TC-12	Transit- Aerotropolis	Transit Service and Hubs	Medium Investment (Rapid bus to full BRT)	Jewell Ave to 64th Ave	$235,000,000 to $352,600,000	Long
TC-13	Transit- E 6th	Transit Service and Hubs	Medium Investment (Rapid bus to full BRT)	Dayton St to I-225	$27,200,000 to $40,800,000	Long
TC-14	Transit- Hampden	Transit Service and Hubs	Medium Investment (Rapid bus to full BRT)	Parker Rd To Picadilly St	$100,800,000 to $151,300,000	Long
TC-15	Transit- 40th	Transit Service and Hubs	Low Investment (Enhanced Bus)	40th/Pena to Gun Club Rd	$37,600,000 to $56,400,000	Long
TC-16	Transit- 56th	Transit Service and Hubs	Low Investment (Enhanced Bus)	City Limits to Colorado Air and Space Port	$56,200,000 to $84,300,000	Long
TC-17	Transit- E Colfax BRT Next	Transit Service and Hubs	High Investment (BRT)	E Colfax BRT Next	$146,700,000 to $220,100,000	Medium
TC-19	Transit- H Line	Transit Service and Hubs	Rail Extension	Aurora Metro Center to Smith/Peoria	$0 to $0	Long
TC-20	Transit- 11th Ave	Transit Service and Hubs	Low Investment (Enhanced Bus)	Yosemite St to Peoria St	$8,800,000 to $13,200,000	Long
TC-21	Transit- Smoky Hill	Transit Service and Hubs	High Investment (BRT)	Quincy Ave to Aurora Pkwy	$225,600,000 to $338,400,000	Long
TC-22	Transit- Quincy Ave	Transit Service and Hubs	Low Investment (Enhanced Bus)	Parker Rd to Gun Club Rd	$38,200,000 to $57,300,000	Long
TC-23	Transit- E Alameda / S Tower	Transit Service and Hubs	Medium Investment (Rapid bus to full BRT)	Sable Blvd to Hampden Ave	$40,900,000 to $61,400,000	Long
TC-24	Transit- Picadilly	Transit Service and Hubs	Low Investment (Enhanced Bus)	SH 30 to 56th Ave	$52,600,000 to $78,800,000	Long

Transit Projects (cont'd)

ID	Project Name	Project Category	Recommendation	Location-Extents	Cost Range	Construction Phase
TC-25	Transit- Parker Rd	Transit Service and Hubs	High Investment (BRT)	Iliff Ave To Quincy Ave	$48,400,000 to $72,700,000	Long

Contents

Acronyms and Abbreviations I

1 Introduction 1-1

2 Learning from Aurora's Past Planning 2-1
2.1 Common Themes 2-1
2.2 Shared Values 2-1
2.3 Summarized Goals 2-2
2.4 Recurring Recommendations 2-3
2.5 What Makes a Plan Successful 2-3
2.6 Insights & Opportunities 2-4

3 Who Aurora Is Today 3-1
3.1 Overview of Aurora Community 3-1
3.2 Social Vulnerability Analysis 3-10
3.3 Economy 3-29
3.4 Aurora's Places 3-32
3.5 Placetypes and Mobility Networks 3-33
3.6 Development patterns and trends 3-43

4 Automobile System Overview 4-1
4.1 Street Network 4-1
4.2 Travel Times 4-14
4.3 Estimated Total Delay at Bottleneck Locations 4-23
4.4 Future Congested Corridors 4-25

5 Freight System Overview 5-1
5.1 Freight by Truck 5-3
5.2 Freight by Rail 5-8
5.3 Freight and Equity 5-10

6 Public Transportation Overview 6-1
6.1 Planned Transit 6-3
6.2 Transit Infrastructure 6-7
6.3 Transit Demand 6-22
6.4 Transit Propensity 6-26
6.5 Low-Income Jobs 6-27
6.6 Transit Access to Destinations 6-27
6.7 Transit Service Gap Analysis 6-35
6.8 Citywide Bus Delay 6-41
6.9 Corridor Bus Delay 6-53

7 Active Transportation Overview 7-1
7.1 Moving on Foot or with mobility device 7-9
7.2 Moving by bicycle or other active mode 7-24
7.3 Bicycle Access & Barriers to Key Destinations 7-28

8 Moving Around Aurora 8-1
8.1 Regional and Local Movements 8-1
8.2 Trips by Select Demographics 8-7
8.3 Commuting 8-14
8.5 Travel by Mode 8-19
8.6 Travel Time Modal Comparison 8-23

9 Safety 9-1
9.1 The Safe Systems Approach 9-1

9.2 Crash Data 9-1
9.3 Fatal and Serious Injury Crash Summary 9-2
9.4 Regional High Injury Network 9-6
9.5 Transit Safety 9-6

10 Next Steps 10-1

ZEV	Zero Emission Vehicle

1 Introduction

The State of the System report provides an overview of the existing transportation network within the City of Aurora. The State of the System report is an appendix to Connecting Aurora, the city's first multimodal transportation master plan. As a multimodal plan, the report includes a detailed assessment of all major transportation modes: vehicles, freight, bicycles, walking, using mobility devices, and transit. This report also examines the city's demographic makeup and builds a shared understanding of how people from different backgrounds navigate the city.

Ultimately, this report establishes a critical baseline understanding of the existing transportation system, including its operation, usage, and relationship with surrounding land uses. The findings of this report will inform the development of the Multimodal Transportation Master Plan by identifying gaps and inefficiencies of the network and being responsive to the current and projected needs of Aurora. Capital projects and policies determined through the planning process will be based on a thorough understanding of the existing system and support the vision, mission and goals of the Connecting Aurora plan.

2 Learning from Aurora's Past Planning

While the City of Aurora does not currently have a stand-alone transportation plan, it has led numerous planning efforts over the years that have worked to improve its local transportation system. Most notably, the city's recent 2018 comprehensive plan, Aurora Places, specified "easy mobility and active transportation" as a key community principle.

Easy Mobility and Active Transportation

Principle: "An easy-to-use transportation network with multiple travel choices supports a strong economy, healthy community and flourishing environment"

(Aurora Places, 2018)

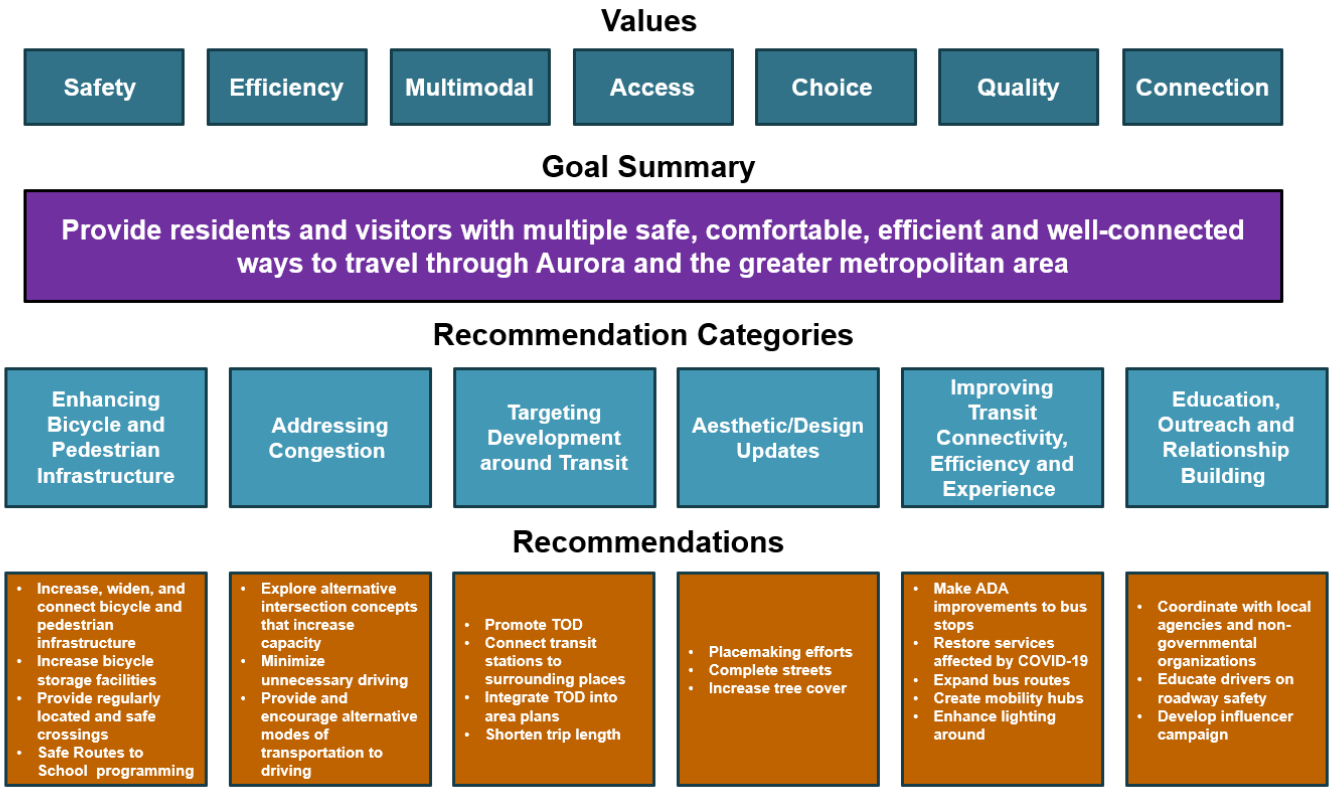
This section describes the relevant plans developed at the city, county, and regional levels that will help inform the goals, objectives, policies, and recommendations of this planning effort. The intent of this review is to:

- Build on work that has already been done to identify past successes, key ideas to leverage, and opportunities for efficient development of Connecting Aurora
- Identify synergy between completed plans to inform the development of Connecting Aurora's vision, mission, goals, and recommendations.
- Highlight gaps in previous planning efforts that may inform areas of high priority for Connecting Aurora to address and develop meaningful approaches to improving transportation systems.
- Communicate that Connecting Aurora is not starting from scratch. Rather, key takeaways from prior efforts will be used as the starting point for the plan. Planning expertise and public input from prior efforts will inform our approach, effectively leveraging the work and input provided by others.

Table 2-1 summarizes the plans and documents that were reviewed.

Table 2-1. Relevant Plans & Document Review

Scale	Plan Code	Document Title	Year	Document Description
City	A.1	Aurora Comprehensive Plan	2018	Presents a vision for the future of the City of Aurora, with recommended actions to reach long-range goals. This plan covers land use, transportation, housing, economic development, natural resources, parks and open space, and community identity.
	A.2	City of Aurora Unified Development Code	2019	Presents guidelines to ensure that all development in the City of Aurora is consistent with plans and policies adopted by City Council.
	A.3	City of Aurora Capital Improvement Plan	2024	Provides an overview of how the City of Aurora's existing funds and projected revenues should be allocated for projects of $25,000 or more and a long-term benefit of at least five years.
	A.4	Northeast Area Transportation Study	2018	Identifies the transportation facilities needed to serve the growing northeast area of the City of



Scale	Plan Code	Document Title	Year	Document Description
				Aurora. This study includes a timeline and the magnitude and intensity of likely multimodal transportation improvements.
	A.5	Southeast Area Transportation Study	2007	Identifies the corridors, alignments, and interconnections in need of improvements to meet long-term transportation goals. This study includes existing and future land use projects and travel demand levels for 2030.
	A.6	City of Aurora Bicycle and Pedestrian Master Plan	2012	Provides a roadmap for the city to complement, extend, and improve safety of bicycle and trail facilities.
	A.7	Northwest Aurora Mobility Study	2018	Identifies short-term and mid-term opportunities to enhance connectivity, safety and system performance
	A.8	Who is Aurora?	2022	Presents a detailed and thorough analysis of the 2020 U.S. Census data and the updated American Community Survey.
	A.9	Havana Street Corridor Study	2023	Identifies short-term and long-term vision and improvement strategies for the corridor.
	A.10	13th Avenue Multimodal Corridor Study	2023	Presents pedestrian and bicycle facility improvements for 13th Avenue that reflect the priorities of Aurora residents.
	A.11	64th Avenue Multimodal Transportation and Urban Design Study	2020	Identifies multimodal transportation improvements and presents urban design visions for 64th Avenue between E-470 and Himalaya Avenue.
	A.12	Our Parks, Our Places: A Plan for Aurora's Parks, Recreation and Open Space	2023	Serve as a guide for decision-makers to ensure that the parks, recreation, and open spaces system in Aurora grows in accordance with the short-term, mid-term and long-term community vision.
	A.13	Public Works Strategic Asset Management Plan	2024	Outlines the Public Works Department's plan for managing Aurora's assets and maximizing their value over time.
County	C.1	Arapahoe County Bicycle and Pedestrian Master Plan	2017	Proposes policies and recommendations for creating a comprehensive bicycle and pedestrian system.
	C.2	2040 Transportation Master Plan for Arapahoe County	2021	Presents pathways to promoting an efficient and balanced transportation system in Arapahoe County by promoting alternative transportation solutions and coordinating land use to complement transportation system.
	C.3	Adams County Transportation Master Plan	2022	Identifies long-term vision and recommendations to improve the transportation experience for people, walking, biking, driving, and taking transit.
	C.4	Douglas County Transportation Plan	2019	Defines a long-range vision for a multimodal transportation system that ensures safety, public good and economic growth.
Region	R.1	DRCOG Adopted Transportation Improvement Program	2023	Identifies federal and state-funded transportation projects that align with the vision and goals of the greater region.

Scale	Plan Code	Document Title	Year	Document Description
	R.2	2050 Metro Vision Regional Transportation Plan	2021	Presents a long-range vision and investment framework for the region's multimodal transportation system.
	R.3	DRCOG Complete Streets Toolkit	2021	Presents design guidelines that create safe, context-sensitive, inclusive, equitable, and flexible streets for all right-of-way users.
	R.4	DRCOG Multimodal Freight Plan	2020	Provides a shared vision, action plan and strategic guide to improve the movement of freight and goods more efficiently through the region.
	R.5	Denver Regional Active Transportation Plan	2019	Envisions a pedestrian and cyclist friendly and provides strategies to improve active transportation across the region
	R.6	Reimagine RTD	2022	Evaluates and forecasts the mobility needs within RTD's operating area. Includes a System Optimization Plan that proposes near-term modifications to RTD's fixed route services and a Mobility Plan for the Future that addresses industry advancements that can be incorporated into RTD's future operation.

2.1 Common Themes

The common themes identified across the plans and policies are summarized in Figure 2-1. Because Connecting Aurora is a mobility-focused plan, only the values, goals, and recommendations related to mobility from the above plans have been included in this summary.

Figure 2-1. Summary of Common Themes

2.2 Shared Values

Many of Aurora's past plans shared similar values and guiding principles that could be condensed into a single statement. Table 2-2 highlights the shared values among the plans reviewed and the statement below summarizes those values.

Shared Value Statement

The City of Aurora strives to provide residents and visitors with multiple safe, comfortable, efficient, and well-connected ways to travel through Aurora and the metropolitan area.

Table 2-2. Plans by Shared Value

Plan Value	Plan	Plan Value	Plan
Ease/Easy	A.1, A.6, A.9, C.1, R.2, R.6	**Predictable/Simple**	A.2, R.2, R.5
Choice	A.1, A.6, A.9, R.2, R.5	**Convenient**	A.2, A.9, A.10
Safe/Safety	A.1, A.2, A.3, A.6, A.7, A.9, , A.12, C.1, C.4, R.1, R.2, R.5,	**Comfort**	A.1, A.10, C.1
Connection	A.1, A.2, A.3, A.6, A.7, A.9, A.10, A.12, C.1,9, R.2, R.5	**Accessible**	A.3, A.12, C.1
Strong Economy	A.1, A.2, A.9, A.13, C.1, C.4, R.2, R.5,	Quality	A.2, A.6, A.7, A.12, A.13, C.1, R.1, R.2, R.6, C.4
Efficient	A.2, A.9, C.2, C.4, R.2, R.5, R.6,	**Multimodal**	A.1, A.2, A.4, A.7, A.9, A.10, A.11, C.3, R.2, R.5,
Access to Resources/ Services/Etc.	A.1, A.2, A.3, A.6, A.9, A.12, C.1, C.4R.2, R.5,	**Prosper/Prosperity**	C.1, R.2, R.5
Consistent/Consistency	A.2, A.9, R.1		

While the values conveyed in Connecting Aurora will ultimately be dictated by feedback sourced from Aurora residents, the values listed above provide a foundation for understanding what has been emphasized in past planning efforts.

2.3 Summarized Goals

"Goals" refer to the services and conditions that local agencies and organizations aim to improve or change. There are several recurring/common themes within the goals of the documents reviewed:

1) Establish and maintain a complete, connected and convenient transportation system for all modes.
2) Create and prioritize pedestrian and bicycle facilities that are accessible to the city's diverse population.
3) Reach the highest level of safety for all users of the transportation system.
4) Organize the transportation system to complement and support the local economy and accommodate future growth.
5) Design and implement mobility solutions that meet the unique needs of the city's diverse population.
6) Ensure that the transportation system provides users with easy access to the places and resources they need and want to reach.
7) Reduce travel time and congestion.
8) Establish and maintain an integrated multimodal transportation system.

The identified goals emphasize the common components that many of the plans share, and which resonate across the different demographics and geographic areas of Aurora. These commonalities can help inform the goal development process of Connecting Aurora. This review can help the project team understand where goals may differ or how new goals can be generated to meet future city needs.

2.4 Recurring Recommendations

Recurring recommendations are more detailed strategies or potential projects developed for local agencies and organizations to facilitate implementation and meet established goals. Key recommendations can be organized into six categories:

1) Enhancing bicycle and pedestrian infrastructure
2) Improving safety for all users of the street network
3) Targeting development around transit
4) Improving transit connectivity, efficiency, reliability and experience
5) Addressing congestion
6) Placemaking to highlight and support community cohesion and sense of belonging
7) Conducting community engagement through relationship building and public engagement

There is significant overlap and reinforcement in some of the recurring recommendation categories, highlighting where priorities have been focused. The identified recommendations highlight the need to incorporate the local context and consider trade-offs in the development of recommendations, which will enable Aurora to move as many projects into implementation with support as possible.

2.5 What Makes a Plan Successful

While a significant number of plans have been developed within and around Aurora, some have been more successful than others in facilitating change and directing investment. Based on this review, three primary themes that contribute to a plan's success were identified.

- The plan **leverages a process-based, authentic assessment, engages people where they are, and facilitates momentum for action**. The process of developing a plan is the first step toward creating a meaningful, actionable, and useful tool for city staff, as well as stakeholders and community partners. A well-developed and executed process will ensure that the plan considers who the various users of the document will be and how to effectively communicate the plan's results to them. Additionally, it is an opportunity to inform the public about the benefits and tradeoffs of identified projects and foster meaningful dialogue on project outcomes. The 13th Avenue Multimodal Mobility Study exemplifies a planning process that was authentic to the community and communicated tradeoffs, resulting in a community-supported plan and project.
- The plan **effectively communicates to various audiences** and can be leveraged as a tool for the city. While plans must contain sufficient technical information to spur action and outcomes, they must also be easy to understand for multiple audiences. Some plans leverage visuals, succinct summaries, or tailor information to different audiences to help people in the community and other organizations easily digest key information and pick out what is most useful for them to know about the plan. Aurora Places is an example of how information is visually presented to multiple audiences, enabling them to easily understand complex technical information.
- The plan **provides the right level of specificity, details, and information** that can be leveraged by the city to effectively communicate with stakeholders, developers, the community, and potential funding partners. For plans to be successful, they must contain the appropriate context for audiences to understand how they can also apply the plan. For example, the NEATS plan provided a

high level of specificity that could be used for the city to point to when working with developers, so they understood the expectations for future development.

- The plan is **aligned with past efforts and is context sensitive** to appropriately integrate various areas and typologies within the community. For Connecting Aurora, integrating projects and recommendations to align with the UDO and Aurora Places will be essential and can facilitate effective coordination with the community, stakeholders, and other departments within the city.

2.6 Insights & Opportunities

This review yielded numerous insights and opportunities, as documented below, that should be explored throughout the Connecting Aurora planning process.

- Prior plans should help inform the Connecting Aurora planning process and provide further context on the community's vision for its future mobility needs.
- Multimodal options are very important to the city and community.
- With significant growth and a long list of projects/needs, Connecting Aurora will need to set priorities to ensure action and implementation.
- Some forms of transportation have disproportionately benefited from investment and attention compared to others. While non-vehicular travel modes, such as biking, walking, and taking transit, are a high priority for Aurora, there has been less investment in their implementation compared to automobiles. New technologies, such as congestion control and freight, are identified less frequently. Connecting Aurora will help address these gaps as a comprehensive mobility plan.
- Aurora's Unified Development Ordinance (UDO) is aligned with the city's comprehensive plan (Aurora Places). There is an opportunity to identify updates in the Comprehensive Plan and UDO that will likely better support the stated goals, recommendations, and intended outcomes of Connecting Aurora.
- Some recommendations may conflict with each other depending on the local context. For example, enhancing bicycle and pedestrian infrastructure could conflict with addressing auto congestion on a particular corridor if vehicle volumes are high and the right-of-way is extremely constrained. The policy framework in the Comprehensive Plan, then codified in the UDO and supporting policy documents, provides a meaningful and effective connection to guide Connecting Aurora.
- With a significant amount of previous planning work completed, it is important that Connecting Aurora reinforces or refines prior plans where there is an obvious need and alignment. Alignment with the comprehensive plan, including the placetypes designations, would strengthen and integrate the city's long-range land use plans and mobility systems.
- Connecting Aurora must reflect the diverse community needs and provide safe transportation options for residents, businesses, and visitors across the city with differing demographic backgrounds, economic circumstances, and mobility needs. This plan will address both immediate and long-term needs for Aurora as they evolve over time.

3 Who Aurora Is Today

3.1 Overview of Aurora Community

This Chapter summarizes demographic, socioeconomic, economic, and real estate market trends in the City of Aurora and compares them to those of Metro Denver, providing a critical foundation for developing Aurora's multimodal transportation master plan. Demographic changes—such as population growth, aging residents, or shifts in household composition—can alter the demand for different types of transportation. Similarly, socioeconomic factors, including income disparities and employment patterns, influence how people access and afford transportation. Real estate market dynamics, whether characterized by urban densification or suburban expansion, impact land use, travel distances, and mobility patterns. The relationship between these factors and Aurora's transportation network is further explored in the modal sections of this report.

By assessing these interconnected trends, Aurora can design a transportation system that meets current demands while adapting to future changes, ensuring sustainable and equitable access for all residents. Below summarizes the key trends identified in this chapter.

- The highest concentrations of vulnerable populations (low incomes, renters, low/no car ownership, etc.) are in an area referred to as Central and Original Aurora. The Central and Original Aurora area is defined in this report (note that this is not an official City of Aurora designation) as the area approximately between Airport Road and Chambers Road on the east, I-70 on the north, Iliff Avenue to Mississippi Avenue on the south, and Yosemite Street on the West. The Central and Original Aurora area roughly overlaps with Wards I and III.
- Currently, the largest industry in Aurora is retail trade, reflecting the characteristics of a largely suburban city. In contrast, the fastest growing industries are healthcare, wholesale trade, and warehousing and distribution. The Colorado Anschutz Medical Campus, Fitzsimons Innovation Community, and VA Hospital areas, along East Colfax Avenue, are large job centers that generate economic and housing demand impacts nearby. Large available development sites and e-commerce demand are driving the growth of warehousing and distribution centers on the East I-70 corridor and south of Denver International Airport.
- Single-family homes in Aurora's original residential neighborhoods were mainly constructed in the 1950s through the 1980s. Now, single-family development is moving to the eastern and southern areas of the city. While multifamily development has occurred across the city, greater emphasis has been placed on constructing multifamily housing near transit stations and employment hubs to encourage medium to high-density development and more supportive land uses.
- Industrial development is increasing at a much faster rate than other commercial markets in Aurora, such as office and retail. The city's industrial inventory has doubled since 2010, growing from 22.9 million square feet to nearly 46 million square feet, and recent industrial growth is concentrated in northern Aurora near Denver International Airport.

It is worth noting that the metrics are reported as a percentage of the total population. In areas with low population density and large Census tracts, the visual presentation of the data can skew the interpretation, leading one to think that the conditions affect a large number of people. Generally, east of E-470 and Buckley Space Force Base, population densities are much lower than in Central and Original Aurora.

Population

In 2024, Aurora's population is 404,219, a 77,800 increase from 326,419 residents in 2010. From 2010 to 2022, Aurora's average annual population growth rate was 1.5 percent, as shown in Table 3-1. This population growth rate is slightly higher than that of the Denver Metro area overall (defined in this table as Adams, Arapahoe, Boulder, Broomfield, Denver, Douglas, and Jefferson Counties), which has seen an average annual growth rate of 1.3 percent.

Similar to the population growth rate between 2010 and 2022, Aurora experienced an annual average household growth rate of 1.6 percent, which translates to 2,161 additional households per year. This is the same rate of household growth as the Denver Metro. Notably, a higher percentage of the Denver Metro's population growth in 2022 was in Aurora (14.3 percent) compared to households (10.9 percent), indicating that, on average, household sizes are larger in Aurora than in the metro area.

As Aurora continues to grow in population and household, this places additional pressures and strains on the transportation infrastructure and services. To accommodate the travel needs of new residents and visitors, Aurora will need to consider new and innovative land use and transportation policies, improvement strategies, and mobility options.

Table 3-1. Population and Households, 2010-2022

	2010	2022	2010-2022		
			Total	Annual Average Change	Annual Growth Rate
Population					
Aurora	326,419	391,281	64,862	5,405	1.5%
Denver Metro	2,797,896	3,251,694	453,798	37,817	1.3%
Aurora % of Denver Metro	*11.7%*	*12.0%*	*14.3%*		
Households					
Aurora	119,559	145,493	25,934	2,161	1.6%

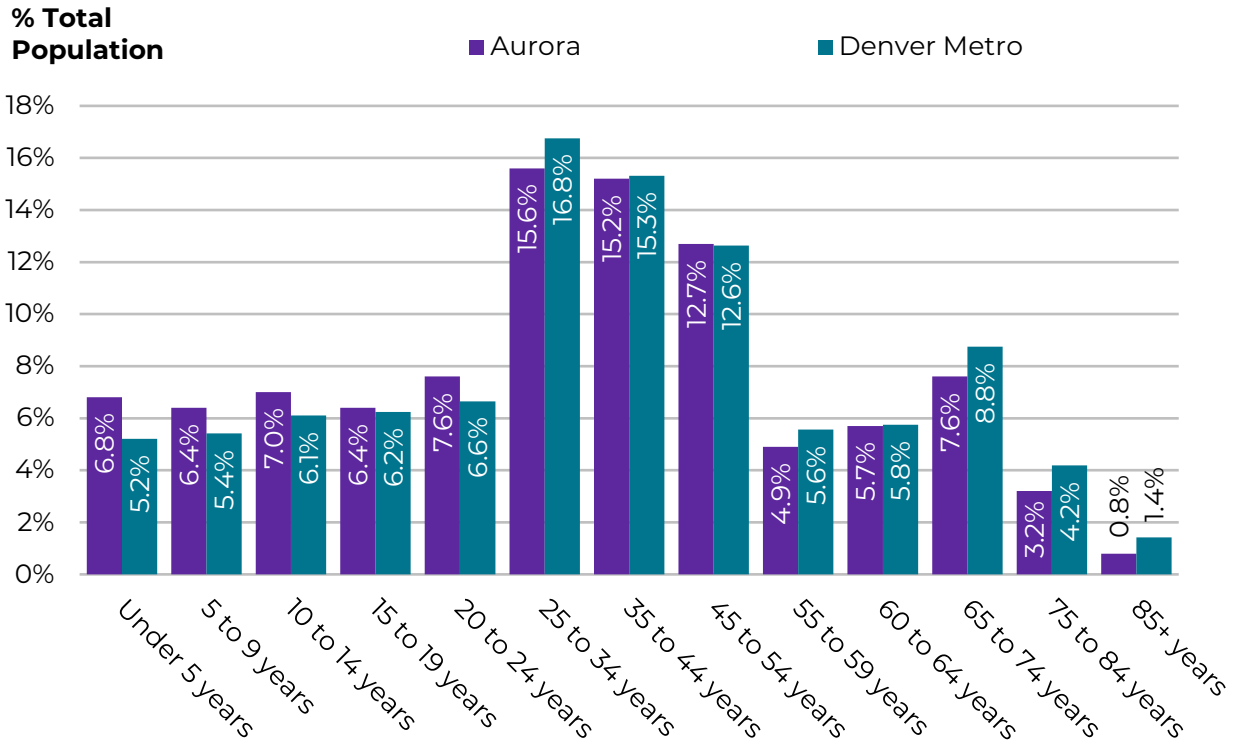
Aurora % of Denver Metro	*10.9%*	*10.9%*	*10.9%*		



Source: City of Aurora; Colorado Dept. of Local Affairs; U.S. Census; Economic & Planning Systems

Age

Age is an important factor to consider in a multimodal transportation plan, as different age groups have varying mobility needs and preferences. For instance, teenagers or young people may not have access to a vehicle and rely on public transportation to get to school or participate in extracurricular activities. Similarly, older adults, particularly seniors, may rely more on accessible transit options, such as paratransit services or pedestrian-friendly infrastructure, as driving becomes more challenging with age. These transit options help seniors maintain their independence and access to essential services, such as healthcare.

Figure 3-1 shows the age distribution in Aurora compared to the Denver Metro area overall. Aurora has a higher share of residents in every age cohort under the age of 24 compared to the Denver metro area, indicating that Aurora's population is younger than the metro area.

Figure 3-1. Age Distribution, Aurora and Denver Metro, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

Population growth in Aurora is concentrated in two broad age ranges - those aged 10 to 24 and those over 60. The growth in younger people reflects numerous factors, including the availability of comparatively more affordable housing, a large immigrant population, and growth in first-career job sectors. The aging population includes individuals aging in place in housing built in the 1970s and 1980s, as well as the ex-military population surrounding Buckley Space Force Base.

Since 2012, Aurora has experienced the most significant increase in residents in the 60- to 84-year-old cohort, demonstrating that while Aurora's population has a lower median age than the Denver Metro area as a whole, the city's population is aging. From 2012 to 2022, the median age of Aurora's residents increased by two years, from 33.5 to 35.1 years old. Additionally, the city has experienced a decrease between 2012 and 2022 in the proportion of children ages 5 to 9, as shown in Table 3-2.

Table 3-2. Age Distribution, Aurora, Change from 2012-2022

	2012		2022		2012-2022		
	Total	% Total	Total	% Total	Total	Annual Average Change	% Change

75 to 84 years	9,643	2.5%	12,540	3.2%	2,897	241	30.0%
85+ years	4,006	1.0%	3,164	0.8%	-842	-70	-21.0%

Source: U.S. Census; Economic & Planning Systems

Age groups are generally distributed equally across city wards, as demonstrated in Table 3-3. Several exceptions include Ward III, which contains a higher percentage of young adults between the ages of 18 and 24, and Ward IV and V, which have a higher share of residents over 65.

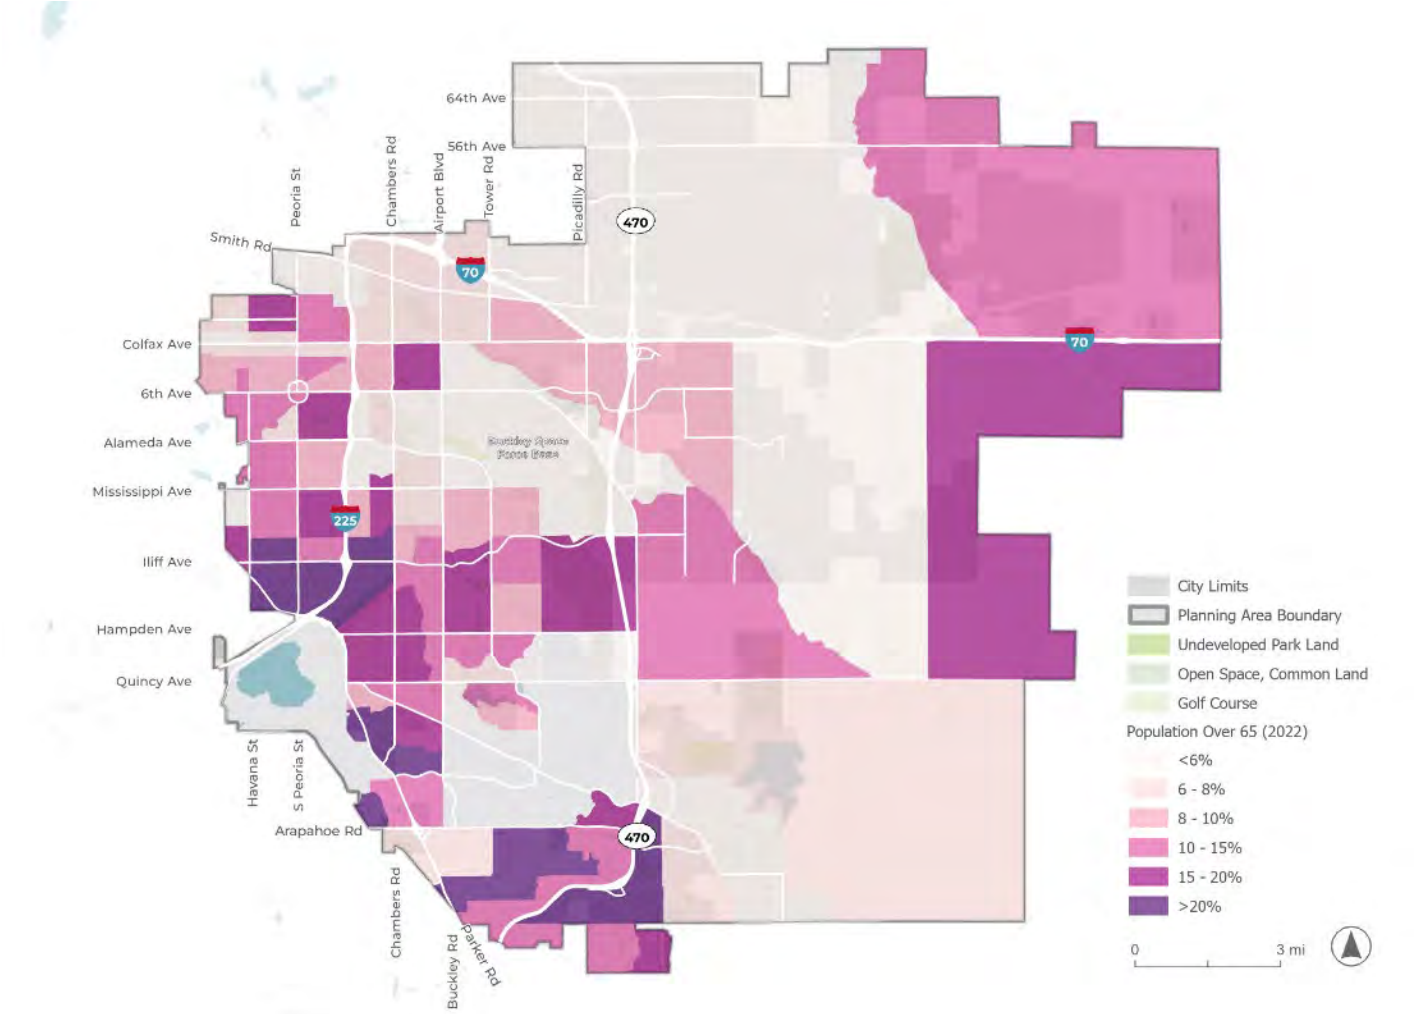

Table 3-3. Age Distribution by Ward

Age	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Under 18	28%	24%	23%	23%	21%	28%
18 to 24	10%	9%	13%	8%	8%	7%
25 to 64	53%	56%	55%	54%	53%	54%
Over 65	8%	10%	9%	15%	17%	11%

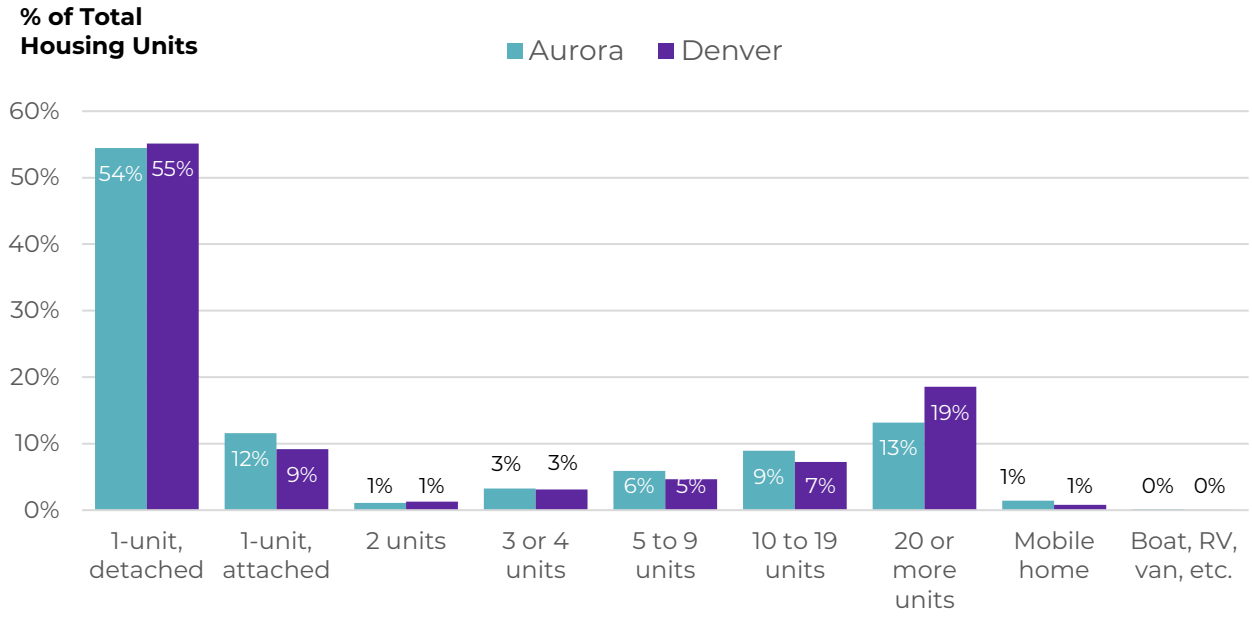
Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

Census tracts with a higher percentage of residents over the age of 65 are shown in Figure 3-2. As of 2022, these areas are primarily located west of I-225 and south of Iliff Avenue and Jewell Avenue, and in housing built during the early waves of suburban development in Aurora during the 1960s and 1970s.

Figure 3-2. Population over 65 years old, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

Housing Characteristics



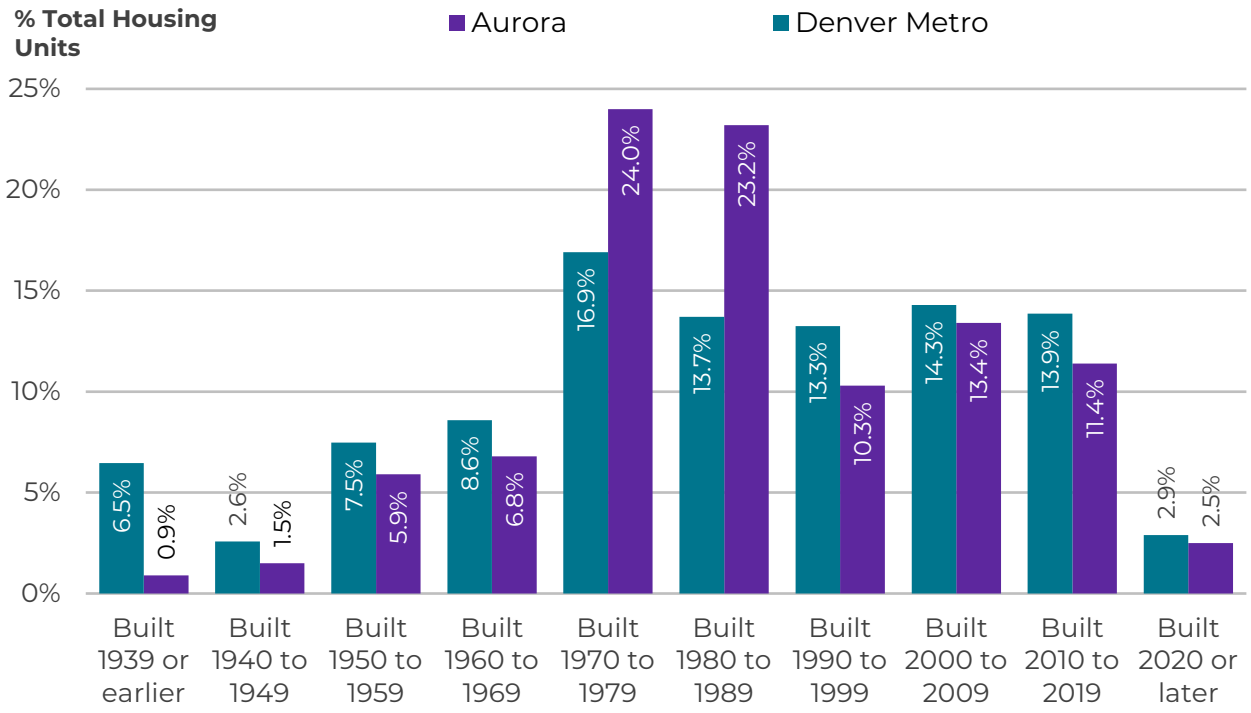
Housing typology directly influences people's travel behaviors and demand for transit services. Different housing types—such as single-family homes, multi-family units, or mixed-use developments—create distinct transportation needs and challenges. For instance, suburban areas with predominantly single-family homes are more likely to generate more car trips due to greater distances between homes, jobs, and services. Conversely, dense multifamily or mixed-use developments are better suited to support public transit, biking, and walking due to high transit ridership potential and proximity to employment and services. A better understanding of Aurora's housing distribution will help align the current and future transportation network with the housing landscape.

Aurora's mix of housing typologies and tenures is generally aligned with that of the Denver Metro area. Most of the city's housing was constructed during a period of significant population growth that began in the 1970s. In recent years, the construction of multifamily housing has accelerated. However, as the city's population continues to grow, impacting housing prices and demand, its housing stock needs to evolve to continue serving the community's needs.

3.1.1.1 Housing Typology

Consistent with the Denver Metro area, Aurora's housing inventory primarily consists of single-family detached housing, representing 54.4 percent of the city's housing stock in 2022 (Figure 3-3). The City of Aurora has a lower percentage of large, multifamily housing structures than the Denver Metro overall, with 13.2 percent of housing structures with 20 or more units (compared to 18.5 percent in the overall metro area). As previously mentioned, multifamily housing increases population density, and when located near well-planned transit systems, can increase transit ridership and reduce dependency on single-occupancy vehicles. The relationship between transit and population density is explored further in Section 6.

Figure 3-3. Housing by Units in Structure, Aurora and Denver Metro, 2022



Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

3.1.1.2 Year Built

The year a home or neighborhood was built often reflects the era's transportation preferences. Neighborhoods constructed before the dominance of the car are more likely to feature pedestrian-friendly infrastructure such as sidewalks, narrow streets, and nearby transit stations. Neighborhoods built after World War II were often designed around the car, featuring wider streets, larger lots, and fewer pedestrian and transit connections. Understanding the age of the housing stock enables more targeted investment in transportation infrastructure.

Nearly half of Aurora's existing housing stock was built in the 1970s and 1980s, as shown in Figure 3-5. Most of these neighborhoods were constructed on a curvilinear street network facing away from major roadways. Connectivity from within these neighborhoods is limited due to winding roadways and cul-de-sacs. The Denver metro area has a higher share of both older (built before 1970) and newer housing (built after 1990) than the City of Aurora.

Figure 3-4. Housing by Year Built, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

3.1.1.3 Tenure

Housing Tenure, whether residents rent or own, influences mobility patterns and travel choice. Often, renters are more likely to rely on public transit compared to homeowners. Renters are more likely to live in denser environments where transit options, walking, or biking are more accessible and convenient and parking is limited. Additionally, renters with lower incomes may not have access to a vehicle, making other mobility options essential for daily travel.

As shown in Table 3-4, in 2022 approximately 62.1 percent of occupied housing units in Aurora were owner-occupied and 37.9 percent were renter-occupied, nearly the same breakdown as the Denver metro area.

Table 3-4. Housing Summary, 2022

	Aurora		Denver Metro	
	Total	% Total	Total	% Total
Total Housing Units	**150,920**		**1,205,949**	
Occupied housing units	145,493	96.4%	1,143,943	94.9%
Vacant housing units	5,427	3.6%	62,006	5.1%
Tenure				
Owner-occupied	90,322	62.1%	717,288	62.7%
Renter-occupied	55,171	37.9%	426,655	37.3%

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

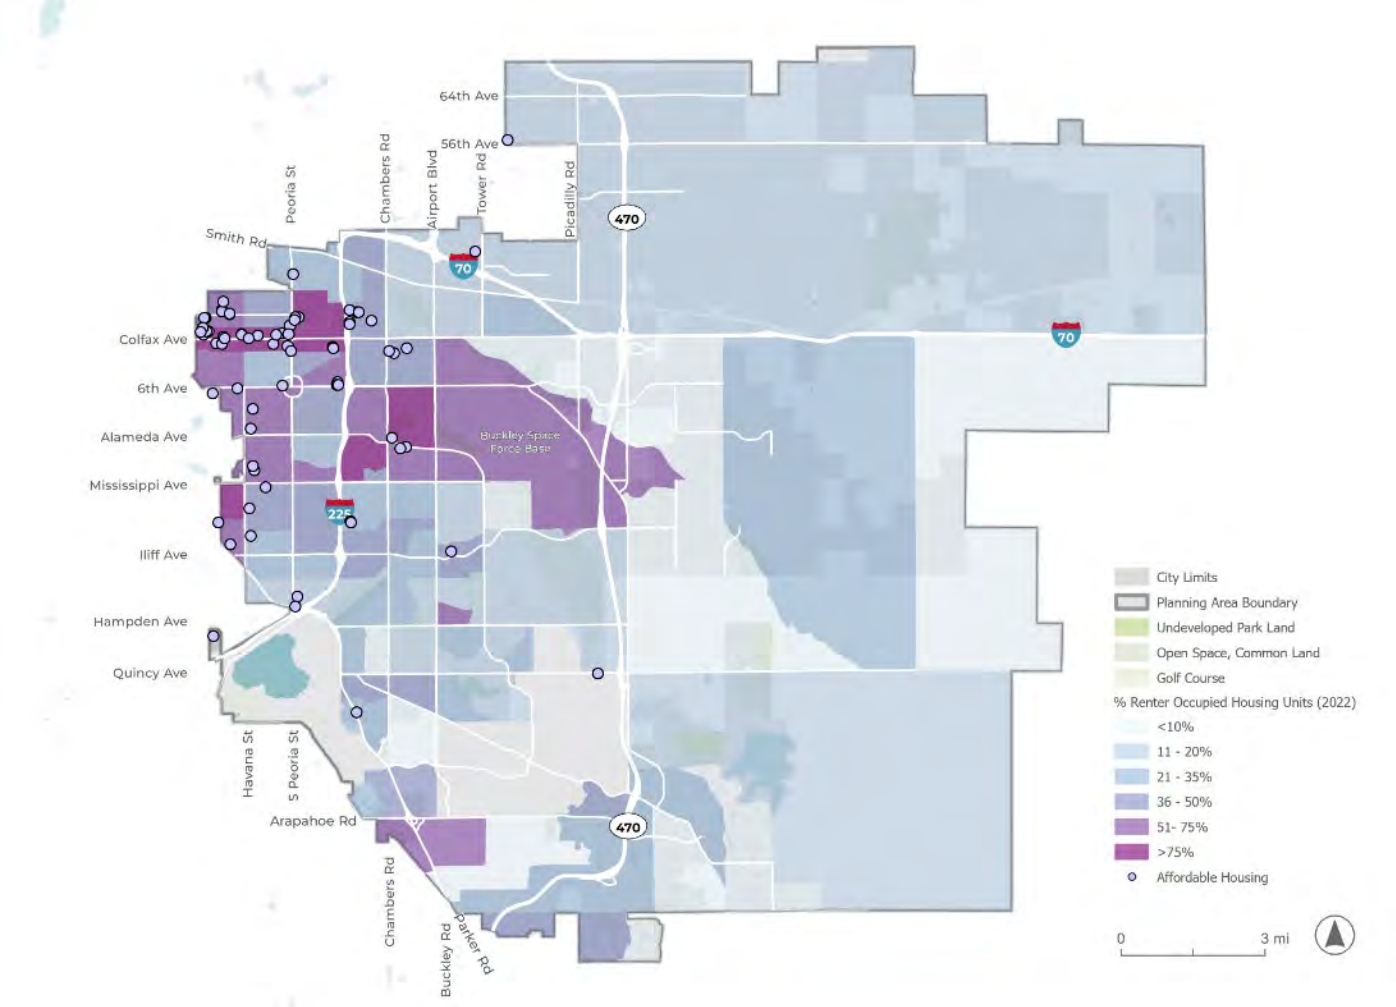


Table 3-5. Housing Tenure by Ward

Tenure	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Rent	57%	20%	56%	39%	26%	19%
Own	43%	80%	44%	61%	74%	81%

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

Table 3-5 reveals that higher concentrations of renter-occupied housing are in Wards I and III. Figure 3-5 highlights that concentrations are clustered along Colfax Avenue, Havana Street, and Chambers Road. Affordable housing is concentrated along Colfax Avenue in Original Aurora, with a smaller distribution throughout the rest of the city. In Figure 3-6 (below), the dark purple represents areas with more than 75 percent of housing units occupied by renters. These areas have more than double the proportion of renters as Aurora on average. Areas with a higher share of renters and affordable housing complexes, such as Ward I and Ward III, should prioritize multimodal transportation investments, including bike lanes and transit, to enhance access to jobs and services.

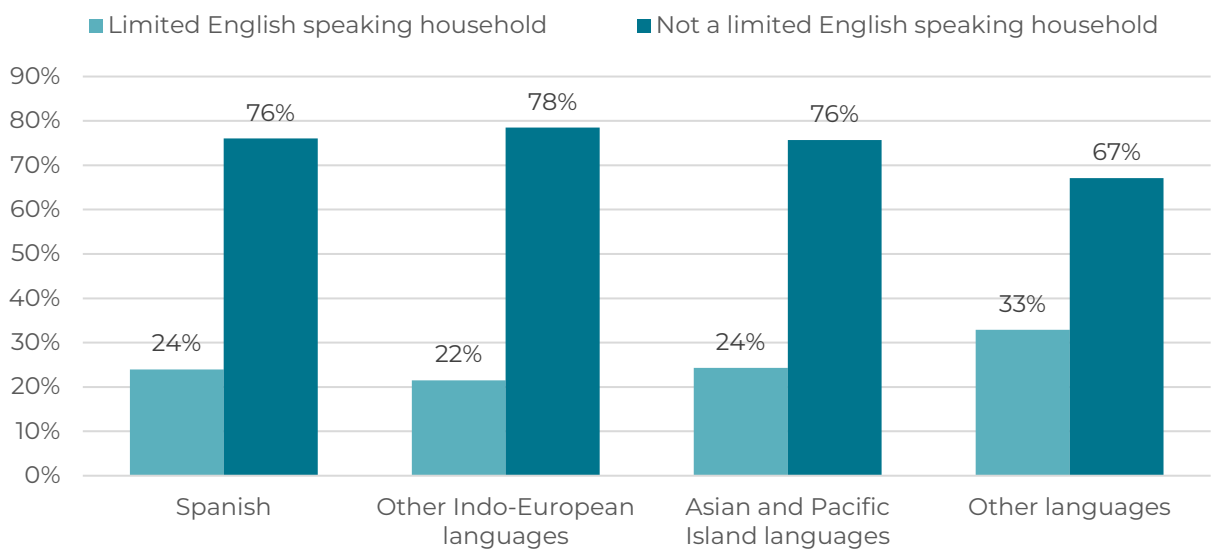
Figure 3-5. Renter Occupied Housing, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

3.2 Social Vulnerability Analysis

Understanding where vulnerable people and communities are concentrated can help prioritize investment in areas where people face greater transportation challenges and inequities. Socially vulnerable populations often include low-income households, seniors, people with a disability, people with limited English proficiency and communities of color. These groups are more likely to be affected by poor transit connectivity, unsafe infrastructure, and long commutes that can limit access to opportunities such as jobs, education, and essential services.

This section provides a spatial analysis (mapping) of concentrations of people with social, economic, and environmental vulnerabilities. Individual metrics on language spoken, race and ethnicity, car ownership, and household income were analyzed and are discussed in the following sections.



Following these individual metrics, a series of combined metrics is compiled and mapped using the Environmental Justice Index developed by the U.S. Centers for Disease Control (CDC). The Environmental Justice Index (EJI) indicators are categorized into three main areas: Social Vulnerability, Environmental Burden, and Health Vulnerability. Each of these analyses show that Aurora's most vulnerable people are concentrated in the general area of Central and Original Aurora, defined in the introduction to this Chapter.

Primary Language or Limited English Proficiency (LEP)

Limited English-speaking households are more likely to experience barriers to accessing and navigating the transportation system. LEP individuals may struggle to understand signage, schedules, and fare systems if they are only available in English. If individuals do not feel confident using the available transportation services, they have limited access to employment, education, healthcare, and other essential services.

Approximately 8 percent of households in Aurora are limited English-speaking households, including nearly 6,700 Spanish-speaking households. The breakdown of these households by language spoken at home is shown below in Figure 3-7.

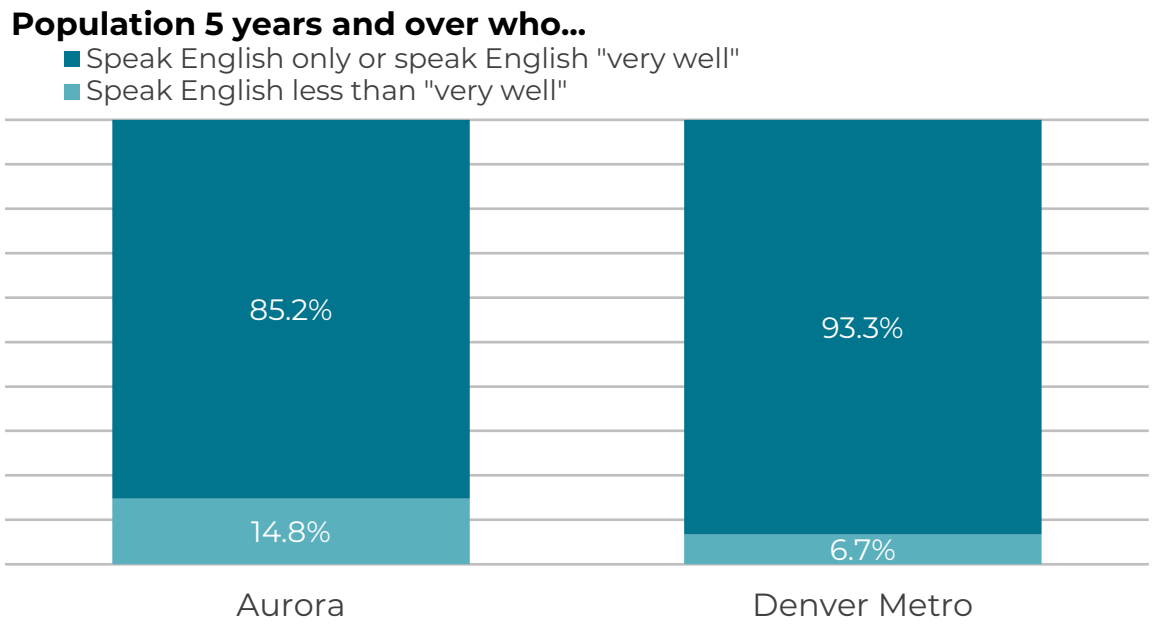


Figure 3-6. Households by Limited English-Speaking Status, Aurora, 2022

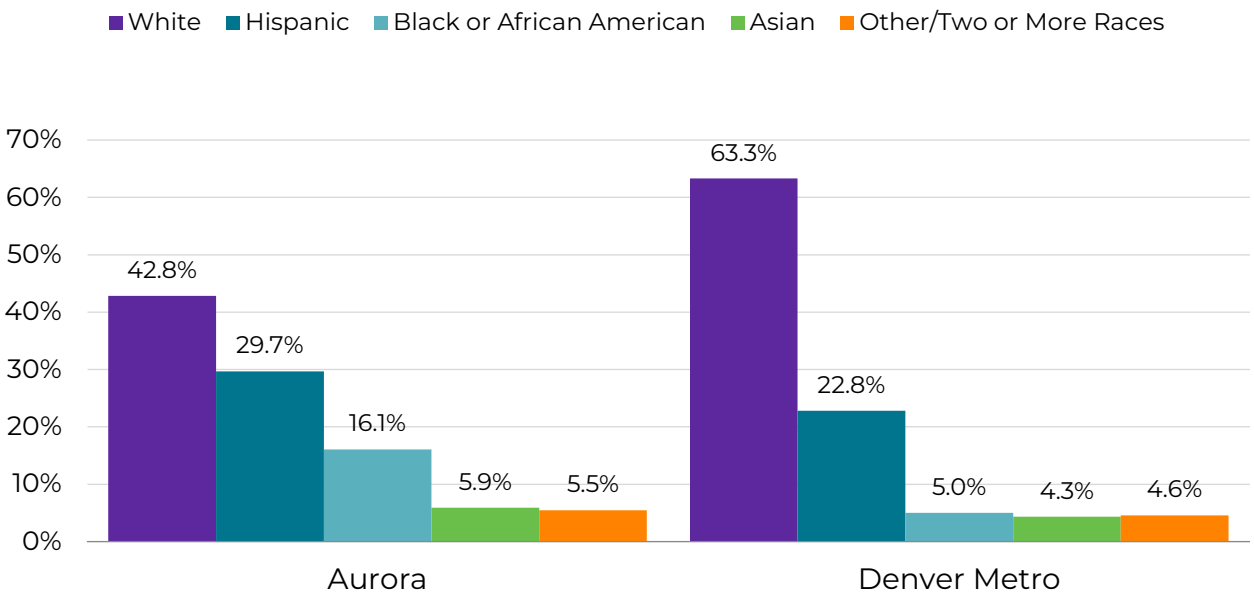
Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

Compared to the Denver Metro area, a larger share of the population in Aurora has limited English proficiency. As shown in Figure 3-8, 14.8 percent of Aurora's population over the age of five speaks English "less than very well" compared to 6.7 percent of the metro area.

Figure 3-7. Population by English Proficiency, 2022



Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

Race & Ethnicity

Historical inequities and development patterns have influenced how people of different races and ethnicities navigate cities. Some of these inequities persist today, and it is important to understand the racial makeup of communities to resolve these inequities. Communities of color are more likely to experience barriers to mobility, including fewer transit options, longer commutes, and unsafe infrastructure.

Aurora has a higher proportion of non-white residents than the metro area as a whole. Approximately 42.8 percent of Aurora's population is white compared to 63.3 percent of the Denver Metro area, as shown in Figure 3-9.

Figure 3-8. Race and Ethnicity, 2022

Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

When evaluated by Ward, it becomes clear that communities of color are more concentrated in parts of the city than others. Communities of color comprise a larger portion of Wards I and III, which are older and more urban areas of Aurora. For instance, Ward III has a higher share of Black/African American residents, and Wards I and III have a higher share of Hispanic residents. These areas of Aurora are better served by transit; however, many streets have too narrow or missing sidewalks to facilitate safe trips.

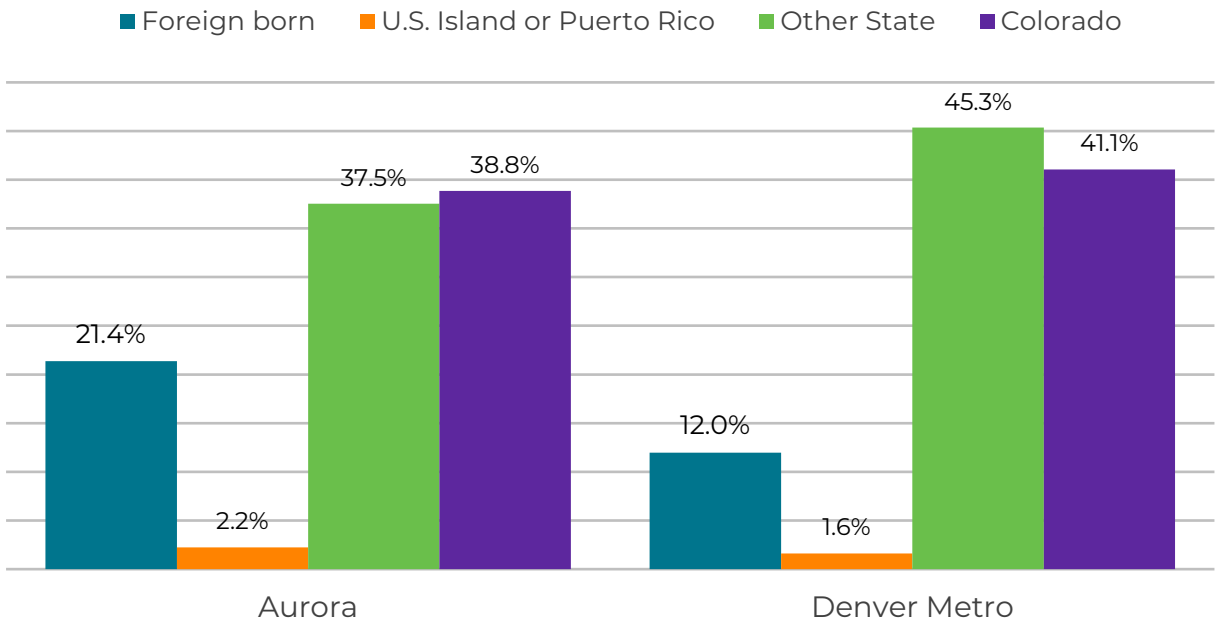


Table 3-6. Race and Ethnicity by Ward

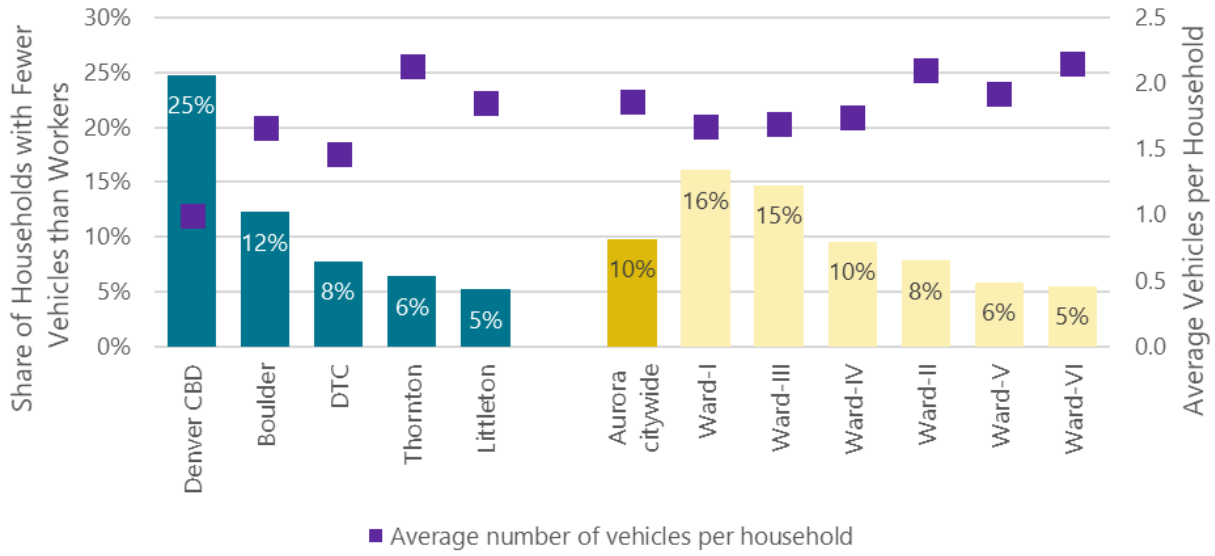
Race/Ethnicity	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
White	22%	37%	29%	43%	58%	65%
Black/African American	15%	18%	24%	19%	12%	7%
Hispanic	52%	32%	37%	27%	20%	14%
Asian	6%	7%	4%	6%	5%	7%
Other/Two or More Races	5%	5%	5%	5%	5%	6%

Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

In addition to having a more racially diverse population, Aurora also has a higher share of foreign-born residents overall than the Denver Metro area. As of 2022, 21.4 percent of Aurora residents are foreign-born, compared to 12 percent of the overall metro area.

Figure 3-9. Population by Place of Birth, 2022



Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

Car Ownership

Car ownership greatly affects how people move around Aurora and access services. Individuals or households with access to vehicles have greater flexibility and independence in their travel choices compared to those with limited or no access to a vehicle. In areas with high car ownership, different transportation infrastructure must be considered, such as parking and traffic management. Areas with lower car ownership may require additional investment in public transit and bicycle and pedestrian infrastructure. Additionally, lower-income households are more likely to have limited access to a personal vehicle, making affordable and reliable public transportation services critical for equitable access to opportunities.

Aurora residents have an average of 1.9 vehicles per household, reflecting the same average vehicle ownership for the entire Denver Metro area. However, 10 percent of Aurora households have fewer vehicles than workers, which is higher than the regional average of 7.5 percent. As shown in Figure 3-11, residents of Wards I and III have the lowest vehicle ownership, with approximately 15 percent of households having fewer vehicles than workers and 1.7 vehicles per household, similar to auto ownership levels in the City of Boulder. Ward 6 has the highest number of vehicles, with an average of 2.2 vehicles per household, similar to Thornton and Littleton.

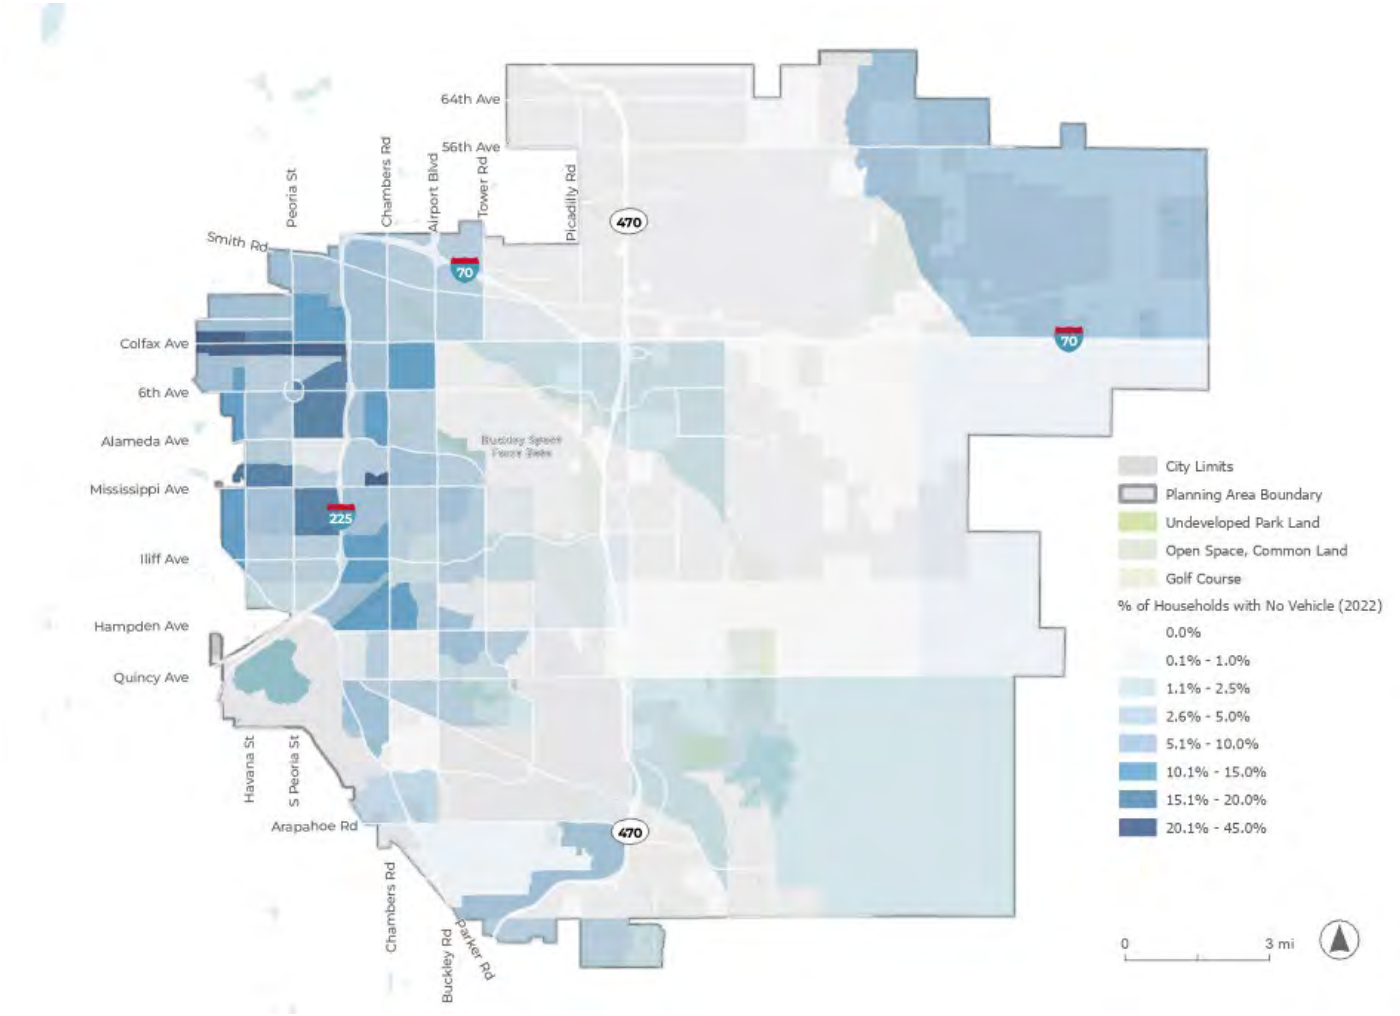


Figure 3-10. Vehicle Availability, 2022

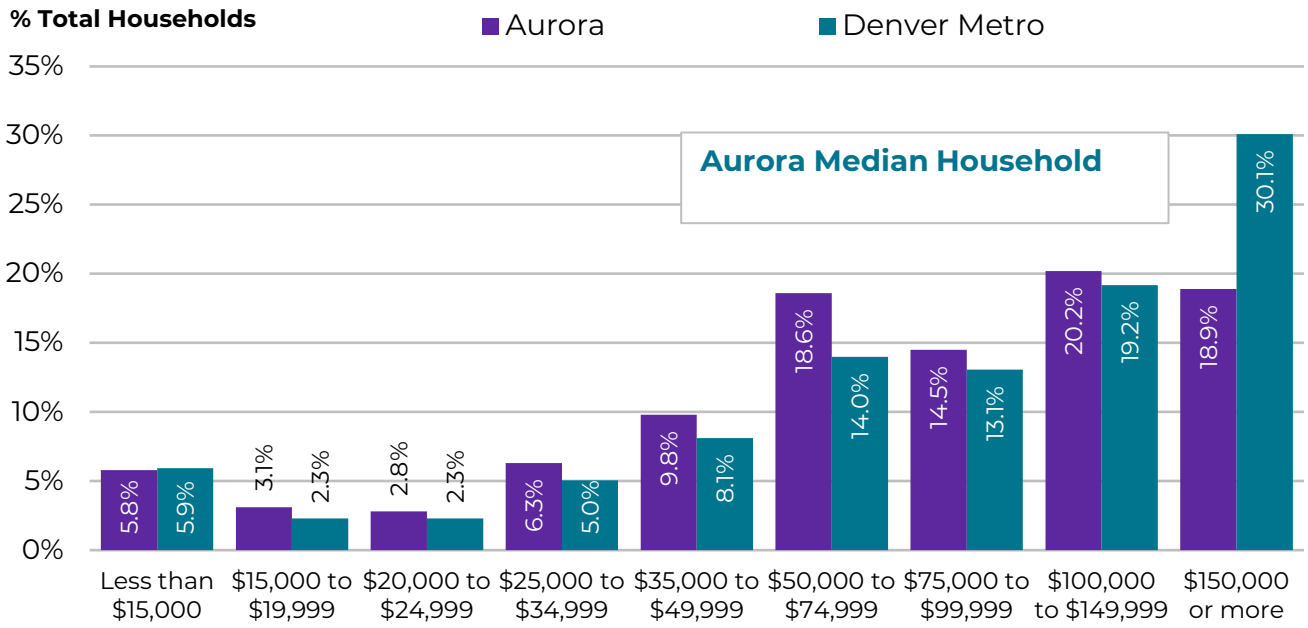
Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

Figure 3-12 highlights census tracts in Aurora with higher concentrations of households without access to a vehicle. Many of these tracts overlap with areas that have higher proportions of renter-occupied housing units. As previously mentioned, renters are more likely to live in denser environments that are more conducive to transit usage. In these areas, households without vehicles rely on other mobility options, such as public transit and micromobility, for their daily needs.

Figure 3-11. Zero Vehicle Households, 2022



Source: U.S. Census (ACS 1-Year Estimate); Economic & Planning Systems

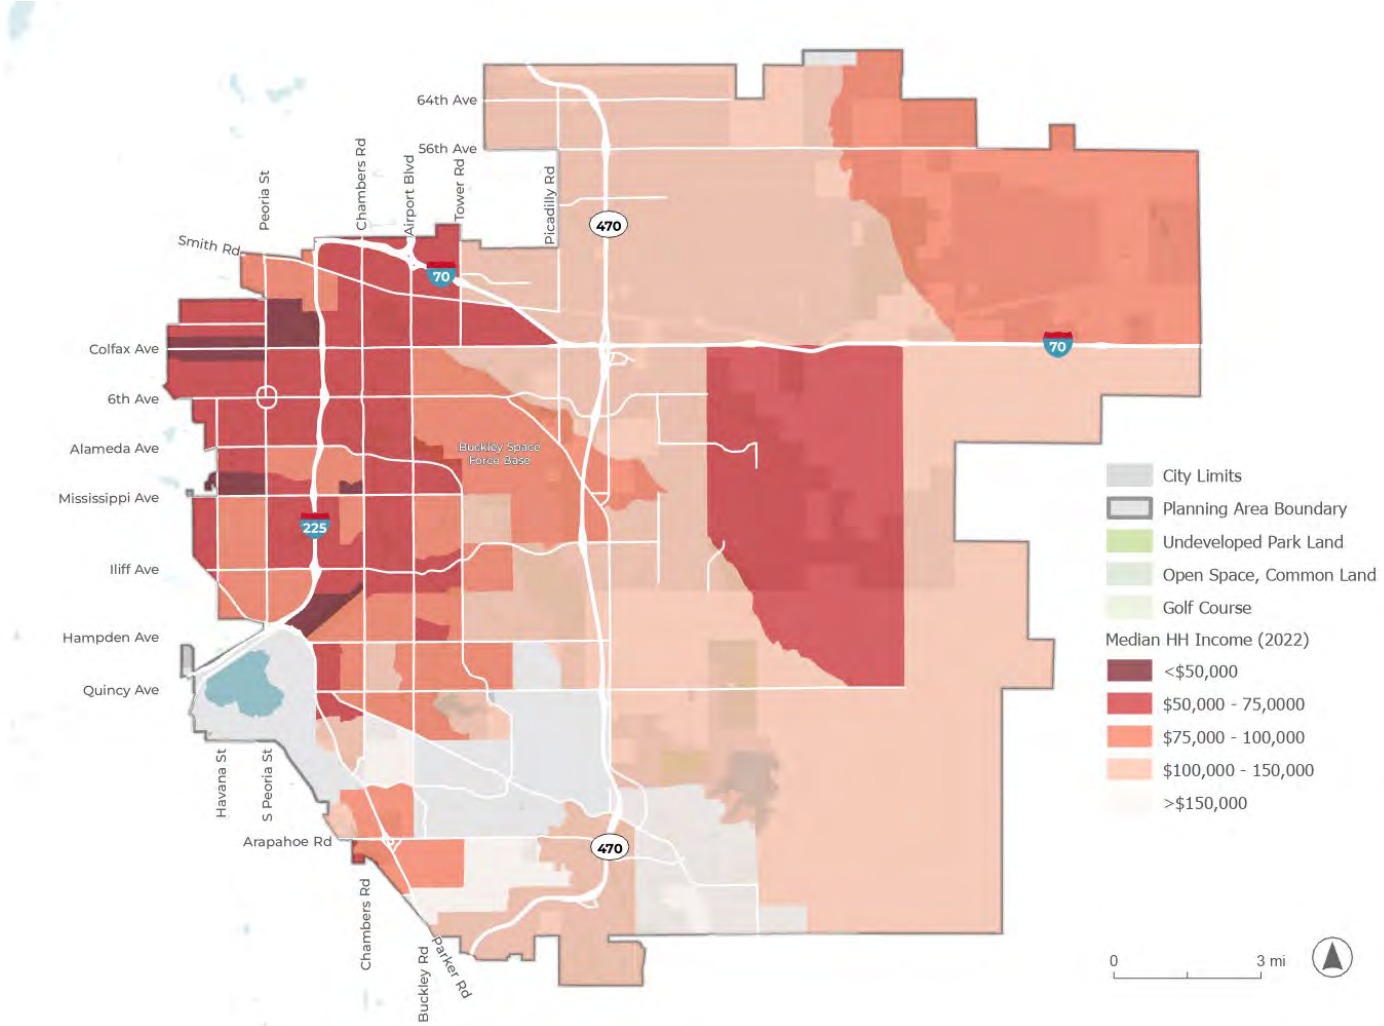
Household Income

Household income directly relates to people's ability to afford mobility options. Lower-income households are more likely to rely on public transit, biking, or walking due to the high costs associated with car ownership, such as fuel, insurance, and maintenance. In contrast, higher-income households likely have greater flexibility in their travel options, including owning multiple cars or using rideshare services. Understanding the distribution of household income across the city can help address disparities in transportation choice.

In 2022, the median household income in Aurora was $81,395, which is lower than the Denver Metro Area's median household income of $98,975. As shown in Figure 3-13, Aurora has a notably higher share of households in lower income brackets compared to the Denver Metro Area, with 60.9 percent of households earning under $100,000 annually compared to 50.7 percent in the Denver Metro Area. Additionally, there is a much lower percentage of households with incomes in the highest earning bracket of $150,000 in Aurora; only 18.9 percent of Aurora's households fall under this category compared to 30.1 percent in the Denver Metro area.

Figure 3-12. Household Income, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems



The median household income, when evaluated by Ward, shown in Table 3-7, indicates that Wards I and III have a higher concentration of lower-income households compared to the rest of Aurora. This pattern is demonstrated in Figure 3-14.

Table 3-7. Median Income by Ward

	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Median Household Income	$59,460	$94,454	$65,370	$74,910	$88,363	$132,166

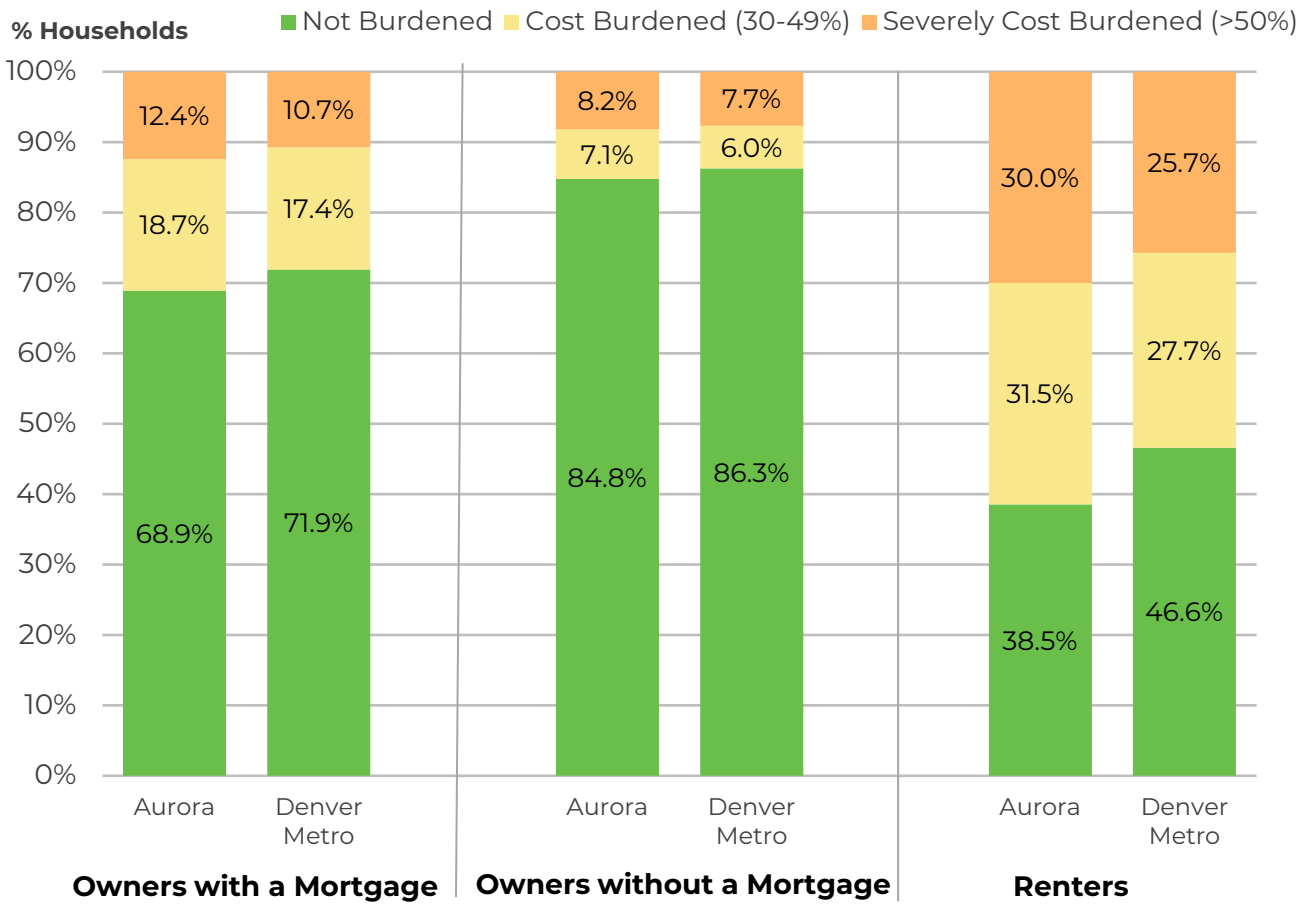
Figure 3-13. Median Household Income, 2022

Source: U.S. Census (ACS 1-Year Estimates); Economic & Planning Systems

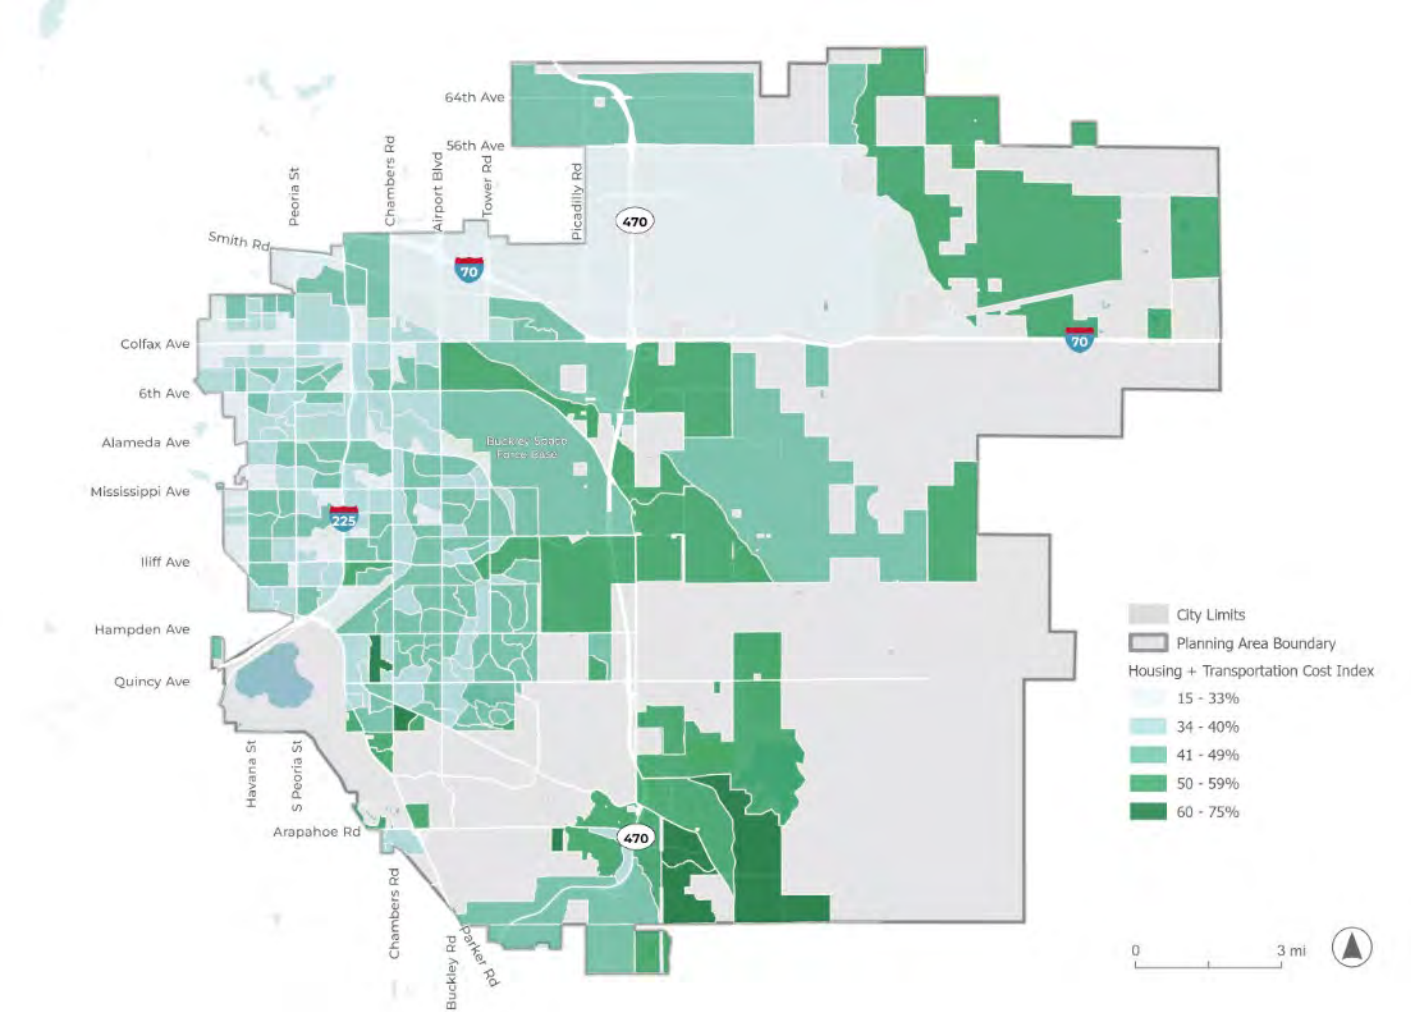
3.2.1.1 Housing Affordability



The U.S. Department of Housing and Urban Development (HUD) defines cost-burdened households as those that spend 30 percent or more of their income on housing-related costs, and severely cost-burdened households as those that spend over half of their income on housing. In Aurora and the Denver Metro area, a higher share of renters are cost-burdened compared to homeowners, who typically have more stable housing and lower housing costs. Roughly half of all renters in Colorado are cost-burdened, and nearly a quarter of renter households are severely cost-burdened. Regarding owner-occupied housing, cost burden is more common among homeowners with a mortgage than among those without one. When homeowners without a mortgage are cost-burdened, it is typically due to utilities and taxes that make up more than 30 percent of their income (for example, seniors with fixed incomes).

In 2022, 61.5 percent of renter households in Aurora were cost-burdened or severely cost-burdened, compared to 31.1 percent of owners with a mortgage, and 15.3 percent of owners without a mortgage. The Denver Metro area overall saw a slightly lower share of cost-burdened (and severely cost-burdened) renters and owners, as shown in Figure 3-15.

The Housing and Transportation Index is a tool to measure affordability. It combines the cost of housing and transportation as a percentage of household income to provide a more comprehensive picture of the cost of living. According to the Center for Neighborhood Technology (CNT), the combined costs of housing and transportation should ideally not exceed 45 percent of a household's income. Households spending more than this threshold are considered financially burdened.



In Aurora, households spend an average of 41 percent of their income on housing and transportation. Transportation costs are higher in more suburban and rural areas that have fewer mobility options, compared to households near activity centers, as shown in Figure 3-16.

