

Contemporaneous Review of Plumbing Licenses

Pursuant to Colorado Revised Statutes 12-58-114.5 the City of Aurora has established procedures for conducting contemporaneous reviews of plumbing licenses. These procedures apply to the inspection of all plumbing work required to be performed by State Licensed Plumbers. Inspections of plumbing work will only be conducted when State licensed plumbers or plumbing contractors are listed on the permit. The City of Aurora will verify the State Plumbing License by accessing the Colorado Department of Regulatory Agencies (DORA) website.

City of Aurora plumbing inspectors will request, at their discretion, any or all of the following:

- Verification of plumbing licenses for the plumbers working on the job site for compliance with Colorado Revised Statute Section 12-58-105.
- Verification of apprentices working on the job site for compliance with Colorado Revised Statute Section 12-58-117.
- Verification that the plumbing contractor is the same as that listed on the building permit.

If the City inspector is unable to verify the identity or verification of any of the items listed above, the inspector may fail the inspection, at their discretion, until verification can be provided.
