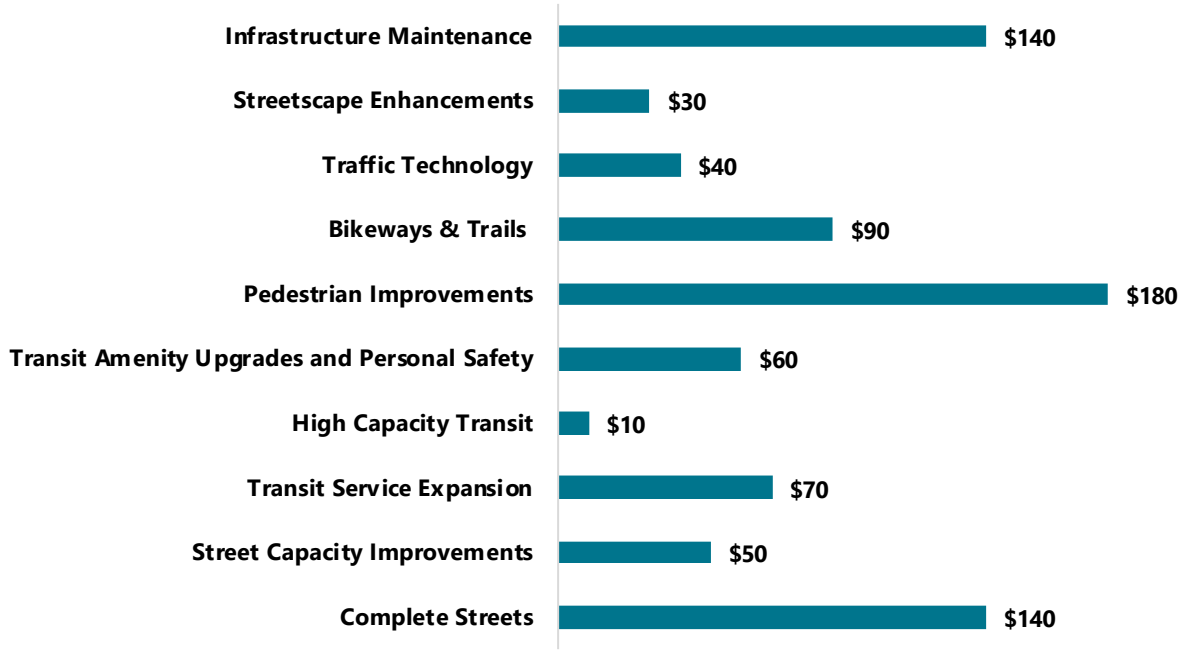
EMPLOYEE ENGAGEMENT – BLOCK CAPTAINS

- Wednesday, April 16, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Pedestrian Improvements
    2. Complete Streets
    3. Infrastructure Maintenance

In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Pedestrian Improvements, Complete Streets, and Infrastructure Maintenance.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



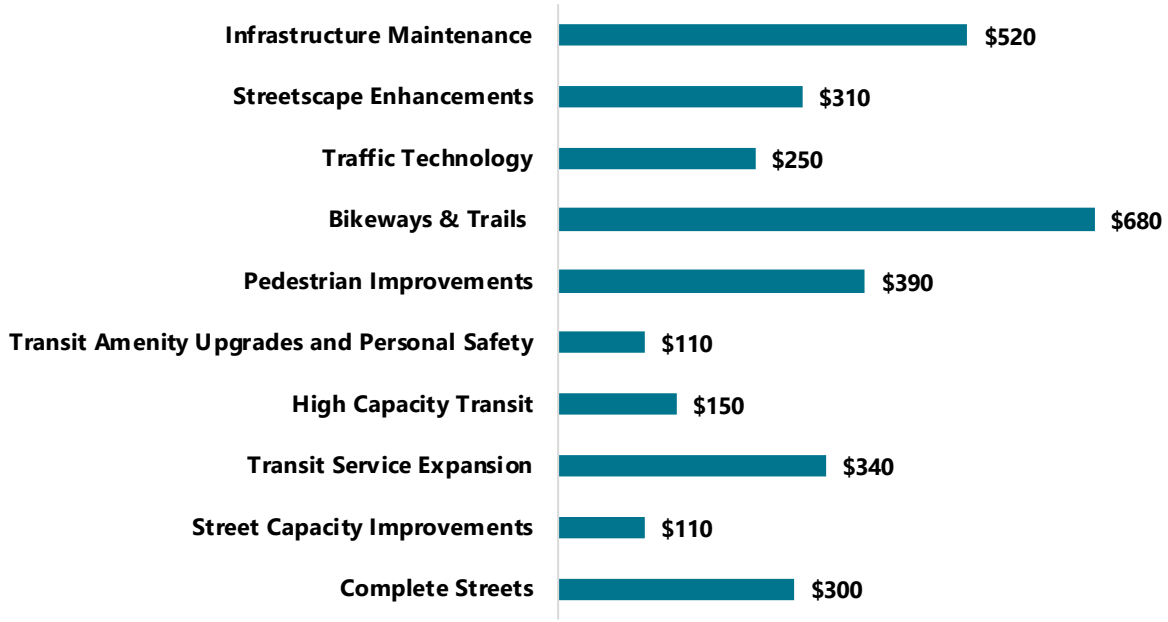
EMPLOYEE ENGAGEMENT – CENTRAL PARKS, RECREATION, & OPEN SPACE

- Thursday, April 17, 2025
- Central Maintenance
- 31 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Infrastructure Maintenance
    3. Pedestrian Improvements

In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Bikeways & Trails, Infrastructure Maintenance, and Pedestrian Improvements.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



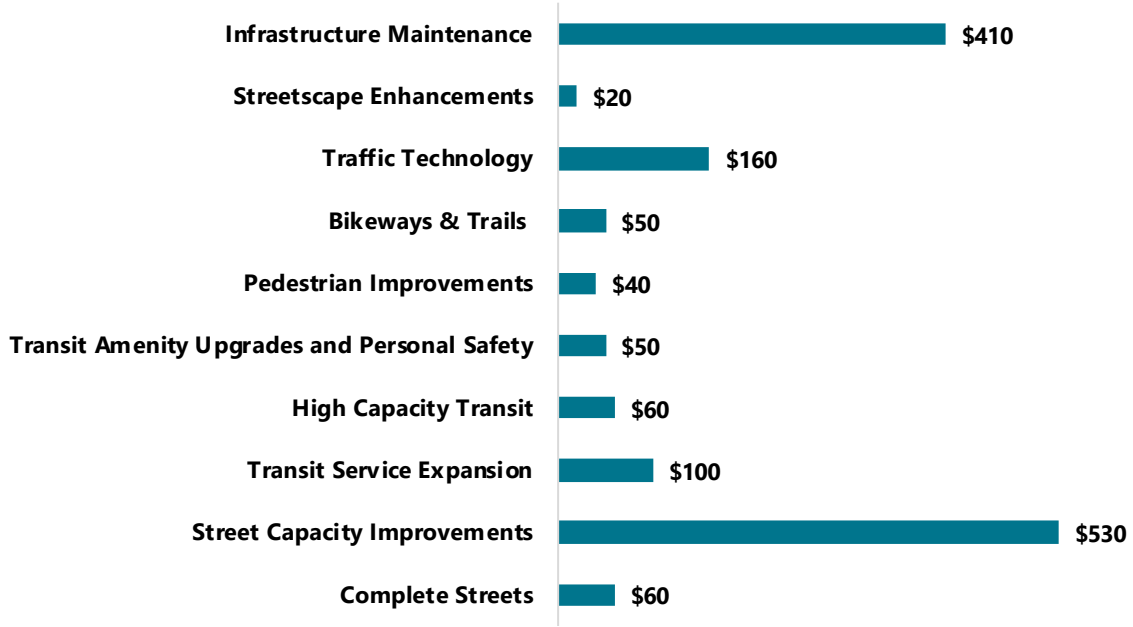
EMPLOYEE ENGAGEMENT – CENTRAL HEAVY MAINTENANCE

- Friday, April 18, 2025
- Central Maintenance
- 15 attendees
- Top 3 Investment Categories
    1. Street Capacity Improvements
    2. Infrastructure Maintenance
    3. Traffic Technology

In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Street Capacity Improvements, Infrastructure Maintenance, and Traffic Technology.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



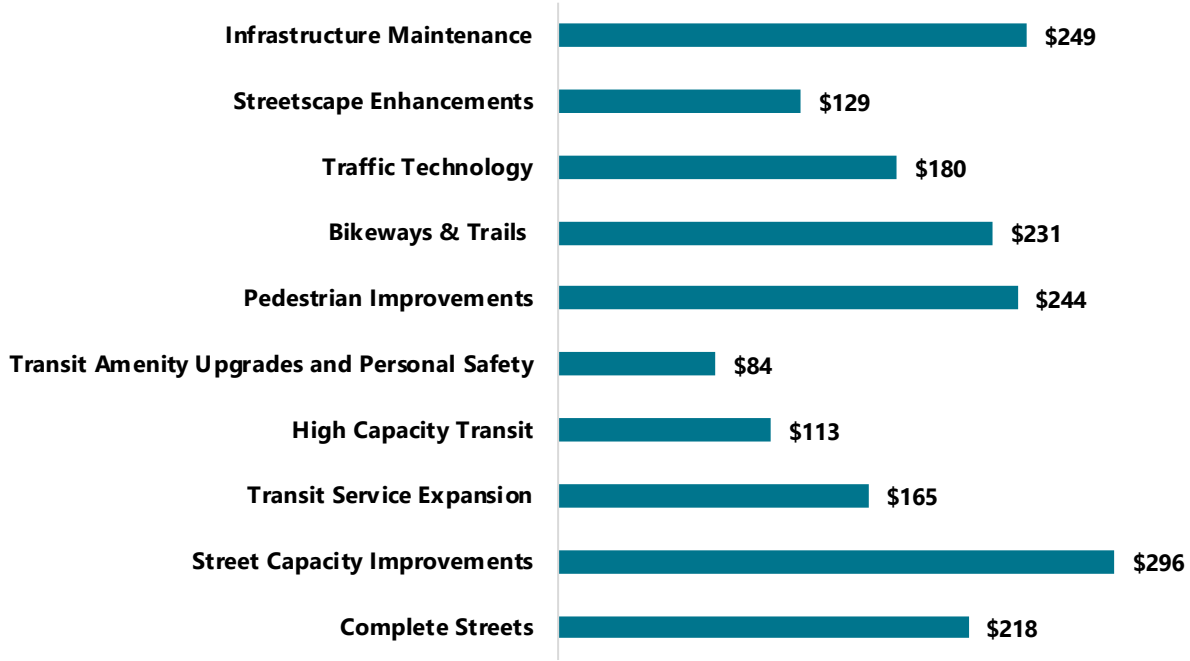
EMPLOYEE ENGAGEMENT – SEAM

- Friday, April 18, 2025
- Southeast Maintenance
- 190 attendees
- Top 3 Investment Categories
    1. Street Capacity Improvements
    2. Infrastructure Maintenance
    3. Pedestrian Improvements

In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Street Capacity Improvements, Infrastructure Maintenance, and Pedestrian Improvements.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



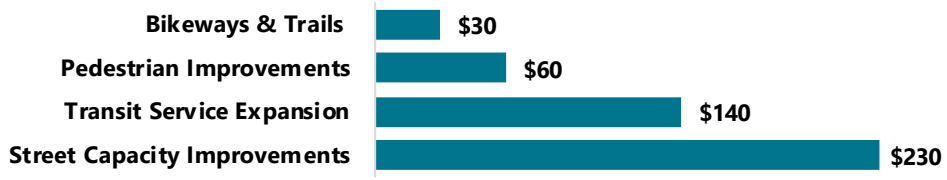
PROJECT WORTHMORE

- Monday, April 14, 2025-Wednesday, April 16, 2025
- Southeast Maintenance
- ~35 attendees

Following three specialized presentations, the Connecting Aurora project team gathered feedback from English classes at Project Worthmore. Each presentation was adjusted according to English level, and the feedback activity was simplified down to four investment categories instead of 10, focusing on streets, transit, pedestrian, and bikeway improvements. Participants were still given 10 jellybeans to represent $100 worth of funding and asked to disperse them across the categories of Street Capacity Improvements, Transit Service Expansion, Pedestrian Improvements, and Bikeways & Trails.

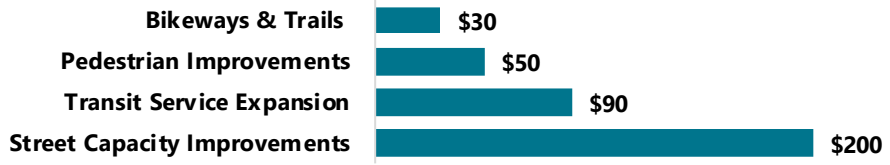
Investment Categories – English Class #1 (April 14, 2025)

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.



Investment Categories – English Class #2 (April 15, 2025)

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.



Investment Categories – English Class #3 (April 16, 2025)

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.

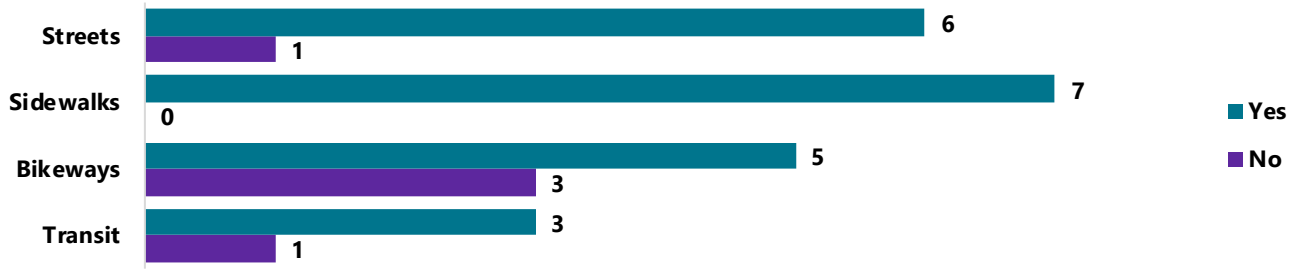
POP UP #1 – AURORA CENTER FOR ACTIVE ADULTS

- Wednesday, April 2, 2025
- 35 attendees
- Top 3 Investment Categories
    1. Street Capacity
    2. Infrastructure Maintenance
    3. Traffic Technology

The Connecting Aurora Project team hosted a pop-up event at the Aurora Center for Active Adults and gathered feedback from 35 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network receiving only slightly lower levels of support than the rest of the networks. The top three highest funded investment categories were Street Capacity, Infrastructure Maintenance, and Traffic Technology.

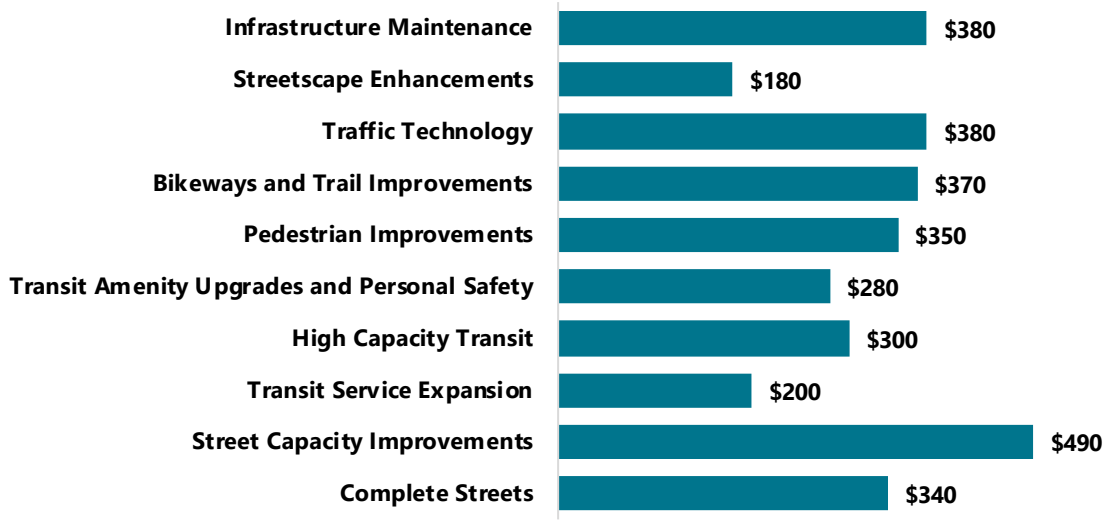
Visionary Networks

Does this network improve your quality of life?



Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



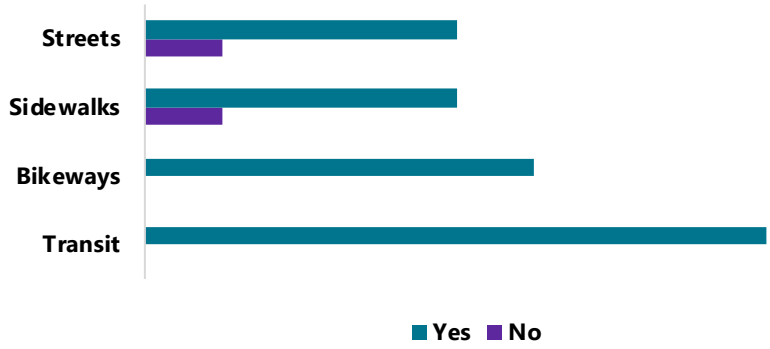
POP UP #2 – STANLEY MARKETPLACE FIRST FRIDAY

- Friday, April 4, 2025
- 32 attendees
- Top 3 Investment Categories
    1. Bikeways
    2. High-Capacity Transit
    3. Streetscape Enhancements

The Connecting Aurora Project team hosted a pop-up booth at the Stanley Marketplace First Friday in April and gathered feedback from 32 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network and Transit Network receiving 100% support. The top three highest funded investment categories were Bikeways, High-Capacity Transit, and Streetscape Enhancements.

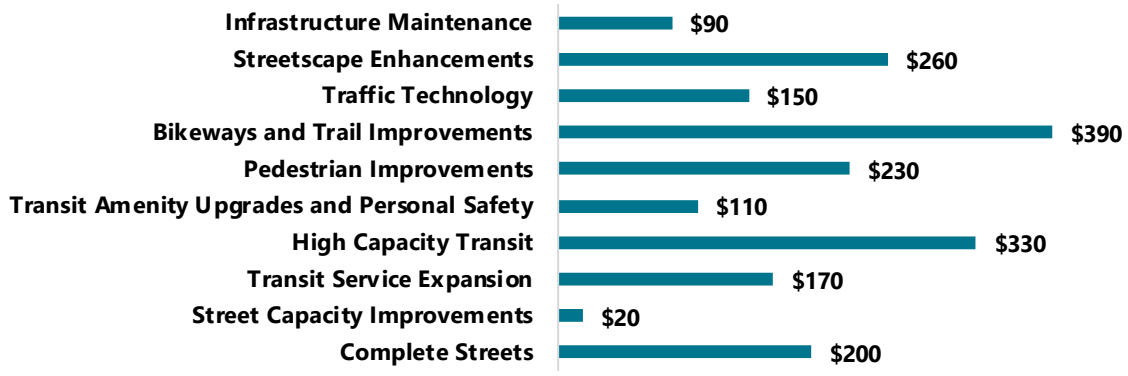
Visionary Networks

Does this network improve your quality of life?



Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #3 – HOFFMAN HEIGHTS LIBRARY

- Saturday, April 5, 2025
- 6 attendees
- Top 3 Investment Categories
    1. High-Capacity Transit
    2. Pedestrian Improvements
    3. Transit Service Expansion/Infrastructure Maintenance

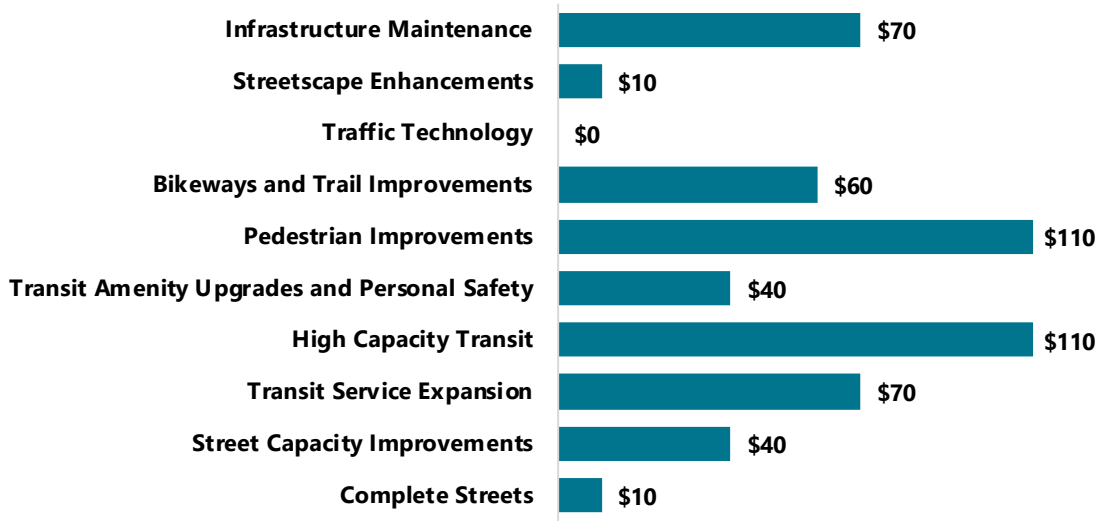
The Connecting Aurora Project team hosted a pop-up event at the Hoffman Heights and gathered feedback from six participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were High-Capacity Transit, Pedestrian Improvements, and Transit Service Expansion and Infrastructure Maintenance tied for third

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



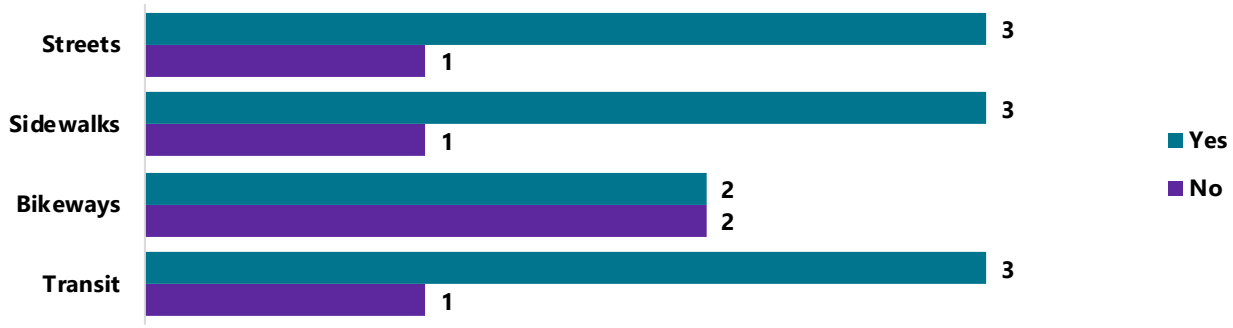
POP UP #4 – SOUTHEAST RECREATION CENTER

- Tuesday, April 8, 2025
- 20 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Street Capacity Improvements
    3. Infrastructure Maintenance

The Connecting Aurora Project team hosted a pop-up event at the Southeast Recreation Center and gathered feedback from 20 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network receiving only slightly lower levels of support than the rest of the networks. The top three highest funded investment categories were Bikeways & Trails, Street Capacity Improvements, and Infrastructure Maintenance.

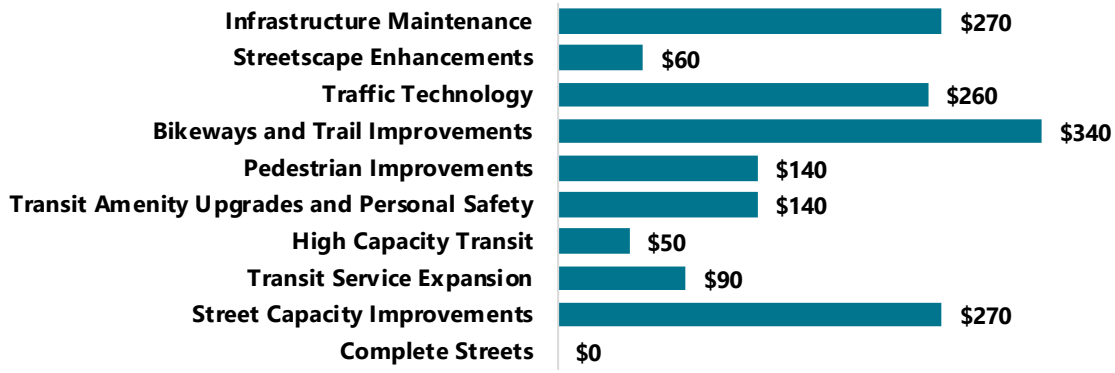
Visionary Networks

Does this network improve your quality of life?



Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #5 – MISSION VIEJO LIBRARY

- Wednesday, April 9, 2025
- 5 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Transit Amenity Upgrades & Personal Safety
    3. Streetscape Enhancements

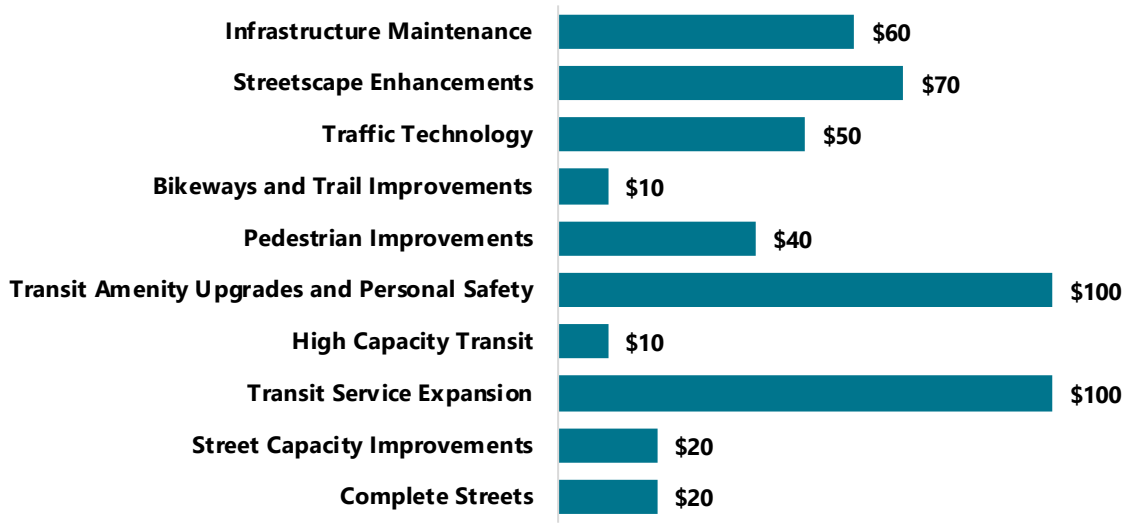
The Connecting Aurora Project team hosted a pop-up event at the Mission Viejo Library and gathered feedback from five participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, and Streetscape Enhancements.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #6 – AURORA ANIMAL SHELTER

- Saturday, April 12, 2025
- 9 attendees
- Top 3 Investment Categories
    1. Pedestrian Improvements
    2. Bikeways & Trails
    3. Infrastructure Maintenance

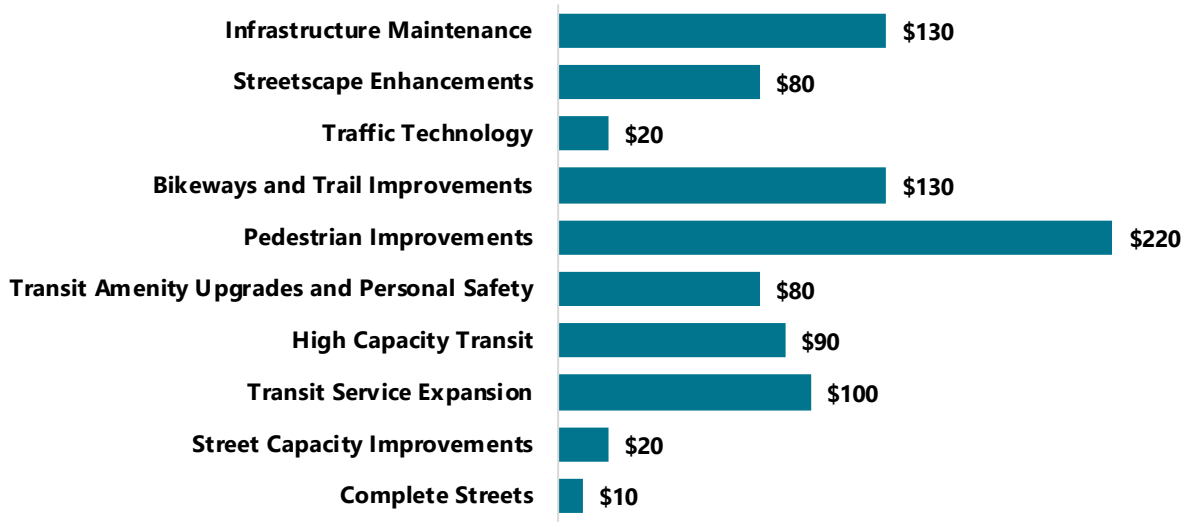
The Connecting Aurora Project team hosted a pop-up event at the Aurora Animal Shelter and gathered feedback from nine participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Pedestrian Improvements, Bikeways & Trails, and Infrastructure Maintenance.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #7 – COMMUNITY COLLEGE OF AURORA

- Wednesday, April 16, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Transit Amenity Upgrades & Personal Safety
    3. Pedestrian Improvements

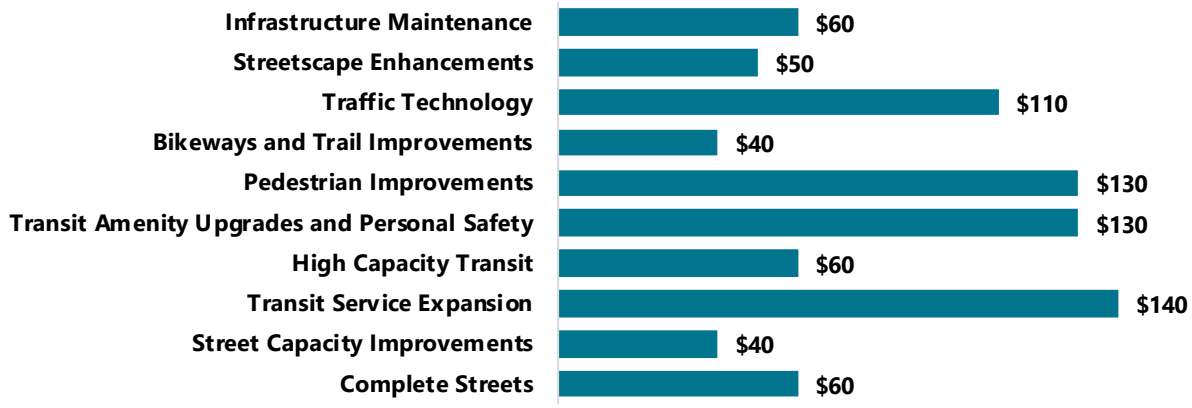
The Connecting Aurora Project team hosted a pop-up event at the Community College of Aurora and gathered feedback from 10 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks. The top three highest funded investment categories were Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, and Pedestrian Improvements.

Visionary Network

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #8 – MLK LIBRARY

- Wednesday, April 16, 2025
- 17 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Bikeways & Trails
    3. Traffic Technology

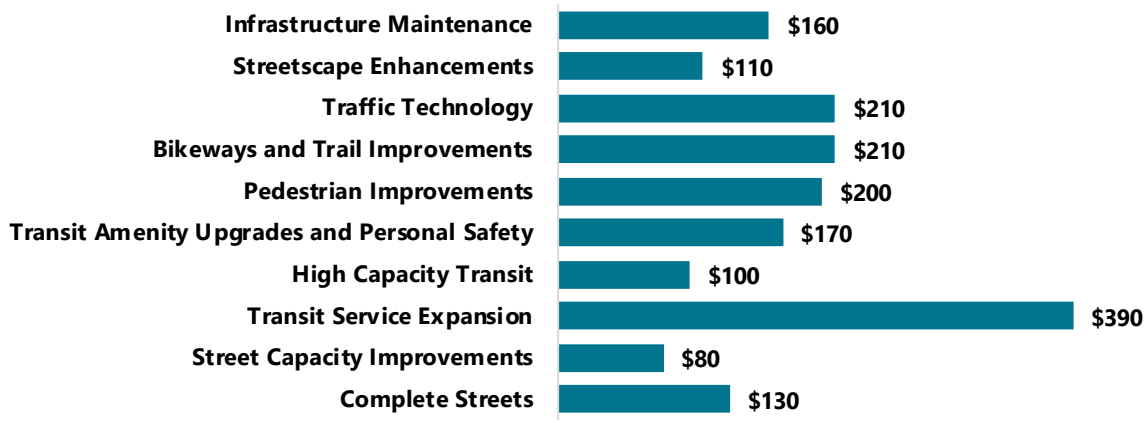
The Connecting Aurora Project team hosted a pop-up event at the MLK Library and gathered feedback from 17 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, Transit, Sidewalk, and Street networks received 100% support, while the Bikeway network received 64%. The top three highest funded investment categories were Transit Service Expansion, Bikeways & Trails, and Traffic Technology, with Transit Service Expansion leading in funding significantly.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #9 – CU ANSCHUTZ EARTH DAY

- Wednesday, April 23, 2025
- 56 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Transit Service Expansion
    3. Pedestrian Improvements

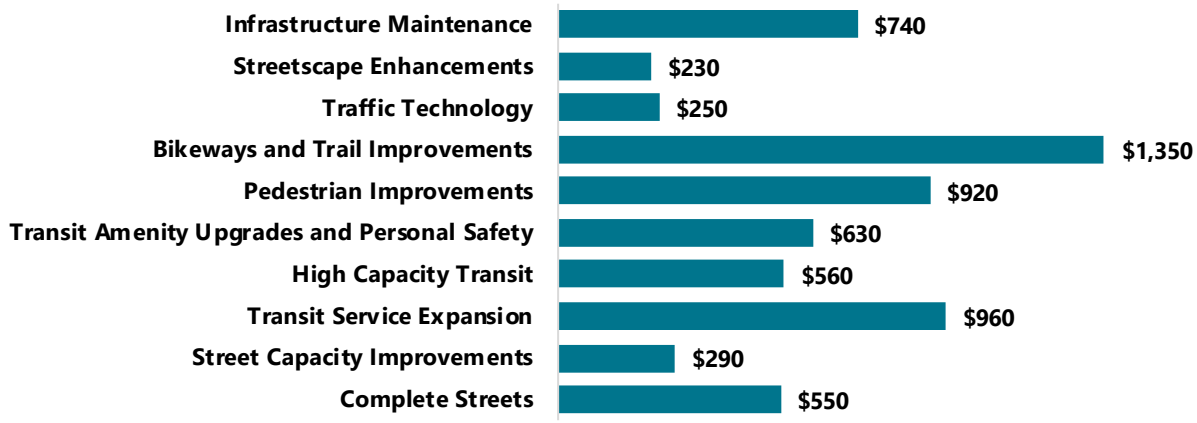
The Connecting Aurora Project team hosted a pop-up booth at the CU Anschutz Medical Campus Earth Day event and gathered feedback from 56 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the Bikeway, Transit, and Sidewalk networks received 100% support, while the Streets network received 64%. The top three highest funded investment categories were Bikeways & Trails, Transit Service Expansion, and Pedestrian Improvements.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #10 – CENTRAL RECREATION CENTER

- Thursday, April 24, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Infrastructure Maintenance
    3. Pedestrian Improvements

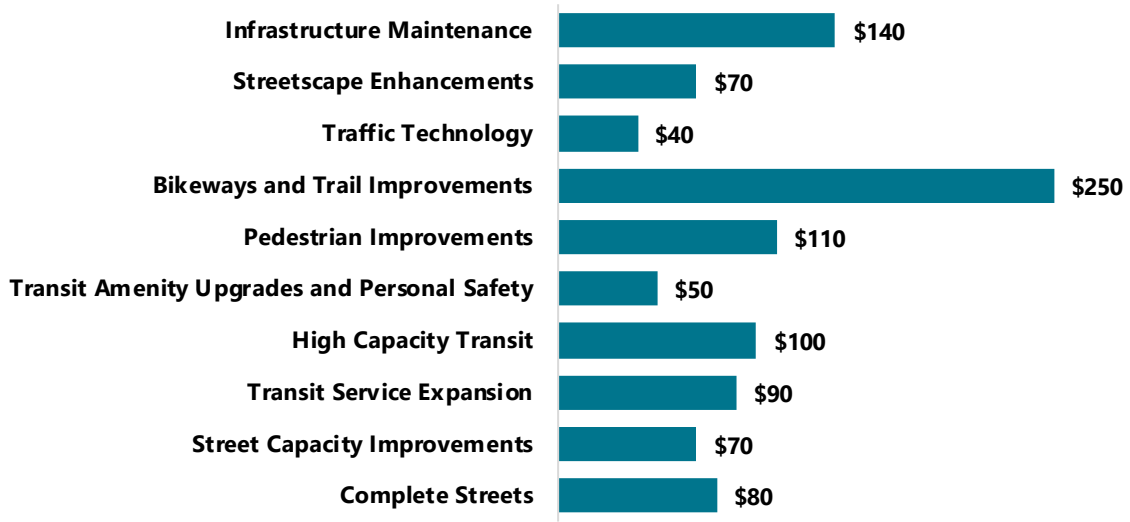
The Connecting Aurora Project team hosted a pop-up event at the Central Recreation Center and gathered feedback from 10 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Bikeways & Trails, Infrastructure Maintenance, and Pedestrian Improvements.

Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



ADDITIONAL COMMENTS & FEEDBACK

At the end of the online survey, participants were asked to provide any outstanding feedback on the networks in an open-ended question: "Please share any additional thoughts or comments you would like the city to know about the proposed networks." A complete record of these responses can be found in Appendix C: Survey: Additional Feedback.

Shortly before and during the beginning of the Milestone 3 Engagement period, the city gathered feedback on Aurora's future in the Build Up Aurora survey. Some of the questions related to transportation and their responses were deemed relevant to Connecting Aurora. A complete record of those responses can be found in Appendix C: Build Up Aurora: Related Survey Comments.

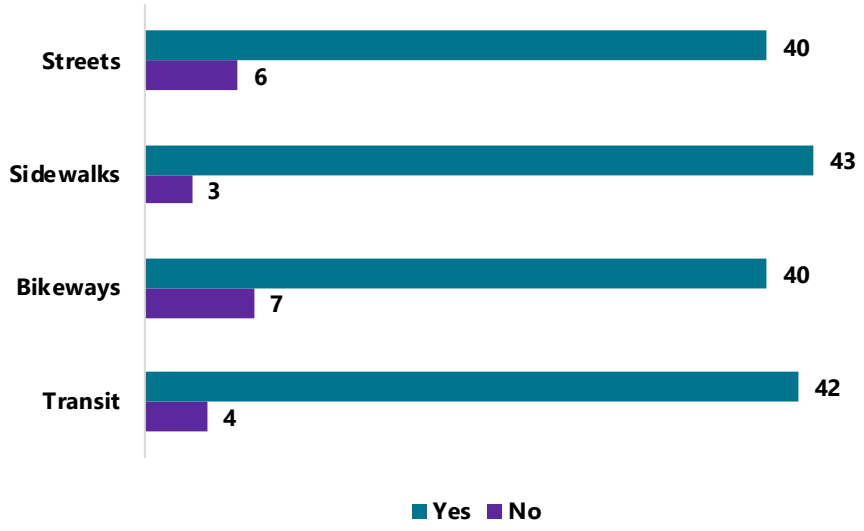
OVERALL RESULTS

- Feedback was fairly evenly distributed across all Wards.
- There were equal number of responses from those who identify as female and those who identify as male.
- The income bracket with the most responses was $120,000+ per year.
- Many pop-up event participants and roundtable discussion attendees expressed **appreciation for the project as a whole and were glad to have an opportunity to have a voice in the process.**
- Most participants, in both in-person and virtual engagement opportunities, **showed support for all four visionary networks**.
- The three consistently highest funded investment categories by in-persona and virtual participants:
    1. **Bikeways & Trail Improvements**
    2. **Transit Service Expansion**
    3. **Pedestrian Improvements**.

What We Heard Overall – Visionary Networks

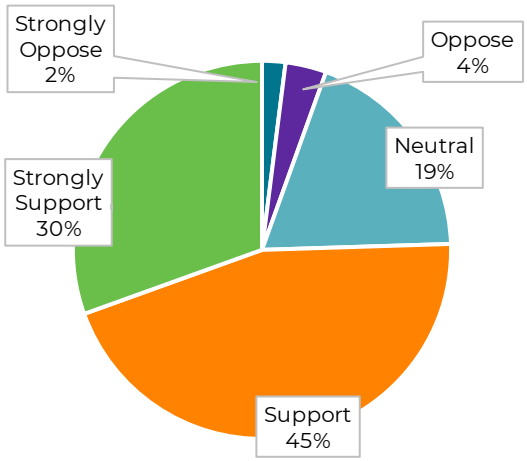
Based on data from the in-person events, 89% of community members agreed that the visionary networks would improve their quality of life.

Does this network improve your quality of life?



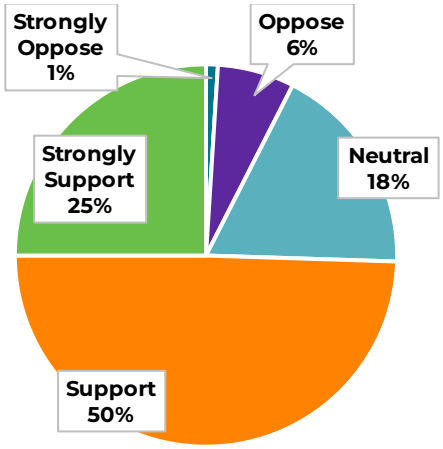
WHAT WE HEARD OVERALL – BIKEWAY NETWORK

Based on data from the online survey and the virtual town hall, 85% of community members support or strongly support the Bikeway Network.



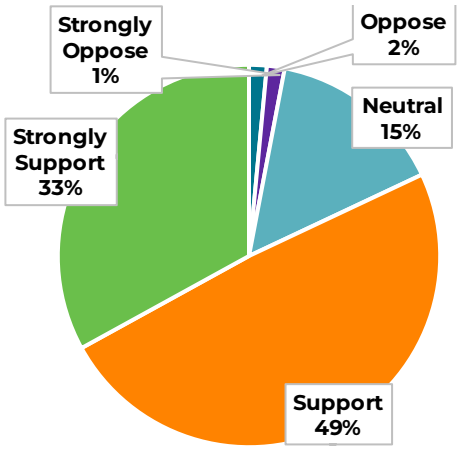
WHAT WE HEARD OVERALL – TRANSIT NETWORK

Based on data from the online survey and the virtual town hall, 75% of community members support or strongly support the Transit Network.



WHAT WE HEARD OVERALL – SIDEWALK NETWORK

Based on data from the online survey and the virtual town hall, 82% of community members support or strongly support the Sidewalk Network.

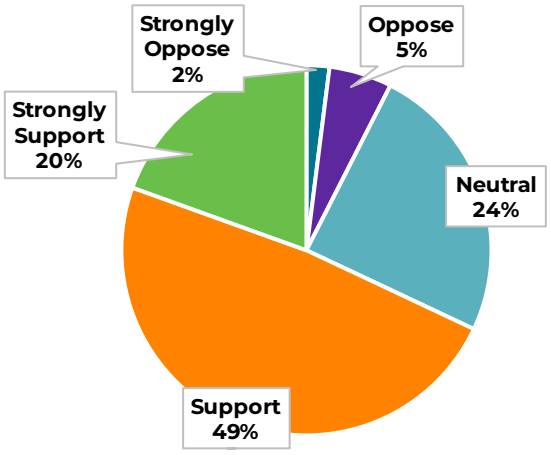


Based on data from the in-person events, 93% of community members agreed that the sidewalk network would improve their quality of life.

WHAT WE HEARD OVERALL – STREET NETWORK

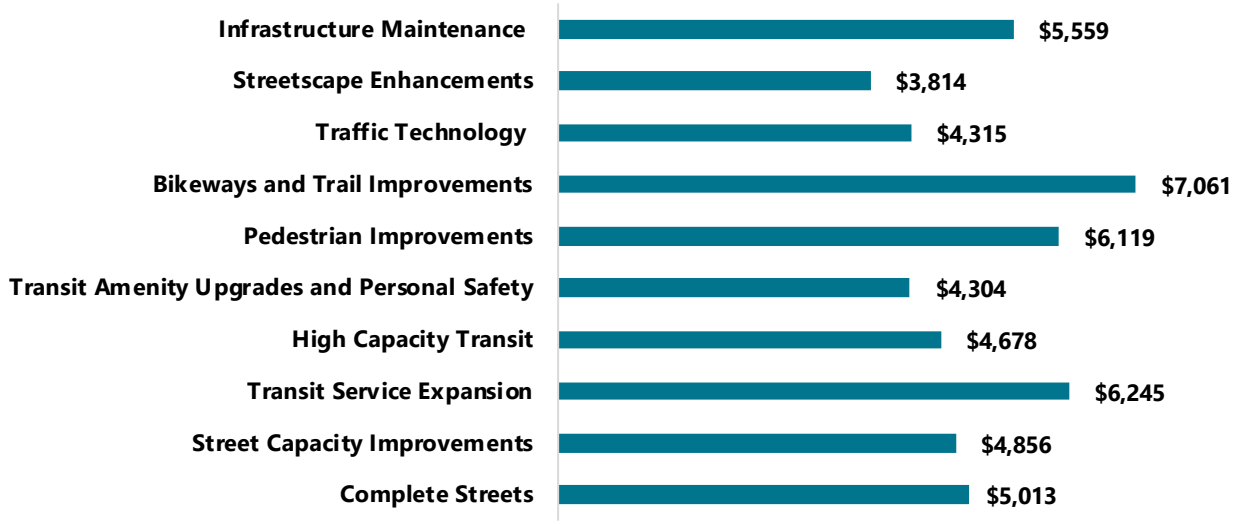
Based on data from the online survey and the virtual town hall, 69% of community members support or strongly support the Street Network.

Do you support the visionary streets improvements areas?



What We Heard Overall – Investment Categories

After combining the data from the online survey and from the jellybean funding activity that took place at nearly every in-person event, the top three most supported investment categories were Bikeways & Trail Improvements, Transit Service Expansion, and Pedestrian Improvements. Infrastructure Maintenance trailed closely behind in fourth place.



Infrastructure Maintenance
$5,559
Streetscape Enhancements
$3,814
Traffic Technology
$4,315
Bikeways and Trail Improvements
$7,061
Pedestrian Improvements
$6,119
Transit Amenity Upgrades and Personal Safety
$4,304
High Capacity Transit
$4,678
Transit Service Expansion
$6,245
Street Capacity Improvements
$4,856
Complete Streets
$5,013

Participa en Aurora Live

Únete a nosotros para conocer más sobre las diversas maneras en las que puedes influir en lo que sucede en Aurora, incluyendo dar tu opinión sobre los futuros proyectos de transporte.

Ayuntamiento Virtual

Habla en línea con el equipo del proyecto directamente en una reunión virtual en vivo a través de Zoom. Tendrás la oportunidad de dar tu opinión y hacer preguntas. Todos los que asistan y se queden hasta el final serán ingresados en un sorteo para ganar una tarjeta de regalo de Target esa noche.

Mesa Redonda Reunión Pública

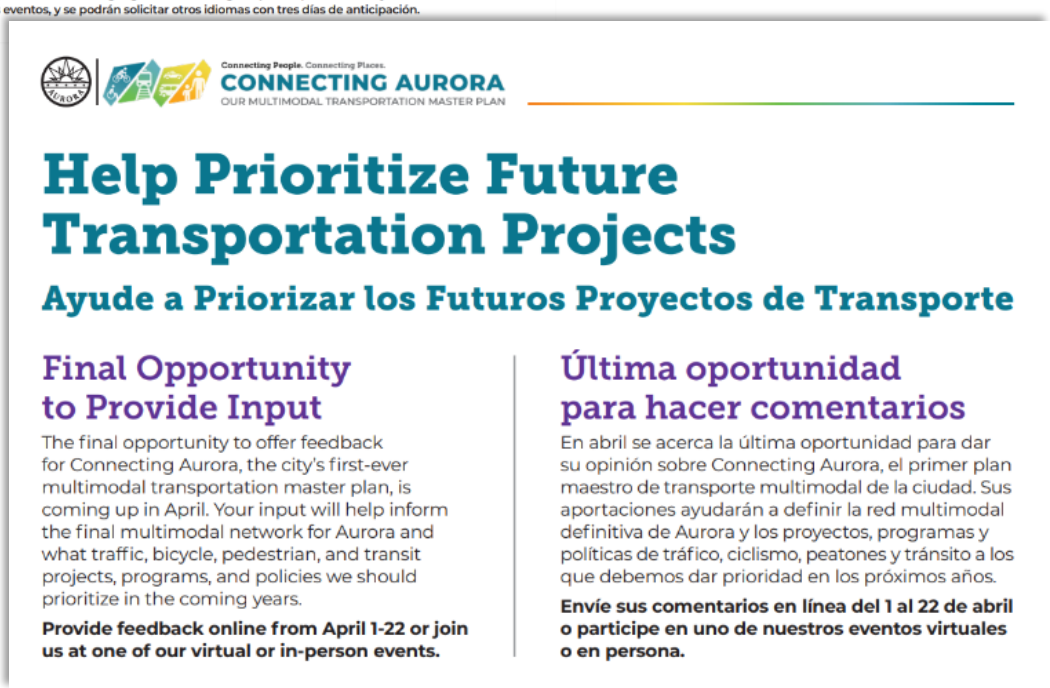
Venga a cenar con nosotros y participe en una mesa redonda. Todo aquel que asista y se quede hasta el final participará en el sorteo de una tarjeta regalo de Target esa noche. **Inscríbete en EngageAurora.org/ConnectingAurora.**

Autoguiado en línea de Puertas Abiertas

Los que no puedan asistir en persona podrán enviar sus comentarios por Internet entre el 1 y el 22 de abril. Los participantes entrarán en el sorteo de una tarjeta regalo de Target.

720.984.2109 connectingauroraco@gmail.com EngageAurora.org/ConnectingAurora

Spanish interpretation will be available at all events, and additional languages can be arranged upon request three days in advance
Habrá interpretación en español en todos los eventos, y se podrán solicitar otros idiomas con tres días de anticipación.



Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Help Prioritize Future Transportation Projects

Ayude a Priorizar los Futuros Proyectos de Transporte

Final Opportunity to Provide Input

The final opportunity to offer feedback for Connecting Aurora, the city's first-ever multimodal transportation master plan, is coming up in April. Your input will help inform the final multimodal network for Aurora and what traffic, bicycle, pedestrian, and transit projects, programs, and policies we should prioritize in the coming years.

Provide feedback online from April 1-22 or join us at one of our virtual or in-person events.

Última oportunidad para hacer comentarios

En abril se acerca la última oportunidad para dar su opinión sobre Connecting Aurora, el primer plan maestro de transporte multimodal de la ciudad. Sus aportaciones ayudarán a definir la red multimodal definitiva de Aurora y los proyectos, programas y políticas de tráfico, ciclismo, peatones y tránsito a los que debemos dar prioridad en los próximos años.

Envíe sus comentarios en línea del 1 al 22 de abril o participe en uno de nuestros eventos virtuales o en persona.

CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2025

More about the Connecting Aurora plan

Over the next couple of years, the city will examine how to make traveling in Aurora better for everyone in our community.

The plan will propose improvements that will offer safer, more comfortable, and more convenient transportation options for everyone who walks, rolls, bikes, drives and takes transit.

The purpose is to create a complete transportation system for people of all backgrounds, incomes, ages, and abilities. The plan will identify necessary projects, policies, and programs for all modes of transportation, including bike, pedestrian, transit, freight and vehicular traffic consistent with the city's overall development vision expressed in the adopted comprehensive plan, Aurora Places.

Connecting Aurora will guide the development, design, and delivery of future multimodal transportation infrastructure projects and programs that focus on providing safer, more sustainable and convenient mobility options for the community.

Get involved

Your feedback is critical in guiding the development of Connecting Aurora.

The final plan will reflect the community's shared vision for Aurora and includes improvements that will enhance your quality of life. There will be several online and in-person opportunities for the community to engage in the planning process throughout the next two years.

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2025

Project overview

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around. But this year, the city is launching Connecting Aurora – its first-ever citywide multimodal transportation master plan – to look holistically at the transportation needs of the entire city.

Connecting Aurora is a transportation plan that will identify projects, policies, and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees, and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

What does multimodal mean?

Multimodal is a transportation term that means all the different ways people travel. This could be your car, a bus or train, your feet or wheels, bicycle, scooter, skateboard, hoverboard, or box truck. You name it.

We want to make sure this plan considers all types of transportation modes.

PLANNING PROCESS AND TIMELINE

Connecting Aurora is being developed over the next two years and a final draft will be presented at the end of 2025. Throughout the process, we will work closely with you to make sure we are headed in the right direction and that the outcomes reflect the needs of our community.

Below is a timeline of the planning process.

Discover (Early 2024)
- Existing Conditions Analysis
- Future Trends Analysis

Synthesize (Late-2024)
- Vision, Goals, Objectives, Values, Priorities
- Strength, Weakness, Opportunities, and Challenges Analysis
- Scenario Development
- Modeling and Testing

Visualize (Early 2025 to Mid-2025)
- Multimodal System Development and Evaluation

Realize (Mid-2025)
- Policies and Programs
- Implementation Plan
- Final Report and citywide Transportation Information System

Aurora, Colorado 80012
email communications@auroragov.org
City of Aurora
AuroraGov.org

Join us and share with your neighbors

Dear HOA and neighborhood leader,

For those of you who attended our first-ever Engage Aurora Live! over the weekend or recently participated in providing input on some of the critical city projects we have going on, we thank you!

Connecting Aurora Multimodal Transportation Master Plan: Milestone 3

If you haven't yet reviewed our **proposed visionary transportation networks** for streets, sidewalks, transit and bikeways, we encourage you to explore the maps online, post comments and respond to other people's comments.

Then **take our short survey** to let us know if we are on the right track and also let us know how you would prioritize transportation projects if you had $100 to spend. Everyone who participates will be entered into a drawing for a Target gift card. **We have extended the deadline for feedback to May 2.**

We also invite you to join us **tomorrow, April 22**, for a roundtable discussion and dinner from 6:30 to 8:30 p.m. at the Central Library, 14949 E. Alameda Parkway, Community Room. We will have large, printed copies of the network maps for you to review and add comments, and talk with us in person. **Please RSVP if you plan to attend** so we have enough food for everyone.

THIS IS AURORA: CITY NEWSLETTER ARTICLES/MENTIONS

Connecting Aurora Milestone 3 Map Comments and Survey

Deadline: Saturday, May 2

Anyone who travels in Aurora is invited to review the proposed visionary transportation networks (streets, transit, sidewalks and bikeways) developed as part of our citywide multimodal transportation master plan. The deadline has been extended to allow more time to review the maps online, drop pins on the maps, make comments and take the 5-minute project priority survey. Anyone who participates will be entered into a drawing for a Target gift card.

Map link available at EngageAurora.org/ConnectingAurora

Engage Aurora Live! coming this Saturday for resident input and family fun

You are invited to share your thoughts on critical projects, enjoy family friendly activities and free food from 11 a.m. to 1 p.m. this Saturday, April 19, at the Aurora Municipal Center, 15151 E. Alameda Parkway (park on the west side).

The city's first-ever Engage Aurora Live! will offer indoor stations to provide input on city infrastructure, transportation, libraries, Colfax transit services, community services federal funding plan and more. A spring gardening craft for all ages and free food will be available while supplies last.

Tour the AuroraTV studios at 11:30 a.m. and 12:30 p.m. Find out more about city jobs, boards and commissions, and how to get more involved in your local government.

Outside, explore our Touch-A-Truck area with vehicles from the Aurora Police Department, Aurora Fire Rescue, Falck Rocky Mountain, the Public Works Department and AuroraTV. Check out the Aurora Public Library Bookmobile.

When you arrive, stop at our tent to pick up an event passport to get stamped. Visit the designated stations to be entered into a drawing for a gift basket.

Spanish interpretation will be available on site.

To find out more, visit EngageAurora.org/EngageAuroraLive.

Connecting Aurora Milestone 3 Survey

Through April 23

Review the latest information and give feedback for Milestone 3 of this citywide multimodal transportation planning effort. Anyone who takes the survey will be entered into a drawing for a Target gift card.

EngageAurora.org/ConnectingAurora

Connecting Aurora Roundtable Discussion and Dinner

Tuesday, April 22, 6:30 to 8:30 p.m.

Join us in person for dinner and a roundtable discussion to give feedback for Milestone 3 of this citywide multimodal transportation planning effort. Spanish interpretation will be available, and additional languages can be arranged on request at least three days in advance. Anyone who attends and stays until the end will be entered into a drawing that night for a Target gift card.

Central Library Community Room, 14949 E. Alameda Parkway

Sign up (so we can plan for food): EngageAurora.org/ConnectingAurora

Engage Aurora Live!

Saturday, April 19, 11 a.m. to 1 p.m.

Provide input on some critical projects impacting Aurora's future, and enjoy food and family friendly activities like Touch-A-Truck. Park on the west side to access the event. When you arrive, stop at our tent to pick up an event passport to get stamped and be entered into a drawing for a gift basket. Offer feedback on projects like Build Up Aurora infrastructure planning, Connecting Aurora multimodal transportation master plan, Colfax BRT Next bus rapid transit east of I-225, and Radiating Possibilities library master plan.

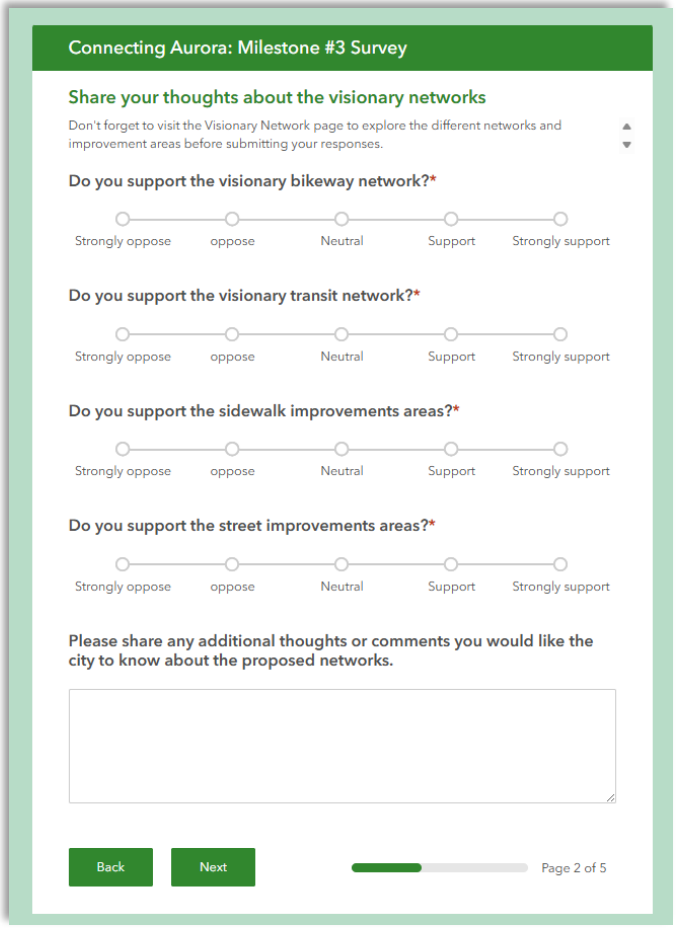
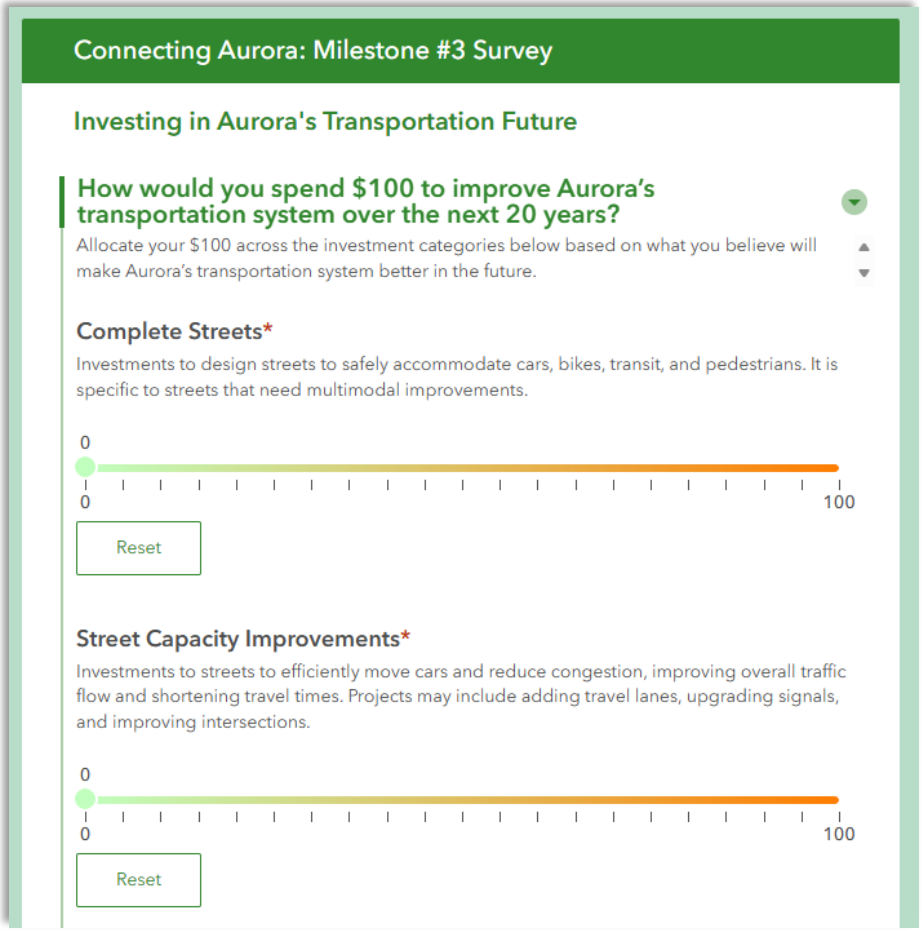
APPENDIX B: ENGAGEMENT MATERIALS

SURVEY





PROJECT BOARDS

PROJECT OVERVIEW | RESUMEN DEL PROYECTO
Our shared vision
Nuestra visión compartida
OUR VISION
Aurora safely connects all people to our places for a healthy, sustainable, and economically strong community.
NUESTRA VISIÓN
Aurora conecta de forma segura a todas las personas con nuestros lugares para una comunidad saludable, sostenible y económicamente fuerte.
OUR MISSION
The city of Aurora will provide a complete transportation system to meet the needs of all people. The city will engage the public in the delivery of plans, programs, policies, standards, and projects.
NUESTRA MISIÓN
La ciudad de Aurora proporcionará un sistema de transporte completo para satisfacer las necesidades de todas las personas. La ciudad implicará al público en la elaboración de planes, programas, políticas, normas y proyectos.
Our goals
Nuestras metas
SAFE
People are safe and feel safe traveling in our city.
SEGURO
Las personas están seguras y se sienten seguras viajando en nuestra ciudad.
RELIABLE
People can depend on all forms of transportation.
CONFIABLE
Las personas pueden depender de todas las formas de transporte.
CONVENIENT
People can move around our city efficiently and easily.
CONVENIENTE
Las personas pueden moverse por nuestra ciudad de manera eficiente y sencilla
CONNECTED
People are well-connected to the places they want to go however they choose to move.
CONECTADO
Las personas están bien conectadas con los lugares a los que quieren ir, sin importar cómo eligan moverse.
SUSTAINABLE
Infrastructure and services can be built, operated, and maintained at high levels, in a fiscally and environmentally sustainable way.
SOSTENIBLE
La infraestructura y los servicios pueden construirse, operarse y mantenerse a altos niveles, de manera fiscal y ambientalmente sostenible.
ECONOMICALLY STRONG
The community's economic vitality is supported and enhanced by the transportation network.
ECONÓMICAMENTE FUERTE
La vitalidad económica de la comunidad se ve respaldada y mejorada por la red de transporte.
HEALTHY
The community is served by transportation that supports a healthy lifestyle and environment.
SALUDABLE
La comunidad cuenta con transporte que respalda un estilo de vida y un medio ambiente saludables.
AUTHENTIC
Infrastructure design contributes to the creation of great places and preservation of traditionally unique places.
AUTÉNTICO
El diseño de infraestructura contribuye a la creación de grandes lugares y a la preservación de lugares tradicionalmente únicos.
EQUITABLE
All people have viable transportation choices to meet their needs.
EQUITATIVO
Todas las personas tienen opciones de transporte viables para satisfacer sus necesidades.
INTEGRATED
People have easy access to a mix of places because land use and transportation are fully woven together.
INTEGRADO
Las personas tienen fácil acceso a una combinación de lugares porque el uso de la tierra y el transporte están completamente entrelazados.

COMMUNITY FEEDBACK | COMENTARIOS DE LA COMUNIDAD

What we've heard so far

Lo que hemos escuchado hasta ahora

Over the last year we hosted two engagement milestones to collect feedback from the Aurora community to better understand the challenges people face traveling in Aurora and what they want for their future.

A lo largo del año pasado organizamos dos eventos para conocer la opinión de la comunidad de Aurora y comprender mejor los retos a los que se enfrenta la gente que viaja por Aurora y lo que quieren para su futuro.

STEP 1
DISCOVER
PASO 1: DESCUBRIR

YOUR TOP TRANSPORTATION CONCERNS
SUS PRINCIPALES PREOCUPACIONES DE TRANSPORTE

- Unsafe to travel outside a car. — No es seguro viajar fuera de un automóvil.
- Bottlenecks and dangerous driving behaviors. — Embotellamientos y conductas peligrosas al conducir.
- Destinations too far to comfortably walk or bike. — Destinos demasiado lejanos para ir cómodamente a pie o en bicicleta.
- Transit is too slow infrequent, unreliable, and feels unsafe. — El transporte es demasiado lento, poco frecuente, y da sensación de inseguridad.
- Desire to have more quality streets and places. — Deseo de tener más calles y lugares de calidad.
- Lack of connections to services and destinations. — Falta de conexiones con servicios y destinos.

STEP 2
SYNTHESIZE
PASO 2: SINTETIZAR

YOUR PREFERRED FUTURE
TU FUTURO PREFERIDO

You were asked how you thought each potential future — **Neighborhood-, Transit-, and Car-Oriented City** — would impact your overall quality of life.

Se le preguntó cómo creía que afectaría a su calidad de vida en general cada uno de los futuros posibles: **ciudad orientada a los vecindarios, ciudad orientada al transporte público y ciudad orientada al automóvil.**

Impact on Participants Overall Quality of Life Impacto en la calidad de vida general de los participantes

CONNECTING AURORA

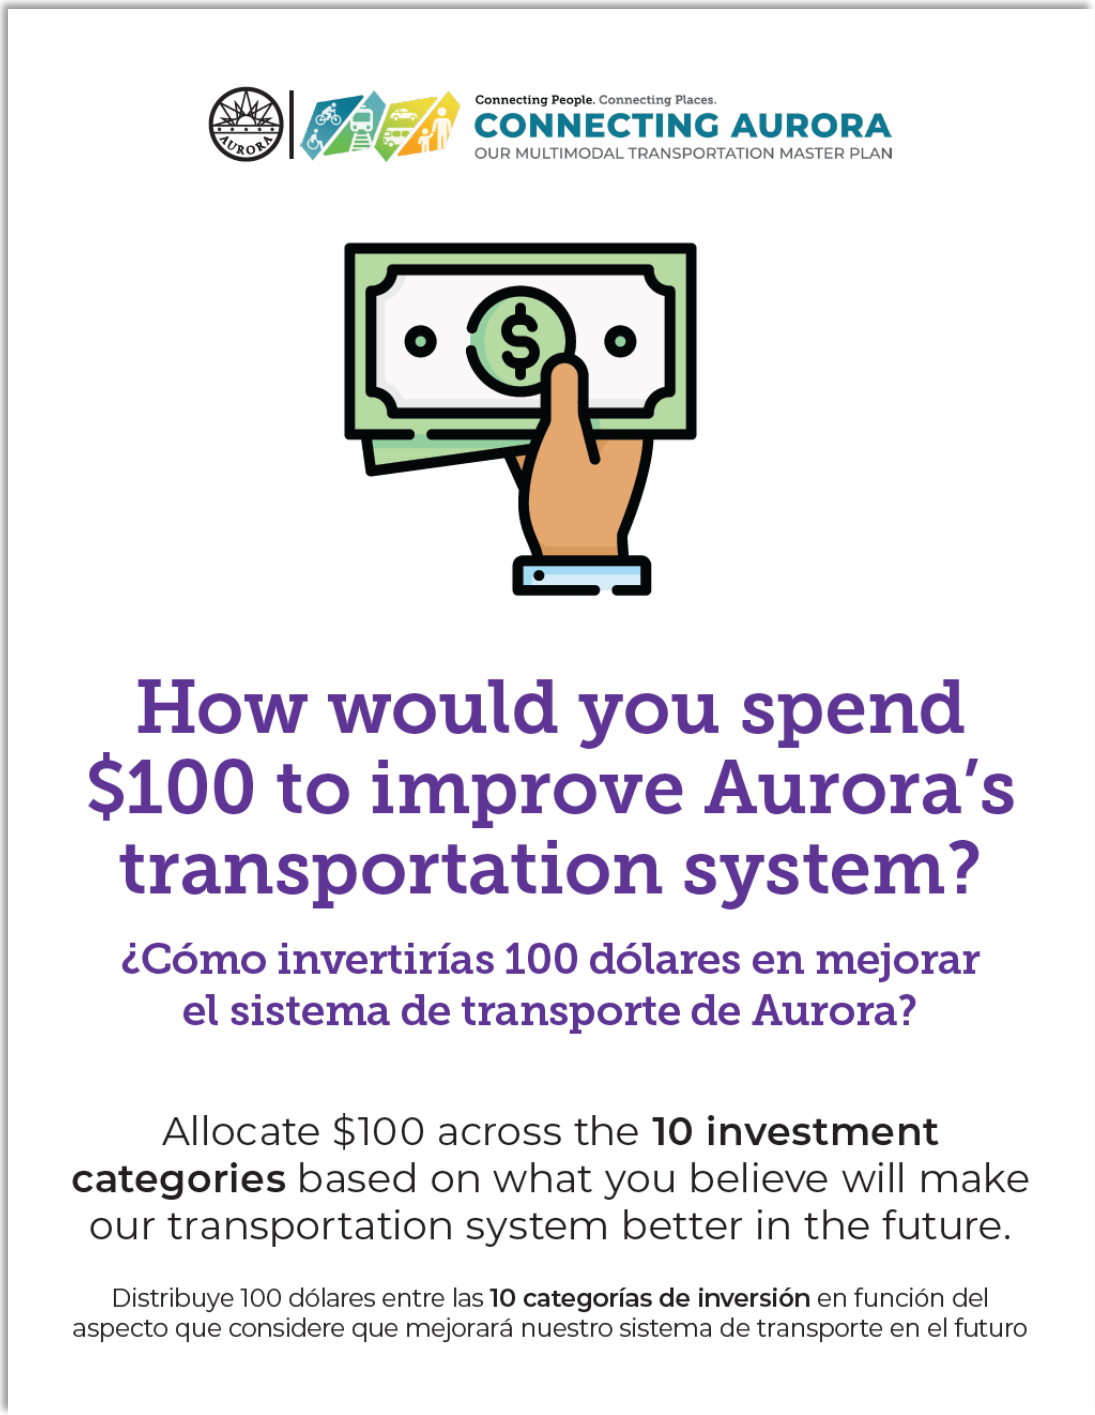
JELLYBEAN FUNDING ACTIVITY

Instructional Sign



Investment Category Cards

Complete Streets

Complete street investments focus on designing streets to safely accommodate cars, bikes, transit, and pedestrians. It is specific to streets that need multimodal improvements.

Project Types

- Traffic Calming Measures
  - Speed Bumps
  - Curb Extensions
- Sidewalk expansion
- Bike lanes or shared-use path
- Transit signal priority

Street Capacity Improvements

Street Capacity Improvements focus on increasing the ability of roadways to accommodate more vehicles and reduce congestion, improving overall traffic flow and shortening travel times. These projects aim to enhance the efficiency and capacity of existing streets or add new capacity to support increased demand.

Project Types

- Adding travel lanes
- Adding turn lanes or through lanes at intersections
- Constructing new streets
- Freight corridor improvements
- Improving intersections

Transit Service Expansion

Transit Service Expansion focuses on increasing the reach, frequency, and coverage of public transit services to improve access and connectivity for more users. These projects aim to enhance mobility options and reduce reliance on single-occupancy vehicles.

Project Types

- New bus routes to underserved areas
- Increased bus and train frequency
- Microtransit service (on-demand shuttles)
- Extended service hours

Transit Amenity Upgrades and Personal Safety

Transit Amenity Upgrades and Personal Safety focus on improving the comfort, convenience, and security of transit facilities and services to enhance the overall rider experience and encourage transit use. These projects aim to make transit more accessible, user-friendly, and safe for all passengers.

Project Types

- Enhanced bus stops (shelter, seating, etc.)
- Improved lighting
- Security measures (cameras, call boxes, etc.)
- ADA compliant boarding areas
- Pedestrian and bicycle access

High Capacity Transit

High-Capacity Transit focuses on developing and expanding transit services that can move large numbers of passengers efficiently and reliably, typically along regionally significant corridors. These projects aim to provide faster, more frequent, and higher-volume transit options to reduce congestion and improve regional connectivity.

Project Types

- Light rail and commuter rail extensions
- Bus Rapid Transit (dedicated bus lanes and supporting infrastructure)
- Express bus service (limited stops)
- Dedicated transit lanes
- Transit signal priority
- Mobility Hubs

Pedestrian Improvements

Sidewalk Projects focus on improving and expanding pedestrian infrastructure to enhance safety, accessibility, and walkability. These projects aim to create a more connected and comfortable pedestrian network.

Project Types

- New sidewalks to fill network gaps
- Sidewalk widening in areas with higher pedestrian volumes
- ADA compliant sidewalks (ramps and paving)
- Buffer areas to separate people from traffic
- Enhanced pedestrian crossings

Streetscape Enhancements

Streetscape Enhancements focus on improving the visual appeal, functionality, and comfort of streets and public spaces to create more inviting and pedestrian-friendly environments. These projects aim to support vibrant, accessible, and safe streetscapes.

Project Types

- Street furniture (benches, trash cans)
- Public art and murals
- Decorative lighting
- Landscaping and street trees

Infrastructure Maintenance

Infrastructure Maintenance focuses on preserving and maintaining existing transportation infrastructure to extend its lifespan, improve safety, and maintain functionality. These projects aim to prevent deterioration and reduce long-term repair costs.

Project Types

- Pavement resurfacing
- Pothole filling and crack sealing
- Bridge and overpass repairs
- Sidewalk and curb repairs
- Stormwater drainage repairs
- Traffic signal and streetlight repairs
- Guardrail and barrier replacements

9. Courtney Stryker, Arapahoe County Council on Aging/ Arapahoe County Senior Resources
10. Eugenia Titterington, Village Exchange Center
11. John Hudgens, Children's Hospital Colorado
12. Lyle Artz, Fitzsimmons Redevelopment Authority
13. Ryan Billings, Nelson Nygaard
14. Desiree Banka, Sunny Homes and Associates
15. Matt Schaefer, Cherry Creek School District
16. Ryan Shaaban, Tryba Architects (FRA Master Plan)
17. Yarkenda Payne, Foundation for Sustainable Urban Communities
18. Erik Balsley, Anschutz Medical Campus
19. Sam Valeriano, Foundation for Sustainable Urban Communities
20. Tom Tobiassen, Bicycle Aurora

2. Presentation & Discussion:

1. Welcome and Introductions (5 minutes)

2. Schedule Overview (10 minutes)

3. Public Engagement Review (20 minutes)

- What we heard during Milestone 2

4. Milestone 3 – Multimodal Network Development Input (45 minutes)

- Review of multimodal network categories and opportunity to provide input

5. Discussion of Networks

- **Tom Tobiassen**: I am vacationing in Tucson, AZ and I'm astounded by the increase in e-bikes on the bikeways and trails. People are traveling much longer distances on less expensive e-bikes.
- **Tom Tobiassen**: I think e-bikes will evolve and provide more transportation options in the future.
- **Shaida Libhart**: We are seeing more and more use of e-bikes, so we are trying to be thoughtful of how the network can accommodate that
- **Tom Tobiassen**: Netherlands is a great model for separated lanes for each mode.

- **Lyle Artz**: You are showing maps of only different parts of Aurora for each slide. Recommend you show the entire City of Aurora in the different maps."
- **Tara Bettale**: Thanks for the comment! The full city will be showed - for the sake of readability, we wanted to zoom in
- **Tom Worker-Braddock**: We recognize the map snapshots we showed are very limited, so we are looking for general feedback at this point. We hope that everyone can plan some time to sit down in the coming weeks and provide feedback on the networks.
- **John Hudgens**: Recognizing that this is a City of Aurora project, to what extent will RTD be involved. For example, is Aurora going to provide funding to RTD to increase / change public transit within the city limits?
- **Shaida Libhart**: We have been thoughtful about coordinating with RTD. Part of the approach is to understand where there are opportunities and where there are other models or implementation strategies to address any issues.
- **Ryan Billings**: The goal is to understand the need for increased transit, align the needs with potential solutions related to new routes, increased service, & improved infrastructure, and understand the costs of those solutions. Then we must have internal conversations about which projects are most important. RTD is an essential partner in working through transit needs and how we can potentially fund those solutions, and what might those projects look like in the first place.
- **Shaida Libhart**: It is important to consider the future corridor and what that might look like. We want to make it easier on ourselves for the future. There may be priorities listed here that might not actually happen, but we want to be prepared. Things like population and needs can change, but we want to make sure we are thinking things through now.
- **Tom Worker-Braddock**: RTD and the City have a good relationship. Before this, we did not have a citywide plan. Now that we have a masterplan, we can point to what the City has agreed to be important when meeting with RTD in the future. This process has also identified areas of the City where bus routes are delayed due to infrastructure issues. Traditionally, the City is responsible for the roads RTD buses use, and RTD is responsible for the actual service. So, the City does have the power to increase service reliability by improving infrastructure. We do also want to consider what the capacity of the City is to self-fund additional transit service. This plan allows us to at least begin that conversation.
- **Tara Bettale**: RTD is also part of our Technical Advisory Committee and will be present at our Roundtable Discussion on April 22.
- **Yarkenda Payne**: Is RTD on the call? They are currently doing a transit equity study to see where the gaps in service are. This could be a great opportunity for collaboration or at least convo (if this isn't happening already). This work seems similar, so it might be a good idea to have a conversation with RTD.
- **Ryan Billings**: We've been chatting with RTD about this—once we finalize the networks on the service side, we can make sure the service is serving folks in the appropriate way. We need to consider more than just geography when it comes to this.

- **John Hudgens**: On a completely different line of thought, is the city looking into building out the EV charging station infrastructure to encourage the transition to EVs. It can be a huge barrier to people transitioning over to EVs.
- **Tara Bettale**: Cities have been mobilizing to increase these efforts through rolling out EV readiness plans in the recent years. Politics can impact this of course, but that type of effort could come out of this plan.
- **Shaida Libhart**: The policies are the underlying structure that help the infrastructure investments get built. Programmatic piece that helps leverage these investments. We haven't figured out the level of the need/scope of EV infrastructure yet. Once we get into policy and programmatic phase, we will know more. There could be a recommended policy or program that is related to EVs that come out of this plan. Either way, there would need to be follow up to put those into place by the City.
- **John Hudgens**: So, EV are not part of this study, but it could be an outgrowth of it?
- **Huiliang Liu**: This project includes a phase of policy and programs—so EV could be part of that phase.
- **Lyle Artz**: We are now installing 2 new electric Car charging stations with a State Grant that was available. There is a program that ends in June that you can get state funding for charging stations.
- **Lyle Artz**: I will have to leave at 3:10 for another meeting. Will you be sending out info/tasks to us to accomplish?
- **Tara Bettale**: Yes, Lyle! We'll send these materials as well as instructions, next step needs, etc.

5. Milestone 3 Promotion Reminder (5 minutes)

6. Next Meeting – May 14 - *Could shift based on Milestone 4 efforts* (5 minutes)

MAP COMMENTS

Figure 1. Visionary Transit Network Comment Map

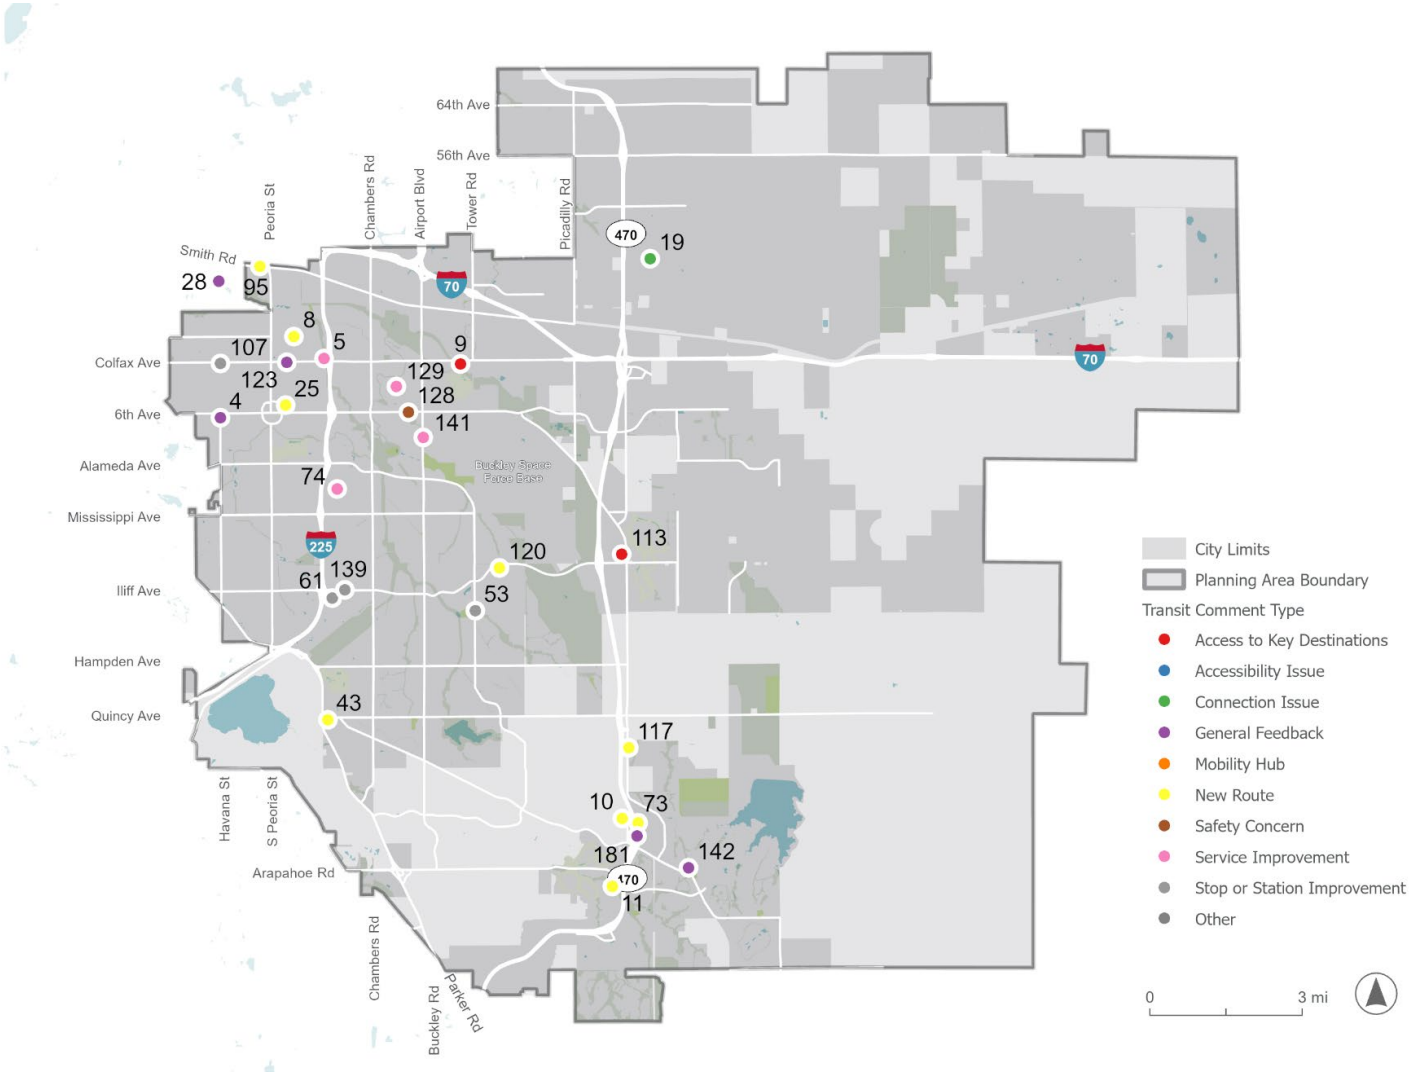

Table 1. Transit Map Comments

ID	Type	Impact	Comment	Like	Dislike
4	General Feedback	High - This issue significantly impacts my ability to take transit.	TWB Test	1	
5	Service Improvements	High - This issue significantly impacts my ability to take transit.	Need a minimum of 15 minute service frequency	6	
8	New Route	High - This issue significantly impacts my ability to take transit.	Need RTD Bus service to Run on Montview from Peoria to The Fitzsimons parkway thru the Fitzsimons Anschutz Campus	2	
9	Access to Key Destinations	Medium - This issue somewhat impacts my ability to take transit.	Triple Creek Trailhead at 18000 E Colfax Ave, Aurora, CO 80011 is slated for improvements. There is an unlit bus stop with no shelter, just a bench. Additionally, the parking lot is not lit. Improvements potentially include a shelter, bike skills course, and public art. How can collaborative funding an site design for this project account for more appealing multi-modal bike / ped / transit connectivity in an area potentially slated for future BRT. Potential partners in include City of Aurora PROS, City of Aurora Art in Public Places, RTD, High Line Canal Conservancy, Sand Creek Regional Greenway Partnership	2	
10	New Route	High - This issue significantly impacts my ability to take transit.	Would love to get a light rail out in this area that easily goes to Anschutz Medical Campus. The one at Parker and 225 is so far I just drive, would take longer to take the train from the Parker station	4	
11	New Route	High - This issue significantly impacts my ability to take transit.	Would love a train stop close to here. Huge residential area - could cut down on traffic	4	
19	Connection Issue	Low – This issue is a minor inconvenience or suggestion.	As the city builds out to the north east, there is a an opportunity to build rail or at least set aside right-of-way to build rail. It is WAY more expensive to add rail once the city is built up. As neighborhoods and large city places (eg The Aurora Highlands) are built, additional conference centers, future additions to the Air & Space Port, entertainment venues, etc. are added, we need to think about adding rail connections. There would be a huge benefit to people moving to Aurora on the east I-70	9	

ID	Type	Impact	Comment	Like	Dislike
			corridor if they could take a commuter rail train into Denver rather than commuting by car or bus.		
25	New Route	High - This issue significantly impacts my ability to take transit.	TWB 4/11/25 Transit test. Confirm and delete.		
28	General Feedback	High - This issue significantly impacts my ability to take transit.	TWB 4/11/25 Chrome test. Confirm and delete.		
43	New Route	Medium - This issue somewhat impacts my ability to take transit.	Allowing for a future rail station at the East Bank development for rail (probably underground) to lead north to Nine Mile Station & up Havana and southeast to Southlands would really help connect the city.	4	
53	Stop or Station Improvement	High - This issue significantly impacts my ability to take transit.	The bus stop at Tower and Sterling Hills Parkway is miserable on days after snow or rain as the sludge and muck is sprayed all over the sidewalk and bench by passing drivers. Please move the sidewalk and bench further from the street. Would be nice if there was also a delineated part of the sidepath for bicycles so they aren't crossing right where people are waiting for the bus.	4	
61	Stop or Station Improvement	Low – This issue is a minor inconvenience or suggestion.	The parking garage at the Iliff light rail station is paid, even for same-day transit. This discourages daily travel via light rail and can cause confusion compared to other Park-n-Ride facilities. Removing the fee for same-day parking would likely improve ridership.	4	1
73	New Route	High - This issue significantly impacts my ability to take transit.	Planning for a train station for the Southlands area to connect north to the airport and new developments near the airport and northwest towards Denver would be amazing. Even if such high capacity is not in the cards for the near future planning ahead to ensure it's possible when the funds are available would be great. Grade separated rail is high capacity without the drawbacks of getting stuck in traffic or possible pedestrian collisions. With well planned stations areas can be restricted to those with tickets and platform screen doors can be installed to make it even safer.	5	
74	Service Improvements	Medium - This issue somewhat impacts my ability to take transit.	If there is any way to grade separate the rail leading to the Aurora Transit Center to smooth out the current sharp corners and aviod conflicts with cars such a plan ought to be considered, even if gathering the funds would take some time.	6	

ID	Type	Impact	Comment	Like	Dislike
			This would also create an opportunity to upgrade the stations at the Transit Center and 2nd Ave & Abilene Station. By elevating or burying the tracks it would allow for a convenience store/coffee shop/other amenities & restrooms on the ground floor while making it easier to have fare gates leading to the platform, which could be widened and better protected from the elements.		
95	New Route	High - This issue significantly impacts my ability to take transit.	I live close to Nine Mile Station, but would never consider taking transit again to the airport because it's inconvenient and takes too long. There needs to be a train that goes from Nine Mile directly to the airport without requiring a transfer at Peoria Station, where train schedules don't line up very well. It takes too long and the system is just too unreliable.	4	
107	Stop or Station Improvement	High - This issue significantly impacts my ability to take transit.	Colfax is the most direct way to get to downtown from near this area. A lightrail down Colfax connecting Aurora to Downtown would be so beneficial.	2	
113	Access to Key Destinations	High - This issue significantly impacts my ability to take transit.	The time to plan for, budget, and build a light rail line going straight south from DIA is now. E470 and Jewell is expected to be the center if Aurora in the next 15 years. If there were a light rail hub at Southlands with a line that went along 470 or even farther East where the roads are not as complete, it would make transportation to the airport so much easier, would decrease traffic along E470, Tower Road, and Pecos.	5	
117	New Route	High - This issue significantly impacts my ability to take transit.	A future rail route along the E470 with stations at the airport, new Aurora Highlands development, Jewel, Quincy (to serve Copperleaf) and at Southlands would be a great amenity for the city, and would improve traffic along Aurora Parkway, Quincy, Airport Blvd/Buckley and other streets. It would also be an attractive option in general by giving people a way to ge to the airport without having to park there.	6	
120	New Route		I hope I'm out of Aurora and Colorado before you libtards build a rail line right in my backyard to bring more gang members, car theifs and drug addicts within yards of my house. Why would you want to bring more of Denver into Aurora? Oh,so it's convenient for Denver high rollers to cruise through my backyard on their way to the airport!	2	

ID	Type	Impact	Comment	Like	Dislike
123	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	Glad to see that Aurora has plans to have the BRT on Colfax continue along the Aurora segment of the street.	3	
128	Safety Concern	High - This issue significantly impacts my ability to take transit.	HALP		
129	Service Improvements	High - This issue significantly impacts my ability to take transit.	TWB test		
135	General Feedback	High - This issue significantly impacts my ability to take transit.	I'd like to see more robust community outreach. Signs in the ground, tables at local shops, speaking at community centers. Realistically, how many people know about this, provide feedback, etc?		
139	Stop or Station Improvement	Low – This issue is a minor inconvenience or suggestion.	Beatutify all stops. Benches that are cleaned. Add drought tolerant plants like ice plants. Getting more people to ride transit means changing how people perceive it, and that includes the stops.	1	
141	Service Improvements	High - This issue significantly impacts my ability to take transit.	There are 6 schools and 3 APS department buildings on Airport between Centerpoint and 6th. 5 of these programs serve all of APS, making bus systems important. The 169 runs every 60 minutes. We need more frequent routes during the school year. In general, Aurora is lacking E-W routes. Since Covid, we lost the 157, 131 and the frequency of the 15 and the 169 has decreased. It seems like RTD is decreasing service throughout the center of your map. We need accessible stops that feel safe for all.	2	
142	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	It might be worth addressing transit in far southeast Aurora with a micromobility solution to connect far-flung newer neighborhoods with existing but limited RTD regional connections and also facilitate local travel. I also wonder if there is a consideration about a micromobility solution that could connect far southeast Aurora with Parker as many far southeast Aurora residents travel often to Parker and likely many Parker residents go to Southlands for shopping. Is multi-jurisdictional collaboration a consideration?	1	
181	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	Appreciate the future transit corridor marked along the E-470. Hope it can be a fully grade separated rail segment for optimal functionality and safety.	1	

Figure 2. Visionary Bicycle Network Comment Map

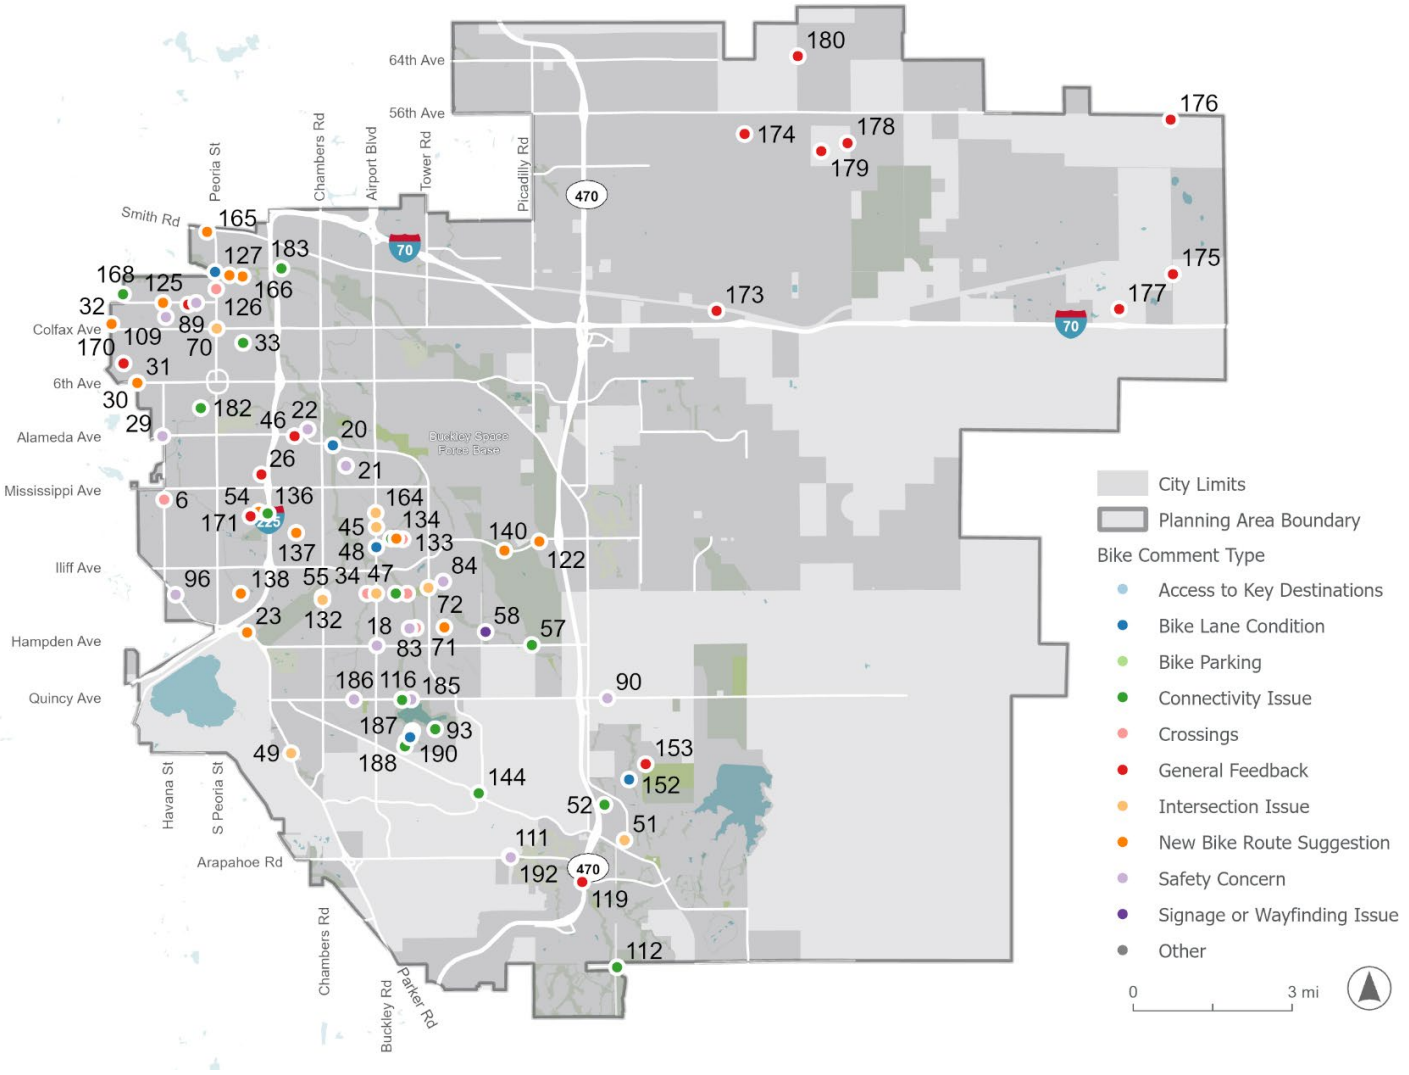

Table 2. Visionary Bicycle Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
6	Crossings	High - This issue significantly impacts my ability to safely bike.	need a signal protected crossing	2	
18	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Buckley rd. is designated a bike route to the right of the right driving lane. Very unsafe in current condition. . Cars are going 50+ mph. Not safe to bike on this "bike route"	9	
20	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	During colder months, water drips from the bridge above and creates a massive sheet of ice on the incline to the North. Even walking there is dangerous during that time.	4	
21	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	I have a lot of issues crossing the street with my bike here, mostly parents speeding to drop off their kids at the school and not paying attention. I've been almost hit by a car three times in the last year: Cars swerving into the bike lane to park, cars parking in the bike lane where there is no parking, and cars turning into the parking lot and not looking for bikes)	2	
22	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	There is no crosswalk here and all the police officers speed on this road to get to work on time, making it dangerous to cross over and get to work. I also walk here and have trouble with cars speeding around the corner. Speed bumps would help.	2	
23	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	I'd love to be able to bike to work instead of driving. To do that I'd need to bike on Parker and as it is that is not an option with the speed of traffic. A sidepath or separated bike lane would be ideal.	6	
26	General Feedback	High - This issue significantly impacts my ability to safely bike.	TWB 4/11/25 Bikeway test. Confirm and delete.		
29	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Slip lane from Havana onto Alameda makes the Off-street Shared-use Bikeway (sidepath) feel dangerous ESPECIALLY when heading East since drivers are often looking over their shoulder for drivers heading West. Would be ideal to eliminate the slip lane, or give it a signal like Leetsdale at CO Blvd.	3	

ID	Type	Impact	Comment	Likes	Dislikes
30	Crossings	Medium - This issue somewhat impacts my ability to safely bike.	Drivers don't stop at this signal when turning right. They pull forward blocking the crosswalk which is also the crossing for the Off-Street, Shared-Use Bikeway (Side Path). At minimum, we need a No Turn on Red & ideally a right on green arrow only signal like 9th at CO Blvd (though drivers often ignore that as well.)	2	
31	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	This Off-street, Shared-use Bikeway (Side path) needs to be continued & connected by Denver. Seems like it comes to a dead-end at Monaco Pkwy.		
32	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	16th Ave is a planned Neighborhood Bikeway in Denver. Would be good to connect into Aurora especially with the coming Colfax BRT.	3	
33	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This is a short connection that needs a Shared-use Bikeway (Trail) connecting Ursula to 13th Ave only for Bikes & Pedestrians. It is currently difficult to navigate with any amount of speed.	2	
34	Crossings	High - This issue significantly impacts my ability to safely bike.	Median refuge island needed here	4	
35	Crossings	High - This issue significantly impacts my ability to safely bike.	Median refuge island/protected ped-bike crossing needed here	2	
36	Crossings	High - This issue significantly impacts my ability to safely bike.	Signalized pedestrian crossing needed here	1	
45	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	The intersection of Buckley and Mexico needs significant improvements for cyclists. The bike lanes on Buckley are narrow, full of debris and dangerous while the bike lanes on Mexico peter out on approach to the intersection. A protected intersection would be better for cyclists and pedestrians and make cyclists more predictable and visible for drivers as well.	2	
46	General Feedback		TWB test - delete		
47	Intersection Issue (e.g. crossing	High - This issue significantly impacts my ability to safely bike.	This intersection is a connection point between the end of Unnamed Creek Trail at the Center Rec Center & future park, the West Tollgate Creek trail and the bike lanes on	2	

ID	Type	Impact	Comment	Likes	Dislikes
	difficulty, signal timing)		Buckley. Currently there is no bicycle infrastructure, it ought to be upgraded to a protected intersection. This would improve safety for pedestrians and cyclists, and visibility and predictability of cyclists for drivers.		
48	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	The Buckley bike lane would be a convenient bicycle route, but the current narrow lane filled with cracks, holes and debris right next to fast moving traffic with no barrier or buffer is not something I'm willing to risk my life using. Please upgrade this route to give cyclists their own designated space that is protected from car traffic by a curb at the very least.	4	
49	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	Crossing Parker Road at Belleview on bike is extremely unsafe feeling. Upgrading the intersection to a protected intersection to improve visibility of pedestrians and cyclists, reduce crossing distance and conflicts and move the stop limit line back a bit to make it easier to tell which drivers are just going to run the red light would be nice.	3	
50	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There is currently no designated space for bicycles on the small segment of Yale between the terminus of Unnamed Creek Trail at Center Rec Park and West Toll Gate Creek Trail.	1	
51	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	The Southlands Parkway & Aurora Parkway intersection could use an upgrade to a protected intersection to make those on a bicycle waiting to cross here have to spend less time having to leap onto the sidewalk to avoid cars cutting the corner. This would reduce conflicts with pedestrians at the intersection too.	1	
52	Connectivity Issue (e.g. missing link, difficult connection)	Low – This issue is a minor inconvenience or suggestion.	There ought to be pedestrian and cycle paths up the hill connecting the sidepath of the Southlands Parkway segment through the new apartment complexes to the Southlands Parkway segment in Southlands Mall, and its bike lanes.	2	
54	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	The current "Visionary Bikeway" network map shows a bike route going straight through the hospital at The Medical Center of Aurora. This wouldn't work without tearing down the hospital so a protected bike path along Arkansas Dr. seems preferable.	2	

ID	Type	Impact	Comment	Likes	Dislikes
55	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Would be really nice to have a cycle and pedestrian bridge over Chambers on the Cherry Creek Spillway Trail.	3	
57	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Please connect the bike lanes on Conservatory Parkway to the entrance of the Plains Conservation Center via a sidepath along Hampden with a designated bicycle section/lane.	4	
58	Signage or Wayfinding Issue	Low – This issue is a minor inconvenience or suggestion.	Would be nice to have some signage along the paths near the skills field. Not even sure which path is Unnamed Creek Trail at this point where several paths converge.	1	
70	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please get rid of the slip lane from Colfax onto Peoria. This just endangers everyone outside of a car and encourages speeding.	4	1
71	New Bike Route Suggestion	Low – This issue is a minor inconvenience or suggestion.	The current Visionary Map shows a path through a Catholic church and several private yards, when instead it would be easy to route it to Floyd and then down Ceylon to cross Hampden in a way that makes more sense.	2	
72	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please implement a protected intersection at Tower and Sterling Hills Parkway. This would increase safety for all users as currently the bike lanes disappear on approach to the intersection and the wide sidewalk on the east side of Tower gets overcrowded in this area between cyclists and pedestrians on nice days. A protected intersection would separate cycle and foot traffic at the intersection, giving each mode its own designated section, and make it easier for drivers to see pedestrians and cyclists.	3	
83	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Please upgrade the westbound bike lane on Dartmouth leading uphill to the schools to a cycle-track/designated side path as the uphill nature of this segment leads to bicycles weaving in the lane and this segment of road has a bunch of signs on gates begging drivers not to park across their access. Getting rid of street parking on this side of this segment of Dartmouth to add a cycle path	2	

ID	Type	Impact	Comment	Likes	Dislikes
			would benefit residents as well as students and other cyclists.		
84	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Please upgrade the bicycle infrastructure at the intersection of Sterling Hills Parkway and Villanova Place to a protected intersection. Drivers rarely actually give the right of way to cyclists who currently have to cross the right hand turn lane for cars to go straight. The sidewalks in this area are already crowded with dog walkers and other pedestrians making it best that cyclists, pedestrians and cars each have their own dedicated space at the intersection, without cars being able to cut across the bike lane.	2	
89	General Feedback	High - This issue significantly impacts my ability to safely bike.	Making Montview have a fully protected/seperated bike path from Yosemite to Fitzsimons Parkway as is planned on the Visionary Bikeway Map would be amazing.	3	
90	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	There is no Sidepath along Quincy, this is 2 lane road with little room for both bikes and cars to share the road.	2	
93	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There needs to be a connection point to quincy reservoir trail from this park. Only limited to pedestrians and bikes. This would increase our usability of the trails	2	
96	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	I would like to bike from my neighborhood around Eastridge-Ptarmigan Park/Heather Ridge over to the Cherry Creek Trail. However, there is no safe way to access the Cherry Creek Trail near Dartmouth and Havana due to a lack of sidewalks or other infrastructure for bikes and peds. I wouldn't feel safe biking down Yale (or Iliff, or Dartmouth) and crossing Parker Road. Separated bike lanes and signalized crossings at those intersections might help.	3	
109	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Having safer bike paths would encourage people to drive less and use alternative transportation for quick trips to the store, to the library, or rec center.	4	

ID	Type	Impact	Comment	Likes	Dislikes
111	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please do not close off this tunnel underneath Arapahoe. The cars do not stop for bikers/pedestrians in the crosswalks.	4	
112	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Please complete this small connector between the Inspiration neighborhood and the Piney Creek Trail. The existing connectors are through locked gated communities.	2	
116	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	An underpass under Quincy connecting West Tollgate Creek Trail to Quincy Reservoir would be nice.	1	
119	General Feedback	Medium - This issue somewhat impacts my ability to safely bike.	Color coding of the Legend makes if very difficult to distinguish between a "Sidepath" and a "Trail or Path", which are very different - e.g., High Plains Trail versus a sidepath on Arapahoe Road. Determining safe cycling routes (and commenting on them) would be easier if these types of routes were more easily distinguished.		
122	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is no bike infrastructure whatsoever from Jewell and. Gun club, there is trail access after 470, however it's quite some distance to get to anything of value unless you are ready to lock in for a minimum of 15 miles. On top of that getting from the jewell/gun club intersection to the HPT access or beyond is too treacherous to attempt for most folks. Even with the decent wide berm it's always filled with debris including broken glass, screws and other puncture type items. A dedicated trail leading from the intersection to all the way to dunkirk would be helpful in reaching businesses. In addition to this I'm part of a large group of folks who want/do occasionally ride into Buckley SFB from the Murphy creek neighborhood which is now surrounded by 5 more developments that would utilize this heavily but currently don't ride in at all or often due to the unsafe conditions from east of 470/ gun club	3	

ID	Type	Impact	Comment	Likes	Dislikes
124	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	The bike lane on Montview needs to be protected, similar to what was done along Central park blvd (in denver) this is a 2 lane road with a lot of traffic from the neiboorhood. Regarding Moline, Outside of a few signs and a share the road bike marker, we need a dedicated bike lane.	2	
125	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	A North South connection would be very useful, especially if it is a protected bike lane.	1	
126	Crossings	High - This issue significantly impacts my ability to safely bike.	Cars turning right on Peoria st on to 23 ave are going too fast and will swing wide into the opositle side of traffic. Bikes waiting to cross Peoria have to sit in the Right turn lane where cars behind them cant turn right untill the bikers move. Feels safer to just sit on the sitewalk and use the crossing on a bike instead of going in the road.	1	
127	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	Have this be paved, as right now its dirt and in winter months it turns to deep mud on the slope up. Paving this would also connect to the other paved part.	1	
131	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There is no connection between the bike paths here. It appears there was originally a connection planned, but the bike path on private property - where I placed the marker - ends at the boundary of the property. There is a fence and shrubbery completely blocking access. Students from Mracheck middle school have worn a path through the dirt between the marked paths, and have created access through a hole in the fence next to my marker. This could be a completed path with only aboug 200 feet of pavement.	2	
132	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	Traffic signal at this location is very slow to respond to cross Chambers rd to get from East/West . Pedestrians and bikes have to wait a very long time to get the single to change after pressing cross button. Would be nice to get faster response time. Also, turning crosswalk sign to green prior to cars signal going green would be helpful. There are 2 lanes on Yale turning right onto N. Chambers. Often one lane of cars let peds/bikes on green while other keep turning making this a safety	1	

ID	Type	Impact	Comment	Likes	Dislikes
			hazard. If single can be adjust to let peds / bikes go first before cars turn green that ?may? help.		
133	Crossings	High - This issue significantly impacts my ability to safely bike.	There is no marked crossing at this point, although the Powerline Trail is a main walking/biking trail and crossed a wide, moderately used street, and is directly next to and frquently used by students from Mrachek middle school. There are no street markings, no signs and no crossing lights. There is a marked crossing and signage about 300 feet north of this crossing at E Bails Place, but that crossing is rarely used. Moving that marked crossing to the Powerline Trail would be a huge improvement in crossing safety.		
134	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	This is city property and is undeveloped. It gets overgorwn with grass and weeds during the summer, and there is a fairly deep, narrow ravine running through it from erosion. Students from Mrachek middle school use it often to access the neighborhood to the north, but there is no paved trail. There is a chain-link fence on the south end of this property with an opening about 4 feet wide, and the ravine runs through that gate, making it very difficult to walk through and impossible to ride a bike through. A pathway from S Salida Cir to the Powerline Trail would be great.	2	
136	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Connect this spot with Florida so folks don't have to go up to mississippi or iliff.		
137	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	Extend the sable bike path that stops at jewell north so it becomes a main "bike friendly" path in aurora. there are schools, trains, retail, & residential on sable. it just makes sense.	2	
138	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	Bike route ends here & with safe riding ability if you need to go further West on Yale. If we can add safe bike passage from here to Hampden, that would be great. Only one side of yale has a sidewalk wehn going west and it is not safe to peds / bikes.	2	
140	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is no pathway between Great Plains Park and the pathway along E470. To get to the E470 pathway, you would have to ride along E Jewell Ave which is very dangerous due to high speeds, heavy traffic and a narrow	3	

ID	Type	Impact	Comment	Likes	Dislikes
			shoulder. Only a crazy, suicidal person would do this. Ultimately I would like to see E Jewell Ave widened and a seperate bike path included in the design, but for now a seperate bike path away from traffic would be great.		
144	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	It's hard to comment on the visionary bikeway network for far southeast Aurora when there is a lack of context for how our network will work with all of the space in between our city boundaries between island Aurora and mainland Aurora. If I work in far southeast Aurora and want to ride my bike to mainland Aurora, how do the two parts connect through non-Aurora?		
152	Bike Lane Condition (e.g. pavement quality, debris)	Low – This issue is a minor inconvenience or suggestion.	This section of the trail along Murphy Creek between Tollgate Crossing and Sorrel Ranch is currently not paved. Paving would help the trail dry and not be as muddy following rain and snow.	1	
153	General Feedback	Medium - This issue somewhat impacts my ability to safely bike.	Glad to see plans for a path connection between Harvest and Aurora Reservoir near the SE rec center - this would be safer than the current solution of utilizing neighborhood streets through Beacon Point.	1	
164	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Not sure if the places where the purple trail/path level street routes on the visionary map intersect are intended to be interpreted as protected intersections, but hope they are as most of these intersections would be much safer for all users if they could be upgraded to protected intersections.	2	
165	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	The bike path should be extended to Peoria Station HL		
166	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is an existing 12-foot side path between Fitz Pkwy and 23rd Ave on Ursula Street and between Ursula Street and Pitz LRT Station along south side of Fitz Parkway. Also, there is existing bike lanes on Ursula Street between 23rd Avenue and Moutview Blvd. Therefore, Ursula Street between 23rd and Fitz Parkway and Fitz Parkway between Ursula and Fitz LRT Station should be marked as Sidepath. Ursula between 23rd and Montview should be depicted as a bike lane.		
167	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There should be a sidepath on the south or east side of Fitz Parkway between Peoria and Colfax HL		
168	Connectivity Issue (e.g. missing link,	High - This issue significantly impacts my ability to safely bike.	Why do we have a missing link here? HL	1	

ID	Type	Impact	Comment	Likes	Dislikes
	difficult connection)				
170	General Feedback	High - This issue significantly impacts my ability to safely bike.	This area needs more work. The segmented sidepaths should be removed or revised. HL		
171	General Feedback	High - This issue significantly impacts my ability to safely bike.	Adjust the line work to align with the ground configuration HL	1	
173	General Feedback		Smith between Powhaton and Monaghan is also identified as part of a primary route HL	1	
174	General Feedback		As a primary route, Monaghan should be a side path or SBL HL	1	
175	General Feedback		This needs to somehow connect back to the overall network HL		
176	General Feedback		Bike facility on Peterson Road should be extended to 56th HL	1	
177	General Feedback		Bike facility on Manila should be extended to 6th Ave HL		
178	General Feedback		Missing segment HL		
179	General Feedback		Missing segment HL		
180	General Feedback		Missing segment HL	1	
182	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	a bridge over the High Line Canal near where 1st Ave dead ends at it would connect the bicycle facilities on 1st Ave, 2nd Ave and the High Lind Canal Trail.	1	
183	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This bridge is marked as an existing bicycle bridge, but can only be accessed by a set of stairs on both ends. It is not accessible to bicycles or wheelchair users in its current configuration.	1	
184	Bike Lane Condition (e.g.	High - This issue significantly impacts my ability to safely bike.	This supposed existing connection between Marina Park and Quincy Reservoir does not exist. There is a fence topped with barbed wire here. Having a gate here for	1	

ID	Type	Impact	Comment	Likes	Dislikes
	pavement quality, debris)		pedestrians and cyclists that is open during the day time would greatly improve connectivity and safety in the area.		
185	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Please upgrade the portion of the Quincy Reservoir Loop trail that uses the sidewalk to a two way cycle path next to a walking path, currently it gets crowded and is next to fast dangerous traffic.	1	
186	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Please upgrade the intersection of Memphis and Quincy to a protected intersection for improved safety and visibility of cyclists and pedestrians.	1	
187	General Feedback	Low – This issue is a minor inconvenience or suggestion.	This "existing" bicycle path is a long staircase. Should not be marked as a bike path.		
188	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This "existing" bicycle path segment is completley fenced off from the public. Would be great if there actually was a mixed use path along this drainage.		
189	Connectivity Issue (e.g. missing link, difficult connection)		This "existing" bicycle path connecting to Quincy Reservoir has a fence across it instead of a gate.		
190	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	This "existing" bicycle & pedestrian path is blocked by fallen trees and brush.		
191	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	Would love for the trail along West Toll Gate Creek to cross Quincy to Quincy Reservoir with an underpass.	1	
192	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	This underpass has a bunch of signs marking it as closed. Please reopen it.	1	

Figure 3. Visionary Pedestrian Network Comment Map

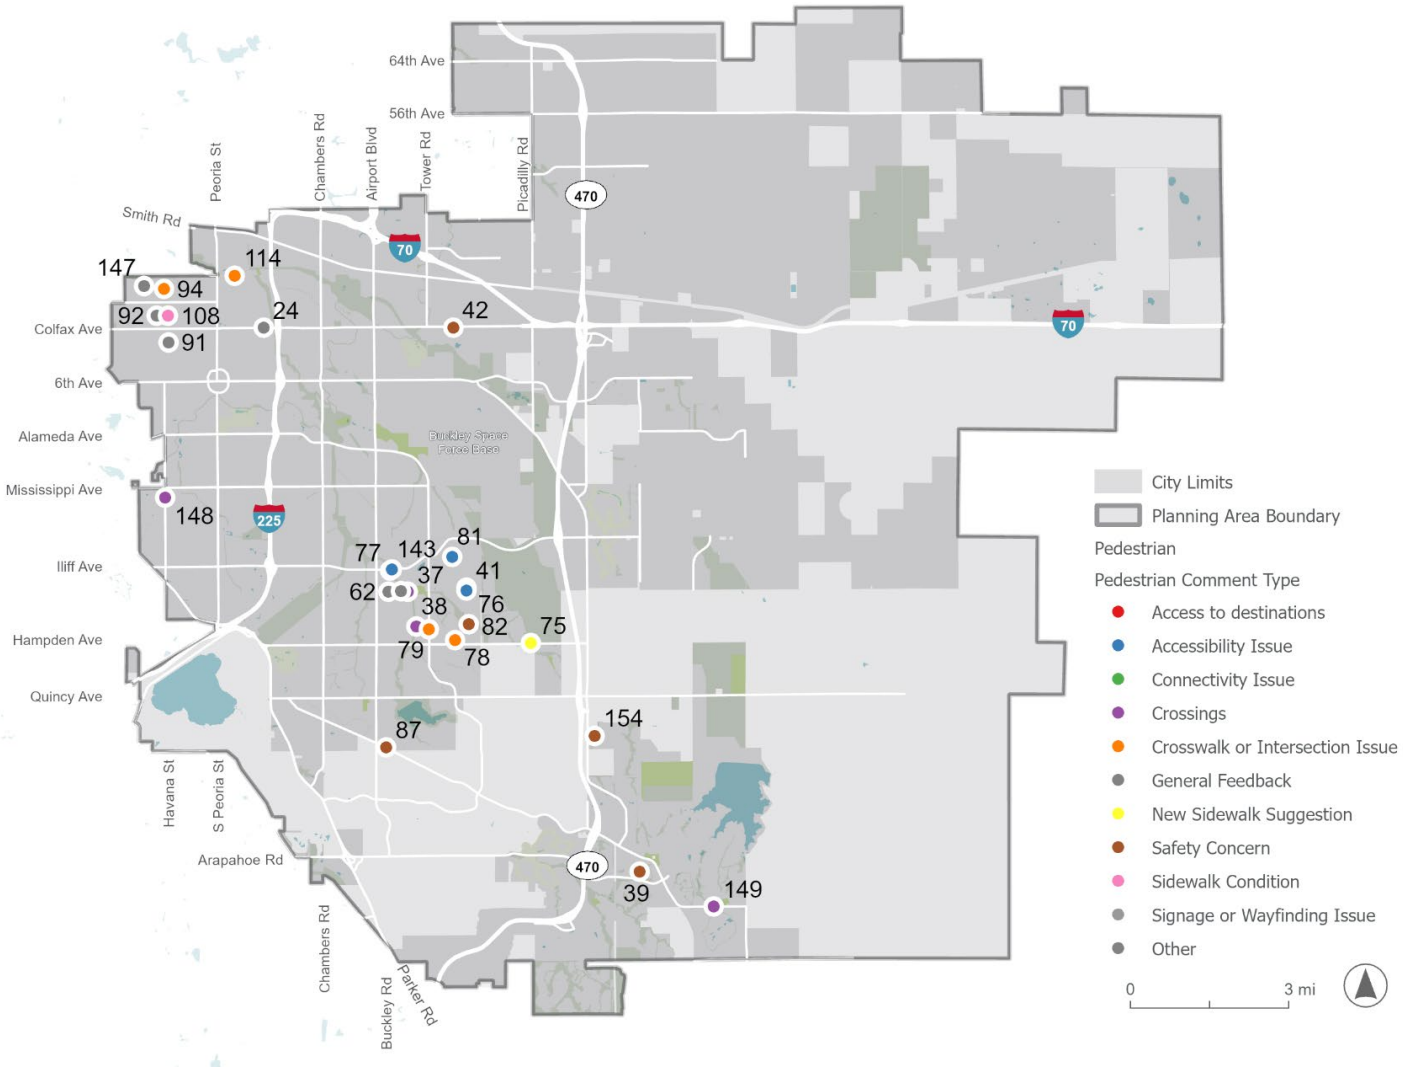

Table 3. Visionary Pedestrian Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
24	General Feedback	High - This issue significantly impacts my ability to safely walk.	TWB 4/11/25 test. Confirm and delete.		
37	Crossings	High - This issue significantly impacts my ability to safely walk.	Protected pedestrian crossing needed here	1	
38	Crossings	High - This issue significantly impacts my ability to safely walk.	enhanced pedestrian crossing needed here		
39	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	This is an extremely dangerous area to cross due to visibility issues and traffic speeding along Tallyn's Reach Parkway. It is in need of traffic calming and other measures.	1	
41	Crossings	Low – This issue is a minor inconvenience or suggestion.	The Villanova and Flanders intersection can be dangerous to cross due to speeding drivers, especially those who run the stop sign. Since this is a way to access a park with kids and is in a popular dog walking area anything that can be done to slow down drivers through this intersection like a traffic circle would be a boon. Cars parking close the the intersection also causes visibility issues, which would be prevented by the narrowing of lanes on the approach to a traffic circle..	1	
42	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	High - This issue significantly impacts my ability to safely walk.	The Slip lanes at the entrance to the Sports Park are designed to encourage drivers to turn quickly without stoping or slowing down, making crossing the entrance to this park unnecicarily The Slip lanes at the entrance to the Sports Park are designed to encourage drivers to turn quickly without stoping or slowing down, making crossing the entrance to this park unnecessarily dangerous.	2	

ID	Type	Impact	Comment	Likes	Dislikes
62	General Feedback	Low – This issue is a minor inconvenience or suggestion.	Sidewalks along Yale feel very awkward and don't make good use of the space between the sidewalk and the curb. This results in feeling uncomfortable when walking along it.		1
75	New Sidewalk Suggestion	Low – This issue is a minor inconvenience or suggestion.	A sidewalk and bike path connecting to the entrance of the Plains Conservation Center would be nice.	1	
76	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Medium - This issue somewhat impacts my ability to to safely walk.	Curb bump outs with ramps at the place where the power-line access road--which is also used as a walking and mountain biking path--crosses the street would make it more accessible, and make is safer and easier to cross the street.		
77	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Low – This issue is a minor inconvenience or suggestion.	The sidewalk where Ilif crosses West Tollgate Creek is narrow and can be difficult to use during busy times due to the barriers on either side.		
78	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	Low – This issue is a minor inconvenience or suggestion.	People sometimes park across the crossing from Flanders to Ceylon, making the ramp inaccessible. A curb bump out, perhaps accommodating the bike lane by having the bike lane closer to the sidewalk and the ramp on the other side of it closer to the street, would be nice to prevent this.	1	
79	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	High - This issue significantly impacts my ability to safely walk.	Drivers turning right off of Dartmouth onto Tower regularly drive right through the crosswalk without ever even looking for a pedestrian, only looking in one direction at the traffic they want to merge into. This is a regular spot for near misses.		
80	General Feedback		Really appreciate the wide verges on Yale giving a large buffer from traffic. Would be nice to have more verges that provide such separation from cars.		