Figure 3-14. Housing Cost Burden for Owners and Renters, 2022

Source: U.S. Census ACS 1-Year Estimates, Economic & Planning Systems

Figure 3-15. City of Aurora's Housing + Transportation Percentage of Income, 2019

Source: Center for Neighborhood Technology, 2019

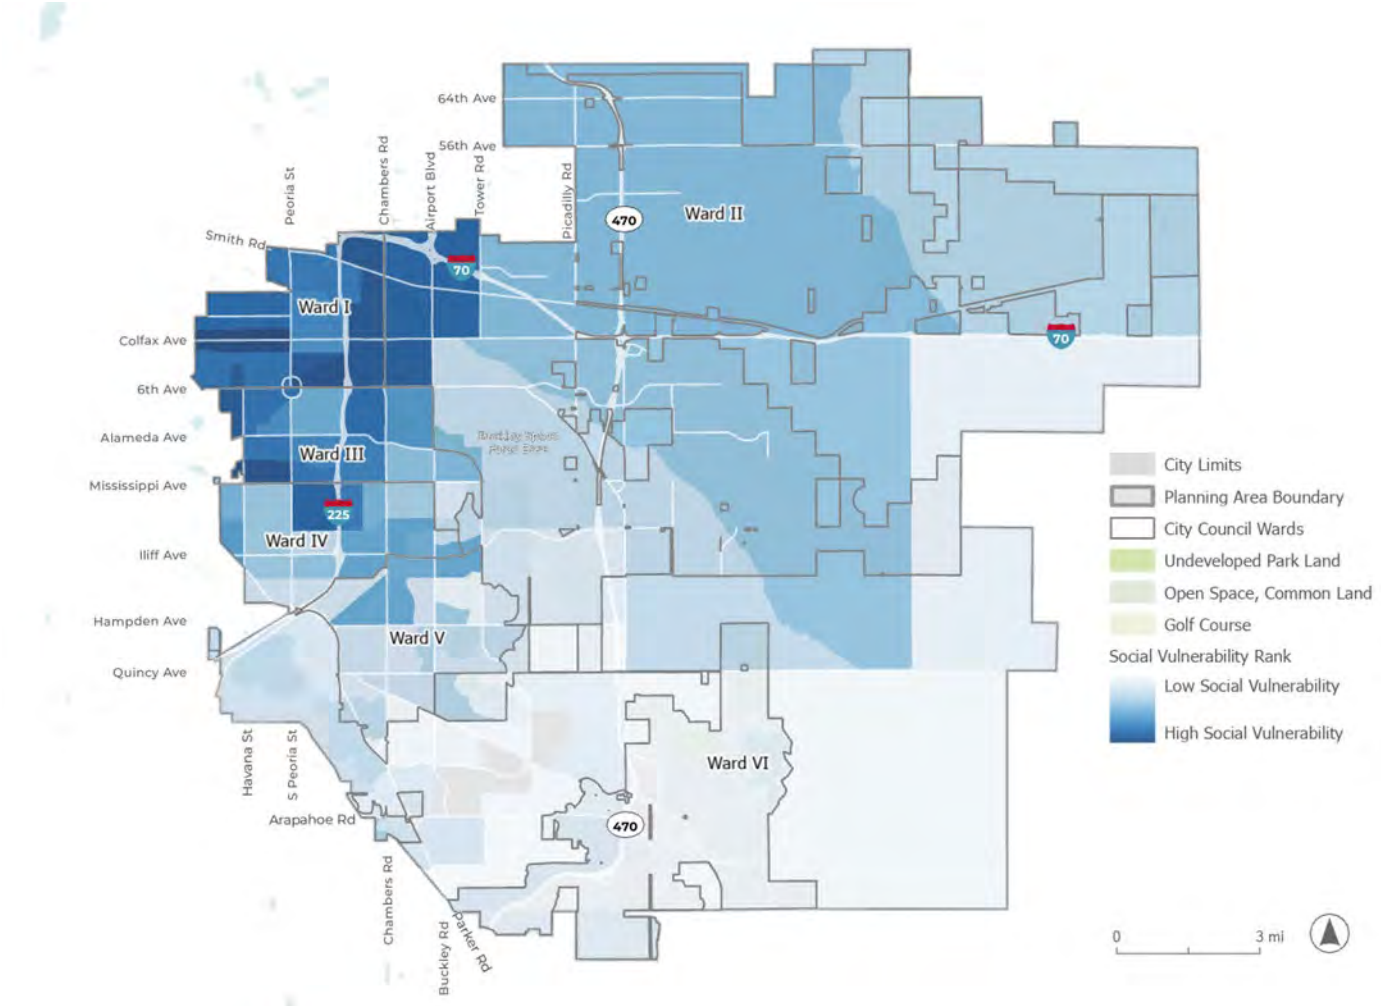
Underserved populations and neighborhoods

This section combines the various vulnerability factors explored earlier and uses an index to evaluate them as a whole to build a more comprehensive understanding of where vulnerable populations reside. This approach will help the team understand where inequities exist and prioritize transportation infrastructure investments based on community needs.

3.2.1.2 Environmental Justice Index (EJI)

The Environmental Justice Index (EJI) is a national, place-based tool developed by the Centers for Disease Control and Prevention (CDC) and the Agency for Toxic Substances and Disease Registry (ATSDR), in partnership with the Department of Health and Human Services' Office of Environmental Justice. This tool ranks every census tract based on 36 environmental, social, and health factors (shown in Figure 3-17) to determine the cumulative impacts of environmental injustice. These factors each fall under three categories—social vulnerability, environmental burden, and health vulnerability.

Figure 3-16. CDC/ATSDR Environmental Justice Index Indicators



Overall Environmental Justice Rank	Social Vulnerability	Racial/ Ethnic Minority Status	Minority Status
		Socioeconomic Status	Poverty
			No High School Diploma
			Unemployment
			Housing Tenure
			Housing Burdened Lower-Income Households
			Lack of Health Insurance
			Lack of Broadband Access
		Household Characteristics	Age 65 and Older
			Age 17 and Younger
			Civilian with a Disability
			Speaks English "Less than Well"
		Housing Type	Group Quarters
			Mobile Homes
	Environmental Burden	Air Pollution	Ozone
			PM2.5
			Diesel Particulate Matter
			Air Toxics Cancer Risk
		Potentially Hazardous & Toxic Sites	National Priority List Sites
			Toxic Release Inventory Sites
			Treatment, Storage, and Disposal Sites
			Risk Management Plan Sites
			Coal Mines
			Lead Mines
		Built Environment	Recreational Parks
			Houses Built Pre-1980
			Walkability
		Transportation Infrastructure	High-Volume Roads
			Railways
			Airports
		Water Pollution	Impaired Surface Water
	Health Vulnerability	Pre-existing Chronic Disease Burden	Asthma*
			Cancer*
			High Blood Pressure*
			Diabetes*
			Poor Mental Health*

Social Vulnerability

Social vulnerability refers to the potential negative effects on communities resulting from external stresses. The EJI's social vulnerability module considers demographics, socioeconomic status, household characteristics, and housing-related factors, such as poverty, unemployment, age, and housing tenure.

Figure 3-18 indicates that people in Wards I and III are more vulnerable to external stressors than those in other areas of the city.

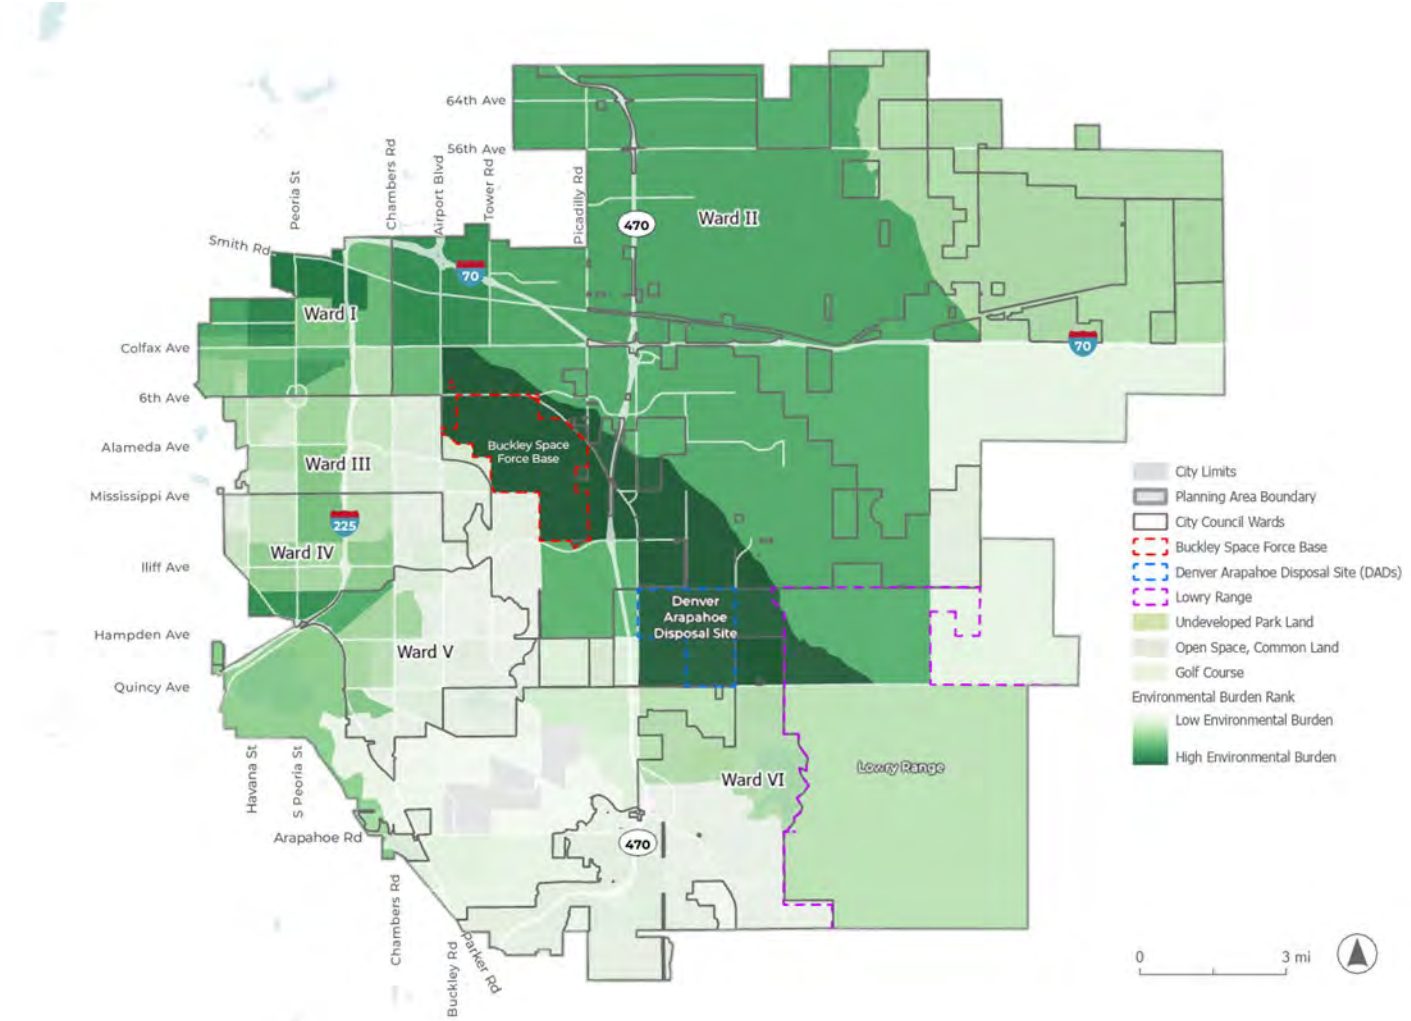
Figure 3-17. Social Vulnerability Ranking, 2022

3

Source: Centers for Disease Control and Prevention and Agency for Toxic Substances Disease Registry. 2022 Environmental Justice Index. https://www.atsdr.cdc.gov/placeandhealth/eji/index.html

Environmental Burden

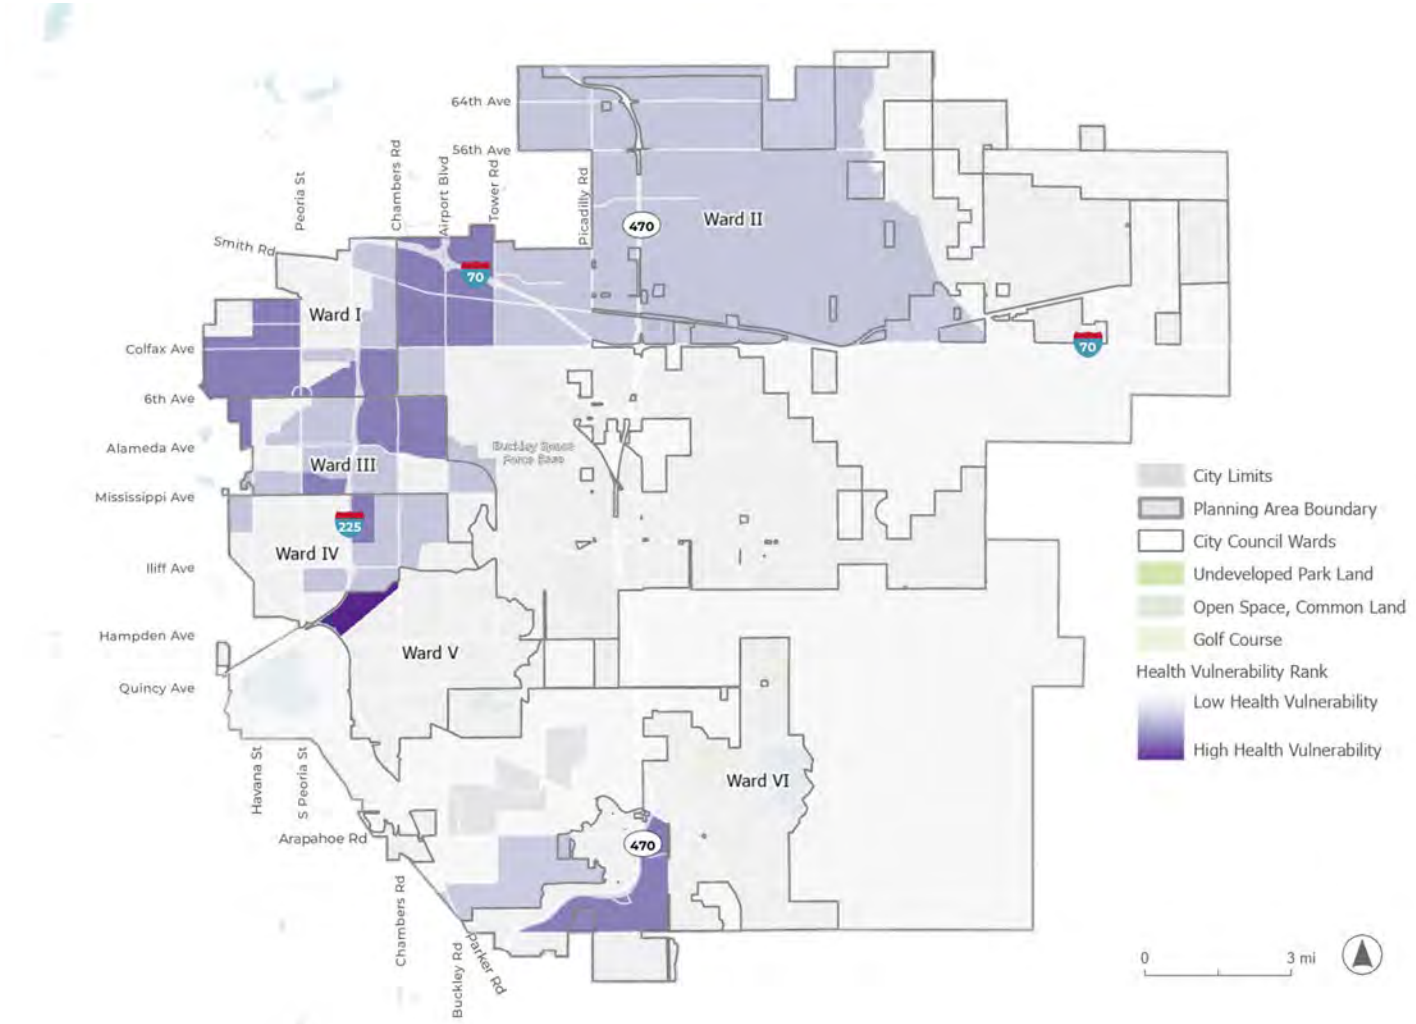
The highest concentrations of environmental burden are located in the vicinity of the Buckley Space Force Base; the Denver Arapahoe Disposal Site (DADS), and the former Lowry Bombing Range Figure 19). The DADS is located just east of E-470 at Hampden Avenue and is a former superfund site. The Lowry Bombing Range is an affected area of about 100 square miles with dispersed contamination and former intercontinental ballistic missile sites from about Hampden Avenue and Quincy Avenue to the Douglas County border, an area of generally low population density.



3.2.1.3 Health Vulnerability

Figure 20 highlights census tracts that have higher rates of existing burden from pre-existing chronic diseases such as asthma and cancer. These census tracts are clustered around the freeway system and near industrial areas.

Overall Environmental Justice Index Ranking



Overall Environmental Justice Index rankings (Figure 21) represent the summation of percentile rankings from the social vulnerability, environmental burden, and health vulnerability modules. The higher an area ranks, the more vulnerable an area is. This overall ranking shows that through a health and equity lens, areas of Central and Original Aurora are the most vulnerable to negative social and health impacts.

Figure 3-18. Environmental Burden Ranking, 2022

3.3 Economy

Different industries have varying transportation needs and patterns. Analyzing the distribution of these different sectors will help identify barriers and opportunities for the overall transportation network. For instance, industrial or manufacturing workers may require convenient and efficient access to freight routes and transit systems that support shift work, while employees in service-oriented or technology industries may benefit from reliable public transit options or bike-friendly infrastructure near urban centers. The geographic distribution of employment hubs, such as office parks, retail centers, or industrial zones, shapes commuting patterns and the demand for transportation services. Additionally, understanding the economic base helps anticipate future changes, such as the rise of remote work or shifts in local industries, which may alter traffic volumes, transit ridership, or the need for infrastructure expansion. A well-functioning transportation system is essential for supporting Aurora's economic growth goals by ensuring workforce accessibility and improving overall efficiency in the movement of both people and goods.

From 2010 to 2022, Aurora added a total of 55,000 jobs across all industries, from 112,000 in 2010 to 167,000 in 2022, an increase of 49.1 percent over 12 years and an annual growth rate of 3.4 percent per year (Table 3-8). This growth rate is higher than Denver Metro's average annual growth rate of 2.3 percent. A third of new jobs (share of change) in Aurora during this period were in healthcare, a sector that grew by over 18,000 jobs. The growth in healthcare jobs is attributed to the development and expansion of the Anschutz Medical Campus, the adjacent V.A. Hospital, and the Fitzsimons Innovation Community. The industrial and construction sectors accounted for approximately a quarter of new jobs, primarily in the construction, manufacturing, wholesale trade, and transportation and warehousing sectors.

From 2010 to 2022, the share of total jobs in Adams County and Arapahoe County located in Aurora has increased from 24.8 percent to 27.3 percent (Table 3-9). Aurora also captured 34.4 percent of all job growth in these two counties.

Table 3-8. Employment by Industry, Aurora, 2010-2022

Aurora	2010	2022	2010-2022		
			Total	% Change	Share of Change
Agriculture, Forestry, Fishing and Hunting	388	806	418	107.7%	0.8%
Mining, Quarrying, and Oil and Gas Extraction	107	38	-69	-64.7%	-0.1%

Source: JobsEQ; Economic & Planning Systems

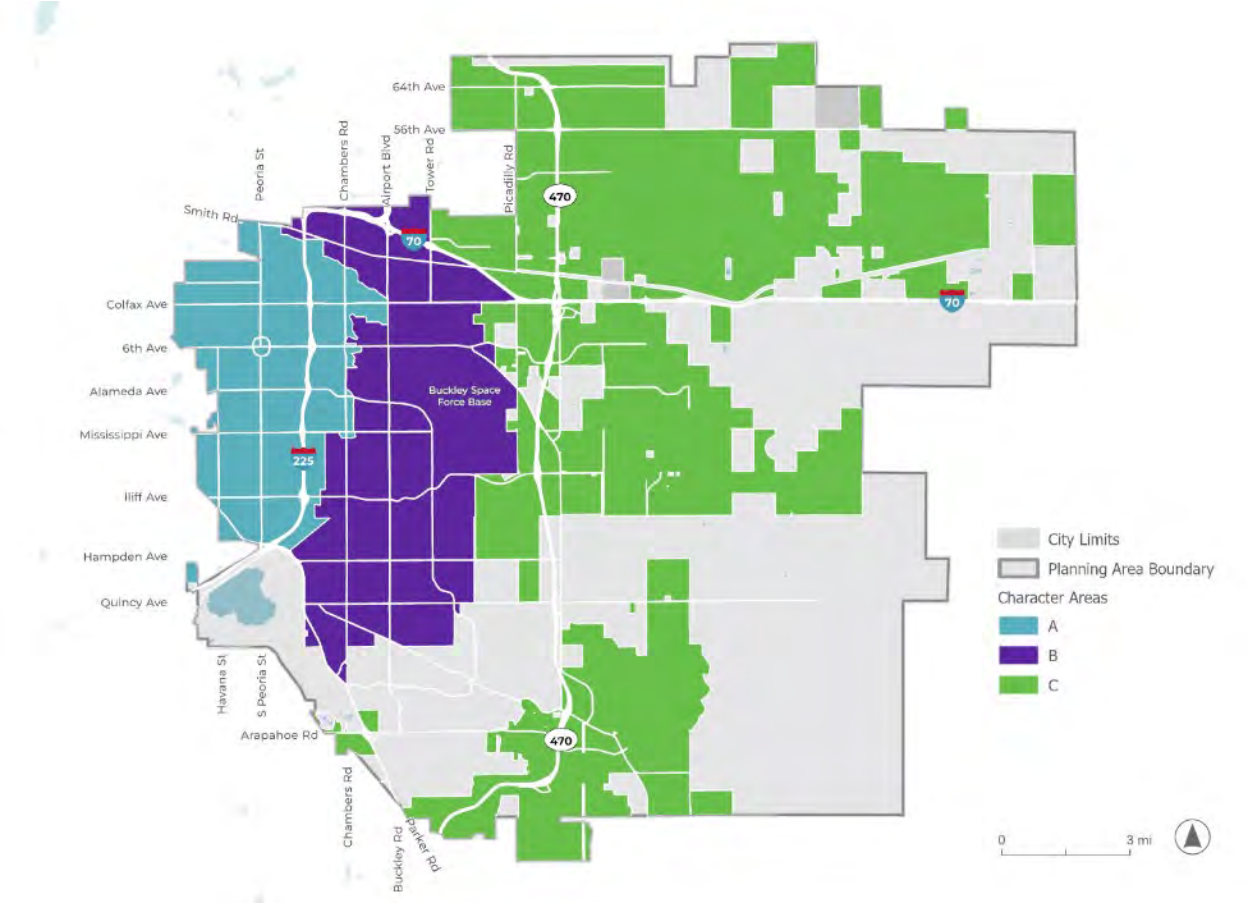
The largest industries in Aurora include Retail Trade, Professional, Scientific, and Technical Services, and Transportation and Warehousing (Figure 3-22). Retail trade is the largest industry, accounting for roughly 18,000 jobs, which is typical for a largely suburban, non-central city location. The next largest sector is professional, scientific, and technical services (accounting, legal, engineering, research and development) with just over 12,000 jobs. Combined, transportation, warehousing, and wholesale trade make up nearly 20,000 jobs, which is larger than the retail sector. There are several retail distribution warehouses and fulfillment centers in Northeast Aurora, including multiple Amazon fulfillment centers.

Figure 3-21. Aurora Industries by Employment, 2022

Source: JobsEQ; Economic & Planning Systems

The relationship between job centers and the transportation network is discussed further in Chapter 6: Public Transportation Overview and Chapter 8: Moving Around Aurora.



3.4 Aurora's Places

This section provides an overview of Aurora's land use in relation to its transportation network. The section includes a description of the three primary character areas in Aurora, the existing and desired Placetypes as described in Aurora Places, and a review of the trends in numbers and spatial patterns of new real estate development in Aurora.

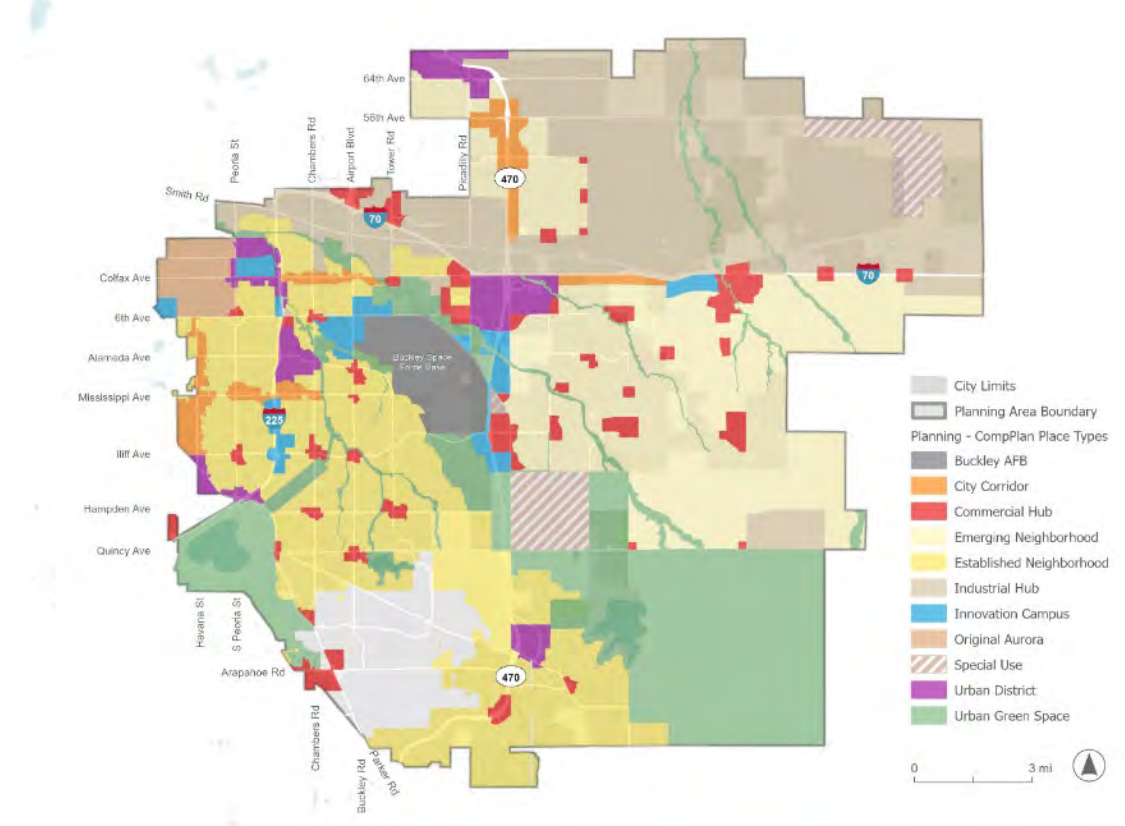
Aurora Character Areas

The City of Aurora's Unified Development Ordinance (UDO) defines three different character areas: Subarea A, B, and C (Figure 23). Each character area has a distinctive feel based on when these areas were platted and later developed.

Figure 3-22. Aurora's Character Areas

Subarea A comprises west Aurora, which was primarily developed before 1960, with southern portions developed into the 1970s. Development follows a general grid pattern with some variation, with block dimensions typically 330 by 660 feet, bisected by alley access. Arterial and collector streets were designed for commercial and multi-family frontage. Most buildings, residential and non-residential, are smaller scale, with greater potential for infill development. Land uses in Subarea A vary, ranging from industrial to residential and commercial.

Subarea B is primarily central Aurora, generally between I-225 and E-470, and was platted and developed after the 1970s. Compared to Subarea A, blocks tend to be larger, and the street networks are curvilinear. The street network is comprised of disjointed local streets that connect to large arterials and collectors, which provide through access to other parts of the city. Many housing developments were constructed away from the street, creating fence canyons and auto-centric streetscapes. Most commercial buildings are oriented around the car, with large parking lots fronting arterials and collectors. The current street network creates connectivity challenges between residential and commercial areas.



Subarea C is east Aurora, which is mainly undeveloped agricultural land and prairie. The area is under greater pressure as demand for industrial storage facilities and housing intensifies. The street grid has yet to be developed and will occur as new neighborhoods and commercial areas are constructed.

3.5 Placetypes and Mobility Networks

Aurora Places, the city's adopted comprehensive plan, identified 10 distinct placetypes in Aurora today and to be developed in the future. The ten types are: Urban District, Innovation District, Industry Hub, Buckley Air Force Base, Urban Green Space, Original Aurora, Established Neighborhood, Emerging Neighborhood, City Corridor and Commercial Hub. Buckley Air Force Base and Urban Green Space were excluded from this analysis as they have their own distinct networks and purposes.

The placetypes capture the general character of an area, various land uses, street networks, and mobility options that help define each place. These elements combine to create recognizable places, whether that be a vibrant urban district, mixed-use commercial corridor, or livable and desirable neighborhood. Aurora's existing layout presents challenges to achieving multimodal connectivity and expanding future identified places; however, new development, redevelopment, and future capital improvement projects offer opportunities to incrementally move toward these desired networks and environments. Figure 3-24 depicts the placetypes and their locations within Aurora.

Figure 3-23: Aurora Placetypes Map

Urban Districts

Urban Districts are Aurora's existing and future activity centers, including entertainment areas, civic institutions, retail destinations, and multifamily housing. These areas are designed to support higher-intensity uses and are intended to be walkable, bikeable, and well-connected.

Desired Condition

Urban Districts should feature a continuous street grid with short blocks, frequent intersections, and clear wayfinding. Streets should include safe, well-marked crossings, dedicated bike facilities, and accessible pedestrian routes. Streetscapes should incorporate street trees, lighting, seating, and other amenities that create a comfortable, engaging environment. Overall, the network should be highly connected, reduce travel distances, and support walking, biking, and rolling.

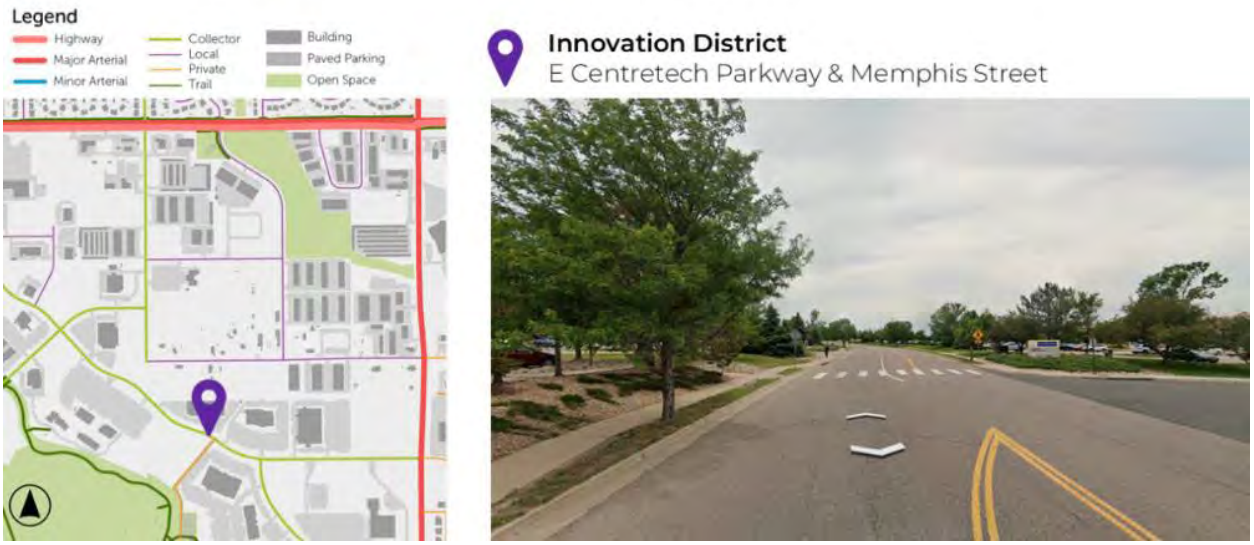
Existing Condition

Figure 3-25 shows an example street within an Urban District, a private street at Aurora City Place, that demonstrates some desired elements, such as wide sidewalks, landscaping, seating, pedestrian-scale lighting, short crossings, angled parking, and buildings oriented close to the street. However, the broader street network does not reflect the desired grid. The surrounding area is fragmented, with indirect routes, limited connectivity to nearby neighborhoods, extensive surface parking, and many buildings set back from the street.

Figure 3-24: Existing Urban District

Innovation Districts

Innovation Districts should be places designed to spark new ideas and creativity. They should include light industrial uses, business parks, and medical or educational institutions arranged in a campus-like environment with gathering spaces and a connected street grid.



Desired Condition

Innovation Districts should have a cohesive, connected grid that supports walking and biking and allows easy movement between businesses, institutions, and start-ups. Streets should reinforce a campus feel—encouraging interaction and collaboration—while still accommodating necessary auto access and parking. A well-connected network and inviting public spaces are essential to creating an environment where innovation can thrive.

Existing Condition

Figure 3-26 shows the current street network within a designated Innovation District. Centretech Parkway functions as a collector linking several businesses and the Community College of Aurora. While it provides access, the surrounding area consists mainly of parking lots, low-rise offices, and vacant parcels. Sidewalks are incomplete, with gaps on private streets, minimal widths of about five feet, and crossings spaced far apart. The area lacks gathering spaces and a cohesive campus character. Overall, the existing network does not reflect the highly connected, walkable environment envisioned in Aurora Places.

Figure 3-25: Existing Innovation District

Industry Hubs

Industry Hubs should support the commercial and industrial activities that drive Aurora's economy. These large employment centers generate significant truck traffic, operate around the clock, and are typically located near highways for efficient access.

Desired Condition

Industry Hubs should have a street grid optimized for both freight movement and employee access. Roadways should be wide and well-marked, with designated truck lanes to minimize conflicts with smaller vehicles. Intersections and signal timing should accommodate large-vehicle turning movements and reduce freight delays. The network should provide direct connections to highways and rail lines while minimizing impacts to nearby residential and commercial areas through well-planned circulation and buffers.

Existing Condition

Figure 3-27 shows a designated Industry Hub with a grid-like street network that generally aligns with Aurora Places' desired pattern. Lanes are approximately 20 feet wide to support freight vehicles. The area includes a mix of residential, commercial, and light industrial uses but lacks buffers between these uses. While the grid supports efficient circulation and proximity to the highway meets the desired conditions, the absence of transitions or buffers highlights opportunities to reduce conflicts and improve compatibility with surrounding neighborhoods.

Figure 3-26: Existing Industry Hub

Original Aurora

Original Aurora is the city's first neighborhood, blending historic homes, commercial corridors, and an arts district. Its traditional street grid is a defining feature and should be maintained and enhanced to support strong pedestrian, bicycle, and transit connectivity.

Desired Condition

Original Aurora should feature a highly connected grid with widened sidewalks, clearly marked bike lanes, and improved crossings to create a safe and comfortable walking and biking environment. Enhanced transit service, particularly along key corridors such as East Colfax Avenue, should support easy connections between Aurora and central Denver. Infrastructure upgrades and reinvestment, including adaptive reuse that respects the neighborhood's historic character, are central to creating a vibrant and accessible community.

Existing Condition

Figure 3-28 illustrates the current street network in Original Aurora. While the grid pattern aligns with the vision in Aurora Places, many transportation elements fall short of contemporary standards. Sidewalks in residential areas are narrow, bicycle infrastructure is limited, and connectivity to commercial corridors is hindered. The area is predominantly low-density residential, characterized by deep setbacks and frequent driveways, which further reduce walkability and multimodal access.

Figure 3-27: Typical Local Street/Original Aurora

Established Neighborhoods

Established Neighborhoods are predominantly low-density residential areas made up of single-family detached and attached homes, with pockets of schools, parks, and religious institutions. Their curvilinear street patterns create barriers to walking and biking to nearby destinations. Established neighborhoods have great potential for enhancement, particularly in their layout and accessibility. While current street patterns can pose challenges for residents accessing essential services and amenities, there is opportunity to create more direct routes. By improving the street grid, established neighborhoods can have enhanced pedestrian and transit access, making it easier for everyone to reach vital resources, especially for those without personal vehicles.

Desired Condition

Established Neighborhoods should maintain their curvilinear character while improving multimodal connectivity. Short, protected pedestrian and bike routes should weave through neighborhoods, linking residents to parks, schools, adjacent neighborhoods, and nearby commercial areas. Streets and pathways should feel safe, welcoming, and well-maintained, supporting a community environment where residents can comfortably travel on foot or by bike.

Existing Condition

Figure 3-29 highlights the current street network within an Established Neighborhood. Uravan Street exhibits some desirable elements, including the presence of sidewalks that facilitate pedestrian movement, although the quality and continuity vary. The broader network partially aligns with Aurora Places, as it features a curvilinear layout and generally consistent sidewalks; however, it still lacks direct routes to commercial areas and daily services. Opportunities remain to enhance connectivity and make essential destinations more accessible without a car.

Figure 3-28: Existing Established Neighborhood

Emerging Neighborhoods

Emerging Neighborhoods are recently built subdivisions with diverse housing, parks, open space, and pedestrian and bicycle infrastructure, often arranged around a central gathering space and a traditional grid street pattern.

Desired Condition:

Emerging Neighborhoods should have a well-connected, grid-based street network that promotes safety, accessibility, and community interaction. Sidewalks should meet ADA standards and provide safe pedestrian access throughout the neighborhood. Intersections, mid-block crossings, and major streets should include clearly marked crosswalks and adequate lighting. Bike lanes should be clearly marked and integrated into the street design, connecting to parks, trails, and surrounding neighborhoods. Streets should facilitate multimodal travel while encouraging residents to walk, bike, and engage with community resources.

Existing Condition:

Figure 3-30 illustrates the Painted Prairie development, which features a grid street network that allows relatively easy navigation but often lacks sufficient collector connections. Continuous detached sidewalks support pedestrian movement between residential areas, commercial arterials, and greenspace. However, there is currently no dedicated bicycle infrastructure, and reliance on vehicles remains high. Opportunities exist to enhance connectivity, add bicycle facilities, and further improve multimodal safety and accessibility to foster a more vibrant, walkable neighborhood.

Figure 3-29: Existing Emerging Neighborhood

Commercial Hubs

Commercial Hubs are located at the edges of established and emerging neighborhoods, providing access to services, shopping, and entertainment. They should include gathering spaces and serve as key connections for transit users, pedestrians, and cyclists.

Desired Condition

Commercial Hubs should feature a well-connected street grid that enhances accessibility for all users. Streets should include wide, pedestrian-friendly sidewalks, clearly marked bike lanes, and high-frequency transit routes. The network should support safe, direct movement throughout the hub and to surrounding neighborhoods, encouraging foot traffic, social interaction, and economic activity.

Existing Condition

Figure 3-31 shows an existing Commercial Hub with numerous businesses, including retail shops and restaurants. While sidewalks are present, they are narrow (around 5 feet), and deep building setbacks and wide rights-of-way create a hostile pedestrian environment. Signalized crossings are spaced too far apart, forcing mid-block crossings, and there are limited direct connections to surrounding neighborhoods. The network is primarily designed for car access, and the area lacks the gathering spaces and walkable, bikeable connectivity envisioned in Aurora Places.

Figure 3-30: Existing Commercial Hub

City Corridor

City Corridors serve as the backbone of Aurora's urban fabric, linking neighborhoods, commercial hubs, and activity centers while supporting a diverse mix of transportation modes. These corridors are critical for facilitating the flow of people and goods, enhancing economic vitality, and shaping the city's public realm. Beyond moving vehicles efficiently, City Corridors are envisioned as vibrant, multi-modal streets that prioritize safety, accessibility, and connectivity for pedestrians, cyclists, and transit users. They provide opportunities for public life through well-designed streetscapes, including landscaping, seating, lighting, and spaces that encourage social interaction. By balancing mobility, placemaking, and economic activity, City Corridors can act as dynamic connectors that strengthen neighborhood cohesion, promote sustainable travel, and support Aurora's broader vision for a connected, walkable, and thriving city.

Desired Condition

City Corridors should prioritize pedestrian and cyclist engagement while maintaining accessibility for vehicles. Wide, well-maintained sidewalks with landscaping, benches, and pedestrian-scale lighting should create inviting walking environments. Crosswalks should be frequent, safe, and clearly marked. Dedicated bike lanes should connect to trails and surrounding neighborhoods, and transit stops should be conveniently located to encourage ridership. The corridor should support a vibrant mix of uses, making shops, services, and amenities easily accessible by all modes of travel.

Existing Condition

Figure 3-32 shows a segment of a City Corridor providing local connectivity to homes and businesses. Detached sidewalks (approximately 8 feet wide) with a 10-foot tree lawn promote pedestrian activity and connect neighborhoods to nearby amenities. Pedestrian-scale lighting and landscaping enhance safety and comfort. However, there is currently no dedicated bicycle infrastructure, limiting multimodal access. While the street network generally aligns with Aurora Places' vision and allows walking and driving access to retail, bicycle use relies on low-volume streets without dedicated lanes, signage, or infrastructure to support safe cycling.

Figure 3-31: Existing City Corridor

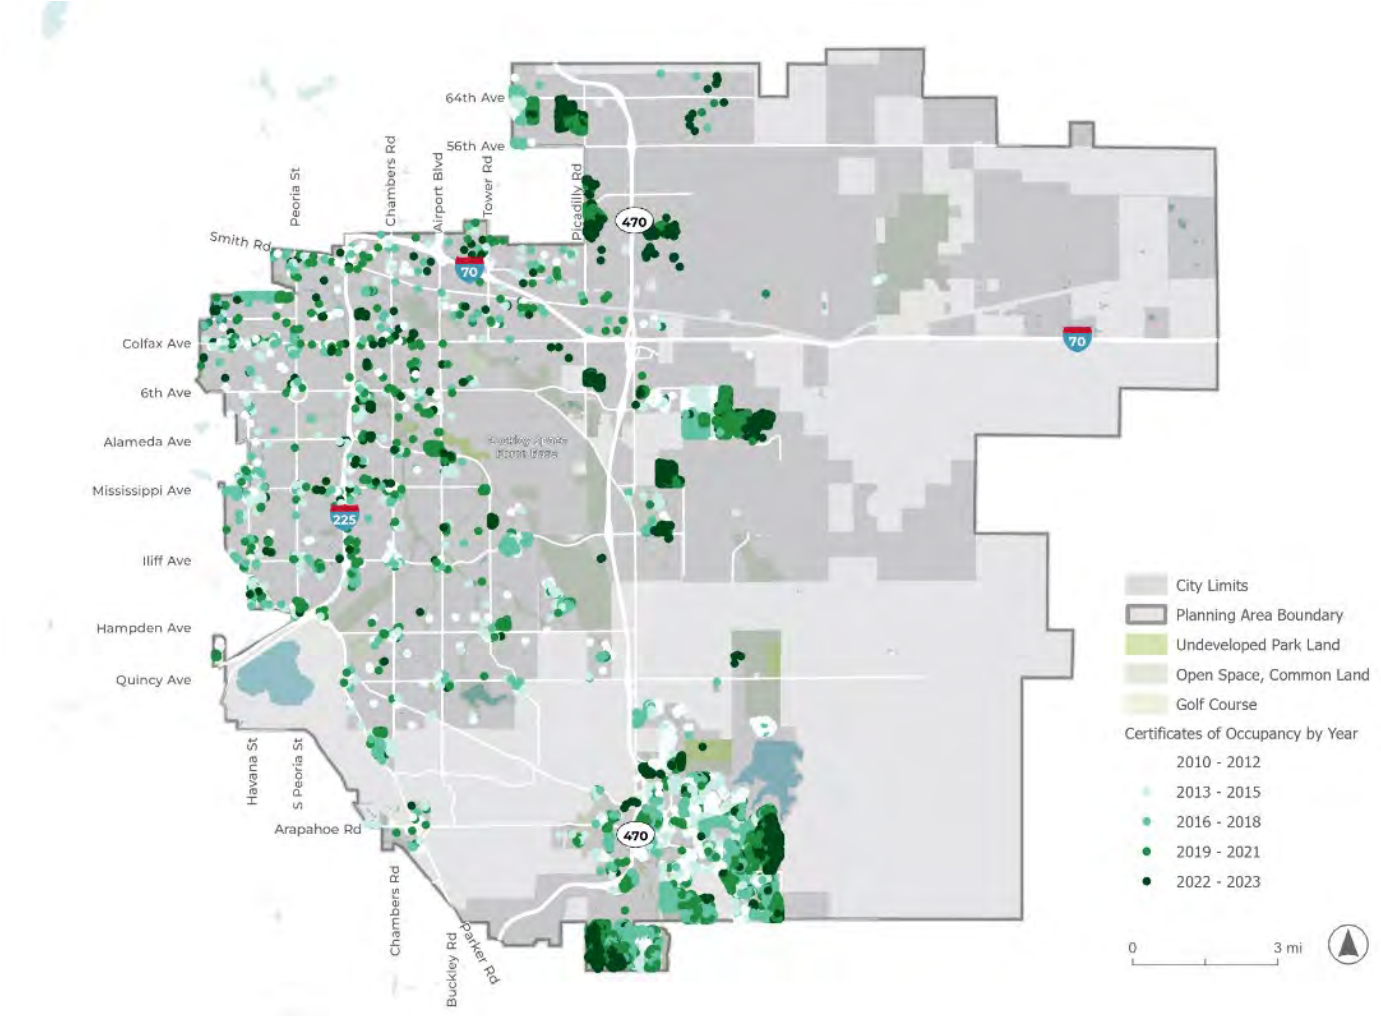
3.6 Development patterns and trends

Land development patterns impact transportation and mobility by shaping the nature of how people travel through a region. Office, retail, industrial and residential development directly impacts an area's traffic patterns and intensity, and the demand for public transit and other mobility options. In general, single-family homes require the highest level of investment in transportation infrastructure as they are a less dense land use and more spread out compared to multifamily developments. Similarly, low-density commercial spaces, such as big-box developments, are more land-intensive and are designed for vehicle access. Office and retail are more suitable in denser areas as they require less land to accommodate more units.

In recent years, residential and industrial development in Aurora has accelerated, but office and retail uses have grown at a slower pace. Notable industrial construction has been clustered near the Denver International Airport, north of East Colfax Avenue, and new office and retail development has primarily located west of E-470.

Single Family Residential Development

As previously mentioned, areas that are largely dominated by single-family residential land uses are likely to generate more car trips due to greater distances between homes, jobs, and services.



The City of Aurora tracks certificates of occupancy (completion) for single-family dwelling units. Residential construction has accelerated in Aurora over the past five years. From 2010-2016, approximately 850 new single-family units were built each year compared to 1,800 per year from 2017 through 2023 (Table 3-10 and Figure 33). This is attributed to new annexations in the Eastern Plains areas (east of E-470), and new projects in Northeast Aurora, east of Peña Boulevard, including Aurora Highlands and High Point, and the Windler Homestead development. There has also been a continued buildout of infill lots within Central and Original Aurora (Figure 3-33).

Table 3-10. Certificates of Occupancy Issued in Aurora, 2010-2023

Apartments

Multifamily development patterns are important to regional mobility, since residents of multifamily housing near transit routes are often less reliant on cars to get around, and residential density is linked to higher transit ridership, which is often a more efficient method for moving larger numbers of people in limited public ROW.

Data on multifamily inventory and construction trends comes from CoStar, as the city's permitting system does not readily track the number of dwelling units in new projects. From 2010-2016, on average, 1,975 new apartment units were built annually. From 2017 to 2024, multifamily construction increased, with 8,415 units built each year on average (Table 3-11).

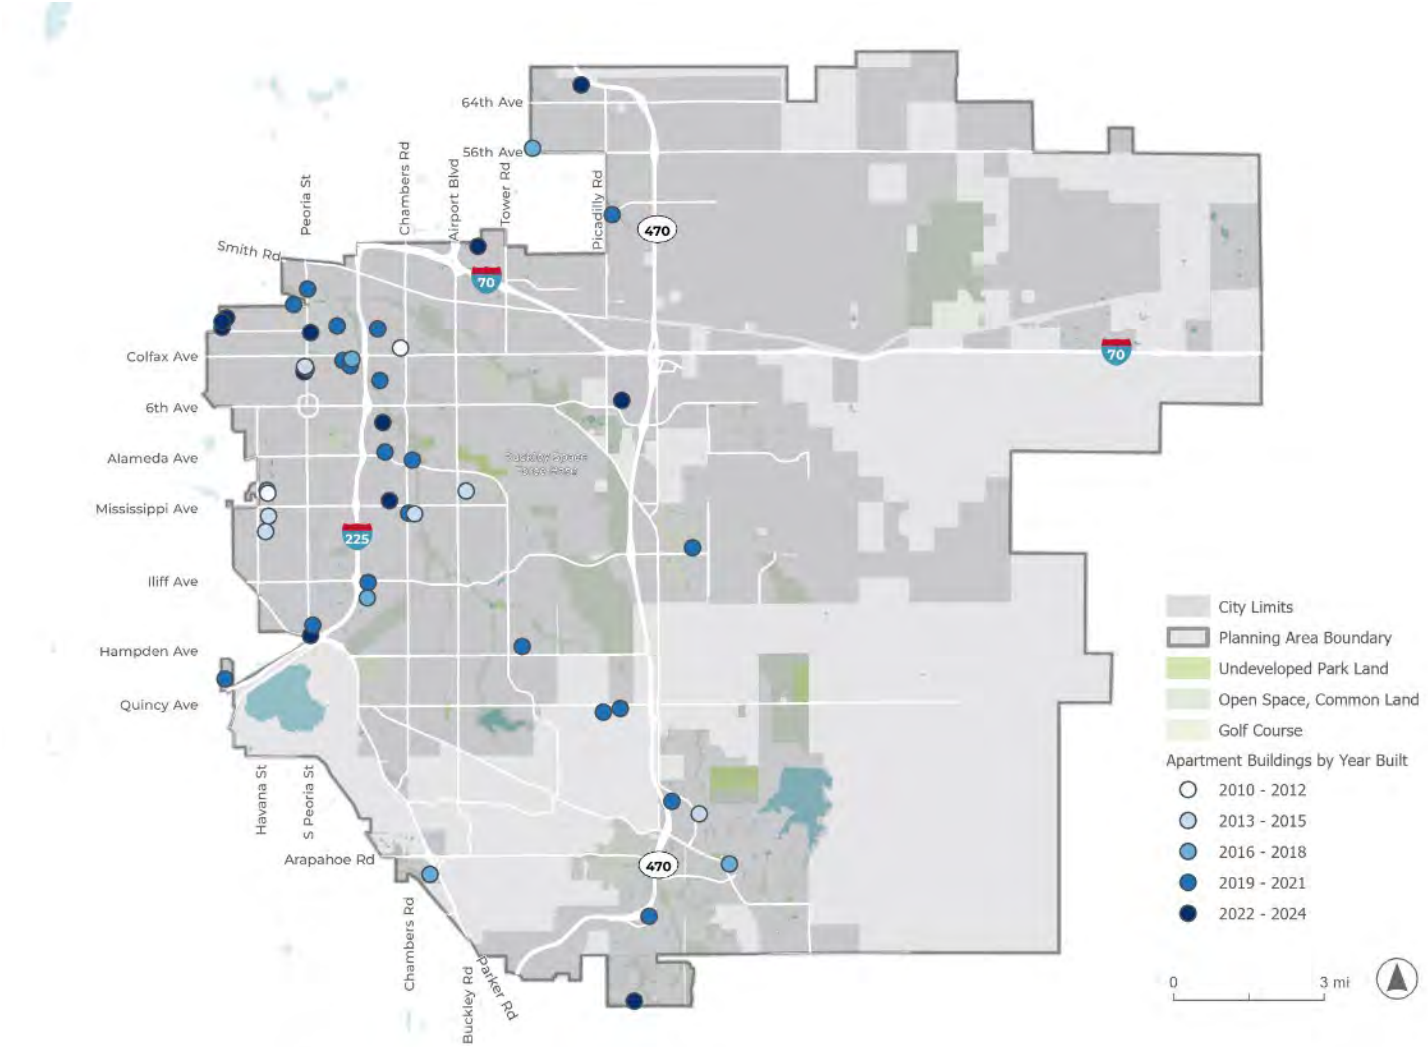

Table 3-11. Multifamily Inventory, Aurora, 2010-2024

	2010	2017	2024	2010-2024		2010-2016		2017-2024

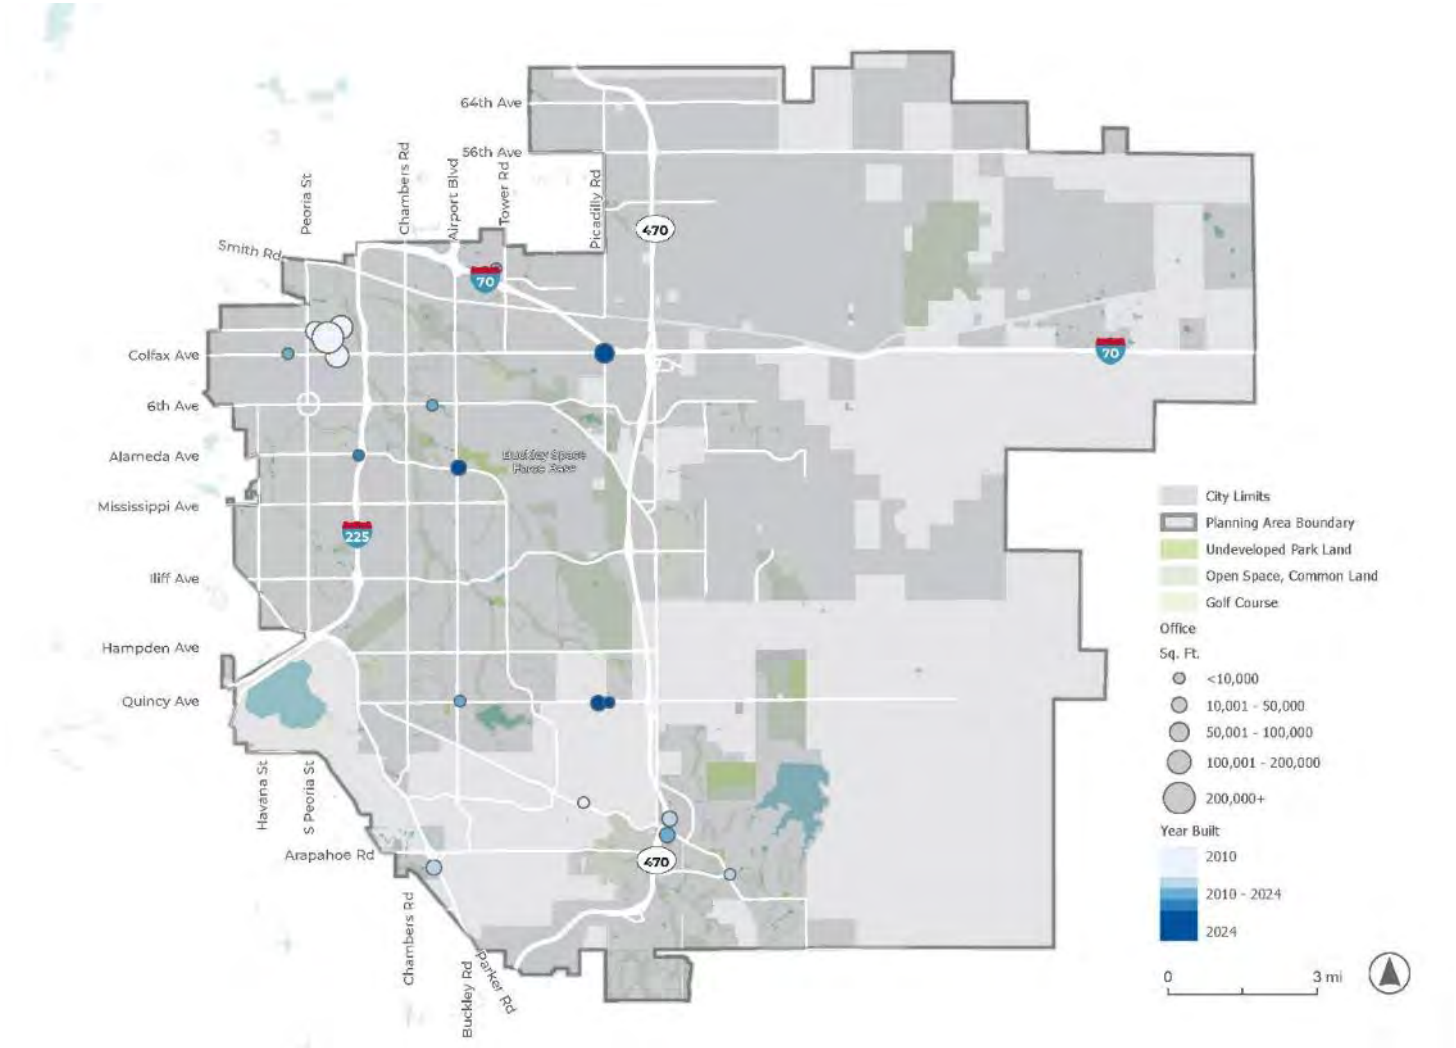
Figure 3-34 shows multifamily rental buildings constructed after 2010. This includes transit-oriented development along R-Line light rail stations and -I-225 corridor, such as Iliff Station. Additionally, multiple new apartment developments have been constructed along East Colfax near Anschutz Medical Campus and near Stanley Marketplace off East Montview Boulevard.

Figure 3-33. Apartment Buildings Constructed after 2010

Office



The location and scale of office development impacts commuting patterns and peak-hour traffic. Compared to the industrial and healthcare markets, the office market in Aurora is small. Since 2010, 371,000 square feet of office space have been developed, which is a growth rate of 0.3 percent per year (Table 3-12 and Figure 3-35). The majority of office space was developed at the Anschutz Medical Campus in 2010.

Table 3-12. Office Inventory, Aurora, 2010-Q1 2024

Industrial

Industrial development patterns impact the movement of people and goods. Industrial uses such as manufacturing and warehousing generate truck traffic and influence commuting patterns.

Industrial submarkets in and around Aurora captured 63.9 percent of the Denver Metro area industrial market (defined by CoStar) growth since 2010. The City of Aurora has added nearly 23 million square feet of industrial space since 2010 to its inventory (1.6 million square feet on average annually), representing a 5.1 percent average annual growth rate (Table 3-13).

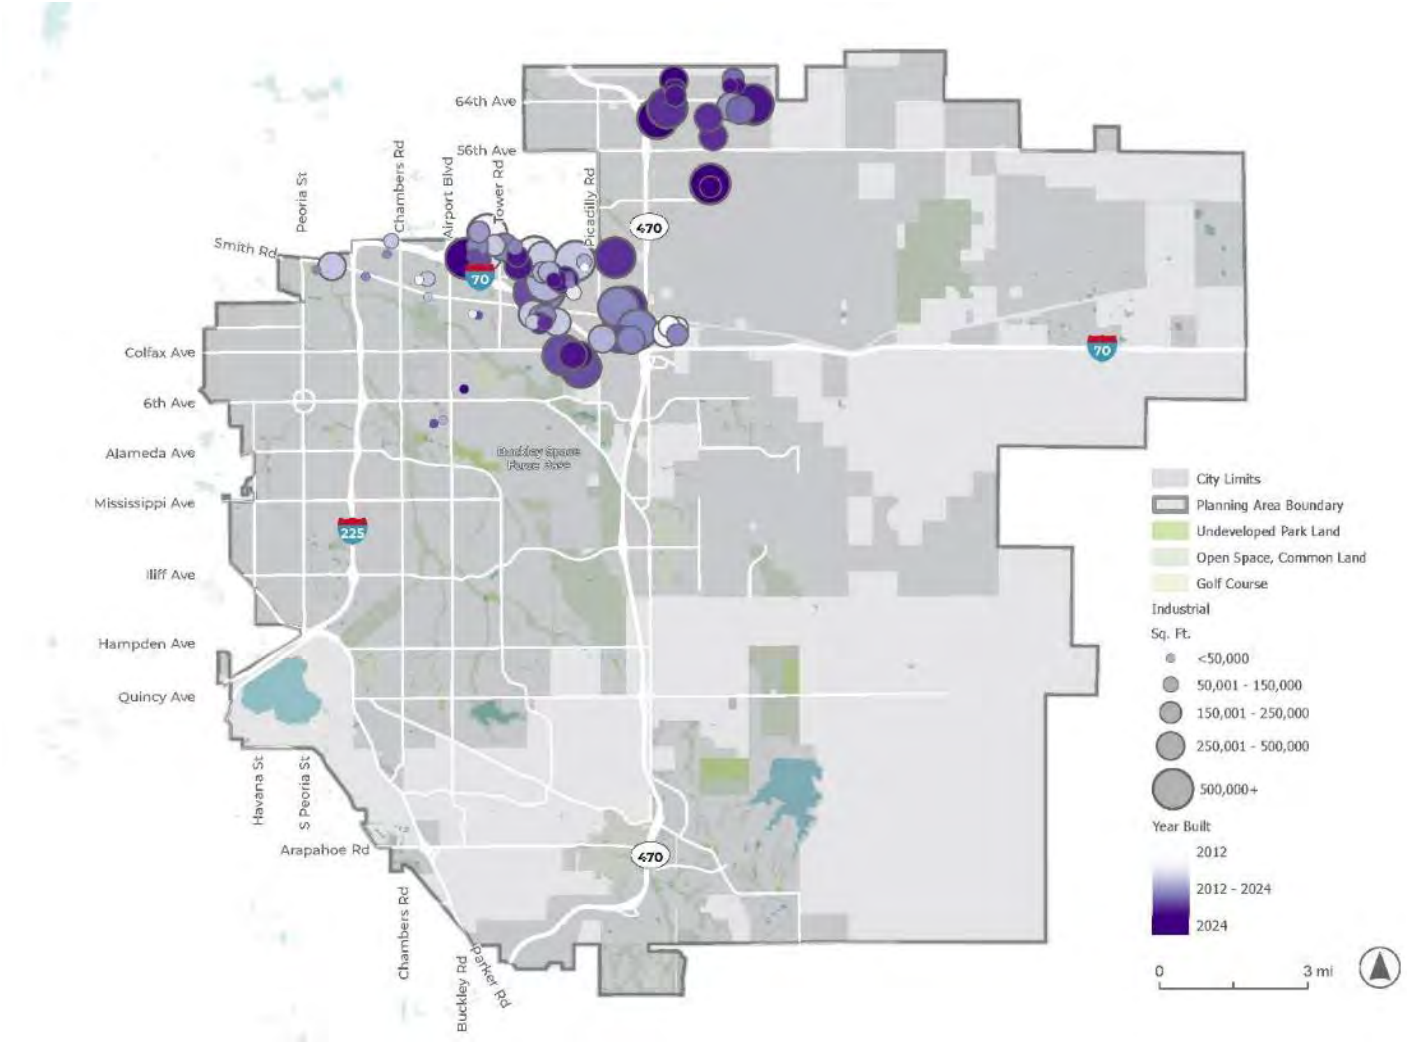

Table 3-13. Denver Metro Area Industrial Inventory, 2010-Q1 2024

Source: CoStar; Economic & Planning Systems

Notably, most of Aurora's industrial growth has been concentrated near Denver International Airport. As shown in Figure 3-36, most of Aurora's industrial development since 2010 is located north of I-70.

Figure 3-35. Industrial Space Built After 2010

Source: CoStar; Economic & Planning Systems

Retail

Retail establishments generate both consumer and employee traffic, which can drive demand for both parking infrastructure and public transportation. As of the first quarter of 2024, Aurora had a total of nearly 22.3 million square feet of retail space, as shown in Table 3-14. This represents a 634,000 square foot increase in the city's retail inventory in 2010, equating to an average annual growth rate of 0.2 percent.

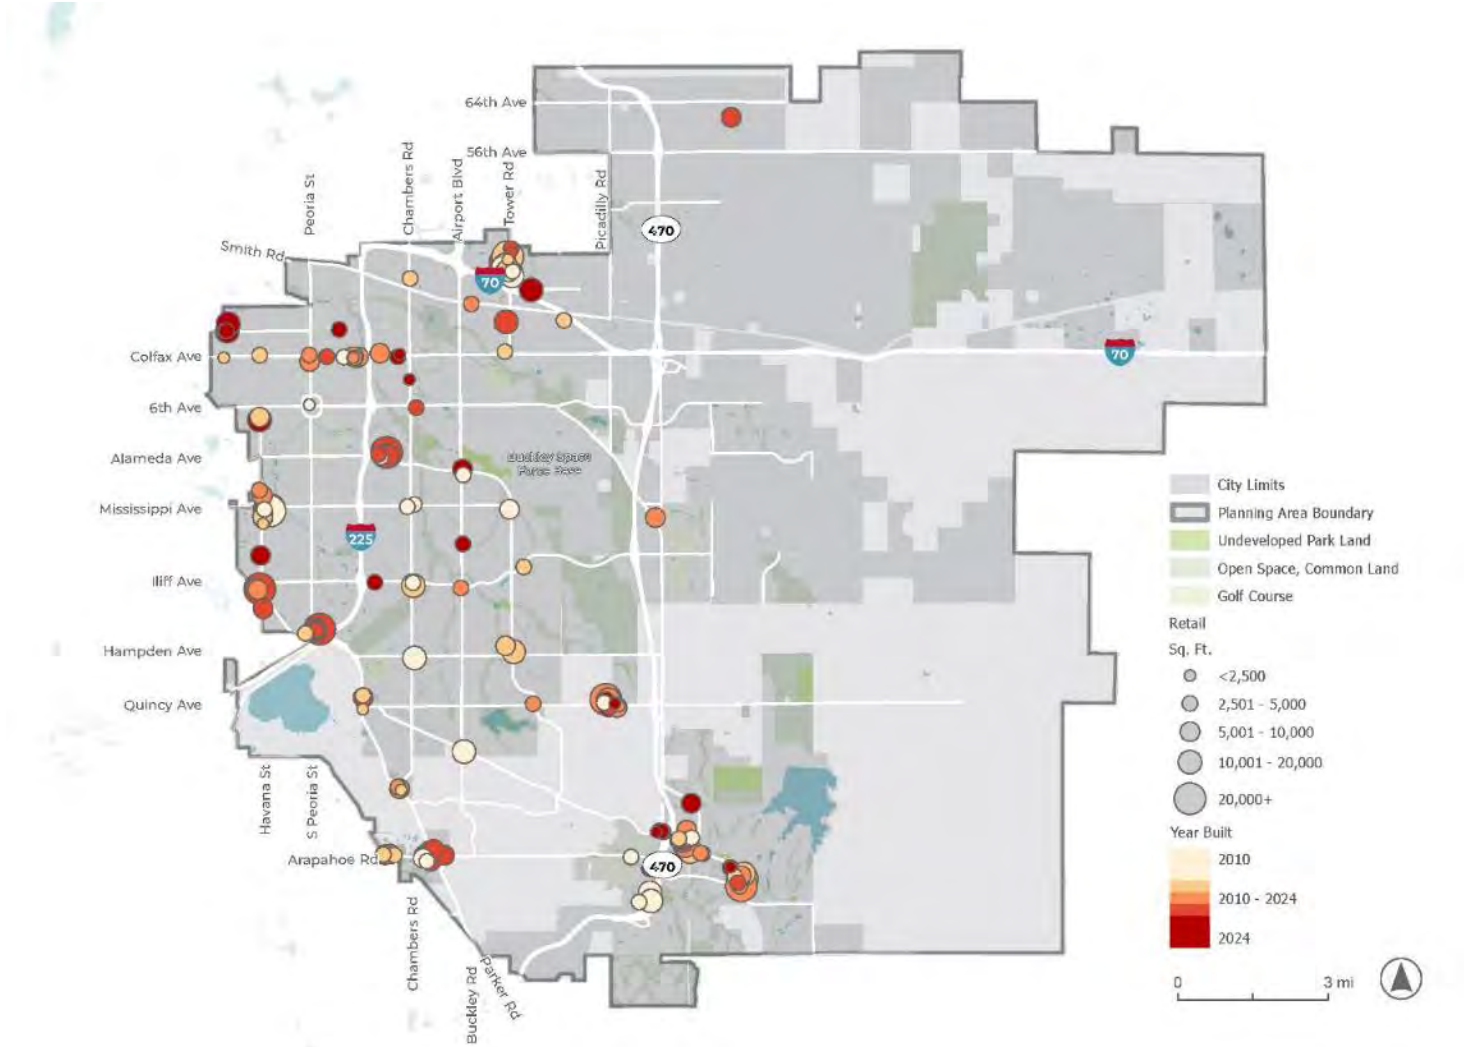

Table 3-14. Retail Inventory, Aurora, 2010-Q1 2024

Retail Sq. Ft.	2010	2017	2024	2010-2024 Total	2010-2024 Ann. #	2010-2024 Ann. %

Source: CoStar; Economic & Planning Systems

Figure 3-37 shows where retail space has been constructed in Aurora since 2010. Most of this retail development is clustered along major corridors such as Colfax Avenue and Havana Street. Other hotspots of retail development are near Tower Road and I-70, as well as E-470 and Smoky Hill Road.

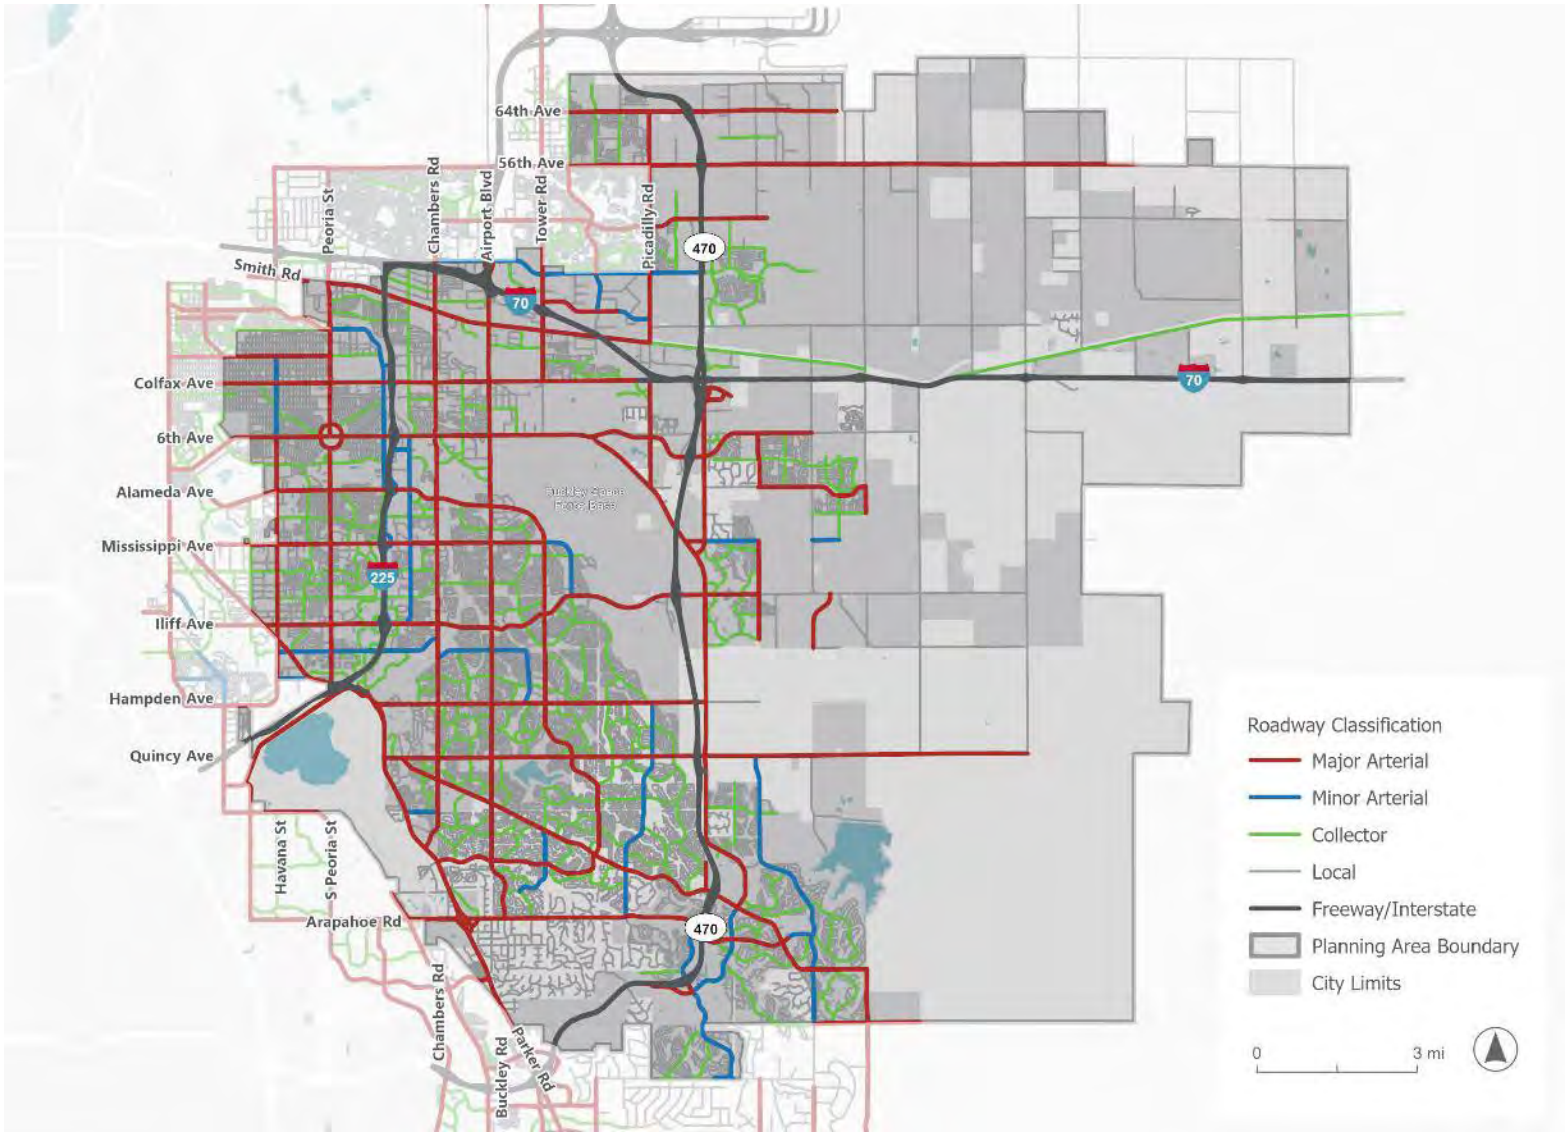
4 Automobile System Overview

The street networks in Aurora are comprehensive and widespread. They serve most areas of the city well and provide good connectivity for people traveling by car for most trip types. The following sections further outline and summarize the state of the system for auto modes.



4.1 Street Network

This section examines the existing roadway classification and characteristics, roadway capacity and level of service, travel times, and future congested corridors. The focus of this overview is arterial and collector roadways for automobile traffic only.

Roadway Classification and Characteristics

This section describes the roadway characteristics for existing typical roadway classifications in Aurora, which include major arterial, minor arterial, collector, and local (Figure 4-1). The figures presented throughout this section represent the current standards and do not necessarily reflect existing conditions for older roadways.

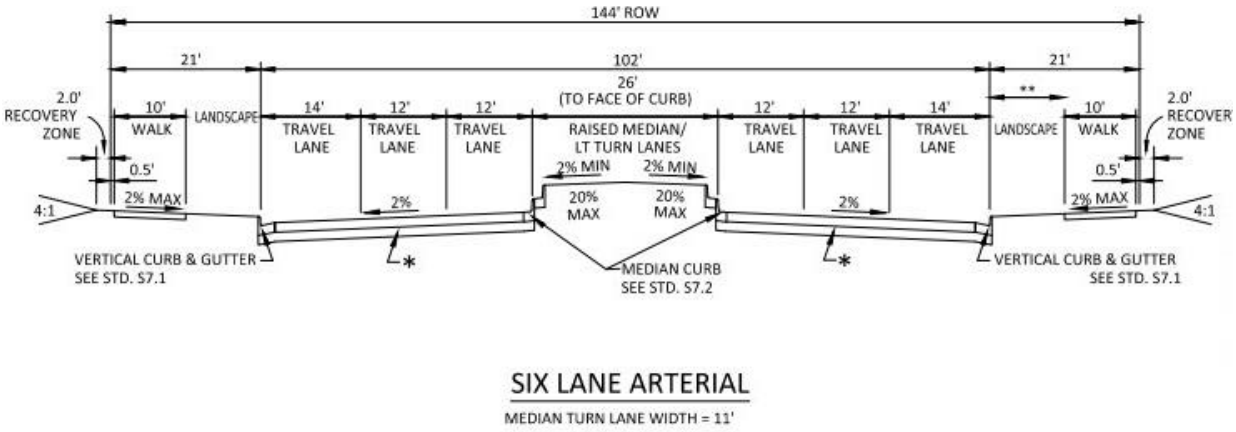


Figure 4-1. Aurora Roadway Classification

4.1.1.1 Major Arterial

Major arterial streets prioritize travel for longer distances, allowing for higher volumes and speeds. These roadways have up to six total through traffic lanes, with most carrying four or six lanes of through traffic, dedicated left and right turn lanes, raised medians, and posted speed limits of 45 mile per hour (MPH). Major arterials generally have one-mile spacing between them. Direct access to adjacent properties is limited, and signalized intersections are infrequent, allowing for maximum vehicle mobility. On-street parking is prohibited on these roadways. Figure 4-2 shows the current standard section of a six-lane arterial. Many existing streets, such as Mississippi Avenue or Havana Street, were built to earlier standards, and some may have different attributes, such as attached sidewalks without landscaping.

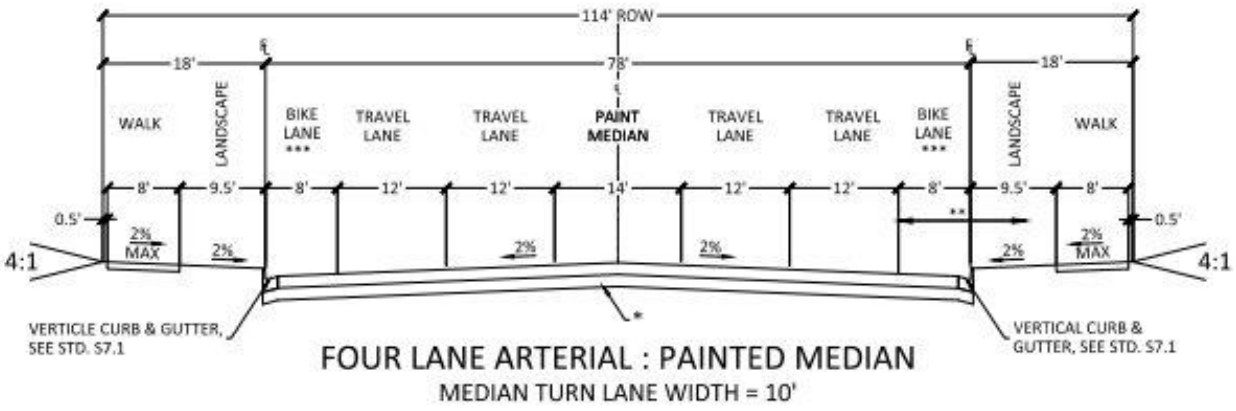

Figure 4-2. Six Lane Arterial Cross Section

4.1.1.2 Minor Arterial

Minor arterial streets serve a similar purpose to major arterial roadways, prioritizing travel for longer distances. However, these roadways have less capacity and slightly slower speeds than major arterial streets. Minor arterials are generally located one-half mile from major arterials and generally one-eighth mile spacing from Collectors. Minor Arterials often serve major trip generator land uses, such as hospitals and commercial areas, and provide connections between major arterial roadways and collector roadways. Minor arterial roadways typically have two or four through lanes, dedicated left-turn lanes, painted medians, and a posted speed limit of 35 MPH. On-street parking is prohibited. Figure 4-3 shows the typical section of a four-lane arterial with a painted median; examples of such roadways in Aurora are S Sable Boulevard and E Yale Avenue.

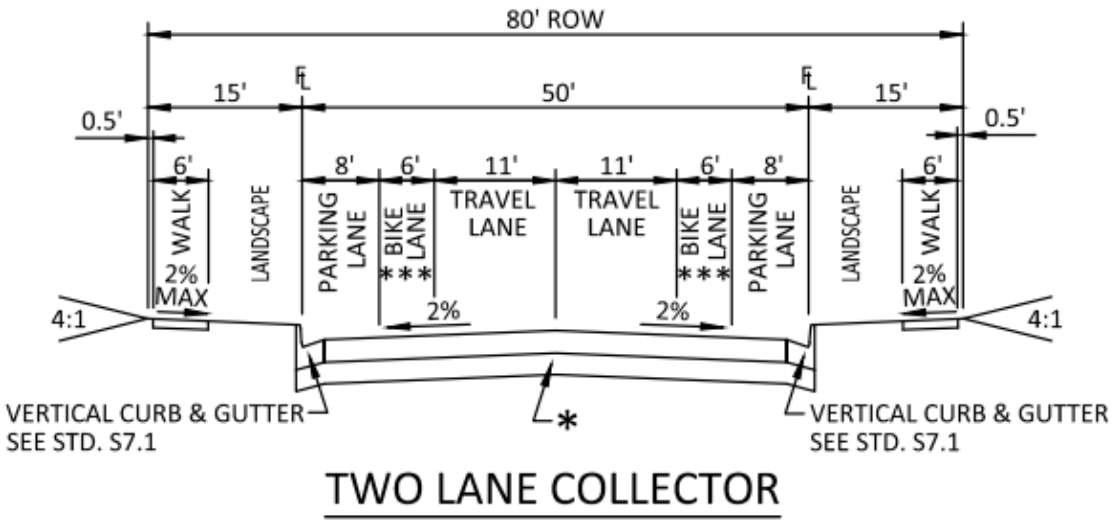

Figure 4-3. Four Lane Arterial: Painted Median

4.1.1.3 Collector

Collectors connect local streets to arterial streets. They aim to balance mobility and access, meaning they typically carry fewer vehicles over shorter distances. These streets typically have two through lanes, dedicated left-turn lanes when volumes warrant, no medians, and a posted speed limit of 30 MPH. Collectors generally have half-mile spacing between themselves or arterials. Direct property access is allowed with the correct spacing to reduce turning movement crash potential. On-street parking may be allowed depending on street width, presence of bicycle facilities, and adjacent land uses. A typical section of a three-lane collector (two travel lanes and a center turn lane) is shown in Figure 4-4. Examples of Collectors in Aurora are Orchard Road and E Mexico Avenue.

Figure 4-4. Three Lane Collector

4.1.1.4 Local

Local streets prioritize direct property access and generally serve residential land uses. They are low-speed and low-volume streets that carry residential and low-density traffic to higher street classifications. There are typically two lanes of travel that are not striped and have a posted speed of 25 MPH. On-street parking is typically allowed.

Roadway/Intersection Vehicular Capacity and Level of Service

Roadway capacity is a measure of a roadway's ability to accommodate vehicular traffic volume, categorized by the desired Level of Service (LOS) for the roadway. LOS is a quantitative measure that is used to categorize how drivers experience traffic. For this evaluation, LOS is measured in two ways: 1) traffic flow between intersections, also referred to as Roadway Segment LOS, for each roadway classification, and 2) traffic delay at signalized intersections, or Intersection LOS.

4.1.1.5 Roadway Segment LOS

Roadway segment LOS measures a driver's experience on the roadway based on speed and number of vehicles using the road and is designated by a letter grade A to F (Figure 4-5). Grades A through C are considered "free flow or stable" traffic conditions, which occur when there are relatively few vehicles per lane of travel, thus resulting in no to minor delays and high maneuverability. Grade D is the lowest acceptable LOS, which maintains stable flow traffic with considerable impacts to speed and maneuverability due to high-density traffic nearing roadway capacity. Grades E and F are unacceptable LOS and indicate that there are severe impacts to speed and maneuverability due to traffic at or above roadway capacity.

The recommended daily traffic volume LOS thresholds are shown in Figure 4-6 and Figure 4-7. The thresholds are based on the most recent average daily traffic volumes from 2022 to 2024. These thresholds are based on recommendations from the Northeast Area Transportation Study (NEATS).

Figure 4-5. Segment Level of Service Definitions

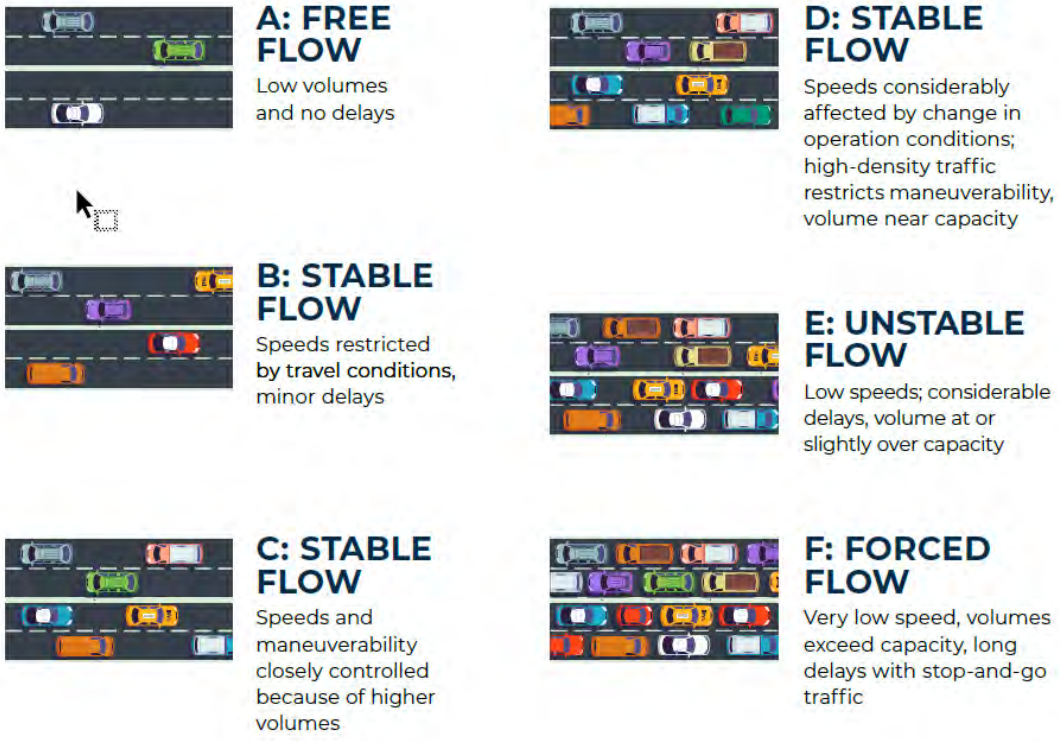

Figure 4-6. Arterial Recommended Level of Service Thresholds based on Vehicles per Day

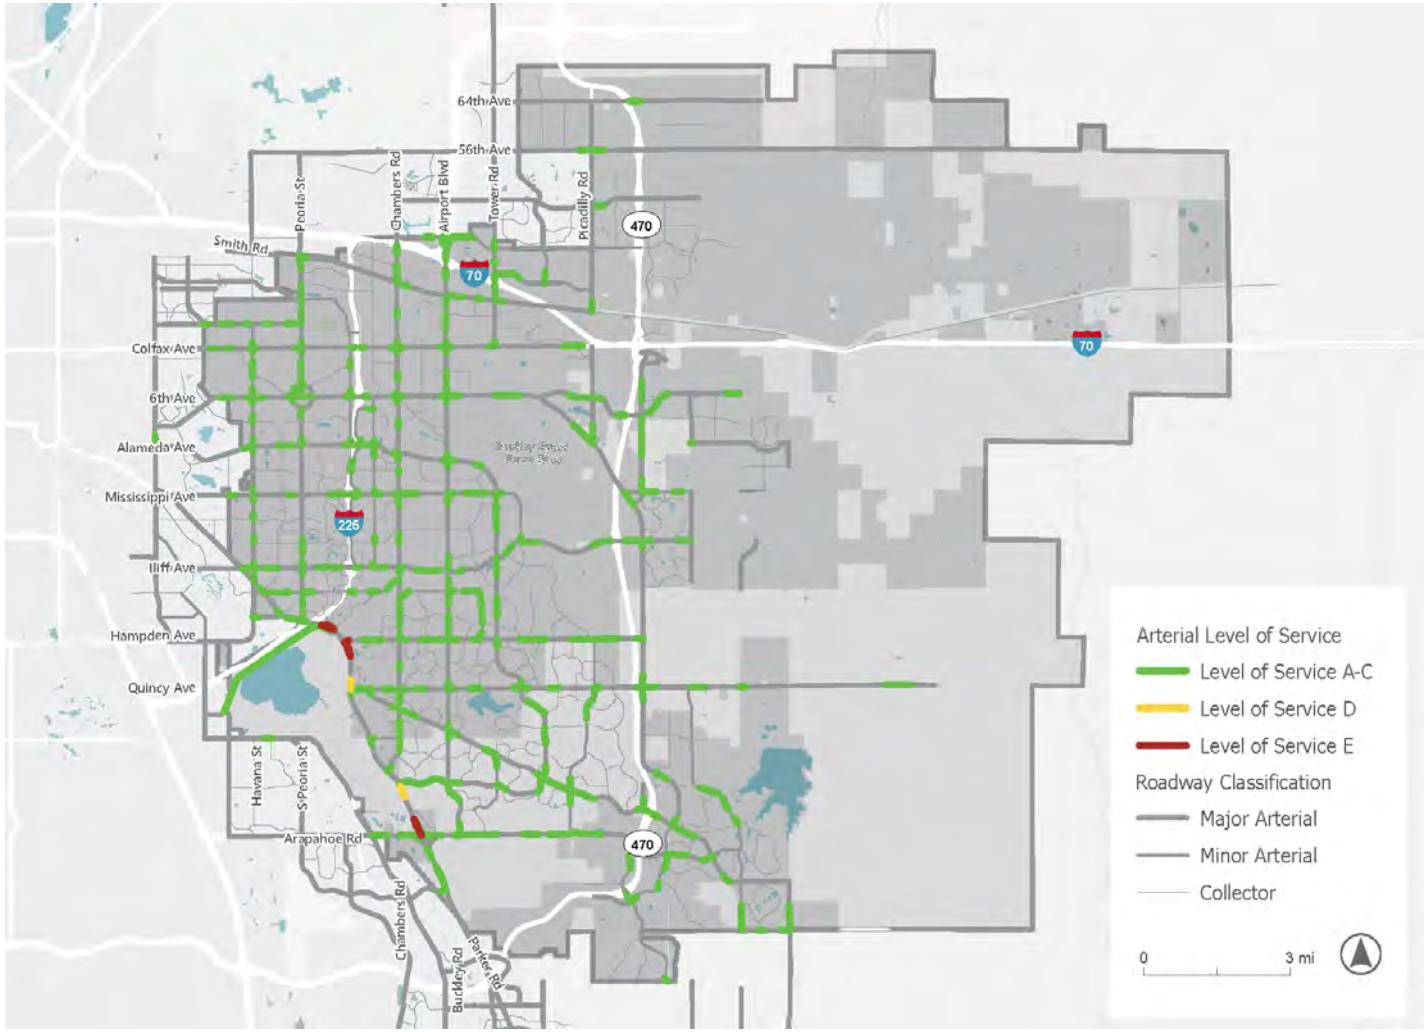

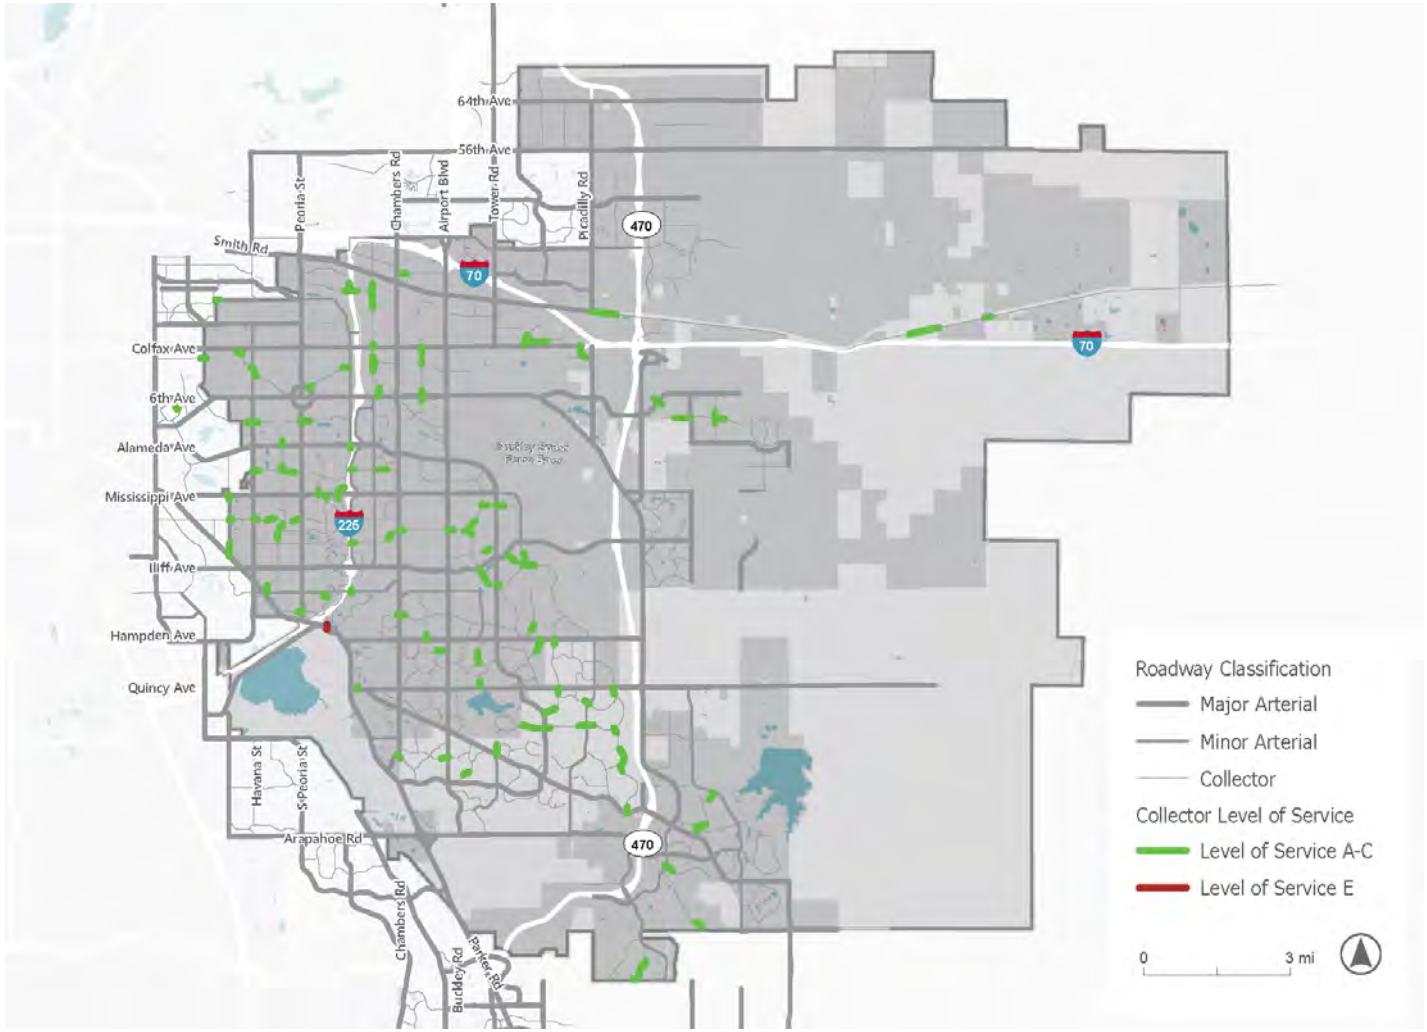

Figure 4-7. Collector Recommended Level of Service Thresholds based on Vehicles per Day

Note: The City of Aurora currently does not have any Collector roadways within the LOS D threshold.

