The purpose of the project is to implement a transportation solution that will close a critical gap in the regional transportation network to enhance east-west mobility.

**Project Need**

The project is needed to:

- Provide an efficient transportation link in the Aurora arterial system
- Reduce travel time and vehicle miles traveled for motorists and emergency vehicles
- Enhance and support existing and future multimodal connectivity
- Provide transportation infrastructure needed to promote economic development

**Study Area**

The map shows the study area within the City of Aurora, including the Buckley Air Force Base and surrounding areas. The legend indicates Unincorporated Arapahoe County.
For projects receiving or applying for federal funds, the National Environmental Policy Act (NEPA) must be followed. In this case through preparation of an Environmental Assessment.