ID	Type	Impact	Comment	Likes	Dislikes
81	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Medium - This issue somewhat impacts my ability to to safely walk.	A piece of fence has been installed across this path.	1	
82	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Low – This issue is a minor inconvenience or suggestion.	Better lighting along Flanders where it crosses Unnamed Creek would make it easer to see and be seen, even with the very bright headlights some cars have these days.		
87	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	At night crossing Wagontrail along Smokey Hill is dangerous due to low lighting.	2	
91	General Feedback	Medium - This issue somewhat impacts my ability to to safely walk.	What happened to the 13th Ave Multimodal study? Why are no sidewalk/pedestrian improvements along 13th ave shown here? This is a great project and would improve pedestrian access to many spaces, reduce speeds along 13th ave, and provide a safe route for kids to walk to and from school and nearby amenities. Please bring this project back if it has been reduced/put on the back burner.		
92	General Feedback	High - This issue significantly impacts my ability to safely walk.	Please widen the sidewalks and improve pedestrian access along 17th ave from Yosemite St to Peoria St. Situated midway between Montview and Colfax, this is a great spot for improving walkability and accessibility. 17th Ave also connects multiple parks (Spencer Garrett Park, City of Aurora Park, and Montview Park, intersects Del Mar Parkway, and crosses Crawford Elementary school and Project Worthmore. This is also a very good route for folks looking to walk to MLK library and the shopping on Colfax, to Stanley Martketplace, or to other neighborhood shopping (Spicy 9 Thai, Taco River).	1	

ID	Type	Impact	Comment	Likes	Dislikes
			Many apartment complexes and churches connect to 17th as well. The sidewalks are narrow and broken, and cars drive very fast down the street. Widening sidewalks and adding lighting would be a huge boon for this neighborhood. Thank you for your consideration.		
94	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	High - This issue significantly impacts my ability to safely walk.	There is a 3-way stop here, but you regularly see cars disregard this going east-west on 23rd. This is one of the major crossing sections next to a recreation center that has a lot of kids on a day to day basis. Seeing some sort of blinking red light, blinking stop signs, better signage and a cross walk would all be better visual cues to make this a safe intersection to cross.	1	
108	Sidwalk Condition (e.g. cracks, uneven surface)	Medium - This issue somewhat impacts my ability to to safely walk.	The sidewalks in my neighborhood are narrow and in poor condition. It would be easier and safer to walk to places like the library, rec center, and stores if these were improved and widened. Also on busy streets like Havana, people often park their cars on the sidewalk blocking the pedestrian walkways. Wider sidewalks would help discourage this.	2	
114	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	Medium - This issue somewhat impacts my ability to to safely walk.	The crossing at this intersection needs the correct signage for drivers. It's missing the statement that "when flashing, stop, then proceed when clear". This is how this crossing is supposed to be labled.		
143	Accessibility Issue (e.g., missing curb ramps, blocked paths)	High - This issue significantly impacts my ability to safely walk.	This intersect of Salida and Iliff needs an audible crossing button on all 4 corners. Students who are walking to Rangeview are not able to access the Illiff crossing to the north. I am a mobility teacher of Students with Visual Impairments and in order to cross north on Salida the students would have to walk westbound on Salida across the bridge to the street crossing then walk westbound all the way back to the school.	1	

ID	Type	Impact	Comment	Likes	Dislikes
147	General Feedback	High - This issue significantly impacts my ability to safely walk.	The sidewalks in the northwest Aurora area are narrow and substandard. They should be widened overtime as resource becomes available. HL	1	
148	Crossings	High - This issue significantly impacts my ability to safely walk.	A protected ped crossing is needed for this 1700' + stretch with bus stops on both sides of the street. HL	1	
149	Crossings	Medium - This issue somewhat impacts my ability to to safely walk.	Please add a crosswalk on Smoky Hill between Southshore and Blackstone. Perhaps at S Titus Way. Childeren who live in Southshore are zoned for Woodland Elementary School in Blackstone. Currently the only crosswalk is located at Smoky Hill and Powhaton	1	
154	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	The sidewalk along E. Chenango Pl where it crosses Tollgate Creek has sunken significantly. The city repaired a portion of the sidewalk but cones have remained and have fallen down in the last few months.	1	

Figure 4. Visionary Street Network Comment Map

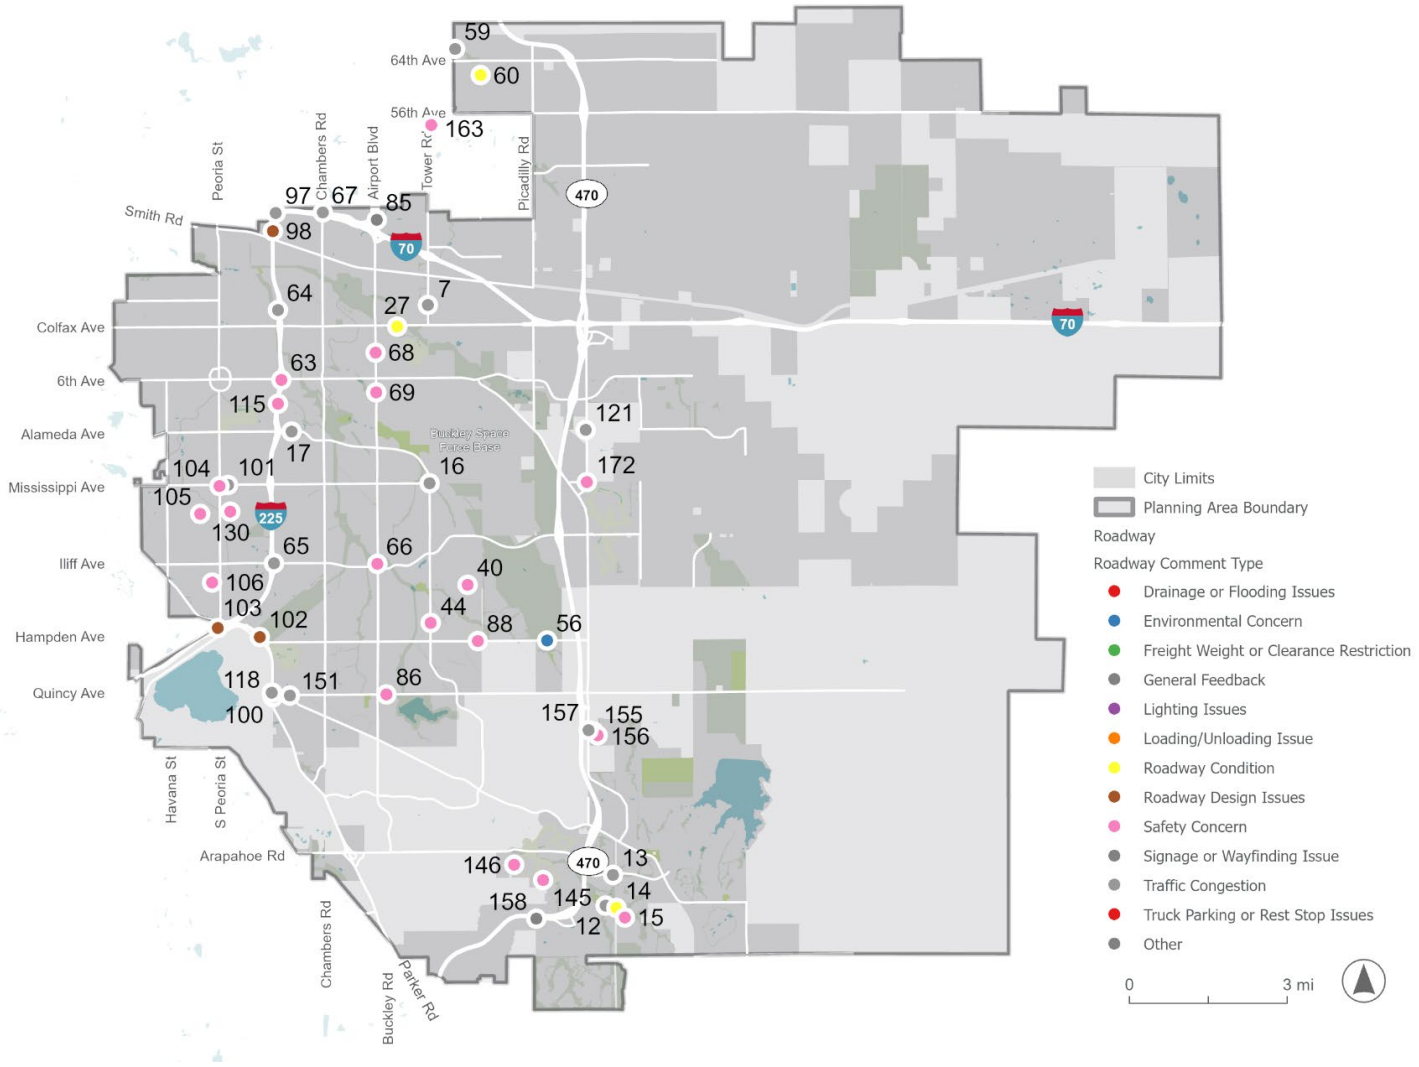

Table 4. Visionary Street Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
7	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Because Tower Road between Colfax Ave. and Smith Road is still only two lanes (one lane each direction) it becomes quite congested, especially during the busy commute times. North of Smith Road, Tower is 4 to 6 lanes, as is Colfax at the south. These multi-lane roads dump all of their traffic into the two lanes of Tower Road south of Smith Road to create huge bottlenecks. This section of Tower needs to be widened to 4 lanes to accommodate the 4 lanes of traffic coming from Colfax Ave and Tower north of Smith. I've lived in this area for 38 years and would love to see this issue finally addressed. Thank you for any progress that can be made toward solving this increasingly frustrating problem.		
12	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Low – This issue is a minor inconvenience or suggestion.	Would love a designated right turn lane here if possible		
13	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	really need a right turn lane here from Arapahoe onto southbound Aurora Parkway. Many people just cut through the immediate neighborhood to avoid that light and it feels unsafe for people living in that area. People race through the neighborhood to beat the light and pulling out from the neighborhood is limited visibility since cars come flying south down the hill after the light turns green. lots of accidents there.		
14	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	Road is getting torn up from all the construction trucks. Many drive through here to avoid all the lights on smoky hill - this should not be a thoroughfare for construction trucks just to avoid smoky hill. Road is completely trashed all the time.		
15	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	People drive insane on Irish between Aurora Parkway and the Whispering Pines neighborhood - many are cutting through the neighborhoods to get on 470. Speed limit is 30 - I see people driving upwards of 50 mph on this road. There are bike lanes along this road and kids along it all the time. It is ridiculous. Can we please install speed bumps here to make people slow down so no one gets killed from people driving insane? It really has gotten ridiculous and unsafe.		
16	Traffic Congestion	Medium - This issue somewhat	The traffic signals at Louisiana & Tower and Mississippi & Alameda tends to be very, very poorly timed during rush hour, resulting in backed up traffic nearly every morning. If the		

	(e.g., bottlenecks, poor signal timing)	impacts my ability to safely drive.	signals were timed more appropriately for northbound traffic in the morning, which is the great majority, traffic would flow much better here.		
17	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	The way traffic lights are staggered on westbound Alameda between Sable & 225 always causes traffic jams in the morning and evening, and due to the poor timing it seems like it encourages people to run red lights so they don't get stuck behind what will inevitably be several red lights.		
27	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	TWB 4/11/25 Streets comment test. Confirm and delete.		
40	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	The intersection of Flanders & Villanova is a two way stop with very poor visibility due to the curve of the road, which is often reduced to nearly no visibility due to parked cars. Cars frequently run the stop sign, illegally split the lane on the approach to the intersection or stop when they don't have a stop sign out of caution for the frequent stop sign runners. If at all possible this would be an optimal location for a traffic circle to control the unpredictable driving on the approach and force speeding drivers to at least slow down through the intersection. The current problem is only going to get worse with the two new apartment complexes due to be built on Villanova without modifying the current intersection.		
44	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	A road diet along Tower to reduce speeding would not be remiss, perhaps turning the curbside through lanes into turn only lanes. Tower is also popular with cyclists who are sometimes forced into the driving lanes due to busy sidewalks which feels very dangerous and unpredictable as a driver. Giving cyclists a designated space seperate from the roadway would be great.		
56	Environmental Concern (e.g., noise, air quality)	Medium - This issue somewhat impacts my ability to safely drive.	When Hampden just south of the Plains Conservation center is upgraded please make it a bridge so that the pronghorns which frequently cross here will go under the bridge instead of across the road. This would also allow for the construction of a safe pedestrian underpass.		

59	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Tower road should be 6 lanes with sidewalks, crosswalks and designated right turn lanes to avoid slowing traffic flow. There are so many businesses you have to stop every block for right turns.		
60	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	Fix pot holes and add a speed bump or 2 to assist neighbor hood trafffic.		
63	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	The most recommended way to access Aurora City Place from southbound I-225 is to exit to westbound 6th, then take a left on Potomac. With only a single right turn lane, this lane either backs up from traffic or encourages drivers to cross three lanes in under 600 feet, which creates a considerable risk of accidents.		
64	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Every day, the southbound corridor on I-225 between I-70 and 6th Avenue experiences substantial congestion. As speeds pick up after the Colfax on-ramp, it appears that most congestion is caused by the rapid merging of both 17th Pl and Colfax within a quarter-mile of each other. Closing the southbound on-ramp on 17th, or otherwise redirecting it to be coincident with the Colfax merge, would reduce the slowdowns that then ripple out into the Colfax ramp.		
65	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	Westbound Iliff traffic shares one lane to turn onto Abilene, northbound I-225, and southbound I-225, with two of those three dependent on the Abilene light being green to proceed. This creates a large backup in the fourth (rightmost) lane, and a gamble for those intending to travel southbound on whether they could merge from the 3rd lane in time to take the clover-leaf exit. Changing the northbound I-225 on-ramp to an exit-only and creating a new lane for southbound traffic to enter into from the third lane would help balance this disparity and help improve flow.		
66	Safety Concern (e.g., conflicts with other modes, sightline	Medium - This issue somewhat impacts my ability to safely drive.	There are a lot of drivers exiting from the shopping center at the northwest corner of Iliff and Buckley that are intending to turn left (eastbound) onto Iliff, causing them to cut in front of multiple lanes of traffic to make it into the turn lanes directly across from the entrance. Changing this to an entrance-only ramp would push these drivers to use the light at Pagosa Way to the north, giving a more reasonable distance for lane changing.		

	issues, speeding)				
67	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	The timing of the lights northbound on Chambers at I-70 causes frequent backups for semis turning onto the westbound on-ramp. Because so many semis are in this space, traffic turning north from the westbound I-70 off-ramp frequently get stuck in the intersections, creating a lot of split-second decisions that result in cars getting cut off or maneuvered around, which substantially elevates the risk of accidents.		
68	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	Some traffic treats the northbound stretch of Airport Blvd between 6th Ave and Colfax as a 45 speed limit, but the area is zoned as 40 (it increases to 45 at Colfax). This creates a conflict between drivers wanting to comply with the speed limit or matching traffic to reduce aggressive driving/road rage incidents. Rezoning to 45 would alleviate this conflict and align to how drivers operate today.		
69	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	On Airport Blvd, there is a light supporting traffic in and out of Pickens Technical College, but only an unprotected intersection for WIlliam Smith High School. This creates traffic problems when cars try to turn left into the school or in either direction out of it. Recommend adding another light for William Smith to reduce the need for drivers to guess when all lanes of traffic are stopped/empty, as morning traffic frequently backs up beyond this intersection during the morning commute.		
85	Signage or Wayfinding Issue	Low – This issue is a minor inconvenience or suggestion.	The sign leading to 40th Ave/Pena Blvd on NB Airport Blvd shows that the middle lane is a straight-only, but the light itself allows both straight and left turns. Sign prior to the light needs to be updated.		
86	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Pitkin & Quincy intersection has fences that block sightlines on the north side of Quincy and and people often turning left in front of oncoming traffic that is going straight.		
88	Safety Concern (e.g., conflicts	Medium - This issue somewhat impacts my	Fences create poor sightlines at Greenwood & Hampden.		

	with other modes, sightline issues, speeding)	ability to safely drive.			
97	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	If the I-70/I-225 junction is ever reworked, separate lanes should be designated from both I-70 and 225 to a Pena Blvd ramp, perhaps a flyover that allows Chambers Rd traffic to be separate from the Pena Blvd exit. Separate access directly to HOT lanes would be beneficial as well.		
98	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	If the I-225 NB to I-70 ramp is ever redesigned, there should be no split lanes (like the second lane). Given the current traffic flow, this could have two lanes for I-70 W and two lanes for I-70 E instead of the current 2 to 70W 1 split and 1 to 70E.		
99	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Poor signal timing on Parker Road makes me hate going that way. The signals are timed very poorly and at times you can end up stopping at every single traffic light all the way down. The same goes almost all of the other major routes nearby such as Hampden, Quincy, Chambers, Buckley, etc. This causes unnecessary traffic buildup and a lot of stop/go conditions, which lead to crashes and a lot of people merging to go around slower traffic after every stop.		
100	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	The intersection of Parker and Quincy needs a major overhaul, perhaps something similar to Parker and Hampden or a DDI to help move the large volumes of traffic from Parker to Quincy, especially at high road use times.		
101	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Poor signal timing on Mississippi causes a lot of traffic issues, especially around the I-225 interchange. Stopping at several signals between Havana and I-225 is often required, rendering this overused corridor even slower. Additionally, there are too many possible turns. Reducing intersections with left turns and removing traffic lights where possible should be a goal.		
102	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	On the rare occasion of flash flooding or rapid snowmelt, there are some locations in the curves on Parker Road where water pools against the retaining wall in the center, often leading to flooding in the inside lanes.		

103	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	On the rare occasion of flash flooding or rapid snowmelt, there are some locations in the curve on the ramp from Peoria to I-225 where water pools causing the roadway to flood.
104	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	What is likely the world's shortest center turn lane is at this marker. There are way too many turns taking place immediately near the intersection. Removing the center turn lane and placing a barrier that goes far enough back to accommodate the intersection's typical traffic storage would be beneficial.
105	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Low – This issue is a minor inconvenience or suggestion.	Many of the neighborhood intersections in Aurora could benefit from having their stop signs changed to roundabouts. With proper design, this could help slow traffic down and make these intersections safer. It could also reduce emissions/pollution from vehicles having to stop and go every few hundred feet between stop signs.
106	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	The intersection of E Harvard Ave and S Oswego St has a stop sign for S Oswego St. This causes confusion for drivers. The route to Eastridge Elementary is (incorrectly) designated as E Harvard Ave between S Peoria St and S Oswego St, then S Oswego St between E Harvard Ave and E Iliff Ave. There are often conflicts as this stop sign where drivers on E Harvard Ave stop even though they have no stop sign, or drivers on S Oswego St fail to yield becuase they assume it is a four way stop. A roundabout or four way stop would improve safety for this intersection.
115	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	This intersection really needs traffic signal control. Right now it has some stop signs. each direction should have a stop sign (all ways stop) because there is too much confusion and it causes backup of traffic and unsafe crossings.
118	Traffic Congestion	High - This issue	There is a large (300 plus unit) apartment complex approved to be built at Parker Rd and Quincy in the Eastbank shopping center. The neighborhood of Pier Point and Olive Glen

	(e.g., bottlenecks, poor signal timing)	significantly impacts my ability to safely drive.	Villas on S Achison Way already have difficult access to Parker Rd and Quincy, how does the coty or state highway department plan to mitigate the extra 500 plus cars a day from the new apartment complex getting onto Parker Rd or Quincy?
121	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Gun club needs to be for lanes all the way from 6th to Quincy. The new apartments and housing going up by Murphy creek is only going to make traffic on gun club worse and there needs to be a solution.
130	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	Please add speed humps on this side of the park, too. This is the side with the playground, plus a near blind curve. Speed humps were recently constructed on the opposite end of the park. Thanks!
145	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Easter Ave needs roundabouts or speed bumps to slow down the speed of traffic. This is a school bus stop route and is dangerous. This road also becomes a raceway after dark.
146	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Grandview High School kids cross here but there is no crosswalk or caution lights. Heavy traffic during school pickup times.
151	Traffic Congestion (e.g., bottlenecks,	Medium - This issue somewhat impacts my ability to safely drive.	Travelling Westbound on Quincy towards Parker Road during high traffic times will often see significant backups at Smoky Hill. The timing of the lights between smoky hill, the shopping center and parker road combined with traffic merging onto Quincy from Smoky HIll can make it impossible for traffic travelling west on Quincy to move forward more than 1 or 2 cars per light cycle.

	poor signal timing)		
155	Roadway Condition (e.g., potholes, uneven pavement)	Medium - This issue somewhat impacts my ability to safely drive.	E. Chenango Pl. between Gun Club and S. Biloxi Way has very uneven pavement and areas that collect water turning to significant ice areas in winter due to the uneven pavement. The road is in significantly poorer condition than the surrounding roads.
156	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	There is a significant amount of speeding along S. Biloxi Way between E. Chenango Pl and E. Bellewood Dr. Suggest adding speed humps between Chenango and Whitaker and between Whitaker and Grand to address the issue (similar to what was done on E. Chenango Pl. a few years ago.
157	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Low – This issue is a minor inconvenience or suggestion.	As the lot to the west of Gun Club in unincorporated Arapahoe county may become developed and Gun Club is widened, there have been proposals to turn intersection of S. Gun Club and E. Chenango Pl. into a 3/4 access or possibly signalized. Suggest community involvement and updated traffic study to determine neighborhood traffic impacts to Tollgate Crossing
158	General Feedback		Connecting Aurora Parkway to Parker Rd. as proposed here would be much more convenient than utilizing Inspiration
161	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	With such high taxes on transportation, it seems as though roads could be better maintained.
163	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Reservoir Road is unsafe due to cars & motorcycles constantly speeding and racing. Would like to see traffic slowed by speed bumps, police actively patrolling, or some more efficient system to control the traffic between Quincy and Flanders.

172	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Gun Club road from Quincy to 6th Ave is currently significantly over-capacity and needs to be two lanes in each direction. This intersection at Mississippi and Gun Club needs to be signalized since it is unsafe for turning movements most times of the day, primarily WB to SB and SB to EB, due to long cue times and a large speed differential. With new apartments, neighborhoods, and shopping developments planned and currently being constructed in this immediate area, the transportation system needs to catch up with the existing demand and rapid current and future development. If not, Gun Club will only become more unsafe and the accident rate at this intersection will only get worse.

SURVEY: ADDITIONAL FEEDBACK

Please share any additional thoughts or comments you would like the city to know about the proposed networks.

The proposed networks promise enhanced connectivity and economic growth, but careful planning for infrastructure scalability and equitable access is crucial to ensure long-term efficiency and inclusion.
THIS NETWORK PLAN IS A GAME-CHANGER! Faster speeds and wider coverage will supercharge businesses, education, and daily life—let's build a future where the city thrives digitally, connecting every neighborhood with innovation!
The networks show potential for improving accessibility, though concerns about cost, environmental impact, and technical implementation require transparent communication and community input to address effectively.
Love the idea of super-fast Wi-Fi everywhere—just please don't let it become the "urban legend" of coffee shops with passwords harder than solving a Rubik's cube. Smooth, reliable connections for all? Sign me up!
While I support the idea, we need more public input on the proposed networks.
I'm concerned about implementation costs. The city should thoroughly assess the proposed networks.
I wholeheartedly back the proposed networks! They'll boost connectivity and truly benefit our city.
The dual system of "ecological corridor + sponge city" is planned, and a self-purifying water circulation network is built by using rivers and green spaces, and rain gardens and ecological detention ponds are set up at nodes, which not only reduces the risk of flooding, but also forms a water-friendly space for citizens

Sensors are embedded in green belts to monitor the amount of carbon sequestration by vegetation in real time, and plant allocation is optimized through data feedback, so that green spaces can become quantifiable "urban carbon accounts".
Vehicle-road collaboration technology is used to automatically adjust tidal lanes during peak commuting hours, and dispatch instructions are sent to bike-sharing stations to alleviate "last mile" congestion.
Establish a real-time simulation model for key urban areas, so that policymakers can pre-infer the impact of decisions such as road closures and commercial layout adjustments on the surrounding areas.
Citizens can earn points for participating in community proposals, garbage sorting supervision, etc., and redeem them for public services
When designing the network, priority should be given to the needs of residents. For instance, improving the quality of life through digital convenience services (such as medical appointment scheduling and traffic navigation) rather than merely pursuing technological advancement.
Clarify the boundaries of data collection, establish a transparent privacy protection mechanism, and prevent public networks from becoming a breeding ground for information leakage. It is suggested to introduce third-party security audits.
Ensure that the network coverage reaches low-income communities and elderly groups, offer low-cost or free options for selection, and avoid exacerbating the digital divide.
Adopt energy-saving infrastructure (such as low-power sensors, renewable energy power supply), and utilize network to optimize urban energy consumption (such as intelligent street lamps, garbage management).
Adopt energy-saving infrastructure (such as low-power sensors, renewable energy power supply), and utilize network to optimize urban energy consumption (such as intelligent street lamps, garbage management).
The network should possess the ability to withstand disasters (such as extreme weather conditions and cyber attacks), and key nodes should have backup systems to ensure smooth communication in emergency situations.
Make non-sensitive data available for enterprises and developers to use, promote local innovation (such as traffic optimization apps, business analysis tools), and stimulate economic vitality.
Governments, enterprises, communities and academic institutions should jointly participate in planning and supervision, avoiding technological monopolies or decisions that deviate from actual needs.
The network architecture should be designed with an upgrade margin reserved to accommodate future technologies (such as 6G, quantum communication) and unanticipated demands (such as response to sudden public events).

Utilize the Internet to enhance urban cultural identity, for instance, by means of virtual museums, local content platforms, or augmented reality guided tours to improve tourism experiences.
Avoid excessive reliance on short-term capital investment, and plan a clear business model or public-private partnership (PPP) mechanism to ensure the sustainability of operation and maintenance funds.
The proposed networks must prioritize equitable access and cybersecurity, ensuring reliable connectivity for all neighborhoods while safeguarding resident data from potential threats.
Prioritize expanding broadband access to underserved communities
Partner with manufacturers or nonprofits to provide low-cost devices (laptops, tablets) for residents who cannot afford them.
The proposed networks seem promising. I hope the city speeds up implementation for quicker connectivity gains.
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
It is suggested to establish a real-time traffic data monitoring system, integrating GPS, cameras and citizen feedback. Through AI analysis, it can identify congestion patterns, accident hotspots and travel demands. The data should be transparent and made public, and be used to dynamically adjust traffic signals, bus schedules and infrastructure investment priorities, ensuring that resources are allocated to the most beneficial projects.
The planning should focus on covering low-income communities and people with disabilities, and avoid "traffic deserts". For instance, additional measures such as installing barrier-free buses and providing subsidies for low-income passengers should be taken. Moreover, it is necessary to ensure that new bike lanes or bus routes benefit under-served areas rather than merely connecting affluent communities.
When designing hub stations, integrate public transportation, bicycles, shared micro-mobility (electric scooters/bicycles), and pedestrian paths. For instance, at railway stations, add bicycle parking racks and shared vehicle zones, and provide real-time transfer information to reduce transfer time and costs.

All infrastructure needs to be prepared for extreme weather conditions: raise flood-prone sections, use permeable paving materials, and install sun-shading canopies and cooling designs for bus stops. Long-term planning should reduce asphalt pavement and increase green belts to mitigate the heat island effect.
I think it's fine to keep things as they are.
I am neutral towards improving all kinds of transportation. However, this method can be used to test the effectiveness. Before each project is launched, an "Open Street Day" is held to temporarily renovate the pilot area for citizens to experience and provide feedback. For instance, temporary flower pots are used to demarcate the bicycle lanes, and after collecting opinions, a permanent plan will be decided.
Regarding the improvement of transportation and traffic. Plan dedicated nighttime freight transportation periods and urban micro distribution centers to reduce the traffic volume of trucks during the day. Encourage the use of electric freight bicycles for last-mile deliveries to reduce noise and pollution.
Regarding children's safety on the roads. Build a "safe walking circle" around the school, install speed bumps, widen the sidewalks and set up volunteer security posts. Promote the "walking school bus" program, where adults lead children in teams to walk to and from school together.
Initiate congestion pricing or low-emission zones, and regulate traffic flow through time-based pricing. The revenue should be directly used to subsidize public transportation to form a virtuous cycle. Public consultation should be conducted in advance to ensure the fairness and transparency of the plan.
Regulation of shared mobility. Standardize the parking areas for shared bikes and scooters, and require operators to provide service quotas for low-income communities. Use electronic fence technology to prevent random parking and impose fines on enterprises that over-provide.
Special evacuation routes and bus priority lanes for disasters should be formulated and regular drills should be conducted. It is necessary to ensure that key routes can be quickly converted into corridors for transporting relief supplies in the event of an earthquake or flood.
Design linear parks along the main thoroughfares, integrating bike lanes, walking paths and greenery (like Singapore's "Park Connectors" model). This will enhance the commuting experience while promoting ecological connectivity.
Analyze the commuting pain points of major employment centers (such as science and technology parks, hospitals), and launch peak-hour direct buses or corporate cooperation shuttle buses. Commuting allowances can be provided to encourage employees to give up driving by themselves.

Open up specific areas to test new technologies such as autonomous shuttle buses and intelligent street lamps. Cooperate with enterprises and universities to turn Aurora into a smart transportation laboratory, and attract investment and talents.
Adding cultural elements is what we should do. Incorporating local artistic elements (such as murals and sculptures) into facilities like stations and bike lanes can enhance citizens' sense of belonging. For instance, the bike lane painting in Portland significantly reduced the rate of violations.
Promote the "Green Commuting Points" APP. Users can exchange points for discounts on goods or quotas for public welfare donations by walking or cycling. Cooperate with insurance companies to offer health insurance premium discounts to active users.
Explore diversified financing: Land value-added gains from TOD (Transit-Oriented Development) model, corporate naming sponsorship for stations, carbon trading funds, etc., to reduce reliance on traditional fiscal resources.
All newly-built roads should reserve space for future upgrades (such as BRT lanes and expansion of underground pipelines) to avoid repeated excavation. A special fund for traffic should be established to ensure that the funds for long-term maintenance are not misappropriated.
I prefer to ride a bike. It's easy to get around and I don't have to get stuck in traffic jams. It saves me a lot of time and exercise
Strengthen road construction
Increasing the proportion of bicycle trips helps to reduce vehicle exhaust emissions, reduce energy consumption, and play a positive role in environmental protection and sustainable development of cities. Optimizing the transport network can improve the efficiency of public transport operations, encourage people to use public transport, reduce the use of private cars, and thus reduce carbon emissions. Through street improvement, urban green space and public facilities can be increased, urban ecological environment quality can be improved, and livable cities can be built. Personally, I think it's okay
The improvement of the bicycle lane network and the encouragement of bicycle travel will help reduce the use of motor vehicles, thereby reducing exhaust emissions and noise pollution, and improving the ecological environment quality of the streets. At the same time, a good sidewalk environment can increase the green space and landscape facilities of the street, and enhance the aesthetics and comfort of the street.
1. Significant help: the improvement of bicycle lanes, traffic networks and sidewalks can optimize street space in an all-round way and significantly improve street quality. 2. Organic linkage: Improving the three types of channels can make street traffic more orderly and more active, which is an important driving force for street improvement.

3. Fit the trend: Their upgrading is in line with the needs of green travel and livable city construction, injecting new vitality into street development.
I hope the proposed transportation network can have more bike lanes to encourage green travel. Also, it would be great if there are more convenient transfer points between different types of public transportation, like buses and trains. And better signage and information systems at stations would be very helpful for both locals and tourists to navigate easily. Additionally, integrating more smart technologies to manage traffic flow would improve the overall efficiency of the network.
Smooth access: The three make street traffic more orderly, of course, support street improvement. Perfect bicycle lanes, transportation networks and sidewalks, suitable for multiple travel, for the street "extra points". They improve access conditions, reshape street functions, and contribute to street improvement. I support improving bike lane networks, transit networks and sidewalks. These improvements contribute to improving traffic safety, promoting green travel, optimizing urban space use and enhancing street vitality, which has a positive impact on the sustainable development of cities and the improvement of residents' quality of life.
In my opinion, the optimization of bicycle lane networks, transportation networks and sidewalk improvements have a positive and important supporting effect on street improvement. They can improve the traffic efficiency of streets, ensure the safety of pedestrians and cyclists, green travel, enhance the vitality and livability of streets, and make streets more in line with people's needs for a better living environment.
1. Incorporate more bike lanes for eco-friendly commuting. 2. Ensure real-time traffic info available at stations. 3. Plan for seamless transfer between different modes. 4. Consider noise reduction measures near residential areas. 5. Have emergency response plans for transport disruptions.
The optimization of bicycle lane network, traffic network and sidewalk improvement play a vital supporting role in street improvement. First, a well-developed network of bike lanes encourages green travel, reduces vehicle congestion, provides safe Spaces for cyclists, and improves street traffic diversity. Secondly, optimizing the traffic network can make the vehicle pass more smoothly. Through reasonable planning of traffic flow lines and setting up intelligent traffic facilities, the traffic efficiency of the whole street can be improved and traffic accidents can be reduced. Finally, improving sidewalks can guarantee the right of pedestrians to walk, provide a

comfortable and safe walking environment for pedestrians, increase the pedestrian-friendliness of streets, make streets more dynamic and attractive, and thus promote the overall improvement and sustainable development of streets. Very supportive
Optimizing the transportation network can reduce congestion, allow vehicles, pedestrians and bicycles to move in different directions, reduce mutual interference, and make traffic flow on the streets smoother. Improving the network of bike lanes will encourage more people to cycle and reduce motor vehicle use, which will help reduce carbon emissions and improve the urban environment.
Sure,here are some brief thoughts: 1. Ensure better connectivity between suburbs and city centers to facilitate daily commutes. 2. Prioritize pedestrian safety with more crosswalks and protected walkways. 3. Consider dedicated lanes for electric vehicles to encourage eco-friendly transport. 4. Improve signage and navigation to make it easier for drivers and tourists. 5. Plan for future growth and potential expansion of the network.
Separating pedestrians and vehicles is more effective.
These are all meaningful and worthy of support. The improvement of the bicycle lane network and traffic network will help optimize the travel structure of the city, improve traffic efficiency, and reduce congestion and environmental pollution. Improving sidewalks can enhance the safety and comfort of pedestrians and reflect the care for pedestrians. Street improvement can take into account various factors, such as aesthetics, functions, etc., to create a more livable and navigable urban environment and promote sustainable urban development. They play an important role in improving the quality of cities, meeting the diversified travel needs of residents and promoting green travel.
For the proposed network, cities should focus on balanced coverage of the network between different regions to avoid weak signal or no network in remote areas. At the same time, it is necessary to ensure the integration of network construction and urban landscape, such as the design of communication base stations to be more beautiful and hidden, and reduce the damage to the urban style. In addition, network security should be fully considered during construction to prevent data leakage and protect the privacy of citizens.
It is hoped that the city will take compatibility seriously as it moves forward with the proposed network. Ensure that the new network can be seamlessly connected with the existing equipment and systems, and reduce the replacement cost of citizens and enterprises.

At the same time, it is necessary to plan the network expansion space in advance to cope with the future population growth and the demand for explosive rise in data volume, and avoid network overload and performance degradation in the short term.
The proposed network should be able to withstand traffic shocks such as extreme weather and large events to ensure that it does not drop at critical times. Actively integrate 5G and Internet of Things technologies to make urban smart management and citizens' lives more convenient. In combination with the steady progress of urban development, do not be too ahead or behind, and match the actual needs
It is recommended that cities focus on the convenience of network upgrades to ensure that the proposed network can be iterated with low cost and high efficiency in the future and adapt to constantly changing technologies and requirements. Pay attention to the impact of network construction on the surrounding ecology, and adopt environmentally friendly materials and construction methods to reduce the interference to the urban ecological environment. It is hoped that the proposed network will be built with interfaces to integrate with future emerging technologies, such as quantum communication, to lay the foundation for the long-term development of the city
The proposed network construction should consider combining with community services, such as providing exclusive online assistance for the elderly and disabled, such as telemedicine assistance and online living guidance. It is necessary to pay attention to the control of pollution such as noise and dust in the process of network construction, and reduce the interference to the daily life of urban residents. It is hoped that the city will promote the linkage between network construction and cultural industry, use the network to spread city characteristics culture, and help promote cultural and creative products
It is hoped that the city will attach importance to network security supervision, set up a strict protection mechanism for the proposed network, prevent hackers and malware intrusion, and ensure the information security of citizens. The proposed network construction should be adapted to the different architectural styles of the city, and the design of facilities such as base stations can be integrated into the surrounding environment without damaging the coordination of the urban landscape. Promote the coordination between network construction and education, and use the network to build online learning resources for schools and enrich education channels
When the city promotes the proposed network, it needs to build a user feedback platform simultaneously, so that citizens can feedback network problems and use needs at any time, and optimize and adjust in time. Pay attention to the applicability of network construction to vulnerable groups, such as the design of easy-to-operate network terminals and interfaces to help the elderly and visually impaired groups easily access. It is suggested that the proposed network be deeply integrated with the urban emergency warning system, so that alerts can be pushed quickly and accurately when disasters come, and the safety of people's lives can be guaranteed.

The proposed network construction should pay attention to cross-regional coordination, break administrative boundaries, ensure the smooth flow of inter-city networks, and promote regional integration. Cities should encourage innovation in network construction and introduce new technologies to improve network performance, such as edge computing, and reduce data transmission latency.
It is hoped that when the city plans the proposed network, it can combine the layout of public space and set up free high-speed Internet hotspots in parks, squares and other places to enhance leisure experience.
It is hoped that when the city promotes the construction of the proposed network, it will make full use of idle space, such as abandoned buildings and lampposts, to reduce construction costs and footprint. It is necessary to pay attention to the protection of wildlife habitat in network construction, rationally plan routes, and avoid interfering with ecological balance. It is suggested that the proposed network be integrated with the urban tourism industry to provide tourists with convenient network services such as scenic spot tour and intelligent translation
In the proposed network construction, the city is expected to customize exclusive network services for different scenarios (such as hospitals and schools) to meet special needs. Pay attention to the compatibility of network construction with existing infrastructure, avoid repeated construction, reduce construction costs and impact on citizens' lives. Promote the proposed network to help urban environmental monitoring, and use the network to transmit environmental data in real time to provide strong support for ecological governance.
Bike lane network: Supported. It helps to encourage green travel, reduce traffic congestion and environmental pollution, and improve the health of urban residents. Transportation network: Continuous improvement is necessary. Efficient transport networks are key to the functioning of cities, promoting economic development and facilitating the movement of people and goods. Improving sidewalks: Very supportive. It can ensure the safety of pedestrians, improve the comfort and convenience of walking, and enhance the livability of the city. Street Improvement: Overall support. Street improvement can enhance the image of the city, optimize public space, provide residents with a better living and social environment, and also benefit business development.
Convenient transportation is convenient for commuting to work
Well-developed road traffic is more suitable for living

Propose adding more bike lane connections to commercial areas, such as solar-powered lighting and 24/7 surveillance near shopping centers to enhance nighttime safety. Public transit should prioritize coverage in low-income neighborhoods for equitable access. Sidewalk improvements must focus on universal design, including tactile paving and voice navigation for the visually impaired.
Propose adding e-bike charging stations and expanding bike-sharing systems in the bikeway network to reduce short-distance car trips. Public transit should integrate real-time arrival apps and collaborate with communities to design safe nighttime waiting zones. Sidewalk improvements should prioritize school zones with colored anti-slip surfaces and child-friendly signage.
Propose integrating "green cycling corridors" into the bikeway network, such as eco-friendly paths along rivers or parks. Public transit should adopt zero-emission electric buses and optimize seamless transfers at hubs. Sidewalk improvements must mandate slip-resistant permeable materials to reduce puddles and add temporary rest seats for people with disabilities.
Propose smart sensor-activated lighting in bike lanes to adjust brightness based on rider traffic for energy efficiency. Public transit should partner with ride-sharing platforms to offer "last-mile" connectivity. Sidewalks in commercial areas should pilot retractable shade structures to combat extreme weather. Street improvements should prioritize smart signal optimization over lane expansion to reduce congestion.
Propose integrating community art projects into sidewalk upgrades, such as locally-designed tile patterns or interactive installations to foster cultural identity. Public transit should add multilingual signage at hubs to serve immigrant populations. Street improvements should adopt "shared space" designs (e.g., blended pedestrian/vehicle zones) instead of widening lanes to enhance safety and neighborhood vibrancy.
Propose solar-powered charging stations and self-service repair kiosks along bike lanes for long-distance cyclists. Public transit should integrate real-time crowding data via apps and provide accessibility navigation for disabled passengers. Sidewalk upgrades in senior-heavy areas need gradual-slope benches and emergency call posts. Street improvements should prioritize pedestrian crossing efficiency over one-way conversions.
Propose dynamic speed limit signs in bike lanes that adjust based on weather and traffic for 24/7 safety. Public transit should integrate a cross-platform ticketing system (e.g., unified passes for subway, buses, and bike-sharing) with flexible pricing for students and seniors. Sidewalks near medical facilities need guide dog rest areas and emergency kits to build barrier-free lifelines.
Propose AI-powered traffic prediction in bike lanes to dynamically adjust width during peak hours. Public transit should partner with remote-work companies to offer "flexible commuter passes" for off-peak travel. Sidewalks should pilot community co-design programs where residents maintain local walkways. Street improvements must eliminate lane expansions and use vertical green barriers to absorb vehicle emissions.

Propose using recycled plastic composite materials for bike lane surfaces to enhance sustainability. Public transit should collaborate with local businesses to sponsor amenities like free Wi-Fi and charging ports at stations. Sidewalks in tourist zones should integrate QR codes for historical landmark tours. Street improvements must reject lane additions and adopt congestion pricing to reduce private vehicle use.
Propose modular bike lanes that can be temporarily reconfigured for events or emergencies, enhancing public space flexibility. Public transit should integrate carbon footprint tracking, allowing riders to view their environmental impact per trip via apps to incentivize green travel. Sidewalks should feature "community hubs" at neighborhood entrances with seating, public art, and mini-libraries to blend mobility with social interaction. Street improvements must prioritize AI-powered traffic signal optimization over physical lane expansions.
Propose integrating solar-powered pavement lighting in bike lanes to enhance nighttime safety and feed clean energy into the grid. Public transit should adopt dynamic scheduling algorithms to adjust vehicle frequency based on real-time demand, reducing empty runs. Sidewalks in commercial zones need smart anti-slip tiles with sensors to detect and melt ice automatically. Street improvements should prioritize upgrading aging drainage systems over lane expansions to prevent flooding during rainy seasons.
Propose recycled rubber composite materials for bike lanes to reduce carbon footprint and enhance comfort. Public transit should adopt data-driven "demand-responsive routes" that adapt to real-time commuter patterns. Sidewalks need "multi-functional hubs" in neighborhoods with charging ports, drinking fountains, and first-aid kits. Street improvements should deploy smart dynamic lanes with LED markers to optimize space without physical expansion.
In our daily life, traffic safety is always around us. As soon as you set out, you will inevitably encounter traffic safety issues. A momentary distraction while walking, a momentary侥幸 when crossing the road, or a single violation while driving - even a minor oversight like these can cause a life to slip away in an instant.
For everyone, life is only one chance. For yourself and for those you care about, please abide by traffic rules and strive to achieve "Safe Travel with Us". Let's plant the four words "Safe Travel" deeply in our hearts forever!
Propose smart solar-powered streetlights in bike lanes with air quality sensors to provide real-time environmental data. Public transit should launch a "Green Points Program" where riders earn rewards for low-carbon travel. Sidewalks near parks and schools need "rain garden pathways" using permeable materials to manage stormwater and enhance aesthetics. Street improvements must reject lane expansions and adopt "shared space" designs with traffic calming and multi-functional zones.
Propose dynamic bike lane barriers that expand during rush hour and convert to public space off-peak. Public transit should partner with schools to deploy "student shuttle algorithms" matching commute routes. Sidewalks in aging communities need AI-powered fall

prevention systems with pressure sensors and cameras. Street improvements must prioritize all-way pedestrian signals to reduce wait times and enhance walkability.
Propose piloting solar-kinetic bike lanes that harvest energy from rider motion and sunlight to power streetlights, creating carbon-neutral corridors. Public transit should launch inter-suburban micro-shuttles to seamlessly connect outskirts with downtown hubs, reducing cross-region private car use. Sidewalks near transit hubs need smart LED-guided tiles to direct tourists to attractions. Street improvements must adopt adaptive curbs that adjust height based on traffic flow to optimize parking and cycling space, eliminating lane expansions.
Propose a community co-design platform for bike lanes, enabling residents to participate in route planning via apps. Public transit should pilot a carbon-credit ticketing system where riders earn discounts on city services for low-carbon travel. Sidewalks near industrial zones need "eco-noise reduction paths" with sound-absorbing plants and materials. Street improvements must adopt dynamic lane allocation technology to adjust functions (e.g., temporary bus priority lanes) based on real-time data, avoiding physical expansion.
Propose smart temperature-regulated bike lane surfaces that melt snow in winter and cool in summer for year-round safety. Public transit should implement an accessibility booking system where disabled riders reserve station assistance via apps. Sidewalks in commercial areas need retractable shade structures that deploy during peak hours. Street improvements must adopt mini-roundabouts with adaptive signals to optimize intersections without lane expansions.
Propose solar-powered bike lane canopies for shade and nighttime lighting. Public transit should test tidal bus lanes that adjust width during rush hours. Sidewalks near hospitals need emergency medical corridors with ramps and AEDs. Street improvements must prioritize smart drainage systems with flood sensors over lane expansions.
Propose wireless charging stations for e-bikes along bike lanes to extend range. Public transit should create dynamic micro-routes with temporary stops based on real-time demand. Sidewalks need AR-enhanced cultural walls to showcase local heritage. Street improvements must replace physical barriers with holographic lane markers for adaptive space use.
Propose air-purifying plant barriers in bike lanes to absorb traffic pollutants while enhancing rider experience. Public transit should pilot hydrogen-powered buses on industrial-residential corridors. Sidewalks at transit hubs need multilingual smart signs with voice assistance for tourists. Street improvements must adopt modular curbs that adapt for parking, cycling, or events through elevation control.
I do not support bike riders. They do NOT follow the road rules and cause accidents. Bike lanes are stupid. They cut you off and pedel thru red lights. THEY cause accidents. If you can make roadways better to enforce PROPER biking, I might change my mind. And the motorcyles that pop wheelies going down Iliff btwn Kitteridge and chambers

I think overhead walk ways would be better and safer for pedestrians and allow traffic to flow better.
Increase the use of electric busses.
Aurora has a huge opportunity to really improve the bike-walk-run areas of the city by connecting them better, there are gaps (sharing lanes with cars, trucks don't work, and most drivers are angry, rude, and seldom follow the law when it comes to pedestrian right of ways, and APD doesn't do anything about it), and a straight stretch from Anschutz to Denver City Park without stop signs would be awesome. Another example the Highline Canal I-70 crossing is very urban, filthy, and not really a "bike" or "run" and instead a path to nowhere, this could be improved with a real pedestrian bridge and extension of the trails (Rocky Mountain Arsenal anyone). Sand creek trail, Toll Gate Creek, side creek, Aurora and Quincy Reservoir, C470 Trail, there is opportunity here, and for running, I'd like to propose a parallel and or established and connected dirt trail, 5K, 10K, half marathon, full marathon distances loops are a plus. Whose idea was it to detour the RTD R line to Sable (impractical).
Wide streets promote unsafe driving, don't expand them!
Reduce residential speed to 20 please - this is how ped lives our saved - and as we all know - Aurora is doing a terrible job keeping pedestrians safe -
I am really in favor of the bikeway network in particular and love the idea of decentering cars in our communities and recentering pedestrians, bikes, and buses, and people in general instead of cars.
Adding more travel lanes for cars is a mistake and will only see the worst aspects of current Aurora spread further into the city. Fixing traffic light timing is a better use of resources without needlessly endangering the populace and making areas unpleasant and uncomfortable to be in. If certain streets and corridors are expected to need more capacity in the future then improving public transit is the optimal way to do so.
Your visionary network maps are terrible. In the bikeways map, there was too much attention paid to color-coordinating and so its hard to tell the difference between the two blue options and between the two purple options. The in-browser app is clunky and hard to use. The sidewalk improvement plan is not dense enough for real improvement. Cars go way too fast down small, neighborhood streets in North Aurora and regularly go through stop signs. None of the places I've nearly been hit by cars are covered by the proposed improvements.
The use of overpasses/bridges to cross major thoroughfares (Havana, Chambers, Colfax, etc) would be really helpful to reduce pedestrian collisions and injuries

There is an opportunity to include future rail networks into the north east part of the city as it expands and this should be included in development plans. I enjoy the off-road trails and bike connections as these are safer and generally more enjoyable to take places, keep those up and expand as possible.
I think Aurora needs protected bike lanes on the major roads. Drivers are not aware of bicyclists and even on the smaller roads, I've almost been hit by cars multiple times. People use the bike lane as a turn lane. They cross the bike lane to park without looking. They go well above the 25 mph speed limit. And they don't look for bikes when crossing streets, which makes it very dangerous during rush hour, never knowing if a car at an intersection is going to pull out without seeing you. Protected bike lanes would make it much safer.
The website didn't explain what any of the projects involved, what the timelines were or what division really entails. This was a strange survey.
Great trails but the lack of protected median refuge islands makes crossing these 4-6 lane arterials, collectors, etc., very challenging and difficult. Concerned that the City has previously chosen to raise speed limits and now want to add lanes - these types of 'improvements' only lead to people dying on the street while walking or biking, or worse yet, just more speeding vehicles and weaving/crashing.
Sidewalks along bus routes are important since people in wheelchairs rely on sidewalks to get to bus stops. Riding a wheelchair on a 4 lane arterial is totally unacceptable and probably against the ADA. Aurora needs to adopt a "people first" priority when designing infrastructure. Count bellybuttons, not cars!
This is awesome! Keep up the good work!
If winter didn't exist I would bike or scoot everywhere! But when it's cold, icy, or I'm sick, the transit network is really important to me. Also, I would add that snow and ice removal to the sidewalk network should be part of the vision if we want it to be usable all the time and by everyone. Many of the main paths are cleared, but many in neighborhoods are not
I strongly oppose the visionary bikeway network. The city is installing bike lanes which are blocked off from vehicles. This is taking away car lanes and there is never anyone in these bike lanes. I'm hoping the city will come to their senses and take these out. The bike lanes only collect debris and aren't used. It would be nice to see money being put into repairing/resurfacing the streets we already have instead of worrying about sidewalk improvements.
The big issue most cities have when addressing ideas to connect citizens to their surroundings is they invest in bigger, better streets. These streets just fill up and need to be improved/expanded even further. If a concentrated effort is not made to lesson the need for

bigger/more roads in Aurora at this stage in its development, alternatives to driving is always going to be an afterthought. If the city expands with these alternatives in mind as the primary, rather than as a secondary goal, all this investment will actually be worth it.
Network improvements aren't valuable unless people feel safe to use them - please consider incorporating safety features to increase comfort with alternate forms of transportation. Increasing the frequency of public transit would also help reduce how long people are left in the open, which would assist with safety and also make it more appealing than it is today. Also, for changes impacting major arteries, please make efforts to limit lane closures to one as much as possible. Losing two of three lanes in a single direction of travel is enough to double some commute times, and they create ripples across the entire road network.
what would really help most HOAs the most would be if Aurora PD or Code Enforcement could enforce the current laws. We need cars towed with expired/missing tags/plates. We need speed limits enforced, etc. I don't need more stuff for the city to maintain to make my HOA better - just get the current stuff working correctly. I was an intern at Stantec when Aurora paid for Traffic light timing. Once thing I know was true then and is still true today is NONE of your pedestrian crossing traffic signals are linked to your overall system. Meaning when someone calls to cross at Iliff&tollway trail, but Illiff at Chambers just turned green, the ped signal will turn red a hose traffic timing - this really is absurd this wasn't fixed years ago
Better lighting and sight lines at intersections so that pedestrians can be seen at night.
Please encourage more bike riding with the bike plan!!
At E-470 North and Smoky Hill Rd, there are two lanes, one for Smoky Hill east, governed by the traffic light, to get to Southlands and turning left on Smoky Hill. The other lane is for Smoky Hill traffic turning right. Traffic for both lanes generally ignore the reason for the two lanes and turn right in the right hand lane and cross 2 lanes of traffic, not stopped, to try to get in the left turn lane for Southlands. I have missed many of these cars through the years as they bull their way through the cars to turn left in in 500 feet. Poor design as the right turn lane should have no choice but to continue on the right lane on Smoky Hill with no option to get to Southlands.
The maps are very difficult to interpret and don't give a good impression of the improvements that are planned. I'm not confident that the planned improvements will ultimately be useful in the long run, and I'd like to see a better overview of them. I'm not confident that the planned improvements will make things safer and better for my use cases.
With what ever proposed work going to be done please be mindful with Colorado weather snow / ice upkeep
I would like to see a balance of resources and doing our best with water conservation so that water is not wasted on unnecessary or water heavy flora.

Having safer bike paths and sidewalks and more frequent and reliable transit will encourage people to take these forms of transportation. Many people would like to take advantage of these forms of transportation, but are forced to drive because of the amount of time it takes, the limited routes, or unsafe areas where they do not feel comfortable taking the train/bus. Well lit, sidewalks and frequent transit will help this.
More emphasis on off-road bike trails or widened multi-use sidewalks rather than share-the-road lanes. Drivers don't respect them.
It is unsafe to travel in something other than a car. People run red lights all the time, speed and it's scary traveling in a bike knowing you could be injured at anytime. Also if I travel to the store I have to worry about my bike getting stolen. We should invest in more lights when building new apartments or new stores
1. Gun Club road needs widening to two lanes in each direction between S Aurora Pkwy and I-70. 2. There should be a ramp from NB E-470 to EB I-70.
We need more light rail lines from Aurora to major destinations: DIA, DPAC, Ball Arena, Stadiums, Southland, Northfield, and 9-Mile station
Adding lanes doesn't reduce congestion, there have been studies proving this basic fact for decades. Roundabouts are good, proper signage is a necessity as many folks seem to be very confused by them.
Would like covered bus stops again. Summer is coming and it gets hot.
Aurora doesn't have roads, it has stroads. Just look at Alameda. There are 6 large lanes along most of it. That's a highway. -Change one of each of the lanes on 4-6 lane roads into a rail or bus-only lane. It increases ridership by keeping buses from getting stuck in traffic and builds revenue for more transit projects. -Make lanes thinner and include protected bike lanes along high traffic areas. Thinner lanes make cars go slower. Protected bike lanes make it feel safer to bike. -Include roundabouts in low traffic areas first so people get used to them -Change zoning to include multi-use commercial areas on the corners in R1 residential zoned areas so people can get to places without having to go far -People mostly don't care How they get somewhere. They care about how Fast they get somewhere. Less cars will make that happen. But it means a lot of people will have to get fed up with traffic and see buses pass them before they switch to buses.
No more six through lane wide arterial roads please.

With regards to the transit vision, as an older adult, it is important that the community understands how to use the rail transit. I have been here for 6 months and cannot figure to schedule out to get from one city to the next.
Unless the transit system is affordable people won't use it. Aurora isn't Boulder. Please don't congest current roads to build and add bike lanes that do NOT get used. Look at GVR. There are zero bikes on the bike lanes yet they add a bike lane instead of help with the car congestion??? Please don't waste our tax funds. We can't afford more useless projects. If you need something to spend money on, try looking at the addiction and mental health crisis instead of the sidewalks they are standing on.
Need to improve the quality of roads and update the timing of some lights.
Gun club really needs to be wider than two lanes to support all the new houses and businesses being built.
Thank you for working on Aurora. I really appreciate it!
keep all folks with all types of disabilities in mind when making changes. Who are those that will be using these services and are the changes realistic.
Multimodal transportation will always be an ongoing effort. Thanks for continuing to evolve and gather feedback.
Unfortunately I'm unable to figure out how to comment on the maps directly. Hopefully this is part of the plan, but traffic enforcement needs to be a key part of this effort, particularly speeding and running red lights. I live behind the Costco and I won't walk to the shopping center on the other side of Havana bc I feel so unsafe crossing Havana. As a result I take my car which feels really wasteful and silly given how close I live to Target, Sprouts, etc.
Aurora currently has no great E-W routes for transit. Airport is the middle of your map, but the N-S route there is every 60 min. Chambers is every 30, Peoria 15, Havana 20. Getting to a transfer station can take 2 buses from Airport Blvd, making the process of getting to Aurora Metro Station long. Consideration for people who don't drive to get to these places needs to happen ASAP. Also, a path to ensuring that roads/stops being created by builders are accessible is important. Giving citizens a clear path to make adjustments is hard as RTD says they don't own the stops and the city says it is private property. Also, if the beautification, resurfacing and upgrades could be coordinated ... Airport Blvd has been ripped up every year for 3 years. In the first month of school, in a zone affecting Pickens, WSHS, Transportation, Warehouse, Mosely, Quest, Crossroads. It seems wasteful and unplanned. These are things to work on...
The city should already be on board with Colfax BRT. Aurora should also look at BRT along Havana and a city run e-scooter/bike program with docking stations. The current bike trail system is great for getting to different parts of the city.

Please work on easy access to 470 bike path. NO entry point (parking) at the Jewell entrance and no easy (safe) way to bike to the trail from Murphy Creek and for the love of all things FIX GUN CLUB!! Widen it!! This is beyond acceptable. It needs to be 4 lanes.
Generally Aurora seems to keep sidewalks in good condition and have a decent network. Bike path connections between Harvest Rd. and Aurora Reservoir as well as improvements to S. Gun Club Rd. would be very welcome to SE Aurora
impressed with the work that has gone into this visioning thus far

BUILD UP AURORA: RELATED SURVEY COMMENTS

Does your neighborhood offer safe streets, adequate lighting and pedestrian-friendly roads? If no, please describe what investments are needed.
3/13/2025 My immediate neighborhood offers these things. The access roads to my neighborhood do not. They are too small to service the population and there is no curb and gutter.
3/17/2025 - Never EVER allowing attached sidewalks, ONLY detached, adopting better road marking standards, they are currently OUTRIGHT INSANELY AWFUL(turn arrows/ONLY message are never painted in turn lanes when they should be, bike lanes are almost never marked across intersections, crosswalks are barely painted at stop signs, stop bars are NEVER painted and it causes so much issues like people stopping in crosswalks or literally not knowing where to stop due to someone at Aurora's incompetence - yall are literally the only city that doesn't paint stop bars), more streetlights. Upgrading every single streetlight in Aurora to LED in the next 2 years. It's beyond embarrassing and completely disgusting that Aurora is cheap and still has sodium streetlights in 2025..... Denver was able to replace every single one of 44000 streetlights to LED within 3 years tops, boulder is currently replacing every single sodium light with LED as we speak. Stop with excuses, led streetlights are needed for safety and there should be a single sodium light within Aurora past 2026. Also NEVER allowing bike lanes that aren't buffered. They need to be buffered with GREEN PAINT at every single intersection. Roundabouts need to be evaluated first ALWAYS way before a signal is considered. Every intersection should ALWAYS have four streetlights no matter what, there are so many intersections without streetlights or the public works department refuses to install streetlights on the mast arm that's missing a fixture.
3/26/2025 - Sidewalks are incredibly narrow, very limited street lights (or they are old wooden posts that are leaning), there is constant glass and debris on the sidewalk, and no sidewalks present on the west side of potomac street in hoffman heights. We would greatly appreciate a sidewalk on potomac and brick fencing along the homes off of potomac to decrease the risk of accidents in residential yards (This is fairly common).
3/26/2025 - There is not adequate lighting for safely using the sidewalks in the early morning and evening

3/26/2025 -There are many missing sidewalks. Potomac street has missing chunks. very few street lights. Lots of homeless people. Not enough street sweeping.
3/27/2025 - Sidewalks stop or are very narrow. They are not well maintained by residents - shoveled or bushes trimmed back so you have to walk on the street
3/27/2025 - My community needs better sidewalks that are repaired & maintained. In many areas, people who must travel via wheelchair are forced into roadways because of uneven sidewalks & damaged access points.
3/30/2025 - Delmar parkway & Aurora cultural arts neighborhood saw a flood of crime in the past few years which made people scared to walk the streets especially at night. We need to prioritize continuous patrolling of this area. Faster police response times. More speed bumps and lighting on the streets and alleys. Especially down main roads like 11th & 13th where people often speed and drive recklessly. And clean up the abandoned, stolen, and expired plate cars off the streets. Ticket people for doing car work in the streets and getting trash and oil everywhere while taking up parking spots.
3/31/2025 - Southshore Drive goes from 2 lanes to 1. The road striping makes no sense as drives race down the road to cut each other off. The inner East bound should be a left turn only at Shady Grove. This would help avoid the unsafe merge. Just last week a major accident occurred in the area. Should be completely avoided with restriping the lanes.
3/31/2025 - 1. Car racing within meadowwood neighborhood (darmouth) streets and along chambers. 2. Trying to walk across dartmouth from one side to the next feels people will run you over.
4/2/2025 - No, our curb ramps do not meet ADA standards, not do our sidewalks (we live in an older neighborhood). Littering and dumping is a huge problem especially now that new developments of apartment complexes have gone up. While urban camping is down, the littering and trash in the parks and open space is not down. We do not have adequate lighting, or sufficient numbers of stop signs and warning signals in our neighborhood and as such speeding is also a safety issue.
4/3/2025 - Speed control and other measures to greatly increase pedestrian safety on sable blvd, especially between Mississippi and exposition, and Mississippi/alameda between Buckley and 225. It is incredibly dangerous for pedestrians to cross an intersection with a walk sign at a intersection which has two flashing yellow turn lanes face two other flashing yellow turn lanes with three more active lanes of traffic's going each direction. Turning cars are trying to see oncoming speeding traffic (which is blocked by the opposing vehicles) and are not looking for pedestrians. The whole immediate area around sable/missippi/chambers is very unsafe for pedestrians due to traffic and lack of street lighting.
4/4/2025 - I live right off of 17th and Hanover. Sidewalks in my neighborhood are very narrow and not lit well. I have two kids, one 3.5 years old and one 10 months old. Taking them out in the stroller for walks is very difficult. The sidewalks are so narrow and cars or bushes are often blocking the walkway. The sidewalks dip with every driveway, and cars race by much too fast. I often go for walks in the Denver neighborhoods close to me instead. The sidewalks north of Moorhead rec center are now very wide, beautifully lit, and comfortable. Everything to the north of that is very pleasant, as is everything over by Stanley marketplace. I prefer to walk these areas but would love for my neighborhood to be more pedestrian-

friendly. Walking west along 19th is quite nice, and 19th or 17th would both be wonderful possibilities for better pedestrian infrastructure. I have heard there are plans to widen the sidewalks along Havana up to Montview, which is a big help. Please at least consider making some pedestrian friendly walking routes in the neighborhood and add more lighting. There is so much happening around us, but everything needs to be better connected and safer for those not in cars. I do have a car and we drive, but that should not be the only option. Montview may also be a fantastic road for public transportation. Please also make intersections safer and more accessible for those on foot. Finally, please consider paving more the alleys behind the homes in my area. There is an alley plan, but only 5-6 sections are selected per year. There are over 100 sections still to be developed. At the rate the city is currently going, it will take over 22 years to finish. Please look along Central Park Blvd for inspiration for pleasant, walkable areas. The sidewalks that were recently widened in front of Rocky Mountain Prep School are also a wonderful example. Places I have walked to from my home include Moorhead Rec Center, Glissade coffee shop (with a bike shop and kids theatre company in the same small plaza), Judi's House (a new center for kids experiencing the loss of a sibling), new affordable townhomes, Stanley marketplace, the shops and King Soopers at MLK Blvd and Havana, Westerly Creek trail up along Central Park Blvd, to Montview Park, and even to the Bluff Lake Nature Center. I have walked to other nearby locations, such as Spencer Garrett Park, Taco River at Peoria and 17th Ave, and even to General's Park beyond that. I have also walked to the MLK library and Aurora City Park. I used to, on occasion, walk to the Walgreens and Walmart near Colfax and Havana (though both have since closed). What I have found is that walking to the north, west, and northwest are my favorite routes. The sidewalks feel more pleasant and the roads safer on the north side of Montview. While MLK library is close to me and Aurora City Park is beautiful, I do not feel safe walking there with all the cars whizzing by along Colfax, Del Mar, etc. The parks feel exposed, with traffic on all sides. Spencer Garrett is a little better, but is not as close to other amenities. Time and time again, I find myself drawn towards Montview Park, the Westerly Creek trails, Stanley marketplace, and all the lovely pathways along 25th and 26th ave. I walk these areas because they are safe, have interesting destinations, and are pleasant and comfortable. Please check out the Youtube channels NotJustBikes and CityNerd for some inspiration. Thank you for reading!!!
4/7/2025 - Street lamps aren't enough and they are too dim. Sidewalks are too narrow and hazardous in many places. Protected bike lanes would also be helpful.
4/7/2025 - There are no sidewalks on many streets in my neighborhood. Trash debris broken glass and dumped items litter the walkable dirt area where a sidewalk should be
4/7/2025 - So much traffic, streets are too wide and busy to cross safely, not enough trees or greenery. There are 20 gas stations within 2 miles of my house, it's ridiculous how car centric everything is. I would love for Aurora to be more pleasant to walk around.
4/7/2025 - more lights for sure. better protection for instersection located at Iliff & Kitteridge.
4/7/2025 - Many roads are still missing sidewalks, and Xcel does a poor job of managing lighting. Some parks and open spaces lack safe pedestrian or bicycle access, like the Cherry Creek Trail
4/8/2025 - Pedestrian friendly roads... I would not walk on Parker parkway because I would fear being hit by speeding cars. Rarely do police monitor speeding. Street racers at night makes it dangerous to drive or walk on Parker Parkway.

4/8/2025 - Especially around 225 and Parker, the street and sidewalks need a lot of cement work, pot holes, dirt, trash, everywhere you look just about.
4/8/2025 - I am an APS educator working with students at Crossroads Transition Center. A large part of our program is helping our disabled young adult students access the community. We frequently encounter streets that are either inaccessible or unsafe. For example, most recently, we were at Parker and Yale and there was no sidewalk from the bus stop to the intersection, just stretches of river rock, parking lot entrances, and curbs. More accessible sidewalks should be a priority so that everyone can access all of our community.
4/8/2025 - Aurora is not a pedestrian safe city.
4/8/2025 - Being a pedestrian on south Buckley Road doesn't feel safe. There is a lot of trash and speeding cars.
4/8/2025 - I work and live off Fitzsimons and Colfax the Median makes it difficult to get to my location safely. I run the Storage facility and my 350+ tenants feel the same. Turn in access to the business is not possible without a U-turn at Colfax with is a risk or making circles around town to come back down Fitzsimons. A trun in off the road would be amazing!
4/8/2025 - The sidewalks are dirty and covered in trash and the roads are busy with fast and aggressive cars and the public transport stations dont feel safe
4/8/2025 - No lighting, no sidewalks on 6th Ave east of Picadilly
4/8/2025 - It's awful. 1) Cars parked in front of stop signs, limiting sight of roads/ oncoming traffic 2) sidewalks are narrow, end abruptly, or are generally not bike friendly. (Highline trail is fantastic) 3) pot holes galore. I'm afraid I'll wreck my car on one
4/8/2025 - raised intersections and speed bumps, and stop signs through main neighborhood roads, especially in the vicinity of parks and schools where children need to cross
4/8/2025 - E Mansfield Ave is a very wide road in our neighborhood that promotes speeding. Need more speed bumps that actually slow people down. Unsafe especially with a local school nearby and lots of kids walking to get there
4/8/2025 - Lightning is poor. Roads are maintained pretty well. Speeding and distracted drivers are the biggest risk. There’s only one crosswalk on E. Mansfield Avenue.
4/8/2025 - No protected bike lanes, no speed bumps to discourage speeding vehicles, very few options for public transit.
4/8/2025 - Within my neighborhood, it's fine. However, the intersection of Gun Club and Alameda could use turn lanes or maybe a roundabout. Honestly, the lack of lanes causes a lot of frustration, especially when a slow driver holds others back. I've seen lots of red lights run and I think people are so frustrated, trying to get to their destinations that they run lights.
4/9/2025 - More streetlights on the roadway/sidewalks, it's too dark most of the time; pothole maintenance; sidewalks fit for ADA; in Australia, they have walk signs that beep for those who are visually impaired, while we don't have anything to alert that it is safe for them to walk.

4/9/2025 - Speed deterrents on Powhatan and Southshore Parkway
4/9/2025 - Additional lightening in Southshore Mead District near pocket parks. Traffic lights and four way blinking sign at stoplights. Too much speeding in the neighborhood.
4/10/2025 - Xcel does not properly maintain the streetlights in Ward VI. There are not enough crosswalks or speed enforcement to make it safe to cross the road. Even at crosswalks, folks turning right on red or left don't stop for pedestrians and bikes. The speeding and racing on our public roads is disgraceful.
4/11/2025 - Crosswalk/pedestrian light at Evanston/Smoky Hill; traffic light Chambers/Pheasant Run; sidewalk cleaning along Chambers and Smoky Hill (dirt, broken glass) and also Quincy (in season no ice/snow piled on south sidewalk) and sidewalk repairs; enforce citizen/resident compliance with sidewalk maintenance adjacent to property (bushes cut back, swept, snow removal)
4/11/2025 - Speed humps to prevent drivers from literally drag racing, gunshot and all, on east Kentucky Ave. just east of Havana.
4/11/2025 - Conservatory Parkway curves and becomes Wesley. The crosswalks on Conservatory Parkway have flashing lights to warn cars to slow down and stop. We need the crosswalks on Wesley to have those same features.
4/11/2025 - Perhaps a stop sign midway between Havana and Moline at Kentucky and Kenton or a road hump. There is an elementary school just north of us (11055 E Kentucky Ave) and children walk and possibly cross Kentucky while walking home.
4/12/2025 - The emphasis is entirely on cars, I fully believe that sections of the city should be cordoned off for walking only, and emphasis given to accessibility transit with parking garages further away.
4/14/2025 - We have multiple intersections without even crosswalk lights. You kind of have to guess when to cross. Sidewalks are constantly blocked by cars or construction projects without any signage for ped detours. Pedestrians are clearly NOT a part of the process when planning improvement projects, and enforcement of blocked sidewalks is lacking.
4/14/2025 - Road diets to narrow all non-highway roads, but especially in neighborhoods and near community gathering places. Less street space devoted to vehicles, including taxpayer-subsidized car storage. Wider sidewalks away from the road and protected bike lanes, but also bus-only lanes to improve transit times, make transit more appealing than driving, and to decrease the pollution and noise from 6-lane arterials that have become the norm for almost every street in "new" Aurora. More opportunities for non-car travelers to cross major streets, including full lights (not just the flashing ones that drivers don't stop for) with speed bumps to force drivers to slow down and stop for people.
4/14/2025 - We are at Bayaud and Sable. The traffic from the Colfax bus stops at this intersection, and then people hide behind the brick wall, leaving behind a lot of trash. I think widening the sidewalk, adding more lighting, and some kind of trash cans that have covers/hard to get into would be a good place to start. I think people are used to coming over here like this and I am hoping the Colfax improvement plans reduce the traffic.
4/15/2025 - Wider sidewalks and walking bridges over major roads like Havana, Peoria, Sable, Chambers.

4/16/2025 - Not enough sidewalks/ bike paths. No crosswalks at 56th and Himalaya or 64th and Himalaya to get to Gaylord. Painted prairie was supposed to have shopping and a lake/pond…pedestrian brides.
4/17/2025 - 56th and Dunkirk needs line fixing on North lane after intersection
4/18/2025 - Better lighting at night for crossing streets, more ADA accessible crossing times, more public transportation
4/19/2025 - mexico between chambers and sable is a raceway. it is a wide road encouraging faster speeds past houses. adding painted parking lines would give the illusion of a narrower road.
4/19/2025 - Cars speed on the roads. Narrowing the streets, adding bike lanes, adding raised crosswalks would help slow car traffic and make the streets safer for pedestrians. Sidewalks need to be moved further away from the roads. Trees and other vertical visual barriers need to be placed between the sidewalks and roads to provide a sense of safety for pedestrians. I often see broken glass on sidewalks and in crosswalks.
4/22/2025 - Reduce the speed limit on westbound Hampden between Eagle and Hamilton so people stop running the red light at the Churchill subdivision entrance.
4/22/2025 - I live on Florida between Havana and Peoria. There is lots of speeding, passing in the bike lane, etc. I think speed humps are the only solution that will help the problem the full length of Florida.
4/27/2025 - The roads are not pedestrian-friendly. Or, more specifically, the drivers aren't. We need to force drivers to drive more safely and accommodate bikes/pedestrians, and upgrading streets/roads can be part of that.
Are there any types of facilities or services that you think are missing in your community? If yes, please specify.
3/13/2025 - Buckley road is designated as a bike lane. However, riding a bike is completely not safe on it. Lane is not protected and people go 55+ MPH. Please develop realistic bike lanes so people can use them safely.
4/2/2025 - protected bike lanes, pedestrian friendly crossings
4/4/2025 - Covered bus stops with seating
4/4/2025 - Moorhead Park is a prime candidate for larger picnic shelters and more outdoor programming. The playgrounds there are lovely but it can certainly be more utilized. A library/nature center in the area would be nice, perhaps right next to Judi's house. Would love to see the Dayton street become a revitalized, thriving walkable shopping area (it may be moving towards that already? Hard to tell). Development is occurring all around and the area has such huge potential. Please make it more walkable and pedestrian-friendly, develop better crossings and safer intersections, employ traffic calming measures and bike lanes, create shade corridors and connect green spaces to one another, and fill in the vacant lots with housing and even businesses! So much exciting work is happening along Havana, Colfax, at Fitzsimons, near Stanley Marketplace, and along Montview Blvd. Please continue that reinvestment in northwest, original Aurora while also keeping the character of the neighborhood alive (allowing food trucks, unique small business, people selling oranges off the corners, etc).

4/7/2025 - Colorado 30 from Gun Club to Southlands is an outdated pothole ridden highway. It serves thousands of people daily, is always bumper-to-bumper, and dangerous! It needs to be rebuilt urgently.
4/8/2025 - Shoulders and more lanes on Gun Club road.. No one wants to use e470 because it is so expensive. Give us at least a shoulder on Gun Club so it will be safer. Connect South East Aurora to Parker safely. Going through neighborhoods to get to Inspiration that has no shoulder is not safe and is very crowded. With more housing and houses being built there are no expansions to support the extra infrastructure. We need more lanes on roads and better access to Parker.
4/8/2025 - Further bike paths and connections between bike paths
4/8/2025 - While it seems like a bizarre idea, I think we should take multi-lane roads and establish a trolley system to exclusively use some of the lanes. It would dramatically improve public transit, reduce road width which makes for safer streets, and be completely unique to Aurora.
4/8/2025 - better access to public transit
4/8/2025 - Protected bike lanes, narrower roads to slow down drivers.
4/8/2025 - Safe and convenient bus shelters with lites, accompanying wider and complete sidewalk access and bicycle paths (sidewalk paths and dedicated trails/paths) are needed. Street intersections have got to be improved to be much more pedestrian and bicyclist friendly. Transit bus bypass and que jumps are needed on a variety of major streets throughout the city.
4/10/2025 - I live in Denver just blocks from North Aurora. I wish the sidewalks along Montview and Colfax were wider and supported more local retail.
4/11/2025 - While there is a train station not too far from me, it still takes over an hour to get into downtown Denver. That seems ridiculous to me. It's faster to take a car than it is to take the train, which makes taking the train a non-starter. Aurora and Denver should resolve these issues and improve the transit network so people who live in Aurora but work in Denver don't have to choose between horrible car congestion or horrible, long train rides.

Connecting People. Connecting Places.

PROJECT OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the Realize Phase or Milestone 4, conducted October 7-20, 2025. The Visualize Phase involved extensive public outreach to gather feedback on programs, policies and projects. In this phase, community members were asked to gauge their general support for the proposed programs, policies and projects, and were encouraged to add any location-specific feedback to a comment map. This phase provided the planning team valuable insight as they wrote the Connecting Aurora Final Report, which will be made available for public review in early 2026.

ENGAGEMENT OVERVIEW

A variety of engagement tactics were used to gather feedback from the Aurora community on proposed visionary networks and investment categories. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers

TOUCHPOINTS	ONLINE VISITS	ACTIVELY ENGAGED
*125K+	*578	600+

**The figure of 821k+ touchpoints indicate the cumulative number of interactions or exposure to the project. This is a broader measure compared to the 578 online visits, which represent more direct engagement with the project's online presence.*

Engagement Activities

Throughout Milestone #4 the project team used several different activities during the engagement period to gather input from the public. The main tool used to gather feedback was an Online Open House that included a survey and comment map. The project team also hosted a Virtual Town Hall and In-Person Office Hours to enable community members to share their feedback in a face-to-face manner.

ONLINE OPEN HOUSE

A self-guided online open house was hosted on ArcGIS StoryMaps, linked via the Engage Aurora website (engageaurora.org/ConnectingAurora). Community members could learn more about the project, make comments directly on the map of proposed projects, and take the survey. The survey gathered feedback to gauge support for the proposed programs, policies and projects that will be presented in the Final Plan. The data below represents engagement between April 1-May 2.

- Total visits: 578
- Survey responses: 24
- StoryMap comments: 70

A complete record of map comments can be found in Appendix C: Map Comments.

ONLINE COMMUNITY SURVEY

The StoryMap included a survey to gather feedback from community members after they learned about the proposed programs and policies and explored the map of proposed projects. The survey gauged general support for the proposed programs, policies and projects and received **24 responses**. The survey was available in English and Spanish and other languages upon request. A copy of the complete survey can be found in Appendix B: Survey.

ONLINE COMMENT MAP

Participants were able to provide detailed comments on a map of the proposed projects virtually via the Online Open House. The projects map received **70 pins** throughout the Milestone #4 engagement period.

VIRTUAL TOWN HALL

A virtual town hall was hosted on Zoom the evening of Wednesday, October 8, from 6-7:30 p.m. **12 community members** attended. The town hall was open to the public and attendees could register via the Engage Aurora website. Information on the current phase of the project was shared, and the project team walked through the online open house forum to encourage community members to provide their feedback. Following the presentation, attendees were invited to ask questions and provide feedback via the Q&A function or verbally.

IN-PERSON OFFICE HOURS

The project team hosted in-person office hours at the Aurora Municipal Center on Thursday, October 9 from 4-7 p.m. Community members were encouraged to stop by to learn more about the proposed programs, policies and projects that will be presented in the Final Plan and provide their feedback on physical project maps.

STAKEHOLDER GROUP

A virtual meeting with the Connecting Aurora Stakeholder Group was held on the afternoon of October 15. The meeting was attended by **14 stakeholders** and began with a review of public engagement thus far. The project team then gave a brief overview of planned programs, policies, and projects, and encouraged stakeholders and their communities to provide detailed feedback via the online open house forum.

PROMOTION

A variety of promotional materials were used throughout Milestone 4 to inform the community about the newest phase of Connecting Aurora and how to provide feedback. For details and examples of materials used, go to Appendix A: Milestone 4 Promotional Materials.

News Releases and Media Coverage

One news release was distributed to a comprehensive local media list, including media targeting non-English speakers. A public service announcement about the project aired on Aurora TV the week of September 25. The project was also promoted in an October 2 newscast on **Aurora TV**'s Aurora Now Weekly on cable channels 8 and 880, AuroraTV.org and the AuroraTV mobile app. For a list of news stories, go to Appendix A: Media Coverage.

Social Media

Extensive social media efforts were undertaken to promote the project and to engage the public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Additionally, one Facebook post was boosted for the most common languages: English and Spanish.

- Total posts (including ads): 23
- Total reach/impressions (views/shown): 34K+
- Engagement (clicks/likes/comments): 598

Newsletters and Flyers

Multiple city and community newsletters distributed Milestone 4 project information, reaching over 77k community members.

This is Aurora weekly electronic city newsletter (8,160 subscribers)

- Oct. 2 issue
- Oct. 9 issue
- Oct. 16 issue

Road Construction Roundup weekly electronic newsletter (660 subscribers)

- Oct. 3 issue

On Havana Street email blast

- **Oct. 15**

AuroraTV weekly electronic newsletter (1,600 subscribers)

- Sept. 24 issue

- Oct. 2 issue

HOA Leaders electronic newsblast (1,173 recipients)

- -Oct. 5 distribution

Engage Aurora Connecting Aurora project page newsletter blast (192 recipients)

- Aug. 1
- Aug. 22
- Oct. 2

Engage Aurora all registered platform participants newsletter blast (2,567 recipient)

- Sept. 15

An article was included in three News Aurora issues, which were distributed in water bills in July, August and September. Approximately **63K homes** received each bill insert each month.

Flyers were made available at Central Recreation Center, Southeast Recreation Center, Moorhead Recreation Center and the Center for Active Adults as well as the Aurora Central Library, Martin Luther King Jr. Library, Mission Viejo Library and Tallyn's Reach Library.

A Milestone #4 promotional email was sent to the **400+ City of Aurora Boards and Commissions Members** on October 8.

Bus Benches

Bus bench ads were placed at three locations throughout Aurora:

- 14875 E Colfax Av & Altura
- 17175 E Smoky Hill Rd & Wagon Trail Pkwy
- 00280 S Chambers Rd & Alameda

Photos of bus bench ads can be found in Appendix A: Bus Bench Ads.

Outreach

Outreach was conducted with various community stakeholders as described in the following sections.

STAKEHOLDER GROUP

One email was sent to the Stakeholder Group with promotional materials for Milestone 4 engagement.

STAKEHOLDER EMAILS

The project team sent emails to many stakeholders with the project information and asked them to share with members of their organizations.

FEEDBACK RESULTS

The results described below are a compilation of the feedback gathered via the online open house survey.

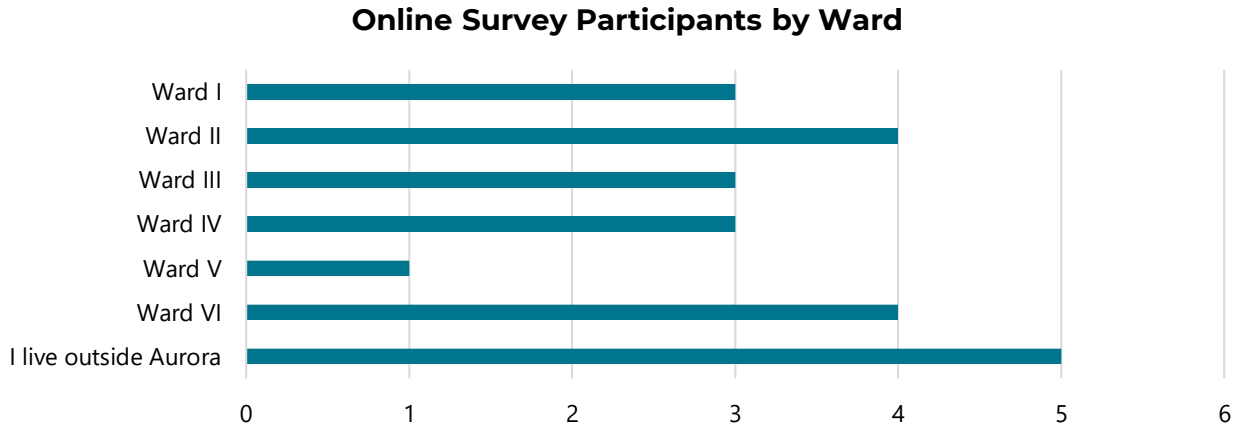
Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

Who We Heard From

DEMOGRAPHIC INFORMATION

Wards

Survey participants were asked to share the Ward they live in. The engagement by Ward was generally evenly split, with the lowest participation from Ward V.



Online Survey Responses: Overall Results

Throughout the course of Milestone 4, community members were invited to take a survey to gauge public opinion on the proposed programs, policies and projects. The survey was available online on the StoryMap site via Engage Aurora. The survey consisted of one demographic question; three multiple choice questions to gauge general support of the programs, policies and projects; three open-ended questions to share thoughts about the programs, policies and projects; and one question that asked participants to share any other thoughts with the project team.

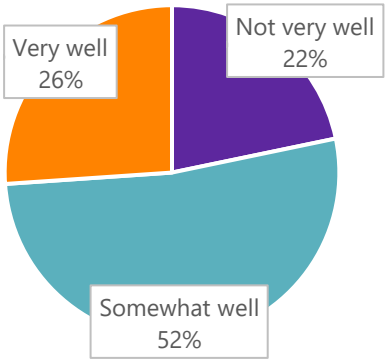
As seen in the breakdown of each question below, the majority of participants agree that the proposed programs, policies and projects reflect the needs of their community "somewhat well," with the lowest levels of support shown for the proposed projects.

PROGRAMS

When asked how well the proposed programs reflect the needs of their community, **over 75% of respondents said "somewhat well" or "very well."** In the open-ended response about programs, most participants showed support for the direction of the programs, especially when it came to bus priority, sidewalk retrofits, bicycle-friendly infrastructure, and bus stop improvements. Several noted the programs are well thought out and aligned with current and future needs. Several respondents emphasized that public safety and cleanliness should be addressed before or alongside transportation

improvements. Concerns about crime, homelessness, and violence were repeated. Some supported reducing car convenience to promote transit and active transportation. Others are reluctant to lose driving lanes, especially without improved safety and security on public transit. A few suggested adding dedicated bus lanes only if they don't reduce car lanes. There were also calls for microtransit and better BRT connections to RTD rail lines.

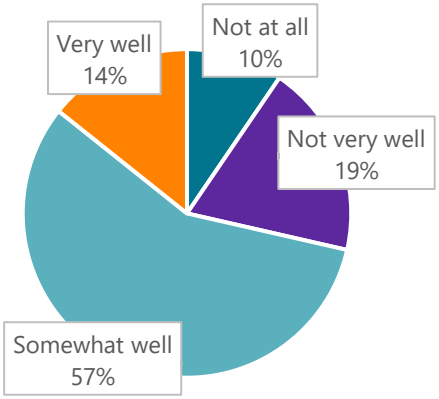
After reviewing Connecting Aurora's programs, how well do you feel they reflect the needs and priorities of your community?



POLICIES

When asked how well the proposed programs reflect the needs of their community, **over 70% of respondents said "somewhat well" or "very well."** In the open-ended question about the proposed policies, many respondents showed support for multimodal transportation, including bike lanes, sidewalks, and public transit improvements. Designing streets for safer speeds and improving pedestrian infrastructure were frequently praised. Several emphasized the importance of wheelchair accessibility and sidewalk maintenance, especially in winter. Another major theme was that public safety must come first. Some felt that transportation improvements are meaningless without addressing safety first. Some support reducing car lanes for bikes/buses, especially if they improve safety and transit flow. Others oppose removing driving lanes, citing increased congestion and underused bike lanes. There was also some criticism of car-centric development and lack of mixed-use, walkable neighborhoods, with suggestions to enforce stronger development guidelines and increase density to support transit and walkability.

After reviewing Connecting Aurora's policies, how well do you feel they reflect the needs and priorities of your community?



PROJECTS

When asked how well the proposed programs reflect the needs of their community, **over 65% of respondents said "somewhat well" or "very well."** In the open-ended question about the proposed projects, respondents emphasized that safety must be addressed first before investing in new transportation features. Several respondents felt the proposed projects are too limited, additionally calling for more detailed project lists, not just maps, to improve transparency and accessibility. Many supported the holistic, multimodal vision, including microtransit accessibility improvements, and safe infrastructure for e-bikes and scooters. There was enthusiasm for reducing car dependency and revising speed limits to make roads safer for all users. Respondents also noted concerns over a lack of bike/walk infrastructure and transit access in growing areas, like Northeast Aurora. There was a general emphasis on shared funding responsibility between the city and developers to avoid overburdening new communities.

After reviewing Connecting Aurora's policies, how well do you feel they reflect the needs and priorities of your community?

FACT SHEET

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Fall 2025

GET READY FOR MILESTONE 4

Project Overview

Launched in early 2024, Connecting Aurora is a transportation plan that will identify projects, policies and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Fall 2025

What We've Heard

Connecting Aurora has been built upon the public engagement efforts of previous transportation projects in recent years and the city's commitment to inclusive public engagement. The plan will reflect meaningful feedback from diverse communities throughout the city's neighborhoods and business centers, especially those who are historically underrepresented.

Since early 2024, we've gathered community input and relied heavily on public feedback in building the final plan. Our promise to the public is to make sure the plan reflects the community's priorities and illustrates how public input influenced the plan's outcomes.

Spring 2024 Community Feedback

During the project's first milestone in Spring 2024, **many community members shared that they do not feel safe driving, walking and biking is an uncomfortable form of transportation, public transit is unreliable and often poses security risks, and there is a strong desire to have higher quality streets and places.**

Fall 2024 Community Feedback

In Fall 2024, community members were asked to provide input on three imagined transportation futures: car-oriented, transit-oriented, and neighborhood-oriented. Most participants **favored either the transit-oriented or neighborhood-oriented future for Aurora when surveyed about factors like accessibility, prosperity, mobility and safety.** A car-oriented city, on the other hand, was widely viewed as either having no or a negative impact on quality of life.

Spring 2025 Community Feedback

Earlier this year, we collected input on future investments and four visionary networks: bikeway, sidewalk, transit and streets. **The majority of community members showed support for all four networks, and the three consistently highest funded investment categories were bikeways & trail improvements, transit service expansion and pedestrian improvements.**

APPENDIX B: ENGAGEMENT MATERIALS

SURVEY

Questions:

1. After reviewing Connecting Aurora's programs, how well do you feel they reflect the needs and priorities of your community?
    a. Very Well
    b. Somewhat Well
    c. Not very well
    d. Not at all
2. After reviewing Connecting Aurora's policies, how well do you feel they reflect the needs and priorities of your community?
    a. Very Well
    b. Somewhat Well
    c. Not very well
    d. Not at all
3. After reviewing Connecting Aurora's projects, how well do you feel they reflect the needs and priorities of your community?
    a. Very Well
    b. Somewhat Well
    c. Not very well
    d. Not at all
4. Share your thoughts on Connecting Aurora's recommended policies.
5. Share your thoughts on Connecting Aurora's recommended programs.
6. Share your thoughts on Connecting Aurora's recommended projects.
7. Which city ward do you live in?
    a. If you don't know your Ward, please enter your zip code.
8. Is there anything else you would like to share with the project team?

TIME:	6 p.m.
LOCATION:	ZOOM
ATTENDEES:	12 non-project attendees

Notes

SLIDES:

RECORDING:

COUNCILMEMBERS PRESENT:
Councilmember Hancock

PRESENTATION:
Question from Drew Davidge: East Colfax resident here! Please speak more about how the Connecting Aurora plan bridges the Westerly Creek Trail link between both communities for pedestrian and bicycle transportation modes. NANO, Del Mar, and East Colfax (Denver) neighborhoods are some of the most underserved in the metro and priority for improved transportation modalities.

Answer: Key finding is the need to improve major crossings for our trails systems. Over 300 different improvements have been identified. Westerly Creek is a very important question, and Colfax is a barrier to that transportation. Recommend going to online open house to make comments about suggestions. Westerly Creek is identified as an improvement. With a project/plan of this nature, it's tough to present all 1000 projects in a single webinar. For Original Aurora, a significant amount of streetway improvements are planned.

Question from Maitri Lazaroff: is there a funding plan in place, or are projects planned to be funded along the way?

Answer: Transportation funding can be hard to come by and a key outcome of the plan is to identify what the key funding opportunities are. There are many opportunities for funding. The city is in the midst of reviewing funding opportunities to make sure the city has appropriate funding in place to pay for services needed. Strategic planning process underway, which includes this plan. Will explore options and partnerships. Build Up Aurora is the city's planning process. Connecting Aurora identifies which projects are important to the city, assigns costs and the information can be used it identify necessary funding mechanisms.

RANDOM DRAWING WINNER:
Drew D.

STAKEHOLDER MEETING NOTES

NOTES

MEETING SUBJECT: Stakeholder Group – Meeting #8

LOCATION: Virtual – MS Teams

DATE/TIME: Oct. 15, 2025 at 2 PM

---

1. Welcome and Introductions (5 minutes)

   - Erik Balsley, University of CO Anschutz
   - Lyle Artz, Fitzsimmons Redevelopment Authority
   - Kelly Brough, Fitzsimons Innovation Communtiy
   - Ryan Shaaban, Tryba Architects, Fitzsimons Innovation Community Master Plan Consultant
   - Sam Valeriano, Be Well Health and Wellness Initiative
   - Tracy Sakaguchi, Colorado Motor Carriers Association
   - Lisa Romero, Kaiser Permanente
   - Matt Schaefer, Cherry Creek Schools
   - Kenneth Ho, FIC
   - Adam Spears, Anschutz Facility Management
   - Courtney Stryker, Arapahoe County Senior Resources
   - Chance Horiuchi, BID
   - Desiree Banka
   - Malia Hickens
   - Keith Borsheim, HDR
   - Ambriel Speagle, HDR

2. Milestone 4 Presentation – Programs, policies, and projects (45 minutes)

   Chance Horiuchi (chat): engageaurora.org/connectingaurora - I will share with the BID

3. Discussion (20 minutes)

   Lyle Artz: I know I'm preaching to the choir here, but one of the most critical and frustrating issues for me is RTD. Frequency and reliability for both buses and light rail are huge issues. Frequency of service decreased during Covid and has not fully recovered since. I don't know how we can fix this, but it's very important in my book.

   Keith: RTD is a partner, part of our Technical Advisory Committee, and are generally supportive. Transit is at an interesting moment in the country, making expansion difficult for any transit provider right now. The city will look into its role in expanding transit (funding to RTD, providing capital improvements to allow for greater efficiency, etc.). Better access to transit services (first mile, last mile, etc.) will also improve these issues to some degree.

   Kelly Brough: For the Fitzsimmons and Anschutz campuses, could transit service frequency just be shifted to accommodate start/end of shifts if service frequency expansion is not possible? This wouldn't require more funding.

   Keith: Great recommendation, that can apply to more than just the campus areas as well, such as Northeast Aurora.

   Desiree Banka (chat): Great idea Kelly!

4. Next Steps – (5 minutes)

SURVEY OPEN RESPONSES

Share your thoughts on Connecting Aurora's recommended policies.	Share your thoughts on Connecting Aurora's recommended programs.	Share your thoughts on Connecting Aurora's recommended projects.	Is there anything else you would like to share with the project team?
Safety should be the main concern and our city is filled with crime, theft, cartels, gangs, and homelessness. Our children do not feel safe in this city! They are no longer safe to walk to school.Public transportation is occupied drug addicts and homeless. Spend the money and time on improving our safety. None of these transportation ideas will do any good if your community does not feel safe.	Money and time should be spent on safety and cleaning up the city. Aurora has become similar to a third world country with crime, violence, and homelessness!	The community wants to feel safe from all the crime, gangs, and homelessness not new paint on sidewalks and more useless bike lanes.	End this project. It is a waste of time and money. These people making these decisions need to live where I live and in the areas most affected by gangs, crime, and homelessness!
The policies are good- multimodal streets and designing streets for safer speeds are particularly strong.	The programs are good and there is good variety. Bus priority and sidewalk retrofit are great. Resurfacing is necessary, bicycle	The specific projects are lacking. The only sidewalk improvements are to major arterial roads, nothing to make residential	Thank you for your efforts in creating this plan. Just to get this far is great. Please continue to bring

New development guidelines are improtant and should be both strong and enforced (not waived).	friendly, bus stop improvement, and safe routes to school are innovative. Programs could be more specific as to how they will achieve policies (which of these programs will change road design to encourage slower speeds? None include making roads more winding/narrow, adding in street trees, etc). Multimodal counts is a start in making streets multimodal, but only a baby step in that direction. We are missing things like raised crosswalks, installing more roundabouts, removing slip lanes, shortening crosswalk length at intersections, adding medians, curb extensions, and adding car free zones or streets! The programs fall a bit short of what they could be, especially for informing the next 20 years.	sidewalks wider/more accessible in the next 20 years? There are plenty more individual projects that need to be included in this plan. 13th Ave multimodal plan is a great project that needs to be brought back/expanded, Havana St improvements, Montview improvements (Montview would be great for fast transit options like a tram, raised crosswalks, policies to reduce speeds, etc). 17th ave or 19th ave both great options to go multimodal. The proposed projects barely scratch the surface of what needs to be done.	more innovative projects. Walkability is increasingly popular and beneficial for all (health, accessibility, business, safety, connection, families).
I think all the projects proposed are good ones, but there are many other places where changes could be made. For instance there are many 2 lane strodes that are not commuter friendly for anyone and if we could block off more of the second lanes as bus and bike only that would be great,	I think that progress is being made, but there are still feelings that traffic is being prioritized over making our roads more pedestrian/bicycle friendly. I would prefer we make commuting by car harder and less convenient while simultaneously making bus and other forms of	Again, this is good progress and I am really excited to see these projects, but I know for instance that the move to push Yale west of Parker from a two lane road to a single lane was nixed because there was too much car use during peak hours. That use is likely induced demand since the road is there and too wide already. I wish we could move	I would love to see the price of bus and train tickets drop. I know it's not much now, but with concerns around reliability and frequency, having the cost be very low would incentivize use.

especially if they were protected from the traffic.	transit easier and more convenient.	more two lanes roads to single lanes and find different ways to discourage car commuting while encouraging other transit use.	
	I like the programs. They seem to be helping Aurora become more connected and multimodal, which is a plus!	The map function made it very difficult to see what projects were being proposed and it could be a bit glitchy, especially on a phone. While it's nice to see everything mapped by location, it would also benefit to have a list of projects and their description, especially, for those unfamiliar with transportation improvements.	A breakdown of all projects by the various timelines in addition to type of project so people can have a true understanding of what will be done in the near term vs. long term.
Widen narrow sidewalks on local streets for wheelchair users, and add new sidewalks to local streets where no sidewalks exist. Pay attention to surface for wheelchair accessibility and mobility. I like the whole idea of the multimodal transportation planning, and more frequent transit and BRT.	We need microtransit in central Aurora east of I-225.	Encouraged by holistic view. Likes microtransit and multimodal, and recognition of accessibility.	
I think it looks good. I would like to see public art incorporated into these projects.	I think it looks good. I would like to see public art incorporated into these projects.	I think it looks good. I would like to see public art incorporated into these projects.	I would like to see public art incorporated into these projects.

Very well thought out and focused on current needs and future growth & developments.	Very well thought out and focused on current needs and future growth & developments.	Very well thought out and focused on current needs and future growth & developments.	I would like to see more art and culture in these projects to show that the city of Aurora is contemporary, fostering community identity, enhancing public areas..
Roads need to be maintained and lanes added. Money spent on bike and walking paths are a waste of money.			
There's a lot of info to take in. If I understood everything, it seems like it makes sense. I'd still like to make sure pedestrian-friendly infrastructure is prioritized on a timeline, new bus routes (maybe via a bus trial program) are added, and there is a snow shoveling program for sidewalks (shaded sidewalks around me - iliff & sable - don't get shoveling).			1) The area bordered by Iliff (south), Chambers (west), Airport (east) doesn't have much walking, bikeways, or transit. Why not? 2) Mandatory bike lanes on streets extending 2 blocks from the school.
More bus routes are needed to connect aurora to light rail and major city areas. Including along 64 - if it is to be an artery for aerotropolis.			
Perhaps it's my phone but I can't see the specific policies		I am unable to see specific projects. May i strongly recommend a light at 56th Ave	

		and Piccadilly. I have a child who has to cross this intersection daily to catch the RTD bus. Drivers are not prioritizing pedestrians. While we're at it, why not an RTD bus stop closer to Painted Prairie	
While I agree with the vision of these, Aurora has allowed developers to build communities in a way that don't really mesh with these utopian ideas of walking, biking, public transport. Take a look north and east of 56th and tower, and you'll see proof of hotel and gas station galore continuing to be placed, cars prioritized as well as parking lots primarily for those two, then restaurants if we're lucky secondarily and/or medical, finally getting more grocery. Out East more commercial. It just doesn't seem to mesh with how everything is built around our area for residential. It kind of begs the question as to how your vision and what you allow the developers to do can be so far apart and how these two opposing forces are going to align.	Ignoring our community needs and the name doesnt really match newer communities and how we are connecting them in our area.	Nothing is really being planned/done for our Painted Prairie community. It seems mostly ignored in the current plans with next to nothing really making it more bike, walkable in the current design and only a few major considerations in 20+ years time frame for anything really close by. Someone needs to take a look again at this and other expanding areas north of 56th. It looks like we've mostly been forgotten.	

Land density needs to be incorporated in the policy. City is sprawling in a big way and maintaining the infrastructure or sustainability will be challenge in the near future.Denser walk able or non-motorized accessible neighborhoods should be incorporated in the policy.	Jobs/acre or density/acre needs to be included in the policy and mass transportation, non-motorized mode of transportation projects should get higher priority. BRT on major main roads feeding to the RTD rail lines can create residents to use mass transit than driving alone which will have both direct and indirect impact to our community and region.	There is a high tendency you kids using e-bikes, scooters etc. and also technology is also in favor. creating a safe infrastructure for non-motorized modes can help to build on such momentum. Vehicle speed is scary and city has to revise speed limit and road diet approach so that roads will be for all users not only drivers!	Aurora Land use policy needs big amendment, sprawling city with limited resources could be a challange looking forward.
			Stop forgetting about east of E470. I know we don't exist to you all but we actually do.
			The sidewalks in my neighborhood (Sunnyvale, near 6th & Fulton) are ridiculously narrow. I and others often walk in the street if I am walking with someone else, because we cannot walk side-by-side otherwise. I wish these sidewalks were wider.
We need a bus line for Piccadilly that takes people to the Pena Station train. The bus lines do not reach in a highly dense and populated area. Kids, citizens that need or want public transportation do not have any	I am worried that my area will not benefit from these plans.		

options. I couldn't tell if there was a widening of Pena to I-70? I couldn't tell. That area is getting worse and worse.			
While it is good to improve walkways and bike lanes, please don't take away driving lanes — like was done on the northwest side of Del Mar Circle and Peoria a few years ago where we lost a drive lane to make a bike lane that is rarely used and now us locals have to deal with back ups in traffic at certain times of the day that doesn't used to exist when there were two driving lanes. I also LOATHE the way bike lanes are sectioned off in Denver, please do not follow their model.	Until RTD improves security and safety on public transportation, I won't ride public transportation and am not keen to lose driving lanes to dedicated bus lanes. If dedicated bus lanes can be added without losing driving lanes, go for it!	I found the informal given here too broad and generalized to be able to comment. The maps were too small to be easily read.	
I appreciate the policies for multimodal being a priority and designing streets to be safer. The cross-sections in NEATS should be reevaluated to ensure they are actually promoting safety to cross the most vulnerable users. And phasing roadway widenings to not have unsafe designs for a 20-30 year potential need.	I appreciate the desire to have "good" data, as this can be the foundation for all the programs and implementation of policies. The review process should take into account more current data that is sometimes better than previously forecasted data since the land plans and roadway network are on a micro level versus macro level. There should be flexibility in cross-sections,	It appears the projects are mostly within existing areas of the City. And it seems that the infrastructure in the NE developing area is assumed to be the responsibility of developments instead of the City. There is a need for many regional improvements in the developing area that should also become a priority to the City to obtain affordable and attainable	Prioritize education to all road users for interactions with cyclist. There was great info for the new motorcycle law, but never an informational campaign for new bicycle laws. Drivers are frustrated when they don't realize cyclists are within the law.

	phasing, and connectivity from NEATS once more thorough data is available and evaluated.	housing and development. Without regional or municipal funding, the cost to build communities increases and ultimately impacts residents and business owners. It should be a shared cost, not just assuming developments will afford to pay all infrastructure nearby. For the safety improvements at Powhaton and the railroad crossing, this should remain at-grade with the widened road since there are many limiting factors to an affordable grade separated bridge. There will be two nearby grade separated bridges with the near-term interchanges coming to the east (Monaghan) and west (Aerotropolis). Thank you for your consideration.	
No Comments	No Commenst	NEATS currently shows this as a separated grade crossing at Powhaton Road & Smith Road/Union Pacific RR. With the planned Aerotropolis Parkway (Interchange at I-70; separated grade crossing of Smith Rd & UPRR, and interchange with 26th Ave.) and the Monaghan Road/I-70 interchange being planned by the County, having another major infrastructure project at	

		this location on a Collector road crossing (Powhaton Road & UPRR)) should be re-evaluated. Based on the other road improvements planned in this area, this planned separated grade crossing should be eliminated from NEATS. The development in this area cannot support this amount of infrastructure through only their Metro Districts and ARTA.	
I haven't had time to review in detail.	I haven't had time to review in detail.	The proposed major bridge on Powhathon Road would impose a significant infrastructure cost on the region, adding to the existing financial burden created by the bridges on Aerotropolis Parkway and Monaghan Road. Given the proximity of multiple nearby interchanges, projected traffic volumes on Powhathon Road may not justify a grade-separated crossing. It is recommended that the City take a closer look at this segment to evaluate whether a more cost-effective at-grade solution could adequately serve anticipated demand.	Additional engagement with the development community recommended, including local civil engineers, traffic engineers, and planning firms.
I believe the policies listed really focus on the short and mid term needs of the city during this		Please continue to focus on how north and south Aurora can connect better, via multi modal	Heavy lifting in the project, great job to Tom, Huang,

incredible growth period. I also believe perhaps the E470 corridor may need its own policy in the NE area of the city due to how it is building out.		and micromobility. I feel it needs to be listed, so it is not forgotten about, from not only a business perspective but citizen connection perspective also.	and Rick/Amber! This wasn't easy.
			RTD is not efficient or cost effective. Not a big fan of it expanding into east Aurora

MISC. ADDITIONAL FEEDBACK

Additional feedback following Milestone 4 Office Hours was sent to the project team by one of the attendees:

Resident's Initial Input on the Connecting Aurora Transportation Plan

Particular Points-of-Interest Re: Info Gleaned from Connecting Aurora's Staff/Website

● Multi-Modal Transportation Planning

- Holistically (and inclusively) hope-full!

● BRT = Bus Rapid Transit

- This plan's a plus (to help resolve RTD-route transit-times) ★

● Aurora Rides

- Happy to hear …but wish it were here (extended to additional areas and to <60yo riders with mobility issues)!!

Potential Proposal(s)

(Pt 1: Senior and Mobility Transportation)

● Q: Could a Rapid-Expansion of On-Demand Rides Programs be combined with business-opportunities and lowered program-costs?

Visionary Network Idea(s): What if the upcoming **Aurora Rides** program were to somehow be more-rapidly expanded to serve both additional geographical-areas and additional age-/mobility-challenged demographics, while simultaneously creating more win-wins, for budgets (eg. those of City of Aurora, RTD, local NPO's/NGO's and various businesses) and perhaps added profits, as well, by integrating and utilizing multiple currently-established systems, entities and vehicles?

Current Insights:

- Using Access-a-Ride types of short-buses seems especially expensive (as much or more than a plane ticket?)

- The planned initial program for Aurora Rides is for a limited area, and for persons aged 60 and above

- Initial phase is planned for a 3yr period, before possible expansions

- Younger disabled/mobility-challenged persons are also facing gaps in their ability to find affordable, accessible transportation on an on-demand (or even on a reliable plan-ahead) basis.

Suggestions for Synergistic Solutions

● Could smaller wheelchair-accessible vans be added to the Aurora Rides program, to assist with transporting individual mobility-challenged disabled persons and Seniors door-to-door (and thereby also reduce the per-ride costs to the city and RTD)?

● Instead of purchasing additional vehicles for the program itself, might those being used by various other nonprofits and businesses already be utilized within their off-times by the program, somehow (bringing additional profits for those entities plus lowered costs for the city of Aurora and RTD)?

● Could current programs such as Access on Demand (esp. in collaboration with Uber's and Lyft's WAV programs) and RTD's Flexride and Access-a-Ride arms become Transportation dance partners with the Aurora Rides program (and areas/agencies beyond), while still offering free, On-Demand ridership to those who need it most (mobility-challenged, seniors and other adults) …and also integrate (pre-trained) vehicles from the point above (similar to Uber/Lyft drivers, but drawn from trained professional para transit drivers, vehicles and organizations)?

● Would there be any way to also integrate current Medicaid and other medical-insurance-covered rides programs (eg. TransDev and perhaps individual programs connected with Living Centers and/or veterans' benefits…) in order to create a more centralized, profitable, cost-saving and mutually-beneficial, efficient system of providing rides for those who need them for medical reasons?

Pt. 2 (and beyond?):

While additional ideas (in regards to both seniors / disabled persons and overall Transportation issues and inspirations and situations) have also percolated, in response to the processing of your information about the City's Connecting Aurora Plan, this resident is currently bumping into various tech issues (incl. unstable internet/wonky devices), plus the deadline for community input, so additional submissions are yet to be determined, at this point (and thought it might be best to at least try to get this part to you).

Thank you to all of the City of Aurora planning department staff members and leaders for your work in visualizing and creating better future connections for all who are living in, delivering things to or visiting Aurora (and areas which we want to travel to/from).

Connecting Aurora Community Input

(Pt 1a/addendum: Potential Supplemental Funding Sources?)

Aurora Rides / Free Shuttle Service Funding Ideas

For some reason, when the Lone Tree Link (On Demand Free Shuttle Service) comes to mind, it's with the thought that there had been some original articles saying that it was being funded by local businesses there. At any rate (whether accurate or

not), it has sparked additional ideas and questions about potential supplemental funding sources for the Aurora Rides services:

● Could something be set up so that various local destinations (eg. from businesses such as retail places, grocery stores and malls to hospitals and clinics, rehabs and senior living centers, theaters and churches, parks and rec, workplaces and/or government agencies) might contribute towards funding the service by purchasing annual memberships for being designated (or prioritized/advertised?) destination-points? Bringing more people to them might be a worthwhile win-win of bringing them higher profits, payments, memberships, visits and attendance/usage while helping to financially support the Aurora Rides program.

● Might there be a way to have certain contributing members / destinations also contribute smaller micro-payments for each rider who is dropped off at (and who spends a minimal amount of time at) their location; and have these micro-payments automatically-calculate and accrue via an app which tracks precise locations of the riders who are utilizing the Aurora Rides service?

● Perhaps a nominal (or even sliding-scale) fee could also be considered for people using Aurora rides who are not disabled/mobility-challenged and/or who are over a specific (non-poverty) income-level. Maybe they could also receive some sort of automatic-credit applied (via the app's scheduling and precise-location-services) to their Aurora Rides account/next-rides, if they choose (and spend time at) one of the location-destinations which is an annual/paid program-member?

AURORA PLACES

planning tomorrow's city

The Comprehensive Plan for the City of Aurora, Colorado

Adopted by Ordinance 2018-37
Effective October 27, 2018

Connecting Aurora Update - March 2026
Adoption Draft

Acknowledgments

Aurora Places would not have been possible without generous participation from the Aurora community. The unprecedented diversity of community stakeholders were integral to developing the city's vision and planning for its future. Additional information about public input into Aurora Places can be found in Chapter 3.

Aurora Places in the Region and Nation

Aurora Details

- 374,154 residents (2018)
- Third most populous city in Colorado
- 54th most populous city in the U.S.
- Part of the Denver-Aurora-Lakewood Metropolitan Statistical Area (19th largest in the U.S.)
- Approximately 160 square miles and only partially built out

Highly Accessible to Regional Transportation Corridors

- Interstate 70 (east to west through northern Aurora)
- Interstate 225 (north to south through central Aurora)
- E-470 (north to south through central Aurora)
- Denver International Airport (DEN) and the Colorado Space Port (adjacent to Aurora's northeastern boundary)
- Regional Transportation District (RTD) Aurora Line (R Line) with 10 stations in Aurora
- RTD University of Colorado A Line, connecting to Denver International Airport and downtown Denver, with service through Aurora's Peoria Station and 40th / Airport - Gateway Park Station

THE RIGHT PLAN AT THE RIGHT TIME

Much has happened in Aurora since the city's last comprehensive plan was adopted in 2009. The population has grown by 15 percent or 47,384 people, and the city has become even more diverse, with thousands of residents hailing from over 50 different countries. The Anschutz Medical Campus experienced recent exponential growth, becoming the most prominent academic health center in the Rocky Mountain region. The Regional Transportation District (RTD) opened the R Line light rail–our Aurora Line–adding seven new stations in Aurora, increasing mobility in the city and connecting the region to Aurora. Stanley Marketplace, Stapleton Aurora, the Gaylord Rockies Resort and Convention Center, the Hyatt Regency Aurora-Denver Conference Center, and numerous new projects at rail stations and on the eastern plains have been completed or are underway.

Together, these changes–and many yet to come–offer opportunities and challenges as Aurora rapidly evolves from a mid-size, suburban community to a large city. Aurora Places will provide the foundation for these efforts by describing a general path forward and identifying and addressing trends, needs and opportunities broadly and comprehensively. Aurora Places includes the following:

Chapter 1. The Right Place at the Right Time

What is Aurora Places and how is it used? It is a foundation for decision-making and focuses on planning and connecting places.

Chapter 2. A City in Transition

How is Aurora changing, and what are some of the key issues that need to be addressed? It describes challenges associated with the economy, housing, population and natural resources.

Chapter 3. A Community Conversation

What did we hear from the community? Aurora Places engaged residents, businesses, officials and city staff in an extended conversation concerning important matters in the city and ways to successfully move forward. The conversation provided ideas concerning a strong economy, population diversity, housing variety, health, the environment, improved mobility, and an improved and authentic reputation.

Chapter 4. Placetypes

What types of places need to be planned and developed or improved in Aurora? Aurora Places describes types of places and principles to be employed in planning and developing these places. It includes a map showing the proposed general locations for these placetypes.

Chapter 5. Connecting Places

How does the city connect the different places? This chapter describes concepts for city form, transportation, water, parks and open space, cultural resources, strategic areas and other means for providing connection and choice in the community.

Chapter 6. Goals and Policies

What are the detailed goals and recommended practices for Aurora? Both were formulated based on an understanding of issues facing the city, what we heard during the community conversation and a grasp of placetypes and connections.

Chapter 7. Action Strategies

What are the immediate action steps that should be taken to implement the goals and policies in the plan? It describes some of the tools that can be used immediately, along with specific strategies and measurements for success.

What is AURORA PLACES?

Aurora Places is the plan for our city's future.

It is designed to serve as a foundation for decision-making related to growth and development in Aurora. It presents a vision for the future, with long-range goals and recommended actions for a variety of public activities. The vision identified in Aurora Places is based on a public engagement and outreach process more extensive than that of any previous planning initiative. The information that residents, business owners, subject matter experts, city officials, staff and other stakeholders provided was critical to understanding the community's concerns, aspirations and priorities.

The plan emphasizes the importance of creating and improving the variety and types of places throughout the city. These placetypes include urban districts, neighborhoods, commercial and industrial areas and areas for innovation. Aurora Places also describes the systems that connect places citywide, including transportation, water and parks and open space.

Public outreach and engagement was key to the creation of Aurora Places. The information and feedback collected from residents, business owners, subject-matter experts and community stakeholders was critical in both understanding the community's concerns, aspirations and priorities and responding effectively to the city's needs. In addition, the city and its consultants conducted extensive inventory, analysis, research and assessment to fully understand the impact of the various conditions that influence planning and the context of the city as it exists today. This extensive inventory, outreach and engagement program also provided the feedback necessary to identify and establish a community vision and community principles.

COMMUNITY PRINCIPLES

A Strong Economy Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

A Diverse and Equitable City Principle: Diversity and equity are assets to be nurtured and promoted by the city.

Housing for All Principle: High-quality housing options enable people across all socioeconomic levels, cultural practices and stages of life to establish and manage households.

A Healthy Community Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans.

A Thriving Environment Principle: Stewardship of water, energy and natural open spaces is essential to the well-being and success of residents and the community.

Easy Mobility and Active Transportation Principle: An easy-to-use transportation network with multiple choices for travel supports a strong economy, healthy community and flourishing environment.

An Authentic Aurora Principle: The creation of great places, the preservation of traditionally unique places, and effective marketing and promotion are essential to improving Aurora's image.

A COMMUNITY VISION

Aurora is a welcoming and safe community and a city of opportunities where people of all backgrounds can prosper. Aurora is known for its unique places, strong economy, community involvement, quality and attainable housing, integrated and healthy neighborhoods, smart ways to get around and a thriving natural and cultural environment.

How to Use AURORA PLACES

Aurora Places is general in nature–it cannot tackle every issue in sufficient detail to determine every type of necessary action. The plan's intent is to identify key areas of focus, define a vision for future growth and development, and provide guidance for city actions and investments over the next 10 to 20 years. In areas where more detailed information and recommendations are needed, the plan may identify additional steps or actions to address those needs. The plan serves the following key functions:

Telling Aurora's Story and Sharing Its Vision

At its core, the plan should serve as a powerful statement of the community's vision for how it grows and changes in the coming years. The plan identifies the city's priorities and charts a path for the city's long-term growth.

Evaluate and Inform Development Proposals

The plan should guide and assist in the evaluation of public and private development proposals and help ensure that proposed developments support the city's long-term objectives.

Regulatory Framework

The plan should serve as a foundation for zoning regulations, subdivision regulations, the official zoning map, water planning and policy, flood hazard regulations, annexation decisions and other decisions guided by these regulations. Amendments to these regulations should be made as needed to support the long-term objectives of the plan.

Coordinate Local and Regional Initiatives

The plan should inform and coordinate local and regional planning initiatives at the city, county and regional levels. The plan may aid and inform efforts related to housing, transportation, transit, trails, water and natural resources, economic development, annexation, conservation and more.

CIP and Budgeting

The plan should inform the development of the city's capital improvement program and budgeting process and help establish priority expenditures and the sequence of capital improvement programming.

Identify Future Studies

The plan establishes a path forward, but cannot address every issue in sufficient detail. It should help identify additional studies and future action steps to address specific needs.

Inform and Educate

The plan is a valuable source of information for policy makers, local boards and commissions, organizations, businesses and residents. This broad spectrum of interests should use the plan to inform members and stakeholders and provide important information that can assist with future initiatives.

A CITY IN TRANSITION

Situated on prairie grasslands, rolling hills and the Black Forest's northern tip, Aurora, Colorado started as a small collection of subdivisions that incorporated initially as the town of Fletcher in 1891. In 1907, the town was renamed Aurora and was officially incorporated as the City of Aurora in 1928. The city grew steadily throughout the 20th century as the largest city adjacent to Denver's eastern border. Today, with more than 361,000 people, Aurora is among the nation's largest cities–bigger than more well-known cities like St. Louis, Pittsburgh and Cincinnati.

Aurora welcomes and celebrates the growing diversity of its population. As an emerging economic leader within the Colorado Front Range, it is a city that supports and promotes the entrepreneurial spirit of its residents. Aurora forms the eastern edge of the metropolitan area, is conveniently located next to Denver International Airport and serves as a major transportation hub. Its residents enjoy a comfortable way of life and a wealth of opportunity, with access to quality education, family friendly neighborhoods and a strong job market. Aurora has the potential to become a global destination for residents and businesses because of its diversity, location and economic opportunity.

It is a critical time for Aurora–a time that calls for bold planning and strategic thinking.

The city's history as a suburb has resulted in obstacles that must be overcome. The city generally lacks urban places that will attract 21st-century jobs and the people who want to work in them. Housing options are not as diverse as other large cities and transportation options are increasing but need to expand citywide. Water is a critical resource that requires a strategy of planning, acquisition and conservation in order to meet future demands. The plan's name, Aurora Places, captures the essence of what Aurora needs most in its future-more options, high-quality public spaces and new urban places.

Building on a community conversation that engaged thousands of Aurorans, Aurora Places describes strategies for overcoming obstacles and forging a clear path to reach the city's full potential. This comprehensive plan will serve as a guide for decision making as the city navigates through this transitional period.

Economy

Our city needs new types of urban places and a greater variety of neighborhood experiences to attract employers and support new, higher-paid jobs and to draw the most talented workforce to fill those jobs.

For much of its history, the public viewed Aurora as a bedroom community and a suburb of Denver. But with the ever-growing prominence of key economic assets like the Anschutz Medical Campus, Buckley Space Force Base and related aerospace industries and recent additions such as Stanley Marketplace, the Amazon fulfillment center, and the Gaylord Rockies Resort and Conference Center, the city continues to be attractive to businesses and investment. Still, the majority of workers who live in our city commute to other communities to work.

Also, a majority (74 percent) of those who work in Aurora do not live in the city. Aurora is heavily dependent on its retail sales tax for revenues to support city services. In general, attracting more of its workers to live in Aurora will increase city revenues and boost the local economy.

Inflow / Outflow

Most workers who live in Aurora work elsewhere, likewise, most people who work in Denver live elsewhere.

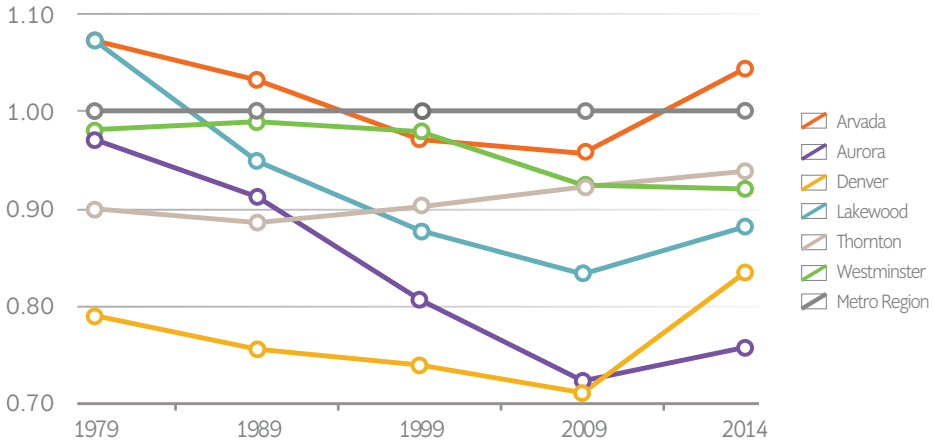
Relative Median Income

In comparison with the metropolitan area, Aurora's incomes have been low.



Source: Colorado Department of Labor and Employment

It is projected that the healthcare industry will continue to provide the greatest number of jobs in Aurora, followed by education services, retail trade and professional services. All together, these sectors account for over half the jobs in the city. While these sectors do offer some above-average and high-wage jobs–like doctors, researchers and professors–a large portion of the jobs in these fields tend to pay less. Average household and family incomes in our city are relatively low compared to neighboring communities. Families are sometimes challenged to meet their basic needs–including housing and transportation–leaving little extra spending money, which reduces the city's sales tax revenues. Since the city of Aurora is primarily dependent on sales tax revenues to support basic services such as public safety and street maintenance, increasing average family incomes is critically important.

Aurora is home to many talented and hard-working residents, but to stay competitive in the regional and national employment markets, it is essential that Aurora's workforce be equipped with the education, training and credentials needed in tomorrow's economy. The quality and readiness of Aurora's workforce can be a significant advantage in attracting and retaining growing businesses to the community.

Increasingly, the quality of life and authentic, unique places in a community dictate where both employers and employees choose to locate. Our city needs new types of urban places and a greater variety of neighborhood experiences to attract employers and support new, higher-paid jobs and to draw the most talented workforce to fill those jobs. In addition, Aurora must continue to attract primary employers and higher-income jobs to complement the current workforce and grow Aurora's economic base.

Population

The increasingly diverse population offers the opportunity for our city to grow its economy by developing a unique identity and culture within the metropolitan area.

While the city has seen a steady increase in population throughout its history, a long period of rapid growth began in 1950. Establishment of Aurora's own water utility in 1949 significantly expanded the water supply available to serve the community, allowing for substantial growth in the following decades. Aurora experienced its most dramatic population growth in the 1970s and 1980s when it added almost 150,000 people–tripling the population of the city. Although the population growth rate has slowed in recent decades, our city continues to add an average of 5,000 people each year–or roughly 50,000 people per decade–bringing the current population to over 360,000.

Aurora has become more culturally diverse and has become a majority-minority community. A fifth of Aurora's population was born in a foreign country, a number that has grown substantially over the past couple of decades. But Aurora isn't just known for being a place of many cultures. The city is also recognized for its racially and culturally integrated neighborhoods. Brown University research cited Aurora as the 9th most diverse at the neighborhood level and the 10th most integrated community among the 100 most populous cities in the United States.

Like other communities in the nation, Aurora is aging with a growing population of seniors. This life stage can usher in changes to housing and transportation needs, shopping habits, recreation and entertainment preferences, and health care and social service needs. New types of places will allow more residents to, "age in place" as their needs and preferences change, and continue to call Aurora their home.

Diversity extends beyond age, race or ethnicity, however. Aurora is home to households with very diverse incomes, employment, sizes and compositions. Single-person households, extended families, educational attainment, income levels and other unique personal situations can significantly affect a household's needs for housing, transportation, and other aspects.

Population

The population of Aurora has grown steadily with more recent periods of rapid growth.

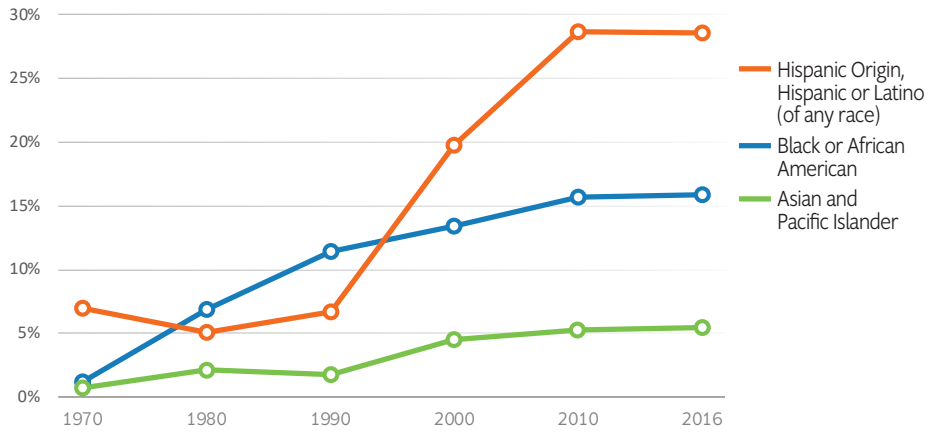
Race / Ethnicity

The Hispanic, African American and Asian ethnic populations have been growing at a relatively rapid rate.



Source: Who is Aurora Report

Being home to a diverse and inclusive community has broadened the city's cultural understanding, educational offerings and community life. As the city continues to welcome newcomers and adapt to meet the changing needs of long-time residents, it is challenged with ensuring that they can all enjoy everything that Aurora offers. That includes access to quality jobs and a local economy that rewards entrepreneurship and supports small-business success, safe neighborhoods, access to quality schools and ample opportunity to be active in civic life. The increasingly diverse population offers the opportunity for our city to develop a unique identity and culture within the metropolitan area, grow its economy and meet the changing needs of its residents.

Housing

By expanding the types of housing and neighborhoods that Aurora offers, the city can better meet the diverse preferences and needs of residents across the income spectrum.

Moderately priced, single-family homes and smaller-scale apartment buildings have dominated housing construction in Aurora. Aurora now needs a much broader range of housing options. While our city contains a variety of housing products at various prices (both for-sale and rental), there is a supply-and-demand gap at many price levels. This discrepancy between supply and demand is strongest for both the lowest-and highest-income households.

Although Aurora's single-family housing values are increasing at a rate similar to that of the metropolitan area, Aurora remains one of the most affordable communities in the region. According to Zillow, Aurora has one of the lowest median sale prices in the region, even though the median price is higher than the country's median. However, for-sale housing is less affordable than in the past. Additionally, there is minimal higher-end, luxury housing in Aurora.

Aurora's median rent is similar to the metropolitan area's, yet, the city has fewer rentals below $1,000 and more above $1,000 than the region. Comparatively, in 2000 almost 60 percent of rentals in Aurora were priced lower than $750 per month. Many renters in our city are being pushed out, becoming cost burdened, or are being forced to house together to afford to stay in their homes.

The Percentage of Renter Households

The majority of renters in Aurora are burdened by high housing costs.

Renter/Owner Unit Supply Discrepancy

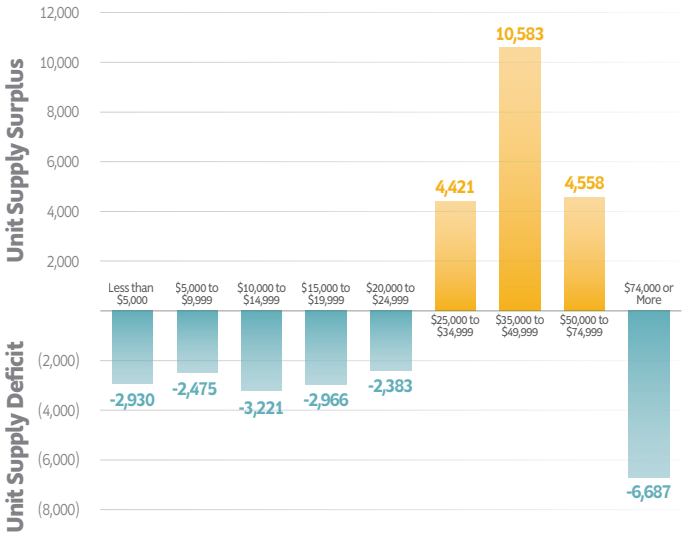
Housing is available to meet the needs of moderate income households but is not adequately available for lower and higher income households.

Housing for low-income households in demand in Aurora. Currently, Aurora has an insufficient number of rental properties that low-income households can afford without experiencing a cost burden or spending more than 30 percent of annual income on housing. This forces potential disposable income to instead be spent on housing.

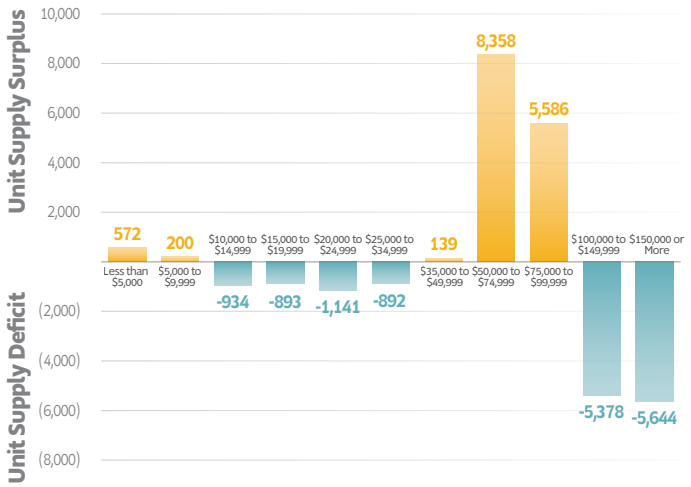
At the other end of the housing market, our city lacks sufficient higher-value units to meet the needs of higher-income households looking to live in Aurora. As the number of higher-income professional jobs increases, upper-end housing will be needed to accommodate these households within the city.

Expanding both affordable and higher-value housing will prevent the need for workers to look for a home in a neighboring community.

Renter



Owner



**This chart measures the discrepancy between available supply of renter-occupied housing units and the households that earn incomes that can afford them comfortably, as measured by spending less than 30 percent of total annual income.*

Natural Resources

Careful stewardship of water, energy and natural resources not only represents a commitment to protecting the natural environment, but is also essential to our city's ability to meet the growing needs of its residents and businesses as the city develops.

Aurora's natural environment contributes to the city's high quality of life by providing recreational opportunities, transportation and neighborhood connections, a unique identity, ecosystem preservation, and highly cost effective solutions for stormwater runoff and water conservation. As Aurora continues to grow, it will need to expand its outdoor and recreational opportunities and to conserve its valuable natural resources in order to balance future community needs.

With an incorporated land area of 164 square miles, Aurora is located in the rolling hills and high plains grasslands of Colorado, just to the east of the Rocky Mountain foothills.

WATER-WISE LANDSCAPING

Water-wise landscaping (also known as xeriscaping) is sustainable and drought tolerant due to the low-water plants and specific techniques used to maximize water efficiency. When compared to grass, which requires about 28 inches of supplemental water annually, water-wise landscaping can thrive on 15 inches or less and weathers longer periods without water. Additionally, this type of landscape often requires less maintenance. The city operates a number of programs to promote the use of these techniques, including design assistance, plant suggestions, rebates, educational resources and a recognition program.

Aurora is more than a mile high at its lowest point of 5,285 feet above sea level. But then the city's elevation increases to more than 6,200 feet above sea level at its highest point in the southeast. Surface water in Aurora flows into several streams that eventually adjoin the South Platte River. Aurora enjoys a mild, semi-arid climate with an average annual precipitation of only 15 inches and an average of 300 sunny days per year. Its sweeping views of the Front Range mountains and its mild climate make it a pleasant place to live. The well-developed park and trail systems, coupled with large open space areas like the Plains Conservation Center and Aurora Reservoir, provide significant outdoor places for the community.

Water supply is critical to Aurora's future. Currently, our city's water supply comes from the Colorado River Basin, Arkansas River Basin, and Upper South Platte Basin. According to the 2016 Integrated Water Master Plan, the city's water demand is projected to more than double by 2070. In accordance, the city plans to obtain additional water supply and expand storage capacity.

The city's strong conservation program is crucial in addressing its water-supply challenges such as limiting outdoor watering to three days a week, water-wise landscaping rebates, and other programs. Conservation, water efficiency and demand management practices are incorporated into Aurora's land use planning and development standards. These programs have saved 528 million gallons of water between 2014 and 2016.

Aurora has undertaken several energy conservation efforts. The city has worked with partners to create the country's largest solar-technology test facility. The 74-acre Solar Technology Acceleration Center (SolarTAC) is located at the Aurora Campus for Renewable Energy (ACRE).

XCEL Energy operates six acres of community solar gardens that allow Aurora customers to buy renewable energy credits for their homes and businesses. The city also has photovoltaic systems at three of its public facilities. Aurora has sponsored several educational and outreach programs for schools and businesses to help them improve their energy efficiency. These initiatives provide an opportunity to integrate energy efficiency and economic development.

Careful stewardship of water, energy and natural resources represents a commitment to protecting the natural environment. The integration of water and land use planning will enable our city to conserve its resources and make strategic, cost-effective infrastructure with the highest level of reliability. As Aurora continues to evolve into a major city, stewardship of these natural assets becomes increasingly important to maintain Aurora's quality of life and provide both functional and environmental benefits.