4.1.1.6 Signalized Intersection Level of Service

Intersection level of service is a measure of the average vehicle control delay at a signalized intersection. For this analysis, LOS is shown for the intersection as a whole, versus per movement or per approach. Similar to segment LOS, intersection LOS is shown using a letter grade from A to F, with the number of seconds of delay assigned for each letter. Table 4-1 summarizes the typical delay associated with each LOS.

Table 4-1. Level of Service and Motor Vehicle Delay

LOS	Signalized Intersection
A	Less than 10 seconds
B	10 to 20 seconds
C	20 to 35 seconds
D	35 to 55 seconds
E	55 to 80 seconds
F	More than 80 seconds

Source: Highway Capacity Manual

There are 394 signalized intersections maintained and operated by the City of Aurora. Table 4-2 shows non-interchange signalized intersections in the City of Aurora with LOS of E or F during the AM, PM, or both peak hours. The intersections identified in Table 4-2 are based on available data and may not represent all congested intersections. Furthermore, while not depicted in the Tables and Figures, anecdotal information suggests that E-470 interchange vehicular operations are poor. Interchange operations are frequently more complex than typical street intersections due to the interaction with, and effects of, major highway operations, and they present more unique multimodal challenges regardless of congestion levels.

Figure 4-9 and Figure 4-11depict the intersections with a LOS D, E, or F. While LOS D indicates a stable flow of traffic, these intersections are more likely to become unacceptable if traffic volumes were to increase. Per the COA Traffic Impact Study Guidelines, LOS D is the minimum acceptable LOS standard for signalized intersections. Most signalized intersections in Aurora are operating at acceptable LOS for both peak hours, as shown in Figure 4-8 and Figure 4-10.

4.2 Travel Times

Travel time data for 2013, 2018, and 2023 indicate that congestion on major arterials was at its worst, in general, in 2018 before the COVID-19 pandemic (Figure 4-12). INRIX, a big data aggregation tool, provided free flow travel time, average travel time, and planning travel time for each of the major corridors. Free flow travel time is the 5th percentile travel time or the time that it takes somebody to traverse the corridor on the best day of a typical month; note that this is not necessarily the same as traveling the length of the corridor at the prevailing or posted speed. Even on a good day, travelers encounter at least some delay on urban arterials. The average travel time is the 50th percentile travel time during a set period of the day. The planning travel time is the 95th percentile travel time during a set period of the day; this generally equates to the worst day of the month, or the time when a person needs to plan for in case they absolutely cannot be late to their destination.

The travel times are summarized by the number of minutes per mile traveled for the AM and PM Peak hours (typically starting around 7:45 a.m. and 5:00 p.m.). This provides an easy comparison from year to year and corridor to corridor, regardless of the corridor's length. It would take 1.33 minutes to go one mile at the posted speed on a corridor with a speed limit of 45 MPH if a traveler encountered no delays; the typical free flow time for urban corridors in Aurora falls within the range of about 1.4 to 2.1 minutes in 2023. Several factors affect the time taken to travel a corridor, which can be explored in later stages of the planning process.

Citywide, it took an average of approximately 1.5 minutes to travel a mile in 2013 during a typical morning, and about 2.0 minutes on the worst mornings. In both 2018 and 2023, conditions were notably worse, with the average morning approximately equal to the worst mornings in 2013, at about 2.0 minutes per mile. However, the worst mornings added a whole minute (3.0 minutes) in 2018 and half a minute (2.6 minutes) in 2023. During the PM Peak Hours, a similar story emerges, with 2018 conditions notably worse than those in 2013, but slight improvements between 2018 and 2023.

Figure 4-12. Average Travel Times for Major Arterials: Average Time and Planning Time by Year and Peak Hour

Individual corridors available within INRIX include those shown in Table 4-3. Travel time summaries for these corridors follow.

Table 4-3. Travel Time Segments

Roadway	Segment*	Limits	Length (miles)
6th Avenue	East	I-225 to Picadilly	5.00
6th Avenue	West	Havana to I-225	2.18
Alameda Avenue	East	I-225 to Mississippi	3.25
Alameda Avenue	West	Havana to I-225	2.00
Aurora Parkway	All	Quincy to Smoky Hill	3.00
Buckley Road	South	Mississippi to Arapahoe	7.00
Chambers Road	North	I-70 to Mississippi	5.00
Chambers Road	South	Mississippi to Parker	5.00
Colfax Ave	East	I-225 to Picadilly	5.00
Colfax Ave	West	Quebec to I-225	4.20
Gun Club Road	South	Picadilly to Quincy	4.87

Roadway	Segment*	Limits	Length (miles)
Havana Street	South	Mississippi to Dartmouth	2.54
Iliff Ave	East	I-225 to Dunkirk	3.50
Mississippi	East	I-225 to Tower Road	3.10
Mississippi	West	Parker Road to I-225	3.70
Parker Road	East	Hampden to CO-88 Belleview	4.60
Parker Road	West	Iliff to Hampden	2.65
Peoria	North	I-70 to Mississippi	3.97
Peoria	South	Mississippi to Parker	2.60
Quincy	All	Parker to Gun Club CO-30	6.00
Smoky Hill	All	Quincy Ave to Powhatan	9.00
Tower	All	Mississippi to Quincy	4.20

* Generally: east or west of I-225; north or south of Mississippi Avenue (see limits column for details)

At the corridor level, westbound (WB) and southbound (SB) mornings and eastbound (EB) and northbound (NB) evenings are the slowest directions to travel. However, several outliers exist as shown in Figure 4-13 and Figure 4-14.

Figure 4-15 and Figure 4-16 show the free flow times, average times, and planning times in minutes per mile for each corridor. In addition, the gray bars show plus or minus one standard deviation from the mean travel times for each category. Corridors where travel times fall outside this range are considered outliers and potential opportunities to make improvements in both congestion and reliability.

Figure 54 and Figure 55 show the AM and PM peak hour travel time index (TTI) and planning time index (PTI) for each corridor. These indices are the average travel time divided by the free flow time (TTI) and the planning time divided by the free flow time (PTI). This calculation normalizes by the free flow time, which can vary significantly based on context and roadway characteristics such as traffic signal density, access density, etc. That said, by these measures, a similar set of corridors stand out as experiencing congestion and reliability issues.

Figure 4-13. High Planning Time Corridors (Poor Reliability)

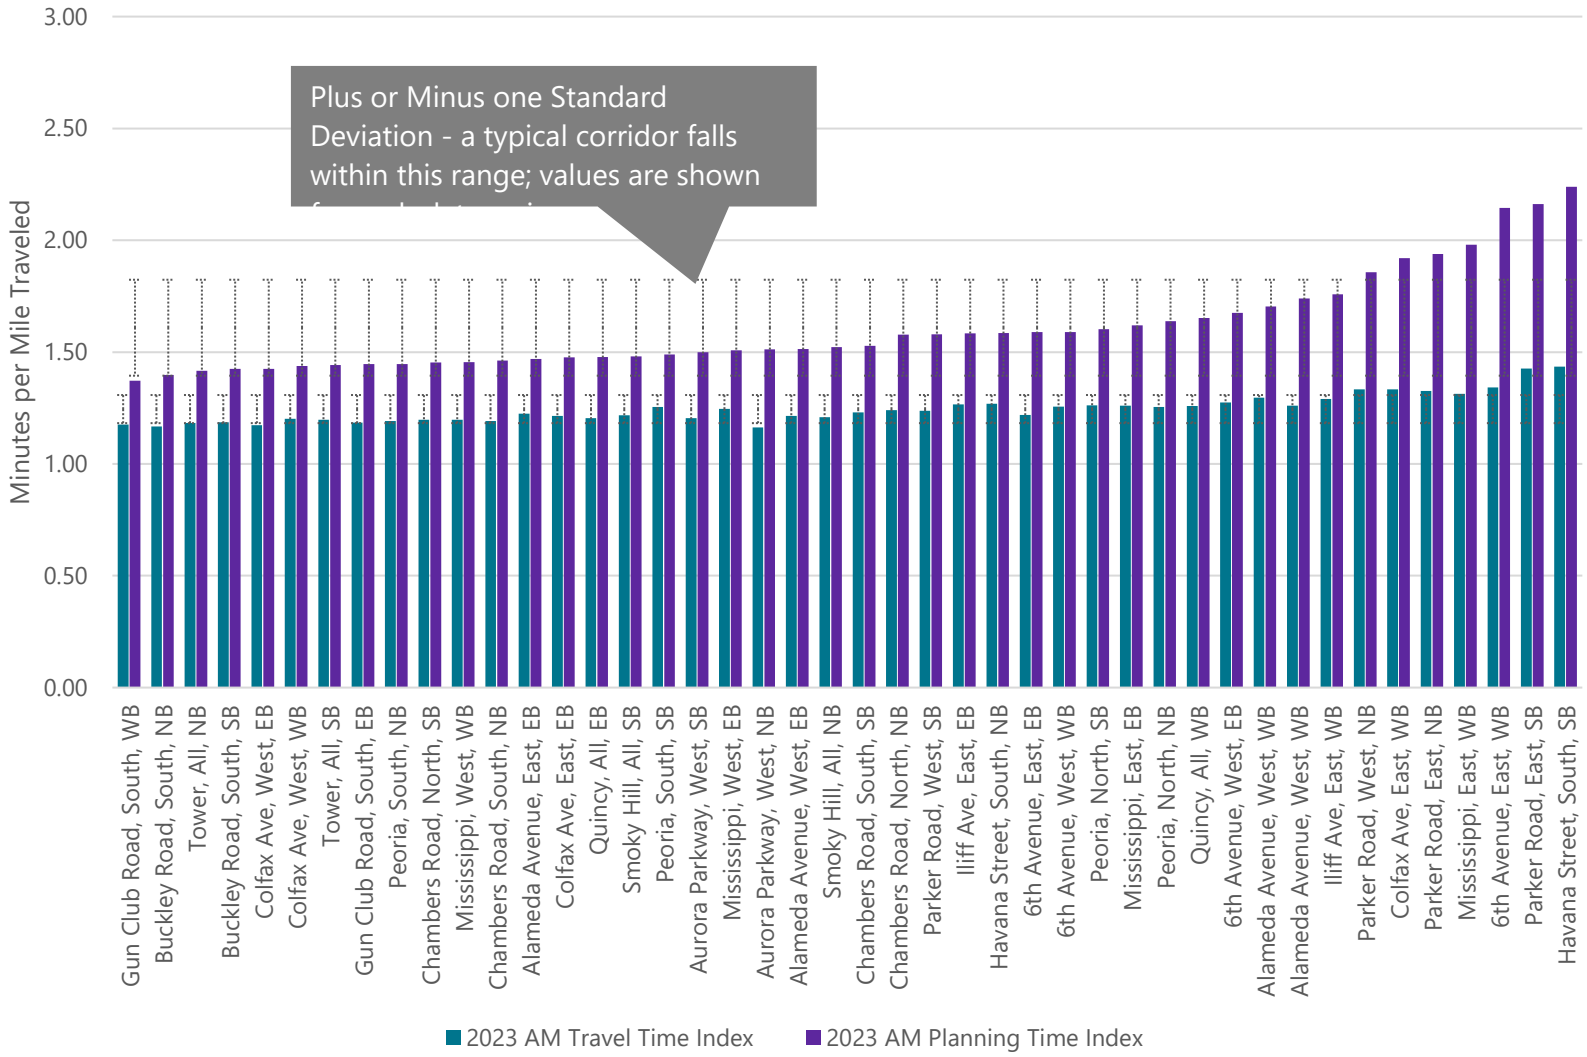

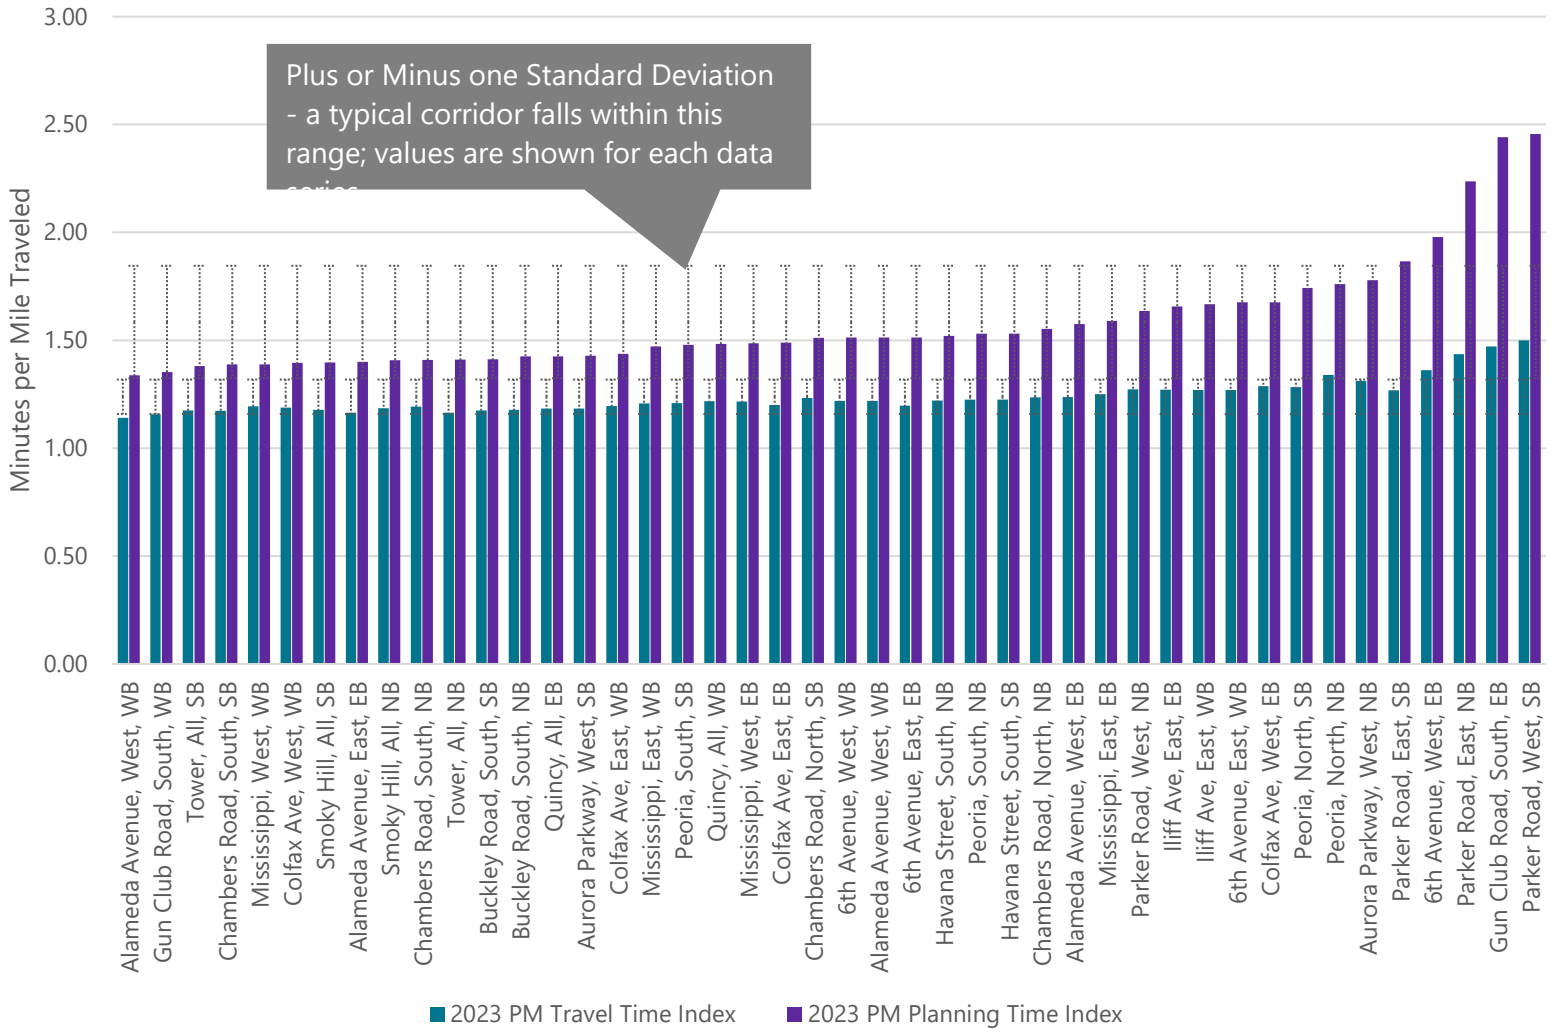

Figure 4-18. 2023 PM Peak Hour Travel Time Index and Planning Time Index

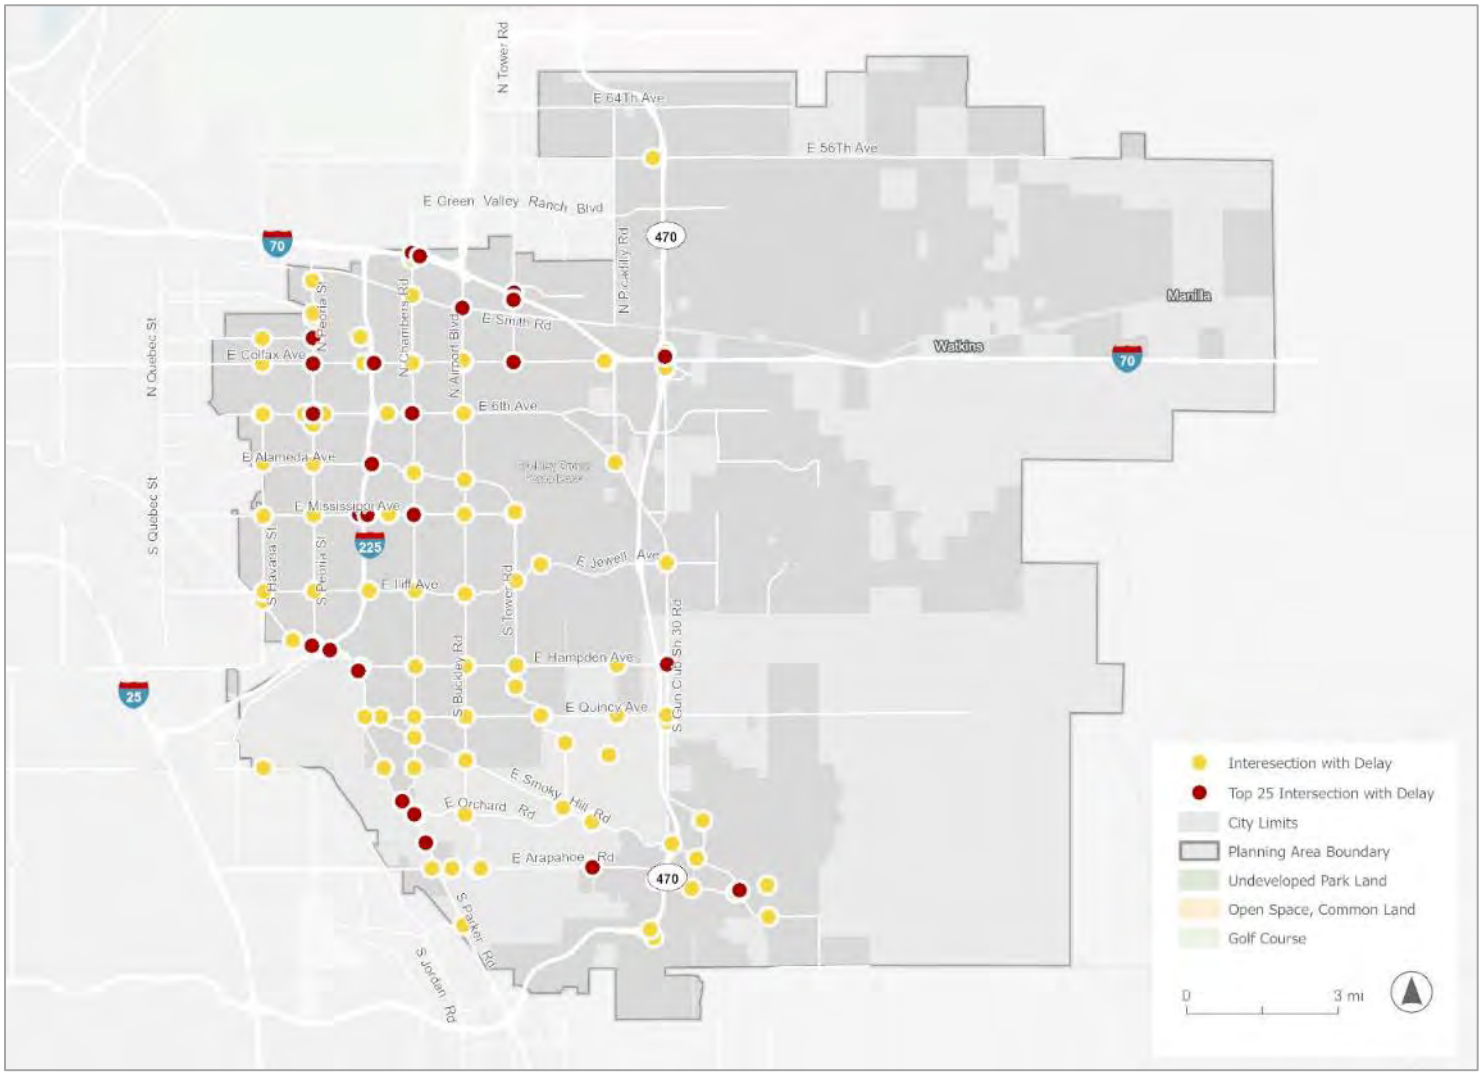

4.3 Estimated Total Delay at Bottleneck Locations

INRIX defines bottlenecks as "locations on the roadway where conditions have fallen below a certain percent of the reference speed for an extended period of time". INRIX has created several metrics to provide insights into bottlenecks impacting the roadway system, including estimated total delay. The estimated total delay is the "base impact weighted by the difference between free-flow travel time and observed travel time multiplied by the average daily volume (AADT), adjusted by a day-of-the-week factor". INRIX recommends that this metric be used to rank and compare the estimated total delay from all vehicles within the bottleneck. Figure 56 shows locations with the highest estimated total delay. Table 4-4 lists the top 20 intersections that have the highest estimated total delay number.

Table 4-4. Top 20 Locations with Highest Estimated Total Delay (2023)

Rank	Intersection

4.4 Future Congested Corridors

Using outputs from the regional transportation model, the DRCOG model estimates future volumes and roadway projects and calculates the level of congestion for each segment as part of the 2050 Regional Transportation Plan. Figure 57 indicates that many of Aurora's major corridors will likely be congested by 2050. The calculation includes four metrics to determine the severity of congestion:

- Severity: How bad does congestion get on the roadway during rush hour?
- Duration: How many hours per day is the roadway congested?
- Magnitude: How many people (traffic volume) are affected by congestion on the roadway?
- Reliability: How often do crashes or incidents occur on the roadway?

DRCOG's model was based on current land use and transportation trends. Should different land use and transportation policies are adopted through Connecting Aurora, the congestion situation may change.

Figure 4-20. DRCOG Congested Corridors (2050)

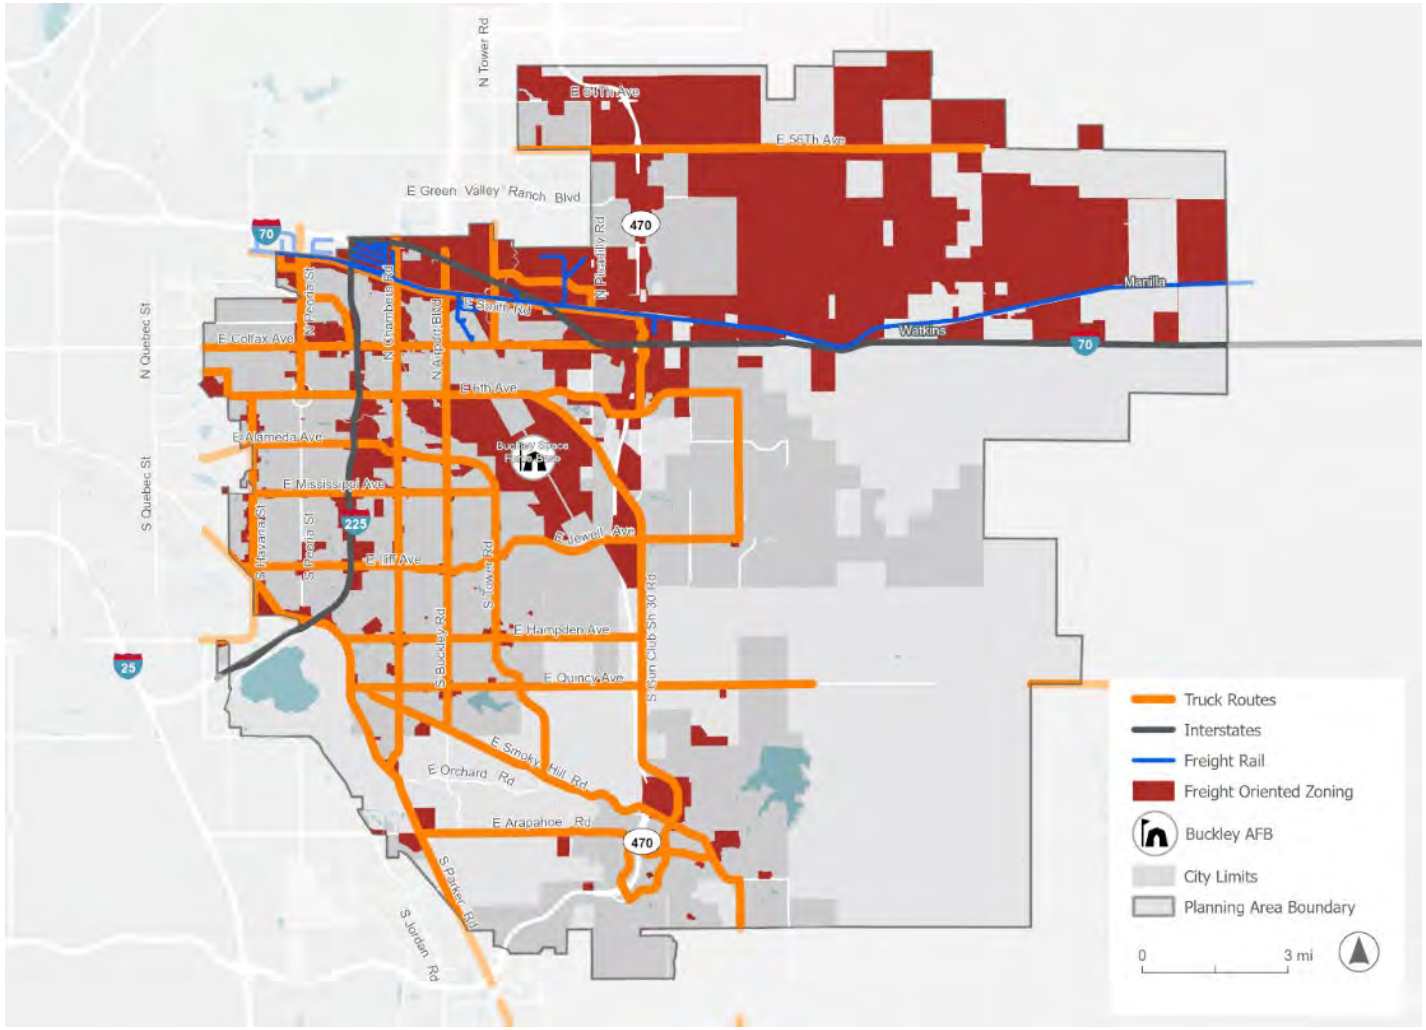
Source: DRCOG

5 Freight System Overview

Freight is a crucial component of the economic landscape in Aurora; residents rely on the safe and reliable transportation of goods to meet their everyday needs. Freight transportation is a key driver of every major supply chain, including many that the city depends on for growth as individuals and as a community. The operation of the freight network is felt every day, such as in keeping grocery stores stocked, fueling at gas stations, and contributing to job creation for our workforce.

Aurora is home to numerous industrial and manufacturing facilities, particularly along the I-70 corridor, and serves as the gateway city to eastern U.S. markets for the Denver Metro area. Additionally, the city has several major interstates and highways that intersect the planning area, nearly 37 miles of freight rail system, and is directly adjacent to the third-largest passenger and 22nd-largest landed cargo airport in the nation (Denver International Airport). It is also home to one of three strategic military installations in the state, Buckley Space Force Base (Buckley ASB). Understanding where these freight activities are located and how they interact with residents, businesses, and other modes of transportation will help ensure a safe, equitable, and resilient transportation system for all.

The DRCOG region represents approximately two-thirds of Colorado's freight activities. The City of Aurora, specifically, contains a substantial share of the regional freight network, with major freight generators situated in proximity to this network. Figure 58 shows the key elements of the freight network in Aurora, as well as some of the major freight-generating areas. The main assets include I-70, I-225, 470 Toll Road, the freight rail lines, and the city's designated truck routes. Primary freight generators include I-1 (Industrial) and I-2 (Business/Tech) zoned areas and the Buckley ASB.



In 2019, DRCOG developed the Regional Multimodal Freight Plan which examines the existing regional freight profile and identifies strengths and opportunities for growth and development. DRCOG is currently updating its freight plan. Based on timing, the plans will integrate findings and recommendations.

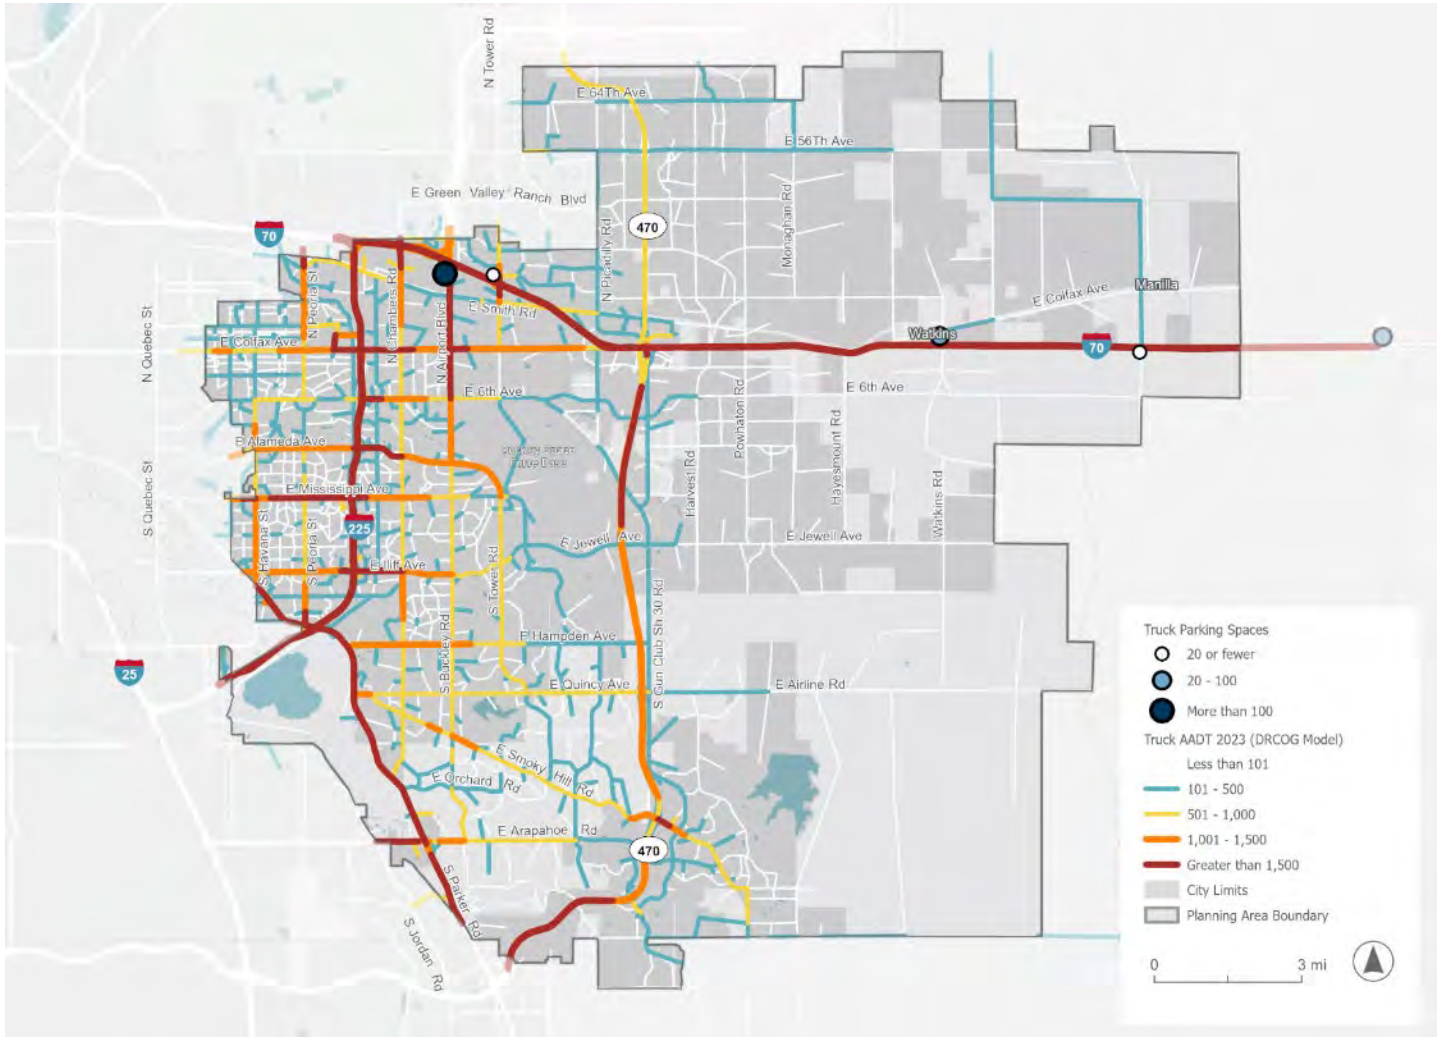
The current plan identifies ten "Regional Freight Focus Areas" to provide a framework for freight planning and coordination. One of these is the "I-70 East Distribution Hub," which covers much of Aurora in the vicinity of I-70. This part of the city is a hub for industrial and commercial activity with a large amount of developable space in conjunction with the Denver International Airport Aerotropolis. The plan identifies potential strategies and actions for the I-70 East Distribution Hub as "coordinated land use planning near existing industrial or distribution clusters and around significant freight corridors, safety assessments of future growth near at-grade rail crossings along mainline national railroads, and the integration of freight considerations and perspectives within future interchange and local area studies." Related to the Denver International Airport Aerotropolis focus area, the plan identifies "local area studies of key corridors and essential roadways such as Peña Boulevard, Tower Road, Smith Road and Airport Road."

Freight activity inherently extends beyond the city borders, and much of the key freight infrastructure within the city is owned and managed by other entities (Interstate Highways and freight rail lines). However, the City of Aurora can plan for and manage freight within the city in other ways, including:

- Land use/zoning code,
- Designating truck routes (outside of the various uninterrupted flow facilities)
- Street operation and design on truck routes
- Future investment in freight-related infrastructure, including mitigation measures
- Setting policy related to freight vehicle activity within the city, such as loading zones.

Figure 5-1. Aurora Freight Network

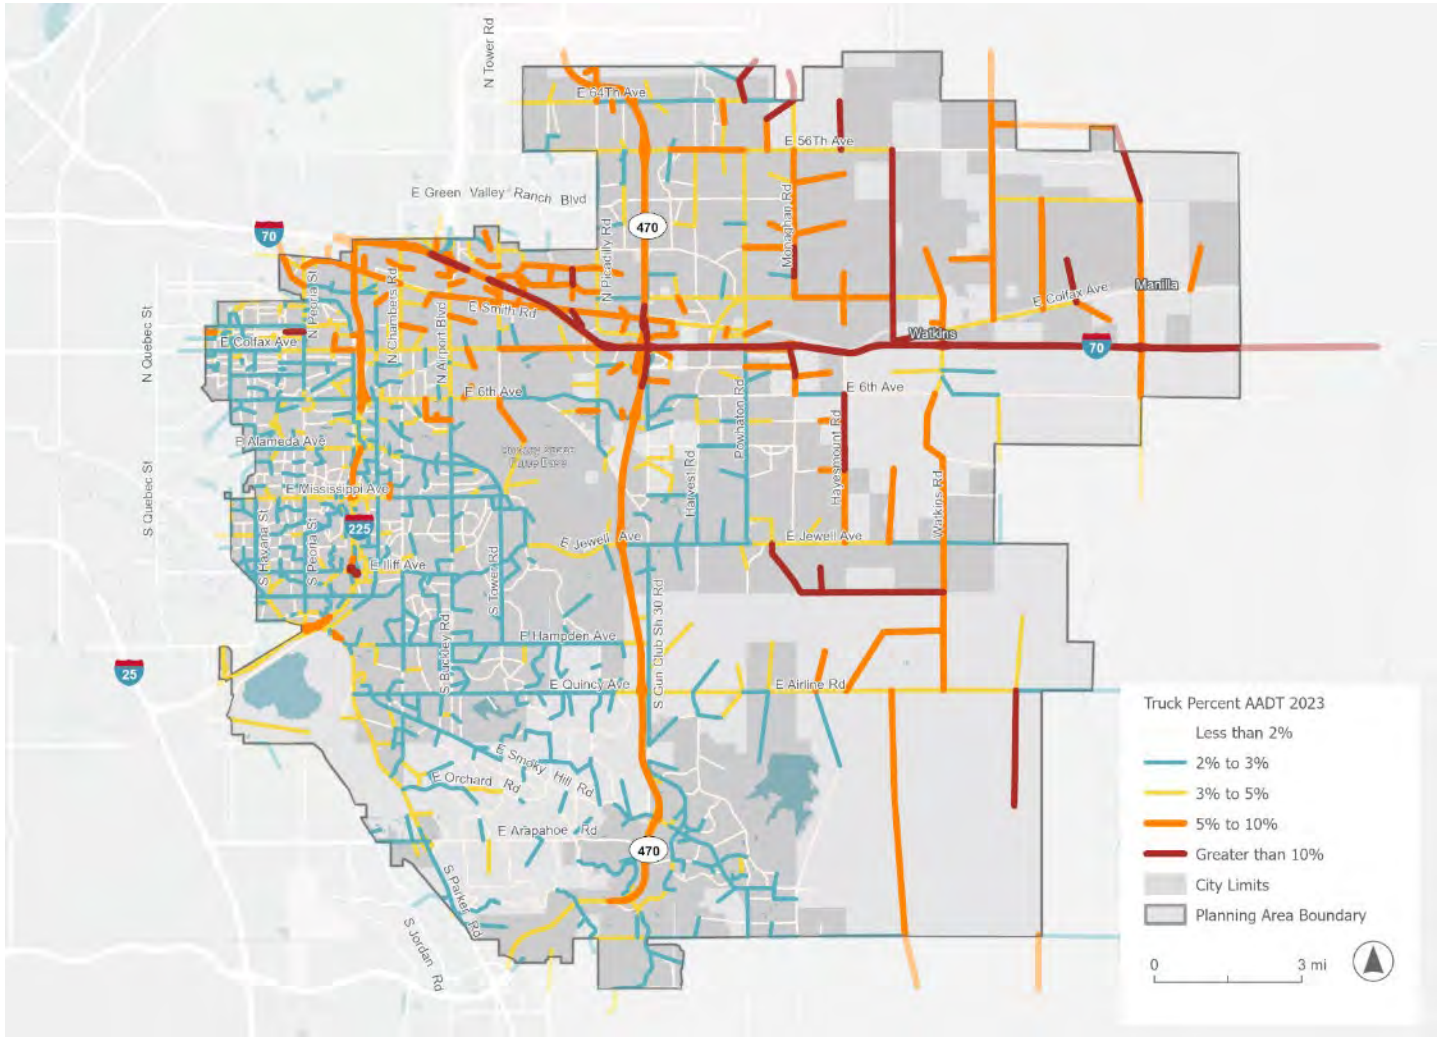
Source: City of Aurora Data Information System, 2024



5.1 Freight by Truck

In Colorado, trucking accounts for more than 90 percent of all freight activity. In the City of Aurora, rail also serves as a key freight infrastructure, but trucks account for the majority of freight activity. Trucks are generally involved in every intermodal transmission of commodities and are often the exclusive origin-to-destination mode. Truck freight generally consists of heavy-duty trucks (colloquially semis), hazardous materials vehicles, construction vehicles, garbage vehicles, and some other medium-duty trucks. Figure 59 and Figure 60 show the 2023 DRCOG modeled annual average daily truck traffic and the truck percent of total traffic volumes, respectively. The routes with the highest volume are the uninterrupted flow facilities, including I-70, I-225 and 470 Toll Road. These routes connect to other major freight corridors and freight generators/attractors in the region, making them critical for freight mobility. Other relatively high truck traffic routes in Aurora include Colfax Avenue, Alameda Avenue, Mississippi Avenue, and Iliff Avenue for east-west flows, and Havana Street, Peoria Street, Chambers Road, and Airport Boulevard for the north-south flows, with the highest volume segments closest to I-70 and I-225; these routes provide access to lower classification routes and commercial, business, and development access points. This plan acknowledges the significance of major truck trip generators to daily truck traffic, encompassing both heavy- and medium-duty vehicles, throughout the city. Locations like the Denver Arapahoe Disposal Site, Buckley Space Force Base, the Denver International Airport Aerotropolis, and the Porteos area are a few examples. These locations may not show as high demand across Figure 59 and Figure 60 based on data reporting or truck classification nuances, but are notable locations where demand is expected to remain consistent or grow with the city.

Truck parking in the region is a challenge, with generally limited truck parking inventory and high overall truck demand, as depicted by Figure 5-2. There are only four designated truck parking locations in the study area, all of which are directly adjacent to I-70. Two locations support 20 or fewer truck parking spaces, and only one exceeds 100 spaces (this location supports 160 trucks at a time). This means that truck trip generators and attractors must largely provide parking for loading purposes. In cases where demand exceeds capacity, there is a risk of improper and unsafe parking, both temporarily and in overnight situations. Improper truck parking has been observed in the area, particularly in northeast Aurora on 32nd Ave from Tower Road to Chambers Road, where there is a high density of truck-generating businesses and, with the exception of one high-capacity facility, limited parking availability.



Looking at percent truck traffic, typically high truck percentages are observed in low population density, rural areas where trucks transport commodities from agricultural, mining, or manufacturing operations. This is consistent with what is observed in Aurora, where the further east the route, the higher the share of truck traffic. Notably, I-70 also carries a high share of trucks, which is not always the case in dense urban areas where personal vehicles are the primary mode of transportation. This is observable in the westernmost segment of I-70 on Figure 59 and further demonstrates the importance of I-70 for freight mobility and access in Aurora. While I-70 is not within the scope for this planning effort, it underscores the importance of the surrounding areas and transportation networks.

Figure 5-2. Annual Average Daily Truck Traffic, 2023 Modeled—Planning Area

Source: DRCOG Transportation Model, 2024

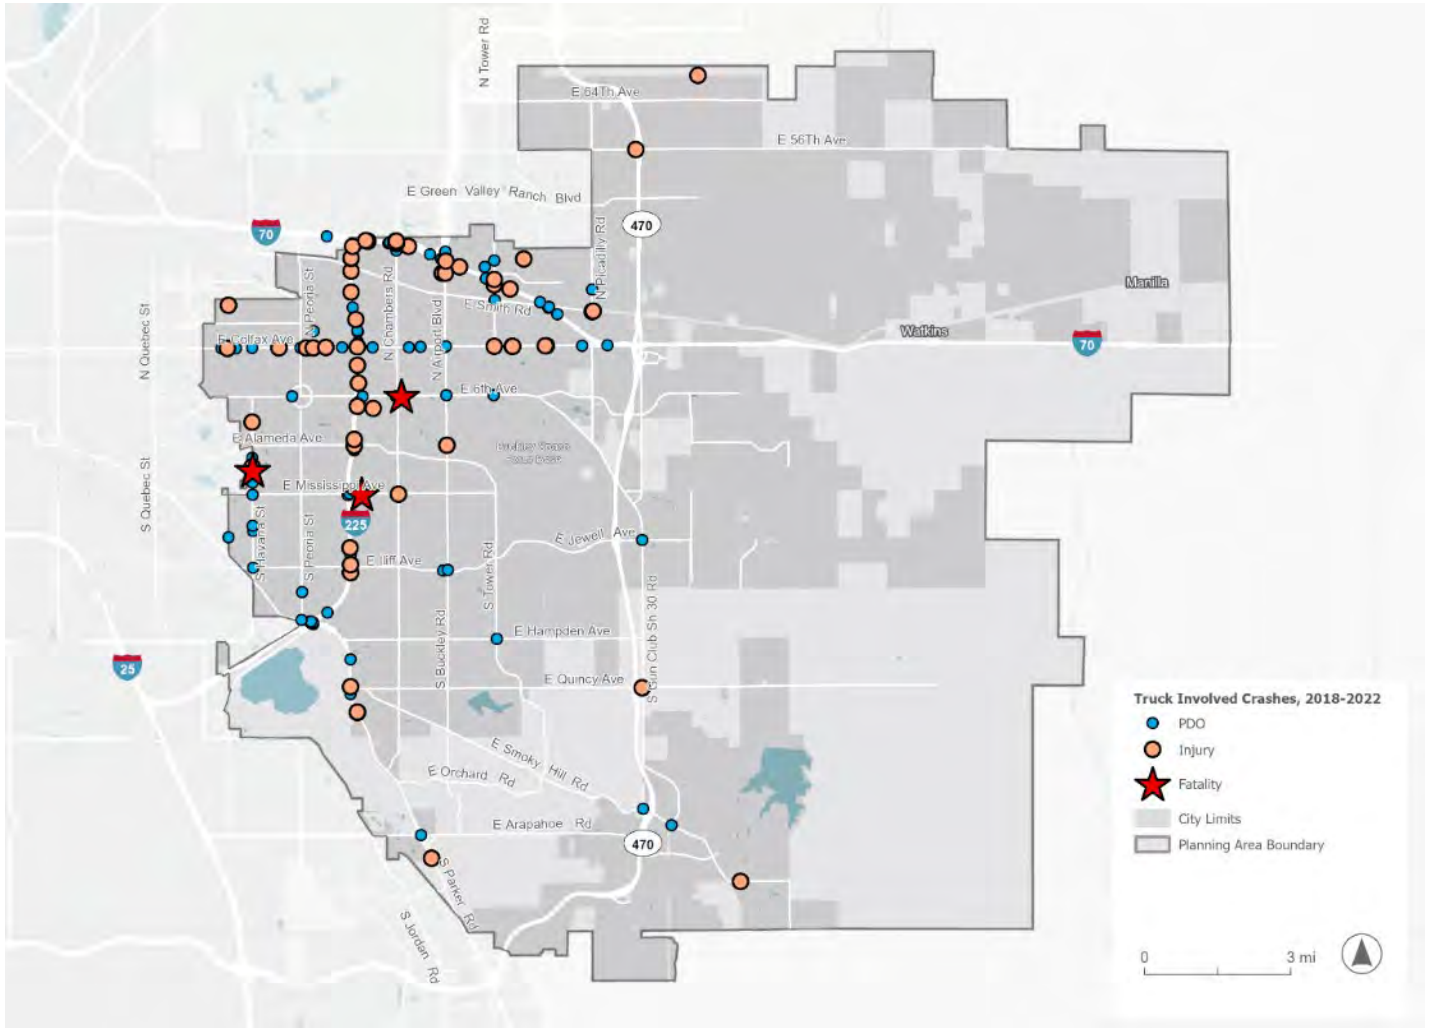


Figure 5-3. Truck Traffic Percent of Total Traffic, 2023 Modeled—Planning Area

Source: DRCOG Transportation Model, 2024

Safety is also a key component of multimodal freight planning efforts. Figure 5-4 shows the locations of crashes where one or more trucks were involved by severity within the 5-year period of 2018-2022. Three truck-involved fatalities occurred in this 5-year period, all of which were at or near intersections and involved vulnerable road users (motorcycle, bicycle, and pedestrian). The injury and property damage only (PDO) crashes primarily occur along I-70, I-225, and Colfax Avenue, coinciding with locations where there are generally high volumes of truck and non-truck vehicles. Additional safety analysis will be conducted through Adams County's upcoming safety action plan, with the findings incorporated into Aurora's final Multimodal Transportation Master Plan.

Figure 5-4. Truck Crash Locations, 2014-2023

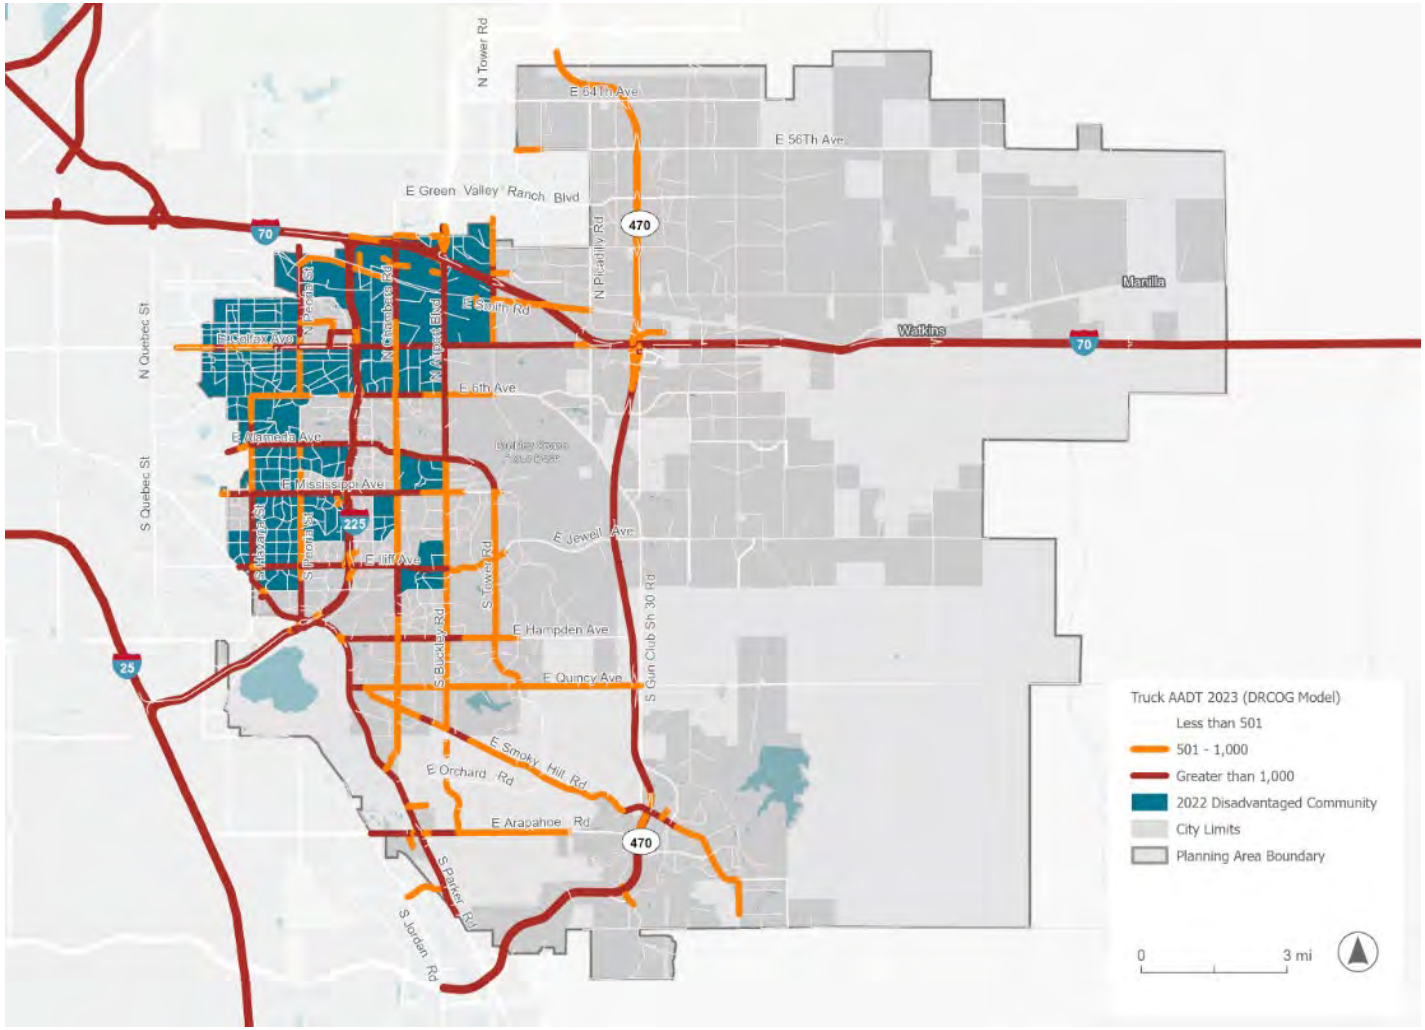
5.2 Freight by Rail

Freight railroad infrastructure and its operations are largely private, with the freight railroads in the City of Aurora owned and operated by Union Pacific. While most freight using the rail system simply travels through the city, there are also multiple freight rail spur lines that directly serve land uses within the City of Aurora, including the area surrounded by I-70, I-225, Smith Road and Chambers Road; land uses just south of Smith Road and east of Airport Boulevard; and the industrial area just north of Smith Road and west of Picadilly Road. Additionally, one of the most visible interactions between freight rail and the city's transportation system is at-grade rail crossings. At-grade rail crossings pose both safety and travel reliability concerns to other users navigating the planning area. Figure 62 shows the locations of freight rail crossings in the planning area, and the number of incidents that have occurred at these locations from 2014 to 2023. During this 10-year period, four incidents have occurred at three separate locations, with one resulting in a crash and an injury. This location is the Peterson Road (CR-29) crossing at the eastern edge of the planning boundary, which also had two of the four total incidents. This crossing is along a very rural, low-traffic roadway, where the only warning device present is the crossbuck signage.

Overall, within Aurora, there are a total of 69 rail crossings, of which 21 are grade-separated and 48 are at-grade. Various warning devices are present, including gates, flashing lights, signals/bells, crossbuck signs, and other signs.

Figure 5-5. Rail Crossings and Incidents, 2014-2023

Source: Department of Transportation—Data Portal, 2024



Interestingly, the highest volume freight crossings, in terms of roadway vehicle crossings, are among the safest. Chambers Road and Airport Boulevard carry the highest volume roadway routes that cross mainline freight rail tracks. These locations have not recorded an incident in the 10-year analysis period, likely as a result of two conditions/characteristics. First, these crossings have excellent safety measures. Traffic signals, gates, flashers and detection all play a major role in safely managing the intersection of roadway vehicles and trains. These crossings serve as case studies for ensuring safety at at-grade crossings. Second, the urban nature of the locations indicates an "end of the line" situation for trains, resulting in slower speeds at the crossings. This makes managing safety easier because drivers and operators have adequate time to respond to potential incidents. Incidents in Aurora typically occur on side tracks, where there is a lot of individual or small-group railcar activity, and on mainlines that intersect rural roadways, where trains operate at higher speeds and crossing safety measures are not as robust as in urban areas.

5.3 Freight and Equity

Another important consideration in transportation planning today is equity—a consideration of who benefits from the system and where the costs are borne. The U.S. Department of Transportation (among other federal agencies) currently uses the Justice40 Dashboard to identify disadvantaged communities by census tract, as a resource to inform planning and investments. The Justice40 Dashboard considers the following six criteria: Transportation, Health, Economy, Equity, Resilience, and Environmental. A subtotal of the six criteria, referred to as overall disadvantaged communities, identifies any tract where at least four of the six criteria are considered disadvantaged. Figure 63 shows the location of these communities within the City of Aurora in relation to general truck travel.

Future investments and policies should consider the benefits and impacts of freight within these communities, along with opportunities to mitigate impacts where possible.

Figure 5-6. Disadvantaged Communities, 2023

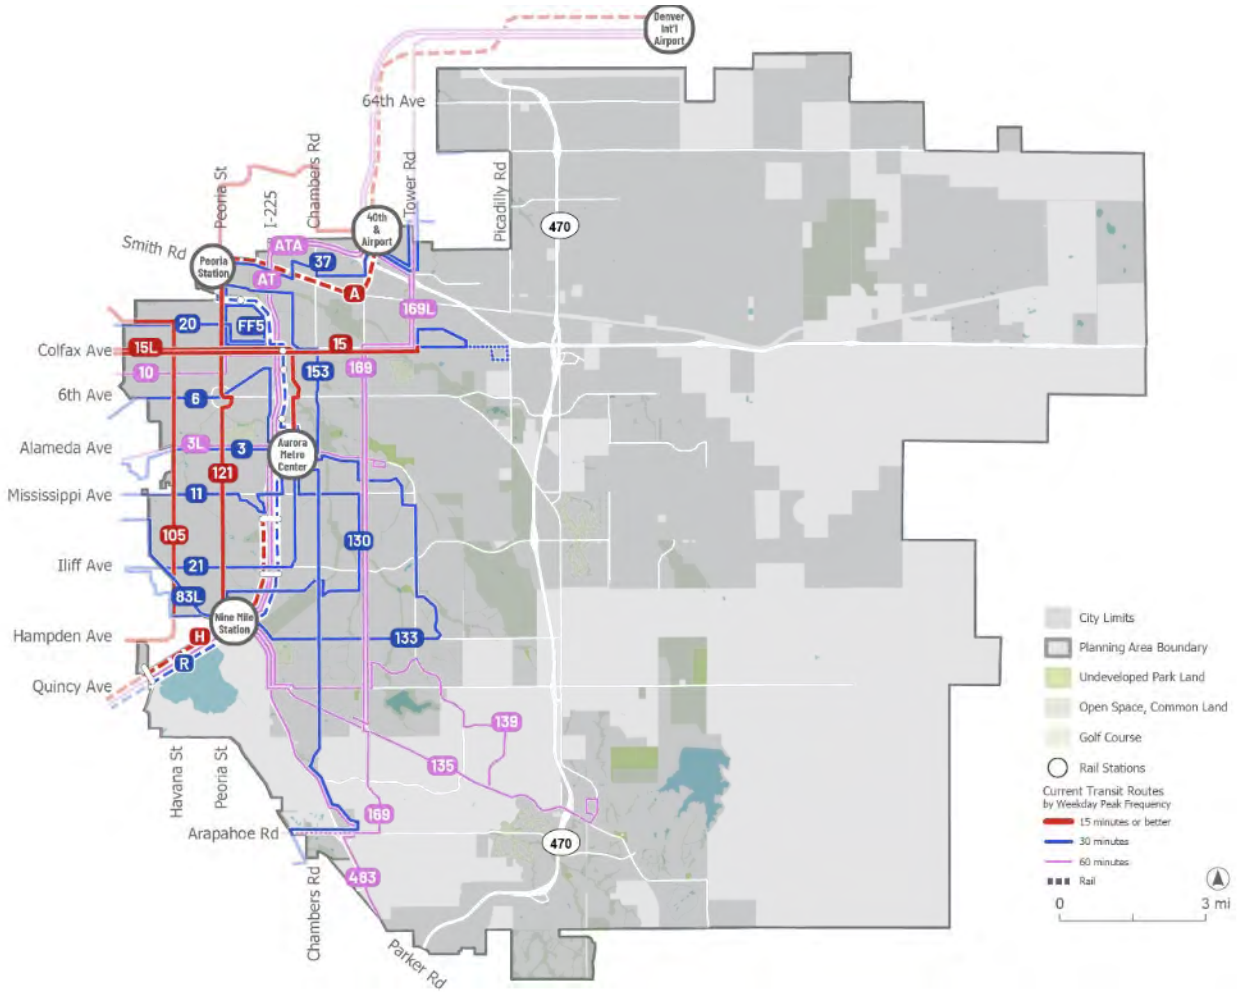
6 Public Transportation Overview

Transit is a vital component of Aurora's transportation network, enabling residents and employees to reach destinations both within the city and across the region. Public transportation has been provided since 1972 by the Regional Transportation District (RTD), which serves 37 municipalities, including Aurora. RTD currently serves over 3 million customers in the Denver Metro area, with approximately 13 percent of them residing in Aurora.



Riders can use a variety of transit modes to get to their destinations. Today, Aurora is served by 30 RTD bus and rail routes, including 24 local bus routes, one regional Flatiron Flyer route, two light rail lines, one commuter rail line, and two SkyRide lines (Table 6-1 and Figure 6-1). These routes comprise 20 percent of all RTD routes.

Table 6-1: RTD Transit Routes in Aurora Weekday Peak Service Characteristics

Route	Name	Headway (minutes)
FF5	Flatiron Flyer	30
A	A Line	15
H	H Line	15
R	R Line	30
3	E Alameda Ave	30
6	East 6th Ave	30
10	East 12th Ave	60

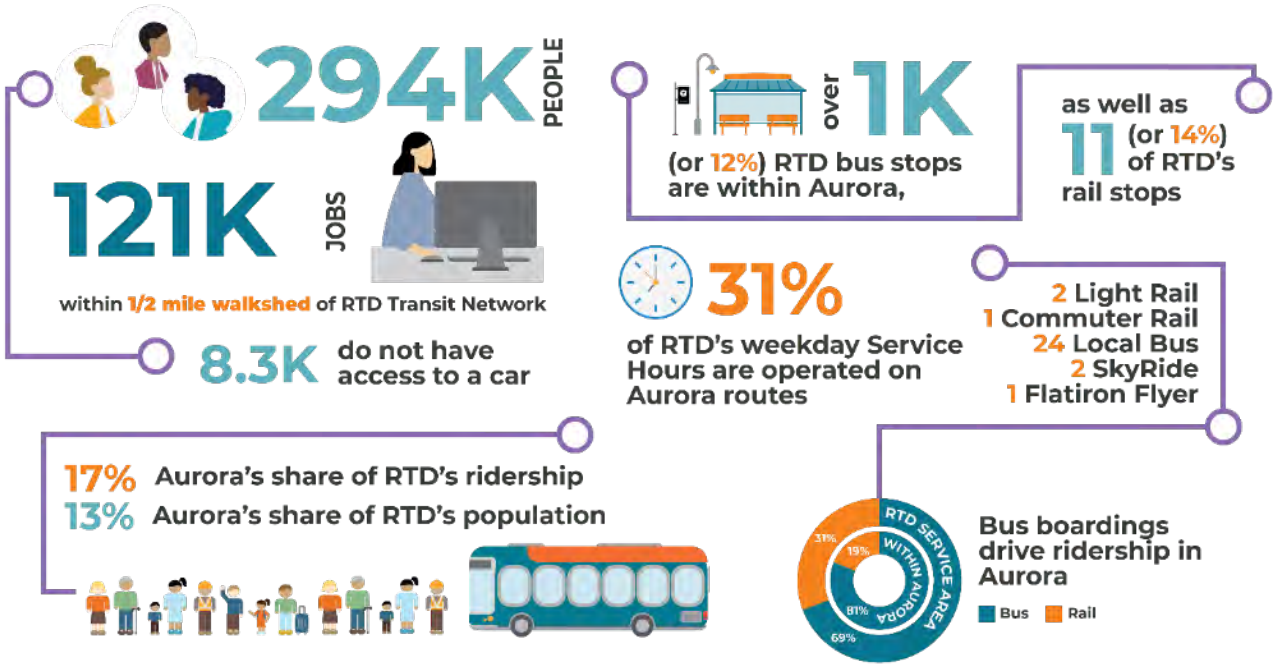
Figure 6-1: RTD Transit Routes in Aurora by Weekday Peak Frequency



Source: RTD, September 2023

Aurora has over 1,000 bus stops and 11 rail stops. Of those, approximately 630 have benches, and around 90 have shelters. Local fares for a one-way bus and rail trip cost $2.75, while a one-way ticket to Denver International Airport costs $10. There are fare discounts of 50 percent available for seniors, students, people with disabilities, low-income individuals, and Medicare recipients, as well as free admission for youth 19 and under. All discounted fares include trips to and from Denver International Airport.

Aurora residents use transit to commute to work and school, meet family and friends, attend appointments and events, and shop at stores. Nearly 300,000 people and around 120,000 jobs in Aurora are located within a ten-minute walk to transit or within one-half mile "walkshed" of RTD's bus network. Walksheds are buffers that are calculated using the distances of the existing sidewalk and trail network from transit stops (as opposed to "as-the-crow-flies" buffers). It typically takes a person around 10 minutes to walk one half mile. Of the nearly 300,000 people near transit, over 8,300 people do not have access to a car and may rely on transit to get around. Over 35,000 people use transit in Aurora every weekday, with more than 28,000 using the bus system and the rest using the rail system.

Figure 6-2: Transit in Aurora, Today

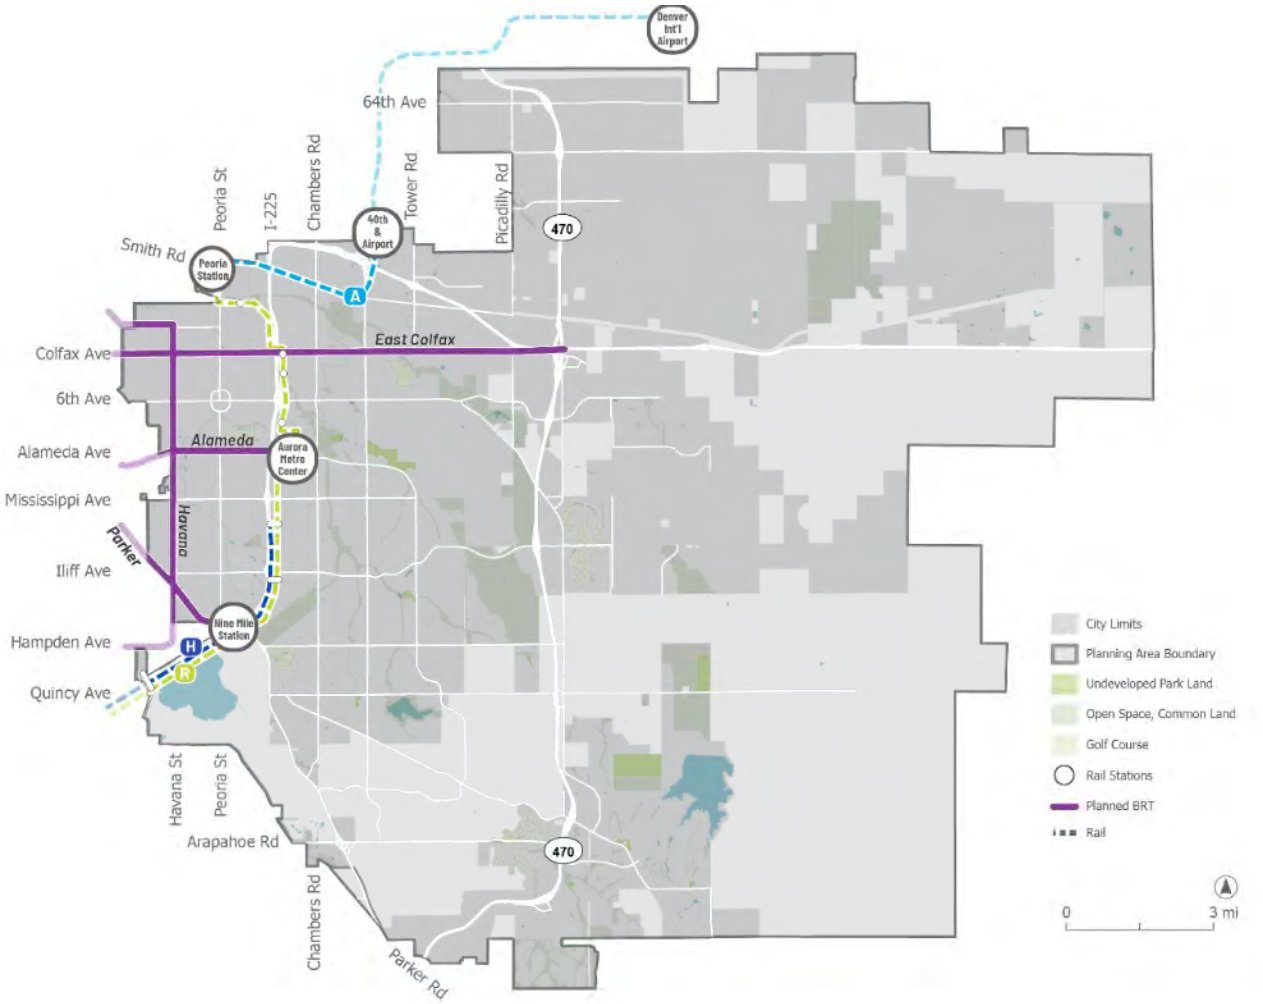
6.1 Planned Transit

RTD is expanding and improving its offerings to better serve the Denver Metro area. In 2004, voters from the agency's eight constituent counties approved a sales tax increase to fund the FasTracks program. The FasTracks program will expand commuter rail, light rail, and express bus service in RTD's service area. The program is not expected to be built out until after 2050.

Two FasTracks rail projects currently serve the City of Aurora. The R Line, which opened in 2017, provides north-south service in the heart of Aurora from Dayton Station to Peoria Station on the University of Colorado A Line. This line has 10 stations in Aurora and provides connectivity to other major transit routes and destinations, including the Denver International Airport. It originally operated with a 15-

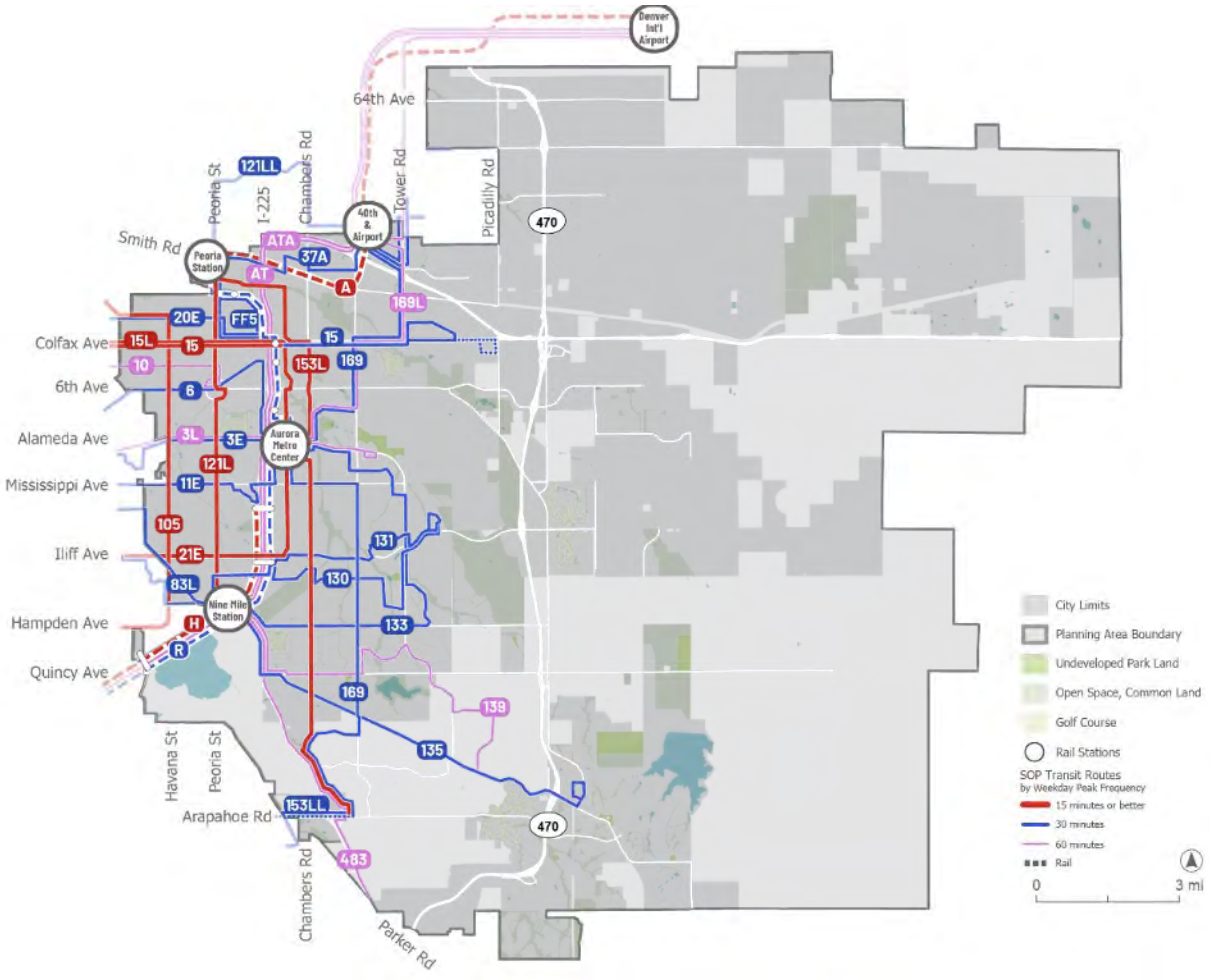
minute frequency but has since been reduced to 30-minute headways due to low ridership and operator shortages.



Another FasTracks line, the commuter rail transit A-Line, travels from Denver Union Station to the airport and has two stations, Peoria Station and 40th Ave & Airport Blvd-Gateway Park Station, in Aurora at frequencies of every 15 minutes. The H line, which opened in 2006, operates from Aurora to South Denver and to Downtown Denver, but it is not a part of the FasTracks program. While the planned program for Aurora has already been built, further progress is underway for FasTracks that will continue to improve connectivity for Aurora residents in the future to other parts of the region.

There have been different plans that have identified future corridors for bus rapid transit (BRT) in the Denver and Aurora region. RTD, CDOT, and DRCOG have all worked with other local partners to study the feasibility of different BRT corridors in the region. Currently in Aurora, there are five BRT corridors planned (Figure 6-3), each at different phases of planning and design and construction that if built, each of these will contribute to a more fast and reliable transit service for riders throughout the region.

- East Colfax BRT (2028)
- East Colfax BRT Extension (2030)
- Alameda Ave BRT (2031-2040)
- Speer/Leetsdale/Parker BRT (2031—2040)
- Havana/Hampden BRT (Future)



The RTD's System Optimization Plan (SOP) looked to RTD's existing bus service to identify areas for improvement in growing ridership and increasing efficiency (Figure 6-4). The process of developing the SOP involved comprehensive reviews of existing services, travel patterns, and financial capacity. These informed the recommendations for the optimized bus network, which were adopted by the RTD Board of Directors in 2022. The changes proposed by this plan are being gradually implemented through 2027 through RTD's standard runboard and service change process.

Figure 6-3: Rail Service and Planned and Programmed BRT in Aurora

Source: City of Aurora, RTD, CDOT, and DRCOG.

Figure 6-4: System Optimization Plan Routes by Frequency in Aurora

Source: RTD System Optimization Plan

In Aurora, several routes have been identified for changes; there are four routes identified for frequency improvements, one route being restored to service, two routes with a longer span of service than today, and nine routes with alignment changes.

- Route 15 East Colfax will have a short-turn at Billings Street, slightly **changing where the frequency changes** on the corridor from 15 minutes to 30 minutes, and it will be extended east to serve the Amazon distribution center near Picadilly Road
- Route 131 East Iliff **restored** (and interlined with 130)
- Route 130 Yale/Buckley **realigned** to Iliff Station
- Route 169 Buckley Crosstown **adds a deviation** to serve Aurora Metro Center Station
- Route 169L Buckley/DIA **adds a deviation** to serve 40th & Airport Station and is shortened to Aurora Metro Center Station (paired with 169 frequency increase)
- Route 21 Evans Ave frequency **increased to 15 minute**
- Route 135 Smoky Hill Rd frequency **increased to 30 minute**
- Route 153 Chambers Rd frequency **increased to 15 minute**
- Route 169 Buckley/DIA frequency **increased to 30 minute**

System reliability improvements will be made by breaking up long routes to enhance on-time performance for these existing long routes. However, this will require transfers for riders taking longer crosstown trips. This includes Route 3 East Alameda Ave, Route 11 Mississippi Ave, Route 20 20th Ave, Route 21 Evans Ave, Route 37 Smith Rd, and Route 121 Peoria Street.

- Break up Route 3 East Alameda at Alameda and Broadway/Lincoln. Route 3E runs in Aurora, east of Alameda Station
- Break up Route 11 Mississippi Avenue at I-25/Broadway Station
- Route 20 20th Avenue in Aurora will end at Denver Union Station
- Break up Route 21 Evans Avenue at Evans Station
- Route 37 Smith Road will operate between 40th & Colorado Station and Central Park Station with the ability to deviate within a short distance of alignment
- Route 121 Peoria Street will operate every other trip north of Aurora between Peoria Station and 40th & Airport Station

6.2 Transit Infrastructure

Bus stops, Rail Stations, Park-n-Rides (PNR) and other types of transit facilities and infrastructure support the daily operations of transit in Aurora and the region as a whole. Within the Aurora Planning Boundary area, there are a total of 1,128 active bus stops, 11 rail stations, and 8 PNR facilities. Each of these transit facilities provides riders with various levels of amenities and supporting infrastructure to walk, bike, or drive to access transit services. According to the RTD Bus Stop Inventory and City of Aurora Bus Stop Maintenance Program Structures Database, around 56 percent of stops have a bench, and only 8 percent of stops have a shelter (Table 6-2). Furthermore, about 47 percent of stops are ADA Accessible, and 48 percent have a handicap ramp.

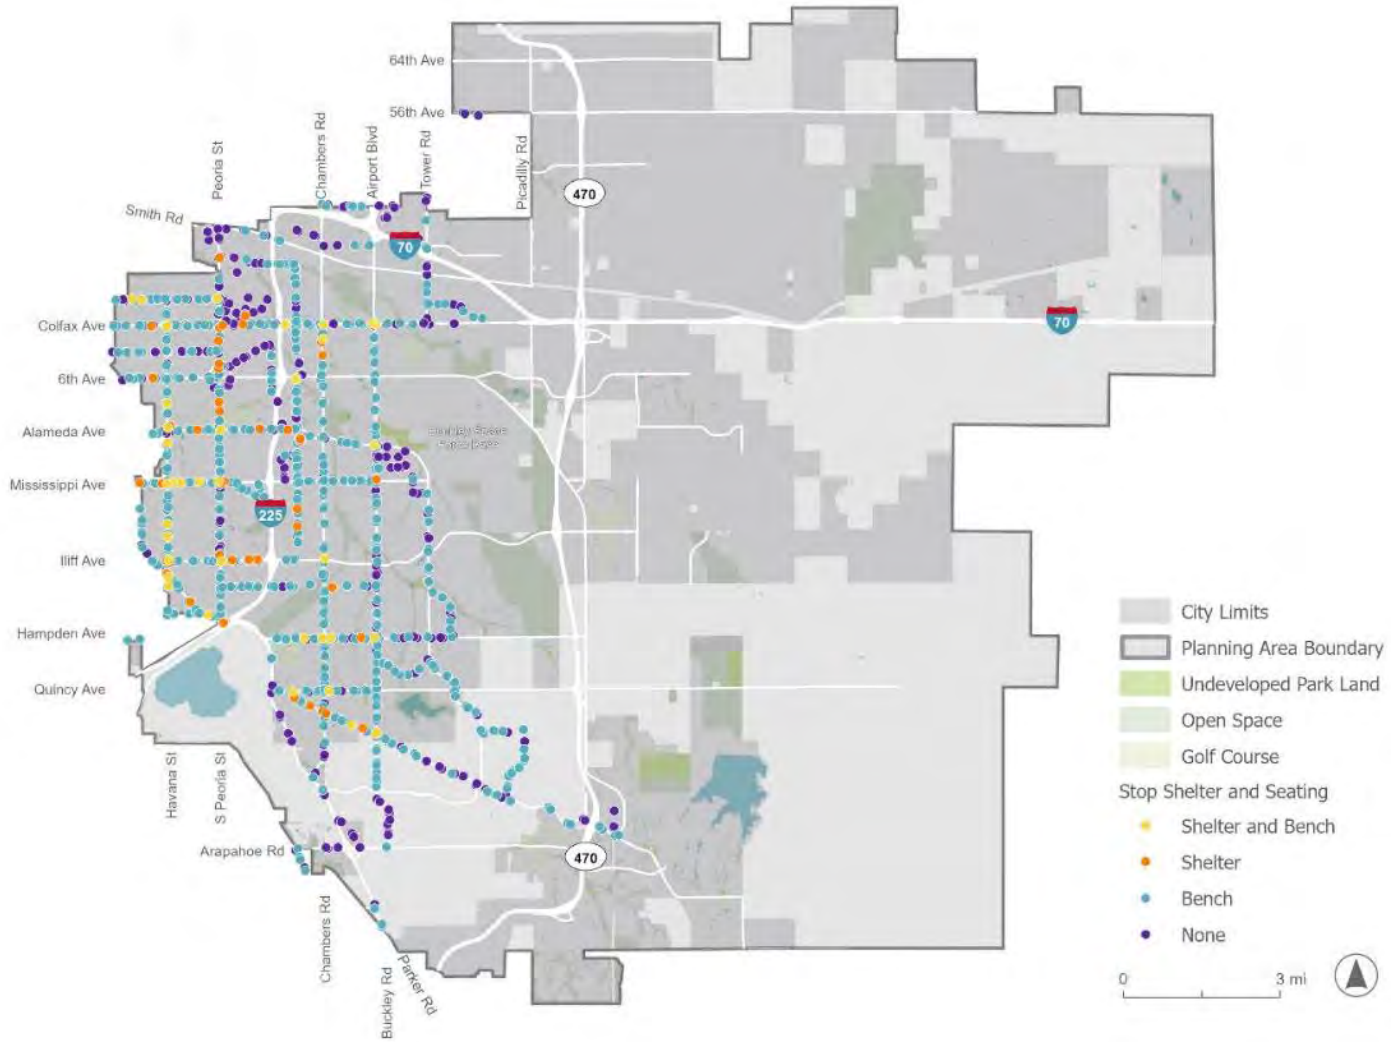
Table 6-2. Existing Bus Stop Amenities

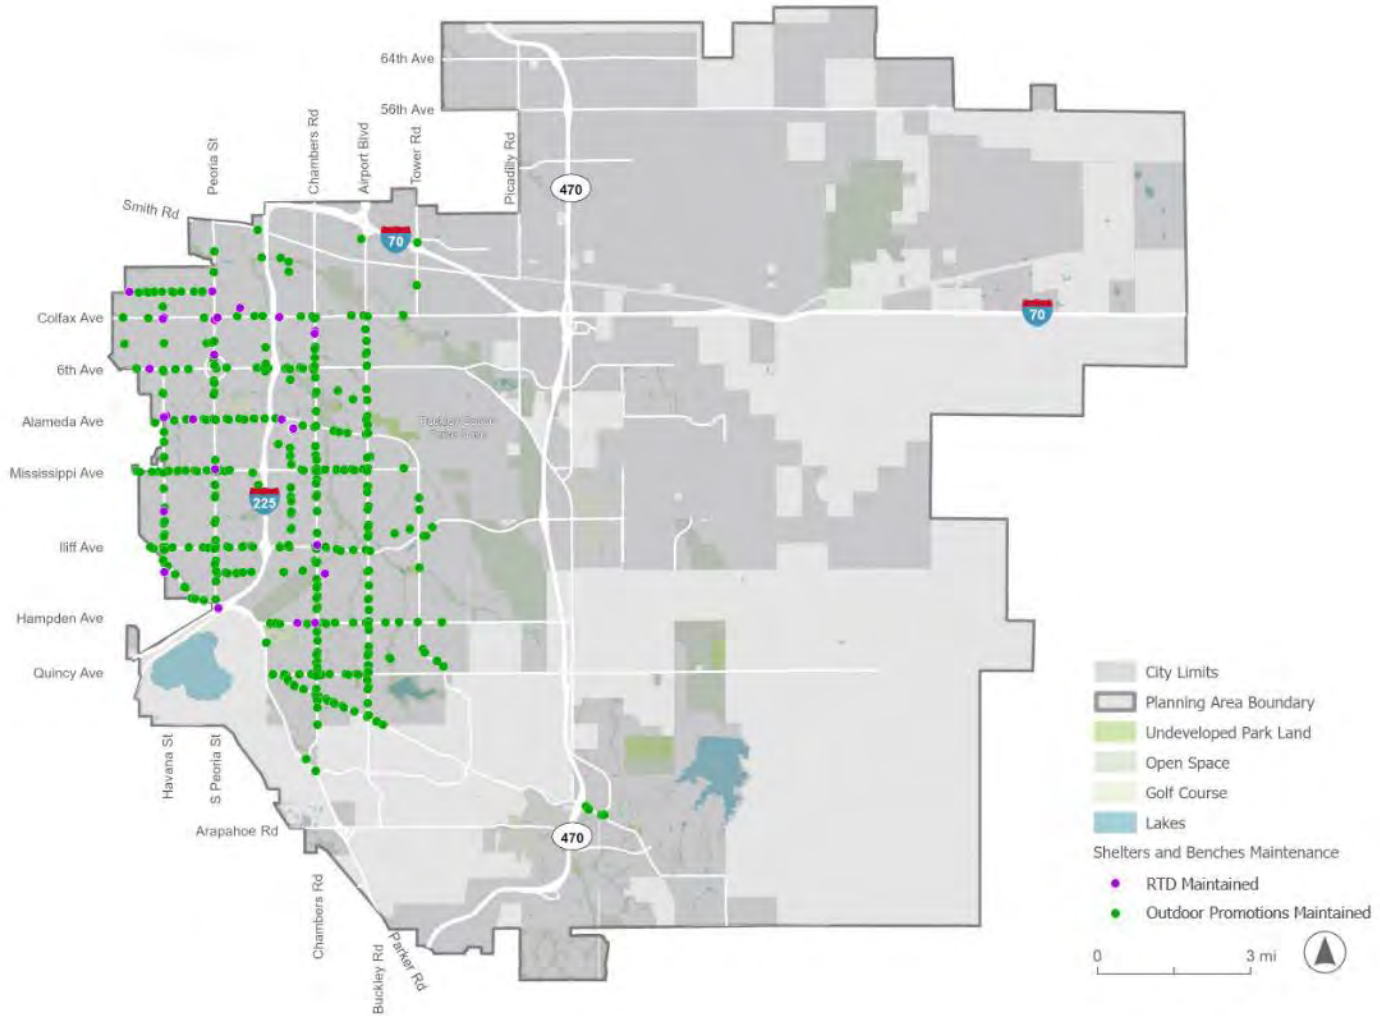
Stop Amenity	Number of Bus Stops	Percentage of Bus Stops
Bench	630	56%
Shelter	93	8%
Handicap Ramp	543	48%
Is ADA Accessible	527	47%

In Aurora, the geographic distribution of benches is relatively even across the transit routes and stops in Aurora (Figure 6-5). Shelters, although sparsely located, are generally concentrated at stops with higher ridership in the system, with approximately 40 percent of shelters situated at stops with more than 50 average daily riders on a weekday (data from September 2023). Shelters can be found along corridors such as Alameda Avenue, Colfax Avenue, Hampden Avenue, Iliff Avenue, Mississippi Avenue, Havana Street, and Smoky Hill Road.

