

beaver

Beaver eats:
bark, buds, leaves and twigs
of willow and cottonwood trees,
other wetland plants seasonally

Beaver is eaten by:
coyotes, bobcats, mountain lions;
people harvest them for fur

Raccoon

Raccoon eats:
Berries, wild plums, chokecherries,
crawdads, birds, small
mammals, snakes, fish, lizards,
amphibians

Raccoon is eaten by:
coyotes, red foxes,
great horned owls

Coyote

Coyote eats:
rabbits and other rodents,
carrion, fruit,
berries, grasshoppers

Coyote is eaten by:
Nothing kills coyote to eat him,
but when he's dead, decomposers
feed on his body.

mule deer

Mule deer eats:
Trees, shrubs, forbs and grasses

Mule deer is eaten by:
coyotes, golden eagles, domestic
dogs

Bullsnake

Bullsnake eats:
small rodents, birds, eggs,
lizards

Bullsnake is eaten by:
hawks, racers, coyotes

box turtle

Box turtle eats:
beetles, caterpillars, grasshoppers
crickets, prickly pear cactus,
tadpoles,
eggs, sometimes small birds

Box turtle is eaten by:
coyote and raccoon, racers and
hognose
snakes prey on young

great horned owl

**Great horned owl eats:
rabbits, rodents, snakes,
skunks, small domestic dogs
and house cats**

**Great horned owl is eaten by:
peregrine falcon, golden eagle,
hawks sometimes prey on young**

Skunk

**Skunk eats:
beetles, grasshoppers, voles,
mice, ground nesting birds, eggs,
berries**

**Skunk is eaten by:
great horned owls, eagles,
bobcats, badgers, coyotes, foxes**

fox squirrel

Fox squirrel eats:
acorns, nuts, twigs, buds, leaves,
berries, small grains

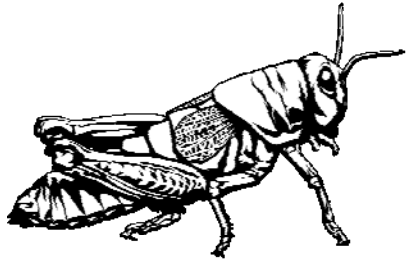

Fox squirrel is eaten by:
red foxes, coyotes,
great horned owls,
red-tailed hawks, domestic cats
and dogs

red fox

Red fox eats:
ground nesting birds and their
eggs, rabbits, pocket gophers,
small rodents, insects, berries,
fruits, nuts

Red fox is eaten by:
coyotes, eagles, bobcats

grasshopper

**Grasshopper eats:
grasses and other plants**

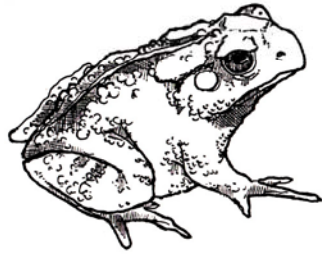

**Grasshoppers are eaten by:
other insects, snakes, owls,
skunks, lizards, red foxes**

**red-winged
blackbird**

**Red-winged blackbird eats:
seeds and insects**

**Red-winged blackbird is eaten by:
bullsnakes, barn owls,
sharp-shinned hawks;
raccoons and skunks prey
on eggs**

Woodhouse toad

Woodhouse toad eats:
isopods, scorpions, mites, spiders,
centipedes, flies, maggots, beetles,
ants, bees, caterpillars

Woodhouse toad is eaten by:
snakes, some birds and mammals,
possibly raccoons and skunks,
predaceous insects prey on young

damselfly nymph

Damselfly nymph eats:
other aquatic insects, small
fish, sometimes each other

Damselfly nymph is eaten by:
birds, lizards, frogs, fish, spiders,
other aquatic insects, each other

Monarch butterfly

Monarch butterfly eats:
adults eat nectar, sap, juices,
dew; larvae feed on milkweed

Monarch butterfly is eaten by:
mostly other insects

hairy woodpecker

Hairy woodpecker eats:
wood-boring grubs, insects,
insect eggs, pupae, sap,
some nuts and fruit