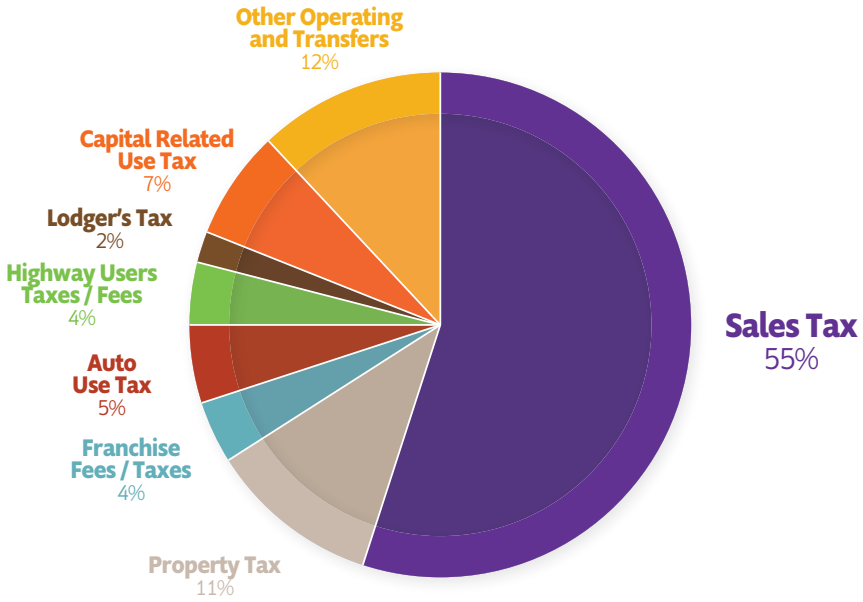
Fiscal Health

The city's long-term fiscal health is strongly tied to how the city chooses to grow. All types of development and redevelopment have associated positive or negative fiscal impacts. It is critical to understand these implications when weighing growth decisions. Revenue is driven largely by consumer demographics and the type and intensity of development constructed in the city. The spending power of Aurora households or outside visitors who shop in the city drives sales tax revenues while the type of development drives both property tax revenue and required city services. Many of the city's largest budget appropriations are directly related to the growth and development of the city, such as transportation improvements, water and wastewater utilities, police and fire services, and parks and recreation.

Aurora is deeply dependent on local sales tax to support its budget. In the 2018 Adopted Budget, sales tax revenue is the largest operating source of revenue, contributing 55 percent of General Fund sources. This source of revenue is largely driven by population demographics the availability of disposable income of Aurora households. Consumer spending by daytime Aurora-based employees and spending by visitors to the city are other sales tax contributors. Aurora residents shopping outside the city, or "retail leakage"; growing popularity of online shopping; and a shifting proportion of spending on taxable goods toward non-taxable services can have a negative effect.

Adopted General Fund

Sales provides the majority of revenues in the city of Aurora.



Source: City of Aurora 2018 Adopted Budget

Overall consumer spending is often cyclical, in large part based on regional or national economic trends; however, the city can take actions to capture its fair share–or more–of sales tax revenue in both strong and challenging economic times. One strategy is to create unique places that draw shoppers to Aurora and keep resident spending in the city is one strategy. These Aurora places can offer desirable experiences and retail and restaurant options that respond to changing consumer preferences.

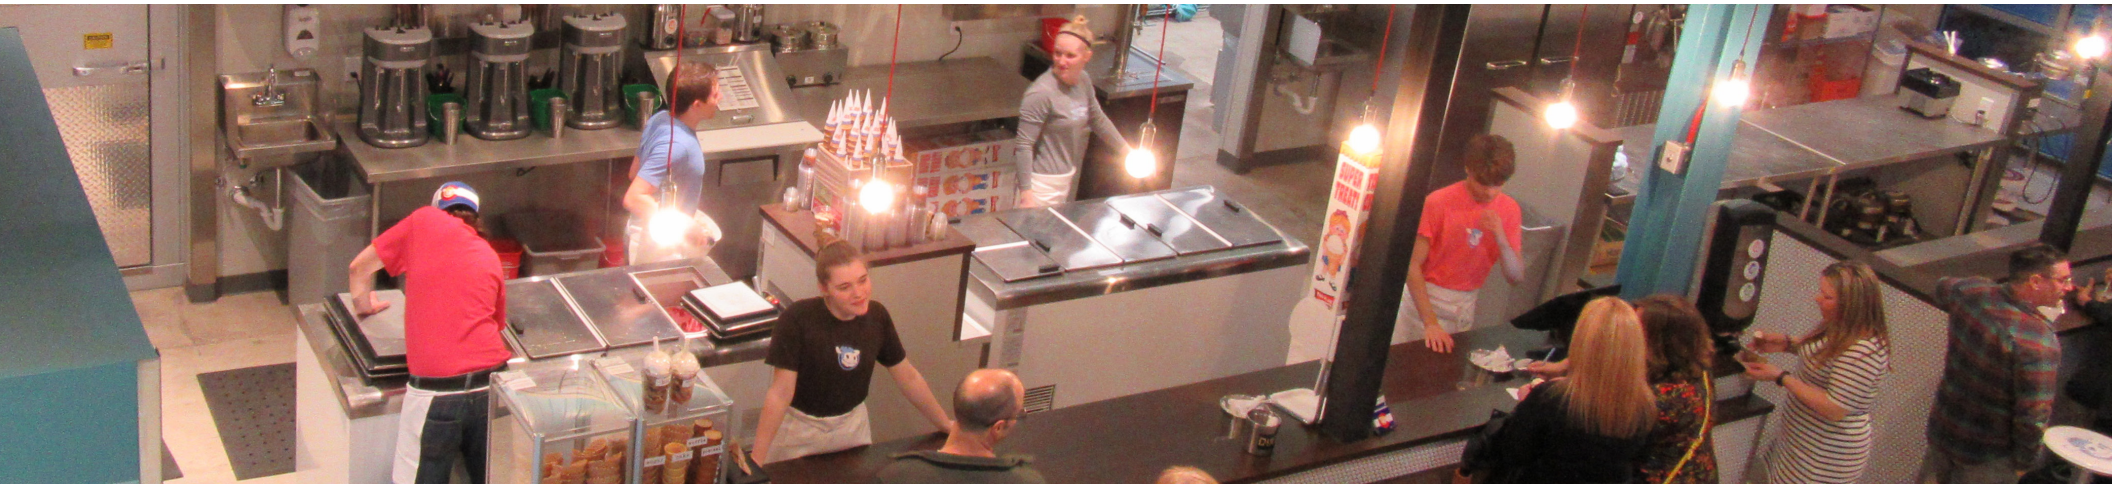
The second largest revenue source is local property taxes, which comprises 11 percent of the General Fund revenue. The property tax revenue from new development will vary based on the type, quality and density of housing, and value of non-residential development. In large part, these factors are established when a new development is planned and built.

Furthermore, the city will continue to work within state legislative constraints, such as the TABOR (Tax Payer's Bill of Rights) and Gallagher Amendments, as they affect the growth and balance of commercial and residential property-tax revenues.

The 2006 Study of Revenues report found that the city will face budget challenges under various scenarios of growth and expenditure. This is described as the "structural gap" between ongoing service needs and the city's revenue capacity. Periods of strong revenue growth delay or reduce the size of the gap, while recessions cause the gap to grow.

In response to the study, the city has taken steps toward reducing the structural gap, such as judiciously funding service level needs with ongoing revenue, using one-time funds for one-time needs, and indexing service fees annually. The long-term General Fund financial outlook scenarios confirm a gap remains a risk. Closing the gap will likely require measures that address both expenditures and revenue.

Aurora Places aims to address the role of development and economic development in the city's overall health. The fundamental goal of the plan is to create a strong and stable city that meets the needs and desires of residents and continues to be attractive to investors and employers. Placemaking plays a unifying role in creating great destinations to live, work, invest, shop and play. This is an essential part of the community's future economic and fiscal success.



COMMUNITY CONVERSATION

Aurora Places is the community's plan.

The Aurora Places team engaged in in-depth conversations with the community to create a plan based on the aspirations of the people who live and work in Aurora. Aurora's diverse population made it even more essential to listen to the community's broad range of perspectives, including:

- Aurora City Council
- Residents and neighborhood organizations
- Business owners and major employers
- Local school districts and higher education providers
- Local advocacy organizations
- City boards and commissions
- City administration and staff

Community Vision Statement

Aurora is a welcoming and safe community and a city of opportunities where people of all backgrounds can prosper. Aurora is known for its unique places, strong economy, community involvement, quality and attainable housing, integrated and healthy neighborhoods, smart ways to get around and a thriving natural and cultural environment.

COMMUNITY CONVERSATION

Aurora Places is built on a foundation of community input resulting from an ambitious outreach campaign.

The community and planning team collaborated in person and online, at events, in small groups, and community-wide workshops. In 2016 and 2017, the planning team interviewed individuals, held focus groups and community workshops, conducted online surveys, hosted the sMap interactive mapping tool, and distributed do-it-yourself (DIY) workshop kits to local outreach teams. To ensure that the city's non-English-speaking community had an opportunity to participate, the Aurora Places team conducted outreach in six languages.

In January 2017, local experts, representing a variety of community topics, participated in focus group discussions. In spring 2017, the Aurora Places team hosted community workshops focused on creating a vision for Aurora's future. The issues, opportunities and desired actions expressed in this chapter reflect the opinions and feedback from community residents and stakeholders. The discussions and comments from these groups were used to inform the planning process and develop insights into the key issues facing the Aurora community.

3,200+

Aurora Places team has engaged more than 3,200 residents, businesses and city staff in the making of this plan.

800
RESPONSES

The online surveys generated almost 800 responses.

500
MAP POINTS

The community mapped more than 500 assets, issues and concerns using sMap; a web-based application developed by Houseal Lavigne Associates.

6
LANGUAGES

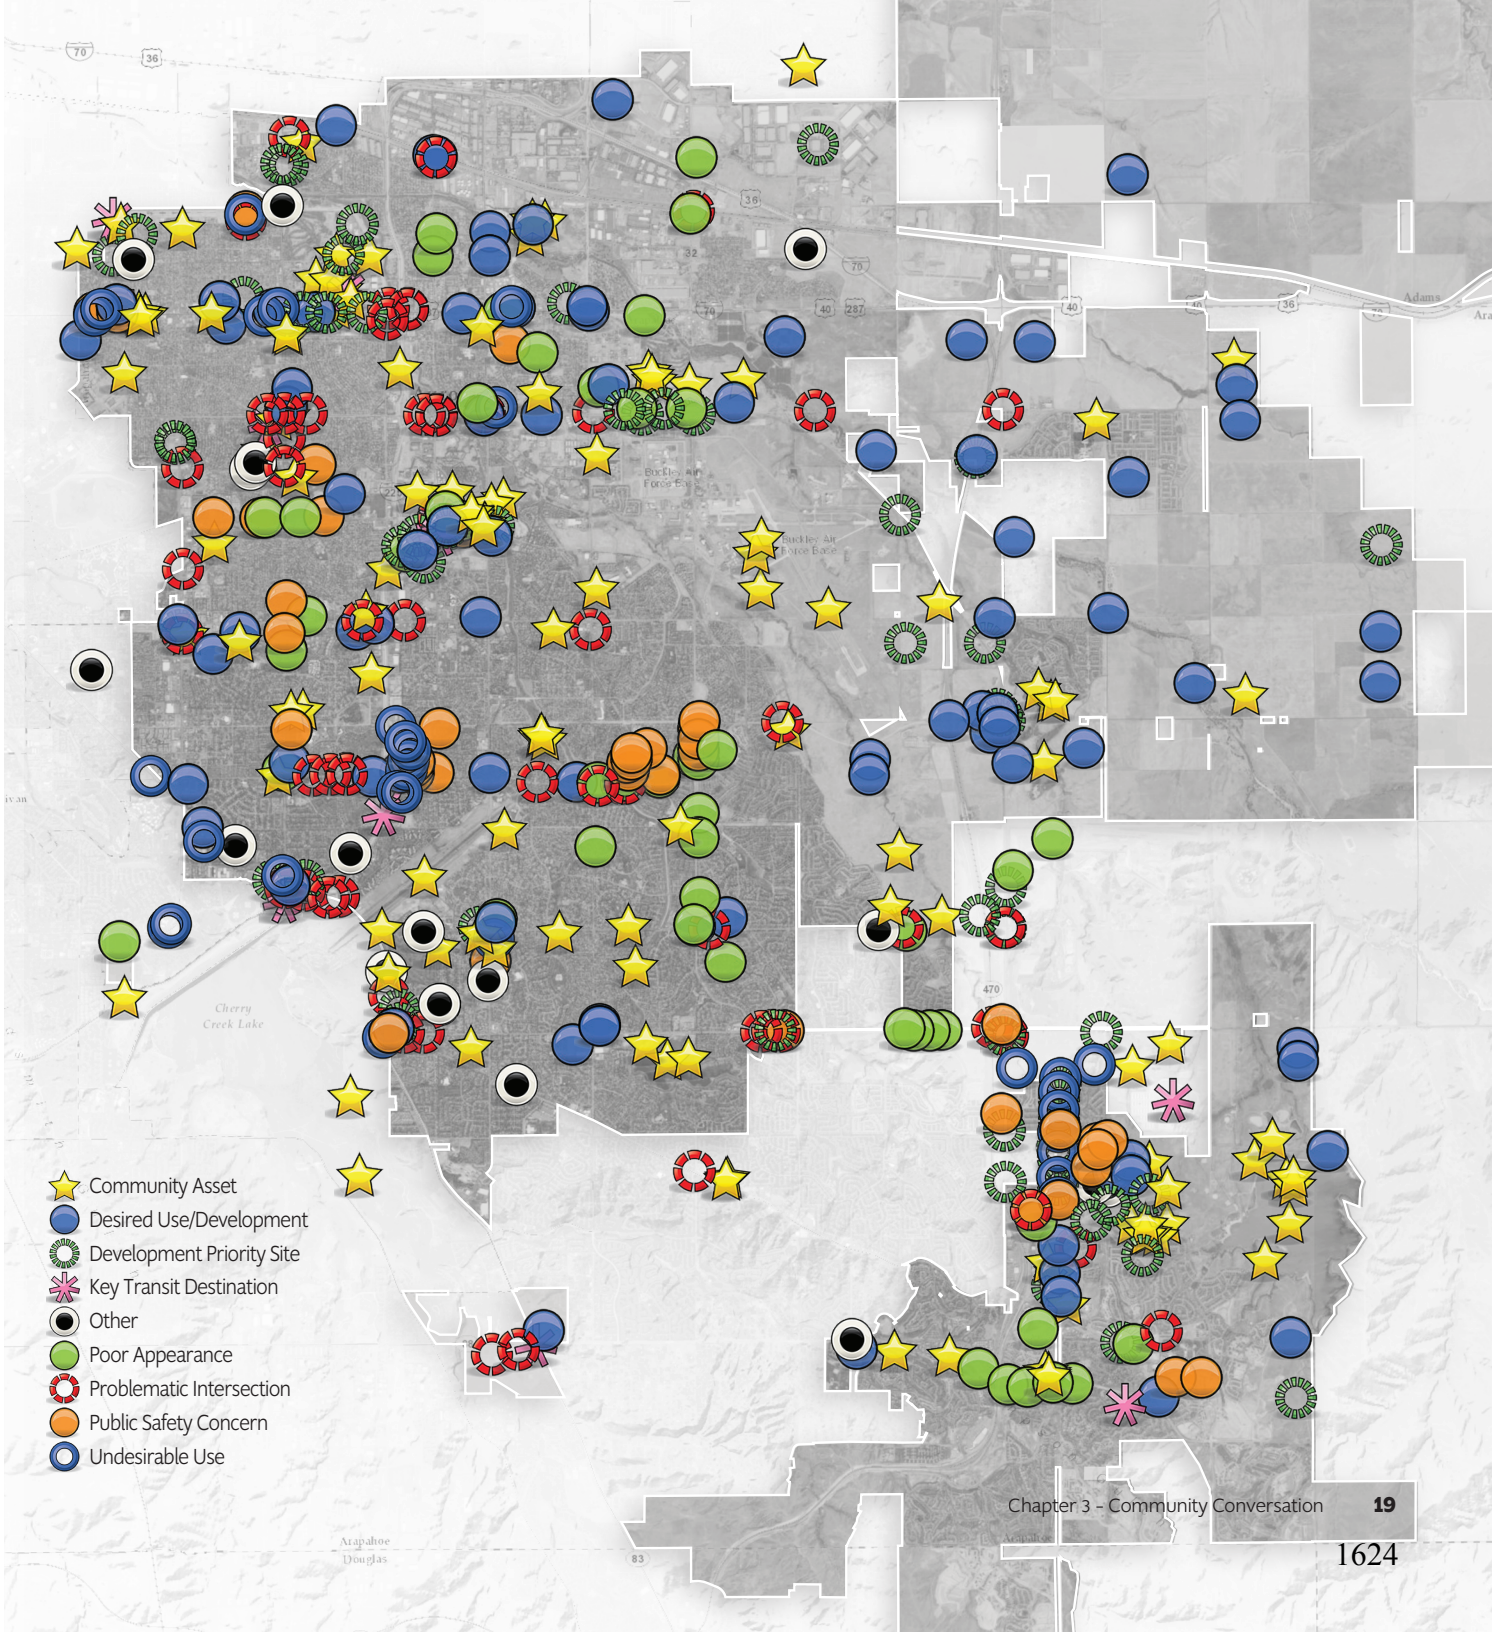
Outreach was conducted in English, Spanish, Korean, Amheric, Somali and Burmese.

55
DIY + LOT

Do-it-Yourself (DIY) workshop kits distributed to local outreach teams (LOT) resulted input from 1,000+ residents.

SMAP

As part of the planning process, sMap, a web-based outreach and engagement platform, was used by residents across Aurora to gather input on issues, concerns, opportunities and aspirations. In a later round of community outreach, sMap was used to prioritize the most important components related to community health, diversity, mobility, sense of place, local economy, housing and sustainability. Input provided helped to shape the vision, core principles and goals included in Aurora Places.



WHAT WE **HEARD...**

COMMUNITY PRINCIPLES

Community members identified many issues and actions to make Aurora better. They described what they considered to be Aurora's most important assets and voiced concerns that will help determine how to best plan for our city's continued development. Through the community conversation, the Aurora Places team assisted the community in identifying and defining seven topic areas as priorities for Aurorans. These seven community principles served as the foundation for the development of the Aurora Places.

A Strong Economy

The participants in the community conversation stressed the importance of economic growth for Aurora. The city has several community assets that provide a foundation for growing the local economy, including a major research center at the Anschutz Medical Campus, the Buckley Space Force Base and a new light rail line. According to participants, job creation and access to workforce training resources are very important. There is a strong desire to improve support for small and local businesses. There is also a need for unique urban places for employment, together with housing, daycare and locally grown businesses. Multiple modes of transportation should connect these urban places. Partnerships with institutions and the private sector will be critical for the economy, especially in relation to training and education.

A Diverse and Equitable City

The population of Aurora is diverse in every way. Aurorans wanted to celebrate this diversity and make sure that services are provided to the people of Aurora, regardless of background, age, income or ability. Diverse populations should enjoy all of the opportunities and amenities that Aurora offers. Improved intercultural communication is needed, along with enhanced services for immigrants, people with disabilities, seniors and low-income families. Displacement of people from their homes and neighborhoods as development occurs around them is a critical issue to address. Participants also called for the city to continue to engage diverse communities and provide information and services in multiple languages.

Housing for All

Participants described the need for more high-quality housing in a range of types and prices, including affordable housing. The lack of affordable housing options for low-income families, particularly for renters, must be addressed. Participants emphasized the need to end homelessness. There is a need for more housing choices and options, and existing affordable housing should be preserved and direct assistance should be provided to low-income families. Development regulations and processes should be improved to make housing development more efficient and less costly. Affordable housing should be located at accessible places such as at transit stations and close to job centers.

Healthy Community

Participants identified the need for additional recreational opportunities and better access to healthy food. Participants also expressed desire for improved public safety and mental health resources. They also expressed interest in smoking cessation programs. There was strong support for community gardens, urban agriculture, and fresh and healthy food options available in every neighborhood. Our city should support health promotion events, inventory sidewalks and crossings and invest in street improvements to allow residents to walk and bike safely in their neighborhoods and across the city.

Thriving Environment

Participants described the need for more water and energy conservation and improved recycling options and opportunities. They expressed concern for improving air quality to protect health and the environment, and preserving, enhancing and connecting open spaces, trails and waterways. They understood that planning for growth and water supply are inextricably connected and emphasized the need for water conservation education, the use of native vegetation, water-wise landscaping and green infrastructure. The city should promote construction of energy-efficient buildings, and educate the public about energy-efficient practices.

Improved Mobility and Active Transportation

Aurora has significantly improved the mobility of Aurorans by providing new travel options for cyclists, pedestrians, drivers and public-transit users. Participants wanted to continue to increase and improve all types of travel connections. Aurorans are concerned about traffic congestion, safety, road maintenance and the need for additional bike routes. Improved walkability, public transit and transportation technology are needed. Participants expressed strong concerns for meeting the travel needs of the disabled, the elderly and families.

Authentic Aurora

Participants frequently stated that Aurora's reputation does not reflect its actual high quality of life. In addition, participants wanted to make improvements to the city that will reflect well on it, particularly through the creation of new downtown areas as locations for jobs, entertainment and the arts.

Aurorans want to improve the community's image and perception. Part of that improvement will involve the creation of unique urban places where people can come together to work and enjoy entertainment, art and community events. Our city needs an improved image, reputation and appearance, along with more distinctive destinations for both residents and visitors. They were also concerned with eastward growth and its impact on city services and fiscal health.

PLACETYPES

From the Havana District to Colfax Avenue to southeast Aurora and the northeast plains, Aurora is a city of individual places joined into a unified community. Like most large cities, Aurora has places with different histories and characters, separated by significant distances. Aurora currently has fewer types of places compared to cities of similar size. For instance, Aurora lacks an established central business district or downtown. If the city wants to build on its diversity and continue balancing growth and success, it is critical that it creates these and other places throughout Aurora.

In vibrant cities, great places most often take the form of unique neighborhoods and active mixed-use districts, designed around parks, plazas and main streets, with distinctive architecture and a diverse mix of activities. Such places allow people to meet, conduct business, exchange ideas and interact with one another. During the 20th century, most American city plans placed a focus on individual land uses, such as single-family homes, apartments, shopping centers and industry, without fully recognizing the dependency each of the uses had on the others. The most successful, sustainable and vibrant cities have recognized and organized their uses to create complete places.

Great cities are composed of great places.

1628

PLACE-BASED APPROACH

Placetypes define Aurora's neighborhoods and destinations by creating unique places with their own characteristics.

This plan describes future development and land use in terms of "placetypes". They characterize specific areas of the city based on defining qualities, scale, form and function. Aurora's ten placetypes constitute well-defined, unique and desirable places. The vision described by these placetypes should direct or regulate new development areas as well as guide the evolution of an established place through redevelopment, infill development, or planning of new public improvements.

Placetypes are created and strengthened through community stewardship, neighborhood planning, land-use regulation, public improvements and public-private partnerships. Places are built through many decisions and investments, anchored in vision, and working toward a common outcome.

Each placetype incorporates flexibility and potential for innovation, evolution, or reinvention. The creation of places not only depends on land uses but also on design, functionality and access to infrastructure. Employing these placetypes foster more inclusive, accessible and economically successful places that implement the seven community priorities described in Chapter 3.

UNIQUE AURORA PLACES

While locations or districts of the same placetype generally share defining features, each individual place defines its own unique character and specific mix of uses to meet local needs and desires. For example, the Anschutz Campus, City Center area and Southlands Town Center are all designated as Urban Districts.

While those examples may share general characteristics or defining features, each offers a unique mix of uses and experiences. Placetypes are descriptive, not prescriptive. Diversity of places and experiences is a strength of Aurora.

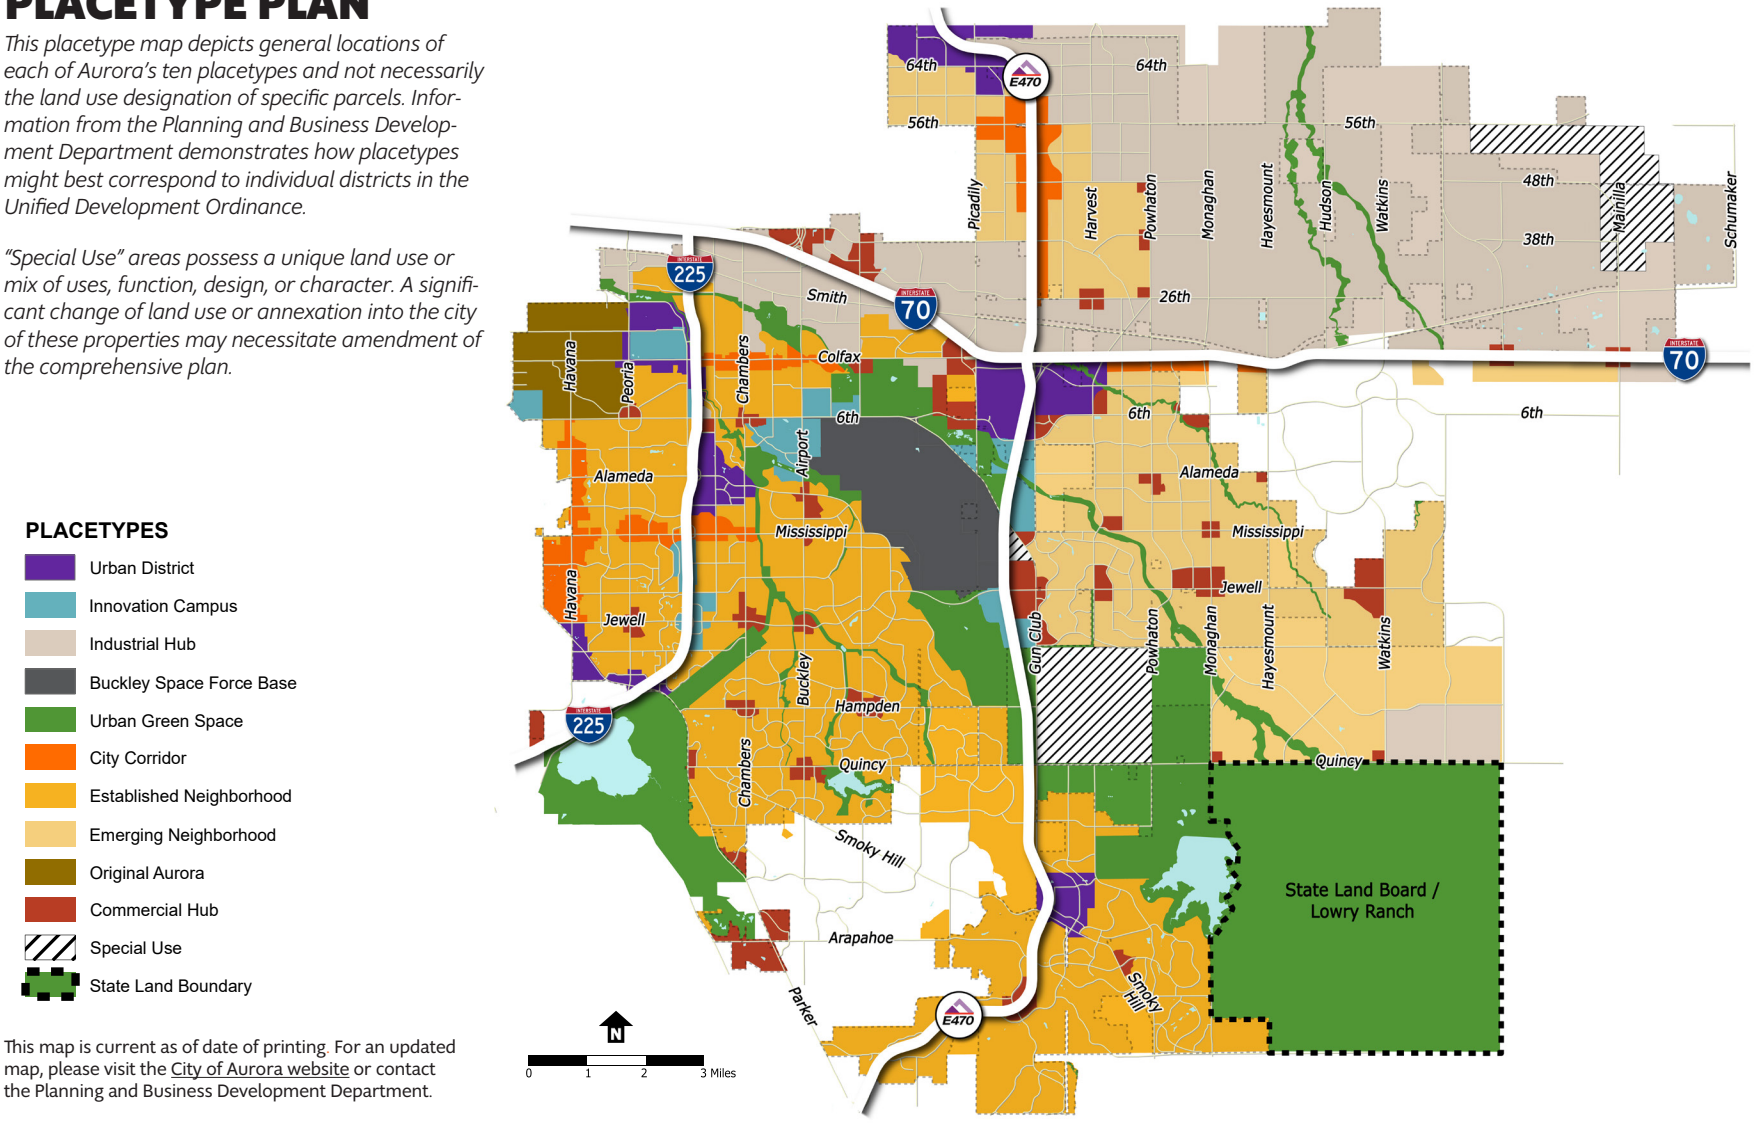
This chapter outlines Aurora's ten placetypes by describing what each looks like, compatible land uses mix, and best practices in urban design and function. The use of placetypes approach envisions an Aurora that is full of unique, desirable places that encourage cohesive communities, commerce, and connections.

A cohesive community experience forms when placetypes appropriately connect to each other. Where placetypes adjoin, a transition area that integrate each one's character is formed. Adjacent uses should be designed for connection where patterns are complementary, but appropriately buffered where uses might conflict.

PLACETYPE PLAN

This placetype map depicts general locations of each of Aurora's ten placetypes and not necessarily the land use designation of specific parcels. Information from the Planning and Business Development Department demonstrates how placetypes might best correspond to individual districts in the Unified Development Ordinance.

"Special Use" areas possess a unique land use or mix of uses, function, design, or character. A significant change of land use or annexation into the city of these properties may necessitate amendment of the comprehensive plan.



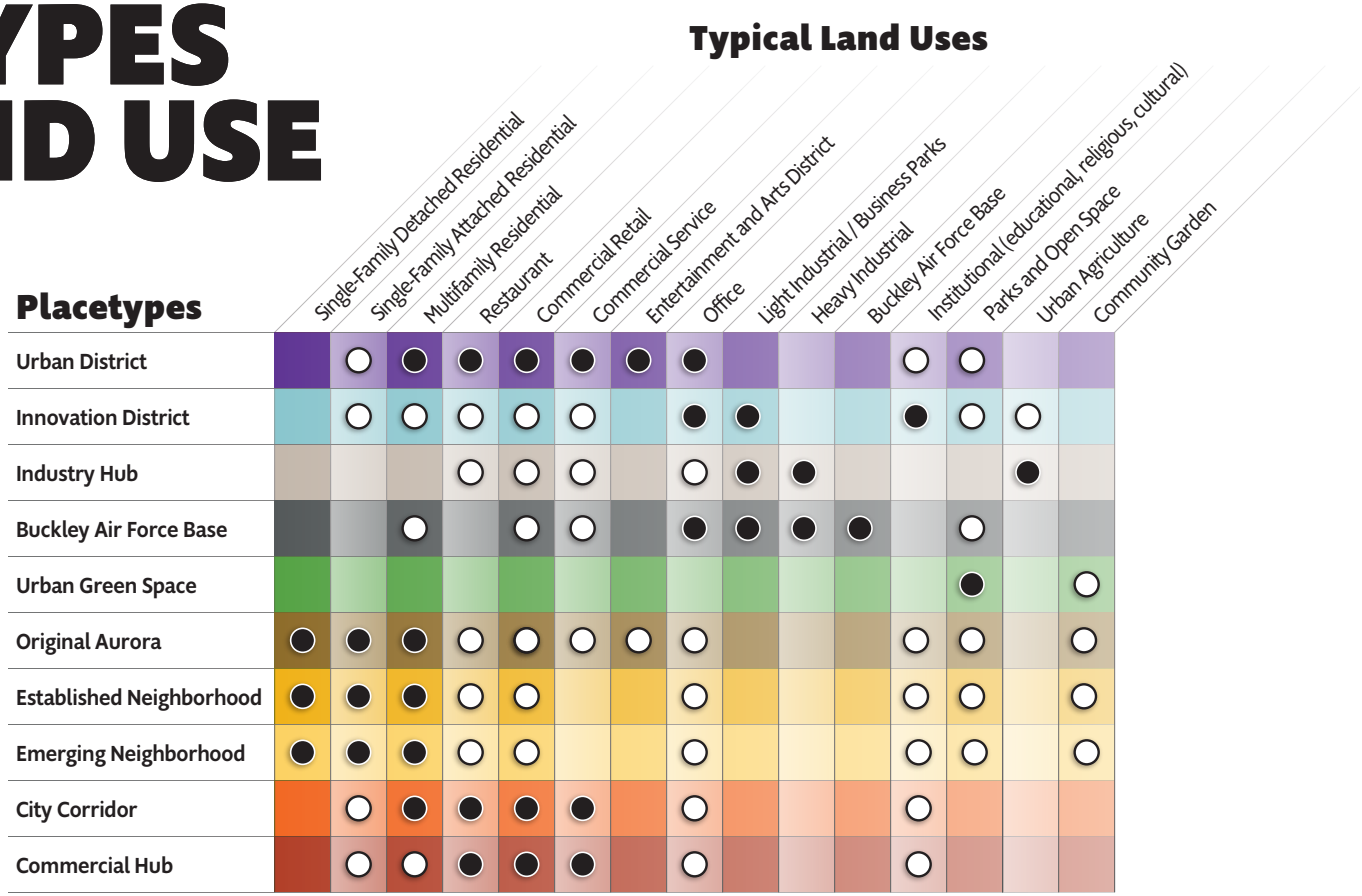
This map is current as of date of printing. For an updated map, please visit the City of Aurora website or contact the Planning and Business Development Department.

This map identifies current placetype designations for all areas within the City of Aurora's adopted planning and annexation boundary. See Chapter 5 for additional information about this boundary. Placetype designations for areas outside of the city limits are for long-range planning purposes only. These properties are subject to the rules and regulations of their appropriate jurisdiction(s).

PLACETYPES AND LAND USE

The 10 placetypes consist of several typical land uses. Primary land uses are prominent and play a pivotal role in characterizing the placetype. Supporting land uses are less prominent but strengthen the primary land uses. For example, an Established Neighborhood primarily consists of various residential housing types, like single-family homes; however, the neighborhood also supports housing with schools and parks. The following pages note typical land uses, their descriptions and whether they are primary or supporting uses.

Placetypes describe the overall character of a place including typical land uses mix, key urban design features, the mobility network, and other physical and functional elements. Zoning is a regulatory tool used to implement the vision described by the placetypes. The Aurora Zoning Code defines land uses, regulations, and development standards for all land within the city.



● *Primary Land Uses are more prominent and play a pivotal role in characterizing that placetype.*

○ *Supporting Land Uses are less prevalent and serve to support the primary land use.*

Placetype Categories

TYPICAL LAND USES

Single-Family Detached Residential

Single-family detached residential areas consist primarily of homes on lots subdivided in an organized and planned manner. Single-family detached homes are the most prevalent residential building type in the city.

Single-Family Attached Residential

Single-family attached structures include townhomes and row-houses. Single-family attached structures contain multiple units divided by common or shared walls, with each unit having their own direct access to outside.

Multifamily Residential

Multifamily residential structures contain multiple housing units and are usually stacked vertically and attached horizontally, with each unit having its entrance on a common hallway or lobby. Examples of multifamily residential developments include apartments, condominiums, student housing, and senior housing.

Commercial Services, Restaurants and Retail

All these areas permit "commercial" uses and include places where people shop, eat, work and receive professional and personal services. The uses can be low-intensity and small in scale, such as those found within a neighborhood. They also can be large and intense, like those found in regional shopping areas, or part of mixed-use environments such as a downtown.

Light Industrial/ Business Parks

Light Industrial, Business Parks, and office space cover a wide range of uses that include storage, warehouse, research, light processing or assembly, office parks and others.

Heavy Industrial

Heavy Industrial uses consist of large-scale industrial uses, including manufacturing, construction, waste and recycling services, and intense automobile repair and salvage services.

Religious Institutions

Religious Institutions include churches, synagogues, mosques, other houses of worship and their related facilities. These institutions can be a key component of quality of life and tend to stabilize and help define individual neighborhoods.

Parks and Schools

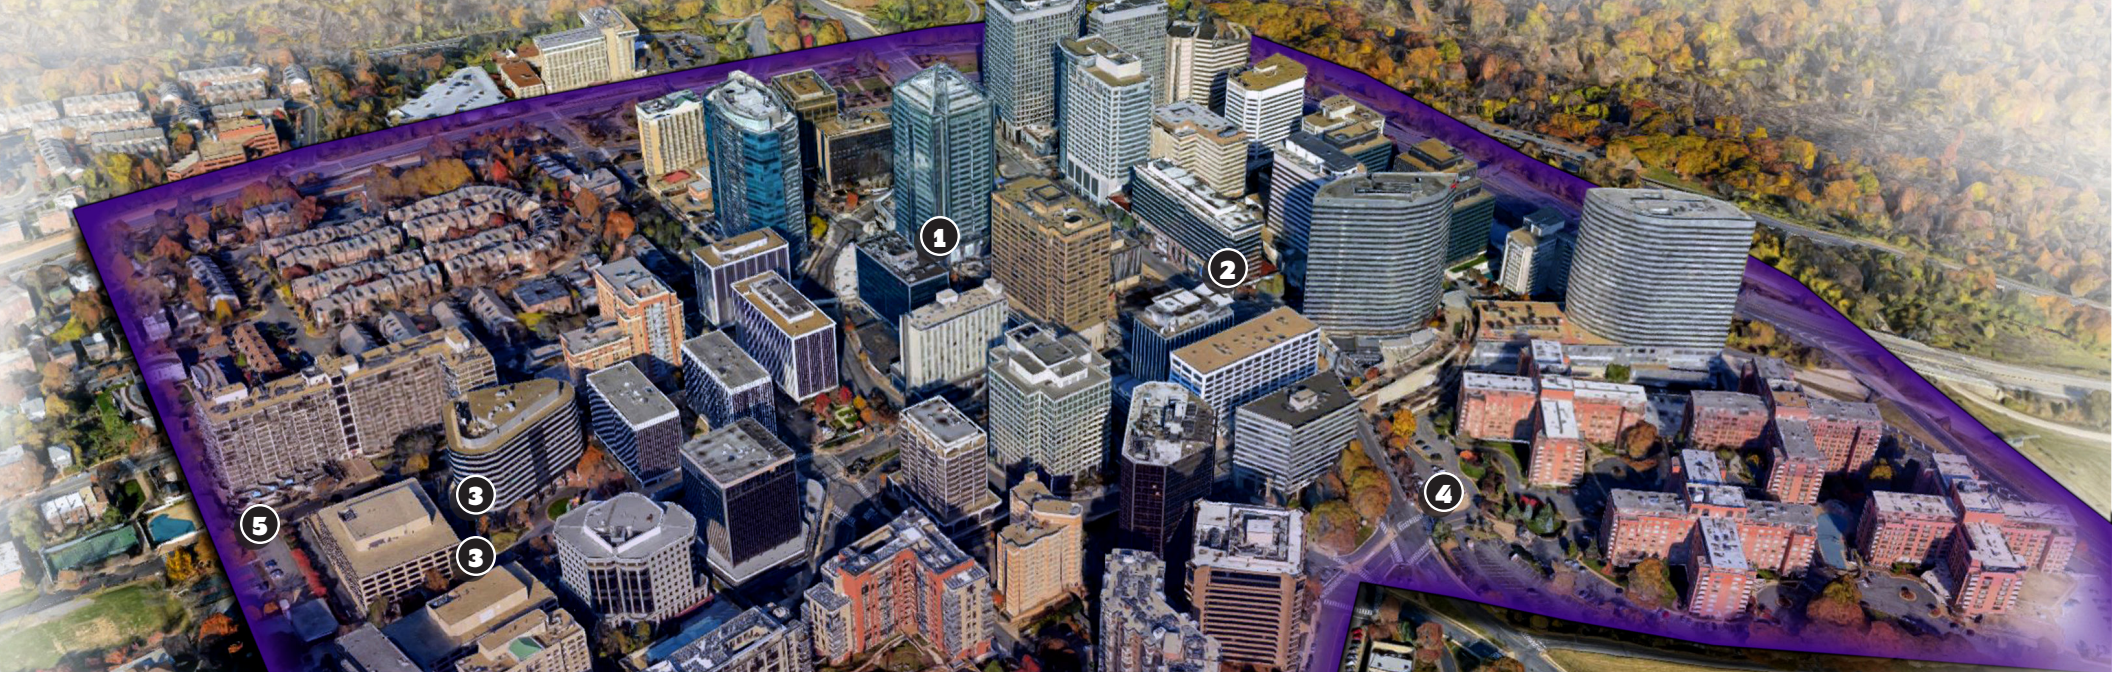
Parks and schools are located throughout the city and contribute significantly to the community's overall quality of life. Parks can include small neighborhood parks with playgrounds, as well as larger community-wide parks with ball fields and recreation programs.

Urban Agriculture and Community Gardens

These two land uses are related, but represent varying levels of intensity and compatibility. Urban agriculture is more intense and can include agricultural activities intended for the commercial-level production of crops and produce.

Civic and Cultural

These land uses are publicly accessible places utilized by community members on a daily basis either directly or indirectly. They include necessary services such as utilities, police and fire as well as desired amenities like libraries and other municipal services.



Aurora Placetypes

Urban District

Urban Districts are Aurora's signature destinations that offer a unique, vibrant urban experience.

Urban Districts are critical to the economic and fiscal health of the city because they centralize employment, culture and activity. This District is the city's most intensely developed area with land dedicated to mixed-use, entertainment, institutional, retail, restaurant and multifamily residential. In the absence of a single "Downtown Aurora," this placetype provides a unique mix of uses in a relatively dense, pedestrian-friendly urban fabric of places to live, work, shop, dine, recreate and more. It is distinguished from other placetypes by density and the prioritization of multimodal transportation.

Multifamily housing and employment opportunities abound. Predominantly mixed-use developments accompanied by a small amount of stand-alone commercial and multifamily uses characterize the Urban District. Public facilities and institutions may be strategically located within the Urban District to anchor or support these diverse and active places. Urban parks serve as locations for activities of residents and workers. This mix and intensity of uses offers around-the-clock activity. Transit, pedestrian and bike connections are essential to its development and success.

Primary Land Use

- Multifamily Residential
- Restaurant
- Commercial Retail
- Commercial Service
- Entertainment and Arts District
- Office

Supporting Land Use

- Single-Family Attached Residential
- Institutional
- Parks and Open Space

Mobility in Urban Districts

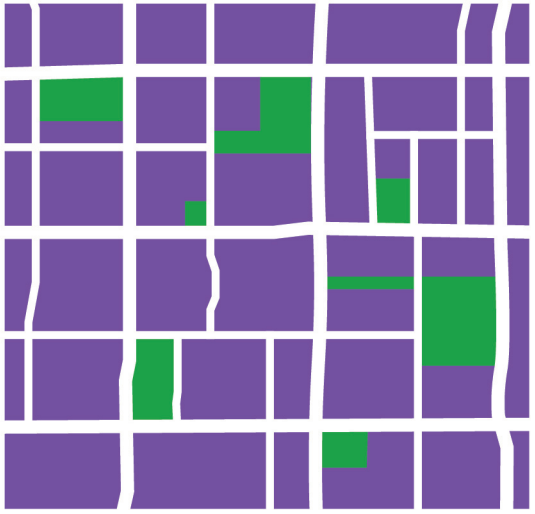
In mixed-use placetypes like Urban Districts, streets function as active, public spaces, organized around walkable blocks and tightly-connected street networks desighed to prioritize walking, cycling, and frequent transit use.

Prioritization of walking, biking, and transit users is critical in urban districts, especially along main streets and arterial streets. These are places for human interaction, the most diverse mix of uses, and commerce to thrive. New development should integrate these modal priorities into plan and in established areas, opportunities to re-establish or enhance these networks and connections should be identified and implemented.

Freight and delivery movement must be accommodated, but should be balanced with other curbside needs and not interrupt pedestrian and bicycle users. For this reason, district and site design are especially important to get right to achieve this balance.

Continued infill and redevelopment in urban districts will add more residents and jobs to these areas. These trends will generate more daily trips, not only for commuting but also for shopping, school, recreation and freight movement. Providing mobility options is essential to the well-being and functionality of these mixed-use districts.

Street and Open Space Network

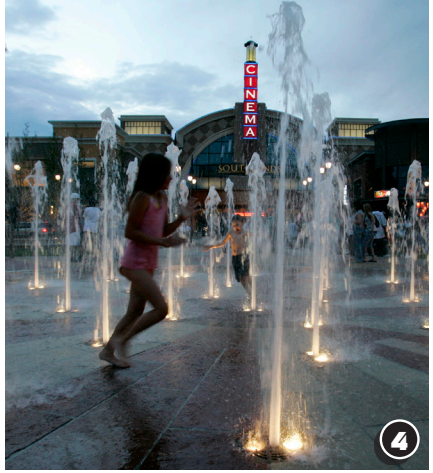


Urban Districts should have a complete grid of streets that form relatively small urban blocks. Easy, short pedestrian and bicycle path connect to surrounding districts and neighborhoods.

Open Space/Park

Developed Blocks

Streets



Defining Features

1. Urban Districts can define Aurora's image and aesthetic through high-quality design and architecture supporting active places and distinctive destinations.
2. Prioritize mixed-use buildings with ground-floor commercial and multistory residential housing above to bolster commercial and social activity.
3. Use attractive, connected and well-designed urban streetscapes throughout the district. Place buildings at or near the sidewalk to maintain a traditional streetwall effect.
4. Utilize civic plazas, courtyards, and parks and open space as gathering places for residents, employees and visitors.

Defining Features

5. Provide easy, short pedestrian and bicycle connections to surrounding districts, neighborhoods, and destinations.

6. Integrate "water-wise" practices including water-efficient fixtures, native xeric landscaping, water efficient streetscapes and medians and low-impact development.

7. Incorporate an accessible, well-connected transit hub to link Urban Districts to the rest of the city and region.

8. Develop urban districts with complete grids of streets forming relatively small urban blocks.

Aurora Placetypes

Innovation District

Innovation Districts foster new ideas and enterprises by bringing together people, companies, and institutions.

The Innovation District is where leading-edge anchor institutions and businesses connect with start-ups and other emerging businesses. This placetype fosters new ideas and enterprises by facilitating collaboration between companies and institutions and are key to increasing employment within the city. Such Districts will foster creativity and horizontal integration through proximity of light industrial and business parks with educational and medical institutions.

A robust, tech-centric space, with meeting sites that encourage people and organizaitons to collaborate and exchange, is critical to this placetype's success. Co-locating office space with housing will augment efficiency and convenience. Urban agriculture and community gardens serve as secondary uses, particularly for research in biological sectors. Transit, pedestrian, and bicycle accessibility to and through the Innovation District is also critical.

Primary Land Use

- ● Office
- ● Light Industrial
- ● Institutional

Supporting Land Use

- ○ Single Family Attached Residential
- ○ Multifamily Residential
- ○ Restaurant
- ○ Commercial Retail
- ○ Commercial Service

- ○ Urban Agriculture

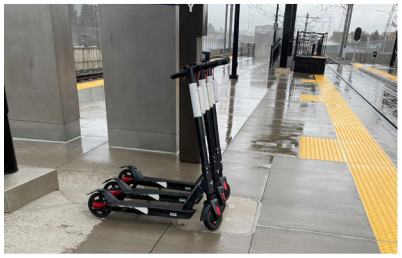
Mobility in Innovation Districts

In mixed-use placetypes like Innovation District, streets function as active, public spaces, organized around walkable blocks and tightly-connected street networks desighed to prioritize walking, cycling, and frequent transit use.

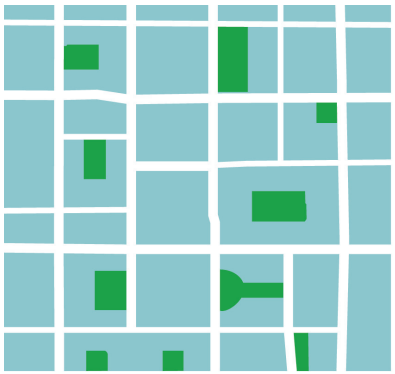
Prioritization of walking, biking, and transit users is critical in urban districts, especially along main streets and arterial streets. These are places for human interaction, the most diverse mix of uses, and commerce to thrive. New development should integrate these modal priorities into plan and in established areas, opportunities to re-establish or enhance these networks and connections should be identified and implemented.

Freight and delivery movement must be accommodated, but should be balanced with other curbside needs and not interrupt pedestrian and bicycle users. For this reason, district and site design are especially important to get right to achieve this balance.

Continued infill and redevelopment in urban districts will add more residents and jobs to these areas. These trends will generate more daily trips, not only for commuting but also for shopping, school, recreation and freight movement. Providing mobility options is essential to the well-being and functionality of these mixed-use districts.



Street and Open Space Network



Connect the district through a highly-connected and walkable network of streets. Cluster buildings around gathering places or within a campus layout.

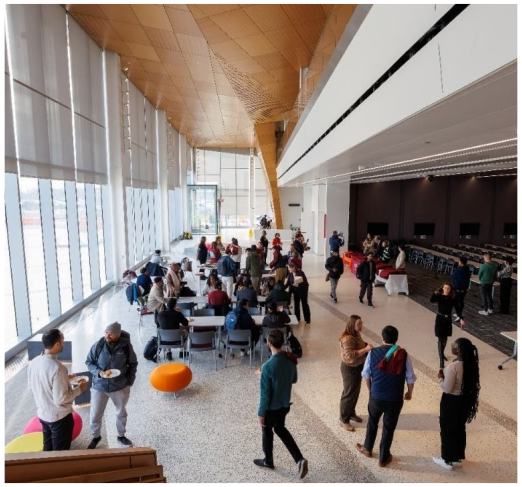
Open Space/Park

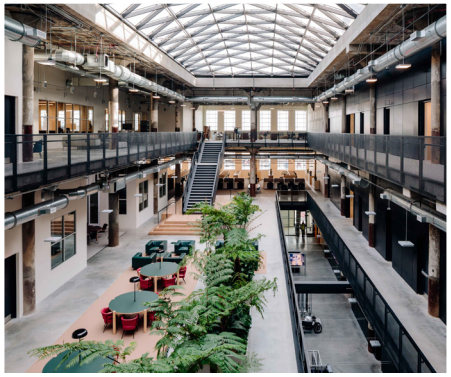
Developed Blocks

Streets

Defining Features

1. Demonstrate innovative approaches to design and development through architecture, lighting, infrastructure, greenery, and meeting/gathering spaces indoors and outdoors.
2. Cluster or connect buildings around gathering places or within a campus layout to promote idea sharing and business collaboration.
3. Integrate affordable single-family attached and multifamily residential housing to support students and employees.
4. Develop a fully connected network of sidewalks and bike paths to ensure safe and efficient pedestrian access from nearby neighborhoods and adjacent placetypes.





Defining Features

5. Construct gateway treatments and wayfinding signs at key entrances to better direct residents, workers, and visitors to numerous cultural and educational facilities.

6. Include establishments such as coffee shops, restaurants, bars, plazas, libraries, conference centers, relevant retail, and shared working spaces to facilitate collaboration and exchange of ideas.

7. Integrate "water-wise" practices including water-efficient fixtures, native landscaping, water efficient streetscapes and medians and low-impact development best management practices (BMPs).

8. Identify opportunities for joint nonpotable cooling water reuse and passive heating.

Aurora Placetypes

Industry Hub

Industry Hubs are primarily dedicated to a mix of commercial and industrial uses and can be large employment centers.

The Industry Hub includes areas dedicated to manufacturing, warehousing, distribution, fulfillment centers, freight operations and renewable energy enterprises. This placetype plays an important role in the city's employment and economy, but can sometimes create outdoor activities and operations which should be appropriately buffered from residential and commercial areas. It can generate high volumes of traffic from both employees and associated freight movements.

Adjoining roadways should accommodate traffic without negatively impacting quieter placetypes or traffic on local streets serving residential areas. Large-scale alternative energy facilities may also fit into this placetype. Uses permitted only in Industry Hubs are manufacturing plants, factories, large open-air operations and heavy-equipment storage.

Primary Land Use

- ● Light Industrial
- ● Heavy Industrial
- ● Urban Agriculture

Supporting Land Use

- ○ Restaurant
- ○ Commercial Retail
- ○ Commercial Service
- ○ Office

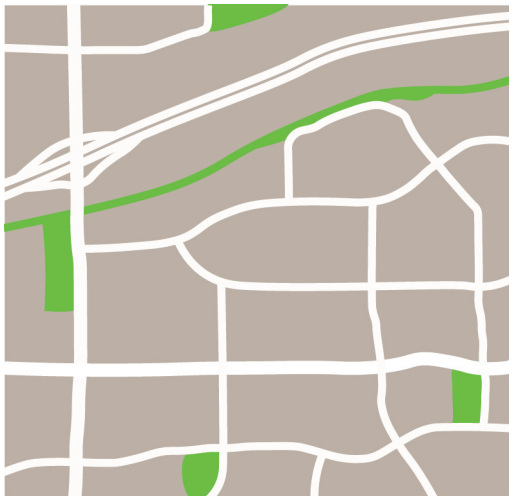
Mobility in Industry Hubs

Large-format warehousing, manufacturing, logistics yards and energy or utility uses are the primary uses in Industry Hubs. These uses typically require wide streets that are suitable for frequent heavy truck traffic. Intersections are limited, but prioritize heavy-vehicle throughput and safe separation from neighborhood traffic. Corridors are intended as primary routes for goods movement, as well as connect major streets.

Given the impacts and prevalence industrial traffic in this placetype, off-street truck parking is an important element. The city should work with major employers in the area to explore models and opportunities for the provision of this vehicle infrastructure.

However, these industrial uses are also important destinations for employees and commerce. For this reason, truck traffic must be balanced with the needs of employees and customers driving, taking public transit, biking, or even walking to job sites and local services. Transit and/or microtransit services can these industrial areas.

Street and Open Space Network

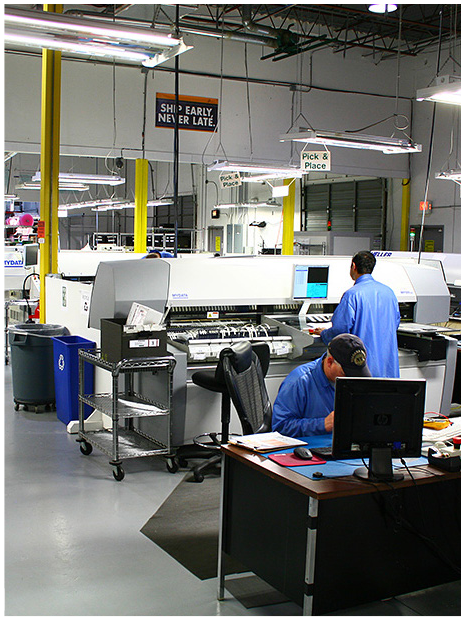


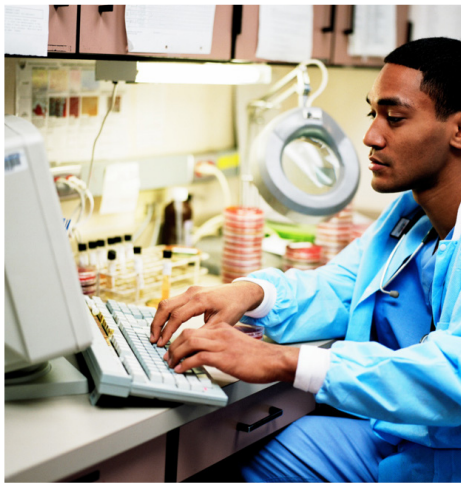
Locate Industrial Hubs near major highways. Configure a street grid sufficient to accommodate large industrial facilities and truck traffic.

- Open Space/Park
- Developed Blocks
- Streets

Defining Features

1. Configure a street grid and roadway design of a width and layout sufficient to accommodate the safe and efficient circulation and access of a high volume of large-truck traffic.
2. Develop sites to accommodate large storage buildings and large paved areas required to facilitate the on-site maneuvering and loading of tractor trailers.
3. Utilize sustainable best practices to mitigate negative environmental impacts.





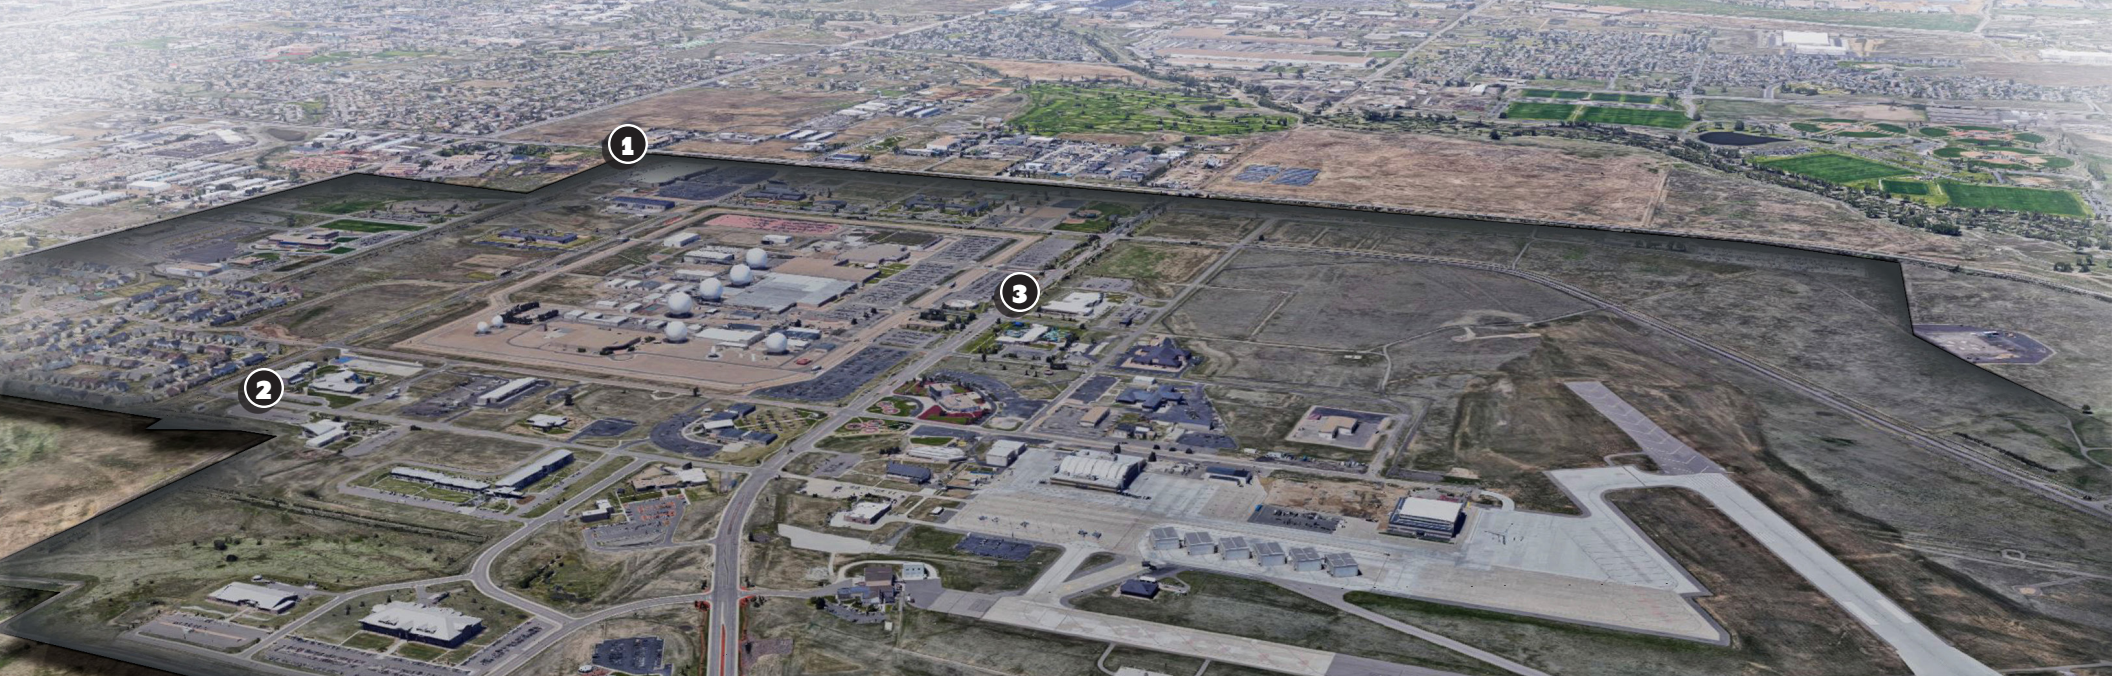
Defining Features

4. Locate Industrial Hubs near major highways and commercial rail lines to provide fast and convenient freight access. Avoid mixing industrial traffic with quieter neighborhood placetypes.

5. Integrate "water-wise" practices including water-efficient fixtures, native landscaping, water efficient streets-capes and medians and low-impact development BMPs.

6. Identify opportunities for joint nonpotable cooling water reuse.

7. Use attractive and durable architecture and landscape to help maintain the value of industry hubs over time.



Aurora Placetypes

Buckley Space Force Base

The continued success and viability of Buckley Space Force Base is a critical priority to Aurora.

Buckley Space Force Base (SFB), host unit of the 460th Space Wing, includes all areas directly involved in base operations. Buckley SFB is a United States Space Force Space Command base that serves more than 92,000 active-duty, National Guard, Reserve, retired military personnel, contractors, and other related tenants throughout Colorado's Front Range. Buckley SFB has air operations, space-based missile warning capabilities, space surveillance, communications operations, and support functions. The base contributes an estimated $2.6 billion annually to the local economy.

Buckley SFB is the most unique placetype as it essentially functions like a town unto itself with residential uses and all necessary commercial uses, including restaurants, retail and services, in addition to its core military functions. Residential uses are prohibited in key adjoining areas, and a range of uses are prohibited below flight paths. Noise mitigation measures are required for new buildings in a large area around the base. The city continues to partner with Buckley SFB to maintain a compatible use buffer adjacent to the base through open space protection and development restrictions.The continued success and viability of Buckley Space Force Base is a critical priority to Aurora.

Primary Land Use

- Buckley Space Force Base
- Light Industrial
- Heavy Industrial
- Office

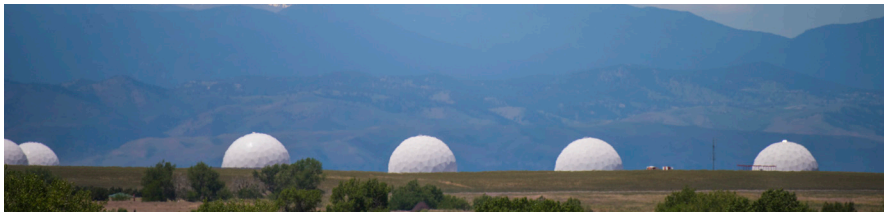
Supporting Land Use

- Multifamily Residential
- Commercial Retail
- Commercial Service
- Parks and Open Space

Street and Open Space Network

Open space acquisitions protect the base from urban encroachment and buffer surrounding neighborhoods.While the base itself is fairly self-contained, access to the base by employees is important.

- Open Space/Park
- Developed Blocks
- Streets



Defining Features

1. Encourage development of commercial or supporting services near the base to serve people that work or live on the base.
2. Work with Buckley SFB to mitigate its impacts on the surrounding neighborhoods, including noise pollution, air quality and visual appearance.
3. Upgrade public transportation routes to improve access to the base.
4. Support or collaborate on water conservation measures in partnership with Buckley SFB.
5. Continue to collaborate with Buckley SFB to buffer the base from urban encroachment.

Aurora Placetypes

Urban Green Space

Regionally significant areas of nature environments and developed parks define the Urban Green Space placetype.

Various forms of green space are integrated into all placetypes as supporting elements. What defines the Urban Green Space placetype is the regional importance, connectivity and scale of these signature parks, trails and open space assets. Aurora's Urban Green Spaces include large areas, such as the Plains Conservation Center and Aurora Reservoir, and smaller ones, such as Quincy Reservoir and the undeveloped land adjoining Aurora's major creeks and drainage ways. They include undeveloped areas with significant ecological value as well as programmed parks accommodating passive and active recreation, both of which may also function as stormwater-management facilities.

The Urban Green Space placetype is largely defined by three land uses: parks, trails and open space. These uses may be of many types, from developed and programmed parks, to protected natural areas. Recreational facilities, services and programming of green spaces activate these public gathering places.

Primary Land Use

- ● Parks and Open Space

Supporting Land Use

- ○ Community Garden

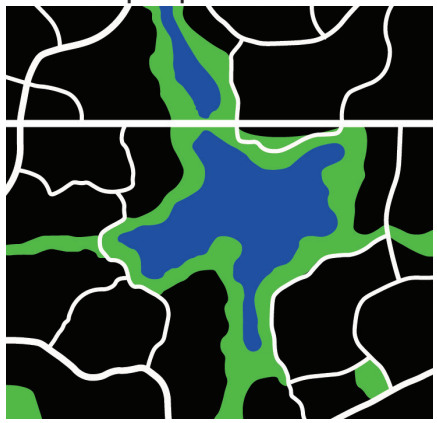
Mobility in Urban Green Spaces

The Urban Green Space placetype is dominated by large community parks, habitat preserves, major greenway corridors, and active recreation fields. While many of these properties are used by local residents, larger destinations, such as the Aurora Sports Park, Plains Conservation Center, Aurora Reservoir, and others, draw visitors from beyond the immediate area and require higher levels of access through driving, biking, walking, and transit.

The trails system is also a critical primary circulation network for park users, neighborhood residents, and even commuters. Trails supplement the on- and off-street pedestrian and bicycle networks, so connections between these facilities and the larger mobility network are important to consider in planning and design.

Freight traffic, with some exceptions (such as maintenance and events logistics), is typically restricted from these places.

Street and Open Space Network



Parks, trails, and open space amenities are highly valued by local residents, attract visitors to the community, and supplement connectivity throughout Aurora.

Open Space/Park
Streets
Developed Blocks
Water

Defining Features

1. Locate Urban Green Spaces within walkable distances of all neighborhoods to provide opportunities for all of Aurora's residents.
2. Establish recreation opportunities throughout the city with playgrounds, sports fields and large open spaces.
3. Preserve significant wooded areas, grasslands, and waterbodies to help enhance environmental services and Aurora's natural beauty.
4. Consider the impact of non-local traffic in adjacent neighborhoods when building parking lots and access points for community parks and promot less environmentally-hazardous forms of transportation.

Defining Features

5 Connect residents to parks and open spaces through a comprehensive network of trails, parks, bicycle routes and sidewalks. Where appropriate, install streets and bus routes on green space edges for public views and access.

6 Buffer creek and drainage corridors to protect private property from flood or erosion hazards, as well as to preserve opportunities for trails and recreation.

7 Activate Urban Green Spaces for community gathering places through well-maintained facilities and engaging programming.

8 Use water-wise practices, including limiting turf to active recreation uses, xeriscaping and identify opportunities for nonpotable water supply.

Aurora Placetypes

Original Aurora

Original Aurora is a traditional city neighborhood that retains its character, diversity and form, even as it continues to evolve.

Original Aurora, the city's first neighborhood, is characterized by a street grid, commercial corridors, established residential areas and an active arts district. It represents traditional neighborhood development. It includes East Colfax Avenue, a major commercial and transit corridor connecting the Anschutz campus to central Denver, and the emerging Westerly Creek area, anchored by the Stanley Marketplace.

The city seeks to maintain and strengthen the traditional character of Original Aurora, targeting reinvestment through infill, redevelopment and adaptive reuse. The Colfax, Dayton, and Montview corridors offer a growing mix of restaurants, retail, entertainment and services.

The predominantly residential portions of the neighborhood offer a balanced mix of housing options and convenient, neighborhood-scaled services for residents. Tree canopy should be improved to benefit this placetype.

Arts venues, civic buildings and dining and entertainment options in the Arts District reinforce the area's tradition as a gathering place for the community and visitors. Mixed-use development along key corridors can help support the neighborhood, adding a new dimension of vitality to the area, and stimulating entrepreneurial growth and jobs. A walkable network of streets and ample transit service offer mobility options throughout the placetype.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

Supporting Land Use

- ○ Restaurant
- ○ Commercial Retail
- ○ Commercial Service
- ○ Entertainment and Arts District
- ○ Office
- ○ Institutional
- ○ Parks and Open Space
- ○ Community Garden

Mobility in Original Aurora

In mixed-use placetypes like Original Aurora, streets function as civic rooms–slow, tightly-gridded corridors that prioritize walking, cycling, frequent transit, deliveries and rideshare pick-ups. A fine-grained street grid and shared plazas promote easy "door-to-door" connectivity of all modes for public gatherings.

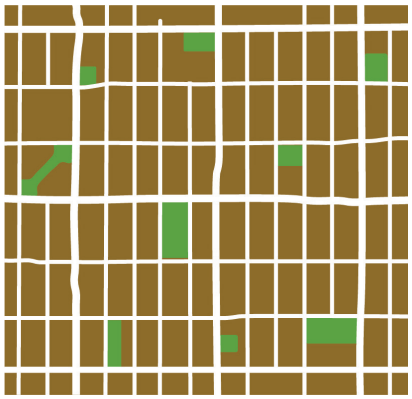
As Aurora embraces more mixed-use, walkable development, street designs must integrate multimodal infrastructure for safe and convenient access for people walking, biking or riding transit. While this placetype will not experience as much new development as others, road improvements should encompass parts of Original Aurora, and should facilitate transportation into other placetypes from this one.

Sidewalk improvements are a focus for this part of the city, where many are missing and existing ones may not meet accessibility standards. Enhancing these facilities to meet contemporary standards and user needs is a priority.

Original Aurora is home to many households that are especially transit-reliant and may not have other options to accessing jobs, schools, shopping, and services. Ensuring safe, convenient access to frequent, reliable transit services in the area are critical in serving this community.

Freight movement, which is not prioritized in mixed-use settings, must compete with other curbside needs, especially in these placetypes. The city has introduced Transit-Oriented Development (TOD) and Original Aurora (OA) zoning districts and development standards and should continue to evolve standards to facilitate compact, mixed-use development along transit priority corridors. Mixed-use areas are highly suitable for high-frequency transit on the primary network.

Street and Open Space Network

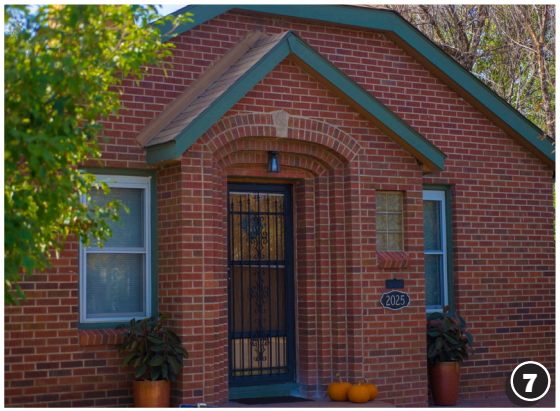


Maintain or re-establish the traditional street grid network to maximize connectivity throughout the neighborhood.

Open Space/Park

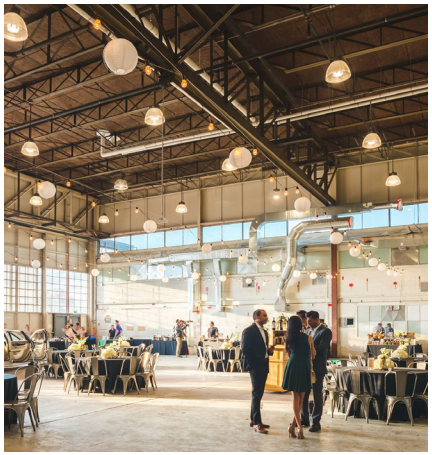
Developed Blocks

Streets



Defining Features

1. Blend new residential and mixed-use developments with the mid-20th-century commercial storefronts and residential areas.
2. Preserve, improve and augment existing housing stock retaining community character while encouraging investment and upgrading homes to meet current household and homebuyer preferences and codes.
3. Support thriving cultural, restaurant, and entertainment scenes by creating gathering places, like Stanley Marketplace and Arts Districts, that serve residents, Anschutz campus employees, arts patrons and visitors.
4. Strategically employ landscape features, including street trees, to highlight Original Aurora's grid system and improve the appearance, air quality and general health.



Defining Features

5. Augment MLK Jr. Library and Fletcher Plaza as a center of community events and gathering, public services and Aurora pride. Actively program events at the library and plaza to supplement activity in the Arts District and entertainment corridor.

6. Improve walking and bicycling connections throughout the neighborhood, including widening sidewalks and upgrading street crossings where necessary to meet ADA standards.

7. Protect and highlight Aurora's unique cultural and historic resources within the neighborhood.

8. Incorporate low-impact development and water quality practices and use appropriate systems to direct rainwater onto green spaces.

Aurora Placetypes

Established Neighborhood

Established Neighborhoods are predominantly residential, but supported by retail, services, multifamily and office uses along perimeter streets and intersections.

The Established Neighborhood placetype is characterized by predominantly residential areas with a variety of unit types, such as single-family detached and attached, and multifamily, typically constructed between 1950 and 1990. This placetype often deviates from the traditional grid pattern of streets with more curvilinear pattern. Although primarily residential, this placetype may also support smaller-scale retail, services and offices uses located at intersections or along major perimeter streets.

Established Neighborhood primary land uses include: single-family detached and attached and multifamily residential of various densities, along with schools, parks and religious institutions. Supporting uses can include appropriately-scaled and located restaurants, retail, commercial services, community gardens and other neighborhood-serving gathering places.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

Supporting Land Use

- ○ Restaurant
- ○ Commercial Retail
- ○ Office
- ○ Institutional
- ○ Parks and Open Space
- ○ Community Garden

Mobility in Established Neighborhoods

In many Established Neighborhood placetypes, Aurora's suburban patterns are apparent in networks for short, calm, wide, often winding networks of local residential streets, connecting to the wider community through limited collector and arterial streets. Adapting these preexisting networks into a more connected, multimodal environment is an important, if not challenging, goal.

Transit access is typically available only at the neighborhood's edges, along major arterial streets, or in more rare cases, along collector streets. Access to transit from the interior of neighborhoods can inconvnient or confusing without thoughtful connectivity retrofits, micormobility options, or adjusted service routes.

Infill redevelopment in established neighborhoods will add more residents, jobs and destinations within the existing urbanized area, often along major arterials and intersections, but some neighborhoods may offer other opportunities for infill or redevelopment in interior blocks. New development offers opportunities to establish or enhance the connectivity between blocks and to the shopping, services, and transit at the neighborhood's edge.

Street and Open Space Network

These neighborhoods typically feature complex curvilinear streets. Established Neighborhoods should feature convenient, safe and protected bicycle and pedestrian routes throughout the neighborhood that connect to adjacent placetypes.

Open Space/Park

Developed Blocks

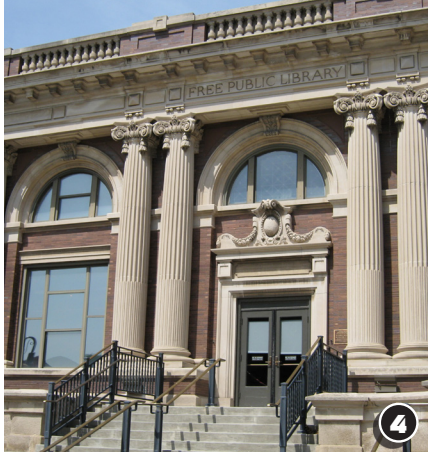
Streets

Defining Features

1. Appropriately connect Established Neighborhoods to surrounding placetypes of all kinds with convenient, safe, highly protected and attractive bicycle and pedestrian routes.

2. Pioritize single-family detached and attached housing to establish the character of this placetype. Multifamily housing is another accepted housing type in Established Neighborhoods but is not as prominent and is often located along main streets or the edge of neighborhoods.

3. Locate full-service grocery stores and personal services in areas that are conveniently accessible from Established Neighborhoods to for healthy foods and daily needs. Enhance pedestrian, bicycle and transit access to these important services.



Defining Features

4 Develop neighborhood gathering places, such as schools, parks, recreation centers and religious institutions, as many community events are centered around their activities.

5 Integrate "water-wise" practices including water-efficient fixtures streetscapes, and medians, alongside native landscaping and low-impact development BMPs.

Aurora Placetypes

Emerging Neighborhood

Emerging Neighborhoods offer opportunities for Aurora to redefine itself through appealing, connected, and complete neighborhoods.

An Emerging Neighborhood placetype is a newer largely residential neighborhood in previously undeveloped areas. Such neighborhoods have typically been built in the past 25 years, and present diverse neighborhood choices. This placetype includes residential subdivisions that are complete neighborhoods of mixed housing types and pedestrian and bicycle infrastructure. They are walkable and well-connected internally and externally, integrating highly accessible parks and open space.

This placetype is similar to Established Neighborhoods with some important differences. These neighborhoods offer a mix of housing types at various densities. Restaurants, retail and commercial services support residential uses in this placetype and should be conveniently connected and accessible to the neighborhood's residents. Other supporting uses are institutions and gathering places. Commercial uses should be located along main or perimeter streets rather than within primary residential areas.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

Supporting Land Use

- ○ Commercial Retail
- ○ Office
- ○ Institutional
- ○ Parks and Open Space
- ○ Community Garden

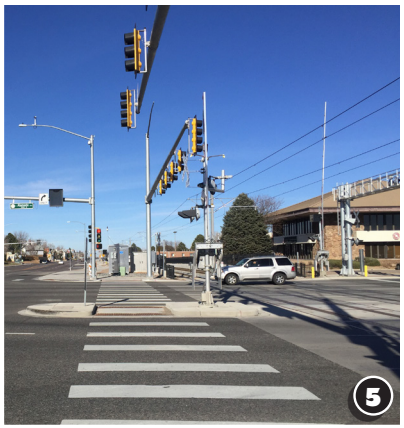
.

Mobility in Emerging Neighborhoods

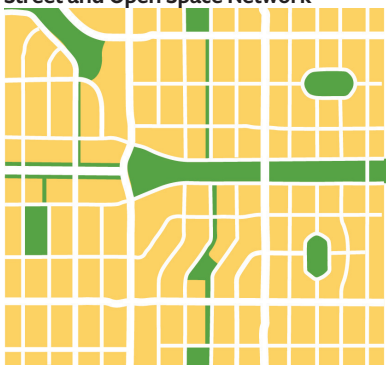
IUnlike more 20th Century suburban development patterns, neighborhoods in many Emerging Neighborhood placetypes provide an opportunity to build int walkability, connectivity, and mobility convenicne from the inital design.

Transit access is typically available only at the neighborhood's edges, along major arterial streets, or in more rare cases, along collector streets. Access to transit from the interior of neighborhoods can inconvnient or confusing without thoughtful connectivity retrofits, micormobility options, or adjusted service routes.

Emerging neighborhoods will add more residents, jobs and destinations within the existing urbanized area, or outlying areas, often along major arterials and intersections, but also within neighborhood centers and activity nodes strategically place in interior blocks. New development offers opportunities to establish the connectivity between blocks and to the shopping, services, and transit within these neighborhood centers and active corridors.



Street and Open Space Network

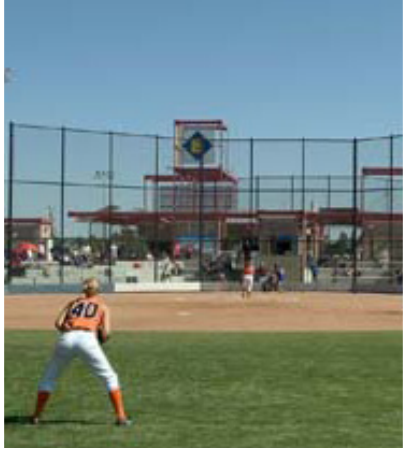


The street pattern should balance vehicle, bicycle and pedestrian connectivity. Design new neighborhoods around a central organizing or gathering feature, such as a park.

Open Space/Park

Developed Blocks

Streets



Defining Features

1. Place supporting retail, restaurants, commercial services and small offices along main streets or perimeters of neighborhoods. These supporting uses should be directly accessible from the residential areas of the neighborhood by drivers, pedestrians, bicyclists and transit riders.

2. Intersperse a variety of housing types, sizes and prices throughout the neighborhood. Higher-density multifamily units should be located on main streets or along neighborhood edges, yet still be integrated into the neighborhood street pattern.

3. Design new neighborhoods around a central organizing feature, such as a park, natural feature, school, or other neighborhood gathering place.

4. Install ADA-compliant sidewalks, crosswalks, and lighting, that help residents safely traverse their community.

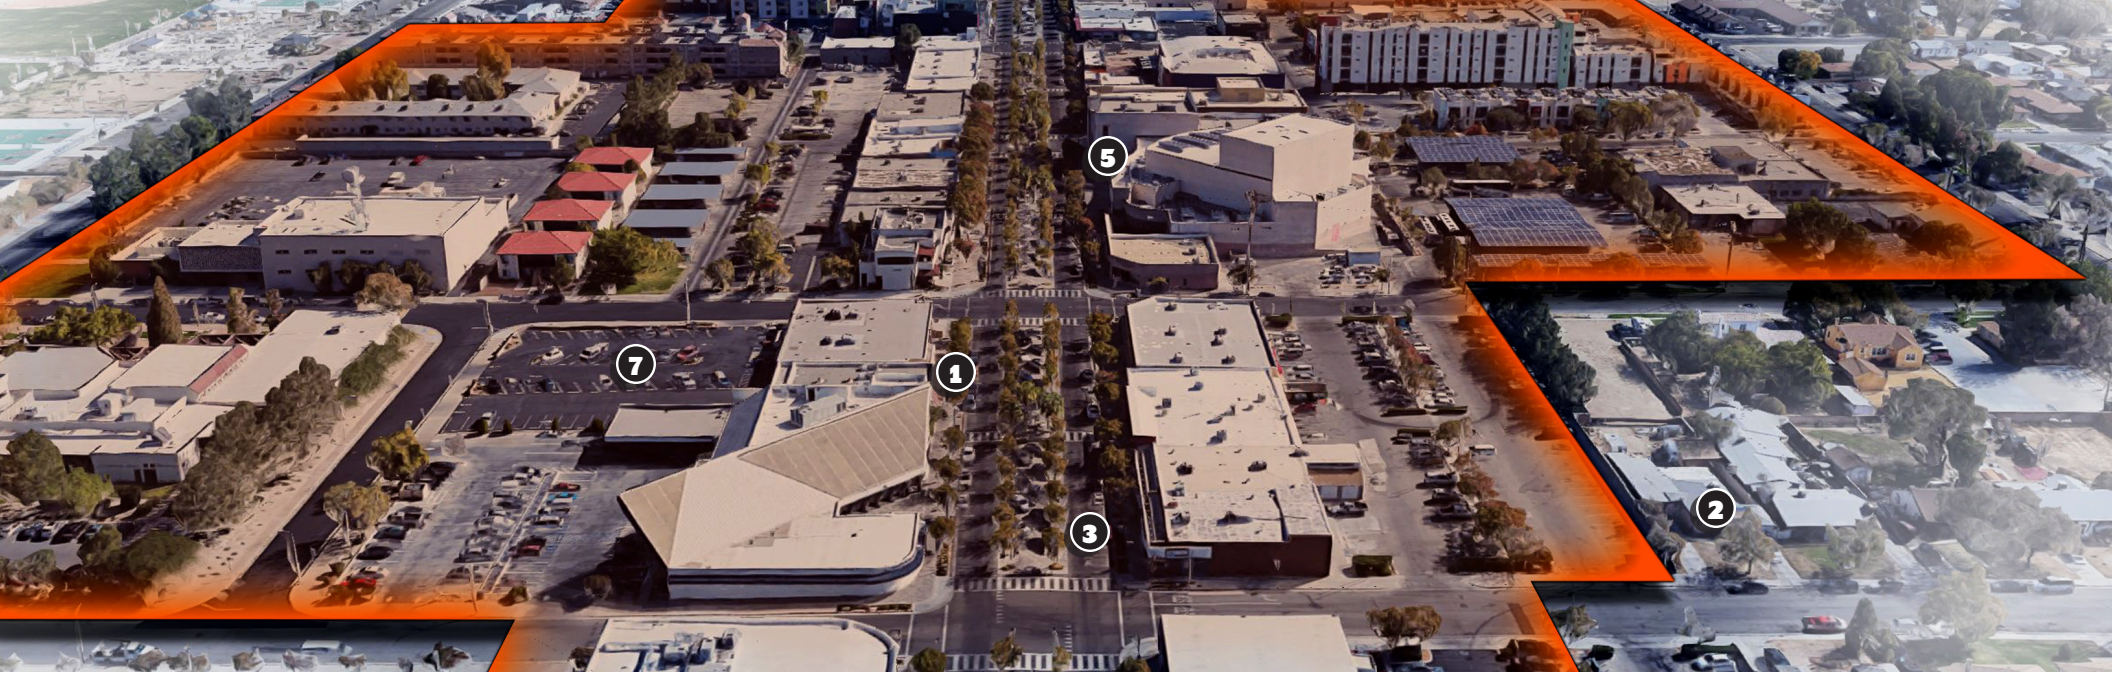
Defining Features

5. Design a street pattern that balances traffic flow with pedestrian and bicycle connectivity, convenience and safety. Limit cul-de-sacs and dead ends and provide multiple connections to main streets and adjacent placetypes.

6. Integrate water-wise practices including water-efficient fixtures, native landscaping, water-efficient streets-capes and medians and low-impact development BMPs.

7. Limit turf to low-water varieties, and only in active recreation areas.

8. Encourage incorporation of nonpotable water systems in new development where appropriate and feasible.



Aurora Placetypes

City Corridor

The City Corridor's focus is commercial activity along the main street, with connected mixed residential types supporting this vibrant district.

City Corridors are a placetype that will contribute to the economic and fiscal success of the city. They are centered along the city's major roadways, home to a wide range of uses, including commercial, retail, institutional, service and some residential. This placetype is generally auto-oriented, but also accommodates pedestrians, bicyclists and transit service. City Corridors should include amenities such as sidewalks, crosswalks, benches, lighting and landscaping that make it easy for pedestrians to safely and comfortably navigate.

Green space is typically limited within this placetype, but outdoor gathering areas–like pocket parks, common greens and plazas–enhance the experience. Integration of these amenities varies among the City Corridors throughout Aurora. The focus of the City Corridor placetype is commercial activity: its primary uses include restaurants, retail, and commercial services. Office and institutional uses are secondary, allowing for the development of mixed-use projects. Single-family attached residential is a secondary use appropriate in areas not prioritized for commercial development.

Primary Land Use

- Multifamily Residential
- Restaurant
- Commercial Retail
- Commercial Service

Supporting Land Use

- Single-Family Attached Residential
- Office
- Institutional

Mobility in City Corridors

In commercial placetypes like City Corridors, streets act as access spines, moving cars efficiently along arterials along with major transit routes. Pedestrian and bicycle access has historically been under-prioritized in these car-dominated enviorments.

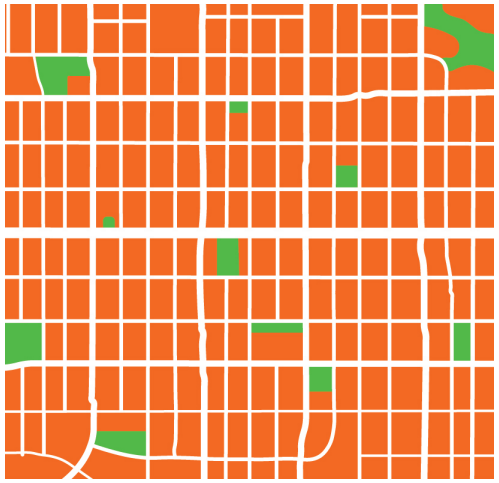
The retail, services and restaurant industries are undergoing an evolution, given the contnued growth and popularity of online shopping, "pick up" retail and restaurant service, and post-Covid household habits. Furthermore, due to housing demand and the city's efforts to provide more mixed-use areas, more non-retail and service uses are being introduced into City Corridors.

These realities have influenced who, how, and why people access City Corridors, and mobility options need to evolve to meet these new patterns and preferences.

Main Streets in these areas should prioritize the greatest mix of walking, biking, transit, and driving access - even as temporary event or community spaces. Arterial and collector streets must still serve drivers, but should evolve into more organized, interconnected networks and better integrate and improve crossings, sidewalks, and pedestrian and bicycle facilities.

Curbside management for a mix of retail, service, and residedntial uses should be thoughtfully planned. Freight deliveries to and from commercial properties should take into account current and evolving retail habits These mixed-use areas are good hubs for micromobility services and will be essential in spreading and supporting multimodal success.

Street and Open Space Network

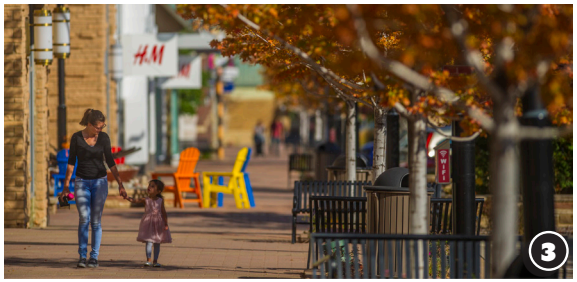


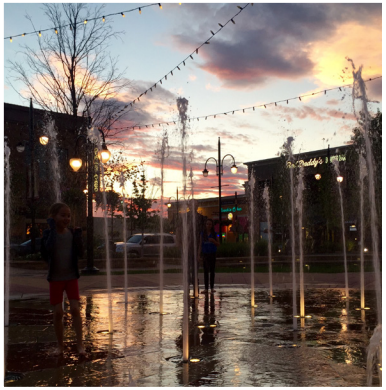
Design a street network along the primary commercial corridor to provide access for area residents and visitors to the area. Provide safe and convenient access to businesses by drivers, pedestrians, bicyclists and transit users.

Open Space/Park

Developed Blocks

Streets





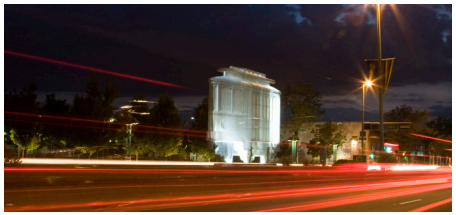
Defining Features

1. Wherever possible, front commercial buildings along primary streets to ensure visibility and accessibility. Avoid street frontages dominated by parking lots or buildings set back large distances from the street

2. Use single-family attached units where the City Corridor abuts a residential placetype to promote an appropriate transition between the two placetypes.

3. Develop a road network along the City Corridor to provide quick and easy access to businesses for drivers, cyclists, transit riders and pedestrians.

4. Reposition or redevelop aging or obsolete shopping centers to more effectively compete in current and future retail markets, and deliver goods and services to the local community.



Defining Features

5 Design centers around a central organizing feature or gathering space, like a common green or plaza, promenade, natural feature, or other shared space. Programmed common spaces surrounded by active uses and buildings attract or retain customers and convey a sense of community.

6 Incorporate drainage swales, rain gardens, xeriscaping and water-efficient streetscapes and medians.

7 Size primary parking lots for typical and reasonable demand and provide for peak parking in overflow areas away from primary street frontages. Promote shared parking opportunities.

Aurora Placetypes

Commercial Hub

Commercial Hubs center activity that supports adjacent neighborhoods with shopping, services, entertainment and community life.

Commercial Hubs are critical to Aurora's future economic and fiscal health. This placetype's uses are primarily goods and services for nearby Established and Emerging Neighborhoods, but it also serves other adjacent placetypes. This placetype is characterized by shopping centers and clusters of compatible businesses. It may be located along the city's corridors, often at the intersection of two arterial streets. These hubs vary in size and density, but are larger than neighborhood-scale. These centers should be improved by better connecting them to surrounding neighborhoods and establishing broader arrays of services and experiences.

The Commercial Hub's primary uses are retail, commercial service and restaurant. They are important employment centers. Smaller community parks, trails, plazas, common greens and outdoor areas facilitate social gathering spaces as well. The Commercial Hub should serve multiple nearby neighborhoods. Transit, pedestrian and bicycle connections should safely and conveniently link this placetype to others.

Primary Land Use

- Restaurant
- Commercial Retail
- Commercial Service

Supporting Land Use

Mobility in Commercial Hubs

In commercial placetypes like City Corridors, streets act as access spines, moving cars efficiently along arterials along with major transit routes. Pedestrian and bicycle access has historically been under-prioritized in these car-dominated enviorments.

The retail, services and restaurant industries are undergoing an evolution, given the contnued growth and popularity of online shopping, "pick up" retail and restaurant service, and post-Covid household habits. Furthermore, due to housing demand and the city's efforts to provide more mixed-use areas, more non-retail and service uses are being introduced into City Corridors.

These realities have influenced who, how, and why people access City Corridors, and mobility options need to evolve to meet these new patterns and preferences.

Main Streets in these areas should prioritize the greatest mix of walking, biking, transit, and driving access - even as temporary event or community spaces. Arterial and collector streets must still serve drivers, but should evolve into more organized, interconnected networks that better integrate and improve crossings, sidewalks, and pedestrian and bicycle facilities.

Curbside management for a mix of retail, service, and residedntial uses should be thoughtfully planned. Freight deliveries to and from commercial properties should take into account current and evolving retail habits These mixed-use areas are good hubs for micromobility services and will be essential in spreading and supporting multimodal success.

Street and Open Space Network

Connect Commercial Hubs to surrounding neighborhoods with safe and convenient pedestrian and bicycle connections. Improve street crossings to enhance walkability.

Open Space/Park

Developed Blocks

Streets

Defining Features

1. Include medium- or high-density housing to expand the local customer base. Use mixed-use buildings to create an active and diverse experience.
2. Provide a wide range of neighborhood-serving retail uses, such as a pharmacy, grocery store, home goods, personal services and restaurants, among others.
3. Celebrate and promote local businesses owned by diverse populations from adjacent residential neighborhoods in the Commercial Hub.
4. Locate Commercial Hubs at the intersection of two arterial streets to be more accessible to the neighborhoods they serve, particularly by public transit.

Defining Features

5 Incorporate drainage swales, rain gardens, xeriscaping, water-efficient streetscapes and medians and nonpotable water systems in new development.

6 Connect Commercial Hubs to surrounding neighborhoods with safe and convenient pedestrian and bicycle connections. Improve street crossings to enhance walkability.

7 Design centers around a central organizing feature or gathering space, like a common green, plaza, promenade, natural feature or other shared space. Programmed common spaces surrounded by active uses and buildings attract or retain customers and convey a sense of community.

CONNECTING PLACES

Chapter 4 describes the placetypes that serve as the building blocks for Aurora, but the city is more than just a collection of individual locations. Aurora is a connected community of people and places working together to create a cohesive and connected community.

This chapter identifies the policies, infrastructure and external organizations that help shape and define the varied places that make up the city. These are key components or building blocks of how the city grows, the quality and experience of different placetypes and how different parts of the city are integrated and connected to each other.

Aurora is an intersection of people and places working together to create a cohesive and connected community.

Places are physically connected by the streets, sidewalks, open space, waterways, rail, trails and utilities that serve them. Residents and visitors rely on a safe and convenient way to move throughout the community–from home, work and school to shopping, services and entertainment. Likewise, businesses need an effective mobility network to move both people and goods. Cost-effective, efficient and reliable utilities are essential to all activity in Aurora. The community is also connected through a network of city services, including parks, public safety, recreation facilities, transit and libraries. Shared assets, highlighted by public art, distinct neighborhoods, historic places and cultural events, also work together to create a cohesive community.

The local economy links all parts of Aurora, and joins the city with the rest of the region. Private-sector investment is often based on factors beyond municipal boundaries or individual properties. Employers consider many factors in locating their operations, including the availability of skilled local workforce, convenient access to the region's transportation network, desirable neighborhoods for their employees and vibrant mixed-use districts to locate their facilities. No single placetype can meet all of these needs, but the network of places Aurora offers can. A strong local economy is defined by the network of people and places within a community.

1672

CITY FORM

Each neighborhood has its own unique population and needs.

Aurora was founded in 1891 as the town of Fletcher on four square miles of prairie bounded by Yosemite and Peoria Streets and Sixth and 26th Avenues. The beginnings of a water system and 14 new brick homes made up its earliest neighborhood. Much of Aurora is located on prairie grasslands with few topographic or natural obstacles to development. As a result, the city has expanded substantially to the east and southeast over the last few decades.

Over the decades, Aurora has grown to encompass 163.5 square miles although significant areas are still undeveloped. The city provides adequate and sustainable public services and infrastructure to these areas of future development, most of which are on the city's eastern edge. The city's future revenue, cost to provide services and long-term maintenance, among other impacts, is greatly affected by how the areas are developed. Planning for this development is vital for balancing the costs of providing these essential services with the continuation of the city's and region's projected growth.

Neighborhoods

Aurora's neighborhoods have diverse forms, from the traditional urban blocks in Original Aurora and the winding streets of central Aurora's more suburban neighborhoods, to the golf courses and hilltop views of the city's southeastern neighborhoods. As Aurora continues to develop, new neighborhoods and urban mixed-use districts will further diversify the options available to current and future Aurora residents. There is a great opportunity for each neighborhood to take on its own image and identity.

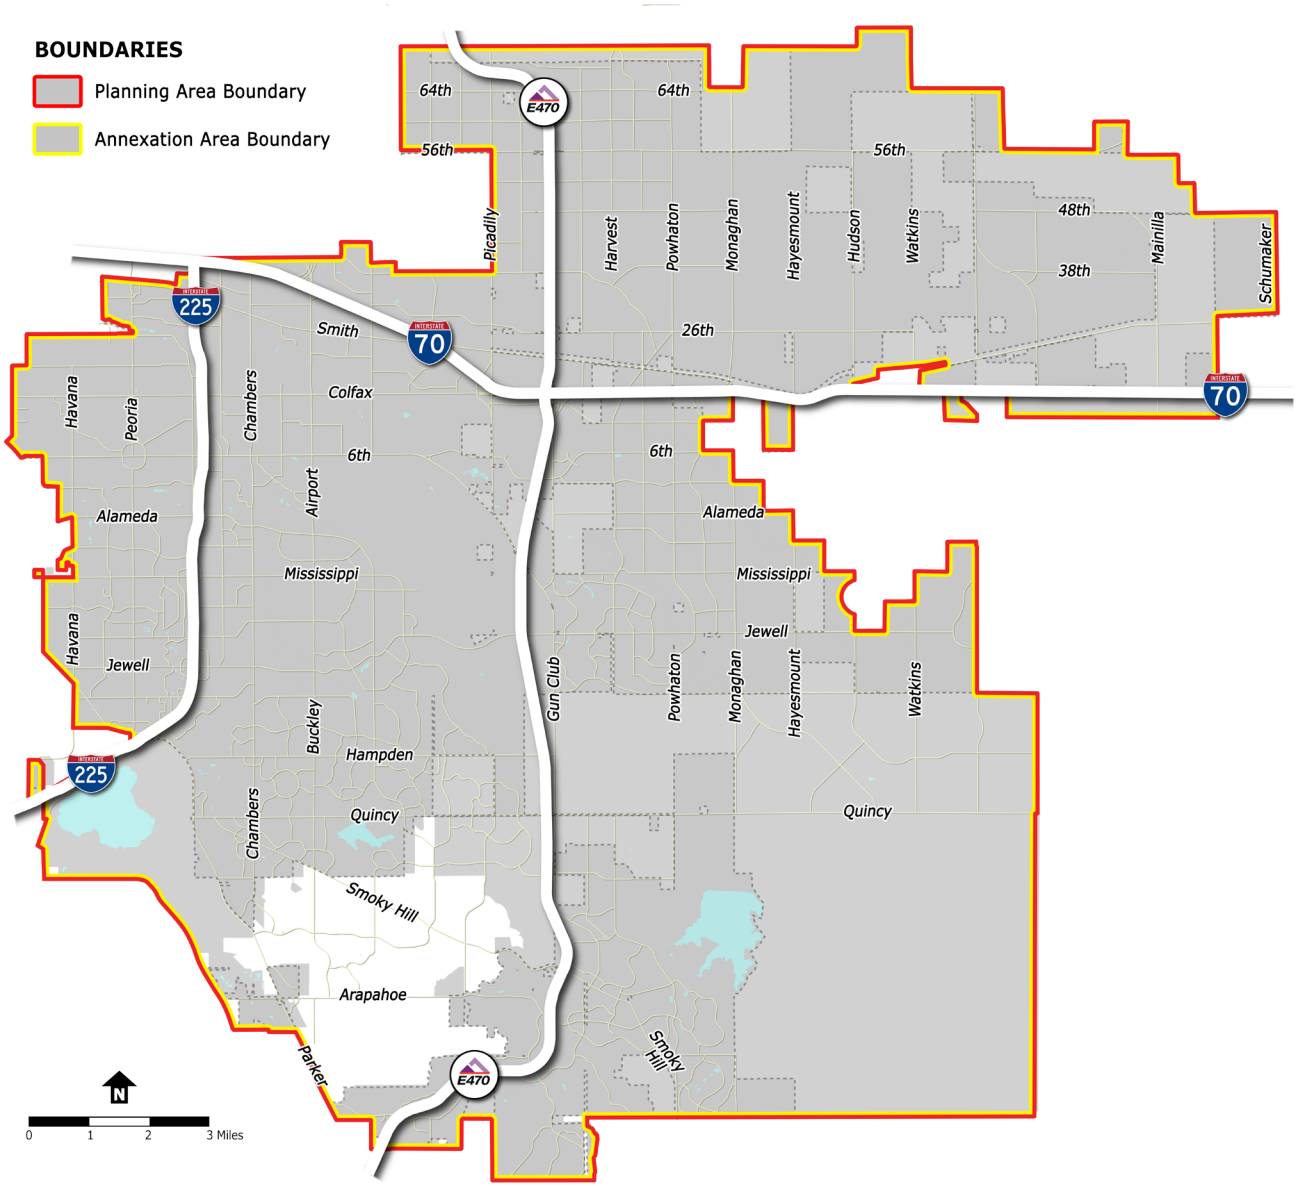
Each neighborhood has its own unique population and needs. Neighborhood-level planning can help address the service and development needs of its residents by engaging them in the development process and creating conversation to determine their vision and priorities.

Planning and Annexation Boundaries

The city has traditionally built its Comprehensive Plan around a geographic area referred to as the "Planning and Annexation Boundary". This boundary encompasses the area within the city's municipal city limits as well as select and adjacent land outside of the city limits. Aurora's boundaries, particularly on the eastern edges, are not always coherent and substantial acerage lies between city boundaries. The city has an interest in planning for ordered and wells-erved development in these outlying areas.

Property within the boundary is eligible to be considered for future annexation, in accordance with all applicable city codes and state laws. City Council will consider whether to approve such annexation requests based on its established procedures and policies on a case-by-case basis.

The Aurora Places Comprehensive Plan, including this Planning and Annexation Boundary, and all applicable plans, policies, and codes included by reference within the plan, or otherwise adopted or approved by the City of Aurora, are intended to meet therequirements of Colorado Revised Statutes (C.R.S.) 31-12-105(1)(e).



This map is current as of 03/01/2026. For an official or updated map, please visit the City of Aurora Maps Library or contact the Planning and Development Services Department.

REGIONAL GROWTH AND DEVELOPMENT

Aurora will play an instrumental role in achieving regional goals and participating in regional benefits.

The Denver-Aurora-Lakewood metropolitan region has a long history of cooperation and coordination regarding regional growth and development and has experienced unprecedented change in recent years. The region has been among the nation's fastest growing, with the population increasing from 2.1 million in 2000 to 2.7 million in 2016. This expansion has brought opportunities and challenges to its metro-area communities.

While rapid population growth can strain local services, transportation infrastructure and housing, it also presents opportunities for cities to offer a greater diversity of jobs, neighborhoods and experiences to both current and future residents. Rapid growth presents both challenges and opportunities for regional coordination.

Aurora is the region's second largest city (374,154 people), home to 133,595 jobs spanning 163.5 square miles. The city recognizes that many future challenges must be addressed through regional cooperation. Aurora will play an instrumental role in achieving regional goals and participate in regional benefits, which can have significant positive impact on the quality of life within Aurora and the metro region.

DRCOG Mile High Compact and Metro Vision

Aurora is a signatory of the Mile High Compact, an intergovernmental agreement to manage and coordinate metro-area growth in accordance with the regional Metro Vision plan. This includes the most recent Metro Vision 2040 plan that the Denver Regional Council of Governments (DRCOG) adopted in 2017. The city reaffirms its support of the Mile High Compact and adopted Metro Vision plan and will continue to serve in influential and leadership roles within DRCOG to provide a leading voice on important regional issues.

The Metro Vision plan describes the future extent of urban development and regional support for efficient use of available land and existing and planned infrastructure, especially on the edges of the metro area. The city will continue to develop ongoing population and employment forecasts to support capital planning and funding programs and use these forecasts to assess the city's appropriate share of regional growth under Metro Vision.

Urban Growth Area

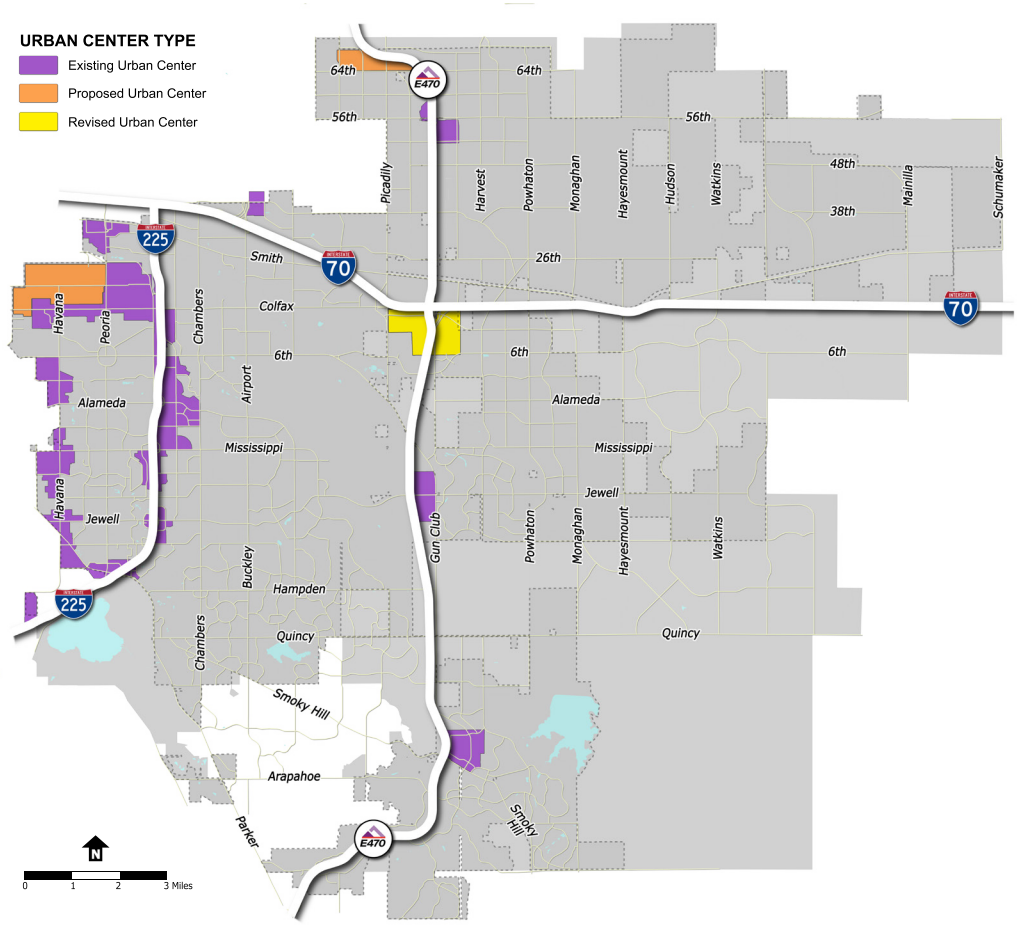
To implement this regional growth policy, DRCOG developed the Urban Growth Boundary/Area (UGB/A) program which periodically allocates growth area to all municipalities and counties in the region. Local jurisdictions designate and manage the specific location of their allocations.

Aurora's undeveloped area is vast, including thousands of acres stretching from Denver International Airport and the Colorado Air and Space Port (formerly Front Range Airport) to Douglas County. The sequence and timing of development of this area is unpredictable, so Aurora has chosen to identify areas of future growth and designate portions of the city's allocation of development under the UGB/A program. In Aurora, this allocation is distributed among nine subareas and is used by property owners on a first-come, first-served basis. The urban growth allocation in the UGA is only considered to have been used when land is subdivided or new construction has occurred.

Designated Urban Centers

DRCOG's Metro Vision plan also describes the "urban centers" concept as a model for healthy, livable communities. These designated centers are intended to feature a multimodal travel network within a mixed-use, urban district with diverse housing, employment and service opportunities accessible without sole reliance on automobiles. Metro Vision establishes a goal of having 25 percent of new housing and 50 percent of new employment in urban centers by 2040. By focusing growth into strategic areas, the city can capitalize on valuable development opportunities and build upon existing transportation networks and infrastructure.

Urban centers are identified by local decision-makers and submitted to DRCOG for formal review and approval. There are currently 18 designated centers in Aurora. The adjacent map shows the city's designated urban centers.



This map is current as of 02/01/2026 For an official or updated map, please visit the City of Aurora Maps Library or contact the Planning and Development Services Department.

City Connections

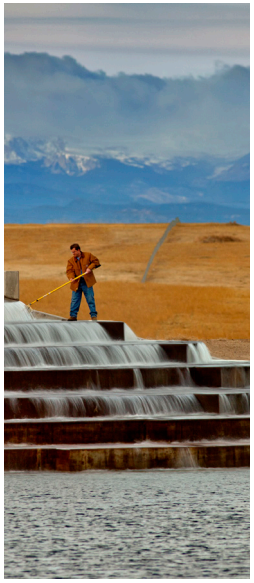
To create great places in Aurora, it is critical that these systems be well planned and developed.

Chapter 4 identifies the different placetypes that define the development pattern of Aurora. Public systems and networks, including multimodal transportation, parks and open space and water utilities (water, wastewater and stormwater), connect these placetypes. Cultural resources, including libraries, public art and art venues, connect the community through shared culture and pride. To create great places in Aurora, it is critical that these systems be well planned and developed.

PUBLIC SYSTEMS

Economic Development System (page 56)

Transportation and Mobility System (page 66)



Water, Wastewater and Stormwater Systems (page 78)

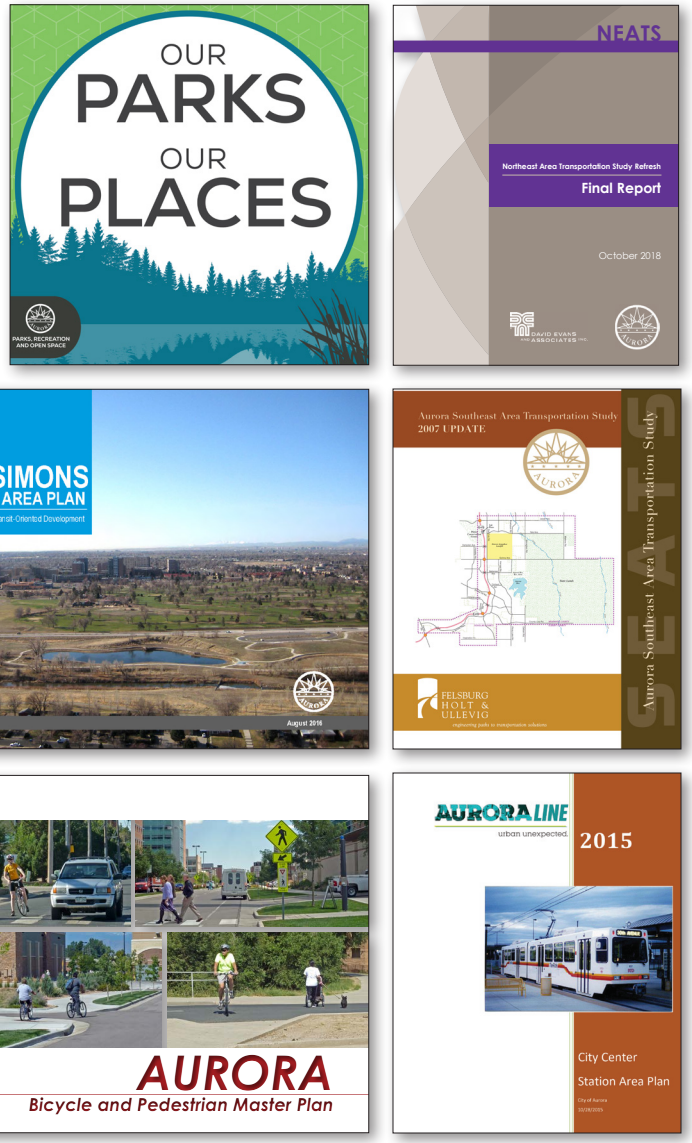
Parks, Trails, Recreation, and Open Space System (page 82)

Arts and Cultural Resources System (page 84)

PLANS ADOPTED BY REFERENCE

The following plans are also adopted by reference as amendments to the Aurora Places Comprehensive Plan.

- Our Parks, Our Places: A Plan for Aurora's Parks, Recreation and Open Space (2024) (Ord. 2024-11)
- Connecting Aurora Multimodal Transportation Plan, 2026 (Ord. 2026-__)
- Station Area Plans:
  Gateway Park East Station Area Plan, 2008 (Ord. 2008-79)
  Iliff Station Area Plan, 2009 (Ord. 2009-43)
  Abilene Station Area Plan, 2009 (Ord. 2009-44)
  Peoria-Smith Station Area Plan, 2009 (Ord. 2009-53)
  Florida Station Area Plan, 2011 (Ord. 2011-44)
  Nine Mile Station Area Plan, 2012 (Ord. 2013-01)
  City Center Station Area Plan, 2015 (Ord. 2015-16)
  Fitzsimons Station Area Plan, 2016 (Ord. 2016-40)
  Colfax and 13th Avenue Station Area Plan, 2025 (Ord. 2025-84)



Economic Development System

Building a vibrant, successful local economy is a shared effort and economic development embodies this pursuit.

Economic growth is spurred by all businesses, residents and organizations that bring money into the city of Aurora. Any and all contributors to the economy share resources both intentionally and unintentionally to prosper individually and holistically as a city. As such, they all must work together to create a fully functional economic development system.

Partners and Partnerships

Building a vibrant, successful local economy is a shared effort and economic development embodies this pursuit. More jobs and more investment within a community means more opportunities and increased choices. Economic development practices are growing more comprehensive. It is not only about attracting corporate headquarters, but addressing the growth and expansion needs of existing businesses, engaging with firms across the globe, encouraging entrepreneurship and small business development, supporting the surrounding community as a place for employees and companies to call home, and aligning education and training to meet current and future workforce trends.

Partners with important roles to play in Aurora's economic growth and success include:

- Adams County Economic Development (ACED)
- Adams County Workforce and Business Center
- Arapahoe/Douglas Works! Workforce Development Center
- Aurora Chamber of Commerce
- Aurora Economic Development Council (AEDC)
- Aurora Public Schools
- Aurora-South Metro Small Business Development Center (SBDC)
- Aurora Urban Renewal Authority (AURA)
- City of Aurora
- Colorado Office of Economic Development and International Trade (OEDIT)
- Community College of Aurora and other higher education providers
- Major local employers and institutions, including Buckley SFB and Anschutz Medical Campus
- Public School Districts
- U.S. Small Business Administration
- Visit Aurora

Small Business Development and Entrepreneurship

The SBDC's mission is to help existing and new businesses grow and prosper.

The Aurora Municipal Center is home to the Aurora-South Metro Small Business Development Center (SBDC). The center is one of 14 SBDCs statewide, and serves not only Aurora, but also all of Arapahoe County, portions of Douglas County and southern parts of Jefferson and Adams counties.

The SBDC's mission is to help existing and new businesses grow and prosper. The center offers high-quality, confidential and no-cost, one-on-one consulting with business experts, niche programs and free or low-cost business workshops. The city of Aurora serves as host to the SBDC, offering services five days a week during regular business hours. Additionally, several programs are offered either during the evening or on weekends. In addition to the main office at the Aurora Municipal Center, the Aurora-South Metro SBDC has satellite offices at Innovation Pavilion in Centennial and the Englewood Civic Center.

The SBDC systematically tracks its quality of service through a variety of methods, including citizen evaluations after each consulting session and workshop and evaluating economic impact in terms of jobs created, jobs retained and business starts. Capital formation, contracts awarded, and the involvement with cluster industries like retail, restaurant, energy and bioscience also provide measurement metrics for SBDC.

Aurora uses the resources provided by the SBDC to leverage small business development and expansion and foster vitality in the development of all placetypes.

Redevelopment and Reinvestment

Like many communities that developed substantially since the mid-20th century, Aurora's aging neighborhoods and commercial centers face a growing need for revitalization. Housing, commercial buildings, infrastructure and public facilities are aging and in need of repair or replacement to return those areas to a place of vibrancy and desirability. While most of this reinvestment will come from the private sector, the city has an active role to play in planning, initiating and supporting reinvestment in key areas and projects.

Urban Renewal

This tool is intended to help guide public and private investment toward catalytic development projects.

Urban Renewal is one tool that has been used to address blighted areas by initiating and supporting private reinvestment and redevelopment of aging and obsolete properties and returning them to an active, revenue-generating space. The City of Aurora established the Aurora Urban Renewal Authority to pursue and facilitate redevelopment of blighted and strategically located properties within the city. The authority serves as a governmental entity under state law separate from the city of Aurora. While being a legal entity separate from the city, the authority's board of directors is primarily comprised of the mayor and city council members. Three additional members representing the school districts, county governments and other property taxing entities will likely join the board in the near future to bring it into compliance with current state law.

The authority's mission is to plan for, recruit, promote and support development and redevelopment projects that revitalize blighted, strategic and economically challenged areas, and provide technical assistance and financial resources to make projects viable. Each area has a plan that offers a vision and framework for future development and includes mechanisms by which the Authority will achieve high priority goals, including:

- Pursuit of higher density development and redevelopment within designated TOD areas and urban centers
- Pursuit of redevelopment and revitalization projects within the oldest sections of Aurora
- Enhancement of funding capabilities to better assist small-site, infill development and neighborhood supporting businesses in economically challenged neighborhoods

The authority's primary means of meeting these goals is through the creation of urban renewal and tax increment areas that generate tax increments resulting from increased property tax, sales tax and other local taxes generated from redevelopment activity. As a result of tax increment revenue generation, significant funding can be made available to provide needed public improvements and to help make projects financially viable to the public sector by helping close financial gaps.

Urban renewal areas have been identified and prioritized, with plans to address land use, transportation, infrastructure, recreational facilities and urban design. They are intended to help guide public and private investment toward catalytic development projects. New areas may be established as needs and opportunities arise.

Federally Designed Investment Zones

Aurora is home to a number of federally-designed investment zones under the Enterprise Zone, Foreign Trade Zone, and Opportunity Zones programs. While these are federal programs, the benefits are intended to support local communities, like Aurora. The purpose of these zones is to encourage private investment and job creation.

While the specific function and benefits from these zones are unique to each program, generally these zones aim to attract private investment into targeted areas by offering some type of tax incentive. The zones offer tax credits, deferrals or other benefits to private investors who commit to funding employment growth, real estate projects or infrastructure improvements.

Employment

A skilled and educated workforce is critical to economic growth.

The majority of Aurora's eligible workers leave the city every day to work in another community. Community outreach and research determined that Aurora companies, as well as those outside the city, note that the local skilled workforce does not fully match their evolving business needs. A skilled and educated workforce is critical to economic growth, necessary to attract large-scale, well-paying employers and imperative to diversifying our economy. Significant efforts must be made to expand the city's workforce and retain at least a portion of its existing workers by leveraging its existing businesses, strong industries and other assets.

Targeted Industries

The city and its partners work to attract and expand key industries in order to broaden and deepen the diverse local economy. These businesses may be growth industries with a strong long-term outlook, complementary or support industries to existing job sectors, or emerging industries in which Aurora offers a competitive advantage. However, Aurora's employment is diverse, and opportunities in other sectors will be pursued as well. Targeted industries include:

- Advanced manufacturing
- Aerospace and defense
- Bioscience
- Creative industries
- Healthcare
- Hospitality
- Energy
- Transportation and logistics

Retail Strategy

A robust local retail economy is especially important in a community like Aurora, which receives over half of its revenue from sales and use taxes. Changing consumer preferences, competition from adjacent communities, and continued growth in online shopping will continue to reshape the local retail environment. Identifying growth sectors, marketing the city to the retail community, keeping up with industry trends and encouraging reinvestment in aging retail destinations are part of the city's retail strategy and need to be supported.

The retail sector is constantly evolving. The continued growth of online commerce is reshaping how people shop, with direct impacts on brick-and-mortar stores and the city's tax revenue. Retailers are rethinking the role of their physical stores and in many cases decreasing their footprints and seamlessly connecting their stores with their online services.

As an approach, placemaking adds value to the retail environment. Increasingly, consumers are seeking diverse experiences as part of their shopping preferences, not simply a one-store-and-done trip. Aurora can offer places with unique identity and at various scales–from a bustling "downtown" experience to a neighborhood center that serves as a true gathering place for area residents. Mixing shopping with housing, entertainment, dining, recreation, services, events and employment in a comfortable, safe and conveniently accessible place is a strategy that will draw and keep customers in Aurora.

Education and Workforce Development

An educated and talented workforce is a critical asset to Aurora and essential to a growing local economy.

This talent can either be acquired by attracting educated and trained residents to relocate to Aurora, or it can be "home-grown" by equipping local residents with the skills and certifications needed to compete for stable and well-paying jobs. Aurora's strategy is to pursue both opportunities.

A strong local workforce provides two-fold benefits to the community. A stable and well-paying job is foundational to a family's ability to provide for itself. Many positions in the competitive and changing economy over the next two decades will require both a solid educational foundation and job-specific skills, training or certifications. If residents are able to access appropriate education and training locally, they will be well-equipped to meet the needs of the local job market, and in turn, meet the needs of their own family to rent or purchase a home, purchase everyday goods and services, and provide a stable and comfortable lifestyle.

Secondly, employers need qualified and skilled employees to fill jobs. The strength and stability of the local economy is in large part built upon a company's ability to acquire and retain talented employees to succeed and grow in their industry. Additionally, firms seeking to relocate or expand their operations will weigh their location decisions based in large part on the availability and readiness of the workforce pool available to them in a community.

Education

A strong education system, from K-12 through higher education and career training, is essential to creating a steady and continuous pipeline of talent to local employers and providing opportunities for Aurora residents to earn and maintain stable and well-paying jobs.

Aurora is served with a continuum of education and training providers. The majority of Aurora is served by Aurora Public Schools and Cherry Creek School District, while small portions of the city fall within the Brighton, Bennett and Douglas County school districts. The Aurora and Cherry Creek districts operate K-12 schools, as well as preschool, charter, magnet, vocational, gifted and talented schools and other support programs. The districts emphasize career and college readiness through concurrent credit courses with the Community College of Aurora and other local colleges, career and technical education opportunities and college preparation resources.

Aurora is also well-served by a variety of higher education institutions. The University of Colorado Anschutz Medical Campus, Pima Medical Institute and Concorde Career College offer a spectrum of medical education and health care training programs. The Community College of Aurora offers a diversity of degree programs at two campuses and online. Pickens Technical College provides classes in variety of fields, including engineering and technology, health, transportation, business technologies and human services. Both CCA and Pickens have associations with Aurora's school districts to provide concurrent education and joint programs.

Aurora is also home to Platt College, Colorado Technical University South Denver Campus and the Ecotech Institute, the first college entirely focused on preparing graduates for careers in the fields of renewable energy and energy efficiency, and other educational institutions.

Workforce Development

Aurora is served by the Arapahoe/Douglas Works! workforce center and the Adams County Workforce and Business Center. Both offer a variety of free services to individual job seekers, including those looking for training or retraining, new employment and employment counseling. Youth programs offer assistance with obtaining a high school diploma or GED, training and support services through the Workforce Innovation and Opportunity Act. The centers also provide services for employers seeking skilled and trained employees through hiring events, job listings, and connecting employees with training and certification programs.

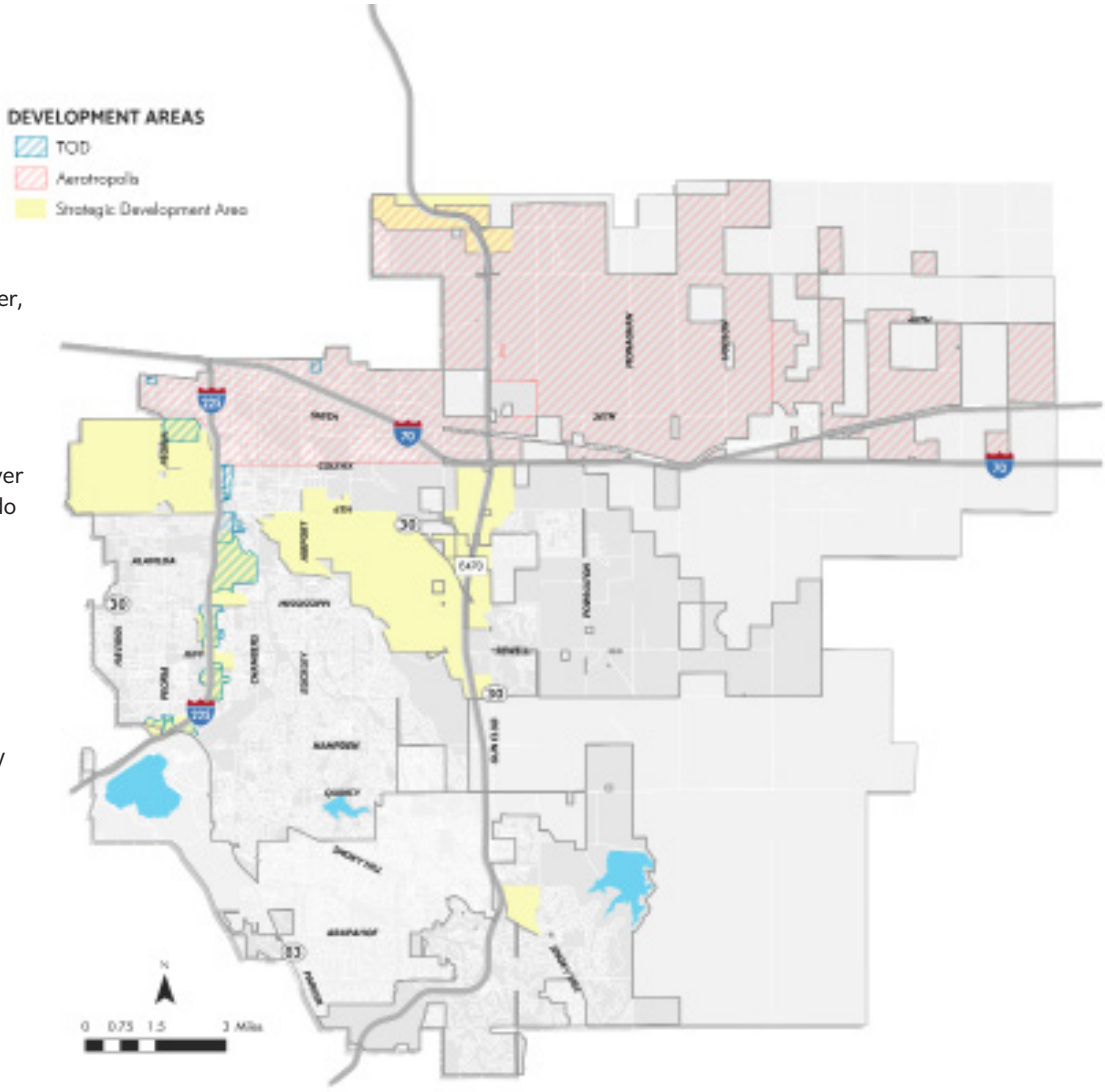
The city cooperates on programs with all these agencies and supports cooperative efforts that improve the economic well-being of Aurora and its residents.