Most bus stops in Aurora are located either within public (usually city-owned) right-of-way or on private property where the owner has provided an access easement to RTD or the city to place a bus stop. The infrastructure at each stop is funded and maintained by various entities. Approximately 538, or almost half, of the city's bus stops are maintained through a partnership between the City of Aurora and Outdoor Promotions, a marketing company that specializes in bus stop advertising. The stops operated by Outdoor Promotions are located along major arterials and all feature either a bench or shelter. Additionally, RTD directly operates and maintains 38 stops with shelters throughout the city, primarily along Colfax Avenue and at other key transfer locations (Figure 6-6). The remaining ~550 stops have an unclear maintenance agreement status, although these tend to be stops with limited or no amenities, such as benches and shelters. RTD will launch a comprehensive inventory of bus stops throughout the system in Fall 2024, which will include an implementation plan for working with local jurisdictions and advertising partners to address ADA compliance issues and the disparity of stop amenities seen throughout the network, including in Aurora.

Figure 6-5. Transit Stops and Stations and Amenities





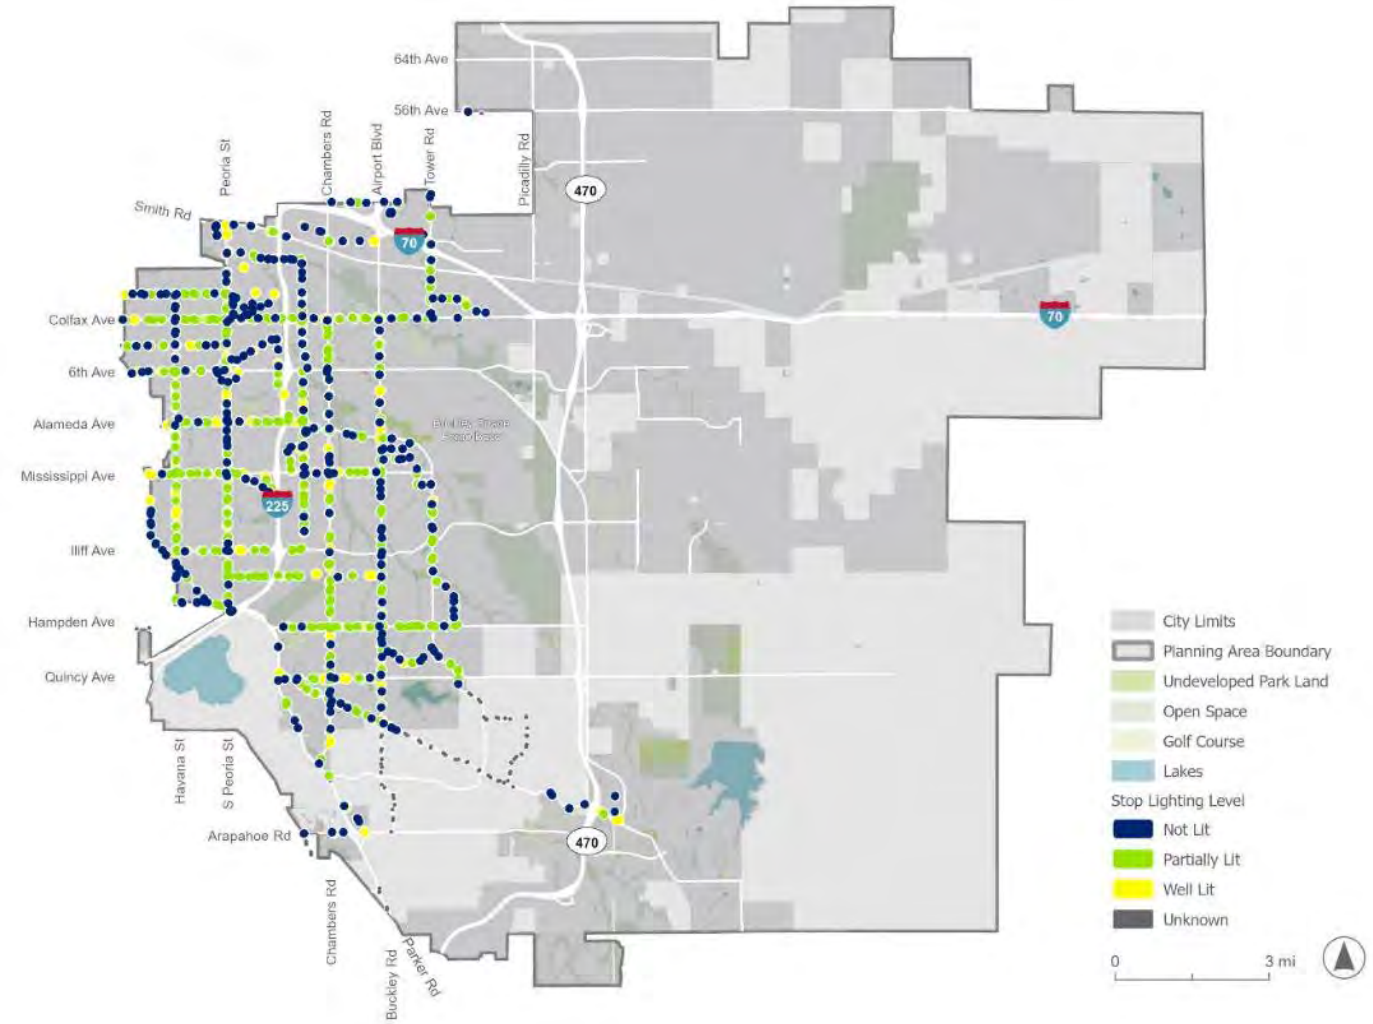


Figure 6-6: Stop shelter and bench maintenance

Lighting is another critical component of infrastructure for transit riders. A well-lit street and bus stop can provide a more comfortable and safe experience for someone walking to and from the stop and waiting at the stop for the bus at night. It also helps riders be visible to bus drivers, so that they can safely slow down while approaching the stop when they see someone waiting at night. There are almost 15,000 streetlights in the City of Aurora and nearly 10,000 pedestrian-scale neighborhood lights. Since few bus stops in Aurora outside of the enhanced Route 15L shelters on Colfax Avenue feature their own lighting, the project team compared the location of the city's street lights to the locations of bus stops to assess the level of lighting available at stops (Figure 6-7). A little over 200 stops are likely well-lit, with at least 1 streetlight within 50 feet of the stop or 3 or more streetlights within 100 feet of the stop. The majority of stops, approximately 375, are likely partially lit, meaning they are within a 100-foot distance of at least one or two streetlights. Of the remaining stops, nearly 350 were found to have no lighting within 100 feet of the stop, and the remaining 200 stops had insufficient streetlight data available to determine the likely level of lighting. The distance of 50 to 100 feet from the stop was based on a typical streetlight height of around 15 feet, and that lights should typically be spaced 2.5 to 3 times the height of the light apart for optimal lighting coverage, or approximately 50 feet apart. Therefore, it could be expected that multiple lights within 100 feet of the stop, or at least one light within 50 feet of the stop, would provide enough lighting for visibility at the stop at night

Figure 6-7: Transit Stops and Stations Lighting

There are 12 PNR facilities in Aurora, 11 of which are at rail stations, eight of which have PNR facilities on site and there is one bus PNR facility. There are nearly 4,480 total parking spaces at the PNRs in Aurora; the two facilities with the most parking spaces are the Nine Mile Station which has 1,225 spaces and serves both the H Line and R Line as well as 10 bus routes today, followed by the 40th Avenue & Airport Boulevard Gateway Park Station facility with 1,079 spaces and serves the A Line and connections to six bus routes. Of the 12 facilities, six provide bike racks, and five of those provide bike lockers in addition to racks. All of these stations, with the exception of Alameda/Havana and Iliff, offer free parking for up to 24 hours, after which they charge for longer-term parking in increments of 24-hour periods. Alameda/Havana is always free. Table 6-3 presents an inventory of transit facilities in Aurora.

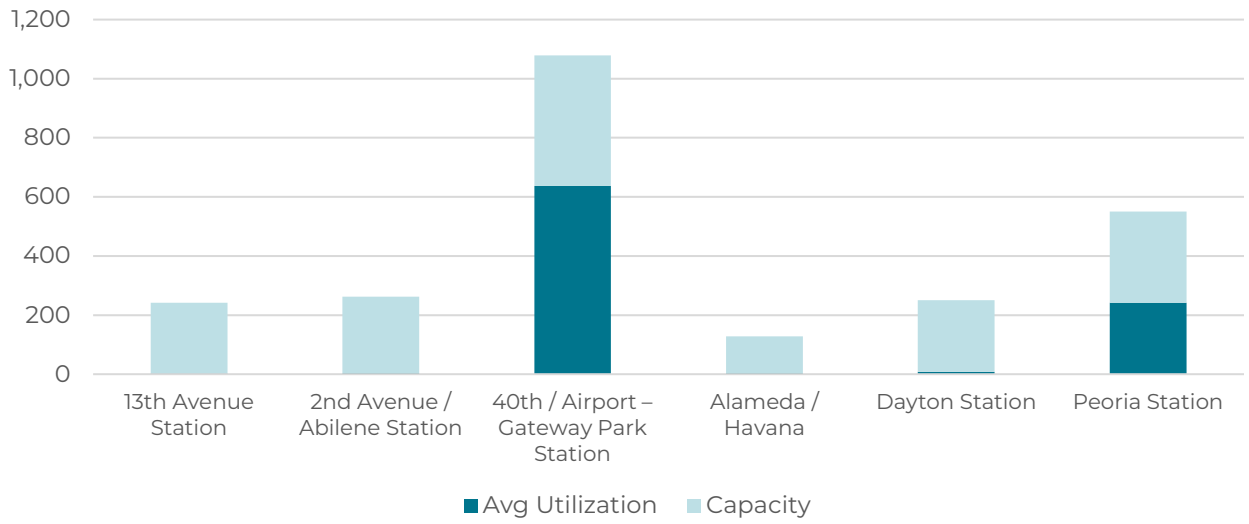

Table 6-3. Inventory of Transit Facilities in Aurora

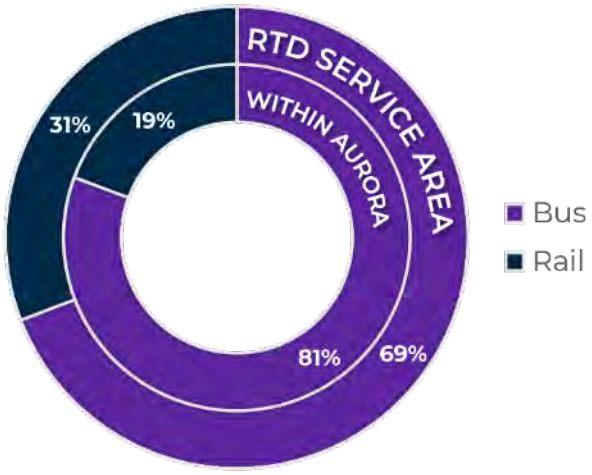
Name	Type	Routes Served	Parking Capacity	Bike Racks	Bike Lockers
Peoria Station	PNR with Bus & Rail	A Line, R Line Routes: 37, 45, 121, 153	550 spaces	Yes	No
40th/Airport—Gateway Park Station	PNR with Bus & Rail	A Line Routes: 37, 42, 45, 121, 169, ATA	1,079 spaces	Yes	Yes
Fitzsimons Station	Rail Station	R Line	None	No	No
Colfax Station	Rail Station	R Line Routes: 10, 15, 15L, 20, FF5	None	No	No
13th Avenue Station	PNR with Rail	R Line	242 spaces	No	No
2nd Avenue/Abilene Station	PNR with Bus & Rail	R Line Route 6	262 spaces	No	No
Aurora Metro Center Station	PNR with Bus & Rail	R Line Routes: 3, 3L, 6, 11, 15L, 21, 130, 133, 153	145 spaces	No	No
Florida Station	Rail Station	H Line, R Line Route 11	None	No	No
Iliff Station	PNR with Bus & Rail	H Line, R Line Route 21	600 spaces	Yes	Yes
Nine Mile Station	PNR with Bus & Rail	H Line, R Line Routes: 83D, 83L, 121, 130, 133, 135, 139, 483, AT, ATA	1,225 spaces	Yes	Yes
Dayton Station	PNR with Rail	H Line, R Line	250 spaces	Yes	Yes
Alameda/Havana	PNR with Bus	Routes: 3L, 105	128 spaces	Yes	Yes

Source: RTD

In 2023, RTD collected data on the average use of their parking facilities (Figure 6-8). Of the facilities with data available in Aurora, 40th and Airport—Gateway Park Station had the highest utilization at an average of 59 percent and Peoria Station at 44percent. The other PNR facilities had an average utilization of only 1 percent to 3 percent in 2023.

Figure 6-8: Average Parking Utilization at RTD PNR Facilities in 2023

Transit Conditions



Examinations of ridership and demand reveal where transit is or will be used most frequently and can provide insight into opportunities for future expansion or service redesign. While the City of Aurora and the Planning Area Boundary cover a large area, RTD service is provided only on their western edge, where population and employment densities are high enough to support frequent fixed-route transit. In this section, analyses of route ridership, bus stop boardings, a transit gap analysis, access to destinations via transit, and bus delay were analyzed to assess transit conditions and opportunities.

Transit Performance

As described above, riders can use a variety of transit modes to get to where they want to go. The R-line provides a light rail service that operates from Peoria Station in North Aurora along I-225 and I-25 through the Denver Tech Center out to Lone Tree in the south. The R-line is a north to south backbone which connects to many of Aurora's bus routes, to the A-line commuter rail with connections to Downtown Denver and Denver International Airport, and to the H-line light rail route to Downtown Denver. Shortly after the route opened in 2017, RTD reduced frequency from 15-minutes to 30-minutes to respond to lower-than-expected ridership. Over the past ~5 years, the R-Line has also experienced severe reliability issues, causing slower travel speeds and delays due to maintenance issues and track closures, as well as canceled trips resulting from a shortage of light rail operators. These issues make it difficult for riders to rely on, especially due to the potentially long wait times. Both the A-line, which provides connections to northeast Denver and the Airport, and the H line, which provides connections to south Denver and Downtown Denver, typically operate every 15 minutes but serve smaller sections of north and south Aurora, respectively.

The majority of transit service operated by RTD in Aurora today is bus service along 27 bus routes, with 4 of those routes being high frequency with buses arriving every 15 minutes or more frequently throughout most of the weekdays. Bus boardings drive more of the ridership than rail at 81% of weekday boardings at 29,415 boardings per day within the Planning Area Boundary, while bus boardings only make up 69% of all RTD Service Area weekday ridership (Figure 72).

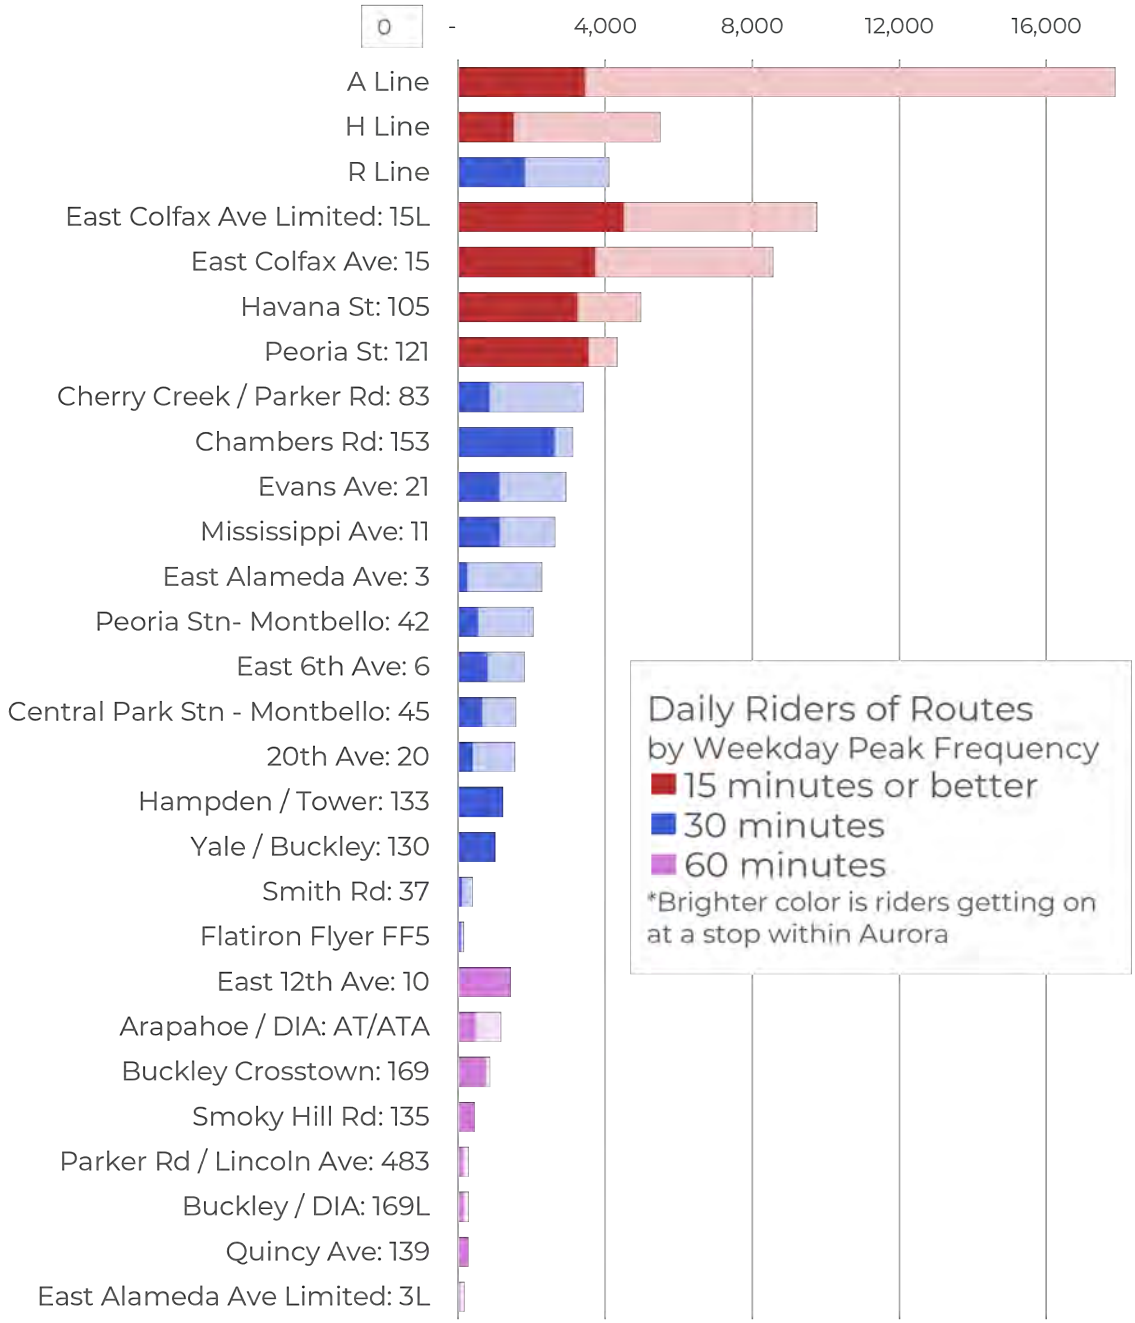


Figure 6-9: Bus Boardings Ridership in Aurora

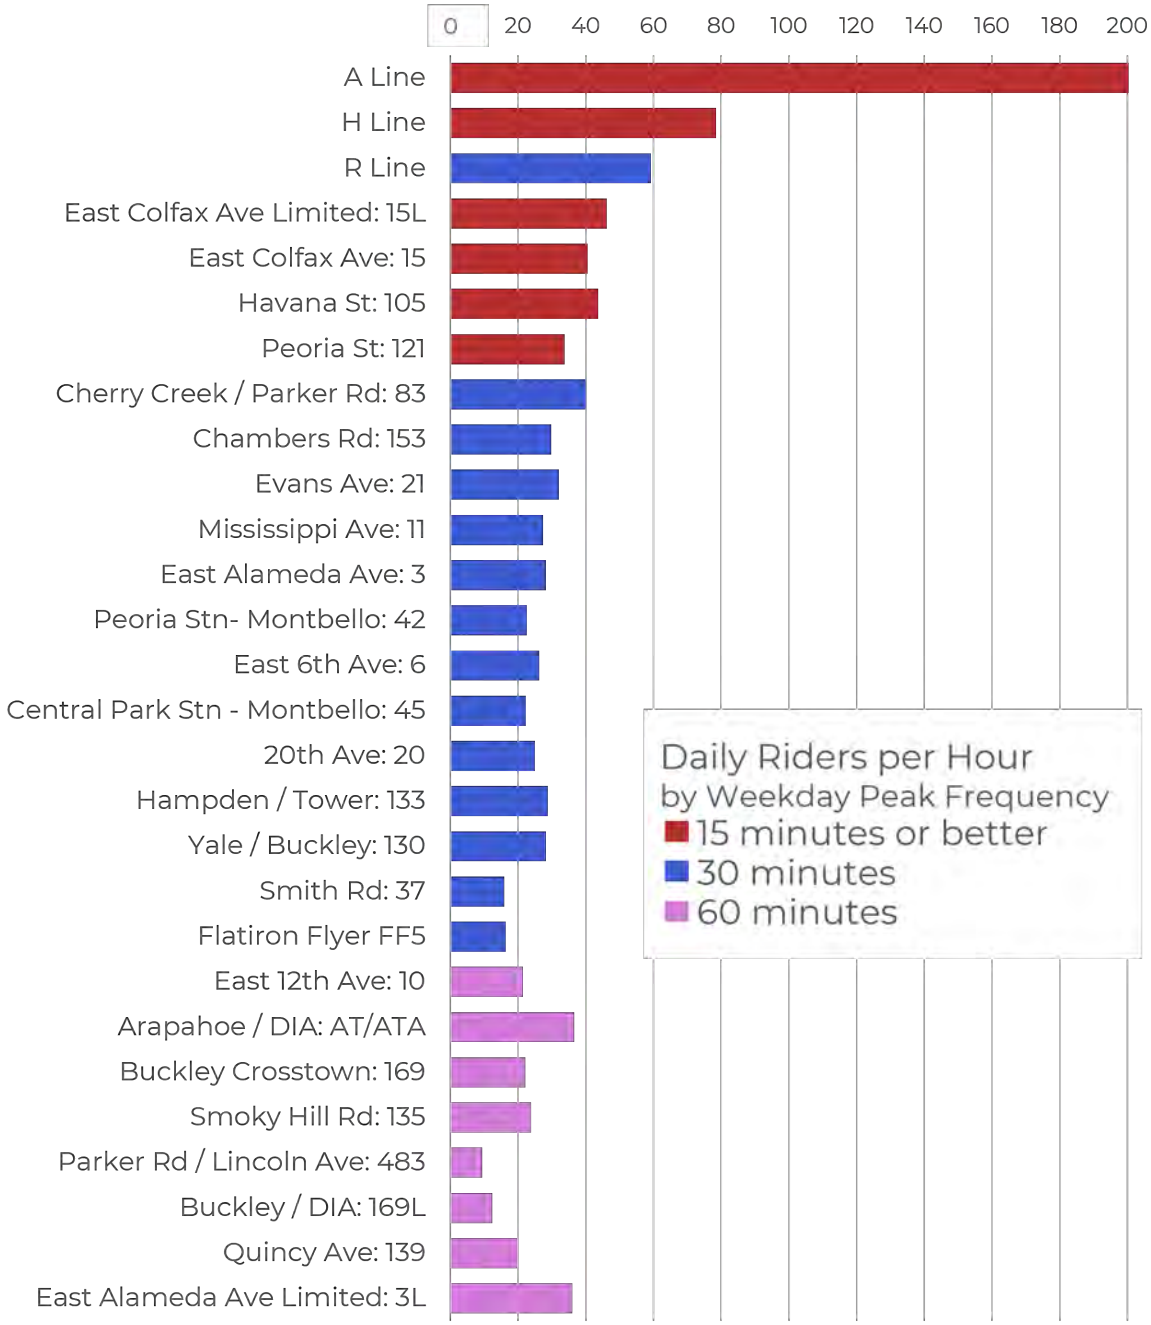
Source: RTD, September 2023.



Average weekday boardings are greatest on high-frequency and high-capacity routes, with the A Line, East Colfax Limited (15L), and East Colfax (15) as the strongest performers. Rail services have a high number of boardings relative to their revenue hours, and at a system level, their share of boardings exceeds their share of revenue hours. Higher-frequency bus routes with 15-minute headways or better also perform strongly in terms of riders per revenue hours, averaging 41 riders per hour, while the 30-minute headway routes average closer to 26 riders per hour. The 60-minute routes average a bit lower. This does not mean that these lower-frequency routes are not performing as intended, as their primary function is to connect riders in outlying and more sparsely populated areas to higher-frequency bus routes and rail lines. Because of this, evaluations of productivity should be nuanced and consider the interconnected network, rather than limiting the analysis to a single route or type of route. Figure 6-10 and Figure 6-11 summarize some key ridership trends.

Figure 6-10: Daily Ridership by Route

Source: RTD, September 2023.

Figure 6-11: Boardings per Revenue Hour

Source: RTD, September 2023.

Boardings per trip can be another effective measurement of productivity, as it accounts for routes with few trips per day but a high number of boardings per trip. Patterns emerge when analyzing boardings per trip by time of day. In general, Rail and 15-minute routes have a softer peak during the morning peak and a sharper peak during the afternoon peak, before dropping precipitously in the evening. This

may be due to people using transit in the morning primarily to commute to work and school, while they use transit in the evening to commute, in addition to running errands, attending appointments, and going to social events and entertainment. The high afternoon peak may also indicate a high number of Aurora residents commuting to second-shift jobs (i.e., jobs with work hours between 5 PM and 1 AM, such as those in the medical or service industries). Some services have low overall ridership but relatively high numbers of boardings per trip. These services operate only a few trips per day, but each trip has high ridership.

As shown in Figure 6-12 through Figure 6-15, most routes experience at least an afternoon peak of ridership, but many routes see much flatter distributions of boardings throughout the day, with only slight peaks during the morning and afternoon. There are some exceptions: East Alameda Avenue Limited (3L), East 6th Avenue (6), 20, and 11, which have more defined peaks, typically with a stronger afternoon peak.

Figure 6-12. Average Daily Boardings per Trip by Time of Day (60-minute routes)

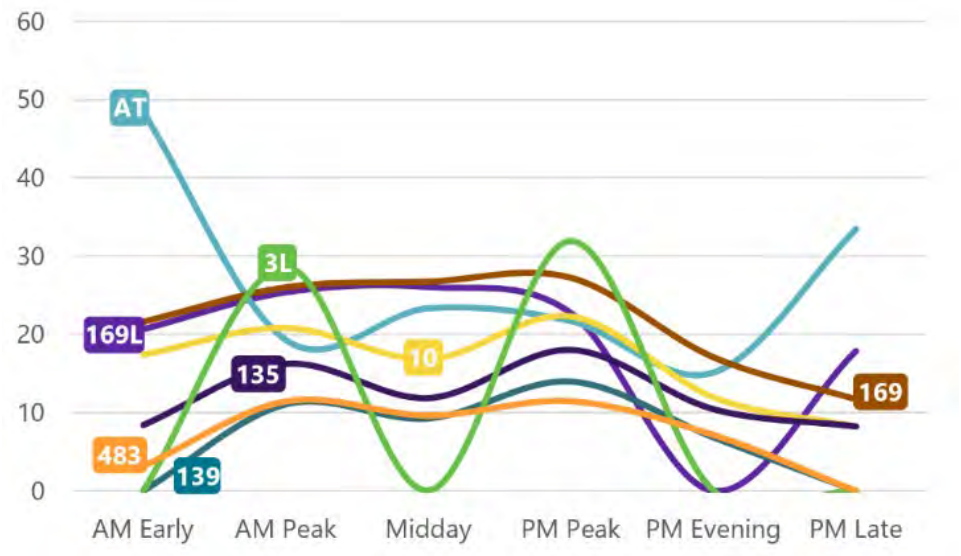


Figure 6-13. Average Daily Boardings per Trip by Time of Day (30-minute routes)

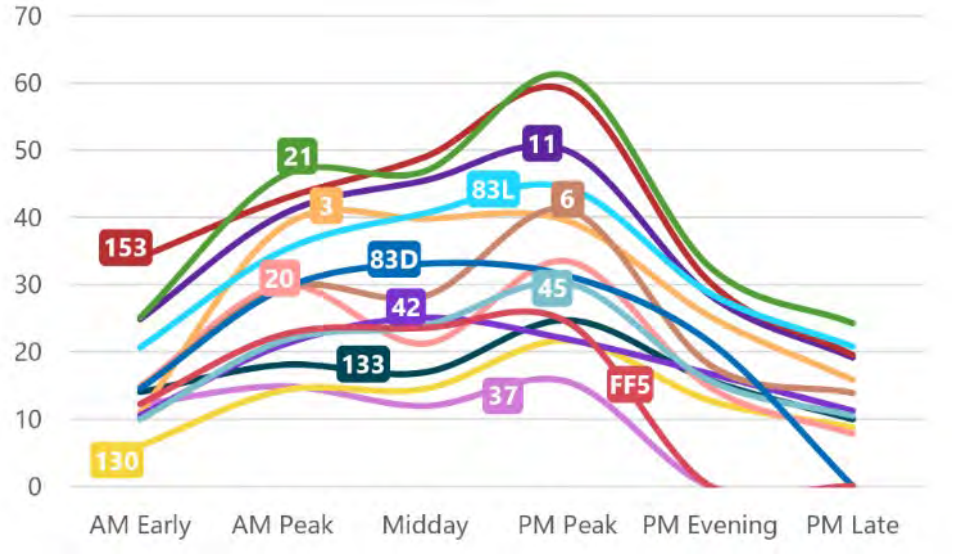

Figure 6-14: Average Daily Boardings per Trip by Time of Day (Rail)

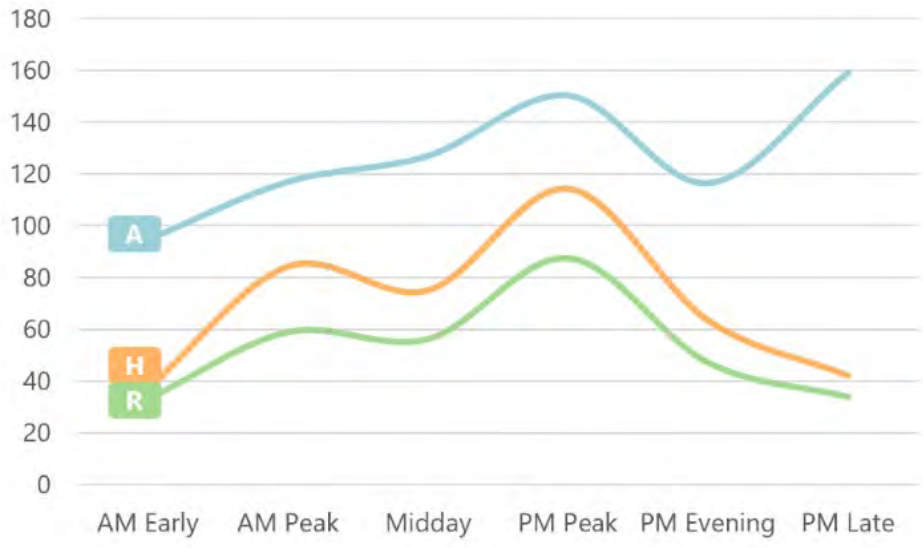

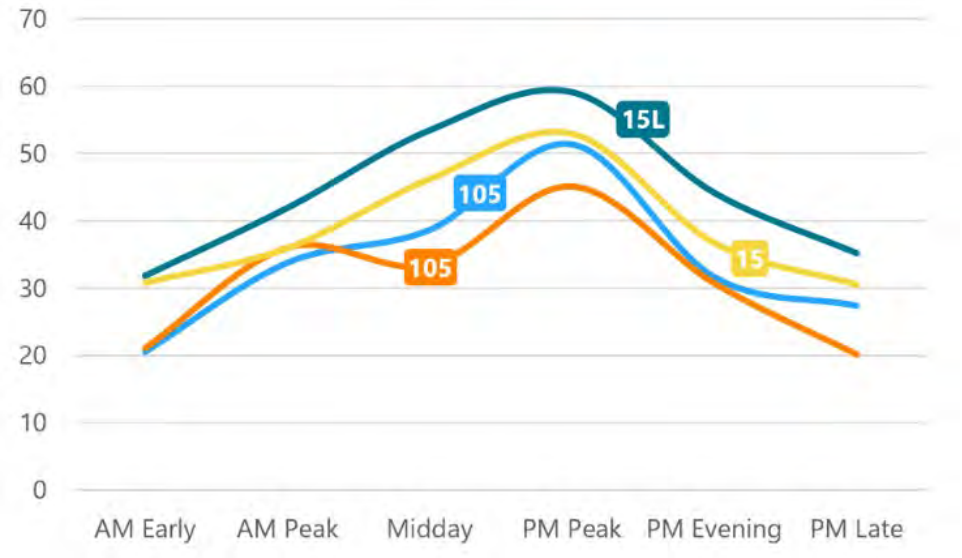

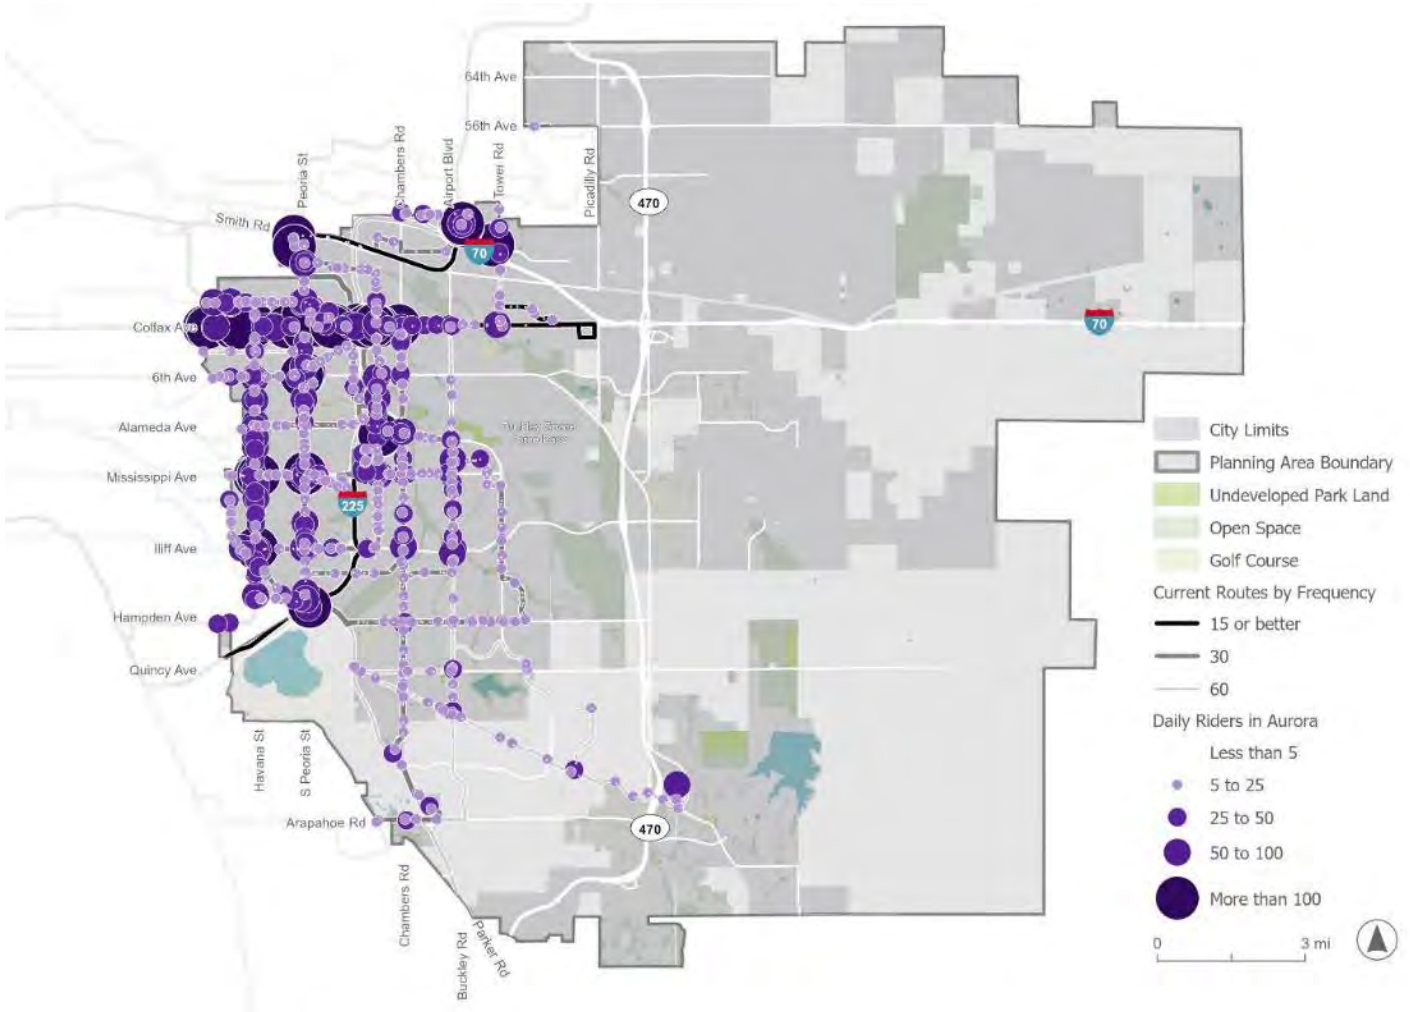

Figure 6-15. Average Daily Boardings per Trip by Time of Day (15-minute routes)

Ridership by Stop

Assessing how many people ride transit from specific stops and stations across the city can provide insights into where the system is in highest demand today. Ridership and the amount of service are inherently linked; people are more likely to ride transit that is convenient for them and reliable, and a route that comes more frequently (like every 10 to 15 minutes) is easier to use without planning to a schedule. However, that doesn't necessarily mean that if 10 to 15 minute service was provided at every stop in the system, ridership would be equally high and distributed across the city. The demand for transit is also linked to the number of people, jobs, and destinations located near transit which is discussed in more detail in the next section. Figure 79 depicts the weekday daily boardings by stop in Aurora.

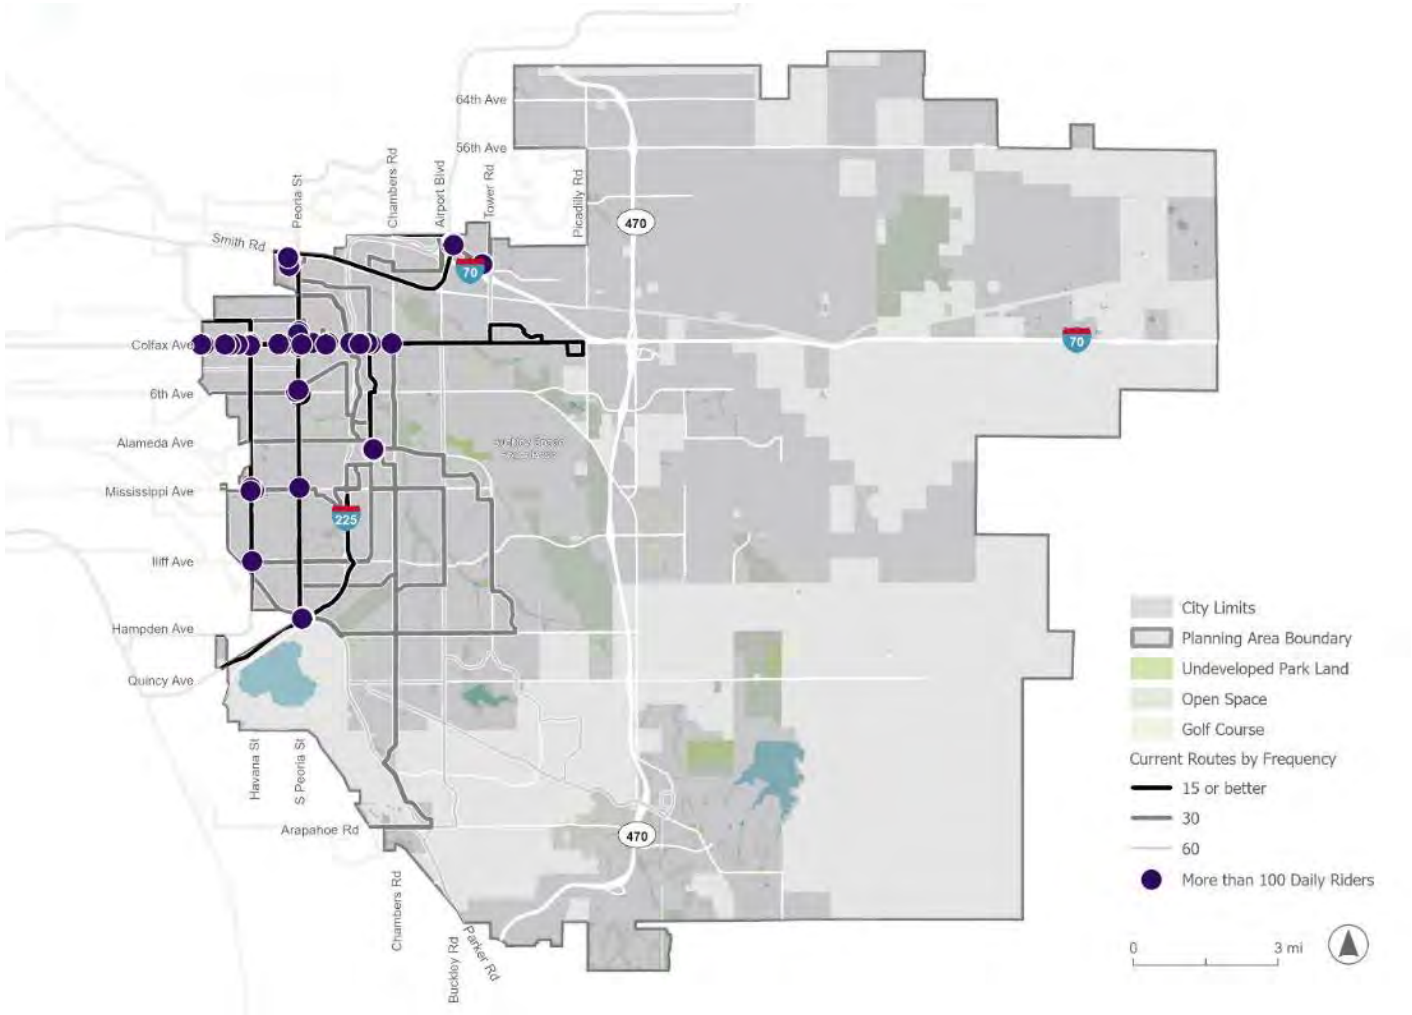
Figure 6-16. Weekday Daily Boardings by Stop

Source: RTD, September 2023.

The transit stops in Aurora with the greatest number of boardings and alightings are found at major hubs for transit, like the Aurora Metro Center Station, Nine Mile Station and Peoria Station (Figure 6-16). Aurora Metro Center Station, at over 2,000 boardings a day, is positioned between a large shopping complex anchored by the Town Center at Aurora to the west and several municipal service buildings to the northeast, including the public library, courthouse, Aurora Municipal Center, and police headquarters. This station is served by the R Light Rail line as well as nine bus routes. Nine Mile Station serves a diverse array of multifamily housing, commercial development, human services, and the Arizona College of Nursing. Peoria Station has a Park & Ride and provides transfers to the A Line, R Line, and bus routes 37, 45, 121, and 153.

The other highest ridership stops are found along Colfax Avenue, at the intersections at Havana Street and at Peoria Street. Colfax Avenue is the main thoroughfare for the city's highest ridership routes, the 15 and 15L. Stops on this corridor provide access to apartment buildings, grocery stores, culturally diverse restaurants and food markets, and the medical complex at Fitzsimons and Anschutz.

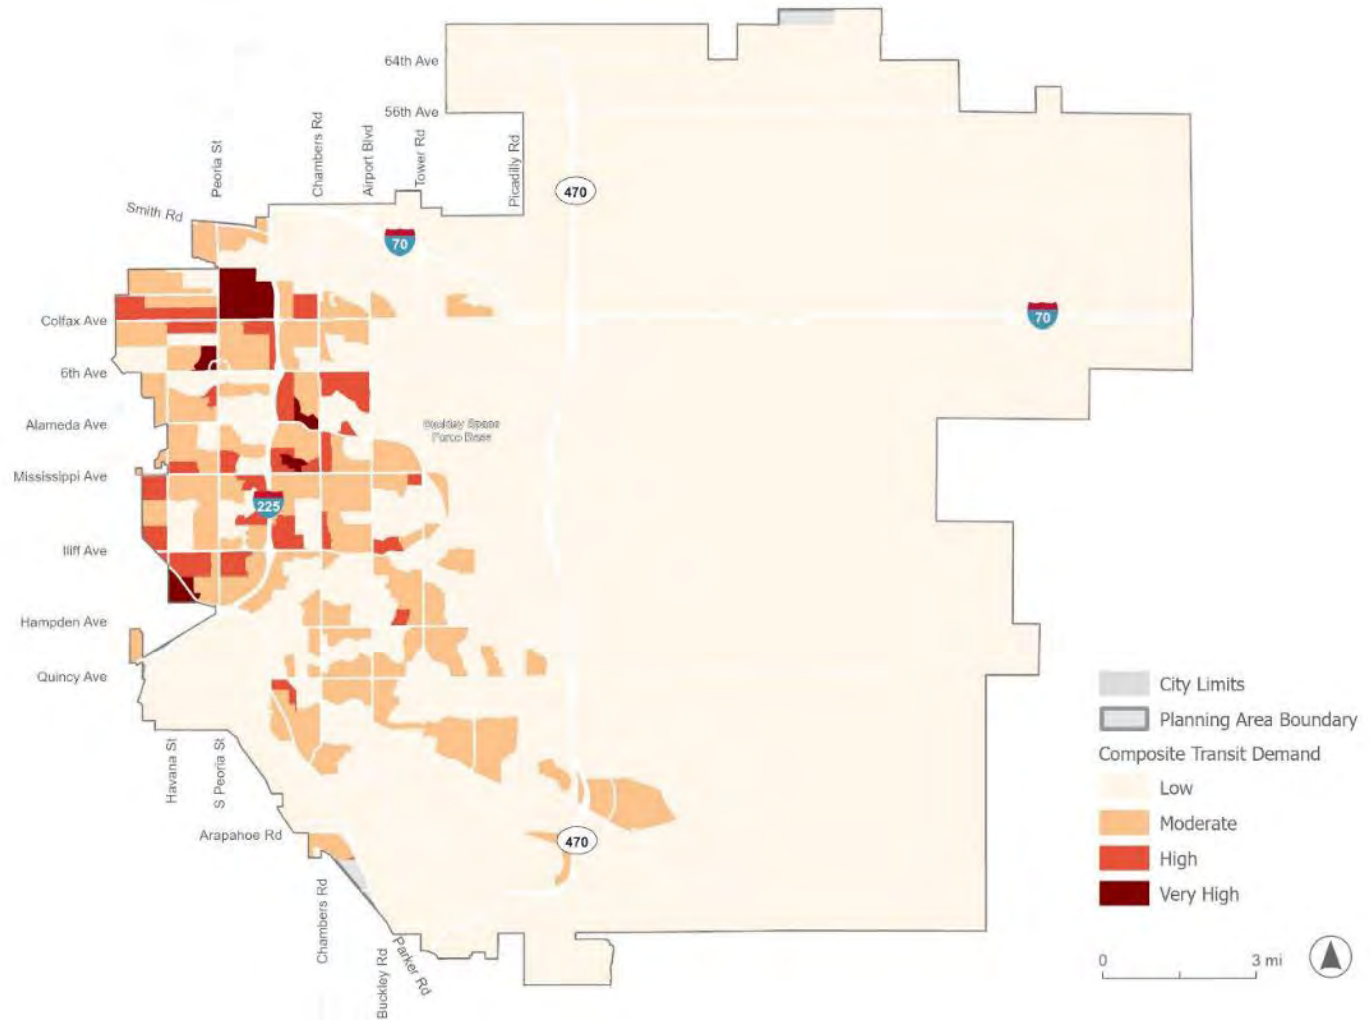
6.3 Transit Demand



A Composite Transit Demand Analysis was performed to examine which areas of Aurora are most likely to generate demand for fixed-route public transportation, based on where people live and work. Fixed-route transit refers to public transportation that has designated stops and follows a consistent route throughout the day. Both a population and employment density analysis were conducted. Employment data is critical to understanding transit demand, as travel to and from work is a regularly occurring trip for transit riders. Many destinations for transit riders, such as retail and restaurants, are also places where people work. Because of this, employment densities are combined with population densities to represent a composite demand.

It is essential to note that certain employment types, particularly warehouse and distribution jobs, may not exhibit strong transit demand using this methodology, as these facilities tend to occupy a significantly larger land footprint with fewer employees per square foot compared to office or retail jobs. These types of jobs are also harder to serve with regular fixed-route transit, given the wide disparity in shift times at many of these facilities and the design of industrial job centers, which often feature a relatively sparse street network, with building entrances often set far back from publicly accessible rights of way. Still, given that these jobs are places where hybrid work is less likely and, therefore, daily commuting patterns may still be similar to pre-COVID conditions, the project team will explore ways to meet the travel needs of places with concentrations of these types of jobs (like Northeast Aurora) through non-traditional forms of transit service.

In Aurora, demand is somewhat evenly spread throughout the northwest section of the city, with a pocket of significant demand at the medical and dental campus at the intersection of Colfax Avenue and I-225, as shown in Figure 6-17.



The population is growing, and more jobs are expected to continue arriving in Aurora. By 2050, there is anticipated growth across the city, with much of the central and western portions of Auroa growing to at least a medium level of demand for fixed-route transit and more density showing up in the northeastern part of the city, where there is job growth happening already today. Demand for transit is expected to increase to more areas with high and very high demand along the central spine of Aurora, where the R line is situated today, and along the Havana Street, Chambers Road, and Colfax Avenue corridors (Figure 6-18).

6.4 Transit Propensity

Population and employment density alone do not fully capture the nuance of transit usage and who is most likely to rely on and use transit services. The Transit Propensity Analysis measures which demographic groups living in Aurora are most likely to use transit to get to work and where these populations are located. This analysis used 2022 5-year ACS Census data to examine demographic factors, including race and ethnicity, household income, household vehicle access, and citizenship status. These factors are understood to influence transit propensity. The relative transit propensity values indicated in Table 6-4 are specific to Aurora and to the timeframe in which the census data was collected. They describe how likely an individual from the demographic group is to use transit as compared to the area's general population. A value of 1.0 represents that a person with a specific demographic characteristic would be neither more nor less likely to use transit when compared to the average person in Aurora. A characteristic's influence may differ between geographies or may change over time within a single geography. For example, a person in Aurora with a household income of less than $25,000 per year is 1.66 times as likely to use transit as the average person in Aurora. This propensity may be different from what it is for the same group in a different city, or for the same group in Aurora twenty years ago. A value of less than 1 indicates that the group is less likely to be a transit user, while a value higher than 1 suggests that the group is more likely to be a transit user on average.

Table 6-4. Relative Transit Propensity

Demographic Group	Relative Transit Propensity
Race & Ethnicity	
White Alone (Not Hispanic or Latino)	0.91
Black Alone	1.19
Asian Alone	1.13
Native American Alone	1.18
Hispanic or Latino	1.05
Household Vehicle Ownership	
No Car	5.02
One Car	1.47
Two Cars	0.52
Country of Origin	
Native	1.01
Foreign	0.97
Household Income	
Less than $25,000	1.66
$25,000-$50,000	1.09
More than $50,000	0.68

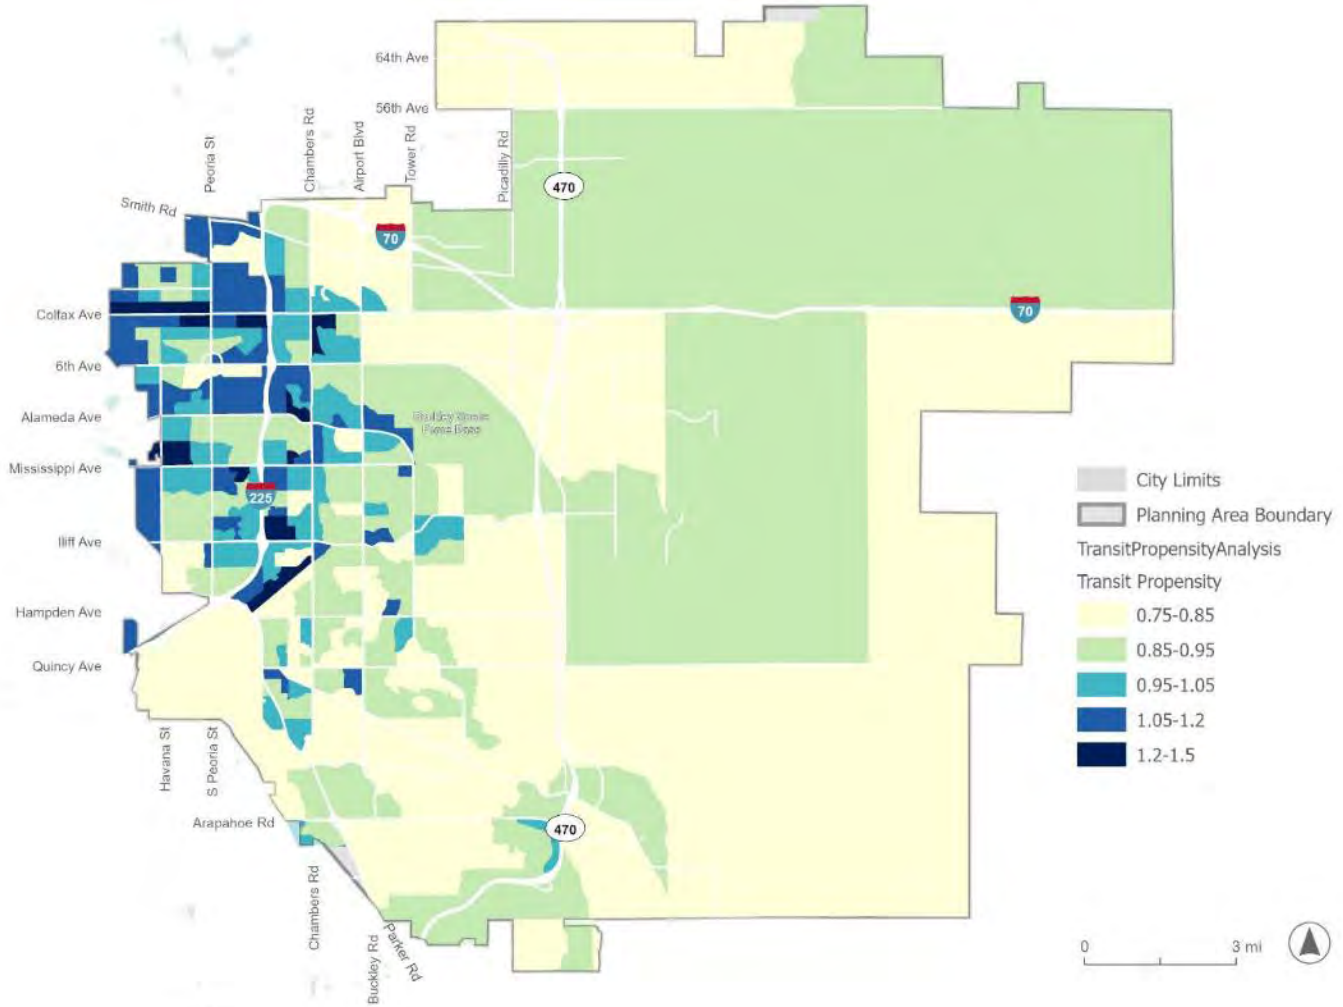
The analysis found that the greatest influencing factor on an individual's transit use is household vehicle ownership. Individuals living in households with no vehicles are five times as likely to use transit, while individuals living in households with access to two or more vehicles are half as likely to use transit. Household income is also a significant factor, as individuals in households earning less than $25,000 per

year are more likely to use transit than their higher-earning peers. As incomes rise, transit propensity tends to decrease. Race and Ethnicity also have a moderate influence on an individual's propensity to use transit in Aurora, with Black and Native American individuals having the highest propensity and Non-Hispanic White individuals having the lowest. However, the range in this category is slightly less than 0.3, which is still significant but not as much as Household Income (range of 1.0) or Household Vehicle Ownership (range of 4.5).

In Aurora, the populations that are most likely to use transit are concentrated in the northwestern section of the city, particularly in the neighborhoods immediately surrounding Colfax Avenue and sharing a border with Denver. There is also a significant concentration of these populations immediately southeast of I-225, and a moderate concentration immediately near E Alameda Parkway. This provides evidence that a transit network should focus on providing high-quality service to these areas. Figure 6-20 depicts the transit propensity in Aurora.

6.5 Low-Income Jobs

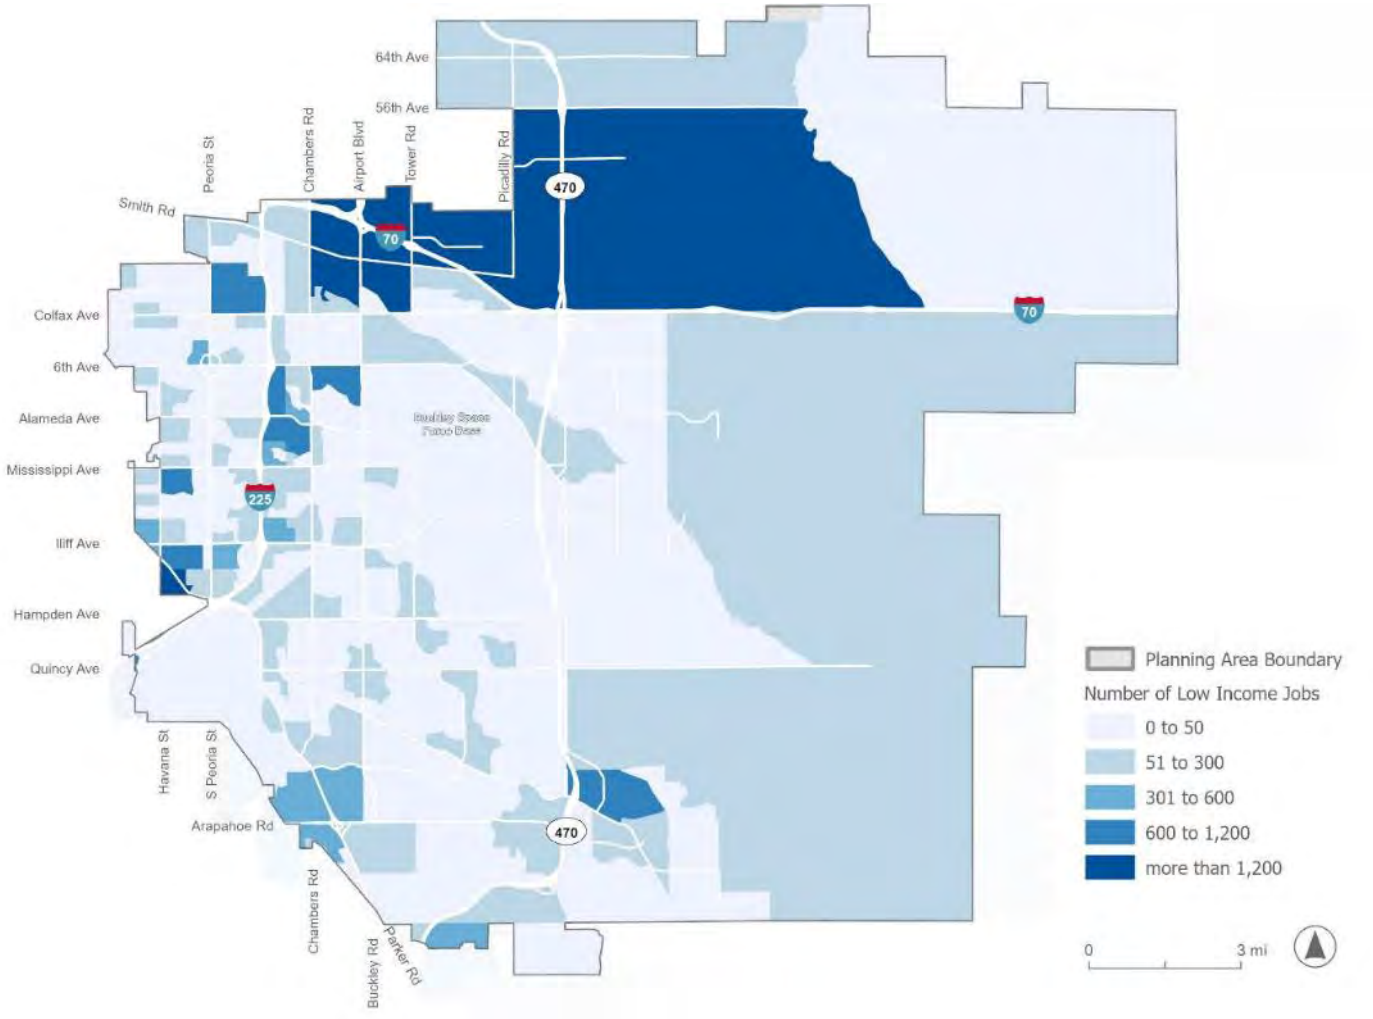
As discussed in the section above on Transit Demand, not all employment centers will show up when examining the density of jobs or demand for fixed-route transit. This is due to a few factors, including the large size of Census Block Groups in areas where land use is predominantly employment-focused, and buildings that contain warehouse and distribution jobs often take up a large footprint of land with fewer employees per square foot than other job types (like office or retail). To better capture these nuances, the project team mapped the number of jobs with earnings of $1,250 per month or less. Many of these jobs are located in Northeast Aurora (Figure 6-21). While the nature of the shift times at these facilities and the sparse street network may make these locations hard to serve with fixed-route transit, these commute patterns should still be considered for transit investments such as microtransit services or employer-provided shuttles.



6.6 Transit Access to Destinations

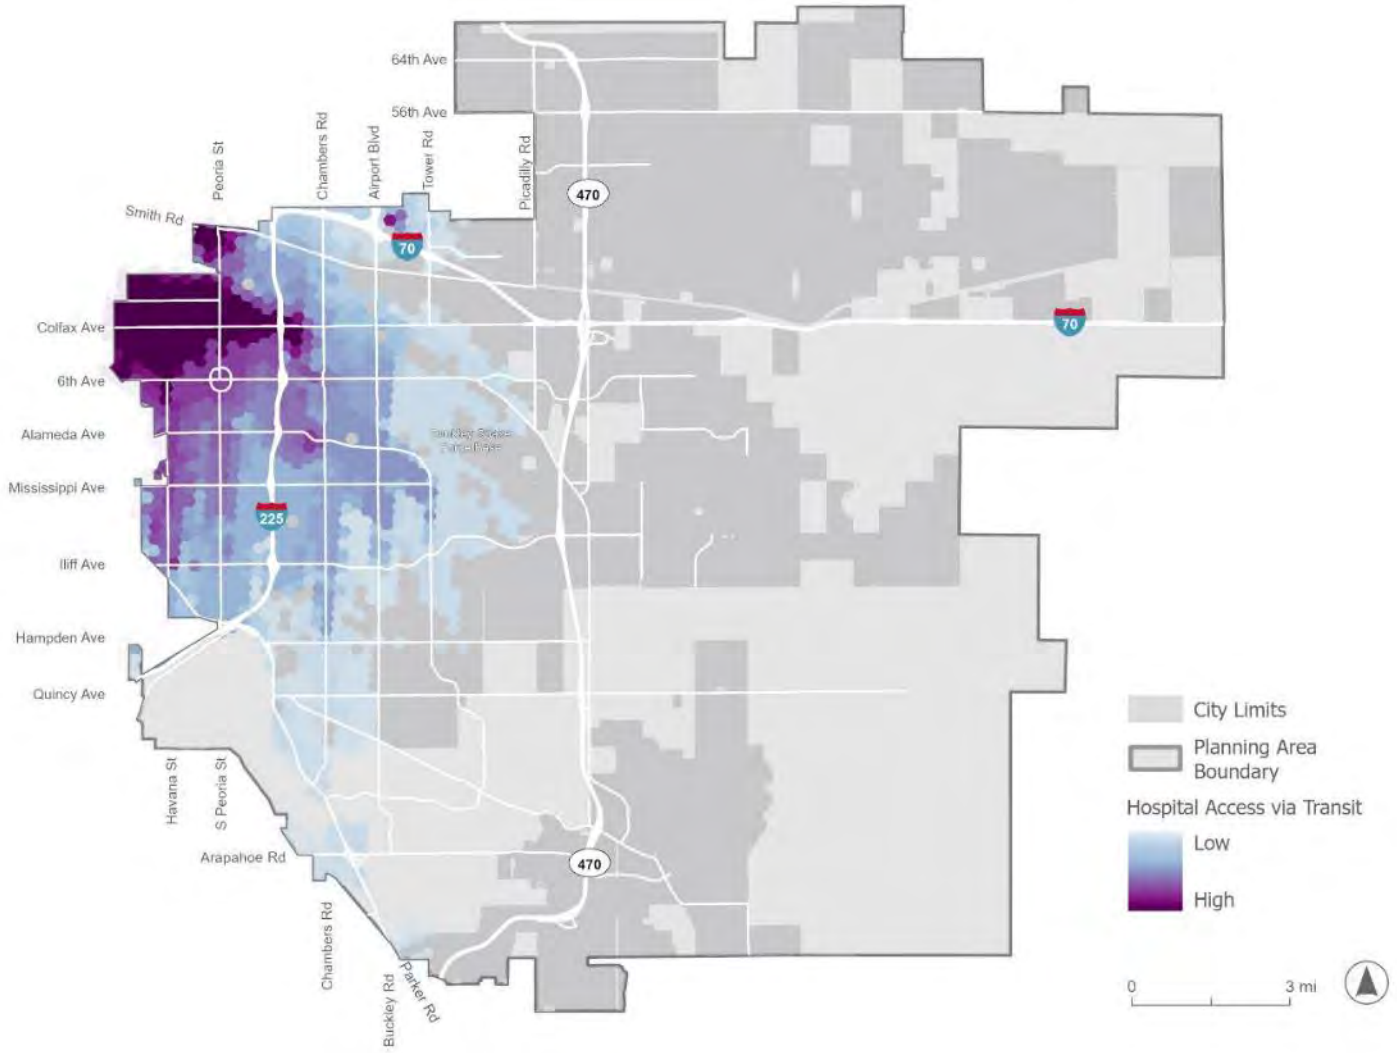
Using Remix's Network Jane, the project team conducted an assessment of access to several key destinations via transit. Network Jane uses travel-time isochrones to assess how far a person can travel from different points in the network in 60 minutes and applies this to the entire network to compare the differences in access to destinations and opportunities at various locations within the City of Aurora. The destinations and opportunities assessed included:

- Hospitals,
- Supermarket and Grocery Stores
- Colleges and Universities
- Essential Jobs (as defined by LEHD)



Hospitals are typically co-located with other medical facilities and offer areas with jobs and services that people can access by taking transit. There are usually relatively few hospitals in a geographic area and they generate a lot of activity that can be served by transit. In Aurora, access to hospitals via transit is highest in northwest Aurora, on the same corridor as the Anschutz Medical Campus (Figure 85). There is moderate access to hospitals from the more frequent transit corridors such as Havana Street and Peoria Street.

Figure 6-20. Transit Propensity in Aurora



Source: 2022 5-year ACS Census

Figure 6-21: Locations of Low-Income Jobs

Source: LEHD Jobs Data 2021

Figure 6-22: Access to Hospitals via Transit within 60 minutes at 5pm on a Weekday

Supermarkets and grocery stores are critical services that people rely on. Trips to and from the grocery store occur regularly and consistently, and these are trips that can be well-served by transit. There are many supermarkets and grocery stores, which are typically located throughout neighborhoods. However, sometimes there are gaps where there are too few grocery stores to meet people's needs, sometimes referred to as "food deserts". Generally, there is high access to grocery stores across much of the transit network in Aurora, although east of Chambers Road and south of Hampden Avenue, the number of stores accessible decreases in comparison to western Aurora (Figure 6-23).

Colleges and universities are like hospitals in that they are places that provide both jobs and services that are well-served by transit. Colleges can have more specific needs in terms of planning routes that get students to campus for activities or classes and to their housing. Access to colleges and universities is moderate to high along the rail routes in Aurora, east of I-225, and highest in the areas with the most frequent transit like Colfax Avenue (Figure 6-24).

Essential jobs include industries such as manufacturing, retail, warehousing, construction, healthcare, and food services. These are often jobs with shifts that do not follow the 9 am to 5 pm work hours and were defined during the COVID-19 pandemic to identify jobs that are critical to the operation of cities. Examining access to essential jobs is helpful in identifying potential gaps in transit service where workers may lack connectivity to reach these jobs. Northwest Aurora has high access to a number of essential jobs in the region, and the access is much lower east of Chambers Road where services are lower frequency (Figure 6-25).

Figure 6-23: Access to Supermarket and Grocery Stores via Transit within 60 minutes at 5pm on a Weekday

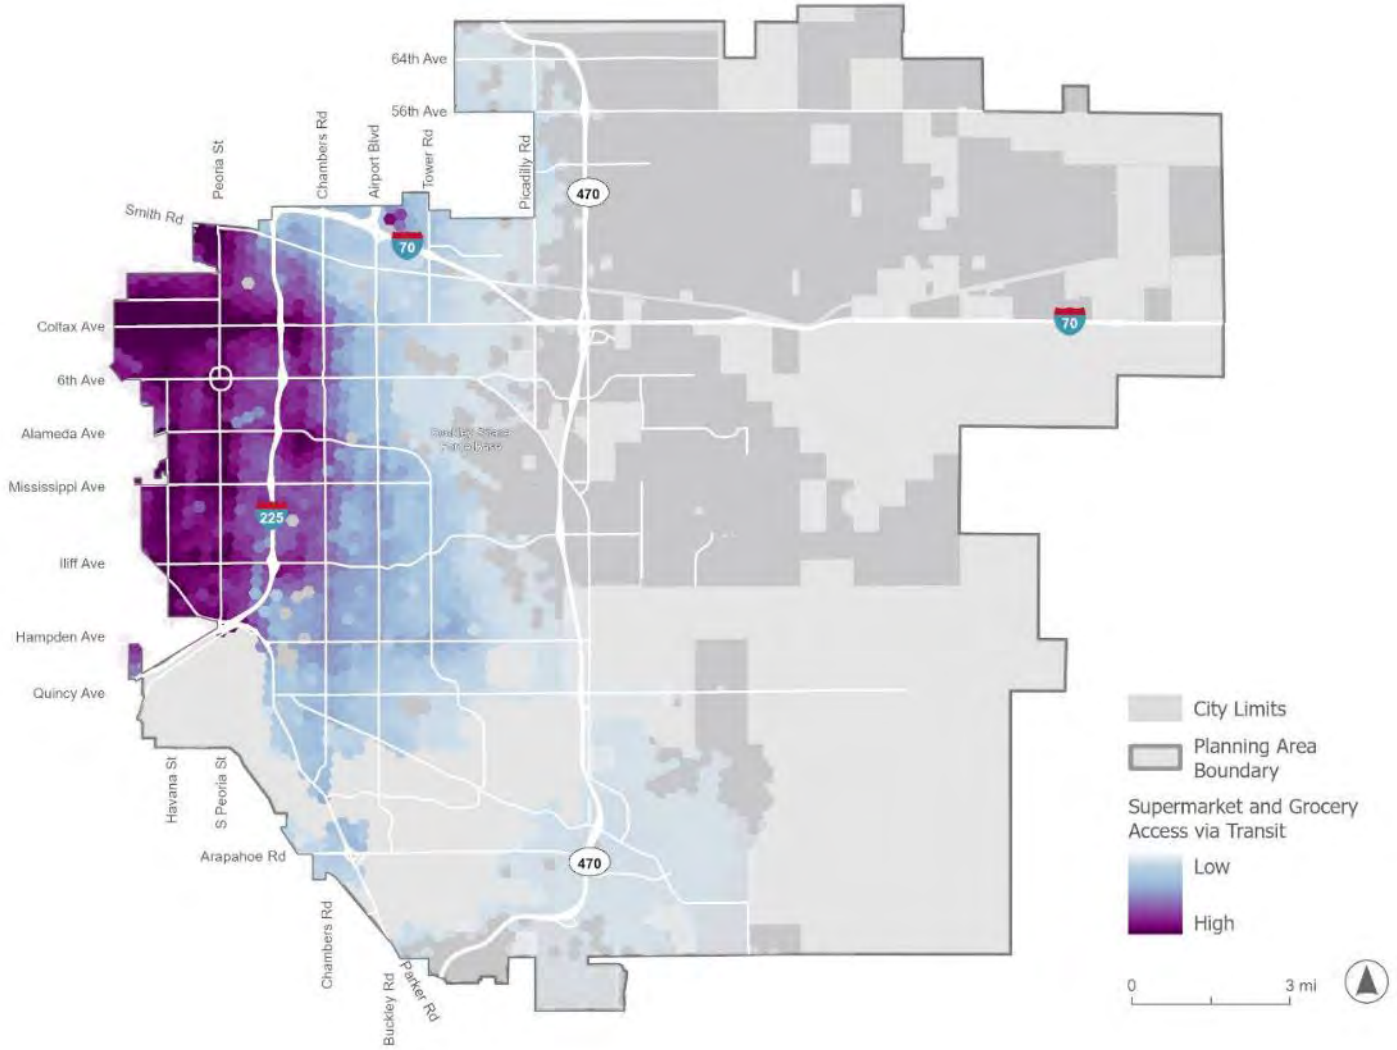


Figure 6-24: Access to Colleges and Universities via Transit within 60 minutes at 5pm on a Weekday

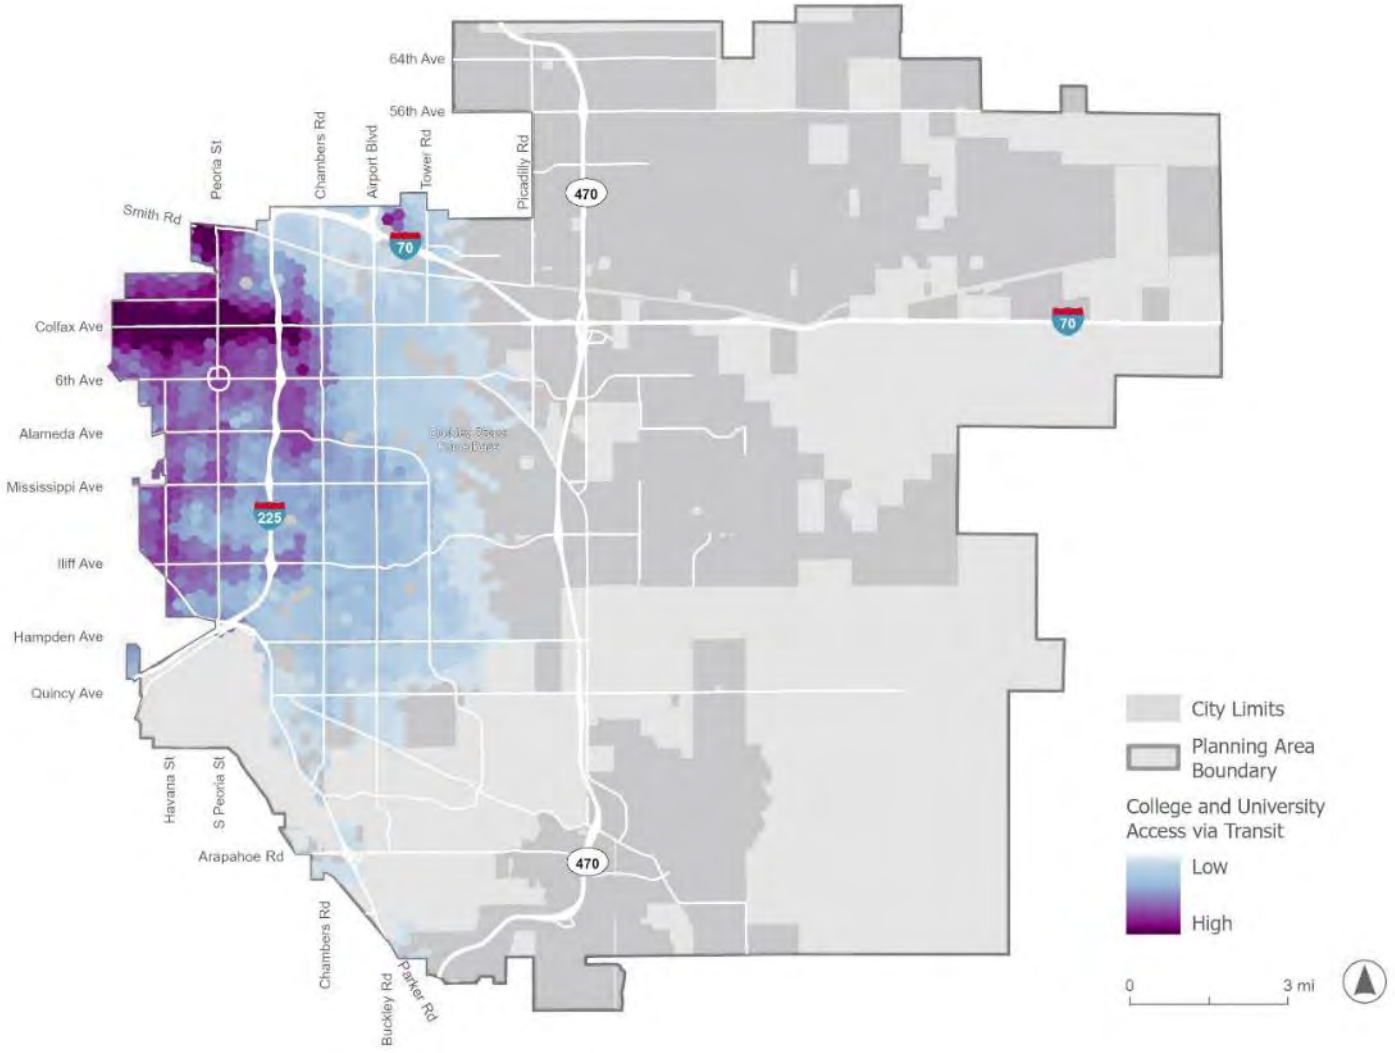

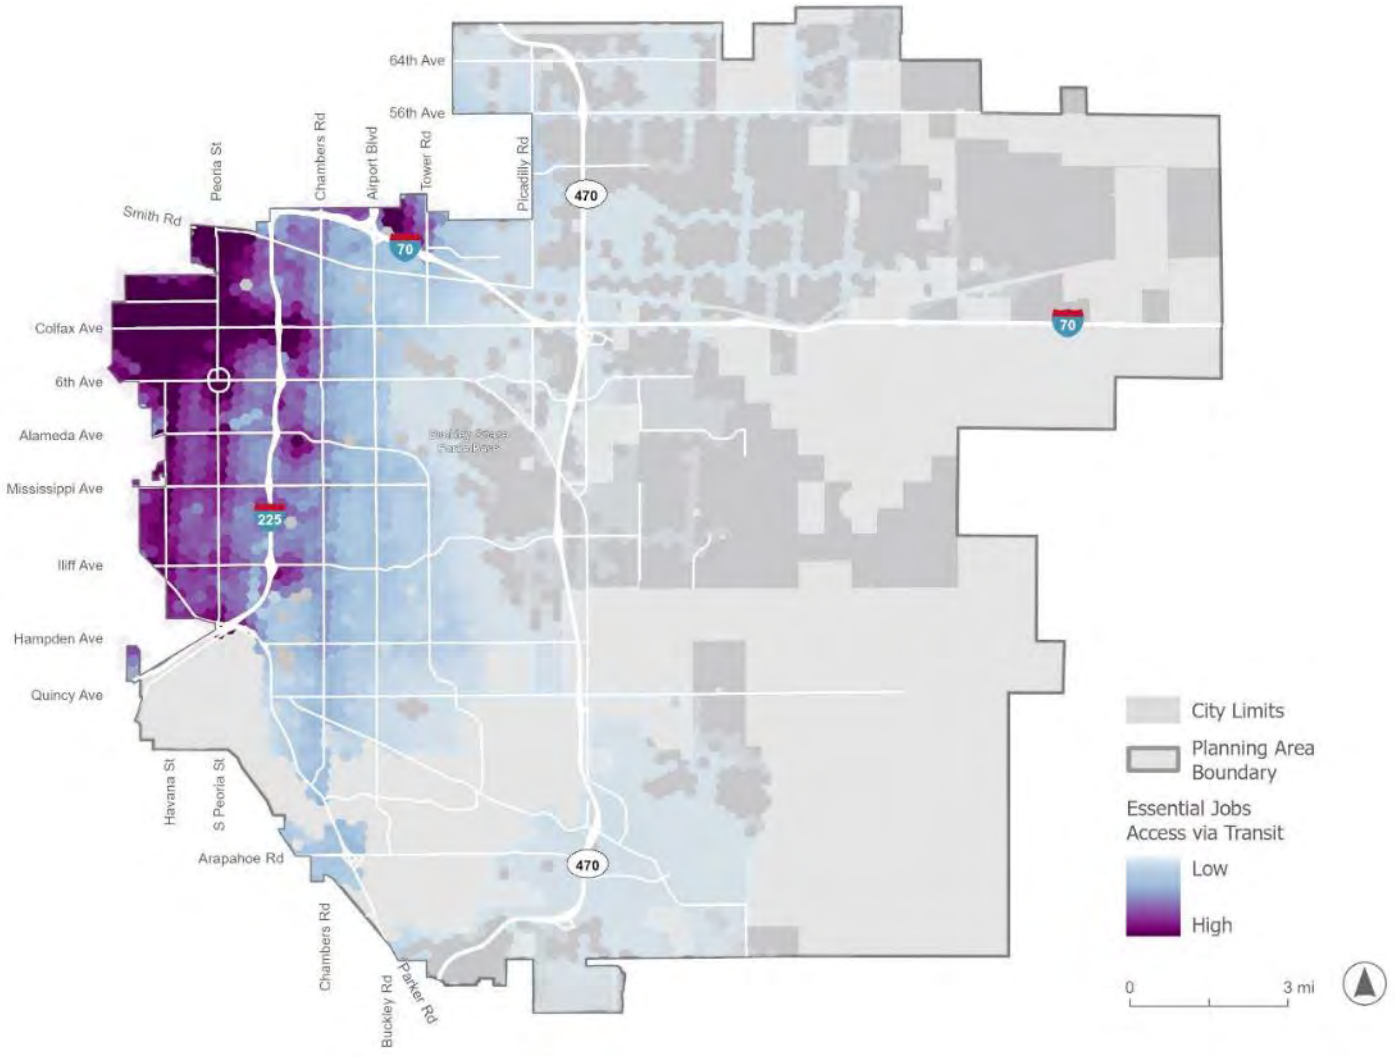

Figure 6-25: Access to Essential Jobs via Transit within 60 minutes at 5pm on a Weekday

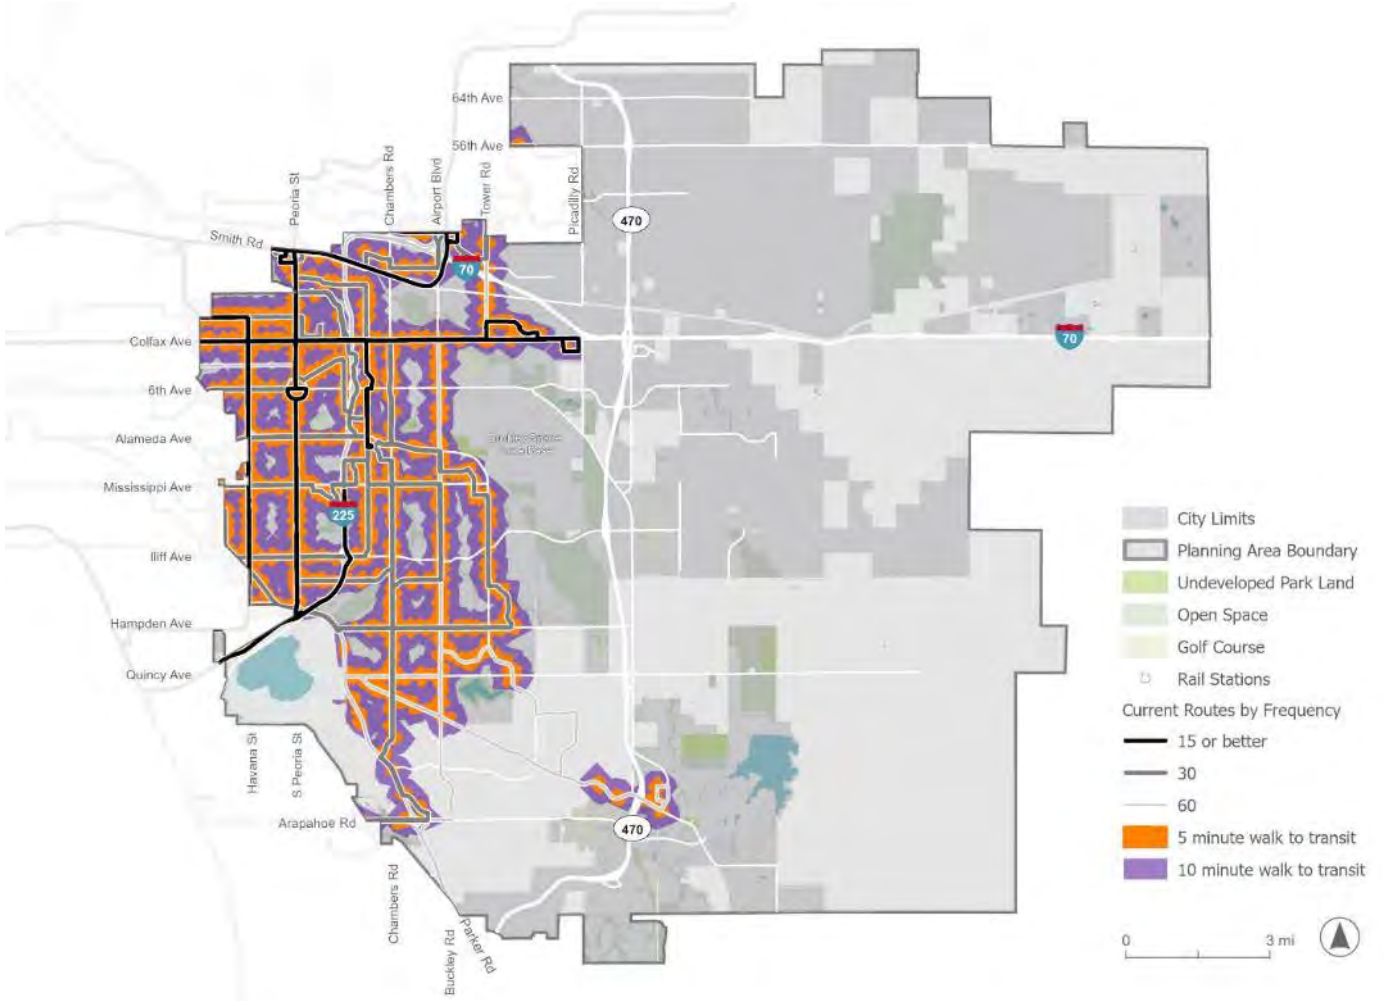
6.7 Transit Service Gap Analysis

A transit service gap analysis identified areas where the existing demand for transit may be higher than the transit currently supplied to the area, or where changes to transit routing or the connected transportation network might be necessary to better meet the City of Aurora's needs.

Walkshed Access

Nearly 300,000 people and around 120,000 jobs in Aurora are located within a 10-minute walk to transit (Figure 6-26). It typically takes a person around 10 minutes to walk one half mile. As a reminder, "walksheds" are buffers that are calculated using the distances of the existing sidewalk and trail network from the stop. The five and 10-minute walksheds illustrate the reach of the existing transit network in the City of Aurora. However, it's important to note that some riders ride a bike to reach transit, or drive to a park-and-ride stop. Those modes have a wider reach, but most people who ride transit start or end their trip by walking. There are many factors that can impact the reach of a walkshed and the access to transit, including:



- Barriers such as high-stress pathways like interstates
- Connectivity of the street network and distance of street blocks
- Distance between transit stops and evenness of the spacing
- Distance between transit routes and the "grid" of the roadway network

Each of these contributes to the presence of gaps in the network that can be reviewed for creating better access to transit and coverage. In Aurora, some transit stops and stations are surrounded by high-stress pathways, which create significant barriers to access for people walking to and from the bus or train. Creating some narrow walksheds and providing safe crossings and connections across major barriers can increase the reach of transit.

