

SAVE MONEY

WITH OUR COMMERCIAL AND MULTI-FAMILY REBATES

At Aurora Water, we want you to get the most out of every drop, so we have a variety of programs that can help you save water and money on your bill. Get in touch with us at 303.739.7195 to estimate your rebate.

TOILET REBATES

When you replace old toilets with high-efficiency models you could receive a rebate.

**UHET WaterSense
Toilet Purchased**

0.8 gpf only

Your Current Toilet

1.6 gpf or more

Your Rebate

up to \$100/toilet

gpf= gallon per flush

Please see AuroraWater.org for program rules and eligible models.

SPRINKLER ASSESSMENTS/REBATES

Sprinkler systems that are older or that aren't properly maintained use a lot more water. Sign up for a free irrigation assessment, and our experts will identify ways to make your system run efficiently. You also could be eligible for rebates. Call us before you purchase any sprinkler equipment to ensure it qualifies.

LANDSCAPE REBATES

Get rid of your water-guzzling grass and switch to water-wise landscape. It requires very little water and is a cinch to maintain – we'll even help design it. You could save as much as 50 percent on your water bill.

HOW MUCH COULD YOU SAVE?

**one drip
per second**

ADDS UP TO

**5 gallons
per day**

Although a small leak may not seem like it could be costing a lot, those drips add up quite a bit.

So let's say you have only one toilet that leaks. How many gallons does it waste?

Size of leak	Water wasted per day	Water wasted per month
Small	30 gallons	900 gallons
Medium	250 gallons	7,500 gallons
Large	Up to 800 gallons	Up to 24,000 gallons

And that's only ONE toilet. Imagine how quickly that adds up if you have multiple leaking fixtures.

REBATE SUCCESS STORY

Toilets are the most water-guzzling appliance in the home. Replacing an old one can save thousands of gallons of water. Yosi Lutwak, owner of Amber Ridge Apartments, knew that his high water bills needed to shrink – so he called Aurora Water.

Amber Ridge is a 68-unit apartment building built in 1973. Mr. Lutwak enrolled in our toilet replacement program and began changing out the old, 3.5 gallon per flush toilets with ultra-high-efficiency toilets that use only 0.8 gpf. He received more than \$15,000 in rebates by replacing 105 toilets.

Mr. Lutwak conserved even more water by installing more efficient showerheads.

The change in water use over the past few years is astonishing: **the total water use is down 61 percent.**

"It was probably the most beneficial project we've done in the building as far as efficiency."

– Yosi Lutwak, owner of Amber Ridge Apartments