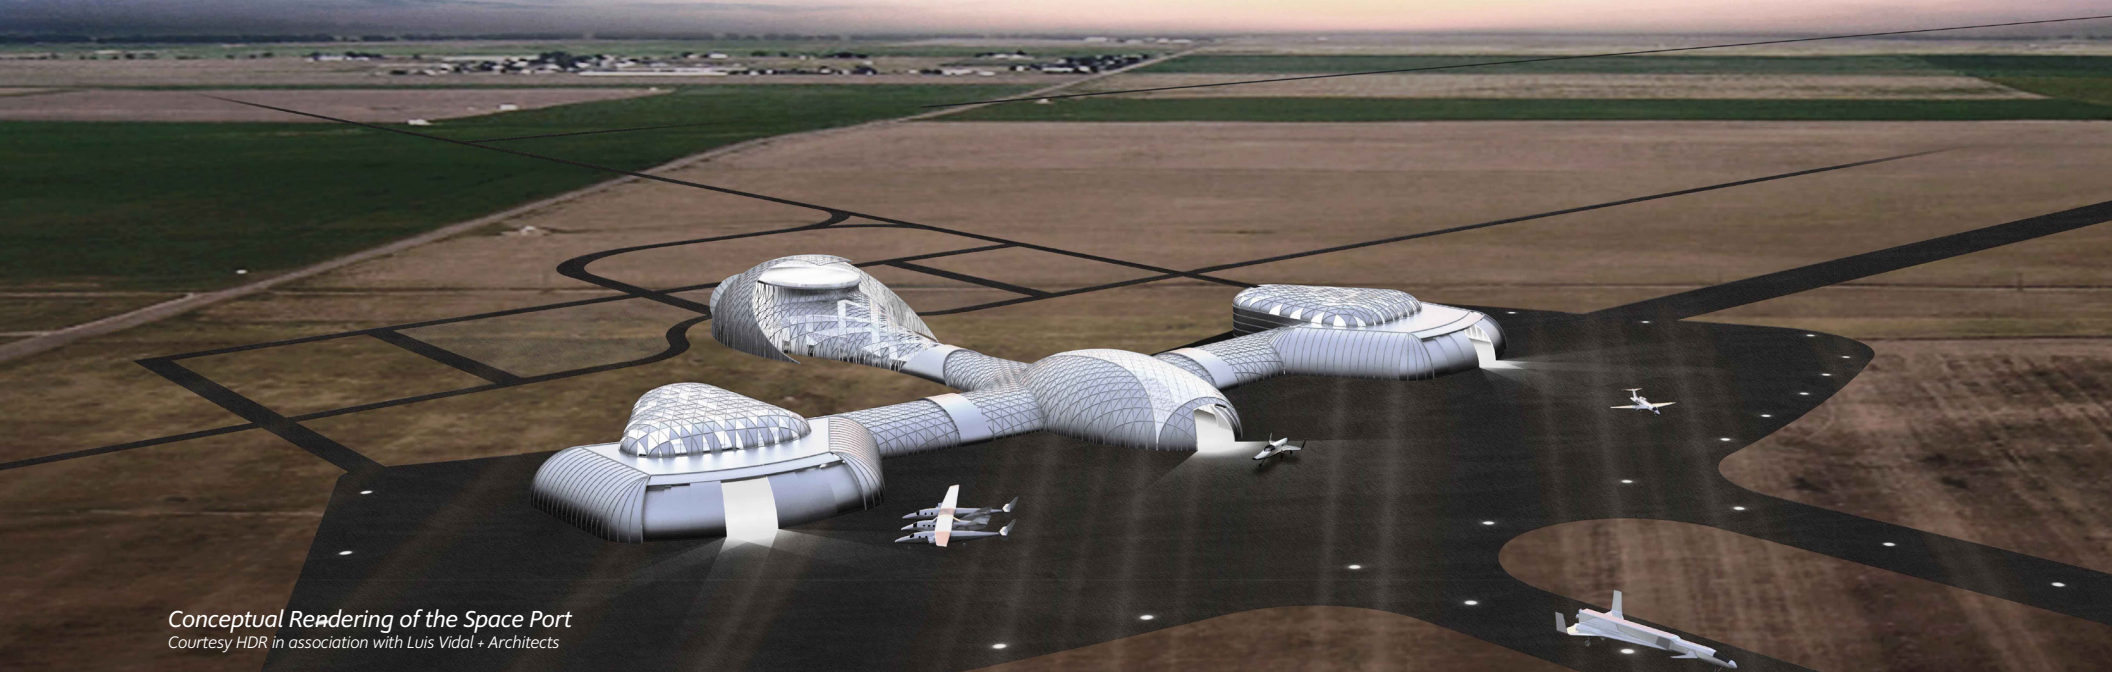
STRATEGIC DEVELOPMENT AREAS

While the city provides services and encourages investment and job creation across the community, Aurora Places identifies locations within Aurora that have been identified as particularly suitable for significant investment or needing ongoing focus and intervention. Each has its own unique conditions, opportunities and challenges to be addressed through a set of strategies specific to the area. Strategic areas include:

- Urban Districts placetypes (City Center, Anschutz/Fitzsimons, I-225/Parker/Havana, Southlands, I-70/E-470, and Gaylord/Far North E-470)
- Innovation Districts placetypes
- Aerotropolis area supported by Denver International Airport and the Colorado Air and Space Port (formerly Front Range Airport)
- Station area transit-oriented development
- Original Aurora, including the Arts District and Colfax Avenue corridor
- Buckley Space Force Base and nearby employment areas

These strategic areas often have additional plans, including station area, neighborhood, transportation or urban renewal plans that outline strategies specific to that area.





Conceptual Rendering of the Space Port
Courtesy HDR in association with Luis Vidal + Architects

AEROTROPOLIS

Aurora's close proximity to the Denver International Airport (DEN), one of the busiest and fastest growing airports in the country, and several main transportation corridors in Colorado, positions it to take advantage of a key opportunity in the region. Furthermore, the future Colorado Air and Space Port (formerly Front Range Airport) offers even more opportunities for transportation, research and development. An aerotropolis, which includes thousands of acres of land on and around DEN in multiple jurisdictions, including Aurora, will demonstrate how collaborative, responsible development enhances Aurora's ability to compete for world-class companies who will create jobs, invest in the community and strengthen the economy.

An aerotropolis is a dynamic, urban place in which the layout, infrastructure, and economy center around the airports. An aerotropolis is more than any single development, it is largely characterized by a collection of transportation-linked businesses and supporting industrial and commercial development. However, appropriately-located residential, retail and restaurants will also be included.

Airport-centered development seeks to take advantage of the connectivity and synergy created by the people and industries in the area. Within its boundaries, it will deliver the opportunity for innovation to flourish, drive a forward-looking strategy for important planning, like infrastructure and transportation, and bring together the public and private sectors to grow existing and new industries.

Best Practices

- Develop cooperative partnerships between the public and private sectors, ensuring strategic planning and development.
- Focus on prioritized infrastructure and transportation opportunities that will benefit the area's development..
- Leverage key anchor assets within the aerotropolis' influence areas that are already spurring activity and prioritize catalytic projects that will do the same.
- Continue to support efforts related to the Colorado Air and Space Port. Explore transportation, employment and development opportunities related to the establishment of this unique facility.
- Balance job creation with residential, commercial services and entertainment uses in the area.

Photographs provided courtesy of Denver International Airport.

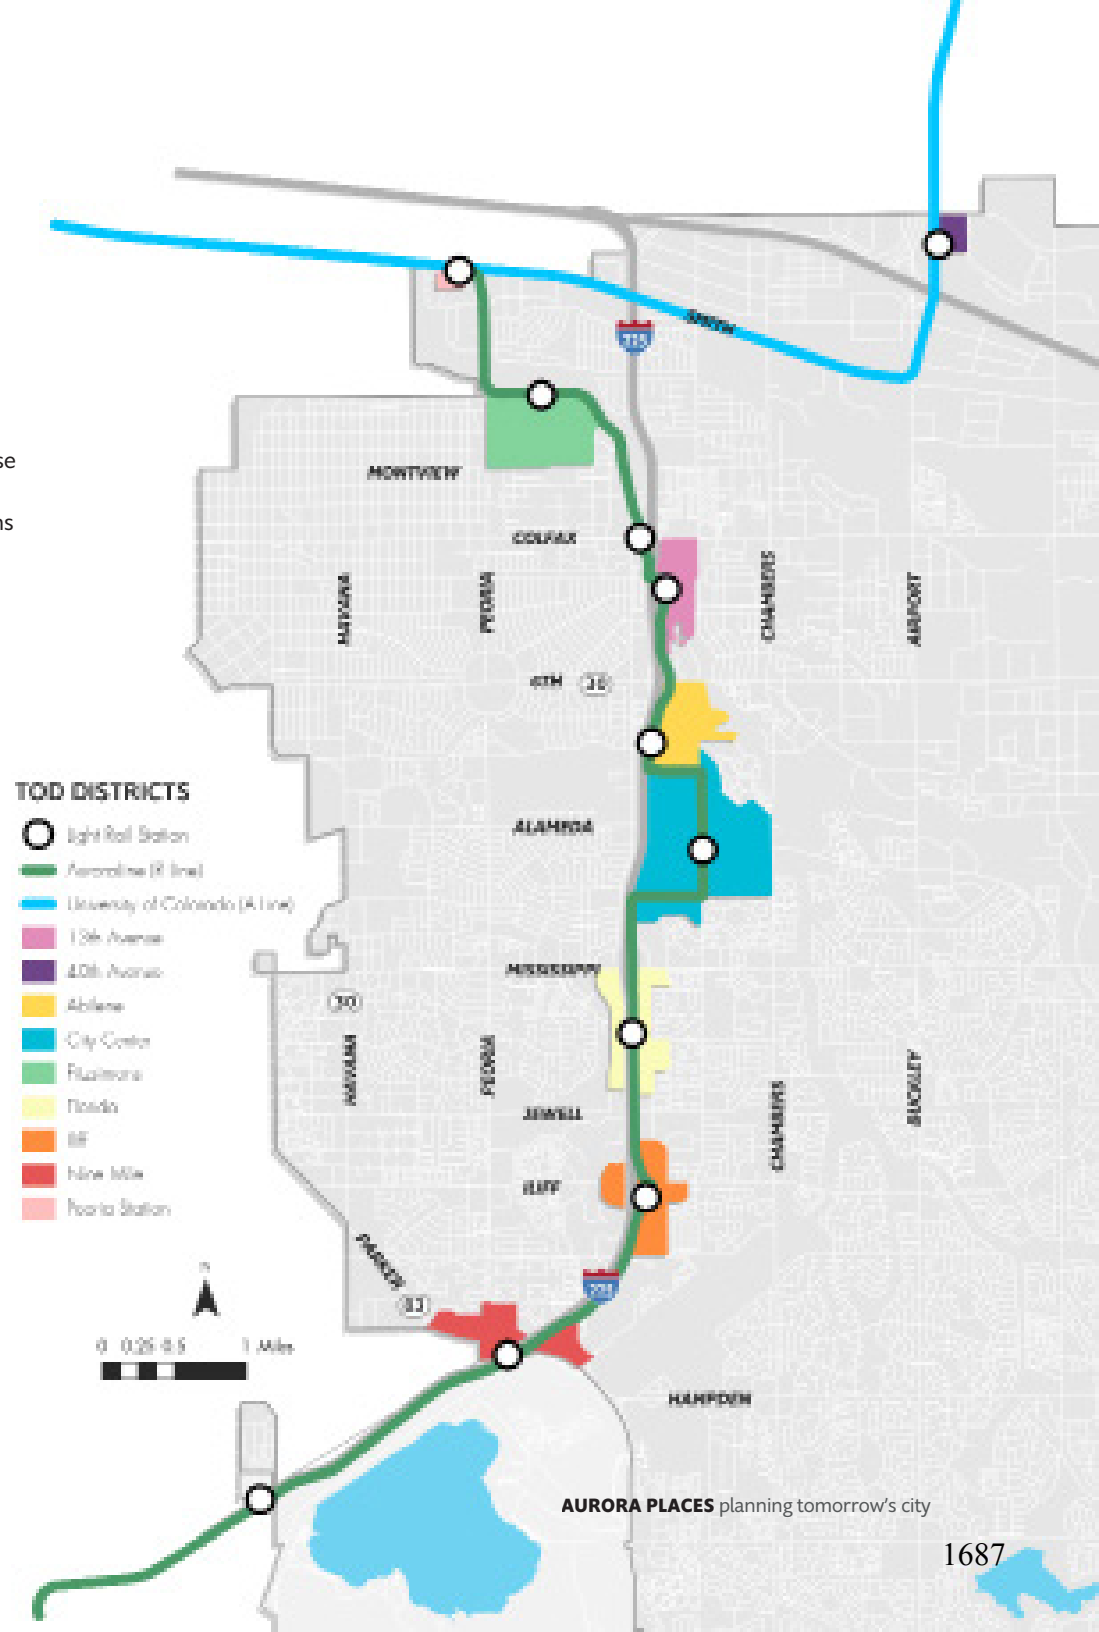
TRANSIT-ORIENTED DEVELOPMENT (TOD)

The Aurora Line, RTD's R Line, opened service in early 2017, connecting nine stations from Dayton Station in the south to Peoria Station in the north. Two stations on the University of Colorado A Line are located in Aurora, connecting to Downtown Denver and Denver International Airport. RTD's H Line serves four stations: Florida Station, iliff Station, Nine Mile Station and Dayton Station, ensuring important transit connections between Aurora and Downtown Denver. These station areas represent a unique and valuable opportunity for significant investment surrounding transit.

Beginning in 2006, the city initiated planning for the light rail stations in anticipation of transit service and interest from the private sector. These plans are promote TOD by identifying opportunities for compact, mixed-use development that is transit-supportive and to develop public-private strategies to implement a shared vision.

While the plans offer a vision and land use framework that is powerful yet flexible, these plans may be updated as conditions change or opportunities materialize. Adopted station area plans include:

- Nine Mile Station Area Plan
- Iliff Station Area Plan
- Florida Station Area Plan
- Fitzsimons Station Area Plan
- City Center Station Area Plan
- Abilene Station Area Plan
- 40th Avenue and Airport Boulevard Gateway Station Area Plan
- 13th Avenue and Fitzsimons-Colfax Station Area Plan
- Peoria Station Area Plan



This mixed-use, pedestrian-oriented development type is a compact, walkable and bikeable area positioned around a transit station. They focus on providing visibility and accessibility to transit users and connecting them to developments near the transit center. Although varying in size and intensity, this overlay contains higher residential densities; niche retail, dining, and entertainment opportunities; office spaces and service uses; and gathering spaces. Although the mix, intensity, and makeup of uses in this overlay may vary, the intent is to create a condensed mixed-use area that provides a place for urban living, employment and necessary and convenient access to transit, all in a pedestrian-friendly environment.

Transit-Oriented Development (TOD) best practices include:

- Include areas that are within reasonable walking distance (within ½ mile) of transit stations that also include high-quality cyclist connections.
- Provide density and intensity of development that promotes high levels of activity and transit ridership and is appropriate in relation to Aurora's evolving real estate market.
- Integrate public art and creative architecture so that transit-oriented developments have a unique characters.
- Ensure an appropriate mix of housing, employment, entertainment and services focused around gathering places, such as a central plaza or main street.
- Conform development in TOD areas to the adopted station area plans.

Transportation and Mobility System

CONNECTING AURORA MULTIMODAL TRANSPORTATION PLAN

Connecting Aurora is the city of Aurora's first multimodal transportation master plan–a bold, community driven roadmap to create safe, connected, and sustainable multimodal options for everyone, no matter how they travel.

Connecting Aurora creates a vision for the city's multimodal transportation system that serves pedestrians, people using mobility assistance devices, bikes, transit, cars and freight. This vision will guide the planning, design and delivery of future multimodal transportation policies, programs and projects that are based on community values and needs. The plan includes tools, implementation strategies and actions for achieving Aurora's vision to expand mobility choices for safe and seamless movement of people and goods throughout the city.

Connecting Aurora is forward thinking and innovative, and it is fundamentally focused on achieving the stated vision and goals for the city's multimodal transportation system. The plan supports an integrated multimodal transportation system that is safe, convenient, reliable, connected, efficient and sustainable for all. Walking, rolling and biking will be safer and more convenient, and transit will be an attractive way to travel for many more residents and visitors. The plan proposes a street network that preserves and creates unique places throughout Aurora, supporting economic vitality and a high quality of life for people of all backgrounds.

Connecting Aurora will guide the city's transportation investments and decisions that are crucial to actualize the plan's vision, mission and goals. Ultimately, Aurora's strengthened transportation system will support a thriving and competitive city for generations to come.

OUR VISION

Aurora safely connects all people to our places for a healthy, sustainable and economically strong community.

Our Mission

The city of Aurora will provide a complete transportation system to meet the needs of all people. The city will engage the public in the delivery of plans, programs, policies, standards and projects.

OUR GOALS

Our goals represent specific and measurable outcomes for the transportation system, to help us stay focused on actions that help to achieve the vision.

A Transportation System Serving People

Safe

People are safe and feel safe traveling in our city.

Reliable

People can depend on all forms of transportation.

Convenient

People can move around Aurora efficiently and easily.

Connected

People are well-connected to the places they want to go, however they choose to move.

A Transportation System Supporting Overall City Aspirations

Sustainable

Infrastructure and services can be built, operated and maintained at high levels, in a fiscally and environmentally sustainable way.

Economically Strong

The community's economic vitality s supported and enhanced by the transportation network.

Healthy

The community is served by transportation that supports a healthy lifestyle and environment.

A Transportation System Strengthening Community

Authentic

Infrastructure design contributes to the creation of great places and preservation of traditionally unique places.

Equitable

All people have viable transportation choices to mee their needs.

Integrated

People have easy access to a mix of placetypes because land use and transportation are fully integrated.

INNOVATIONS, TECHNOLOGIES AND EMERGING TRENDS

Aurora should prepare for an entirely new era in transportation.

Artificial intelligence and recent innovations in information and communication technologies will significantly impact transportation and travel infrastructure. Aurora should prepare for an entirely new era in transportation. The city should be a regional and national leader in exploring partnership opportunities for potential pilot projects involving autonomous and connected vehicles, data sharing, and other related applied-technology initiatives.

Growth of Shared Mobility

Shared mobility refers to forms of transportation that are shared among users such as transit, taxis, car-sharing, and bike shares.

Transportation network companies (TNCs) like Uber and Lyft have risen in popularity across the country. These services connect people to rides on demand. These services can offer riders with greater convenience and coverage than traditional taxis. Rideshare models have been replicated by public transportation providers when providing service to people with disabilities and in areas with lower population density.

Micromobility, like shared bikes, e-bikes, and scooters, can improve access to Aurora's greater transportation network by allowing people to more easily make first-mile and last-mile connections. These mobility options are often low-cost and can decrease GHG emissions if used in place of a car.

Travel Demand Management

Due to limited financial resources and environmental constraints, it is more difficult and takes longer to add new infrastructure to meet the significant growth in passenger and freight travel demand. Therefore, strategies to manage travel demand are more critical to transportation operations than strategies to increase capacity.

With the advancement of technologies, managing demand should use more comprehensive approaches, beyond merely encouraging single-occupancy vehicle commuters to use carpool, vanpool or public transit for their commute. The focus of contemporary travel demand management (TDM) is to optimize the transportation system performance by providing real-time information on incidents, congestion and weather conditions to all travelers to help them make smart decisions about location, route, travel time and mode.

Impact of Delivery Services and Growth of E-commerce

The increasing use of transportation services like Uber and Lyft, e-commerce, AV self-parking and on-demand delivery is creating increased demand for temporary uses of curb space. Freight movement and the ability of trucks to park and easily deliver goods to businesses is an essential factor for the success of Aurora's economy.

Freight movement must be balanced and prioritized among the competing curbside needs, especially in commercial and mixed-use areas of Aurora. Curbsides can be managed with static signing that designates uses by time of day and day of week, or it can be done dynamically via changeable message signs that define regulations based on various thresholds.

While static signing is predictable for users, dynamic signing provides greater flexibility for agencies to manage curb space based on changing needs.

Electric and Autonomous Vehicles

Electric vehicles (EV) are rising in popularity. As of November 2024, there were more than 156,000 electric vehicles registered in Colorado, making the state a leader in EV adoption. Aurora's current electric vehicle infrastructure lags behind neighboring cities. Aurora has about 240 public charging station ports for EVs, or about one charger for every 1,650 people. This is substantially fewer chargers per capita than Denver (one charger for every 680 people) and Boulder (one charger for every 255 people).

Autonomous vehicles (AV) use radar, global positioning systems (GPS), cameras and light detection and ranging (LiDAR) to partially or fully replace the need for human drivers. The timeline for full AV adoption is unknown; however, some research predicts that by 2035, between 17% and 57% of new passenger cars sold will have some level of autonomy. If deployed strategically, AVs are believed to drastically improve safety on roadways by eliminating human error.

TRANSPORTATION INFRASTRUCTURE AND FISCAL CHALLENGES

Aurora's transportation system is a complex mix of public and private facilities that require maintenance and upkeep, as well as continued investment, to maintain in a state of good repair.

Aurora's population and employment growth, and increasing construction and infrastructure needs require a sustainable and diversified financial approach to support the city's long-term transportation goals. There are several dynamics that challenge the long-term financial investment in the city's transportation infrastructure.

Mismatched Development Patterns

Suburban development patterns common across U.S. cities can complicate how transportation infrastructure is planned, delivered and maintained. Lower-density, car-oriented development often requires more infrastructure, increasing both the upfront construction costs and long term maintenance obligations. When development occurs over time, infrastructure investments may be fragmented, resulting in gaps in connectivity and limited multimodal options.

In Aurora, similarly to other growing communities, transportation infrastructure is frequently delivered in response to development. This tendency can create timing mismatches between when travel demand exists and where infrastructure is built. Incomplete networks, indirect travel routes and delayed improvements can result.

Limited Funding Dedicated to Transportation

While the city does receive transportation funding through regional, state and federal grants, these contributions are relatively modest in comparison to the amount of dollars needed for annual upkeep, new development and retrofit capital improvements, and future maintenance obligations. Aurora primarily funds transportation infrastructure projects through general fund allocations, state Highway User Tax Fund (HUTF) distributions and limited development impact fees.

Aurora's capital program outlays for transportation are low compared to peer cities. Without dedicated funds, the city's CIP relies heavily on general funds and HUTF distributions, both of which are subject to volatility. Outside of development, metro districts, and authorities, Aurora's reliance on general funds and formula funds limits the city's ability to finance large, multiyear projects essential for meeting long-term infrastructure demands. Other large cities in Colorado, while also struggling with infrastructure demand, have made policy decisions to implement supplemental revenue sources to substantially augment transportation funding.

AURORA AS A PLACE-ORIENTED CITY

The Connecting Aurora plan is built upon an Aurora that is a "place-oriented city". This emphasis on a community of great places aims to improve the quality of life for Aurorans by increasing the number of convenient, affordable and safe mobility options. Choice is fundamental to this scenario.

Aurora Places serves as the foundation for this scenario as it emphasizes designing and building the transportation system around what best fits different placetypes.

In addition to making improvements to the city's transportation network, the place-oriented city emphasizes the need to simultaneously concentrate the destinations within and near neighborhoods so that people can access daily destinations within a short walk, bike ride, transit ride or car trip. In this scenario, the city of Aurora makes significant investments in walking, biking and transit infrastructure with a focus on making these modes of transportation safer, more connected and more accessible.

The Place-Oriented City uses land efficiently and productively. It balances providing opportunities for parking with opportunities for additional shops, services, parks and other land uses, within and near neighborhoods so that people can access daily destinations within a short walk, bike ride, transit ride or car trip.

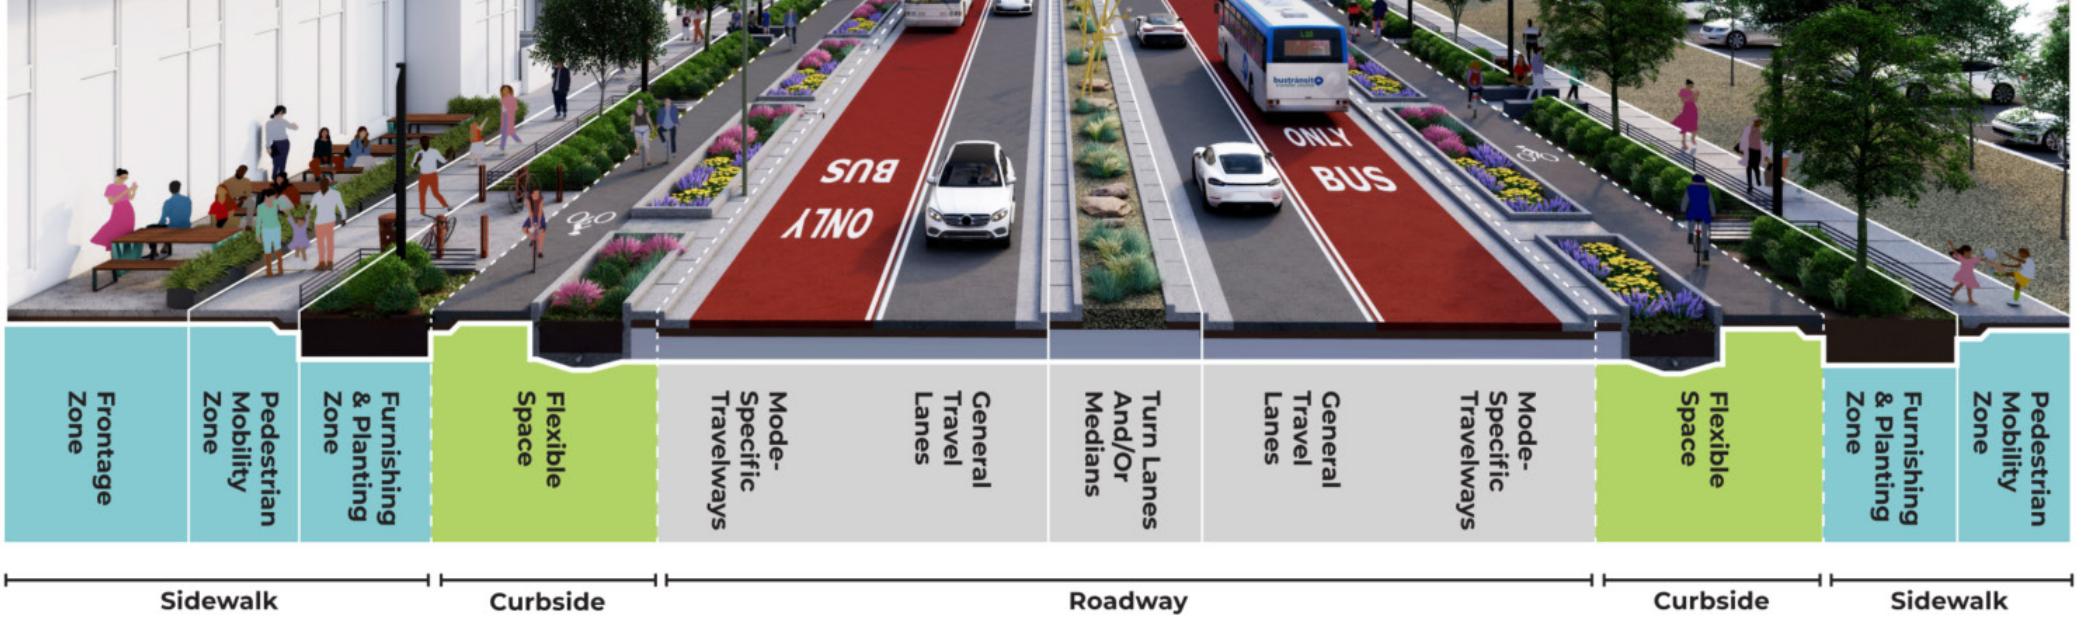


Illustration of common complete streets concepts and features. Refer to city codes for applicable design standards.

COMPLETE STREETS FRAMEWORK

Aurora will develop and implement a "complete streets" framework to support Connecting Aurora's vision and reinforce the city's commitment to inclusive mobility, public health, sustainability and community vitality. It will help ensure that Aurora's transportation investments contribute to a connected, multimodal street network and enhance public space.

The framework will integrate multimodal principles into the fabric of transportation decision-making–from initial planning to long-term maintenance. Its purpose is to safely connect all people, whether they walk, bike, roll, drive or ride transit, to the places they live, work and play.

Establishing Modal Priority

The framework will define modal priority and coordinate with street types and placetypes to account for the surrounding context while maintaining consistency for users. This will allow the city to tailor multimodal features and curbside amenities according to corridor type and community input. This approach will ensure strategic trade-offs and investments align with corridor function and community goals.

The three modal priority levels described by Connecting Aurora (from highest to lowest) are Prioritize, Emphasize and Accommodate.

These priority levels help clarify the role of each mode in the design and operation of individual streets and networks of streets and allow for multiple modes to share priority levels to meet goals and development outcomes. This approach supports balanced, context-sensitive street design that reflects community goals and transportation needs.

People Walking

Aurora's suburban, car-centric land use patterns and infrastructure priorities have resulted in a city that are difficult or uncomfortable navigate on foot.

People who walk in Aurora rely on the existing network of sidewalks, crossings and trails; however, walking to everyday destinations in Aurora can be difficult and dangerous. Often, sidewalks are narrow or without buffers from traffic. This is especially problematic for sidewalks on high-speed, high-traffic arterials, like Peoria Street and Chambers Road. Limited or a lack of separation between people walking and people driving creates a pedestrian environment that feels unsafe and uncomfortable.

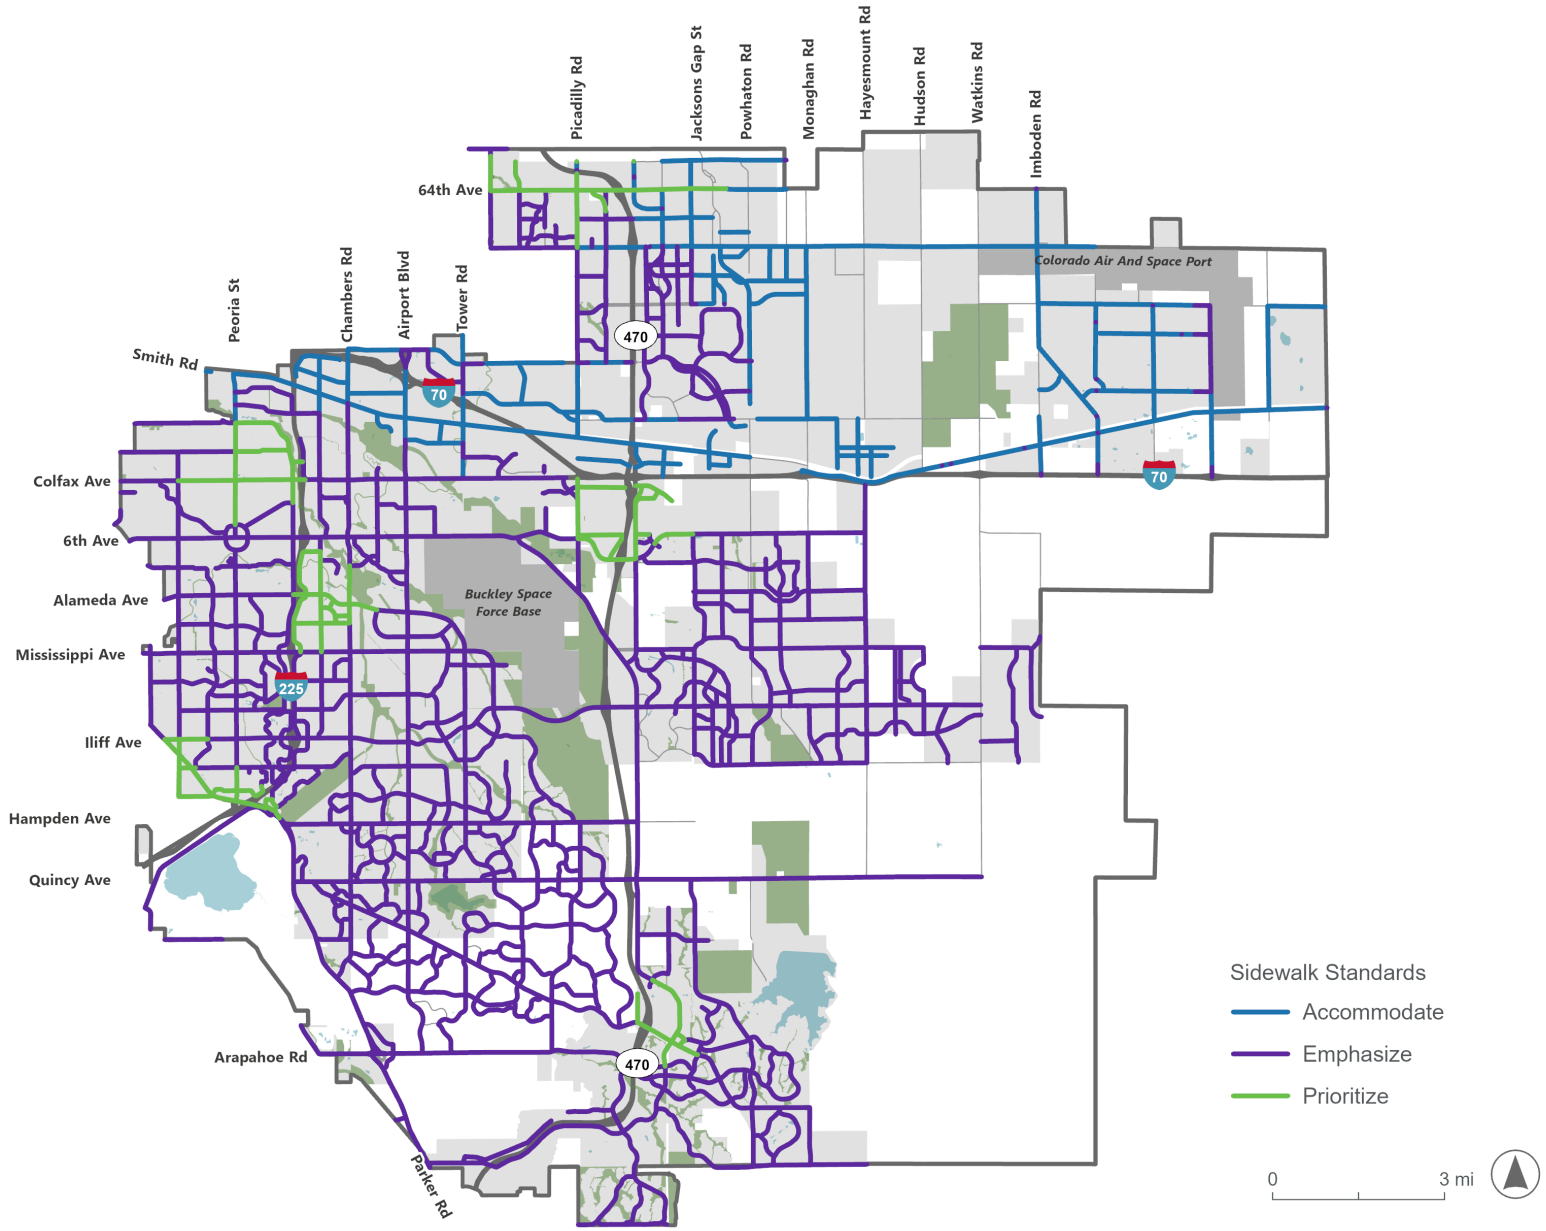
Furthermore, many of Aurora's streets, especially wide arterials, have long distances between traffic signals or marked crossings. These large gaps force people walking to go far out of their way to safely cross the road at marked locations or to make unsafe crossings at unmarked locations.

The visionary walking network will create a safe, comfortable and connected environment for people walking in Aurora. The goals of this network are to expand the city's "low stress" pedestrian network, provide more safe crossing opportunities, and improve destination access for people walking.

The visionary network will have a connected system of spacious sidewalks and safe crossings that advance the Connecting Aurora goals. It will include improvements to busier roads (collectors and arterials) and local streets with missing or narrow sidewalks that do not meet ADA standards. Options for improving conditions on local streets are presented in the policies and programs described later in this chapter.

To guide the vision for Aurora's pedestrian network, the Connecting Aurora Multimodal Streets Design Guidelines differentiate among three walking priorities: Accommodate, Emphasize, and Prioritize. These categories determine what kind of walking experience is expected based on street type and surrounding land uses.

VISIONARY WALKING NETWORK (CLASSIFICATIONS)



People Biking

Aurora maintains a robust recreational trail network that is enjoyed by residents and visitors alike, but the current on-street biking network is fragmented, which discourages biking for commuting and everyday trips.

The visionary biking network will be a safe and low-stress connected network for Aurorans to use every day. To fully realize the recognized benefits of biking and to achieve Connecting Aurora's vision, the city, developers, special districts, and others must work together to design, build, maintain, and operate a bikeway network that is safe and connected. This bikeway network should attract bicyclists who are "interested, but concerned" in regard to riding on Aurora's streets. This group makes up the vast majority of potential bicyclists; they are interested in biking but concerned about real and perceived safety risks.

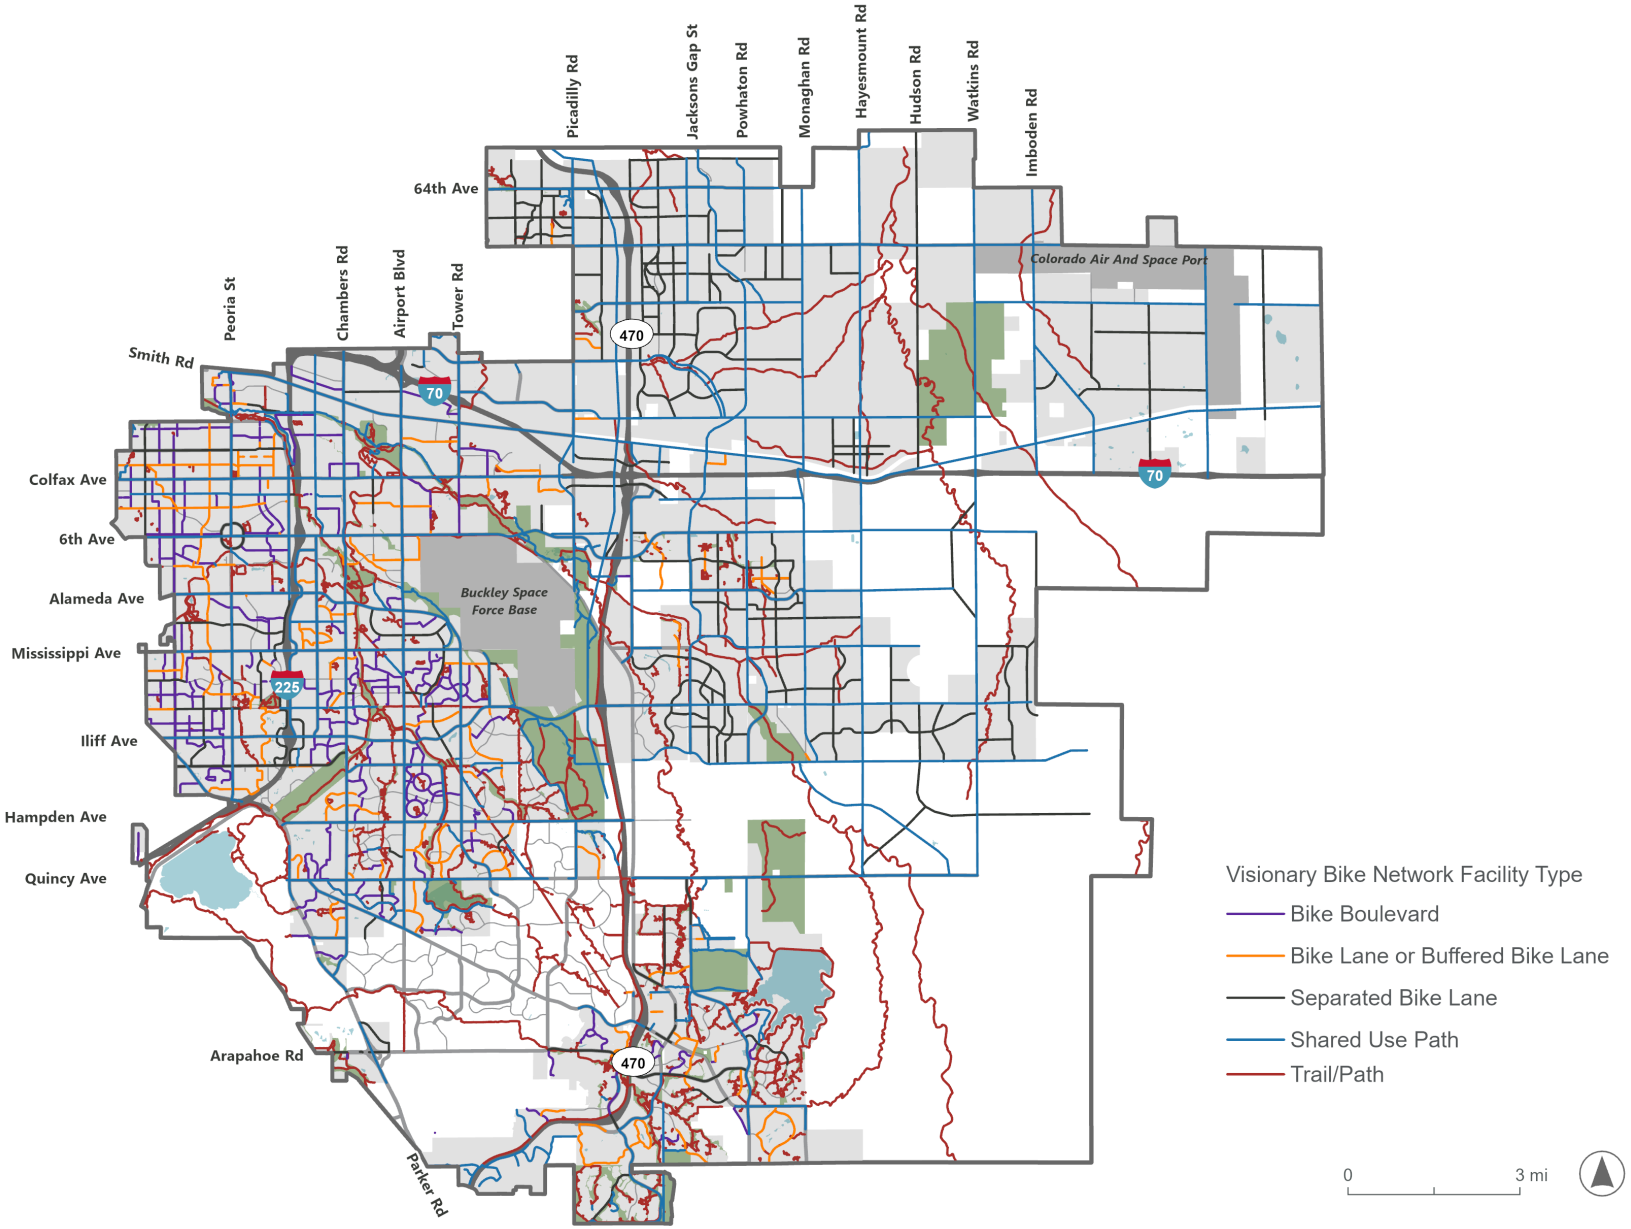
A core visionary network goal is to create a low-stress network that encourages more people to ride bikes. Not all bikeways feel equally safe and comfortable. Missing on-street bikeways and insufficient separation between bicyclists and cars create stressful biking conditions.

Improved access to destinations is a second core goal. Biking is most useful when it connects people to where they need to go on a regular basis (schools, parks, grocery stores, and transit). Evaluating ease and directness of access to destinations helps indicate how well the network supports short trips.

The city should also be responsive to trends in biking, such as e-bikes and micromobility programs. Because micromobility programs depend on private operators, citywide efforts and initiatives must balance meeting the city's needs with requirements, while making them attractive for micromobility companies to operate. This balance requires that enough residents, visitors, and workforce members consider shared micromobility a viable option and that they select that option.

The visionary biking network is comprised of three classifications: primary routes, secondary routes, and local routes. The network is critical to connecting to and through neighborhoods, as well as regional corridors and destinations.

VISIONARY BIKING NETWORK (FACILITY TYPES)



People Riding Transit

Transit is a critical function of Aurora's transportation system, connecting residents and employees within the city and across the metropolitan area.

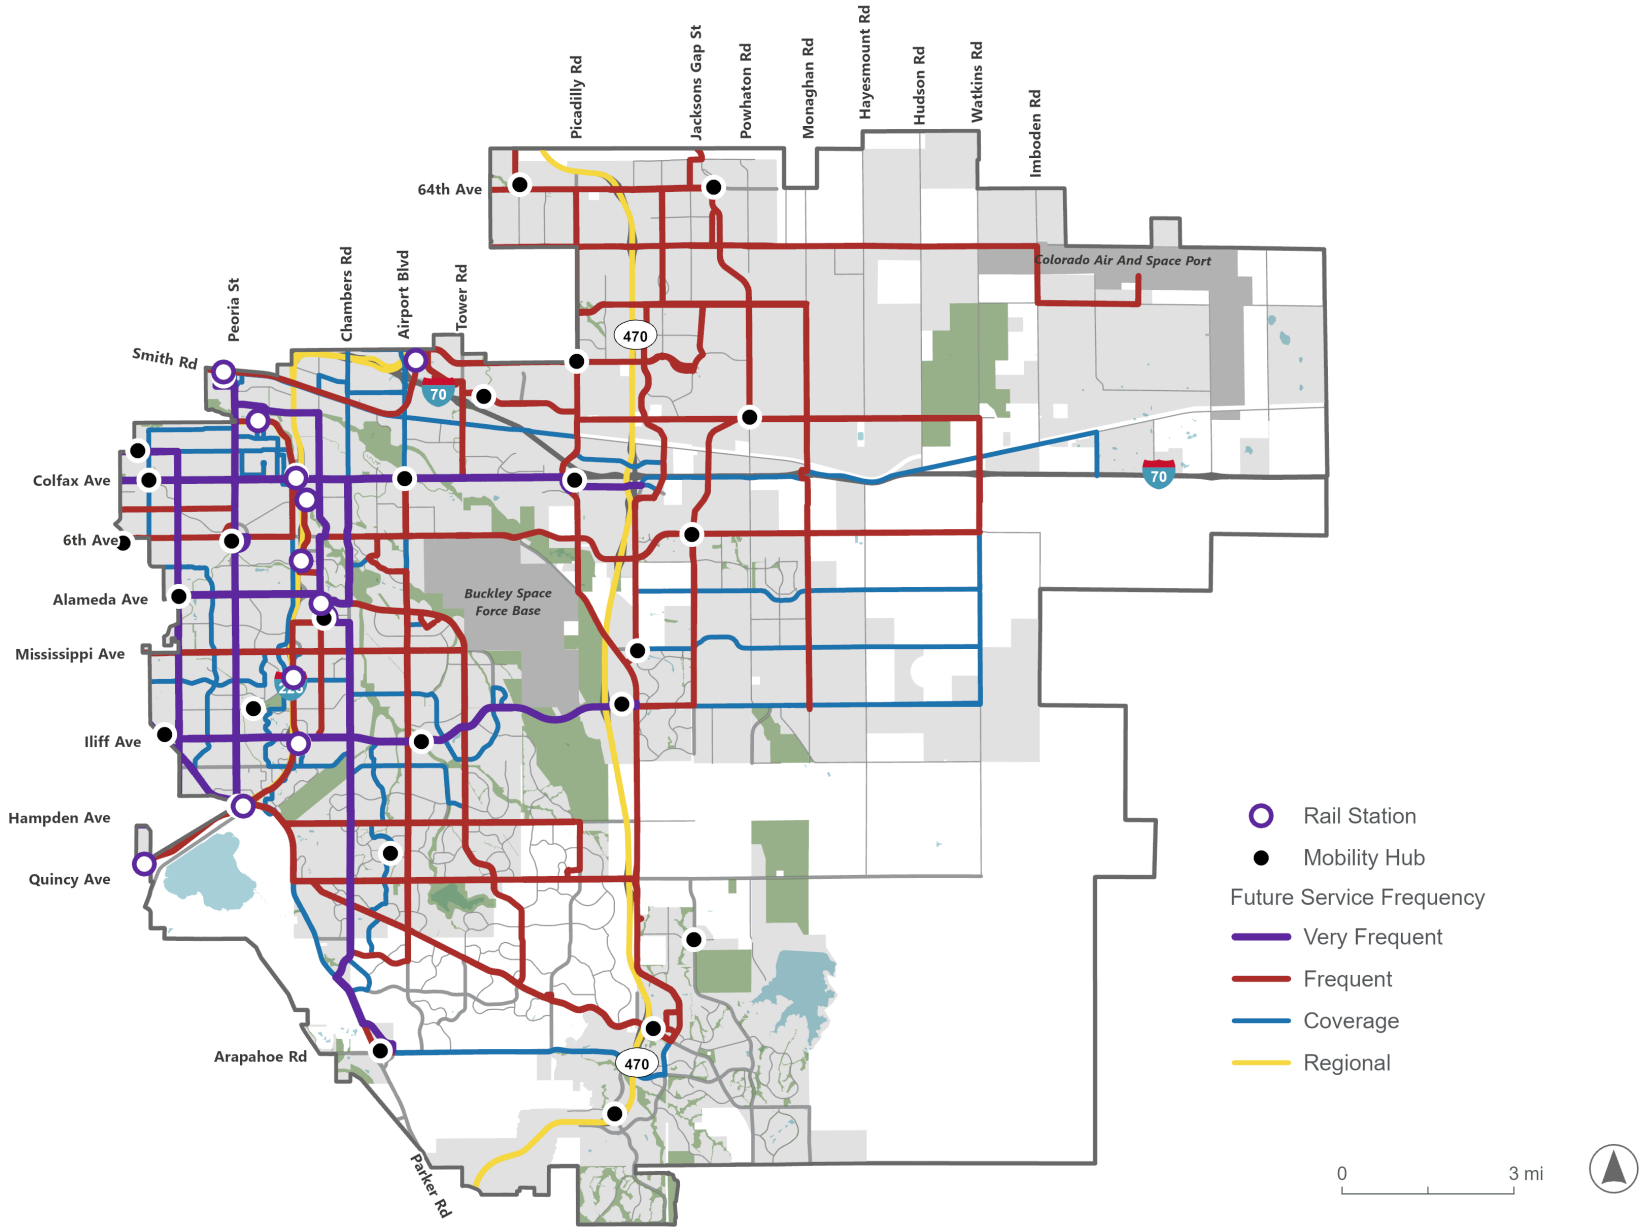
RTD has delivered public transit in Aurora since 1972. Around 13% of RTD's more than 3 million annual customers in the Denver metro area live in Aurora. 30 RTD bus and rail routes serve Aurora, including 24 local bus routes, three light-rail or commuter rail lines, and several other routes. Transit service is generally concentrated in established parts of west and central Aurora. The developing areas of the city to the east and northeast are underserved or unserved. As residents and jobs fill out these areas, service must be extended to serve these new riders and destinations.

Most Aurora transit routes run every 30 to 60 minutes, with limited evening and weekend service hours. Only 9% of Aurora residents live within walking distance of transit that comes every 15 minutes or less. Of the 27 bus routes, only four operate at 15-minute or less headways. Consequently, the system is difficult to use for commuting purposes, such as school, healthcare or shift work, particularly in populations with higher transit dependence, such as school-age children, households with lower incomes, one- or zero-vehicle households, individuals with disabilities and seniors. For example, Northwest and Central Aurora are home to transit-reliant populations but there are no frequent, all-day connections to job centers across the metropolitan area.

The visionary network for public transit includes widespread, convenient transit service for nearly everyone in the city. Infrastructure alone will not transform mobility in Aurora – frequent, accessible transit services matters. How often buses run, how long they operate each day and how well they connect people to jobs and daily needs all constitute transit's usefulness and convenience.

The network is defined by service frequency: frequent transit network routes (typically 10 to 15 minute service intervals) and the coverage network (typically 30 minute intervals and circulators or crosstown routes). It also includes infrastructure in the form of rail stations, mobility hubs, park-and-ride, and other enhanced transit facilities and services.

VISIONARY TRANSIT NETWORK



1700

People Driving

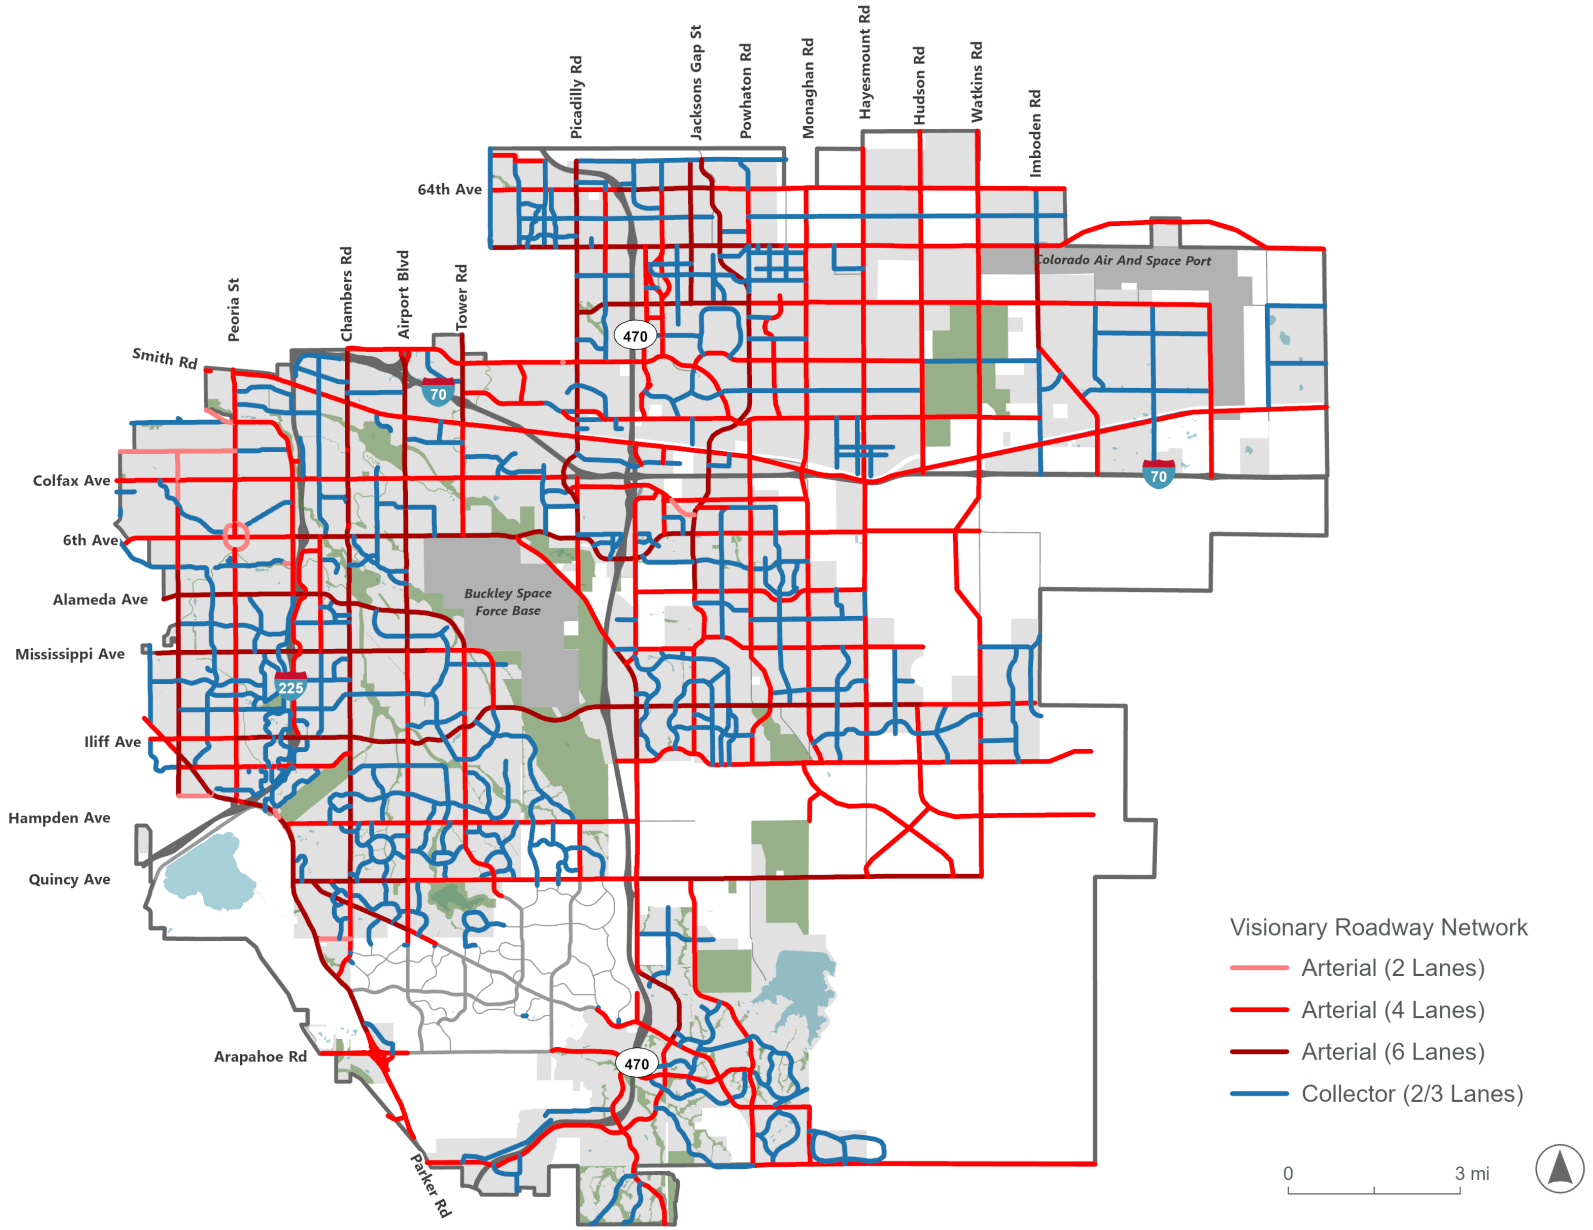
Aurora's development has long prioritized travel by car, with a traditional suburban street layout dominated by large, high-volume, arterials spaced every mile.

Many areas of the city are low-density, single-family neighborhoods and car-oriented shopping centers set back from the street fronted with large parking lots. Sidewalks and bikeways along these large, heavy-traffic arterials, are often uncomfortable and limited. Demand on Aurora's streets is steadily increasing as the city's population grows and development expands. Aurora's population is expected to rise by approximately 160,000 residents between 2025 and 2050, bringing the total population well over 500,000.

A significant share of the growth will occur on the city's eastern edge, where large undeveloped areas are slated for new housing and employment centers. At the same time, infill redevelopment in established neighborhoods and mixed-use centers will add more residents and jobs within the existing urbanized area. These trends will generate more daily trips only for commuting as well as shopping, school, recreation and freight movement.

As Aurora solidifies itself as a "place-oriented city," the city should more fully support multiple ways of moving around on our streets. Maintaining acceptable travel times for drivers is important; however, speed and efficiency must be balanced with design features that make streets safer and integrate multimodal options. Recognizing that all streets have different modal priorities depending on the context, streets must be designed for flexibility and modal balance. They must continue to accommodate private cars while ensuring safe and welcoming facilities for pedestrians, bicyclists and transit riders.

VISIONARY ROADWAY NETWORK



Moving Goods

As an established regional freight hub, the visionary network will support safe and efficient movement of goods through the city on a hierarchy of designated truck routes.

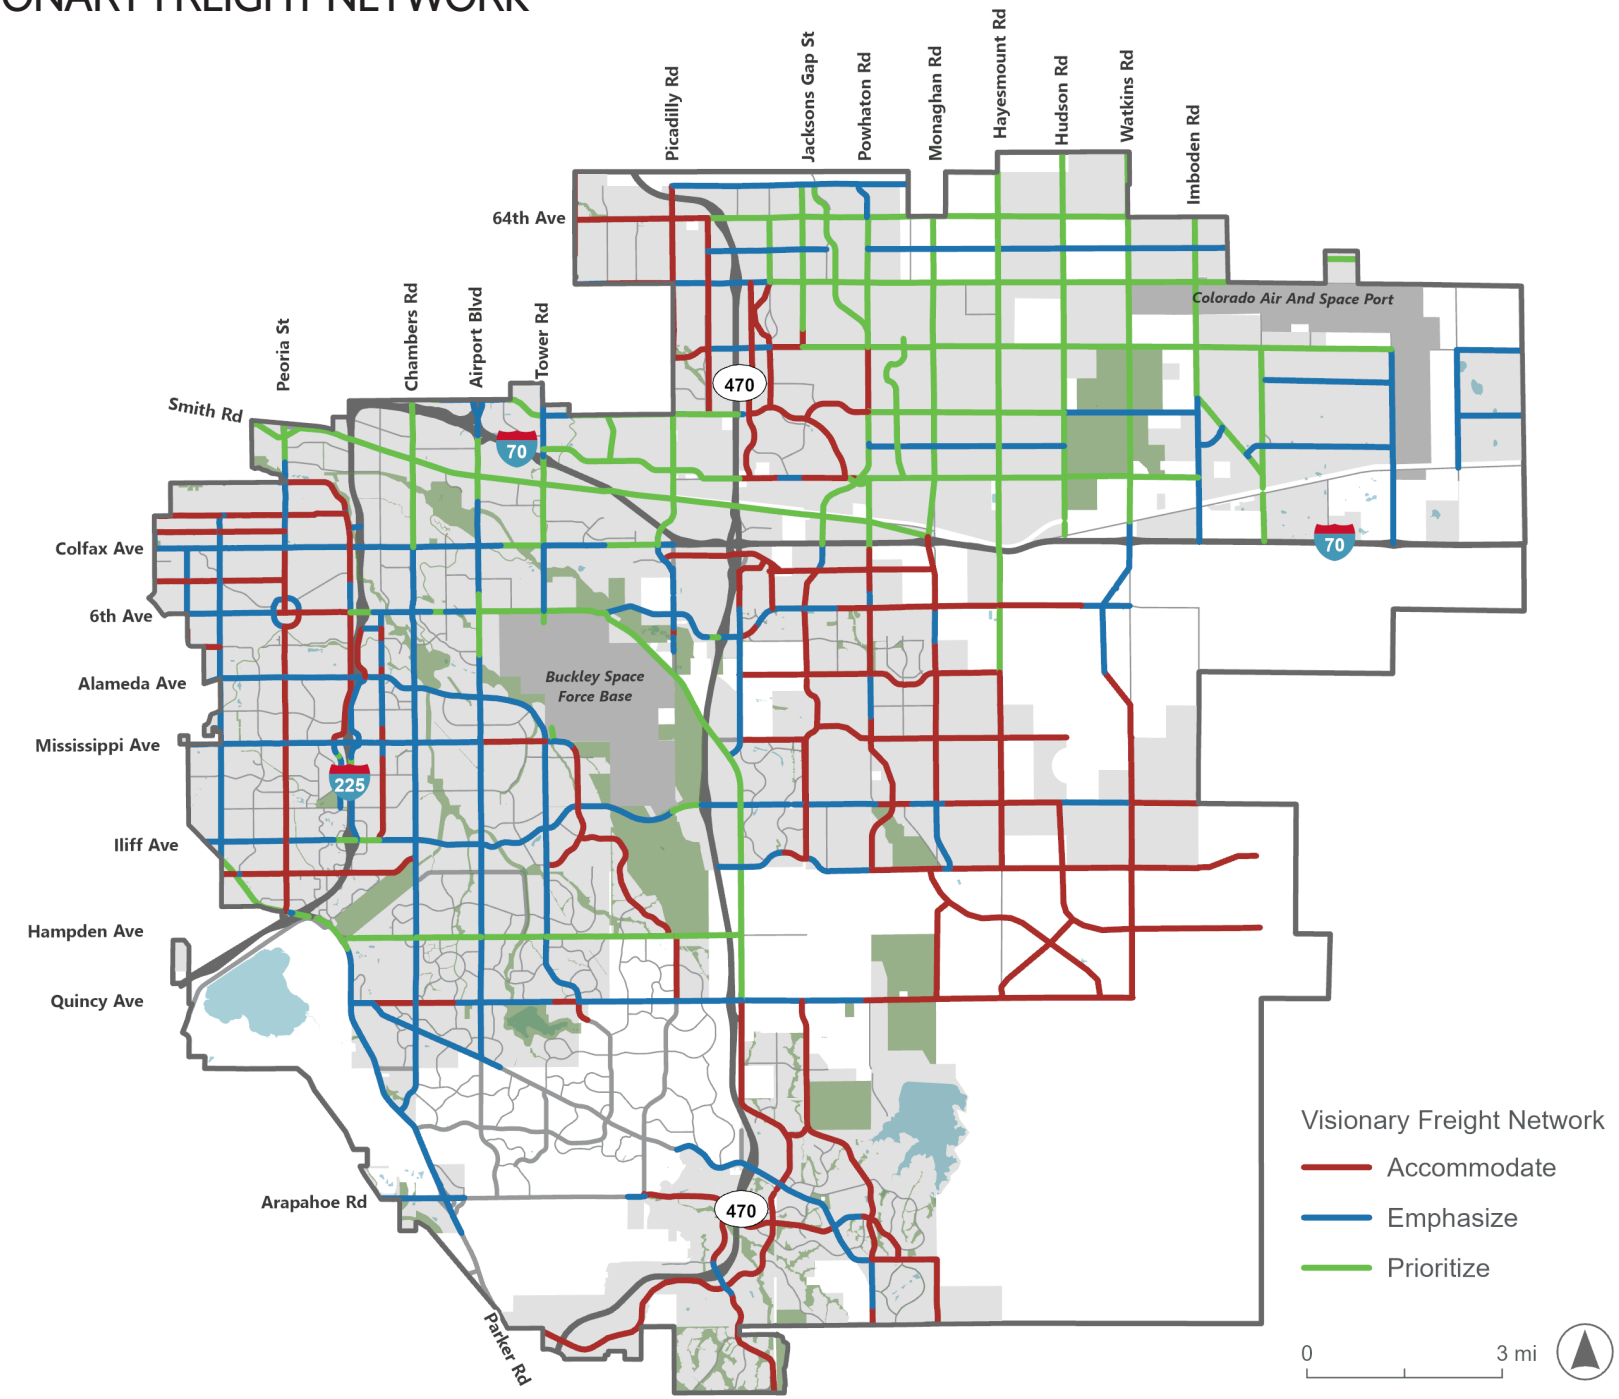
Aurora is an established regional freight hub that includes highway and rail infrastructure. Northeast Aurora, particularly north of I-70, is the primary hub for freight activity. DRCOG's 2019 Regional Multimodal Freight Plan identified this area as a regional freight focus area because of its concentration of industrial land uses, availability of large undeveloped parcels and its future role in the Aerotropolis development vision.

The visionary freight network will support safe and efficient movement of goods through the city on a hierarchy of designated truck routes. Freight routes are assigned by modal priority to accommodate, emphasize or prioritize freight access based on land use and development context.

These designations will help the city identify what improvements are needed to accommodate trucks and that they are appropriate for the surrounding context and use of the street. The visionary network will align truck route designations with infrastructure investments, land use planning and operational policies.

It will offer clarity on trasportation routes for private freight operators, developers and community stakeholders so that the benefits of freight movement are shared equitably while minimizing conflicts and environmental impacts.

VISIONARY FREIGHT NETWORK



AIRPORT INFLUENCE DISTRICTS

Growth and development in Aurora is significantly shaped by the location and operation of four airports.

These include Denver International Airport, Buckley Space Force Base and the two general aviation facilities, the Colorado Air and Space Port (formerly Front Range Airport) and Centennial Airport. Each airport has an Airport Influence District that reflects operations specific to that airport and which may prohibit or limit certain types of development. Planning and zoning tools are implemented to assure that development proposed around airports is compatible with airport operations and reduces environmental impacts.

The city has taken a proactive approach to reduce impacts from aircraft noise by implementing zoning restrictions that are more protective than federal standards. Although federal standards specify that residential uses are compatible with the 60 day-night average sound level (DNL) for Federal Aviation Administration (FAA) airports and the 65 DNL noise contour for Department of Defense airports, Aurora requires that compatible residential uses only be constructed with noise mitigation in the 55 DNL contour. In addition, the city continues to work closely with Buckley Space Force Base to ensure proposed land uses are compatible with the Accident Potential Zone.

The zoning ordinance defines various areas subject to development restrictions because of their proximity to airport noise corridors. The following map illustrates airport noise contours for the airports located in and around Aurora, as well as the Accident Potential Zones near Buckley Space Force Base.

Water, Wastewater and Stormwater Systems

WATER SUPPLY

Water supply is paramount to the continued prosperity and future growth of Aurora.

Safe, convenient and affordable water and wastewater services are a core public utility for homeowners, businesses, visitors and others in the community. The city's capacity for continued growth and development is tied to its ability to continue to provide high-quality water service, through a strategy of acquisition, reuse and conservation, as well as wastewater and stormwater management services.

Aurora Water provides full-service water, wastewater and stormwater utility services to the community. The water utility department relies largely on renewable surface water sources to meet needs and continues to identify and acquire new water resources to meet growing demand. The scale of cost and complexity of managing such a system requires planning, budgeting and thoughtful coordination with regional partners. As the city continues to evolve through easterly growth and new urban infill development and redevelopment, Aurora Water is challenged to continue to meet rising demands, retain regionally competitive utility rates and remain a leader in the development of water policy in Colorado.

AURORA'S WATER AND WASTEWATER SYSTEMS

Aurora's water is supplied largely by snowmelt and transported through an extensive system to the city and storage facilities. The city's raw water is collected and stored in 12 reservoirs, including the Aurora Reservoir, Quincy Reservoir and others outside of Aurora, which when filled to capacity can store more than 156,000-acre feet of water.

Aurora Water operates a distribution system that includes over 1,600 miles of pipe and 12 potable water pump stations. Three drinking water treatment facilities have a capacity of 210 million gallons per day. The Sand Creek Water Reuse Facility has received national awards and can process five million gallons per day while the new and innovative Prairie Waters facility has extended Aurora's water supply. There are 1,050 miles of wastewater pipeline in Aurora. The city's stormwater system includes 384 miles of pipe, 76.4 miles of open channel, 98 city-owned ponds and three stormwater pump stations.

INFRASTRUCTURE AND SERVICE PLANNING

Aurora Water has adopted a strong water conservation ethic for local water use.

Water and Wastewater Master Plans

To prepare for future growth, Aurora maintains an Integrated Water Master Plan (IWMP) which projects the future city water demands and identifies near-term and long-term water supply, treatment and transmission pipeline capital projects. The IWMP planning horizon is 2070, and the plan is updated every five years.

Like water planning, Aurora maintains a citywide Wastewater Master Plan to project future wastewater loading, identify undersized pipes and locate and define pipeline diameters for future growth. Because wastewater conveyance is predominantly a gravity-based system, it is important to plan on a drainage basin level and coordinate across multiple developments.

Stormwater Master Plan

The city also maintains a comprehensive Stormwater Master Plan that combines the results of over 20 master drainage plans and outfall system plans. These plans are typically completed with assistance from the Urban Drainage and Flood Control District (UDFCD). They identify projects that alleviate or reduce flooding risk and enhance water quality throughout the city.

The city's preferred approach is to maintain open drainage systems serving multiple public purposes, including flood protection, stormwater management, recreation, open space, habitat, parks and trails. However, where the development placetype or challenging physical conditions warrant a more mixed approach, other techniques and technologies may be used. Aurora Water maintains a digital stormwater master plan that combines all the projects identified in various basin master plans and prioritizes them based on criteria for incorporation into the 20-year capital improvement program.

Urban Drainage and Flood Control District

The city coordinates with the UDFCD to plan for future growth in the stormwater system. The district manages basin-wide master plans (which often cross multiple jurisdictions), maintains criteria manuals for design and water quality, manages some stormwater construction and design projects and works directly with state and federal agencies on behalf of its members. The city, in conjunction with UDFCD, has studied the Aurora stormwater basins to identify future floodplains and related detention and water quality needs.

Colorado Water Plan

In 2015, the state completed the Colorado Water Plan, a statewide strategy that sets forth measurable goals, objectives and actions to address projected water needs. The plan's objectives include reducing the municipal and industrial water supply-demand gap, initiating conservation measures to supplement supply, supporting local efforts to incorporate water-saving actions into land use planning, adding storage capacity, protecting watersheds, and securing financial resources to support these actions. Collaboration between the state and local jurisdictions is critical to achieving these goals.

The Role of Water Conservation

As the costs and complexity of acquiring new water sources continues to grow, stretching existing supply becomes more essential to meeting Aurora's growing demand. Conservation efforts can mitigate the public costs of water and infrastructure, as well as provide homeowners and businesses savings on their water bills.

Aurora Water has adopted a strong water conservation ethic for local water use, which they have supported through a range of planning, programs, and innovative projects. Programs include conservation education and outreach, water-wise demonstration gardens, water budgets and conservation pricing, financial rebates and incentives and collaboration and coordination with peer agencies. The Long Range Conservation Plan provides guidance for future water conservation programs so that as water supply planning progresses, decision-makers can determine the best programs for the community.

Parks, Trails, Recreation and Open Space System

Parks and recreation facilities can serve as centers of neighborhood activity.

There are few physical features more essential to quality of life and the appearance of a community than parks, trails, open spaces and the recreation system. Parks and recreation facilities can serve as centers of neighborhood activity and as places for sports, exercise, community events and gathering places. Protected open spaces support healthy living by connecting residents and visitors to Aurora's natural amenities, while a robust and interconnected network of trails and bicycle ways serve commuters and recreational users alike.

The city of Aurora maintains 97 developed parks and over 5,000 acres of open space. The system includes a broad range of facilities including parks, recreation centers, golf courses, dog parks, park shelters, playgrounds, sports fields, nature centers, swimming pools and a variety of outdoor activities at Quincy and Aurora reservoirs. The city provides over 90 miles of local and regional trails across Aurora, many of which connect to the larger regional network and provide access connecting neighborhoods, mixed-use districts and other destinations. The city also supports those with mobility disabilities by enabling use of assistive technologies and services in its parks, trails and open space system.

Arts and Cultural Resources System

A sense of community is defined by the connections among people and shaped by shared culture, experiences and history.

The city's urban history began in Original Aurora, in the city's far northwest, with a small town that has since grown to become the state's third largest city. Aurora's recent history is in many ways defined by a growing diversity of people, cultures and experiences. The city's art, historic places and cultural resources are one way this rich history is expressed and experienced. Arts and cultural facilities are important elements of the fabric of a vibrant city and can anchor community activity and support economic activity and development.

Libraries and Museums

The Aurora Public Library system offers an opportunity to serve as a center of neighborhood or community life, a place for all ages to gather and interact. The city operates six library locations, including the large main library and satellite libraries, and offers computer lab and pick-up/drop-off services at other facilities around the city. The Aurora History Museum collects and exhibits artifacts and documents pertaining to the history of Aurora and Colorado. It provides in-house research and educational programs and oversees the city's historic preservation program. The libraries and museum also collaborate with other agencies and organizations, including local school districts, to provide access to a growing number of educational resources and develop exhibits of interest to the community.

Historic Resources and Preservation

The city recognizes that preservation of its historic and cultural resources is important to the community at large, and that the city should play an active role in the protection and preservation of Aurora's heritage through education, advocacy, training and partnerships. The Historic Preservation Ordinance, first adopted in 1985, creates a process for establishing historic landmarks, both historical and archeological.

Historic preservation is achieved through a partnership among the City Council, the Historic Preservation Commission, various city departments, the Aurora History Museum, the Aurora Historical Society, private property owners and others in the community. These partnerships provide shared cultural and economic benefits to the Aurora community.

Many of the city's designated historic resources can be found in Original Aurora and contribute to that neighborhood's unique character and local interest. The city values protection of these resources, even as revitalization or redevelopment occurs in the area. However, historic sites and landmarks are located throughout the city. These include DeLaney Farm and Round Barn adjacent to the Aurora Municipal Center, the Smoky Hill Trail landmark and Melvin School in south Aurora, and Centennial House and Lowry Building 880 in northwest Aurora.

Arts in Aurora

The Arts District draws talented artists and visitors to the area and contributes to the overall vitality of Original Aurora.

The Aurora Cultural Arts District is located in Original Aurora along Colfax Avenue and is home to visual and performing arts facilities and festivals. The city has invested in programming, facilities and attracting visitors to the area. The district's goals are to support arts and creative businesses, create a vibrant arts destination, and embrace the urban context of Original Aurora. The Aurora Fox Theater and recently renovated People's Building are among the city-owned arts venues in the area. Theater, dance, visual arts and other creative endeavors can be found in the district.

The Arts District draws talented artists and visitors to the area, which in itself is a source of community pride and an economic asset; however, the district also contributes to the overall vitality of the greater Colfax Avenue corridor and Original Aurora neighborhood. Fletcher Plaza offers a public venue for community events, interaction and recreation, and potential for even more. The adjacent Martin Luther King Jr. Library and Municipal Services Center is an important community asset for learning and services for diverse nearby neighborhoods. Public and private development of new housing in the area has grown the area, while growing choices of new restaurants, shopping and entertainment options complement the arts scene.

However, the arts in Aurora extend well beyond the Arts District. The city's Art in Public Places program has selected, funded and installed art throughout the city in parks, commercial centers and public facilities. The Art in Public Places Commission governs the program and a robust public participation process supports it. The city's zoning code requires dedication of construction project fees for projects in Metro Districts. The city's transit stations feature a variety of amazing works by diverse artists.

SUMMARY

Different types of networks connect people and places across the city of Aurora. From transportation to arts and entertainment to strategic economic opportunities to water, every person is connected to one another and every neighborhood both directly and indirectly. To achieve sustainable growth and continued success the city must support these systems through targeted planning efforts and supplemental support of private and nonprofit stakeholders. Ensuring that all three sectors work together is the key to connecting places in Aurora.

GOALS, POLICIES AND PRACTICES

Goals, Policies and Practices incorporate the main ideas and recurring themes discussed throughout the planning process. They are centered on the seven Core Principles identified through the community engagement activities. Each principle sets forth a standard for Aurora within its specific topic area. The goals are statements of the community's aspirations and the recommended practices are the means to realize those goals. The practices should be used by city staff, the business community and the public on a daily basis to guide the implementation of Aurora Places.

A Strong Economy

Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

A Diverse and Equitable City

Principle: Diversity and equity are assets to be nurtured and promoted by the city.

Housing for All

Principle: High-quality housing options enable people across all socioeconomic levels, cultural identities and stages of life to establish and manage households.

A Healthy Community

Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans and contributes to a stable community.

A Thriving Environment

Principle: A thriving natural environment – including stewardship of water, energy and natural resources – is essential to the physical and mental wellbeing of residents and the city's ability to support future growth.

An Authentic Aurora

Principle: The creation of great places, the preservation of traditionally unique places and effective marketing and promotion are essential to improving Aurora's image.

Easy Mobility and Active Transportation

Principle: An easy-to-use transportation network with multiple travel choices supports a strong economy, healthy community and flourishing environment.

A **STRONG** ECONOMY

Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

GOALS:

1. Support a growing availability of job opportunities for people with a variety of skill levels and experience.
2. Achieve greater balance between the number of residents and jobs in Aurora.
3. Continue to support the growth of primary employment to bolster the local economy.
4. Create new and unique retail areas that match changing trends.
5. Create partnerships with major institutions and businesses to encourage economic growth.
6. Support locally grown businesses along with business startups and expansions.
7. Continue to provide high-quality and reliable city and utility services throughout the city.

RECOMMENDED PRACTICES:

Placetypes

- Create highly active urban districts as locations for knowledge-based businesses, desired retail, unique entertainment and local entrepreneurs and for people who desire convenient urban areas to live and work. Create these areas as intensely developed, mixed-use places to attract talented workers and higher-paying jobs.
- Work with the development community to encourage construction of high-quality office space in urban districts, innovation districts and other placetypes.
- Partner with institutions, such as the Fitzsimons Redevelopment Authority and the Community College of Aurora to create innovation districts where new ideas and enterprises can flourish, leading to economic innovation and growth.
- Identify and reserve ideal locations for significant and strategic commercial and employment uses in Urban District, Innovation District, City Corridor, Commercial Hub and Industry Hub placetypes.
- Continue to use zoning designations to locate industry hubs, particularly along the I-70 corridor and in the Aerotropolis area, in large land areas well-suited for industrial and distribution operations.
- Continue to support Buckley Space Force Base's success as a major employer in Aurora.
- Develop and redevelop city corridors and commercial hubs as places for retail, services, offices and entertainment.
- Create transit-oriented development (TOD) to provide better access to employment centers, particularly for residents that do not have easy access to a personal vehicle.
- Support quality urban design through capital improvement projects and special districts to create stronger and more attractive business environments.
- Strengthen city zoning and development standards to improve the quality of commercial and office development for redeveloping and reinvesting in targeted locations while also providing appropriate flexibility.

Connecting Places

- Provide complete car, transit, pedestrian and bicycle connections between and within urban districts, as well as to residential neighborhoods, including short, interconnected urban blocks, to promote better access to businesses and employment to benefit employers, employees, and customers.

Partnerships

- Work with community partners to promote Aurora as a creative, efficient and productive international business hub.
- Coordinate efforts among potential public, private and nonprofit partners based on shared priorities and strategies.
- Share data and information within the city's partnership network to help inform decisions based on a shared understanding of the current and projected economy.
- Support the use of business improvement districts (BIDs) and similar development tools to engage the community.

Economic Growth and Sustainability

- Adaptively reuse underutilized properties and strive to retain low-cost commercial properties to provide affordable space for local businesses and maintain community character.
- Continue to nurture a culture of customer service to represent Aurora as one of the best cities in which to conduct business.
- Support Aurora's multicultural and global influences to strengthen and expand the city's economy.
- Serve as a resource for up-to-date and relevant demographic, real estate and economic data to support public- and private-sector decision-makers.
- Evaluate comprehensive economic indicators to identify economic strengths and challenges and measure the city's progress toward economic development goals.
- Support political, legal and legislative efforts to provide and protect important revitalization tools and funding sources.
- Integrate land use and water planning and policies in order to meet the needs of future growth and development.

Business Attraction, Retention and Expansion

- Attract businesses that connect Aurora to the global marketplace with an emphasis on science, technology, research and healthcare.
- Encourage and support growth and expansion of existing businesses, including major employers and institutions, smaller businesses and other employers.
- Take advantage of Aurora's proximity to Denver International Airport for new economic opportunities. Focus on job creation and industrial development opportunities in those areas.
- Work with existing and potential businesses to support a vibrant local economy with increasing numbers and a diversity of high-quality, high-paying jobs at all skill levels, particularly at employment centers.

Small Business and Entrepreneurship

- Encourage targeted, systematic financing approaches for startup enterprises.
- Continue to provide assistance and incentives for the creation of local and small businesses and support of existing ones.
- Promote affordable and appropriate work and meeting spaces to encourage startup enterprises.
- Promote and support the success of immigrant- and refugee-owned businesses. Actively connect these diverse communities with small business and entrepreneurship resources.
- Support the creation of local job opportunities within businesses owned or led by people of historically marginalized or disadvantaged groups.

Workforce Development

- Collaborate with the private sector on job creation and training, including training and jobs for Aurora residents who are underemployed, with an emphasis on technology and job readiness in industries with high-growth potential.
- Connect immigrant and diverse ethnic communities to education, training resources and accepted credentials to integrate their skills and ambitions into the local workforce.
- Identify opportunities for seniors or recently retired individuals to contribute to the local business environment, including as mentors, leaders, volunteers or other roles that capitalize on their skills and experience.

Development and Redevelopment

- Continue to use urban renewal for infill and redevelopment in targeted areas. Explore additional funding mechanisms for development and supporting infrastructure improvements.
- Proactively attract developers who will provide innovative, urban, infill development at key sites.
- Effectively use a capital improvement program (CIP) to strategically provide appropriate infrastructure to major employment centers and redevelopment areas.
- Create comprehensive redevelopment plans that consider and mitigate impacts on housing supply.

A **DIVERSE** AND **EQUITABLE** CITY

Principle: Diversity and equity are assets to be nurtured and promoted by the city.

GOALS:

1. City services should be available and accessible to all residents.
2. Create safe and welcoming public spaces throughout the city that are designed to increase communication and understanding and reduce conflict among cultures.
3. Embrace and promote multiculturalism in education, communication, celebration, and commerce.
4. Further strengthen Aurora's reputation as an international city that recognizes the value and contributions of immigrants and refugees and supports opportunities for these communities to thrive.

RECOMMENDED PRACTICES:

Placetypes

- Locate libraries, recreation centers and other public facilities in urban districts to act as anchors and to ensure that such facilities are well connected to neighborhoods for all residents to use.
- Provide public spaces in urban districts and other placetypes for celebration and to bring people of different backgrounds and cultures together. Design and program these spaces to increase interaction between people and encourage the creation of new ideas by them.

Connecting Places

- Serve neighborhoods with public transit, bicycle and pedestrian routes.
- Develop transportation programs for those who are disabled, aging or who do not have easy access to cars.

Government Services

- Monitor changing socioeconomic trends to understand population and economic changes of the city to adjust programs to effectively adapt to those trends.
- Use equity measures to evaluate city programs' availability and effectiveness in serving residents in diverse communities across the city.
- Engage residents, neighborhood organizations, and diverse communities in planning and development efforts and decision-making.
- Promote educational opportunities designed to address cross-cultural communication, discrimination, language learning, history, citizenship and job training to promote cultural understanding.
- Evaluate the extent to which new development, redevelopment and capital projects result in the displacement of current residents and develop and refine a set of proactive strategies to mitigate such impacts.
- Communicate planning, development and city services matters in multiple languages and manners to promote accessibility by all Aurorans.
- Strengthen trust between the city and diverse communities by promoting inclusion and the celebration of cultural differences.
- The city will continue to expand its efforts focused on immigrant and refugee integration into the Aurora community.

Aging Population

- Provide recreation services and facilities for active adults throughout the city.
- Work with community partners, including the Anschutz Medical Campus, to provide services for seniors.
- Encourage "Meals on Wheels" type programs, county programs and other types of programs for seniors.
- Improve the communication and timeliness of information to seniors regarding programs and services.
- Work with educational institutions to provide opportunities for continuous learning among seniors.
- Provide or encourage volunteer and service opportunities for seniors.
- Encourage service providers that aid senior immigrants and refugees to operate in Aurora.

HOUSING FOR ALL

Principle: High-quality housing options enable people across all socioeconomic levels, cultural practices and stages of life to establish and manage households.

GOALS:

1. Increase high-quality housing options of all types and at all price levels throughout the city through ongoing collaboration with the development community.
2. Work with partners to better understand specific needs for affordable housing and to develop new, creative housing options.
3. Locate affordable and senior housing throughout the city and at locations with a variety of transportation options.
4. Address barriers to the development of diverse housing variety and neighborhood choices across the city.
5. Decrease barriers to homeownership.

RECOMMENDED PRACTICES:

Placetypes

- Provide appropriate locations for multiple housing types in urban districts, including both affordable and luxury options, because the concentration of services, retail, entertainment and employment and the multiple transportation choices are desired by households of all incomes.
- Integrate housing of varying types and prices into placetypes throughout the city to create lively and diverse neighborhoods.
- Create vibrant and highly desirable neighborhoods through superior housing design and neighborhood layout, with varied design along streets and quality landscaping and architecture throughout.
- Focus primarily residential placetypes around neighborhood gathering places, such as parks, trails, neighborhood-serving commercial centers or other spaces.
- Apply planning processes in individual neighborhoods to invite resident involvement and address neighborhood needs.
- Encourage and support renovation or rehabilitation of existing housing stock to meet minimum standards and appeal to changing household needs and preferences.

Diverse Housing

- Enforce fair housing policies and practices and code compliance.
- Work with partners to identify demand and development opportunities for affordable housing throughout Aurora.
- Provide homeless and low-income housing programs to address housing security.
- Preserve and improve existing housing to retain community character and meet housing demand.
- Proactively attract developers to provide innovative neighborhood designs that feature diverse housing options.
- Allow accessory dwellings to accommodate extended family arrangements or generate income to accommodate rising housing prices.
- Consider all household costs, including acquisition or move-in costs and ongoing costs, such as utilities and home maintenance, when evaluating affordable housing needs.
- Continue to assess zoning and development regulations and processes to reduce ineffective regulations or unnecessary barriers to quality development.
- Create comprehensive redevelopment plans that consider and mitigate impact on housing supply.

Connecting Places

- Ensure that neighborhoods are effectively connected to safe, attractive pedestrian, bicycle and public transit routes, especially those with affordable and senior housing.

Aging Population

- Work with the Aurora Housing Authority, the private sector and others to ensure that sufficient, affordable housing is available for seniors throughout the city.
- Use CDBG and other funding to improve existing housing for use by seniors and work with partners to develop programs to support home maintenance.
- Encourage the construction or rehabilitation of homes for downsizing households, including single-story, shared housing, multigenerational and other senior-friendly housing types.
- Encourage local organizations to support seniors living in mobile homes, including maintenance assistance, legal rights and relocation.
- Use neighborhood and area plans to support the construction or rehabilitation of senior housing throughout Aurora.

A **HEALTHY** COMMUNITY

Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans.

GOALS:

1. Make active transportation, such as walking and biking, a viable alternative to driving.
2. Maintain, improve and expand parks, open space, trails and recreation facilities throughout Aurora.
3. Neighborhoods should have safe and convenient access to retail outlets that offer healthy and/or fresh food choices.
4. Support the expansion of healthcare facilities to locations that conveniently serve neighborhoods throughout the city.
5. Ensure that Aurora is a safe environment for all community members.
6. Provide safe, effective and high-quality water, wastewater and stormwater services.

RECOMMENDED PRACTICES:

Placetypes

- Support the establishment of retail outlets that provide healthy and/or fresh foods that are conveniently accessible to neighborhoods across the city.
- Provide sufficient parks, open space and recreation facilities safely and conveniently accessible to neighborhoods.
- Retrofit existing neighborhoods with parks, trail connections and access to public and private recreation facilities.

Connecting Places

- Ensure that neighborhoods are well connected by enjoyable pedestrian and bicycle routes to urban districts, commercial hubs and other placetypes.
- Prioritize multimodal options and reliable access to destinations that are critical to resident health, such as medical facilities, recreation facilities, and essential shopping and services.

Community Health

- Enhance Aurora's quality of life by increasing access to natural areas and incorporating vegetation and natural features in streetscapes and buildings.
- Encourage grocery stores and healthcare facilities to locate at easily accessible locations and provide goods and services to meet local needs and preferences.
- Support programs that improve access to healthy food systems and food security such as HEAL Cities and LiveWell Colorado.
- Increase opportunities for neighborhood gardening and urban agriculture.
- Partner with medical institutions and related organizations to provide better access to healthcare and education concerning healthy lifestyles and better health outcomes.
- Work with partners to identify and address public health problems.
- Partner with healthcare providers, including those at the Anschutz Campus, to promote health and fitness.
- Support community events and activities that foster community building and enhance the quality of life for Aurorans.

Public Safety

- Continue to support public safety through responsive police, fire and code enforcement services.
- Improve safety through neighborhood planning, resident involvement and enforcement of city codes and ordinances.
- Consider public safety and health when designing public spaces, facilities or other community gathering places.
- Maintain a high level of community resilience by planning and preparing for natural and manmade disasters or events.

A **THRIVING** ENVIRONMENT

Principle: A thriving natural environment – including stewardship of water, energy and natural area resources – is essential to the physical and mental wellbeing of residents and the city's ability to support future growth.

GOALS:

1. **Implement water supply and storage projects, as well as conserve and protect existing water resources.**
2. **Conserve and efficiently use energy resources.**
3. **Protect valuable open space and natural areas.**
4. **Require that new development or redevelopment provides and maintains attractive, healthy and water-efficient landscaping.**
5. **Implement water-wise land use practices in new development.**

RECOMMENDED PRACTICES:

Placetypes

- Pursue opportunities to use district-wide approaches to water and energy conservation in all placetypes.
- Encourage transit-oriented development to provide alternatives to auto traffic and improve air quality.

Connecting Places

- Concentrate development and provide walking, bicycling and transit choices to reduce distances between destinations and mitigate automobile traffic.
- Preserve, enhance and connect open space corridors to increase green space, connect habitats, enhance the trail system and improve drainage.
- Use trails and linear parks to connect placetypes.

Environmental Improvement

- Improve the community's understanding and acknowledgment of the role a healthy environment plays in creating a successful community.
- Protect sensitive lands, wildlife habitats, and unique natural areas, such as Black Forest in southeast Aurora.
- Use neighborhood- or district-wide approaches for energy, water, and resource conservation.
- Promote resource-efficient development by incorporating energy and water conservation and renewable energy.
- Utilize innovative environmental practices to reduce the amount of water used for landscaping while providing quality landscaping and shade trees.
- Use green stormwater infrastructure to slow and clean stormwater while providing the benefit of green drainage facilities and corridors.
- Encourage net-zero approaches to development. In net-zero development, the energy used after development does not exceed the energy used before development.
- Incentivize renewable energy generation, storage and efficiency in new buildings, neighborhoods and development. The city can lead by example by integrating these best practices into public facilities.
- Plant water-wise shade trees to provide shade to people and property.

AN **AUTHENTIC** AURORA

Principle: The creation of great places, the preservation of traditionally unique places and effective marketing and promotion are essential to improving Aurora's image.

GOALS:

1. **Create distinctive destinations that attract people from around the region and the world.**
2. **Protect the character and quality of established neighborhoods and districts throughout Aurora. Proactively prevent decay, decline or disinvestment within the community.**
3. **Use high-quality community design to create vibrant and active places where people choose to live and work.**
4. **Promote Aurora's welcoming, diverse neighborhoods and parks and open space system as key reasons to live in or visit Aurora.**
5. **Use Aurora's heritage and historic resources as a basis for community events, urban design and community pride.**
6. **Use diverse cultural resources and the arts in urban districts and other placetypes to create destinations.**

RECOMMENDED PRACTICES:

Placetypes

- Create intensively developed urban districts with a mix of residential and commercial uses focused around great public spaces where people can live, work and come together.
- In urban districts, innovation districts, commercial hubs and city corridors, use coffee shops, restaurants, outdoor spaces, recreation centers, shared work spaces and community gathering places to promote natural interaction between people.
- In urban districts, commercial hubs and other placetypes create outdoor spaces that are appropriately sized and surrounded by active uses to create around-the-clock places.
- In urban districts, innovation districts and other placetypes, create design themes based on diverse culture, art or other themes in order to create recognizable identity.
- Program community events and entertainment in public spaces.
- Emphasize the unique character of neighborhoods with community spaces, neighborhood commercial centers, art and design.
- Treat TOD areas as key entry points to the city with quality urban design, public art and innovative businesses.
- Use high-quality and innovative architecture and design to create interesting and valuable places.
- Create active destinations and districts in Aurora for arts, high-quality entertainment and nightlife. Pursue opportunities to attract or enhance regionally recognized public or private venues for arts, culture, recreation and entertainment.
- Support and celebrate Aurora's strong international and cultural restaurants and shopping districts. Protect and leverage these unique resources to support reinvestment and development within Urban Districts, Commercial Hubs and City Corridors.
- Protect and highlight Aurora's cultural and historic resources and places.
- Continue to support the inclusion of public art throughout the community. Incorporate distinctive art and design as a defining feature of community gathering places.

Connecting Places

- Enact standards that require streets that are safe, comfortable and attractive by including quality landscaping and pedestrian design.
- Continue to limit the numbers of signs on major streets to avoid a cluttered appearance and continue to require quality design for sign structures.
- Locate buildings close to streets and public spaces to create high levels of pedestrian activity.

The Image of the City

- Build upon the city's successful marketing campaign touting Aurora's superior quality of life to attract businesses, new residents, professionals, developers and investors.
- Promote the parks and open space system as a great reason to live, work and play in Aurora.
- Attract major regional sports, entertainment or tourism destinations to Aurora.
- Promote and encourage local and independent businesses that reflect Aurora's unique community identity.
- Support and partner with Aurora's school districts, institutions of higher education and other education providers to assist with the provision of high-quality education.
- Survey, evaluate, preserve and enhance historical resources to add special character to urban districts, neighborhoods and other districts.
- Encourage high-quality public events throughout the city.

EASY **MOBILITY** AND **ACTIVE** TRANSPORTATION

Principle: An easy-to-use transportation network with multiple choices for travel supports a strong economy, healthy community and flourishing environment.

GOALS:

1. **Deliver a multimodal transportation system that serves the diversity of people that live, work, and visit Aurora. This system should serve people with safe, connected, reliable, and convenient mobility choices.**
2. **Create a transportation system that supports overall city goals, including fiscal sustainability, economic impact, community health and environmental goals.**
3. **Strengthen the community with transportation choices to meet its diverse needs. Integrate the land use and transportation planning and design to create a place-oriented city in which people can readily access jobs, housing, services, and recreation.**
4. **Design infrastructure that contributes to the creation of these great places.**
5. **Successfully balance and integrate the various modes of transportation in a context-sensitive way. Establish plans, codes, policies, and practices that prioritize desired outcomes for network users and development types.**

RECOMMENDED PRACTICES:

Placetypes

- Plan and deliver a multimodal transportationsystem that is context-sensitive and balances modal priorities according to placetype designations. This applies equally to new development, redevelopment, or retrofitting established areas to improve mobility.
- Strategically focus transportation investments in urban districts, transit-oriented development areas, and other walkable,-mixed-use districts.
- Promote transit-oriented development (TOD) and prioritize intense development along high frequency transit corridors.
- Emphasize walkability, mixed land uses, and higher densities near stations and transit corridors. Ensure that private development and public improvements in these areas conform with adopted station area plans.
- Prioritize walking and biking through design and improvements in urban and mixed-use districts and along main streets in all placetypes. Ensure that neighborhoods and other commercial districts provide safe, convenient options for walking and biking.
- Locate industry hubs near major highways, rail lines, and street networks that can accommodate trailer trucks for quick and easy shipping that does not disrupt non-commercial traffic.
- Locate industry hubs in the Aerotropolis area to capitalize on immediate access to the airports.

Connecting Places

- Connect urban and mixed-use districts to neighborhoods using transit and safe and comfortable pedestrian and bicycle routes.
- Develop street grids with blocks small enough to encourage walking and to maximize the potential for development, particularly in urban districts and transit-oriented development (TOD) areas.
- Design street networks to separate industrial traffic from local traffic.
- Incorporate vehicle, pedestrian and bicycle connections within and connecting to between adjacent placetypes. Provide alternative routes for local traffic other than through major roads and intersections.
- Enhance walking and biking connections between neighborhood placetypes and parks, trails, open space, and recreation facilities.
- Support the "Our Parks, Our Places" plan's priority recommendation to achieve a 10-minute walk standard connecting neighborhoods and parks and open spaces.

Transportation and Development

- Apply a complete streets framework to guide design of streets and street networks to prioritize safe, convenient, and comfortable travel for all users.
- Require that new development provides complete street connections with frequent connections to major streets. In cases of redevelopment, connectivity should be improved as retrofit opportunities are identified.
- Align land use codes and other relevant design standards and documents to ensure that development is designed to support multimodal transportation and connectivity. These codes should include context-sensitive design principles and support complete neighborhoods and mixed-use districts.

- Support the installation of enhanced public lighting and technologies in select commercial or mixed-use districts, especially urban districts and transit-oriented development (TOD) areas.
- Integrate traffic calming design improvements into new development or redevelopment as part of its original construction to mitigate the needs for expensive or challenging post-development installation.
- Consider impacts of private and/or limited-access streets on overall street connectivity goals.

Parking

- Discourage or disallow parking lots along major street frontages, particularly in city corridors, commercial hubs and urban districts.
- Utilize parking best practices, such as shared parking, lot sizing and peak parking overflow areas to conserve valuable land and reduce development costs.
- Require that parking lots are attractive and efficient by including walkways, landscaping and appropriate lighting.
- Continue to maintain strong partnerships with the Regional Transportation District (RTD) and the Colorado Department of Transportation (CDOT).

Planning and Maintenance

- Integrate land use and transportation in planning, design, construction, and operation of mobility infrastructure and services.
- Incorporate multimodal safety and convenience best practices into traffic analyses and standards. Integrate multimodal level of service considerations into policies and practices.
- Develop citywide transportation plans that include analytical approaches to identifying the most critical investments that can be made to improve the function of the overall transportation system.
- Support transportation demand management (TDM) to shift travel behavior away from single-occupancy vehicle use towards more sustainable modes such as transit, biking, walking, or carpooling.
- Consider innovative partnerships with non-traditional transit providers, such as major employers or public agencies, to provide expanded services.
- Administer a program for annual maintenance funding of new and existing city-owned transportation infrastructure, as well as replace cost funding. Identify and adopt dependable revenue sources for transportation maintenance and improvements.
- Research and prepare for technological advances in transportation, including autonomous vehicles, intelligent transportation systems, microtransit, shared ride, on-demand services and continued growth of EV use.
- Collect and analyze multimodal data and use it to shape future investments in infrastructure and services.
- Monitor and evaluate progress toward Connecting Aurora plan implementation and desired community outcomes. Compile relevant data into a dashboard for periodic assessment.

Motor Vehicles

- Update best practices, guidelines, and metrics related to street and traffic design.
- Use context-sensitive approaches and data to set speed limits, particularly on pedestrian-priority streets.

Pedestrians and Bicycle Users

- Provide regularly located, safe and comfortable crossings on major streets and in proximity to key destinations.
- Install new sidewalks and widen existing sidewalks as part of redevelopment or capital improvement projects. Pursue grant funding to support these improvements.
- Add or upgrade bike lanes to appropriate streets, separated from automobiles, to create a fully connected bicycle system. Utilize trail connections to augment the city's bicycle network.
- Expand the city's "low stress" bicycle network.
- Continue to explore implementation of micromobility opportunities.

Transit Services

- Expand the city's frequent transit network through investments in transit service frequency, facilities, and transit-supportive land use and design.
- Work with RTD to improve bus speed, reliability, and user experience. Support expansion of transit services to unserved or underserved areas of Aurora.
- Advocate for affordable fares, refined transit connection timings, adequate bus shelters, and other transit improvements.
- Provide a range of economically viable transit and shuttle services, such as those with flexible routes and schedules, for high-activity areas and employment centers.
- Improve first and last mile connections to transit stations and corridors.
- Expand transit-supportive land use and zoning to support transit ridership and investments.
- Expand transit access to and from east and northeast Aurora as the area fills out with housing and employment.

Freight Transportation

- Administer best practices and appropriate codes and standards to regulate vehicle access to destinations, on-street loading zones in high-demand areas and accommodate deliveries to commercial and residential properties.
- Build freight-focused mobility hubs with truck parking and services to serve industrial centers. Ensure industrial development provides adequate short- and long-term truck parking.

Interagency Coordination

- Continue to maintain strong partnerships with the Regional Transportation District (RTD), the Colorado Department of Transportation (CDOT), and County transportation departments.
- Work closely with local school districts to create safe routes to schools.
- Comply with applicable local, State, and Federal laws related to disability rights and accessibility as they pertain to the city's mobility services, programs, activities, and infrastructure.

Aging Population

- Develop incremental programs for the improvement of deficient sidewalks. Ensure that sidewalks can accommodate wheelchairs, walkers, and other mobility devices.
- Identify street crossings that are difficult for seniors and prioritize improving sidewalks, signal timing, and crossing design. Prioritize enhanced connections that provide direct access to transit or in proximity to destinations or services frequently used by older adults.
- Provide improved transit stations and bus stops that meet the needs of seniors with appropriate seating, and shelter, and safety improvements.
- Support targeted transportation services to serve older adults, connecting them with the destinations and services they regularly need.

ACTION STRATEGIES

It is not sufficient to simply prepare and adopt a new plan for our city. Actions and procedures need to be established to ensure that the plan's recommendations are carried out and the community's the vision is realized. An actions program should be created and trends should be measured over time to ensure that it achieves the desired results.

City staff within appropriate departments should provide regular reports to city management, the Planning and Zoning Commission, City Council and the community describing trends and program results. Based on these reports the Commission and City Council may direct changes in policies and programs.

Our city continues to change as it grows and develops. Plans, recommendations and strategies will need to be adjusted over time. City staff will accept the responsibility to undertake the recommended actions and policies, evaluate results and recommend adjustments to strategies. This chapter describes tools that can be used to implement the recommendations of Aurora Places and a specific program of actions to be undertaken immediately.

TOOLS

Aurora Places is the policy guidebook for growth and development throughout the city for the next 20 years. Chapter 6 outlines recommended policies and practices to achieve the goals outlined in the plan. This chapter lays out a framework that can be used as a first step in implementing the policies.

This chapter also defines tools the city and its partners can use to implement the plan and realize the community's vision for Aurora.

Capital Improvements Planning

To ensure that the city is planning ahead for its infrastructure and facility needs, it is common practice for cities to maintain a five-year capital improvement plan (CIP). The CIP provides the basis for capital expenditures in the current budget. The plan should be reviewed and updated annually to assess changing conditions, priorities and how the identified projects address the vision and goals of the comprehensive plan. According to the Aurora City Charter, the Planning and Zoning Commissions should review and provide recommendations regarding the CIP to ensure it supports the goals and recommendations of the comprehensive plan.

In Aurora, the Capital Projects Fund (CPF) provides support for general government capital projects. Additionally, an enterprise fund for water, wastewater and stormwater funds some utility infrastructure projects.

Partnerships

There are limits to what the city can afford to finance. At the same time, there are often special costs associated with the types of development that the city needs to attract. Targeting a variety of new types of development to provide job growth, revenue-generating retail, affordable housing, renewable energy and transportation improvements will help create urban places. The special costs associated with these beneficial projects can include transportation improvements, land acquisition, building rehabilitation, environmental work or special aesthetic enhancement. The city can more effectively meet its goals by leveraging capital improvement funding, urban renewal financing, grants and other sources with private funding. The city should pursue and maintain special partnerships with property owners, developers, businesses, nonprofit organizations, government agencies, large institutions and other parties.

Neighborhood and Area Planning

Aurora continues to plan for smaller areas of the city, including neighborhoods, urban centers and mixed-use districts, strategic urban renewal areas and transit station areas. By creating neighborhood and area plans, the city can address more specific or local issues associated with particular neighborhoods and areas. Using this method, goals and programs can address the needs of specific areas.

Neighborhood and area planning will include more methods to involve residents and businesses of all cultures and backgrounds in planning for their locations. This involvement may be through workshops, local events or the establishment of local committees. Such methods can support continued citizen involvement in development processes and in programs for the areas. The city should continue to initiate plans in areas that do not currently have a plan and regularly review and update existing plans.

Land Use Regulation

Like other cities, Aurora regulates the use and development of land. The city's zoning code includes the zoning designations that describe which uses of land are allowed in different portions of the city. The code also includes standards governing various aspects of development, including building heights and spacing, street construction, the design of public spaces, and overall site or neighborhood layout. Additional codes and regulations also govern the construction of buildings or integrate water or energy best practices with land use planning and development review.

The ordinance should be used to implement the goals and policies described in the Aurora Places plan, including the availability of urban places for job creation, increasingly diverse housing options, resource conservation, improved transportation, an attractive appearance and an improved image. Building regulations require that structures are safe, durable and energy efficient.

Technology and Data Solutions

The city will leverage data and technology solutions to achieve goals and efficiently meet policy objectives. Aurora is a "smart city" that uses data strategically to inform decisions, understand challenges, and effectively identify solutions in the areas of transportation, engineering, communication, public services and economic development. Advanced technology offers new opportunities for managing the city's key functions, delivering services to the community and connecting with residents.

Infrastructure Planning

The city is responsible for providing adequate streets, water and sewer facilities, parks and open space and other public facilities. In many cases, this responsibility is assigned by land use regulations to new developments. Aurora can use the provision of infrastructure to support the goals and policies in this plan.

Urban Renewal

Aurora creates urban renewal areas in the city to eliminate blight and plan to prevent its reoccurrence in identified locations throughout the city. Urban renewal plans are created for each area describing how blight conditions will be alleviated and creating a neighborhood vision to guide future development. The Aurora Urban Renewal Authority, primarily composed of the mayor and Aurora City Council members, governs urban renewal efforts in Aurora. Three additional members representing the school districts, county governments and other property taxing entities are expected to be added in the near future to bring the board into compliance with current state law.

An urban renewal project is a public/private partnership intended to stimulate a development project that would not otherwise happen without public support. The private sector funds the majority of the investments required to redevelop urban renewal areas. Funding for public investment comes from tax increment financing (TIF) revenue, which is the increased amount of property tax or municipal sales tax revenue collected within the Urban Renewal Area resulting from redevelopment projects. This public financing is used to address particular needs associated with redevelopment such as infrastructure improvements, public spaces and parking.

Aurora Places Report and Review

The Planning and Development Services Department will regularly prepare a report for the Planning and Zoning Commission, city management and the Aurora City Council outlining progress toward the goals and aspirations of the plan. The report should include the following:

- Information on key community trends and changing conditions.
- A progress report on each of the key actions below, including improvements in the related measurements.
- Identification of new actions to be undertaken.
- Recommendations on amendments to the Aurora Places Plan.

Measurements

To effectively meet the goals, the city will need to monitor various performance measurements concerning the state of the city and adjust its policies and programs in accordance with changing conditions and trends. These measurements should be employed to determine whether the actions recommended are effective in achieving the goals of the city. It will be increasingly critical to measure trends, including average incomes, job growth, development, the composition of the population, energy and water use, traffic safety and congestion. Each project employed to achieve the goals of this plan should include recommended measurements.

IMPLEMENTATION ACTION MATRIX

The following Implementation Action Matrix suggests actions and projects that may be taken in the near term to implement Aurora Places recommendations. The matrix recommends specific actions and projects to be undertaken in the next several years. This matrix should be reviewed, updated and revised periodically as a part of the annual Aurora Places report. Most of the actions described will be multi-departmental.

Priorities identified during the planning process are focused around key topics:

- Strong Economy
- Diverse and Equitable City
- Housing for All
- Healthy Community
- Thriving Environment
- Improved Mobility and Active Transportation
- Authentic Aurora

Principle	Action Title	Action Description
All	**Aurora Indicators**	Develop and monitor a system of community indicators concerning changes in demographics, the economy, health, transportation, the environment and other issues described in the comprehensive plan. Use the indicators to measure overall success and to refine strategies when necessary. Include this information in the Aurora Places Comprehensive Plan update report.
All	**Area Planning Program**	Enhance Area Planning Programs. Develop studies, analysis and plans for neighborhoods, urban districts, commercial corridors, employment centers and other subareas of the city where plans do not currently exist. Existing area plans should be updated to account for changes in conditions and opportunities. Each program will identify and prioritize target areas for future planning and development based on agreed upon criteria.
Strong Economy	**Economic Development Strategic Plan**	Work with economic development partners to develop a strategic plan to further refine the city's economic development policies and practices and to pursue the goals of the Aurora Places plan. The plan may incorporate market analyses; assessment of development capacity; available sites and targeted areas and economic sectors; retail strategies; best practices in coordinated or cooperative partnerships; incentives tools and policies; and other critical considerations.
Strong Economy	**Fiscal Impact Analysis Modeling Tool**	Update the city's tools for providing fiscal impact analyses for use by City Council to evaluate requests for annexation, zoning changes, development incentives or other development proposals. Evaluate inclusion of a housing impact element as part of the analysis.
Housing for All; Strong Economy	**Aurora Housing Strategy**	Update the 2020 Aurora Housing Strategy. Reassess the comprehensive set of recommendations and strategies to address the short- and long-term housing needs of the community, including, but not limited to: homelessness, displacement, transitional housing, workforce housing, mobile or manufactured housing, condominium development, mixed-income housing and other homeownership opportunities. Integrate opportunities in future neighborhood or area plans.
Improved Mobility and Active Transportation	**AuroraLine (R Line) Transportation Management Association**	Work with DRCOG, RTD and major businesses along the Aurora Line (R Line) to evaluate the establishment of a corridor-wide Transportation Management Association (TMA). Focus on promoting the R Line, including marketing the service, reducing congestion, fine tuning service and connection times, increasing transit ridership and providing first-mile, last-mile mobility options such as bike sharing and car sharing to various stations along the line.
Improved Mobility and Active Transportation	**Northeast Area Mobility and Accessibility Program**	Identify and pursue funding sources for improving mobility and accessibility in the northeast area, with a specific focus on connectivity. Construction of the I-70/Picadilly interchange to support the economic activities of e-commerce, fulfillment centers, warehousing and logistic industries in the area.
Improved Mobility and Active Transportation	**Complete Streets Framework**	Adopt a Complete Streets Framework and create a complete streets design guide to prioritize safe, convenient, and comfortable travel for all users–regardless of age, ability, or mode of travel. This includes incorporating sidewalks, bicycle lanes, protected crossings, accessible transit stops, and traffic calming measures in all projects. The framework guides all phases of project delivery, including planning, design, construction, and maintenance.
Improved Mobility and Active Transportation	**Transportation Impact Study (TIS) Guidelines**	Update current TIS Guidelines to incorporate multimodal safety and convenience best practices. In the future, consider alternative methods for measuring multimodal level of service. The policy supports project evaluation across modes.
Improved Mobility and Active Transportation	**New Development and Redevelopment Requirements**	Update the Unified Development Ordinance (UDO) and other city land use codes / relevant documents to ensure that new developments and redevelopments are designed to support multimodal transportation, connectivity and maximize transit investments. The policy includes context-sensitive design principles and supports complete neighborhoods.
Improved Mobility and Active Transportation	**Designing Streets for Safe Speeds**	Where appropriate, use context-sensitive approaches and data to consider setting speed limits, particularly on pedestrian priority-streets. It aims to reduce crash frequency and severity, particularly, but not only for people walking and biking.

NOTE: *Items listed above are recommended actions. Prioritization, funding, and initiation of these activities are subject to future direction by City Council or city management.*

Principle	Action Title	Action Description
Improved Mobility and Active Transportation	**High Frequency Transit Corridors & Transit-Oriented Development**	Encourage transit-oriented development along high-frequency transit corridors, emphasizing walkability, mixed land uses, and higher densities near stations. It aims to maximize the benefits of transit investments by increasing ridership and supporting economic development. Tools may include zoning changes, and/or financial incentives.
All	**Aurora Places Review and Report**	Prepare a report for the Planning and Zoning Commission, city management and the Aurora City Council outlining progress in plan implementation. The report should include the following: information on key community trends and changing conditions; a progress report on each of the key actions in Chapter 6, including improvements in the related measurements; identification of new actions to be undertaken and recommendations on amendments to the Aurora Places Plan.

NOTE: *Items listed above are recommended actions. Prioritization, funding, and initiation of these activities are subject to future direction by City Council or city management.*

CM Horton asked if there are mechanisms being designed into the infrastructure for people to navigate physical disabilities.

C. Campuzano stated there will be tactile strips for the visually impaired to note where they are entering the roadway, but she was not sure about any other audible indications RTD may have. She said they would look into that.

CM Horton inquired if there was opportunity to include the "World in a City" branding on the Aurora side.

L. Perry stated they would absolutely look into doing that.

CM Horton clarified they are not having two bus lanes.

C. Campuzano explained there are still two lanes of traffic in each direction, but it depends on the stop. She stated some areas have a space for a bus pullout, but they have on-street parking through a lot of their area in Aurora, so there will basically be two travel lanes and then buses will typically be in their pullout space.

CM Horton asked if there will be a breaking ground ceremony.

C. Campuzano answered yes, but they need to nail down a date.

Outcome:
The Committee recommended the item be presented to Council at Study Session.

Follow-up Action:
The item will be presented at the next available Study Session.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Overview

Summary of Issue and Discussion:
Keith Borsheim, Project Manager for HDR, lead consultant on the Connecting Aurora Multimodal Transportation Master Plan, stated that this is the city's first opportunity to create an overall citywide multimodal transportation master plan. It will align and support the goals of Aurora Places and is intended to be adopted as part of the city's comprehensive plan through an amendment. He said the key goals for the project are to be innovative and adapt to a changing transportation landscape. He noted this is a long-term plan and many projects have been identified throughout this plan and process. The project team took a four-phased approach to develop the plan and recommendations, which included discovery, synthesize, visualize, and realize phases. He went over the timeline and process for the master plan, the engagement activities, and the overall engagement results. He discussed the state of the system reports, with the top outcome being the identification of safety challenges, as well as mobility challenges. He noted that certain demographic groups have a higher propensity to use transit, and the top transportation concerns they heard from people were they feel it is unsafe to travel outside of a car, bottlenecks and dangerous driving behaviors, destinations in Aurora are too far apart to reach comfortably by walking and biking, lack of connection to services and destinations, desire to have higher quality streets and places, and transit is too slow, infrequent, unreliable, and feels unsafe.

K. Borsheim went over the vision and mission statements, as well as the ten goals developed by Connecting Aurora. He stated that the project team analyzed three possible futures for Aurora, which include a car-oriented city, a transit-oriented city, and a neighborhood-oriented city. The public expressed that transit-oriented and neighborhood-oriented cities were preferred to improve quality of life, and a car-oriented city would keep the quality of life either the same as today or worse. He voiced that the analysis and public input led to a fourth scenario, called the place-oriented city, which includes key aspects of transit-oriented and neighborhood-oriented scenarios. The place-oriented city is Aurora's desired future, and consists of increasing the number of convenient, affordable, and safe mobility options, emphasizing the need to concentrate on the destinations within and near neighborhoods, imagining investments in walking, biking, and transit infrastructure, and focusing on making those modes of transportation safer and more accessible, and using land efficiently and productively. He explained they used that model to help develop visionary networks, which include pedestrian, bike, transit, auto, and freight networks. He stated that the completion of all projects recommended by the plan will be expensive, and the city will need to fund them through active participation and partnerships over many years, which is a key aspect of this plan. He shared that the plan also includes five new or updated policies, 12 new or updated programs, and over 900 individual project elements.

K. Borsheim went over the short-term projects, including Microtransit, intersection upgrades, complete street projects, bikeway projects, closing missing sidewalk gaps, and safety and technology improvements. He added that the total investment is $45 to $65 million per year for the next 10 years, not including maintenance. He stated they plan to submit the final plan to City Council for adoption in April.

Committee Discussion:

CM Coombs commented that, in looking at the short-term projects, the majority of them are road projects and not bikeway, pedestrian, or transit projects, and the definition of roadway projects was primarily capacity projects.

K. Borsheim responded that it is generally correct; however, he would put many of the roadway projects into the Complete Streets category, as they are planning to include the construction of adjacent sidewalks to go with those projects in many of them.

CM Coombs noted one of the main priorities from the public engagement was slowing down the traffic. She asked if that was part of these projects.

C. Colip answered on the Complete Streets portion, they are looking at a variety of areas where they only have half a street built and no sidewalk on the other side, but the goal is to make that a complete street that could be a function of both sidewalks adjacent to both sides and bikeway parking.

CM Coombs inquired if they do or do not slow down traffic.

C. Colip responded it should slow down traffic because they would have narrow lanes to drive in, as long as people obey the rules.

C. Campuzano added the scope is different for each project. She said there are a lot of constraints in the built-out areas of the city where their right-of-way is and how much width they have. However, she expressed that most of the street projects do not include lane expansion, with the exception of Gun club Road.

CM Coombs asked if they include sharrows and single painted shoulders of roads when they say Complete Streets or if they are talking about the protected bike lanes.

C. Colip shared their goal is to put in separate bikeways with possibly a curb, but there are some locations where they may not be able to do that due to right-of-way constraints. The goal is to repurpose that portion of the road, so it is safe for all modes of travel.

C. Campuzano noted all the projects have a shared use path that is meant to be shared. However, she said they have gotten a lot of negative feedback from residents about sharrows, so there are no sharrow projects.

K. Borsheim said they are slowing vehicles down, and a key outcome of this process is the Complete Streets Design Guidelines, where they have identified updates, they want to include in the city's design standards, and most of those updates are focused on slowing things down. He expressed that bikeway design is really dependent on speed of the roadway and the volume of traffic they see on a road, and the higher the speeds and volume, the more separation of protection they need for cyclists.

CM Coombs stated the images shown related to neighborhood or place-based design seemed to be gridded blocked streets, but the vast majority of Aurora streets are not gridded and blocked. She asked how they are looking to navigate connectivity in their roadway network and what future development and roadway design looks like in addressing that.

K. Borsheim answered generally a grid system provides a greater level of connectivity and more options for people and designers of the roadway network to provide bikeways not along arterials, so the desire for the city moving forward is to provide more of a grid system. He said there will be greater connectivity for pedestrians and bicyclists, and there may be some places where street connectivity does not go through an area, but pedestrian and bicycle connectivity does.

J. Rustad added that parallel with this project, they are working on analyzing small lots and their zoning codes, and few of their guiding principles have been connectivity. She stated that as they are building smaller lots and more houses, they want to make sure people have connectivity and protection along the public route. She said they are currently looking at creative ways that currently are not in code to allow for that.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

---

5. MISCELLANEOUS MATTERS

K. Muehlemeyer explained they overlapped with the Management and Finance Policy Committee by half an hour. He gave the committee the options to keep the meeting the same day but either move it up to 12-1:30 p.m. or move it later from 3-4 p.m.

winter of 2026, and construction to start spring of 2027 and completed by end of 2027.
Does the Committee support moving forward with the Resolution for the Intergovernmental Agreement between the City of Aurora and the E-470 Public Highway Authority regarding funding, design, construction and maintenance of temporary traffic signals at Stephen D. Hogan Parkway and E-470 to the next available Study Session.

Committee Discussion:
None.

Outcome:
The Committee recommended the item move forward to Study Session.

Follow-up Action:
Staff will move the item forward.

4.b. CONNECTING AURORA - AURORA CITYWIDE MULTIMODAL TRANSPORTATION MASTER PLAN UPDATE

Summary of Issue and Discussion:

Huiliang Liu, Principal Transportation Planner, stated that this will be the last project update on Connecting Aurora before it is presented to the TAPS Committee for the adoption process. Keith Borsheim, HDR Project Manager, presented the project update, which included a public engagement update; proposed policies, programs and projects; and the final plan adoption timeline. The Connecting Aurora project started two years ago. The project team started by studying existing challenges in the City and how those might change in the future. The project team then explored possible futures for the City through scenario planning, and identified a preferred place-oriented future for the city. The place-oriented city was analyzed, and visionary networks were created for each travel mode, which include biking, walking, transit, driving, and freight.

The bulk of this year was spent drafting policies, programs, and project recommendations. There were four rounds of major engagement milestones throughout the process with the public, which included over 800,000 touchpoints. Over 10,000 people visited the website, including 1,500 in October. 2,500 people filled out surveys, including 700 comments on online maps. There were over 500 attendees at open houses and public roundtables, and 150 people attended virtual town halls. There were also 580 touchpoints during various community and pop-up events.

The engagement process showed that people feel unsafe traveling outside of their cars. When driving, they experience bottlenecks and observe dangerous driving behavior. People feel destinations in Aurora are too far to walk or bike to, and that there is a lack of connections to those destinations. There is a desire to have higher-quality places and streets. Public transit is too infrequent, unreliable, and sometimes feels unsafe.

The most recent round of public engagement showed there was general support for the draft policies and programs. Map comments were received from all over the City. Survey responses varied from 65% to 75% support for the policies, programs, and projects that were presented to the public.

The policies and frameworks include a complete streets framework, which is a way for the City to ensure streets serve everyone, no matter how they choose to move throughout the City. Staff is also recommending an update to the Transportation Impact Study Guidelines to align with industry best practices. Other recommendations include updating requirements for new development and redevelopment which may take the form of updates to

the Unified Development Ordinance; designing streets for lower speeds; and focusing on high-frequency transit corridor development and improvements.
There are 12 new or updated programs, which include maintaining and updating Geographic Information Systems; transit programs such as bus stop amenity improvements and making sure buses move efficiently; safe sidewalk and bike programs; expansion of the resurfacing programs; and expanding the maintenance program. The programs are explained in detail in the final plan.

To build the visionary networks that were created, over 1,000 individual project elements have been identified, which include over 70 intersection improvements, 27 bridge and interchange projects, over 100 new or upgraded signals, 31 street widening and traffic calming or safety projects, over 350 miles of bikeways including trails, 111 miles of sidewalk upgrades, over 300 bike and pedestrian crossings, and 23 multimodal transit corridors. The narrow sidewalks in many older neighborhoods are not included in the 111 miles of sidewalk projects. Many of the recommended projects will be paid for by others as development occurs.

Maps of street projects, sidewalks projects, bikeway and trail connection projects and transit projects were shown and reviewed.

The plan adoption timeline was presented. Staff are currently going through review cycles of the final plan draft and addressing comments received. The plan will then be posted for public comment early next year. The final plan will be submitted to TAPS and the Planning Commission in the March/April timeframe for City Council adoption.

Committee Discussion:

Councilmember A. Lawson asked how these things are going to be implemented and wants to make sure that it is not just a document sitting on a shelf and asked if it is a living document that can be updated. K. Borsheim responded that they have taken the project list and created project packages and prioritized the projects into short-term, medium-term and long-term that aligns with the City's other master plans. There are around 400-million-dollars' worth of projects on the short-term, 0-to-10-year timeframe. There are several projects identified for the medium, 10-to-15-year timeframe. It is a recommendation of the plan that the City regularly updates the plan and revisits the recommendations from the plan on a periodic basis.

Deputy City Manager L. Perry stated that all of the work on Connecting Aurora will bleed into the Build-Up Aurora conversation. The Infrastructure Task Force will hear a presentation on transportation needs at its meeting tomorrow. This master plan will serve as a framework for capital planning for their annual budget, for grant pursuits and for bond programs. They are longstanding documents that evolve with the City, and require updates. There is the city's Comprehensive Plan and master plans for development and other documents that govern what is constructed in a development and the construction requirements.

Councilmember Lawson stated that when they did the Northeast Aurora Transportation Study (NEATS), she remembers that that was a big study that cost over $500,000 and she has not seen a lot of utilization of that. She wants to make sure when they do these studies and this work that it is implemented not only now but in the future.

Chair Hancock agreed with Councilmember Lawson and added that she wants to see the fruits of their labor and hard work. She asked if people were leaving comments online. K. Borsheim responded, yes, that 700 comments were received, and one interesting thing about those comments is that they are really focused.

Senior Transportation Planner Tom Worker- Braddock, stated that staff and the development community regularly use the NEATS study to guide development in northeast Aurora and it provides a lot of information on what roadways and trail connections they expect to see, and Connecting Aurora will do a similar thing but on a

broader City level.

J. Rustad, Director of Planning and Business Development, stated that this will be adopted as part of the Comprehensive Plan, and in addition to the Roadway Manual Updates, there will be UDO updates to ensure implementation of the plan.

Councilmember Lawson responded that, during the NEATS study, there was a lot of controversy regarding the cost of the study, and she is glad that some things have been implemented and thinks more things should be implemented.

Chair Hancock commented that one thing unique about Aurora is they have so many highways that cut the City up into slices, and they are trying to pull that all together to make it feel like the connectivity is there, but it is a challenge.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

4.C. 2025 TRANSPORTATION, AIRPORTS AND PUBLIC WORKS COMMITTEE RECAP

Summary of Issue and Discussion:

Chair Hancock wanted to highlight the biggest accomplishments over the last year as a Committee. Carlie Campuzano, Deputy Director, Transportation Mobility, Public Works Department, responded they have gotten a lot done this year and a lot of things were completed through partnerships with other agencies. RTD was mentioned. Chair Hancock suggested having an annual update from RTD.

Senior Planner H. Liu responded that the Master Plan update is the most important project but there have also been a lot of collaborations and partnerships with agencies, such as RTD, CDOT and neighboring jurisdictions. T. Worker-Braddock mentioned the Older Adult Transportation System where they partnered with RTD. The program is called Aurora Rides and will launch in December and will be a free service for people 60 years of age and older. Chair Hancock thanked Councilmember Lawson and noted her work with the Center for Older Adults and that project was her baby. Councilmember Lawson responded that she hopes to continue to be on the Committee, and she hopes that they can get updates about how things are going and working. Chair Hancock thanked Deputy Director C. Colip regarding sidewalks. C. Colip gave an update on future sidewalk projects.

The Committee thanked Vice-Chair and Councilmember A. Kassaw for his service on the Committee and to the City.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

CM Lawson, CM Kassaw, and CM Hancock approved moving the resolution forward.

Outcome:
The Committee recommended the item move forward.

Follow-up Action:
Staff will move the item forward.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:
Huiliang Liu, Principal Transportation Planner, Co-project manager, introduced Keith Borsheim, with HDR Consulting, the consultant Project Manager, to provide an update on Connecting Aurora, the city's Multimodal Transportation Master Plan. K. Borsheim gave a reminder of the vision, mission, and goals of the plan. He went over the April engagement activities conducted by the project team, including four main public events, a virtual town hall, Engage Aurora Live! a roundtable discussion, and an online open house. He added that they also had over 10 popup events, including four city employee-specific engagement events, and a persons with disabilities and their caretakers focus group. He presented what they heard from the public during the engagement activities. He stated that the visionary network, including bikeway, sidewalk, transit, and street networks, are generally supported by the public. He explained that they also presented 10 investment categories, which is where the public was asked where the city should put its money over the next 30 years. The top three supported by the public were bikeways & trails, pedestrian infrastructure, and street capacity. He provided an overview of the visionary network, which is a long-term network with a complete street's emphasis intended to address mobility needs, drive network design and project development, and reflect the city's overall vision. The visionary pedestrian network reflects the need that every city street must safely and comfortably accommodate pedestrian movement particularly near schools, transit stops, and commercial areas, and will include filling gaps in sidewalks, widening sidewalks where needed, and providing safe crossings particularly along major roads. The visionary bike network includes improvements like separated bike lanes, shared use paths, new crossings to make biking safer, more viable, and a more attractive transportation option, and bikeway benefits also include a healthier and most sustainable community. The visionary transit network prioritizes service expansion, higher frequency, infrastructure improvements, and high-capacity transit investments, which could include dedicated bus lanes on major arterials and providing nicer transit stops or mobility hubs. Regarding the visionary auto and freight network, the city will continue providing safe and convenient automobile travel, and this plan will continue to prioritize safety and connectivity improvements and acknowledge where freight enhancements throughout the city may be needed. K. Borsheim went over next steps, which include turning networks into projects and prioritizing projects into short-, medium- and long-term projects, identifying potential funding sources that might be associated with the projects, developing programs and policies to go along with the projects, having a draft plan available this summer, and moving towards council adoption in the fall.

Committee Discussion:
CM Hancock pointed out that it was stated there were 750 respondents, which is dismal in the city of our size. She asked what they could do to get the word out more, because it would have been great to have more participation. She suggested utilizing Aurora TV station to get the word out. She said it is important for people to know about what we are doing, as it directly impacts their life.