Long blocks and areas with numerous disconnected streets can be challenging to serve with fixed-route transit. Creating a more connected street network with shorter distances between crossings can increase the reach of transit; however, this is usually more difficult and costly to change in established and built-out areas. In areas with new development, the connectivity of streets should be considered to plan for future transit services.

Transit vehicles typically require straight streets with wide enough lanes for standard buses (usually between forty and sixty feet long) to operate on and pavement that can handle these types of vehicles. Most transit agencies avoid operating regular buses on narrow, winding streets. This means that sometimes the distance between the interior of neighborhoods and transit routes is wide, which may indicate a need to find a way to connect people in neighborhoods to transit when the walk is too long. This is sometimes accomplished with a service called microtransit or on-demand transit, which operates similarly to ride-hailing services like Uber and Lyft, where a user requests a ride, and a smaller transit vehicle (like a van or cutaway bus) can bring people from the neighborhood to the nearest fixed-route transit stop/station or nearby destinations.

Figure 6-26: 5-minute and 10-minute walk to transit in Aurora

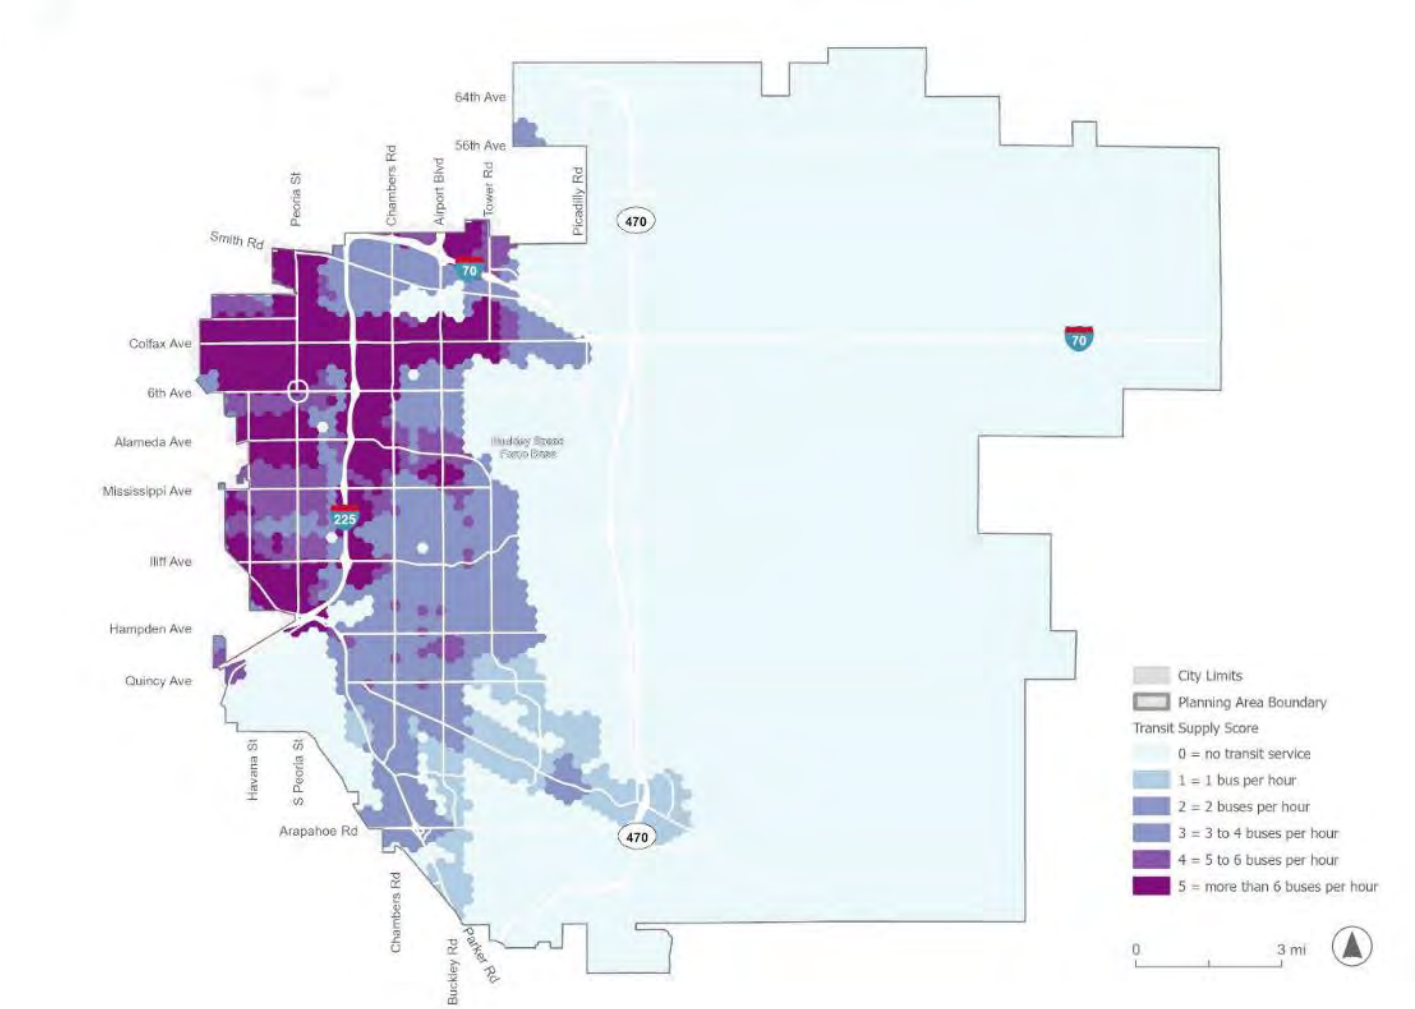
Source: City of Aurora; RTD.

Transit Supply

Transit supply was determined by using the transit walksheds. If an area is within a 10-minute walk to a transit stop, it was scored as having some level of transit supply. More specifically, the project team tallied the number of buses serving each walkshed within an hour. For example, if a stop provides service to two 60-minute routes like the 169 and 169L, which provide service to much of Airport Boulevard, then those stops were scored as having two buses per hour. This scoring allowed the team to determine whether a neighborhood is "very well served" by transit service. This would include areas where a rider can walk to frequent transit routes or to where multiple transit services are present. Both of these indicate that a location is well supplied by transit service. These scores were then scaled from zero to five, with zero indicating no transit service was present and five indicating a place with more than six buses stopping in an hour. This analysis was completed by summarizing the amount of service within the walksheds to a hexagon grid of around a quarter mile in size. Hexagon grids are useful for analyzing geographic patterns for features like roads or transit routes that are curved or irregular, and they provide a granular level of analysis for determining clusters of data.

The Transit Supply Score results closely followed where the most frequent transit service is provided (Figure 6-27). The area surrounding Colfax Avenue, Chambers Road, Alameda Avenue, and the areas near stops where multiple routes come together to create connections between routes, like Peoria Station, had the highest transit supply score.

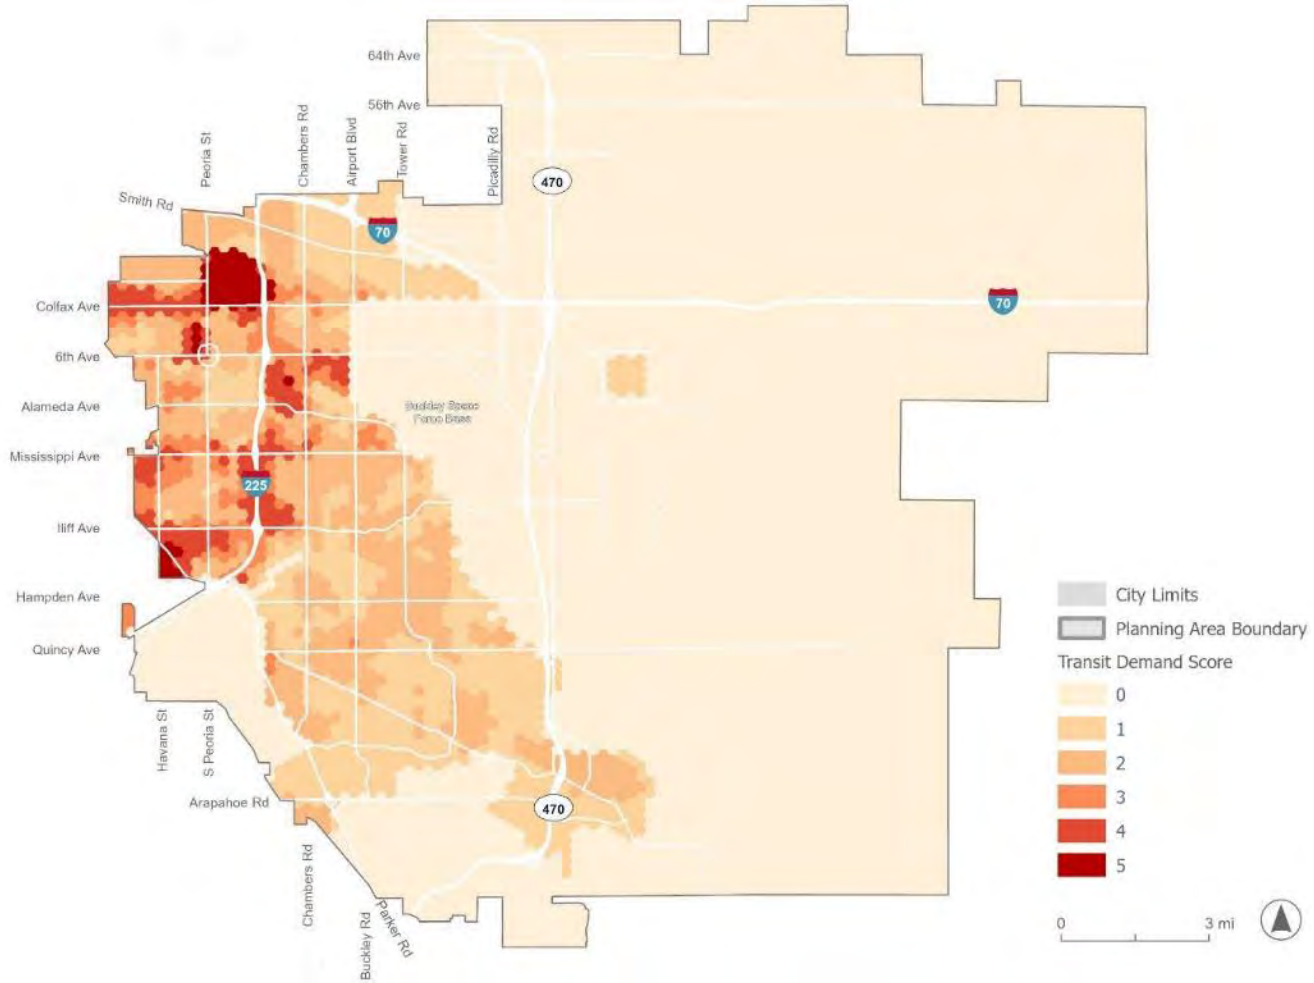
Transit Demand



Transit demand was calculated using the Composite Transit Demand and the Transit Propensity layers. The block group level population density was adjusted to account for the propensity or likelihood for transit use based on the socio-economic makeup. The Composite Transit Demand, which accounts for both the adjusted population density and the density of jobs, was applied to the same quarter-mile hexagon grids, and the values of people and jobs per square mile were scaled from zero to five. This Transit Demand Score (Figure 6-28) closely resembles the Composite Transit Demand in Aurora (Figure 6-18).

Potential Gaps

Finally, the Transit Demand Score was subtracted by the Transit Supply Score to determine the difference between the level of transit being supplied to the amount of potential transit demand in each hexagon. As shown in Figure 6-29, a value near 0 indicates that there is sufficient transit supply. A negative value (orange) indicates a potential gap in service with unmet demand and a positive value (purple) indicates an area that is well served by transit today. Some potential gaps include:



- Community College of Aurora and the housing and businesses nearby located south of 6th Avenue and east of Chambers Road
- South of the Fitzsimmons R-Line Station
- The Heather Gardens community near I-225 and Parker Road
- West of I-225 near Iliff Station and Florida Station
- On Quincy Avenue near the Walmart neighborhood market at Piccadilly Road
- Southeast Aurora near the Southlands development

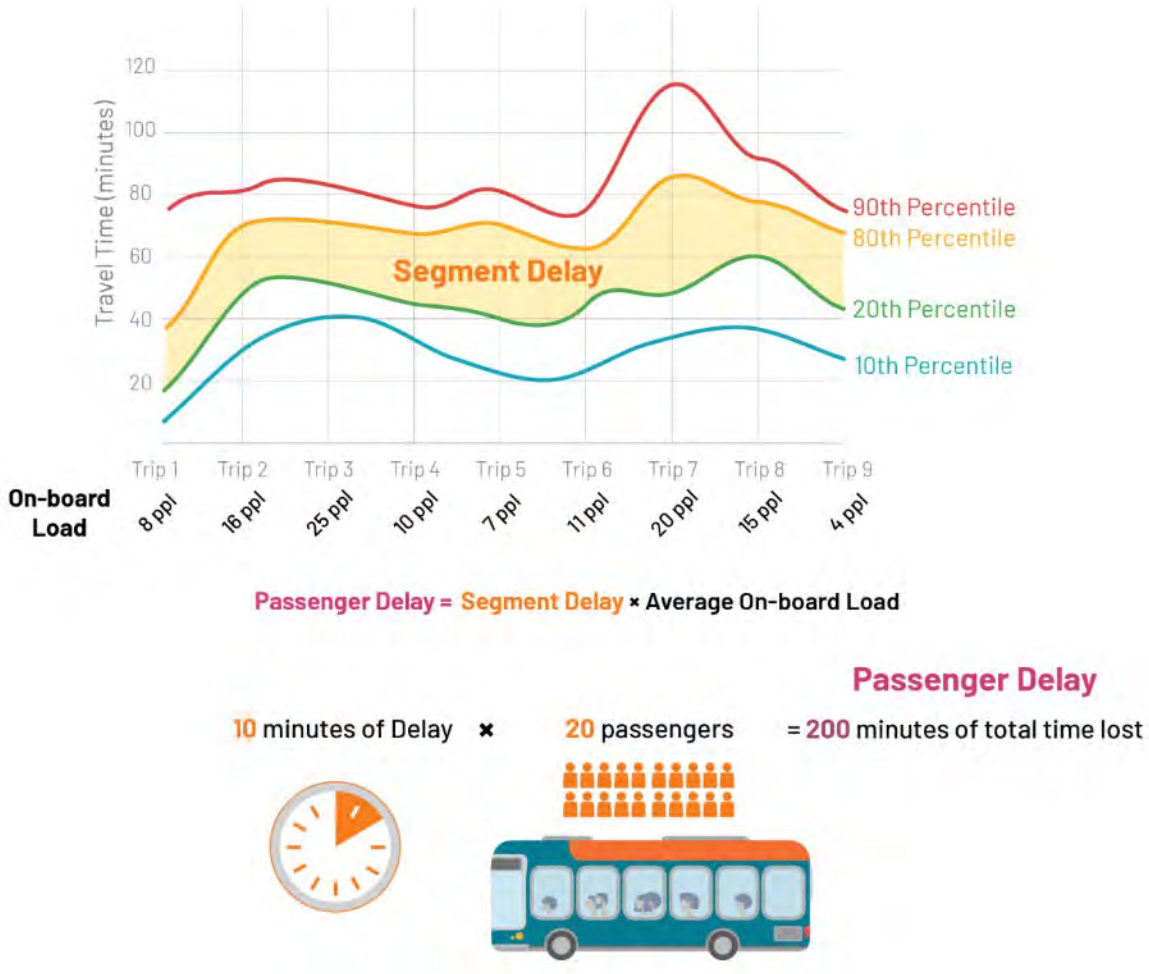
Figure 6-28: Transit Demand Score Results

Source: U.S. Census 2020; LEHD Jobs Data 2021; 2022 5-year ACS Census

Figure 6-29: Transit Gaps Analysis Results

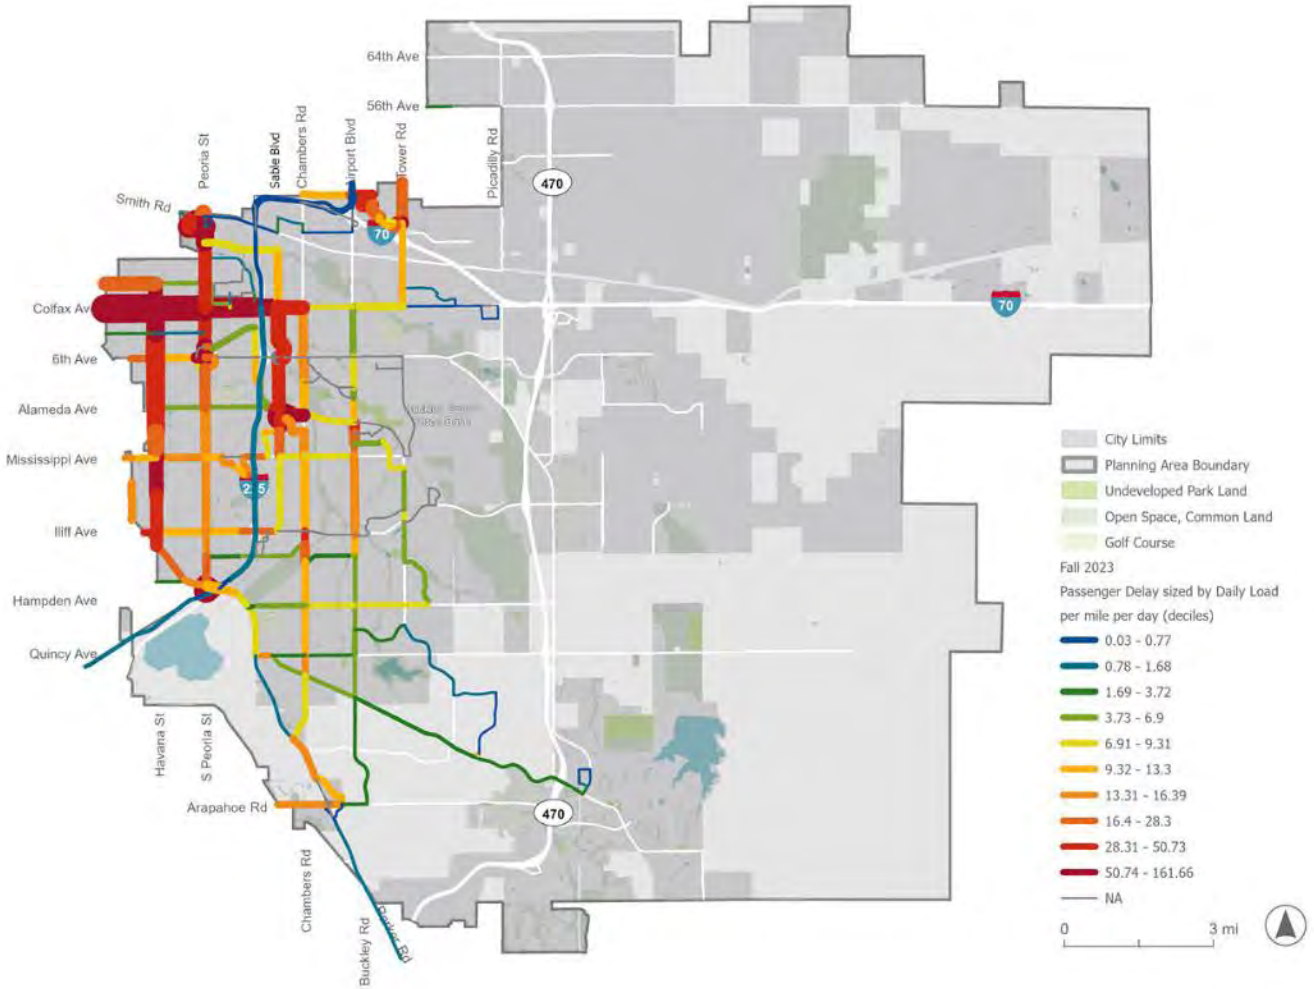
These locations can be prioritized for improvements to the sidewalks, trails, and crossings that connect more people to existing stops and stations. This is especially true for areas near I-225, which represents a large barrier to access. Additionally, microtransit, new fixed-route services or altering existing bus routes can also be considered to fill potential gaps in service.



6.8 Citywide Bus Delay

The Bus Delay Analysis Tool (BDAT) provides an interactive dashboard for reviewing a series of performance data for analyzing bus delay over time in the Denver Metro area. Its key data inputs are Automated Passenger Count (APC) data which provides information about how many riders are using the transit system at different locations, General Transit Feed Specification (GTFS) data which provides insights into the location and quality of transit service, and Automated Vehicle Location (AVL) data which tracks bus speeds throughout the day. Bus Delay is an important metric as it can give insight into where there is congestion or operational challenges that are causing buses and therefore passengers to be delayed. It is also critical to understand where buses experience the most delay today as this delay is likely to increase over time with traffic congestion and population growth.

There are different metrics and measurements that can be used to quantify the delay experienced by buses and the passengers on board (Figure 6-30). The following are definitions for key terms used throughout this section summarizing bus delay. Note that delay is typically quantified for an average weekday rather than weekends since there is usually more delay during weekdays.



- **Segment**—the bus network is broken down into logical roadway segments to be able to study delay and reliability at a granular level.
- **Speed**—how fast the buses travel along a segment.
- **Travel time**—the unimpeded time it takes for a bus to travel from point to point including stopping at intersections and bus stops.
- **Delay**—additional time buses spend on a road segment due to traffic congestion, signalized intersections, waiting to merge into and out of traffic lanes, slowing to a stop and being stopped at bus stops while passengers unload and load. Delay is calculated for each trip taken on each segment in the network over the course of the day and normalized by the length of the segment. For this analysis, the difference between the 80th and 20th percentile travel times are used to represent delay to account for any outliers.
- **Passenger Delay**—time passengers spend delayed on a road segment. Passenger Delay is calculated by multiplying the average number of weekday passengers on board for a trip on that segment by the average delay. This metric identifies where would transit improvements have the biggest impact for the most passengers.
- **Reliability**—there are several aspects that contribute to reliable or unreliable transit service. Are buses for specific trips punctual, do buses regularly show up at a stop every 15 minutes if that is the scheduled headway, are there any trips that don't show up at all? It can also refer to the variability of the service throughout the day, like if it takes a lot longer at peak times to get to a destination than at non-peak times.

Figure 6-30: Passenger Delay Explanation

In Fall 2023, Aurora bus service experienced the highest passenger delay along the highest used transit corridors and at large transit centers with park and ride facilities. There are around 147 miles of bus service and 1,819 total passenger hours of delay per day. In Figure 6-31, areas with the highest passenger delay in hours is represented in red and orange and the thickness of the line represents the average daily load or number of people typically riding a bus on that segment of the network. Generally, the areas that experience the most passenger hours of delay in the system on an average weekday are in west and central Aurora, near major transit centers and on high frequency bus corridors with more ridership like Colfax Avenue and Havana Street.

Figure 6-31: Passenger Hours of Delay sized by Daily Load, Fall 2023

The areas that experience the highest passenger delay (top 20 percent of segments) make up only 12 percent of the miles of bus service in Aurora, at around 18 miles, but carry around 68 percent of the daily boardings and 52 percent of the passenger hours of delay in the Aurora network (Figure 6-32).

- **Peoria Station**—Located: near Smith Road and Peoria Street in central NW Aurora. It serves the A Line and R Line as well as the bus routes 37, 45, 121, and 153. It has 550 parking spaces.
- **Nine Mile Station**—The largest park and ride in Aurora with 1,225 spaces is located near Peoria Street in between Hwy 83 and I-225 in central SW Aurora. Serves the H Line and R Line and bus routes 121, 130, 133, 135, 139, 483, 83D, 83L, AT, and ATA.
- **Colfax Avenue Corridor**—From the western edge of Aurora to Picadilly (?) Road, Colfax Avenue serves routes 15 and 15L and is a future BRT corridor. It is the highest ridership corridor in Aurora with many high ridership stops.
- **Havana Street Corridor**—Serves route 105 and is a future BRT corridor. Havana Street has many stops with medium to high ridership.
- **Peoria Street Corridor**—Serves route 121 and the flatiron flyer.
- **Sable Boulevard**—Serves route 15L to Aurora Metro Center Station.
- **40th Avenue/Airport Boulevard–Gateway Park Station**—A Line Station with 1,079 parking spaces located in north Aurora. Serves routes: 37, 42, 45, 121, 169, and ATA.
- **Aurora Metro Center Station**—Located near Alameda Avenue near I-225 and Town Center Mall. It serves the R Line and bus routes 3, 3L, 6, 11, 15L, 21, 130, 133, and 153 with 145 parking spaces
- **Walmart @ Salida Street and Tower Road**—A high ridership stop at around 150 average daily boardings. Serves routes 42, 45, and 169.
- **Airport Boulevard & Alameda Avenue**—Serves routes 133, 169, and 169L.
- **Chambers Road & Iliff Avenue**—Serves route 153.
- **Intersection at Colfax Avenue and Havana Street**—Serves routes 105, 15, and 15L.
- **Intersection at Peoria Street and 6th Avenue** near Del Mar Circle—Serves routes 6 and 121.

Segment delay is an input to calculating the passenger delay and can be another useful way to look at where hours of bus delay are experienced in the system. There are around 270 total hours of bus delay per day in Aurora. Generally, the areas that experience the most bus hours of delay in the system are similar to the areas where the most passenger delay occurred (Figure 6-33).

Many of the top locations of segment delay align with the top areas of passenger delay. The top 20 percent of segments make up only 10 percent of the miles of bus service in Aurora at around 15 miles, but carry around 55 percent of the daily boardings and 49 percent of the hours of bus delay in the Aurora network (Figure 6-34.) There are a few differences from passenger delay in that fewer segments on the Havana Street corridor experience significant bus delay as well as fewer segments on the Sable Boulevard corridor. Conversely, more segments near 40th Avenue & Airport Boulevard at Gateway Park station approaches are among the segments experiencing the most bus delays.

Figure 6-32: Top Locations of Passenger Hours Delay, Fall 2023

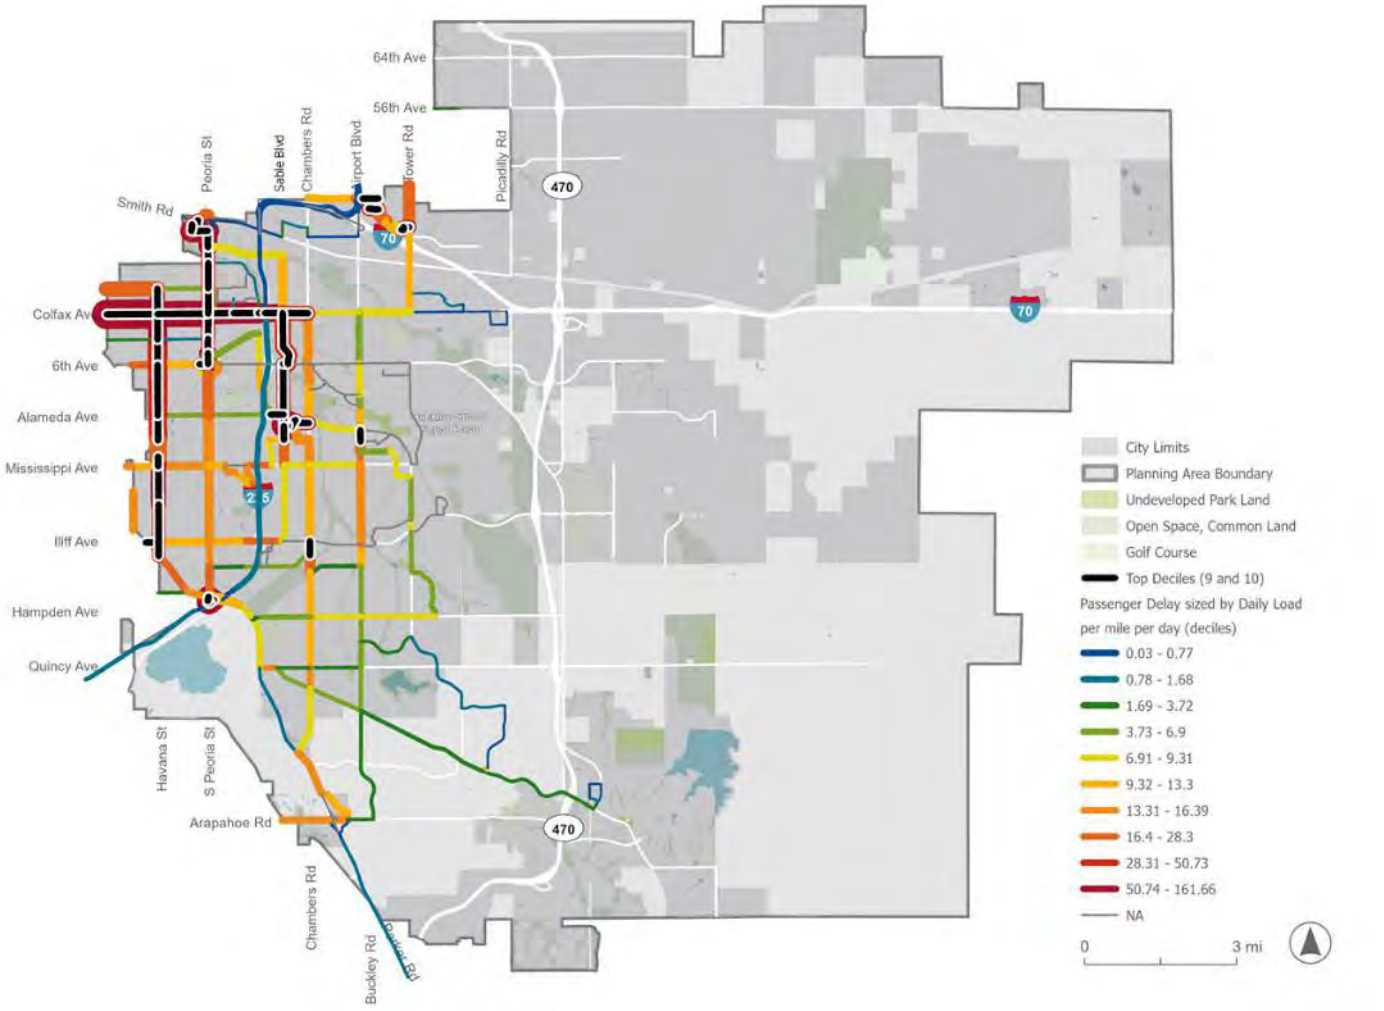


Figure 6-33: Segment Hours of Delay, Fall 2023

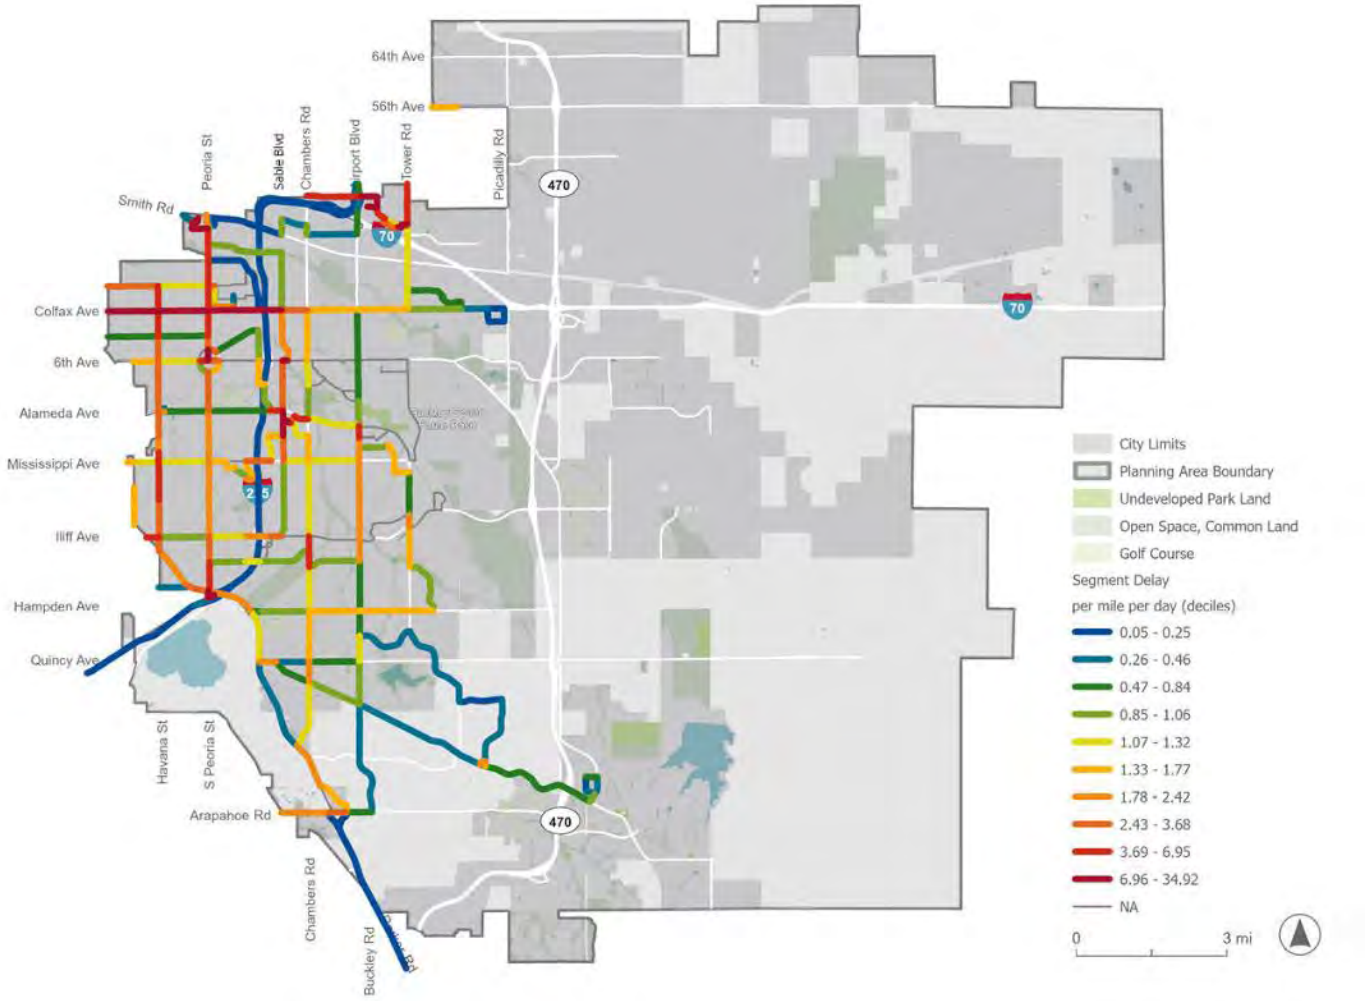

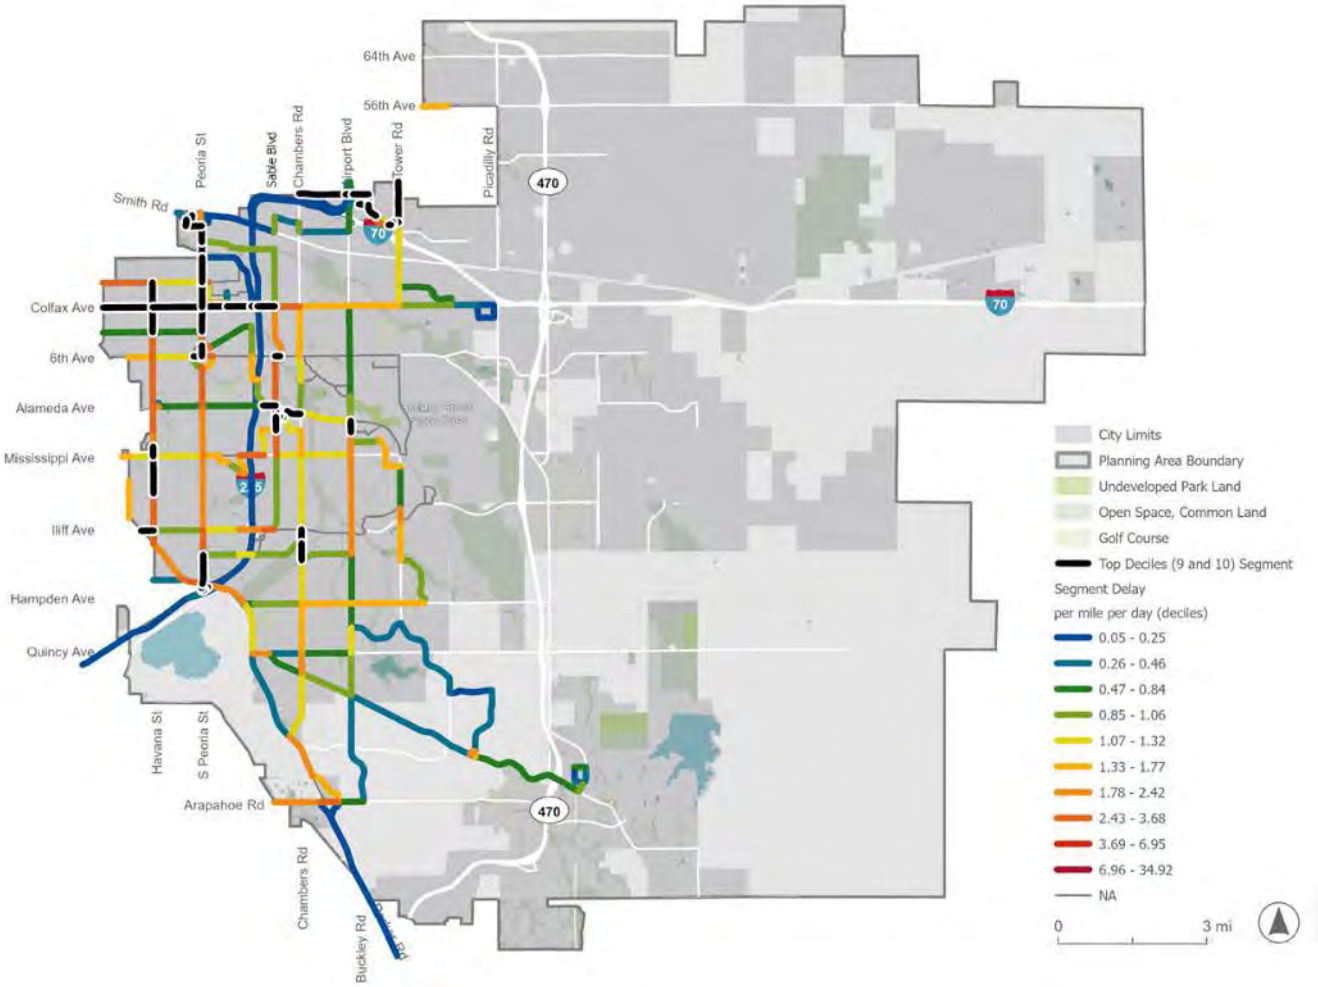

Figure 6-34: Top Locations of Segment Hours Delay, Fall 2023

In calculating the bus and passenger delay, the 80th and 20th percentile travel times were used to account for outliers. To better illustrate these concepts, average bus speeds in miles per hour for the 80th and 20th percentile travel times are mapped in Figure 6-35 and Figure 6-36. The 20th percentile average bus speeds represent the slower travel times and speeds typically experienced on the network in an average day, such as those encountered during peak times. Many of the segments where the most delay in the system have bus speeds below 10 MPH. The 80th percentile average bus speeds are where travel times are faster and more like speeds that may be experienced in the evenings. It is important to note when looking at speeds that these are inverse to travel time, in that the 80th percentile values of travel speeds are better (i.e. faster) than the 20th percentile travel speeds.

Looking at the segment delay per trip accounts for the level of service being provided and is agnostic of ridership (Figure 6-37). So, if a segment shows a higher delay of around 3 minutes per mile per trip, that is how much longer a vehicle would be traveling on that segment on any given trip. It doesn't indicate how many people are on the vehicle during that trip or how many trips occur on that segment. Locations where buses are delayed more than around 2.5 minutes on average per mile per trip include:

- Colfax Avenue near Fitzsimmons Parkway and I-225
- Near Del Mar Circle
- On Havana Street north of Colfax Avenue
- Near Aurora Metro Center Station
- On Buckley Road near Alameda Parkway
- Chambers Road & Iliff Avenue
- Iliff Avenue & Havana Street
- Alameda & Havana Park and Ride
- 6th Avenue connection between Sable Boulevard

The travel time reliability ratio is a metric used to analyze the reliability of transit service. It is calculated by taking the standard deviation of travel time during peak hours and dividing it by the standard deviation of the reference time, which is typically a time with minimal travel time variation. It best represents areas that have vastly different travel times at peak times compared to other times of day. So, if a route on a segment is delayed at all times of the day, it would be reliably slow and have a value closer to 1; similarly, an area with very little delay at any time of day would have a ratio near 1. However, a segment where the travel times vary significantly throughout the day would have a high ratio or poor reliability. The most unreliable segments can be found around Peoria Station, on Parker Road near Arapahoe Road, near Aurora Metro Center Station, near Nine Mile Station, a few segments on Colfax Avenue, and near 40th Avenue & Airport Boulevard at Gateway Park station (Figure 6-38). While the AT and ATA commute route segments on I-225 do not rank at the top in terms of delay, they do experience moderately unreliable travel times or are more significantly impacted by peak travel time changes.

Figure 6-35: Average Bus Speeds (20th Percentile)

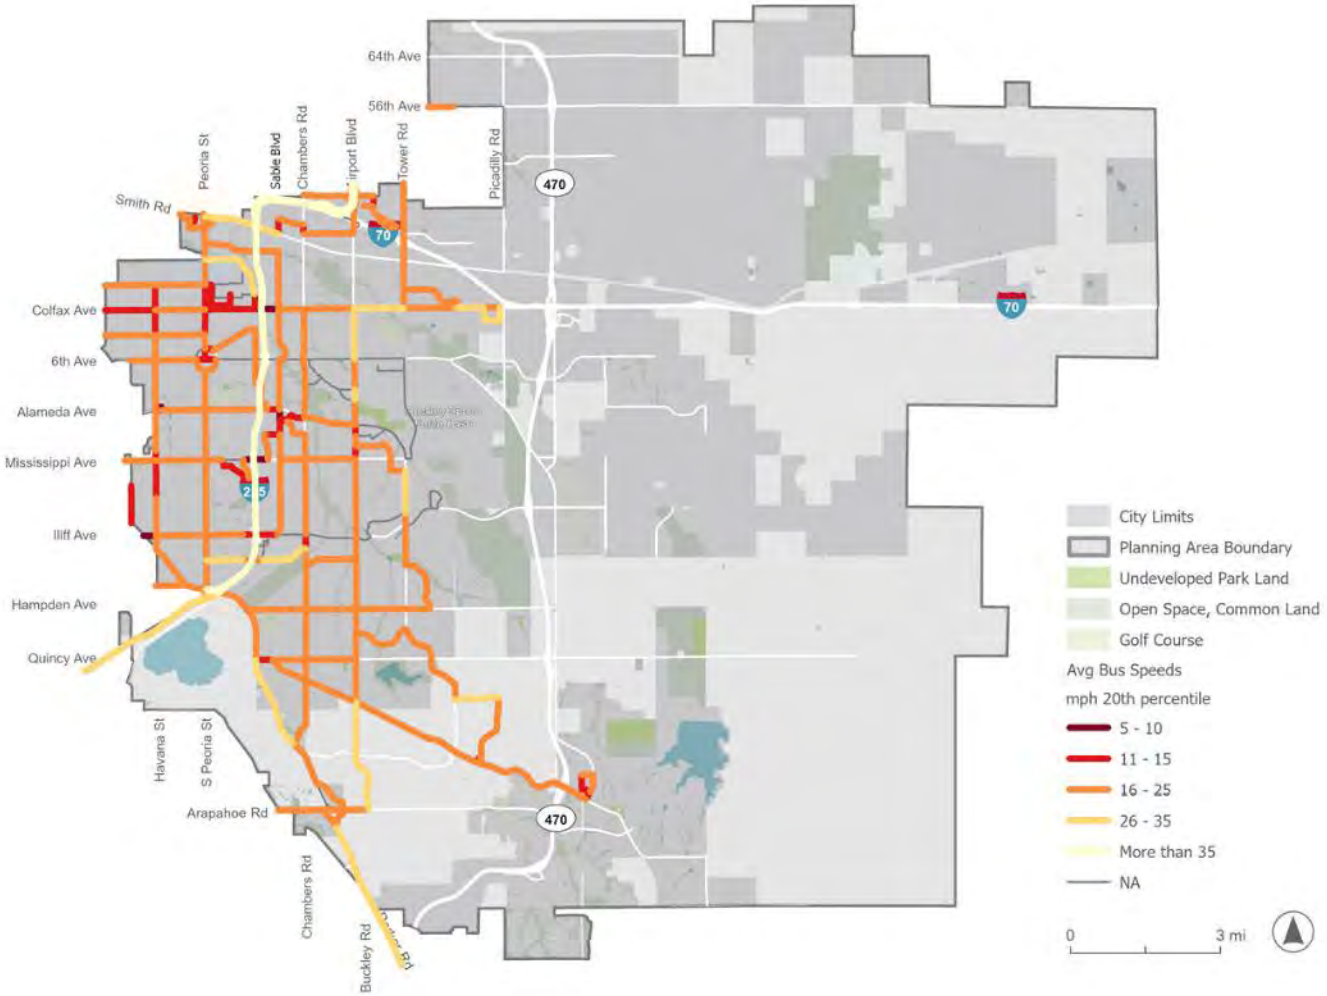

Figure 6-36: Average Bus Speeds (80th Percentile)

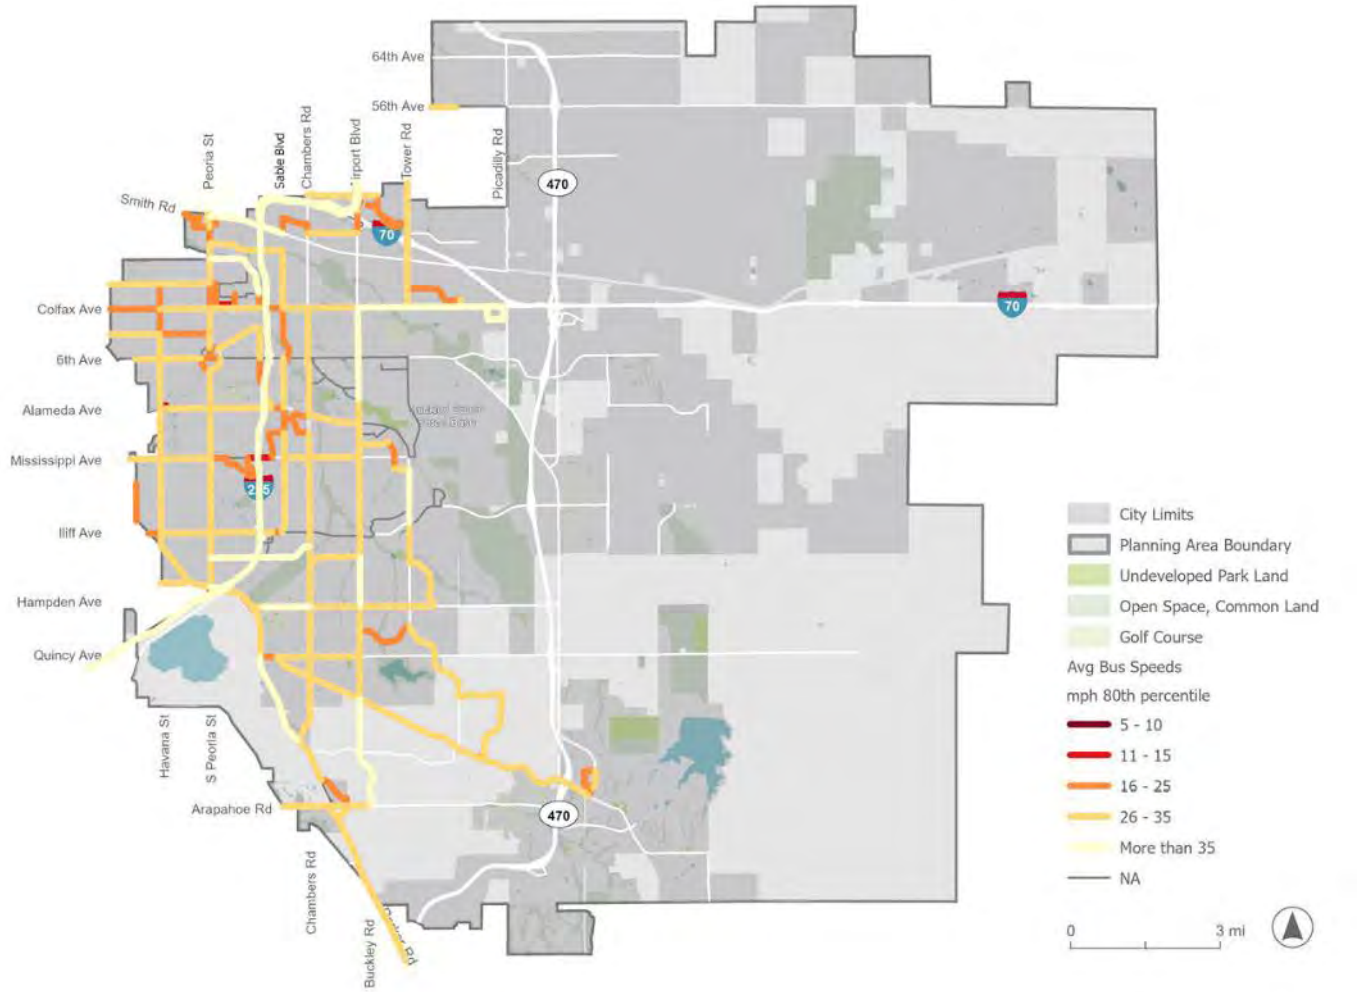

Figure 6-37: Segment Hours Delay per Trip, Fall 2023

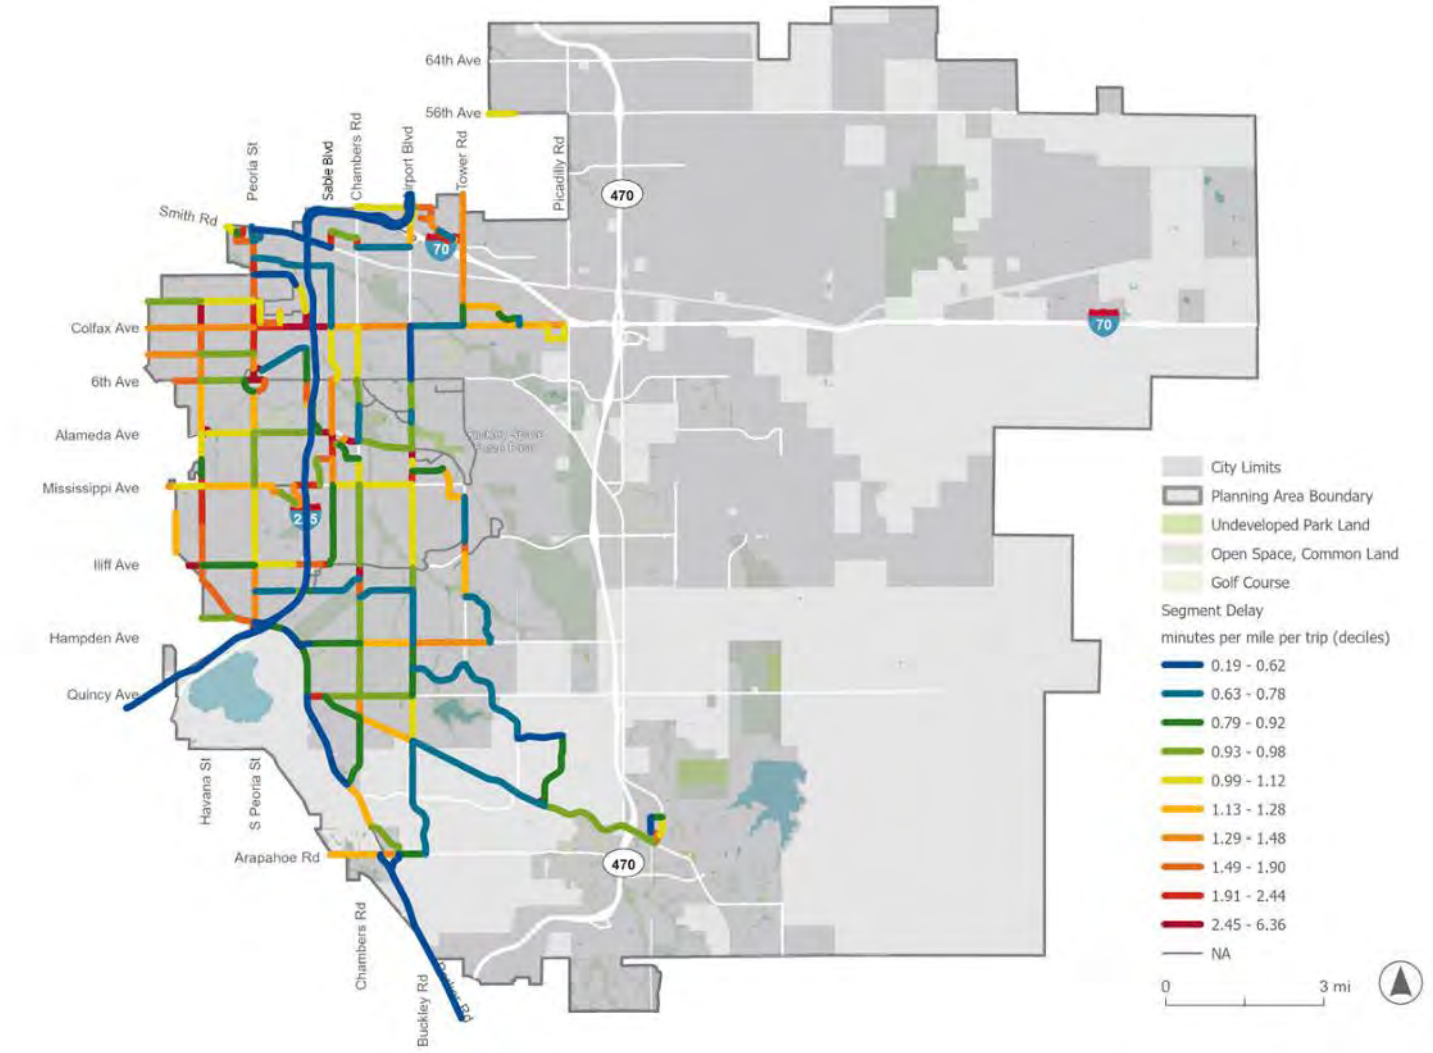

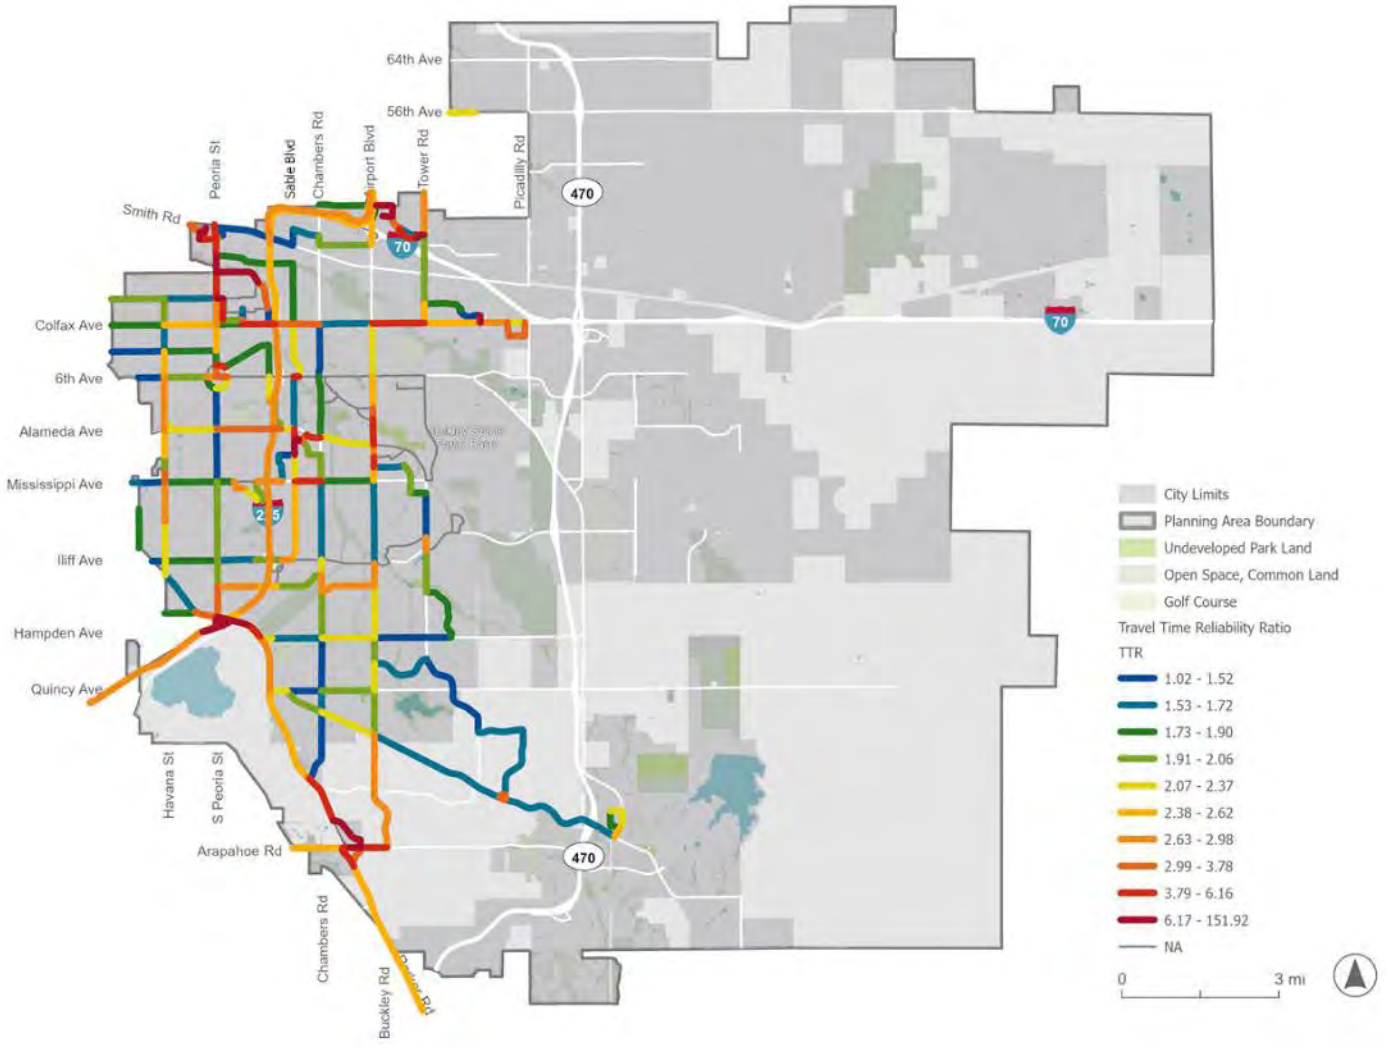

Figure 6-38: Travel Time Reliability, Fall 2023

6.9 Corridor Bus Delay

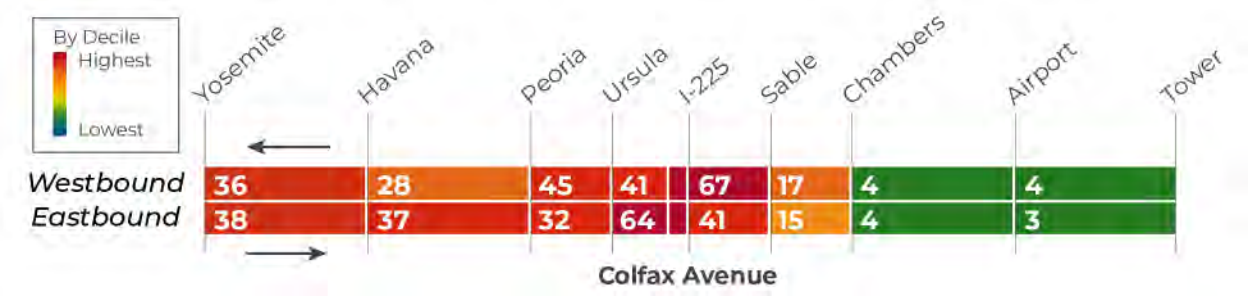
Colfax Avenue

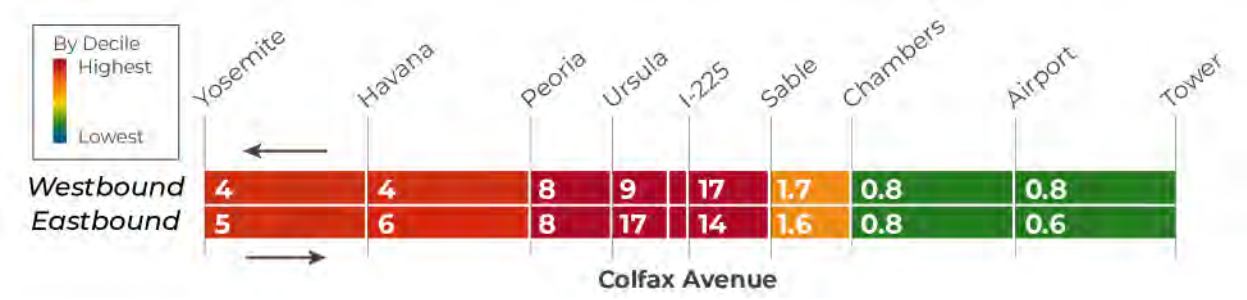
The Colfax Avenue Corridor in Aurora starts at the western edge of Aurora at Yosemite Street and ends near Picadilly Road and I-70. Colfax Avenue serves the frequent routes 15 and 15L and is a future BRT corridor. It is the highest ridership bus corridor in Aurora, with many stops, and consistently high daily ridership. This section of Colfax is around 7 miles long and carries 17% of the passenger delay hours experienced in Aurora at 315 hours per day, and 23% of the segment delay hours experienced at 62 hours (Figure 6-39).

Figure 6-39: Colfax Avenue Corridor Passenger Delay

Most of the passenger delay experienced on Colfax Avenue is between Yosemite Street and Chambers Road. In reviewing the passenger delay (Figure 6-40) and segment delay (Figure 6-41) per mile in the east and westbound directions, the most intense delay is experienced approaching I-225 in both directions.

Figure 6-40: Colfax Avenue Average Weekday Hours of Passenger Delay per mile by direction





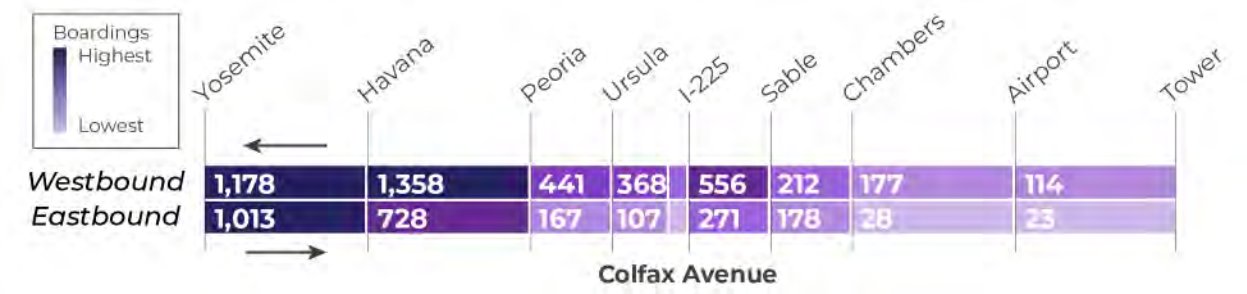


Figure 6-41: Colfax Avenue Average Weekday Hours of Segment Delay per mile by direction

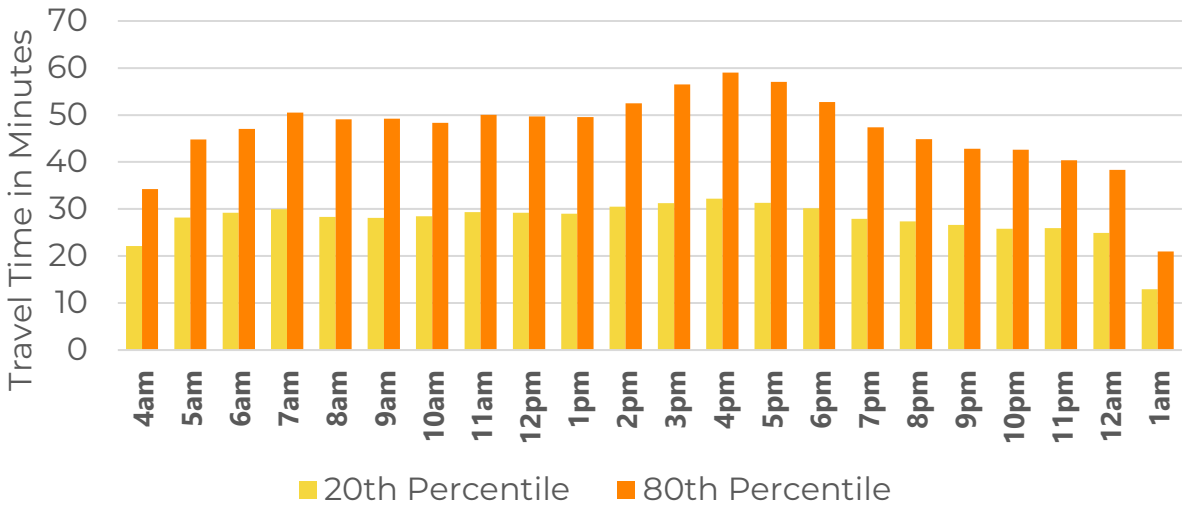
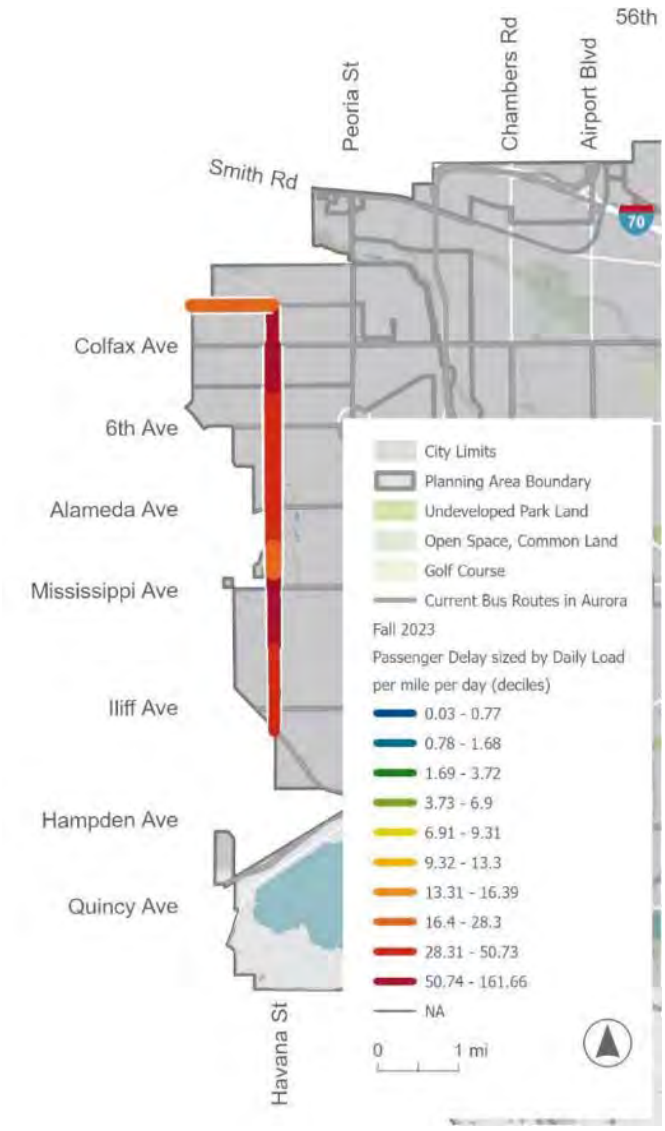


Most of the boardings occur on Colfax Avenue between Yosemite Street and Peoria Street, and generally traveling westbound to Downtown (Figure 6-42).

Figure 6-42: Colfax Avenue Average Weekday Boardings by direction



On Colfax Avenue, the 20th percentile travel time remains relatively steady throughout the day at around 30 minutes to travel Colfax, while the 80th percentile travel time fluctuates up to around 60 minutes at the peak around 4pm (Figure 6-43).

Figure 6-43: Colfax Avenue Travel Time in Minutes (20th and 80th Percentile) by Time of Day

Havana Street

Figure 6-44: Havana Street Corridor Passenger Delay

The Havana Street Corridor in Aurora starts on Montview Boulevard at the western edge of the City of Aurora and continues onto Havana Street, ending at Dartmouth Avenue. Havana Street serves route 105 and is a future BRT corridor. Havana has many stops with medium to high ridership. This section of Havana is around 6.3 miles long and carries 15 percent of the passenger delay hours experienced in Aurora at 271 hours per day (Figure 6-44). It carries a smaller percentage of segment hours of delay at around 9 percent at 24 hours.

The passenger delay experienced on Havana is consistently high across the corridor but is highest approaching Mississippi Boulevard in the southbound and northbound directions and near Havana Street and Colfax Avenue in both directions (Figure 6-45).

The segment delay (Figure 6-46) shows similar areas with high delay. In the southbound direction, the segment approaching Mississippi Boulevard is highest. In the northbound direction, between Colfax Avenue and Montview Boulevard is highest.

Havana carries a lot of daily riders. More than half of the riders in the southbound direction are getting on before 11th Street, but ridership is still steady on the latter half of the corridor (Figure 6-47). Similarly, many riders get on near the southern end of the corridor in the northbound direction, but also near the northern end.

Figure 6-45: Havana Street Average Weekday Hours of Passenger Delay per mile by direction

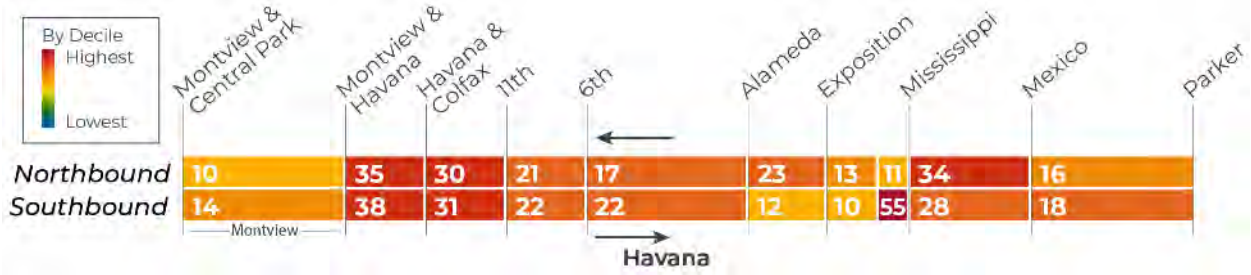


Figure 6-46: Havana Street Average Weekday Hours of Segment Delay per mile by direction

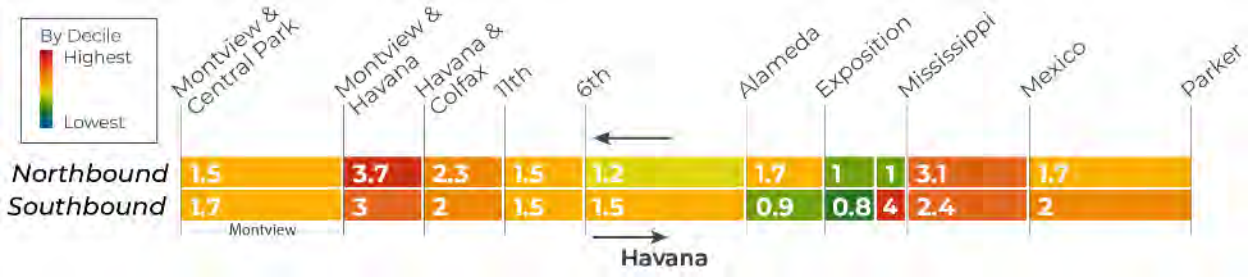

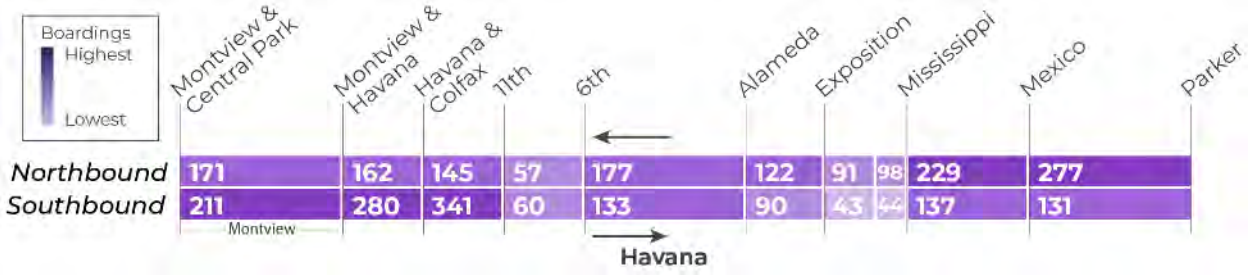

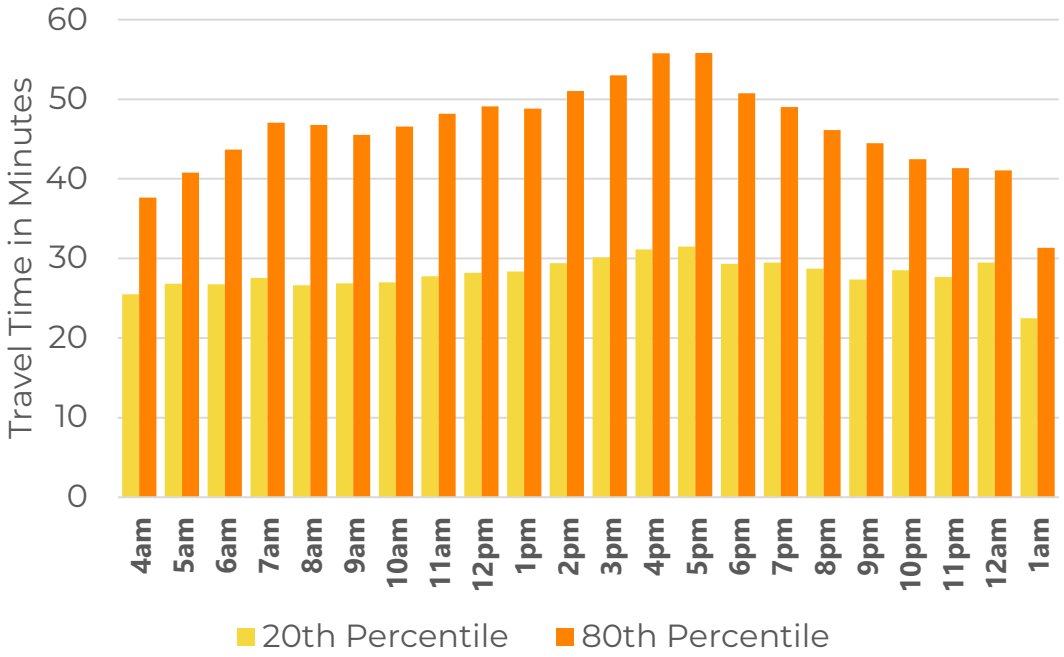

Figure 6-47: Havana Street Average Weekday Boardings by direction

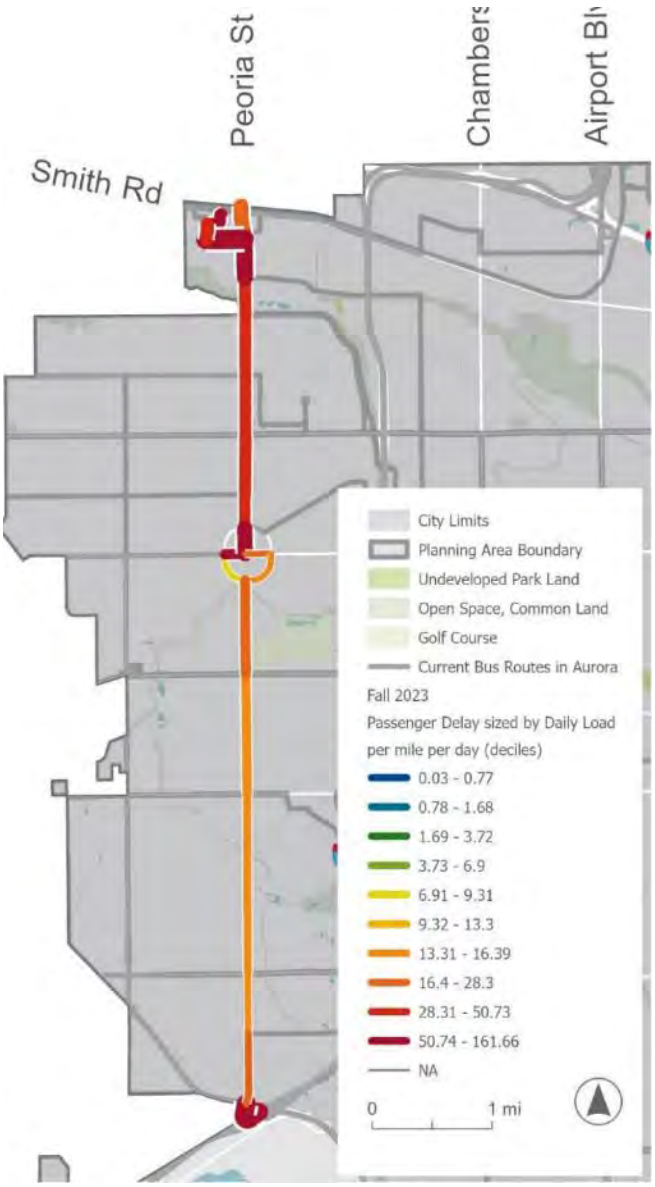

On Havana, the 20th percentile travel time remains relatively consistent throughout the day at around 25 to 30 minutes (Figure 6-48). The 80th percentile travel time ranges throughout the day, from around 30 to 55 minutes, and peaks from 4 pm to 5 pm.

Figure 6-48: Havana Street Travel Time in Minutes (20th and 80th Percentile) by Time of Day

Peoria Street

Figure 6-49: Peoria Street Corridor Passenger Delay

The Peoria Street Corridor in Aurora starts at the northern edge of Aurora near Peoria Station and ends at the southern edge of Aurora at Nine Mile Station. It serves the frequent route 121 and the Flatiron Flyer. Peoria Station and Nine Mile Station offer a convenient location for riders to connect with other services, including multiple bus and rail routes, as well as park-and-ride facilities. The Peoria Street Corridor is around 9.3 miles long and carries 285 hours of passenger delay or about 16 percent of the delay experienced in Aurora (Figure 6-49). It carries a similar amount of segment delay at 15 percent of the delay experienced in Aurora or 41 hours.

The highest delay on the corridor is found at Peoria Station, Nine Mile Station, and segments north of Del Mar Circle. Overall, more passenger delay is experienced in the southbound direction than the northbound one (Figure 6-50).

Peoria Street segment delay is very similar to passenger delay with the same higher and lower delay locations (Figure 6-51).

A lot of riders board transit at the major transfer stations, but there is also consistent boarding activity along the length of the corridor (Figure 6-52).

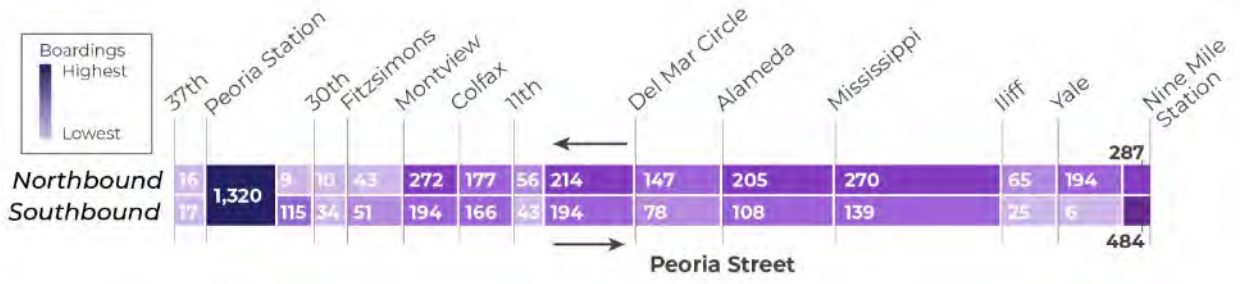

Figure 6-50: Peoria Street Average Weekday Hours of Passenger Delay per mile by direction

Figure 6-51: Peoria Street Average Weekday Hours of Segment Delay per mile by direction

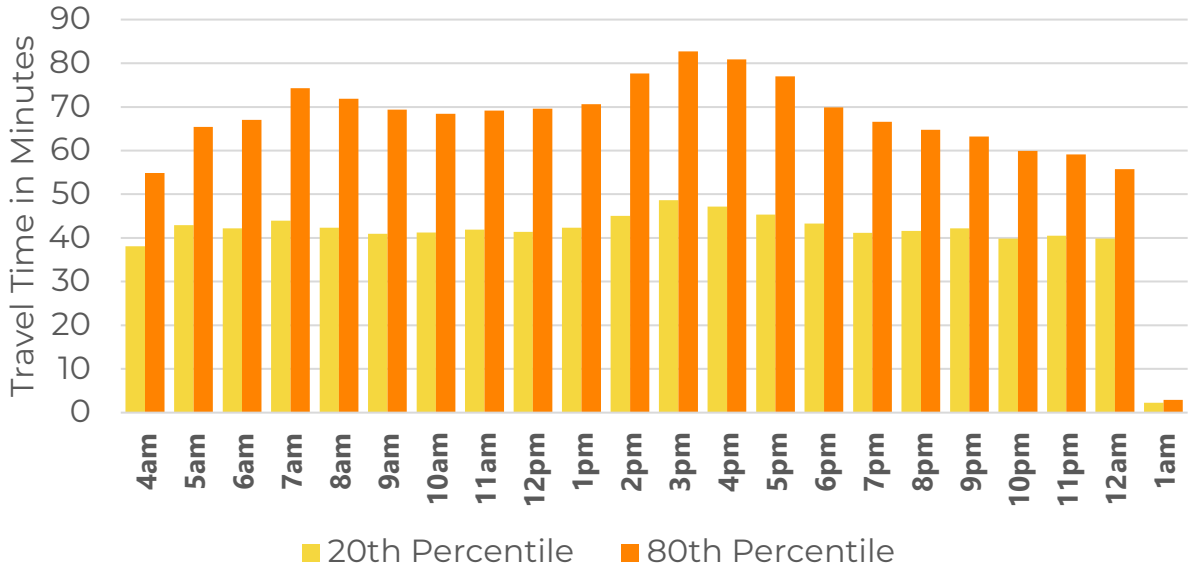

Figure 6-52: Peoria Street Average Weekday Boardings by direction

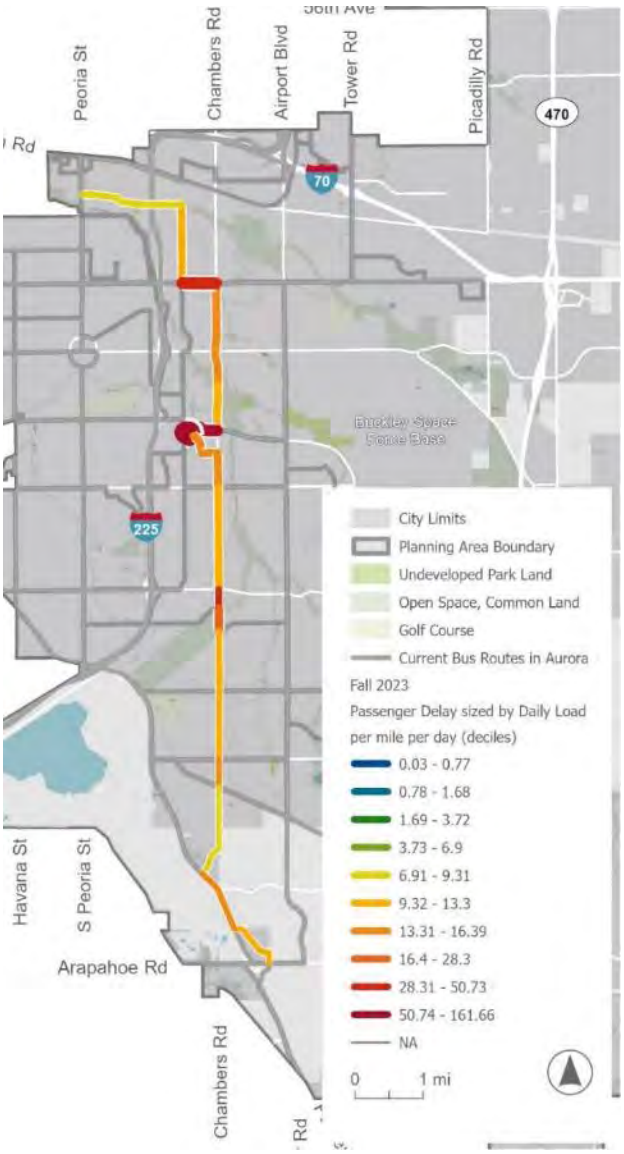

On Peoria Street, the 20th percentile travel time is steady throughout the day, ranging from just under 40 minutes to 50 minutes (Figure 6-53). The 80th percentile travel time has two small peaks in morning and the afternoon, with travel times as high as 80 minutes around 3 pm to 4 pm.

Figure 6-53: Peoria Street Travel Time in Minutes (20th and 80th Percentile) by Time of Day

Chambers Road

Figure 6-54: Chambers Road Corridor Passenger Delay

The Chambers Road corridor runs mostly north to south, starting at 30th Street and Peoria, and ending at Arapahoe Road in the south. It serves route 153, which is a 30-minute bus route that is planned to increase frequency to every 15 minutes with the implementation of RTD's System Optimization Plan. The corridor is 14.5 miles long and experiences 212 hours of passenger delay per day, or 12 percent of the Aurora passenger hours of delay experienced (Figure 6-54). It carries a slightly smaller percentage of segment hours of delay at around 9 percent at 25 hours.

The passenger delay experienced on Chambers Road today is moderate, with more delay occurring on the Colfax Avenue segment, entering Aurora Metro Center Station, and near the intersection of Yale Avenue (Figure 6-55).

Chambers Road segment-level delay is very similar to the passenger delay in terms of the key areas with moderate delay (Figure 6-56).

Ridership is consistent along the Chambers Road corridor today, with the exception of a high number of boarding at Aurora Metro Center Station (Figure 6-57).

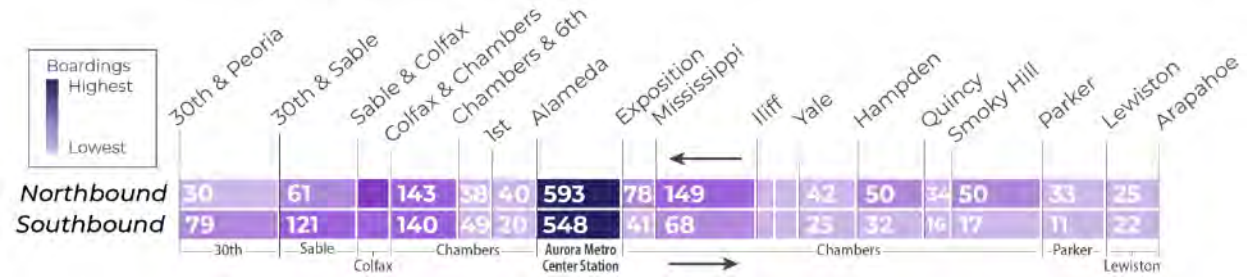

Figure 6-55: Chambers Road Average Weekday Hours of Passenger Delay per mile by direction

Figure 6-56: Chambers Road Average Weekday Hours of Segment Delay per mile by direction

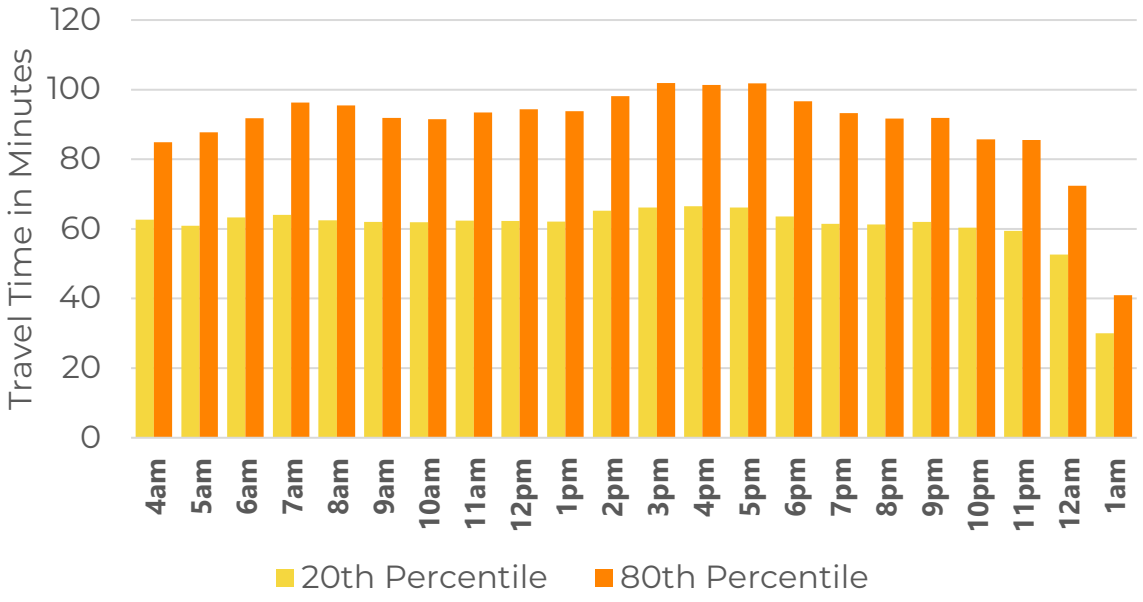

Figure 6-57: Chambers Road Average Weekday Boardings by direction

On Chambers Road the 20th percentile travel time is consistently around 60 minutes for most of the day, and the 80th percentile travel time typically ranges from 80 minutes to around 100 minutes in the afternoon (Figure 6-58).

