

beaver
(Castor canadensis)

Beaver eats:
bark, buds, leaves and twigs
of willow and cottonwood trees,
other wetland plants seasonally

Beaver is eaten by:
coyotes, bobcats, mountain lions;
people harvest them for fur

Raccoon
(Procyon lotor)

Raccoon eats:
Berries, wild plums, chokecherries,
crawdads, birds, small
mammals, snakes, fish, lizards,
amphibians

Raccoon is eaten by:
coyotes, red foxes,
great horned owls

Coyote
(Canis latrans)

Coyote eats:
rabbits and other rodents,
carrion, fruit,
berries, grasshoppers

Coyote is eaten by:
Nothing kills coyote to eat him,
but when he's dead, decomposers
feed on his body.

mule deer
(Odocoileus hemionus)

Mule deer eats:
Trees, shrubs, forbs and grasses

Mule deer is eaten by:
coyotes, golden eagles, domestic
dogs

Bullsnake
(Pituophis melanoleucus)

Bullsnake eats:
small rodents, birds, eggs,
lizards

Bullsnake is eaten by:
hawks, racers, coyotes

box turtle
(Terrapene ornata)

Box turtle eats:
beetles, caterpillars, grasshoppers
crickets, prickly pear cactus,
tadpoles,
eggs, sometimes small birds

Box turtle is eaten by:
coyote and raccoon, racers and
hognose
snakes prey on young

great horned owl
(Bubo virginianus)

Skunk
(Mephitis mephitis)

Great horned owl eats:
rabbits, rodents, snakes,
skunks, small domestic dogs
and house cats

Great horned owl is eaten by:
peregrine falcon, golden eagle,
hawks sometimes prey on young

Skunk eats:
beetles, grasshoppers, voles,
mice, ground nesting birds, eggs,
berries

Skunk is eaten by:
great horned owls, eagles,
bobcats, badgers, coyotes, foxes

fox squirrel
(Sciurus niger)

Fox squirrel eats:
acorns, nuts, twigs, buds, leaves,
berries, small grains

Fox squirrel is eaten by:
red foxes, coyotes,
great horned owls,
red-tailed hawks, domestic cats
and dogs

red fox
(Vulpes vulpes)

Red fox eats:
ground nesting birds and their
eggs, rabbits, pocket gophers,
small rodents, insects, berries,
fruits, nuts

Red fox is eaten by:
coyotes, eagles, bobcats

dust grasshopper
(Dissosteira carolina)

Grasshopper eats:
grasses and other plants

Grasshoppers are eaten by:
other insects, snakes, owls,
skunks, lizards, red foxes

**red-winged
blackbird**
(Agelaius phoeniceus)

Red-winged blackbird eats:
seeds and insects

Red-winged blackbird is eaten by:
bullsnakes, barn owls,
sharp-shinned hawks;
raccoons and skunks prey
on eggs

Woodhouse toad
(Bufo woodhousei)

Woodhouse toad eats:
isopods, scorpions, mites, spiders,
centipedes, flies, maggots, beetles,
ants, bees, caterpillars

Woodhouse toad is eaten by:
snakes, some birds and mammals,
possibly raccoons and skunks,
predaceous insects prey on young

damselfly nymph
(Austrolestes annulosus)

Damselfly nymph eats:
other aquatic insects, small
fish, sometimes each other

Damselfly nymph is eaten by:
birds, lizards, frogs, fish, spiders,
other aquatic insects, each other

Monarch butterfly
(Danaus plexippus)

Monarch butterfly eats:
adults eat nectar, sap, juices,
dew; larvae feed on milkweed

Monarch butterfly is eaten by:
mostly other insects

hairy woodpecker
(Picoides villosus)

Hairy woodpecker eats:
wood-boring grubs, insects,
insect eggs, pupae, sap,
some nuts and fruit

Hairy woodpecker is eaten by:
American kestrel, sharp-shinned
hawk, Cooper's hawk

**common black
beetle**
(Pterostichus spp).

Common black beetle eats:
insects, flies, snails, slugs,
caterpillars, grubs

Common black beetle is eaten by:
toads, small snakes, birds, shrews

muskrat
(Ondatra zibethicus)

Muskrat eats:
cattails, other aquatic plants,
carrion, fish, crayfish, mollusks

Muskrat is eaten by:
raccoons, foxes, coyotes,
domestic dogs

plains garter snake
(Thamnophis radix)

Plains garter snake eats:
earthworms, grasshoppers, toads,
frogs, small fish, salamander
larvae

Plains garter snake is eaten by:
racers, hawks, owls, crows

red-tailed hawk
(Buteo jamaicensis)

Red-tailed hawk eats:
smaller birds, snakes, rodents

Red-tailed hawk is eaten by:
no natural predators,
but they can die
from habitat loss and pollutants.

earthworm
(Lumbricus terrestris)

Earthworm eats:
dirt, leaves, partially decomposed
vegetation

Earthworm is eaten by:
birds, flatworms, snakes, frogs,
toads, salamanders, centipedes,
crawdads, foxes

common millipede
(Allajulus londenensis).

Millipede eats:
decaying vegetation, roots,
shoots, sometimes dirt

Millipede is eaten by:
birds, reptiles, amphibians, some
insect-eating mammals, some
carnivorous invertebrates

fathead minnow
(Pimephales promelas)

Fish eats:
algae, aquatic plants,
macro-invertebrates

Fish is eaten by:
raccoons, herons,
painted turtles, snapping turtles,
snakes, larger fish

Mushroom
Woodland agaricus
(Agaricus Silvicol)

Mushrooms are decomposers that release enzymes into the soil that break down organic matter.

Mushrooms are eaten by squirrels, some birds, mice

cottonwood tree
(Populus deltoides)

**Cottonwood trees are eaten by:
beavers, beetles, some birds**

Coyote willow
(Salix exigua)

**Willows are eaten by:
deer, insects, beaver**

Milkweed
(Asclepiadaceae speciosa)

**Milkweed is eaten by
caterpillars of the monarch
butterfly.**

Cattails
(Typha angustifolia)

**Cattails are eaten by:
geese, muskrats, ducks**

Chokecherry
(*Prunus virginiana*)

**Chokecherry is eaten by:
birds, deer, rabbits, raccoons**

wild plum
(*Prunus americana*)

**Wild plum is eaten by:
bees, flies, foxes, some birds**

fringed sage
(Artemisia frigida)

Fringed sage is eaten by:
deer, pronghorn

blue grama grass
Chondrosium gracile

Blue grama grass is eaten by:
rabbits, rodents, prairie dogs,
cattle

Sunflower
(Helianthus annuus)

Sunflower is eaten by:
birds, insects, pocket gophers,
ground squirrels, mice, deer

Duckweed
(Lemna minor)

Duckweed is eaten by:
ducks, fish

scarlet globe mallow
(Sphaeralcea coccinea)

Scarlet globe mallow
is eaten by:
cattle, sheep, pronghorn,
deer, bison, prairie dogs,
jackrabbits

sideoats grama
(Bouteloua curtipendula)

Sideoats grama is eaten by:
bison, deer, prairie dogs,
some birds, pronghorn,
livestock