C. Campuzano stated the engagement was extensive on this project, and the 750 number was just for a specific exercise they did where participants used jellybeans to indicate where they'd spend funding. She said K. Borsheim's team has a lot of strategies they have been employing, and city staff have spent a lot of

time going to existing events and getting feedback, so they have heard from thousands of people from different backgrounds.

K. Borsheim added that one thing they try to do when measuring their engagement approach is to measure process as well as outcomes. He noted that the engagement period ended on May 2nd, so they are still summarizing all the various touchpoints, and that will be included in their summary of the milestone engagement. He expressed one of his frustrations of being a planner is that when you do a citywide plan, it is abstract to folks and it is harder for them to take that step higher and provide that level of feedback, which a lot of times results in people looking at the information but not providing the feedback.

CM Kassaw commented that he liked the idea of going out and meeting with the people, so people feel empowered. He asked if they ever use an email data system that sends mass emails to reach out to people.

K. Borsheim responded that they do, but only people that have opted into it, receive the emails.

J. Patterson, Senior Communications Strategist, expressed they have had multiple stories on Aurora TV, in the water bill newsletter, in the weekly electronic newsletter 'This is Aurora', through all social media channels, and news media coverage.

CM Hancock said she would love to get those numbers.

K. Borsheim responded they can provide that summary as soon as it is compiled and said it will be a chapter of the plan.

CM Lawson asked if it is possible to see how many residents in each ward participated.

K. Borsheim answered that they can provide that information for the people who filled out the surveys, but they do not track that data on the touchpoints.

CM Lawson stated that she would like to see how much outreach the project team has done to each ward and how many residents participate. She suggested getting that for a future meeting.

CM Hancock agreed that she would be interested to know how well they did.

K. Borsheim responded that they would provide the summary of all three milestones.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

---

5. MISCELLANEOUS MATTERS

6. ANTICIPATED TOPICS FOR NEXT MEETING

- Agreement for review for the 9 Mile Pedestrian Bridge Project with the Aurora Urban Renewal Authority (AURA) for funding

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

February 20, 2025

Members Present:	Council Member (CM) Stephanie Hancock, Chair; Council Member (CM) Amsalu Kassaw, Vice-Chair; Council Member (CM) Angela Lawson, Member
Others Present:	Laura Perry, Cathy Valencia, Brian Rulla, Julie Patterson, Traci Burton, Mac Callison, Haley Busch Johansen, Tom Worker-Braddock, Cindy Colip, Kurt Muehlemeyer, Scott Bauman, Adrian Morris, Nicholas Johnson, Huiliang Liu, Earl Wilkinson, Mark Smith, Leah Langerman, Krista Orloff, Heath Walter, Jeannine Rustad, Jacob Cox, Leticia Callanen, Mindy Parnes, Elly Watson
Guest:	Keith Borsheim, HDR Engineering; James Katzer, David Evans and Associates; Stacy Tschuor, David Evans and Associates

1. WELCOME AND INTRODUCTION

2. APPROVAL OF JANUARY 23, 2025 MEETING MINUTES

3. CONSENT ITEMS (None)

4. GENERAL BUSINESS

4.a Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Huiliang Liu, Principal Transportation Planner, gave a summary update on Connecting Aurora, the city's Multimodal Transportation Master Plan. He expressed that they are halfway through the project and are in the middle of Milestone 3.

Keith Borsheim, Transportation Planner and Project Manager with HDR Engineering, provided a overview of the project, stating that Connecting Aurora is the first ever citywide multimodal transportation master plan, and they are aiming to identify ways to better connect people to places that they need and want to go, and are aiming to improve safety and convenience for everyone moving around Aurora. He spoke about the mission, vision, and goals for the plan. He gave a brief overview of the timeline and process, stating

that they have made it through the first two phases of the project, which they call the "Discover" and "Synthesize" phases of the project, with the next two phases being "Visualize" and "Realize". He discussed scenarios they developed to analyze what might happen in Aurora, and investments and policy decisions that might be made by the city to help shape how trends impact the city. K. Borsheim voiced that they presented three imagined futures of Aurora to the public through many ways and different settings. The three imagined figures were car-oriented city, transit-oriented city, and neighborhood-oriented city. He discussed the survey demographics and what they heard overall on how each future would impact the community's quality of life. He noted that a transit-oriented city and neighborhood-oriented city received much more positive feedback than the car-oriented city. After gathering input and conducting the analysis, they are now moving forward with identifying recommended projects and multimodal transportation networks that are resilient and would best reflect those potential futures. He said they will also be drafting policies and program recommendations to reflect the values they heard throughout the outreach and will present them in the next couple of months. K. Borsheim said they will continue to check in with the Committee throughout the rest of the project to confirm the approaches they are taking and will share a draft of the plan with the Committee and City Council for the adoption in late fall of this year.

Committee Discussion:

CM Lawson stated that more people would take transit if it was on time and safer and that should be a question, but she does not see that in the presentations. She added that there are some realities with the current transit system that should be told to the people who may want to take transit. She said regarding Bus Rapid Transit (BRT), it will be important for the city to ensure they are engaging with the business and not losing businesses in the city as they are building out the transit network and grid. She thanked them for the presentation and added that it is good to have a vision, but some realities are not being pointed out.

K. Borsheim responded that one of the key aspects of the goals they have developed is a goal for safety, and people feeling safe using their transportation system. He said that it is an important thing that they have heard from the community, and that is top of mind, and they need to emphasize that more in the presentations and in the plan. He noted that the Regional Transportation District (RTD) has struggled over the last few years with funding, and a key aspect of this plan is to identify potential funding strategies to help mitigate funding shortfalls that RTD has experienced. He stated that there is a lack of drivers and the ability to hire and retain drivers has been severely impacted over the last decade, so they are trying to come up with strategies to address that. He added that even though the city does not tell RTD how to run their business, there are opportunities for the city to jump in.

CM Lawson voiced that she sat on the RTD Reimagine Committee for many years and knows what those issues are, but in these presentations, there has to be realities, and she does not see that.

H. Liu shared that they are developing the network right now, which includes a transit network, and there will be projects and programs for transit that will focus on safety, reliability, improvements and connectivity to other destinations; and how to work together with RTD for funding and safety. During Milestones 1 surveys and pop-ups, the project team did ask people what improvements are needed. The project team heard a lot, especially in Ward 1 at MLK and Fletcher Plaza where there were boards where people could place a dot, that transit has been a major concern for a lot of people.

CM Hancock commented that she would like to see more detailed analysis. She said that when she takes the train, it should not take half the day to get where she needs to go. She pointed out that they are using buses to go from the Nine Mile Station to the Florida Station, when they should be getting on the train. She added that there is no notification of when transit issues happen so people can prepare. She shared that they want people to take public transport and know that it is accessible and reliable, that they have staff,

and are consistent with scheduling, so it is important to detail that and be top of mind. She voiced that she likes intent, ambition, and what they are doing, but they need to deal in reality.

J. Rustad added that they have a quarterly standing meeting with RTD and have asked them to help by giving the notice ahead of time and work with our communications to help get the word out for any cancellations. She said if anyone experiences difficulties, please reach out to her, L. Perry, or C. Colip.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

4.b 2025 Roadway Maintenance Program Update

Summary of Issue and Discussion:
Nicholas Johnson, Engineering Supervisor, gave an update on the 2025 Roadway Maintenance Program. He said that Aurora has 1,379 miles of road responsibility, a population of 404,219, spans 165 square miles and the roadway network has grown 78.8% since 1986. He explained that local roads take up a large portion of their network, but arterials tend to take up the bulk of their budget, as they impact quality of life for citizens the most. He stated that they use a pavement management system to decide where they do roadway maintenance to provide the best quality program for the budget that they have. He added that the pavement condition system is what guides them, as it has a grade scale from 0 to 100 on how well a road rides, and the goal is to be 60 and above. N. Johnson said that they are getting a roadway assessment this year, which will help form the next five-year plan and focus budget dollars as they move forward. He discussed pavement life cycle, street maintenance history, program history, and pavement maintenance strategies. He stated they are starting to apply the appropriate strategies at the appropriate time, stretching maintenance dollars and making their network the best that they can. Currently, they have shifted to the Transportation Maintenance Fund and consolidated several programs and financial lines into three core groups, which are concrete repair, street maintenance and reconstruction. He added that they are using the Transportation Maintenance Fund to push them toward the PCI of 73 of the entire networks and are hoping to get there in the next year or two. N. Johnson discussed pavement maintenance strategies within the Rehabilitation Program, which total $31.5 million, and a couple of concrete programs that will come to the Council in the next month or so. Then staff will start with the surface treatment and asphalt work.

Committee Discussion:
CM Lawson asked if they factor in new development when looking at road maintenance and what needs to be done.

N. Johnson answered a little bit. He explained that they have very robust road building requirements, so any development going in with road work will have a good solid foundation, so they only must take care of the surface or just a little below on arterials. He noted they do coordinate with Development Review, Planning and several departments across the city when doing these projects to avoid conflict of activities.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

public transit due to unavailable services where they need to go, and most people that use transit do it because of health/legal reasons, because it is more affordable, and/or it is better for the environment. Regarding freight, they heard concerns of wear and tear on the road, desire for grade separated railroad crossings, safety, and curbside loading and unloading. They also heard that the top urban design features people like included bus stop amenities and multimodal connections, shared streets and event spaces and green gutters along protected bike facilities. K. Borsheim noted that overall, they learned that personal and transportation safety is a focus; driving is viewed as relatively safe; walking and biking feels unsafe; everything is too far away; and transit is also unsafe, too slow, and limited. He discussed the next steps, including attendance and engagement efforts at community events during the summer and applying what they learned to develop a plan for Milestone 2 engagement efforts, which starts early fall 2024. He talked about the framework for the vision, mission, and goals; who they have talked to; and other activities in developing the vision, mission and goals. K. Borsheim presented the draft vision, mission and goals and bedrock practices. K. Borsheim summarized the ten goals that support the city's vision and mission and discussed next steps which includes finalizing the vision, goals, mission and objectives after presenting to City Council.

Committee Discussion:

CM Bergan commented that it was surprising to see that most people said they drive once or twice a week, especially when a lot of people work outside of the city.

K. Borsheim believed it should say at least once or twice a week, but he would doublecheck the data.

CM Lawson said she was surprised to see comfort being the number one factor instead of convenience when traveling by car, and asked what comfort really means.

K. Borsheim explained it was hard to determine how people determined the survey question.

C. Campuzano added that they chose a lot of different adjectives to try and capture how different people feel, and it could be having air conditioning when it's hot as opposed to walking or biking.

CM Bergan asked why the police was not on their list of who they talked to considering police deal a lot with traffic.

K. Borsheim answered that they attempted to talk to the police and were unsuccessful in getting it scheduled, but it is still on their list of follow-up items.

CM Bergan inquired if they would be looking at some commonalities in the applications in the Traffic Calming Program.

K. Borsheim responded that yes, they are working to identify all the technical data available and like the idea of digging deep into the Traffic Calming, so he will work with C. Campuzano to do that.

CM Hancock asked that when looking at the transportation all over the city, what is the role and how will they coordinate with RTD to expand transportation access to other wards.

K. Borsheim stated transit planning efforts are starting to kick off, from which they want to see what an impact on transit availability, transit usage, and transit convenience will have to help them develop strategies and work with RTD to implement them.

L. Perry added that RTD is at the table on this and are very interested in this work.

CM Hancock commented that she wants to make sure it stays top of mind that if they want people to utilize services it must be convenient, accessible, and safe.

K. Borsheim noted they have a Technical Advisory Committee meeting today and RTD, CDOT, and DRCOG are all a part of that meeting and involved throughout the process.

CM Lawson asked where the previous work in the past years with RTD went on the regionality of transit.

K. Borsheim stated they were building on that and not starting from scratch.

CM Bergan asked if Reimagine was the analysis study for efficiency; by looking at ridership per corridor, how many people ride in a certain area, and if they can recoup money if no one is riding in a particular area.

K. Borsheim agreed that is correct and stated it was the system optimization goal.

Outcome: Information only.

Follow-up Action: No follow-up action needed.

4.d. Consideration to Approve a Resolution for the Intergovernmental Agreement between Aurora, E-470 Authority, and Windler District regarding the operations and maintenance for 48th Avenue

Summary of Issue and Discussion:
Haley Johansen, City Engineer, asked for consideration and approval for a resolution for the Intergovernmental Agreement between Aurora, E-470 Authority, and Windler District regarding the operation and maintenance for 48th Avenue. Aurora standards will be used for 48th Avenue, a six-lane arterial, and the city will maintain all the standard roadway items, including pavement, the road and bridge pavement markings, lights and electrical, snowplowing and sweeping, signage, and traffic signals. Windler will maintain the decorative elements, including concrete sidewalk and median special patterns, pedestrian bridge rail, concrete pattern, finish on the parapet walls and bridge columns, enhanced landscaping in the interchange area, and maintain the weeds and debris along the E-470 right of way line. E-470 will be responsible for the bridge structure, approach slabs, underdeck lighting, on/off ramps, fencing, two water quality ponds, and drainage infrastructure.

Committee Discussion: None.

Outcome: The Committee recommended the item move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

4.e. Kings Point Way IGA Between Aurora and Parker For Snow Removal and Street Sweeping

Summary of Issue and Discussion:
Marc Tamburro, Manager of Street Operations, discussed the Kings Point Way IGA between Aurora and Parker for snow removal and street sweeping. Aurora and Parker entered into an original IGA 1/28/2019

Committee Discussion:

CM Hancock asked if there was typically a drastic difference in how Aurora and Denver do things.

H. Johansen stated she did not know the specific difference between Aurora standards versus Denver, but it will follow Aurora's standard for the plan, even in the northern parts.

CM Hancock inquired if there would be any traffic calming or bike lanes or just a flat road.

H. Johansen stated she would have to see if bike lanes were proposed, but the road would be a typical collector section the city sees in its industrial or larger commercial areas.

CM Hancock asked if it would be two or four lanes.

H. Johansen said the section in the interim is a 2 lane with turn lanes. H. Johansen indicated in the long term, she thought the sections would be a collector in the east half and 4-lane arterial on the western half.

Outcome: The Committee recommended the item move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Keith Borsheim, HDR Consulting Team Project Manager, provided an update on the Connecting Aurora Project. He stated they started last fall and are now in the synthesize phase. He noted they did analysis on conditions in the network and conducted the vision, goals, and objective workshop to present to the committee and Council in June for feedback and approval. He explained how high-quality transportation leads to individual and societal benefits through implementation of the plan. Mr. Borsheim discussed safety challenges; mobility challenges; demographic trends; bikeway infrastructure and level of traffic stress; and the transit propensity analysis to look at different demographics that lead to people deciding or needing to use transit. He went over what they heard in their engagement process, and said most people, when asked to describe in one word the transportation system they wanted to see in used the words safe, fast, convenient, frequent, efficient, seamless, and clean. He stated they also discussed areas of congestion and safety concerns, and the key issues were safety for all modes of transportation and increased frequency and access to transit. He also noted next steps, including the state of the system analysis and report; development of a transportation information system; continued public engagement; draft vision, goals, and objectives; and future scenario evaluation and network development.

Committee Discussion:

CM Hancock said the updated numbers meant people were taking advantage of the extension for comments and participating.

CM Bergan stated it did not look like Gun Club Rd was identified on the Denver Regional Council of Government's (DRCOG) congestion slide and urged them to go during rush hours and see it for themselves, because it is extremely congested.

Mr. Borsheim said it is planned to widen Gun Club Road in the future DRCOG network, but they do not have the funding to construct that yet.

CM Bergan asked if they could get their ward results from surveys and open houses.

Mr. Borsheim said yes, but only for people who chose to provide demographic information.

CM Lawson inquired if she could get the sum of the results in Ward 5. She said she did not know how accurate the survey was without the aging community's input, because most of the aging people in her ward did not complete the survey.

L. Perry assured they would make sure the efforts are very well coordinated with the older adults needs assessment currently being completed by Parks, Recreation and Open Sace in collaboration with the Older Adults Commission.

CM Hancock explained it was important to get the older people's input and appreciated the effort. She also asked if they were coordinating with the senior centers to get that data input.

L. Perry stated she would check in on the full engagement plan and would report back to the Committee.

CM Lawson asked if they were capturing and reaching out to the older adult communities and explained she had been hearing about transportation issues in those areas.

L. Perry commented she would get more information on that and follow up.

D. Krzyzanowski added there was Planning staff on both projects and the older adults assessment is being shared with the transportation team.

CM Hancock voiced they did not want the seniors to be left out and need to know they are being heard.

H. Liu added they are in the process of laying out some additional outreach efforts and will reach out to Heather Gardens and other senior centers.

K. Borsheim noted they have information and surveys they can take to their town halls.

CM Lawson agreed that would be helpful.

Outcome: Information only.

Follow-up Action: No follow-up needed.

4. GENERAL BUSINESS

4.a Connecting Aurora - Aurora Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Keith Borsheim, consultant Project Manager from HDR, updated the committee on the City-wide Multimodal Transportation Master Plan, and reiterated that the goal of the project is to develop a citywide vision for the transportation system, as well as goals for the next 20 years that are consistent with the values developed in the Aurora Places Comprehensive Planning process. He explained the outcome will be an integrated multimodal system with Complete Streets concept, and the project will be focused on engagement with residents, businesses, and key stakeholders. He went over a flow chart for the project overview and milestones. Mr. Borsheim also provided an overview

of the engagement plan. He emphasized to the Committee that the project team is committed to engaging with the public in meaningful ways throughout the process with transparency and honesty at the forefront, and they would be listening throughout the process to the community voice. He stated the primary goal of the engagement plan is to gather meaningful input from stakeholders, policy makers, and the public to build a foundation for support and develop integrated mobility visions and solutions. He talked about objectives and outcomes for the engagement, including building upon previous and existing public engagement efforts; listening first; educating local stakeholders, civic and community groups on benefits; being reflective of the community's needs, goals, and values; developing partnerships throughout the community; reaching out to underrepresented communities; and sharing data points and goals during the process. Mr. Borsheim discussed the co-creation of the engagement plan, including 10 to 15 interviews, with key community groups and representatives on ways to engage with audiences in the city. Some of the input received through the co-creation process was to perform outreach by ward; include consideration of new platforms; address transit service gaps; use community leaders as translators; conduct a family night activity; and go to where stakeholders are instead of having meetings in city buildings.

He discussed the key audience they are trying to reach and various engagement tactics to be deployed in the engagement process. He also provided schedules for the four open houses to be held throughout April.

Committee Discussion:

CM Bergan asked if the business and development community were included in the 10 to 15 interviews with key stakeholders.

K. Borsheim answered that several people within the business and development community are invited to the stakeholder group but none of them were able to attend the first one. He said they were reaching out to those that could not attend to follow up and schedule separate one on one interviews.

CM Bergan stated there are already transportation plans in place so there is a need to make sure it is all well connected. She asked if when they do the public forums with residents, will cost limitations be communicated if the community is asking for very expensive things.

K. Borsheim said yes, and tradeoffs will be considered. He added they will have Regional Transportation District (RTD) representation at the open houses to help the public to understand who is responsible for what.

CM Hancock asked if it would be valuable to have some of the open house information available at Councilmember town halls going forward since, they are doing them through the end of April.

K. Borsheim answered yes, they would be providing a packet to council members to use at town halls that has the same information and a link to the open house available online.

CM Lawson stated she hoped they get to the residents of the new developments of the Transit Oriented Developments (TOD). She also said when talking about RTD and transit, she hopes that category could be broken out, because there's a lot of different issues when it comes to safety with those.

K. Borsheim explained that this is a plan for transit, biking, walking, and traffic, and the public open houses will be set up for each category in addition to the RTD station.

Outcome:
Information only.

Follow-up Action:
No follow-up needed.

4.b.Neighborhood Traffic Calming Program Update 2024

Summary of Issue and Discussion:

Carl Harline, Principal Engineer, updated the progress on the Neighborhood Traffic Calming Program (NTCP) to help mitigate neighborhood speeding concerns. He noted that arterial roadways were not eligible due to those roadways being designed for more traffic at higher speeds. He explained that a resident needs to fill out an application and petition for the program. The city then will schedule an evaluation and collect data as well as perform mitigation, installation, and do any follow up studies to confirm effectiveness. He talked about what the traffic calming toolbox consisted of including flashing radar speed signs, speed cushions, chicanes, roundabouts, roadway striping, improved pedestrian crossings, curb extensions at intersections, and road diets. He discussed the NTCP applications they have received to-date, with five of those pending decision; program totals; mitigation overview; and gave a brief history and breakdown of the budget, with $642,500 allocated for this year and the same projected for next year. Mr. Harline said that they were accepting and evaluating additional applications that come in, and they are prioritized according to criteria they evaluate on and based on the annual budget. He said they were beginning to scope out the before/after study to get a good picture of what the first five years of implementation has looked like as it relates to effectiveness in reducing travel speeds, so they can adjust as needed. A presentation on the results of the study is expected to be presented Fall 2024.

Committee Discussion:
CM Bergan asked how they explain needing a roundabout but cannot afford it when they analyze traffic calming applications and looking at what would work. She noted she only saw one roundabout.

C. Harline explained they are currently constructing two this summer, one that went in late summer/early fall 2023, and three are currently under design. He said they are prioritized in the budget to ensure that the roundabout will address the root cause of the speeding issue. Roundabouts are tricky due to limited funding.

CM Bergan asked if they need one that is too much for the budget, was there another budget it could come out of.

C. Colip stated that sometimes they supplement small overages with the miscellaneous streets fund but would end up coming to Council to ask for approval through the budget process to add or include a roundabout.

Mayor Coffman asked if there was a way to download a form or if they just do it online.

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

February 15, 2024

Members Present:	Council Member (CM) Stephanie Hancock, Chair; Council Member (CM) Francoise Bergan, Vice-Chair; Council Member (CM) Angela Lawson, Member
Others Present:	Mayor Michael Coffman, Carlie Campuzano, Elly Watson, Julie Patterson, Lynne Center, Ryan Germeroth, Mac Callison, Huiliang Liu, Haley Busch- Johansen, Michelle Gardner, Cindy Colip, Laura Perry, Scott Bauman, Cathy Valencia, Mindy Parnes, Rachel Allen, Leticia Callanen, Mark Smith, Jeannine Rustad, Tom Worker-Braddock, Stephanie Sinclair, Brian Rulla, Nicholas Johnson
Guest:	Keith Borsheim; Project Manager, HDR

1. WELCOME AND INTRODUCTION

---

2. CONSENT ITEMS (None)

---

3. GENERAL BUSINESS

3.a Connecting Aurora - Aurora Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Mr. Huiliang Liu, Principal Transportation Planner stated that this is the first update on the city's Multimodal Transportation Master Plan to the committee. The project is co-managed by the Planning & Development Services and Public Works Departments. He and Carlie Campuzano, Traffic Manager, are the co-project managers of the project. Mr. Liu then introduced Keith Borsheim, consultant Project Manager, with HDR. Mr. Borsheim gave an update on the Aurora Multimodal Transportation Master Plan. He stated the project was funded through the Denver Regional Council of Governments (DRCOG) Transportation Improvement Program (TIP) grant award with a $3.224 million budget and $644,000 of that coming from the city. He explained they kicked off the project in September and got under way in October to create the project identity, logo, existing conditions analysis, and engagement framework. He displayed the logo and identity, Connecting Aurora. He discussed the main purpose and goals of the project, including creating a city-wide vision, be forward looking and innovative, adaptable, and responsive, creating an integrated multimodal system, focus on providing complete streets for people of all ages, background, abilities and income levels, engaging residents, businesses, and stakeholders, create a unified mechanism to guide policies, programs, standards, and guidelines, and 1reating a capital improvement program. Mr. Borsheim then discussed the scope of the project and

the four phases of the project, including the discovery phase, synthesize phase, visualize phase, and realize phase. He said they were in the discovery phase right now and will be creating a state of the system report to incorporate all the existing conditions analysis, including vehicular traffic, safety, bike and pedestrian, and transit. He stated the state of the system report will also be looking at future trends and analysis. He discussed what would be happening in the next phases, such as creating a citywide vision in goals and objectives and shared values and priorities of the city in the synthesize phase, development of multimodal networks and projects in the visualize phase and creating the policies and programs to implement the plan and a transportation information system in the realize phase. Mr. Borsheim discussed public and stakeholder engagement efforts planned throughout this project. Mr. Borsheim also mentioned a Charrette or workshop included in the project scope to develop vision, goals, and objectives for Aurora's transportation system. He stated that a scenario planning effort, which will include several different scenarios based on the values developed through the engagement process and the Charrette will be undertaken, and they will ultimately present an evaluation of the scenarios on how they impact they city fiscally and their overall quality of life. He said they would also be coordinating with the Adams County safety action plan and incorporate those recommendations into this plan and update the current city practices and standards to reflect the outcomes from this plan. He explained this will all lead to an update to the Capital Improvement Program and discussed other next steps.

Huiliang Liu, Principal Transportation Planner, added it will be a very intensive and complex two-year project process and they will be providing frequent updates to the committee.

Committee Discussion:

CM Lawson asked if they would be looking at wards specifically on the way people move, because different wards move differently. She suggested focusing on that so the public in each ward can see what their challenges are instead of just with the city overall.

H. Liu answered that this project is context sensitive, meaning different areas have different needs, characteristics, and demands. He said from the engagement perspective, they specifically scheduled meeting locations in different areas, because they know different areas have different needs and wants and their consultant will conduct a detailed analysis for different areas. He also stated staff are prepared to go to ward meetings to give presentations and collect input upon request.

CM Lawson said going to the different town halls still did not get to specific people living in the wards because not everyone attends those. She suggested maybe having a communication plan to give out. She said she wanted to make sure they were covering how things are transcending from development and how they are moving in general from ward to ward and overall.

H. Liu explained that from the engagement point, they work very closely with the city's Communications Department and identify various ways to try to outreach to everybody in the city.

C. Colip said the scope and RFP was specifically put together so they could address the different issues within the different areas of the city to address.

CM Bergan asked if they included the developer taskforce they have in the stakeholder advisory committees.

K. Borsheim answered he thinks it does. L. Perry added they will make sure the development committee is heavily engaged in this due to its impacting requirements and specifications.

CM Bergan recommended it would be good to have their input before doing any kind of plan because it may impact them specifically from a planning and cost perspective. She asked if they would integrate adjacent communities.

K. Borsheim explained the adjacent communities were identified on the Technical Advisory Committee and incorporating their recommendations and other projects going on into their plan will be an important consideration. He added one of the key outcomes would be how to better work as a city with adjacent communities and establish policies and frameworks to work with them for those projects.

L. Perry said they recognize community engagement is important, so they will come back with more details on outreach, strategies, location, and when so they can all see the outreach in the community.

CM Hancock expressed people's main concern is getting the nuts and bolts of how they are moving forward in the project to articulate it where people can understand it.

H. Liu stated they were still in the process of co-creation of the engagement plan.

Outcome:
Information only.

Follow-up Action:
No follow-up needed.

3.b 2024 Roadway Maintenance Program

Summary of Issue and Discussion:
Nicholas Johnson, Engineering Supervisor for Public Works, discussed the 2024 Roadway Infrastructure Program. He gave some quick facts about the city. He explained they have 1,365 center line miles of roadway responsibility that they need to keep in good condition for everyone. He stated their roadway network has grown considerably and showed different ways they look at that.

Lynne Center, Deputy Director of Operations for Public Works, stated she was originally hired with the city as a pavement maintenance engineer and has a lot of experience in that area. She talked about their philosophy around pavement management and how they arrive at the list of roads to do every year, including using a computerized system using objective and reputable data. She expressed the goal of the program is to apply the appropriate strategy at the appropriate time, look at many other different factors, work with partners to make sure they are not on the same stretch of road at the same time to minimize opportunities for pavement to be cut into right after it is paved, and all decisions are based on a pavement condition index (PCI). She explained a PCI is made up of a surface condition number and a structural condition number and the scale for PCIs are excellent. She then displayed photos of PCIs and discussed past and current PCIs. She discussed the four major categories of maintenance strategies, including routine maintenance, preventive maintenance, rehabilitation maintenance, and reconstruction maintenance. L. Center stated reconstruction is very expensive and showed a cost comparison between the different strategies and reconstruction.

the designation is official, projects could begin to receive NEVI funds. CDOT is working with Colorado Energy Office to set up a specific grant program and all its criteria. Grant solicitation will be done in Q1 of 2023. The NEVI plan will be updated on an annual basis and will be an ongoing program for at least five years.

Committee Discussion:
CM Murillo asked if Colfax would be an eligible roadway. M. King said yes since Colfax is part of the national highway system. CM Murillo said that she would be open to exploring what this program would look like for the Colfax Corridor. CM Marcano highlighted that Colfax and Havana are state highways that run through impacted communities in Aurora. He advocated for the corridors to be flagged through the NEVI or Charge Ahead Colorado Programs. CM Marcano asked if the corridors would be better suited for Charge Ahead or if they should aim for NEVI designation. M. King said that he will work with staff and other stakeholders on talking about I-225, Havana, or Colfax for the next round. He said that the project comes down to the location and the intended user. He explained that DC fast charging would be better to put in existing fueling stations or retail areas while Level 2 chargers would be a better fit for housing, work areas, community areas, etc. He added that the Level 2 chargers would be more affordable and would not have as many federal requirements. He mentioned that Colorado Energy and Xcel Energy have grants and programs to help communities develop an EV readiness plan which provides a roadmap for what funds will be pursued.

CM Marcano commented that Havana has a large shopping center where people spend a lot of time but there is only one rapid charging station. He mentioned that Havana BID may be interested in the conversation and it could bring more business to them. M. King mentioned that the Charge Ahead Colorado Grant Program has rounds three times a year. CM Coombs requested flagging Parker Road. CM Marcano mentioned getting high-voltage chargers in small-town restaurants and museums to general positive economic impact and increase the likelihood that people will adopt EVs.

Outcome: Information only.

Follow-up Action: No follow-up needed.

4.f. Grant Updates- DRCOG FY2022-2027 Transportation Improvement Program and Infrastructure Investment and Jobs Act Discretionary Grant Programs
Summary of Issue and Discussion:
Victor Rachael and Mac Callison presented an update on applications for the DRCOG FY2022-2027 TIP Calls #1-4. Call #1 represented a regional project focus for approximately $40 million. The DRCOG Board approved the project recommendations which were solely directed for multimodal and transit projects in May 2022. Additionally, the Board approved the Forum(s) recommendations for Call #2, Sub regional Share projects at the September 21st Board Meeting. Call #2 has a total of approximately $173 million for the entire region focused on multimodal and transit projects. The Forums received funding based on their proportional share of population, employment and vehicle miles traveled. Staff submitted three project applications 2 on this Call. Call #4, Sub regional Share Projects, will open on November 28th and applications are due on January 27, 2023. Total funding across all Forums is approximately$193 million for multimodal, bridge, safety, and street projects. The Adams Forum is apportioned approximately $30 million and the Arapahoe Forum funding level is estimated at $36 million.

The six projects in Call #1 were brought into the FY2022 to 2025 TIP. Approved Call #1 projects includes the Denver-sponsored Colfax BRT Project which requested $18 million and was awarded $15 million to support the National Environmental Policy Act (NEPA) process and design activities for the project. Call #2 recommended projects were recently approved at the September 21st DRCOG Board meeting, including the Aurora Multimodal Transportation Master Plan programmed to start in FY 2023. Staff members are currently developing the scope for the RFP with recommendations coming to Council in Q1 of 2023. The notice to proceed is aimed at April 2023. Also moving forward is the Aurora Multimodal Access Improvements Design and Construction for locations on Havana Street, Colfax Avenue, and Yale Avenue focusing on sidewalk connections to bus stops. The Smith Road Multimodal Improvements – Design will also move forward to bring deliver a 60 percent design, including the multimodal side path. All these projects were successful in being awarded full funding as requested.

A total of 19 projects were submitted for Call #3 Regional Share Projects with 13 for the Surface Transportation Block Grant funding track and 6 for the Air Quality and Multimodal Grant funding track. These projects far exceed the available funding. The public comment period has been completed and all proposed project applications will be advancing to DRCOG for scoring. The scores provided are non-binding but serve an informational role. The project review panel is comprised of representatives from all 8 Transportation Forums, CDOT and RTD representatives and will convene on October 31st. The panel will ultimately make recommendations that will be forwarded to the DRCOG Board for approval on November 16th. Prior to Board action, the Call #3, Regional Projects assessment and recommendations will be brought to the Transportation Advisory Committee on November 14th and the Regional Transportation Committee on November 15th.

City staff compiled the Peoria Bridge over Sand Creek Replacement project application which aims to clear it through NEPA and produce a final design. The preliminary design concept at the 25 to 30% will be completed by a consultant team by years end. The project NEPA and final design activities is estimated to cost $3 million with Aurora providing a 40% local match of $1.2 million and the remainder, $1.8 million being requested from available federal TIP funds. The Peoria Bridge has become aged and inadequate and is also a pinch point for traffic. It was constructed in 1996 and carries volumes of over 33,000 vehicles per day including freight traffic. There are concerns about it being structurally deficient, and it also does not provide adequate multimodal pedestrian and bicyclist passage and connectivity.

The Surface Transportation Block Grant funding category for which this proposed project is seeking funding has approximately a total of $27.7 million apportioned to the Adams Transportation Forum. However, there are a total of $121 million in applications. Call 4 has approximately $192 million with a 55-45 split for surface transportation (STP) and Air Quality Multimodal projects. The project package recommendation will advance to the Executive Committee and then Adams County Transportation Forum. Those will be ported to the DRCOG Committees, Transportation Committee, Advisory Committee, RTC, and the DRCOG Board for consideration in March or April 2023. These recommendations will require policy and program changes to the overall TIP.

Call #4, Sub regional Share Projects, applications are anticipated to be e made for the 13th Avenue Multimodal Study for NEPA clearance and 60% design. The High Line Canal Trail Underpass at Colfax Avenue, west of Airport Boulevard, a joint project of the PROS Department and Arapahoe County will be assessed for design and construction activities. Alameda Bridge over I-225 is contemplated as a proposed bridge replacement project with focus on NEPA clearance and design activities. In addition, bike/pedestrian facilities and turn lanes on the bridge must be brought to proper

and current standards. Staff may also propose design and potential construction activities for multimodal access improvements for segments of Havana, and other locations throughout the city. and Gun Club Road for NEPA and final design activities.

Potential projects for the IIJA US DOT Discretionary Grant Programs include Montview Boulevard within the Anschutz/Fitzsimons Innovation Community for construction, Alameda Bridge over I-225 – depending on outcome of Call #4, the Chambers Road at Smith Road/A Line/UPRR Grade Separation, a clear freight category project. Gun Club Road NEPA/design/construction, a Citywide Transportation Safety Study, and the ADA Transition Plan Implementation related to the existence of substantial sidewalk gaps and ADA ramp deficiencies within known right of way. An addition, a city Traffic Management Center/Fiber Optic Communications infrastructure – design and construction.

Committee Discussion:
CM Murillo expressed support for seeking additional funding resources for future projects. CM Coombs expressed appreciation for the presentation and is excited to see how funding can be received to address infrastructure needs. CM Marcano thanked the presenters for providing proper context of how much funding comes through DRCOG and the regional transportation forums.

Outcome: Information only.

Follow-up Action: No follow-up needed.

---

5. MISCELLANEOUS MATTERS
Traffic and Safety Issues in Havana
Carlie Campuzano presented a brief overview of the incidents in Havana. In October 2020, staff received resident outreach regarding a fence crash and a request to repair object marker signs. CDOT assisted in doing a crash review to see if any patterns could be corrected by engineering measures. Signing and striping improvements were then made at 4th and Havana in December 2020. Additional outreach was received in February 2022 for a fence crash at the same corner. Staff worked with CDOT to get another crash history and did additional signing and striping improvements. In the corner, vehicles use the right turn lane to go straight, get across, and cut the queue of traffic. Staff modified the road and emphasized the right-turn lane. In June 2022, a council request was received from CM Medina. A public meeting was held with the residents with CDOT in attendance. All questions were answered thoroughly. More recent requests have been received to look at the area. Staff and CDOT are discussing additional improvements and are setting a meeting with CM Medina.

CM Marcano suggested using a concrete guide or a physical obstruction to change the built environment and eventually change driver behavior. C. Campuzano said that they are collecting a survey and discussing the next steps with CDOT. Signing and striping are the fastest and least expensive ways to address the problem. She also mentioned that there isn't a high or frequent crash pattern. She added that CDOT has extended the lane, added markings, and added signs. They are discussing putting physical barriers. CM Marcano stressed the importance of being proactive as opposed to waiting for a significant pattern to emerge which puts people's lives at risk due to dangerous situations. C. Campuzano explained that they try to be proactive but are also concerned about unintended consequences such as people hitting or swerving more to avoid physical barriers that are put right away.

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

June 2, 2022

Members Present: Council Member (CM) Juan Marcano, Chair; Council Member (CM) Alison Coombs, Vice-Chair; Council Member (CM) Crystal Murillo (absent)

Others Present: Jack Bajorek, Daniel Brotzman, Traci Burton, Mac Callison, Carlie Campuzano, Lynne Center, Cindy Colip, Michelle Gardner, Karen Hancock, Huiliang Liu, Matthew Kozakowski, Daniel Krzyzanowski, Julie Patterson, Mindy Parnes, Victor Rachael, Jeannine Rustad, Elly Watson, Tom Worker-Braddock

1. WELCOME AND INTRODUCTION

---

2. APPROVAL OF MINUTES

The minutes for the April 28, 2022 TAPS meeting were approved as written.

---

3. CONSENT ITEMS (None)

---

4. GENERAL BUSINESS

4.a. DRCOG 20222-2027 Transportation Improvement Program (TIP) Project Application Update and Infrastructure Investment & Jobs Act Overview

Summary of Issue and Discussion:

Mac Callison, Matt Kozakowski, Cindy Colip, and Huiliang Liu presented an update on the Denver Regional Council of Governments (DRCOG) 2022 to 2027 TIP Project application and an overview of the Infrastructure Investment and Jobs Act (IIJA). For Call 2, the TIP is providing $451 million from varying sources from both state and federal funding for transportation projects in the Metroplex. It provides regional funding for regionally and sub-regionally significant projects. Aurora is within the Adams County and Arapahoe County Subregions.

The Infrastructure Investment and Jobs Acct (IIJA) created 25% additional funding from the prior authorization act. This bill is a five-year authorization bill with annual appropriation bills attached to it. There are additional discretionary grant opportunities available at two regional agencies, the State Department of Transportation (DOT), and local jurisdictions. Adams County represents 15.5% of the total regional shares with $23.9 million available and Arapahoe County covers 18.5% with $28.9 million in available funding. The funding amounts will ebb and flow slightly as additional formula finalization of numbers from the US DOT come through to the Colorado Department of Transportation (CDOT) and CDOT disseminates those to the Metropolitan Planning Organizations (MPOs) such as DRCOG. Call 2 projects need to be submitted because the Congestion Mitigation and Air Quality Improvement Program (CMAQ) and Senate Bill 21-260 multimodal transportation and mitigation options fund (MTMOF) have a completion date of 2026.

Call 2 consists of four selection criteria: sub regional impact for 30%, Metro Vision Regional Transportation Plan (RTP) priorities for 50%, leveraging for 10%, and project readiness for 10%. Sub regional impact addresses environmental justice, marginalized populations, jurisdictions, beneficiaries, and shared outcomes. The Metro Vision RTP priorities include multimodal options, air quality outcomes, transit system support, safety, freight systems, goods movements, and active transportation infrastructure and programs. There is a higher criterion point award for projects matched above the minimum 10% for the Multimodal Options Fund and 20% for the Surface Transportation Block Grant (STBG) Funding. Project readiness accounts for design and construction projects with National Environmental Policy Act (NEPA) clearance, railroad, waters, wetland involvement, etc. Applications for Call 2 are due on June 24, 2022. Once they are submitted, DRCOG will review them in terms of project eligibility and provide a scoring. The DRCOG scoring is advisory. Then, it will be placed within the Arapahoe and Adams County Forums. The forums will then render a recommendation to the DRCOG Committees and present the projects to the Transportation Advisory Committee, the Regional Transportation Committee, and the DRCOG Board.

Call 1 was a regional project call for $40.3 million from the CMAQ and MTMOF. Through this call, the Denver East Colfax Bus Rapid Transit (BRT) was awarded $12 million to support continued NEPA clearance and design. Call 3 will allocate $47.5 million for regional projects. For Call 4, Adams County will have $29.5 million, and Arapahoe County will allocate $35.4 million. Calls 3 and 4 have multiple funding sources compared to Calls 1 and 2 which are sourced from CMAQ and MTMOF. For Calls 3 and 4, the 40% from CMAQ and MTMOF requires a 10% match while the 60% will be from STBG with a 20% match.

Call 3 is expected to open in August or September 2022 while Call 4 will open in December 2022

Call 2 focuses on multimodal transit and supportive projects, transportation demand management, transportation management associations and organizations (TMA/TMO), and greenhouse gas mitigation projects. CDOT Policy Directive 1610.0 talks about the greenhouse gas mitigation action plans. A presentation will be coming to the board for consideration of possible actions focused on local agencies relative to zoning density regarding parking considerations and policies.

Aurora has three projects that are qualified for Call 2 which are the City-wide Multimodal Transportation Master Plan, the Sidewalk Multimodal Access Improvements, and Smith Road Bicycle/Pedestrian Multi-use Path.

The City-wide Multimodal Transportation Master Plan will define the city's goals in terms of transportation, mobility networks, policies, and programs with prioritized projects and phasing levels. This will be an interdepartmental effort with the support of the city council and city management. There will be an emphasis on a multimodal transit, bike/ped, and vehicular transportation system which will provide an array of choices for mobility and provide safe environments for constituents. A citywide safety study is also recommended. Freight transport systems and the vision zero safety element will also be addressed in addition to mobility hubs and TMA/TMOs. New technology autonomous vehicles will be studied for safety aspects as well as future trends. There will be a focus on implementation strategies, funding opportunities, partnerships with adjacent jurisdictions and federal and state partners, and identifying priorities in terms of phasing. Systemic performance metrics and monitoring systems will be put in place. Staff is looking into providing mobility annual or biannual reports that will present the trends, benefits, and return of investments. The master plan will link

mobility modes and provide residents with community clarity and consistency. Community engagement programs will be done through surveys, focus groups, and other outreach platforms. The plan will continue to be updated to be relevant in terms of investment and meeting goals and objectives.

The Sidewalk Multimodal Access Improvements project will be a continuation of efforts to enhance pedestrian and bicycle access. This is in conjunction with the current Sidewalk Gap Closure TIP project which emphasized missing or substandard sidewalks. In the Havana Corridor Transportation Study, multiple areas were identified that needed improvements for transit. Havana Street, Yale Avenue, Chambers Road, and Colfax Avenue were identified as areas in need of transit stop connectivity. This project will serve vulnerable populations, provide safer access to all users, and implement ADA compliance. On the east side of Havana, there are no sidewalks that people who need wheelchairs can navigate safely. In the area, there are obstructions, unpaved sidewalks, and high-speed and high-volume traffic. North of Colfax Ave, locations were identified to improve access to transit stops at 13th Avenue, 17th Avenue, and Montview. In the southern part of Yale Avenue, there is no sidewalk. Bus access will also be a focus on the segment east of Peoria. Bus stops are standing in the middle of grassy areas which causes difficulty to access. On Chambers Road, there is also an area with bus stops serviced by Bus 153 in the middle of grassy areas which causes safety and accessibility concerns. In the area serviced by Bus 15, the segment of the corridor is unpaved. The city staff is in the process of developing cost estimates for the upcoming grant application.

The Smith Road Corridor is approximately eight miles long and is an important corridor for transit and jobs. There is a large presence of logistics-driven businesses that have lower-wage jobs that rely on transit. The project will produce a safe multimodal facility to allow for connections along the corridor. It proposes to install regional protected and separated bike and pedestrian facilities. Staff is looking into a varied approach for different segments of the 9-mile corridor due to the heavy rail & commuter rail presence as well as high volume of traffic and turning movements associated with the logistics uses. The installation of drainage infrastructure is also being considered. This varied approach with context-sensitivity throughout the corridor will drive construction costs. The proposed application in Call 2 is to utilize the federal funding and the 10% MMOF funding match to develop a 60% design effort for the entire corridor to address different factors that will affect the design and cost. This will allow the city to better prepare and move forward with future projects and applications with accurate costs. The 60% design allows the city to untether the bike and pedestrian facilities from the road. From this, different areas will be prioritized according to what needs to be improved first.

Staff is also proposing potential projects for Calls 3 and 4. The 13th Avenue Study will be used to identify constraints and opportunities and conduct NEPA preparations to have the 13th Avenue Multimodal Improvements queued for construction. Arapahoe County is fostering an initiative to look at Highline Canal Underpass crossing opportunities with one at Sable and another location on Colfax Avenue west of Airport Boulevard. The Alameda Bridge over I-225 is also proposed for an enhanced bridge replacement to advance the concept design and conduct NEPA preparations to be competitive for federal funding in the future. Concept design and NEPA preparations are also needed for the Chambers Road Grade Separation over Smith Road and Union Pacific Railroad where tanker trucks and semis frequently cross. The Peoria Bridge over Sand Creek is functionally and structurally at its limits and lacks sufficient bike/ped facilities. This bridge is urgently needed to be replaced and enhanced. Assessments will be done relative to discretionary grant opportunities as well as Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Grants. The Montview Boulevard on the Anschutz Medical Campus's final design is close to being completed. The next step is advancing it with partners on the campus for implementation. This project is a multimodal corridor improvement to serve the entire campus.

For discretionary grants, there is a match ratio of 30 to 50% in terms of the local match versus the federal share. For the RAISE Grant, there is funding from $10 million to upwards of $25 million. The next notice of funding (NOFO) for this is estimated to be in Q1 of 2023. The Peoria Bridge Project, Alameda Bridge Project, and Montview Boulevard Project are great candidates for this grant. The Chambers Grade Separation will be a candidate for the INFRA Grant Program geared toward freight and regionally significant projects that enhance goods movement. The NOFOs for the Citywide Traffic Transportation Safety Study came out in May with due dates in September 2022. This is a prerequisite to competing for actual design and construction project improvements and the next rounds of funding. Locations in Aurora that need safety improvements have been identified. Requests for funding to address those locations will be seen in the 2023 budget process. This will be supplemented by the safety study and implementation grant.

Committee Discussion:

Council Member (CM) Marcano asked if the grants for reducing vehicle miles traveled (VMT) only include infrastructure improvements or if they could also apply to the redevelopment of certain areas to reduce VMT. M. Callison said that they are principally focused on initiatives that will realize a mode shift in trip making such as fuel-efficient and sustainable energy transit, micro-transit, or human- powered active transportation options. He added that DRCOG briefed the board on what may be considered to meet greenhouse emission targets. DRCOG believes that the increasing densification around transit stations and telework will be quantified in the emissions estimation process as per the 2050 Regional Transportation Plan (RTP). However, he added that there is still a 20 to 30% gap, which calls into play the Greenhouse Gas Rule and the CDOT policy directive 1610.0 (Greenhouse Gas Mitigation Measures). The directive offers choices. One is that the region identifies resources in the current RTP and directs those in capacity or operational improvement projects into advancing and bringing BRT corridors sooner and reprogramming funds. Another option is to develop a regional mitigation action plan. M. Callison added that the board will have further conversations regarding what credits and reductions in emissions can be reasonably accounted for by the management parking system, actions, policies, and programs. He mentioned that they will assess allowing density bonuses in areas near fixed guideway transit, BRT lines, high-frequent transit, and bus lines. In addition, they will also assess the ability to move the needle from an emissions perspective and how they will fit within the plan.

CM Marcano asked for clarification on whether there is potential given that that is the direction that DRCOG is taking. M. Callison confirmed this. He mentioned that it must be context and jurisdictional-sensitive. CM Marcano said that he hopes that they will be able to densify underperforming commercial areas and use those to create transit hubs and walkable and bikeable environments. Over the long term, this will create a network throughout the city while preserving existing housing stock.

CM Marcano asked for clarification regarding Smith Road. He asked if they can pre-design a portion of the corridor to get a better idea of where to put the separated protected bike infrastructure. M. Kozakowski clarified that it would go through the entire strip and not just a portion. CM Marcano expressed that he is happy to have that separated. He thanked staff for including Yale in the sidewalk multi-modal access improvements.

CM Coombs thanked staff for including Chambers in the sidewalk improvement. She highlighted areas near bus transit that are difficult to access for people in wheelchairs and areas along Peoria that have narrow sidewalks. CM Coombs stressed the importance of sidewalks that provide access to people

with mobility impairments or those that need mobility devices. She asked what financial contributions the Anschutz Medical Campus is making for the project. M. Callison said that they participated in the cost of the design effort. C. Colip said that there has not been any contribution to date, but they are working with city management to start those discussions. CM Coombs said that it's important for them to be contributing financially given that they have more resources than the city in some cases.

CM Coombs asked if they could get funding support if they wanted to design a city-level version of the Employer Based Trip Reduction Program (ETRP) for the city of Aurora employees and in partnership with large employers within the city. M. Callison said that they have a Transportation Demand Management (TDM) study that is about to start as the Federal Highway Administration is reviewing the scope and the city was awarded a grant from DRCOG in 2021. The study will focus on the I-70 corridor, the Aerotropolis Area, Smith Road, and logistics and distribution centers. They would be in partnership with the Northeast Transportation Connections (NETC) or TMA/TMO. He said that it would be competitive in Call 4 for sub regional. He added that there is an almost equal mix between Surface Transportation Block Grant and Air Quality and Mitigation Funds in Call 4. He said that it makes sense to have a focused TMA/TMO whose business is to address alternative opportunities in the I-225 Corridor. He mentioned that they will learn from the Smith Road I-70 East Corridor perspective regarding scalability and use those learnings moving forward. CM Coombs said that she would like to have more conversations about it specifically for city employees and other opportunities for TMA/TMO. She added that she hopes that many or all projects will get funded. CM Marcano agreed with CM Coombs.

Outcome: The Committee approved the item to move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

6. ANTICIPATED TOPICS FOR NEXT MEETING

- 13th Avenue Study Update
- 2021 to 2022 Snow and Ice Report

Karen Hancock mentioned that Centennial Airport requested to make a presentation to the TAPS Committee. She said that they could put it on the agenda for the July or August meeting. CM Marcano said that he is happy to accommodate them for the next month's agenda if possible. K. Hancock said that she will work with C. Colip and V. Rachael regarding the scheduling.

---

7. CONFIRM NEXT MEETING

The next meeting was confirmed for June 30, 2022, at 1:00 PM. It will be a virtual meeting.

Approved: _____ 07.01.2021

CM Juan Marcano, Committee Chair **Date**

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING THE 2018 COMPREHENSIVE PLAN TO ADOPT BY REFERENCE CONNECTING AURORA, THE CITY OF AURORA'S MULTIMODAL TRANSPORTATION MASTER PLAN (CONNECTING AURORA PLAN)

WHEREAS, Section 146-5.4.1.A of the Unified Development Ordinance provides for the adoption of a Comprehensive Plan for the orderly development and redevelopment of the City of Aurora, Colorado (the "City"), and that this plan shall serve to guide the City Council and the Planning and Zoning Commission in their decisions and recommendations in all land use decisions within the City; and

WHEREAS, on October 8th, 2018, the City Council passed Ordinance 2018-37 adopting the 2018 Aurora Comprehensive Plan (the "Comprehensive Plan"); and

WHEREAS, the Comprehensive Plan establishes a land use map providing varying placetypes for City design; and

WHEREAS, the purpose of this amendment is to update the Comprehensive Plan to reflect community needs and based on significant public input; and

WHEREAS, the purpose of this amendment to the Comprehensive Plan is to build on past investments, continue planning for development and growth, and to identify new opportunities to improve transit service and multimodal access throughout the city; and

WHEREAS, on _____, following a public hearing, the Planning and Zoning Commission voted to recommend approval of an amendment to the Comprehensive Plan to adopt by reference the Connecting Aurora, Multimodal Transportation Master Plan; and

WHEREAS, Section 146-5.4.1.A of the Unified Development Ordinance provides that City Council amends the Comprehensive Plan by an ordinance approved by a vote of not less than two-thirds of the entire membership of the City Council, provided the amendment promotes the long term economic, social, and environmental health of the City, and that it protects the public health, safety and welfare of the citizens of Aurora.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The Aurora Comprehensive Plan is hereby amended to adopt by reference to the Connecting Aurora, the City of Aurora's Comprehensive Multimodal Master Plan as shown in the attached Exhibit A.

Section 2. The amendment to the Comprehensive Plan shall be in the form as filed with the Office of the City Clerk and presented to the City Council at tonight's meeting.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

INTRODUCED, READ AND ORDERED PUBLISHED this _____ day of _____, 2026.

PASSED AND ORDERED PUBLISHED this _____ day of _____, 2026.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the R-2 District (Medium Density Residential) to the MU-A District (Mixed-Use Airport) for approximately 104 acres. The undeveloped property is located east of the future Harvest Road, north of the future 12th Avenue, west of Powhaton Road, and south of Interstate 70. The property is within the Tributary development and is designated for commercial and multi-family uses on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from R-2 to MU-A to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, R-2, primarily allows low-to-medium density residential uses. Changing the zoning to MU-A will allow commercial and higher-density residential uses in this location to take advantage of its proximity to the Harvest Road-Interstate 70 interchange that is under construction.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to MU-A. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include responses to approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as a "City Corridor," which promotes commercial buildings oriented toward primary streets, an accessible and attractive street network, and development organized around green spaces or plazas to foster a sense of community. This placetype supports both medium and high-density residential uses. The MU-A District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☒ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to MU-A?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. (UDO §146-5.4.1.C.3.a.ii) (McClelland)

Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

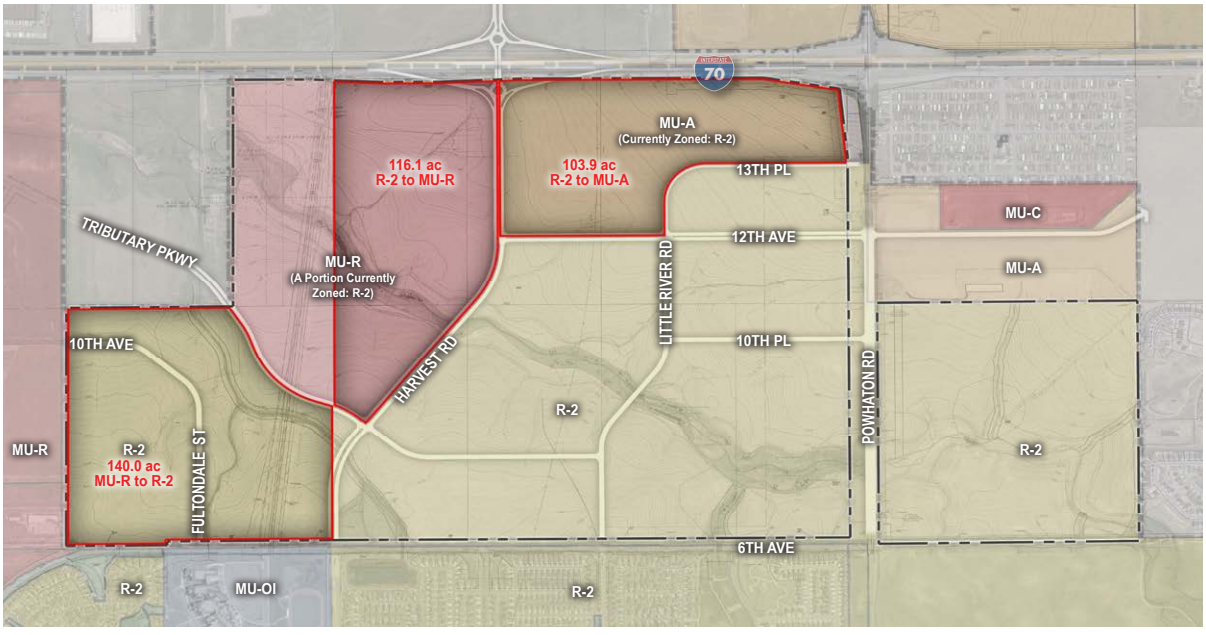
Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

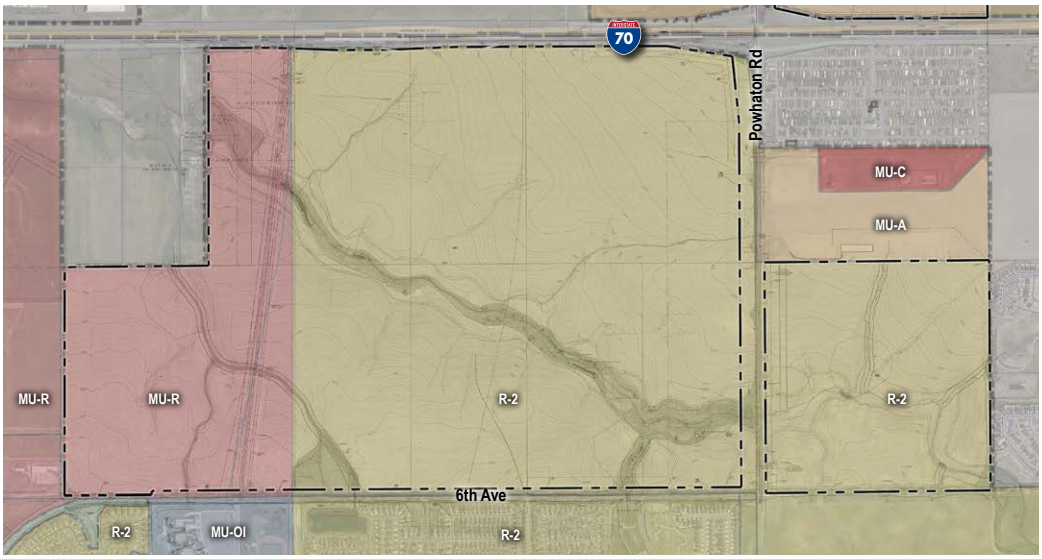
Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.

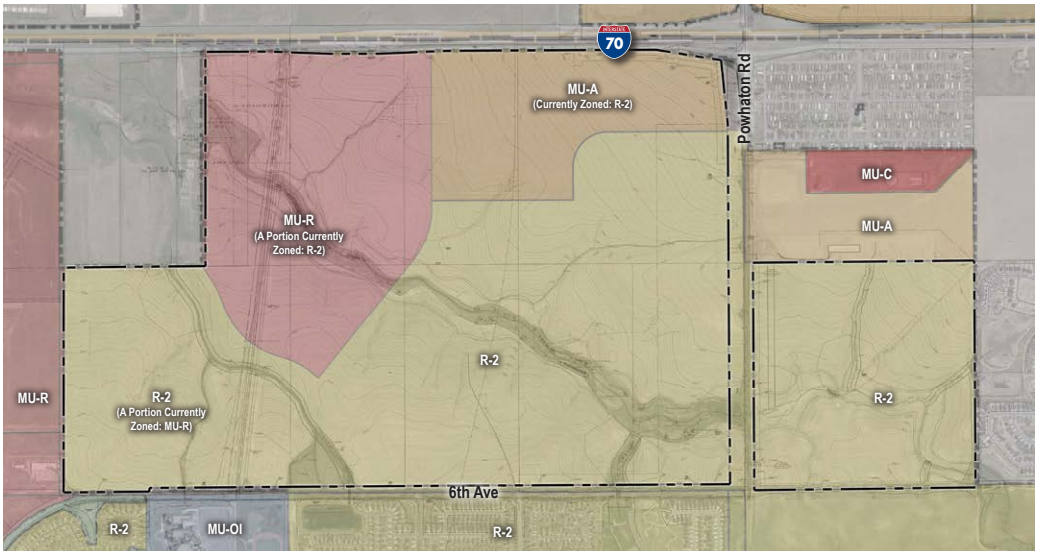
PROPOSED ZONE MAP AMENDMENTS



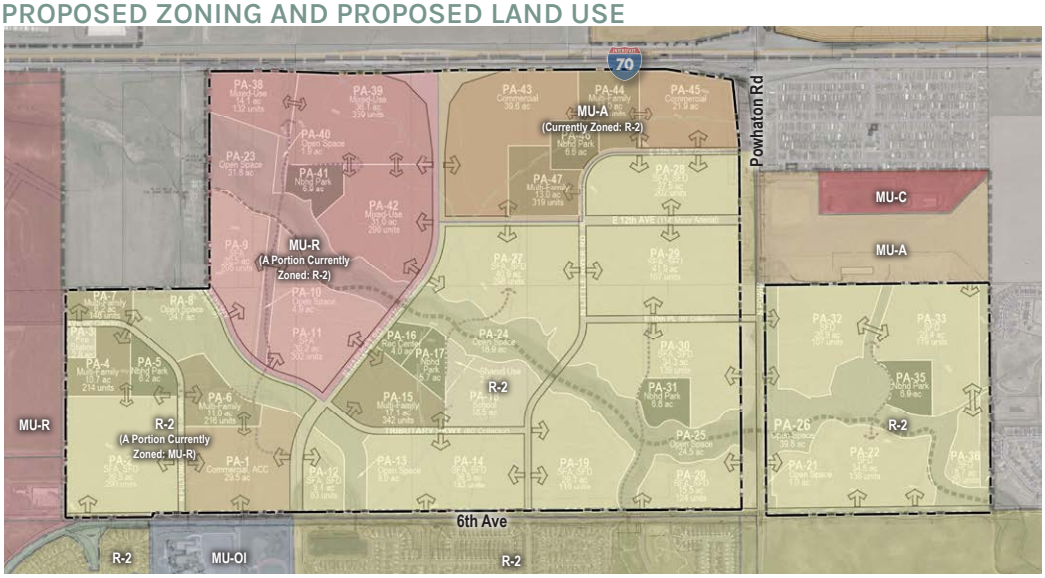
EXISTING ZONING



PROPOSED ZONING



PROPOSED ZONING AND PROPOSED LAND USE



APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.

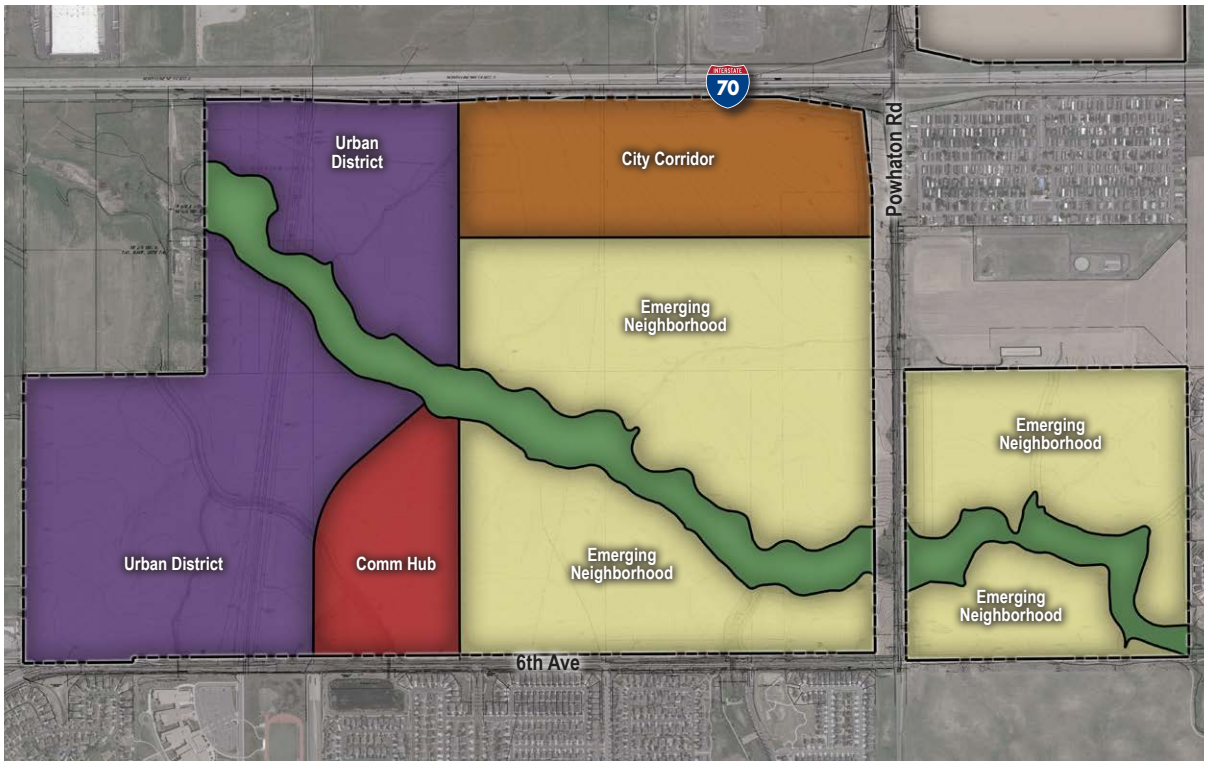
Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP



APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.

The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results

AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

Zoning Map Amendment Approval Criteria

City of Aurora Unified Development Ordinance, Section 146-5.4.1.C.3:

An application for changes to the Zoning Map for individual parcels shall only be recommended if the Planning Director and the Planning and Zoning Commission finds that the following criteria have been met, and shall only be approved if City Council finds that the following criteria have been met:

1. *The change to the Zoning Map is needed to correct an error (change in the character of surrounding areas does not constitute an error in the map); or*

2. *The change to the Zoning Map is required because of changed conditions or circumstances on the property or in the surrounding area and:*

a) *The applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, with other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district;*
b) *The applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible with surrounding development through development conditions; and*
c) *The applicant demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application.*

- Recommended approval (6-0) of the Zoning Map Amendment for 104 acres from the R-2 District to the MU-A District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 189 acres from the R-2 District to the MU-R District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 143 acres from the MU-R District to the R-2 District to City Council

Planning and Zoning Commission Recommendations

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 104 ACRES OF LAND TO MIXED-USE AIRPORT (MU-A), LOCATED EAST OF FUTURE HARVEST ROAD, WEST OF POWHATON ROAD AND NORTH OF FUTURE 12TH AVENUE (MU-A TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 104 acres of land located east of Harvest Road, west of Powhaton Road and north of 12th Avenue, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Medium-Density Residential District (R-2) to Mixed-Use Airport (MU-A); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Mixed-Use Airport District (MU-A) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

☒ Minutes Attached

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the R-2 District (Medium Density Residential) to the MU-R District (Mixed-Use Regional) for approximately 189 acres. The undeveloped property is located west of the future Harvest Road, north of the future Tributary Parkway, east of the future Fultondale Street, and south of Interstate 70. The property is within the Tributary development and is designated for mixed-use, multi-family, and single-family attached on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from R-2 to MU-R to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, R-2, primarily allows low-to-medium density residential uses. Changing the zoning to MU-R will allow mixed-use, commercial, and medium-to-high density residential uses in this location to take advantage of its proximity to the Harvest Road-Interstate 70 interchange that is under construction.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to MU-R. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include the Planning and Zoning Commission's responses to the Zoning Map Amendment approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as an "Urban District," which represents the city's most intensely developed areas and is characterized by a relatively dense urban form, pedestrian-friendly environments, and a diverse mix of uses. This placetype also supports both medium and high-density residential uses that are well-integrated with commercial areas. The MU-R District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☒ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to MU-R?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

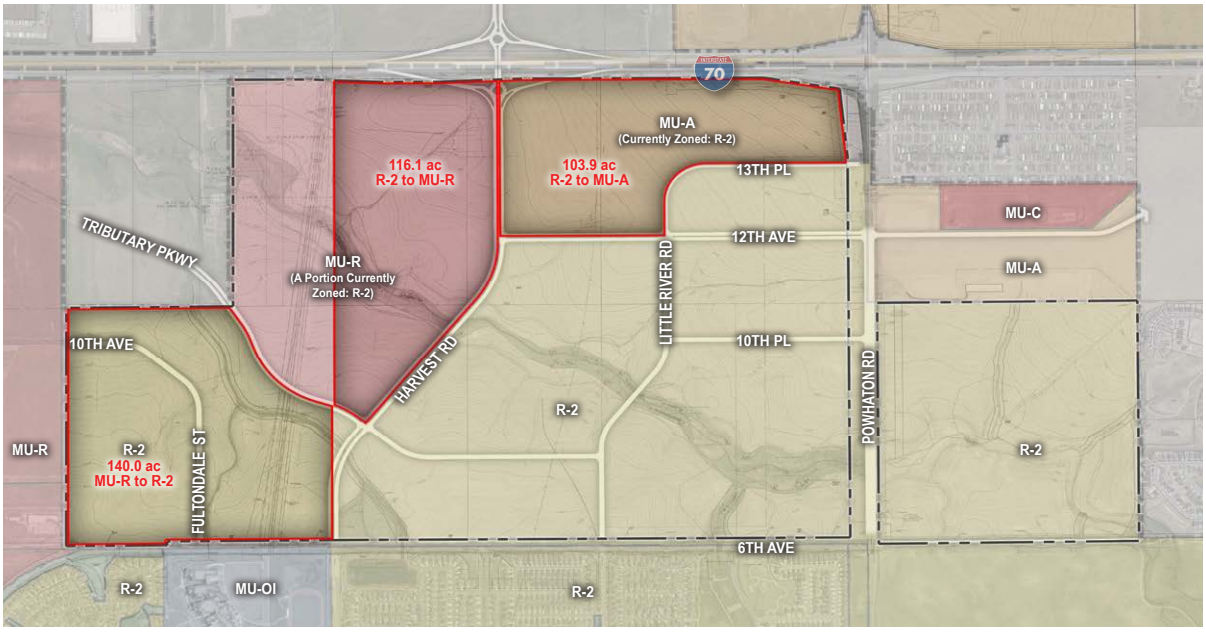
Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

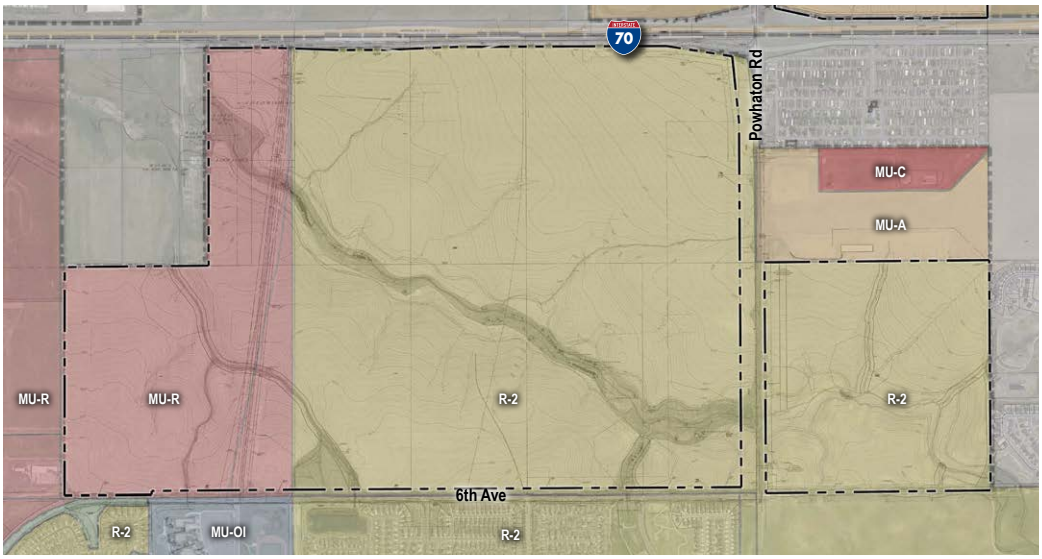
Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.

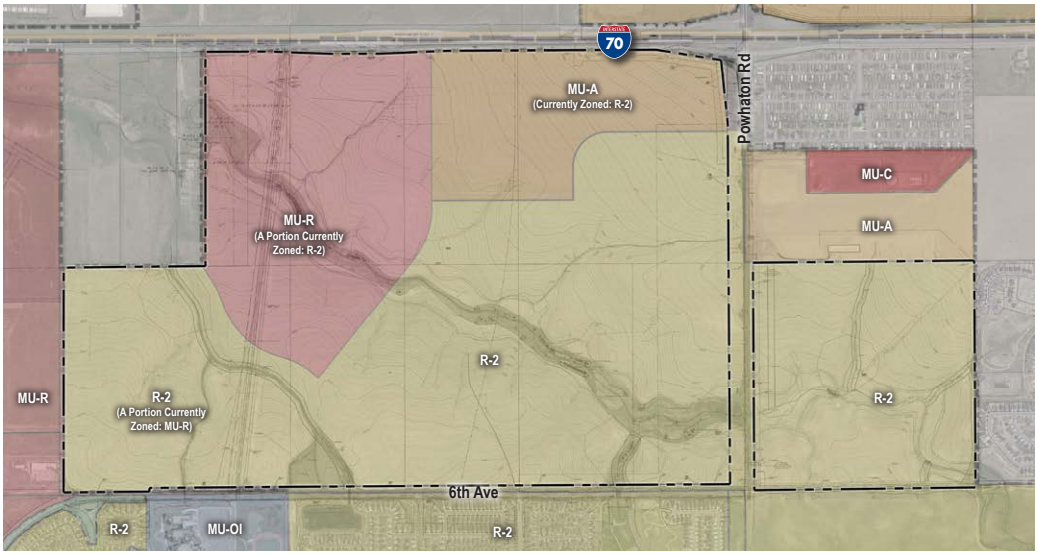
PROPOSED ZONE MAP AMENDMENTS



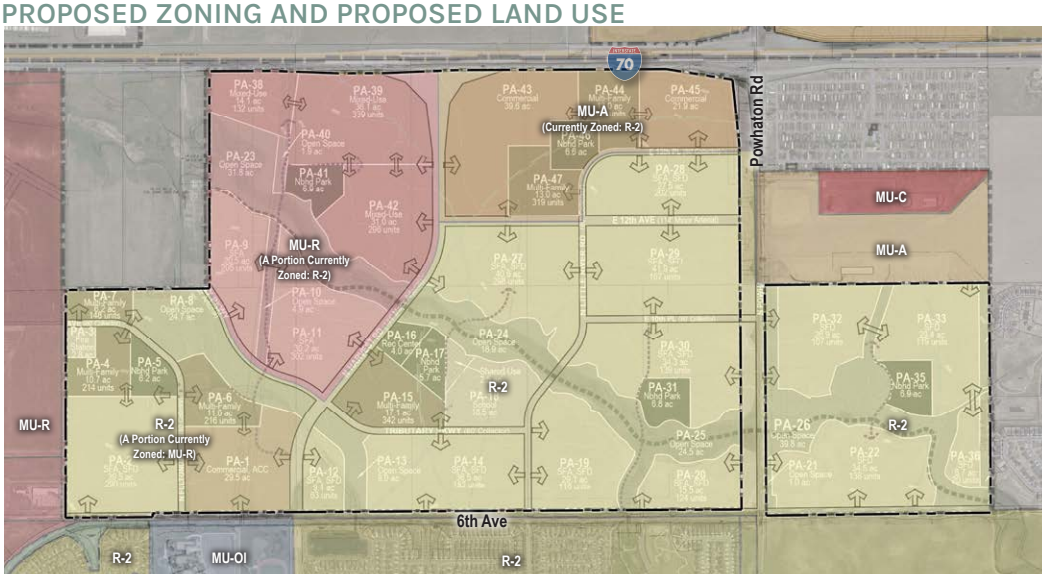
EXISTING ZONING



PROPOSED ZONING



PROPOSED ZONING AND PROPOSED LAND USE



APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.

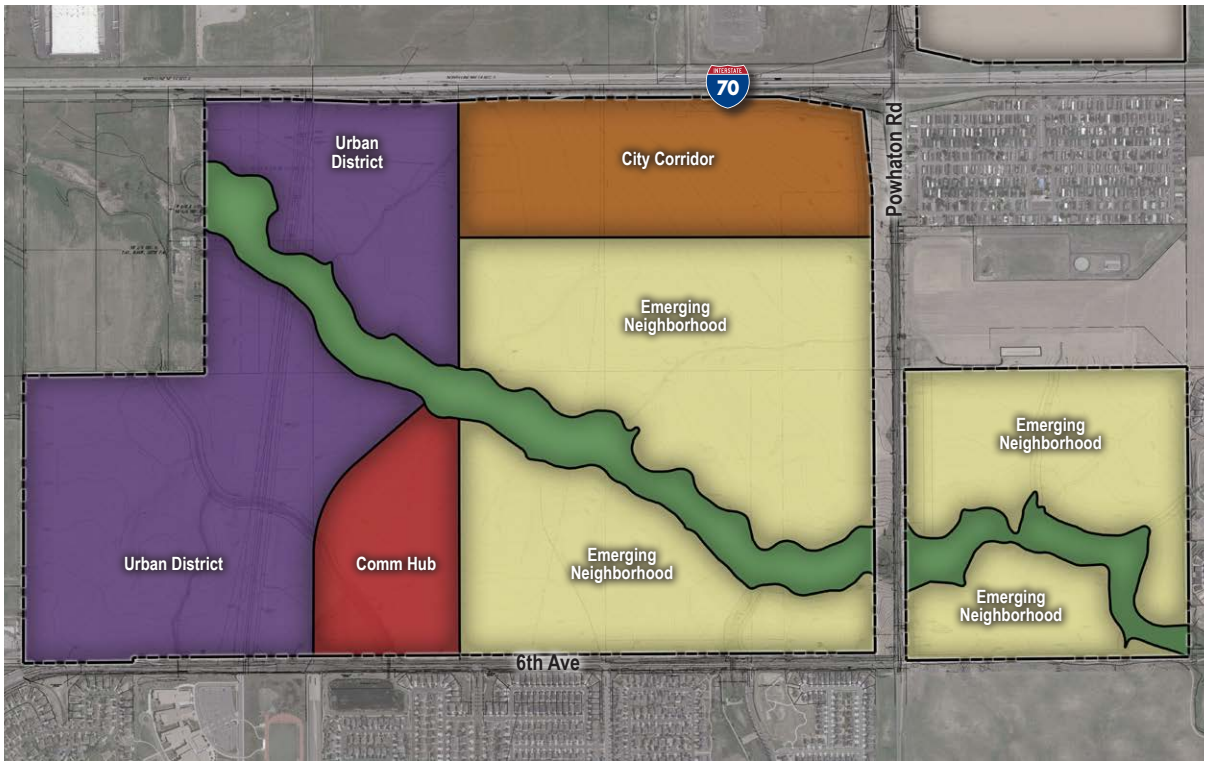
Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP



APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.

The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results

AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 189 ACRES OF LAND TO MIXED-USE REGIONAL (MU-R), LOCATED WEST OF FUTURE HARVEST ROAD AND NORTH OF FUTURE TRIBUTARY PARKWAY (MU-R TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 189 acres of land located west of Harvest Road and north of Tributary Parkway, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Medium-Density Residential District (R-2) to Mixed-Use Regional (MU-R); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Mixed-Use Regional District (MU-R) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

EXHIBIT B
REZONING (MU-R) DESCRIPTION

A PORTION OF THE EAST HALF OF SECTION 6 AND THE WEST HALF OF SECTION 5, BOTH IN TOWNSHIP 4 SOUTH, RANGE 65 WEST OF THE SIXTH PRINCIPAL MERIDIAN, CITY OF AURORA, COUNTY OF ARAPAHOE, STATE OF COLORADO, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE CENTER QUARTER CORNER OF SAID SECTION 6, WHENCE THE NORTH LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 6, BEARS NORTH 89°24’14” EAST, A DISTANCE OF 2636.70 FEET, WITH ALL BEARINGS REFERENCED HEREIN BEING RELATIVE THERETO;

THENCE ALONG SAID NORTH LINE NORTH 89°24'14" EAST, A DISTANCE OF 1,615.55 FEET TO THE **POINT OF BEGINNING**;

THENCE CONTINUING ALONG SAID NORTH LINE, NORTH 89°24'14" EAST, A DISTANCE OF 32.39 FEET TO THE SOUTHEAST CORNER OF LOT 1, BLOCK 1, MCENIRY SUBDIVISION, RECORDED JUNE 11, 2008, AT RECEPTION NO. B8066656, IN THE OFFICIAL RECORDS OF ARAPAHOE COUNTY, COLORADO;

THENCE ALONG THE EASTERLY LINE OF SAID LOT 1, BLOCK 1, AND THE SOUTHERLY RIGHT-OF-WAY OF E-470, DESCRIBED IN SPECIAL WARRANTY DEED RECORDED JUNE 19, 1996 AT RECEPTION NO. A6077434, IN SAID OFFICIAL RECORDS, NORTH 00°01'47" WEST, A DISTANCE OF 2,494.31 FEET TO THE SOUTHERLY RIGHT-OF-WAY OF I-70 FRONTAGE ROAD, DESCRIBED IN SPECIAL WARRANTY DEEDS RECORDED MARCH 30, 1956 IN BOOK 960, PAGE 478, IN SAID OFFICIAL RECORDS;

THENCE ALONG SAID SOUTHERLY RIGHT-OF-WAY AND THE SOUTHERLY RIGHT-OF-WAY OF SAID I-70 FRONTAGE ROAD DESRICED IN SPECIAL WARRANTY DEED RECORDED JUNE 15, 1956 IN BOOK 972, PAGE 40 AND SPECIAL WARRANTY DEED RECORDED APRIL 9, 1956, IN BOOK 961, PAGE 519, BOTH IN SAID OFFICIAL RECORDS, NORTH 89°43'21" EAST, A DISTANCE OF 738.93 FEET TO THE SOUTHERLY RIGHT-OF-WAY OF I-70 FRONTAGE ROAD DESCRIBED IN SPECIAL WARRANTY DEED RECORDED JANUARY 16, 1976 IN BOOK 2411, PAGE 120, SAID OFFICIAL RECORDS;

THENCE ALONG SAID LAST DESCRIBED SOUTHERLY RIGHT-OF-WAY THE FOLLOWING 4 COURSES:

1. SOUTH 87°58'12" EAST, A DISTANCE OF 248.37 FEET;
2. SOUTH 87°58'45" EAST, A DISTANCE OF 502.20 FEET;
3. NORTH 89°44'16" EAST, A DISTANCE OF 549.99 FEET;
4. NORTH 87°35'35" EAST, A DISTANCE OF 584.00 FEET;

THENCE DEPARTING SAID SOUTHERLY RIGHT-OF-WAY, SOUTH 00°14'46" EAST, A DISTANCE OF 1,801.79 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE WESTERLY HAVING A RADIUS OF 1,000.00 FEET;

THENCE SOUTHERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 39°00'35", AN ARC LENGTH OF 680.85 FEET;

THENCE TANGENT TO SAID CURVE, SOUTH 38°53'09" WEST, A DISTANCE OF 1,745.41 FEET;

THENCE NORTH 51°06'51" WEST, A DISTANCE OF 100.00 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 930.00 FEET;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 21°20'55", AN ARC LENGTH OF 346.52 FEET;

THENCE TANGENT TO SAID CURVE, NORTH 72°35'10" WEST, A DISTANCE OF 125.55 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE NORTHEASTERLY HAVING A RADIUS OF 930.03 FEET;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 51°58'00", AN ARC LENGTH OF 843.53 FEET;

THENCE NON-TANGENT TO SAID CURVE, NORTH 20°37'06" WEST, A DISTANCE OF 111.21 FEET TO THE BEGINNING OF A NON-TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 927.10 FEET, THE RADIUS POINT OF SAID CURVE BEARS SOUTH 69°23'09" WEST;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 12°47'23", AN ARC LENGTH OF 206.95 FEET;

THENCE NON-TANGENT TO SAID CURVE, NORTH 33°21'12" WEST, A DISTANCE OF 216.52 FEET TO THE **POINT OF BEGINNING**.

CONTAINING AN AREA OF 8,258,643 SQUARE FEET OR 189.592 ACRES, MORE OR LESS.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the MU-R District (Mixed-Use Regional) to the R-2 District (Medium Density Residential) for approximately 143 acres. The undeveloped property is located west of the future Harvest Road, north of 6th Avenue, east of the future Fultondale Street, and south of Tributary Parkway. The property is within the Tributary development and is designated for single-family detached, two-family, single-family attached, and commercial on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from MU-R to R-2 to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, MU-R, primarily allows commercial and medium-to-high density residential. Changing the zoning to R-2 will allow more residential uses in this area to provide a better transition between the existing residential uses in Cross Creek and Adonea to the south. The applicant will designate a 27-acre Administrative Activity Center (AAC) at the northwest corner of the future Harvest Road and 6th Avenue to provide commercial development for Tributary and the surrounding neighborhoods.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to R-2. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include responses to approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as an "Urban District" and "Commercial Hub," which both encourage a diverse mix of uses, an accessible and attractive street network, and commercial and residential development organized around green spaces to foster a sense of community. With the inclusion of the proposed Administrative Activity Center, the R-2 District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to R-2?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. (UDO §146-5.4.1.C.3.a.ii) (McClelland)

Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

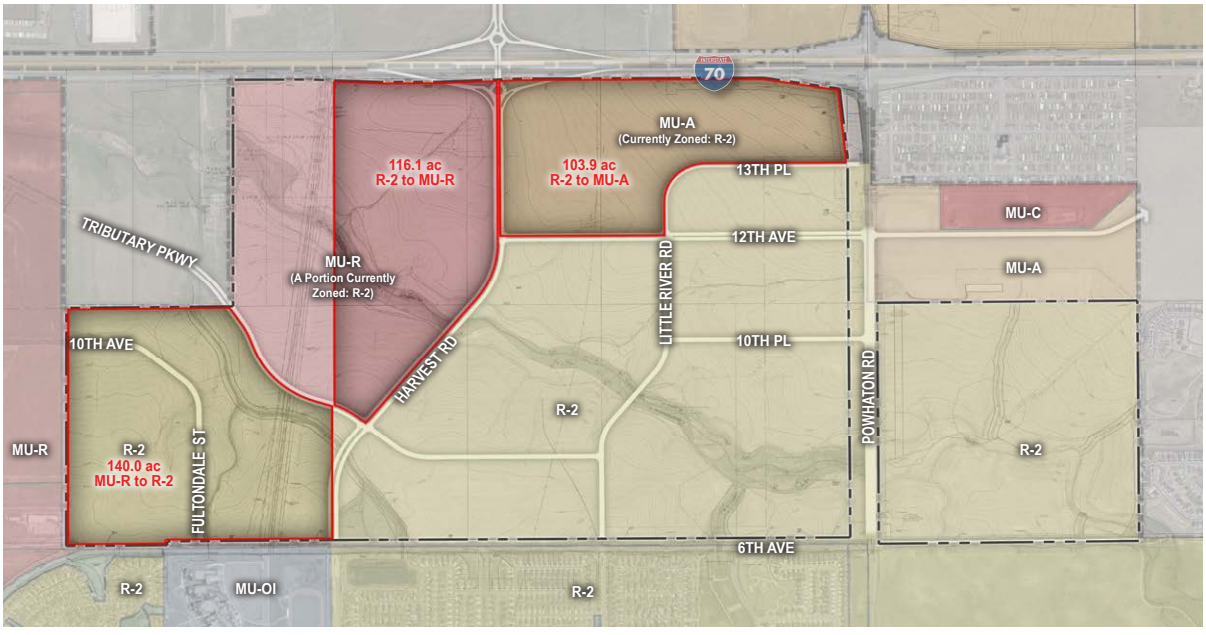
Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

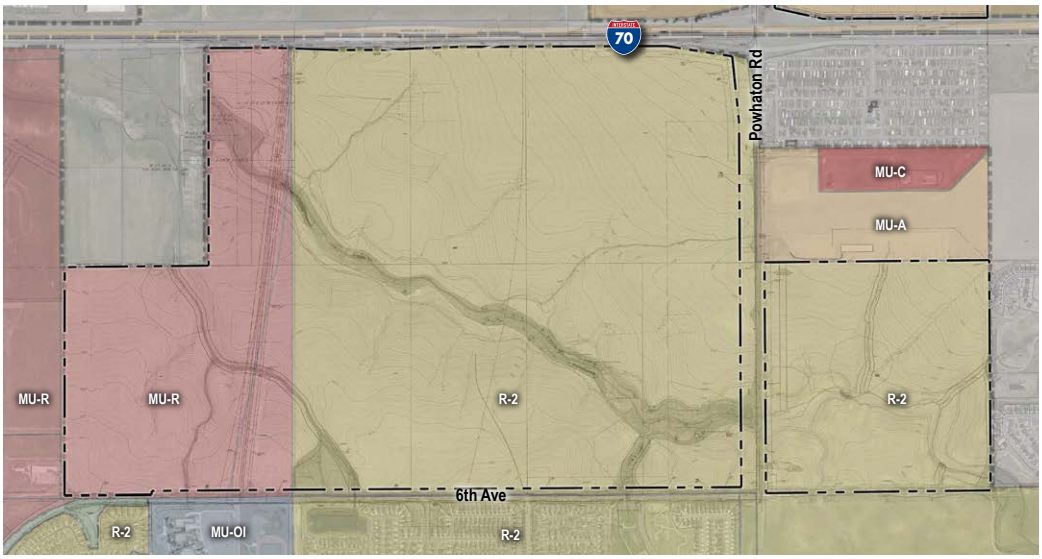
Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.

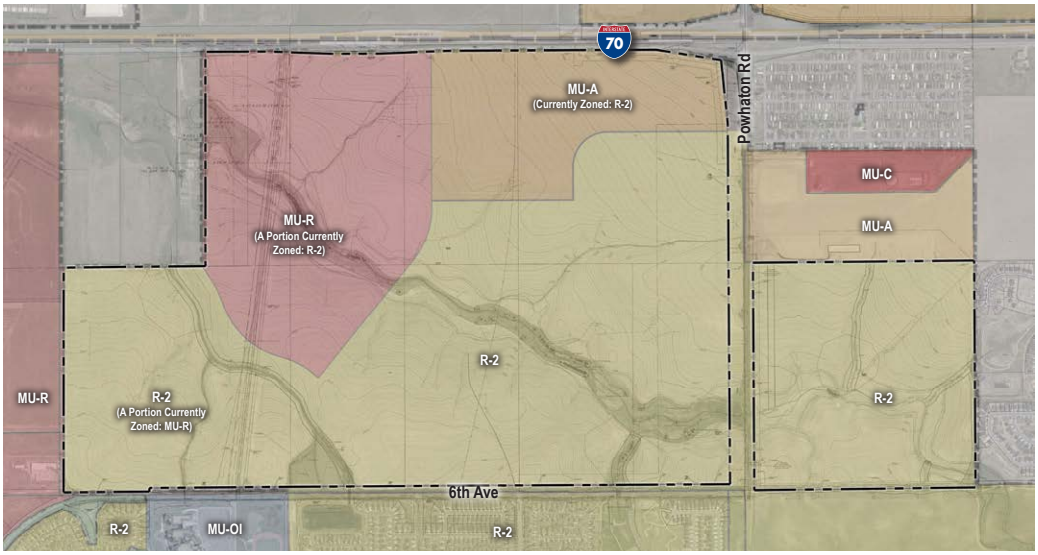
PROPOSED ZONE MAP AMENDMENTS



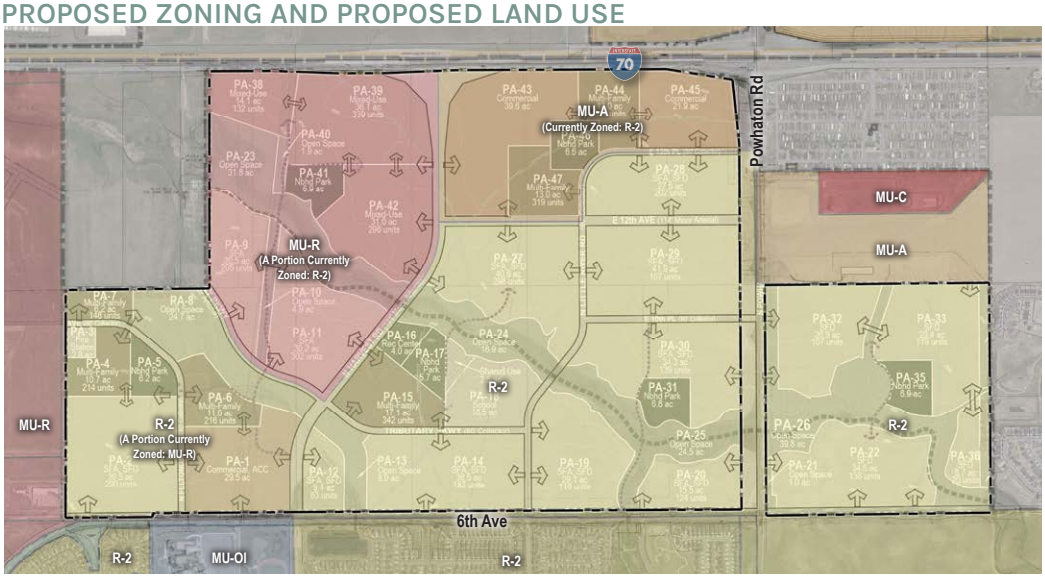
EXISTING ZONING



PROPOSED ZONING



PROPOSED ZONING AND PROPOSED LAND USE



APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.

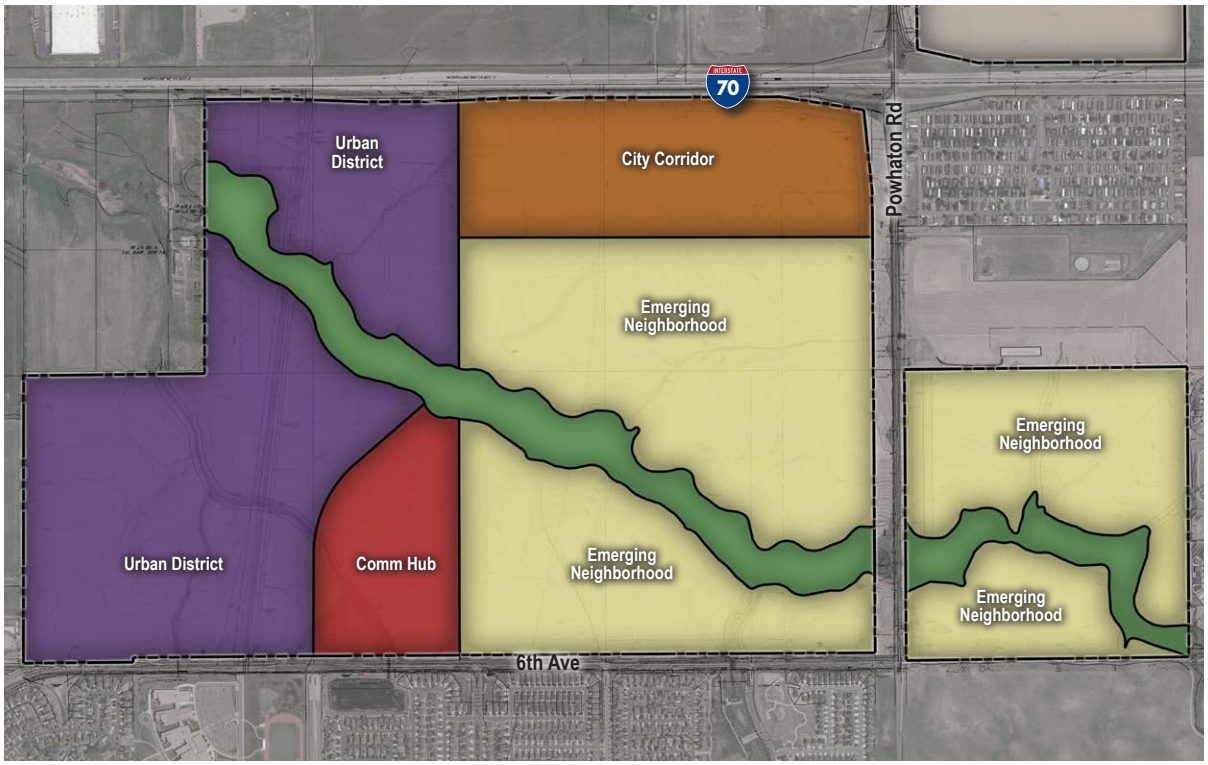
Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP



APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.

The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results

AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

Zoning Map Amendment Approval Criteria

City of Aurora Unified Development Ordinance, Section 146-5.4.1.C.3:

An application for changes to the Zoning Map for individual parcels shall only be recommended if the Planning Director and the Planning and Zoning Commission finds that the following criteria have been met, and shall only be approved if City Council finds that the following criteria have been met:

1. *The change to the Zoning Map is needed to correct an error (change in the character of surrounding areas does not constitute an error in the map); or*

2. *The change to the Zoning Map is required because of changed conditions or circumstances on the property or in the surrounding area and:*

a) *The applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, with other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district;*
b) *The applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible with surrounding development through development conditions; and*
c) *The applicant demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application.*

- Recommended approval (6-0) of the Zoning Map Amendment for 104 acres from the R-2 District to the MU-A District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 189 acres from the R-2 District to the MU-R District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 143 acres from the MU-R District to the R-2 District to City Council

Planning and Zoning Commission Recommendations

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 143 ACRES OF LAND TO MEDIUM-DENSITY RESIDENTIAL DISTRICT (R-2), LOCATED WEST OF FUTURE HARVEST ROAD AND SOUTH OF FUTURE TRIBUTARY PARKWAY (R-2 TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 143 acres of land located west of Harvest Road and south of Tributary Parkway, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Mixed-Use Regional (MU-R) to Medium-Density Residential District (R-2); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Medium-Density Residential District (R-2) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

This ordinance will repeal the changes introduced by council related to the Aurora Houing Authority "AHA"). Council changed the qualifications and appointment process in 2024. After the changes were approved the AHA challenged ordinance 2024-29 and the district court and court of appeals of the state ruled in favor of the AHA. In consequence, staff is recommending to council repealing the ordinance.

FISCAL IMPACT

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does council wish to approve an Ordinance to repeal the Aurora Housing Authority changes?

LEGAL COMMENTS

The City of Aurora is a home rule municipality, organized and existing under and Article XX, Section 6 of the Colorado Constitution. Article XX Section 6 grants the city and its citizens the right to self-government in matters of local affairs not preempted by the State legislature. The City Council shall have and shall exercise the powers, privileges and duties granted and conferred by the state constitution, statute, or city Charter. The City Council has the power to make and publish from time to time ordinances, pass resolutions and motions not inconsistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the state constitution, statute or City Charter as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort, and convenience of the city. City Code Section 2-32. As a home rule city, the City Council has the inherent power to pass ordinances and repeal any prior ordinances. This action is legislative in nature and will amend the Aurora City Code therefore it must be taken in the form of an ordinance. *See,* Article 5-1 Aurora City Charter. (Hernandez).

ORDINANCE NO. 2026-____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, REPEALING ORDINANCE 2024-29, AND OTHER RELATED MATTERS

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and under Article XX Section 6 of the Colorado Constitution, the City has authority over matters of local concern; and

WHEREAS, the City Council (the "Council") has the power to make and publish from time-to-time ordinances as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city; and

WHEREAS, the City passed Ordinance 2024-29 amending the composition and qualifications of the Board of Directors of the Aurora Housing Authority (the "Authority"), and the Authority instituted proceedings challenging the amendments; and

WHEREAS, the Colorado Court of Appeals reached an unfavorable decision for the City, and the ordinance is now likely moot; and

WHEREAS, the Council has found and determined that repealing Ordinance 2024-29 is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. Ordinance 2024-29 is hereby repealed in its entirety.

Section 2. The City Manager and the City Attorney or their respective designees are hereby authorized to take any necessary steps to effectuate the repeal contained in this ordinance, and to collaborate with the City of Aurora Codifier to correct the Aurora City Code as needed.

Section 3. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 4. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

QUESTIONS FOR COUNCIL

Does Council wish to support the ordinance to establish the Office of Public Safety Accountability? (PSA)

LEGAL COMMENTS

Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (Section 5-1, Aurora City Charter) (Platt)

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, ADDING SECTION 2-68 OF THE CITY CODE TO CREATE THE OFFICE OF PUBLIC SAFETY ACCOUNTABILITY

WHEREAS, the City entered into a Consent Decree with the Colorado Attorney General's Office in 2021 to address issues identified in a patterns and practice investigation authorized by C.R.S. § 24-31-113; and

WHEREAS, the City engaged an independent consent decree monitor, IntegrAssure, to oversee the Consent Decree and assist the City with meeting the mandates of the Decree; and

WHEREAS, many mandates of the Consent Decree are now in substantial compliance, and the City seeks to establish an independent public safety oversight office to continue this function after the conclusion of IntegrAssure's engagement and completion of all remaining mandates; and

WHEREAS, the Office of Public Safety Accountability's mission will be the furtherance of the reforms achieved under the Consent Decree and culture of continuous improvement of the City's public safety departments; and

WHEREAS, the Office of Public Safety Accountability will conduct proactive and ongoing community outreach across Aurora, with particular focus on highly impacted communities, to better understand and respond to the diverse needs, and experiences

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by adding Section 2-68 which section reads as follows:

"Sec. 2-68. Office of Public Safety Accountability.

(a) *Organizational independence*. The office of public safety accountability (hereinafter "PSA"), overseen by the manager of public safety accountability (hereinafter "manager"), is an independent function reporting administratively to the city manager and functionally to the public safety policy committee. The manager has the authority to discuss significant and sensitive matters with city council members, including concerns with the interference of duties, without city management present.

(b) *Powers and duties; scope of review*. The manager shall have the authority to conduct oversight and review of all public safety functions including all council appointees, offices, boards, activities, agencies, and programs. This includes, but is not limited to, police, fire, 911, and detention.

(c) *Oversight methodology*. PSA shall conduct ongoing review, monitoring, and participation in public safety processes, policies, and performance reporting. This includes, but is not limited to, use of force reviews, policy development, and department operations and performance meetings.

(d) *Critical Incidents*. Any city public safety agency that has a critical incident, defined as an incident resulting in death or serious bodily injury, shall notify PSA within thirty minutes of the incident. The manager or designated staff shall report to the site of the critical incident and have access to pertinent information and personnel involved in the incident. The manager shall have access to monitor any investigations or reviews under the purview of the city associated with critical incidents. The manager shall issue a report of findings contemporaneous with the release of other city investigations or reviews.

(e) *Family Communication and Transparency*. PSA shall assign a liaison to the family of any individual killed or injured in any critical incident within forty-eight hours of the incident. The liaison shall be the primary point of contact for the family. The liaison shall have training in trauma informed response and training in investigative processes as required under state law. The liaison is responsible for informing the family of the investigative processes required under state law. The liaison shall reach out to the investigating agency and judicial district attorney and request updates for the family at least every thirty (30) days and upon reasonable requests by the family. The liaison shall coordinate with the police department to ensure the family has access to viewing all body worn camera footage and other evidence as required by state law.

(f) *Funding*. Sufficient funds shall be proposed and approved to fulfill the responsibilities specified herein in accordance with the city policies and procedures. Sufficient resources shall be available to the manager of PSA and staff to ensure appropriate professional development, continuing professional education, and compliance with applicable professional certification requirements. The city council must approve any budget or resource reductions that impact the office of PSA's ability to fulfill its responsibilities.

(g) *Manager hiring and evaluation*. The city manager shall seek input from the city council Public Safety policy committee when hiring and removing the manager and evaluating the manager's performance, including remuneration. The manager shall be selected based on experience and education suitable for the professional performance of civilian oversight of law enforcement.

(h) ***Appointment of employees*****. The manager shall have the power to appoint, employ, and remove employees as deemed necessary to administrate the office's affairs and to prescribe their duties, scope of authority, and qualifications in accordance with all city policies, rules, and regulations.**

(i) ***Annual review plan*****. The manager shall coordinate with the city manager in creating an annual review plan. The manager shall coordinate with the city auditor to coordinate each of their respective annual plans to identify areas of cooperation and interest. The manager shall annually present the proposed plan to the city council public safety policy committee for their review by the beginning of each calendar or fiscal year. The annual review plan should include the proposed reviews and identify potential objectives, the general nature of the reviews, and any special projects. The manager of PSA shall have final authority to select the reviews planned. The manager may modify the annual review plan as necessary during the fiscal year and will notify the city manager and the city council public safety policy committee of such modifications.**

(j) ***Access to employees, records, and property*****. All officers and employees of Aurora shall provide to PSA unrestricted access to employees, information, records (including electronic data), body worn camera videos, property, equipment, and facilities required for the office to conduct reviews and oversight. If such officers or employees fail to produce access and/or information, the manager shall notify the city manager or applicable council appointee unless there is a concern about the loss or destruction of records. The manager then has the authority to initiate a search to obtain the needed information from any such official or employee, outside contractor, or subcontractor, except as governed by Colorado law. Additionally, during a review or related oversight duties, city officers and employees shall fully cooperate and fully disclose all known information to PSA.**

(k) ***Review reports*****. Each annual review conducted in accordance with subsection (i) or subsection (d) will result in a report, electronically and publicly available, in accordance with state or federal law. A final draft of the review report will be shared with the reviewed program and the department director or chief for their review and to obtain management responses. The manager shall communicate the final results to city management, the city council public safety policy committee and the public. Information legally protected by state or federal law will be withheld from public release in accordance with applicable open records laws.**

(l) ***Annual reports*****. The manager shall submit an annual report to the city council public safety policy committee indicating reviews completed, reports on internal performance measures, and significant issues management has not fully addressed.**

(m) ***Report on irregularities*****. If the manager becomes aware of abuse or illegal acts or indications of such acts that could affect the city, the manager shall report the irregularities to the city manager, the city council public safety policy committee, or city attorney. In the**

case that the city manager or a council appointee is believed to be a party to abuse or illegal acts, the manager shall report the acts directly to the city council.

(n) *Complaints and Commendations*. PSA shall take complaints against city employees of public safety agencies. The complaints shall be relayed to the appropriate department for action in accordance with that department's policies and procedures. PSA shall have the ability to monitor the investigative process to include providing feedback to the department on the process. PSA shall raise any concerns or issues associated with the investigative process with the appropriate department director or chief. PSA may facilitate communication between the complaining party and the appropriate department as needed.

(o) *Community Engagement.* PSA shall lead at least two community listening sessions yearly and be a liaison between community stakeholders, public safety departments, and city management."

Section 3. Severability. The provisions of this Ordinance are hereby declared to be severable. If any section, paragraph, clause, or provision of this Ordinance shall, for any reason, be held to be invalid or unenforceable by a court of competent jurisdiction, the invalidity or unenforceability of such section, paragraph, clause, or provision shall not affect any of the remaining provisions of this Ordinance.

Section 4. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 5. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $105,000,000 and increase the sales and use tax rate by 0.129% for 30 years to provide for libraries, recreation, and community centers facilities needs, including without limitation the operation

of and repair, maintenance, and improvements to community facilities. Planned capital projects to be funded from bond proceeds include neighborhood park renovations, Aurora Center for Active Adults renovation, recreation facilities capital improvements, new Northeast Aurora Recreation Center, master planned parks construction, Central Library branch remodel, Mission Viejo Library branch remodel, and new Northeast Aurora Library branch

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.129% increase is anticipated to be $12,640,000 annually.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to community facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Community Facilities ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

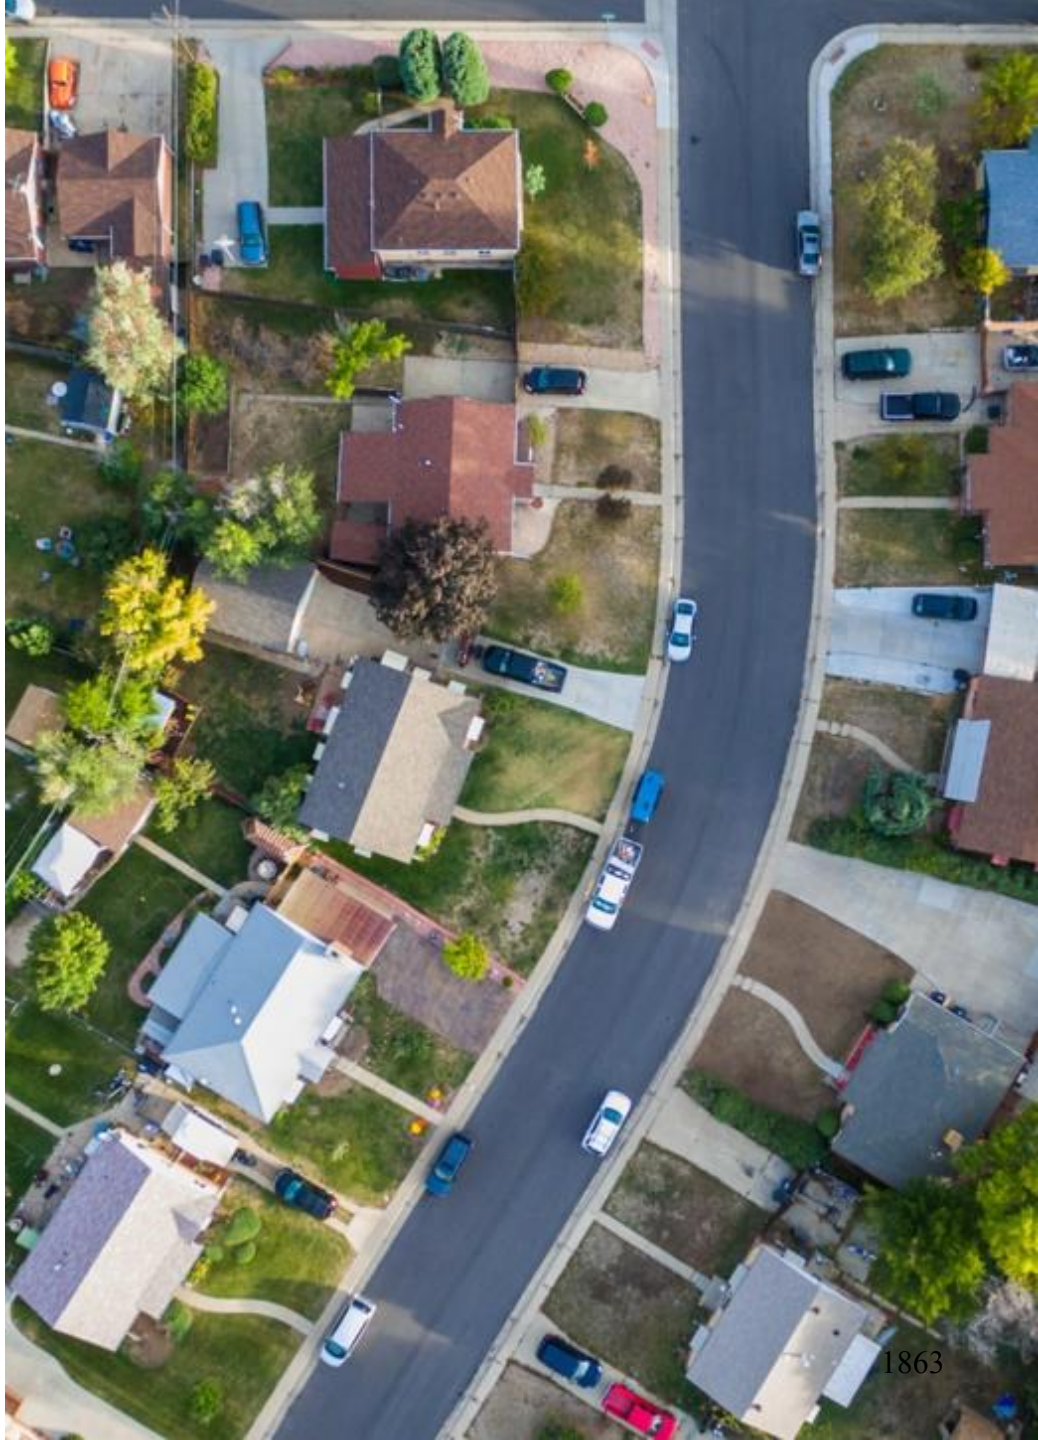
Build Up AURORA

Care for What We Have
Provide for What We Need

Build Up Aurora

Sponsors: Councilmember Curtis Gardner
Councilmember Francoise Bergan

Study Session
May 18, 2026



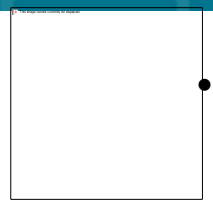
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

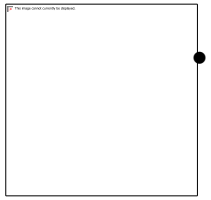
Members

Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council

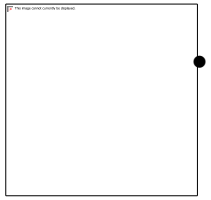
Infrastructure Task Force



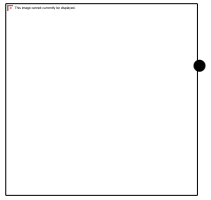
- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



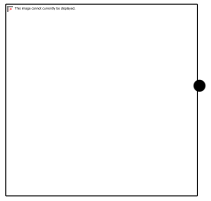
- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.



- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.



- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.



- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning

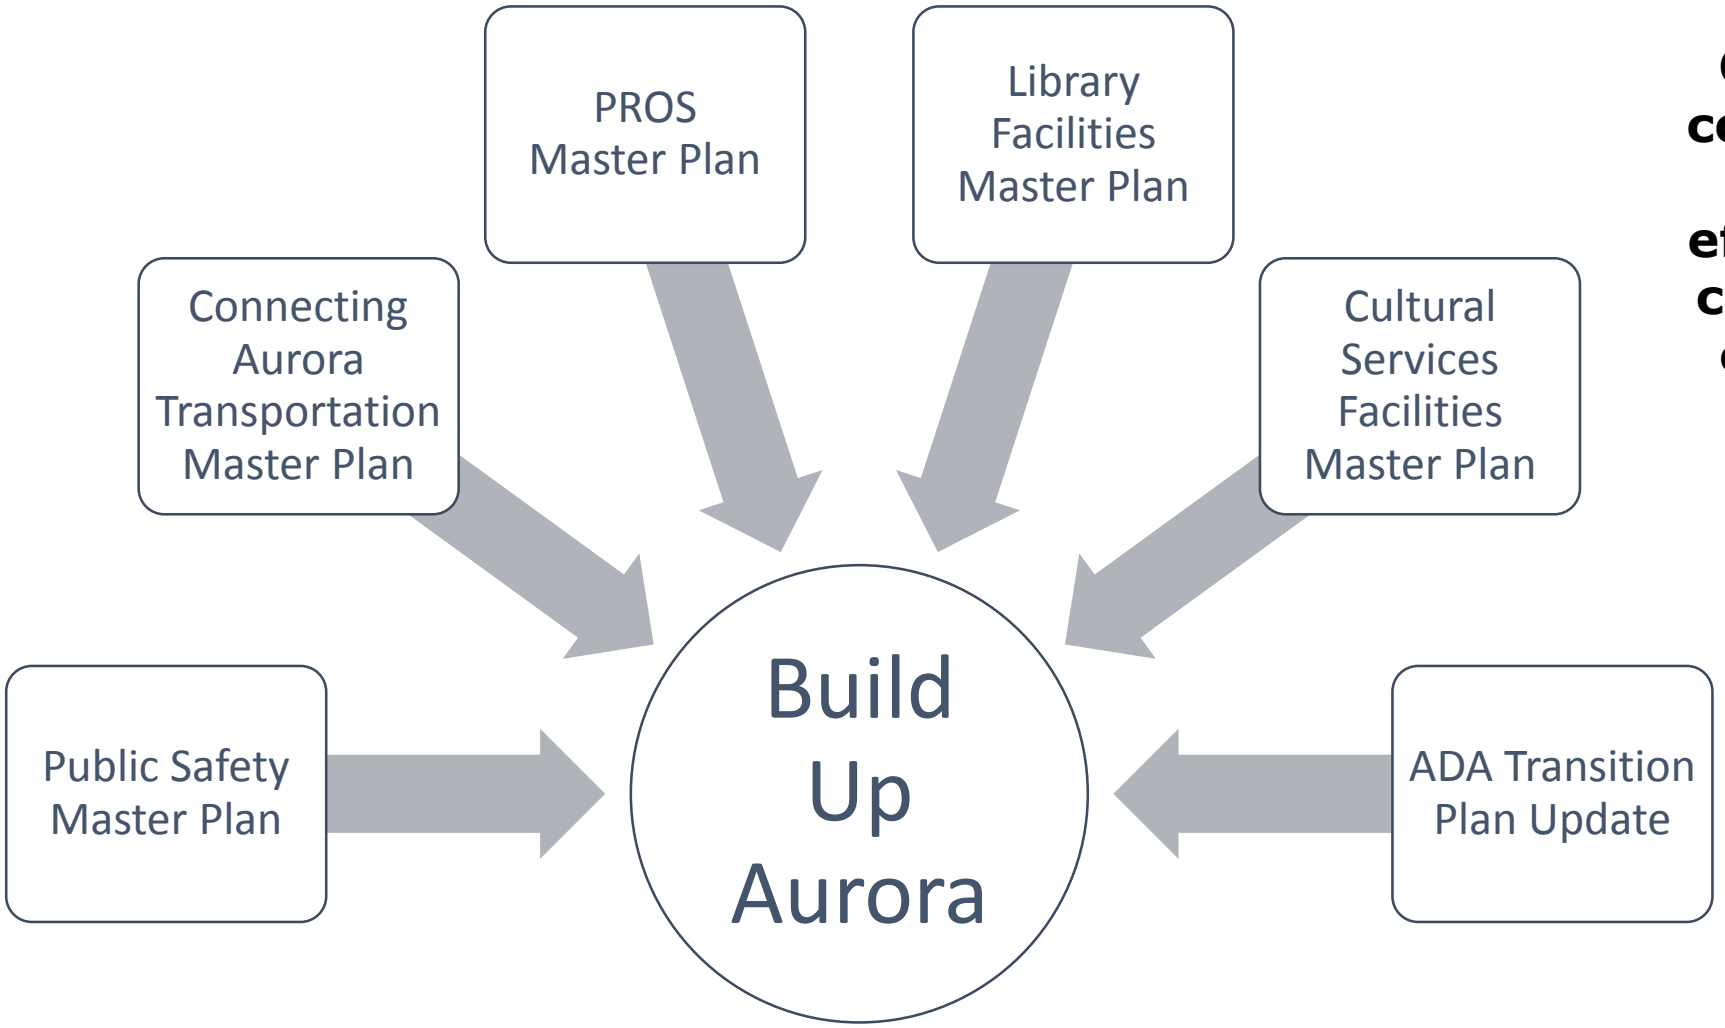
Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts



City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M

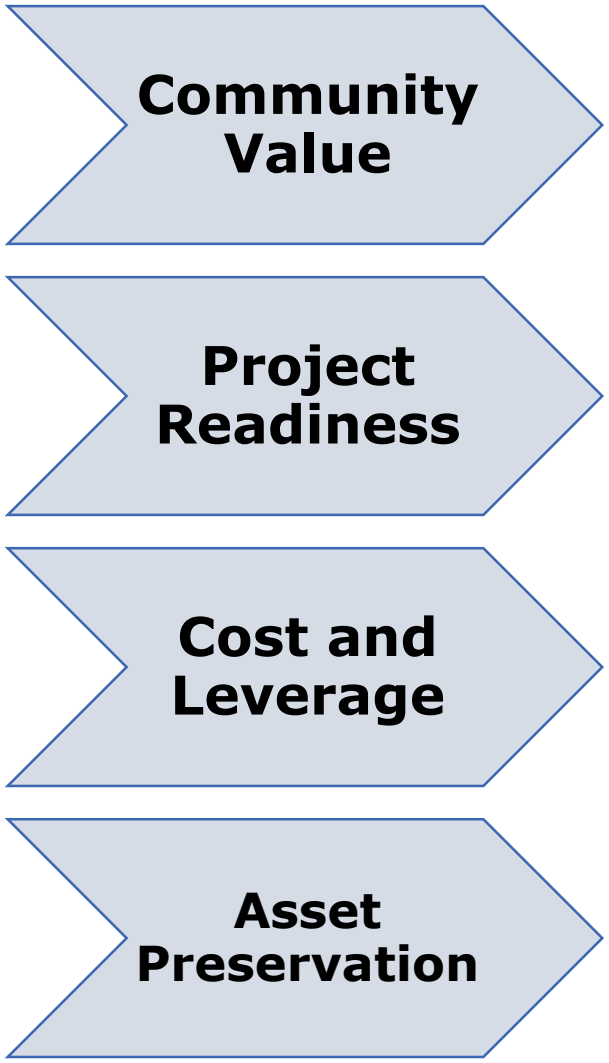
Other City Facilities $246.5M

Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

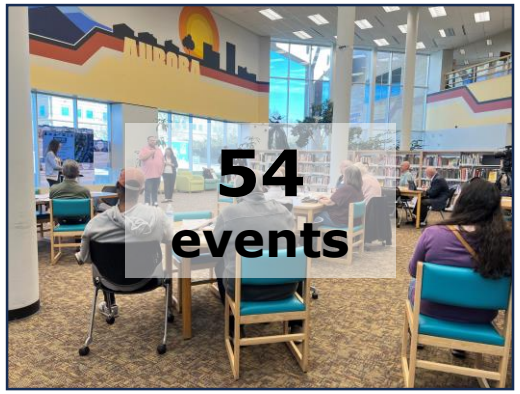
Capital Project Prioritization Framework: Community Informed and Technically Sound

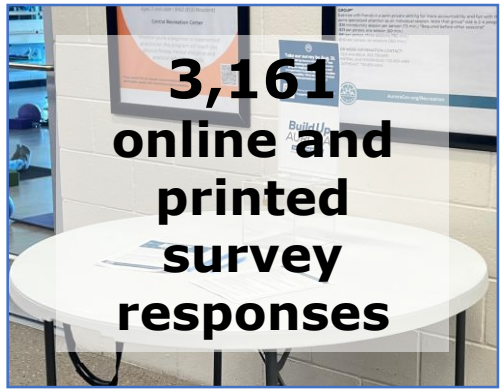


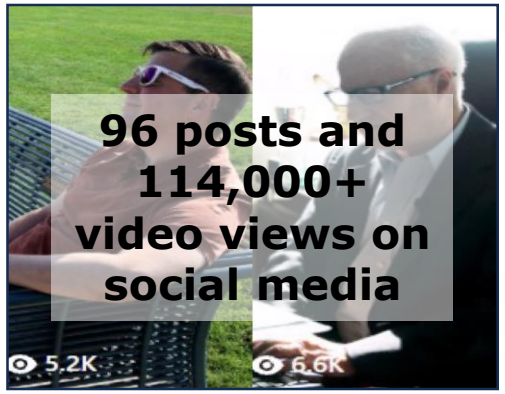
Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:

- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview







Build Up AURORA
Care for What We Have
Provide for What We Need

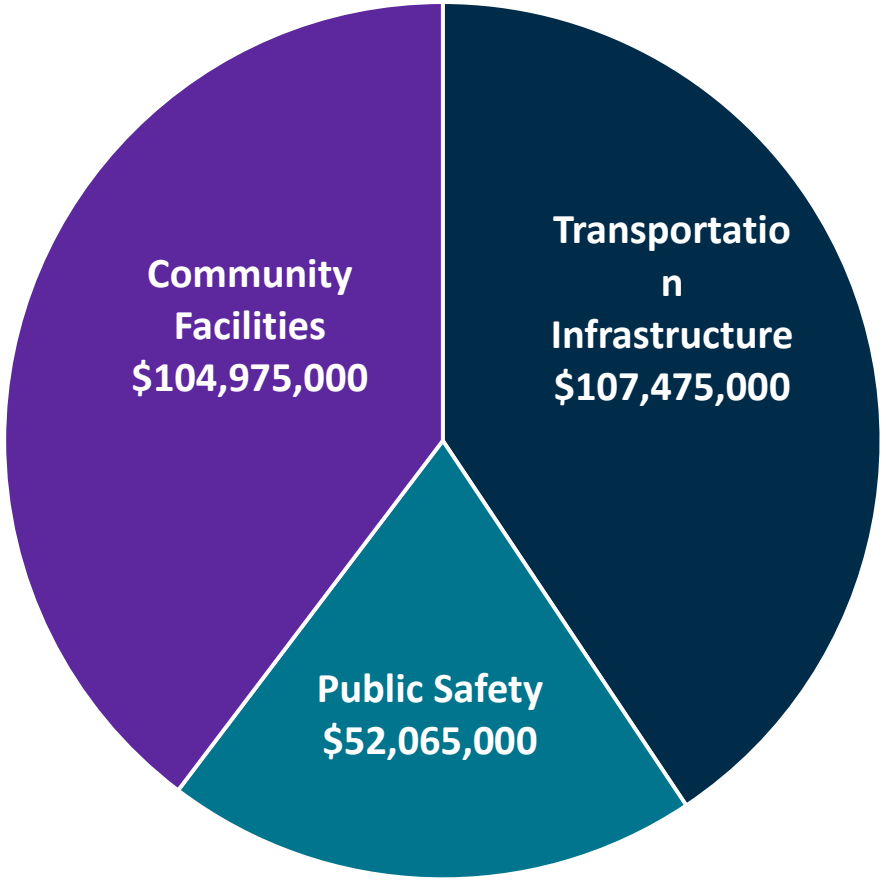
1870

Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals



- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

New Northeast Aurora Library Branch	$ 15,000,000	II
Purpose Contingency	*$ 2,775,000*	
Community Facilities Total	**$ 104,975,000**	

Key Project Facts

- 7 neighborhood park renovations
- Renovation of the Aurora Center for Active Adults built in 1980
- Construction of Central Community Park (Phase 1)
- 2 library branch renovations
- Construction of a new recreation center and library to serve northeast Aurora

Proposed 2026 Ballot Questions

Total Project Value*: $264,515,000

- More than **65 distinct projects**
- Companion resolution will designate projects and level of funding to be undertaken with proceeds of bonds if authorized by voters
- 0.325% sales and use tax increase recommended (prorated across three categories) to provide financial capacity to issue bonds

Ballot Question/Purpose	Est. Par Amount (Principal)	Total Repayment Cost (Principal + Interest)*	Sales and Use Tax Rate	
Transportation Infrastructure	$107,475,000	$209,733,000	0.132%	*1.3 cents/$10*
Public Safety	$52,065,000	$101,600,000	0.064%	*0.6 cents/$10*
Community Facilities	$104,975,000	$204,870,000	0.129%	*1.3 cents/$10*
Aggregate of Three Questions/Issuances*	**$264,515,000**	**$516,203,000**	**0.325%**	*3.25 cents/$10*

**Estimated repayment cost includes additional capacity to support interest rate volatility*

Build Up AURORA

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

Build Up Aurora
Transportation Infrastructure Ballot Question

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,940,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.132% SALES AND USE TAX (THAT EQUALS 13.2 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR TRANSPORTATION INFRASTRUCTURE NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $108,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $209,733,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- TRAFFIC, INTERSECTION, AND PEDESTRIAN SAFETY IMPROVEMENTS;
- MAJOR BRIDGE REPLACEMENTS;
- ROADWAY IMPROVEMENTS AND EXPANSION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.132% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATING TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO COMMUNITY FACILITIES SUCH AS LIBRARIES, RECREATION, AND COMMUNITY CENTERS

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for community facilities, including without limitation the operation of and repair, maintenance, and improvements to libraries, recreation centers, and community centers; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR COMMUNITY FACILITIES

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,640,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.129% SALES AND USE TAX (THAT EQUALS 12.9 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO COMMUNITY FACILITIES, INCLUDING WITHOUT LIMITATION LIBRARIES, RECREATION AND COMMUNITY CENTERS;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $105,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $204,870,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- PARK RENOVATIONS AND NEW PARK CONSTRUCTION;
- RECREATION CENTER IMPROVEMENTS AND NEW RECREATION CENTER CONSTRUCTION;
- LIBRARY BRANCH IMPROVEMENTS AND NEW LIBRARY CONSTRUCTION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.129% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $53,000,000 and increase the sales and use tax rate by 0.064% for 30 years to provide for public safety needs, including without limitation the operation of and repair, maintenance, and

improvements to police, fire, and other public safety infrastructure and facililies. Planned capital projects to be funded from bond proceeds include police station facility capital improvements, Aurora 911 facility capital improvements, Fire Station 19 construction, Fire Station 2 renovation, Fire Station facility capital improvements, and Fire Station 3 renovation.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.064% increase is anticipated to be $6,270,000 annually.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to city public safety infrastructure and facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Public Safety infrastructure and facilities ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

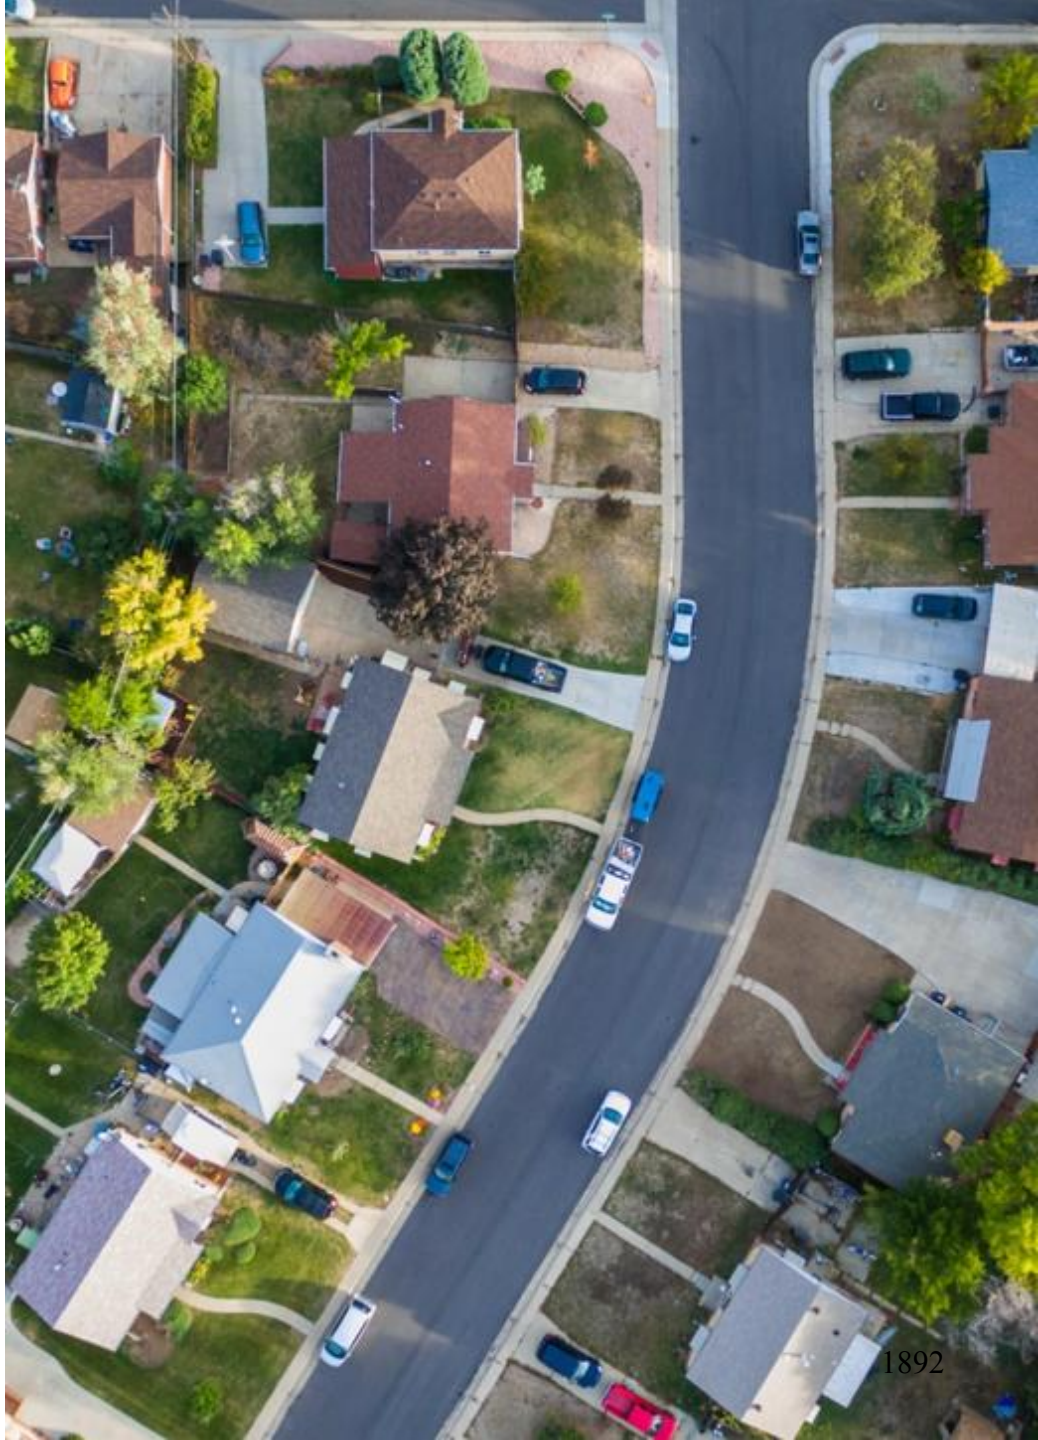
Study Session
May 18, 2026



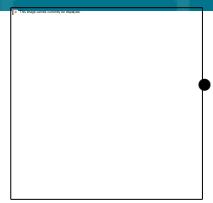
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

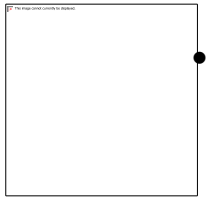
Members

Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council

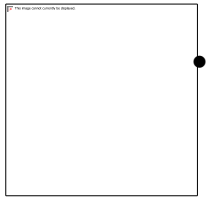
Infrastructure Task Force



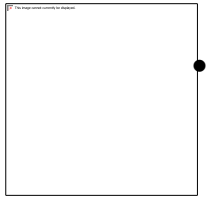
- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



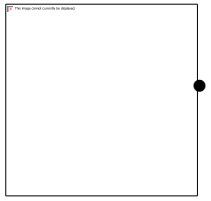
- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.



- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.



- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.



- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning

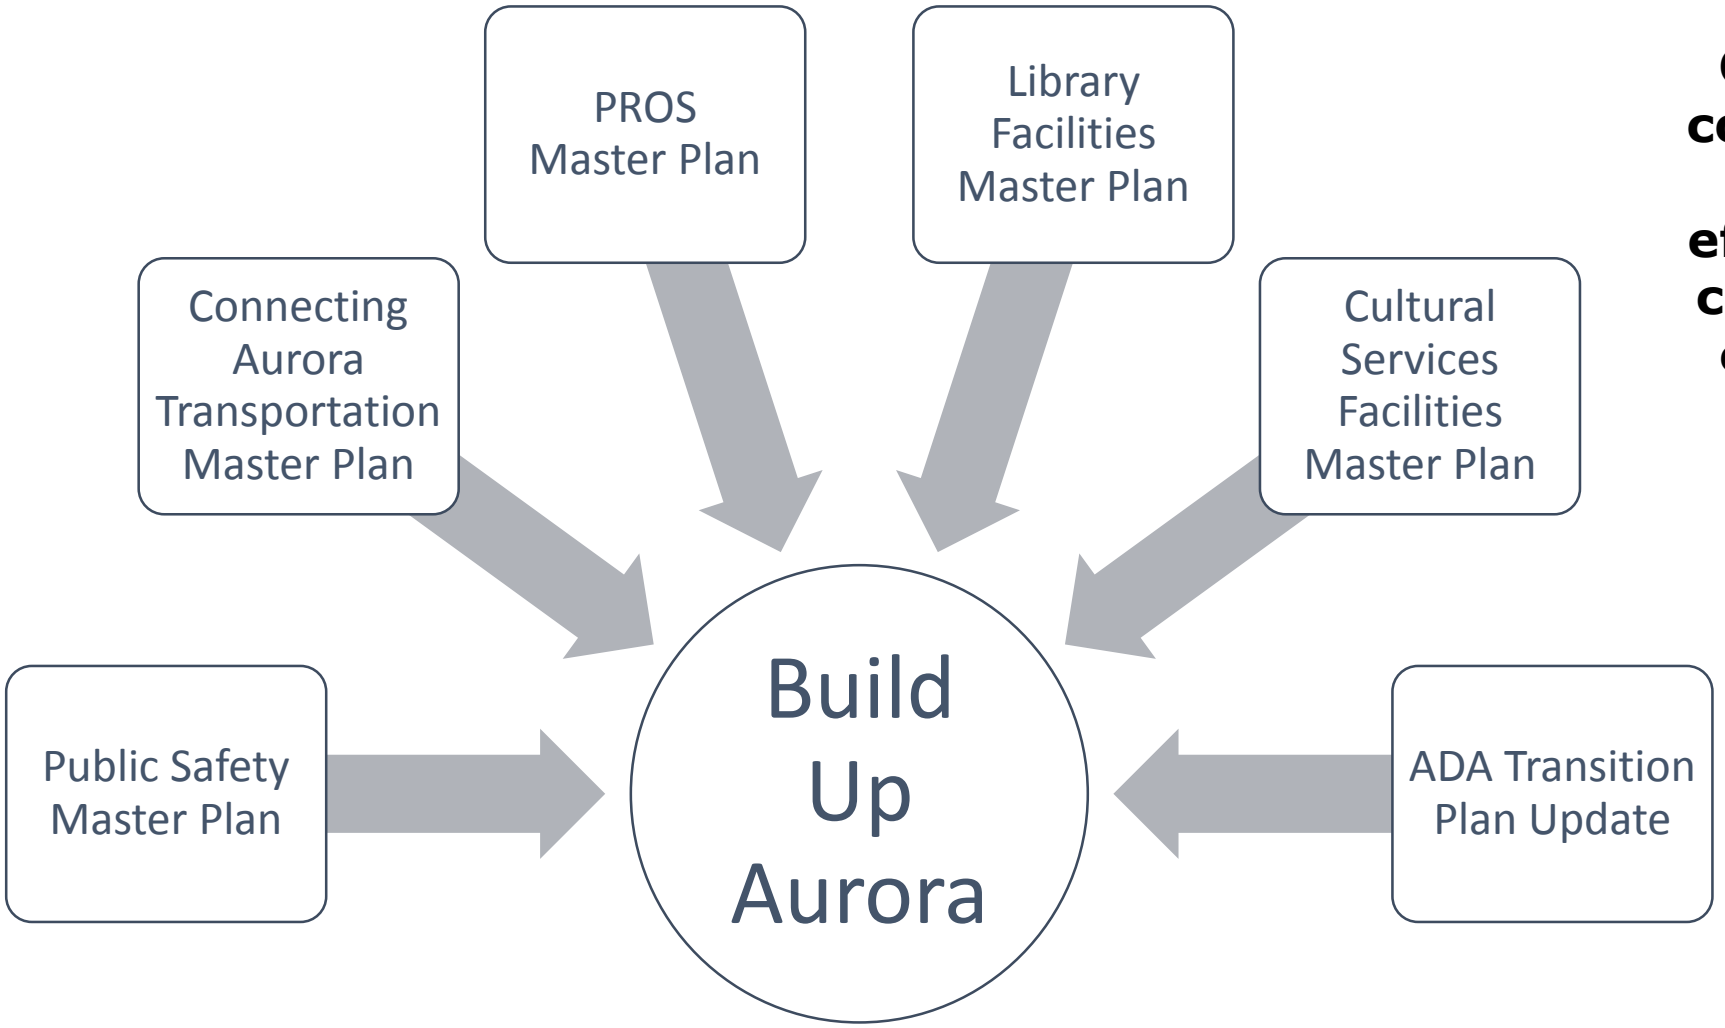
Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts



City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M

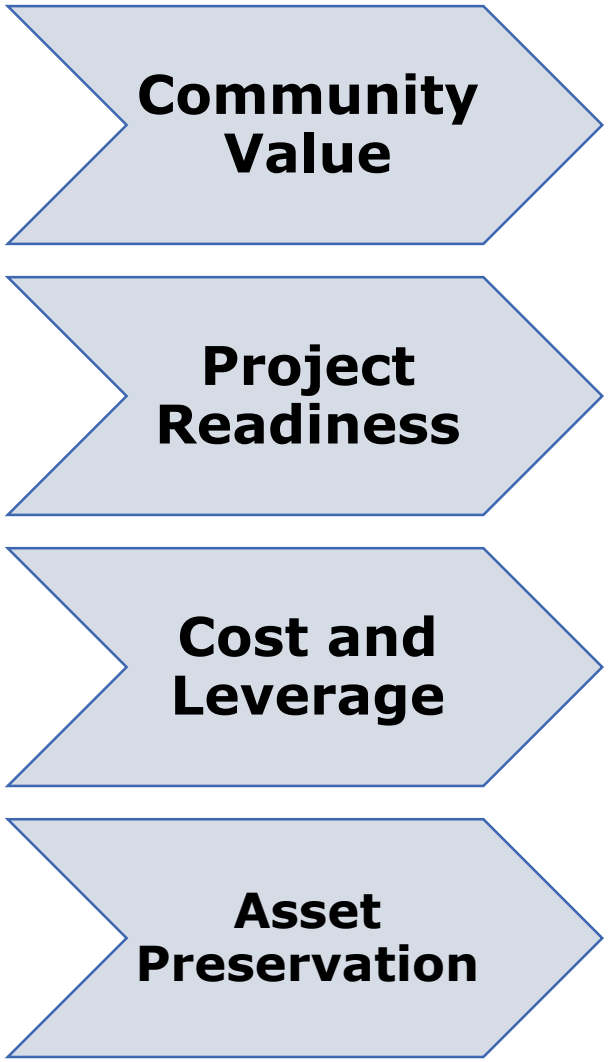
Other City Facilities $246.5M

Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

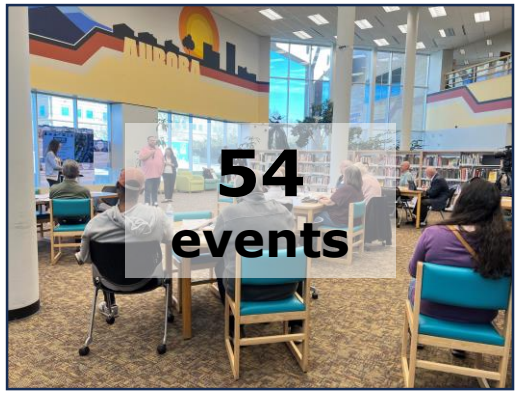
Capital Project Prioritization Framework: Community Informed and Technically Sound

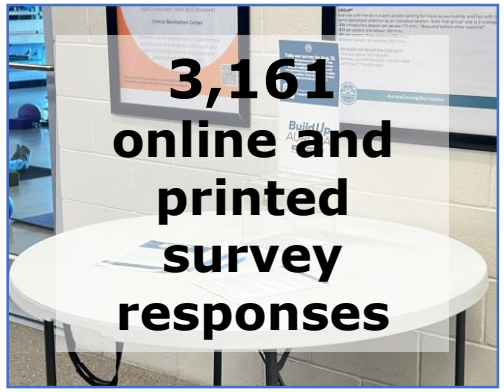


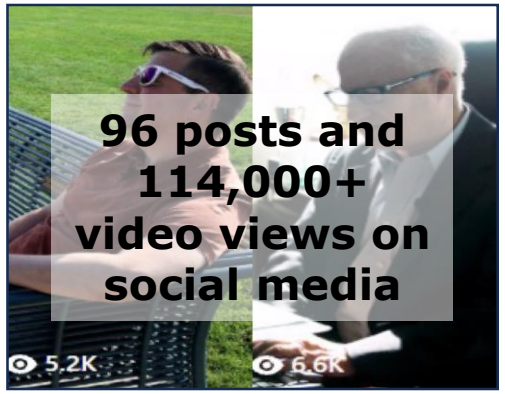
Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:

- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview







Build Up AURORA
Care for What We Have
Provide for What We Need

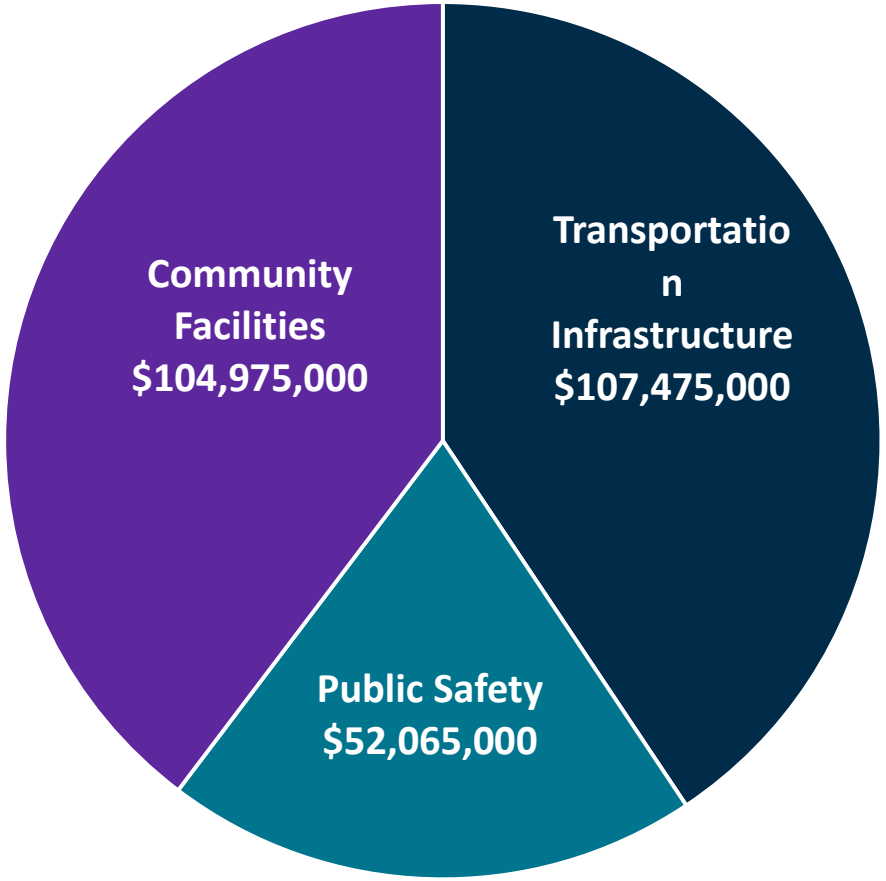
1899

Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals



- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

Key Project Facts

- 7 neighborhood park renovations
- Renovation of the Aurora Center for Active Adults built in 1980
- Construction of Central Community Park (Phase 1)
- 2 library branch renovations
- Construction of a new recreation center and library to serve northeast Aurora

Proposed 2026 Ballot Questions

Total Project Value*: $264,515,000

- More than **65 distinct projects**
- Companion resolution will designate projects and level of funding to be undertaken with proceeds of bonds if authorized by voters
- 0.325% sales and use tax increase recommended (prorated across three categories) to provide financial capacity to issue bonds

Ballot Question/Purpose	Est. Par Amount (Principal)	Total Repayment Cost (Principal + Interest)*	Sales and Use Tax Rate	
Transportation Infrastructure	$107,475,000	$209,733,000	0.132%	*1.3 cents/$10*
Public Safety	$52,065,000	$101,600,000	0.064%	*0.6 cents/$10*
Community Facilities	$104,975,000	$204,870,000	0.129%	*1.3 cents/$10*
Aggregate of Three Questions/Issuances*	**$264,515,000**	**$516,203,000**	**0.325%**	*3.25 cents/$10*

**Estimated repayment cost includes additional capacity to support interest rate volatility*

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

Build Up Aurora
Transportation Infrastructure Ballot Question

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,940,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.132% SALES AND USE TAX (THAT EQUALS 13.2 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR TRANSPORTATION INFRASTRUCTURE NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $108,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $209,733,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- TRAFFIC, INTERSECTION, AND PEDESTRIAN SAFETY IMPROVEMENTS;
- MAJOR BRIDGE REPLACEMENTS;
- ROADWAY IMPROVEMENTS AND EXPANSION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.132% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATING TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO POLICE, FIRE AND OTHER PUBLIC SAFETY INFRASTRUCTURE AND FACILITIES

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for public safety, including without limitation the operation of and repair, maintenance, and improvements to police, fire, and other public safety infrastructure and facilities; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR PUBLIC SAFETY

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $6,270,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.064% SALES AND USE TAX (THAT EQUALS 6.4 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027 AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR PUBLIC SAFETY NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO POLICE, FIRE, AND OTHER PUBLIC SAFETY INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $53,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $101,600,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- FIRE STATION RENOVATIONS AND REMODELS;
- AURORA 911 AND POLICE FACILITIES IMPROVEMENTS;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.064% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

INTRODUCED, READ AND ORDERED PUBLISHED this _____ day of _____, 2026.

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $108,000,000 and increase the sales and use tax rate by 0.132% for 30 years to provide for transportation infrastructure needs, including without limitation the operation of and repair, maintenance, and improvements to city transportation infrastructure and facilities. Planned capital projects to be

funded from bond proceeds include transportation safety improvements, Gun Club Road (Quincy to Aurora Parkway), Peoria over Sand Creek Bridge replacement, high priority sidewalk improvements, and Aurora Reservoir transportation improvements.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.132% increase is anticipated to be $12,940,000 annually.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to city transportation infrastructure and facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and public improvement inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Transportation Infrastructure ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

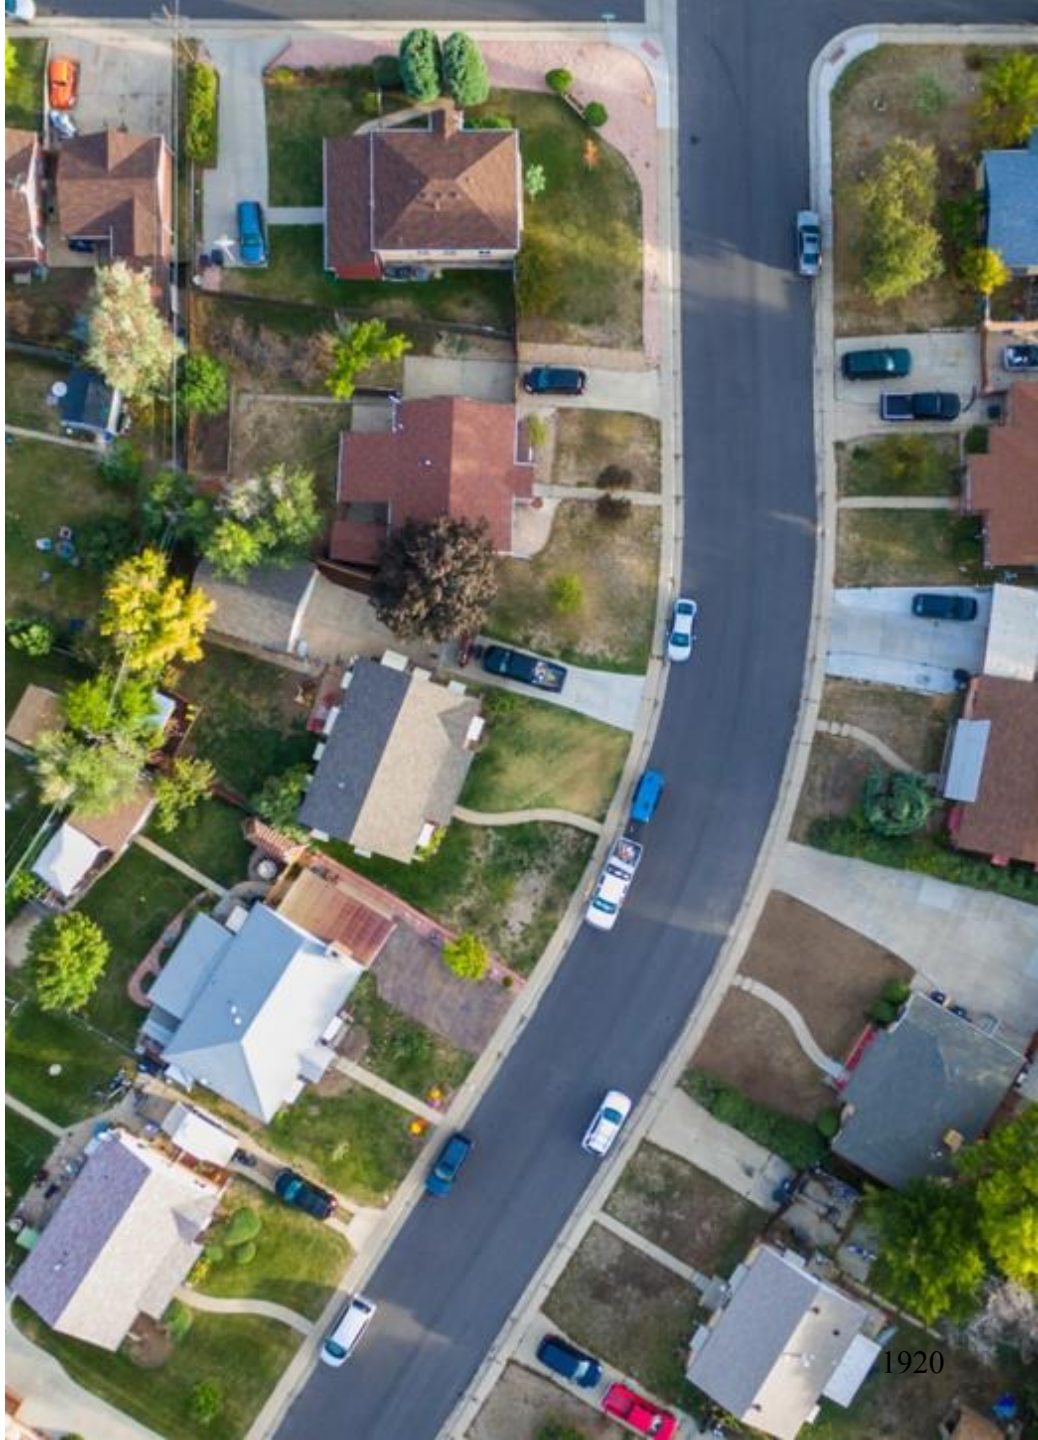
Study Session
May 18, 2026



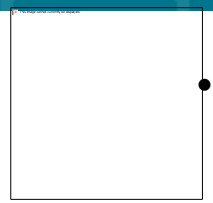
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

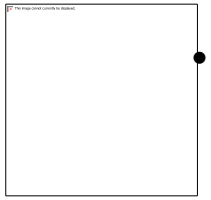
Members

Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council

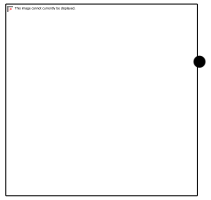
Infrastructure Task Force



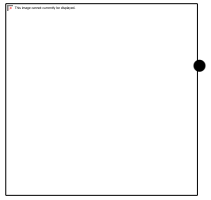
- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



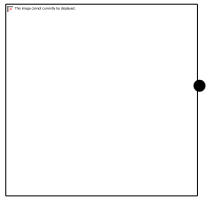
- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.



- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.



- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.



- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning

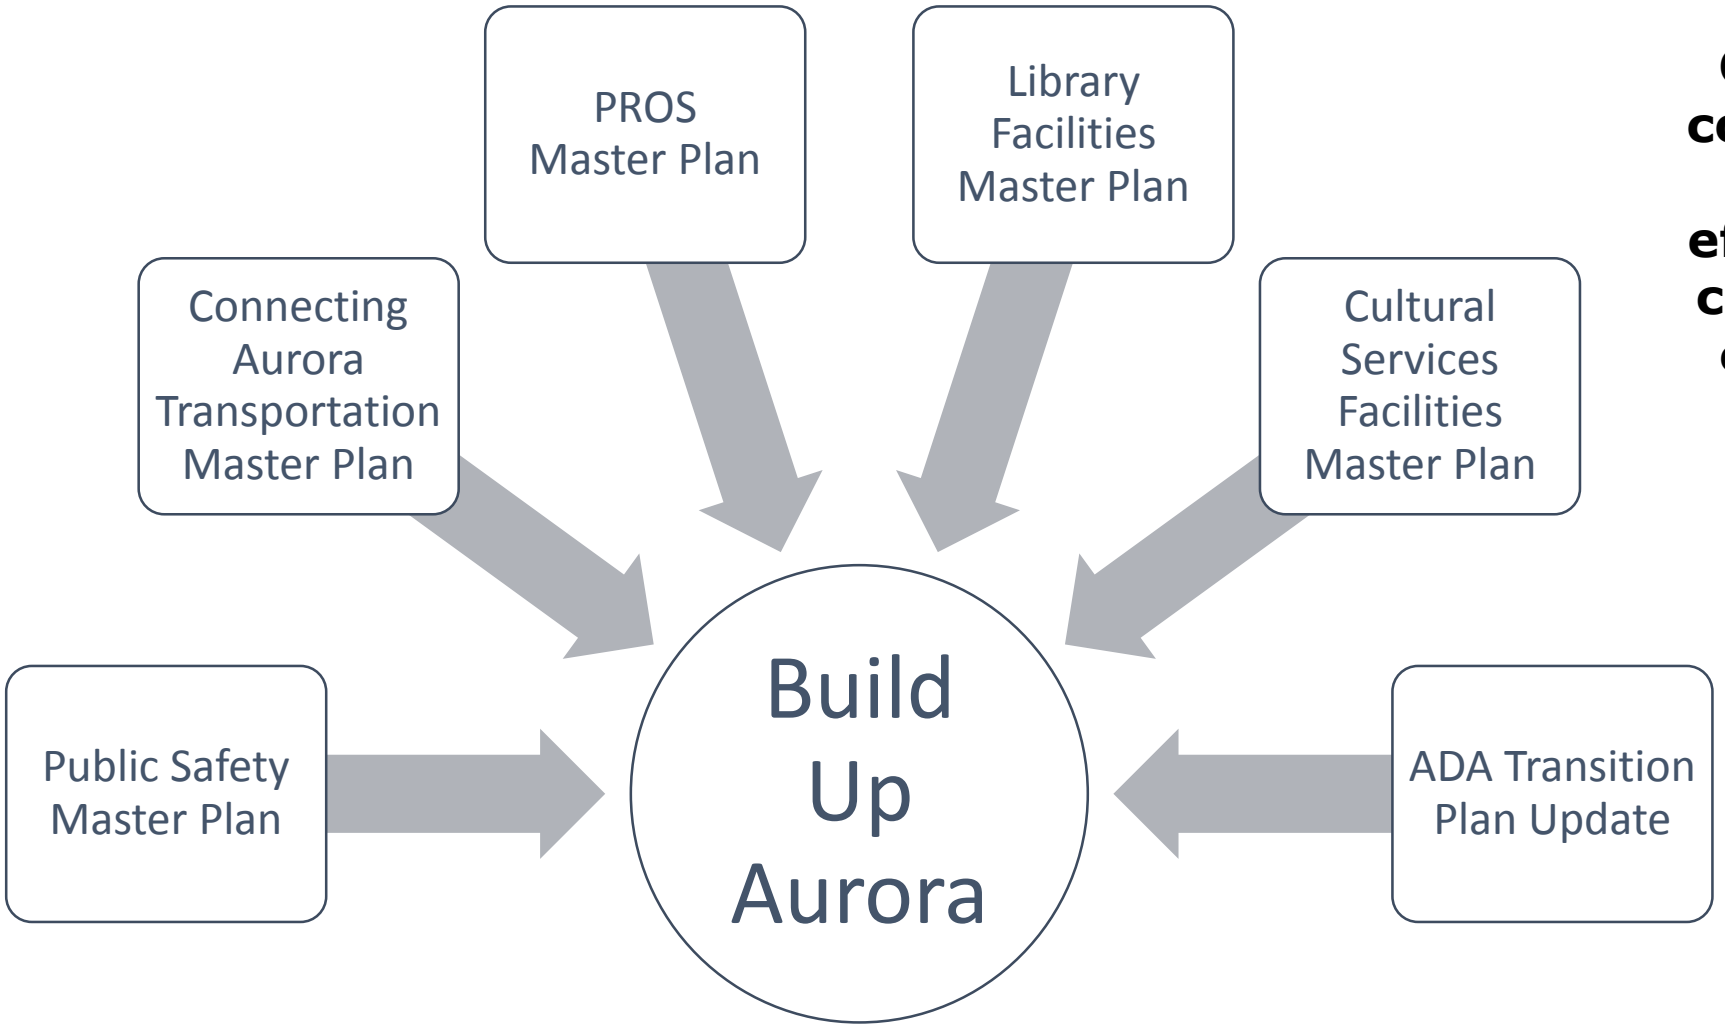
Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts



City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M

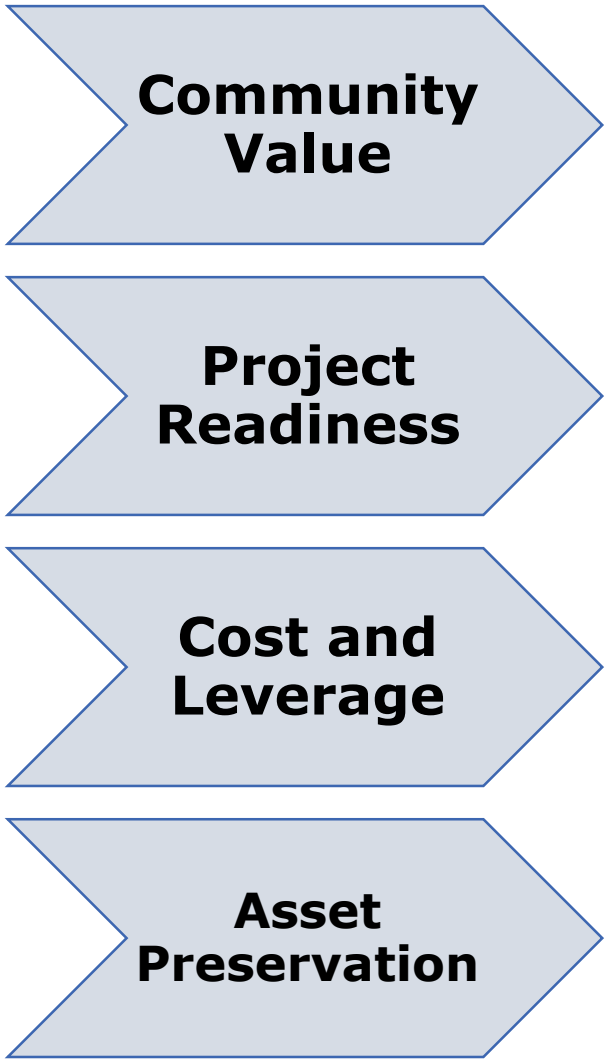
Other City Facilities $246.5M

Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

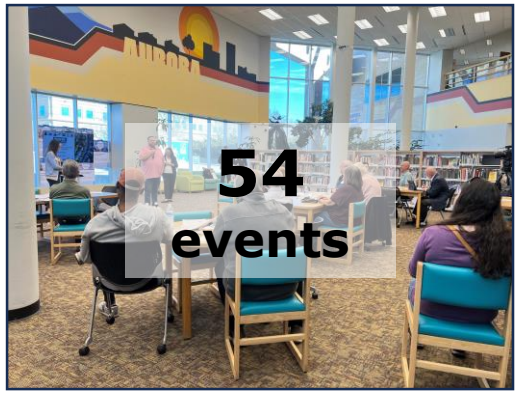
Capital Project Prioritization Framework: Community Informed and Technically Sound

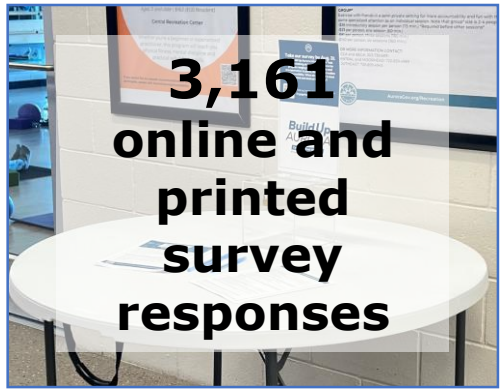


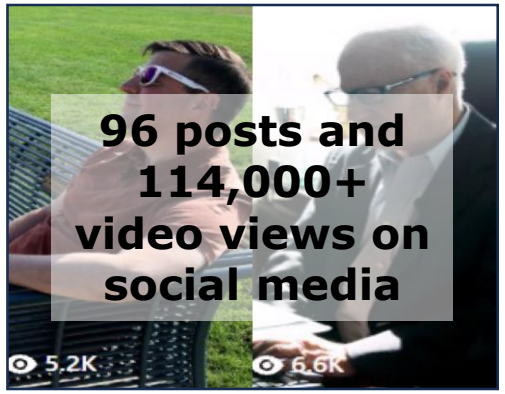
Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:

- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview







Build Up AURORA
Care for What We Have
Provide for What We Need

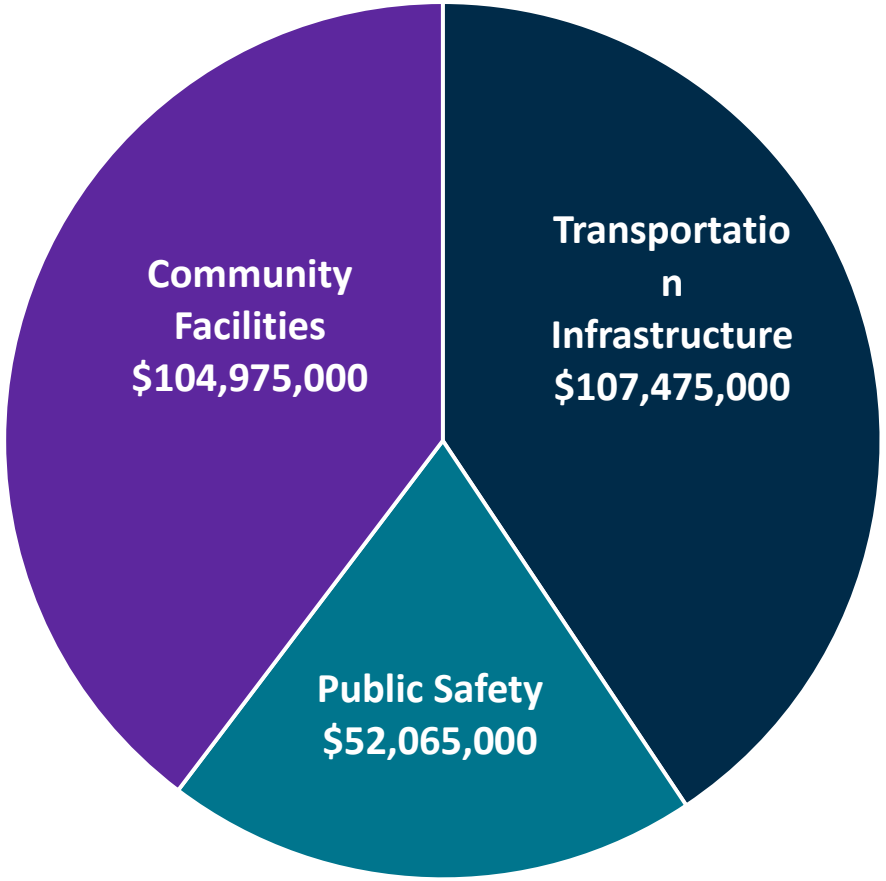
1927

Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals



- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATED TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for transportation infrastructure needs, including without limitation the operation of and repair, maintenance, and improvements to city transportation infrastructure and facilities; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and .

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR TRANSPORTATION

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,940,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.132% SALES AND USE TAX (THAT EQUALS 13.2 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR TRANSPORTATION INFRASTRUCTURE NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $108,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $209,733,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- TRAFFIC, INTERSECTION, AND PEDESTRIAN SAFETY IMPROVEMENTS;
- MAJOR BRIDGE REPLACEMENTS;
- ROADWAY IMPROVEMENTS AND EXPANSION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.132% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The City of Aurora ("Aurora") is advancing with construction of the Aurora Multimodal Access Improvements Project ("Project") as depicted on the attached maps. Havana Street is a vital commercial, residential, and commuter corridor that connects the City of Aurora to its surrounding communities and the eastern part of the metropolitan area. To continue serving the transportation needs of Aurora's rapidly growing population, the Havana Corridor Study was completed in 2021 to identify the areas that are most in need of these improvements. To safely construct this new multi-use path, acquisition of certain property interests from 94 property owners is necessary.

In 2025, the Project land acquisition plans were approved by CDOT and Aurora's Real Property & Survey Services Division ("RPSS") issued the requisite Notice of Intent to Acquire ("NOIA"), made offers and initiated negotiations with all affected property owners in accordance with C.R.S. Title 38, Article 1 (Section 38-1-101 et seq.). C.R.S. Title 38, Article 1 sets forth the uniform policy for fair and equitable treatment of property owners during the acquisition of real property interests and includes a provision of residential/business relocation assistance, if necessary. Appraisal reports have been completed by an independent state certified appraiser and were used as the basis for the fair market value offering to the property owner(s) of the specific land interests to be acquired. Aurora has also paid for landowner's independent appraisals in accordance with C.R.S. 38-1-121.

The Project requires the acquisition of 153 temporary construction easements and 16 permanent easements from the 94 property owners. The properties are located along Havana St., located in Adams & Arapahoe County as legally described in Exhibit A and depicted on the attachments. Presently, the City has acquired the necessary property rights from approximately 40 property owners. To avoid incurring additional construction costs due to acquisition delays, City staff is requesting Council authorize an ordinance allowing eminent domain, if it becomes necessary to use, to meet the Project's schedule. City staff would utilize the legal services of Don Ostrander, outside counsel, to file any court action, such as petitions for immediate possession. The authorization of the use of eminent domain by Council will allow the City to obtain possession of the property interests needed and will ensure that property acquisitions do not delay the Project's construction schedule. Condemnation is always used as a last resort when negotiations between the condemning authority and the property owner regarding valuation of the property have reached an impasse. As part of the condemnation process and in the event City staff negotiations fail, obtaining immediate possession will allow the Project to proceed on schedule. The attached Exhibit B is an overview of the eminent domain process for informational purposes.

City staff will continue using best efforts to acquire the real property interests needed by further negotiating with the property owners. City staff recommends the passage of an ordinance authorizing the use of eminent domain for the acquisition of the necessary land interests to avoid delays in the Project schedule. If Council authorizes the ordinance and it becomes necessary to act beyond obtaining immediate possession, City staff will update Council.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT

Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Funding will come from the Aurora Multimodal Access Improvments Project

The estimated cost for the permanent and temporary easements = $248,000
Estimated maximum legal fess = $100,000
Grand total = $348,000

Org No.: 49658

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does Council approve the ordinance authorizing the use of eminent domain, pursuant to Aurora City Code Section 10-10, in order to acquire the necessary property interests for the construction of the Aurora Multimodal Access Improvements Project?

LEGAL COMMENTS

Council has the legal authority and power to act by ordinance to use eminent domain pursuant to Section 10-10 of the Aurora Charter, Article XX Sections 1 and 6 of the State Constitution, C.R.S. Section 38-1-101 C.R.S., et seq. (Michelle Gardner)

ORDINANCE NO. 2026-31

AN ORDINANCE AUTHORIZING THE CITY OF AURORA, COLORADO, TO EXERCISE THE POWER OF EMINENT DOMAIN FOR ACQUISITION OF CERTAIN REAL PROPERTY INTERESTS NECESSARY FOR THE AURORA MULTIMODAL ACCESS IMPROVEMENTS PROJECT

WHEREAS, the City of Aurora is a Colorado municipal corporation and home rule city ("City") of the Counties of Adams, Arapahoe, and Douglas of the State of Colorado and it has the legal authority and power of eminent domain per Article XX Sections 1 and 6 of the State Constitution, Section 10-10 of the City's Home Rule Charter, C.R.S. 38-1-101 et seq.; and

WHEREAS, the City of Aurora, through its Public Works Department, requires construction of the Aurora Multimodal Access Improvements Project ("Project"); and

WHEREAS, the primary objective of the Project is to improve the multi-use path and access along Havana Street in Adams & Arapahoe County within the City; and

WHEREAS, as part of the Project, acquisition of 153 temporary construction easements and 16 permanent easements from 94 property owners are needed to make the Project improvements; and

WHEREAS, the City has determined it necessary to acquire the easement interests identified in this Ordinance for the construction of the Project, and that acquisition of these easement interests serves the public purpose by providing greater health, safety, and welfare; and

WHEREAS, the City has determined that these easement interests are necessary for the Project and said interests and their purported landowners are as described in the attached Exhibit A ("Properties").

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. That the City Council hereby finds and determines that it is in the interest of the health, safety, and general welfare of the public, and serves a necessary public purpose, to acquire real property interests in the Properties described in Exhibit A for the construction of the Project and hereby declares a public need and necessity for the same.

Section 2. The Real Property Services Division, through its staff, agents, or consultants, is authorized to engage in good faith negotiations for acquisition of the interests in the Properties, as a precondition to initiating proceedings in eminent domain. Eminent domain will only be used if good faith negotiations are unsuccessful. If the interests in the Properties cannot be obtained voluntarily, the City is authorized to commence condemnation proceedings to acquire the Properties and prosecute the proceedings to their conclusion.

Section 3. The City Council hereby authorizes itself to exercise the power of eminent domain for the purpose of acquiring interests in the Properties. The City is authorized to exercise the power of eminent domain pursuant to Section 10-10 of the City Charter in the manner provided by Article I of Title 38, Colorado Revised Statutes. The City is authorized to employ all necessary persons for this purpose, including special condemnation counsel, if necessary, and appraisers, surveyors, engineers, and other experts.

Section 4. The City Council has determined there is an immediate public need and necessity to acquire the Properties for the City of Aurora to proceed with the Project. To ensure timely possession of or title to the Properties, it may be necessary for the City to obtain immediate possession of the Properties.

Section 5. That the City Council hereby authorizes the expenditure of that amount of money which is determined by an appropriate tribunal to constitute just compensation necessary for the acquisition of the interests in the Properties. The City Council hereby authorizes the City's Director of Finance to pay all awards, legal expenses, court costs, and any other expenses of eminent domain lawfully found to be just compensation, as determined by a court of competent jurisdiction.

Section 6. The City or its staff, designee, agents, or representatives shall have the authority to amend the legal descriptions of and the interests sought in the Properties or to add additional properties as deemed necessary in the course of acquiring the Properties for the Project, and any such amendments shall be included in the definition of the Properties contained herein.

Section 7. That, nothing contained in this ordinance shall be construed as precluding or preventing negotiations by the City Attorney, or duly authorized representatives, from purchasing interests in the Properties at private sale, nor shall anything herein be construed as preventing the City of Aurora, upon the acquisition of said interests in the Properties, from terminating the eminent domain proceedings.

Section 8. That, pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the City Clerk.

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-1
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 1, Block 1, Walgreens at Aurora Subdivision Filing No. 1, the plat of said subdivision being recorded on August 18, 1995, at Rec. No. 1995030099455 (C0099455) in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the SW corner of said Section (from whence the W 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N07°45’35”E, a distance of 249.80 feet to a point on the westerly line of said Lot 1, said point being the **Point of Beginning**;

Thence coincident with the easterly line of a sidewalk easement dedicated by the plat of said subdivision the following two (2) courses:

1. Thence N34°36'03"E, a distance of 17.48 feet;
2. Thence N00°17'41"W, a distance of 37.68 feet;

Thence S10°39'17"E, a distance of 38.39 feet;

Thence S21°38'33"W, a distance of 11.30 feet;

Thence S00°17'41"E, a distance of 8.07 feet;

Thence S89°42'19"W, a distance of 9.68 feet;

Thence S00°17'41"E, a distance of 92.44 feet;

Thence N89°42'19"E, a distance of 5.00 feet;

Thence S00°17'41"E, a distance of 65.00 feet;

Thence S89°42'19"W, a distance of 5.00 feet;

Thence S00°17'41"E, a distance of 22.35 feet to a point on the westerly line of said Lot 1, said point also being a point of non-tangent curvature;

(continued)

Thence coincident with said westerly line the following two (2) courses:

1. Thence along said curve to the right (whose chord bears N14°28'25"W, a distance of 12.25 feet) having a radius of 25.00 feet, and a central angle of 28°21'27", an arc distance of 12.37 feet to a point of tangency;
2. Thence N00°17'41"W, a distance of 172.22 feet to the **Point of Beginning**.

The above-described parcel containing 1,170 square feet (0.027 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

PARCEL NUMBER: TE-2
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 1, Block 1, Karen Park – Second Addition, the plat of said subdivision being recorded on December 8, 1964, at Rec. No. 746565 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the SW corner of said Section (from whence the W 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N05°22’38”E, a distance of 303.55 feet to a point on the westerly line of said Lot 1, said point being the **Point of Beginning**;

Thence N00°17'41"W, coincident with said westerly line, a distance of 107.48 feet;

Thence S80°02'34"E, a distance of 14.74 feet;

Thence S00°17'41"E, a distance of 104.83 feet;

Thence S89°36'07"W, a distance of 14.50 feet to the **Point of Beginning**.

The above-described parcel containing 1,539 square feet (0.035 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A PARCEL OF LAND SITUATED IN THE SE 1/4 OF SEC. 34, T3S, R67W, 6TH P.M., CITY OF AURORA, COUNTY OF ADAMS, STATE OF COLORADO

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-5
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lots 34, 35, and 36, Block 17, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the SE corner of said Section (from whence the E 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N05°41’07”W, a distance of 319.35 feet to the southeasterly corner of that parcel of land described in that Warranty Deed recorded on September 26, 2019, at Rec. No. 2019000080860 in said office, said corner being the **Point of Beginning**;

Thence S89°38'47"W, coincident with the southerly line of said parcel, a distance of 5.50 feet;

Thence N00°17'41"W, a distance of 36.39 feet;

Thence N89°42'19"E, a distance of 3.50 feet;

Thence N00°17'41"W, a distance of 13.71 feet to a point on the northerly line of said parcel;

Thence coincident with the northerly and easterly lines of said parcel the following two (2) courses:

1. Thence N89°38'47"E, a distance of 2.00 feet;
2. Thence S00°17'41"E, a distance of 50.09 feet to the **Point of Beginning**.

The above-described parcel containing 228 square feet (0.005 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

Commencing at the SE corner of said Section (from whence the E 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N01°50’15”W, a distance of 1114.38 feet to a point on the easterly line of said block, said point being the **Point of Beginning**;

Thence S89°42'19"W, a distance of 6.50 feet;

Thence N00°17'41"W, a distance of 22.00 feet;

Thence N89°42'19"E, a distance of 6.50 feet to a point on the easterly line of said block;

Thence S00°17'41"E, coincident with said easterly line, a distance of 22.00 feet to the **Point of Beginning**.

The above-described parcel containing 143 square feet (0.003 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 6, Block 7, Gateway Park Addition, the plat of said subdivision being recorded on May 6, 1946, at Rec. No. 302386 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the W 1/4 corner of said Section (from whence the SW corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S02°05’56”E, a distance of 952.92 feet to the northwesterly corner of said Lot 6, said corner being the **Point of Beginning**;

Thence N89°42'19"E, Thence coincident with the northerly line of said lot, a distance of 5.50 feet;

Thence S00°17'41"E, a distance of 19.65 feet;

Thence S89°42'19"W, a distance of 3.50 feet;

Thence S00°17'41"E, a distance of 9.27 feet;

Thence N89°42'19"E, a distance of 3.50 feet;

Thence S00°17'41"E, a distance of 10.00 feet;

Thence S89°42'19"W, a distance of 3.50 feet;

Thence S00°17'41"E, a distance of 11.08 feet to a point on the southerly line of said Lot 6;

Thence coincident with the southerly and westerly lines of said Lot 6 the following two (2) courses:

1. Thence S89°42'19"W, a distance of 2.00 feet;
2. Thence N00°17'41"W, a distance of 50.00 feet to the **Point of Beginning**.

The above-described parcel containing 204 square feet (0.005 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

(continued)

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

A PARCEL OF LAND SITUATED IN THE SE 1/4 OF SEC. 34, T3S, R67W, 6TH P.M., CITY OF AURORA, COUNTY OF ADAMS, STATE OF COLORADO

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-28
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lots 31 & 32, Block 49, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the E 1/4 corner of said Section (from whence the SE corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S01°15’50”W, a distance of 1102.85 feet to the northeasterly corner of said Lot 32, said corner being the **Point of Beginning**;

Thence S00°17'41"E, coincident with the easterly line of said Block 49, a distance of 34.25 feet;

Thence S89°42'19"W, a distance of 5.50 feet;

Thence N00°17'41"W, a distance of 34.24 feet to a point on the northerly line of said Lot 32;

Thence N89°37'57"E, coincident with said northerly line, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 188 square feet (0.004 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

PARCEL NUMBER: TE-32A
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 41, Block 49, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the E 1/4 corner of said Section (from whence the SE corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S01°39’13”W, a distance of 882.42 feet to a point on the easterly line of said Lot 41, said point being the **Point of Beginning**;

Thence S00°17'41"E, coincident with said easterly line, a distance of 10.00 feet;

Thence S89°42'19"W, a distance of 6.50 feet;

Thence N00°17'41"W, a distance of 10.00 feet;

Thence N89°42'19"E, a distance of 6.50 feet to the **Point of Beginning**.

The above-described parcel containing 65 square feet (0.002 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

Commencing at the W 1/4 corner of said Section (from whence the SW corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S03°13’55”E, a distance of 642.07 feet to a point on the southerly line of said Lot 11, said point being the **Point of Beginning**;

Thence N00°17'48"W, a distance of 7.31 feet;

Thence S40°04'04"E, a distance of 9.51 feet to a point on the southerly line of said Lott 11;

Thence S89°42'12"W, coincident with said southerly line, a distance of 6.09 feet to the **Point of Beginning**.

The above-described parcel containing 22 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

PARCEL NUMBER: TE-46
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 1, Block 6, Gateway Park Addition, the plat of said subdivision being recorded on May 6, 1946, at Rec. No. 302386 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the W 1/4 corner of said Section (from whence the SW corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S23°14’09”E, a distance of 76.97 feet to a point on the westerly line of that parcel of land described in that Warranty Deed recorded on November 11, 2018, at Rec. No. 2018000091761 in said office, said corner being the **Point of Beginning**;

Thence N35°31'42"E, a distance of 13.48 feet to a point on the northerly line of said parcel;

Thence N89°38'00"E, coincident with said northerly line, a distance of 4.94 feet;

Thence S35°31'42"W, a distance of 17.64 feet;

Thence S00°17'41"E, a distance of 24.28 feet;

Thence N89°47'55"E, a distance of 4.00 feet;

Thence S00°17'41"E, a distance of 27.04 feet to a point on the southerly line of said parcel;

Thence coincident with the southerly and westerly lines of said parcel the following two (2) courses:

1. Thence S89°37'54"W, a distance of 6.50 feet;
2. Thence N00°17'41"W, a distance of 54.70 feet to the **Point of Beginning**.

The above-described parcel containing 303 square feet (0.007 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

(continued)

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: PE-57
DATE: SEPT. 29, 2025

A permanent easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 47, Block 80, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the E 1/4 corner of said Section (from whence the SE corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S22°11’51”W, a distance of 78.42 feet to a point on the easterly line of said Lot 47, said point being the **Point of Beginning**;

Thence N34°47'08"W, a distance of 9.00 feet to a point on the northerly line of said lot;

Thence coincident with the northerly and easterly lines of said lot the following two (2) courses:

1. Thence N89°39'01"E, a distance of 5.10 feet;
2. Thence S00°17'41"E, a distance of 7.43 feet to the **Point of Beginning**.

The above-described parcel containing 19 square feet (0.000 acres) more or less.

The purpose of the above-described parcel is for the construction and maintenance of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

EXHIBIT B

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-103A
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 1, Block 1, 1450 Havana Retail Center Subdivision Filing No. 1, the plat of said subdivision being recorded on April 14, 1997, at Rec. No. A7043051 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S04°23’08”E, a distance of 401.01 feet to the southwesterly corner of said Lot 1, said corner being the **Point of Beginning**;

Thence N00°05'43"W, coincident with the westerly line of said Lot 1, a distance of 42.18 feet;

Thence N03°26'58"E, a distance of 29.17 feet;

Thence S86°33'02"E, a distance of 3.00 feet;

Thence S03°26'58"W, a distance of 35.43 feet;

Thence S86°33'02"E, a distance of 4.00 feet;

Thence S03°26'58"W, a distance of 35.54 feet to a point on the southerly line of said Lot 1;

Thence S89°35'51"W, coincident with said southerly line a distance of 4.40 feet to the **Point of Beginning**.

The above-described parcel containing 302 square feet (0.007 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

PARCEL NUMBER: TE-111
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NE 1/4 of Section 3, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lots 1 & 2, Block 3, Havana Subdivision, Amended Map, the plat of said subdivision being recorded on May 22, 1940, at Rec. No. 264203 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the NE corner of said Section (from whence the E 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S03°01’37”W, a distance of 550.82 feet to the northeasterly corner of that parcel of land described in that Warranty Deed recorded on February 16, 2016, at Rec. No. D6015453 in said office, said corner being the **Point of Beginning**;

Thence coincident with the easterly line of said parcel the following two (2) courses:

1. Thence S00°05'43"E, a distance of 85.00 feet to a point of tangent curvature;
2. Thence along said curve to the right (whose chord bears S41°24'09"W, a distance of 19.88 feet) having a radius of 15.00 feet, and a central angle of 82°59'43", an arc distance of 21.73 feet to a point of non-tangency;

Thence N42°36'16"E, a distance of 16.47 feet;

Thence N00°05'43"W, a distance of 87.77 feet to a point on the northerly line of said parcel;

Thence N89°37'11"E, coincident with said northerly line, a distance of 2.00 feet to the **Point of Beginning**.

The above-described parcel containing 221 square feet (0.005 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the NE 1/4 of Section 3, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 7, Block 9, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S02°02’13”E, a distance of 885.36 feet to the southwesterly corner of said Lot 7, said corner being the **Point of Beginning**;

Thence N00°05'43"W, coincident with the westerly line of said Lot 7, a distance of 20.85 feet;

Thence N89°54'17"E, a distance of 7.50 feet;

Thence S00°05'43"E, a distance of 20.81 feet to a point on the southerly line of said Lot 7;

Thence S89°36'03"W, coincident with said southerly line, a distance of 7.50 feet to the **Point of Beginning**.

The above-described parcel containing 156 square feet (0.004 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

PARCEL NUMBER: TE-120
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 20, Block 9, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S01°32’23”E, a distance of 1190.11 feet to a point on the westerly line of said Lot 20, said point being the **Point of Beginning**;

Thence N89°54'17"E, a distance of 6.50 feet;

Thence S00°05'43"E, a distance of 20.09 feet to a point on the southerly line of said Lot 20;

Thence coincident with the southerly and westerly lines of said Lot 20 the following two (2) courses:

1. Thence S89°36'03"W, a distance of 6.50 feet;
2. Thence N00°05'43"W, a distance of 20.12 feet to the **Point of Beginning**.

The above-described parcel containing 131 square feet (0.003 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A temporary construction easement situated in the NE 1/4 of Section 3, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 5, Block 1, Havana Subdivision, Amended Map, the plat of said subdivision being recorded on May 22, 1940, at Rec. No. 264203 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the NE corner of said Section (from whence the E 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S01°28’20”W, a distance of 1096.65 feet to a point on the easterly line of said Lot 5, said point being the **Point of Beginning**;

Thence S00°05'43"E, coincident with said easterly line, a distance of 6.00 feet;

Thence S89°54'17"W, a distance of 5.00 feet;

Thence N00°05'43"W, a distance of 6.00 feet;

Thence N89°54'17"E, a distance of 5.00 feet to the **Point of Beginning**.

The above-described parcel containing 30 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the NE 1/4 of Section 3, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

DATE: SEPT. 26, 2025

A permanent easement situated in the NW 1/4 of Section 11, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of that parcel of land described as PARCEL 1 in that Warranty Deed recorded on June 28, 1999, at Rec. No. B0043518 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the W 1/4 corner of said Section 11 (from whence the NW corner of said section bears N00°12’05”W, a distance of 2645.10 feet);

Thence N02°54’59”E, a distance of 983.65 feet to a point on the southerly line of said PARCEL 1, said point being a point of non-tangent curvature and also being the **Point of Beginning**;

Thence coincident with the southerly and westerly lines of said PARCEL 1 the following two (2) courses:

1. Thence along said curve to the left (whose chord bears N88°34'33"W, a distance of 3.50 feet) having a radius of 61.65 feet, and a central angle of 03°15'16", an arc distance of 3.50 feet to a point of non-tangency;
2. Thence N00°12'05"W, a distance of 94.98 feet to a point of non-tangent curvature;

Thence along said curve to the right (whose chord bears S15°14'17"E, a distance of 13.49 feet) having a radius of 26.00 feet, and a central angle of 30°04'24", an arc distance of 13.65 feet to a point of tangency, said point being 3.50 feet east of the westerly line of said PARCEL 1 when measured perpendicular thereto;

Thence S00°12'05"E, parallel with and 3.50 feet east of said westerly line, a distance of 82.05 feet to the **Point of Beginning**.

The above-described parcel containing 318 square feet (0.007 acres) more or less.

The purpose of the above-described parcel is for the construction and maintenance of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 11, T4S, R67W, 6th P.M., being N00°12’05”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16419 1989” and on the north end by a 3 1/4" aluminum cap in a range box “COLO DEPT OF HIGHWAYS 1988 PLS No 22571”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-201
DATE: SEPT. 26, 2025

A temporary construction easement situated in the NW 1/4 of Section 11, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of those parcels of land described as PARCEL 1 and PARCEL 2 in that Warranty Deed recorded on June 28, 1999, at Rec. No. B0043518 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the W 1/4 corner of said Section 11 (from whence the NW corner of said section bears N00°12’05”W, a distance of 2645.10 feet);

Thence N02°54’59”E, a distance of 983.65 feet to a point on the southerly line of said PARCEL 1, said point being the **Point of Beginning**;

Thence N00°12'05"W, a distance of 82.05 feet to a point of tangent curvature;

Thence along said curve to the left (whose chord bears N15°14'17"W, a distance of 13.49 feet) having a radius of 26.00 feet, and a central angle of 30°04'24", an arc distance of 13.65 feet to a point of non-tangency, said point also being on the westerly line of said PARCEL 1;

Thence coincident with the westerly and northerly lines of said PARCEL 1 the following two (2) courses:

1. Thence N00°12'05"W, a distance of 25.02 feet to a point of non-tangent curvature;
2. Thence along said curve to the right (whose chord bears S89°01'08"E, a distance of 7.50 feet) having a radius of 181.65 feet, and a central angle of 02°21'59", an arc distance of 7.50 feet to a point of non-tangency;

Thence S00°12'05"E, a distance of 53.21 feet;

Thence S10°49'16"E, a distance of 16.28 feet;

Thence S00°12'05"E, a distance of 35.01 feet;

Thence S08°40'45"W, a distance of 16.19 feet;

Thence S00°12'05"E, a distance of 62.29 feet to a point on the southerly line of said PARCEL 2;

Thence coincident with the southerly and westerly lines of said PARCEL 2 the following two (2) courses:

1. Thence S89°47'55"W, a distance of 3.00 feet;
2. Thence N00°12'05"W, a distance of 62.46 feet to a point on the southerly line of said PARCEL 1, said point being a point of non-tangent curvature;

(continued)

Thence coincident with said southerly line and along said curve to the left (whose chord bears N86°15'00"W, a distance of 1.50 feet) having a radius of 61.65 feet, and a central angle of 01°23'51", an arc distance of 1.50 feet to the **Point of Beginning**.

The above-described parcel containing 927 square feet (0.021 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 11, T4S, R67W, 6th P.M., being N00°12’05”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16419 1989” and on the north end by a 3 1/4" aluminum cap in a range box “COLO DEPT OF HIGHWAYS 1988 PLS No 22571”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

CONDEMNATION PROCEDURES

see C.R.S. Title 38, Article 1 (§ 38-1-101 et seq.)

I. PRE-PETITION STEPS

A. Obtain a Legal Description of the property, sufficiently clear and definite to enable the property to be located without difficulty, so that the landowner can assess the effects upon his/her/its property.

B. Pass a Legislative Declaration (an ordinance) identifying the condemnation project, declaring that the project is for a "public use", and finding that the acquisition of the property is necessary for the project.

C. Obtain an Appraisal from a licensed appraiser of the "reasonable market value" of the property to be condemned, and conduct a Title Search in order to identify all persons with record interests in the property.

D. Conduct Good Faith Negotiations with the Landowner, including, at a bare minimum, one reasonable offer to purchase, and allowing a reasonable period of time (e.g., two weeks) for the landowner to respond.

E. Obtain a Current Title Commitment, including the Legal Description and the Status of all Encumbrances on the property.

F. Send a formal Notice of Intent to Acquire the Property to every person with a record interest in the property.

[Note: If the value of the property to be condemned exceeds $5,000, the notice of intent to acquire must advise the landowner that the condemnor will pay for the reasonable cost of an appraisal for the landowner if the landowner provides a copy of such appraisal to the condemnor within ninety days after the notice of intent to acquire. The valuation trial may not take place until the ninety days have passed or the condemnor has received the landowner's appraisal, whichever occurs first. However, the condemnor may initiate condemnation proceedings (i.e., file suit) and may obtain possession of the property pursuant to a court order at an "immediate possession hearing" before the passage of the ninety days.]

II. FILING THE CONDEMNATION CASE

A. Summons

B. Petition in Condemnation

(1) Citation of Constitutional and Statutory Authority to Condemn

(2) Reference to Legislative Declaration that Project is for Public Use and that Acquisition of the Property is Necessary for the Project

(3) Legal Description of the Property to be Condemned, and the Nature of the Property Interests to be Acquired

(4) Identification of all Persons who have or may have an Interest in the Property

(5) Statement that Good Faith Negotiations have Failed

(6) Prayer for Immediate Possession

(7) Reminder of Landowner's Duty to Mitigate Damage Claims

C. Notice of Lis Pendens

D. Notice of Immediate Possession Hearing

III. POST-FILING PROCEDURES

A. Immediate Possession Hearing on Condemnor's Motion
-- takes place approximately 30-60 days after filing of petition
-- is often stipulated, leaving only "just compensation" to be determined
-- is accompanied by condemnor's deposit into court of funds equal to appraised value of property (according to condemnor's appraisal)

B. Trial to Determine the Value of the Property Interests Condemned
-- the date of valuation is usually the date when the condemnor is first authorized to take possession of the property; interest added therefrom
-- the burden of proving fair market value is on the landowner

C. Rule and Order Issued by the Court
-- this is the court's judgment, and has the same legal effect as a deed

D. Hearing on Landowner's Bill of Costs (if these cannot be stipulated)
-- the landowner's reasonable costs, appraisal fees, and expert witness fees (but not attorney fees) are recoverable, from the condemnor, as part of the landowner's "just compensation" for the taking

E. Hearing on Apportionment of Award among Condemned Landowners
-- a tenant, for example, is not entitled to a separate award from the condemnor for the value (if any) of the tenant's leasehold interest; rather, the tenant must seek recovery out of the landowner's award
-- the condemnor is not involved

Ordinance amending Chapter 22 of the City Code related to Periodic Code Inspections of Detention Facilities

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

The proposed ordinance calls for quarterly and annual inspections of detention facilities for occupancy and habitability standards. Development of occupancy standards will take approximately 40 hours of staff time to research, draft, benchmark, and consult with subject detention facilities. Existing staff and resources will be utilized to develop the occupancy standards. Similarly, development of the habitability requirements will take approximately 40 hours of staff time to research, draft, benchmark, and consult with subject detention facilities. The quarterly and annual inspections of occupancy and habitability standards will take approximately 2 hours each for 4 staff members, or 8 staff hours per inspection. Existing staff and resources will be utilized to conduct the inspections. Since existing staff will be utilized for this work there is not an impact to the annual budget, but there is a workload impact as previously indicated.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does City Council approve of moving the ordinance forward to a regular City Council meeting?

LEGAL COMMENTS

Council has the power to make and publish ordinances consistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the State Constitution, State Statute, or City Charter and such as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city and the inhabitants thereof. (City Code, sec. 2-32 and C.R.S., sec. 31-15-103). City Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of an ordinance. (City Charter, Art. 5-1). (Garcia)

ORDINANCE NO. 2026- ___

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING CHAPTER 22 OF THE CODE OF THE CITY OF AURORA COLORADO, RELATED TO PERIODIC INSPECTIONS, OCCUPANCY STANDARDS, AND HABITABILITY REQUIREMENTS FOR DETENTION FACILITIES.

WHEREAS, the City Council recognizes the importance of maintaining detention facilities in a safe, sanitary, and humane condition for detainees and staff; and

WHEREAS, detention facilities should be held to the same reasonable expectations, standards of conduct, and obligations applicable to any other business or property occupant including but not limited to compliance with health, safety, and sanitation standards to maintain community standards; and

WHEREAS, establishing clear inspection protocols, occupancy limits, and habitability standards for detention facilities promotes accountability, operational transparency, and risk management; and

WHEREAS, municipalities have a legal obligation to ensure that conditions of confinement do not violate constitutional protections recognized under the Eighth Amendment to the United States Constitution.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by adding a Division to Article XV, to be numbered 4, which Division shall read as follows:

DIVISION 4. INSPECTION, OCCUPANCY, AND HABITABILITY STANDARDS FOR DETENTION FACILITIES

Sec. 22-671. Declaration of purpose.
Sec. 22-672. Definitions.
Sec. 22-673. Systematic Inspections.
Sec. 22-674. Occupancy Standards.
Sec. 22-675. Habitability Requirements.
Sec. 22-676. Penalties.

Sec. 22-671. – Declaration of purpose.

***Purpose*. The purpose of this division is to ensure that detention facilities are**

maintained in a safe, sanitary, and humane condition through periodic inspections, defined occupancy standards, and minimum habitability requirements.

Sec. 22-672. – Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly requires otherwise:

(a) ***Detention facility*** **means a secured institution under the supervision of the judiciary, correctional departments of any local, state, or federal governments, or any law enforcement agency, in which persons are or may be lawfully held in custody after arrest or as a result of conviction of a crime or in which a person or person are restrained and unable to freely leave the facility on their own accord.**

(b) ***Director*** **means the director of housing and community services or the director's designee.**

(c) ***Occupancy capacity*** **means the maximum number of detainees permitted in a housing area based on square footage, safety requirements, and supervision capacity.**

(d) ***Habitability standards*** **means minimum standards related to space requirements, furnishing requirements, prevention of the spread of communicable disease, housing and environmental conditions related to sanitation, lighting, ventilation, and temperature.**

Sec. 22-673. – Periodic Inspections.

(a) The detention facility shall be subject to periodic inspections including random, unannounced inspections to ensure compliance with safety, sanitation, and operational standards.

(b) Periodic inspections shall include:

- **i. Daily operational inspections conducted by the on-duty supervisor.**
- **ii. Quarterly inspections conducted by the city manager or his or her authorized representatives.**
- **iii. Annual inspections conducted by the city manager or his or her authorized representatives.**
- **iv. Inspection records shall be maintained for no less than seven (7) years.**

(c) Any detention facilities built after the effective date of this ordinance shall comply with the standards in Chapter 22, Article XV of the Code.

Sec. 22-674. – Occupancy Standards.

(a) Occupancy limits shall be established for each holding cell or housing unit based upon:

i. Square footage

ii. Availability of beds or seating

iii. Access to sanitary facilities

iv. Staff supervision capacity

(b) Occupancy levels shall not exceed limits established by the Director.

Sec. 22-675. – Habitability Requirements.

The detention facility shall maintain minimum conditions including:

(a) Sanitation

i. Cells and common areas shall be cleaned and disinfected regularly.

ii. Detainees shall have access to functioning toilets and handwashing facilities.

iii. Continuous access to potable drinking water.

iv. Proper sewage and waste disposal systems.

(b) Lighting and Noise

i. Detention facilities shall provide adequate light and noise regulation based on the size of the detention facility, prioritizing the use of natural lighting.

ii. Adequate lighting for safety and sanitation.

(c) Air and Temperature

i. Heating and cooling systems sufficient to maintain consistently reasonable indoor temperatures.

ii. Natural or mechanical ventilation which admits fresh air and is sufficient to prevent the accumulation of odors, smoke, dust, harmful gases, and other contaminants.

Sec. 22-676. – Penalties.

Any person, firm or corporation violating any provision of this division or failing to

comply with any provisions of this division shall, upon conviction thereof, be punished as provided in section 1-13 of the City Code.

Section 2. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

QUESTIONS FOR COUNCIL

Does Council approve of moving the item forward to a regular City Council meeting?

LEGAL COMMENTS

Council has the power to make and publish ordinances consistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the State Constitution, State Statute, or City Charter and such as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city and the inhabitants thereof. (City Code Sec. 2-32 and C.R.S. Sec. 31-15-103). City Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of an ordinance. (City Charter Art. 5-1). (Garcia)

ORDINANCE NO. 2026- ___

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING SECTIONS 26-246 AND 26-247 OF THE CITY CODE OF THE CITY OF AURORA COLORADO, AND ADDING SECTIONS 26-248 AND 26-249 TO THE CITY CODE OF THE CITY OF AURORA COLORADO, REGARDING DETENTION FACILITIES NOTIFICATION REQUIREMENTS.

WHEREAS, City Council has a compelling interest in protecting the public health, safety, and welfare of the City's residents, visitors, and employees; and

WHEREAS, reportable diseases present a significant risk of transmission in congregate settings including detention facilities; and

WHEREAS, timely notification of reportable disease outbreaks is essential to enable the City to take appropriate public health measures to prevent further spread and protect the broader community; and

WHEREAS, the City requires accurate and prompt information regarding reportable diseases or outbreaks occurring within detention facilities to coordinate with local and state public health authorities; and

WHEREAS, the failure to provide timely notice of reportable diseases may hinder the City's ability to respond effectively and may increase the risk of widespread transmission.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by amending section 26-246 which section shall read as follows:

Sec. 26-246. Definitions

Except as otherwise indicated by the context, the following words, terms and phrases, shall have the following meanings for purposes of this article:

Agent means an individual designated by a private or publicly-held corporation or a government to act on behalf of the corporation or governmental entity under this article. An agent shall be a bona fide resident of Colorado, a citizen or legal resident of the United States, or otherwise authorized to work in the United States.

Detention facility means a facility that a person, corporation or government, owns, rents, leases or has otherwise lawful possession, dedicated to maintaining inmates or detainees imprisoned or otherwise confined whether under contract with a government agency or not, excluding half way houses and other facilities where residents have freedom of movement.

Employee means any person who performs any service at a detention facility whether public or private on a full-time, part-time, or on contract basis. Employee does not include a person exclusively engaged in the repair or maintenance of the detention facility, or for the delivery of goods to the detention facility. For purpose of this article the term "employee" shall not include federal agents or employees of the federal government.

~~*Notification* means a written or electronic communication from the detention facility to the fire chief or designee advising the fire department of the existence of a communicable disease or pathogen. The communication shall not include any personal identifiable information as required under the Health Insurance Portability and Accountability Act (HIPAA).~~

Person shall have the meaning as defined in section 86-26.

Reportable disease or Reportable diseases **shall have the same meaning and requirements defined and outlined in 6 CCR 1009-1.**

Respond or Response **means a certified mailing or electronic communication from the detention facility to the fire chief or designee providing the fire department all information about reportable disease cases or pathogens in the facility upon request. The communication shall not include any personal identifiable information as required under the Health Insurance Portability and Accountability Act (HIPAA).**

Section 2. The City Code of the City of Aurora, Colorado, is hereby amended by amending section 26-247 which section shall read as follows:

Sec. 26-247. ~~Notification required.~~ **Response required.**

Every detention facility shall be required to:

(1) Request and maintain available at the detention facility and accessible to all employees the contact information of the city fire chief or designee for the notification purposes required in subsection (2).

(2) ~~Within 48 hours, notify in writing or by electronic means to the fire chief or designee, any health hazards existing in the premises, including but not limited to contagious disease, that may affect fire rescue personnel or other city personnel responding to the facility provided that all personal identifiable information is removed as required under the Health Insurance Portability and Accountability Act (HIPAA). The obligations contained in this subsection are in addition to any state or federal law requirement and do not supersede the need to~~

~~report notifiable conditions in accordance with Regulation 6 CCR 1009-1.~~ **Within 48 hours, detention facility shall respond in writing by means of a certified mailing or by electronic means to the fire chief or designee, any health hazards existing in the premises, including but not limited to reportable diseases, that may affect fire rescue personnel or other city personnel responding to the facility, or any other information upon request that the fire chief or designee believe may impact health, safety, or welfare provided that all personal identifiable information is removed as required under the Health Insurance Portability and Accountability Act (HIPAA). The obligations contained in this subsection are in addition to any state or federal law requirement and do not supersede the need to report notifiable conditions in accordance with Regulation 6 CCR 1009-1.**

(3) The fire chief or designee shall request information in subsection (2) monthly.

(4) The fire chief or designee shall report any information provided by the detention facility in accordance with this section to the Arapahoe, Adams, or Douglas County health department.

Section 3. The City Code of the City of Aurora, Colorado, is hereby amended by adding a new section to Article VI, Chapter 26, that shall be numbered 26-248, which section shall read as follows:

Sec. 26-248. Emergency Response.

(1) The Aurora Police Department shall be granted access to the detention facility to respond to calls for service and to conduct state and local criminal investigations.

(2) Aurora Fire Rescue shall be granted access to the detention facility to respond to calls for service and to conduct state and local criminal investigations.

Section 4. The City Code of the City of Aurora, Colorado, is hereby amended by adding a new section to Article VI, Chapter 26, that shall be numbered 26-249, which section shall read as follows:

Sec. 26-249. Penalties.

Any person, firm or corporation violating any provision of Chapter 26 of Article VI or failing to comply with any provisions of Chapter 26 of Article VI shall upon conviction thereof, be punished as provided in section 1-13 of the City Code.

Section 5. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the city clerk.

Item Title: CONTINUATION PAGE: 2026 Spring Supplemental
Item Initiator: Jackie Ehmann, Budget Program Manager
Staff Source: Jackie Ehmann, Budget Program Manager
Legal Source: Hanosky Hernandez, Senior Assistant City Attorney
Outside Speaker: N/A
Date of Change: 6/22/2026

COUNCIL MEETING DATES:

Study Session: 5/18/2026

Regular Meeting: 6/8/2026

ITEM SUMMARY ***(Brief description of changes or updates with documents included.)***

At the June 8, 2026 Regular Council Meeting, Council Member Bergan requested that a decision regarding the item titled 2026: Transfer 3.0 FTE Public Defenders from Non-Departmental to Public Defender be made in context of the 2027 Budget deliberations at the Budget Workshop on October 3, 2026. Council Member Bergan's motion was seconded and passed.

As background, the Public Defender had requested that 3.0 FTE Deputy Public Defender Attorneys be added to the 2023 budget including 1.0 FTE to support the newly state mandated weekend court and 2.0 FTE in response to an external workload study prepared in August of 2022. At the 2023 Budget Workshop, City Council added the FTE and appropriations to Non-Departmental for further discussion once the 2024 court system workload study was reviewed and a determination was made on any actions based on the study.

These positions have been held vacant to-date and the vacancy savings are used to offset Public Defender costs associated with legal services for the weekend court mandate as well as to address workload issues as needed which are costs in the spirit of the original request to add the FTE. In the 2026 Spring Supplemental request for 2026, the Public Defender requested the FTE be transferred to the Public Defender's Office. It was decided by Council that a decision regarding this amendment will be tabled until the Budget Workshop.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The 2026 Spring Supplemental Ordinance includes appropriations for various operating expenditures, capital projects, and interfund transfers that impact the 2025 and 2026 budget years. Items for 2025 represent financial activities that have already occurred.

Many of the requests in this supplemental process are technical in nature, such as budget lapses (reductions), reallocations, zero-dollar amendments where appropriations are offset by revenue, or accounting and other adjustments. These items are indicated by including "technical" in the title and may or may not have been reviewed by City Council. Items that were previously reviewed include those in the 2025 projection used in the 2026 Adopted Budget, as well as items discussed in Council Committees or City Council meetings. Council review details are included in the narrative for the supplemental request.

The attachments included for this agenda item reflect summary and detailed information regarding the requested appropriation changes for each fund and department. Transfers reflect the movement of funding from one fund to another. The details of these appropriation amendments can be found in:

- **Attachment A:** 2025 Amendment Summary
- **Attachment B:** 2026 Amendment Summary
- **Attachment C:** 2025 Amendment Detail
- **Attachment D:** 2026 Amendment Detail

The following discussion highlights significant changes by fund for each budget year, rather than listing all amendments. Please refer to Attachments C and D for full details on each request.

2025 Supplemental Amendment Requests

One-time appropriations in the General Fund total **$19.5 million** offset by $1.1 million in additional revenue. Most items are technical or are included in the 2025 projection. Significant supplemental items in the General Fund include:

- The appropriation of **$6.0 million** in the Police Department to cover costs in excess of budget for personnel-related expenditures. These include costs for overtime, shift differential, standby pay, and paid time off (PTO) year-end payouts. These overages allowed the department to meet its goals and was projected for 2025 in the 2026 budget.
- A technical supplemental to appropriate **$5.1 million** in Non-Departmental to create a transfer budget to move funds collected in the General Fund to the Designated Revenues Fund to cover incentive payouts. There is a related amendment in the Designated Revenues Fund to receive this transfer-in and create appropriation to cover 2025 payments of $3.0 million.

- The appropriation of **$3.2 million** for Aurora Fire Rescue to cover costs in excess of budget for personnel-related expenditures. These include costs for overtime and acting pay which allowed the department to adhere to the mandated staffing model. This overage was projected for 2025 in the 2026 budget.
- The appropriation of **$1.5 million** for the Public Works Department to cover costs in excess of budget for the Facilities Operations division. Additional expenditures were required as the division experienced unprecedented demand for repairs and maintenance while staffing shortages required more expensive contracted services. The need for this supplemental was not able to be projected for 2025 in the 2026 budget due to the timing of the needs.
- The appropriation of **$1.1 million** for Aurora Fire Rescue to cover personnel and travel costs related to wildland fire events in Colorado and other states. These expenditures are fully offset by reimbursement revenue. The need for this supplemental was projected for 2025 in the 2026 budget.

Significant supplemental items in other funds include:

- The net appropriation of **$7.6 million** in the **Gifts and Grants Fund** to cover the costs associated with several grants covered by newly granted funds or existing grant fund balances. Significant technical appropriations include:
    - Fuels Impact Reduction Grant at $4.0 million
    - USDA Tree Planting Grant at $2.5 million
    - American Rescue Plan Act at $1.0 million
- The appropriation of **$8.4** million in the **Capital Projects Fund** for taxes and fees collected to be returned to the Aerotropolis Regional Transportation District (ARTA) per the agreement.
- **$1.8** million in appropriation in the **Capital Projects Fund** for the Police Drone First Responder program. This project was not included in the 2025 projection in the 2026 budget as plans were not finalized.
- The total appropriation of **$1.9 million** in the **Development Review Fund** to cover costs in excess of budget across multiple departments. Credit card fees, drainage review contracted services, and fewer vacancies than expected drove this overage. The need for this supplemental was mostly reflected in the 2025 projection as part of the 2026 Adopted Budget due to timing.
- The appropriation of **$1.5 million** in the **Enhanced E-911 Fund** to cover overtime costs incurred to address service demands in the Aurora911 Department. Current fund balance is able to cover this additional cost. The need for this supplemental was included in the 2025 projection.
- The lapse of **$73.0 million** in the **Water and Wastewater funds** combined to release funds for completed projects. This supplemental was not included in the 2025 projection due to the uncertainty of project spending and timing.

2026 Supplemental Amendment Requests

New appropriation in the **General Fund** totals $383,700 offset by $244,700 in new revenue for a total impact to the fund of $139,000. Although the General Fund requests incorporate the net addition of just 0.5 FTE, there are several amendments affecting FTE as follows:

- **Add 1.0 FTE** to Finance for the Tobacco and Age Restricted Psychoactive Product Retail Licensure Program. Additional revenue of $200,000 generated by the program more than offsets the new appropriation of $164,000 in the initial year. This program was approved by Council.
- The **reduction of 0.5 FTE** in HR. The existing budget for this part-time FTE will be combined with budget for an existing vacant position to create a new Assistant Director of Human Resources at no additional cost to the General Fund.
- Transfer **7.0 FTE** and associated budgets for Access Aurora from Aurora Water to General Management.
- Transfer **3.0 FTE** and associated budgets for the Transportation Team from Planning and Business Development to Public Works.
- Transfer **3.0 FTE** Public Defender positions added to Non-Departmental in the 2023 Adopted Budget by City Council to the Office of the Public Defender. The positions have been held vacant since 2023 with vacancy savings for use by the Public Defender as needed for weekend court and other workload needs.

Other significant supplemental items in all funds include:

- A technical supplemental of **$2.0 million** in the **Gifts and Grants Fund** to appropriate grant funding for the DRCOG Climate Pollution Reduction Grant to help develop a Building Decarbonization Program.
- A technical supplemental in Aurora Water for **$9.5 million** in the **Water Fund** for PFAS MDL Litigation. This appropriation is completely offset by settlement revenue.
- The lapse of **$70.0 million** in the **Water and Wastewater funds** combined to release funds for completed projects.
- Aurora Water is requesting to add a total of **10.0 FTE** funded by the **Water and Wastewater funds** for a total of **$1.6 million**. The addition of these FTE has not previously been reviewed by Council.
    - 6.0 FTE for a 5th Construction and Repair Crew will require $1.4 million in total appropriation. The addition of this crew will help the group to stay ahead of infrastructure needs by allowing for increased in-house line replacement efforts and system improvements, an area that has had a shortage of staff.
    - 4.0 FTE are requested at a total cost of $121,000. The department provided reductions to the variable hour pay budget to reduce the cost to convert current variable hour staffing to authorized FTE to include:
        - 1.0 FTE Flow Control Technician
        - 1.0FTE GIS Technician
        - 1.0 FTE Project Manager
        - 1.0 FTE Water Conservation Specialist

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Revenue will be adjusted in 2025 and 2026 for grant funds and other agreements or policy.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

These supplemental requests will make adjustments to the 2025 and 2026 budgets.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does Council wish to forward this supplemental ordinance to the regular meeting?

LEGAL COMMENTS

The City Council may make appropriations in addition to those contained in the budget upon recommendation of the City Manager, provided that the Finance Director certifies there are sufficient funds available to meet such appropriations. (*See*, City Charter Art. 11-16). (Hernandez)

Aurora Water

2025 Technical: Wastewater Fund Lapses

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Wastewater Fund	0.00	0	-25,980,000	-25,980,000	0	25,980,000
Total Appropriation Impact	0.00	0	-25,980,000	-25,980,000	0	25,980,000

This supplemental will reduce (lapse) appropriation in the amount of $26.0 million in the Wastewater Fund for capital projects as shown below. Some lapses are offset by re-appropriations for the 2026-2030 capital plan.

* SCADA - Sewer ($400,000)
* Maintenance Facility-Sewer ($80,000)
* Maintenance Facility-Storm ($37,000)
* First Creek Interceptor Segment Zero ($653,357)
* Second Creek Lift Station ($10,000)
* Senac Creek Interceptor - Sewer ($2,095,420)
* Misc Lift Stat/Force Main Rehab-SS ($2,950,000)
* Interceptor Rehab-SS ($1,000,000)
* New Sewer Line Construction ($3,491,223)
* Crossing Structure Projects (Bridge/Culverts) ($8,291,196)
* Upper 1st Creek Det Pond-DV ($651,093)
* Miscellaneous Stream Restoration-SD ($304,761)
* Peninsula Townhomes ($278,239)
* Storm Drainage System Improvement ($1,860,919)
* Detention Ponds/Improvements ($376,792)
* Misc Stormwater Development Projects ($3,500,000)

This supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget due to the uncertainty of the timing of capital project spending. Because capital projects often span multiple years, an unspent capital appropriation will systematically carry forward to the next budget year until the appropriation is either spent, reassigned within the same program, or lapsed.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Aurora Water	Wastewater Fund	-25,980,000	0	Lapse of Appropriation

Total Appropriation Impact	0.00	624,775	0	624,775	0	-624,775

This supplemental will provide appropriation to cover actual expenses for the Drainage Review team managed by Aurora Water. These costs are primarily one-time and are associated with drainage review support contracts that were not previously budgeted.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget. Due to the timing of hiring FTEs to replace the drainage contracts as planned, the supplemental is $430,300 more than projected.

Aurora911

2025: Aurora911 Overtime Costs

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Enhanced E-911 Fund	0.00	1,536,888	0	1,536,888	0	-1,536,888
Total Appropriation Impact	0.00	1,536,888	0	1,536,888	0	-1,536,888

This supplemental will provide appropriation to cover costs incurred by Aurora911 to address service demands. Since the opening of a third communications channel in 2023, operational needs have steadily increased. Call volume has also been increasing as the city continues to grow. Despite improved staffing and retention, Aurora911 staff, Police, and Fire overtime helped to cover call taking and dispatching duties as it takes roughly two years to fully cross-train new staff members. The combination of these factors led to 2025 expenditures that exceeded budget in the E-911 Fund. The fund has sufficient funds available to cover these expenses.

This supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type

2025: Ambulance CAD Integration and Telehealth Provider

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	280,250	0	280,250	0	-280,250
Total Appropriation Impact	0.00	280,250	0	280,250	0	-280,250

Aurora Fire Rescue contracted with a telehealth provider to support its right response model by reducing unnecessary transports and improving unit reliability for high-priority calls. The implementation was intentionally aligned with the integration of the contracted ambulance provider into the city's Computer Aided Dispatch (CAD) system, allowing for more streamlined workflows, including better identification of appropriate call types and improved sharing and use of CAD data across agencies. The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

2025: Aurora Fire Rescue Overtime and Acting Pay

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	3,156,635	0	3,156,635	0	-3,156,635
Total Appropriation Impact	0.00	3,156,635	0	3,156,635	0	-3,156,635

This supplemental request will provide appropriation to cover overtime and acting pay costs related to Aurora Fire Rescue's mandated staffing model. Overtime needs fluctuate throughout the year due to unexpected absences, turnover, and prolonged periods of heightened activity. An increased reliance on overtime is needed to maintain operational readiness. The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

General Management

2025 Technical: Additional Appropriation for Aurora Fest Expenditures

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	39,300	0	39,300	68,000	28,700
Total Appropriation Impact	0.00	39,300	0	39,300	68,000	28,700

This technical supplemental will provide additional appropriation to cover 2025 Aurora Fest expenditures in excess of the annual baseline budget of $10,000. Total city expenditures in this fund for the event were $49,300, while funding raised through sponsorships plus interest totaled $68,000. The unspent funds will remain in the Aurora Fest account to be used for future events.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
General Management	Gifts & Grants Fund	0	39,300	New Appropriation

2025: Fleet Sublet Expenses

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Fleet Management Fund	0.00	434,159	0	434,159	434,159	0
General Fund	0.00	311,400	0	311,400	0	-311,400
Total Appropriation Impact	0.00	745,559	0	745,559	434,159	-311,400

This supplemental appropriates funding for sublet expenses in excess of budget in the Fleet Management Fund, as well as a transfer from the General Fund to maintain an ending fund balance in line with 2025 projections. Revenue came in lower than the 2025 projection, and expenses came in higher, therefore an increase to the General Fund transfer was needed to bring the fund balance in line with the 2025 projection. The expense overage was projected for 2025 in the 2026 budget but the revenue shortfall and the needed increase in the General Fund transfer was not expected.

Housing and Community Services

2025 Technical: Adjust Federal HOME Grant and Program Income

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	830	0	830	830	0
General Fund	0.00	-26,469	0	-26,469	0	26,469
Total Appropriation Impact	0.00	-25,639	0	-25,639	830	26,469

This technical adjustment will align the Home Investment Partnership (HOME) grant appropriation for the final award and to match final 2025 program income collections. It will also set the General Fund grant match to the 2025 actual award amount. The city is required to provide a match to the HOME grant equal to 22.5 percent of the annual award. With this adjustment, the General Fund match will be $241,445. The need for this supplemental was identified and included in the 2025 projection as part of the 2026 Adopted Budget.

HOME program income consists primarily of loan payoffs from the Home Ownership Assistance Program (HOAP) and the Housing Rehabilitation Program. The strong real estate market has led program participants to sell their homes or refinance home loans with a cash out of equity resulting in the requirement to repay the loan.

HOME programs are funded by annual grants from the United States Department of Housing and Urban Development (HUD). HOAP provides zero interest, deferred loans to first-time homebuyers. The loans do not exceed $10,000 and repayment is deferred until title transfers or if a refinance results in a cash out of equity. The Housing Rehabilitation Program provided zero-interest deferred loans to income qualifying owner-occupied homeowners to rehabilitate their homes and making them more energy efficient which in turn keeps the home more affordable for the homeowner. Payment is deferred until transfer of title or if a refinance results in a cash out of equity.

Housing and Community Services

2025 Technical: Appropriate Broncos Funds to City Council Designated Youth Programs

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	293,679	0	293,679	0	-293,679
Total Appropriation Impact	0.00	293,679	0	293,679	0	-293,679

This technical one-time adjustment will appropriate $293,700 for 2025 expenditures associated with three of the Housing and Community Services Broncos Funding projects. Aurora received $3.8 million in revenue in 2023 when the sale of the Denver Broncos took place. These projects were approved for the use of those funds during the City Council meeting on September 11, 2023.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Housing and Community Services	Designated Revenues Fund	0	293,679	New Appropriation

2025 Technical: Appropriate Program Income for Neighborhood Stabilization

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	19,165	0	19,165	19,165	0
Total Appropriation Impact	0.00	19,165	0	19,165	19,165	0

This technical adjustment for the Neighborhood Stabilization Program (NSP1 and NSP3) will set the 2025 appropriation of program income to match final 2025 collections.

The City of Aurora was awarded NSP funding of $6.9 million from the United States Department of Housing and Urban Development (HUD) over two years (2009 and 2011). NSP projects were developed to address the high foreclosure problem resulting from the market crash and recession. The city bought, rehabbed, and sold homes to households whose incomes did not exceed 120 percent of the area median income as established by HUD. The program also provided soft second mortgages in the form of deferred loans to the qualified buyers. As the market rebounded, some of the NSP buyers either sold their homes or refinanced with a cash out of equity, requiring loan repayment, resulting in NSP program income.

Aurora's NSP program is effectively complete at this time. All grant money has been spent and there are no future NSP projects planned. Each year NSP program income collected typically declines as there are fewer remaining loans to be paid. In 2025, there were small payoffs of existing NSP loans, necessitating this budget adjustment in NSP program income.

Housing and Community Services

2025 Technical: Community Development Block Grant Adjustments

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	57,376	0	57,376	57,376	0
Total Appropriation Impact	0.00	57,376	0	57,376	57,376	0

This technical adjustment will align the budget for the Community Development Block Grant (CDBG) to the 2025 actual award amount. The final 2025 CDBG award received from the U.S. Department of Housing and Urban Development (HUD) was $1,000 higher than anticipated. Additionally, this technical one-time adjustment will set the 2025 appropriation of program income to match final 2025 collections. CDBG program income consists of loan payoffs from the original Home Ownership Assistance Program (HOAP) and the Commercial Renovation Program. The need for this supplemental was identified and included in the 2025 projection as part of the 2026 Adopted Budget.

CDBG programs are funded by annual grant from the United States Department of Housing and Urban Development (HUD). The Commercial Renovation Program provided ten-year amortized loans to commercial building owners to renovate and improve building facades.

Total Appropriation Impact	0.00	538,339	0	538,339	0	-538,339

This supplemental provides one-time appropriation of $538,300 to cover the abatement and security costs associated with the Nome, Hannover, and Dallas properties in northwest Aurora. These properties required complex and extensive abatement activities.

The need for additional funding was projected for 2025 in the 2026 Adopted Budget, however at a lower amount than what was finalized. The approved budget indicated a $254,600 overage for the department and the final expenditure was $538,300 which was an increase of $283,700.

Information Technology

2025: 911 Call Management System

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Enhanced E-911 Fund	0.00	0	242,628	242,628	0	-242,628
Total Appropriation Impact	0.00	0	242,628	242,628	0	-242,628

This supplemental will appropriate additional funds to complete the implementation of the new 911 Call Management System utilized by Aurora911. This next generation system will move Aurora911 forward with capabilities to answer 911 calls from any location, provide advanced information for 911 calls, and provide reliability for data storage as it is in the cloud. Additional funds are needed for the addition of managed services provided by the vendor and technical services required for the delivery of 911 calls.

The need for this supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget, as we were notified of the additional costs and services needed after the 2026 Budget was adopted.

2025: Contracted Services and Communication Upgrades for Major Citywide Systems

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	758,329	0	758,329	0	-758,329
Total Appropriation Impact	0.00	758,329	0	758,329	0	-758,329

This supplemental covers expenditures in excess of the 2025 budget stemming from the use of contracted services to meet the demands of the Information Technology (IT) department's requirements and new and improved communication services to enhance network reliability, security and performance across departments. The majority of the contracted services were used in the upgrade and implementation of major citywide systems as the portfolio modernization continues. These efforts included staffing for the IT service desk, contract networking and solutions delivery, upgrades to city audiovisual equipment, and information and cyber security services. The upgrades in the communication services include costs associated with the connection of the consolidated data center and modernization of the city's IT infrastructure.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget, but this request is $390,500 higher than the original projections. This is due to several unanticipated factors required of IT to meet requirements for software system implementations, expanded information security services, and modernization of the city's IT network and infrastructure.

Total Appropriation Impact	0.00	1,020,400	0	1,020,400	0	-1,020,400

In 2021 the City of Aurora received $65.4 million in American Rescue Plan Act (ARPA) funds. This supplemental covers 2025 ARPA spending for various projects including park renovations, fire station improvements, the homeless navigation campus, safe outdoor spaces, and housing gap financing. With this supplemental, the ARPA funds are fully expended or encumbered in compliance with federal government deadlines.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

2025 Technical: Incentive Payouts

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	3,007,000	0	3,007,000	5,132,000	2,125,000
General Fund	0.00	5,132,000	0	5,132,000	0	-5,132,000
Total Appropriation Impact	0.00	8,139,000	0	8,139,000	5,132,000	-3,007,000

The city has several agreements with companies or areas under which it collects sales tax, building materials use tax, and equipment use tax. Upon fulfillment of the agreement terms, such as business establishment or job creation, the city reimburses a portion of the funds.

This supplemental includes three incentive payments. Two have been transferred from the General Fund to the Designated Revenues Fund and have been disbursed to the respective companies. The third has also been transferred from the General Fund but has not yet been paid, to ensure those funds are reserved and not inadvertently used for other purposes.

A portion of this supplemental is connected to the lapse in Public Works seen later.

The majority of this supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget due to the uncertainty in timing of incentive agreement completion, which triggers the associated payments.

Total Appropriation Impact (Does not include offset impact)

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Development Review Fund	0.00	52,200	0	52,200	0	-52,200
Total Appropriation Impact	0.00	52,200	0	52,200	0	-52,200

This supplemental will appropriate funding for contracted professional services in excess of the budget. Contracted professionals provide specialized expertise that has been difficult to staff. Planning will continue to utilize contracted professionals until the department can employ additional staff to help with higher levels of work related to plan reviews. This was not projected in 2025 for the 2026 Adopted budget due to unknown levels of work not forecasted at the time.

Police

2025: Drone First Responder Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	1,800,000	1,800,000	0	-1,800,000
Total Appropriation Impact	0.00	0	1,800,000	1,800,000	0	-1,800,000

This 2025 supplemental will appropriate $1.8 million for the Drone First Responder capital project. The Police Department is implementing a Drone as First Responder (DFR) program that enables Real Time Information Center (RTIC) personnel to deploy and operate drones in support of field operations. This program provides immediate aerial situational awareness to first responders, improving response effectiveness, enhancing safety, and supporting proactive public safety strategies. This will be spent over three years.

This supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget because it was not known at the time. This is a capital improvement project.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Police	Capital Projects Fund	1,800,000	0	New Appropriation

2025: Operations Budget Adjustment for Overspend

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	6,039,000	0	6,039,000	0	-6,039,000
Total Appropriation Impact	0.00	6,039,000	0	6,039,000	0	-6,039,000

This supplemental will appropriate one-time funds to cover additional expenditures in the Police Department. The department exceeded the 2025 General Fund budget due to increased personnel costs associated with overtime, shift differential, standby pay, and paid time off (PTO) year-end pay outs as well as necessary operations costs in supplies and services to meet department goals.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Public Works

2025 Technical: Fuels Impact Reduction Grant Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	0	4,000,000	4,000,000	4,000,000	0
Total Appropriation Impact	0.00	0	4,000,000	4,000,000	4,000,000	0

This supplemental will appropriate $4.0 million for 2025 and 2026 funding received for the Fuels Impact Reduction (FIR) grant program. The FIR program was created by the State of Colorado to provide grants to critically impacted communities for the improvement of their hazardous mitigation corridor infrastructure. Aurora will receive a total amount of $10,000,000 for 2025 through 2029. The grant funds must be used for the improvement of hazardous mitigation corridors such as Smith Road, Tower Road, Airport Boulevard, and Chambers Road, in Aurora's jurisdiction; prioritizing uses related to safety and environmental impacts. The Intergovernmental Agreement (IGA) with the Colorado Department of Transportation for the grant was approved at the August 11, 2025, regular City Council meeting.

The receipt of these funds was not known in time to be included in the 2025 projection for the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Works	Gifts & Grants Fund	4,000,000	0	New Appropriation

2025 Technical: Lapse 64th Avenue ARI Incentive

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	-2,818,320	-2,818,320	0	2,818,320
Total Appropriation Impact	0.00	0	-2,818,320	-2,818,320	0	2,818,320

In 2025, a budget was created to fund the agreement with the 64th Ave ARI Authority, which aims to support an intergovernmental initiative to repay the authority's debt incurred from improvements to the 64th Avenue bridge over E-470 and the extension of 64th Avenue to Jackson Gap Street. Aurora's payment for 2025 was paid out of the Designated Revenues Fund requiring that the original budget be lapsed.

This ties to a companion supplemental in Non-Departmental regarding incentives.

2025 Technical: Transfer Funding to Grant Projects

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This technical supplemental shifts previously appropriated funds to the project cost centers:

1. $68,900 in match funding to the 13th Ave Multimodal grant project. This project will design multimodal improvements needed along 13th Avenue Road between Yosemite Street and the High Line Canal Trail.
2. $365,300 in match funding to the Phase 1 Missing Sidewalks grant project. This project will fill 2.4 miles of gaps in the existing sidewalk network in Adams and Arapahoe County.
3. $1.3 million in federal funding for the construction phase of the Northwest Aurora Pedestrian Safety Enhancements grant project. The project has identified improvements at eight Northwest Aurora intersections to improve pedestrian safety. The project includes design and construction of permanent raised concrete bulb outs at two intersections and rapid implementation (striped) bulb outs at six intersections. Along with the bulb outs, striping improvements to improve pedestrian crossings will take place at all eight intersections.

The need for this supplemental was not anticipated in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

2025: Operations Budget Adjustment for Overspend

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	1,537,900	0	1,537,900	0	-1,537,900
Total Appropriation Impact	0.00	1,537,900	0	1,537,900	0	-1,537,900

This supplemental appropriation covers over-budget expenditures in the General Fund for the Facilities Operations division. The division experienced an unprecedented demand for repairs and maintenance. Some of these situations required unbudgeted rentals of temporary heating and air conditioning equipment while awaiting repair and replacement of permanent equipment. Additionally, staffing shortages resulted in the use of more expensive contracted services to deal with emergency situations. Due to the timing of the additional expenditures, the need for this supplemental was not anticipated in the 2025 projection as part of the 2026 Adopted Budget.

2026: Add 1.0 FTE Water Conservation Specialist

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Water Fund	1.00	31,173	0	31,173	0	-31,173
Total Appropriation Impact	1.00	31,173	0	31,173	0	-31,173

This supplemental will add 1.0 FTE Program Specialist for the Water Conservation Program. The reduction of the current Variable Hour Benefit Eligible (VHBE) cost of $87,300 will partially offset the cost of adding this position.

Aurora Water is requesting to reclassify a Variable Hour Benefited Employee (VHBE) into a Full Time Employee (FTE). This position performs duties for multiple water efficiency programs and Water Shortage Response Plan (WSRP) enforcement. During prolonged drought, this FTE conversion would position us to handle the additional associated workload. Responsive, professional, and accurate customer service, now more important than ever, requires detailed training and an in-depth understanding of programs and processes.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Aurora Water	Water Fund	0	-87,331	Lapse of Appropriation

Finance

2026: Tobacco and Age Restricted Psychoactive Product Retail Licensure Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	1.00	163,966	0	163,966	200,000	36,034
Total Appropriation Impact	1.00	163,966	0	163,966	200,000	36,034

This supplemental serves as a request to implement the Tobacco Age Restricted Psychoactive Product Retail Licensure Program related to ordinance 2026-05. The program consists of the addition of 1.0 FTE Licensing Supervisor, salary for variable hour compliance agents and additional associated program costs. Ongoing costs total $200,000 per year, although will be somewhat less ($164,000) in the first year since the employee that is hired will only work part of the year. These costs and the addition of the FTE were disclosed as part of the ordinance approval process for ordinance 2026-05 approved by City Council on March 9, 2026.

The expenses are fully offset by additional revenue to include a $500 license paid up-front fee applied to approximately 340 businesses expected to need the license. This results in $170,000 in fee revenue. Additional expenses are covered by anticipated fines from the program, estimated at a minimum of $30,000 per year for a total revenue of $200,000 per year. Fees can be adjusted in future years based on program expenses and revenues received whether higher or lower than anticipated.

Total Appropriation Impact	0.00	24,500	0	24,500	0	-24,500

This supplemental request will appropriate $24,500 that was budgeted but not spent in 2025 for marketing and improvement initiatives in the Aurora Cultural Arts District. The unspent balance helped to offset the Cultural Services Fund overage in 2025. The department requests that the 2026 budget be increased by the amount of funds not spent for this initiative in 2025.

Parks Development Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	32,053	32,053

Per city ordinance, one percent of funds used for certain construction and remodeling projects with budgets over $100,000 are dedicated to funding Art in Public Places (AIPP). This technical supplemental will allow for a transfer of funds committed to the AIPP program in the Cultural Services Fund from the Conservation Trust Fund (CTF) and the Parks Development Fund (PDF). The amount transferred is based on 2025 qualifying construction project expenses from several projects including Bellewood, Crestridge, Eagle, Kingsborough, Lowry, Parklane, Pheasant Run, Utah, and Village East park renovations.

2026 Reorganization: Transfer the Transportation Team from Planning to Public Works

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplement transfers 3.0 FTE and associated appropriation from Planning and Business Development to Public Works. The purpose of this reorganization is to align transportation staffing costs and responsibilites to the correct department. The transportation team currently supports the operations and objectives that are in Public Works with regards to Connecting Aurora and the focus shifting to Build Up Aurora. This change will streamline project timelines, improve interdepartment communication, and ensure that our city transportation goals are met with both visionary insight and technical precision.

Total Appropriation Impact (Does not include offset impact)

2026 Technical: DRCOG Climate Pollution Reduction Grant

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	1,999,936	0	1,999,936	1,999,936	0
Total Appropriation Impact	0.00	1,999,936	0	1,999,936	1,999,936	0

This supplemental will appropriate funding from the Denver Regional Council of Governments (DRCOG) which received a $199.7 million Climate Pollution Reduction Grant from the Environmental Protection Agency (EPA) to develop a Building Decarbonization Program focused on reducing climate pollution from the building sector. This project addresses staff capacity constraints in the city and supports the goals of the Building Policy Collaboration (BPC) by strengthening the city's ability to implement building decarbonization policies and reduce emissions. It will expand staffing and provide technical assistance to develop a citywide greenhouse gas inventory, update building codes in alignment with state standards, and implement energy benchmarking for low-income housing.

Police

2026: Police Photo Enforcement Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	289,000	0	289,000	289,000	0
Total Appropriation Impact	0.00	289,000	0	289,000	289,000	0

This supplemental establishes an ongoing appropriation in the Designated Revenues Fund for the Police Department's photo enforcement program. The funding will cover the annual costs for rental equipment, a variable hour employee to operate the program, and other services. This program is funded by offsetting revenue generated from speeding tickets and is cost neutral to the fund.

Aurora saw a significant increase in speeding, dangerous driving, and street racing over the last few years. A pilot program to address those issues using speed vans and personnel was presented to the Public Safety Committee on 4/14/22 and then approved in Study Session on 6/13/22 by Resolution. That pilot program was unsuccessful due to the difficulty hiring personnel and operating the speed vans, but there was still a significant need to address dangerous driving in Aurora. As part of a regular discussion in the Public Safety Committee, Police conducted a request for proposal (RFP) to bring in a better solution to address speeding throughout Aurora. This updated version of the pilot program from 2022 went live in late 2025.

2026: Police Secondary Employment Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	44,709	0	44,709	44,709	0
Total Appropriation Impact	0.00	44,709	0	44,709	44,709	0

This 2026 supplemental will appropriate $44,700 of ongoing revenue that is generated from the Police Department's Secondary Employment program. The revenue is collected as a fee charged by the city when a private vendor hires off-duty police officers for private security. The appropriation will increase funding for Police equipment, including new vehicle purchases. This additional expense is entirely offset by the new revenue source with no impact to fund balance.

Total Appropriation Impact	0.00	44,168	0	44,168	0	-44,168

This supplemental request for ongoing appropriation will cover compensation increases approved by the Aurora Public Defender Office Commission pursuant to the city's compensation policies and procedures for five employees for various reasons per established policies, internal equity, and Colorado's Equal Pay for Equal Work Act. Calculations have incorporated the expected effective date of April 6 for four out of five of the adjustments. One position adjustment has an effective date of January 10 because it encompasses both the 2025 merit pay adjustment and an equity adjustment.

2026: Transfer 3.0 FTE Public Defenders from Non-Departmental to Public Defender

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplemental will transfer 3.0 FTE and appropriation for Deputy Public Defender Attorney positions from Non-Departmental to the Public Defender's Office.

The 2023 Proposed Budget included two amendments to add a total of 3.0 FTE Deputy Public Defender Attorneys supported by an external workload study and to accommodate the state mandated weekend court. At the 2023 Budget Workshop, City Council moved the FTE and appropriations to Non-Departmental. These positions have been held vacant to-date and the vacancy savings are used to offset Public Defender costs associated with legal services for the weekend court mandate as well as to address workload issues as needed.

Total Appropriation Impact (Does not include offset impact)

Total Appropriation Impact	0.00	0	486,473	486,473	486,473	0

This supplemental will appropriate design funds reimbursed to the city by Southeast Aurora Regional Improvement Authority (SARIA) for the Gartrell Bridge project. This project, in partnership with SARIA and the E-470 Public Highway Authority, will expand the existing two-lane bridge to a four-lane section with turn lanes. Construction is anticipated to begin in summer 2026.

The intergovernmental agreements for design and construction of the Gartrell project were approved at the August 5, 2019 and March 24, 2025 Regular City Council Meetings, respectively.

2026 Technical: Transfer Budget to Housing And Community Services from Public Works

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplemental lapses $22,500 from Public Works with a corresponding $22,500 appropriation to Housing and Community Services (HCS), resulting in a net-zero impact to the General Fund. The budget transfer reflects a shift in operational responsibility, as HCS now performs large animal carcass removal from roadways in addition to its existing small animal removal responsibility.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Works	General Fund	0	-22,500	Lapse of Appropriation
Housing and Community Services	General Fund	0	22,500	New Appropriation

ORDINANCE NO. 2026-

A BILL

FOR AN ORDINANCE OF THE CITY OF AURORA, COLORADO APPROPRIATING SUMS OF MONEY IN ADDITION TO THOSE APPROPRIATED IN ORDINANCE NOS. 2024-72, 2025-43, AND 2025-106 FOR THE 2025 FISCAL YEAR AND ORDINANCE NO. 2025-96 FOR THE 2026 FISCAL YEAR

WHEREAS, pursuant to Ordinance Nos. 2024-72, 2025-43, and 2025-106 the Aurora City Council (the "Council") has appropriated funds for the fiscal year beginning January 1, 2025, and ending December 31, 2025 ("Fiscal Year 2025"); and

WHEREAS, pursuant to Ordinance No. 2025-96 the Council has appropriated funds for the fiscal year beginning January 1, 2026, and ending December 31, 2026 ("Fiscal Year 2026"); and

WHEREAS, additional appropriations are needed to fund new expenditures for which revenues have recently become available; and

WHEREAS, the Director of Finance has certified that unappropriated reserves and additional funding sources and revenues are available for appropriation in the various funds; and

WHEREAS, the City Manager has recommended that the various appropriations enumerated in this Ordinance be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. Appropriations in addition to those made in Ordinance Nos. 2024-72, 2025-43, and 2025-106 shall be made for Fiscal Year 2025 for the purposes enumerated in Attachment A to the document entitled 2026 Spring Amendment Ordinance Appropriation Summaries by Fund, such document being in the form as filed with the Office of the City Clerk and presented to the Council at this meeting (the "2025 Amendment Summary"), all as follows:

a. From the unappropriated fund balance and/or additional revenues of the General Fund, the net amount of Nineteen Million Four Hundred Forty-Eight Thousand Thirty-One Dollars ($19,448,031).

b. From the unappropriated fund balance and/or additional revenues of the Capital Projects Fund, the net amount of Seven Million Seven Hundred Fifty-Six Thousand Nine Hundred Thirty-Five Dollars ($7,756,935).

c. From the unappropriated fund balance and/or additional revenues of the Community Development Fund, the net amount of Seventy-Seven Thousand Three Hundred Seventy-One Dollars ($77,371).

d. From the unappropriated fund balance and/or additional revenues of the Conservation Trust Fund, the net amount of Nine Hundred Seventy Dollars ($970).

e. From the unappropriated fund balance and/or additional revenues of the Cultural Services Fund, the net amount of Three Hundred Nine Thousand Six Hundred Fifteen Dollars ($309,615).

f. From the unappropriated fund balance and/or additional revenues of the Designated Revenues Fund, the net amount of Three Million Three Hundred Two Thousand Five Hundred Thirty-Six Dollars ($3,302,536).

g. From the unappropriated fund balance and/or additional revenues of the Development Review Fund, the net amount of One Million Nine Hundred Thirty-Two Thousand Three Hundred Seventy-Five Dollars ($1,932,375).

h. From the unappropriated fund balance and/or additional revenues of the Enhanced E-911 Fund, the net amount of One Million Seven Hundred Seventy-Nine Thousand Five Hundred Sixteen Dollars ($1,779,516).

i. From the unappropriated fund balance and/or additional revenues of the Fleet Management Fund, the net amount of Four Hundred Thirty-Four Thousand One Hundred Fifty-Nine Dollars ($434,159).

j. From the unappropriated fund balance and/or additional revenues of the Gifts and Grants Fund, the net amount of Seven Million Six Hundred Forty-Five Thousand Eight Hundred Seventy-Six Dollars ($7,645,876).

k. From the unappropriated fund balance and/or additional revenues of the Golf Courses Fund, the net amount of Two Hundred Nineteen Thousand Three Hundred Twenty Dollars ($219,320).

l. From the unappropriated fund balance and/or additional revenues of the Open Space Fund, the net amount of Thirty-Three Thousand Four Hundred Thirty-Five Dollars ($33,435).

m. From the unappropriated fund balance and/or additional revenues of the Parking and Mobility Fund, the net amount of One Hundred Ninety-Two Thousand Seven Hundred Thirty-Six Dollars ($192,736).

Section 2. Appropriations made in Ordinance Nos. 2024-72, 2025-43, and 2025-106 shall be made for Fiscal Year 2025 shall be adjusted for the reasons enumerated in the 2025 Amendment Summary, all as follows:

a. From the Wastewater Fund, the net amount of Twenty-Five Million Nine Hundred Eighty Thousand Dollars ($25,980,000) shall be deemed lapsed.

b. From the Water Fund, the net amount of Forty-Seven Million Twenty Thousand Dollars ($47,020,000) shall be deemed lapsed.

Section 3. Appropriations in addition to those made in Ordinance No. 2025-96 shall be made for Fiscal Year 2026 for the purposes enumerated in Attachment B to the document entitled

2026 Spring Amendment Ordinance Appropriation Summaries by Fund, such document being in the form as filed with the Office of the City Clerk and presented to the Council at this meeting (the "2026 Amendment Summary"), all as follows:

a. From the unappropriated fund balance and/or additional revenues of the General Fund, the net amount Three Hundred Eighty-Three Thousand Six Hundred Sixty Dollars ($383,660).

b. From the unappropriated fund balance and/or additional revenues of the Capital Projects Fund, the net amount of Five Hundred Eighty-Six Thousand Four Hundred Seventy-Three Dollars ($586,473).

c. From the unappropriated fund balance and/or additional revenues of the Conservation Trust Fund, the net amount of Zero Dollars ($0).

d. From the unappropriated fund balance and/or additional revenues of the Cultural Services Fund, the net amount of Twenty-Four Thousand Five Hundred Dollars ($24,500).

e. From the unappropriated fund balance and/or additional revenues of the Designated Revenues Fund, the net amount of Two Hundred Eighty-Nine Thousand Dollars ($289,000).

f. From the unappropriated fund balance and/or additional revenues of the Gifts and Grants Fund, the net amount of Two Million Three Hundred Twenty-Four Thousand Five Hundred Thirty-Nine Dollars ($2,324,539).

g. From the unappropriated fund balance and/or additional revenues of the Golf Courses Fund, the net amount of Forty-Nine Thousand Five Hundred Dollars ($49,500).

h. From the unappropriated fund balance and/or additional revenues of the Parks Development Fund, the net amount of Zero Dollars ($0).

Section 4. Appropriations made in Ordinance No. 2025-96 shall be made for Fiscal Year 2026 shall be adjusted for the reasons enumerated in the 2026 Amendment Summary, all as follows:

a. From the Wastewater Fund, the net amount of Nine Million Eight Hundred Sixty-Two Thousand Six Hundred Twenty-One Dollars ($9,862,621) shall be deemed lapsed.

b. From the Water Fund, the net amount of Forty-Nine Million Thirty-Seven Thousand Six Hundred Thirty-Nine Dollars ($49,037,639) shall be deemed lapsed.

Section 5. Inter-fund and inter-departmental transfers shall be made as enumerated in the 2025 Amendment Detail for Fiscal Year 2025 and the 2026 Amendment Detail for Fiscal Year 2026.

Section 6. The City Manager and the Finance Director are hereby directed and authorized

to expend so much of the said funds as are necessary to pay for the projects and acquisitions referenced herein.

Section 7. All ordinances or parts of ordinances of the City in conflict herewith are expressly repealed.

Section 8. Pursuant to Section 5-5 of the City Charter, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the City Clerk.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The Aurora Downtown Development Authority (DDA) was approved by voters in November 2025 and is a special district focused on infrastructure and economic vitality along the Colfax corridor. The DDA is funded primarily through Tax Increment Financing (TIF), which reinvests future tax revenue increases within the district. Per State Statute and city ordinance, the DDA is governed by a board of 5–11 members appointed by the Mayor and confirmed by City Council. DDA board members are required to reside, own a business or own property within the defined DDA boundary.

Applications for the inaugural Aurora DDA Board were open from January 20 to February 28, 2026, during which the city received 33 eligible applications that were posted online along with an opportunity for community feedback. Twelve candidates were selected for interviews held on April 29 and May 5, and recordings of those interviews were made publicly available. Community members were invited to provide input on the finalists through an online form or by emailing DDA@auroragov.org between May 6 and May 26.

No DDA actions can begin until the inaugural board is appointed and City Council approves the Plan of Development (Colfax Vision and Action Plan) which guides future priorities and work plans.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The Authority received thirty-three (33) eligible applications and interviews with twelve (12) candidates were conducted on April 29, 2026 and May 5, 2026. The full list of applicants may be found online.

Aurora DDA board candidates were evaluated on their commitment to core board duties, involvement and relationships within the Colfax community, unique skills and experience, ability to work collaboratively, and alignment with the Colfax Community Vision and Action Plan.

Upon conducting interviews, the interview panel respectfully recommends the appointment of the following candidates:

- Amanda Blaurock: Parital term beginning June 22, 2026 and ending June 30, 2027
- Priscilla Montoya: Partial term beginning June 22, 2026 and ending June 30, 2027
- Alemayehu Eshete: Term beginning June 22, 2026 and ending June 30, 2028
- Katie Goldman: Term beginning June 22, 2026 and ending June 30, 2028
- Matthew Horne: Term beginning June 22, 2026 and ending June 30, 2029
- Cynthia Moreno-Romero: Term beginning June 22, 2026 and ending June 30, 2029
- Thoa Nguyen: Term beginning June 22, 2026 and ending June 30, 2029
- Natasha Sztevanovity: Partial term beginning June 22, 2026 and ending June 30, 2026 and to a full term beginning July 1, 2026 and ending June 30, 2030
- Johnny Watson: Partial term beginning June 22, 2026 and ending June 30, 2026 and to a full term beginning July 1, 2026 and ending June 30, 2030

FISCAL IMPACT

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does council support the appointment of Amanda Blaurock, Priscilla Montoya, Alemayehu Eshete, Katie Goldman, Matthew Horne, Cynthia Moreno-Romero, Thoa Nguyen, Natasha Sztevanovity, and Johnny Watson to the Aurora Downtown Development Authority Board?

LEGAL COMMENTS

The affairs of the Downtown Development Authority shall be under the direct supervision and control of a board consisting of not less than five nor more than eleven members appointed by the governing body. A majority of the members appointed shall reside or own property in the authority district. (C.R.S. Section 31-25-805). Each appointed member of the board, except any member from the governing body, shall reside, be a business lessee, or own real property in the downtown development district within the municipality in which the authority is located. A manager, an agent, or an employee of an entity having its place of business in the downtown development district shall be eligible for appointment to the board. No officer or employee of the municipality where the authority is located, other than any appointee from the governing body, shall be eligible for appointment to the board. (C.R.S. 31-25-806). (Allen)

RESOLUTION NO. R2026- ____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, APPOINTING MEMBERS TO THE AURORA DOWNTOWN DEVELOPMENT AUTHORITY (DDA)

WHEREAS, the Aurora Downtown Development Authority ("DDA") was approved by voters in November 2025 and is a special district focused on infrastructure and economic vitality along the Colfax corridor; and

WHEREAS, the DDA is funded primarily through Tax Increment Financing (TIF), which reinvests future tax revenue increases within the district; and

WHEREAS, per State Statute and city ordinance, the DDA is governed by a board of 5–11 members appointed by the City Council; and

WHEREAS, Aurora DDA board candidates were evaluated on their commitment to core board duties, involvement and relationships within the Colfax community, unique skills and experience, ability to work collaboratively, and alignment with the Colfax Community Vision and Action Plan; and

WHEREAS, upon conducting interviews, the interview panel respectfully recommends the appointment of Amanda Blaurock, Alemayehu Eshete, Katie Goldman, Matthew Horne, Cynthia Moreno-Romero, Thoa Nguyen, Natasha Sztevanovity, and Johnny Watson to fill the existing vacancies; and

WHEREAS, no DDA actions can begin until the inaugural board is appointed and City Council approves the Plan of Development (Colfax Vision and Action Plan) which guides future priorities and work plans; and

WHEREAS, the City Council finds the appointment of the proposed members is in the best interest of the City and for the public health, safety, convenience, and welfare of the residents.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, THAT:

Section 1. In accordance with §§ 31-25-805 & 31-25-806, C.R.S., the following individuals are appointed to serve on the Downtown Development Authority for the terms specified:

Amanda Blaurock	Partial term beginning June 22, 2026 until June 30, 2027
Priscilla Montoya	Partial term beginning June 22, 2026 until June 30, 2027
Alemayehu Eshete	Term beginning June 22, 2026 until June 30, 2028
Katie Goldman	Term beginning June 22, 2026 until June 30, 2028
Matthew Horne	Term beginning June 22, 2026 until June 30, 2029
Cynthia Moreno-Romero	Term beginning June 22, 2026 until June 30, 2029

Thoa Nguyen	Term beginning June 22, 2026 until June 30, 2029
Natasha Sztevanovity	Partial term beginning June 22, 2026 until June 30, 2026 and to a term beginning July 1, 2026 until June 30, 2030

Board Applicant Qualification Descriptions

Instructions

To help guide your evaluation of DDA board candidates, below are detailed descriptions of DDA Board member qualifications:

Qualification Descriptions

#	Criterion	What to Look For
1	**Commitment to Core Duties**	Applicants demonstrate a clear understanding of what board service requires as outlined in the "DDA Board Member Responsibilities and Expectations" summary and affirmatively commit to meeting those expectations. DDA Board members' responsibilities include attending and preparing for board meetings, actively participating in decisions on budgets and programs, serving as an informed ambassador in the Colfax community, and complying with all relevant laws and ethical requirements.
2	**Familiarity and Community Ties**	Applicants describe meaningful, ongoing involvement within the Colfax corridor. Involvement can include community volunteerism, local events, or civic groups; and having relationships with a cross-section of stakeholders including residents, business owners, and property owners.
3	**Unique Skills and Experiences**	Relevant skills and experience for DDA board members include but are not limited to financial oversight, strategic planning, real estate, economic development, community improvements, marketing, and governance, along with experience in leadership or board service. They should be strong communicators who can build relationships, represent community interests, and collaborate with local diverse stakeholders.
4	**Dedication to Collaborative Work**	Applicants demonstrate a track record of working constructively across differing viewpoints which includes the incorporation of diverse perspectives and demonstration of the ability to govern inclusively fostering social cohesion and trust.
5	**Vision Alignment with Colfax Plan**	Applicants show familiarity with the Colfax Community Vision and Action Plan and associated goals which include community stability, economic vitality, small business support, public realm improvements, connectivity, and safety. Applicants should describe how they would contribute to advancing those outcomes through DDA programs and investments.

Applicant Package - Ward I

Aurora Downtown Development Authority - Ward I

Term 01 May 2026 - 30 Jun 2029
Positions Available 11

Number of applicants in this package 1

- Adams, Heather

Received: 2/17/2026
Non Resident and Registered Voter
The DDA Address Provided Falls Within Boundaries
Vetted: 2/18/2026
Marcus Bond

Name: Adams, Heather

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

April 2024

How are you involved in your community?:
I was a volunteer on the DDA election committee. I also attend the CADA monthly meetings.

List your interests and activities.:
My other activities include traveling with my family.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

n/a

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

Creating a safe business community by building relationships with other businesses on East Colfax. We can all grow if we build it together.

Describe your vision for the future of East Colfax.:

I see safe, fun and culturally diverse community with a mix of food, drink, music and art.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I was an architect in my past career. I am a creative who loves planning, and I am a "big picture" person. I am a people person, who loves to be involved in my community. Now, as an owner of a bar on East Colfax, I like to be a space for the community as well as be a source of information for the patrons of East Colfax and my surrounding neighbors.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

As an architect, working with clients, engineers, designers and contractors was an everyday task. I had to please the client, coordinate information with the engineers and contractors and make sure projects came within budget. Good organizational skills was a must. I had to be someone who could listen and take action.

Heather Adams
[redacted]

Dear Members of the Selection Committee,

I am writing to express my strong interest in serving on the Aurora Downtown Development Authority Board. I am deeply committed to the long-term vitality of our new downtown district, and I believe my experience, perspective and enthusiasm for community-centered development would make me a valuable contributor to the board's work.

Our downtown is more than a commercial center—it is a reflection of our community's identity, creativity and economic resilience. I am particularly drawn to the DDA's mission to foster thoughtful growth, support local businesses and create a welcoming environment for residents, visitors and future investors. I see tremendous opportunity in strengthening the district's economic base, enhancing public spaces and encouraging development that balances innovation with respect for our community's character.

Professionally, I bring experience in small business ownership, design and project management. Through this work, I have developed skills in strategic planning, collaboration and navigating complex stakeholder interests—skills that align well with the responsibilities of a DDA board member. I am comfortable reviewing development proposals, analyzing financial tools and engaging constructively with community members and business owners.

Equally important, I bring a genuine passion for civic involvement. I value transparent decision-making, inclusive dialogue and long-term thinking. I believe strong downtowns are built through partnerships, and I am eager to contribute my time and energy to initiatives that strengthen our economic and cultural core.

Thank you for considering my application. I would welcome the opportunity to support the DDA's ongoing efforts and help shape a vibrant, sustainable future for our downtown. I look forward to the possibility of contributing to this important work.

Sincerely,

Heather Adams, Owner
Vanishing West Ciders

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

I have lived and owned a home in NW Aurora for over 3 years, having worked and built community in the neighborhood over the past decade. I started my business and organization here in 2020, after years of co-design with community members to identify the type of work, location, and priorities that were important. I very intentionally chose this neighborhood to live and work. It is a vibrant community of hard-working people who care deeply for each other, and display tremendous creativity and entrepreneurship. I am excited for the opportunity to uplift the brilliance of this community as a DDA board member.

How are you involved in your community?:

I founded The Village Institute in 2019 and have since led its growth as a neighborhood-based organization serving newcomer youth and families in Northwest Aurora. Our office is located within the DDA boundaries, and I live nearby, which keeps me closely connected to the day-to-day realities of this community. I rarely walk into an event or community gathering space in East Colfax without recognizing several friends and colleagues. This is my home and community, and I love our people! Over the past decade, I have developed long-standing relationships with residents, small business owners, housing partners, educators, and service providers along the East Colfax corridor. My involvement includes convening cross-sector partners, supporting immigrant and refugee families as they navigate housing and employment systems, and participating in broader conversations about neighborhood investment and revitalization. My work is grounded in proximity and partnership — not just program delivery.

List your interests and activities.:
My background in social work and international development continues to shape my interest in culturally responsive leadership and sustainable institution-building. I am deeply passionate about community empowerment, intergenerational healing, and meaningful cross-cultural exchange. I am particularly interested in how we can leverage the wisdom of many different traditions to strengthen the cultural, economic, and social vitality of a community. I also value connection, culture, and community outside of my professional life. I am active in Jewish and interfaith spaces (as a descendant of Ashkenazi Jewish refugees who originally settled in Colorado!), and enjoy participating in gatherings and song circles that bring people together across traditions. I also enjoy staying active. Rock climbing, cycling, swimming, and dancing are some of my favorite ways to recharge and connect with others — often right nearby in Northwest Aurora and Central Park. Travel — both within the United States and internationally — has also shaped who I am. Experiencing different cultures, languages, and communities has deepened my appreciation for diversity and strengthened my commitment to inclusive, community-centered leadership.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Orbis Institute, Board Chair, 2024-present University of Denver Graduate School of Social Work, Graduate Student Association President, 2018-2019 Peace Corps Gambia, Gender and Development Committee Co-Chair, 2006-2007

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I am seeking to serve on the Aurora DDA board because I love this community and care deeply about what development will mean for the hard-working families who live and work here. There is SO MUCH potential in this community — between the tight knit web of organizations, businesses, and families; the cultural and creative vibrance of our neighbors and local businesses; the historical and continued presence of arts institutions; and the location as a bridge between Denver and Aurora. This DDA is launching at a pivotal moment for our dynamic neighborhood. The decisions made now will shape the economic and cultural landscape of this area for decades. As both a resident and nonprofit leader operating within the DDA boundaries, I see firsthand how development influences housing access, academic and professional opportunity, business sustainability, and neighborhood cohesion. I want to contribute to a board that approaches growth strategically — strengthening the tax base and business environment while ensuring long-term residents and entrepreneurs are not sidelined in the process — especially those with the greatest barriers to participation. Serving on the DDA board would allow me to bring grounded, community-informed insight to conversations about investment and revitalization.