Figure 6-58: Chambers Road Travel Time in Minutes (20th and 80th Percentile) by Time of Day

Sable Boulevard

Figure 6-59: Sable Boulevard Corridor Passenger Delay

The Sable Boulevard corridor starts at Colfax Avenue and ends around Aurora Metro Center Station. This section of Sable serves route 15L, a frequent route that runs on Colfax in Aurora before turning onto Sable Boulevard. The Sable corridor is only around 2.5 miles long and carries 6 percent of the passenger delay in Aurora at 105 hours, and around 11 hours of segment delay or 4 percent of the delay in Aurora (Figure 6-59).

The passenger delay is consistently high on this corridor, and especially high on the short segment that connects the offset legs of Sable Boulevard (on 6th Street) and entering Aurora Metro Center Station (Figure 6-60).

The segment-level delay is more moderate along the corridor, but remains high at the turn at 6th Street and Aurora Metro Center Station (Figure 6-61).

Ridership is consistent along the corridor with the most boardings in the northbound direction at Aurora Metro Center Station (Figure 6-62).

Figure 6-60: Sable Boulevard Average Weekday Hours of Passenger Delay per mile by direction

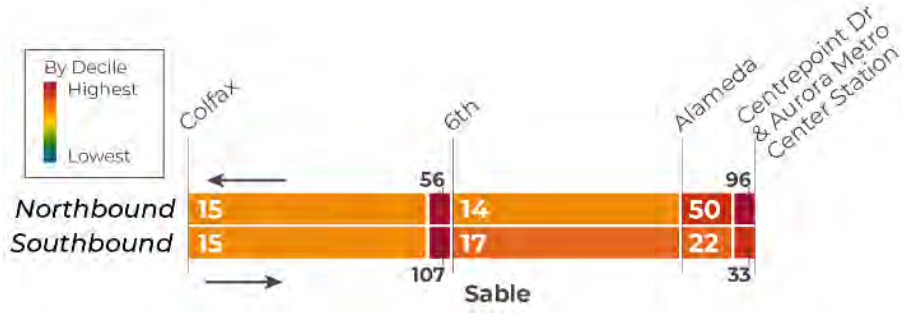

Figure 6-61: Sable Boulevard Average Weekday Hours of Segment Delay per mile by direction

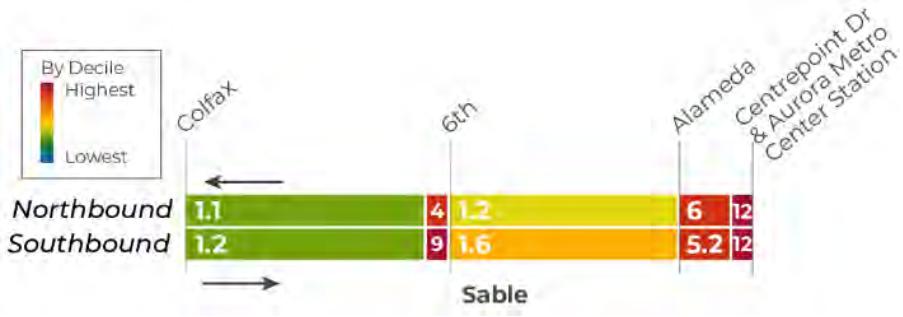

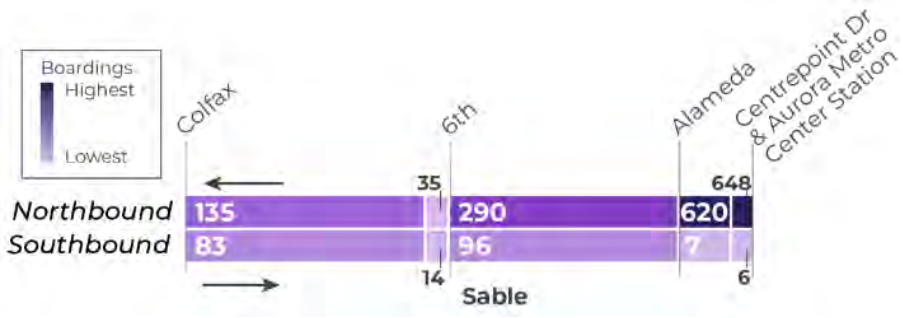

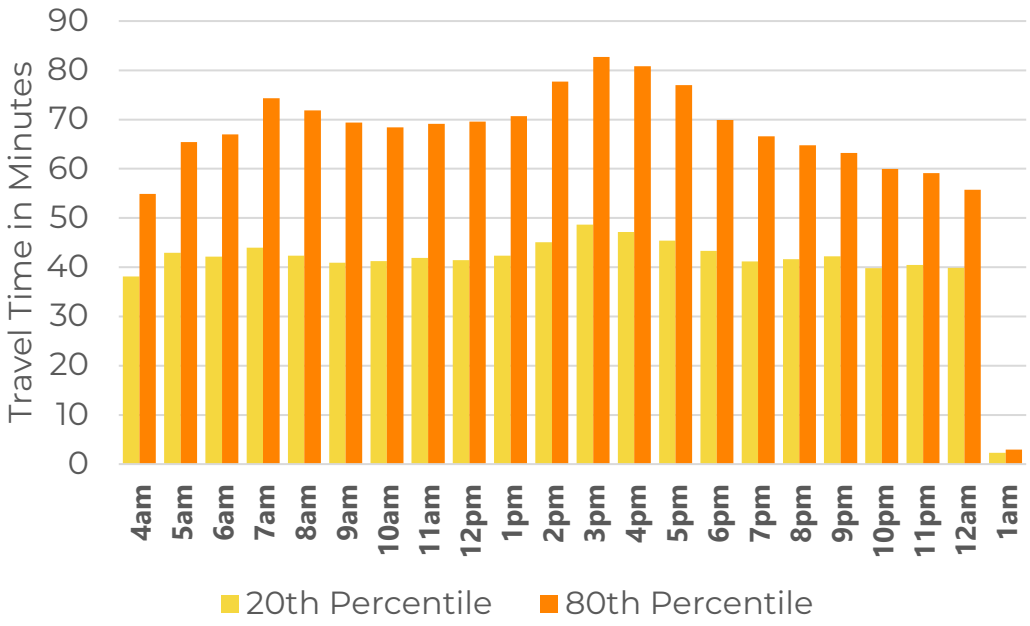

Figure 6-62: Sable Boulevard Average Weekday Boardings by direction

On Sable, the 20th percentile travel time is around 40 minutes all day, and the 80th percentile travel time ranges between 60 minutes to 80 minutes, with a peak at around 3 pm to 4 pm (Figure 6-63).

Figure 6-63: Sable Boulevard Travel Time in Minutes (20th and 80th Percentile) by Time of Day

7 Active Transportation Overview

The City of Aurora has approximately 2,052 miles of sidewalks, 82 miles of on-street bike lanes, and 296 miles of paved shared-use trails. Aurora's popular trail system is the hallmark of the city's current active transportation network, enabling a wide variety of users to connect to local and regional parks and open space, such as Cherry Creek State Park, Quincy Reservoir, Sand Creek Park, and Star K Ranch. Aurora's trails support the existing on-street pedestrian and bike networks, with several notable trail connections including:

- Aurora Reservoir Trail
- Cherry Creek Trail
- High Line Canal Trail
- High Plains Trail
- Metro Center Trail
- Powerline Trail
- Ridgeline Trail
- Toll Gate Creek Trail

Beyond the trail system, there are many gaps in Aurora's existing active transportation network, which has a limited number of high-comfort pedestrian and bicycle facilities on city streets. Of Aurora's sidewalks, 400 miles are narrow (less than four feet wide), and 166 miles of sidewalk are missing, meaning that more than a quarter (26 percent) of the street frontage in Aurora has missing or substandard sidewalks.

The most complete sidewalk coverage is found in central and southern Aurora, while sidewalk gaps tend to be more concentrated in north Aurora (north of E 6th Avenue) and east Aurora (around the Buckley Space Force Base). Major streets with significant sidewalk gaps include Smith Road, Colfax Avenue, 6th Avenue, Jewell Avenue, and Picadilly Road. Narrow sidewalks (less than four feet wide) are heavily concentrated in northwestern Aurora, particularly on and around Montview Boulevard.

Many of the city's enhanced crossings are at trail connections and along arterials and collectors, including Fitzsimons Parkway. The city enhanced several crossings by installing rapid rectangular flashing beacons (RRFBs) (Figure 7-1) and high-intensity activated crosswalks (HAWKs)/pedestrian hybrid beacons (PHBs) (Figure 7-2). HAWKs are a form of traffic control with red beacons that bring conflicting motor vehicle traffic to a complete stop at pedestrian crossings, whereas RRFBs are yellow flashing beacons that warn motor vehicles that pedestrians are at the crosswalk, encouraging drivers to stop for people crossing. Figure 7-3 illustrates Aurora's pedestrian infrastructure.

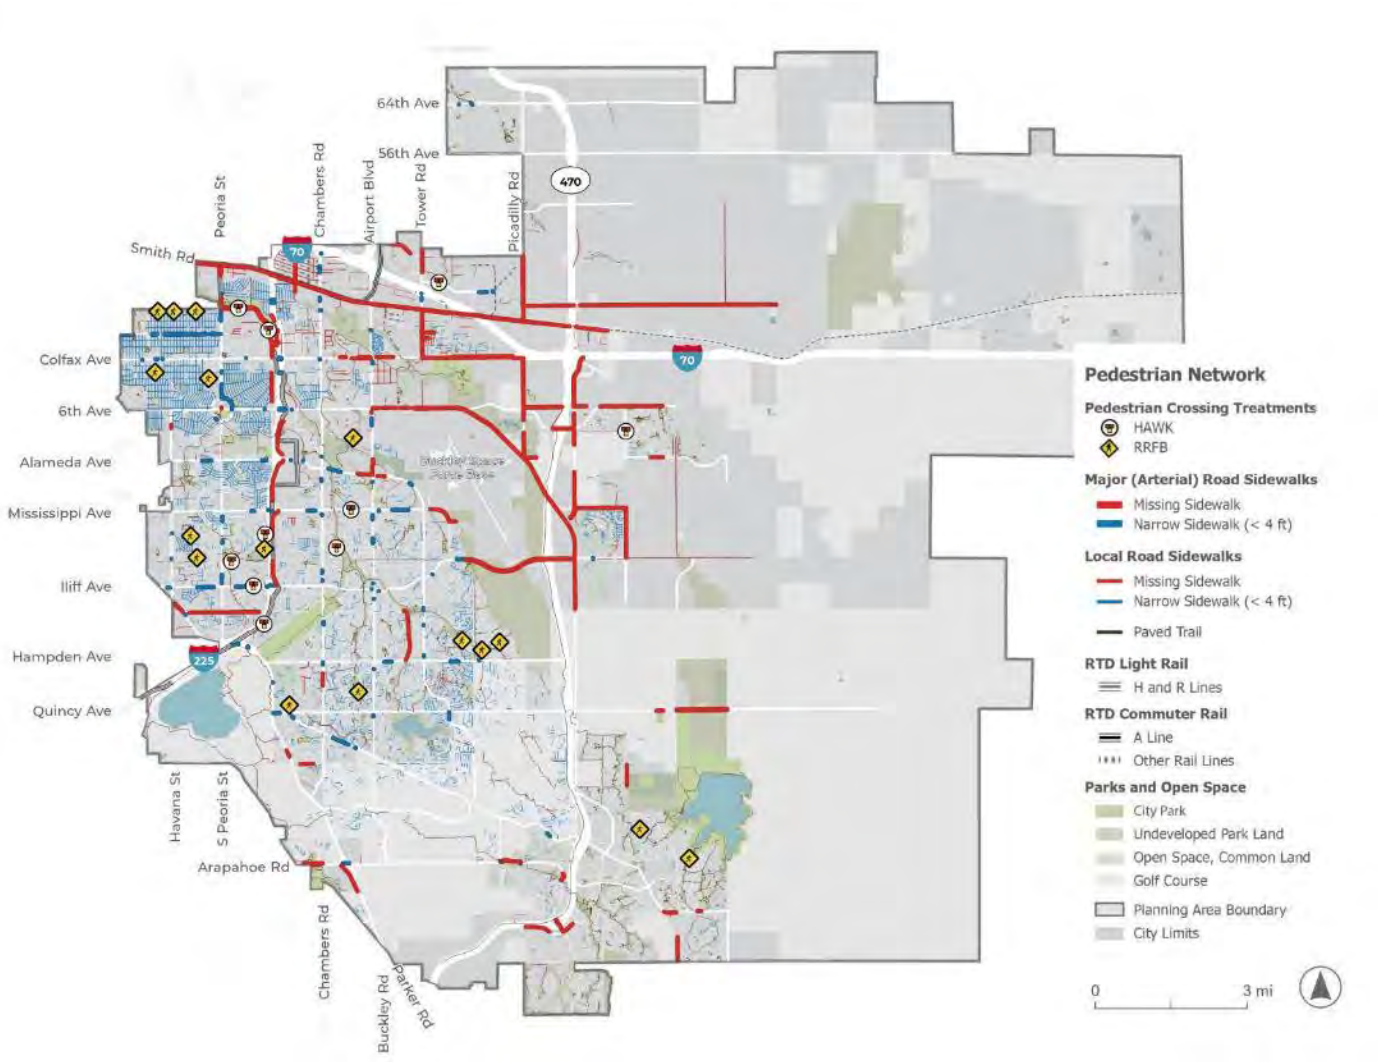

Figure 7-1: Rectangular Rapid Flashing Beacon (RRFB)

Figure 7-2: High Intensity Activated Crosswalk (HAWK) at Iliff & Vaughn

Figure 7-3: Aurora Pedestrian Infrastructure

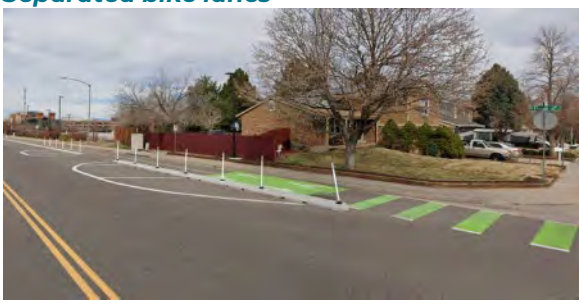
Source: City of Aurora , 2024

Aurora's bike network includes six types of bike facilities, as follows:

Dedicated bike lanes

Shared lanes and bike routes

Buffered bike lanes



Shared use path

Paved off-street trails and paths

Separated bike lanes

Aurora's high-comfort on-street bike facilities include buffered and separated bike lanes. All of the city's separated bike lanes are located in central Aurora, on Jewell Avenue, Potomac Street, Florida Avenue, and Mexico Avenue (Table 7-1). Buffered bike lanes are also present along corridors in northwest and central Aurora, including on Montview Boulevard and Chenango Drive.

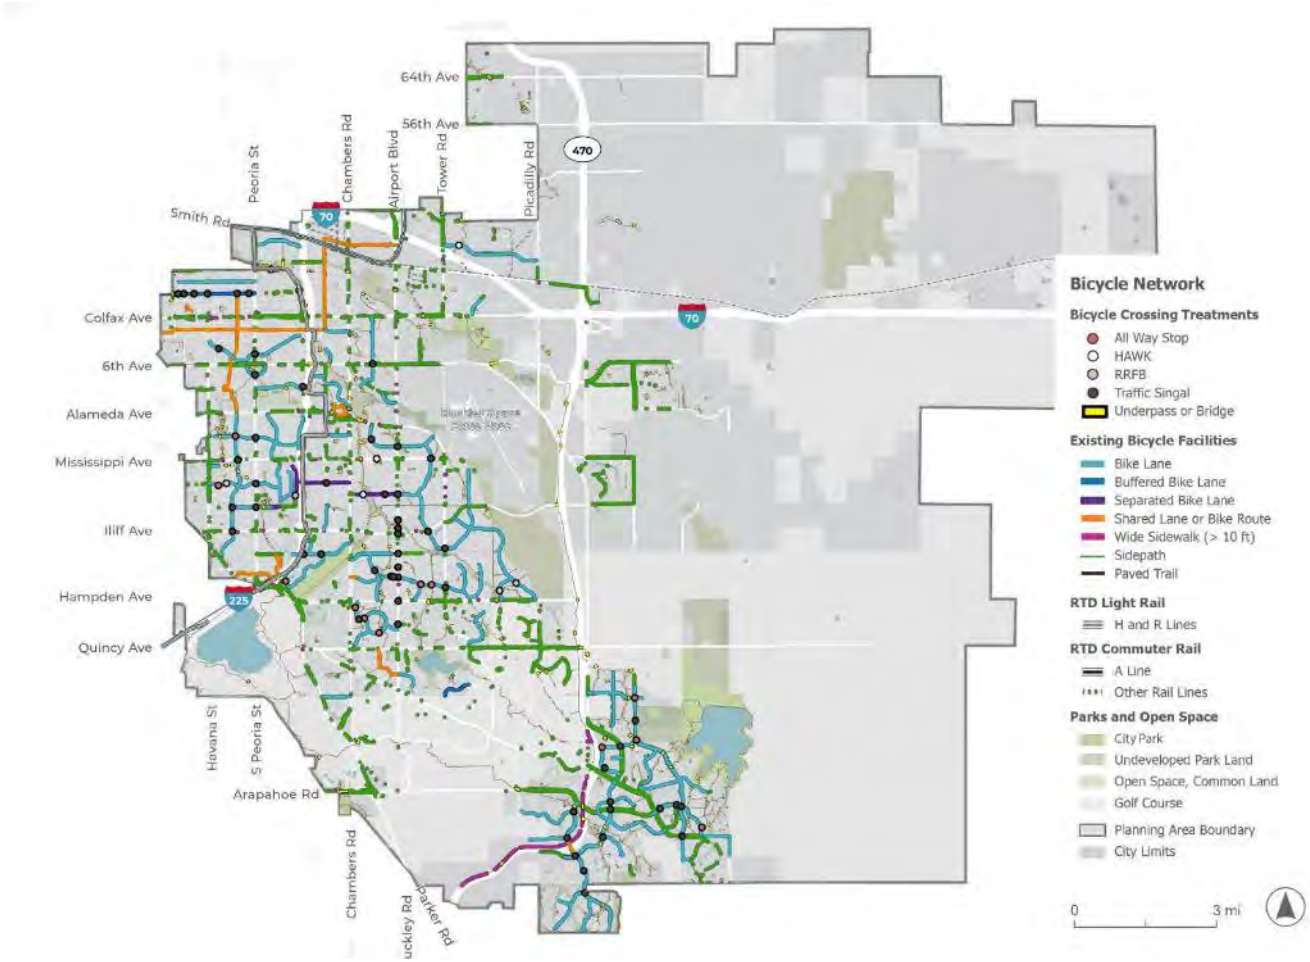


Table 7-1: Separated bicycle facilities

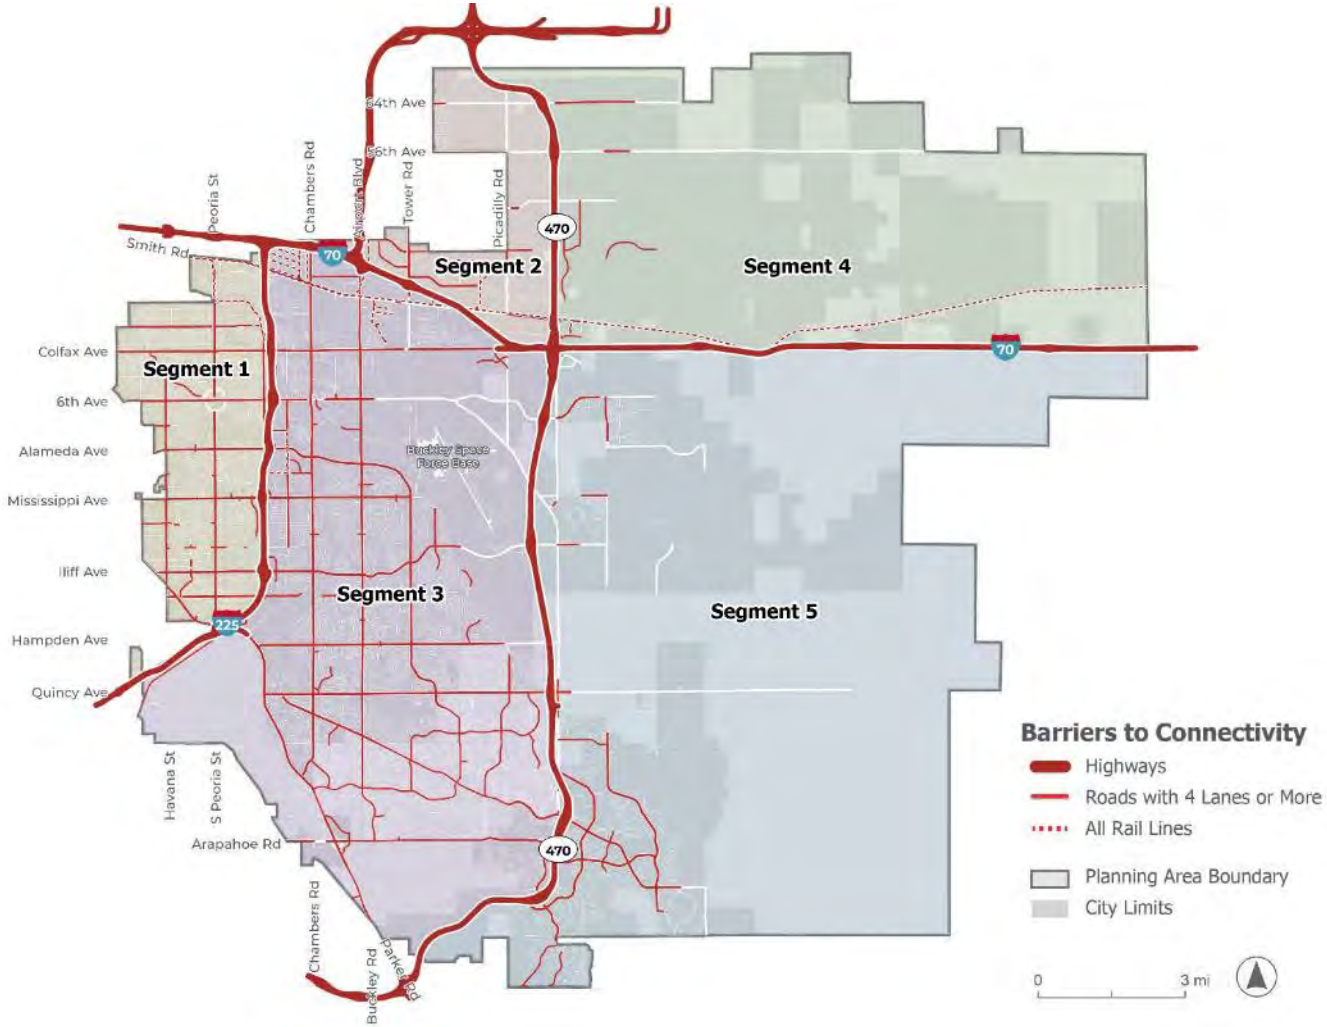
Corridor	Extents	Year Completed
Jewell Avenue	Tucson Street to Jewell Wetlands Park	2020
Potomac Street	Jewell Avenue to Louisiana Avenue	2020
Florida Avenue	Abilene Street to Chambers Road	2020
Mexico Avenue	Idalia Street to Buckley Road	2020

In addition to these high-comfort bike lanes, approximately 103 miles of wide sidewalks (measuring at least 10 feet wide) provide bicyclists with a comfortable alternative to riding in mixed traffic with motor vehicles, while still providing adequate room for pedestrians.

Aurora's bike network, including dedicated on-street bike facilities, sidepaths, and paved off-street trails, offers a moderate degree of connectivity within certain sectors of the City. Trails, dedicated bike lanes, and bike routes form several continuous north-south corridors between Colfax Avenue and Quincy Avenue in northwest and central Aurora, including Moline Street and the Toll Gate Creek Trail system. Although some north-south corridors span several neighborhoods, the quality of these bicycle facilities varies, and may not appeal to a broad range of potential bicyclists. Continuous east-west connections are less common, with many discontinuous and indirect east-west dedicated bike facilities, especially north of Mississippi Avenue (Figure 7-4). In southeast Aurora, trails, bike lanes, and sidepaths form a denser and more connected bicycle network than other areas of the city. Leveraging existing local and regional trails, improving the quality of existing bikeways and crossings, filling short gaps, and increasing the density of high-comfort facilities will be key principles as Aurora works toward a more complete bicycle network in the future.

Figure 7-4: Aurora Bike Infrastructure



Source: City of Aurora , 2024

Side paths displayed on this map are at least 8 feet wide and separated from the adjacent roadway by at least 2 feet. Although it is legal for bicyclists to ride on sidewalks throughout Aurora, sidewalks that do not meet these criteria make it challenging for bicyclists and pedestrians to comfortably share space and do not meet minimum standards for shared use paths.

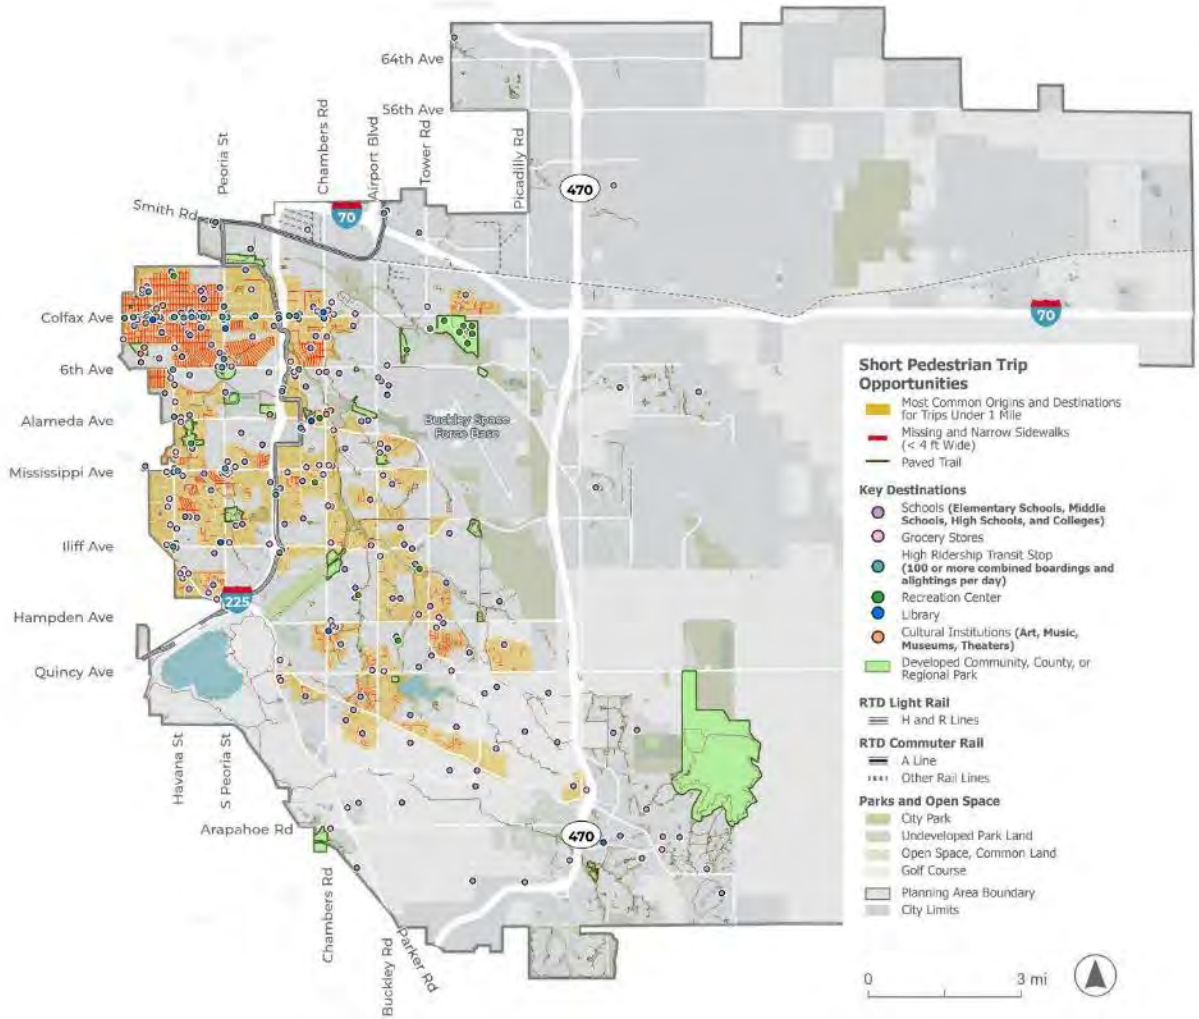
Barriers such as highways, wide roads with four or more lanes, and railways (shown in Figure 7-5) impede active transportation connectivity and safety today. Several limited-access highways and rail corridors—I-70, I-225, the E-470 Tollway, and passenger and freight rail along RTD's A and R lines, act as major barriers that divide Aurora into five distinct segments. Only a limited number of streets and trails cross these highways and rail lines, and many of the roads that connect across these barriers are high-volume, high-speed arterials that do not provide a comfortable environment for walking and bicycling.

High-volume, high-speed roads also act as barriers within and between neighborhoods. Although frequent crossing opportunities exist at intersections along arterials, crossing fast, busy roads can be unsafe and uncomfortable for people walking and bicycling, even at signalized intersections. Investing in safe, comfortable, and frequent crossings can help mitigate these barriers and provide citywide connectivity in the future.

Figure 7-5: Barriers to Connectivity

7.1 Moving on Foot or with mobility device

Short Trip Opportunities



Analyzing short trips is instrumental to identify challenges and opportunities within an active transportation system. Short trip opportunities for pedestrians typically refer to journeys (via any mode) that are less than one mile long and could be converted to walking trips. This State of the System report lists key destinations in Aurora to consider. They include:

- **Schools:** Preschools, elementary schools, middle schools, and high schools.
- **Transit:** High-ridership light rail stations and bus stops with 100 or more daily average boardings and alightings (combined).
- **Cultural and Recreation Destinations:** Recreation centers, libraries, and cultural institutions (art, music, museums, theaters).
- **Grocery Stores:** Supermarkets and other grocery retailers within the City of Aurora.
- **Parks:** Existing community, county, and regional parks.

Figure 7-6 illustrates opportunities and barriers to walking in Aurora. The map highlights key destinations and block groups with high concentrations of trips under one mile, representing places with the highest potential for future walking trips. In areas with high concentrations of short trips, the map also highlights missing and inadequate pedestrian facilities, which currently act as obstacles to walking in these areas.

Most key destinations in Aurora are concentrated in central, west, and northwest Aurora, where high volumes of trips under one mile begin or end. Key destinations and short trips are especially concentrated in northwest Aurora, indicating the potential for high volumes of walking trips in the future. However, many of the neighborhoods in northwest Aurora have discontinuous and narrow sidewalks, leaving pedestrians with few comfortable routes to reach destinations. Investing in higher-quality pedestrian infrastructure in areas where short trips are most concentrated can offer people in Aurora a more comfortable and attractive way to reach nearby destinations, encouraging walking or rolling instead of driving.

Figure 7-6. Short Pedestrian Trip Opportunities

Level of Traffic Stress (LTS) Overview

Individuals consider comfort and convenience when choosing to walk, roll, or cycle, whether for commuting, everyday needs, recreation, or intermodal transportation connections. The stress that individuals feel when travelling by active modes is inherently subjective, but researchers developed a way to measure people's comfort walking and biking along a road or through an intersection—Level of Traffic Stress (LTS). Mekuria, Furth, and Nixon (2012) developed LTS in *Low Stress Bicycling and Network Connectivity* to assign a road a score from 1 to 4 based on a combination of factors. This methodology has since been refined and iterated upon.

Level of Traffic Stress (LTS) represents the stress on pedestrians or bicyclists due to roadway and traffic conditions. Lower LTS scores indicate more comfortable, less stressful facilities for people walking, rolling, and biking, while higher LTS scores indicate the opposite. LTS 1 facilities cater to all ages and abilities, whereas a narrower range of people feel comfortable in LTS 4 facilities.

LTS values range from 1 through 4:

- LTS 1: Little to no traffic stress and requires little attention by the active modes user to navigate the segment or crossing.
- LTS 2: Little traffic stress for most adults, but requires more attention to navigate the segment or crossing than young children (ages 10 and younger) may be capable of.
- LTS 3: Moderate stress; a higher level of attention is needed to navigate the segment or crossing, and adults may feel some discomfort.
- LTS 4: High traffic stress; only active modes users with limited route choices would use this segment or crossing.

7.1.1.1 Pedestrian Level of Traffic Stress (LTS)

The Pedestrian Level of Traffic Stress (Pedestrian LTS) analysis presented in Figure 7-7 assesses how comfortable or safe it feels to walk along a street, while the Crossing Level of Traffic Stress (Crossing LTS) analysis presented in Figure 7-8 assesses how comfortable or safe it feels to cross a street as a pedestrian or a bicyclist.

The Pedestrian LTS methodology considers the posted speed limit, sidewalk width, and degree of separation from motor vehicle traffic. In general, streets with lower speed limits, wider sidewalks, and greater separation from traffic receive lower pedestrian LTS scores, indicating a more comfortable and less stressful walking environment.

The results of the analysis indicate that many of Aurora's busiest collectors and arterials are high-stress environments for pedestrians (LTS 3 or LTS 4), which may discourage people from walking today. This high level of pedestrian stress can be attributed to the high traffic volumes and high-speed limits that characterize many of Aurora's busiest roads.

It is also noteworthy that the arterials and collectors in northwest and central Aurora are mainly pedestrian LTS 3 and 4, while arterials and collectors in east and southeast Aurora are primarily pedestrian LTS 1 and 2. The east side of Aurora has a higher concentration of wide sidewalks and far fewer narrow and missing sidewalks, creating a more comfortable and safer environment for pedestrians compared to the northwest.

Figure 7-7. Pedestrian Segment Level of Traffic Stress (PLTS)

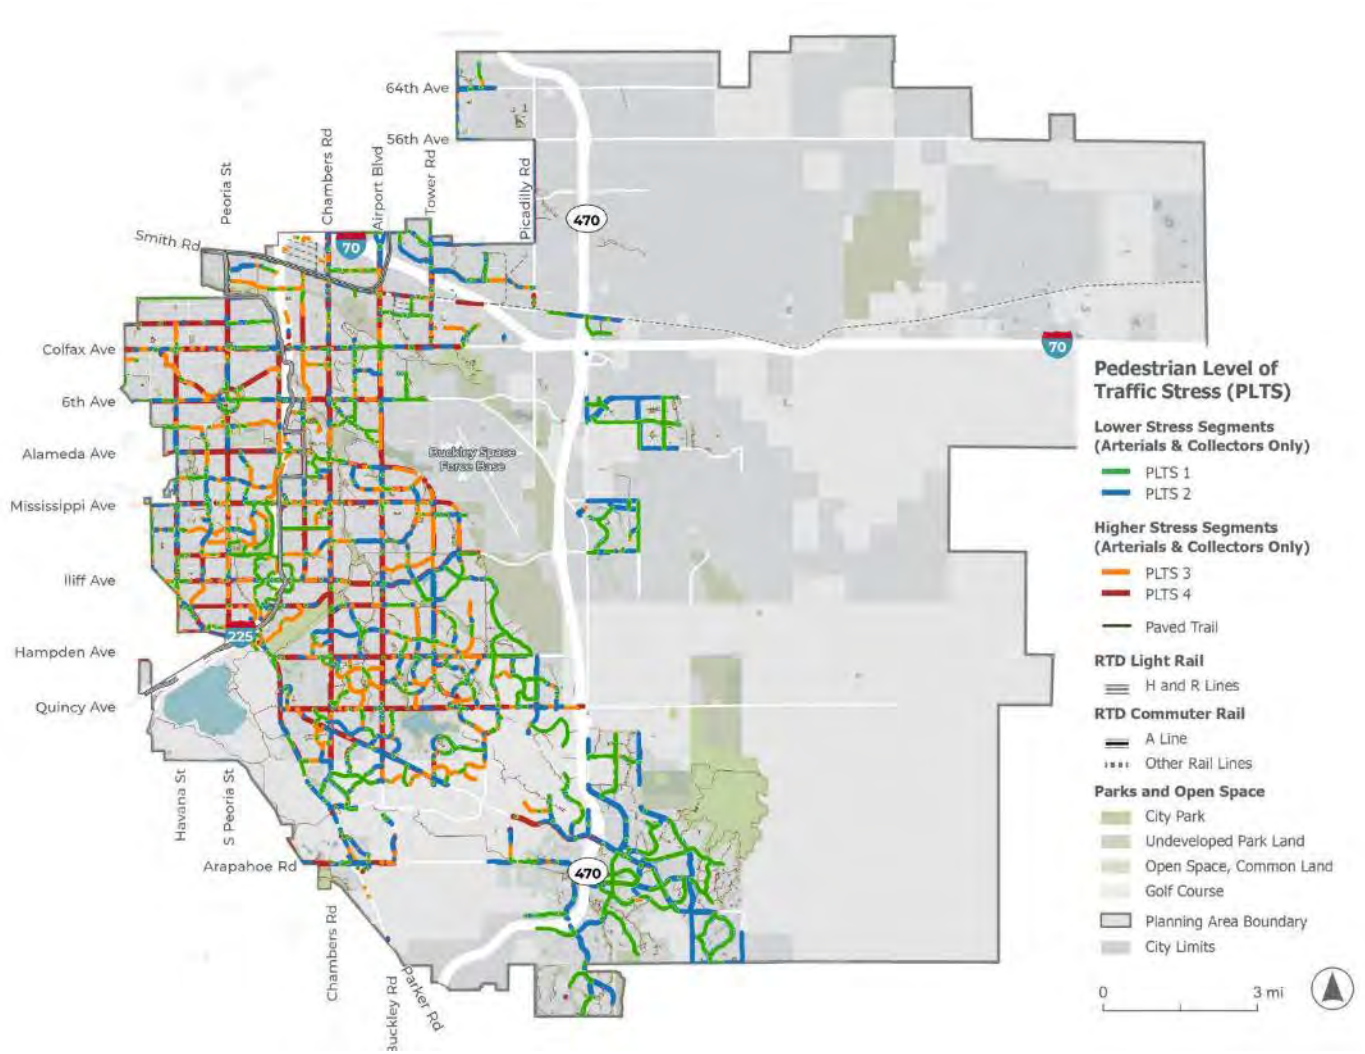

Figure 7-8. Crossing Level of Traffic Stress (Crossing LTS)

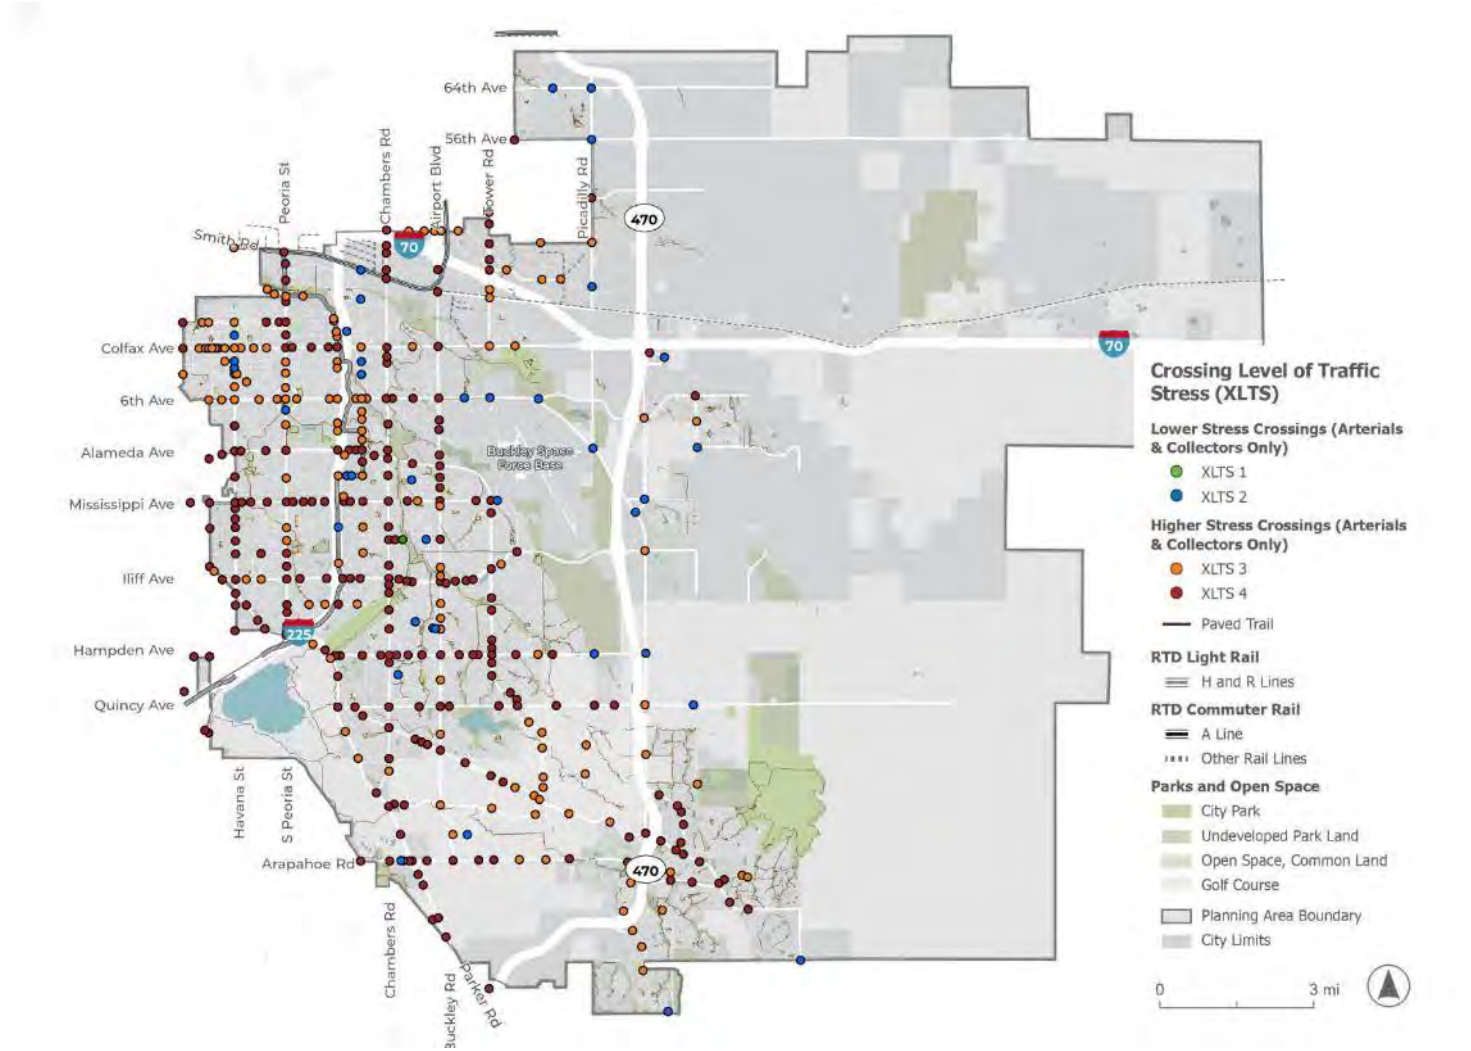

Figure 7-8 illustrates crossing LTS scores, which apply to both pedestrians and bicyclists, for street crossings of and along collectors and arterials in Aurora. The methodology considers the speed of cross traffic, the number of vehicle travel lanes to cross, and crossing treatments like signals, PHBs/HAWKs, stop signs, RRFBs, and refuge islands. In general, crossings with lower speed limits, shorter crossing distances, and more crossing enhancements receive lower crossing LTS scores, indicating more comfortable crossings for pedestrians and bicyclists. The map shows the score of the highest-stress crossing at each intersection, which is typically associated with crossing the arterial or collector rather than the intersecting local street.

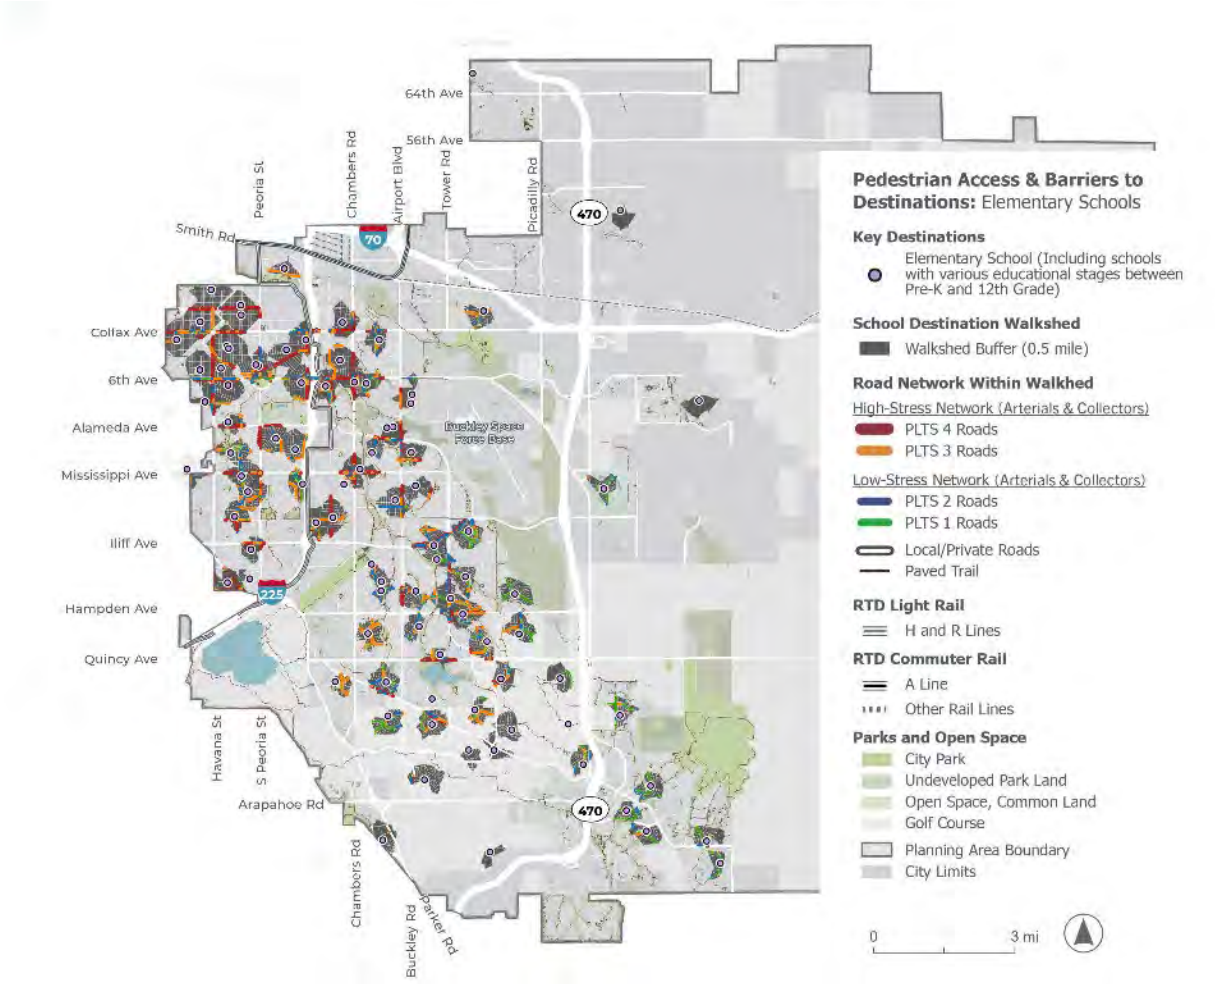
Despite the existence of some enhanced crossings in Aurora, many of Aurora's collectors and arterials have high speeds, multiple lanes in each direction, and high traffic volumes (annual average daily traffic, or AADT), which pose challenges—in the form of higher stress—for people walking, biking, and rolling across these corridors. For pedestrians and bicyclists, stress and discomfort are more pronounced at unsignalized crossing locations along arterials and collectors. However, even at signalized crossings, the presence of traffic control may not result in a low-stress experience if pedestrians and bicyclists must cross several lanes of traffic and contend with a high volume of turning vehicles.



Pedestrian Access & Barriers to Key Destinations

The Pedestrian Level of Traffic Stress (LTS) results illuminate how comfortable it is for people walking and rolling to access key destinations. Figure 135 shows the pedestrian LTS scores on streets within a half-mile walk of different types of destinations, highlighting significant barriers to accessing some destinations.

Within these walksheds, the maps distinguish between high-stress (pedestrian LTS 3 and 4) arterials and collectors and low-stress (pedestrian LTS 1 and 2) arterials and collectors to identify areas of the sidewalk network around key destinations that may impede or facilitate pedestrian movement. Each of the following figures highlight a different type of key destination, illustrating where these destinations are most concentrated, easiest to access, and most challenging to reach by walking or rolling.

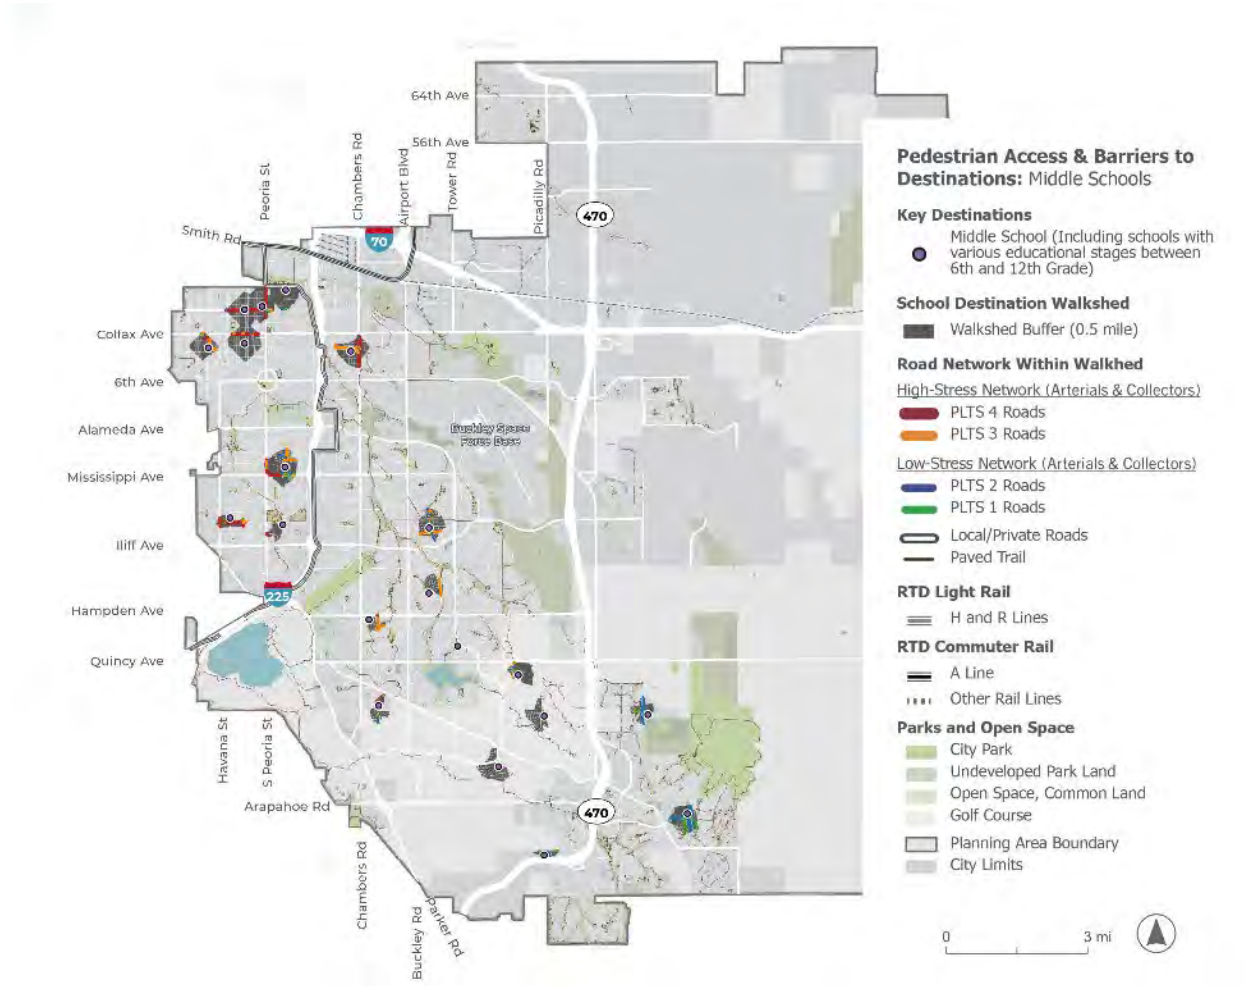


Figure 7-9 through Figure 7-11 show pedestrian access and barriers to pre-K-12 schools in Aurora . Pedestrian facilities in the walksheds around schools in northwest Aurora are primarily high-stress, with more low-stress pathways moving east and south. The prevalence of low-stress streets surrounding schools in southeast Aurora suggests students in the south and east can more comfortably access their schools than students attending schools in northwest and central Aurora.

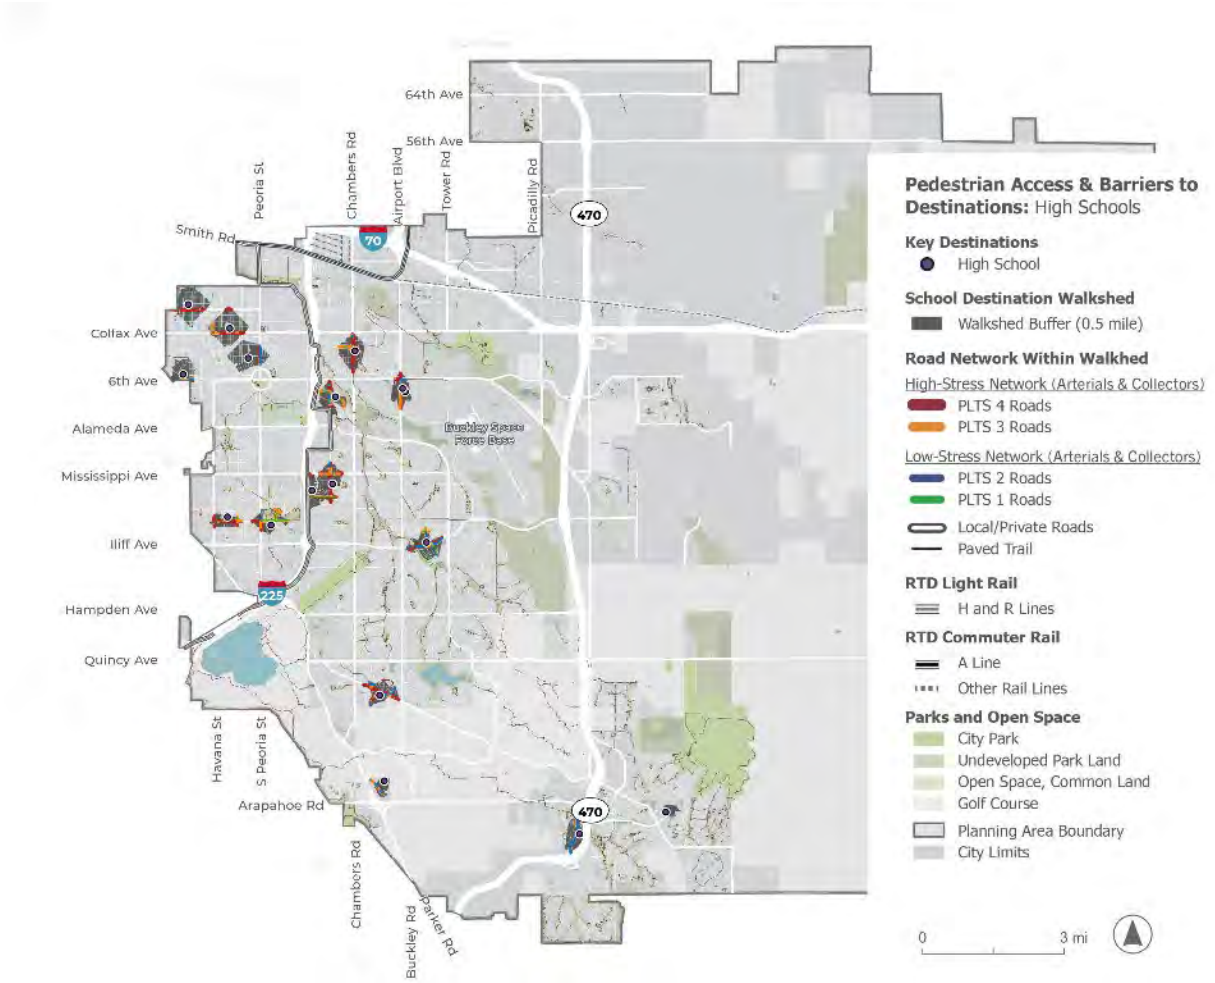
Figure 7-9. Pedestrian Access and Barriers to Elementary Schools



Source: City of Aurora, 2024

Figure 7-10. Pedestrian Access and Barriers to Middle Schools

Source: City of Aurora, 2024

Figure 7-11. Pedestrian Access and Barriers to High Schools

Source: City of Aurora, 2024

Figure 7-12 and Figure 7-13 provide a closer look at conditions in and around three different schools in northwest and east Aurora. Each area features a distinct built environment context: northwest Aurora has a dense grid network divided by multiple barriers, including major highways and rail lines, while east Aurora features a more suburban, hierarchical road network with trails that support access to key destinations. Despite each area's differences, they both have common conditions and challenges that broadly impact walking access to destinations. Using Aurora High School, Mrachek Middle School, and Rangeview High School as examples, each map shows a school surrounded by high-stress roads, which present barriers for students who might walk or roll to school.

Aurora Central High School, situated directly west of Peoria Street (near I-225) and south of Colfax Avenue, is fairly challenging to access, especially from the west within the walkshed, due to the absence of connecting paved trails and the presence of LTS 3 and 4 pedestrian segments and crossings. Although not included in Aurora Central High School's walkshed, directly to the north and south Aurora Central High School is bounded by Del Mar Parkway and Colfax Avenue, high-stress pedestrian segments which pose additional challenges to connectivity. Even in the east, around Mrachek Middle School and Rangeview High School, which provide better pedestrian connectivity and more trail access, students west of these schools would need to walk along high-stress sidewalks.

Figure 7-12. Pedestrian Access and Barriers to Schools Inset (Aurora Central High School)

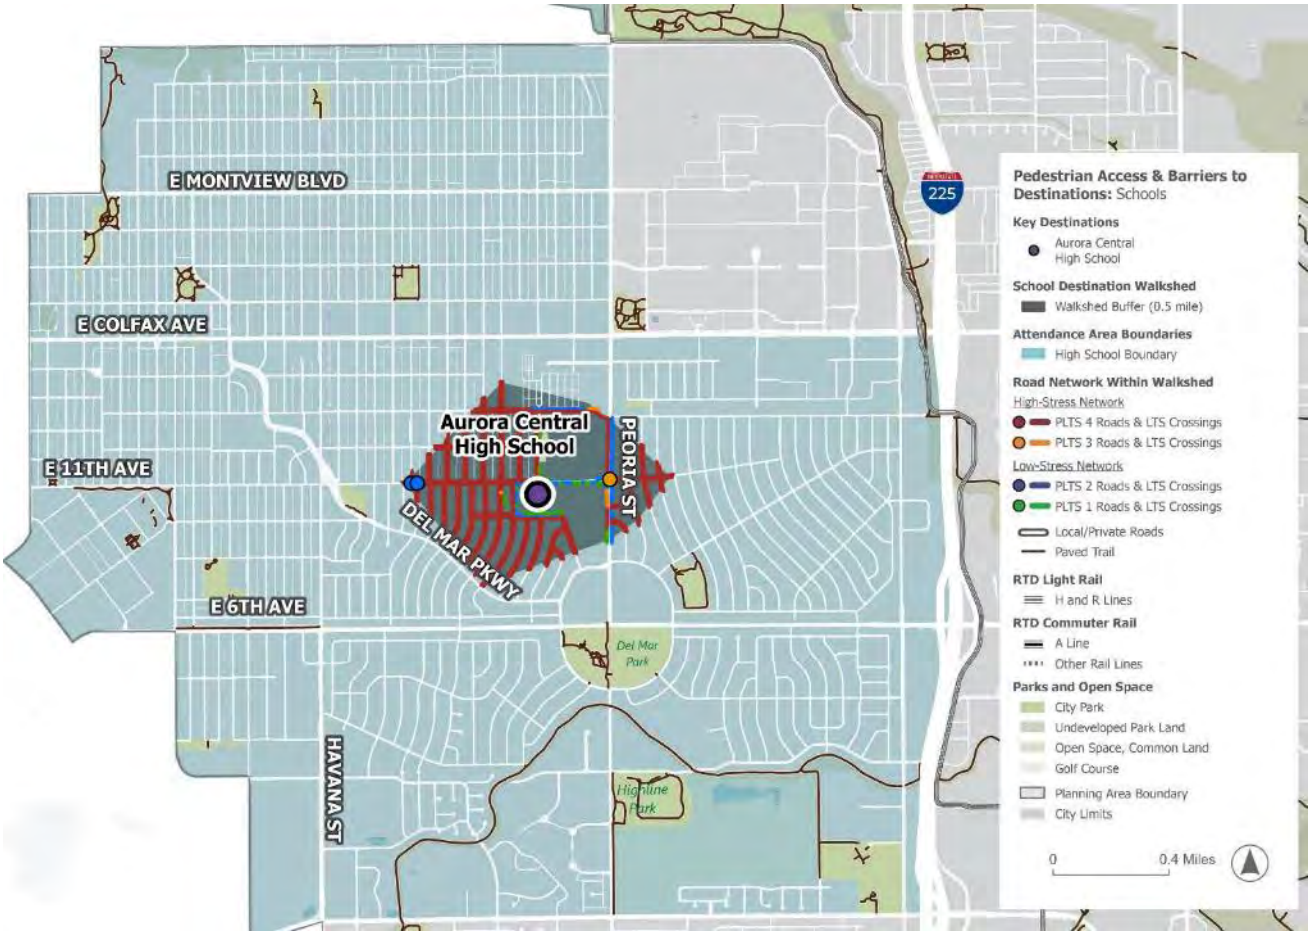


Figure 7-13. Pedestrian Access and Barriers to Schools Inset (Mrachek Middle School and Rangeview High School)

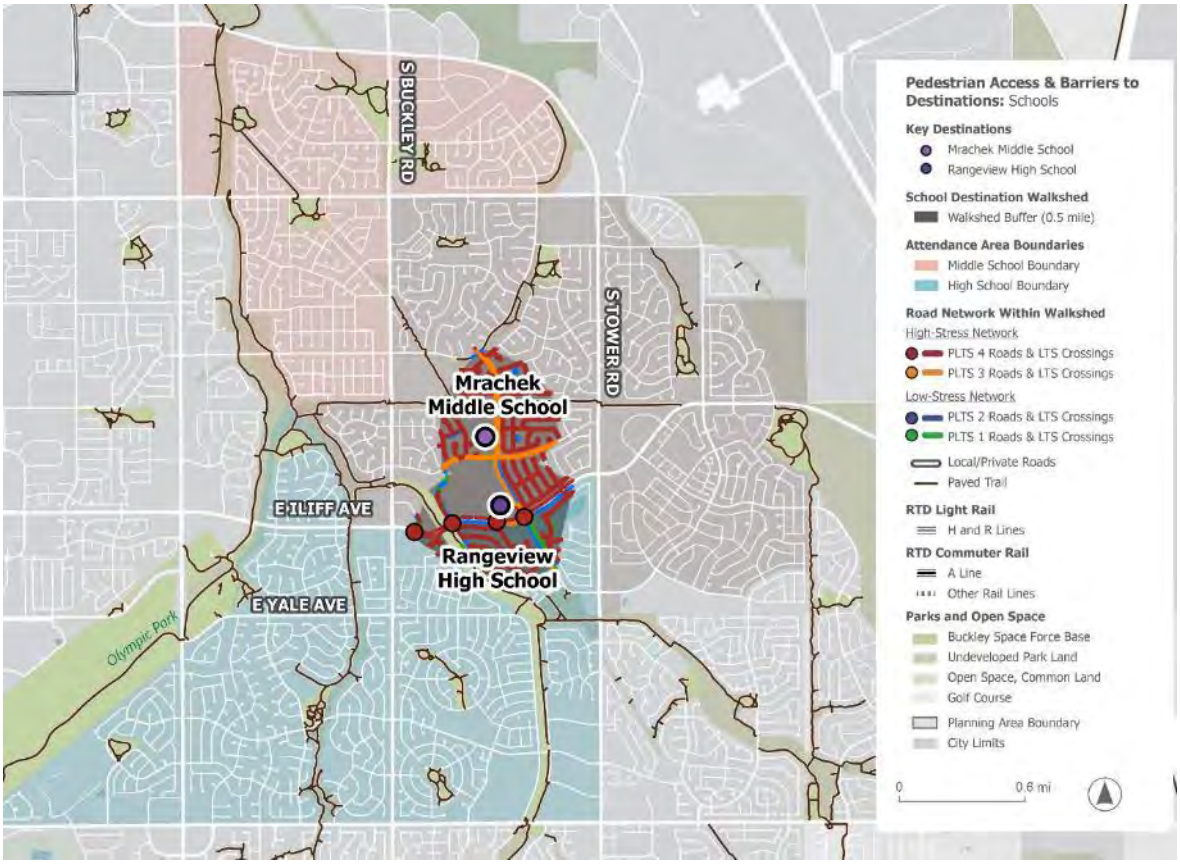

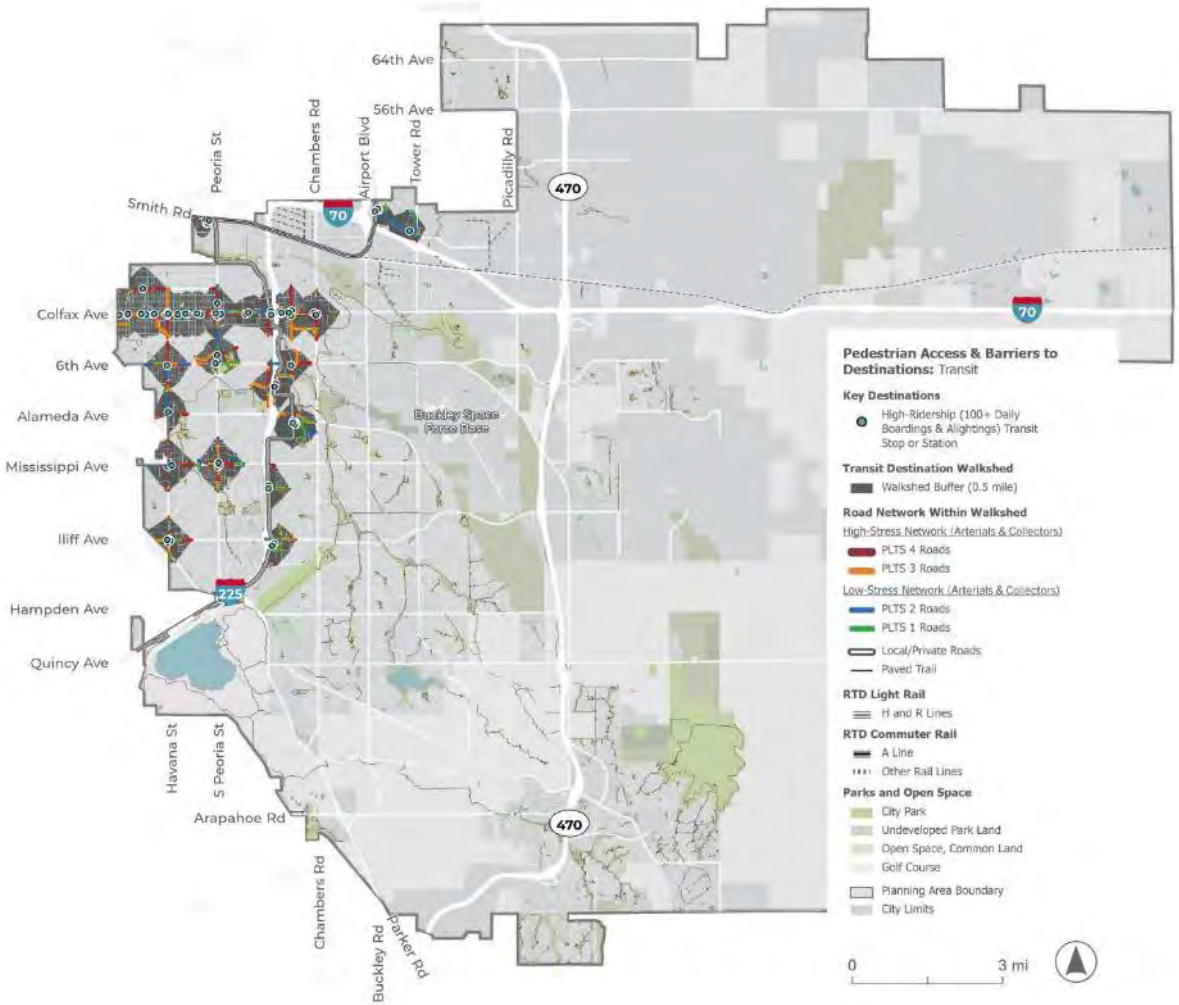

Figure 7-14 shows pedestrian LTS scores on roads surrounding high-ridership light rail stations and bus stops in Aurora. These transit hubs are predominantly along Colfax Avenue, the H and R light rail lines, and at transfer locations in the western portion of the city. Most of these stops and stations are completely surrounded by high-stress pathways, illustrating significant barriers to access for people walking to and from the bus or train.

Figure 7-15 presents community, county, and regional parks in Aurora. Most local and regional parks in central Aurora are surrounded by high-stress pedestrian routes. However, better access to higher-comfort routes is found near regional parks and open space, particularly north of Buckley Space Force Base and south of Quincy Ave, where there are larger concentrations of trails.

Figure 7-16 presents cultural and recreation destinations in Aurora. While high-stress routes are prevalent surrounding cultural and recreation destinations in the northwest, more low-stress access points can be found to the east and south.

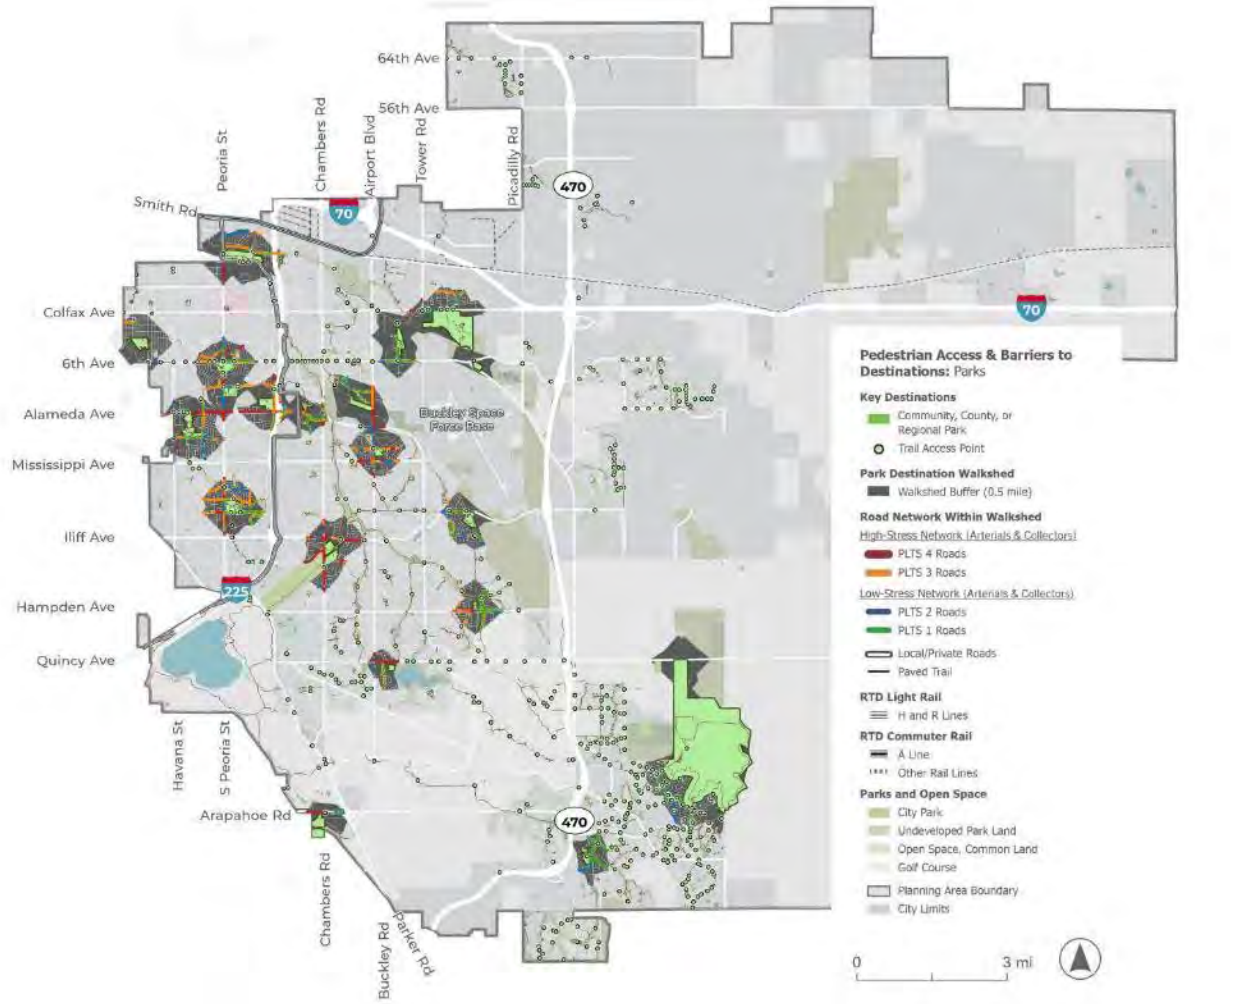

Figure 7-17 presents chain and locally owned grocery stores in Aurora. Grocery stores are scattered across the city with a high concentration of grocery stores situated on the western edge of Aurora. Grocery stores in Aurora are most often positioned along high-stress roadways and intersections that pose barriers to pedestrian mobility. However, better access to higher-comfort routes is found north and south of Buckley Space Force Base and south of Quincy Avenue.

7.2 Moving by bicycle or other active mode

Short Bicycle Trip Opportunities

Analyzing short trips helps to identify areas with strong opportunities to increase the number and share of trips made by bicycling. Because many people are willing to bike for a longer distance than they are willing to walk, journeys of less than three miles in length are typically considered the most feasible trips to switch to biking or other micromobility devices. The three-mile distance is a common planning-level threshold when considering short trips that people may be willing to complete by bicycle, as it represents an approximately 15-minute trip at a typical bicycling speed in urban areas. As the prevalence and popularity of e-bikes increase, more people with access to e-bikes may choose to travel even longer distances by bicycle for everyday trips on a regular basis. The short bicycle trip analysis considers the same set of key destinations introduced in 7.1.1 Short Trip Opportunities.

Figure 7-18 illustrates key destinations and bicycle facilities (dedicated bicycle lanes and sidewalks 10 feet or wider) within block groups where the shortest trips under 3 miles in length originate and terminate. Many trips people take throughout the city today are of a reasonable biking distance. As shown in Figure 7-18, there are few neighborhoods with high concentrations of destinations that also offer robust networks of dedicated bicycle facilities that support comfortable and safe bicycling for all people.

Figure 7-18. Short Bicycle Trip Opportunities

Source: City of Aurora, 2024; Replica Spring 2024

Bicycle Level of Traffic Stress (LTS)

The Bicycle Level of Traffic Stress (Bicycle LTS) analysis presented in Figure 7-19 illustrates the quality of the bicycling experience throughout Aurora and identifies existing bicycling spines and gaps within the existing bikeway network. The analysis of bicycle LTS evaluates the comfort and safety of traveling as a bicyclist alongside vehicles in mixed traffic and on dedicated on- and off-street bicycle facilities. Bicycle LTS uses the same scoring breakdown introduced in Section 7.1.2. The crossing LTS analysis introduced in Section 7.1.2.1 and Figure 7-8 applies to bicyclists as well as pedestrians, and captures how comfortable or safe it feels to cross a street.

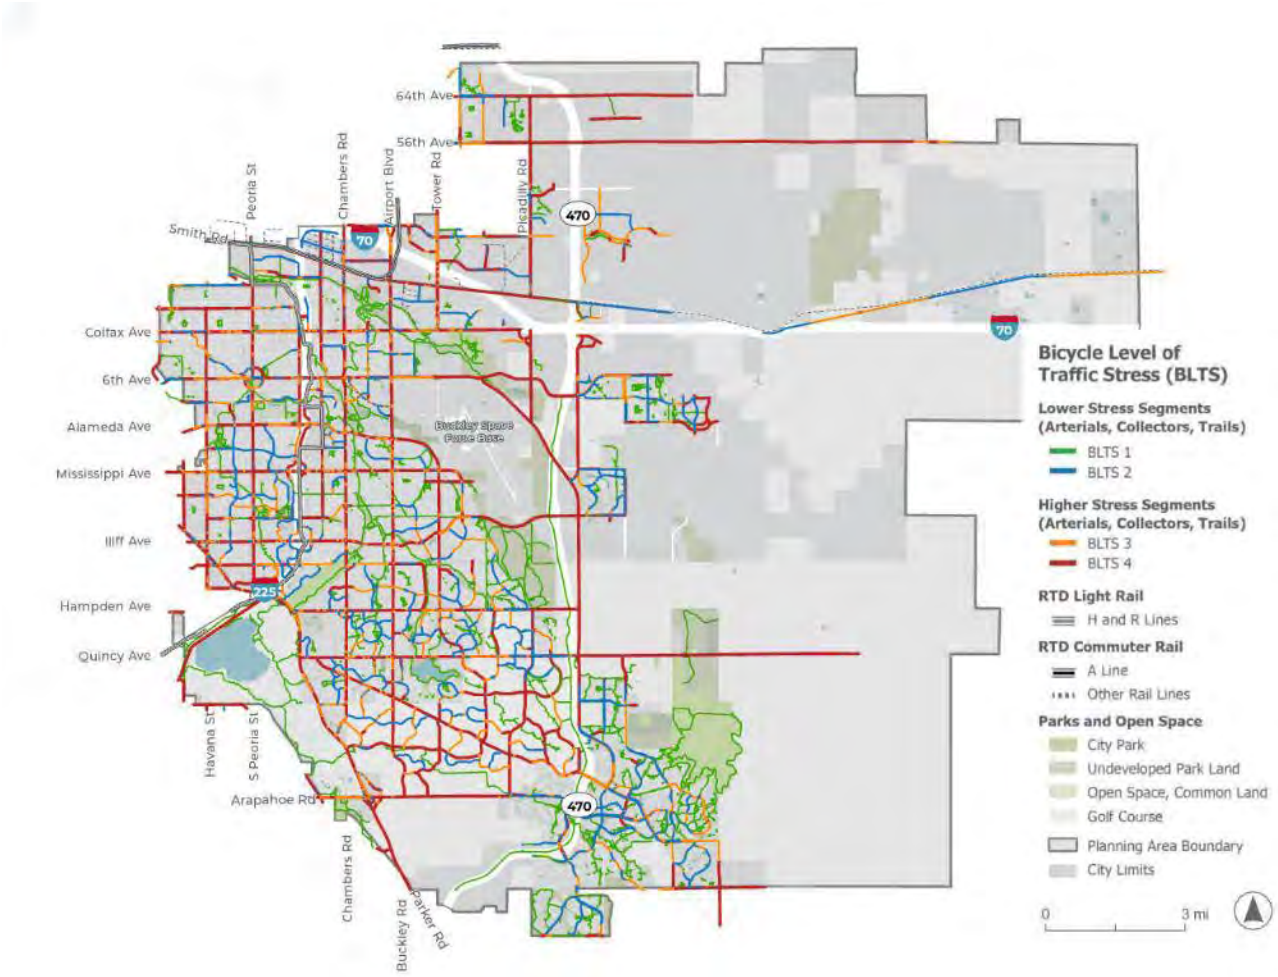

Figure 7-19 illustrates bicycle LTS scores for arterial and collector roads within Aurora. A bikeway's LTS value depends on factors such as the number of lanes, traffic volume, speed, presence of bicycle facilities, parking lanes, and the width of bicycle lanes. In general, bikeways on streets with fewer motor vehicle lanes, lower motor vehicle speeds and volumes, and fewer potential conflicts with parked cars receive lower bicycle LTS scores, because they provide a more comfortable and less stressful bicycling environment. Dedicated bike lanes, wider facilities, striped buffers, and greater separation from traffic also results in a more comfortable experience and lower LTS scores.

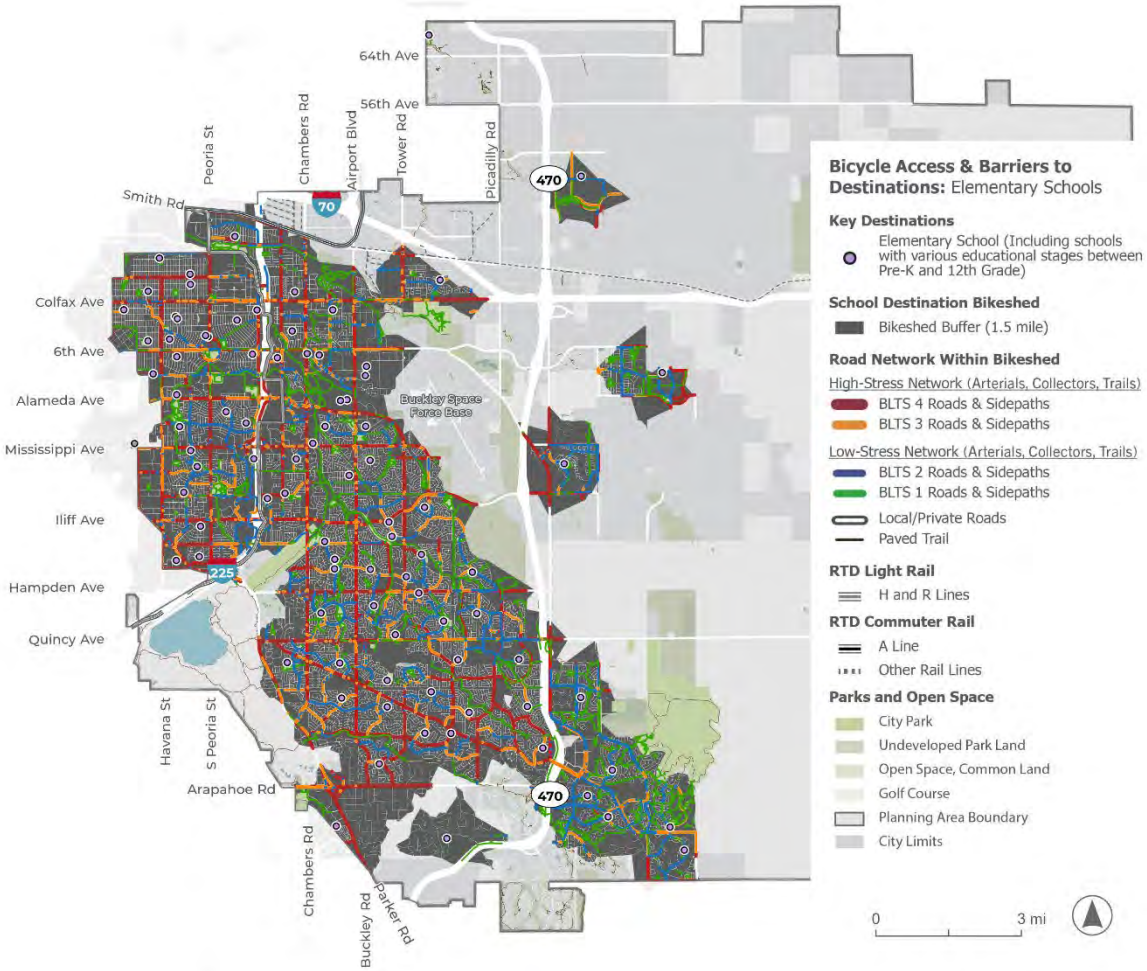
The bicycle LTS analysis includes an analysis of sidepaths, which are wide sidewalks that support bicycling within the right-of-way. The methodology considers the width of the sidepath, the presence and width of a buffer between the sidepath and the roadway, adjacent land uses, transit stops, parking lanes, and the posted speed limit and number of motor vehicle lanes on the adjacent roadway. Trails located outside of the roadway are considered the lowest-stress facilities (LTS 1) because they physically separate people biking from people driving, minimizing potential conflicts with motor vehicles.

In Aurora, arterials and collectors are mostly high stress, unless bicycle infrastructure is present. However, even with bicycle infrastructure, many roads in Aurora remain high-stress due to higher motor vehicle speeds and limited separation from traffic, such as on Montview Boulevard in northwest Aurora. LTS 1 and 2 segments predominantly consist of local streets in central and south Aurora, apart from Smith Road east of E-470, which has some LTS 2 segments. LTS 3 segments are less frequent in Aurora, with most LTS 3 segments south of Hampden Avenue. LTS 4 segments are not secluded to certain areas but spread across the city. Every major road received a score of bicycle LTS 4. Although not included in this analysis, local roads typically have lower speeds, lower volumes of traffic, and therefore lower LTS, except at crossings. Paved trails offer low-stress spines and generally exist in Aurora east of I-225.

The Crossing LTS scores illustrated in Figure 134 also influence bicyclists. LTS 3 and 4 crossings are common along collectors and arterials, including at signalized intersections, and these high-stress crossings significantly impact the citywide bicycle network. Often, people biking along local streets or dedicated bicycle facilities encounter high-stress crossings where these corridors meet major roads. Therefore, while local and residential streets, as well as the city's investments in bike lanes, may offer a comfortable environment for bicycling short distances, these corridors rarely provide continuous, low-stress access to key destinations or between neighborhoods. The challenges associated with crossing arterials and collectors by bicycle effectively create "low-stress islands" within neighborhoods—pockets of low-volume streets that are pleasant for bicycling but that are bound on all sides and cut off from one another by faster, higher-volume corridors with limited safe crossing opportunities.

Figure 7-19. Bicycle Level of Traffic Stress (BLTS)

Sidepaths included in the LTS analysis are at least 8 feet wide and separated from the adjacent roadway by at least 2 feet. Although it is legal for bicyclists to ride on sidewalks throughout Aurora, sidewalks that do not meet these criteria make it challenging for bicyclists and pedestrians to comfortably share space and do not meet minimum standards for shared use paths, and therefore, are not included in this map.



7.3 Bicycle Access & Barriers to Key Destinations

The bicycle LTS and crossing LTS results help to evaluate the quality of Aurora's bikeway network around key destinations. Figure 7-20 through Figure 7-28 show bikesheds within 1.5 miles of different types of destinations. The bikesheds represent the areas that are potentially reachable by bicycle using the existing street and trail networks. 1.5 miles is a practical and manageable bicycling distance for most people, taking about 5 to 10 minutes for an average bicyclist, making it ideal for assessing bicycle access to key destinations, but too far for most people to consider walking.

Within the bikesheds, the maps differentiate between high-stress (bicycle LTS 3 and 4) and low-stress (bicycle LTS 1 and 2) bicycle facilities to identify parts of the network that may impede or facilitate cycling. Similar to Section 7.1.3, each figure on the following pages highlights a different type of key destination, illustrating where these destinations are most concentrated, easiest to access, and most challenging to reach by bicycle.

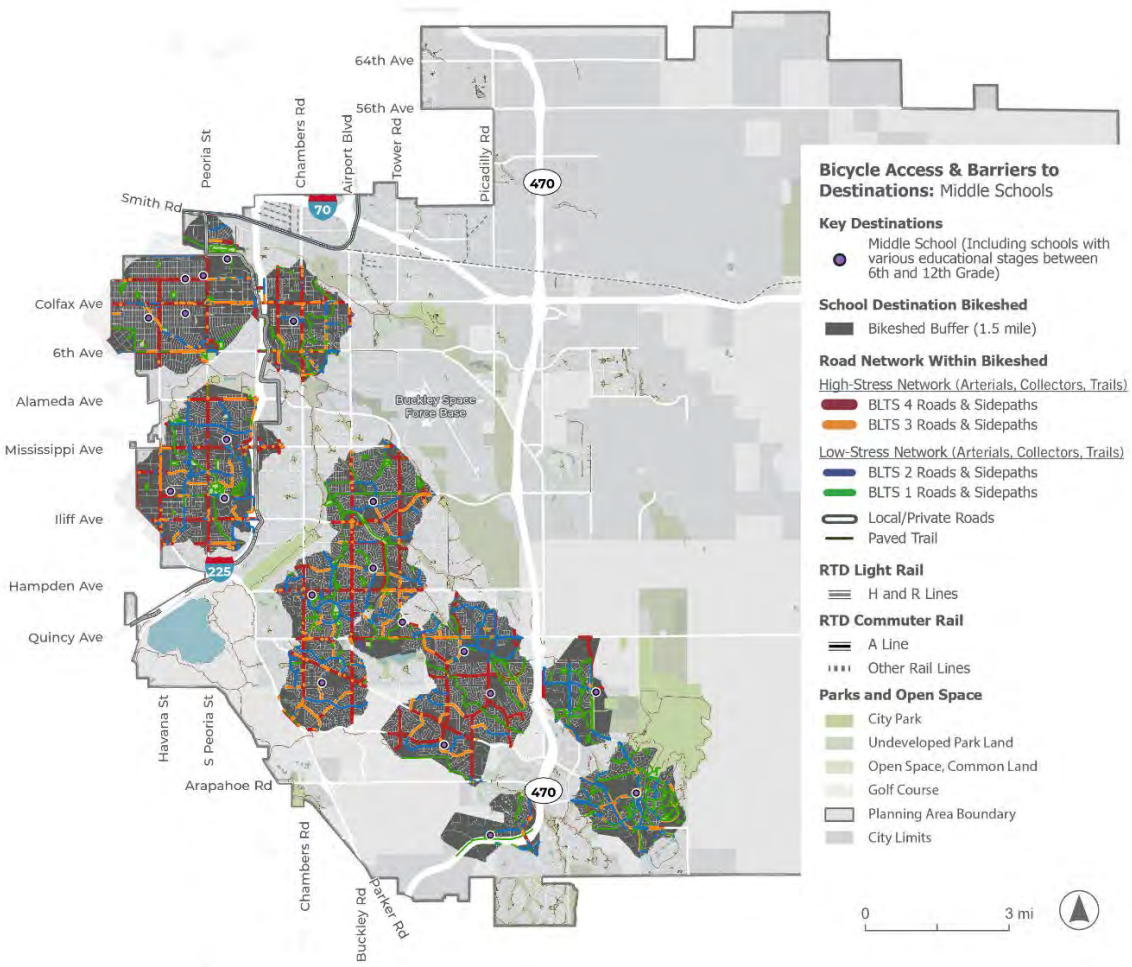


Figure 7-20 through Figure 7-22 presents school locations in Aurora. The bikesheds indicate that schools are typically within reasonable biking distances of most neighborhoods, and the presence of low-stress facilities like trails suggests biking to school may be a safe and attractive option in many neighborhoods east of I-225. However, the prevalence of high-stress arterials throughout Aurora suggests that accessing schools by bicycle may be unsafe and uncomfortable, especially for younger students who must ride along or cross a major roadway to reach their school.