Hairy woodpecker is eaten by:
American kestrel, sharp-shinned
hawk, Cooper's hawk

**common black
beetle**

**Common black beetle eats:
insects, flies, snails, slugs,
caterpillars, grubs**

**Common black beetle is eaten by:
toads, small snakes, birds, shrews**

muskrat

**Muskrat eats:
cattails, other aquatic plants,
carrion, fish, crayfish, mollusks**

**Muskrat is eaten by:
raccoons, foxes, coyotes,
domestic dogs**

plains garter snake

**Plains garter snake eats:
earthworms, grasshoppers, toads,
frogs, small fish, salamander
larvae**

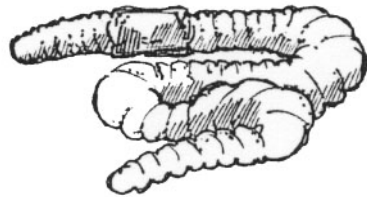

**Plains garter snake is eaten by:
racers, hawks, owls, crows**

red-tailed hawk

**Red-tailed hawk eats:
smaller birds, snakes, rodents**

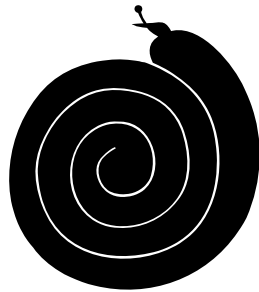

**Red-tailed hawk is eaten by:
no natural predators,
but they can die
from habitat loss and pollutants.**

earthworm

Earthworm eats:
dirt, leaves, partially decomposed
vegetation

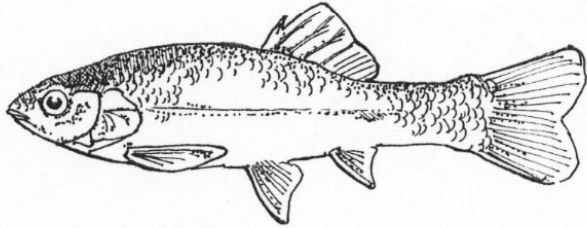

Earthworm is eaten by:
birds, flatworms, snakes, frogs,
toads, salamanders, centipedes,
crawdads, foxes

common millipede

Millipede eats:
decaying vegetation, roots,
shoots, sometimes dirt

Millipede is eaten by:
birds, reptiles, amphibians, some
insect-eating mammals, some
carnivorous invertebrates

fish

**Fish eats:
algae, aquatic plants,
macro-invertebrates**

**Fish is eaten by:
raccoons, herons,
painted turtles, snapping turtles,
snakes, larger fish**

mushroom

**Mushrooms are decomposers that
release enzymes into the soil that
break down organic matter.**

**Mushrooms are eaten by squirrels,
some birds, mice**

cottonwood tree

**Cottonwood trees are eaten by:
beavers, beetles, some birds**

willow

**Willows are eaten by:
deer, insects, beaver**

Milkweed

**Milkweed is eaten by
caterpillars of the monarch
butterfly.**

Cattails

**Cattails are eaten by:
geese, muskrats, ducks**

chokecherry

**Chokecherry is eaten by:
birds, deer, rabbits, raccoons**

wild plum

**Wild plum is eaten by:
bees, flies, foxes, some birds**

fringed sage

**Fringed sage is eaten by:
deer, pronghorn**

blue grama grass

**Blue grama grass is eaten by:
rabbits, rodents, prairie dogs,
cattle**

sunflower

**Sunflower is eaten by:
birds, insects, pocket gophers,
ground squirrels, mice, deer**

duckweed

**Duckweed is eaten by:
ducks, fish**

scarlet globe mallow

**Scarlet globe mallow
is eaten by:
cattle, sheep, pronghorn,
deer, bison, prairie dogs,
jackrabbits**

sideoats grama

**Sideoats grama is eaten by:
bison, deer, prairie dogs,
some birds, pronghorn,
livestock**