Describe your vision for the future of East Colfax.:

I see East Colfax evolving into a dynamic commercial corridor that reflects the diversity and entrepreneurial energy already present here, and benefits the people who have worked hard to build and improve this community for many years. I see tremendous opportunity to uplift the brilliance that already exists within this community, while learning from the experiences of similarly culturally diverse communities across the country. I envision a place where small businesses can thrive alongside thoughtful new development, where housing options meet a range of income levels and family structures, and where public spaces are safe, welcoming, and active. The corridor's cultural richness is one of its greatest assets. Future growth should build upon that strength rather than dilute it. We have a number of unique destinations in this neighborhood that people already seek out and celebrate - The Fox and Vintage Theaters, Mango House, Ollin Cafetzin, sister restaurants Dan Da and Bahn & Butter, Downtown Aurora Visual Arts center, and others. With thoughtful planning and coordinated investment, East Colfax can become a destination that supports economic expansion while maintaining neighborhood identity and stability.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring more than 15 years of experience in nonprofit leadership, cross-cultural program design, and systems-level strategy. I have overseen complex budgets, built multidisciplinary and multicultural teams, and guided organizations through growth while maintaining strong operational and financial stewardship. My background in clinical social work provides insight into how policies and development decisions affect individuals and families, while my international development experience has strengthened my ability to work across cultures and navigate complex stakeholder environments. I also have experience designing initiatives that connect workforce development, women's and youth empowerment, and economic opportunity. In addition to technical skills, I offer the perspective of someone embedded in this district — leading an organization located within the DDA boundaries and engaging daily with residents, entrepreneurs, and community partners. This proximity allows me to bring grounded, practical insight to policy and investment conversations.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

My career has consistently required collaboration across cultures, disciplines, and perspectives - currently overseeing a multi-generational team of professionals from over a dozen countries and communities. I have facilitated planning processes that included developers, service providers, educators, public agencies, employers, and community members — groups that often approach issues from very different starting points. In these settings, I focus on establishing shared objectives, clarifying decision-making frameworks, and creating space for meaningful participation by everyone. I rely on structured facilitation, reflective listening, and clear communication to prevent misunderstandings and keep discussions productive. As a trained mediator and clinician, I have developed strong conflict resolution and de-escalation strategies throughout my career, which I apply in professional environments to help navigate tension constructively. I am comfortable engaging in complex conversations, asking clarifying questions, and working toward solutions that balance competing interests while maintaining forward momentum.

THE VILLAGE INSTITUTE

Building wealth, worth, and wellbeing

[redacted]

February 26, 2026

Dear Members of the Selection Committee,

This letter confirms that Ellie Adelman is an approved agency representative of The Village Institute for purposes of her application to serve on the Board of the Aurora Downtown Development Authority.

Ellie is authorized to represent our organization in matters related to this application and any related communications or processes.

Please feel free to contact me directly if additional information is needed.

Sincerely,

Adrielle Knight

Board Chair
The Village Institute
[redacted]

February 26, 2026

To: Aurora City Council DDA Selection Committee

Letter of Intent – Aurora DDA Board Appointment

Dear Members of the Selection Committee,

I am writing to express my interest in serving on the Board of the Aurora Downtown Development Authority.

As a resident of Northwest Aurora and founder of The Village Institute, located within the DDA boundaries, I am deeply invested in the long-term vitality of this community. Even before launching the organization in 2019, I have been working alongside immigrant and refugee families, small business owners, and local partners to strengthen opportunity, stability, and neighborhood connection. Living and working in this district gives me daily insight into both its potential and its challenges.

My professional background spans more than fifteen years in nonprofit leadership, social work, and international development. I hold graduate degrees in Social Work and International Peace Studies and am a licensed clinical social worker. I have managed complex budgets, led multicultural teams, and developed initiatives that connect workforce development, economic mobility, and community wellbeing.

I am seeking this role because I believe Downtown Aurora is at a pivotal moment. Investment and redevelopment bring important opportunities, but they also require careful stewardship. I would bring to the board a perspective grounded in lived proximity, cross-sector collaboration, and long-term community commitment. My approach to leadership emphasizes thoughtful listening, practical problem-solving, fiscal responsibility, and ensuring that growth expands opportunity for residents and local businesses.

I would be honored to contribute to the Aurora DDA's work and to support a future for East Colfax that reflects both economic strength and community character. Thank you for your consideration.

Sincerely,

Ellie Adelman

FOOD JUSTICE
NW AURORA

February 26, 2026

To: Aurora City Council DDA Selections Committee
Mike Coffman, Mayor, City of Aurora
Alison Coombs, Mayor Pro-Tem
Laura Perry, Deputy City Manager

Re: Letter of Support for Ellie Adelman – Aurora DDA Board Appointment

Dear Mayor Coffman, Mayor Pro-Tem Coombs, and Deputy City Manager Perry,

On behalf of Food Justice NW Aurora, we are pleased to submit this letter of support for the appointment of Ellie Adelman to the Aurora Downtown Development Authority (DDA) Board.

Food Justice NW Aurora (FJNWA) was established in 2022 with a mission to build a multicultural, intergenerational, and intersectional movement for food justice and food sovereignty to transform our local food system in northwest Aurora. Our organization is located in Aurora's Ward 1 and mainly serves the community of northwest Aurora (80010). Through collaboration with residents, small businesses, and partner organizations, we strive to increase local food production, improve access to nutritious food where people live, and build the movement for food justice.

Since 2024, FJNWA has been deeply engaged in the development of the Colfax Community Vision and Action plan, serving on the working group with P.U.M.A. and mobilizing resident and business leaders to shape recommendations for the Colfax plan. We believe it is integral that DDA board members lead with honesty, integrity, transparency, and values that are aligned with the community and the organizations already doing the work on the ground. Board members must not only understand community priorities, but actively advocate for them in decision-making processes that impact residents, small businesses, and neighborhoods.

We care deeply about who is on the DDA because it directly influences the economic vitality and long-term stability of the east Colfax corridor and its existing, long-time residents and business owners. Ellie Adelman brings over 15 years of experience in social work, international development, organizational leadership, and community-centered program design. Her professional background includes managing multi-million dollar budgets, designing culturally responsive curricula, leading multicultural teams, and implementing large scale initiatives across the United States and internationally. She holds master's degrees in Social Work and International Peace Studies and is fluent in English, Spanish, Pulaar, and Gujarati, strengthening her ability to engage diverse stakeholders across Aurora.

She is the founding Executive Director of The Village Institute, which she co-designed and launched in 2019 with deep involvement from refugee and immigrant community members. The Village Institute is based in Ward 1 along the East Colfax corridor, directly within the footprint of the DDA. Leading an organization rooted in this geography has given Ellie firsthand understanding of the opportunities, challenges, and responsibilities that come with stewarding development in this district. She understands the realities facing small businesses, community based organizations, and families who live and work along Colfax, and she has demonstrated long-term commitment to strengthening this corridor through thoughtful leadership and collaboration.

We strongly support Ellie Adelman for the Board because:

- She is a resident of northwest Aurora and leads a community based organization located within the DDA footprint and brings direct, on-the-ground insight into the needs of Ward 1 and the East Colfax corridor.
- She has demonstrated executive leadership experience managing complex programs, budgets, and cross-sector partnerships with accountability and transparency.
- She co-founded and leads a community driven organization rooted in collaboration with refugee and immigrant families, reflecting the diversity of the corridor.
- She brings expertise in workforce development, gender equity initiatives, and systems level strategy that aligns with the DDA's role in supporting economic sustainability and inclusive development.
- She understands how to build sustainable institutions that respond to community needs while maintaining strong operational systems and fiscal responsibility.

We respectfully urge you to appoint Ellie Adelman to the Aurora DDA Board. The future of northwest Aurora requires leadership that reflects the lived experience, cultural diversity, and economic realities of our community. We are confident she will serve with integrity, strategic vision, and a steadfast commitment to strengthening residents, supporting small businesses, and advancing the long term sustainability and inclusive growth of northwest Aurora and the East Colfax corridor.

Thank you for your time and consideration.

Sincerely,

Jesús Calderón
Ward 1 Resident and Vice-Chair of the FJNWA Board of Directors

February 27, 2026

Aurora Downtown Development Authority,
City of Aurora

Re: Letter of Support for Ellie Adelman, Aurora DDA Board Applicant

To the Aurora DDA Selection Committee,

I am writing in strong support of Ellie Adelman's application to serve on the Aurora Downtown Development Authority board. I'm Alex Wise, Executive Director [redacted] and a board member of The Village Institute, where Ms. Adelman serves as Founding Executive Director. CEDS Finance is located within the DDA boundaries, and I have worked alongside Ellie for several years in this community. I write from firsthand experience that she is exactly the kind of person this board needs.

Ms. Adelman founded The Village Institute in 2019 at its location [redacted] which is squarely within the DDA boundaries; and she resides within blocks of it. But her connection to East Colfax runs deeper as spent the better part of a decade building relationships with the families, neighbors, and institutions that comprise this corridor—she is truly a part of it.

What sets Ms. Adelman apart is her track record in community-centered design—not as a concept, but as a practice she has applied at scale here in Northwest Aurora. Before opening The Village Institute, Ellie facilitated an extensive multi-month community design series that brought together refugee and immigrant families, affordable housing developers, real estate professionals, public health practitioners, educators, small business development experts, and potential employers of newcomers. That process shaped every aspect of The Village Institute and what it is. The result is an organization that has earned deep trust across one of Colorado's most linguistically and culturally complex communities—and serves as a genuine anchor for the East Colfax corridor.

Beyond her community roots, Ms. Adelman brings substantial professional depth. She holds master's degrees in Social Work and International Peace Studies, has managed multi-million-dollar budgets in her prior international development roles. She's spent years navigating the intersection of housing, workforce development, public health, and economic opportunity, as a licensed clinical social worker and trauma therapist. And critically for the DDA board, she understands how real estate and development decisions affect the people who live and work in a neighborhood—because she has sat across from her Aurora neighbors and co-designed solutions with them.

I've personally witnessed Ms. Adelman work in collaborative settings where priorities diverge and stakeholders hold fundamentally different worldviews. She listens carefully, holds the thread of shared purpose, and consistently finds ways to move groups toward action without leaving people behind. She will be a constructive, grounded voice on this board—someone who asks good questions, represents constituencies that are too often overlooked in economic development conversations, and brings the kind of community credibility that gives DDA decisions legitimacy.

The East Colfax corridor has enormous potential and realizing it will require decision-makers who understand the full picture—not just the development opportunity, but the people and culture that give this place its character. Ellie Adelman is one of those people. I recommend her without reservation.

Sincerely,
Alexandria E. Wise Alexandria E Wise
Executive Director, CEDS Finance &
Board Treasurer, The Village Institute

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

9 years

How are you involved in your community?:
Since 2017, I have served as the Co-Founder and CEO of the Village Exchange Center (VEC), where I led the conversion of a donated church into a 17,000-square-foot multi-faith worship space and community center. This center acts as a vital bridge for the religious and cultural diversity within the DDA zone, providing essential services like food pantries and health clinics. Through VEC, I have successfully brought over $30 million in funding from outside Aurora into the region. Most recently, I was appointed as a DIRC Commissioner, where I advise on the impacts of federal and local policies on our immigrant and refugee populations

List your interests and activities.:
• Community Integration: Developing "Cultural Brokerage" models to ensure immigrant and refugee communities are integrated into the local economy. • Strategic Philanthropy: Partnering with entities like the Mexican Consulate and the State of Colorado to create high-impact emergency relief funds. • Urban Development: Leveraging 25 years of international and domestic legal and development experience to build inclusive, celebratory community spaces. • Regional Collaboration: Strengthening ties between Aurora, Adams and Arapahoe Counties, and the State of Colorado through VEC’s programming.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Denver Immigrant & Refugee Commission (DIRC): Commissioner (Current).

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I have been involved with the DDA from its inception, and I am driven by a desire to serve as a trusted regional bridge. Having successfully managed a 17,000-square-foot community hub within this specific zone, I have a deep, firsthand understanding of the needs of our residents and business owners. My goal is to ensure that the DDA's growth is both economically vibrant and deeply inclusive. I want to apply my 25 years of legal and development expertise to ensure that the Aurora Downtown District remains a place where diversity is celebrated as a primary economic and cultural asset as bring inclusive abundance into the region.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is a shift from reactive crisis management to a model of Direct Community Investment. I see East Colfax as a "Cultural Brokerage" corridor where small businesses and residents are stabilized through "Responsible Stewardship" and flexible impact funds. By investing in prevention and long-term stabilization rather than just emergency measures, we can create a sense of belonging rooted in economic security rather than fear. East Colfax should be a destination that reflects the global diversity of its residents while maintaining the infrastructure necessary to support the "last-mile" providers who keep the community safe.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

• Legal & Development Expertise: 25 years of experience navigating complex international and domestic real estate and legal landscapes. • Financial Stewardship: Proven track record of securing and managing significant capital, including bringing $30M+ in outside funding to the region. Resulting in perfect federal and financial audits. • Data-Driven Relief Models: Experience in designing high-impact relief models, such as our partnership with the Mexican Consulate for emergency relief, a Minority Business Fund, and multiple other cash assistance programming. • Cultural Competency: 9 year track record of a deep understanding of how to use "Cultural Brokers" to maintain public trust and safety in diverse urban environments.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

In my role as CEO of VEC and as a DIRC Commissioner, I constantly balance the interests of local government, international consulates, and grassroots community members. I believe that trust is the currency of public safety and development. When conflicts arise, such as during significant budget shifts, I focus on Direct Community Investment and transparent communication to bridge the gap between administrative decisions and human impact. I use my 25 years of legal background to find common ground in high-stakes environments, ensuring that all stakeholders feel heard and that our collective decisions prioritize the long-term stability and inclusion of the entire district.

VILLAGE EXCHANGE CENTER

Entity Representative Letter

February 21, 2026

To the Aurora Downtown Development Authority (DDA) and the City of Aurora:

This letter serves as formal notification that Amanda Blaurock, CEO of the Village Exchange Center (VEC), is the designated representative for our organization regarding her application to serve on the Aurora Downtown Development Authority Board of Directors.

The Village Exchange Center operates as a non-profit community anchor within the DDA boundary. Since 2017, we have utilized our 17,000-square-foot facility to serve as a multi-faith worship space and community center that directly celebrates the religious and cultural diversity of the surrounding district.

As an organization that serves thousands of residents, including 25,000 individuals in the 2025 calendar year alone, we believe Amanda's leadership and expertise in local development and legal affairs make her an ideal representative for the interests of this community and the DDA.

We fully support Amanda Blaurock's appointment to the Aurora DDA Board and confirm that she has the authority to act as the agent and representative for the Village Exchange Center in all matters pertaining to the board's duties.

Sincerely,

Omar Montgomery

Chair of the Board of Directors

Village Exchange Center

VILLAGE EXCHANGE CENTER

Letter of Interest: Aurora Downtown Development Authority Board

Amanda Blaurock CEO, Village Exchange Center

Commissioner, Denver Immigrant & Refugee Commission

To the Aurora Downtown Development Authority (DDA) Board of Directors,

Please accept this letter as a formal expression of my interest in serving on the Aurora Downtown Development Authority Board. Having been involved with the DDA from its inception and running a large non-profit in the DDA district for 9 years, I have watched the district grow and evolve. I am eager to apply my 25 years of experience as an international developer, lawyer, and non-profit leader, alongside my deep roots in the Aurora community, to help shape a vibrant, inclusive, and economically resilient downtown.

My commitment to this district is best demonstrated by my role with the Village Exchange Center (VEC). In 2017, I led the effort to convert a donated church into a 17,000-square-foot multi-faith worship space and community center. This facility now serves as a cornerstone of the DDA zone, celebrating the immense religious and cultural diversity of the surrounding neighborhoods. Through my leadership at VEC, I have successfully secured and brought over $30 million in funding from outside Aurora into the region, strengthening our local infrastructure and safety net.

In my professional capacity and through my recent appointment as a DIRC Commissioner, I have seen firsthand that a thriving district requires more than just physical development; it requires a "funded infrastructure" of inclusion. My vision for the Aurora DDA is rooted in the following principles:

- Cultural Brokerage as an Essential Service: I believe the city must formally recognize and support "Cultural Brokers"—the bicultural navigators who maintain trust and bridge the gap between local government and residents.
- Direct Community Investment: We must shift from reactive crisis management to proactive investment models. Our work with the Mexican Consulate has proven that small, targeted financial interventions can prevent homelessness and stabilize families for less than $900 each.
- Responsible Stewardship: I am committed to high-ROI models that ensure limited resources are used to create the highest possible impact for the community. In 2025 alone, VEC served 25,000 people, demonstrating our role as a regional anchor.

The recent $2.5 million loss in operating budget for immigrant-serving organizations underscores the urgency for stable, local leadership that understands the "human cost of administrative

VILLAGE EXCHANGE CENTER

decisions". I bring a unique perspective that balances high-level legal and development expertise with the "last-mile" grassroots knowledge of what Aurora families need to feel safe and included.

I am deeply partnered with Adams and Arapahoe Counties, as well as the State of Colorado, and I am ready to serve as a trusted regional bridge on the DDA Board. Thank you for your time and for the opportunity to contribute to the future of the Aurora Downtown District.

Sincerely,

Amanda Blaurock

Amanda L. Blaurock

Executive Summary

Visionary and mission-driven executive with over 20 years of experience as an attorney and leader at the intersection of environmental stewardship, community engagement, public-private partnerships, and strategic growth. Recognized for building high-performing, inclusive teams and cross-sector coalitions, driving multi-million-dollar capital campaigns, and managing large-scale operations with fiscal integrity. A respected public ambassador with strong political acumen and a passion for civic impact and cultural inclusion.

Professional Experience

Village Exchange Center – Aurora, CO: Co-Founder & Executive Director (2017 – Present)

- Co-founded and lead a nationally recognized nonprofit serving over 60,000 annually, advancing cultural inclusion and environmental justice.
- Led strategic planning for expansion, including the development of an urban farm and outdoor education programming at Stanley Marketplace.
- Secured and administered over $30 million in diversified revenue, including major federal, state, foundation, and individual donor funding, demonstrating robust fundraising and resource development capabilities.
- Oversaw a $5M capital campaign for infrastructure and land improvement, managing city approvals, contractor procurement, and long-term site planning.
- Directed a $13.6M emergency response program during COVID-19, coordinating with public health and state partners.
- Built and manage a senior leadership team, fostering a culture of equity, belonging, and transparency through significant organizational growth.
- Serve as a primary spokesperson to media, government, and the philanthropic community, developing deep partnerships with elected officials and civic leaders.

Private Sector Leadership & International Counsel (2008 – 2019) Managing Partner, Rock Partners, PC; EVP & General Counsel, KIT Capital, LLC; Of Counsel, Finnegan, LLP

- Directed operations and governance for a multinational investment firm, overseeing capital deployment, risk management, and organizational strategy.
- Acted as strategic general counsel to CEOs and individuals with multi-jurisdictional assets, overseeing their complex legal landscape.
- Structured and launched an international investment vehicle for a landmark hospitality project, aligning diverse stakeholders around a shared development vision.
- Provided strategic and complex litigation counsel to major international corporate clients, building cross-cultural partnerships to achieve complex objectives.

Federal Government Leadership (2002 – 2008) Supervisory Attorney-Advisor, U.S. International Trade Commission; International Attorney, U.S. Department of Commerce

- Led high-stakes international trade and intellectual property litigation before federal agencies and international courts.
- Reorganized and led a 20-person federal legal department, transforming team performance and earning service awards.
- Advised political appointees and foreign governments on complex regulatory matters, modeling cross-sector diplomacy and public trust.
- Instituted data-driven systems improvements to enhance transparency and organizational learning.

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

20+ years

How are you involved in your community?:
My involvement in the community is both long-term and hands-on. My husband, Tom Klein, and I have invested in Northwest Aurora for over 20 years. We've owned and managed properties including the Florence Square Apartments, several single-family homes, and most recently Carm & Gia Metropolitan restaurant. Through those investments, we've aimed to contribute to housing stability, neighborhood vitality, and local economic activity. In addition, I've served on the board of Aurora Community Connection, including as Board Chair from 2019 to 2024. That role allowed me to work closely with residents, nonprofits, and civic partners to strengthen programs that connect people to critical services and community resources. I'm also a member of the Denver Lions Club, where I've volunteered locally and participated in international missions providing eye exams and distributing donated glasses to underserved communities. For me, community involvement means long-term investment, leadership, and service — not just financially, but personally.

List your interests and activities.:

Recently semi-retired, I am enjoying the opportunity to be more intentional with my time — particularly with family in Denver, Chicago (my hometown), and Mexico. Staying connected across these communities is deeply meaningful to me and reflects my appreciation for diverse cultures and perspectives. My husband and I are actively involved in service-oriented organizations, including the Lions Clubs International and Rotary International. We value opportunities to contribute our time and resources to initiatives that strengthen local and global communities. Personally, I enjoy reading, cooking, and hosting gatherings with friends and family. I also stay active managing our properties and, on a lighter note, keeping up with our three energetic small dogs, who certainly keep us moving. Overall, my interests reflect a balance of family, service, lifelong learning, and community engagement — all of which continue to shape how I approach both personal and civic life.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Board Member and former chair of the Aurora Community Connection 501c since 2017: [redacted]

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

The authority granted to the DDA to reinvest in small businesses, housing, safety, and neighborhood improvements under its Plan of Development presents a significant opportunity. My expertise in service design and design thinking uniquely positions me to help ensure that investments along East Colfax are human-centered, data-informed, and aligned with the Colfax Community Vision & Action Plan. I believe revitalization efforts are most successful when they are inclusive, fiscally responsible, and responsive to the lived experiences of residents and business owners. I would bring to the Board a collaborative leadership style, strategic perspective, and commitment to transparency and community engagement. I am motivated by the opportunity to help create an East Colfax district that supports economic vitality while preserving its cultural identity and ensuring long-term sustainability.

Describe your vision for the future of East Colfax.:

East Colfax has the potential to become a high-performing urban corridor that balances economic vitality with inclusive growth. The Aurora Downtown Development Authority can serve as the catalyst by strategically deploying reinvestment tools aligned with its Plan of Development. My vision centers on four measurable outcomes: 1. Strengthened Small Business Ecosystem Targeted façade improvement grants, business retention programs, and strategic corridor marketing to reduce vacancy rates, increase sales tax revenue, and stabilize legacy businesses. 2. Mixed-Income, Transit-Oriented Development Partnership-driven housing initiatives that expand attainable housing supply while preserving affordability and encouraging walkability. 3. Enhanced Public Realm and Safety Infrastructure Capital improvements focused on lighting, pedestrian safety, cleanliness, and placemaking to increase foot traffic and support crime prevention through environmental design. 4. Data-Driven, Transparent Governance Clear performance metrics tied to business growth, property value stabilization, housing production, and community satisfaction — ensuring accountability to residents and stakeholders in Aurora. Success should be defined not only by property appreciation, but by business longevity, inclusive economic participation, and sustained neighborhood stability. East Colfax can become a model for equitable corridor revitalization in Aurora Colorado — demonstrating how strategic reinvestment, when guided by community priorities, generates long-term economic resilience. When I think about the future of East Colfax, I see a corridor that becomes one of the most vibrant and inclusive districts in Colorado — a place where revitalization strengthens the existing community rather than replacing it. Under the leadership of the Aurora Downtown Development Authority, East Colfax can become a true engine of small business growth. I envision a district where locally owned and immigrant-owned businesses thrive, storefront vacancies decrease, and entrepreneurs see Colfax as the place to launch and grow. That means intentional reinvestment — façade improvements, access to capital partnerships, corridor branding, and programs that make it easier to do business. I also see smart, mixed-income housing that supports workforce residents and families, ensuring the people who contribute to the corridor’s vitality can continue to live there. Development should be thoughtful, transit-oriented, and aligned with long-term affordability goals. Public safety and placemaking are equally critical. Safer streets, improved lighting, pedestrian-friendly design, and activated public spaces will create a corridor where people want to walk, dine, shop, and gather. Safety isn’t just enforcement — it’s activity, design, and economic stability. Most importantly, I see a governance model that is transparent, data-informed, and community-centered. The DDA has the opportunity to demonstrate that economic development can be both strategic and equitable. My vision is simple: East Colfax becomes a corridor of opportunity — where investment builds community wealth, development honors identity, and revitalization benefits everyone.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

My unique combination of academic training, executive leadership experience, entrepreneurial insight, and long-standing community service has prepared me to contribute meaningfully to the DDA’s mission and the successful implementation of its Plan of Development. Throughout my career, I have held executive and senior leadership roles within Fortune 100 companies, where I led complex initiatives, aligned strategy with execution, and delivered measurable results. As a former small business owner and a long-term Northwest Aurora property investor, I also understand firsthand the realities of operating a business, managing assets, and navigating local economic dynamics. Coupled with my sustained commitment to community service, this breadth of experience provides both strategic perspective and practical insight. I am prepared to help the DDA balance economic growth with community priorities, ensuring investments are thoughtful, sustainable, and aligned with the long-term vision for the district.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Stakeholder management is essential for successful project delivery. Competing ideas can at a times result in bruised interpersonal relationships, navigating these dynamics require skillful tactics and techniques to bring to bear the very best ideas and contributions of the stakeholders. My corporate work experience provided world class training on these matters and experiential execute. From time to time when at the team level a satisfactory resolution cannot be resolved swiftly and amply, it may be necessary to escalate, yet this would be a rare ocurrance.

Mayor Coffman
City of Aurora
15151 E. Alameda Parkway
Aurora, CO 80012

Dear Mayor Coffman and Members of the City Council,

I am writing to express my strong interest in serving on the Board of the Aurora Downtown Development Authority. As a strategic executive leader with deep experience in service design, digital transformation, and real estate asset management, I am enthusiastic about contributing to the revitalization and long-term vitality of the East Colfax corridor.

Throughout my career, I have led enterprise-level initiatives that center on understanding community and customer needs, translating insights into actionable strategies, and delivering measurable outcomes. My work spans high-tech, financial services, aerospace, telecommunications, and customer care industries. In each environment, I have focused on designing systems and experiences that balance innovation, operational excellence, and stakeholder value—principles that closely align with the DDA's mission.

As Principal User Experience Strategist at Marimba!, LLC, I oversee real estate assets and have successfully launched and operated a restaurant business. This hands-on experience as both a property stakeholder and small business operator provides me with a practical understanding of the challenges and opportunities facing business owners within a development district. I understand firsthand the importance of accessible capital, safe and welcoming public spaces, thoughtful infrastructure, and strategic marketing to support sustainable growth.

Previously, as Vice President of Digital Strategy at Bellco Credit Union, I led digital banking and member experience transformation initiatives that strengthened engagement and improved service delivery. My background at organizations such as VMware, Accenture, DirecTV, and Sun Microsystems further refined my ability to manage complex programs, oversee cross-functional teams, and align strategic vision with execution.

The authority granted to the DDA to reinvest in small businesses, housing, safety, and neighborhood improvements under its Plan of Development presents a significant opportunity. My expertise in service design and design thinking uniquely positions me to help ensure that investments along East Colfax are human-centered, data-informed, and aligned with the Colfax Community Vision & Action Plan. I believe revitalization efforts are most successful when they are inclusive, fiscally responsible, and responsive to the lived experiences of residents and business owners.

I would bring to the Board a collaborative leadership style, strategic perspective, and commitment to transparency and community engagement. I am motivated by the opportunity to help create an East Colfax district that supports economic vitality while preserving its cultural identity and ensuring long-term sustainability.

Thank you for your consideration. I would be honored to serve and contribute to the continued progress of Aurora's downtown development efforts.

Respectfully,

Razz I. Cortes-Maceda

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

I have lived and worked in the Aurora area for 36 years. I began operating a business along the Colfax corridor in the early 1990s and, since 1996, have owned and managed commercial property in Northwest Aurora through Miles Investment Corporation. For nearly three decades, I have been both a business owner and property owner in this community, giving me long-term, firsthand experience with the area's changes, challenges, and opportunities.

How are you involved in your community?:
I am actively involved in Aurora's Ethiopian community as a member of St. Mary Ethiopian Orthodox Church and the Colorado Ethiopian Community, including participation in our local Iddir, which provides social and financial support to families during times of loss. These connections have allowed me to stay closely engaged with and support members of our community. As a business and property owner, I am also involved through the relationships we build with our tenants and customers. Many of our tenants have operated their businesses in our properties for years, which reflects the trust and mutual respect we've cultivated. Through our motel business, we regularly serve individuals facing difficult circumstances and strive to offer flexibility and understanding while maintaining a sustainable operation. I see community involvement not only as participation in organizations, but also as how we treat people in our day-to-day business practices.

List your interests and activities.:

Much of my time is dedicated to managing operations of our two on-site businesses and overseeing our other Colfax properties alongside my business partner. Staying actively involved in day-to-day work has always been important to us. For many years, my free time centered on raising my two daughters. I made it a priority to be present in their lives – attending their sports games, school events, and academic activities while balancing the demands of running a business. Now that my daughters are adults living in other cities, I spend more of my free time on home improvement projects. I enjoy fixing and improving things, whether on our properties or at home. I also enjoy gardening, going to the gym, and traveling with my family. Last year, our daughters treated my wife and me to a trip to Portugal, which was a meaningful experience for all of us.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

N/A

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora DDA Board because I bring a long-term, ground-level perspective as someone who has invested, operated, and stayed committed to East Colfax for more than three decades. I immigrated to the United States in 1980 after fleeing political unrest in Ethiopia and built my life and business from the ground up. In the early 1990s, my business partner and I operated a small establishment on Colfax, Peoria Restaurant and Lounge. When we had to relocate, we made the decision in 1996 to purchase a larger property that included a motel that had been vacant for over ten years. It was a significant risk, and many advised against it, but we believed the corridor still had opportunity. Through Miles Investment Corporation, we have continued to own and manage property in the area ever since. Over 36 years, I have experienced the full cycle of this corridor – economic highs, long periods of neglect, shifting demographics, the impact of COVID, and rebuilding after a fire. As both a landlord and operator, I understand the financial pressures small businesses face, the importance of stable tenancy, and how safety and perception directly affect success. I have seen encouraging investments, such as the development around Fitzsimons, and I believe similar momentum can be extended further along Colfax. At the same time, I see vacant buildings, inconsistent code enforcement, and ongoing safety concerns that discourage new investment. I want to serve on the DDA to bring practical experience, long-term commitment, and a balanced perspective – supporting redevelopment while protecting affordability and opportunity for small business owners. I believe thoughtful collaboration between the City, property owners, and community members can improve safety, strengthen businesses, and reshape the reputation of East Colfax for the better.

Describe your vision for the future of East Colfax.:

My vision for the future of East Colfax is a corridor that is clean, safe, affordable, and economically vibrant – while still preserving the diversity and character that make it unique. First and foremost, safety must be a priority. A safe environment benefits everyone: residents, small business owners, property owners, and visitors. Consistent code enforcement, improved lighting, removal of abandoned vehicles, and stronger coordination between the City and property owners would make a visible and meaningful difference. In the past, enforcement felt more consistent; restoring that standard would help rebuild confidence in the area. At the same time, affordability is essential. East Colfax should continue to provide affordable housing options and accessible commercial space so that working families and small, locally owned businesses can remain and succeed. I also envision attracting new businesses and responsible investors who see the opportunity in this corridor. With the right improvements and support, East Colfax can shift its reputation from being viewed as unsafe or neglected to being recognized for its hardworking entrepreneurs, cultural diversity, and strong community ties. Ultimately, I see East Colfax as a place where long-standing businesses can thrive, new investment is welcomed, and residents feel proud of their neighborhood. With thoughtful planning and collaboration, that future is achievable.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring more than 36 years of firsthand business and property ownership experience along the Colfax corridor. Over that time, I have operated businesses, managed commercial properties, and navigated the many economic cycles that have shaped this area. This long-term involvement gives me practical knowledge of how policy decisions, safety conditions, and market changes directly affect small businesses and property owners. In 1996, my business partner and I took on a property that required significant reinvestment, patience, and persistence to stabilize and operate successfully. That experience taught me how to assess risk, identify underlying potential, and commit to long-term improvement rather than short-term gain. I hope to bring that same mindset to the work of the DDA – seeing opportunities for betterment where others may only see challenges. I also have a diplomatic and steady leadership style critical for progress. I believe in listening more than I speak, understanding different viewpoints, and working toward practical solutions. In business and in community relationships, this approach has helped me build trust, maintain long-term partnerships, and navigate conflict constructively. I believe those skills are essential for effective collaboration on the DDA Board.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Throughout my career as a business and property owner, collaboration has been a daily responsibility. Running multiple businesses requires constant coordination with partners, employees, tenants, customers, vendors, and city officials. Each group brings different priorities and perspectives, and success depends on finding common ground. In managing long-standing employees and tenants, I have learned the importance of active listening. When conflicts arise – whether related to lease terms, operations, or expectations – I focus first on understanding the underlying concerns before offering solutions. Often, people want to feel heard and respected. From there, I work toward practical compromises that allow the business relationship to continue productively. I also understand that not every decision will align perfectly with my own viewpoint. In group settings, I am comfortable sharing my perspective clearly, listening to others thoughtfully, and supporting the majority decision once it is reached. Maintaining unity after a decision is just as important as the discussion that leads to it. My approach is steady, respectful, and solution-oriented. I prioritize understanding first, then compromise where possible, always keeping the long-term health of the community in mind.

- Alemayehu Eshete DDA Application.pdf

Dear Members of the City Council,

I am writing to express my strong interest in serving on the Aurora Downtown Development Authority Board.

For 36 years, I have been part of the Colfax corridor as both a business owner and property owner. Throughout that time, one theme has guided me: I have always tried to see the potential in places and people that others may overlook.

I immigrated to the United States in 1980 after fleeing political unrest in Ethiopia. I arrived with little, but with determination and belief in opportunity. In the mid-1990s, my business partner and I made a decision that many advised against – we invested in a larger property on Colfax that included a motel that had been vacant for over a decade. It required significant work, carried real risk, and demanded long-term commitment. But we saw possibility where others saw decline.

Nearly 30 years later, we continue to operate that business through Miles Investment Corporation. Our property has weathered changing neighborhood demographics, economic downturns, COVID, and even a fire that required rebuilding. Along the way, we have provided space for small businesses to grow and served customers from many walks of life. Many of our tenants have remained with us for years, a testament to the relationships we've built and our shared belief in the value of small business to a community.

East Colfax today reminds me of that earlier moment – full of challenges, but also full of opportunity. I have seen the deterioration: vacant buildings, safety concerns, and unsustainable property taxes. But I have also seen the promise: the energy of diverse communities, the strength of hardworking business owners, and positive developments like the growth around Fitzsimons.

My vision for East Colfax is clear: a corridor that is clean, safe, affordable, and economically vibrant. A place where small businesses can succeed, where investors feel confident to build, and where families feel secure. I believe strong code enforcement, thoughtful redevelopment, and collaboration among property owners, business owners, and the City are essential to realizing that future.

As someone deeply rooted in Aurora's Ethiopian community and the broader Colfax business community, I bring both lived experience and long-term perspective. I understand the challenges facing landowners, tenants, and residents because I have faced them myself. More importantly, I believe in the untapped potential of this corridor.

I would be honored to serve on the Aurora DDA Board and to help turn vision into action – so that future generations see East Colfax not for what it once struggled with, but for what it became.

Thank you for your consideration.

Alemayehu (Alex) Eshete

Alemayehu Eshete

[redacted] [redacted]

As an Ethiopian-American, property owner, and small business operator, I have worked on East Colfax for over 36 years. I came to Colorado after fleeing political unrest in Ethiopia, with limited resources and no family in the country, and built a community and resilient business from the ground up. Today, through Miles Investment Corporation, I co-own and operate a motel and commercial rental units on the corridor. I am applying to serve on the Aurora Downtown Development Authority because I believe revitalization should also be shaped by the people who lived through the hard years, not just those arriving for the good ones.

Experience

Miles Investment Corporation — Aurora, Colorado

Co-Owner — 1996 – Present

- Own and operate Park Motel, commercial rental units, and Jet Wash (a self-service car wash) at [redacted]
- Provide affordable commercial space to 5 small business tenants who have renewed leases for multiple years
- Took over a motel property that had been vacant for over 10 years, undertaking a major rehabilitation and successfully operating it for nearly 30 years since
- Rebuilt portions of the property after a significant fire in 2021, worked with the city, insurance, and contractors to build the motel, and reopened the business after a year of renovations
- Navigated the COVID-19 pandemic while maintaining the business and working with tenants and motel guests facing financial hardship
- Witnessed and adapted to neighborhood shifts, including the Fitzsimons medical campus development and periods of increased vacancy and disinvestment along East Colfax
- Operated Las Adelitas, a neighborhood nightclub during the 2010-2014, that hosted live local bands and a weekly Sunday family cookout, bringing the community together through cultural programming and creating a safe, welcoming gathering space
- Operated Club Mixx from 1996 to 2008, hiring live bands to provide entertainment and a gathering space for the East Colfax community

Peoria Restaurant and Lounge — Aurora, Colorado

Manager — 1990 – 1996

- Co-owned and operated an East Colfax establishment with a business partner, building a regular local customer base and establishing roots
- Pivoted to identify and acquire a larger opportunity when the property was sold by the landlord, laying the groundwork for Miles Investment Corporation

Yellow Cab — Denver, Colorado

Transportation Operator — 1982 – 1990

- Operated as an independent transportation operator in the Denver metro area, developing self-employment skills, customer service experience, and knowledge of the local community shortly after immigrating to the United States

Languages	English and Amharic
Education	Metro State College & University of Colorado Denver, 1981 – 1982

Members of City Council
City of Aurora

Re: Letter of recommendation for Alemayehu Eshete to be selected as a member of the Board of Directors for the Aurora Downtown Development Authority

Honorable Members of City Council:

My name is Sanford R. Feld, and I have known Alemayehu Eshete for over 30 years. I was born in Aurora in 1958, and my family has owned significant real estate properties and operated businesses in Aurora for over 50 years. I have been in my current position as a real estate business owner/broker/manager for over 45 years with one firm.

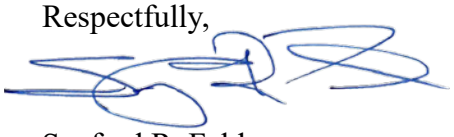
I first met Mr. Eshete in the mid 1990's when he was working several jobs to support his family and looking for opportunities to own a business and live the American dream. He has always demonstrated incredible perseverance, dedication and above all *honesty and loyalty* to everything he has been involved with.

I have personally witnessed his tireless commitment, unique skill set, and ability to work cooperatively in a wide range of business and personal situations. The utilization of his life experiences and skills has enabled him to become a successful entrepreneur throughout the time I have known him, managing and operating a number of business opportunities including successfully managing employees and partnerships.

His distinctive knowledge of the East Colfax Corridor and Downtown Aurora area, combined with his familiarity and interaction with many diverse cultures that this area is comprised of, gives him the skills necessary to implement the mission of the Board of Directors for the Aurora Downtown Authority.

He has my full endorsement and would be an incredible asset to move the DDA Board forward towards accomplishing its goals.

Respectfully,



Sanford R. Feld

Aurora Downtown Development Authority

Applicant Package - Ward I

- Goldman, Jesse

Received: 2/28/2026
Non Resident and Registered Voter
The Address Provided Falls Within the DDA Boundaries
Vetted: 3/2/2026
Marcus Bond

Name: Goldman, Jesse

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

I have owned property within the DDA boundary since October 2020 and actively serve as a managing member of the ownership group.

How are you involved in your community?:
As an architect, I have worked directly on projects within the boundary including the Peoples Building, La Victoria Healing Kitchen, Manos Sagrados, and Shifted Lens Theatre (currently under construction), helping bring community-centered spaces to life.

List your interests and activities.:
I am interested in building a strong and vibrant community in Aurora and the greater Denver area. As an architect I work with many clients to help develop spaces that function for them and the community they are in.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

I am currently a director on CSHQA's board and have served on it since 2020, however I did take one year off from the board while serving as the interim CEO while we restructured the leadership of the firm. In addition I served for several years as a trustee for Park Hill United Methodist Church and was co-chair of that group for two years. Within my roles I have been both a part of and leader of multiple committees.

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

As an architect I want to encourage positive and thoughtful development of our community that is additive to the strong fabric that already exists while being thoughtful about not being subtractive to the community who makes this vibrant area their home.

Describe your vision for the future of East Colfax.:

I envision a space that is full of art, culture, and diversity. I want East Colfax to be a destination that feels safe, inclusive, and walkable while being mindful and uplifting to the existing diversity of the region. As a destination people will come to have experiences by means of food, retail, art, or culture that are not readily available in other parts of the metro Denver area. As leaders within this community my desire is to push the strong arts community in this area as an economic engine that creates long-term sustainability and is a catalyst for small business support.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

As a business leader, as an architect, and as a property owner I bring a unique set of skills that allow me to be a thoughtful leader in creating a strong community with balanced growth. I work hard to bring a 30,000 foot perspective to problems and love the challenge of solving it as an opportunity. I find joy in serving and creating solutions that matter.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Every day of my life entails collaboration. Many of the projects I work on are very complex, with multiple stakeholders. As an Architect I take the lead on coordination between client, design team, public, agency, and contractor to help ensure a successful outcome. I find the best way to address conflict resolution is through continued strong and open communication. Most conflict occurs when various parties do not feel heard.

- DDA Intrest Letter and Resume - Jesse Goldman.pdf

Dear Members of the Selection Committee,

I am writing to express my interest in serving on the Aurora Downtown Development Authority Board. As a property owner within the DDA boundary since October 2020 and a managing member of that ownership group, I am personally invested in the long-term health of Northwest Aurora and the East Colfax corridor. As Principal Architect at CSHQA, I am professionally committed to shaping places that strengthen communities.

My work as an architect has allowed me to contribute directly to projects within the DDA boundary, including the Peoples Building, La Victoria Healing Kitchen, Manos Sagrados, and the Shifted Lens Theatre currently under construction. These efforts have reinforced my belief that great development is not simply about new buildings, it is about stewardship within the community. It is about strengthening the cultural identity, economic vitality, and daily lived experience of the people who already call this place home.

I am particularly passionate about two priorities for East Colfax, safety and small business retention. A thriving district must feel safe and welcoming for residents, visitors, and entrepreneurs alike. At the same time, the corridor's authenticity and vibrancy are driven by locally owned businesses and culturally rooted institutions. I believe the DDA can play a critical role in creating infrastructure, programming, and development strategies that support both.

While my experience with public-private partnerships and urban redevelopment authorities is not extensive, I understand the importance of thoughtful collaboration between public entities and private stakeholders. My professional work requires me to lead complex, multi-party coordination efforts; balancing the needs of clients, agencies, community members, and contractors to achieve durable and equitable outcomes. I approach governance in the same way; listening carefully, seeking alignment, and making decisions that serve the broader good.

In addition to my architectural practice, I currently serve as a Director on the CSHQA Board, and previously served as a Trustee and Co-Chair at Park Hill United Methodist Church. These roles have provided me with experience in governance, fiduciary responsibility, and strategic leadership during periods of organizational transition.

I envision East Colfax as a district known for its art, culture, diversity, and authenticity. This is a destination that cannot be replicated elsewhere in the metro area because it grows organically from its community. With thoughtful design, intentional investment, and strong stewardship, the DDA can help ensure that growth is additive rather than subtractive.

I would be honored to contribute my perspective as a property owner, architect, and community stakeholder to help shape a vibrant, inclusive, and resilient future for Aurora.

Thank you for your consideration.

Sincerely,
Jesse Goldman

JESSE GOLDMAN

AIA, NCARB, LEED AP | Principal Architect, Board Member

PROFILE

A visionary leader passionate about architecture, design, and creating a positive impact on the built environment. Thrive on problem-solving and finding creative solutions. Demonstrated ability to drive growth, profitability, and innovation in professional services firms. Experienced in leading and managing teams as well as developing and implementing strategic plans.

CONTACT

LEADERSHIP

Board Member, CSHQA: 2019 – Present
(Except while serving as Interim CEO)

- Responsibilities: Oversee strategic direction, uphold governance, approve major decisions, and provide feedback and guidance to the executive team on current initiatives. Serve on the Governance Committee and Nomination Committee.
- Contributions: A vocal and engaged member of the board, strongly advocating for the firm's growth transformation process. Consistent collaborator with independent board members to drive diverse and thoughtful leadership oversight.
- Impact: Contributed to raising the board's standards of governance and effectiveness, and to fostering a collaborative relationship between the board and the executive team.

Interim CEO, CSHQA: August 2022 – May 2023

- Guided the firm through a critical growth transformation, laying the foundation for its first full-time executive leadership. Oversaw all aspects of firm operations, including financial management, project delivery, and employee engagement. Led the effort to prepare the firm for the transition from a principal-led structure to an executive-led model.

SELECT WORK EXPERIENCE

CSHQA, Denver, CO
Principal Architect, 2019 - Current

- Successfully led the CSHQA Denver office, expanding the firm's presence in the market. Developed new markets to provide revenue from a regional level. As Principal Architect at CSHQA, I am committed to fostering a culture of collaboration, innovation, and employee ownership and to driving the firm's continued success.
- Responsible for project oversight, client relations, team management, and strategic initiatives. Successfully transitioned numerous clients from Pendentive to CSHQA, expanding the firm's presence in the Denver market.
- Served as Interim CEO of CSHQA, guiding the firm through a growth transformation and preparing it for its first full-time executive leadership.

PENDENTIVE, Denver, CO
Founder and Owner

- Led and managed all aspects of a successful architectural firm, including strategic planning, business development, financial management and project delivery. Brought in multiple new clients each year and consistently increased revenue in each year of operation.

SINK COMBS DETHLEFS, Denver CO

- Led design and project management for a range of arena projects. Spearheaded firm-wide implementation of BIM standards, resulting in significant reduction of hours spent on projects.

DAVIS PARTNERSHIP, Denver CO

- Project Architect on multiple healthcare projects, including the master planning and expansion of the Vail Valley Medical Center and Grand River Medical Center.

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

Purchased the properties in Oct of 2020, opened two buisnesses and relocated a third in 2023.

How are you involved in your community?:

My involvement in Aurora is defined by a holistic commitment and direct action to supporting the transformation of our downtown into a vibrant district that enhances the neighborhood, strengthens the community, and attracts commerce essential to a robust local economy. My approach combines direct capital investment with a "multiplier effect" that supports dozens of other local entrepreneurs and neighbors. I believe physical revitalization is a component in developing a thriving district. In October 2020, I became a property owner in the district, completing full renovations of [redacted] Furthering this commitment, I am currently developing Marigold Market at [redacted]—a project awarded through a competitive city-led bid, which will serve as a key anchor for downtown-adjacent commerce. Beyond my own properties, I view my businesses as "community infrastructure" designed to lower barriers for others. By relocating my professional services firm, oh zhoo, from Denver’s RiNo District to Aurora, I have centered my economic output here. My most significant impact on the local economy is through La Victoria Incubator Kitchen, which has served as a launchpad for over 90 food and beverage entrepreneurs. Currently, our incubator supports over 40 active operators with a focus on inclusive economic participation: - 70% identify as Black, Indigenous, Hispanic/Latino, or People of Color. - 67% are woman-owned businesses. - 18% are refugee- or migrant-owned. By providing the framework for these businesses to scale, I directly contribute to a diverse and resilient commercial corridor. I also believe that a district thrives when its social fabric includes diverse perspectives and participation. I have been an active voice in the formation of the Aurora Downtown Development Authority since 2024, advocating for growth that balances revitalization with small business retention. My involvement extends to the Arts and Culture District, where I maintain active collaborations with DAVA, the Aurora Fox, The People's Building, and others. Within the private sector, I serve as a connector for fellow business owners. I am a frequent collaborator and resource for a wide network of local staples, including Cerebral Brewing, Bahn and Butter, Urban Burma, Rebels In the Garden, and more, to ensure that as our district grows, we share information and support to grow together, and invite in others who currently reside or conduct business in the neighborhood. My family and I have committed to investing our lives and resources in Aurora. Whether I am participating in City Council town halls or partnering with local schools through La Victoria Healing Kitchen programming, my goal remains the same: to ensure Downtown Aurora is a place where culture, community, and commerce intersect to create lasting prosperity.

List your interests and activities.:

Outside of my professional work, my interests are rooted in curiosity, creativity, and time spent with people I love. My childhood was shaped by moving through many different communities including Houston, St. Louis, Baton Rouge, Chicago, Kansas City, and eventually Denver, which gave me an early appreciation for how place, culture, and everyday rhythms shape people's lives. I enjoy traveling, especially to places where food, culture, and daily life are deeply intertwined. I'm always paying attention to how people gather, share meals, and move through public space. At home, I spend time gardening, tending to plants, or sitting on my front porch listening to the sounds of the neighborhood. I love being outdoors, taking walks with our dog, Daisy, and slowing down enough to notice small details that often get missed. Music and the arts are an important part of how I recharge. I enjoy attending small concerts and bluegrass festivals, as well as local performances and shows. These experiences are as much about connection as they are about entertainment—seeing familiar faces, meeting new people, and feeling part of a shared moment. I'm also a lifelong learner, and I often wish I had more time to read. Most recently, I've been working on improving my Spanish, both as a personal challenge and as a way to better connect with people around me. I enjoy learning new skills, trying new recipes, and having conversations that stretch my perspective. Above all, I value time with my family. Being a parent has deeply shaped how I see the world, grounding me in patience, humor, and perspective. Whether we're sharing meals, attending events, or simply being together at home, those moments are what keep me balanced and present.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

2023 - current, Aurora Community Connections Board of Directors - serving as the Vice Chair of the Board 2024 - current, Creative Alliance of Downtown Aurora Board of Directors - Member 2025 - Cultural Affairs Commission, City of Aurora - Community Liaison Yes, specifically within Aurora, I serve as the Vice Chair of the Aurora Community Connections Board of Directors. My responsibilities include developing our 3-year strategic plan (2026- 2029) and assuming the Chair's duties when required. As a member of the board for the Creative Alliance of Downtown Aurora, my contributions have included helping to inform the strategic plan, recruiting other board members, helping to structure the fundraising committee, and drafting a Request for Proposal to secure professional services for branding, marketing, and placemaking. I have also served as a community liaison on an Cultral Affairs Commission organized by the City of Aurora's Library & Cultural Services Department, where I attended meetings and provided guidance on the distribution of grant funding. I am also an active participant in the initiative to create the Downtown Development Authority, regularly attending, helping to organize, and participating since the fall of 2024. Within the larger context of the Denver Metro area, I am: As a member of Good Business Colorado, I spoke on a panel at the 2025 "Level Up Academy" on the topic of Women In Business, The Evolution Effect: How Entrepreneurs Adapt, Transfor and Thrive. The recipient of the 2025 "Community Champion" Award from Good Business Colorado. Regularly volunteered at East High School while my children were in attendance through May of 2025, most recently serving as an Afterprom Space Captain, where I was responsible for recruiting volunteers, soliciting donations for materials, and organizing volunteer work days. Prior leadership roles, appointments, and committees of note include: Group Lead for Leads Group #5 with the Denver Metro Chamber of Commerce - responsible for organizing group meetings and outings, reporting lead generation and converted sales, participating in the Leadership Advisory group to help improve and direct the development of the program at the Chamber level. Active with the Denver Area KU School of Architecture Alumni Association - currently selected as a speaker on two panels for an Alumni Symposium, March 5-8, 2026 Serving on the Board of Directors for the ACE Mentor Program of Denver - during my tenure in this role, I was responsible for the re-imagining of our annual awards and fundraising event, resulting in an increase of over $100k in donations, the largest increase the organization had seen within the previous 5 years. Founding member of the Women in Design Kansas City Chapter - in this role, I served in an advisory capacity, helping to structure the new chapter, establish its bylaws and committees, and support recruitment and fundraising. Being selected as the first student to serve on the Advisory Board for the University of Kansas School of Architecture and was asked to remain on the Board after graduation. I was the youngest member ever to serve at the time. My highlight achievement while serving was organizing and helping to host an Alumni Reunion. Other leadership positions, and committee, and organizational participation are included in my attached resume.

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

My candidacy for the DDA Board is driven by a commitment to inclusive revitalization. I believe that drawing in sustainable commerce requires a neighborhood that is safe, inclusive, and trusted by its residents. I intend to leverage the Colfax Community Vision & Action Plan to strengthen our local economy, ensuring that as we modernize our infrastructure and invite new investment, we do so in a way that respects the existing neighborhood fabric and creates a shared prosperity for all who call the district home. I recognize that for many residents and business owners, conversations about redevelopment come with understandable skepticism. Communities like this one have seen investment arrive without meaningful inclusion, and have watched familiar places, people, and identities pushed out in the name of progress. I have personally witnessed this in RiNo, where rapid change brought visibility and capital, but also the loss of affordability, displacement of longtime residents and artists, and a sense that the neighborhood's original character was no longer at the center of decision-making. That experience has shaped how I think about growth, stewardship, and responsibility. I am also mindful that the community carries real fractures among residents, businesses, property owners, and institutions, shaped by years of disinvestment and uneven outcomes. I believe the DDA can help by serving as a steady, transparent convener: aligning efforts, reducing silos, and demonstrating through action that community voices meaningfully shape decisions. This perspective has been shaped in part by my participation in the City-led working group that helped inform the Vision & Action Plan, where listening across differences and aligning diverse priorities were central to the process. As a licensed architect, I am trained to understand how the built environment influences daily life. How design, scale, and maintenance affect whether people feel safe, welcome, and able to stay rooted over time. And, just as importantly, my work has taught me that good outcomes depend on listening first. Trust is built when communities see that plans reflect their lived realities, that early actions match stated values, and that decision-makers remain accountable over time. The Vision & Action Plan calls for improvements in safety, support for small businesses, housing stability, arts and culture, and public space. Executing this work thoughtfully, with early, visible wins and transparent decision-making, will be essential to building confidence in the DDA as a community partner. I am motivated to serve because I believe the DDA has the opportunity to do things differently: to move at a pace that allows relationships to form, to prioritize investments that help people stay, and to treat the neighborhood as more than a redevelopment opportunity. Serving on the DDA Board would allow me to contribute a practical, grounded perspective shaped by professional experience and lived observation. I see this role as an opportunity to help ensure that downtown Aurora's growth strengthens what already exists, honors the community's identity, and builds trust through consistent, values-aligned action.

Describe your vision for the future of East Colfax.:

My vision for East Colfax begins with the understanding that it is not mine alone to define. East Colfax is shaped by the people who live, work, create, and gather here, and any lasting vision must grow from their lived experience and priorities. It is important to honor the nostalgia of Colfax's thriving past, without trying to recreate it. Colfax Avenue takes on a different character as it moves through Lakewood, Denver, and Aurora, each reflecting the community it serves. This moment offers an opportunity to reframe and revitalize what makes Aurora's Colfax distinct, building forward rather than looking backward for a model. I see East Colfax as a place that continues to evolve without losing its identity: safer, cleaner, and more welcoming, while remaining affordable, culturally rich, and accessible to longtime residents and small businesses. A place where investment supports stability rather than displacement, and where improvements are felt in everyday ways. My hope is that progress on East Colfax is defined as much by how decisions are made as by what is built through transparency, coordination, and follow-through. I see the DDA's role as helping align resources and community priorities to move shared goals into action. Ultimately, my vision is for East Colfax to remain a place where people can stay, contribute, and belong today and for generations to come.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I offer the Aurora DDA a unique blend of high-level architectural strategy and "main street" operational experience. My perspective is shaped by the belief that a district's success depends on the careful sequencing of physical improvements, economic support, and community trust. Technical Experience: As a licensed architect, I bring a deep understanding of how physical spaces influence economic behavior and social connectivity. My career has focused on moving complex projects from conceptual vision to tangible implementation. - Large-Scale Infrastructure: At Denver International Airport, I served on the South Terminal redevelopment program management team. This role required aligning diverse stakeholders, managing realistic timelines, and maintaining clear communication to prevent "stalling" on long-term public goals. - Regulatory Navigation: I have firsthand experience navigating the City of Aurora's zoning, permitting, and building codes. I understand the "friction points" that small business owners face and how the DDA can help mitigate them to encourage investment. Economic Development & Small Business Advocacy: Through creating and managing La Victoria Incubator Kitchen, I have developed a specialized expertise in "micro-economies." - Resource Management: I have experience managing limited resources and adapting systems to meet real-world operational needs. - Entrepreneurial Support: Having supported over 90 food and beverage entrepreneurs, I understand what "commerce-ready" infrastructure looks like. I can help the DDA identify which investments will most effectively draw in new businesses and strengthen the local economy. Stakeholder Perspective: I bring the "skin in the game" perspective of an Aurora property owner [redacted]. This allows me to evaluate DDA initiatives through a lens of: - Long-term Maintenance & Operations: Ensuring that "beautification" projects are sustainable and manageable over time. - Risk Mitigation: Understanding the financial realities of investing in the Colfax corridor. - Market Viability: Assessing whether proposed developments will truly draw in the desired commerce and foot traffic. Leadership & Community Stewardship: I believe communities experience "plans" not as documents, but as kept promises. My leadership style is characterized by: - Sequencing & Follow-Through: I understand that meaningful change requires a logical order of operations to maintain momentum and public trust. - Decisive Collaboration: I prioritize listening to the community first, but I am prepared to lead decisively when a project requires a firm direction to move forward. My goal is to help the DDA align its resources with the Colfax Community Vision & Action Plan, ensuring that every board decision serves the dual purpose of strengthening our neighborhood fabric and creating a resilient, thriving economic district.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I've spent much of my career working at the intersection of diverse stakeholders, including community members, business owners, public agencies, and project teams, where balancing different viewpoints is not just necessary but foundational to success. In both my professional work and community leadership roles, I approach group settings as a facilitator and connector. Whether managing complex, multi-stakeholder projects like those at Denver International Airport or leading collaborative initiatives through the La Victoria Incubator Kitchen, my role often requires aligning competing priorities while maintaining forward momentum. This means creating space for all voices, translating across perspectives, and ensuring decisions are grounded in shared goals rather than individual agendas. I've learned that conflict is often a signal, not a barrier. In practice, I rely on a few key techniques: active listening, reframing challenges in terms of common outcomes, and breaking large disagreements into smaller, actionable decisions. I also prioritize transparency in communication and clear documentation, which helps prevent misalignment and builds trust across teams. In community-focused work, particularly in Aurora, I've seen how important it is to honor lived experiences and historical context when navigating differing viewpoints. My approach is to lead with curiosity, remain adaptable, and ensure that decisions reflect both immediate needs and long-term impact. Ultimately, I see my role on a board like the DDA as a steady steward, someone who can hold multiple perspectives at once, help navigate complexity, and support thoughtful, inclusive decision-making that moves the work forward.

- DDA Uploads KGoldman.pdf

Dear Members of the City of Aurora and Selection Committee,

I am writing to express my interest in serving on the Aurora Downtown Development Authority Board. I am motivated to serve because I care deeply about the future of East Colfax and believe this moment calls for thoughtful stewardship, collaboration, and follow-through grounded in community trust. My technical, professional, and lived experiences will support the board in crafting a responsible strategic plan, providing visionary and practical guidance, and fostering inclusive community activation rooted in trust and communication.

My connection to East Colfax is both professional and personal. I am a property owner, business owner, and licensed architect who has intentionally invested time, energy, and resources in Aurora's downtown and cultural districts. Over the past several years, I have worked alongside residents, artists, entrepreneurs, property owners, and City staff through my businesses, board service, and participation in the City-led working group that helped inform the Colfax Community Vision & Action Plan. Those experiences have reinforced for me how important listening, transparency, and coordination are—particularly in a community that has experienced both long-term disinvestment and uneven outcomes.

I approach this opportunity with humility. I do not see my role as defining a vision for East Colfax, but as helping care for one that is shaped collectively. I believe Aurora's Colfax has its own distinct identity—separate from Denver's and Lakewood's—and that this is the right moment to reframe and revitalize what makes it uniquely Aurora, without losing the people, culture, and character that already exist.

Professionally, I bring experience in project management, the built environment, and implementation. I have worked on projects ranging from large public efforts, including the South Terminal redevelopment at Denver International Airport, to community-scale work such as building and operating La Victoria Incubator Kitchen. Across these contexts, I have learned that trust is built not through plans alone, but through realistic timelines, clear communication, and consistent delivery. I am comfortable supporting collaborative processes and, when required, helping move decisions forward to maintain momentum and accountability.

If appointed, I would aim to serve as a steady and thoughtful board member—one who listens carefully, asks practical questions, and helps align resources with shared priorities. I am committed to approaching this role with care, respect for lived experience, and a long-term perspective focused on stability, inclusion, and resilience.

Thank you for your consideration and for the work being done to support the future of East Colfax and downtown Aurora. I would be honored to contribute my time and experience in service to the community.

Sincerely,

Katie Goldman

KATIE E. GOLDMAN

Licensed Architect | Entrepreneur | Creative Strategist

Katie is a highly accomplished licensed design professional and entrepreneur with over 25 years of experience in architecture, construction, and high-volume operations, who is driven to rally people around ideas so that others become activated & engaged. She specializes in bridging the gap between creative vision and technical execution, with a deep understanding of complex regulatory environments and scalable systems. Proven track record of supporting 75+ local entrepreneurs through culture-forward incubation models and delivering multi-million dollar capital projects at major transportation hubs.

SELECTED EXPERIENCE

OWNER & FOUNDER | Marigold Market | Aurora, CO Opening Summer 2026
Won through a competitive bid issued by the City of Aurora, Marigold Market was selected to infill 2500 SF of tenant space within the city-owned People's Building, an arts venue and community gathering space. Marigold Market will provide much-needed access to staple goods and to locally produced fresh produce from across Colorado. It will also feature food & bar service across breakfast, lunch, dinner, and late-night snack segments, providing another destination for patrons in the Aurora Cultural and Arts district to dwell, mingle, and enjoy.

Marigold Market is currently on schedule to open in the Summer of 2026.

OWNER & FOUNDER | La victoria Incubator Kitchen, LLC (LvIK) | Aurora, CO 2021 – Present
La victoria Incubator Kitchen is a culture-forward commercial kitchen supporting like-minded chefs, makers, and bakers whose products and services promote nutritional benefits, holistic health, and community well-being. Through a foundational belief that there is room for everyone and every business to thrive, La victoria Incubator Kitchen provides access to a clean, safe, working commercial kitchen space, alongside business incubation services, such as market exposure, promotional opportunities, business development workshops, mentorship, fee consulting, and access to professional business growth and support services.

In her role, Katie

- Leads the 100% woman-owned, SBEC-certified commercial organization supporting 75+ local food-based entrepreneurs.
- Established an on average year-over-year growth of 15% during the first three years of operations, and is currently tracking the same trend in 2026.
- Manages a culture-forward incubation model combining access to shared commercial kitchen space with structured business development and market-readiness support.
- Directs operations informed by deep experience in project management and capital project delivery, emphasizing compliance and operational rigor for high-volume environments.
- Is supported by a leadership team, including the Director of Organizational Evolution & Culture and Director of Community Engagement.

OWNER & FOUNDER | La victoria Healing Kitchen | Aurora, CO 2022 – Present
La Victoria Healing Kitchen is a unique venue located in the heart of the Aurora Cultural Arts District, specifically designed for creatives in the Culinary and Healing Arts, serving as a space to develop experiences for patrons.

In her role, Katie

- Leads the 100% woman-owned organization.
- Manages the venue use and oversees daily operations.
- Expanded the "La victoria" brand to integrate wellness and community-centric culinary initiatives.
- Is supported by a leadership team including the Director of Organizational Evolution & Culture and the Director of Culinary and Healing Experiences.

INTERIM DIRECTOR OF OPERATIONS | Half Moon Empanadas (DEN) July 2024-January 2025

Half Moon Empanadas is a fast-casual restaurant concept based in Miami, FL, with 26 locations nationwide. Recognized for their efficiency and innovation, Half Moon Empanadas is the highest-revenue/SF concessionaire at Miami International Airport and a top-performing location amongst concessionaires at Denver International Airport.

In her role, Katie

- Led a comprehensive operational reset for a newly opened kiosk on Concourse B.
- Implemented standardized inventory, supply-chain, and food safety standards.
- Strengthened sales tracking, cash controls, and reporting mechanisms.
- Restructured the team and developed leadership through hiring and training a Store Manager and Assistant Manager.
- Standardized employee scheduling and feedback mechanisms to improve morale and accountability.

OWNER & FOUNDER | oh zhoo, llc | Aurora, CO 2019 – Present

Inspired by the culinary term au jus, a technique in which the essence and juice of an ingredient are used to amplify its flavor, oh zhoo is a professional boutique creative + strategic consulting practice that supports food and beverage-based businesses in navigating change management and capturing growth opportunities. oh zhoo is a 100% woman-owned, SBE, M/WBE, EBE, and DBE-certified company.

In her role, Katie

- Leads the practice, helping small and emerging food businesses translate vision into customer and employee touchpoints.
- Maintains a niche expertise in the development of food and beverage-based businesses within captive development properties such as airports, hospitals, campuses, and military bases.
- Established over a 70% win rate on proposal conversion for her Clients
- Paid back start-up capital within the first 12 months of operations.

MANAGING MEMBER | Four Goldmans | Aurora, CO 2020 - Present

Katie is the Managing Member of Four Goldman's LLC, a property management company that secured [redacted] Street in Aurora, CO. Four Goldmans now maintains the property and provides leasehold space to La victoria Incubator Kitchen, oh zhoo, and La victoria Healing Kitchen.

DIRECTOR OF EXPERIENTIAL DESIGN & DENVER OFFICE LEAD | Chipman Design Architecture, 2017-2019

- Established a new business unit in Experiential Design, securing over $800,000 in fees with a 5% profit margin within 18 months.
- Managed all regional office functions and coordinated project efforts with national headquarters.

CREATIVE DESIGN MANAGER | Qdoba 2013-2017

- Directed the development of the re-imaging strategy for the QDOBA brand in collaboration with the Executive Team.
- Managed over 70 restaurant openings across the U.S., including corporate flagships.

- Developed a signature localized Art Program as a key market differentiator.

DESIGN MANAGER | PROJECT ARCHITECT | HNTB Architecture, Inc. (South Terminal Redevelopment Program, DEN) 2010-2013

- Served as a primary Project Manager to complete the DEN Master Plan initiatives that resulted in the execution of the South Terminal Redvelopment Program, and established the framework for the re-imagined Great Hall that is currently under construction.
- Represented client and stakeholder interests in the $500M South Terminal Expansion (770,000 SF).
- Managed AOR & EOR design teams for the Public Transit Center, terminal roadways, and civil engineering components.

BUSINESS ENTREPRENEUR & STAFF ARCHITECT | Dungan Design Group

- Assisted in the establishment of a new architectural office.
- Managed architectural production and consultant coordination for Chipotle Mexican Grill locations across six states.

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

7yrs

How are you involved in your community?:
I am involved in my community through both my work and my service. As a funeral home owner, I serve families during some of the most difficult moments of their lives, providing compassionate care, guidance, and support when it matters most. I see this work as more than a business, it is a responsibility to the community. Beyond my profession, I am actively engaged in community outreach. I help organize and host food drives, coat drives, and community feedings at our establishment, creating a space where people feel welcomed, supported, and cared for. In 2021 during covid, my firm partnered with Colorado Department of Public Health & Environment to be a host site vaccination clinic. I believe in showing up consistently, building trust, and serving people not only in times of loss, but in everyday life as well and being a steeple in the community.

List your interests and activities.:
Serving families and the community through funeral service and end-of-life care Community outreach, including food drives, coat drives, and community feedings Small business ownership and entrepreneurship Civic engagement and community leadership Supporting neighborhood revitalization and economic development Youth mentorship and family support Faith-based service and volunteerism Building strong relationships with residents, local businesses, and community organizations

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Swigert Elementary School PTA Board (communications chair) 2024- current Harris Funeral Directors Inc. Board of Directors (Chief Executive Officer) 2018-Current National Funeral Directors & Morticians Association (Education Chair) 2014-2016 Downtown Memphis Commission (DMC) (Board member) 2013-2015 Shelby County Mayor Youth Council (board member) 2010-2012

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora DDA Board because I care deeply about East Colfax and the surrounding community and believe its future should be shaped by the people who live, work, and serve here. East Colfax has a rich cultural history and strong small businesses, but it has also faced long standing challenges that require thoughtful, community-driven solutions. As a small business owner and someone who serves families during their most vulnerable moments, I understand the importance of stability, trust, and long term investment. I want to help ensure revitalization efforts strengthen existing businesses, support residents, and attract new opportunities without losing the character and diversity that make this area unique. Serving on the DDA Board would allow me to bring a grounded, service oriented perspective, focus on responsible financial stewardship, and help bridge the gap between community needs and public investment so growth along East Colfax is inclusive, intentional, and beneficial for the entire community.

Describe your vision for the future of East Colfax.:

My vision for the future of East Colfax is a corridor that is safe, vibrant, and thriving while still honoring the people and culture that have always made it special. I want to see East Colfax become a place where families feel comfortable walking, shopping, and spending time, and where small businesses can grow and succeed without being pushed out. I envision a community that celebrates its cultural diversity through local art, food, events, and public spaces, making East Colfax a true destination for both residents and visitors. At the same time, I believe growth should be intentional bringing in new investment, jobs, and infrastructure while protecting long-time residents, supporting affordability, and maintaining a strong sense of community. Ultimately, I see East Colfax as a connected, inclusive district where people feel proud to live, work, and gather, and where progress benefits everyone, not just a few. I will ensure revitalization efforts are practical, fiscally responsible, and focused on outcomes that improve quality of life while expanding the economic base of East Colfax.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a combination of practical leadership experience, community perspective, and fiscal responsibility to the Aurora DDA. I have served on multiple boards and commissions, which has given me a strong understanding of governance, collaboration, and how to make thoughtful decisions in a public setting. I know how to prepare for meetings, ask the right questions, work through differing viewpoints, and stay focused on the mission rather than personal interests. As a small business owner, I bring real world experience with budgeting, financial accountability, compliance, and long-term planning. I understand how decisions made at the board level affect local businesses, employees, and families on the ground, and I value careful stewardship of public resources. Most importantly, I bring a community centered perspective. Through my work and service, I regularly engage with residents, business owners, and community organizations. I listen first, value diverse voices, and work to build trust. This combination of board experience,business expertise, and lived community connection allows me to contribute thoughtfully, responsibly, and collaboratively to the work of the DDA.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I have extensive experience working in group settings through my service on multiple boards and commissions, as well as through my professional and community leadership roles. In those settings, I have learned the importance of preparation, active listening, and mutual respect in order to move groups toward productive outcomes. When balancing different viewpoints, I focus on understanding the underlying interests behind people's positions rather than just the positions themselves. I make space for all voices to be heard, especially those that may feel overlooked, and I work to find common ground that aligns with the shared goals of the group. I am comfortable navigating disagreement and believe healthy debate, when handled respectfully, leads to better decisions. In situations of conflict, I rely on calm communication, clarity, and transparency. I try to de-escalate tension by acknowledging concerns, reframing issues around shared objectives, and encouraging solutions that are practical and fair. My approach is collaborative rather than confrontational, and I am committed to helping groups move forward in a way that builds trust and strengthens relationships.

Letter of Interest for the Aurora Downtown Development Authority Board

Dear Members of the Selection Committee,

I am writing to express my interest in serving on the Aurora Downtown Development Authority Board of Directors. I am deeply invested in the future of East Colfax and the surrounding community and believe strongly in the DDA's mission to support economic resiliency, cultural vitality, and inclusive, community led revitalization.

I am a small business owner and funeral home operator who serves families during some of the most difficult moments of their lives. This work has grounded me in service, accountability, and trust, and it has reinforced my belief that strong communities are built by showing up consistently and responding to real needs. Beyond my profession, I am actively involved in community outreach including food drives, coat drives, and community feedings, and I view these efforts as an extension of my responsibility to the neighborhood I serve.

I have served on multiple boards and commissions, which has given me a solid foundation in public governance, collaboration, and ethical decision making. I understand the importance of being prepared, staying informed, balancing diverse viewpoints, and maintaining transparency and fiscal stewardship when working with public resources. I am comfortable working in group settings, navigating disagreement respectfully, and helping move conversations toward practical, consensus driven solutions.

My vision for East Colfax is a corridor that is safe, vibrant, and thriving while preserving the culture, diversity, and small businesses that define it. I believe revitalization should support existing residents and businesses, attract thoughtful investment, and create welcoming public spaces that bring people together. I am particularly aligned with the DDA's emphasis on partnering with existing organizations, prioritizing local participation, and fostering leadership from within the community.

If selected to serve, I am committed to being an engaged and responsible board member participating fully in meetings and committees, representing the DDA at community events when needed, collaborating with fellow board members and stakeholders, and supporting the development of transparent, community informed work plans and budgets.

Thank you for your time and consideration. I would be honored to contribute my experience, perspective, and commitment to service to the Aurora DDA and the future of East Colfax.

Sincerely,

Jeremy Harris

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

7.5 Years as a resident, 1.5 years a business, 6 years as a pastor

How are you involved in your community?:
I currently operate Jubilee Roasting Co. and also work with Jesus on Colfax, a non-profit that serves the unhoused and sexually exploited. In the past I have been involved with various community organizations focused on poverty alleviation and the many issues that surround homelessness. Last, My wife and I are raising our five kids here, who are involved at DAVA, visit MLK Library, and we enjoy eating and playing in and around the places in the Colfax Corridor and have met many friends this way.

List your interests and activities.:
Music and art, sports, camping & backpacking, rock climbing, making/sharing coffee and having fun with family and friends.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

n/a

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

Having lived and worked in NW Aurora for many years the potential for growth and development that reflects this community is very exciting. Running a business and serving as pastor to many unhoused and other vulnerable populations.has given me a broad understanding of many issues we currently face that could stunt sustainable and equitable growth. I have seen and celebrated the many incredible and creative things that happen here that often go unnoticed but are the result of a strong and vibrant neighborhood. I am committed to seeing the old downtown grow into something everyone can be proud of and have opportunity to hold a stake in and contribute towards the collective goals and vision laid out by the community has already set. I appreciate any opportunity to work collaboratively with others and believe that my skill set and years of living and working here will be a good contribution to the Aurora DDA.

Describe your vision for the future of East Colfax.:

The old downtown can grow into something everyone can be proud of and have an opportunity to hold a stake in and contribute towards. This includes the revival of the arts through creating spaces for creative expression and allowing commerce to emerge as creative action that solves real issues and cultivates our unique community identity. Local markets and grocers rooted in the community can prevent food insecurity and create sustainable local businesses, while programmatic and infrastructure solutions address real safety concerns. This is a place we are proud of, and I want it to be a place we can celebrate and hand to our children as a place to take pride in.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I have a background in architectural design and construction, as well as cultural intelligence and intercultural communication through living and working abroad and in our community. Running a business has given me insight into the issues of starting and growing a business, and has also provided a network of people who I have gotten to learn from over the years who also live and/or work here. Lastly, I am a good listener and can see how multiple perspectives can connect to create solutions that everyone can own and be excited to carry out together.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Before moving here I have collaborated on multiple projects, and most relevant are managing construction projects in Uganda where I worked together with owners and local general contractors and tradesmen to maintain project budgets, timelines, and proper building practices to deliver to the end user. Since moving to the area I have worked collaboratively with the city homelessness coordinators, participated in community organizing in various capacities. Through these experiences I deeply value giving everyone a voice and opportunity for ideas to be understood, putting my own biases and preferences aside for the sake of making steps toward stated goals and tactics for achieving them. I believe conflict is best resolved with a posture of humility and owning my own mistakes and misunderstandings, working to gain clarity on the problem/conflict at hand. Identifying gaps in communication and information is important to working toward resolving conflict that is as objective as possible and not driven by pure emotion or alternative agendas.

Matthew Horne
Jubilee Roasting Co.
[redacted]

To the Aurora Downtown Development Authority Selection Committee,

I am writing to express my strong interest in serving as a board member for the newly formed Aurora Downtown Development Authority. Having lived and worked in Northwest Aurora for many years, I have a deep personal investment in seeing this community grow in ways that are equitable, sustainable, and reflective of the people who call it home.

My background spans construction project management, small business ownership, and pastoral work serving unhoused and other vulnerable populations in the area. These experiences have given me a broad understanding of the barriers to equitable development, as well as the assets already embedded in this community that can serve as a foundation for growth.

My vision for the downtown aligns with the work already done in the community listening sessions and includes investing in the arts, spaces for local business to grow to generate revenue and create real community ownership, and commit to real solutions to the massive housing issues. Above all, I am committed to a downtown that we can celebrate and pass on to the next generation.

I deeply value collaborative decision-making — giving everyone a voice, setting aside personal biases, and keeping focus on shared goals. I am eager to bring that spirit to the DDA board, and I am grateful for the formation of this board and the opportunity to apply.

Thank you for your time and consideration.

Sincerely,

Matthew Horne

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

15 years

How are you involved in your community?:
In my role as a pastor, I am deeply engaged in the daily lives of individuals and families throughout the community. This work places me in regular one-on-one and group settings, allowing me to listen closely, build trust, and understand the real opportunities and challenges facing those who live and work in Aurora. Three years ago, I founded and formally registered Original Aurora Neighbors—formerly known as the Northwest Aurora Community Collaborative—with the City of Aurora as a Registered Neighborhood Organization. Since then, I have worked alongside fellow community members to lead and sustain the organization, focusing on supporting and informing residents—particularly around issues of public safety and the establishment of the Downtown Development Authority. I have served, and continue to serve, on several nonprofit boards, including the Aurora Economic Opportunity Coalition, El Alba Cooperative, and Aurora Community Connections. Through these roles, I have gained experience in organizational leadership, collaboration, and mission-driven decision-making. I am intentional about supporting Aurora's local economy by utilizing local businesses whenever possible—restaurants, retail stores, gas stations, and neighborhood gathering places—because I believe a thriving downtown depends on strong community participation and local investment. I also represent the community through citywide leadership roles, including Chair of the Aurora Key Community Response Team; member of the Consent Decree Community Advisory Council; Chair of the Aurora Community of Faith; Chair of the Aurora Strong Resilience Center; and member of the Police Chief's Community Policing Advisory Team. These roles have strengthened my understanding of governance, cross-sector collaboration, and the importance of inclusive, community-centered leadership.

List your interests and activities.:

Sports, Reading, Walking/hiking

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

N/A

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I deeply love this community and the remarkable diversity that defines it—across ethnicities, cultures, languages, political perspectives, skin colors, and lived experiences. That diversity is Aurora's greatest strength. My desire to serve on the Downtown Development Authority Board comes from a commitment to ensure that future development both honors and protects this richness, while enhancing the community that already exists and respecting its history. For many years, I have believed that the absence of a shared, cohesive vision limited our community's ability to fully flourish. When the effort to develop a clear vision and actionable plan began, I immediately engaged in the process. I participated with a group of community leaders in visits to Portland, Boston, and Lawrence, where we observed firsthand how communities partnered with residents and local government to revitalize their downtowns in inclusive and sustainable ways. When PUMA's contract was approved, I was invited to serve on the Working Group, and I have done so conscientiously since its inception. This experience has strengthened my belief in the potential of this effort and my desire to see its promise fully realized. I also understand that the success of this work depends on strong collaboration—among the soon-to-be-formed Community Development Corporation, the Aurora Urban Renewal Board, the Fitzsimons Innovation Community, the City of Aurora, and the many current and future businesses and nonprofit organizations in the area. Throughout my work, I have consistently sought to bring people together, build coalitions, and foster partnerships that move shared goals forward. I am eager to continue that work in service of our community.

Describe your vision for the future of East Colfax.:

I envision a downtown that is truly unlike any other—a place shaped intentionally through placemaking that reflects the people who live here and invites residents and visitors alike to gather, connect, and belong. A place where individuals and families from every corner of the world come together, and where growth creates opportunity for everyone to thrive. I imagine a safe, welcoming district where neighbors look out for one another and where public spaces, streets, and businesses foster connection and community pride. A place where local entrepreneurs are supported through thoughtful economic development, enabling small businesses and nonprofits to launch, grow, and succeed as anchors of the downtown. I also envision a community committed to workforce development—where local residents are equipped with the skills, training, and pathways needed to become a strong, competitive workforce that supports employers throughout the region, while also benefiting directly from that growth. This is a downtown that is clean, vibrant, and beautiful—one residents are proud to call home—and where art and artists are valued as essential to placemaking, cultural expression, and economic vitality. Together, these elements form a downtown that honors its diversity, protects its history, and grows in ways that are inclusive, sustainable, and community-centered.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I know this area well and have lived, worked, and been actively involved in this community for the past 15–20 years. This long-standing presence has given me a deep understanding of the neighborhood's assets, challenges, and potential. I have built meaningful, trusted relationships across many of the community's diverse populations, including African American, Latino, African immigrant, Asian, and Pacific Islander communities. These relationships have allowed me to bring people from different backgrounds together to work toward shared goals and collective outcomes. I also maintain long-standing relationships with broader community and civic leaders. I am familiar with and connected to members of City Council, key members of the State Legislature, and representatives from both Adams and Arapahoe County Commissions. These relationships support collaboration and effective communication across sectors. In addition, I have led and served on multiple boards and committees and am well-versed in governance, meeting procedures, and productive decision-making processes. I value collaboration, come prepared, and approach my work as a team player committed to advancing shared priorities.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Most of my professional experience has been in collaborative environments where balancing diverse perspectives and applying thoughtful conflict resolution were essential. I have served on several boards alongside individuals with markedly different backgrounds, priorities, and points of view. My work has brought me into meaningful partnership with people of varying cultures, political beliefs, educational levels, ages, faith traditions, and personalities. I have learned that taking the time to genuinely know the people I serve alongside leads to stronger, more productive relationships. When we truly listen to one another and seek to understand—not simply to respond—we often discover shared values and common goals. By focusing on what unites us rather than what divides us, we have consistently been able to work effectively and develop practical, win-win solutions. I believe respect and civility are powerful tools for lowering tension and creating space to address both real and perceived conflicts. I also recognize that some conversations are more constructive when handled privately rather than in a public forum. I find that engaging thoughtfully with differing viewpoints is energizing and frequently reveals a clearer, stronger path forward.

RE: Downtown Development Authority Board - Letter of Interest

DATE: February 14, 2026

Dear Friends,

I am writing to express my interest in serving on the Board of Directors of Aurora's newly formed Downtown Development Authority. As a longtime resident and active professional in the community, I have a strong personal and professional investment in Aurora's continued growth, economic vitality, and downtown success.

My work has focused on bringing people together around shared priorities, building consensus, and helping move initiatives from vision to action. Through community service and collaborative leadership, I have developed an appreciation for thoughtful development that supports local businesses, strengthens community identity, and creates long-term value.

I would welcome the opportunity to contribute my perspective and leadership in support of the Authority's mission and to discuss how my experience could be of value as the downtown continues to evolve. Thank you for your time and consideration. I look forward to the possibility of connecting.

Sincerely,

Reid Hettich

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

Since 2023

How are you involved in your community?:
I am actively engaged in the Northwest Aurora community through both formal leadership and community-based participation. I serve as a board member with the Creative Alliance of Downtown Aurora (CADA), where I support arts-based economic development, creative placemaking, and local artist advocacy. I have collaborated on a range of community arts initiatives, including gallery exhibitions, art markets, vending events, and the curation of youth art showcases that center creative expression, access, and community visibility. Additionally, I have completed contracted work in mindfulness and wellness programming for schools and community members within the Aurora Arts District, supporting holistic well-being and youth development. Beyond formal roles, I am an active community patron, regularly supporting local restaurants, shops, and neighborhood events, contributing to the local economy and strengthening community connectivity.

List your interests and activities.:
- Development of play-based community initiatives that support well-being, engagement, and social connection - Nature education and environmental learning - Visual and performing arts, including murals, public art installations, and dance - Writing and illustrating children’s books that center creativity, literacy, and imagination - Sharing mindfulness and wellness practices for individual and community resilience - Cultural engagement through travel and sustained support of local arts ecosystems

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

Creative Alliance of Downtown Aurora | Board Member | May 2025 to Current

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the board of the Aurora Downtown Development Authority because East Colfax is not just where I live, it is a community I deeply believe in. Since making my home in the area, I have witnessed both the challenges and the extraordinary potential of this corridor. It is a place rich with cultural history, resilience, creativity, and opportunity, and I am committed to being part of its long-term, sustainable revitalization. The DDA represents a rare opportunity to align community vision with structured investment, strategic planning, and accountable governance. Through its role in implementing the Colfax Community Vision & Action Plan, reinvesting resources, and advancing projects that support small businesses, housing stability, neighborhood safety, and economic vitality, the DDA has the capacity to create meaningful, lasting change. As a community builder, creative leader, and systems-oriented practitioner, I bring a multidisciplinary perspective that bridges cultural development, wellness, community engagement, and placemaking. Serving on the DDA board would allow me to apply these skills in a formal governance capacity to support equitable revitalization, strengthen community trust, and help ensure that development reflects the voices, needs, and aspirations of the people who call this neighborhood home.

Describe your vision for the future of East Colfax.:

My vision for the future of East Colfax is a culturally vibrant, economically resilient, and nationally recognized corridor that reflects the depth, diversity, and creativity of the community it serves. I envision a downtown Aurora that becomes a meaningful destination, not only for local residents, but also for visitors traveling through the region, including those arriving via Denver International Airport and regional commuters seeking authentic, memorable experiences. East Colfax has the foundation to become a place where culture, history, and innovation are not just preserved, but actively amplified. I see a corridor that celebrates its diversity through public art, inclusive programming, small business ecosystems, and community-centered development. A place where people do not simply pass through, but intentionally come to engage, gather, and connect. Long-term, I envision East Colfax as a national model for integrated revitalization: a district that demonstrates how art, play, culture, wellness, and community development can be interwoven into a cohesive civic ecosystem. Through intentional investment, strategic planning, and community-rooted leadership, this corridor can set a precedent for innovative, human-centered urban revitalization that strengthens economic vitality while honoring community identity.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a multidisciplinary skill set that integrates strategic leadership, systems thinking, community engagement, and program development. My background includes public speaking, group facilitation, mediation, and conflict resolution, allowing me to navigate complex stakeholder environments, support consensus-building, and contribute to effective board governance and decision-making. I hold a Master's degree in Environmental Leadership, which grounds my work in systems thinking, sustainability, and long-term planning. This perspective enables me to approach revitalization through interconnected lenses of economic development, community well-being, environmental responsibility, and social equity. Professionally, I bring experience in project management, program operations, and collaborative design, supporting the development and implementation of initiatives that are both visionary and operationally sound. My leadership style is rooted in collaborative, non-hierarchical models that emphasize shared leadership, accountability, and collective problem-solving, alongside strong skills in active listening, coaching, and relationship-building. Creatively, I contribute innovative thinking and cultural intelligence, supporting placemaking strategies that integrate art, wellness, and community engagement as drivers of economic vitality and neighborhood identity. This combination of analytical structure and creative strategy allows me to contribute meaningfully to the mission of the Aurora Downtown Development Authority by advancing equitable revitalization, community trust, and sustainable development outcomes.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

My professional experience is deeply rooted in collaborative leadership, cross-sector coordination, and consensus-based decision-making. In my role as an Operations Specialist at the University of Colorado Boulder, I work within multidisciplinary teams and directly with students to support the academic and personal success of first-generation, low-income populations. This work requires navigating multiple layers of departmental collaboration, facilitating inclusive team dialogue, and ensuring that diverse voices are heard, respected, and meaningfully integrated into decision-making processes. In my freelance and contracted work, I regularly collaborate with diverse stakeholders across education, arts, wellness, and community development sectors. I approach group work by meeting individuals where they are, recognizing different strengths, communication styles, and ways of processing information, and aligning people with roles that reflect their capacities and interests. When balancing differing viewpoints, I prioritize synthesis over opposition. I focus on identifying shared values, core intentions, and common goals, and then building integrative solutions that honor diverse perspectives while advancing collective objectives. My conflict resolution approach is grounded in observation, emotional intelligence, and structure. I actively assess group dynamics, tone, body language, and communication patterns to identify points of tension early and address them constructively. I utilize established practices such as setting shared group agreements, facilitating mediation processes, and applying coaching-based dialogue techniques to guide conversations back toward clarity, mutual understanding, and productive outcomes. This allows me to support collaborative environments that are both relationally healthy and operationally effective, which I believe is essential for successful governance and stakeholder engagement within the Aurora Downtown Development Authority.

Dear Selection Committee,

I am writing to express my sincere interest in serving as a board member of the Aurora Downtown Development Authority. As an active community contributor in the East Colfax/Northwest Aurora area, I am deeply invested in the long-term vitality, equity, and sustainable development of this corridor.

East Colfax is a community of extraordinary cultural depth, resilience, and possibility. I have found a true sense of home here and am inspired by the neighborhood's history, diversity, and creative energy. I believe strongly in its potential to become a model of inclusive revitalization that honors community identity while advancing economic opportunity, safety, and neighborhood well-being.

My professional background integrates systems thinking, community engagement, and collaborative leadership. I hold a Master's degree in Environmental Leadership and bring experience in project management, program operations, and cross-sector collaboration. My work across education, arts, wellness, and community development has equipped me to navigate complex stakeholder environments, support consensus-building, and contribute to long-term, mission-driven governance.

I am particularly drawn to the DDA's role in implementing the Colfax Community Vision & Action Plan and its capacity to reinvest in small businesses, housing stability, public safety, and neighborhood infrastructure through structured, accountable mechanisms such as Tax Increment Financing. I am motivated by the opportunity to serve in a formal governance role that aligns strategic planning, community voice, and public trust.

If selected, I would bring a perspective grounded in equity, sustainability, cultural investment, and community-centered development. I am committed to stewarding growth in a way that is responsible, inclusive, and reflective of the people who live, work, and build their lives in this district.

Thank you for your consideration and for your leadership in shaping the future of downtown Aurora. I would be honored to contribute my skills, experience, and commitment to the work of the Aurora Downtown Development Authority.

Respectfully,

Sarah Iverso

Feb 28, 2026

To Whom it may concern,

Referring to the matter of application to the Aurora, CO DDA board, I hereby confirm that Sarah Iverson has been appointed as our representative. Please let me know if you have any questions.

Warmly,

Morgan Schreiber
Board President
Creative Alliance of Downtown Aurora
[redacted]

Creative Alliance of Downtown Aurora

Morgan Schreiber
Board President
Creative Alliance of Downtown Aurora (CADA)

February 27, 2026

To Whom It May Concern,

It is my honor to write this letter of recommendation for Sarah Iverson, a valued member of the Creative Alliance of Downtown Aurora (CADA) Board and an engaged resident of the Aurora Cultural Arts District.

Sarah brings a deep commitment to creative placemaking and a genuine passion for strengthening her neighborhood. She consistently advocates for thoughtful, community-centered approaches that make downtown Aurora safer, more welcoming, and more inclusive for all residents. Her perspective as both a board member and a local resident allows her to bridge strategy with lived experience in a meaningful and impactful way.

As Board President, I have seen firsthand the integrity, collaboration, and vision Sarah brings to our work. She asks important questions, listens carefully, and ensures that our initiatives reflect the diversity and vibrancy of our community. Her leadership strengthens our organization and helps position CADA as a catalyst for positive neighborhood change.

I am proud to recommend Sarah and confident that her dedication to inclusive creative placemaking will continue to benefit any organization or initiative she supports.

Sincerely,

Aaron Vega
Project Manager
City of Aurora – Library and Cultural Services Department

February 27, 2026

To Whom It May Concern,

It is my pleasure to write this letter of recommendation for Sarah Iverson, an Aurora Cultural Arts District (ACAD) resident and dedicated board member of the Creative Alliance of Downtown Aurora (CADA).

Sarah brings both professional expertise and heartfelt commitment to her work in creative placemaking. She understands that arts and culture are not simply amenities — they are powerful tools for connection, belonging, and community safety. Her approach thoughtfully centers the lived experience of residents, ensuring that creative projects reflect the identity, diversity, and aspirations of the neighborhood.

As a resident of the Aurora Cultural Arts District, Sarah is personally invested in the long-term vitality of downtown Aurora. She is passionate about helping shape a neighborhood that is welcoming, inclusive, and safe for everyone. Whether contributing strategic insight at the board level or engaging in conversations about public space, programming, and partnerships, she consistently advocates for initiatives that strengthen community pride and accessibility.

We are excited to have Sarah's voice representing the Creative Alliance of Downtown Aurora. She brings integrity, creativity, and a collaborative spirit to every effort she supports. I am confident that her leadership and perspective will continue to positively impact any organization or initiative she is involved with.

Sincerely,

Name: Kerorssa, Amen

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

3 years

How are you involved in your community?:
I am involved in the community in East Colfax through running youth programs around the area. My Position as Programs Coordinator at The Village Institute has helped me understand and build relationships with different people from different cultures and backgrounds. I have also been involved in networking meetings where different organization around East Colfax get together to share resources, develop partnerships, and expand the communities we serve.

List your interests and activities.:
My interest is to serve people through the gifts and wisdom God has given me. I find my self serving people from different ages but I tend to serve youth more frequently as I have strong compassion towards the younger generation. I serve people through music, counseling, mentorship, and creative thinking.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

n/a

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

I want serve on The DDA because it's a great opportunity to work and partner with people who desire a better Colfax for residence and business owners.

Describe your vision for the future of East Colfax.:

My vision for the future of East Colfax is a place where youth and young adult enjoy being in. A place thats safer, cleaner, has more resources and opportunities for youth to be motivated to create and want to invest their skills and talents in. A place where people are be proud of and aren't stigmatized as soon as they mention they live in Colfax.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I understand what the community needs in East Colfax. I also hear and understand what change partners would like to see in East Colfax therefore I can be a voice for the desire and needs for the community in East Colfax residences and partners alike. I also can bring my knowledge and skills in business administration to this project, as well as my interpersonal skills that I have strengthen working in non profit.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Since I joined the work force I have never had a position where I didn't have to collaborate and work with teams. I am all for working in teams and enjoy it very much to the point I decided to major in business administration. I believe each individual is different with a unique personality which adds value when working on a project that is demanding and requires diverse expertise.

FOOD JUSTICE
NW AURORA

To: Aurora City Council DDA Selections Committee
Mike Coffman, Mayor, City of Aurora
Alison Coombs, Mayor Pro-Tem
Laura Perry, Deputy City Manager

Re: Letter of Support for Amen Kerorssa – Aurora DDA Board Appointment

Dear Mayor Coffman, Mayor Pro-Tem Coombs, and Deputy City Manager Perry,

On behalf of Food Justice NW Aurora, we are pleased to submit this letter of support for the appointment of Amen Kerorssa to the Aurora Downtown Development Authority (DDA) Board.

Food Justice NW Aurora (FJNWA) was established in 2022 with a mission to build a multicultural, intergenerational, and intersectional movement for food justice and food sovereignty to transform our local food system in northwest Aurora. Our organization is located in Aurora's Ward 1 and mainly serves the community of northwest Aurora (80010). Through collaboration with residents, small businesses, and partner organizations, we strive to increase local food production, improve access to nutritious food where people live, and build the movement for food justice.

Since 2024, FJNWA has been deeply engaged in the development of the Colfax Community Vision and Action plan, serving on the working group with P.U.M.A. and mobilizing resident and business leaders to shape recommendations for the Colfax plan. We believe it is integral that DDA board members lead with honesty, integrity, transparency, and values that are aligned with the community and the organizations already doing the work on the ground. Board members must not only understand community priorities, but actively advocate for them in decision-making processes that impact residents, small businesses, and neighborhoods.

We care deeply about who is on the DDA because it directly influences the economic vitality and long-term stability of the east Colfax corridor and its existing, long-time residents and business owners. Amen Kerorssa brings lived experience as an immigrant, strong ties to Aurora's Ethiopian community, and professional expertise in youth leadership development and business administration. As Village Futures Program Coordinator at the Village Institute, she works directly with first generation, refugee, and immigrant youth in Ward 1, facilitating leadership, wellness, and creative programs and training Peer Facilitators who are emerging leaders themselves. Her work positions her to bring an important youth voice and multigenerational perspective to DDA conversations that shape the future of the corridor.

We strongly support Amen Kerorssa for the Board because:

- She works daily with immigrant and refugee youth and families along the East Colfax corridor and can ensure their perspectives are reflected in development decisions.
- She holds a Bachelor's degree in Business Administration from the University of Colorado Denver and brings foundational knowledge of economic systems, entrepreneurship, and responsible growth.
- She trains and leads Peer Facilitators, demonstrating leadership, accountability, and the ability to cultivate the next generation of community leaders in Aurora.
- She is an active member of Aurora's Ethiopian community and understands the cultural and economic contributions of immigrant-owned businesses along Colfax.
- She brings compassion, creativity, and a solutions-oriented mindset grounded in lived experience and long term commitment to serving immigrant families.

We respectfully urge you to appoint Amen Kerorssa to the Aurora DDA Board. We are confident she will serve with integrity, thoughtful leadership, and a deep commitment to advancing the well being of residents, strengthening small businesses, and ensuring the long term stability and prosperity of northwest Aurora and the East Colfax corridor.

Thank you for your time and consideration.

Sincerely,

Jesús Calderón
Ward 1 Resident and Vice-Chair of the FJNWA Board of Directors

Board Selection Committee

Aurora Downtown Development Authority

Aurora, Colorado

Dear Members of the Selection Committee,

I am writing to express my strong interest in serving on the Board of Directors for the Aurora Downtown Development Authority, with a particular passion for supporting the continued development and revitalization of East Colfax. My professional work, educational background, and personal history are deeply rooted in this community, and I am committed to helping shape a future where East Colfax is a thriving, opportunity-rich corridor for residents and businesses.

Through my work at a nonprofit organization that supports immigrants and refugees in East Colfax, I have built strong relationships with community members, local leaders, and partner organizations. This direct engagement gives me valuable insight into both the challenges and the aspirations of the community. I understand what residents desire to see improved — from economic investment and small business support to safer spaces and expanded opportunities for youth and families.

In my role as a Programs Coordinator for youth and young adult initiatives, I lead programs that encourage professional development, mentorship, health education, and mental health awareness. I work closely with young people to help them build confidence, develop career pathways, and envision long-term success within their own community. These experiences

have strengthened my leadership, strategic planning, and partnership-building skills — all of which are essential for effective board service.

I hold a degree in Business Management and currently serve in a coordinator role, where I manage program logistics, community partnerships, and performance outcomes. I bring a balance of analytical thinking and creativity, along with a genuine passion for advising and mentoring others. I believe thoughtful economic development must integrate both sound strategy and human-centered understanding.

My connection to Colfax is also personal. I grew up attending church in this area as a child, and I have witnessed both its struggles and its resilience. I am motivated to help transform the narrative surrounding East Colfax by fostering an environment where immigrant families and long-time residents can thrive, invest in their futures, and break the negative stigma historically associated with the corridor.

If appointed to serve, I would bring strong community relationships, lived experience in East Colfax, youth development expertise, strategic business training, and a deep commitment to inclusive economic growth. I would be honored to contribute my voice, experience, and dedication to advancing a vibrant and equitable future for East Colfax and the greater Aurora community.

Thank you for your time and consideration. I welcome the opportunity to further discuss how I can serve.

Sincerely,

Amen Kerorssa

THE VILLAGE INSTITUTE
Building wealth, worth, and wellbeing

[redacted]

February 26, 2026

Dear Members of the Selection Committee,

This letter confirms that Amen Kerorssa is an approved agency representative of The Village Institute for purposes of her application to serve on the Board of the Aurora Downtown Development Authority.

Amen is authorized to represent our organization in matters related to this application and any related communications or processes.

Please feel free to contact me directly if additional information is needed.

Sincerely,

Executive Director
The Village Institute

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

16 years

How are you involved in your community?:
I'm the head coach of my son's 12U competitive basketball team which is comprised of Aurora residents, and I am a member and past president of the Aurora Rotary Club, serving my 1-year term and additional years on the board. I have 2 State Farm offices in Aurora including my main office within the DDA boundary, and also have other businesses, mostly other residential property that I own. I'm an active sponsor and booster of local high school athletics, and a proud alum of Gateway High School. I have three children that have all attended Aurora Public schools, and my wife is a teacher in the district. My daughter is a member of Miller Dance Studio and is on the competitive team where we have volunteered in various capacities, and my oldest is a senior at Smoky Hill where we attend and support the drama department plays and musicals. My family has volunteered at the Village Exchange Center during the holidays in 2025 and plan to do that more throughout the year helping hand out food assistance to families.

List your interests and activities.:

Most of my activities are related to my children's busy lives and operating my State Farm agencies. In my free time I enjoy playing basketball, traveling at least twice per year, attending hometown team sporting events from high school to the Broncos, Nuggets and Avalanche, and playing the NY Times puzzles daily. I'm a very amateur barbeque cook but enjoy smoking the occasional brisket in my Traeger, and hosting family and friends at our home. Both of my sisters and their families are in the Denver area as well as my in-laws and mother/stepfather, and we spend a lot of time together supporting each other's children in their various pursuits.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Aurora Rotary Club board, as vice-president, then as president, and an additional year as past president, 3 years total, from 2016-2019.

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I'm very invested in the Aurora community and have tremendous pride in my fellow community members. Having mostly grown up in Aurora, I've seen what our residents can accomplish and contribute to Aurora and to Colorado and beyond, and I understand the value of living in a community so rich with diversity. I also find myself as a defender of our community and our values, and often I'm disheartened by Aurora's portrayal or characterization either in the news or by those outside the community. While there are many challenges that we face in the DDA boundary, there's so much to be celebrated and highlighted, and with the help of the DDA, we can target the best use of resources to showcase the positive qualities of the businesses and citizens within the DDA.

Describe your vision for the future of East Colfax.:

There is today so many great ideas on East Colfax that are perhaps not executed to the highest level to create visibility in a way that would overcome the public's existing stereotypes of East Colfax. One example is the Mango House, which is one of my favorite places to have lunch. The food hall concept is especially effective in Aurora where we have such a broad array of ethnicities and food options. However, all of what the Mango House offers is maybe not very clear from passersby, the front doors often locked during business hours, a bit of a hodge podge of seating. With an injection of resources, I could envision a modern facade that would entice all of the hospital employees as they drive home from work, lighting and signage and windows clearly showcasing what is offered inside, an entrance from the parking in the rear of the building that welcomes patrons as they find their way to their favorite cuisine. My vision for the DDA would be an expansion of that concept to all the businesses, helping them to succeed and showcase what makes East Colfax a place to stop and shop and eat, not just to pass through. I would want to find ways to highlight the existing greatness of the corridor, businesses like Banh and Butter, Casa Soccer, The Fox, Tacos Jalpa, and on and on...and that starts with appealing to drivers and passengers with modern, welcoming signage projecting a warm appearance and accessibility for parking, with clear visibility for what is offered, and I envision the word of mouth to follow, and a change in people's perception of East Colfax.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I've been a resident of this area for almost 40 years, and although I'm in Centennial now, I grew up through Aurora Public Schools and have a thriving State Farm business within the boundaries of the DDA territory. I have developed many professional and personal relationships in the area in my 16 years as business owner and have been able to navigate the complexities of starting and operating a small business that now employs 16 team members. More specifically I've flourished due to the development of a strong marketing plan including and especially through my online presence. I love Aurora and passionately want to see Aurora succeed and become a destination with the reputation that it deserves.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

With the Rotary Club, it was important to listen to the club members to form a vision and goals that most closely aligned with what the group wanted to achieve. We surveyed the club often and would engage one another on the board, listening to each other's ideas and attending to one another's answers. Emotion would sometimes enter meetings when someone was especially passionate about a project, and I would approach those situations in very measured tones and not be dismissive of anyone's ideas, often reminding other board members that at our core, we wanted the best club possible service as many people as we can, and sometimes just have different visions on how to get there. Also very critically, it was important to be honest and transparent about what was possible and fair to all club members.

Board Application Aurora Downtown Development Authority

Letter of Interest

Dear Aurora Council Members and Mayor Coffman,

I'm writing this to express my interest in being a member of the board of the newly formed DDA. I'm a business owner in the defined corridor, having operated a State Farm agency at [redacted] since 2010. I learned about this opportunity through the community and had a chance to speak with Naomi Lacewell to understand a bit about the role and requirements.

I'm a passionate supporter of our community and would welcome the chance to serve Aurora. I want to help enhance the visibility and success of the businesses already here and find ways to expand and grow the number of business owners wanting to conduct their operations in our corridor, to create a cycle of growth and additional resources for business and residents alike through the newly formed DDA. Through the success of my State Farm business, I've been able to expand into additional operations, and we have a staff of 16 team members and are witness to the enormous opportunity in our corner of Aurora.

I hope to have the opportunity to interview, and I appreciate consideration of my application.

Sincerely,

Joel Kruschwitz

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

Two years ago, I relocated my business from Denver to Aurora at La victoria Incubator Kitchen. Operating within this neighborhood and environment has allowed me to stabilize my bakery business post-COVID, buy out my business partner to take full ownership, resolve outstanding business debt, grow my customer base, and expand my product offering. Additionally, I've been able to expand my services by teaching baking and cake-decorating classes at La victoria Healing Kitchen. Most recently, I have been brought on in a part-time role as a Kitchen Coordinator at La victoria Incubator Kitchen (starting March 1, 2026). In this new role, I will be supporting fellow entrepreneurs more directly within the various business incubation programs and pathways available to operators working within LvIK, including assisting in the launch of the pathway program to Marigold Market.

How are you involved in your community?:
For over a decade, I have volunteered, taught, and led programs in various schools, afterschool, and summer programs.

List your interests and activities.:
Art, Music, Food. and Cycling.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

N/A

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

Outside of my business, I have been part of art collectives, which give me a unique perspective on the needs of managing and building an artistic community and the economic impact that they produce. As a RMCAD graduate, Helikon Studio resident, founder of Birdseed collective, and Unit E guest curator, I am entrenched in the local music and art scenes, with a vast network of like-minded individuals. I desire to support local artisans and business owners, aspiring entrepreneurs, and support migrants and those who have recently reentered society after incarceration with job skills and opportunities. I see my service on the newly formed DDA as a way to ensure that inclusive systems and equitable opportunities are developed and executed.

Describe your vision for the future of East Colfax.:

I envision a robust, collaborative, and unique community dedicated to forward progress.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

As a former educator in public schools, I can advocate for families and youth. As a business owner, I can bring practical insight into the day-to-day realities of running and sustaining a small business, including financial challenges, customer engagement, and the importance of accessible resources and supportive infrastructure for entrepreneurs. As a representative of an underserved population, I can help ensure that decision-making reflects the needs and experiences of immigrant communities and historically underrepresented groups, advocating for equitable access to opportunities and inclusive economic development. As an artist, I can contribute a creative, problem-solving mindset and an understanding of how culture, identity, and storytelling help shape vibrant, welcoming community spaces. As a Coloradan, I can bring a strong commitment to local growth, community resilience, and building systems that support long-term sustainability while honoring the diverse character of Aurora.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Here’s a strong, completed version that keeps her tone grounded and collaborative: --- In my experience as a leader, I am often involved in conflict resolution. I believe in using leading questions to learn, foster open dialogue, and stay productive while reaching a shared outcome. I have learned and cultivated meaningful communication skills that allow me to listen actively, understand different perspectives, and identify common ground. Through my work as an educator, business owner, and community member, I have regularly worked with people from diverse backgrounds with differing priorities. I approach these situations with patience, respect, and a focus on solutions rather than positions. I aim to create space where everyone feels heard while helping guide conversations toward clear, actionable outcomes. I understand that strong collaboration requires both empathy and accountability. I am comfortable navigating difficult conversations, addressing challenges directly, and helping groups move forward in ways that reflect shared goals and community benefit.

- Laura Madrid DDA Upload.pdf

Letter of Interest – Aurora Downtown Development Authority Board
Applicant: Laura Madrid, Owner of Lala's Bakery

Dear Selection Committee,

I am writing to express my interest in serving on the Aurora Downtown Development Authority (DDA) Board. Over the past two years, Northwest Aurora has become both my professional home and a place where I have been able to rebuild, grow, and invest more deeply in my community.

In 2024, I relocated Lala's Bakery from Denver to La Victoria Incubator Kitchen. Since then, I have stabilized my business post-COVID, taken full ownership, resolved outstanding debt, and expanded my customer base and product offerings. This experience has strengthened my understanding of what small business owners need to succeed including affordable access, mentorship, and a supportive ecosystem.

I am proud of my heritage, which shapes both my business and my approach to community. Food has always been a way to connect people, celebrate culture, and create opportunity. Through my work, I aim to create welcoming, inclusive spaces that reflect Aurora's diversity and support those who are often underrepresented in traditional business environments.

In addition to running my bakery, I have spent over a decade working with youth and families through schools and community programs. Beginning March 2026, I will also serve as a Kitchen Coordinator at La Victoria Incubator Kitchen, where I will support emerging entrepreneurs, many from immigrant and underserved backgrounds, as they build and grow their businesses.

I am motivated to serve on the DDA Board because I believe in equitable, community-driven development. I want to support local business owners, create pathways for aspiring entrepreneurs, and ensure that Aurora's growth includes opportunities for immigrants, working families, and those rebuilding their lives. My goal is to help shape systems that are accessible, inclusive, and reflective of the community they serve.

My vision for East Colfax is a collaborative and thriving corridor that honors its cultural diversity while creating new opportunities for economic stability and growth. I believe this can be achieved by investing in small businesses, supporting local entrepreneurs, and fostering a sense of belonging for everyone who calls Aurora home.

I bring the perspective of a small business owner who has navigated challenges firsthand, an educator who understands community needs, and a Latina entrepreneur committed to inclusive progress. I approach collaboration with openness and respect, using dialogue and problem-solving to find shared solutions and move work forward productively.

Thank you for your consideration. I would be honored to contribute to Aurora's future by serving on the DDA Board.

Sincerely,
Laura Madrid
Owner, Lala's Bakery

February 28, 2026

RE: Letter of Recommendation/ Representation

To the Selection Committee,

I am honored to recommend Laura Madrid, owner of Lala's Bakery, as the representative of the Incubator Kitchen to the Aurora Downtown Development Authority for Northwest Aurora.

Laura is a powerful example of what thoughtful, community-rooted entrepreneurship can look like. As the owner of Lala's Bakery and a participant in the Incubator Kitchen ecosystem, she has not only built a business grounded in quality and care, but has done so in a way that reflects the cultural richness and entrepreneurial spirit of Aurora. Her journey embodies the very purpose of the incubator, providing pathways for emerging food businesses to grow, stabilize, and thrive.

In addition, Laura will be joining the La Victoria Incubator Kitchen team as Kitchen Coordinator, a role that further reflects her leadership, reliability, and deep understanding of kitchen operations. This position will allow her to support fellow entrepreneurs more directly while strengthening day-to-day systems within the incubator, bringing both operational insight and peer-level empathy to the work.

What distinguishes Laura is her deep connection to the community and her intuitive understanding of the challenges faced by small, independently owned businesses. She leads with humility, resilience, and generosity, consistently showing up not just for her own business but also for others navigating similar paths. Her perspective ensures that conversations around development remain grounded in real-world experience, particularly for early-stage entrepreneurs and historically underrepresented business owners.

Laura also brings a practical, solutions-oriented mindset. She understands firsthand the operational realities and challenges of running a food business and approaches them with determination and creativity. Her voice will be critical in helping the DDA shape strategies that are both visionary and implementable.

As a representative of the Incubator Kitchen, Laura offers authenticity, lived experience, and a strong commitment to equitable growth. She will advocate not only for her own business but for the broader network of entrepreneurs who rely on shared resources, community support, and intentional development to succeed.

I strongly support Laura Madrid's appointment and am confident she will be a meaningful and impactful contributor to the Aurora DDA and the Northwest Aurora community.

Sincerely,

Katie Goldman, Owner
La Victoria Incubator Kitchen

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora Downtown Development Authority board because I believe equitable community development is fundamentally linked to community health, safety, and opportunity. As a public health researcher embedded in Aurora, I study the social determinants of violence and neighborhood wellbeing, and I see firsthand how built environments, economic opportunities, and community spaces shape health outcomes. Serving on the DDA would allow me to bridge rigorous, community-grounded research with strategic development decisions that impact neighborhood vitality. I am committed to ensuring that economic development in the East Colfax corridor is informed by evidence, community voice, and principles of equity. My work focuses on understanding community needs through qualitative and mixed-methods research rooted in lived experience. I want to contribute that perspective to help the DDA make decisions that strengthen social and economic wellbeing, support inclusive growth, and create spaces where all residents can thrive.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is a vibrant corridor where economic development enhances community health and belonging rather than displacing long-time residents and small businesses. I see sidewalks, parks, and public spaces that invite interaction; storefronts that reflect the cultural diversity and entrepreneurial spirit of Aurora; and development that prioritizes affordable housing, safe transit, and places for youth and families to gather. In this future, data and community voice inform development priorities. The corridor is a place where residents feel both safe and empowered, where investment does not mean erasure of identity but celebration of it, and where economic growth translates into jobs and opportunities for those most impacted by violence, structural inequities, and disinvestment. East Colfax should be a model of equitable revitalization—where planning and development improve health, strengthen community ties, and expand access to opportunities without forcing longtime neighbors out.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring interdisciplinary expertise in public health, community-based research, and violence prevention, grounded in both academic training and field engagement. My doctorate in public health equips me with skills in data analysis, program evaluation, and qualitative and mixed methods research that can help the DDA evaluate investments not just for economic return but for community wellbeing. Leading a team of community-based researchers and practitioners—many of whom are violence intervention specialists and trusted neighborhood residents—has taught me how to center community knowledge and lived experience in inquiry and decision-making. I'm skilled at synthesizing complex data into actionable insights and communicating findings across technical and non-technical stakeholders. I also bring a perspective that prioritizes health equity, racial equity, and trauma-informed approaches to development. My work highlights how environments—physical, economic, and social—affect quality of life and health. I would use this lens to ensure DDA strategies uplift residents' wellbeing and prevent harm.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Collaboration is central to my work as a community-based researcher and leader in the nonprofit space. I regularly convene and collaborate with multi-sector partners including city agencies, community organizations, researchers, service providers, neighborhood associations, and residents with diverse perspectives. These collaborations require balancing competing priorities, interpreting different forms of knowledge, and negotiating shared goals. In research settings, I facilitate focus groups, community advisory boards, and planning meetings where power dynamics and historical mistrust can surface. My approach emphasizes active listening, establishing shared purpose, and creating space for all voices, particularly those historically marginalized in civic conversations. I use evidence and narrative to build mutual understanding, and when disagreements arise, I ask clarifying questions, identify common ground, and seek options that honor both empirical insight and community values. I also maintain transparency about constraints and trade-offs, which builds trust and reduces conflict. This experience equips me to work effectively on the DDA board—engaging diverse stakeholders, synthesizing viewpoints into shared strategies, and resolving tensions constructively in service of equitable development.

CURRICULUM VITAE
Virginia McCarthy, DrPH, MPH, MDiv

I. Contact Information

Phone Number: [redacted]
Email: [redacted]

II. Education

Saint Louis University, St. Louis, MO
BA, Spanish; BA, Theological Studies — 1999-2003

Boston College/Weston Jesuit School of Theology, Boston, MA
MDiv — 2004-2007

Loyola University Chicago, Chicago, IL
MPH, Epidemiology — 2014-2016

University of Colorado Anschutz Medical Campus, Aurora, CO
DrPH, Community and Behavioral Health — 2021-2024
Colorado School of Public Health

III. Academic Positions

2024 – Assistant Professor, Department of Surgery, University of Colorado School of Medicine; Affiliate Faculty, Firearm Injury Prevention Initiative; Affiliate Faculty, Injury and Violence Prevention Center, Colorado School of Public Health;
University of Colorado Anschutz Medical Campus

2021 – 2024 Research Assistant, Department of Community and Behavioral Health, Injury and Violence Prevention Center, Colorado School of Public Health; Firearm Injury Prevention Initiative, University of Colorado Anschutz Medical Campus

2022 Course Instructor, Bioethics Institute, Loyola University Chicago Health Sciences Campus

IV. Professional Positions

2003 – 2004 Marianist Volunteer Corps, La Chinantla, Veracruz, Mexico

2007 – 2008 Director of Housing and Campus Ministry, Saint Louis University, Madrid, Spain

2008 – 2015 Assistant Director, Center for Community and Global Health, Loyola University Chicago, Stritch School of Medicine, Maywood, IL

2015 – 2021 Director, Heath Sciences Ministry, Loyola University Chicago, Health Sciences Campus, Maywood, IL

2021 – Program Advisor, Center for Community and Global Health, Loyola University Chicago, Stritch School of Medicine, Maywood, IL

2022 – 2024 Director of Development, Denver Youth Program, GRASP (Gang Rescue and Support Project), Denver, CO

V. Honors and Awards

2002 Mev Puleo Scholarship
Saint Louis University, St. Louis, MO

2004-2007 Ignatian Scholarship (full tuition)
Boston College/Weston Jesuit School of Theology, Boston, MA

2015 Megs Langdon, Spirit of Service Award
Loyola University Chicago, Chicago, IL

2017-2018 Chicago Gun Violence Research Fellowship
Sinai Urban Health Institute, Chicago, IL

2020 Excellence in Student Support
Loyola University Chicago, Chicago, IL

2021 Visiting Fellow in Residence
Goethe University, Frankfurt, Germany (cancelled due to Covid)

2021 Hoffman Firearm Injury and Violence Prevention Scholarship
Colorado School of Public Health, University of Colorado Anschutz Medical Campus, Aurora, CO

2022 Outstanding Scientific Merit, Student Presentations
Colorado School of Public Health, University of Colorado Anschutz Medical Campus, Community and Behavioral Health Research & Practice Innovative Exchange, Aurora, CO

2022 Outstanding Student Service Award
Colorado School of Public Health, University of Colorado Anschutz Medical Campus, Department of Community and Behavioral Health, Aurora, CO

2022 Doctoral Student Poster Award
Colorado School of Public Health, University of Colorado Anschutz Medical Campus, ColoradoSPH Research Exchange, Aurora, CO

2023 Best in Science, Students and Early Career Professionals (nomination)
Society for the Advancement of Violence and Injury Research 2023 Annual Conference, Denver, CO

2023 Hoffman Firearm Injury and Violence Prevention Scholarship
Colorado School of Public Health, University of Colorado Anschutz Medical Campus, Aurora, CO

2025 Student Inductee
Delta Omega, Public Health Honor Society

VI. Professional Leadership and Service

A. Loyola University Chicago

2014-2015 Institutional Review Board

2014-2016 Ambassador, Institute for Transformative Interprofessional Education

2015-2019 DREAMER Committee

2016-2018 University Senate

2016-2020 Course Facilitator, Patient-Centered Medicine, Stritch School of Medicine

2015-2021 Student Scholarship Committee

2015-2021 Dean Administrative Council, Stritch School of Medicine

2017-2021 Student Wellness Committee

2017-2021 Hippocratic Odes, Faculty Sponsor

2017-2021 Chair, Loyola Stands Against Gun Violence

2017-2021 Mission Integration Council

2018-2021 Interviewer, Admissions Committee, Stritch School of Medicine

2019-2021 Sesquicentennial Committee

B. Consortium of Universities for Global Health

2013 – Section Convener, Reflection in Global Health

C. Health Alliance for Violence Intervention

2022 – Member of the Research and Evaluation Committee

2024 – Member of the Medicaid Committee

2024 – Member of the Guaranteed Basic Income Committee

D. Society for the Advancement of Violence and Injury Research

2023 – Member of the Student and Early Career Professionals Committee

VII. Review, Referee and Editorial Activities

A. Ad Hoc Reviews

2023 Research Abstracts and Workshop Presentations, Health Alliance for Violence Intervention

2025 Research Abstracts and Workshop Presentations, Health Alliance for Violence Intervention

2025 Research Abstracts and Workshop Presentations, Society for the Advancement of Violence and Injury Research (SAVIR)

2025 Peer-review of Manuscripts, *Pediatrics*

VIII. Teaching Record

A. Course Instructor

Graduate

2022 “Global Bioethics”

IX. Research Record

A. Active Grants and Contracts

Modifiable factors in emergent presentation of potentially elective general surgical disease for patients who are insured or insurance-eligible

Funder: National Institute on Minority Health and Health Disparities PI: Velopulos

Project Dates: 4/17/2021-1/31/2026

Total Budget: $1,575,000

Description: The overall goal of our proposed research is to understand why having health care coverage (or eligibility for health care coverage) is not sufficient to allow equal access to elective surgical care.
Role: Co-Investigator

B. Select Community Engaged Grants
2021 Alternatives to Jail, Caring for Denver Foundation, **$650,030**
Reduction of Substance Use and Increased Access to Mental Health
2022 Community Safety Fund, Everytown for Gun Safety, **$100,000**
Support for the AIM and GRASP programs – Community Violence Intervention and Prevention
2023 Multidisciplinary Crime Prevention and Crisis Intervention, Office of Adult and Juvenile
Assistance, **$440,234**
GRASP Enterprises, Violence intervention and Prevention Support
2023 Equity Collective Initiative, Colorado Health Foundation, **$1,000,000**
Support for the REACH Clinic – Trauma-Recovery post violent injury
2024 Behavioral Health Services Grant Award, Denver Behavioral Health, **$480,447**
Mentorship – Adult/Youth and Peer-led Mentorship
2024 Yield Giving Lever For Change, **$1,000,000**
Partnership with My Outdoor Colorado Coalition
2024 Overseas Resources Foundation Limited, **$500,000**
GRASP Enterprises, REACH Clinic, Violence intervention and Prevention Support
2025: Sustainer Grant, Everytown for Gun Safety, **$100,000**
Support for AIM, GRASP, REACH Clinic– Community Violence Intervention and Prevention

C. Completed Grants and Contracts
Colorado Office of Gun Violence Prevention Resource Bank Implementation and State-Academic Partnership Development
Funder: Colorado Department of Public Health and Environment
PI: Betz
Project Dates: 12/1/2022-6/30/2024
Total Budget: $848,000
Description: The project supports the Colorado Department of Public Health and Environment (CDPHE) in fulfilling the expectations laid out in HB21-1299, including supporting the launch and maintenance of a resource bank as a repository for data, research, and statistical information regarding firearm injuries and deaths, and their prevention, in Colorado.
Role: Graduate Research Assistant

Exploring and Examining Firearm Violence in Missouri
Funder: Missouri Foundation for Health PI: Wright-Kelly
Project Dates: 01/01/2023 – 03/30/2024
Total Award: $199,987
Description: This project provides technical assistance to two Missouri communities to develop tailored data collection methods and tools and facilitate community conversations to understand how local community members perceive firearm injury and

violence and ways in which the communities may collectively prevent firearm injury and death in the future.
Role: Project Director

"Safety in Dementia": An Online Caregiver Intervention
Funder: National Institutes of Health/National Institute on Aging PI: Betz
Project Dates: 9/17/2021-8/31/2024
Total Budget: $1,118,779 (direct costs)
Description: This R01 study (R01 AG076364) explores the utility of an online decision tool for caregivers of community-dwelling individuals with Alzheimer's disease and related dementias (ADRD) regarding firearm access and firearm storage.
Role: Graduate Research Assistant

Maywood Social Enterprise R3 (Restore. Reinvest. Renew) Planning Grant
Funder: Illinois Criminal Justice Information Authority PI: Luke
Project Dates: 7/1/2018-6/30/2020
Total Budget: $157,595
Description: This planning grant organizes five partner organizations to explore a community-academic partnership in social enterprise to provide increased training, education, and employment opportunities for youth, young adults, and community members.
Role: Co-Investigator

Community Paramedicine: Loyola/Hillside Fire Department Collaborative Community Outreach
Funder: Health EQ, Loyola University Chicago PIs: Luke, Cichon
Project Dates: 7/1/2019-6/30/2020
Total Budget: $34,146
Description: This grant aims to reduce hospital readmission through coordinated post-hospital discharge home visits provided by the fire department to address follow-up medical questions, assistance with appointments, mental health need, and secure firearm storage.
Role: Co-Investigator

Exploring the Intersection of Healthcare Chaplaincy and Medical Education
Funder: York Fund, Loyola University Chicago PI: MP McCarthy
Project Dates: 7/1/2021-6/30/2022
Total Budget: $5,000 plus indirects
Description: This study funds qualitative analysis of the Loyola University Health System and Loyola University Stritch School of Medicine Chaplain Mentor program to assess program outcomes through alignment with course learning objectives.
Role: Co-Investigator

Receiving Contexts of Return After Deportation
Funder: National Science Foundation PI: Gomberg-Muñoz
Project Dates: 6/15/2018-5/31/22

Total Budget:	$280,544
Description:	This project explores the complexities of return migration after deportation from the United States to Mexico through a variety of ethnographic research methods and research on state and municipalities regarding migration and deportees. The longitudinal study design and collaborative approach will inform social sciences research and intervention and will be shared with policy makers.
Role:	Project Lead, Map Team Co-founder

February 27, 2026

Office of the Mayor
City of Aurora
15151 E. Alameda Parkway
Aurora, CO 80012

Dear Mayor Coffman and Members of the DDA Nomination Committee:

I am writing to express my interest in serving on the Board of the Aurora Downtown Development Authority (DDA) and to offer my commitment to supporting equitable revitalization along the East Colfax corridor. I am honored to be considered for appointment and respectfully submit this letter of interest.

As a community-based researcher with a doctorate in public health, I lead a team of community-based researchers—violence prevention professionals and violence intervention specialists—at a Denver Metro nonprofit. Our team conducts qualitative and mixed-methods research focused on violence prevention and intervention, centering the lived experiences of residents most impacted by structural inequities. In addition, I serve as Director of the REACH Clinic, where we provide post-discharge wraparound services for victims of violence to support holistic healing, safety planning, and long-term stability. My work sits at the intersection of research, community health, and systems change, and it has deepened my understanding of how economic conditions, neighborhood environments, and public investment decisions shape community wellbeing.

I am inspired by the Aurora DDA's commitment to stewarding economic development, neighborhood improvements, and long-term investment in the East Colfax corridor. The DDA's role in implementing the Colfax Community Vision & Action Plan—grounded in public input and shared priorities around public safety, housing stability, small business support, public space enhancements, and arts and culture—aligns closely with my professional focus on social determinants of health. I view economic development as inseparable from community safety and health equity. When neighborhoods have stable housing, thriving small businesses, accessible services, and welcoming public spaces, we see measurable improvements in wellbeing and reductions in violence.

Throughout my career, I have led interdisciplinary research initiatives that center community voice and translate qualitative and mixed-methods findings into actionable policy and program recommendations. I have trained and mentored teams of community-based researchers and violence prevention and intervention specialists who bring lived experience and trusted relationships into violence prevention work. This has included building cross-sector partnerships with healthcare systems, public agencies, nonprofit organizations, and grassroots leaders to design and implement community-informed solutions. Alongside this, I have managed grants and organizational operations with strong fiscal oversight, accountability, and a focus on measurable outcomes, while facilitating community advisory groups and stakeholder meetings where diverse viewpoints are elevated and incorporated into shared strategies. I bring to the DDA a public health lens that considers how built environments, economic investment, and community infrastructure influence safety and opportunity. My experience evaluating programs and synthesizing complex data can support thoughtful decision-making around resource allocation, impact measurement, and long-term planning. Just as importantly, I bring strong relationships within Aurora's neighborhoods and a deep respect for the lived expertise of residents and small business owners.

[redacted]

I am prepared to dedicate the time and attention necessary to attend meetings, serve on committees, participate in board governance, and contribute meaningfully to advancing equitable revitalization. I am particularly invested in ensuring that development efforts enhance stability and opportunity for residents who have historically been underrepresented in planning processes, including survivors of violence, immigrant communities, and low-income families. Revitalization must not only stimulate economic growth but also strengthen the social fabric and health of the community.

Thank you for your consideration. I would be honored to serve on the Aurora Downtown Development Authority Board and to contribute research-informed, community-centered leadership to the long-term vitality and prosperity of the East Colfax corridor and surrounding neighborhoods.

Respectfully,

Virginia McCarthy, DrPH, MPH, MDiv
Director, REACH Clinic
Denver Youth Program

- Montoya, Priscilla

Received: 2/27/2026
Non Resident and Registered Voter
The Address Provided Falls Within DDA Boundaries
Vetted: 2/27/2026
Marcus Bond

Name: Montoya, Priscilla

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

33 Years (DAVA)

How are you involved in your community?:
Downtown Aurora Visual Arts is an arts education nonprofit for children and youth.