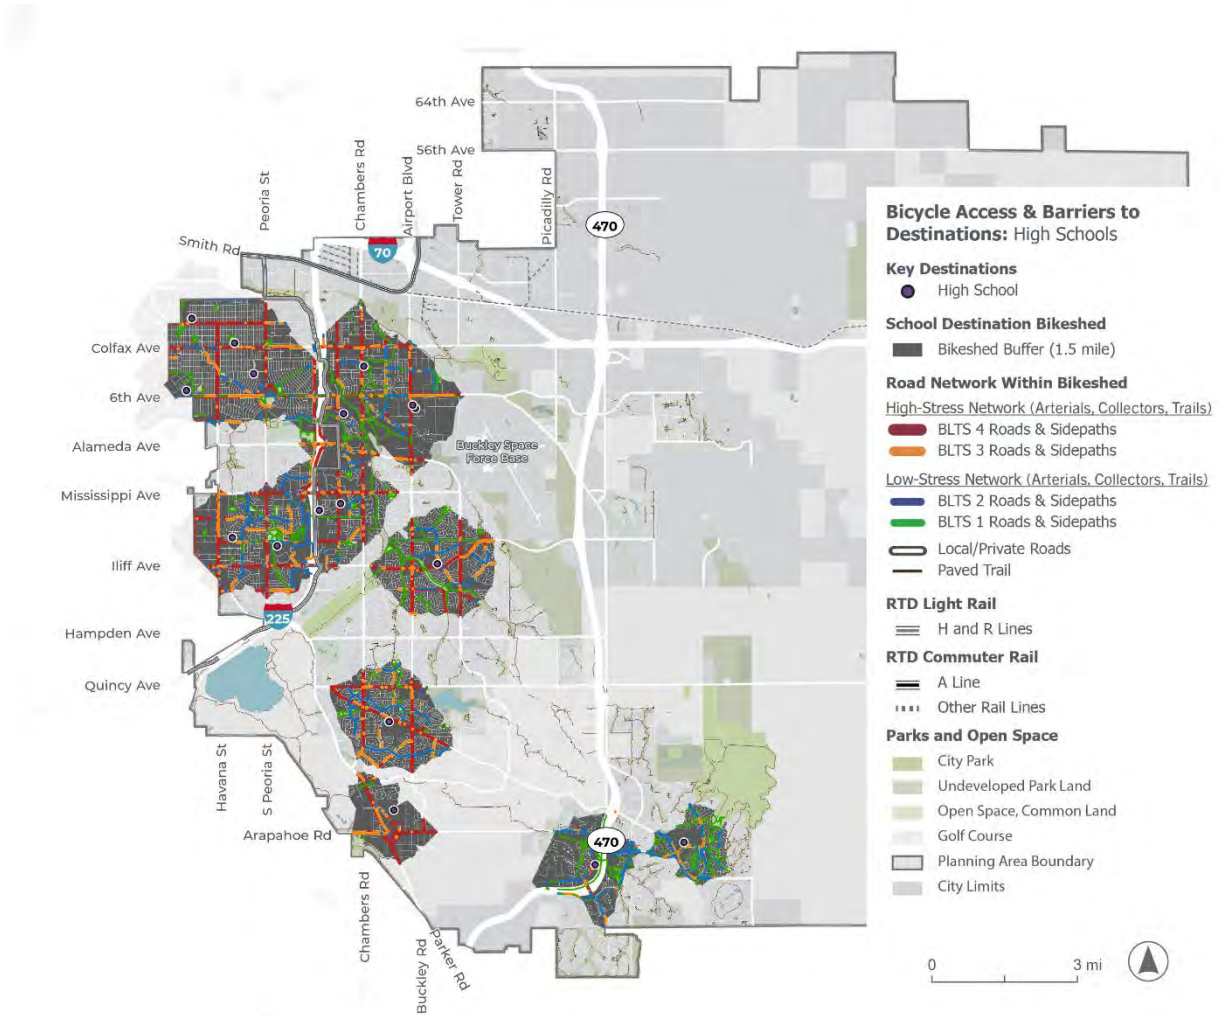
Figure 7-20. Bicycle Access & Barriers to Elementary Schools



Source: City of Aurora, 2024

Figure 7-21. Bicycle Access & Barriers to Middle Schools

Source: City of Aurora, 2024

Figure 7-22. Bicycle Access & Barriers to High Schools

Source: City of Aurora, 2024

Figure 7-23 and Figure 7-24 provide a closer look at conditions in northwest and southeast Aurora. Although Aurora Central High School, Mrachek Middle School, and Rangeview High School are located in areas with distinct built environments and surrounding roadway contexts, students biking to and from these schools face similar infrastructure challenges. Notably, the bikeshed around Aurora Central High School shows a high concentration of high-stress roads immediately surrounding the school along E Colfax Avenue, Havana Street, 6th Avenue, and Peoria Street, but with more comfortable cycling segments on Del Mar Parkway.

Bikesheds surrounding Mrachek Middle School and Rangview High School to the east, despite having similar challenges, feature a slightly better integration of safer, low-stress roads. The variation in road stress levels suggests a disparity in bicycling conditions near schools across the city.

Figure 7-23. Bicycle Access and Barriers to Schools Inset (Aurora Central High School)

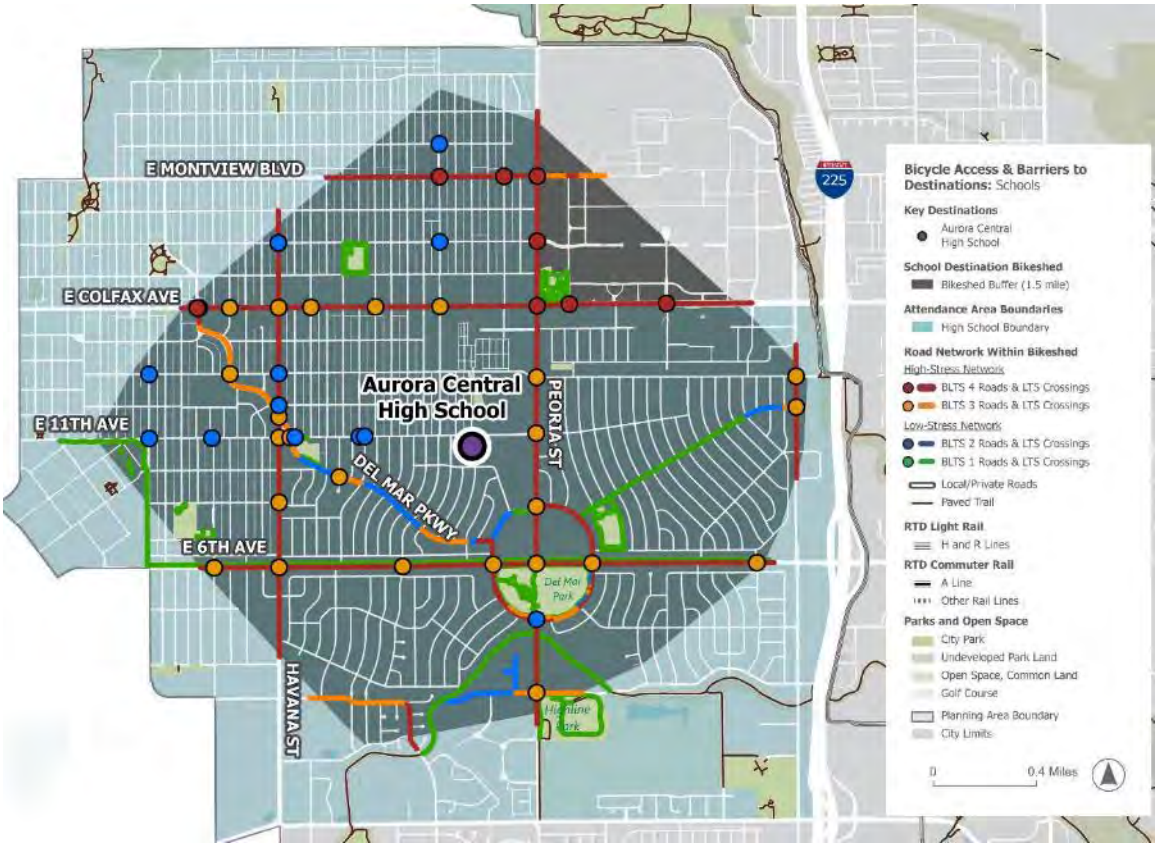


Figure 7-24. Bicycle Access and Barriers to Schools Inset (Mrachek Middle School and Rangeview High School)

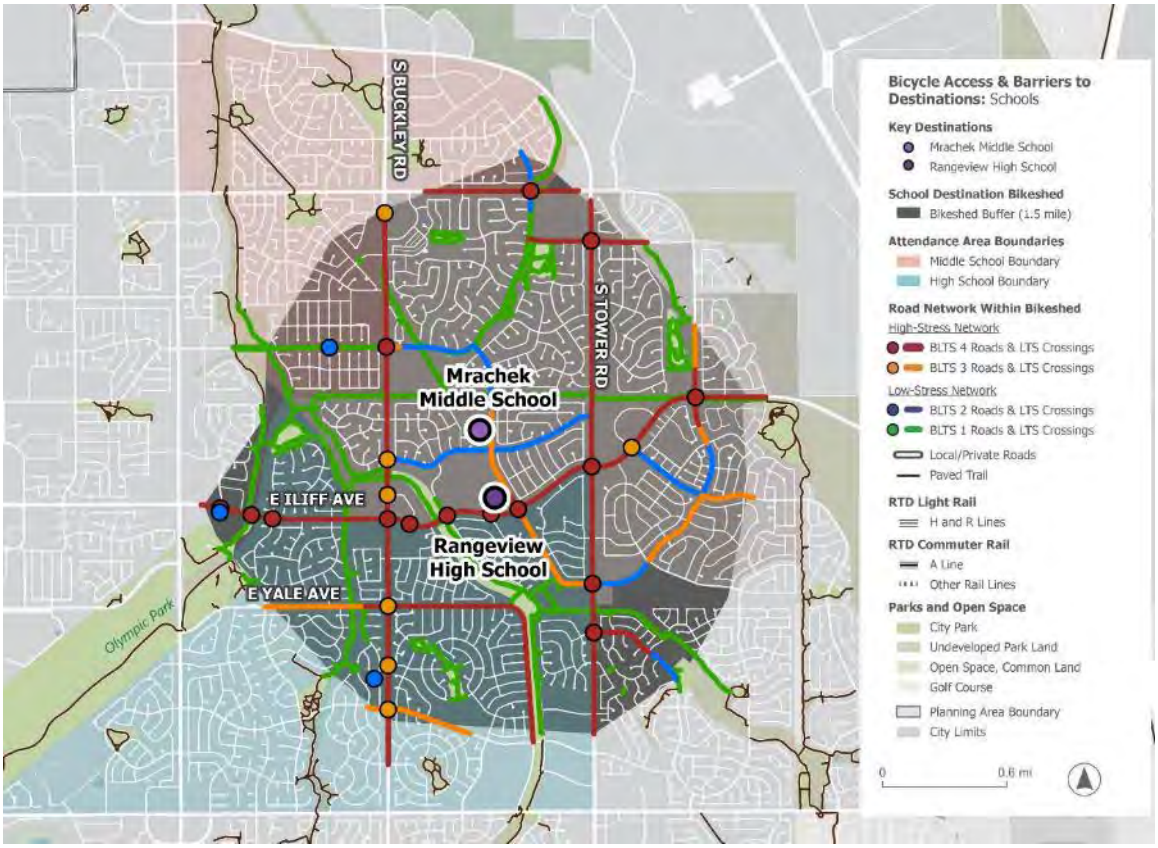

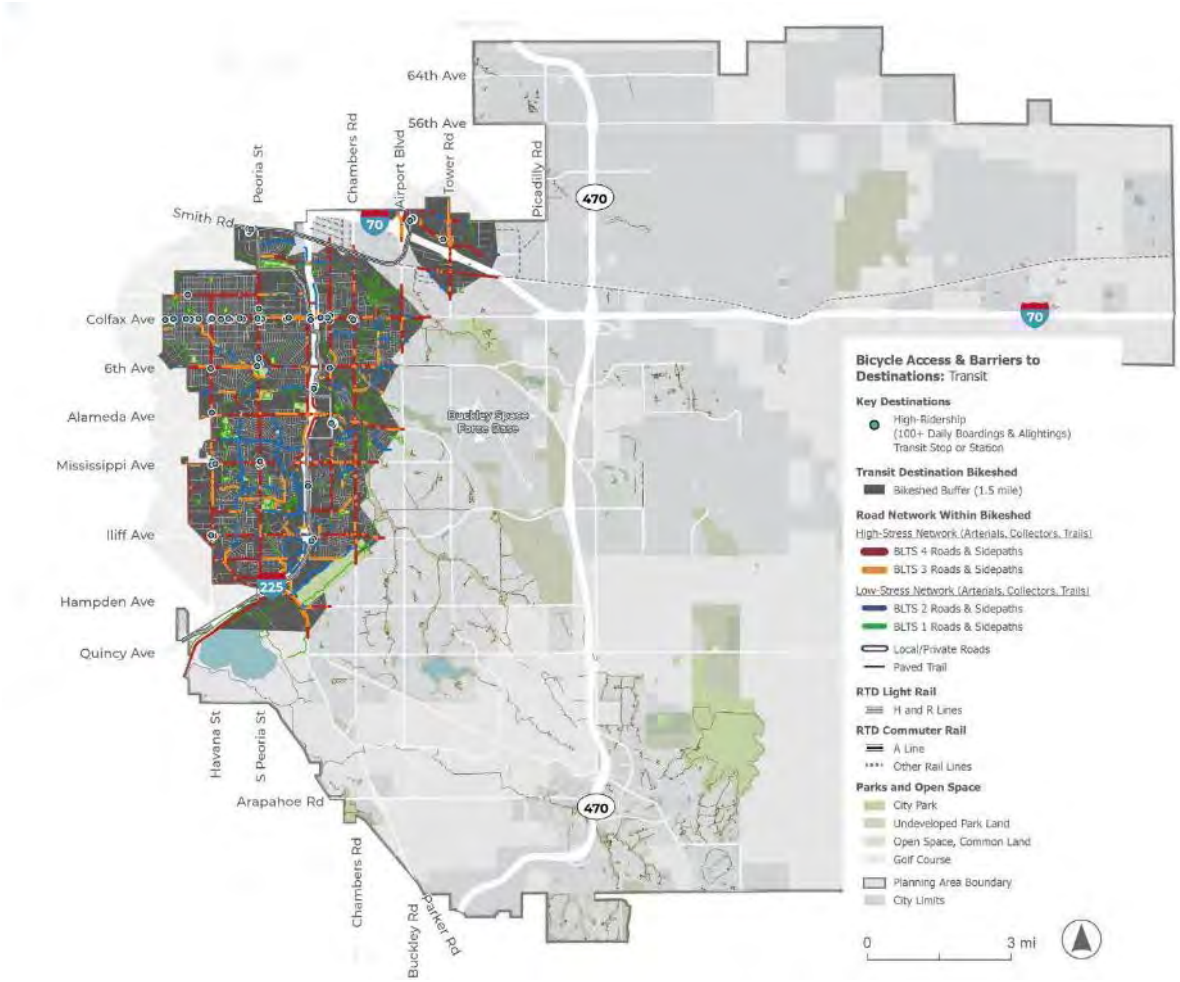

Figure 7-25 presents high-ridership light rail stations and bus stops in Aurora, which are predominantly found in the northern and western parts of the city. High-quality bicycle infrastructure coupled with strong bicycle amenities can dramatically expand access to transit.

There is a mixed distribution of high- and low-stress routes in the bicycle networks surrounding transit stops and stations. Higher-stress roads are prevalent around these key transit access points, which suggests significant barriers to safe and comfortable bicycling access. This pattern may deter less confident or casual bicyclists from riding their bikes to reach transit facilities. There are segments of lower stress streets and trails, such as segments parallel to Mississippi Avenue, Alameda Avenue, and Iliff Avenue, which indicate areas where bicycling infrastructure is likely more supportive and safe. However, the predominance of higher-stress streets in the street networks around transit stops suggests that improvements are needed to make cycling a more viable and appealing option for accessing public transportation.

Figure 7-25. Bicycle Access & Barriers to Transit (RTD, 2023)

Source: RTD, 2023

Figure 7-26 presents recreation spaces and local and regional parks in Aurora. The bikesheds cover most of Aurora west of E-470 or south of Airline Road, indicating that most residents live within 1.5 miles of at least one community, county, or regional park.

Connectivity in the street networks around parks appears to be a mix of high-stress and low-stress, with significant portions of high-stress roads, particularly along major arterial and collector roads. These high-stress roads are prominent in certain areas, creating barriers for bicyclists seeking to access parks, particularly in northern and central Aurora. However, there are also low-stress routes, local roads, and paved trails, which offer safer and more accessible options for bicyclists. These low-stress routes are more frequent around the periphery and in some pockets within the central and southern areas. The presence of both high-stress and low-stress networks suggests that while there are pathways for safer and more comfortable bicycling experiences, the high-stress routes pose significant barriers to accessing parks.

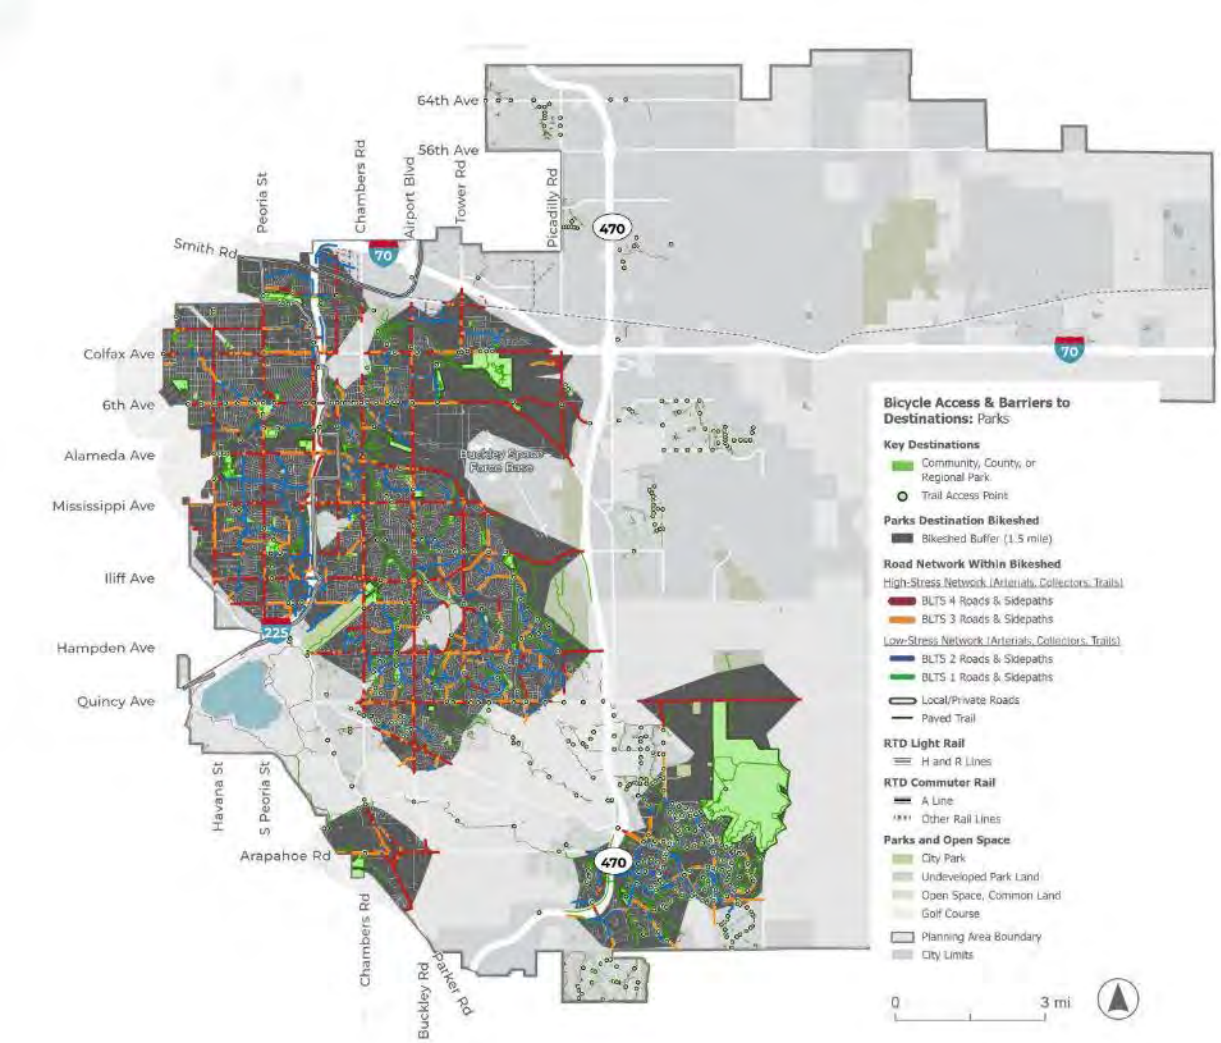

Figure 7-27 presents cultural and community destinations in Aurora. While these destinations are found predominantly in the northern and central neighborhoods of the city, additional bikesheds are in southeastern Aurora and north of Buckley Space Force Base.

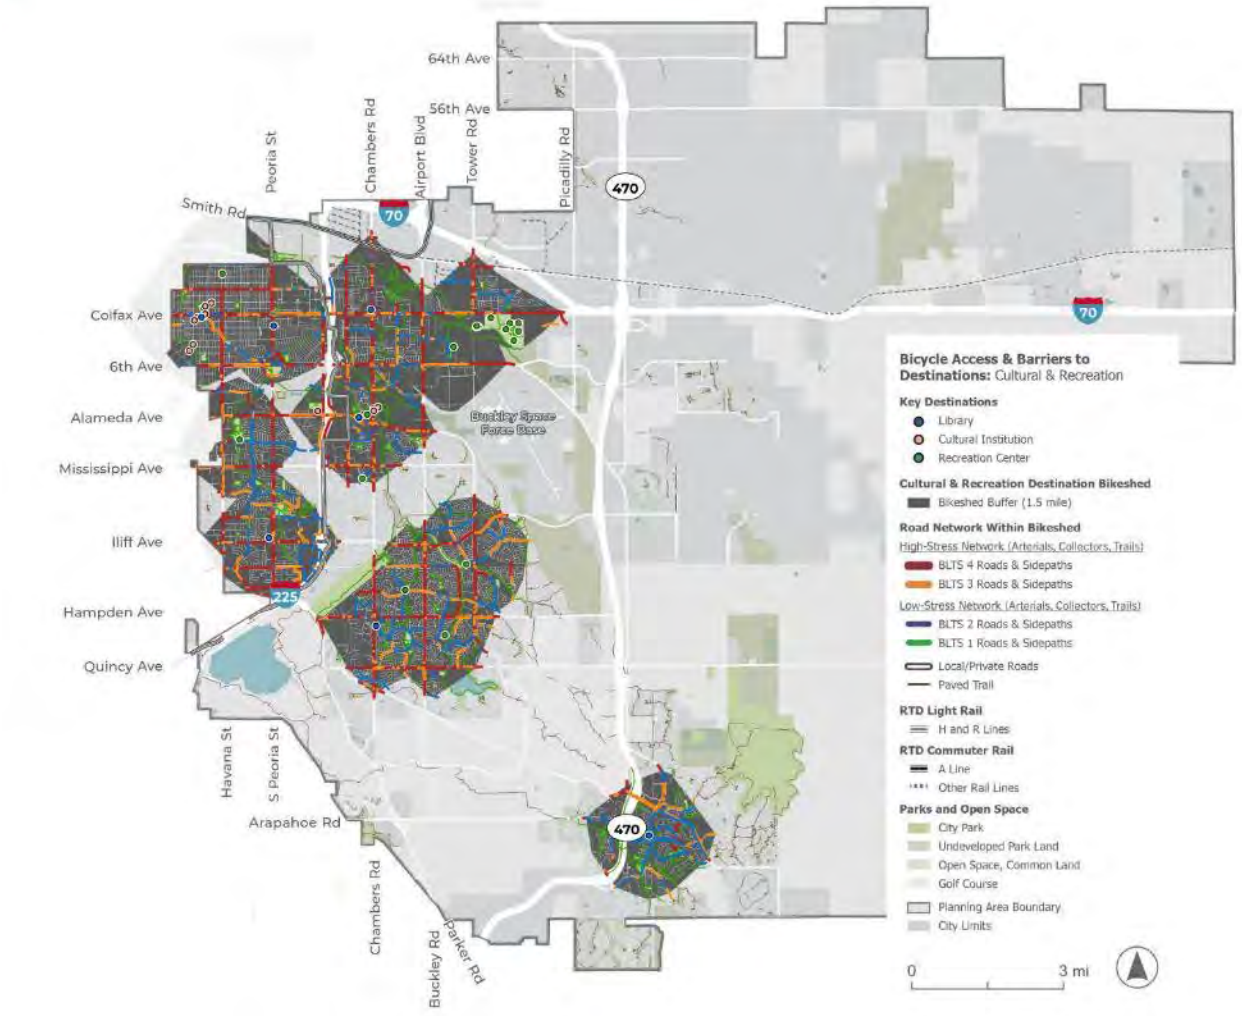
Most cultural and recreation centers in Aurora are situated near high-stress major arterials and collectors. Recreation centers seemingly offer the lowest-stress bicycling access. However, these recreation centers are most often located in parks which also provide generally better connections to paved trails. Overall, there is a mixed presence of high- and low-stress networks around cultural and recreation destinations, illustrating that while some routes to these destinations are relatively safe and accessible for bicyclists, many others pose considerable challenges.

Figure 7-28 presents chain and locally owned grocery stores in Aurora. The bikesheds cover nearly all of Aurora, indicating that most residents live within 1.5 miles of at least one grocery store., with the exception of residents just west of Buckley Space Force Base, east of E-470, and southwest of Arapahoe Road.



Grocery stores in Aurora are most often situated along LTS 3 and 4 major roadways and intersections. However, many grocery store location have direct or nearby access to low-stress paved trail routes, especially in areas east on I-225. There are far fewer opportunities east of I-225, especially along the western barrier of the city for bicyclists to access low stress routes, suggesting the importance of increasing the number of opportunities for bicyclist access to LTS 1 and 2 roadways and trails.

8 Moving Around Aurora

This section describes how people travel to, from, and within Aurora and how those travel patterns vary by mode and socioeconomic factors. The analysis relied on several different data sources to build a comprehensive understanding of people's travel behaviors including:

- **Census Bureau's American Community Survey (ACS).** The ACS is an ongoing survey that provides vital information on a yearly basis about our nation and its people.
- **Replica.** Replica is a data platform that offers a synthetically generated representation of the activities and movement of residents and visitors in a metropolitan area for a representative week during a given season. Replica represents movement by combining data from three primary sources: public use population census data, proprietary locational data from telecommunications and other IT infrastructure in the region, and field observations data from customer public agencies (ground truth).
- **Longitudinal Employer-Household Dynamics (LEHD) Origin-Destination Employment Statistics (LODES).** The LEHD program links employer and household data, building a comprehensive database of longitudinally linked jobs data. LODES is a partially synthetic dataset that describes geographic patterns of jobs by their employment locations and residential locations, as well as the connections between the two locations.
- **DRCOG's Focus Travel Demand Model.** The DRCOG travel model, known as Focus, is an activity-based travel model developed for the Denver region. The model incorporates a wide variety of data about the region's people, businesses, transportation systems, and development patterns to create millions of daily trips across the region. The trips are then assigned to roadway and transit networks to produce estimates of traffic volumes, transit ridership, and other measures.

Each of these sources is developed based on different data and using distinct methodologies. Upon analyzing the data from each, our team found alignment between the data sources in some areas, but disagreement in others. This report omits data with significant disagreement between sources in cases where the differences could not easily be understood.

8.1 Regional and Local Movements

Each day, Aurora residents and people across the Denver Metro area make trips for a variety of reasons, traveling to work or school, running errands, visiting destinations, and getting to and from other activities. There are over two million person trips that start, end, or occur within the Aurora city boundaries on an average weekday, representing approximately 16 percent of all trips in the Denver region. However, Aurora's population of approximately 400,000 people represents only 13.5 percent of the region's population.

About 870,000, or 43 percent, of these total trips start and end within Aurora. Only two percent (34,000) of the total trips are between Aurora and a location in Downtown Denver, and one percent (13,000) are people traveling to or from the Denver Tech Center (*2023 Replica data*).

Figure 8-1 depicts the travel desire lines for intra ward trips. Most trips are to Ward I, followed by Ward III. This is consistent with the city's employment patterns. Aurora is divided into six City Council Wards, shown in Figure 8-2, and the analysis also reviewed trip-making characteristics by ward to better understand how movement patterns vary across the city.

Table 8-1 shows the breakdown of average weekday daily trips (year 2023) occurring within the City of Aurora, both within and between the wards. The darker shaded cells in the table indicate a higher number of trips. For all wards, most trips start and end within the same ward. Ward VI has the highest proportion of trips within the ward at 71 percent, whereas Ward III has the lowest at 51 percent. Several distinctions between these wards are likely accountable for these differences—Ward VI is a larger ward and further away from other parts of the city, and residents can access many daily needs within its commercial areas. It also has the lowest number of trips overall. Additionally, as noted in section 3, Aurora residents 18 years and younger and over 65 years travel to and from neighborhoods throughout Aurora, and their trips are especially concentrated in Wards IV and V. These demographic groups are expected to increase, with the most significant increase of persons in the 60- to 84-year-old cohort, demonstrating that the city's population is aging. Therefore, it is reasonable to expect that trips within Ward VI may continue to increase due to these population shifts Ward III is smaller and immediately adjacent to Wards I, II and IV where a number of employment and commercial destinations are located—many trips travel between these wards. Ward III also has the highest number of trips overall.

Table 8-1. Average weekday daily trips (year 2023) within Aurora among City Council Wards

From/To	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Ward I	96,000	13,000	24,000	11,000	6,000	3,000
Ward II	15,000	69,000	19,000	11,000	14,000	10,000
Ward III	23,000	15,000	88,000	28,000	11,000	4,000
Ward IV	11,000	10,000	28,000	85,000	18,000	4,000
Ward V	6,000	11,000	11,000	18,000	84,000	13,000
Ward VI	2,000	6,000	4,000	4,000	14,000	82,000
Total	153,000	124,000	174,000	157,000	147,000	116,000

Source: Replica

Table 8-2 shows the daily average trip length for intra ward travel. The average trip length is typically under 2 miles when traveling within a ward, with Ward II being the outlier at 2.48 miles. This indicates that most intra ward trips could be completed on foot or by bike with infrastructure improvements. The longest trip distances were between Wards I through IV and Ward VI, with most trips over 10 miles.

Table 8-2. Average Trip Length Between Wards (Miles)

From/To	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Ward I	1.08	5.35	3.43	5.92	9.52	15.99
Ward II	5.35	2.48	5.60	6.65	6.26	10.97
Ward III	3.43	5.60	1.28	2.88	6.09	12.76
Ward IV	5.92	6.65	2.88	1.25	3.68	10.84

From/To	Ward I	Ward II	Ward III	Ward IV	Ward V	Ward VI
Ward V	9.52	6.26	6.09	3.68	1.32	5.64
Ward VI	15.99	10.97	12.76	10.84	5.64	2.00

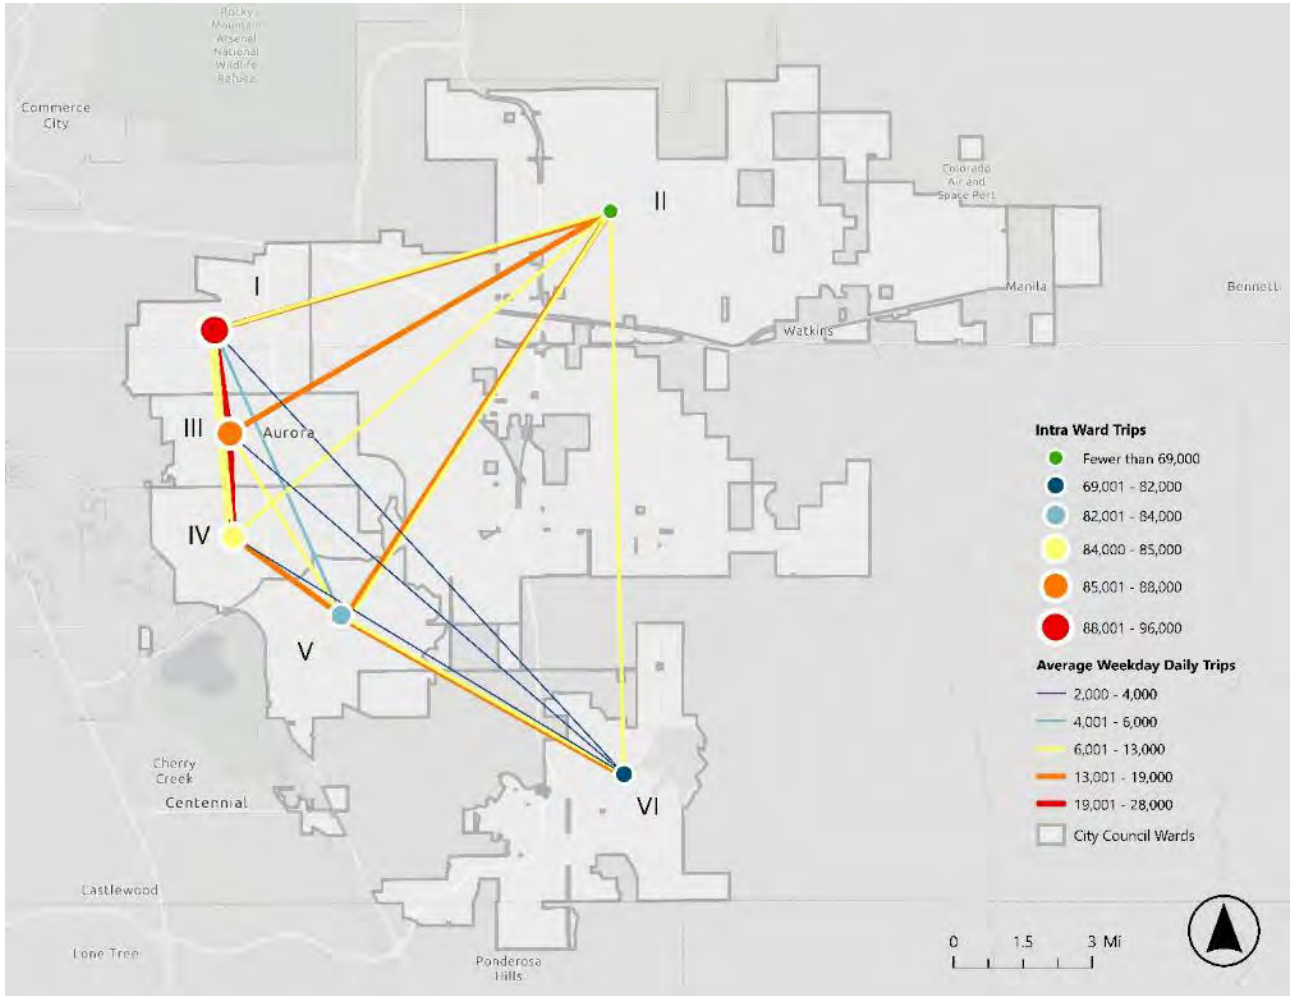
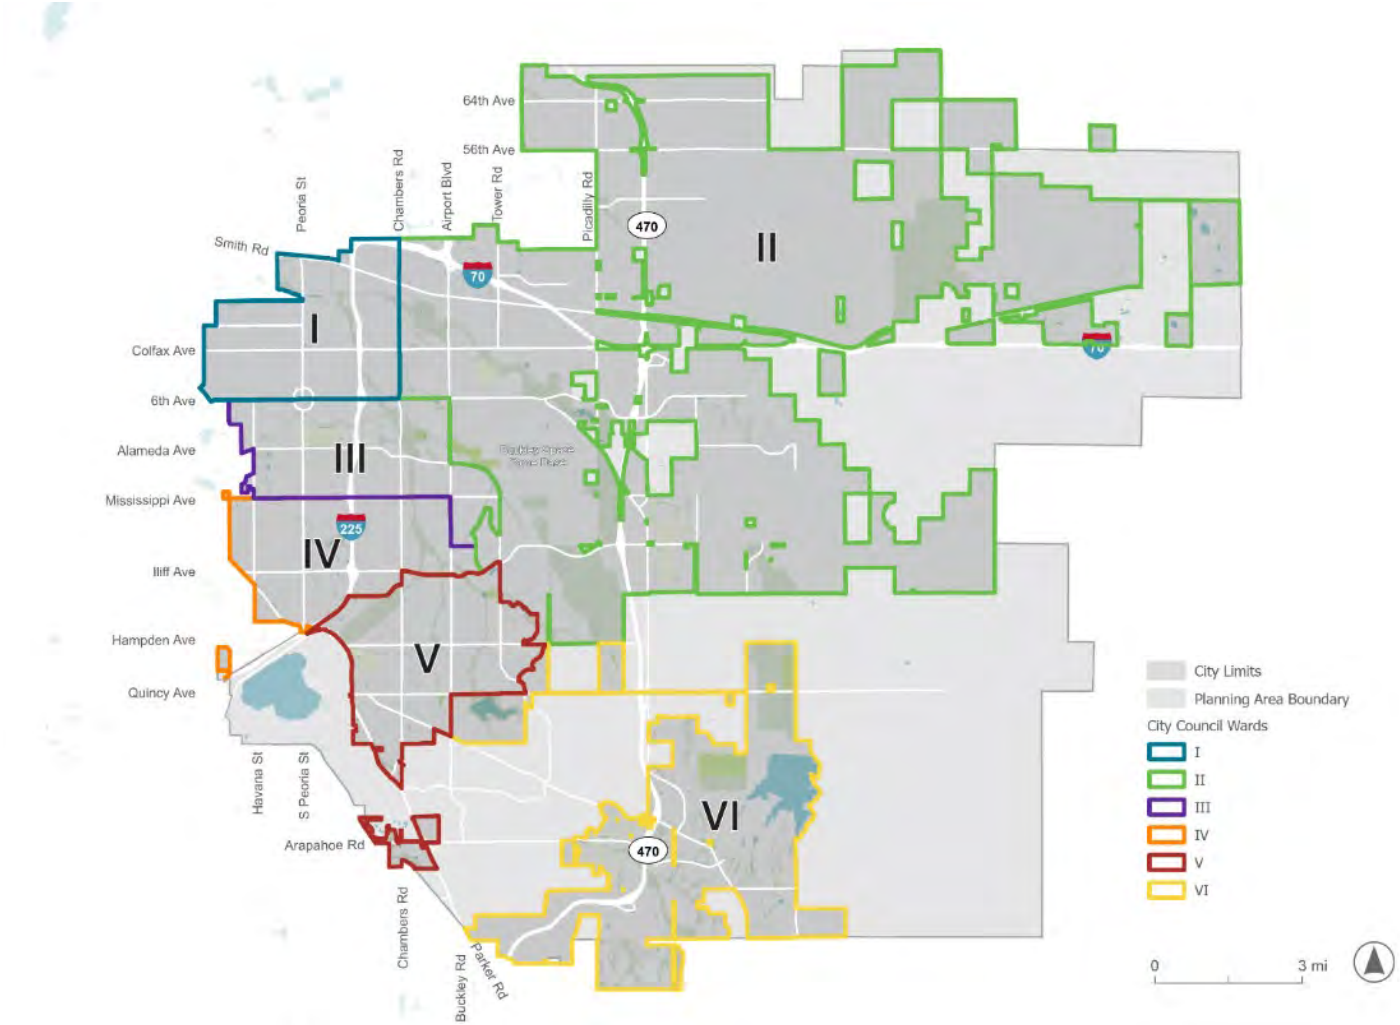
Figure 8-1. Aurora Trip Desire Lines





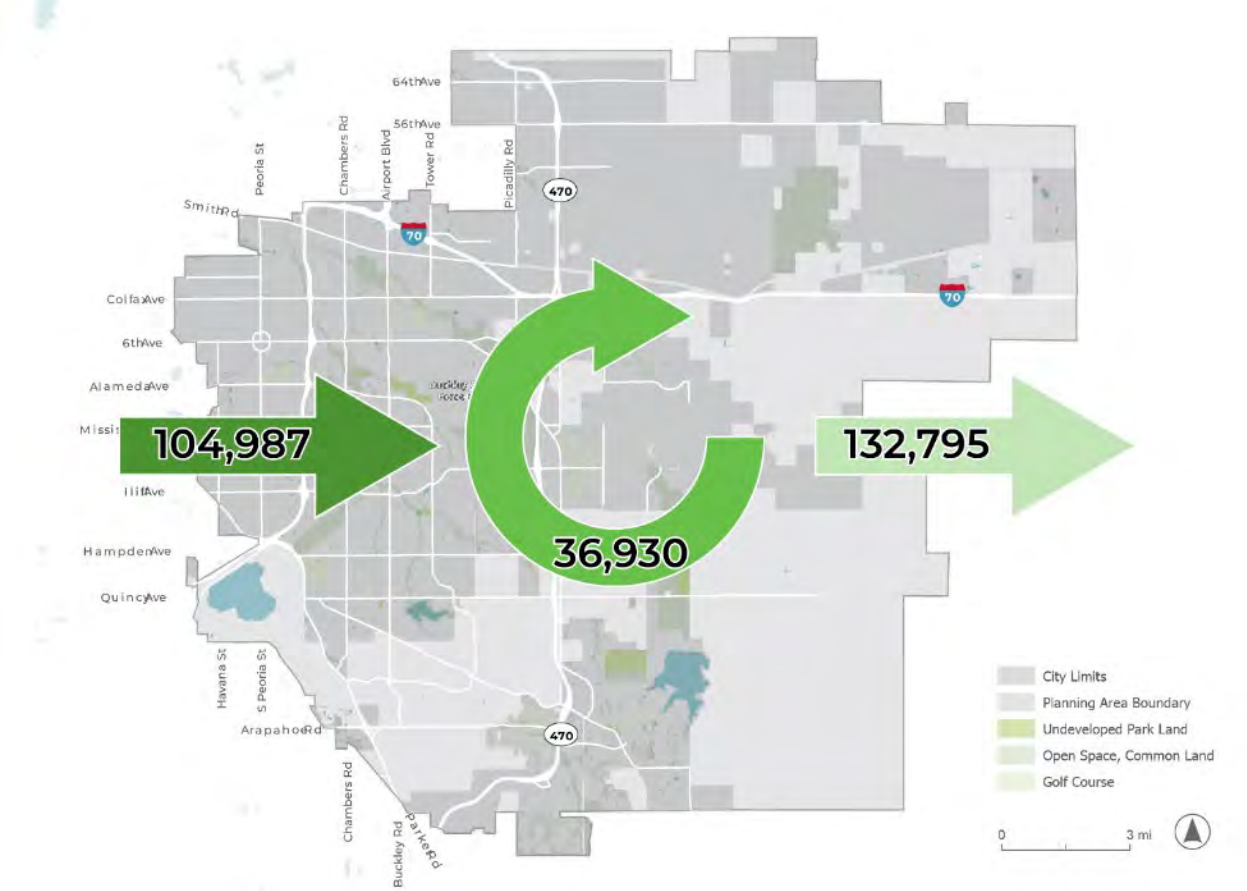


Figure 8-2. City Council Ward Boundaries

Commuter trip patterns in the region indicate that Aurora is a net exporter of workers, similar to other non-central cities in the metro area as demonstrated in Figure 8-3 and Table 8-3. All other Front Range cities in Table 8-3, except for Thornton and Aurora, tend to see more people come to their cities for work than those who leave for work. In the Commuter Trip analysis presented below from US Census Bureau data, the dark green arrows indicate the number of people commuting into a city, medium green indicate the number of people commuting within the city, and the light green indicates the number of people commuting out of the city.

Figure 8-3. Commuter Inflow and Outflow

Source: Longitudinal Employer-Household Dynamics (LEHD) Data, 2020

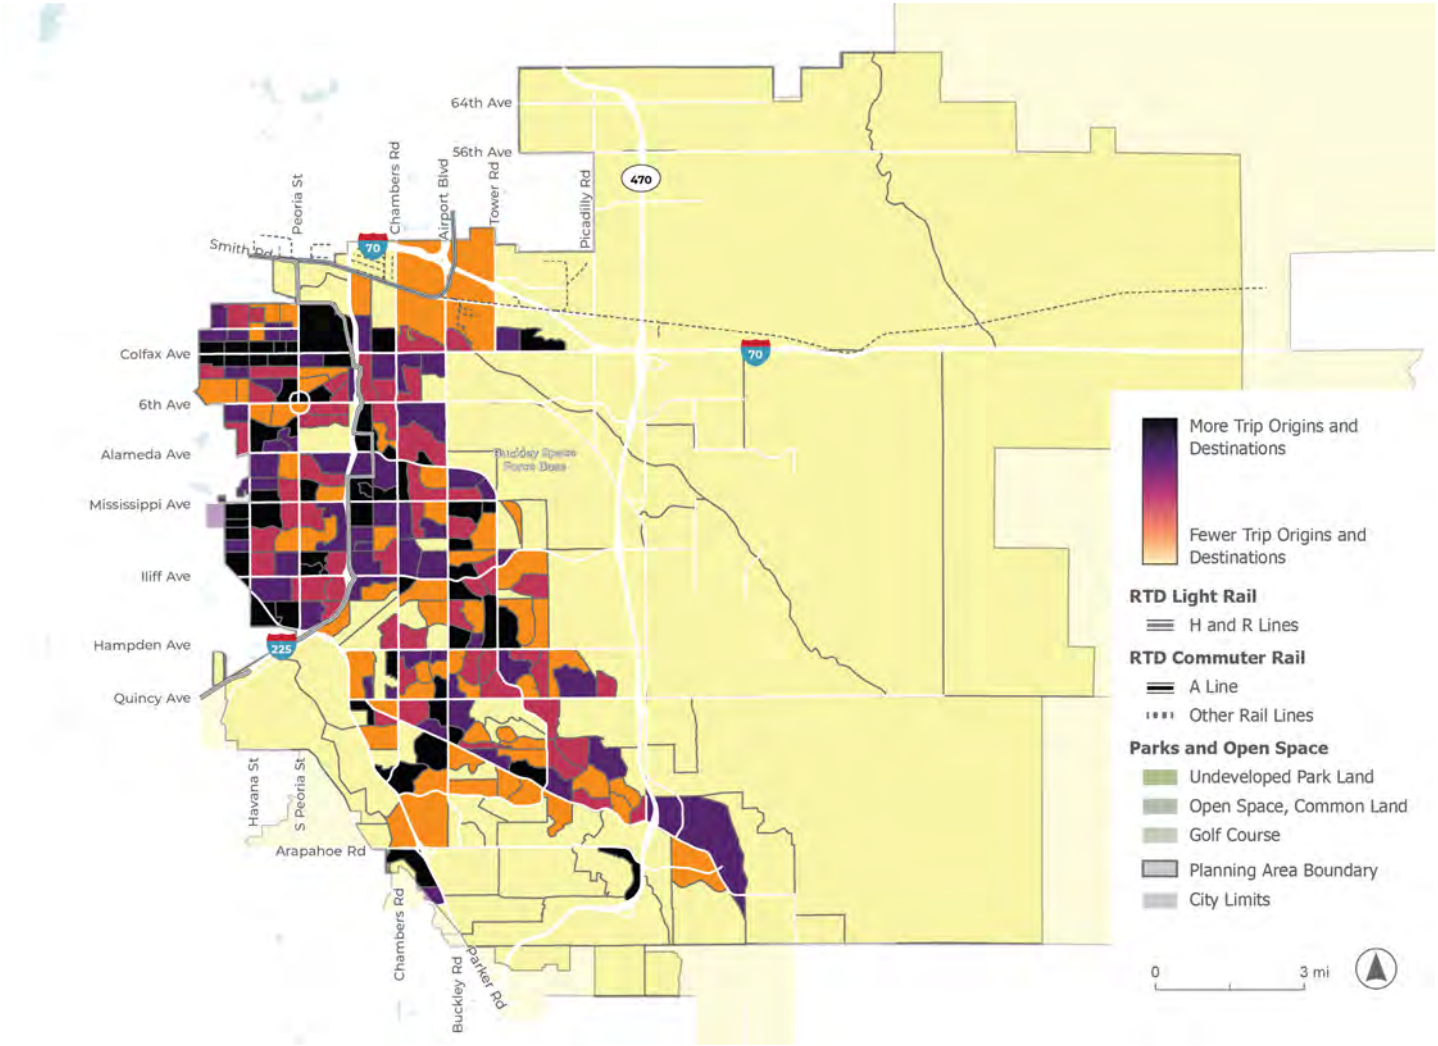
Table 8-3. Commuter flows in Aurora and neighboring cities

	Inflow	Outflow	Within
Aurora	104,987	132,795	36,930
Thornton	25,658	61,348	5,188
Lakewood	79,556	60,922	13,472
Denver	349,112	178,039	151,179
Centennial	64,343	46,568	5,998

Source: Longitudinal Employer-Household Dynamics (LEHD) Data, 2020

Figure 8-4 displays the number of all trip origins and destinations in Aurora for all modes of travel by census tract. Darker colors on the map represent areas with higher concentrations of trip origins and destinations. Neighborhoods and districts with high densities of trips are spread throughout Aurora, with consistently high frequencies of activity in Wards I, III, and IV.

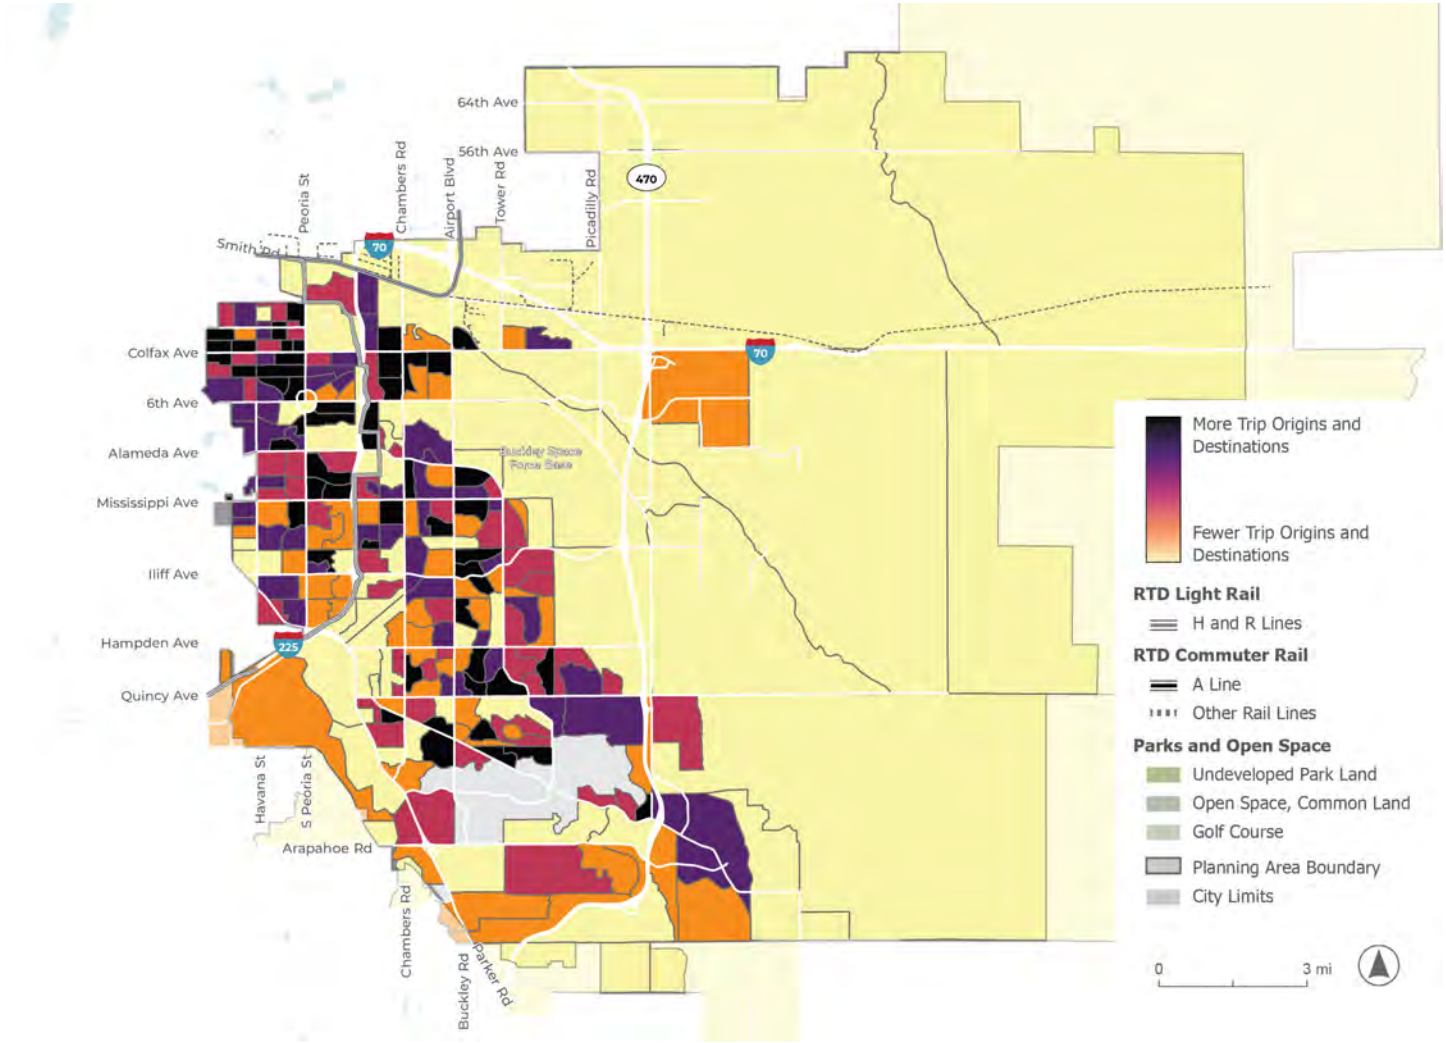
8.2 Trips by Select Demographics



Analyzing the trips of select demographic groups highlights travel patterns among groups with distinct transportation needs. Children, most teenagers, and many aging adults are either too young or too old to drive. Likewise, people and families with lower incomes may not own a car or may share one car among two or more adults. In areas with more activity amongst young people, aging adults, and lower-income households, transit service and active transportation infrastructure can support a broader range of multimodal transportation beyond driving. Figure 8-5 through Figure 8-9 show the density of trip origins and destinations in Aurora for specific demographic groups of interest based on Replica's modeled data of travel behavior, highlighting the areas where trips by key populations are most concentrated.

Figure 8-5 and Figure 8-6 display the density of origins and destinations for trips made by people under 18 years old and over 65 years old, respectively, two age groups with a pronounced need for multimodal options. Within Aurora, people under 18 years old travel to and from a variety of places in Wards I, III, IV, and V, demonstrating a widespread need for transportation infrastructure suited to people who are too young to drive across the city. People over 65 years also travel to and from neighborhoods throughout Aurora, and their trips are especially concentrated in Wards IV and V relative to trips by people of all ages. Transit service and accessible pedestrian infrastructure can help expand mobility for older adults in these areas. As noted in section 8.1, Ward IV has the highest proportion of trips within the ward at 71 percent and that trend may continue, with the increase of 65 and up population who concentrate some of their trips in that area.

Access to high-quality walking, bicycling, and transit networks is also important to households without access to a vehicle. Figure 8-7 illustrates the areas where households without a vehicle travel to and from. Trips completed by people in no-car households are especially prevalent in northwest Aurora in Wards I, III, and IV—and more concentrated in these areas than trips by the general population. People without access to a vehicle are most likely to make trips by walking, bicycling, or riding transit. Accordingly, these neighborhoods have high potential for active transportation trips now and in the future, despite having limited active transportation infrastructure today.



Trips by people with lower incomes and BIPOC, shown in Figure 8-8 and Figure 8-9, respectively, are also concentrated in northwest Aurora, specifically in Wards I, III, and IV, particularly when compared to trips made by the general population. These areas represent neighborhoods where BIPOC and lower-income communities may have experienced and suffered from historic disinvestment in transportation infrastructure. These are also the areas where BIPOC and lower-income communities may benefit most from future investments in safe and affordable transportation options.

8.3 Commuting

Prior to 2020, and the travel changes associated with the COVID-19 pandemic, approximately one in six trips was a commute trip nationwide (2017 National Household Travel Survey). While commute trips represent a minority of total travel, they are one of the most consistent trip types, and often occur during morning and evening peak travel periods. This has made them a useful indicator for transportation system analysis and planning. However, the lockdowns and shift to remote work for some jobs during the COVID-19 pandemic had substantial impacts on commute trip patterns across the nation. More recent available datasets do not provide consistent estimates on the number of commute trips as a portion of total trips. Additionally, the most recent American Community Survey five-year data span from 2018 to 2022. About half of this time period was pre-pandemic, and half was during the pandemic, with corresponding shifts in travel. As more post-pandemic data becomes available, and reflects more stable commute patterns, a more comprehensive assessment of commuting and trip patterns can help reveal what has changed and what is the "new normal" for Aurora workers.

Commute Travel Time

Figure 8-10 shows how much time residents in the Denver region spend on a one-way commute trip, based on American Community Survey five-year data spanning from 2018 to 2022 (the most recent data available as of March 2024). Aurora workers spend approximately 32 minutes on each one-way commute trip, slightly higher than the regional average of 29.6 minutes, and about four minutes longer than the national average of 27.6 minutes. Within Aurora, average commute times are highest in Ward VI, at nearly 33 minutes, and lowest in Ward IV, at about 30 minutes. Higher commute times in Ward VI could be a result of the ward having the highest proportion of trips within the area compared to the other five wards.

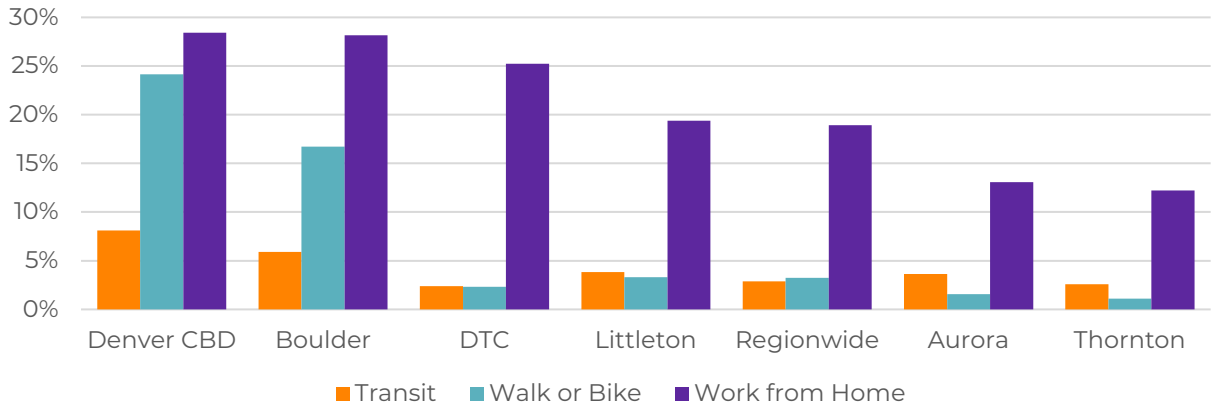

Figure 8-10. Average Commute Time by Residence, 2022

Source: U.S. Census Bureau, ACS 2018 - 2022

Overall, commute trips in Aurora are primarily made by auto, which make up an average of 81 percent of trips citywide, ranging from 76 percent in Ward VI to 82 percent in Ward II. Figure 8-11 shows non-auto commute mode share for Aurora and other comparisons within the region. In 2022, compared to the region as a whole, more Aurora commuters take transit (3.6 percent vs 2.9 percent for the region), fewer walk or bike (1.6 percent in Aurora; 3.2 percent in the region), and fewer work from home (13.1 percent in Aurora compared to 18.9 percent regionwide).

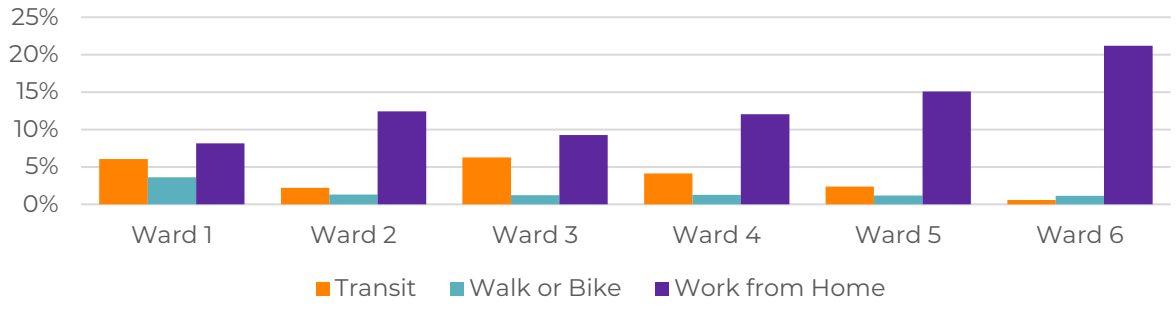

Figure 8-11. Non-auto Commute Mode Shares Across Denver Region, 2022

Source: U.S. Census Bureau, ACS 2018 - 2022

Figure 8-12 shows how non-auto commutes vary across Aurora's City Council wards: Ward I has the highest portion of walk or bike trips, at 3.6 percent, reflecting the more compact character of this area. Since this Ward has such a high concentration of active transportation trips, this could lend itself to building out infrastructure and programs that support even more biking and walking trips. Wards I and III both have the highest transit mode share, at about 6 percent, corresponding to areas of high transit propensity. Ward VI has the highest share of people working from home, at 21 percent and the lowest share of non-auto commute modes.

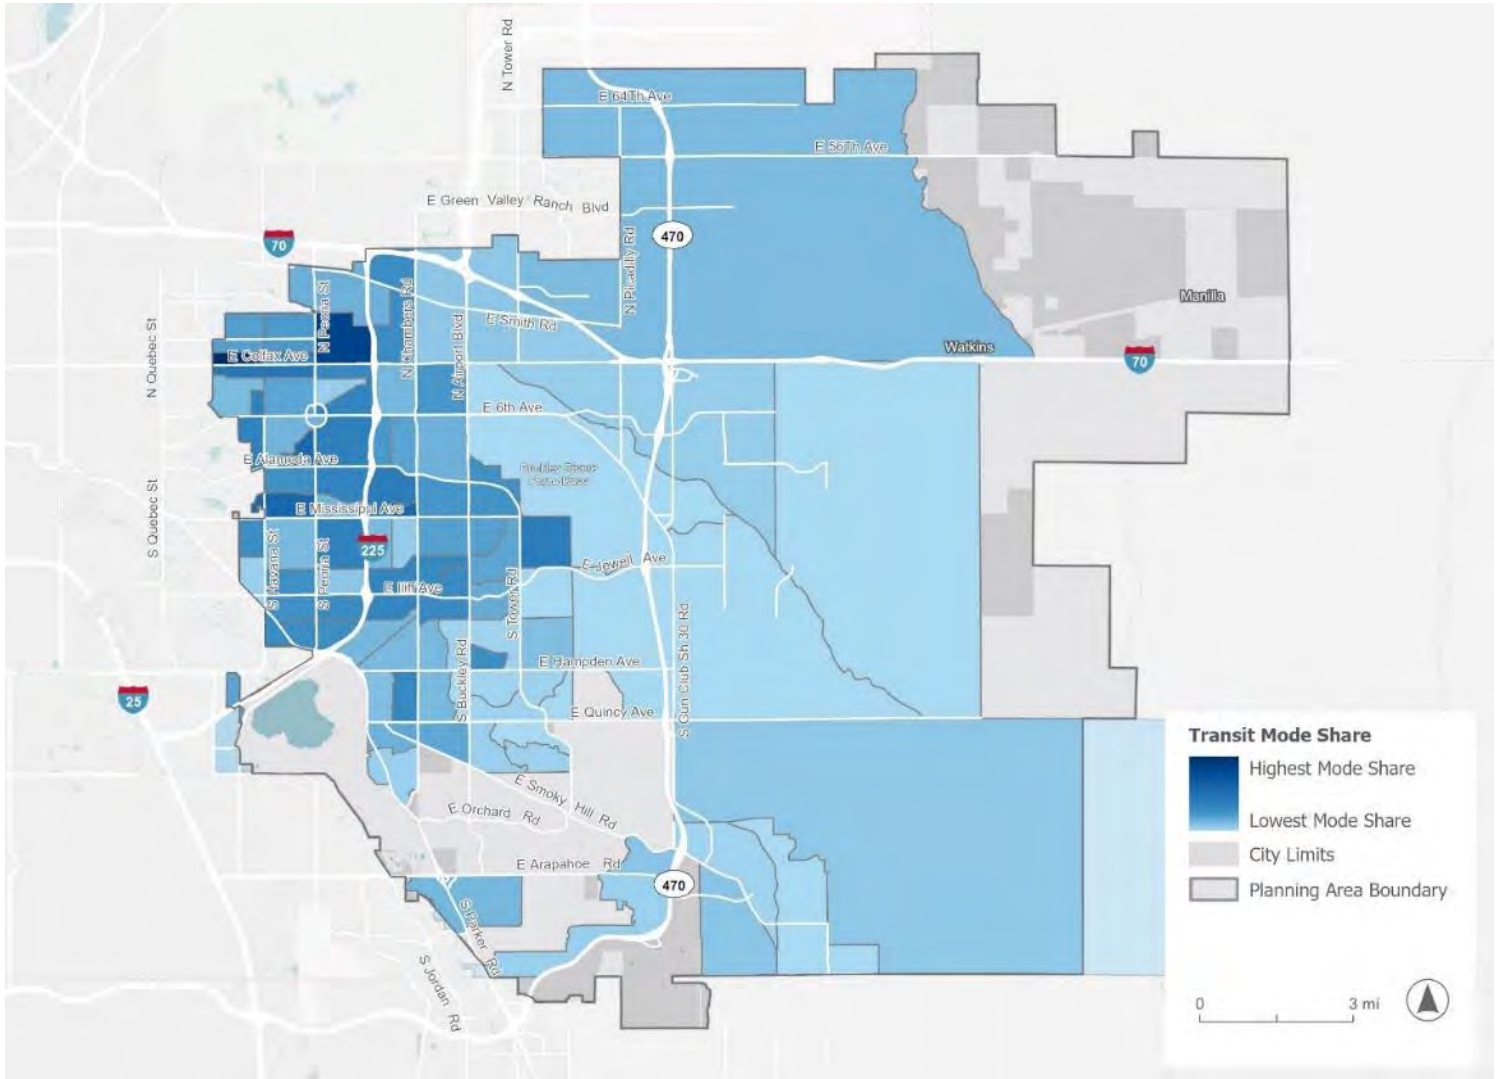

Figure 8-12. Non-auto Commute Mode Shares, for Aurora residents, 2022

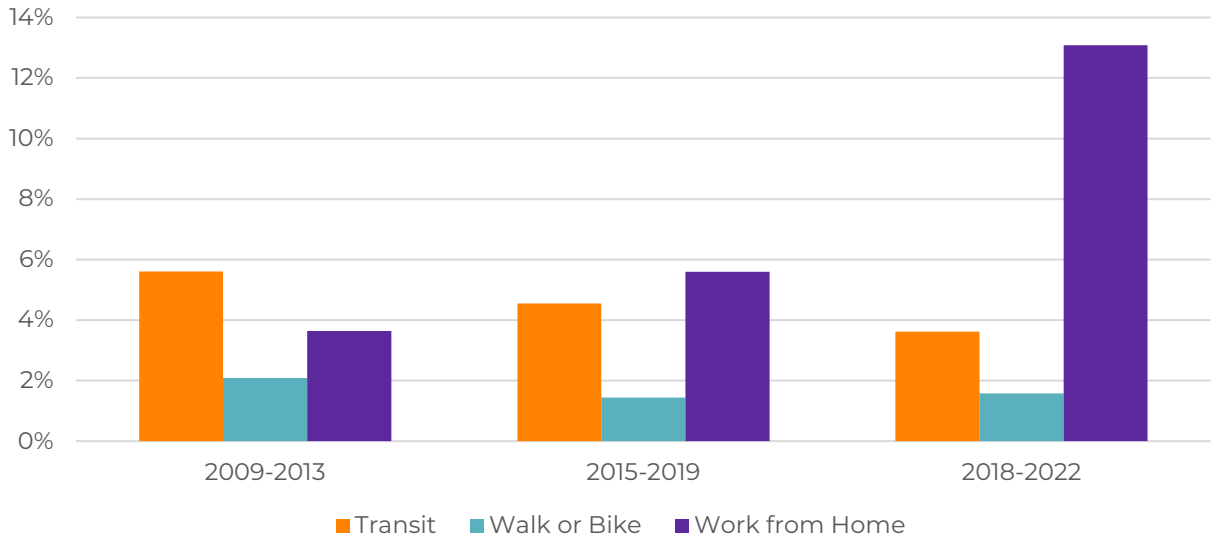
Source: U.S. Census Bureau, ACS 2018 - 2022

Figure 8-13 shows more detail on transit commute mode share across the city by census tract. The areas with the highest transit commute share are located along Colfax Avenue, in areas well-served by transit. One of the highest transit commute tracts is located where I-225 and Colfax Avenue cross—an area that is also served by numerous transit lines and the Anchutz Medical Campus, a major employer center.

Figure 8-13. Transit Commute Mode Shares, 2022



Source: U.S. Census Bureau, ACS 2018 - 2022

Commute Trends Over Time

The analysis also reviewed how current commute trends compare to years in the past. Figure 8-11 shows non-auto commute mode share for three different five-year periods: 2009-2013, 2015-2019, and 2018-2022. Figure 8-12 shows similar data, but instead uses the ACS one-year estimates. While five-year estimates are typically preferred for smaller geographies, in this case looking at the trend over time by year can demonstrate changes that occurred during the pandemic and give an initial indication of how patterns may continue to shift.

Figure 8-13 and Figure 8-14 show that transit mode share had begun to decline over the past decade, with more of a decrease post-pandemic. Bike and walking mode shares are small as a percent of total commutes but remain generally steady (variation shown year to year in Figure 8-14 is similar to the margin of error for this data). The portion of people working from home had been increasing steadily but slowly until the pandemic, when work from home rates in 2021 reached nearly 20 percent. Data from 2022 shows work from home rates declining from peak rates of the pandemic to about 16 percent.

Figure 8-14. Commute Mode Share over Time, for Aurora residents, 2022

Source: U.S. Census Bureau, ACS 2018 - 2022

Commute by Income and Race/Ethnicity

The commute analysis also reviewed commute trends by household income and by race/ethnicity. Table 8-4 demonstrates that lower-income households have the highest rates of carpooling, transit, and walking, but the lowest rates of working from home. Higher income households have much higher rates of working from home, at 23 percent, resulting in the lowest drive alone mode share of the income groups. Table 8-5 summarizes commute mode by race/ethnicity.

Table 8-4. Usual Means to Work, by Household Income, for Aurora Residents (ACS 2022 5-year data)

Usual Means to Work	Household Income Levels		
	Low (<$50k)	Medium ($50-$75k)	High (>$75k)
Drive alone	69%	75%	67%
Carpool	13%	8%	6%
Transit	5%	3%	2%
Bike*	n/a	n/a	n/a
Walk	2%	0%	1%
Worked from home	9%	13%	23%

**Bike mode shares are not reported by Census, likely due to low sample size.*

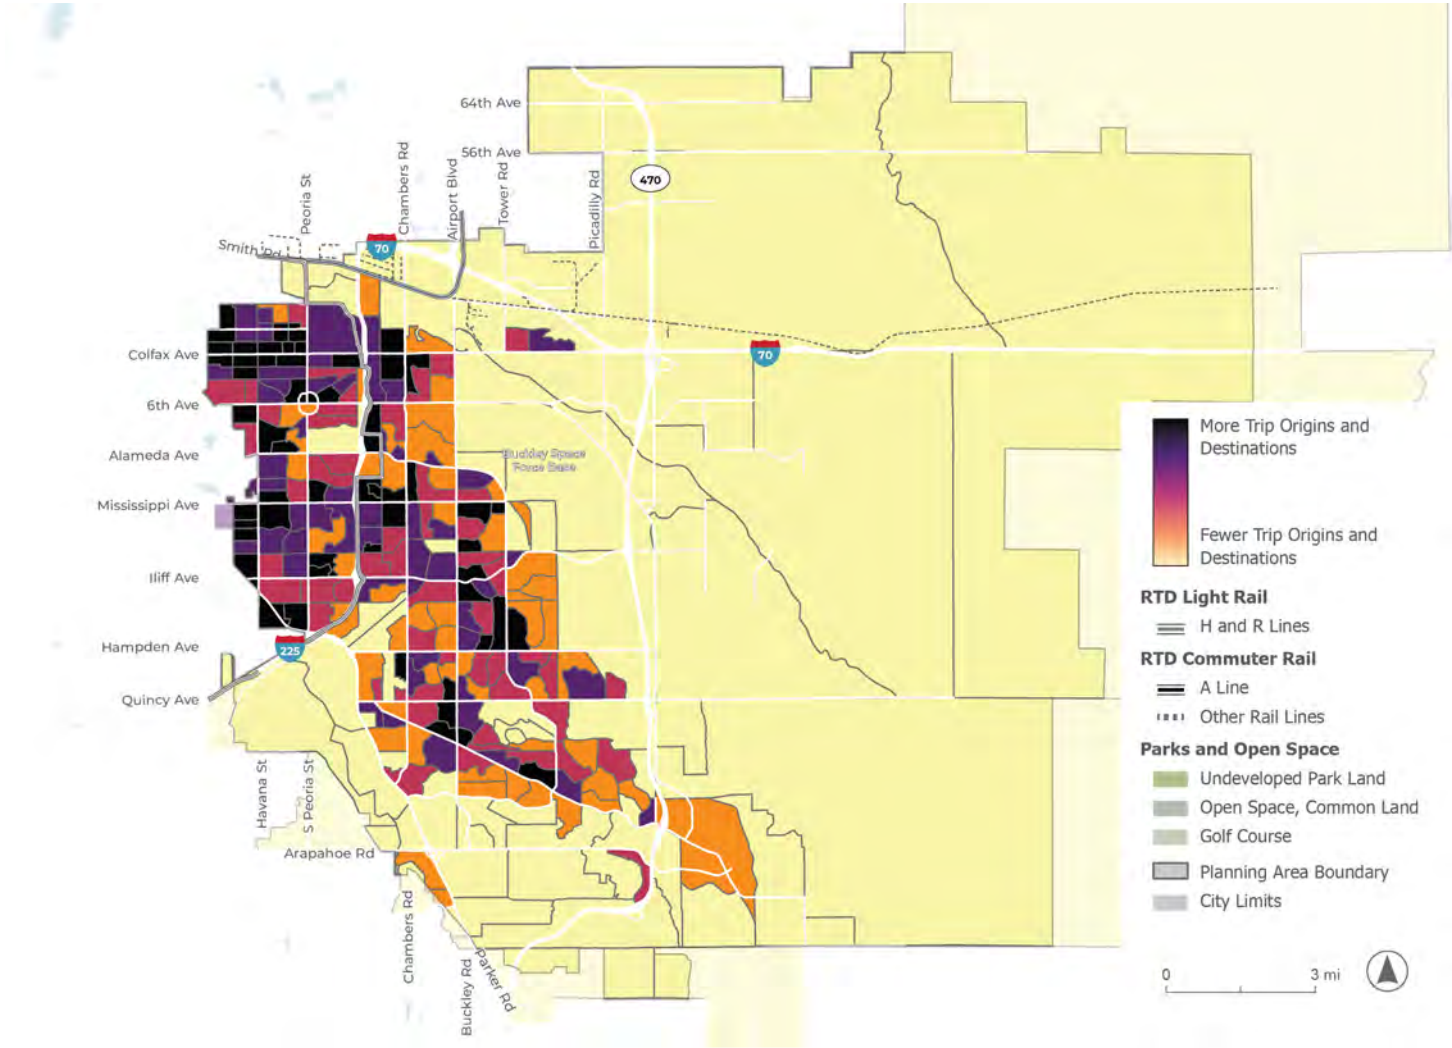
8.5 Travel by Mode

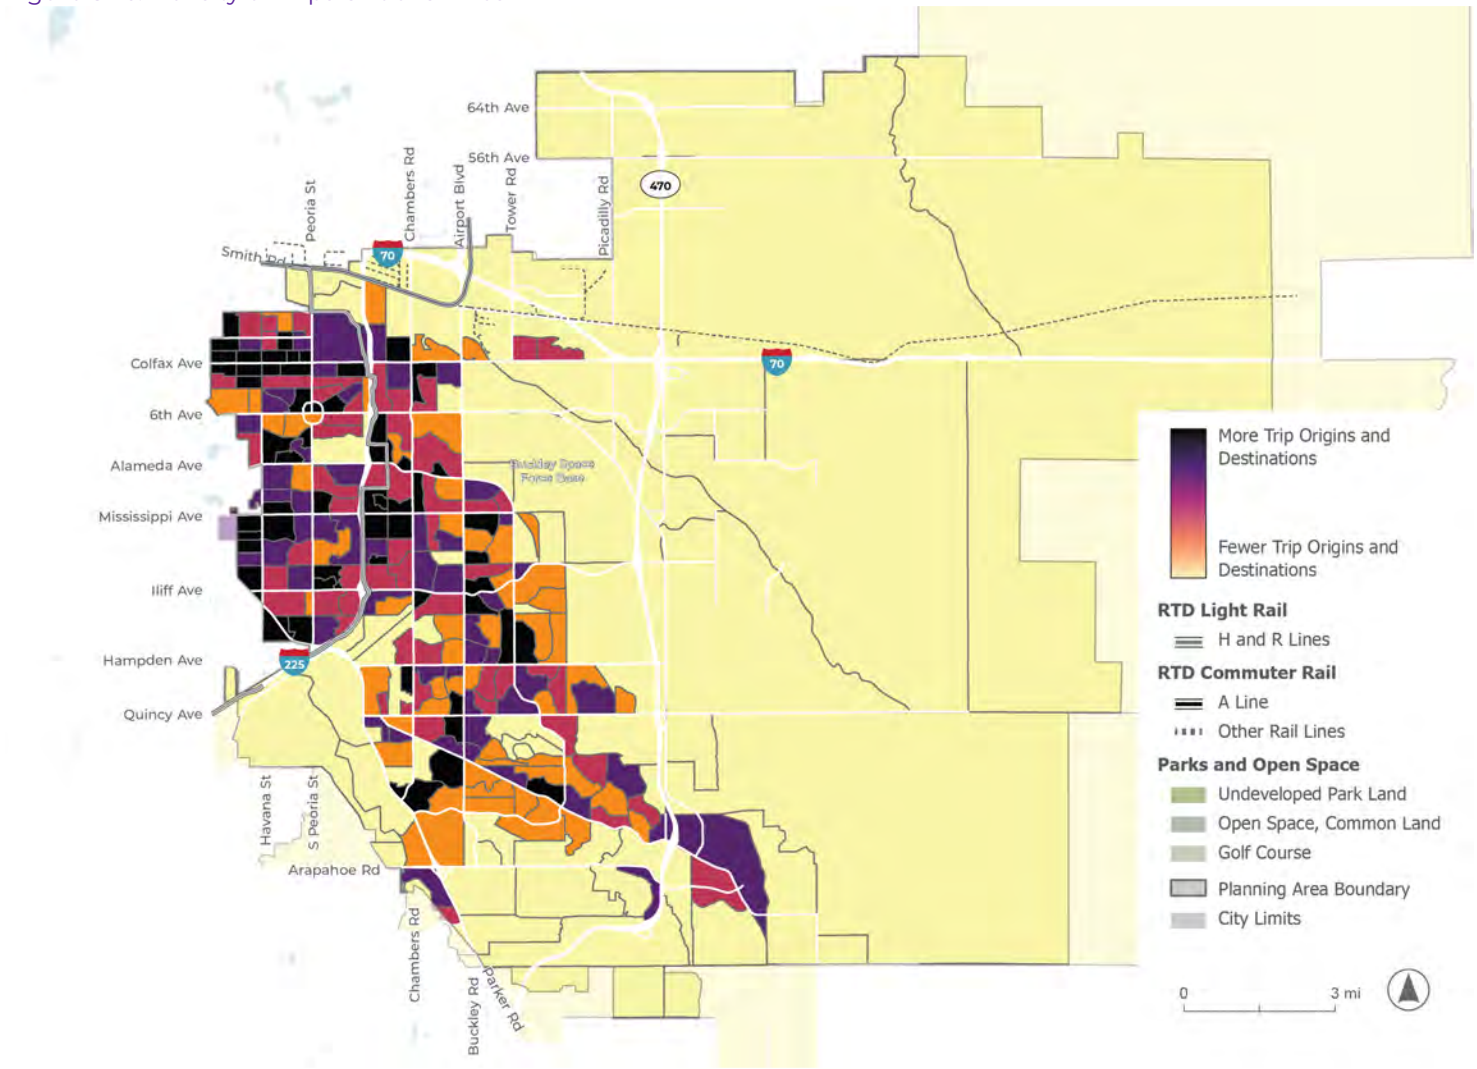
Transit



A sampling of trip-making by various modes is presented in Section 8.2. and indicates that taking trips via transit is rarely competitive with taking the same trip by private auto. Further analysis of this dynamic may be undertaken during the Scenario Planning and Multimodal Analysis phases of the project.

Biking and Walking

In places with safe and convenient active transportation networks and a variety of nearby destinations, many people choose to make short trips on foot or by bicycle. Areas with high concentrations of short trips today represent areas with high potential for future walking and bicycling trips. In places with safe, convenient, and well-connected pedestrian networks, a broad range of people feel comfortable and regularly choose to walk, rather than drive, to destinations within a one-mile radius. Likewise, many people regularly opt to bike up to three miles in places with networks designed for bicyclists of all ages and abilities. These one-mile and three-mile distances are common planning-level thresholds for the distances that many people are likely to walk and bike, respectively, when safe and convenient options for doing so are available. These distances represent approximately 20-minute trips at typical walking and bicycling speeds, respectively. As the prevalence and popularity of e-bikes grow, more and more people with the resources to own and maintain (or rent) e-bikes may choose to travel even longer distances by bicycle for everyday trips on a regular basis.



Shorter trips are most prevalent in northwest Aurora in Wards I, III, and IV, as shown in Figure 8-15 and Figure 8-16. Today, walking and bicycling infrastructure is often inadequate or lacking in many of these areas, as described in more detail in Section 7. Accordingly, these areas present compelling opportunities to promote mode shift (i.e., to convert motor vehicle trips to walking, biking, or transit trips) through investments that make walking and bicycling safe, attractive options. Trips under one mile represent 15 percent of all trips beginning and ending in the planning area surrounding Aurora, and trips under three miles account for 38 percent of all trips, suggesting strong potential for auto trips to shift to walk or bike trips in Aurora.

Figure 8-16: Density or Trips Under 3 Miles

Source: Replica, Spring 2024

Figure 8-17. Travel Time Destinations

8.6 Travel Time Modal Comparison

To better understand existing transportation infrastructure and viable transportation options within each ward, an analysis was conducted to compare the amount of time it takes a person traveling through Aurora to reach their destination via bike, on foot, on transit, or by car. The travel time comparisons were generated using Google Maps and an average time was taken using a summer Wednesday at 8:30am as the standard commuting time/day for all trips. The origin locations within each ward were selected based first on centrality within the ward and then from that, on proximity to neighborhoods and common origins while still maintaining a central location within the ward.

The analysis took an origin central to each ward, and routed a trip to each of seven identified major destinations for Aurorans (Figure 8-17):

- Anschutz
- Town Center at Aurora
- Aurora Community College
- Southlands
- Arapahoe Crossing
- Logistic and Distribution Area

Downtown Denver (Union StationTable 8-6 shows that, by far, driving is the fastest way to travel to almost all destinations within Aurora. In many cases, biking is generally the next most time-efficient option, followed closely by transit, and then walking. Ward II has limited transit options, the eastern most half of the ward having nearly no options. Additionally, biking and walking on some of the routes that are suggested by Google Maps are often unpleasant and/or dangerous. While this exercise highlights a known reality of travel around Aurora, future analysis should consider the various factors in addition to travel time that are important to encouraging mode shift. For instance, transit might become a more attractive option than driving if the service is comfortable, reliable, frequent, and intuitive, while biking may become more feasible with safer and more direct bike facilities.

Table 8-6. Travel Time Comparison (Minutes)

	Bike	Pedestrian	Transit	Car (Typical Range)	
Ward 1 (Peoria Street & Colfax Avenue) @ 8:30 am Wed

9 Safety

The perceived and real threats to personal safety can have a profound impact on how people choose to travel. This section provides a brief overview of safety concerns related to travel in Aurora, including recent crash history and the perception of safety among transit riders. Furthermore, Aurora will participate in the Adams County Safety Action Plan (ACSAP), a grant-funded project that employs the safe systems approach. The project is scheduled to kick off in Summer 2024 and will include detailed analyses of crashes in Aurora. Coordination between the Connecting Aurora Multimodal Transportation Master Plan and the SAP will begin once the ACSAP is underway. In anticipation of that effort, the State of the System report utilized existing crash data and analysis.

9.1 The Safe Systems Approach

Roadway safety is commonly defined as the methods and measures used to prevent road users from being killed or seriously injured. A popular multidisciplinary approach to safety is referred to as the "six E's," which includes Engineering, Education, Enforcement, Emergency Response, Evaluation, and Equity. This approach reflects the complexity of roadway safety, accounting for human behavior, needs, and expectations in the design of a transportation system. In more recent years, the *Safe System Approach* is the guiding paradigm to address roadway safety. This approach is different because it focuses on both human mistakes, which could include any of the "E's" and human vulnerability to inform the design of a system with redundancies to protect all roadway users.

9.2 Crash Data

This section provides background and an overview of the origin of the crash data used in analysis and illustration. All crashes in Colorado investigated by law enforcement are sent to the Department of Revenue (DOR); crashes in Aurora are investigated by the Aurora Police Department. During the report, the investigating officer fills out a crash form, which is then sent to the DOR. The DOR then processes the crash records and enters them into a database, called Colorado DRIVES (Driver License, Record, Identification and Vehicle Enterprise Solution), where the official legal record is maintained.