List your interests and activities.:
Art, Education, Children, Youth, Community building, Public butification, After-School activities

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

No

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

As Executive Director of Downtown Aurora Visual Arts, I work daily in the East Colfax corridor alongside the youth, families, artists, and small businesses who are directly impacted by redevelopment decisions. I want to serve on the Aurora Downtown Development Authority board because this is a pivotal moment for East Colfax, and the decisions made now will shape the corridor for generations. The DDA's ability to reinvest tax increment financing revenue into infrastructure, safety, small business support, and revitalization presents a powerful opportunity. I am motivated to help guide the implementation of the Plan of Development in a way that balances economic growth with cultural preservation and long-term community stability. East Colfax deserves thoughtful, community-centered revitalization that strengthens the historic core while protecting the people and businesses who have sustained it. I want to ensure that arts, youth, and historically underrepresented voices are meaningfully included in decisions about how reinvestment dollars are prioritized.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is a vibrant, walkable, economically strong district that reflects Aurora's diversity and resilience. I envision a corridor where infrastructure improvements enhance safety and accessibility, where small and locally owned businesses are supported through strategic investment, and where public art and cultural programming are integrated into placemaking efforts. Revitalization should not simply mean new construction. It should mean strengthening the ecosystem that already exists. Through the DDA's reinvestment tools, East Colfax can become a model of equitable development. It can leverage tax increment financing to improve public spaces, stimulate responsible mixed-use growth, and preserve legacy businesses and community institutions. As a leader of a youth-serving organization working with over 700 students annually in North Aurora, I see firsthand how stable, welcoming spaces influence long-term community vitality. My vision centers intergenerational investment by creating a district where today's children grow up to be tomorrow's entrepreneurs, artists, and civic leaders.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring over 20 years of leadership experience across nonprofit management, philanthropy, strategic planning, and community development. As Executive Director of DAVA, I oversee operations, budgeting, fundraising, staff leadership, and cross-sector partnerships. Previously, as Vice President of Development and Communications at the Latino Community Foundation of Colorado, I helped lead a 20-million-dollar endowment campaign and have worked across the state in community strategic alignment through a community democracy lens. This experience gives me a strong understanding of financial stewardship, long-term sustainability, and aligning investment strategies with mission-driven outcomes while ensuring that residents and local assets remain invested and heard. I also bring a systems-level equity lens. With a background in social work and service as Co-Chair and Community Representative for the State of Colorado Equity Alliance, I understand how policies and development decisions impact historically marginalized communities. The DDA's responsibility to implement the Plan of Development requires strategic thinking, fiscal accountability, and authentic community engagement. My expertise in building partnerships between public agencies, corporate partners, nonprofits, and residents directly aligns with that responsibility.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Throughout my career, I have worked in environments where stakeholders bring diverse and sometimes competing priorities. At the Latino Community Foundation of Colorado, I collaborated with board members, corporate sponsors, grassroots nonprofits, and donors to align around shared funding strategies. These conversations required balancing financial realities with community accountability. I relied on structured dialogue, transparent data sharing, and clear decision-making frameworks to build consensus. As Executive Director of DAVA, I regularly convene staff, teaching artists, families, funders, and community partners. My approach includes active listening, clarifying shared values, and creating space for differing perspectives before moving toward resolution. My earlier work as a Certified Child Welfare Expert Witness and investigator trained me to remain calm under pressure, assess complex situations objectively, and make decisions grounded in both evidence and human impact. As a DDA board member, I would bring a collaborative, solutions-oriented mindset, recognizing that strong governance depends on balancing economic, community, and cultural considerations with respect and transparency.

Aurora Downtown Development Authority Selection Committee
City of Aurora

Dear Selection Committee,

I am writing to express my sincere interest in serving on the Aurora Downtown Development Authority Board. As Executive Director of Downtown Aurora Visual Arts, located within the DDA district boundaries, I have the privilege of working daily with the children, families, artists, and small businesses who define the spirit of East Colfax. I am seeking this appointment because I believe revitalization must be rooted in equity, community voice, and long-term belonging.

East Colfax is one of the most diverse corridors in our state. It is home to immigrant families, multilingual households, small locally owned businesses, artists, and youth who deserve to see themselves reflected in decisions about development. As the DDA implements its Plan of Development and reinvests tax increment financing revenue, it has the opportunity not only to strengthen infrastructure and economic activity, but also to ensure that growth does not come at the cost of displacement or cultural erasure.

My leadership has always centered community. I began my career in child welfare, advocating for vulnerable children and families and navigating complex public systems with care and accountability. That work shaped my commitment to listening deeply, honoring lived experience, and making decisions that consider both data and human impact. Today, as Executive Director of DAVA, I lead a youth serving nonprofit that supports more than 700 students annually in North Aurora. For over 30 years, DAVA has been an anchor institution in the East Colfax corridor, offering stability, creative expression, and belonging to generations of families.

In addition, my service as Co Chair and Community Representative for the State of Colorado Equity Alliance reflects my ongoing commitment to advancing accessibility, inclusion, and systems level change. I understand that policy and financial decisions shape neighborhoods in profound ways. I believe DDA board members must approach this responsibility with transparency, humility, and an unwavering commitment to community benefit.

My vision for East Colfax is one where revitalization strengthens what already exists. I envision investment that uplifts legacy businesses, supports affordable and accessible community spaces, improves safety and walkability, and integrates arts and culture into placemaking. I believe economic development and equity are not competing priorities. When done thoughtfully, they reinforce one another.

If appointed, I will bring collaborative leadership, a deep respect for community voice, and a commitment to ensuring that East Colfax remains a place where longtime residents, small businesses, and future generations can thrive together. Thank you for your time and consideration. I would be honored to serve.

Sincerely,

Priscilla Montoya, Executive Director
Downtown Aurora Visual Arts (DAVA)

Aurora Downtown Development Authority Selection Committee
City of Aurora

Dear Selection Committee,

On behalf of the Board of Directors of Downtown Aurora Visual Arts (DAVA), I am writing to formally designate Priscilla Montoya as DAVA's official representative and applicant for service on the Aurora Downtown Development Authority Board.

Ms. Montoya serves as Executive Director of DAVA and is authorized to act as an employee and agent of our organization within the DDA district boundaries. The DAVA Board fully supports her application and affirms that she is applying with our endorsement to represent the interests of our nonprofit organization and the broader East Colfax community.

As an anchor institution located within the DDA district, DAVA has served youth and families in North Aurora for more than three decades. We believe Ms. Montoya's leadership, strategic experience, and deep commitment to equitable community development make her exceptionally well suited to contribute to the governance, planning, and long-term vision of the DDA.

The Board is confident that she will collaborate thoughtfully with fellow board members, uphold the responsibilities and expectations of service, and represent DAVA and the community with integrity and professionalism.

Please feel free to contact me if additional information is needed.

Sincerely,

Ramesh Cook

PROFILE

As a versatile professional with a wealth of leadership experience in the philanthropic sector, I offer a unique combination of strategic insight, relationship-building abilities, and operational proficiency. Grounded in social work and a history of spearheading impactful projects, I excel in roles that require innovation, resilience, and a dedication to quality. During my time at the Latino Community Foundation of Colorado, I honed my expertise in philanthropy, communication strategy, and engaging stakeholders to further the organization's mission and enhance its influence. Whether collaborating with diverse teams, overseeing intricate projects, or nurturing a culture of mentorship and development, I am motivated by a relentless pursuit of excellence and a deep commitment to making a positive impact in the world.

KEY COMPETENCIES

Strategic planning	Financial reporting	Strong presentation skills	Team leadership
Client relationships	Community engagement	Communication strategy	Mentorship
Grant writing & management	Social responsibility	Operations management	Research and Evalutation

PROFESSIONAL EXPERIENCE

EXECUTIVE DIRECTOR — 2024 - PRESENT

Downtown Aurora Visual Arts (DAVA)

Currently, I oversee executive operations for a community-based youth arts nonprofit serving 700+ students annually in North Aurora. I also manage a 10-person staff and spearhead fundraising initiatives to support the organization's annual operating budget in one of Colorado's most diverse communities. DAVA partners with ACAD, CADA and SCFD collaborative as well as other local artists and business to round out strategy and increase impact.

ABIDE STRATEGIC ALIGNMENT PRACTITIONER & CONSULTANT — 2024 - PRESENT

Curated Consulting, LLC

I collaborate with a skilled group of consultants who offer guidance on integrating ABIDE (Accessibility, Belonging, Inclusion, Diversity and Equity) concepts genuinely and strategically into current projects. This is achieved through training sessions, organizational assessments, governance, policy creation, grant writing or evaluation processes.

VICE PRESIDENT OF DEVELOPMENT AND COMMUNICATIONS — 2021 - 2023

Latino Community Foundation of Colorado

For the last nine years, I have held a leadership role within this organization, and my recent position showcases achievements that originated years ago. As the Vice President, I have enhanced the impact of the significant projects we have carried out with more than 150 Latino-led, Latino-serving nonprofits in Colorado. I highlighted our narrative from a cultural perspective and secured financial support through sponsorships, corporate donations, and grants.

- Spearheaded comprehensive fundraising initiatives, culminating in the successful launch of a 5-year, $20 million endowment campaign in 2022. My team of 3 rasied $13 Million in a year and a half, significantly bolstering organizational sustainability.
- Engineered a dynamic communication strategy for diverse fundraising campaigns, enhancing donor engagement and organizational branding, as evidenced by a 80% rate of donor retention and an increase by 250% in new donors while in this role.
- Cultivated strategic partnerships with corporations and new corporate partners, leveraging value alignment to expand community impact and secure essential resources for mission-driven projects.

DIRECTOR OF STRATEGY AND LEARNING — 2016 - 2020

Latino Community Foundation of Colorado

I collaborated with stakeholders, employees, community members, and donors to integrate insights into our programs and operations. Through the use of data and evaluation tools, we enhanced and streamlined our operations, establishing trust and transparency within our community.

- Led the strategic planning and execution of comprehensive evaluations across all initiatives, enhancing program effectiveness and stakeholder engagement.
- Directed a communications team in developing and implementing online and print strategies, resulting in a 600% increase in community awareness and support.
- Spearheaded statewide capacity building, training, and education programs, significantly expanding program reach and fostering a significant growth in participant engagement.

MANAGER OF EVALUATION AND COMMUNICATIONS — 2014 - 2015

Latino Community Foundation of Colorado

I assisted in overseeing and executing a brand, logo, and messaging update, setting up style guide norms, introducing and upkeeping our digital and print branding, all while staying true to our organization's Latino heritage.

- Developed a social media strategy to increase donor engagement
- Spearheaded donor campaigns and donor cultivation activities
- Evaluated programs and provided recommendations

STRATEGY AND MANAGEMENT CONSULTANT — 2013 - 2015

University of Denver

The Interdisciplinary Research Incubator for the Study of Inequality (IRISE)
The University of Denver Latinx Center

- Administrative oversight of post-doctoral fellows, research grants, and event planning
- Communications and graphic design for various projects and events

CHILD WELFARE SPECIAL INVESTIGATOR — 2004 - 2013

Department of Human Resources

Department of Human Services, Colorado | 2010 - 2013
Department of Human Services, Georgia | 2004 -2010

- Investigated allegations of child abuse and neglect
- Developed inclusive practices policy
- Certified Child Welfare Expert Witness for judicial testimony (CO, GA)

EDUCATION

UNIVERSITY OF DENVER (MSW)

Master of Social Work (Honors) - Focus on non-profit management

TEXAS STATE UNIVERSITY (BA)

Bachelor of Arts (Honors) - Psychology | Cultural Anthropology

21/64 CONNECT (PHILANTHROPIC ADVISORY GROUP)

Certified Advisor of Color

OTHER ROLES

STATE OF COLORADO EQUITY ALLIANCE — 2019 - PRESENT

Co-Chair, Community Representative | Volunteer position for equity advancement of all CO state agencies

IMPACT 100 METRO DENVER — 2022 - PRESENT

Committee Member | Volunteer - nonprofit philanthropic women's giving circle
Paid Consultant - ABIDE Strategic alignment (Accessibility, Belonging, Inclusion, Diversity and Equity)

ASKKANWII FILMMAKING HUB INCUBATOR — 2022 - PRESENT

Committee Member | Volunteer - nonprofit educational filmmaking for underrepresented people

February 26, 2026

Dear Selection Committee,

I am writing to express my strong support for Priscilla Montoya to serve on the Aurora Downtown Development Authority board. I have known Priscilla for over a decade in both a personal and professional capacity–first and foremost as a friend and mentor, and professionally as a social work colleague.

Over the course of those ten years, I've witnessed Priscilla be a true servant of the community. She has spent her life giving back to children and families–previously as a social worker in child welfare, as a mentor to young social work students and professionals, and now as Executive Director of Downtown Aurora Visual Arts (DAVA).

I grew up in Ward 1 Aurora, and I have lived on the same street in my neighborhood for more than twenty years. During this time, I have personally experienced my community changing before my eyes. As the city has continued to grow and develop, I have experienced both the beauty of change and the heartache of displacement and gentrification. That is why organizations like DAVA are so critical. As a longstanding staple in the East Colfax Corridor, DAVA has been a place of community, learning, art, color, reprieve, and joy for children, teens, and families. Whether it's teaching kids how to create collographs for printmaking or hosting events for Aurora residents to learn about the African Diaspora community that exists in our city, DAVA is a place where all Aurorans can be their best creative selves.

As the DDA continues to explore the development of Old Aurora, it's critical that community staples like DAVA are at the table–lifting up the voices of the children, teens, and families who have found a welcoming space to engage in art.

Thank you for your consideration of Priscilla's candidacy. I am happy to provide any further detail or answer questions as needed.

Sincerely,
Esther Turcios

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

2 years

How are you involved in your community?:

My current chapter in Northwest Aurora is defined by the leadership of a unique Indigenous-owned cafe and library on the historic East Colfax corridor. Set to officially open on November 1, 2025, this space is the culmination of four years of intentional community cultivation. By prioritizing relationships with residents, local business owners, and civic leaders long before our grand opening, I have woven my personal story and vision into the fabric of the neighborhood, ensuring our doors open to a community that already feels like home. As the Co-Founder and Owner of Ollin Cafetzin on East Colfax, I designed an Indigenous-centered café and library to serve as a bridge between generations. This space fosters literacy and cultural dialogue by hosting over 80 public events and housing an Ethnic Studies Library with 1,000+ community-donated books, ensuring that ancestral knowledge and modern stories are accessible to all ages.From 2021 to 2025, I served as the Director of Wellness Care at Centro de los Trabajadores. I founded the organization’s first Wellness Program, designing trauma-informed practices and a 'Worker Wellness Card' to provide immigrant workers with a documented health history. A vital tool for securing their well-being in both employment and legal proceedings.Since 2016, I have also served as a Co-Instructor for the Aquetza Youth Leadership Program. There, I facilitate 'Ourstory,' a curriculum I created to help young people explore their unique cultural identities and propose social change projects rooted in the history of their own neighborhoods.Whether I am utilizing my Master’s in Social Work or drawing on the natural organizing instincts I learned from my migrant parents, my work is always about coordinating with care. I am dedicated to prepping the ground so that every leader and resident in Aurora has a sustainable, multigenerational ecosystem in which to cultivate their social dreams.

List your interests and activities.:
My life and work are deeply rooted in the Aurora. As a mother, wife, social worker, and business owner, I view my primary activity as serving as a catalyst for others, such as modeling how imagination and self-creation can build up not just an individual, but entire families and communities. I have a lifelong commitment to preserving heritage through the organization of large-scale public celebrations, including Raza Graduation, Día de los Muertos, and Cinco de Mayo. I have been a published poet since my youth (Life is More than Words), I remain active in using creative mediums to help others explore self-reflection and empowerment. I believe art is a vital tool for civic engagement and personal agency. As well as a lifelong learner currently expanding my linguistic roots by studying Nahuatl at a beginning level. This complements my bilingual fluency in English and Spanish and reflects my commitment to honoring the deep history of our region. My activities include grassroots fundraising, power mapping, and the cultivation of cross-sector partnerships. I utilize my Master’s in Social Work and my natural organizing instincts to build sustainable networks that support local initiatives and long-term urban growth. Ultimately, I am a resident who is constantly engaged in the process of self-reflection and growth.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

No

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

I am eager to join the Aurora DDA to serve as a representative voice for Indigenous and small-scale business perspectives—two viewpoints that are essential to the authentic development of East Colfax. My lived experience as a first-generation Chicana Indigenous entrepreneur allows me to lead from a place of deep-rooted understanding, yet I recognize that true governance is an act of collective stewardship. I believe in a leadership style that begins with active listening and intentional reflection. My path has taught me that before we can identify a successful strategic plan, we must first truly hear the diverse ideas of our residents and business owners. I am prepared to help direct the Aurora Development Authority by bridging these community voices with clear, actionable strategies that prioritize long-term sustainability. My goal is to ensure that our downtown's growth is not just a top-down process, but a collaborative movement that reflects the heart and hustle of Colorado's third-largest city.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is to transform this historic corridor into a premier community destination that actively cultivates and celebrates the vibrant beauty of Aurora. As the co-founder of Ollin Cafetzin at 9529 E Colfax, I see this street as much more than a commercial, but a living map where our collective history and our future economy must intersect. To move East Colfax forward, we must first pay tribute to its historical meaning. My vision is to honor those layers of history by ensuring that revitalization supports the residents and entrepreneurs who have held this ground for decades. I see a future where East Colfax stands out as the cultural heart of Colorado's third-largest city, defined by: Small-scale and diverse-owned businesses that serve as modern monuments to our heritage. Permanent hubs for literacy, art, and gathering that invite residents of all ages to see their own stories reflected in the streetscape. Public spaces that highlight the global diversity of Aurora, making it a destination where the world meets and stays. By bridging our past with strategic, sustainable development, we can ensure East Colfax isn't just revitalized, but reclaimed as a place of pride. We are prepping the soil for an ecosystem where economic vitality is rooted in cultural authenticity, ensuring that the beauty of our diverse backgrounds becomes the very foundation of Aurora's future

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

With a Master's in Social Work focused on Organizational Leadership and Policy Practice, I possess the technical skill to design and implement large-scale programs. I bring the ability to lead in bilingual settings, ensuring that our downtown development is accessible and culturally resonant for our Spanish-speaking and immigrant neighbors. My background as a Family Functional Therapist and Wellness Director allows me to advocate for a downtown that prioritizes the holistic health and social-emotional well-being of its residents. As the owner of Ollin Cafetzin on East Colfax, I face the same daily challenges as other Northwest Aurora business owners and understand what it takes to survive and thrive in this corridor.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I bring to the board a unique synthesis of clinical communication, award-winning business strategy, and a commitment to multigenerational community reinvestment. My perspective is rooted in the reality of East Colfax, where economic growth must be balanced with the preservation of cultural heritage to be truly sustainable. For instance, I possess the technical skill to build a business from the ground up that is both mission-driven and financially competitive. My professional background provides the DDA with a specialized toolkit for navigating the tensions that often arise in urban development. I am skilled at de-escalating friction and facilitating productive dialogue between groups with competing interests. Whether I am managing the expectations of a large group of community investors or navigating 15 listening sessions per week (as I did at Centro de los Trabajadores), I move through conflict by identifying common ground and "prepping the soil" for collaboration rather than division. I bring a deep "Resource Directory" of existing relationships within Aurora's most diverse neighborhoods. I have solidified a web of 60+ partnerships with leading nonprofits, local institutions, and residents. As an Indigenous, first-generation Chicana business owner, I lead with "coordinating with care." I ensure that 1:1 stakeholder engagement is not just a formality, but a bridge that connects traditional development with the lived experiences of the community. Aurora is the third-largest and most diverse city in Colorado, and I bring a perspective that honors the beauty of this global intersection. I see the DDA's work as a way to create "third spaces" where ancestral knowledge and modern commerce meet. I am dedicated to ensuring the DDA operates with the strategic foresight and cultural humility required to make our downtown a destination for everyone, from youth to elders.

Urban Symbiosis

[redacted]

2/23/2026

To Whom It May Concern,

I am writing on behalf of Urban Symbiosis to express our strong support for **Cynthia Moreno**, owner of **Ollin Café**, for appointment to the Aurora Downtown Development Authority (DDA) Board.

Urban Symbiosis is a community-based nonprofit working to strengthen local food systems, small businesses, and neighborhood-level economic resilience in Aurora. Our work is rooted in collaboration with residents, entrepreneurs, and families specifically in Northwest Aurora. From this vantage point, it is clear that effective economic development requires leadership that is grounded in lived experience, cultural competency, and a deep commitment to community-centered growth.

Cynthia Moreno exemplifies these qualities. Through Ollin Café, she has built more than a business, she has created a welcoming community space that reflects Aurora's cultural richness while contributing to local economic vitality. As a small business owner operating in a historically underserved corridor, Cynthia understands firsthand the challenges and opportunities facing local entrepreneurs, including access to capital, customer traffic, infrastructure, and long-term sustainability.

Her perspective would be a valuable asset to the DDA Board. Cynthia brings practical insight into how development decisions affect small businesses, workers, and families, and how intentional investment can support economic activation without displacing the communities that make Aurora vibrant. Her leadership would help ensure that the DDA's work remains responsive, inclusive, and aligned with the needs of both residents and locally owned businesses.

We believe the DDA is strongest when its board reflects the diversity, creativity, and entrepreneurial spirit of the community it serves. Cynthia Moreno's appointment would advance that goal and contribute meaningfully to equitable and thoughtful development in Aurora.

We strongly encourage her selection and are confident she would serve the DDA and the broader Aurora community with integrity, insight, and care.

Sincerely,

James Grevious

James Dausey Grevious II

Summary

- Consistently recognized for my quiet and creative leadership and creating projects that are grounded in collective visioning
- Engaging critically and culturally responsive practices in bilingual settings with community to offer early prevention services to support clients social-emotional wellbeing
- Promoting holistic working solutions with communities and peers with an emphasis in applying ethical principles in professional practice

---

Honors & Awards

- Tommi Frank Award June 2019
- Faculty Merit Scholarship September 2017
- Most Inspirational Student of the Year June 2017
- Organization of the Year with Movimiento Estudiantil Chicano de Aztlán May 2016

Field Experience

Owner and Co-Founder, Ollin Cafetzin **November 2022- Present**

[redacted]

- Scheduled and coordinated 1:1 meetings with influential stakeholders aligned with the
- organization's mission and vision
- Developed compelling business plan presentations to support funding requests and strategic
- growth initiatives
- Drove successful fundraising campaigns across platforms like Indiegogo, HoneyComb Credit, and grassroots tactics securing over $71,045 in startups from community investments
- Solidified a strong network of 32+ partnerships with leading nonprofits and institutions, leveraging collaborations to host 80+ public events that boosted product visibility and expanded clientele across Aurora, Denver, Thornton, Westminster, Boulder, and Longmont
- Secured 1,000+ book donations from educators and community members for Ollin's Ethnic
- Studies Library, creating a space where youth and community members can exchange reading
- engagement for drinks, fostering literacy and cultural dialogue
- Earned the prestigious "Best Business Plan" award from Mi Resource Casa, reinforcing our vision of establishing an Indigenous-centered café and library as a vibrant third space where culture, knowledge, and community intersect

Director of Wellness Care Program, Centro de los Trabajadores **April 2021-August 2025**
Denver, CO 80211

- Founded and led the organization's first Worker Care/Wellness Program, grounded in a mental health, healing-centered, and wraparound care framework for immigrant and working-class communities
- Design and implement culturally responsive, trauma-informed wellness practices that addressed emotional, mental, and relational health alongside workers' rights and economic justice effort for immigrant workers in Colorado

- Engaged in 15 listening sessions per week with members to identify needs, emerging trends, and program interests, while coordinating and organizing activities and programs
- Scheduled one-on-one meetings with partners and providers to design and expand Centro's first Resource Directory to funnel a referral system for immigrant workers
- Maintained an updated grant reports and meet with Executive Director to collect data and submit work regarding the Wellness Department
- Lead and supervise the Coordinator of Bienvenidos a Denver and a team of interns, providing
- guidance, professional development, and performance evaluations to ensure the successful
- execution of program initiatives
- Designed a "Worker Wellness Card," enabling workers to secure annual checkups and present documented health history for employment opportunities or immigration proceedings

Bilingual Family Function Therapist, Savio House **August 2019-April 2021**
Denver, CO 80209

- Delivered trauma-informed, evidence-based therapy to families and youth, addressing behavioral, emotional, and relational challenges through the Functional Family Therapy (FFT) model
- Conducted comprehensive assessments to identify family dynamics, risk factors, and strengths, developing individualized treatment plans for long-term treatment plans
- Facilitated family-centered interventions in both English and Spanish, promoting effective communication, conflict resolution, and healthy coping strategies for group dynamics
- Collaborated with caseworkers, schools, and community resources to ensure families receive wraparound support tailored to immediate needs
- Provided crisis intervention and de-escalation techniques for adults and youth
- Maintain detailed clinical documentation and progress reports, ensuring compliance with agency and state regulations

Community Commitment

Co-Instructor & Youth Counselor, Aquetza Youth Leadership Program **Nov 2016-July 2024**
University of Colorado, Boulder, CO

- Worked alongside the Co-Founders to implement staff trainings around indigenous epistemology and trauma-informed frameworks and how staff should model and practice these values when working with youth
- Created and facilitated the "Ourstory" curriculum, guiding 52 students through critical self-reflection on their identities, communities, and societal roles with creative art mediums to foster deeper awareness and empowerment of the self and ties to community
- Contributed to the culture of the program to create a culture where young people can learn, imagine and propose social change projects into their communities

CYNTHIA MORENO-ROMERO

[redacted]

Regional Representative & Co-Chair, MEChA **Sep 2011-June 2016**
Central Washington University, Ellensburg, WA

- Honored with the Organization of the Year Award for outstanding leadership and impact on
- school campus
- Co-led the development of regional conferences, overseeing agenda creation, workshop facilitation, and student participation across the states
- Spearheaded the planning and execution of Raza Graduation, Día de los Muertos, and Cinco de Mayo celebrations to preserve cultural heritage and community traditions

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora DDA board because economic development must be intentional, equitable, and community-rooted. For over a decade, I have worked at the intersection of civic engagement, public safety, and economic empowerment through the Dayton Street Opportunity Center and related initiatives. I understand that corridors do not transform through construction alone — they transform through trust, access to capital, small business stabilization, workforce pipelines, and safety infrastructure that supports growth. The DDA is one of the most powerful economic tools available to shape long-term outcomes. I want to ensure that as property values rise and investment increases, existing residents and small businesses benefit rather than get displaced. My focus would be: Strengthening small and minority-owned business participation Leveraging TIF strategically for corridor revitalization Aligning public safety and economic development Building public-private partnerships that create durable opportunity Ensuring transparency and measurable community return on investment I am not interested in symbolic service. I am interested in structured growth, disciplined strategy, and outcomes that expand economic power for the community while strengthening Aurora's tax base. That is why I am seeking to serve.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is disciplined, inclusive growth, not accidental change. East Colfax should become a corridor where small businesses thrive, families feel safe, property values rise responsibly, and long-time residents are not pushed out but brought into ownership. That requires alignment across four pillars: 1. Safe & Stable Infrastructure Lighting, clean corridors, coordinated crisis response, and consistent code enforcement that supports compliance rather than punishes survival. 2. Small Business Power Access to capital, storefront stabilization grants, technical assistance, insurance mitigation partnerships, and priority procurement pathways for local and minority-owned businesses. 3. Mixed-Income Housing with Protection Strategic development that increases supply while preserving affordability, preventing displacement, and supporting pathways to ownership. 4. Community-Owned Growth Leveraging TIF and DDA tools to reinvest directly into the corridor — with measurable ROI for residents, not just developers. East Colfax should become a model of equitable urban revitalization: culturally vibrant, economically strong, and structured so that the people who stayed through the hard years benefit most from the renewal. The goal is simple: growth with dignity, safety with opportunity, and development that builds wealth locally — not extraction.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a combination of civic leadership, economic development strategy, and corridor-level operational experience. Knowledge: I understand how local government works — budgeting, public safety systems, I'm learning TIF financing, procurement, and community engagement. I've worked at the intersection of policy and neighborhood-level implementation for over a decade. Skills: Strategic planning and long-term economic modeling Coalition building across public, private, and community sectors Small business ecosystem development Public safety alignment with economic goals Narrative framing and stakeholder communication Program design with measurable outcomes Expertise: Through the Dayton Street Opportunity Center and related initiatives, I have experience building civic infrastructure, designing workforce partnerships, convening town halls, and structuring economic empowerment strategies tied to real funding pathways. Perspective: I bring the voice of corridor residents, small business owners, and communities historically left out of development decisions. I believe revitalization must increase property values and opportunity without accelerating displacement. Growth should be structured, equitable, and measurable. I approach economic development not as theory, but as implementation — with discipline, accountability, and a focus on durable community return on investment.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

My leadership has always required working in diverse, high-stakes group environments where perspectives are not only different, they are deeply felt. As Managing Director of the Dayton Street Opportunity Center and in my roles within party leadership and community organizations, I have worked with elected officials, business owners, activists, public safety leaders, residents, and nonprofit partners. Those spaces often include competing priorities: growth vs. displacement concerns, enforcement vs. equity, speed vs. process. My approach is disciplined and structured: Clarify the shared objective first. Conflict usually reduces when everyone agrees on the outcome, even if they disagree on the path. Separate emotion from the decision framework. I validate concerns but move the group toward data, policy tools, and measurable impact. Create defined decision criteria. When a board agrees on standards, ROI, equity impact, fiscal responsibility, debates become productive rather than personal. Listen strategically. People want to know they were heard before they can move toward compromise. Protect relationships while solving problems. Long-term collaboration matters more than winning a single vote. I do not avoid tension. I manage it. Strong boards are not built on uniformity, they are built on respectful disagreement, clear process, and shared accountability. That is the environment I consistently work to create.

Aurora Downtown Development Authority Board
City of Aurora
Aurora, Colorado

Dear Members of the Selection Committee,

I am writing to formally express my interest in serving as a member of the Aurora Downtown Development Authority (DDA) Board. I believe East Colfax and the greater Aurora corridor stand at a pivotal moment, and I am committed to ensuring that economic growth is strategic, inclusive, and sustainable.

For over a decade, I have worked at the intersection of civic engagement, public safety, and economic empowerment as Managing Director of the Dayton Street Opportunity Center. I have also served as Founding Chair of the City of Aurora Civic Engagement Commission, Arapahoe County 1st Vice Chair, President of the Colorado Black Economic Empowerment Initiative, and currently as 1st Vice Chair of House District 42. These roles have required collaboration across government, community stakeholders, and business leaders to advance structured solutions.

My interest in the DDA is grounded in results. Downtown development tools — particularly Tax Increment Financing and corridor revitalization strategies — are powerful mechanisms for shaping long-term economic outcomes. I am committed to ensuring that investment in East Colfax strengthens small businesses, increases property values responsibly, supports mixed-income housing, enhances public safety infrastructure, and creates measurable return on investment for residents.

I bring experience in strategic planning, coalition building, economic modeling, community-centered policy design, and stakeholder engagement. I approach development with discipline, accountability, and a focus on long-term community stability rather than short-term gains.

Aurora deserves growth that builds wealth locally, strengthens the tax base, and protects the people who have sustained the corridor through challenging years. I would be honored to contribute to that work as a DDA board member.

Thank you for your consideration. I welcome the opportunity to further discuss how I can support the Authority's mission.

Respectfully,

Sean Moore

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

9 months

How are you involved in your community?:

I am deeply involved in the Aurora community through my leadership in culinary arts, healing-centered events, youth programming, and small business development. As the Director of Culinary & Healing Events at La Victoria Healing Kitchen, I design and execute community-centered food experiences that bring people together across culture, age, and background. My work focuses on using food as a bridge for healing, education, and connection. I oversee culinary programming, manage kitchen operations, and curate events that support local artists, entrepreneurs, and wellness practitioners. Through La Victoria Healing Kitchen, I: Develop and lead community cooking workshops and youth culinary programs Partner with local schools and organizations to provide hands-on food education Host culturally reflective dinners and healing-centered gatherings Support small food entrepreneurs by creating accessible kitchen space and mentorship opportunities Curate events that activate downtown Aurora through food, culture, and storytelling In addition to my work at La Victoria Healing Kitchen, I am the founder and owner of Chef Bella B LLC, where I specialize in curated private dining experiences, community dinners, and culinary education. My business supports local sourcing, artistic collaboration, and economic circulation within Aurora and the greater Denver metro area. I am also actively involved in: Community brunches and cultural celebrations Youth empowerment programming through culinary arts Collaborative events that highlight Aurora's diversity and creative talent Supporting emerging chefs and entrepreneurs in navigating food business operations My work centers around creating safe, inspiring, and empowering spaces where people feel seen, valued, and connected.

List your interests and activities.:
Professional & Community Interests Culinary arts and food-based storytelling Healing-centered hospitality experiences Youth culinary education and mentorship Downtown activation through cultural dining events Small business development and entrepreneurship Community building through food and art Supporting minority-owned and women-owned businesses Creating sustainable, recurring food-based programming in Aurora Activities Designing and leading cooking classes and culinary workshops Curating themed community dinners and cultural events Mentoring youth and aspiring culinary professionals Event planning and operational leadership Collaborating with local artists, entrepreneurs, and wellness practitioners Developing long-term culinary programming that supports economic growth in Aurora

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

None

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora Downtown Development Authority Board because I am deeply invested in the long-term cultural and economic vitality of Aurora — not just as a business owner, but as a community builder. Through my work as Director of Culinary & Healing Events at La Victoria Healing Kitchen and as the founder of Chef Bella B LLC, I have seen firsthand how food, culture, and intentional gathering can activate spaces, strengthen local economies, and create belonging. Downtown Aurora has incredible potential, and I want to contribute to shaping its continued growth in a way that is sustainable, inclusive, and reflective of the community it serves. I believe economic development is most powerful when it is rooted in culture and community. My goal in serving on the board would be to help: Strengthen support systems for small and emerging businesses Increase activation through culturally rich events and programming Support minority-owned and women-owned entrepreneurs Encourage creative use of downtown spaces Build partnerships that circulate dollars locally and keep growth community-centered I also bring operational experience. I manage culinary programming, oversee event logistics, and work within budgets and strategic planning structures. I understand both the creative and structural sides of development — vision and execution. Serving on the Aurora DDA Board would allow me to contribute not only ideas, but hands-on experience in building spaces where people gather, invest, and grow together. I want to help shape a downtown that is economically strong, culturally vibrant, and welcoming to the diverse communities that call Aurora home. Aurora is not just where I work — it is where I am building legacy.

Describe your vision for the future of East Colfax.:

My vision for the future of East Colfax is a corridor that fully embraces its identity as a culturally rich, economically vibrant, and community-centered destination. East Colfax already carries deep history, diversity, and artistic energy. I envision it continuing to evolve into a thriving hub where small businesses, artists, restaurateurs, and entrepreneurs are not only welcomed — but intentionally supported. A place where development does not erase culture, but elevates and preserves it. I would love to see Downtown Aurora and the Aurora Arts District continue to expand as immersive cultural destinations. That means: Regular community-driven events that activate streets and storefronts More opportunities for local chefs, artists, and makers to showcase their work Outdoor dining, art walks, live music, and seasonal markets Strong support systems for minority-owned and women-owned businesses Creative use of underutilized spaces for pop-ups, exhibitions, and culinary experiences As someone who curates culinary and healing-centered events, I have seen how powerful shared experiences can be in transforming perception and increasing foot traffic. Food, art, and storytelling are tools for economic growth when done intentionally. My vision includes a future where East Colfax is known not just as a pass-through corridor, but as a destination — one that feels safe, alive, and deeply reflective of Aurora’s diversity. I want to see: Increased collaboration between developers and local business owners Programming that invites families, young professionals, and long-time residents to engage together Sustainable growth that allows legacy businesses to remain while welcoming new innovation Downtown Aurora and the Aurora Arts District have the potential to be models for inclusive urban revitalization — spaces where culture leads development rather than follows it. I want East Colfax to be a place where people gather intentionally, invest locally, celebrate culture, and feel proud to say they are part of Aurora.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a unique blend of entrepreneurial experience, operational leadership, cultural programming expertise, and community-centered perspective. As the Director of Culinary & Healing Events at La Victoria Healing Kitchen, I oversee culinary programming, event execution, vendor coordination, budgeting, and strategic activation of space. I understand how to take an underutilized space and transform it into a destination through intentional programming. I work daily at the intersection of logistics and creativity — vision and execution. As the owner of Chef Bella B LLC, I bring firsthand experience as a small business operator. I understand: Cash flow realities Marketing and brand positioning Client acquisition and retention Vendor and supplier relationships The challenges minority-owned and women-owned businesses face in scaling This dual perspective — operator and community programmer — allows me to think both strategically and practically about downtown development. I also bring: Economic Activation Experience I curate events that increase foot traffic, support local vendors, and circulate dollars within the community. I understand how cultural experiences drive economic impact. Community-Centered Leadership My work centers on inclusion, collaboration, and creating spaces where diverse communities feel seen and welcomed. Aurora is one of the most diverse cities in Colorado, and I approach development through that lens. Youth & Workforce Development Insight Through culinary education programs and workshops, I support young people and aspiring entrepreneurs in building skills and confidence. Sustainable development includes preparing the next generation. Creative Problem-Solving & Adaptability As an entrepreneur, I have learned how to pivot, problem-solve, and operate efficiently with limited resources — skills that are critical in economic development conversations. Cultural Intelligence & Arts Integration I actively collaborate with artists, wellness practitioners, and local creators, particularly within the Aurora Arts District. I understand how art, food, and culture strengthen a district's identity and longevity. Finally, I bring the perspective of someone who is actively building in Aurora — not from the outside, but from within. I am invested long-term in seeing Downtown Aurora and East Colfax thrive in ways that are sustainable, inclusive, and economically strong. I believe development should feel human, not transactional — and that balance is the lens I would bring to the Aurora DDA.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Throughout my career, I have consistently worked in collaborative, multi-stakeholder environments where balancing different perspectives is essential. As Director of Culinary & Healing Events at La Victoria Healing Kitchen, I regularly coordinate with chefs, wellness practitioners, artists, vendors, staff, and community partners. Each individual brings their own priorities, creative vision, and operational concerns. My role requires me to listen actively, identify shared goals, and align everyone toward a cohesive outcome. In group settings, I focus on three core principles: 1. Active Listening & Clarification Before responding, I seek to understand the root concern or intention behind someone's viewpoint. Often conflict stems from misalignment in expectations rather than true disagreement. I ask clarifying questions and restate what I'm hearing to ensure accuracy. 2. Shared Vision Alignment When perspectives differ, I redirect the conversation back to the shared goal — whether that is community impact, financial sustainability, or event success. Anchoring discussions in purpose helps reduce ego-driven tension. 3. Solution-Oriented Communication Rather than focusing on what isn't working, I encourage collaborative problem-solving. I present options, invite input, and aim for outcomes that respect both creative vision and operational feasibility. As a small business owner, I also navigate vendor negotiations, client expectations, and partnership agreements. These experiences have strengthened my ability to remain calm, professional, and emotionally regulated — even under pressure. Additionally, working within diverse communities has required cultural awareness and sensitivity. Aurora is one of the most diverse cities in Colorado, and I approach group dynamics with respect for differing backgrounds, experiences, and communication styles. I believe effective conflict resolution is not about "winning" a point of view, but about creating understanding and forward movement. I am comfortable engaging in difficult conversations when necessary, and I prioritize transparency, accountability, and mutual respect in all collaborative environments. These skills allow me to contribute productively in board settings where thoughtful discussion and balanced decision-making are critical.

Dear Members of the City of Aurora and Selection Committee,

I am writing to express my sincere interest in serving on the Aurora Downtown Development Authority Board. Aurora is not simply where I work; it is where I am building my legacy, raising my son, growing my businesses, and investing my heart.

Through my roles as Director of Culinary & Healing Events at La Victoria Healing Kitchen and as the owner of Chef Bella B LLC, I have had the privilege of witnessing the transformative power of intentional community spaces firsthand. I have seen how food, art, culture, and shared experiences can change the energy of a room and even a neighborhood. I believe deeply that downtown Aurora and East Colfax hold extraordinary potential to become models of inclusive, culturally rich, and economically vibrant development.

My desire to serve on this board comes from a place of responsibility and vision. I am committed to ensuring that growth in Aurora is not just about buildings and infrastructure, but about people, long-standing residents, emerging entrepreneurs, artists, families, and small business owners who bring life to our streets. Development should honor the diversity that makes Aurora unique, while creating sustainable economic opportunity for those who live and work here.

I want to help cultivate a downtown where:

- Small businesses feel supported and seen
- Cultural experiences are frequent and celebrated
- The Aurora Arts District continues to thrive as a creative anchor
- Families feel safe and excited to gather
- Entrepreneurs of all backgrounds have pathways to success

As someone actively building within the community, I bring both operational experience and lived understanding. I know the realities small business owners face. I understand the importance of foot traffic, programming, collaboration, and long-term sustainability. I also understand the power of listening and of ensuring that development reflects the voices of those most impacted by it.

Aurora is evolving. I want to be part of shaping that evolution thoughtfully, inclusively, and strategically. Serving on this board would allow me to contribute not just ideas, but action grounded in real community engagement and a deep commitment to our city's future.

Thank you for considering my application and for the work you do to steward Aurora's growth. I would be honored to serve and to help build a downtown that reflects the strength, creativity, and resilience of our community.

With gratitude and commitment,

Rebecca Morgan
Chef Bella B LLC
Director of Culinary & Healing Events
La Victoria Healing Kitchen

February 28,2026

RE: Letter or Recommendation/ Representation, Downtown Development Authority Review Committee

To the Selection Committee,

I am pleased to offer my strong recommendation for Rebecca Morgan as the representative of La Victoria Healing Kitchen (LvHK) to the Aurora Downtown Development Authority for Northwest Aurora.

Rebecca brings a rare combination of operational excellence, community-centered thinking, and steady leadership that aligns deeply with both the mission of LvHK and the evolving vision for Northwest Aurora. Through her work with La Victoria Healing Kitchen, she has demonstrated a clear commitment to fostering inclusive economic opportunity, supporting emerging food entrepreneurs, and creating spaces where culture, creativity, and community can thrive.

What sets Rebecca apart is her ability to balance vision with execution. She understands that meaningful development is not just about growth, but about who benefits from that growth and how it is sustained over time. She approaches challenges with thoughtfulness, listens actively to diverse stakeholders, and consistently translates ideas into actionable, grounded outcomes. This is particularly important in a district like Northwest Aurora, where thoughtful stewardship, cultural awareness, and long-term relationship-building are critical.

Rebecca is also a highly effective collaborator. She builds trust quickly, communicates clearly, and works across sectors with ease, community members, or institutional partners. Her presence ensures that LvHK's values, equity, access, and community-rooted development, are not only represented, but actively advanced in decision-making spaces.

As LvHK continues to serve as an anchor for the artistic expression of the culinary and healing arts in the Aurora Arts and Cultural District, Rebecca is exceptionally well-positioned to represent both the organization and the broader community it supports. I am confident that she will contribute meaningfully to the DDA's efforts, bringing both strategic insight and a grounded understanding of on-the-ground realities.

I strongly support Rebecca Morgan's appointment and believe she will be an asset to the Aurora DDA and the Northwest Aurora community.

Please feel free to reach out if you have any questions.

Sincerely,

Katie Goldman, Owner
La Victoria Healing Kitchen

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

2 Years

How are you involved in your community?:
My community involvement has been heavily rooted in culinary world in Denver and recently Aurora. Although my business has only been in the area for a short time (1 year and 10months) my involvement in the community has been through bringing business into a once quiet, underused, and overlooked area. Since Dan Da's opening the space is now more visible and visited frequently from guests all diners all over the state, not just resident diners. My accolades received from my dedication to my work as a chef has been a huge part of attracting increased foot traffic into the area. I have created a space people from all walks of life can feel safe and comfortable to commute to enjoy the area, stimulating the economy of East Colfax enhancing its perception.

List your interests and activities.:
Cooking Graphic Design Family Time Writing Social Media Design & Editing, Marketing

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

NA

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I am interested to serve on the DDA Board because I care deeply about its growth and sustaining its future long term. Even though, I have only been at this location for a short amount of time, this community has been incredibly welcoming and supportive in every way possible. It has made an impact on me and now I want to contribute in the ways I am capable and know best. The resources and collaboration of neighbors who genuinely care about the well being of your business is such a breath of fresh air from what I experienced before. It would be an honor to contribute to that same support system to help the existing diverse community within the district grow and thrive. Through my restaurant experience and platform within Colorado's Culinary community, I hope to offer my perspective of being a small business who understands daily operational realities, economic activation, and the importance of cultural stewardship to help existing businesses in the corridor to sustain, succeed and thrive. As a first-generation minority business owner, I understand both the opportunities and the barriers that these mom and pop business can face when simply surviving and establishing themselves. New or old, I want to help businesses by sharing my story and my experiences. I would also welcome the challenge of helping attract and support new businesses in the neighborhood. I truly believe this corridor has a bright future head and would be honored to contribute in anyway I can in strengthening its growth through collaboration.

Describe your vision for the future of East Colfax.:

I envision a corridor that supports creativity and encourages entrepreneurs. A corridor with vibrant weekends, well lit, clean, and safe for all ages any given time of day to frequent and explore all the diverse old and new businesses. Markets and fun pop up events year round. I see a vibrant weekend night life enjoying the arts visually, performative, or culinary. As one the business owner already contributing to the current evening activity, my vision is to see what's happening now even bigger and sustainable. A desination spot for locals and non locals.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring the perspective of a hands-on leader who works in a fast-paced in high-pressure environment every day. Leading a kitchen requires teamwork, clear communication, quick problem solving and strong attention to detail, skills I feel could apply to being on a board. As a small business owner, I manage budgets, negotiate with vendors, lead my staff, and make quick strategic decisions that impact the success of a business or service. I am an attentive listener who takes the time to research and fully understand topics I am not familiar with. I believe growth is ongoing. I approach every role with the willingness and eagerness to learn I make an effort to always see different perspectives and understand the concerns of the parties involved. My natural instinct is to look for solutions that allow both sides to move forward successfully. I believe growth is ongoing therefore, I approach every role I am in with willingness and eagerness to learn.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I work in the hospitality industry. I would like to think I get along with many and I enjoy hearing different POV for the greater good. In addition, I lead a team with several different personalities. I'm good at pinpointing each individual's strengths/weakness and designating a task they will excel and succeed in. I make an effort to always see different perspectives and understand the concerns of the parties involved. My natural instinct is to look for solutions that allow both sides to move forward successfully. I am good at learning the individual personalties and navigating them through time and able to step up or step back as necessary for a solution to be fulfilled.

Aurora Downtown Development Authority Board
c/o Selection Committee
City of Aurora
Aurora, CO

Dear Members of the Selection Committee,

I am writing to formally express my interest in serving on the Aurora Downtown Development Authority Board. As a first-generation minority business owner operating in Ward 1 along the East Colfax corridor, I believe this area has the potential to become a vibrant cultural and economic hub that cultivates diversity, supports the arts, and empowers both established and emerging entrepreneurs.

I hope to see this district prosper through increased foot traffic and an environment that feels safe, clean, welcoming, and community-driven. This vision extends beyond my own business and focuses on collective growth. I want to help foster a district where businesses thrive together and where people from all walks of life feel drawn to gather, making it a true destination for residents and visitors alike.

I grew up and previously operated a business in a culturally strong, minority-owned district that was vibrant but often driven by individual survival. As many of those small businesses aged, their legacies ended with retirement because there was no broader structure supporting long-term continuity. In Aurora, I see the opportunity to build something more enduring, a community where businesses not only succeed financially but grow together with intention, collaboration, and cultural pride for generations to come.

Economic activation and community involvement must work hand in hand to shape a thriving corridor. I care deeply about preserving and strengthening the cultural fabric that already exists while attracting new businesses that add to its character and vitality. I am committed to contributing my time, experience, and energy toward thoughtful, sustainable growth and serving Aurora with long-term dedication and care.

Sincerely,

An K. Nguyen

Dear Aurora Downtown Development Authority Board, I am writing to formally express my interest in serving on the Aurora Downtown Development Authority (DDA) Board. As a small business owner operating within Ward 1 and the East Colfax corridor, I have a deeply personal and professional commitment to the long-term vitality of our district. Since opening Bánh & Butter Bakery Café in 2022 under Plated Culture LLC, I have worked to build not only a business, but a community-centered space that contributes to economic activity, neighborhood engagement, and cultural vibrancy. Through my service on the Ward 1 Business Advisory Board and participation in DDA-related discussions, I have seen firsthand how strategic collaboration between business owners and city leadership can create meaningful, lasting impact. My vision for the DDA includes strengthening public-private partnerships, supporting sustainable small business growth, enhancing safety and beautification efforts along East Colfax, and cultivating a district that reflects the diversity and entrepreneurial spirit of Aurora. I believe my experience as an entrepreneur, employer, and community advocate allows me to bring a practical, solutions-oriented perspective to the Board. I am invested not only in the success of my own business, but in the collective prosperity of the entire district. Thank you for your consideration. I would be honored to contribute my time, energy, and leadership to the continued revitalization of Aurora’s downtown corridor. Warmly, Thoa Anh Nguyen

Thoa Anh Nguyen

Professional Summary

Entrepreneur and community-focused small business owner with a strong commitment to revitalizing East Colfax and supporting sustainable economic growth in Aurora. Active member of the Ward 1 Business Advisory Board and advocate for collaborative public-private partnerships that strengthen local business ecosystems.

Professional Experience & Leadership

- Owner & Founder, Bánh & Butter Bakery Café (Est. 2022) – Built and scaled a community-driven bakery café in Aurora's Ward 1 corridor.
- Founder, Plated Culture LLC – Oversee multiple culinary ventures focused on retail, wholesale, and experiential dining.
- Active Member, Ward 1 Business Advisory Board – Participate in business advocacy, development initiatives, and city collaboration efforts.
- Engaged in DDA-related meetings and community discussions to support economic revitalization and long-term district planning.

Community Engagement

- Host and organize community-focused pop-ups and neighborhood events.
- Collaborate with local artists, entrepreneurs, and nonprofit initiatives.
- Advocate for crime reduction, economic vitality, and beautification along East Colfax.

Vision for Aurora DDA

- Strengthen public-private partnerships within the DDA boundary.
- Support small business sustainability and responsible growth.
- Enhance East Colfax as a vibrant, safe, and culturally rich district.

Marcus Bond

Name: Parmar, P.J

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own property within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

since 2014

How are you involved in your community?:
I live and work here in this DDA, and own 2 buildings here (as far as I can tell, I'm one of the largest property owners in this DDA, if not largest, by individual property square footage or total properties). I employ 50 people in this DDA. I have helped start dozens of businesses in this DDA. I've been the only physician in this DDA area for a dozen years, and now the only pharmacy also (we opened our pharmacy before Walgreens left and keep growing). I started a team of medical, dental, and pharmacy providers here, serving this community. While Walmart, Walgreens, Family Dollar and Dollar Tree all sit boarded up on the next block, I have helped 100 small businesses or organizations start in this DDA, about 50 of which are my tenants now. I started and run youth programs here, taking kids from this DDA myself camping, as their Scoutmaster, for the last dozen years (including this weekend!)-- As far as I can tell we are the only Youth program and only Scout Troop in this DDA. Our Mango House restaurants have been ranked highly: a few years ago Yelp ranked our restaurants #3 and #5 out of top 50 in the metro area (no other Aurora restaurant made the top 10).

List your interests and activities.:
1. Dad. 2. Making things happen on East Colfax, from healthcare to small business, to restaurants to community organizing.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or

committee, enter the board name(s), position(s), date(s). :

Medicaid Accountable Care Program Advisory Committee, circa 2012-2014

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

Because your city council members asked me to, so I thought maybe I should, to help this neighborhood where I live and work.

Describe your vision for the future of East Colfax.:

Less crime, working with the police not against them. Less blight but no gentrification. We don't need pushing out of poor or homeless, as happened with Denver's Union station DDA, where their security then starts penalizing those in need. We need to help those less fortunate, not displace them in the name of development.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

Not sure, but you can look up my background if you want, or ask around. See your question above about how I am involved in the community. I've helped start dozens of businesses here (while Walmart and others have gone out of business), I employ 50 people here, I've been the only doctor, and now have the only medical facility (with 5 full time providers) or pharmacy in this area. The only youth program here. For those reasons I know something about community health here. etc.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I bring together previously warring ethnicities under one roof, like Amharic and Tigrinya, Tutsi and Hutu, etc....

Letter of Interest

Hello, My name is Scott Pasternack. I'm with Pasternack's Pawnshop, Aurora Colorado's oldest pawnshop. Our address is [redacted] in the ACAD district.

I would like to put my name into concideration for the Board. I grew up on Colfax, I've been very involved over the years with the City and the downtown business asso. I was a part of Aurora's leadership class of 2009. I could help this board with many years of insight into the downtown area. I work closely with Aaron at the peoples building with the ACAD arts district.

Please place me in concideration

Thank You

Scott Pasternack

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

My wife and I came to East Colfax because we believe in it. When we acquired The Teller Theater at [redacted] and began the work of bringing it back to life, we weren't just making a real estate investment — we were making a bet on this community and its potential. We've made a significant financial and personal investment in this neighborhood, and we want to see it thrive. We've also seen what happens to communities — and to society broadly — when arts and culture are absent or neglected. Neighborhoods without creative anchors lose their identity. People lose shared spaces to gather, to express themselves, and to connect across difference. That erosion doesn't happen overnight, but it compounds — and reversing it is far harder than protecting it in the first place. We know what a community looks like when the arts are allowed to wither, and we're not willing to let that happen on East Colfax. Serving on the DDA board is a natural extension of that commitment. I want to help direct the resources and vision of this authority in a way that reflects the people already on East Colfax — the small business owners, the artists, the longtime residents — while thoughtfully welcoming growth. I bring a property owner's perspective, a genuine personal stake in getting this right, and the conviction that investing in arts and culture is investing in the long-term health of this community.

Describe your vision for the future of East Colfax.:

East Colfax has all the ingredients of a thriving urban corridor — history, diversity, transit access, and a growing arts and culture scene — but it needs intentional investment to unlock that potential. My vision is a Colfax that feels safe, alive, and welcoming at every hour of the day: blocks anchored by locally-owned businesses, community institutions like theaters and galleries that give the neighborhood its identity, and public spaces that bring residents together rather than drive them apart. Arts and culture are not a luxury add-on to economic development — they are the engine. Cities and neighborhoods that invest in creative spaces see real economic returns: increased foot traffic, rising property values, and the kind of organic community energy that no amount of marketing can replicate. The Teller Theater is one small example of that principle in action on East Colfax, and I want to see that multiplied across the corridor. A flourishing nightlife is central to that vision as well. East Colfax has the bones of a great evening destination — and a corridor that is alive at night, with theaters, music venues, restaurants, and bars drawing people out, is a safer and more economically vibrant one. Nightlife isn't frivolous; it's infrastructure. It creates jobs, generates tax revenue, and signals to residents and visitors alike that a neighborhood is worth showing up for. I want East Colfax to be a place people choose to spend their evenings, not just pass through. Safety and neighborhood improvement must go hand in hand with that vision. Vibrant, activated streets — with well-lit storefronts, programming that brings people outside, and businesses that stay open into the evening — are themselves a safety strategy. I want a Colfax where people want to be, and where that desire is self-reinforcing.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring the perspective of a property owner and soon-to-be owner-operator of a business on East Colfax — someone with real skin in the game who has experienced the neighborhood's promise and its challenges firsthand, including dealing with vandalism and the realities of operating on the corridor today. When The Teller Theater opens, my stake in this corridor only deepens — as a business owner whose livelihood will depend on East Colfax being a place people want to come to. Professionally, I am a senior software engineer whose day-to-day work involves making multi-million dollar architectural and systems decisions that affect entire organizations. I design complex systems, analyze large amounts of data to distinguish requirements from nice-to-haves, evaluate competing priorities and tradeoffs, and translate those findings into clear, actionable recommendations. These are exactly the skills needed to evaluate DDA investment proposals, assess program effectiveness, and make sound decisions with public resources — particularly as TIF revenue begins to grow and the board faces increasingly consequential choices about where to direct it. I also spend significant time teaching, mentoring, and helping colleagues move forward — not just solving problems myself, but building the capacity of the people around me. That orientation toward shared success rather than individual credit is something I'd bring directly to this board. Finally, as Treasurer of Shifted Lens Theater Arts, I have direct experience with financial oversight and nonprofit governance, which is directly relevant to overseeing a public authority like the DDA. Collaboration is the core of my professional life. As a senior engineer, I regularly facilitate cross-team alignment — bringing together groups with different priorities, constraints, and perspectives, and focusing them on a shared outcome. I'm experienced at running working sessions, building consensus, identifying where real disagreement exists versus where people are just talking past each other, and driving decisions forward without letting process become a bottleneck. I approach disagreement by leading with curiosity rather than judgment — trying to understand what someone's underlying concern actually is before responding to their stated position. I've found that most conflicts in collaborative settings stem from people not feeling heard, and that creating space for that often resolves more than any specific compromise does. Where genuine disagreement remains, I favor transparent discussion of tradeoffs over forced consensus, and I'm comfortable being in the minority on a vote while still fully supporting the group's direction.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Matthew Rogers

[redacted]

February 28, 2026

Aurora Downtown Development Authority
City of Aurora · [redacted]

Dear Mayor, City Council, and DDA Selection Committee,

My wife and I didn't stumble into East Colfax. We chose it. When we acquired The Teller Theater at 9905 E Colfax Ave and began the work of bringing it back to life, we made a deliberate and significant investment — financially, personally, and in terms of our time in a corridor we believe in deeply. We've gutted the building, navigated the permitting process, and are actively preparing to begin construction. I am writing to express my strong interest in serving on the Aurora Downtown Development Authority board because our investment in this neighborhood won't stop when construction is complete. It's just getting started.

We've also seen what happens to communities — and to society broadly — when arts and culture are absent or neglected. Neighborhoods without creative anchors lose their identity. People lose shared spaces to gather, to express themselves, and to connect across difference. That erosion doesn't happen overnight, but it compounds and reversing it is far harder than protecting it in the first place. We know what a community looks like when the arts are allowed to wither, and we're not willing to let that happen on East Colfax.

My vision for East Colfax is a corridor that is alive day and night. A place anchored by locally owned businesses, community institutions, and a flourishing nightlife that gives residents and visitors alike a reason to show up and stay. A vibrant evening economy isn't a luxury; it's an economic engine and a safety strategy. Activated streets with theaters, music venues, restaurants, and bars draw people out, create jobs, generate tax revenue, and signal to the broader region that East Colfax is a destination worth investing in. The Teller Theater is one small piece of that puzzle, and I want to see it multiplied across the corridor.

As a property owner on East Colfax for the past year, I've also experienced the neighborhood's challenges directly including repeated vandalism. That's not a complaint; it's context. It reinforces for me why safety and activation have to be central to the DDA's work. A corridor that feels neglected invites neglect. One that is clean, lit, alive, and full of people doesn't. The DDA's ability to direct TIF revenue toward programs and improvements that make East Colfax feel cared for is one of the most powerful tools we have, and I want to help wield it wisely.

I bring a complementary set of skills that I believe would make me an effective board member. As a senior software engineer and systems architect at Palantir Technologies — where I have worked for 15 years — I make complex, high-stakes decisions that impact entire organizations: designing systems, analyzing data to separate requirements from nice to haves, building consensus across teams with competing priorities, and driving those decisions to implementation. That analytical rigor and collaborative discipline translates directly to evaluating DDA investments, assessing program tradeoffs, and helping the board make sound decisions with public resources — particularly as TIF revenue grows and the choices become increasingly consequential.

I currently serve as Treasurer of Shifted Lens Theatre Arts, where I am involved in financial oversight and organizational governance. I am comfortable with fiduciary responsibility and take it seriously.

Most importantly, my wife and I have put our money, our time, and our energy into this neighborhood because we believe East Colfax can be something special. Serving on this board is how I want to make good on that belief — not

just as a property owner protecting an investment, but as a community member committed to a Colfax that works for everyone on it.

I would be honored to be considered.

Sincerely,

Matthew Rogers

Owner, The Teller Theater LLC

Name: Stafford, Debbie

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I am an employee, manager, or agent of an entity with a place of business within the DDA boundary. (If selecting this qualification, you must upload an Entity Representative Letter naming you as their representative.)

Address within the DDA boundary (if different from address listed previously).:

[redacted].

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

50 Years

How are you involved in your community?:
I am the Legislative and Community Director for Aurora Mental Health & Recovery. I Chair the Aurora Community of Faith (ACOF); I am the Vice-Chair of the Aurora Judicial Performance Commission; I serve on the Chief's Community Response Team; serve on the Board of the Salvation Army, Aurora; serve on the Aurora Chamber of Commerce Government Affairs Committee; and the Aurora Chamber of Commerce Women in Business Executive Committee. I serve on the Adams County Criminal Justice and Behavioral Health Committee through the DA's Office. I donate my auctioneer services to help several community groups, including: The Aurora Chamber of Commerce; The African Chamber of Commerce; Aurora Interfaith Community Services; The Community College of Aurora, Cops Fighting Cancer; and The Salvation Army. I also officiate many funerals in the community and serve as a liaison to help community members gain behavioral healthcare support.

List your interests and activities.:

I enjoy spending time with my grown children, grandchildren, great grandchildren, my cabin in Bailey, and I am a remodeler and builder. I designed and had an addition to my cabin. I have renovated 6 kitchens that I designed and created the blueprints myself. I have planned and designed the remodeling of 9 bathrooms. I designed and had two Tiny Houses built. One of the houses won an award at the Tiny House Festival in Adams County. I have the desire to get my contractors license before I slow down in my life. I have contractor cards through Lowe's, Home Depot and Sherwin Williams. Family and friends frequently consult with me on their remodeling projects.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

I have served on the Arapahoe County Budget Committee and the Arapahoe County Child Support Commission in the past. I also served on the City of Aurora Blue Ribbon Funding Committee. I was also a State Representative serving HD40 from 200-2009.

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I have spent a great deal of time working in the DDA Corridor through Aurora Mental Health & Recovery Programs that operate out of six locations along the Corridor. I see the concerns of many of the residents who rely upon public transportation and local access to needs being met. As I have watched the deterioration of the Colfax Corridor, it is heart-breaking to see that a once thriving business and arts community has deteriorated to such a devastating degree. I agree with the goals of the DDA and believe that new life needs to be created along the Colfax Corridor. I am also concerned that there are considerations and protections for existing residents, along with supporting local business owners who may be renting space and will likely be displaced with renovation and improvement of the DDA Corridor. i believe that I have a steady temperament to be able to work with the various voices, business owners, residents and developers who will be needed to bring new life and advancement along the Colfax Corridor. I believe that this will be a long-haul commitment. I am willing to make myself available for the long run. My employer, Aurora Mental Health & Recovery is also supportive of the commitment of time that the DDA Board would require. I also want to be sure that Aurora Mental Health & Recovery and other community Non-profits are considered in the overall value of the community as development moves forward. I support strengthening the Arts along the DDA Corridor as well as enticing businesses to locate in mixed use construction.

Describe your vision for the future of East Colfax.:

I envision a great deal of new construction of multi-use buildings to include businesses and non-profits. Some would have housing on the higher floors. I believe that some of the existing buildings can be renovated to a modern standard through a mixed-use lens. I also envision the expansion of public , and a safe and accessible community that feels safe, thriving, and is designed to move the community into the future. I see the thoughtfulness of supporting existing homeowners and finding a balance of preservation through a process of building new properties.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I have just walked through the six year process that Aurora Mental Health & Recovery went through to demolish and outdated building and build a new 50,000 sq ft 3 story Crisis Services Building in Aurora. I was responsible to be a liaison with the City of Aurora Building and Planning Departments if there were challenges beyond what our staff thought was reasonable. I was responsible to serve the community notices, facilitate community meetings to hear concerns of neighbors and those in the community who may not agree with our project. I worked with Federal, State, Adams and Arapahoe Counties, and alongside the City of Aurora through the funding process of raising $28 Million dollars for this project. I helped fight several hard battles at the State level to help gain funding for our project. Over the years, I have been involved with other building projects. I am currently working with Rep. Marshall and Sen. Amabile through HB26-1301, to help bring a State Hospital into Aurora. This would be new construction. I have been a part of the team that has given insight into the building costs and challenges. My father was a contractor. I spent a great deal of my life around large building projects and the processes required to get a project done. There is much that I do not know, however, I am a team player and am not afraid to learn, grow, and work.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

My 8 years of serving in the House of Representatives have afforded me a great deal of experience of serving on Committees, Public Hearings, listening to a variety of opinions, dealing with people who disagreed with me or the Policy that I was working on. Prior to that work, I was an Associate Pastor on a church staff with over 10,000 Members, and prior to that, an Associate Pastor on a church staff of 2,000 people, that also went through a large apartment complex project that failed. There was much controversy with people who were hurt in that process. In my over 19 years at Aurora Mental Health & Recovery, I have frequently been sent to address issues and conflicts within the community. I regularly monitor Aurora City Council, Adams and Arapahoe Counties policy committees, and State Legislative Committees. I have a steady temprament. I understand long-term commitment. I am also a therapist and treated offenders of domestic violence part time for 34 years. Our agency just closed last year. I had to work with often very difficult people, in a highly accountable system, which required a great deal of conflict resolution skills. I think it is important to listen to people and try to find a way to hear people's concerns and ideas, and to find a balance in challenging situations. I think that getting to win-win is a good position to work toward.

- Debbie Stafford Resume with BIO 2 27 2026.pdf

Debbie Stafford, MA, CAS

[redacted]

Medical Assistant 1972-1974

Homemaker / Pastor's Wife / Ministry; 1974-1984

Regional Vice President, A. L. Williams (Life Insurance;) 1984-1986

Associate Pastor, Calvary Temple; 1986-1989

Colorado MOVES Counseling Center (part time); 1990-2024

Associate Pastor, Heritage Christian Center; 1990-2000

Colorado House of Representatives, HD 40; 2000-2009

Aurora Mental Health & Recovery; 2005-Present (started part-time while in the Legislature)

Debbie Stafford Brief Bio

Debbie Stafford is the Legislative and Community Director for Aurora Mental Health & Recovery. She began as the Faith Based Coordinator for Aurora Mental Health & Recovery over 19 years ago. She is also the Chair of the Aurora Community of Faith.

Debbie completed her fourth and final term (due to term limits) as a Colorado State Representative serving House District 40 in 2009. Rep. Stafford just retired after working part time as a domestic violence counselor for the past thirty-four years. As an ordained pastor, she has served on the pastoral staffs of two large churches in Denver, CO.

Debbie is a nationally trained Mental Health First Aid Instructor. She is certified to train Adults, First Responders including Fire, EMS, Law Enforcement, Military and Youth Leaders in Mental Health First Aid. She was awarded "Mental Health First Aid Instructor of the Year" in Colorado, after she came along side an Aurora First Responder and CCA instructor, who lost memory after a stroke. She taught with him at the Community College of Aurora for nearly a year until he regained enough memory to teach on his own. As an Auctioneer, Debbie has raised millions of dollars for many of Colorado's Charities.

She co-authored the manual, "Shattered Dreams, a Biblical Outlook on Domestic Violence". She also assisted in the writing of "The Welfare of My Neighbor" through the Rocky Mountain Research Council in Washington, D.C. and has recently co-authored, "A Journey Through Emotional Abuse, From Bondage to Freedom".

Debbie continues her Pastoral care by Officiating funerals for local funeral homes. She was also a political commentator for KPOF Radio for 15 years and is a motivational speaker. She also serves on several Boards and Commissions in her community.

To Whom It May Concern,

As the Chief Executive Officer of Aurora Mental Health and Recovery (AMHR), I hereby authorize Debbie Stafford to act as our representative on the Aurora Downtown Development Authority (DDA) board.

AMHR owns the following properties within the boundaries of the DDA.

[redacted]

Ms. Stafford has the authority to act on our behalf in all manners relating to the DDA, including signing of all documents relating to the DDA. This authorization is valid until further written notice from AMHR, or until the last employment date of Ms. Stafford with AMHR, whichever one is earlier.

Sincerely,

Kelly Phillips-Henry

Kelly Phillips-Henry, Psy.D, MBA
Chief Executive Officer

Aurora Mental Health & Recovery

Inspiring Courage.
Building Hope.

[redacted]

February 26, 2026

To Whom It May Concern:

I am applying to serve on the City of Aurora Downtown Development Authority Board (DDA) as a representative of Aurora Mental Health & Recovery. I have worked for Aurora Mental Health & Recovery for over 19 years. I serve in the role of Legislative and Community Director. I also served 8 years in the Colorado House of Representatives representing HD 40, SE Aurora, all of Eastern Arapahoe County and Elbert County. I am the current Chair of the Aurora Community of Faith and the Vice-Chair of the Aurora Judicial Performance Commission.

I have attended many of the P.U.M.A. DDA meetings in the past year. Aurora Mental Health & Recovery worked with P.U.M.A. hosting meetings at our Cultural Development & Wellness Center (CDWC) on Alton Street, which is one of our six locations along the DDA Corridor. We tried to engage P.U.M.A. with many of the individuals that we serve in the Immigrant and Refugee community. Our experience was that simultaneously, a threatening environment was created by the Federal Government. I believe that this created a sense of not feeling safe to talk to P.U.M.A. by many, about the local community needs.

Aurora Mental Health & Recovery owns 6 properties along the DDA Corridor. We have been in the community for over 50 years. We have 13 active locations throughout the community, serving nearly 20,000 individuals annually, with 863 employees. We recently completed the building of a 50,000 sq ft Crisis and Acute Care Facility, the "Potomac Pavillion", in Aurora. I was the liaison to work with the City of Aurora by bridge building with needs on the permitting process of this new construction, which took 6 years from vision to reality. I also facilitated the community notices and meetings for this project.

The DDA Board will be tasked with creating and implementing a vision that will serve mixed use in the community. I respect that there will be strong beliefs and opinions that must be tempered with information, flexibility and respectful balance between the needs, concerns and fears of the existing community; along with accepting that change is needed to revitalize the DDA Corridor. I believe that I have the temperament to be flexible and open minded through what will be a long and arduous journey to bring new life and a strong future to the DDA Corridor.

I am happy to supply any further requested information.
Thank you.
Debbie Stafford, MA, CAS

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

9 years

How are you involved in your community?:
I began my Colorado career as temporary staff for the Aurora Fox Arts Center in the summer of 2017. I continued working there as a freelance stage manager as my other work schedules allowed. When theaters across the country were shuttered due to the COVID-19 pandemic on Friday, March 13, 2020, I was backstage at the Aurora Fox and had to help guide the cast through the heartbreaking early closure of our production. A few months later, in Summer 2020, I co-founded Colfax Canvas Mural Festival with the goal of celebrating art and community in a safe way. Over the last 6 years, the festival has grown to include markets and food trucks, shifting over to Fletcher Plaza and drawing an estimated 5,000 visitors to the District in one weekend. Colfax Canvas has played a pivotal role in the revitalization of East Colfax, most notably spearheading the initiative to designate the Aurora Cultural Arts District a Colorado Creative Industries state-certified art district in 2021. In 2022, I purchased my first home just North of the DDA boundaries at Montview and Geneva. This was a conscious decision I made to ensure I could be as close as possible to my favorite area in the Denver Metro: The Aurora Cultural Arts District.

List your interests and activities.:
Attending productions at the Aurora Fox, Vintage Theatre, and The People's Building. Organizing neighborhood activities including First Friday Walk Abouts from Cerebral to Society 303 (visiting a minimum of 3 businesses each month). Visiting museums and other CCI designated districts for market research. Crafting is my #1 favorite hobby, and the new makers space at MLK Library is a dream come true! My guilty pleasure is competition reality tv. Maybe Colfax Canvas 2026 includes some "Top Chef" style competition ;-)

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Aurora Pride Board Member, Art In Public Places Committee

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

From my first introduction to the neighborhood in Summer 2017 (I moved to Colorado in February 2017), I was hooked on the Aurora Cultural Arts District. As a former New York City theater maker, it felt the most like Brooklyn (my favorite borough). Gritty, artistic, and the best food in the city. I knew I had to get involved, I just didn't know how. After years of owning and operating Colfax Canvas out of The People's Building basement, and getting to know business owners on East Colfax, I feel it is not only my responsibility, but my calling to be a member of the first Aurora DDA board.

Describe your vision for the future of East Colfax.:

When I'm standing under the Fox neon, I can visualize the bustling hub the area once was and want to bring that back. I picture something similar to the campus model Breck Create has achieved with regular programming, collaborative community events, and creative easy to navigate way-finding. A destination for families and visitors, while keeping the spirit of the arts alive and thriving.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I excel at project management, from creating realistic budgets and workflows, to overseeing the timely execution of all aspects. However, I believe the unique perspective I bring to the Aurora DDA is what I learned as a Broadway National Tour Stage Manager (2013-2019). This era of my life introduced me to arts districts across the United States, Canada, and Korea. I've had first hand experience working with a wide range of arts organizations from the Broadway District in NYC to the Mason Lodge in Butte, Montana. This variety of knowledge makes me the perfect candidate to collaborate with stakeholders and community members of all backgrounds and visions.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

As mentioned previously, my experience running high-level production national tours makes me the ideal candidate for any collaborative position. I've always been the "moderator" in any work or personal setting, being the person people naturally come to when they want to share ideas and opinions. I have made a career out of listening to all viewpoints and making a decision that is best for the whole, while keeping any personal bias out of the equation.

- Distributing daily notes to ensure every performance maintains artistic integrity

Education Wright State University, Bachelors of Fine Arts with emphasis in Stage Management

Related Skills Mac, Windows, Microsoft Office Suite, Google Suite, scheduling, organizing, ability to make quick decisions in high energy environments, excellent problem solving skills

Dear Members of the Aurora Downtown Development Authority Board,

My name is Kristin Sutter, and I serve as the Owner and Director of Operations of the Colfax Canvas Mural Festival. I am writing to formally express my interest in serving on the Aurora Downtown Development Authority Board.

Through my leadership of Colfax Canvas, I have worked at the intersection of economic development, placemaking, public art, and community engagement. What began as a creative initiative has grown into a catalyst for neighborhood activation; bringing artists, property owners, small businesses, sponsors, and residents together to transform the Colfax Corridor. I have overseen operations, budgets, sponsor relations, artist coordination, and strategic partnerships, giving me firsthand experience in collaborative development and public/private coordination.

Downtown Aurora is positioned for intentional growth. Strategic activation of public spaces, thoughtful support of local businesses, and creative programming can help shape a district that is economically resilient, culturally distinct, and community centered. My experience executing large scale events and managing cross sector partnerships would allow me to contribute a practical, solutions oriented perspective to board discussions; particularly in areas of:

- Placemaking and creative district development
- Small business engagement and retention
- Sponsorship development and stakeholder alignment
- Operational logistics for large scale activations
- Brand identity and destination marketing

I strongly believe in the power of arts and culture as economic drivers; not simply beautification tools, but mechanisms for investment, foot traffic, safety perception, and long term district vitality. I am passionate about ensuring that growth in Aurora remains inclusive, strategic, and reflective of the community it serves.

It would be an honor to bring my operational experience and collaborative approach to the DDA Board. I welcome the opportunity to further discuss how I can continue to support Aurora's development and downtown vision.

Thank you for your consideration and for your service to our community.

Sincerely,
Kristin Sutter
Owner & Director of Operations
Colfax Canvas Mural Festival
[redacted]

Dear Members of the Aurora Downtown Development Authority Board,

I am writing in my capacity as Owner and Director of Operations of Colfax Canvas Mural Festival to formally designate myself as the authorized Entity Representative for the organization in matters relating to service on the Aurora Downtown Development Authority Board.

Colfax Canvas Mural Festival is a community centered initiative focused on creating a visual distinction of the Aurora Cultural Arts District. As Owner and Director of Operations, I am responsible for strategic planning, fiscal oversight, partnership development, sponsor relations, and overall organization. I am authorized to speak on behalf of the organization and represent its interests in civic, economic development, and community partnership settings.

If appointed to the Aurora DDA Board, I would serve as the official representative of Colfax Canvas Mural Festival, bringing insight from our work in district activation, public/private collaboration, and community driven programming. My participation would reflect the organization's commitment to strengthening Aurora's economic resilience, supporting local businesses, and enhancing the vibrancy of the Colfax Corridor.

Please feel free to contact me directly should you require any additional documentation or confirmation regarding this designation.

Thank you for your consideration and for your service to our community.

Sincerely,
Kristin Sutter

Letter of Interest

Natasha Sztevanovity
[redacted]

Dear Members of the Downtown Development Authority Board,

I am writing to express my interest in serving on the Downtown Development Authority Board. As a small business owner and active member of our downtown community, I care deeply about the long-term vitality, safety, and sustainability of our district.

As the owner of Society 303, I experience firsthand the realities of operating a brick-and-mortar business. I understand the importance of foot traffic, thoughtful programming, accessible infrastructure, and collaborative marketing efforts. I also understand the challenges- rising costs, evolving consumer behavior, public safety concerns, and the need for cohesive vision and leadership. These lived experiences give me a practical and grounded perspective on what businesses need to not just survive, but thrive.

Beyond my role as a business owner, I am deeply invested in cultivating spaces that bring people together. I believe downtowns succeed when they are intentional, inclusive, and reflective of the people they serve. Strong DDAs balance economic growth with community identity, support independent businesses, encourage responsible development, and create environments where residents and visitors alike feel welcome.

If selected, I would bring thoughtful collaboration, creative problem-solving, and a commitment to long-term planning. I am particularly interested in supporting initiatives that strengthen small business retention, improve pedestrian engagement and safety, and foster programming that makes downtown a destination while preserving its character.

I would be honored to contribute my perspective and energy to the board's work. Thank you for considering my application and for your continued service to our community.

Sincerely,

Natasha Sztevanovity

Resilience Church Board - Secretary American Baptist Churches - Member Church Transformation team - Member JCHutt Ministries - Secretary

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

Contribute directly to the economic and social vitality of the downtown area. Help create a more vibrant, inclusive, and welcoming community. Support local businesses, entrepreneurs, and neighbors. Serve as a voice for residents, business owners, and stakeholders. Participate in shaping long-term vision, policy, and development strategies. Strengthen collaborative between public, private, and nonprofit sectors. Enhance public spaces, walkability, safety, and accessibility. Help create downtown spaces people want to live, work, and visit.

Describe your vision for the future of East Colfax.:

A vibrant, inclusive, and economically resilient downtown that serves as the heart of the community. Downtown should be a place where local businesses thrive, residents feel connected, and visitors are drawn to a unique sense of place rooted in our history and culture. Thus creating a walkable, safe, and welcoming environment with active streets, attractive public spaces, and a mix of uses - retail, housing, arts, dining, and a civic life.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a collaborative, community-centered perspective grounded in an understanding of downtown economic development, place-making, and stakeholder engagement. My strengths include strategic thinking, clear communication, and the ability to balance historic preservation with forward looking growth. I am committed to inclusive, sustainable revitalization that supports local businesses and creates a downtown that works for everyone.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I have extensive experience working in group and committee settings that involve diverse perspectives and competing priorities. I value open dialogue and active listening, and I work to ensure all voices are heard and respected. When differing viewpoints arise, I focus on identifying shared goals and guiding discussions toward practical, consensus-based solutions. I am comfortable navigating conflict by remaining calm, objective, and solutions-oriented. I use constructive conflict-resolution techniques such as clarifying concerns, reframing issues, and encouraging collaboration to move discussions forward. This approach helps build trust, strengthen relationships, and support effective decision-making.

- Resume Mary Rhodes Tellis Resume and Letter of Interest.pdf

February 2, 2026

Dear Members of the Downtown Development Aurora Board:

I am writing to express my strong interest in serving on the Downtown Development Aurora Board, I am deeply committed to the long-term vitality of our community and would welcome the opportunity to contribute my time, skills, and perspective to the board's mission.

I have a genuine passion for community development and revitalization efforts that balance economic growth, cultural identity, and quality of life for residents. Through my professional and volunteer experiences, I have developed strengths in collaboration, strategic thinking, and problem-solving, and I value inclusive processes that bring together residents, businesses, and stakeholders to create meaningful and sustainable change.

I am particularly drawn to the board's work in advancing revitalization initiatives that strengthen local assets, support small businesses, and foster a vibrant, welcoming environment. I believe thoughtful planning, transparency, and community engagement are essential to successful revitalization, and I am eager to support these principles in a hands-on and constructive way.

Serving on the Downtown Development Aurora Board would be both an honor and a responsibility I take seriously. I am prepared to actively participate in meetings, contribute to committee projects, and work collaboratively with fellow board members and partners to advance shared goals.

Thank you for considering my interest. I would welcome the opportunity to discuss how my background and enthusiasm could support the important work of the Downtown Development Board.

Sincerely,

Mary Tellis
Executive Director
Restoration Outreach Programs
[redacted]

Mary R. Tellis

Mary R. Tellis is an ordained minister in the American Baptist Churches and National Baptist USA denominations. Mary is a beacon of leadership, faith, and empowerment. Mary formerly served as the Associate Executive Director at Open Door Ministries, Ministry and Mission Coach at American Baptist Churches of the Rocky Mountains, an educator with Denver Public Schools, and Operations Site Manager at Bayaud Enterprises. Mary serves currently as the Executive Director at Restoration Outreach Programs.

Academically accomplished, Mary holds degrees from Louisiana Tech University, Truth Bible College, and Denver Seminary. These achievements underpin her work as a dynamic preacher and motivational speaker, empowering audiences across the U.S. and internationally. From Africa and Israel to Thailand and France, Mary has shared her passion for leadership and spiritual growth, conducting workshops, facilitating leadership training, and delivering powerful sermons.

Her innovative spirit is evident in her approach to ministry and mentorship. Whether founding Queen to inspire collective empowerment among women or using her platform as a life coach to nurture personal development, Mary consistently identifies unmet needs and creates impactful solutions. Her ability to inspire action in individuals is rooted in her unwavering commitment to the Kingdom.

Mary's contributions have earned accolades in numerous areas, including the Excellence in Community Service Award, Excellence in Leadership Award, and recognition as one of "100 Faces in the Crowd." However, her proudest achievements remain the heartfelt commendations from the youth she has mentored - proof of the lasting impact she has on future generations.

Mary is a devoted wife, mother, and grandmother, balancing her professional accomplishments with her personal life as a testament to her strength and love. Mary Tellis is more than a leader—she is a force for good, inspiring hope, transformation, and unity wherever she goes.

Mary is married to the humble Rev. John L. Tellis Jr., Pastor, at Solomon Temple Missionary Baptist Church in Denver, where she serves as the Associate Pastor of Outreach. They are the parents of three beautiful children and four blessed granddaughters. Mary keeps her passion and purpose to grounded in the Word of God.

"*Let us not become weary in doing good, for at the proper time we will reap a harvest if we do not give up*." Galatians 6:9

Aurora Downtown Development Authority

Applicant Package - Ward I

Aurora Downtown Development Authority - Ward I

Term 01 May 2026 - 30 Jun 2029
Positions Available 11

Number of applicants in this package 1

- Thielst, Christian

The DDA Address Provided Falls Within Boundaries
Adams County
Vetted: 2/18/2026
Marcus Bond

Name: Thielst, Christian

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I live within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

2 years

How are you involved in your community?:
I have not yet had the chance to be very involved with the community, but hope to do more in the future. I do however try to support businesses in the area as best I can.

List your interests and activities.:
I spend most of my time learning about business currently, however when I have time I like to explore in the National Forrest, mostly Pike San Isabelle.

Have you ever served in any other appointed position on a board, commission, or committee?:

No

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

None

I have read and agree to the Board Member responsibilities and expectations.:

Yes

Why do you want to serve on the Aurora DDA board?:

About 2 years ago myself and my wife purchased our current house, and a year after that had our son, and I want to serve on the board to help the area improve, and make the area as friendly to families as possible. I also own a small business, and am very interested in the subject, and would like to help the local businesses in the area adapt to the coming changes, and help them to modernize.

Describe your vision for the future of East Colfax.:

I would like to see the area evolve and become a modern version of what it was back in its prime. I think that using modern urban planning practices the area can become a great walkable area that connects well to the Fitzsimons area, and the Stanley market/ central park areas.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I have alot of experience with leadership and finances/financial management, and I have started 2 local service businesses, one for my previous employer, and one for myself, and am doing everything I can to learn about business that I can, so that I can be an expert on that in the future. I also bring the perspective of being a parent, as I have a son who is just over 1 year old, and is a big part of my families life, and I would like the area to be as friendly to parents as possible.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

Having been in quite a few leadership positions both inside and outside of the military I have worked with a lot of people from different cultures, and with different beliefs, I do my best to make sure that everyone voices their opinions and concerns, and I try to encourage conflict avoidance by creating compromises, and productive discussion.

Christian Thielst, [redacted] |
[redacted]

I am writing to express my interest in serving on the board for the Downtown Development Authority. As a resident with a young family, I would like to help the community take steps to revitalize the area, while keeping the new, and current families that live here in mind. As well as take action to assist small business owners with adapting, and improving their businesses.

Over the past few years I have been learning about leadership, finances and business management from my own career, and now starting my own small business, I think that I will be of great assistance to local business owners, and I look forward to the possibility of helping to steer Aurora towards a great future.

Sincerely,

Christian Thielst

Letter of Interest – Aurora Downtown Development Authority Board

January 28, 2026
Office of the City Clerk
Aurora, CO 80012

Greetings;

I am 
submitting my interest in serving on the Aurora Downtown Development Authority Board, specifically in the Community Development Corporation seat, to help ensure that redevelopment along the Colfax corridor reflects both the intent of the Colfax Vision Plan and the lived realities of the people who call Original Aurora home. My long-standing work in community development, coalition building, and equitable planning positions me to contribute a grounded, community-centered perspective to the Board's decisions.

My vision aligns with the Colfax Vision Plan's goals for a vibrant, connected, and economically strong corridor, but I also recognize critical gaps that must be addressed for redevelopment to be truly equitable. I bring a commitment to integrating education, workforce development, and small-business access to resources critical to sustainable growth —areas where the current plan is too general or underdeveloped. I also elevate the needs of senior citizens and veterans, who represent a significant portion of the community and are uniquely vulnerable to displacement, rising costs, and rapid redevelopment pressures.

As a vested citizen, legacy resident, and long-time advocate for equitable growth in Original Aurora, I am prepared to serve with integrity, transparency, and a deep sense of responsibility to the people most affected by these decisions. I welcome the opportunity to support a redevelopment process that honors history, strengthens community stability, and ensures that long-standing residents and proprietors benefit from the future they helped build.

Respectfully, Gratefully Submitted

Nicholas O. WALKER

Alternate Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

I have worked in Northwest Aurora since 2019 as a consultant, supporting Ward 1 Councilwomen, Murillo, and others. In this role, I have contributed to initiatives focused on strengthening economic development and expanding opportunities within the community.

How are you involved in your community?:
I have actively collaborated with members of the DDA and Ward One to drive economic development initiatives that benefit our community. I provide guidance to organizations on navigating government processes, helping them effectively engage with local departments. In addition, I played a key role in establishing a DDA working group to organize and lead efforts focused on revitalizing Colfax, ensuring these initiatives are structured for long-term success.

List your interests and activities.:
I am deeply interested in serving on the DDA Board and have actively contributed to its initiatives. One way I supported the community was by working with business owners and local leaders to advance the DDA ballot initiative, which successfully passed in the November elections. In addition, I regularly attend community meetings and panel discussions, demonstrating my ongoing commitment to the revitalization and growth of Northwest Aurora.

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

• City of Aurora Planning Commission – Member, 2018 • Aurora City Council – Member, 2019 • Aurora Urban Renewal Authority – Current Member • Metro Water Recovery Board – Director, Current • Eagle Bend Metropolitan District – Director, 2017

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

I want to serve on the Aurora DDA Board because my experience on previous boards and commissions equips me to contribute effectively from day one. I bring a strong understanding of how meetings are conducted, including the use of rules of order, and I am committed to applying this knowledge to support the board's work in revitalizing and strengthening our community.

Describe your vision for the future of East Colfax.:

My vision for East Colfax aligns with the Colfax Community Vision and Action Plan. As a member of the Downtown Development Authority working group, I collaborated with representatives from PUMA Progressive Urban Management Associates to help shape the plan. I also attended community meetings, where I had the opportunity to listen to residents' concerns and suggestions, ensuring that the community's voice an information was heard. By attending community meetings, I have listened to residents' concerns and ideas, ensuring that East Colfax evolves into a lively, creative hub where arts, culture, and local voices come together making the street a destination for connection, celebration, and innovation.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

I bring a strong foundation of knowledge and experience as a City of Aurora Planning Commissioner. In this role, I have worked extensively on planning initiatives and development projects that support both the current needs and the long-term growth of the City of Aurora. This experience has given me a deep understanding of responsible growth, strategic development, and sustainable planning practices. In addition, I have traveled to other states to study revitalized and thriving communities firsthand. Observing successful redevelopment efforts in other cities has provided me with valuable insight into practical implementation strategies, sustainable development models, and economic revitalization techniques. These experiences allow me to bring both a strategic perspective and real-world examples of what works to the Aurora DDA

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

I have extensive experience working in group settings and balancing diverse viewpoints through my roles as a Planning Commissioner, City Council member, and Commissioner on the Aurora Urban Renewal Authority. In each of these positions, I collaborated with fellow board members, staff, and community stakeholders to make decisions that reflect a range of perspectives. As a member of the Eagle Bend Metro District Board of Directors, I regularly apply conflict resolution techniques to navigate differing opinions and ensure productive, respectful discussions during every meeting.

- Johnny's Bio changed.pdf

I am Johnny Watson, past member of Aurora City Council as an At Large member.

Due to corporate transfers with a fortune 100 company for many years, I had the distinct opportunity to be a part of planning commissions and city governance, in numerous cities across the U.S., gaining a bird's eye view on the needs of communities and cities.

I am the Past president and owner of a Montessori School and therefor education is a priority for me.

I am a decorated combat veteran and served 14 years in the US Army.

I have been married for over 50 years to my lovely wife.

I have three adult children, each of whom attended Aurora schools. It is beautiful to see how Aurora schools have impacted their lives and help to create the success that they are today. I am also a grandparent.

In total I have been a residence of Aurora for over 18 years. My wife and I had an opportunity to retire in any state in the US or abroad and chose to come back to Aurora to retire because we love this great city and all it has to offer.

Municipality of Anchorage

As a Planning Commissioner for the Municipality of Anchorage, I worked with others to allow Commissioners to review and approve the project for the Sullivan Arena. That facility was the largest Multi-Use Center in the state at the time of approval.

Also, as a Commissioner, my colleagues and I changed the ordinance on allowing overhead power lines to all new and some exiting power lines must be placed underground. I also worked on the ordinance on developing subdivisions in Avalanche areas.

As a planning Commissioner I reviewed the Comprehensive Plan for approval and implementation. During my time on the commission, Anchorage also won the award for being an All-American City. I received an award from Mayor Tony Knowles for my work helping Anchorage to achieve this recognition.

Beaverton

During my time serving on the Planning Commission for Beaverton, Oregon the Light Rail Project for trains moving passengers from Portland to Beaverton was in the

planning stages. A stringent review of corridors and Right of Ways for the rail lines access to Beaverton.

While on the Planning Commission we reviewed zoning changes and decided on growth areas that are not yet defined. Beaverton had several major corporations who were in the process of expanding. Nike wanted to move from small warehouses city wide to develop Corporate Headquarters.

Beaverton's growth required a review of residential zoning codes to allow for Multi Family and the use of PUD development.

City of Aurora

Served on City of Aurora Planning Commission during the review and passing of the Aurora Places Comprehensive Plan process. The plan is reviewed every 7 to 10 years. The review is done to determine where development is occurring and where development should happen.

The Changes in the land available for development in Aurora is due to annexations and many other factors. The cost of housing and the availability of more affordable housing in Aurora have put development on the fast track in the city. Residential and Business filings for construction and development have put pressure on Planning Commissioners to spend more time reviewing and visiting sites slated for approval.

We worked with staff and developers to ensure a timely review process and quick response to meeting deadlines. City of Aurora Planning Commissioners are a trained and dedicated group of Citizens.

Serving as a Commissioner on Aurora Urban Renewal Authority. The Commission is responsible for redevelopment and Urban Renewal activities. Urban renewal areas may have a variety of projects which are cultivated, negotiated, implemented and monitored through various agreements.

Eagle Bend Metropolitan District

Served as a Director of the Eagle Bend Metropolitan District. While serving as a director, we managed finances and projects that the Metropolitan District chose to sponsor. I voted to provide funds to the three HOA's in the Eagle Bend Metropolitan District. The project included fence painting and repair, landscape and flower replacement.

The district also maintained 2 deep water wells used to water the Heritage Eagle Bend Golf Course. The maintenance and up-keep of the wells is a priority. As a director making decisions to keep the businesses and homeowners aware of the efforts to maintain property values is key to the success of the district.

The Eagle Bend Metropolitan District supported Heritage Eagle Bend in placing a Traffic Light at the entrance to the community. Working with the Ward Council Women to secure funding from the city and the Metro District, that project was a success.

Servicing and Giving Back

As a combat Army Veteran, I understand the needs of our veterans. I support more affordable housing for veterans. I support more assistance for veterans developing businesses in the city of Aurora.

As president of Creekside Eagle Bend HOA, I ensured that the community operated within budget requirements and ensured that policies and requirements were followed by the board as well as residents. Maintaining property values of this HOA is very important to me.

As an officer in the Civil Air Patrol, I will continue to support its mission and know the importance of recruiting and training our youth and young adults for this program. Advanced technology in air and space travel is enviable. The Civil Air Patrol and educational programs are charting the path. This technology will create higher paying jobs which in turn will be a benefit for our city and its residents.

Applicant Package - Ward I

Aurora Downtown Development Authority - Ward I

Term 01 May 2026 - 30 Jun 2029
Positions Available 11

Number of applicants in this package 1

- Williams, Johnnie

Received: 2/28/2026
Non Resident and Registered Voter
The Address Provided Falls Within DDA Boundaries
Vetted: 3/2/2026

Marcus Bond

Name: Williams, Johnnie

Address: [redacted]

Email: [redacted]

Board Name: Aurora Downtown Development Authority

Date of Birth:
[redacted]

Preferred Phone Number:

[redacted]

Which of the following apply to you? (Use the Aurora Downtown Development Authority Map to determine.):

I own a business within the DDA boundary.

Address within the DDA boundary (if different from address listed previously).:

[redacted]

How long have you lived, worked, owned a business, or owned property in Northwest Aurora?:

20+ years

How are you involved in your community?:
I am the Executive Director of a nonprofit organization - Denver Youth Program | GRASP (Gang Rescue and Support Project)- that has worked in Aurora for decades, providing violence intervention and prevention in the community and in regional hospitals. We have recently purchased a building on East Colfax to expand services within that physical location and to better orchestrate a collaborative provision of services across sectors in Aurora.

List your interests and activities.:
Violence prevention/intervention, social enterprise, prosocial positive activities, workforce development

Have you ever served in any other appointed position on a board, commission, or committee?:

Yes

If you have served in any other appointed position on a board, commission, or committee, enter the board name(s), position(s), date(s). :

Board, Health Alliance for Violence Intervention 2024-present Community Board, Firearm Injury Prevention Initiative, University of Colorado, 2023-present

I have read and agree to the Board Member responsibilities and expectations**.:**

Yes

Why do you want to serve on the Aurora DDA board?:

As a longtime community member in the metro area, nonprofit executive director, and recent property owner in the East Colfax corridor, I am deeply invested in the future of this community. My organization recently purchased a building in this area to expand services to youth and families, which represents both a financial commitment and a long-term promise to the neighborhood. Serving on the Aurora Downtown Development Authority (DDA) board would allow me to align that commitment with broader economic development strategies that strengthen the corridor for businesses, residents, and community-based organizations alike. I want to ensure that redevelopment and revitalization efforts reflect the lived experiences of the people who call East Colfax home. This corridor is vibrant, culturally rich, and entrepreneurial. At the same time, it faces challenges related to safety, affordability, and equitable investment. As someone who works daily with families navigating these realities, I believe I can contribute grounded insight to DDA decisions so that growth benefits existing residents and small businesses rather than displacing them. Serving on the DDA board is an opportunity to help shape inclusive development—development that honors legacy businesses, supports new entrepreneurs, improves infrastructure, and builds long-term community wealth.

Describe your vision for the future of East Colfax.:

My vision for East Colfax is a corridor that is safe, economically vibrant, culturally celebrated, and inclusive of the people who built it. I see a district where small businesses thrive alongside new investment, where storefronts are activated with local entrepreneurs, and where public spaces invite families, youth, and seniors to gather. East Colfax has always been a place of resilience and diversity. I envision a future where that identity is preserved and elevated—not erased. That means supporting minority- and immigrant-owned businesses, prioritizing pedestrian-friendly infrastructure, enhancing lighting and streetscapes, and strengthening partnerships between property owners, nonprofits, and public agencies. As a building owner in the corridor, I also think about long-term sustainability. We need strategic investment that increases property values responsibly while protecting affordability and access. The future of East Colfax should include workforce development pathways for local youth, opportunities for community-serving organizations to remain rooted, and public-private partnerships that reinvest in the neighborhood's social fabric. Ultimately, I see East Colfax becoming a model of equitable revitalization—where growth and community stability move forward together.

What knowledge, skills, expertise, and perspective do you bring to the Aurora DDA?:

As the executive director of a local nonprofit serving youth and families, I bring experience in organizational leadership, budget oversight, strategic planning, and community engagement. I manage public and private funding, collaborate with government partners, and oversee long-term facility planning—including the recent acquisition of a property in the DDA area. This gives me firsthand understanding of development processes, financing considerations, and the operational realities of maintaining a building within a commercial corridor. I also bring the perspective of a man of color who has invested in this community for many years. I understand the importance of representation in decision-making spaces and the need to consider how policies impact historically underserved populations. My work places me in direct relationship with residents, small business owners, and families whose voices are not always present in development conversations. In addition, I bring relationship-building skills and a solutions-oriented mindset. My role requires balancing mission, fiscal responsibility, and stakeholder expectations. I approach development with both optimism and practicality—focused on measurable outcomes, long-term sustainability, and community benefit.

As a DDA board member, you will collaborate with fellow board members and many different community stakeholders. Describe your experiences working in group settings, balancing different viewpoints, and using conflict resolution techniques.:

As a nonprofit executive director, collaboration is central to my work. I regularly work with boards of directors, government agencies, funders, neighborhood groups, and community partners who may have differing priorities. In those settings, my approach is to listen first—seeking to understand underlying interests rather than reacting to surface-level disagreements. I have facilitated strategic planning sessions, community meetings, and partnership negotiations where viewpoints varied widely. In those situations, I focus on identifying shared goals, clarifying areas of alignment, and reframing conflict as an opportunity for stronger solutions. I rely on clear communication, transparency, and data to guide discussions while remaining attentive to community voice and lived experience. When disagreements arise, I prioritize respect and relationship preservation. I believe in addressing concerns directly, asking clarifying questions, and finding compromise when possible without compromising core values. My leadership style is collaborative but decisive; once input has been gathered and options weighed, I am comfortable helping a group move toward action. Serving on the DDA board would continue that pattern of thoughtful collaboration. I am prepared to engage constructively, represent community perspectives, and work with fellow board members to advance a shared vision for East Colfax's future.

February 20, 2026

Office of the Mayor
City of Aurora
15151 E. Alameda Parkway
Aurora, CO 80012

Dear Mayor Coffman and Members of the DDA Nomination Committee:

I am writing to express my interest in serving on the Board of the **Aurora Downtown Development Authority (DDA)** and to offer my commitment to supporting equitable revitalization along the East Colfax corridor. I am honored to be considered for appointment and respectfully submit this letter of interest.

As the Executive Director of **Denver Youth Program**, I have dedicated my professional life to advancing violence intervention and prevention through addressing and contributing positively to community wellbeing through youth engagement, culturally grounded programming, and systems-level collaboration that creates opportunities for historically marginalized populations. My work has centered on building bridges among residents, civic partners, service providers, and local institutions to expand access, strengthen community voice, and ensure inclusive outcomes.

I am inspired by the vision for the Aurora DDA to steward economic development, neighborhood improvements, and long-term investment in downtown Aurora. The DDA's role in implementing the *Colfax Community Vision & Action Plan,* through its origin in public input and shared goals for public safety, housing stability, small business support, public space enhancements, and arts and culture, resonates deeply with my own values and experience.

Throughout my leadership career, I have:

- Guided strategic program growth that prioritizes commnity leadership and community-centered decision making.
- Built partnerships across nonprofit, public, and private sectors to design and implement community-driven solutions.
- Managed organizational operations with accountability, fiscal stewardship, and a focus on measurable impact.
- Engaged directly with local stakeholders — including youth, families, educators, service providers, and funders — to elevate community priorities.

I bring both practical management experience and a commitment to equitable development that aligns with the DDA's responsibilities, including thoughtful stewardship of resources, community engagement, and fostering relationships that strengthen downtown neighborhoods. I am prepared to dedicate the

time and attention necessary to attend meetings, serve on committees, participate in board governance, and help move forward the shared goals of revitalization and inclusion that residents have articulated.

I am particularly invested in ensuring that economic development work benefits all residents, including families and youth who have historically been underrepresented in planning and investment discussions. My perspective would contribute to a diverse and collaborative board that reflects the multifaceted needs of the Aurora community.

Thank you for your consideration. I would be honored to serve as a member of the Aurora Downtown Development Authority Board and support the long-term vitality and prosperity of the Colfax corridor and surrounding neighborhoods.

Respectfully,

Johnnie Williams
Executive Director
Denver Youth Program

Aurora Downtown Development Authority
Inaugural Board Appointments

City Council Study Session
June 8, 2026
Sponsors: Mayor Coffman and Mayor Pro Tem Coombs

Downtown Development Authority (DDA)

- Governed by state statute
- Includes commercial and residential property
- Owners, residents, and tenants within district vote to create
- Led by appointed board of 5 to 11 members (mayor appoints, council confirms)
- Mainly funded by Tax Increment Financing (TIF) which allows district to keep future increases in sales/property taxes

Aurora Downtown Development Authority (DDA)

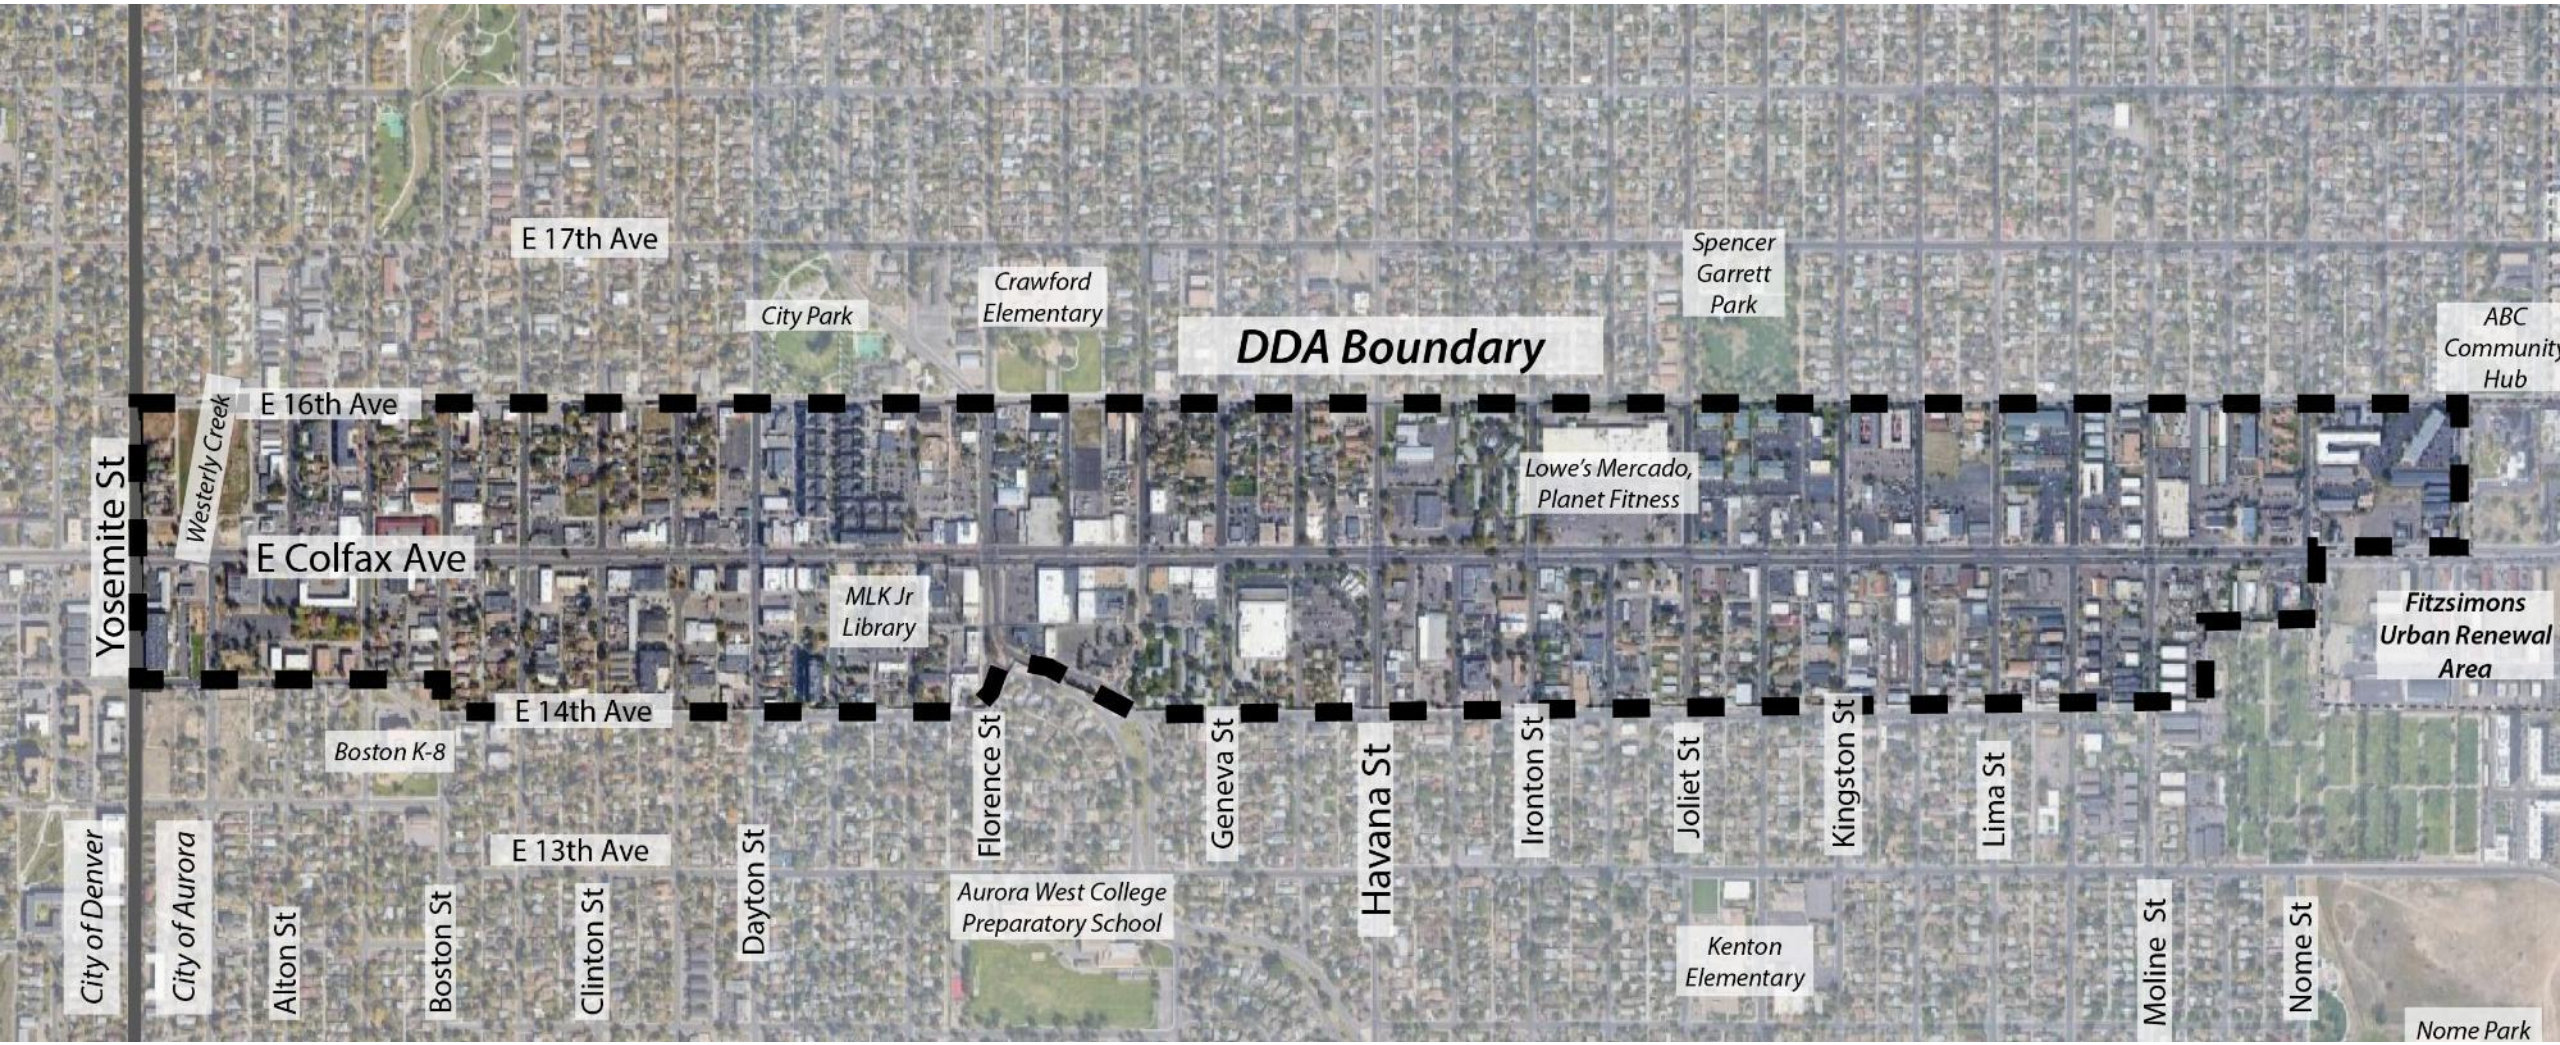
On November 4, voters in the proposed DDA boundaries approved:

1. Forming the DDA
2. Allowing the DDA to use Tax Increment Financing (TIF) under Colorado's Taxpayer Bill of Rights (TABOR).

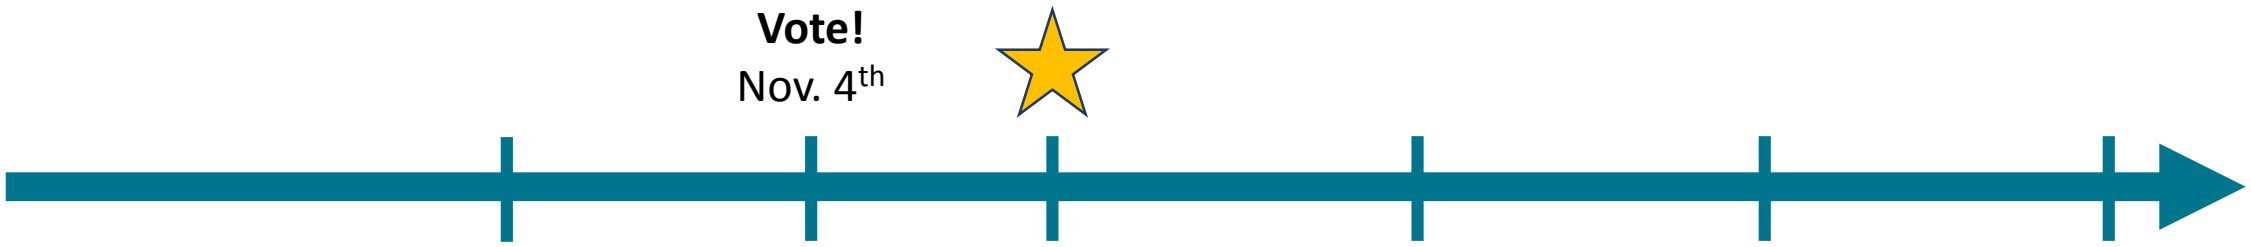
TIF is a financial tool that will allow the DDA to reinvest future tax revenue in the district into community projects outlined in the Vision and Action Plan. TIF does not raise taxes.

No action can occur by the DDA or on behalf of the DDA until the board is appointed and the "Plan of Development" is approved by City Council.

Aurora Downtown Development Authority Boundary



Timeline: DDA Formation and Startup



City council adopts ordinance putting questions on ballot: Creation of DDA, authorizing TIF, and/or debt, and/or mills (all separate questions).

Campaign to spread awareness and understanding of vote among qualified electors.

Council Appoints DDA Board

Board proposes & Council approves **Plan of Development.** DDA *cannot* use TIF or do any project until PoD adopted.

Board decides posting place for meeting notices and agendas at 1st meeting, adopts other bylaws and procedures.

Board creates and Council approves yearly **operating plan and budget.**

Colfax Vision and Action Plan: Six Goals Areas

- Plan serves as legally required "Plan of Development" for a new Downtown Development Authority.
- Describes structure, governance, financing, and boundaries.
- Plan requires approval by DDA board and City Council

Board Appointment Legal Requirements

- **5-11 members that must be 18+** (do not have to be registered voters)
- Must be a **business (non- or for-profit), resident, or property owner** within the DDA
- A **manager, agent, or employee** of a business in the DDA is also eligible.
- The **majority** of board members must either **live** or **own property** within the DDA
- One member of the board must be a **City Councilmember**
  - No other city employee or elected official is allowed
- **Appointed by Mayor and confirmed by City Council**

ADDA Board Appointment Process

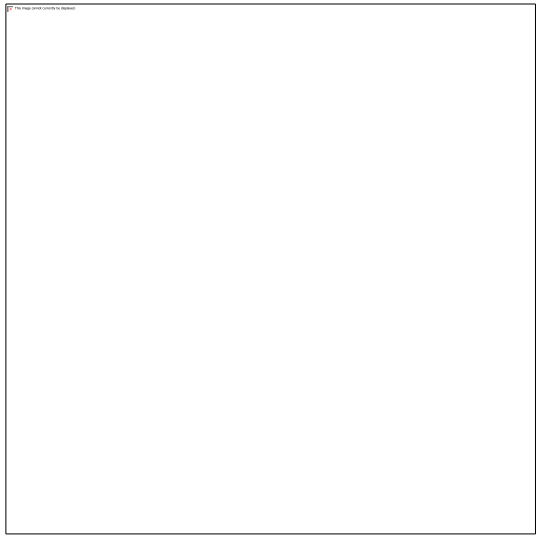
- Applications were open **January 20, 2026 - February 28, 2026**
  - City received **33 applications** (met state statute eligibility requirements)
  - List of eligible applicants were posted online
    - Community feedback
- **12 candidates were selected for interview (April 29th and May 5th)**

Priscilla Montoya	Matthew Horne	Amanda Blaurock
Thoa Nguyen	Cynthia Moreno-Romero	Alemayehu Eshete
Johnny Watson	Heather Adams	Matthew Rogers
Katie Goldman	Razz Cortes-Maceda	Natasha Sztevanovity

- Recordings of interviews are posted online
- Community provided feedback on candidates via an online form and via email to DDA@auroragov.org **(May 6th to May 26th)**

ADDA Board Appointment Process

- Plan recommends **categories of representation**:
  - *"A wide cross-section of the community including property owners, businesses and their employees, artists/arts organizations (including CADA), resident renters and homeowners, schools, and other organizations from within the DDA boundaries."*
- **Proposed Qualifications**
  - Legal eligibility
  - Ability to serve / commitment to core duties
  - Ties to community
  - Knowledge and skills/perspective
  - Dedication to collaborative work
  - Alignment with Vision and Action Plan



ADDA Board Appointment Recommendation

- **Candidates recommended for appointment to the DDA board demonstrated:**
  - Meaningful, ongoing involvement with the Colfax Corridor
  - Diverse backgrounds and experiences
  - Ability to govern inclusively and collaboratively
  - Investment in the Colfax Vision and Action Plan
- **9 candidates are recommended for appointment to the 11 member DDA Board in with staggered terms in accordance with the DDA ordinance:**

Amanda Blaurock	Cynthia Moreno-Romero
Alemayehu Eshete	Thoa Nguyen
Katie Goldman	Natasha Sztevanovity
Matthew Horne	Johnny Watson
Priscilla Montoya	

ADDA Board Appointment Process Timeline

Applicant Interviews (April 29th and May 5th)

ORDINANCE NO. 2025-69

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, CONCERNING THE CREATION AND ORGANIZATION OF THE AURORA DOWNTOWN DEVELOPMENT AUTHORITY IN THE CITY OF AURORA, COLORADO, DECLARING THE NECESSITY FOR AN ELECTION ON NOVEMBER 4, 2025, CONCERNING THE FORMATION OF SUCH AUTHORITY, PURSUANT TO COLO. CONST. ART. X, SEC. 20 AND STATUTORY REVENUE LIMITATIONS FOR SUCH AUTHORITY, DETERMINING ORGANIZATIONAL ASPECTS OF THE AURORA DOWNTOWN DEVELOPMENT AUTHORITY BOARD, AND PROVIDING OTHER DETAILS RELATED THERETO

WHEREAS, the City of Aurora, Colorado (the "City") is a home rule municipality and political subdivision of the State of Colorado (the "State"), duly organized and operating under the City of Aurora Home Rule Charter (the "City Charter") and the Constitution and laws of the State; and

WHEREAS, the City, by ordinance, may create and establish a downtown development authority pursuant to the provisions of Part 8 of Article 25 of Title 31, C.R.S., and the City Council of the City of Aurora (the "City Council") has considered the advisability of establishing the Aurora Downtown Development Authority (the "Authority") for the public health, safety, prosperity, security, and welfare and to carry out the purposes of an authority as stated in Section 31-25-801, C.R.S.; and

WHEREAS, it is first necessary to submit the question of the establishment of the Authority to a vote of the qualified electors, as defined in Section 31-25-802, C.R.S., of the area within which the Authority is to exercise its powers; and

WHEREAS, pursuant to Article X, Section 20 of the Colorado Constitution ("TABOR") and Section 31-25-804, C.R.S., any tax or other matters arising under Article X, Section 20 of the Colorado Constitution are required to be approved by the qualified electors within the boundaries of the proposed Authority.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Recitals. The above recitals are incorporated by reference in this Ordinance and such recitals constitute findings in support of the following ordaining sections.

Section 2. Findings. As the governing body of the City, the City Council hereby determines that it is necessary to establish the Aurora Downtown Development Authority for the public health, safety, prosperity, security, and welfare, and to carry out the purposes of an authority as stated in Section 31-25-801, C.R.S., which Authority will promote the public health, safety, prosperity, security, and general welfare in order to halt or prevent deterioration of property values or structures within the downtown; will halt or prevent the growth of blighted areas within the

downtown; will assist in the development and redevelopment of this district and in the overall planning to restore and provide for the continuance of the health of the downtown; and will be of special benefit to the properties within the boundaries of the Authority.

Section 3. Declaration. The Authority is hereby declared organized, subject to approval of the electors of the Authority voting for or against the ballot issue set forth in Section 5 of this Ordinance by a majority of the votes cast for the ballot issue at an election to be held on November 4, 2025, as provided in Part 8 of Article 25 of Title 31, C.R.S.

Section 4. Status. Upon approval as provided in Section 5, the Authority shall be a body corporate and a political subdivision with all the purposes and powers now or hereafter authorized by Part 8 of Article 25 of Title 31, C.R.S., except or as specifically limited in any plan of development approved by the City Council, and all additional and supplemental powers necessary or convenient to carry out and effectuate the purposes and provisions of said Part 8 and such other powers and authority as provided by law.

Section 5. Organization. Pursuant to Part 8 of Article 25 of Title 31, C.R.S. (the "Downtown Development Authority Act" or "Act") and the City Charter, as applicable, there shall be submitted to the qualified electors (defined in the Act as a resident, a landowner or a lessee, but any landowner or lessee which is not a natural person may vote only if it designates by some official action a representative thereof to cast its ballot) of the area hereinafter described at the election on November 4, 2025, in the City, the following ballot question in substantially the following form:

Ballot Question A

Organization of a Downtown Development Authority

Shall the Aurora Downtown Development Authority (the "Authority") be organized in the City of Aurora, Colorado (the "City") pursuant to Part 8 of Article 25 of Title 31, Colorado Revised Statutes, to exercise all powers authorized therein and any approved plan of development, for the following purposes, including without limitation: to facilitate economic development and redevelopment of properties and infrastructure within the City's central business district; to facilitate small business support, special events, and other district improvements in alignment with the City's Comprehensive Plan(s); to assist the City with the implementation of district improvements and in the overall planning to restore or provide for the continuance of the health of such district; and to halt or prevent the growth of blighted areas within such district, within the boundaries of the proposed Aurora Downtown Development Authority area as such boundaries are described and shown in Ordinance No. __, Series 2025, adopted by the City Council of the City of Aurora, Colorado, on _____?

YES _____ NO _____

Section 6. The boundaries of the Authority shall be as shown on the map attached hereto as **Exhibit A**, and as legally described in the legal description attached hereto as **Exhibit B**, which exhibits are incorporated herein by this reference. Further, for the public's convenience and reference, a list of the real properties to be included in the boundaries of the Authority, identified by property address and county parcel number, is attached hereto as **Exhibit C** and incorporated herein by this reference.

Section 7. TABOR. Pursuant to the Act and the City Charter, as applicable, there shall be submitted to the qualified electors (as that term is defined herein) of the area heretofore described at the election on November 4, 2025, in the City, the following ballot question in substantially the following form:

Ballot Issue B
Authorize Downtown Development Authority to Collect, Retain and Expend Revenues

Without increasing any local tax rate or imposing any new tax, shall the Aurora Downtown Development Authority (the "Authority"), or The City of Aurora (the "City") on behalf of any for use by the Authority, and as a voter-approved revenue change, be authorized to collect, retain, and expend the full amount of revenues received by the Authority in 2025 and each year thereafter, including without limitation, tax revenues, fees, rates, tolls, charges, grants, rents, loans, contributions, and any other revenues, without regard to any expenditure, revenue-raising, or other limitation including those contained within Article X, Section 20 or the Colorado Constitution, the limits imposed on increases in property taxation by Section 29-1-301, C.R.S., Section 29-1-1702, C.R.S., or any other law which purports to limit the Authority's or City's revenues as it currently exists or as it may be amended in the future, and without limiting in any year the amount of other revenues that may be collected, retained, and expended by the Authority?

YES _____ NO _____

Section 8. Mail Ballot Election. The election shall be conducted on November 4, 2025, as a mail ballot election, in accordance with Articles 1 to 13 of Title 1, C.R.S. (the "Uniform Election Code") and the laws of Colorado, except as otherwise provided in the City Charter or ordinances of the City, all as impliedly modified by relevant judicial decision, including without limitation all acts required or permitted thereby with respect to voting by early voters' ballots, absentee ballots, and emergency absentee ballots.

Section 9. Designated Election Official. The City Council appoints Courtney Linney of Spencer Fane LLP, or her designee, as the designated election official (the "Designated Election Official") for all matters except as otherwise provided for by ordinances of the City.

Section 10. Conduct of Election. The Designated Election Official, and other City officials and employees, are hereby authorized and directed to take all action necessary or appropriate to effectuate the provisions of this Ordinance.

Section 11. Organization of Authority. The submission of the foregoing questions and issues to the qualified electors is authorized by Part 8 of Article 25, Title 31, C.R.S., Article X, Section 20 of the Colorado Constitution, Sections 29-1-301 and 29-1-302, C.R.S., the City of Aurora Home Rule Charter and the Code of Ordinances of the City of Aurora, Colorado. In accordance with Section 31-25-804(1), C.R.S., if a majority of votes cast at the election are in favor of the ballot issue as provided in Section 5, then the Authority shall be organized and the City Clerk shall cause this Ordinance, declaring the Authority organized, to be recorded at the expense of the City in the real property records of the Clerk and Recorder of Adams County, Colorado, and Arapahoe County, Colorado.

Section 12. Plan of Development. If authorized in a plan of development approved by the City Council, the Authority or the City on behalf of and for use by the Authority, and as a voter-approved revenue change, is authorized to collect and retain, in the year established in the plan of development, and in all subsequent years thereafter, whatever amount is collected annually from any revenue sources including, but not limited to, taxes received as described in Sections 31-25-807(3), 31-25-816, and 31-25-817, C.R.S., and fees, rates, tolls, rents, charges, grants, contributions, loans, income, or other revenues imposed, collected, or authorized as described in Section 31-25-808, C.R.S., or otherwise, by law to be imposed or collected by the Authority or by the City on behalf of and for use by the Authority consistent with the applicable plan of development, and such revenues shall be collected and spent without regard to any spending, revenue-raising, or other limitation contained within Article X, Section 20 of the Colorado Constitution, or any other law and without limiting in any year the amount of other revenues that may be collected and spent by the Authority and the City on behalf of the Authority. The Board of the Authority may from time to time adopt and amend one or more plans of development which, upon approval of the City Council, provide for tax increment financing from property tax and sales tax, or both, as authorized by Section 31-25-807(3), C.R.S. This Ordinance shall not be construed to prevent the creation of new urban renewal areas subject to tax increment financing under the Colorado Urban Renewal Law after the effective date of this Ordinance within or overlapping the boundaries of the Authority.

Section 13. Operations. The operations of the Authority may be funded from any of the following:

a. Donations to the Authority for the performance of its functions;

b. Moneys borrowed and to be repaid from other funds received under the authority of the Downtown Development Authority Act;

c. Tax increment funds as defined in Section 31-25-807(3), C.R.S., if a plan of development is adopted which provides for such tax increment funding;

d. Fees, rates, tolls, rents, charges, grants, contributions, loans, income or other revenues imposed, collected or authorized by law to be imposed or collected

by the Authority or by the City on behalf of and for use by the Authority pursuant to an approved plan of development;

e. Proceeds of an ad valorem tax of up to five (5) mills on the valuation for assessment of property within the boundaries of the Authority; and

f. Such other sources as may be approved by the City Council of the City.

Section 14. Board Composition. The Authority shall have a board ("Board") consisting of not less than five (5) nor more than eleven (11) members, all of whom, except for any member of the City Council appointed to the Board, must be "qualified electors" of the Authority, as defined in Section 31-25-802(9), C.R.S., appointed by the Mayor and confirmed by a majority of the City Council. Consistent with Sections 31-25-805 and 31-25-806, C.R.S., the Board of the Authority shall be constituted as follows:

a. One (1) member shall be a member of the City Council; and

b. Four (4) to ten (10) members who are residents, landowners, or business lessees within the boundaries of the Authority.

The initial terms of the Board members shall be as follows:

a. The member from the City Council shall serve at the pleasure of the City Council;

b. The terms of two members shall expire on June 30, 2026;

c. The terms of two members shall expire on June 30, 2027;

d. The terms of two members, if the Board consists of seven or more members, shall expire on June 30, 2028; and

e. All other members shall be appointed for terms expiring June 30, 2029.

After the initial terms of the Board members have expired, the terms of all members appointed to the Board, except the member from the City Council, shall expire four (4) years from the expiration date of the terms of their predecessors. After notice and an opportunity to be heard, an appointed member of the Board may be removed for cause by the City Council. Board members shall hold office until their successor has been appointed and qualified by the Mayor and confirmed by a majority of the City Council. Any appointment to fill a vacancy shall be for the unexpired term.

The term "business" shall include a for profit business or a nonprofit business. An officer or director of a corporation having a place of business within the boundaries of the Authority shall be eligible for appointment to the Board. A manager, agent, or employee, all as defined in Section 7-90-102, C.R.S., of an entity having its place of business within the boundaries of the Authority shall be eligible for appointment to the Board. No officer or employee of the City, except the member from the City Council, shall be eligible for appointment to the Board.

Section 15. Board Rules. The Board may adopt and promulgate rules governing its procedures, including election of officers, and these rules shall be filed in the office of the City Clerk. The Board shall hold regular meetings in the manner provided in the rules of the Board. Special meetings may be held when called in the manner provided in the rules of the Board. Notice of meetings of the Board shall be in accordance with the Colorado Open Meetings Law. All meetings of the Board shall be open to the public except as allowed under the Colorado Open Meetings Law.

Section 16. Maximum Net Effective Interest Rate. Any ordinance or resolution by which bonds are issued pursuant to the authority granted to the Authority shall specify the maximum net effective interest rate of such bonds.

Section 17. Inclusion of Property. Additional property may be included within the boundaries of the Authority subject to City Council approval, as provided in Section 31-25-822, C.R.S., as it may be amended.

Section 18. Contests of Ballot Form or Content. The City hereby adopts the provisions of Section 1-11-203.5, C.R.S., as the exclusive procedure for protesting or contesting the content of the ballot titles and text set forth above. For purposes of Section 1-11-203.5, C.R.S., the ballot titles for the questions set forth in this Ordinance above are hereby determined to be the text of each question itself, as applicable.

Section 19. Severability. The provisions of this Ordinance are hereby declared to be severable. If any section, paragraph, clause, or provision of this Ordinance shall, for any reason, be held to be invalid or unenforceable by a court of competent jurisdiction, the invalidity or unenforceability of such section, paragraph, clause, or provision shall not affect any of the remaining provisions of this Ordinance. If any individual tract of land included within the area described in Section 5 of this Ordinance is determined by a court of competent jurisdiction to be excluded from the Authority, should the formation of the same be authorized by the qualified electors, such determination shall not affect, impair, or invalidate the inclusion of the remaining area described in Section 5 of this Ordinance in the Authority, it being the intention of the City Council that the inclusion of the separate tracts of land described herein be severable.

Section 20. Ratification. All actions not inconsistent with the provisions of this Ordinance heretofore taken by the officers and employees of the City directed towards the creation and establishment of the Aurora Downtown Development Authority are hereby ratified, approved, and confirmed.

Section 21. Declaration. The City Council finds and declares that this Ordinance is promulgated and adopted for the public health, safety, and welfare and this Ordinance bears a rational relationship to the legislative object sought to be obtained.

Section 22. Effective Date. This Ordinance shall become effective upon August 30, 2025.

Section 23. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 24. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

INTRODUCED, READ AND ORDERED PUBLISHED this 14TH day of JULY, 2025.

PASSED AND ORDERED PUBLISHED this 28TH day of JULY, 2025.

MIKE COFFMAN, Mayor