CDOT receives data from the Colorado DRIVES system for all crashes, excluding private property and counter reports, which are self-reported by drivers and are not investigated by a law enforcement officer. CDOT will then process or "code" the crash data received from DOR. This process adds an additional field for crash type, corrects common

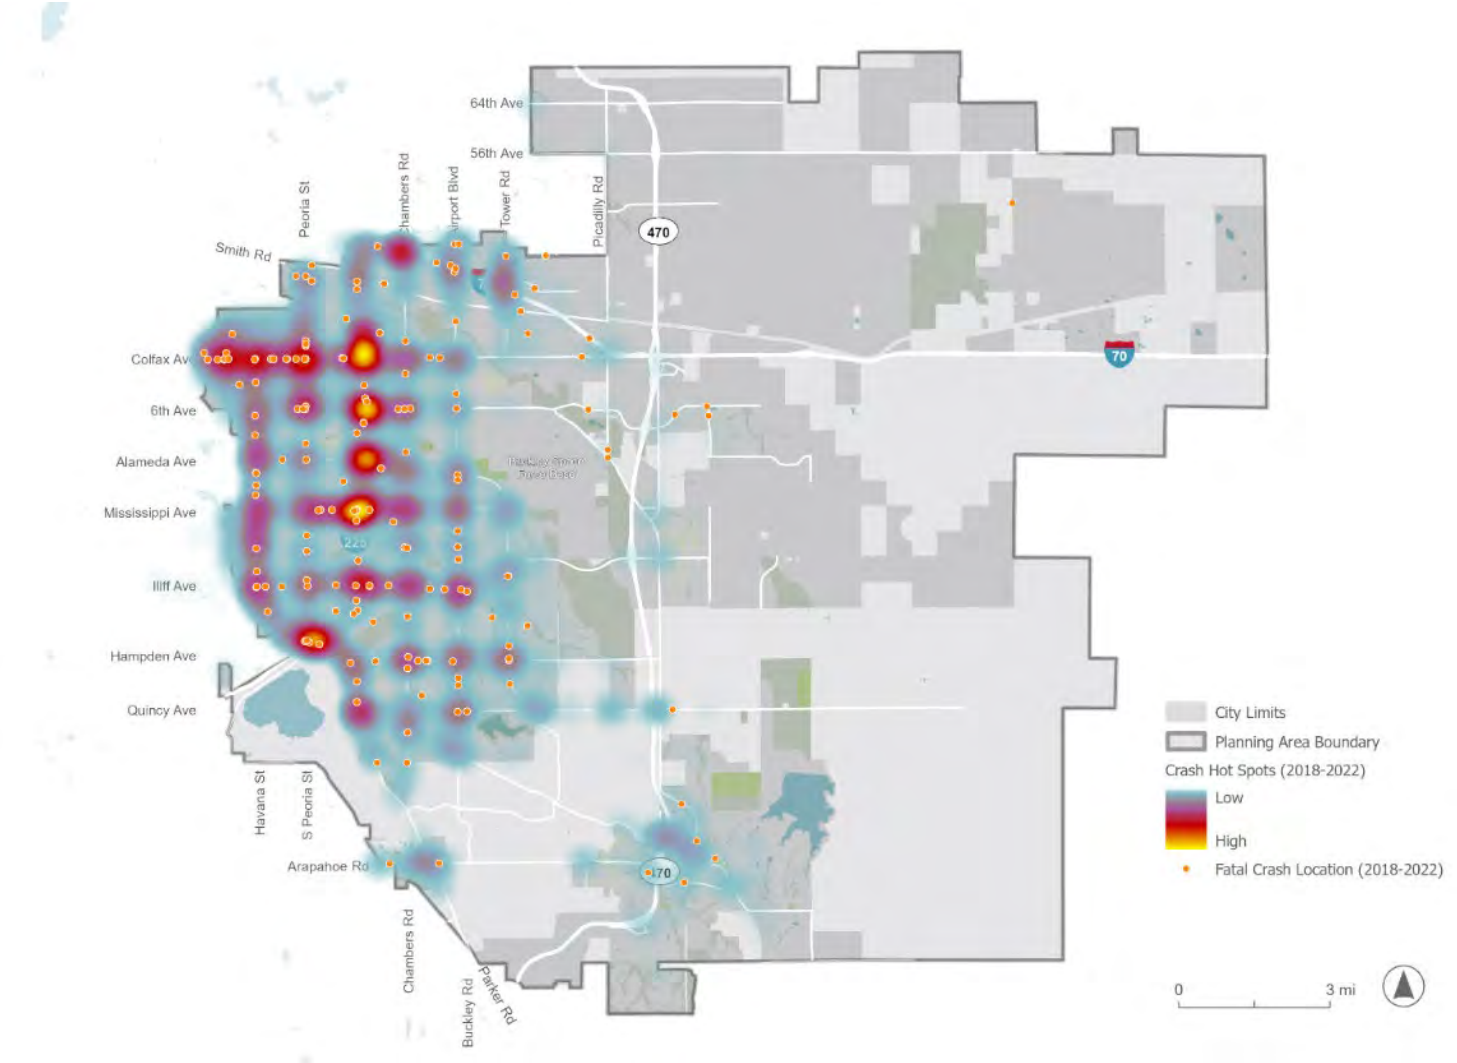
s, provides location information if available, and normalizes the data. CDOT typically compiles data and releases the data in 6 month increments, with approximately a 3 month delay when data is available. CDOT typically delays the release of data another 12 to 18 months to address known deficiencies allowing for data corrections or to download additional data that is delayed through the DOR process. CDOT provides summary data upon request in a tabular format and does not release personal identifying information, including names, driver's license numbers, addresses, birth dates, license plate numbers, vehicle identification numbers, local and state identifiers such as case numbers, etc.

When a new crash data increment is available from CDOT, Aurora requests the crash data for the entire city for import into Aurora's DiExSys Vision Zero Suite, which is a safety management system that uses predictive analytics and diagnostic pattern recognition to inform safety-related decision-making.

In addition to local crash data, there are also national crash databases. The National Highway Traffic Safety Administration (NHTSA) maintains the Fatality Analysis Reporting System (FARS) database, which contains information on all fatal crashes involving a motor vehicle traveling on a public trafficway in all 50 States, the District of Columbia, and Puerto Rico.

The State of the System report considered aggregate crash data between 2018 and 2022, utilizing a data export from the Vision Zero Suite. This crash data was analyzed using a geospatial information system (GIS) analysis called Kernel density, which calculates a magnitude-per-unit area from point features using a kernel function, to show concentrations of a given feature, in this case, the feature is crash records (Figure 9-1).

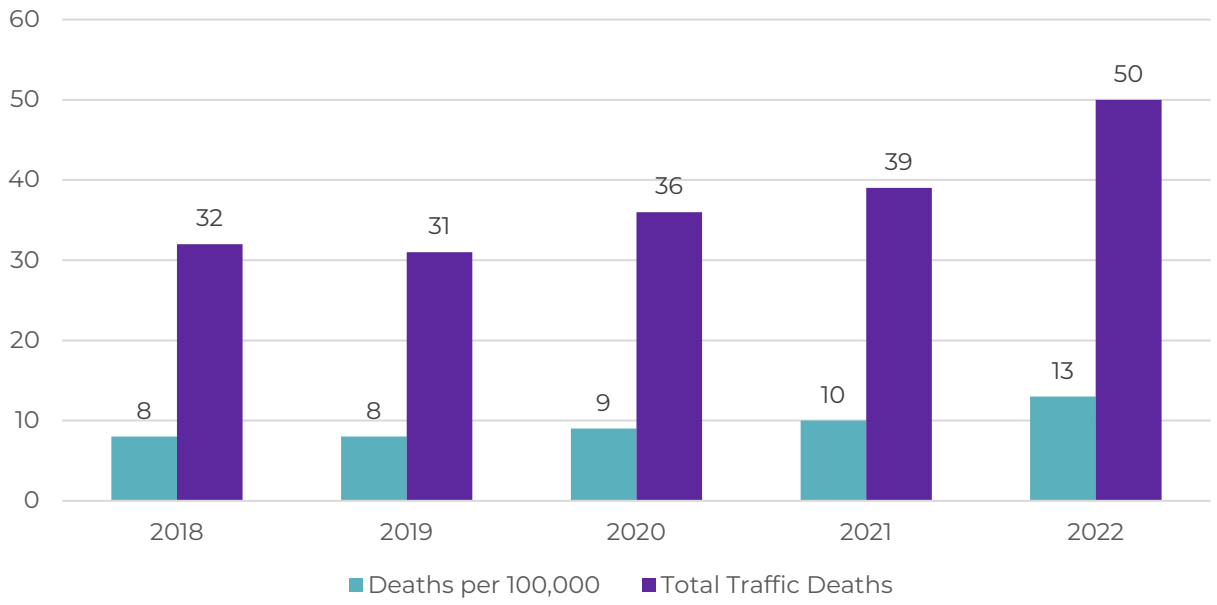
As shown in Figure 9-1, most roadway crashes occur on arterial roadways, which is expected as these roadways carry the highest traffic volumes and allow the highest travel speeds. The highest concentration of crashes tends to occur at or near intersections, specifically at the intersections along I-225 at Colfax Avenue, 6th Avenue, Mississippi Avenue, and Parker Road as well as at the Colfax Avenue and Peoria Street intersection.



9.3 Fatal and Serious Injury Crash Summary

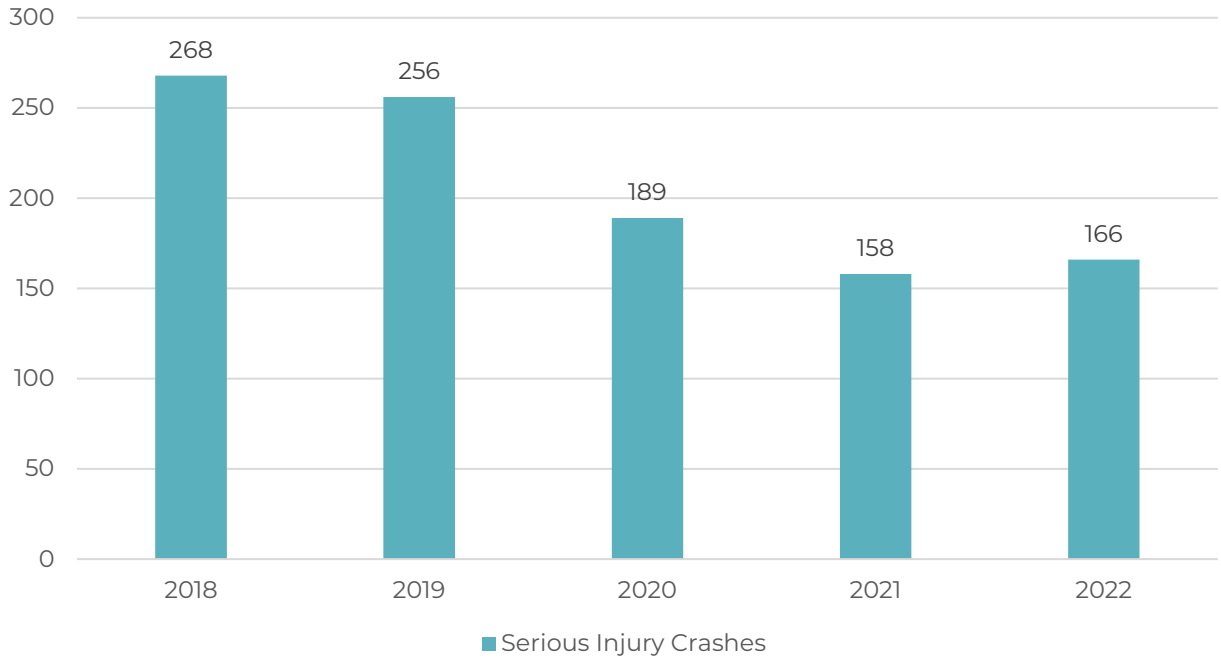
The following summarizes crash related fatalities and serious injuries within the City of Aurora between 2018 and 2022:

- Fatal crashes in Aurora have increased by 56 percent
- Serious Injury crashes have decreased by 3 percent
- There was a total of 175 fatal crashes and 183 fatalities
- There were 57 fatal pedestrian crashes and 6 fatal bicycle crashes
- Approximately 15 percent of fatal crashes involved motorcycles
- Approximately 48 percent of fatal crashes occurred at or near an intersection
- Top contributing factors include impairment, aggressive driving, distracted driving
- Of the fatal crashes, 56 percent of fatalities were not wearing a seatbelt



According to the CDOT *2022 Problem Identification Report,* Adams and Arapahoe Counties were number three and four, respectively, for highest number of fatalities and number two and number three, respectively, for highest number of serious injuries from traffic crashes in the state. Figure 9-2 through Figure 9-4 illustrate traffic-related deaths, serious injury crashes, and fatal crashes in Aurora.

Figure 9-1. Crash Heat Map (2018 to 2022)



Source: CDOT, 2022

Figure 9-3. Aurora Serious Injury Crashes (2018-2022)

Source: Aurora DiExSys Crash Data, 2018—2023

Figure 9-4. Aurora Fatal Crashes by Type (2018-2022)

Source: Aurora DiExSys Crash Data, 2018—2023

The Colorado Department of Public Health and Environment (CDPHE) maintains an Injury Indicators Dashboard, which can be filtered by county. The information presented in Table 9-1 is based on 2018 to 2022 data and details the demographics for traffic related motor vehicle deaths for residents in Adams, Arapahoe, and Douglas Counties.

Table 9-1. Fatal Crash Demographics (2018—2022)

Demographic	Colorado State	Adams County	Arapahoe County	Douglas County
Total Deaths due to Traffic	3,168	342 *(10.8% State Total)*	311 *(9.8% of State Total)*	91 *(2.9% of State Total)*
Female	27.3%	26%	28.6%	31.9%
Male	72.7%	74%	71.4%	68.1%
Age				
Under 18	6.1%	7%	5.1%	7.7%
18—24	14.9%	18.4%	13.8%	12.1%
25—64	61.4%	63.7%	64.6%	56%
Over 65	17.6%	10.8%	16.4%	24.2%
Race				
Black or African American, alone	29.1%	48.2%	26.4%	7.7%
White, alone	61.2%	43.6%	53.7%	85.7%
Asian, alone	5.8%	4.7%	13.8%	3.3%
All Others	3.9%	3.6%	4.8%	0%

9.4 Regional High Injury Network

DRCOG developed the Regional High Injury Network (HIN) by identifying the road segments with the highest killed and serious injury (KSI) crash density and then connected the network by adding links based on proximity to high crash density segments and road segment continuity. For each county, the critical corridors identify the top 50 percent of KSI crash density corridors along the regional High Injury Network (Figure 9-5). The High Injury Network is reflected in the crash heat map, which identifies Aurora's arterial roadway network.

9.5 Transit Safety

RTD conducted its annual Community and Customer Survey in 2023 (Figure 9-6). The purpose of the survey is to capture rider opinion on a wide range of topics related to RTD service and operations.[1] The survey found that 57 percent of respondents felt safe and secure waiting for the bus, and a similar percentage felt the same way for RTD's various rail services (58 percent for Rail, 56 percent for Light Rail, and 59 percent for Commuter Rail). When asked how safe and secure they felt while on the bus or train, between 60 percent and 65 percent indicated they felt safe. Compared to the national average, RTD riders feel safer using the region's public transit system.

Personal safety on and while waiting for public transit was ranked as a lower priority for riders when compared to other services and operational needs. However, personal security on the transit service was a higher priority, in the top 10 priorities, compared to personal security while waiting for the service, which ranked at the bottom for all transit options.

10 Next Steps

The State of the System Report is a tool for city staff to better understand the current strengths, challenges, and opportunities of Aurora's transportation system as it exists today. The existing data provides a foundation on which the city can build a guide for future investment and programming to address key issues such as mobility choice, transit access, congestion, and supportive land use. To accompany this report, additional working papers will be provided separately, offering greater detail on topics such as transportation funding structures, community health and sustainability, and emerging technologies.

The next steps of the planning process include scenario planning, community engagement, network creation, and project identification and prioritization. These actions will form the foundation for creating a dynamic transportation master plan that meets the evolving needs of the community.

OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the Discover Phase or Milestone 1. The Discover Phase was conducted April 1-June 5, 2024, and involved extensive public outreach to learn about current transportation-related challenges the community is facing. In this phase, community members shared their wants and needs for Aurora's transportation system and their travel behaviors and preferences. This information provides the planning team a deeper understanding of Aurora's community members, existing infrastructure, and key transportation needs.

Key efforts and tasks for the Discover Phase include:

- Data collection and analysis
- Future trends analysis
- Initial engagement with stakeholders and the public

ENGAGEMENT OVERVIEW

A variety of engagement efforts were used to gather feedback from the Aurora community about the current state of the transportation system, as outlined below. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers

TOUCHPOINT	ONLINE VISITS	ACTIVELY ENGAGED
*288K+	*4.6K+	1.6K+

**The figure of 288,000+ touchpoints indicate the cumulative number of interactions or exposure to the project. This is a broader measure compared to the 4,600+ online visits, which represent more direct engagement with the project's online presence.*

IN-PERSON OPEN HOUSES

Four in-person open houses were hosted at community libraries across Aurora. All total, 154 people attended the open houses. The library locations were chosen strategically to make sure feedback opportunities were dispersed across the city. Spanish interpretation was provided at each open house and materials were provided in English and Spanish. Additional select materials were provided in Vietnamese, Chinese, Korean, Amharic, Tigrinya, Nepalese, Karen, Burmese, Arabic and French. Food trucks were on site to incentivize community participation and open house attendees received a voucher for a meal from the food truck after participating in the event. Interactive boards were used to garner feedback for each type of travel mode as well as a large-scale, citywide map to leave general comments. Additionally, hard-copy surveys were available for participants to fill out in the languages referenced above.

Open House Locations, Dates, and Times

CENTRAL LIBRARY	MISSION VIEJO LIBRARY	MARTIN LUTHER KING JR. LIBRARY	TALLYN'S REACH LIBRARY
Tuesday, April 2 5-7 p.m.	Wednesday, April 10 5-7 p.m.	Wednesday, April 17 5-7 p.m.	Tuesday, April 23 5-7 p.m.
37 ATTENDEES	**32 ATTENDEES**	**47 ATTENDEES**	**38 ATTENDEES**

ONLINE OPEN HOUSE

A self-guided online open house was hosted on the Engage Aurora website (engageaurora.org/ConnectingAurora). The information and feedback opportunities on this site were

identical to the in-person open houses. The data below represents engagement between April 1-June 5, 2024.

- Total visits: 4,673
- Contributions (any form of input, including surveys): 1,643
- Online map pins: 188
- General comments: 18 comments were submitted and received nine likes
- Questions asked: 7
- Ideas/one word activity (within the online open house): 17 with eight likes
- Feedback opportunities by mode (similar to those on the display boards): 72

COMMUNITY/POP-UP EVENTS

Pop-up events were held at various locations to gather feedback.

Event Locations, Dates, and Times

METRO CENTER TRANSIT STATION	SEOUL KOREAN BBQ	CU ANSCHUTZ EARTH DAY	COMMUNITY COLLEGE OF AURORA	AURORA RESERVOIR
Thursday, April 11 3-5 p.m. Tuesday, April 16 7-9 a.m.	Saturday, April 13 12-2 p.m.	Monday, April 22 11 a.m.-2 p.m.	Thursday, April 25 11 a.m.-1 p.m.	Saturday, May 25 3:30-7 p.m.
16 PEOPLE	**2 PEOPLE**	**60 PEOPLE**	**76 PEOPLE**	**34 PEOPLE**

CHARETTE

A two-day planning charrette took place on May 1 and May 7, 2024, with key stakeholders to create a shared understanding of the city's challenges and opportunities, a common language/set of facts, and the vision and desired outcomes for the plan.

COMMUNITY SURVEYS

The self-guided online meeting included several short survey questions and two longer community surveys. Paper copies of the long-format survey were available at the open houses and in public libraries. Surveys were available in English, Spanish, Vietnamese, Chinese, Korean, Amharic, Tigrinya, Nepalese, Karen, Burmese, Arabic and French. To encourage participation, the planning team promoted a drawing for four $25 gift cards. Initially, the survey was longer form, but following the open houses, the survey was shortened and promoted as a 5-minute survey. Doing this significantly increased the number of responses.

Survey Engagement by the Numbers

TOTAL SURVEYS	ONLINE SURVEYS	OPEN HOUSE/LIBRARY SURVEYS
1,238	1,180	58

MAP COMMENTS AND PINS

Community members left comments on maps at the open houses and pop-up events. Additionally, a map tool was available in the self-guided online meeting where visitors could place a pin and leave a comment. A summary of the comments can be found in the Feedback Results section later in this document.

- Total comments/pins: 282
  - Online map pins: 188
- Open house/pop-up event map comments: 94

OTHER COMMENTS

Comments were also received through the following:

- Email: 4
- Facebook: 1
- Ward V meeting: 5
- Open house/pop-up events (not included elsewhere): 52
- Other: 5 (comments from the printed survey)

PROMOTION

A variety of promotional materials were used throughout Milestone 1 to inform the community about Connecting Aurora and how to provide feedback. For details and examples of materials used, go to Appendix A: Milestone 1 Promotional Materials.

NEWS RELEASE AND MEDIA COVERAGE

Two news releases—one for the start of the engagement period and one for the extension of the self-guided online open house and surveys—were distributed to a comprehensive local media list, including media targeting non-English speakers. As a result, there were nine news stories, as outlined in the next table. For a full list of news stories, go to Appendix A: Media Coverage.

SOCIAL MEDIA

Extensive Social media efforts were undertaken to promote the project and to engage public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Note: X requires a Premium account to access full post metrics, which the city did not have at the time of this report. Additionally, Facebook posts were boosted for the most common languages: English, Spanish, Korean, Vietnamese, Chinese and Amharic. Each boosted post was $100, for a total of $500 spent on social media ads.

- Total posts (including ads): 73
- Total reach/impressions (views/shown): 167K
- Engagement (clicks/likes/comments): 3.6K

E-NEWSLETTERS

Several city and community newsletters distributed the Milestone 1 project information.

- Engage Aurora emails: 3 emails were sent to project subscribers (subscriber count grew from 71 on the first distribution, to 98 for the second and 113 for the third) on Engage Aurora
- City of Aurora Employee Newsletter
- The People's Building Newsletter
- City's This is Aurora newsletter: 11 mentions with 7.6K subscribers
- Library electronic customer communication: 16K subscribers
- On Havana Street newsletter
- AuroraTV Newsletter: 5 mentions with 1.3K subscribers

BILL INSERT

An article was included in two News Aurora issues, which was distributed in water bills between March and June promoting the engagement period. Approximately 80K homes received each bill insert.

MAILER

Approximately 9K multifamily and mobile homes received a postcard about the project. This postcard was in English and Spanish, and equally distributed among all six City Council wards.

FLYERING

Flyers and/or bookmarks were distributed through a variety of means in English and Spanish:

- 7 libraries
- 60 cars at the Iliff Station Garage
- Homes around Tallyn's Ranch (to promote the final open house at Tallyn's Reach Library)

MAYOR AND CITY COUNCIL TOWN MEETINGS

Materials and surveys were available for pickup at all Mayor and City Council town meetings, and presentations were provided at the Ward III, IV and V meetings.

LIBRARY OUTREACH

Community surveys were available in 12 languages at all seven Aurora libraries. Signage was posted about the survey and bookmarks were handed out promoting the open houses and online meeting. Additionally, A-frame signs were rotated through each of the four libraries hosting open houses. A library electronic customer communication was also sent about the project, reaching 16K people.

SIGNAGE OUTREACH

In addition to the signage at the libraries, A-frame signs were rotated around the Town Center at Aurora and Stanley Marketplace. Yard signs were placed around trails in parks promoting the online meeting.

STAKEHOLDER OUTREACH

Outreach was conducted with various community stakeholders as described in the following sections.

Stakeholder Group

Three emails were sent to the Stakeholder Group with promotional materials for Milestone 1 engagement.

Technical Advisory Committee

Two emails were sent to the Technical Advisory Committee asking for their input and for them to share the information with their networks.

Presentations

Presentations were provided to the following groups:

- Veteran's Affairs Commission, April 11, 2024
- Aurora Planning and Zoning Commission, May 22, 2024
- City Council Transportation, Airport and Public Works Policy Committee, March 21, and May 29, 2024

Stakeholder Emails

The project team sent emails to many stakeholders with the project information and ask them to share with members of their organizations.

- Homeowner's Associations and Neighborhood groups: 151 groups/emails
- Aurora Action Coalition for Community Services: email to listserv of 175 people
- Stanley Marketplace: email to business owners

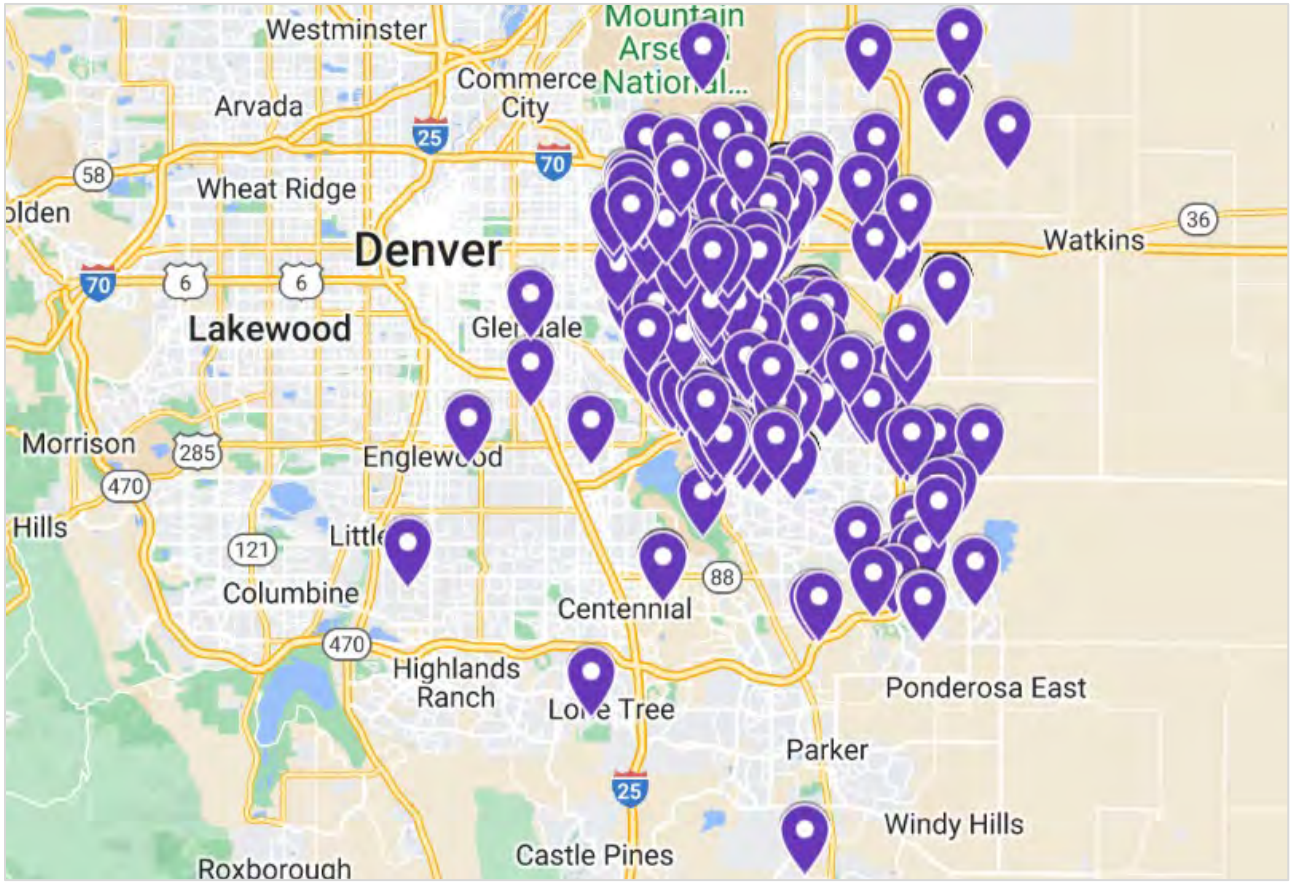
- Fitzsimons Redevelopment Authority
- Department of Pediatrics, University of Colorado School of Medicine/Children's Hospital Colorado
- Aurora Chamber of Commerce
- Aurora Mental Health and Recovery
- Aurora Sister Cities International
- Village Exchange Center
- Village Institute
- Colorado Freedom Memorial
- Aurora Economic Development Council
- Communications Department, Aurora Public Schools
- Amigos de Mexico
    - RISE Colorado

Other Stakeholder Outreach

- Colorado Muslim Community Center: Arabic surveys dropped off
- KETO 93.9 FM – Immigrants FM Radio social media posts in Amharic and Tigrinya
- City of Aurora Intranet
- Project Worthmore helped distribute Burmese, Spanish, French, Amharic, Tigrinya and Arabic surveys
- Aurora Action Coalition for Community Services presentation

FEEDBACK RESULTS

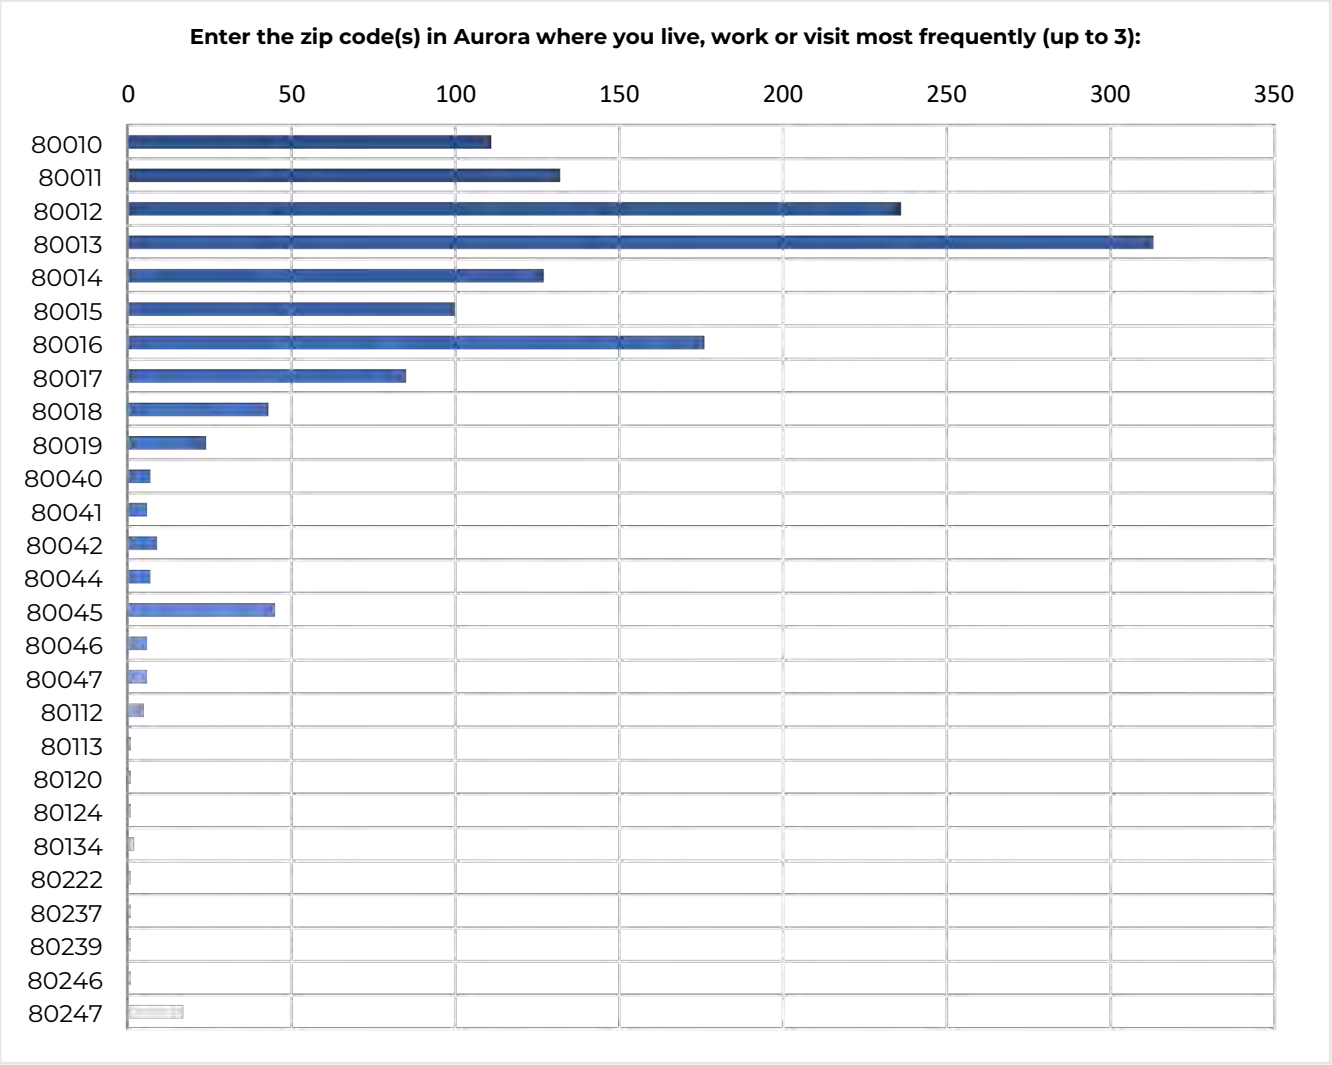
The results described below are a compilation of the various feedback tools. Sources for each chart or fact are indicated as well as the number of respondents. The number of respondents varies as questions were not consistent across the different feedback tools.



Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

WHO WE HEARD FROM

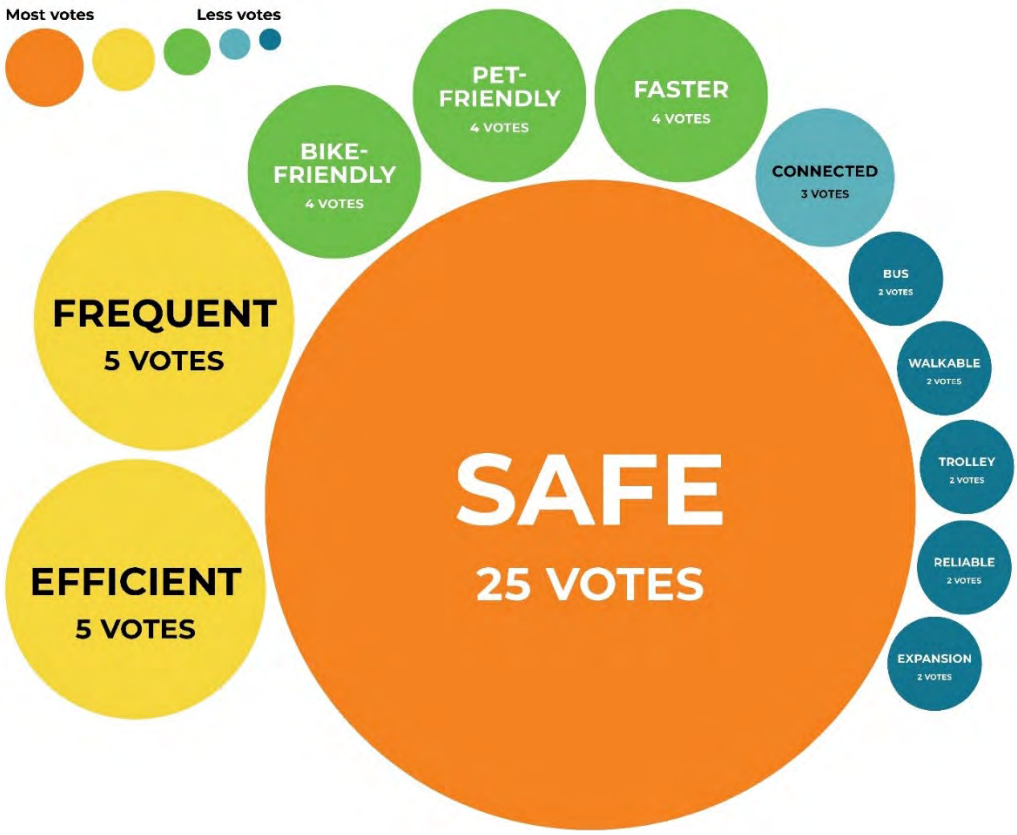
- A variety of people who live, work, commute through, or visit Aurora.
- Individuals of all ages, from students to seniors.
- Individuals and families of varying backgrounds.



Online Map Comment Locations and Survey Zip Codes

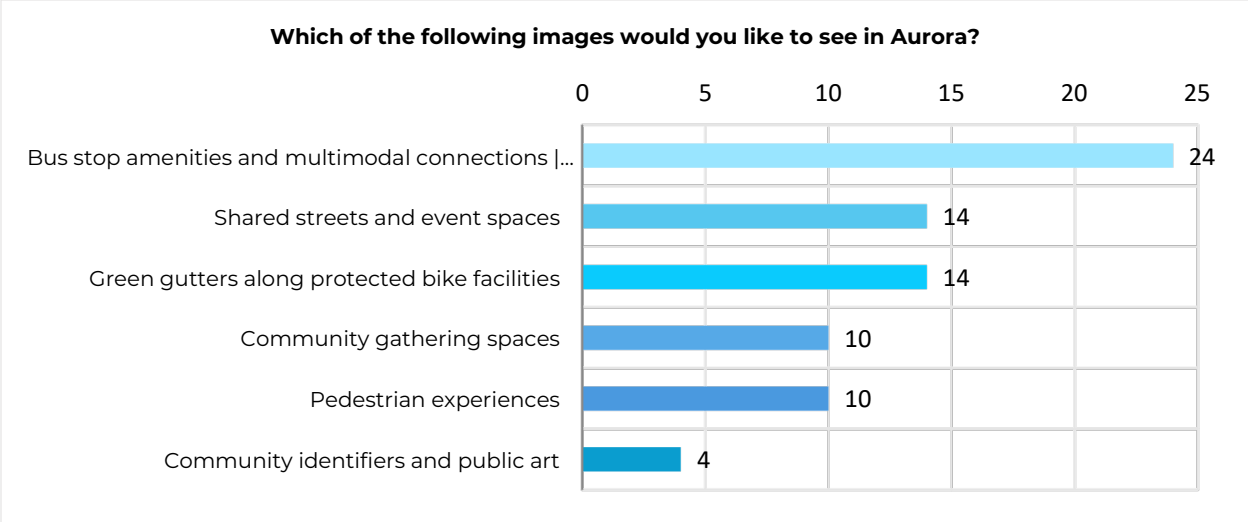
Zip Codes

1,044 survey respondents entered zip codes where they live, work, and visit most frequently.



WHO WE HEARD FROM – OVERALL

- Of the 391 people who answered the question "How often do you participate in transportation or community plans?" **130 indicated it was their first time.**
- Many open house attendees expressed **appreciation for the opportunity to provide feedback** and felt like it was worth their time.
- Based on responses from the open house individuals feel:
    1. Somewhat safe when traveling by vehicle.
    2. Somewhat safe when walking.
    3. Neutral or very unsafe when using a mobility device.
    4. Somewhat unsafe when traveling by bike.

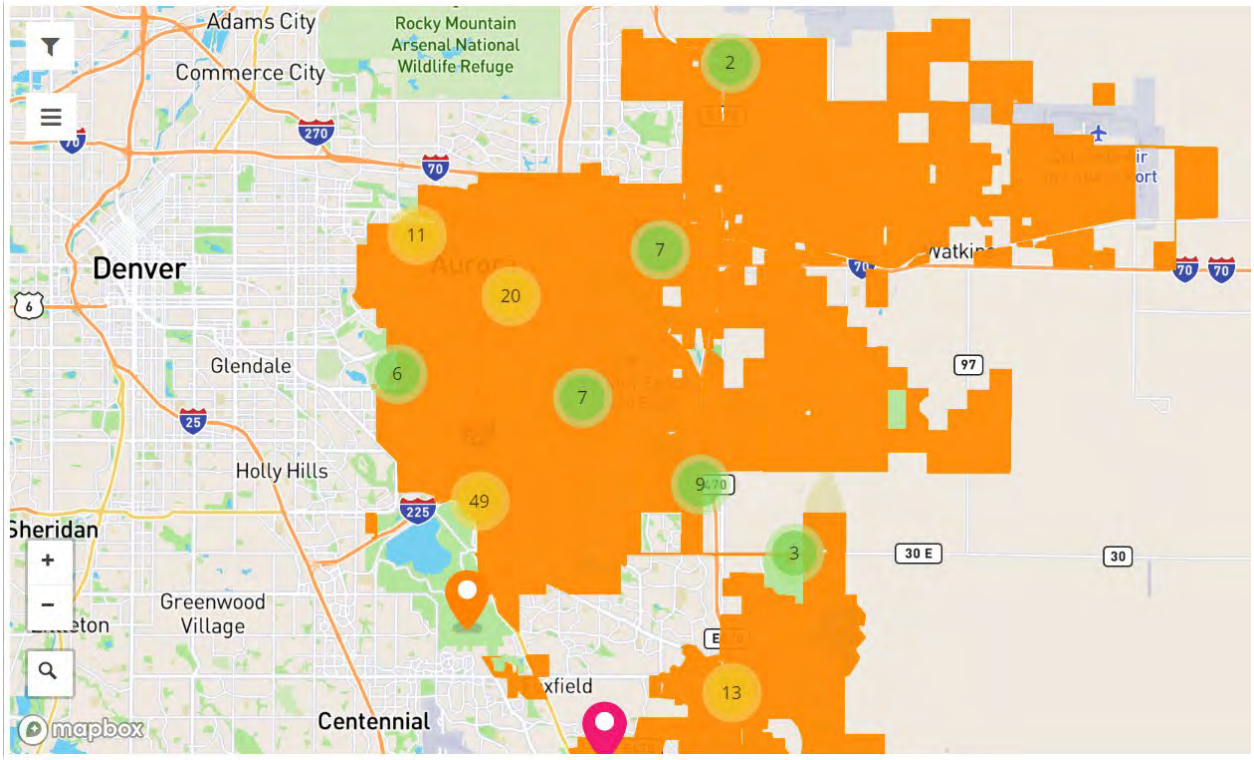


5. Somewhat unsafe when traveling by transit.

- Individuals online and at the open houses were asked: "In one word, describe the transportation system you want to see in Aurora." All total, 87 responses were received, as outlined by the word cloud below. The larger the word, the more often it was mentioned.

  - The following words were selected a total of one time by individuals online and at the open houses and as such are not represented in the word cloud: Cars, Charging Stations, Cleaner, Comprehensive, Diverse, Effective, Entrepreneurial, Free, Futuristic, Harmonious, Improving, Inclusivity, Japanese, Legible, Lights, Metropolitan, Micromobility stations, On time, Seamless, Secure, Separate bike lanes, Slower, Thorough, Trails, Welcoming, Wildlife.

- When asked, "Which of the following images would you like to see in Aurora?" open house and online open house respondents indicated bus stop amenities and multimodal connections as a top priority.



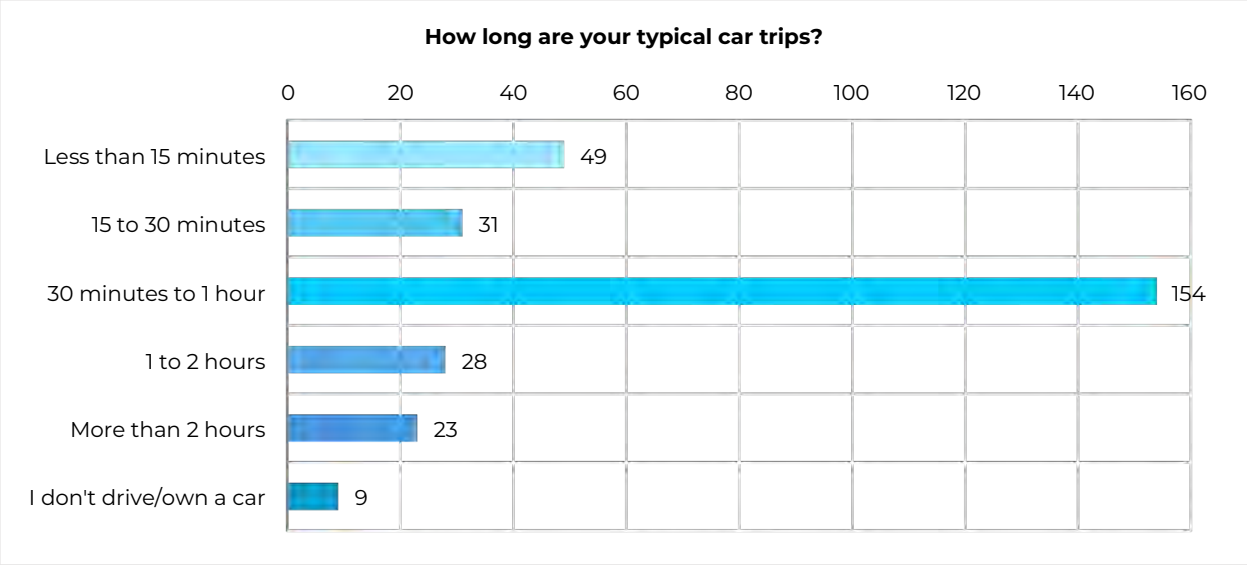
- 282 comments total were added to the online map, open house maps, and community event maps. Most comments were concentrated around three locations:
    1. CU Anschutz
    2. Community College of Aurora Campuses
    3. Parker Road and I-225.

  Full map data can be found in the comprehensive data spreadsheet in the Appendix C: Map Comments or online at engageaurora.org/connectingaurora/maps/add-feedback-by-location.

  The map comments were broken into the following categories:

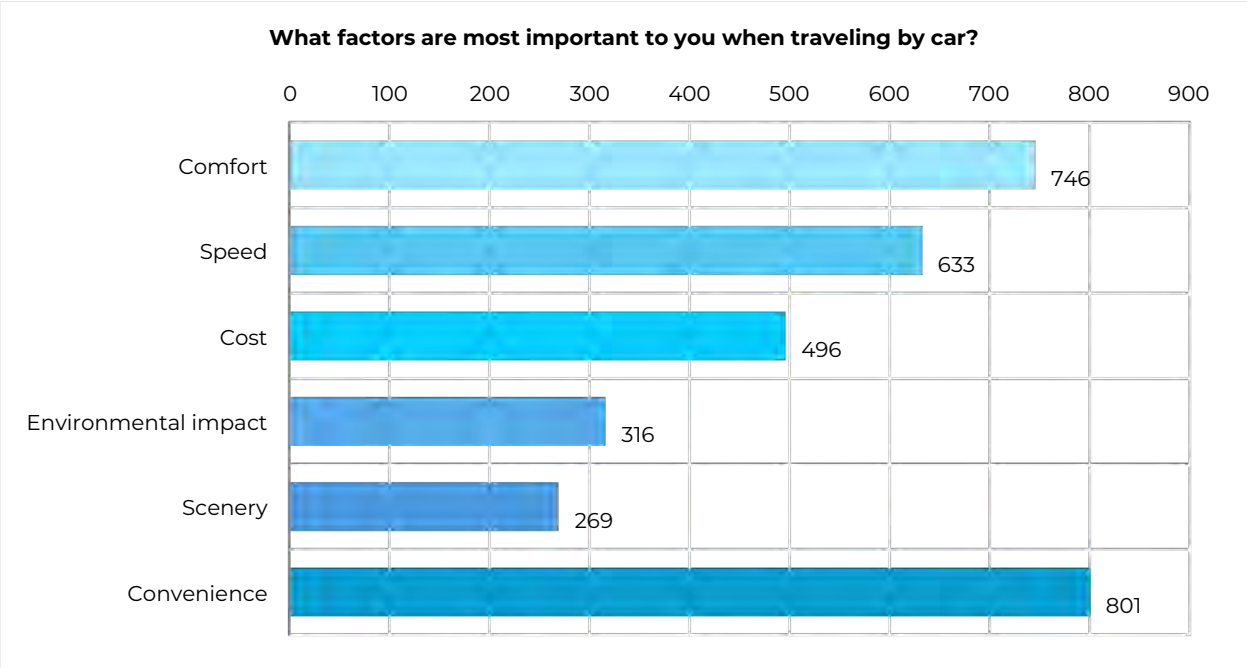
  - Bike: 27%
  - Vehicle: 23%
  - Pedestrian: 20%
  - Transit: 17%
  - Other 12%
  - Freight: 1%

  Concerns were concentrated around Parker Road and I-225, near Aurora Community College and the CU Anschutz Campus. The map on the next page shows hotspots for comments. For a full list of the comments and coordinates, visit the appendix.

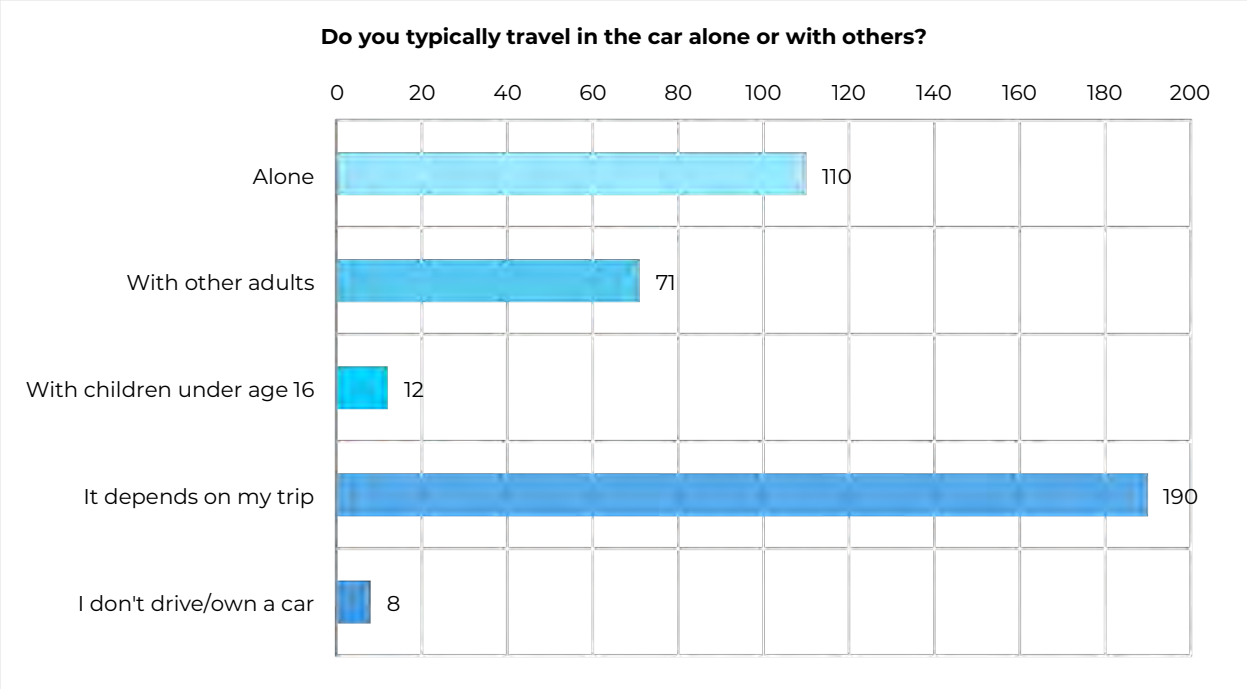


WHAT WE HEARD – VEHICLE TRAVEL

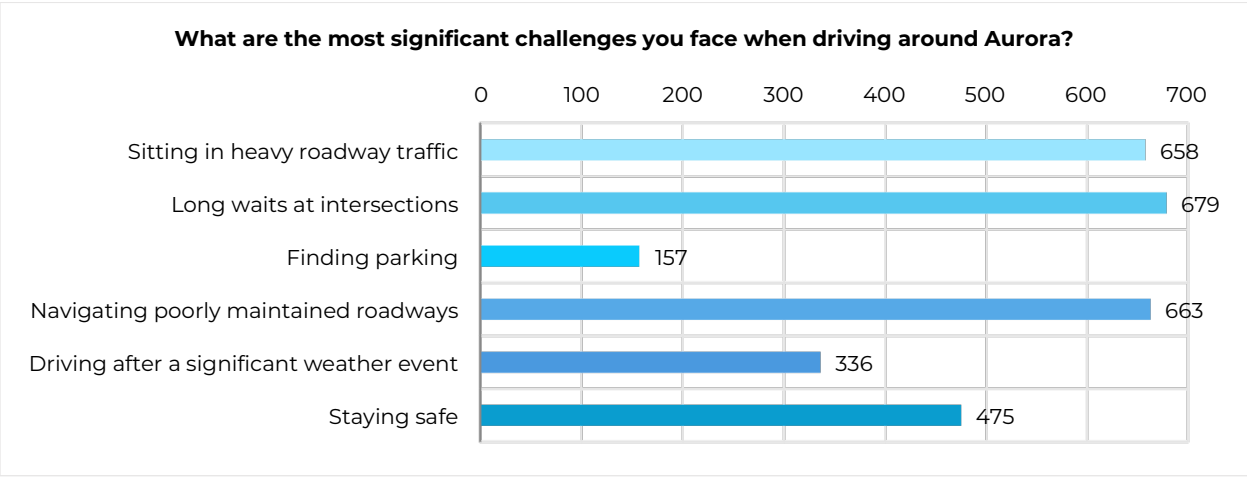
Of those surveyed, the greatest percentage of people (59.4%) indicated that they drive daily or most days, while very few respondents indicated driving less than once a month or less often.



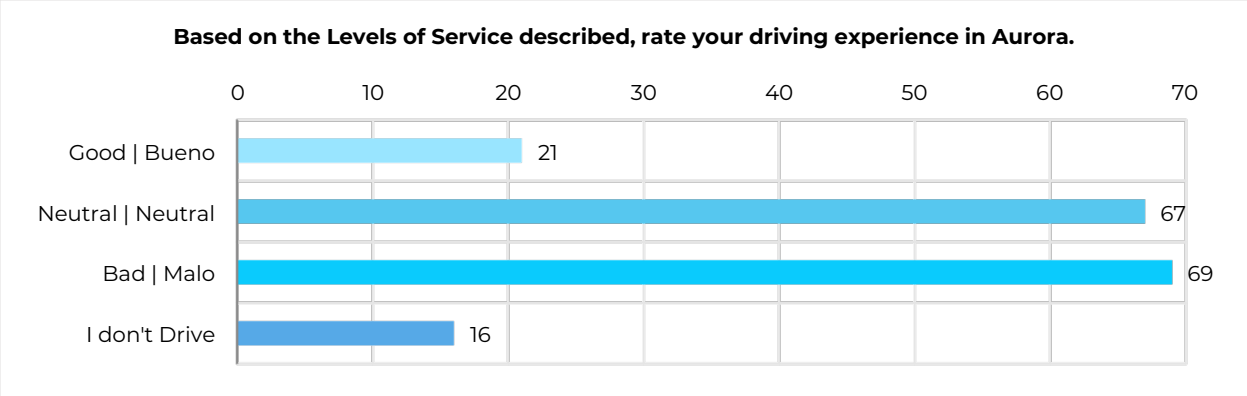
According to survey respondents, a little over half (52%) of vehicle trips are typically 30 min to 1-hour. About 27% of vehicle trips were reported to be typically less than 30 minutes.



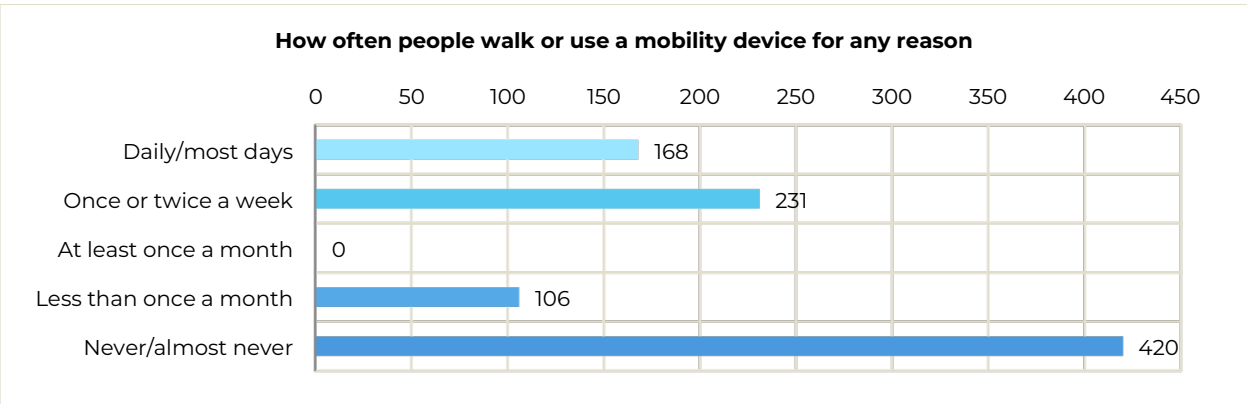
Survey respondents were able to select up to six of the most important factors when traveling by car. In response to this question, the most selected factors were convenience, comfort and speed. Although less commonly selected than some of the other factors, nearly 500 respondents indicated that cost was an important factor when traveling by car.



According to the survey, of those who drive, about 50% indicated that the number of people in their vehicle depends on the trip. Of the remaining drivers, 30% reported typically driving alone and about 20% reported typically driving with others in the vehicle.



According to survey respondents, sitting in heavy roadway traffic, long waits at intersections, and navigating poorly maintained roadways were all nearly tied as the most significant challenge faced when driving around Aurora. Of all the presented challenges, finding parking was the least common challenge identified by respondents.

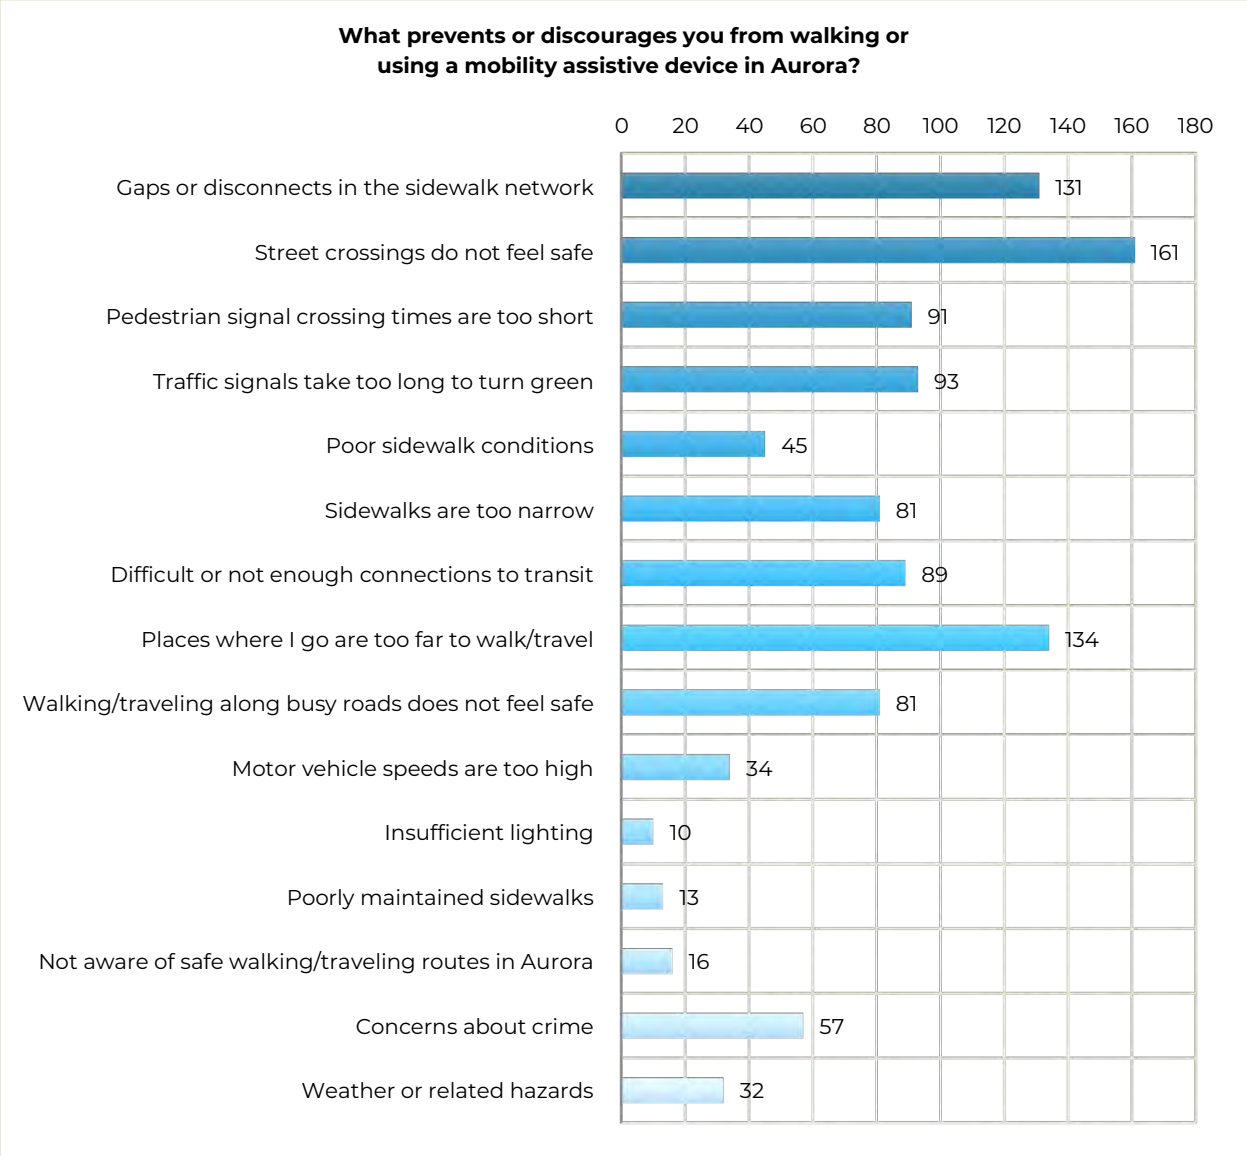


At the in-person and virtual open houses, participants were presented with the meaning of roadway levels of service. Based on the information provided, 39% of those who drive in Aurora rated their experience as bad. Nearly the same percentage of drivers (40%) rated their experience as neutral. Only 12% of drivers rated their experience as good.

WHAT WE HEARD – WALKING

Of the 925 survey responses, 43% walk at least once or twice a week, and 45% never or almost never walk.

Survey respondents were asked to select their top three of 15 listed factors that prevents or discourages them from walking or using a mobility assistive device in Aurora. The three most selected factors were:



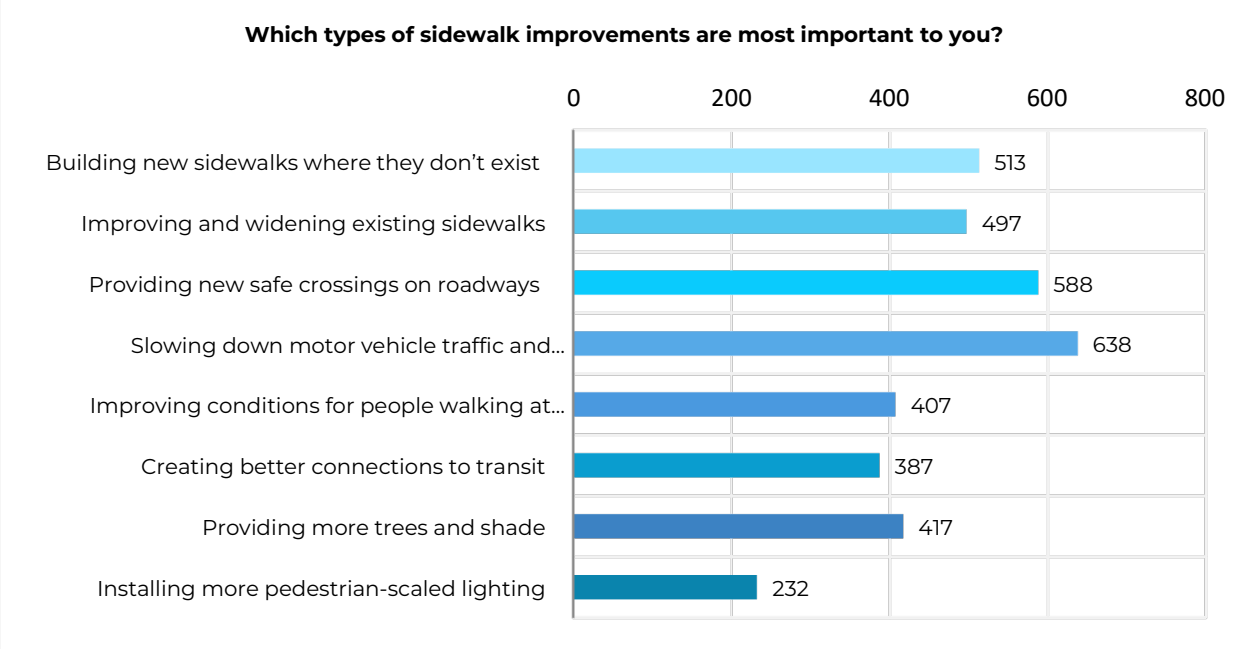
- Street Crossings Do Not Feel Safe (161 responses): Many respondents expressed concerns about the safety of street crossings, indicating that this is a significant deterrent to walking or using mobility devices.
- Gaps or Disconnects in the Sidewalk Network (131 responses): A considerable number of participants noted the presence of gaps or disconnected segments in the sidewalk network, which hinders continuous and safe travel.
    - Places Where I Go Are Too Far to Walk/Travel (134 responses): Distance to destinations was also a major concern, with respondents indicating that the distances involved often exceed what they find manageable or convenient for walking.

A significant amount of people also selected "Pedestrian signal crossing times are too short", "traffic signals take too long to turn green", "Sidewalks are too narrow" and "Difficult and not enough connections to transit."

- Respondents mentioned that pedestrian signal timings are inadequate, making it challenging to cross streets safely (91 responses).

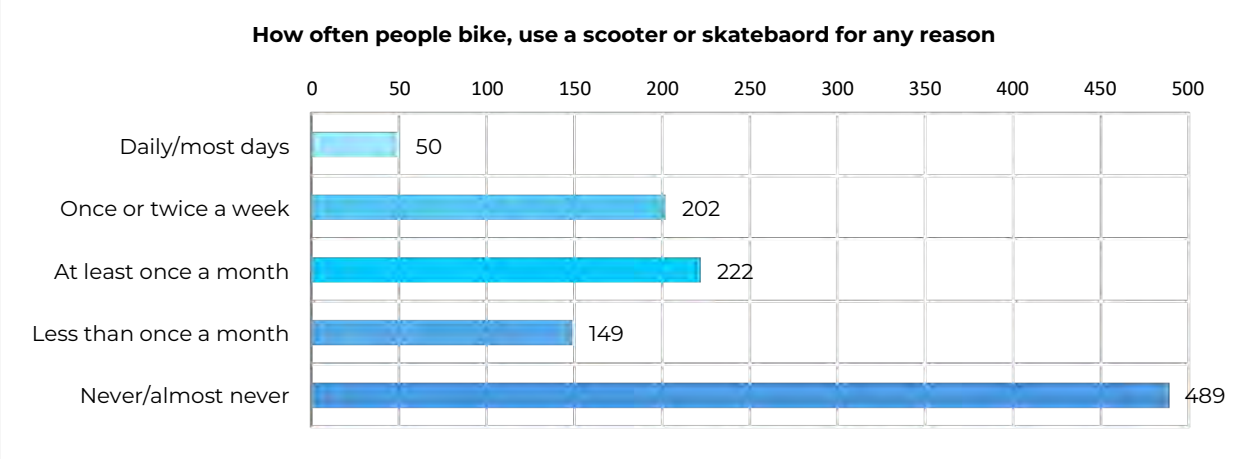
- The delay in traffic signal changes was cited as a frustration that affects mobility (93 responses).
- Many found that inadequate connections to public transit hindered their ability to travel efficiently (89 responses).

Other concerns included poor sidewalk conditions, insufficient lighting, and not being aware of safe routes, though these were less frequently cited. Addressing these diverse issues will be crucial for improving mobility and safety in Aurora. These insights highlight the need for improvements in signal timing, transit connections, sidewalk width, and safety measures to enhance overall mobility.



Survey respondents were presented with eight types of sidewalk improvements and were asked to indicate the top three that were most important to them. The three most selected sidewalk improvements were:

- Slowing Down Motor Vehicle Traffic and Implementing More Traffic-Calming Measures (638 responses): The highest level of concern was expressed regarding the need for traffic-calming measures to enhance safety and reduce vehicle speeds.
- Providing New Safe Crossings on Roadways (588 responses): Ensuring safe crossings at roadways was also a top priority, reflecting a strong desire for improved pedestrian safety at intersections.
- Building New Sidewalks Where They Don't Exist (513 responses): There is a significant demand for constructing new sidewalks in areas where they are currently absent, which would improve overall accessibility.

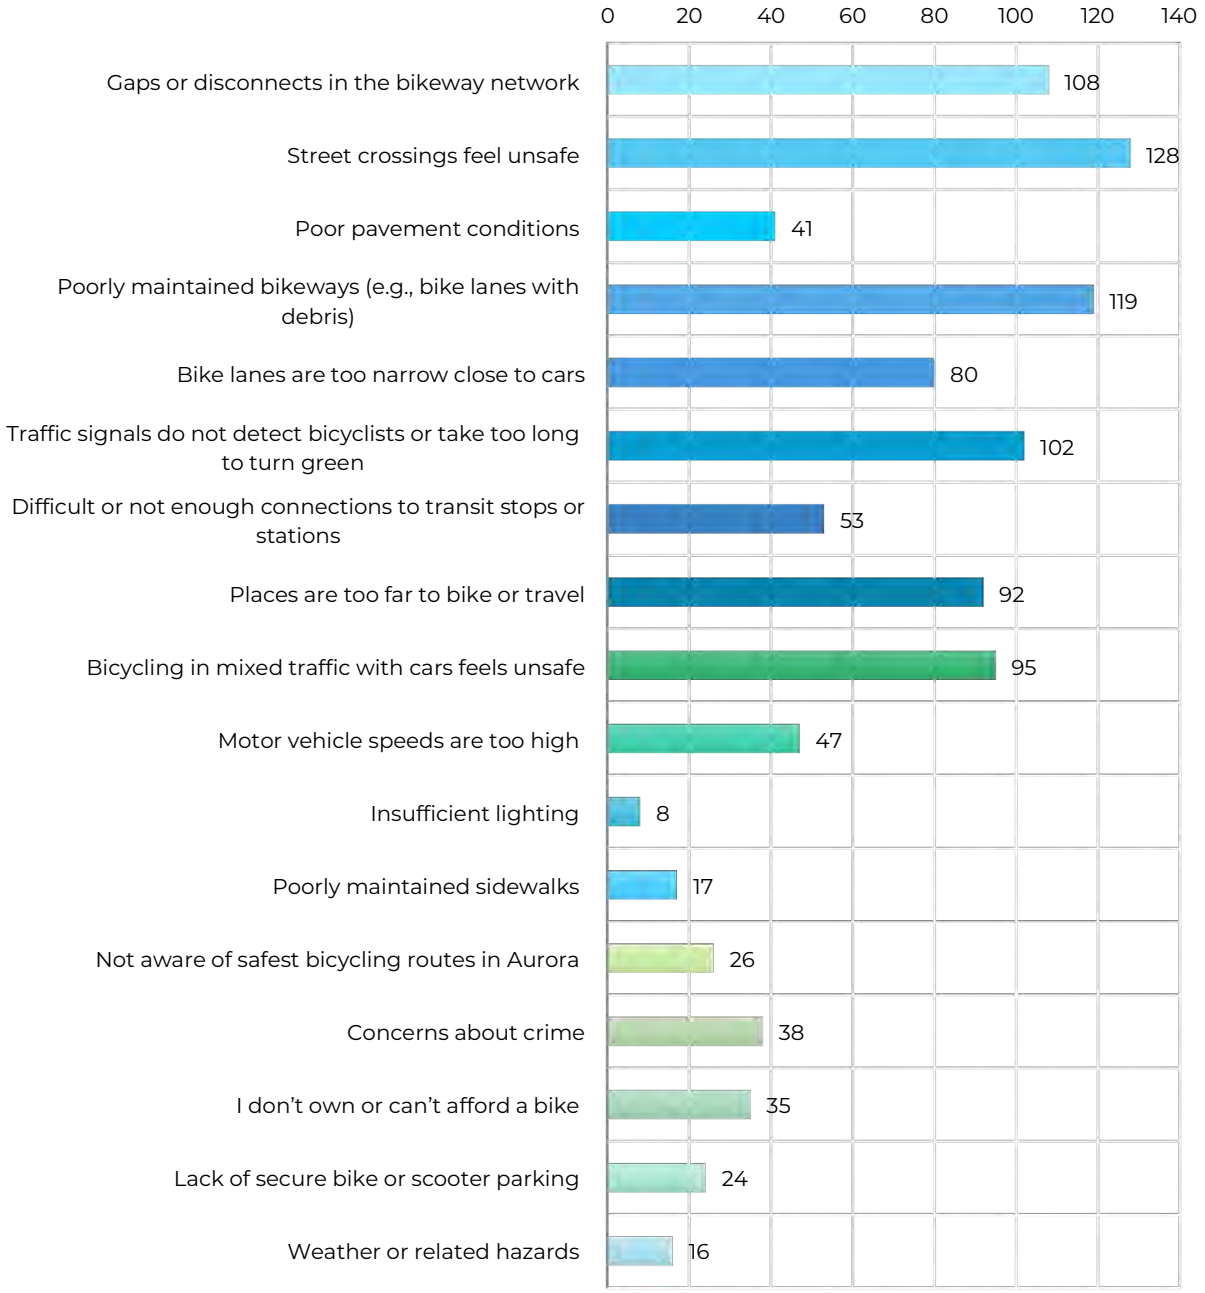


In addition to these top three priorities, respondents also emphasized the importance of:

A significant amount of people also selected "Improving and widening existing sidewalks", "Improving conditions for people walking at signalized intersections", "Creating better connections to transit", and "Providing more trees and shade". This comprehensive feedback underscores a strong emphasis on safety through traffic-calming and improved crossings, alongside significant support for expanding and enhancing the sidewalk infrastructure. Addressing these priorities will be essential for creating a more accessible and pedestrian-friendly environment.

WHAT WE HEARD – BIKING, SCOOTERS, SKATEBOARDS

Of the 1,112 survey responses, only 4% use bikes, scooters, skateboards or other small devices daily; however, 18% use these devices once or twice a week and 19% use them once a month. 43% shared that they never or almost never use those devices.



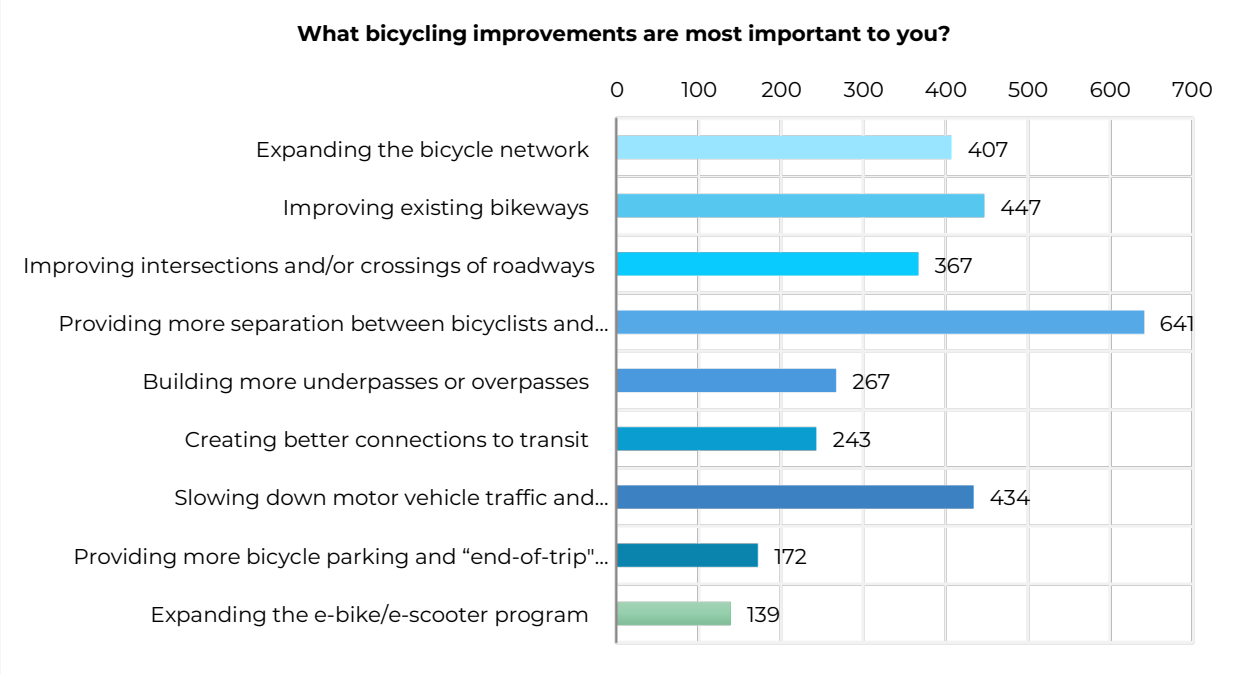
Survey respondents were asked to choose the top three factors out of a list of 17 that prevents or discourages them from biking or using a scooter in Aurora. The three most selected factors were:

- Street Crossings Feel Unsafe (128 responses): The most pressing concern was the perceived lack of safety at street crossings, which deters many from using bikes or scooters.
- Poorly Maintained Bikeways (119 responses): Many respondents noted issues with poorly maintained bikeways, including debris and inadequate upkeep, which affect the safety and enjoyment of biking.
- Gaps or Disconnects in the Bikeway Network (108 responses): A notable number of participants expressed frustration with gaps in the bikeway network, making it difficult to travel seamlessly.

A significant amount of people also selected “Traffic signals do not detect bicyclist or takes too long to turn green (102 responses)”, “Bicycling in mixed traffic with cars feels unsafe (95 responses)”, “Places are too far to bike or travel (92 responses)”, “Bike lanes are too narrow close to cars (80 responses).” This feedback reveals a comprehensive view of the barriers faced by users, with a clear emphasis on safety and infrastructure improvements needed to support biking and scootering in Aurora. Addressing these issues will be essential to encourage more active transportation and ensure a safer, more accessible environment for all users.

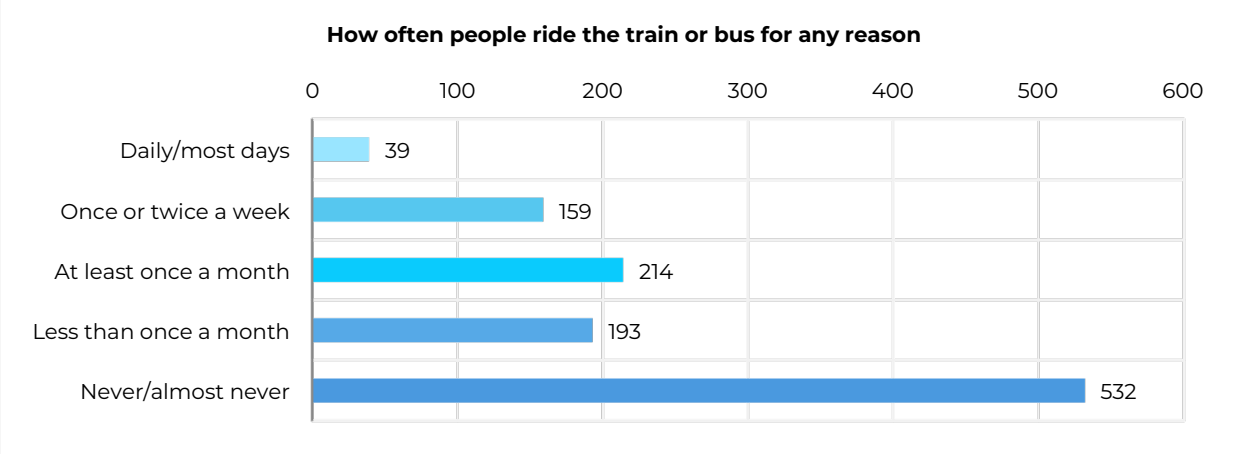
What prevents or discourages you from biking or using a scooter in Aurora?

Survey respondents were presented with nine types of bicycling improvements and were asked to indicate the top three that were most important to them. The three most commonly selected bicycling improvements were:



- Providing More Separation Between Bicyclists and Motor Vehicles Through Protected Bike Lanes or Shared Use Paths (641 responses): The highest priority for respondents was increasing safety by providing greater separation between bicyclists and motor

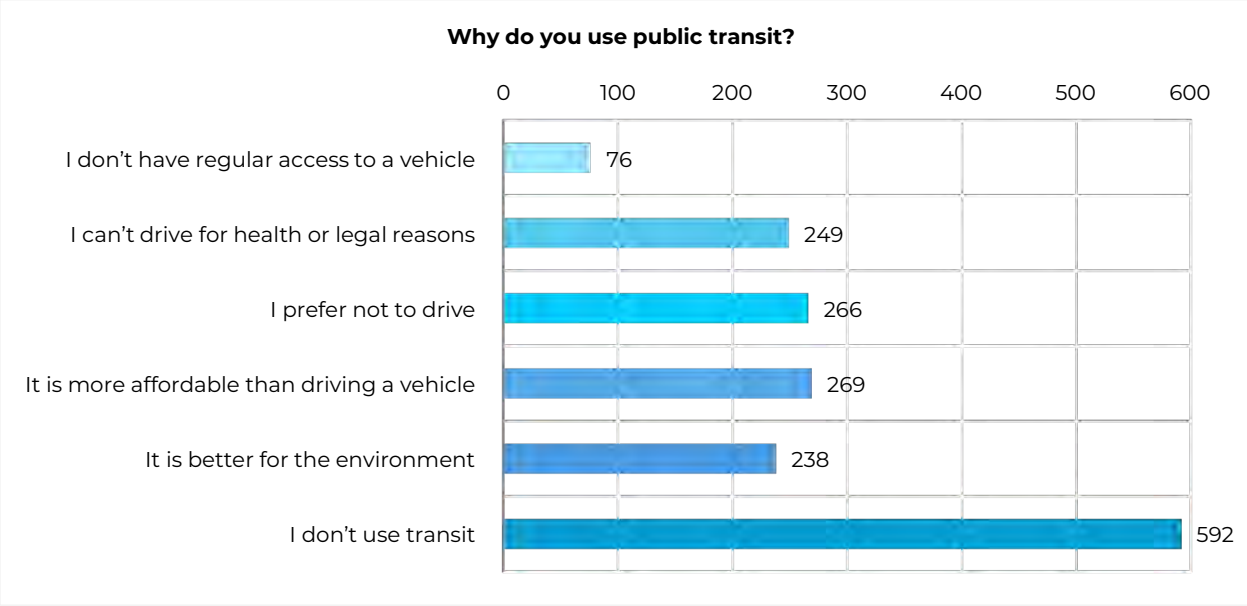
vehicles. This includes the implementation of protected bike lanes and shared use paths.



- Improving Existing Bikeways (447 responses): Enhancing the quality and functionality of current bikeways was also a major concern, reflecting a desire for better-maintained and more effective biking routes.
- Slowing Down Motor Vehicle Traffic and Implementing More Traffic-Calming Measures (434 responses): Many respondents emphasized the need for traffic-calming measures to reduce vehicle speeds and create a safer environment for bicyclists.

In addition to these top priorities, respondents also highlighted the importance of "Expanding the bicycle network (407 responses)", "Improving intersections and/or crossing roadways (367 responses)", "Building more underpasses or overpasses (267 responses)", and "Creating better connections to transit (243 responses)". This comprehensive feedback highlights a strong focus on safety through separation from motor vehicles, infrastructure improvements, and better integration with transit. Addressing these priorities will be essential to fostering a more effective and user-friendly bicycling environment.

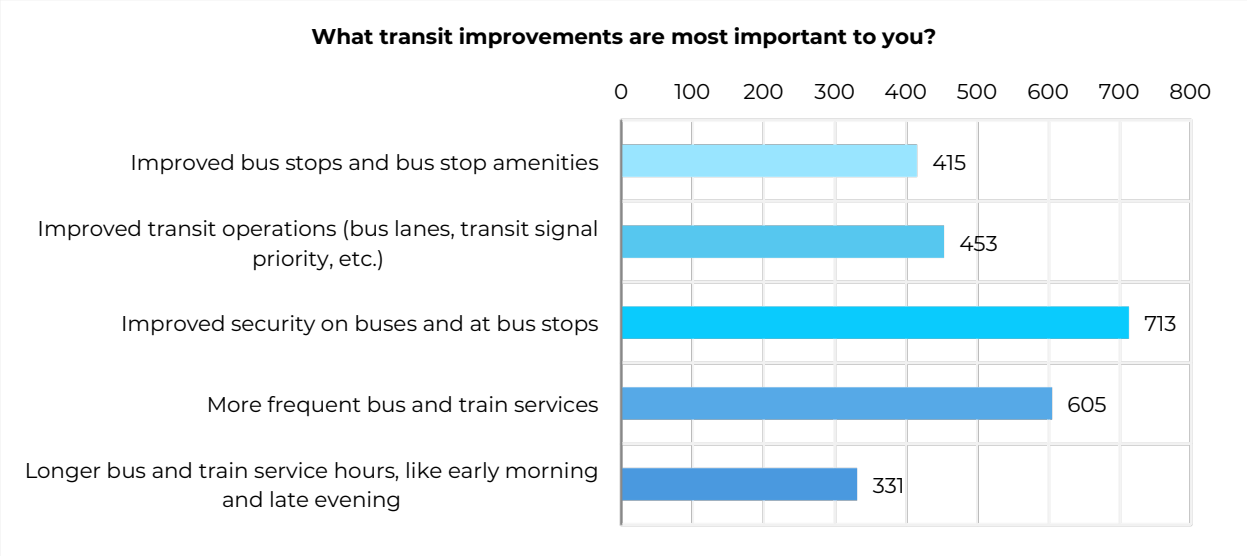
WHAT WE HEARD – TRANSIT



Of the 1,176 responses, 45% never or almost never use the transit. Only 3% use transit daily or most days and 13% uses transit one or two times a week.

When asked why people use transit, most survey respondents indicated that they do not use transit. Of the survey respondents who indicated that they use public transit, the most common responses for why they chose to use transit included:

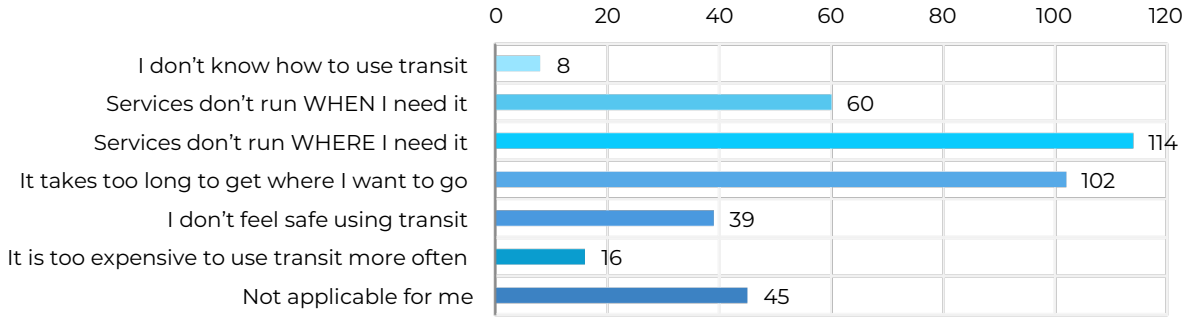
1. Transit being more affordable than driving a vehicle.
2. Preferring not to drive.
3. Not being able to drive for health or legal reasons.



These insights highlight key factors influencing transit use, including cost, personal preference, and limitations related to driving.

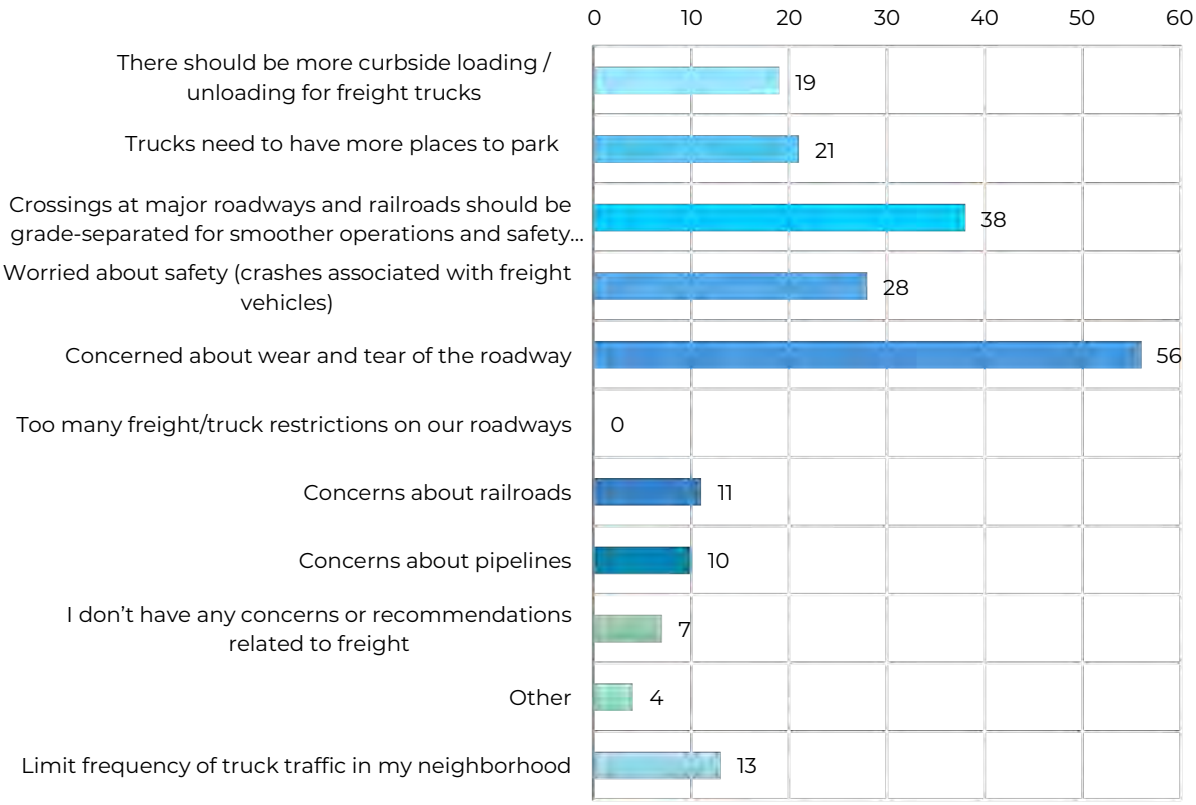
Survey respondents were provided with five types of transit improvements and were asked to indicate their top three. The three most selected transit improvements included:

- Improved Security on Buses and at Bus Stops (713 responses): The top priority for respondents is increasing security on buses and at bus stops. Ensuring safety and reducing crime is seen as crucial for making transit a more secure and reliable option.
- More Frequent Bus and Train Services (605 responses): Many participants emphasized the need for more frequent bus and train services to improve accessibility and convenience for riders.
- Improved Transit Operations - Bus Lanes, Transit Signal Priority, etc. (453 responses): Enhancing transit operations through measures such as dedicated bus lanes and transit signal priority was also a major concern, aimed at increasing the efficiency and reliability of transit services.



Additional important improvements include “Improved bus stops and bus stop amenities (415 responses)”, and “Longer bus and train service hours, like early morning and late evening (331 responses)”. This comprehensive feedback highlights a strong focus on security, frequency of service, and operational improvements, while also recognizing the value of better facilities and extended service hours. Addressing these priorities will be essential to enhancing the overall effectiveness and appeal of the transit system.

Nearly 30% of respondents (114 out of 384) indicated that the most common barrier to transit use was services not running where riders need it. The second most common (27%) barrier to transit use was services taking too long to get to where the rider wants to go.



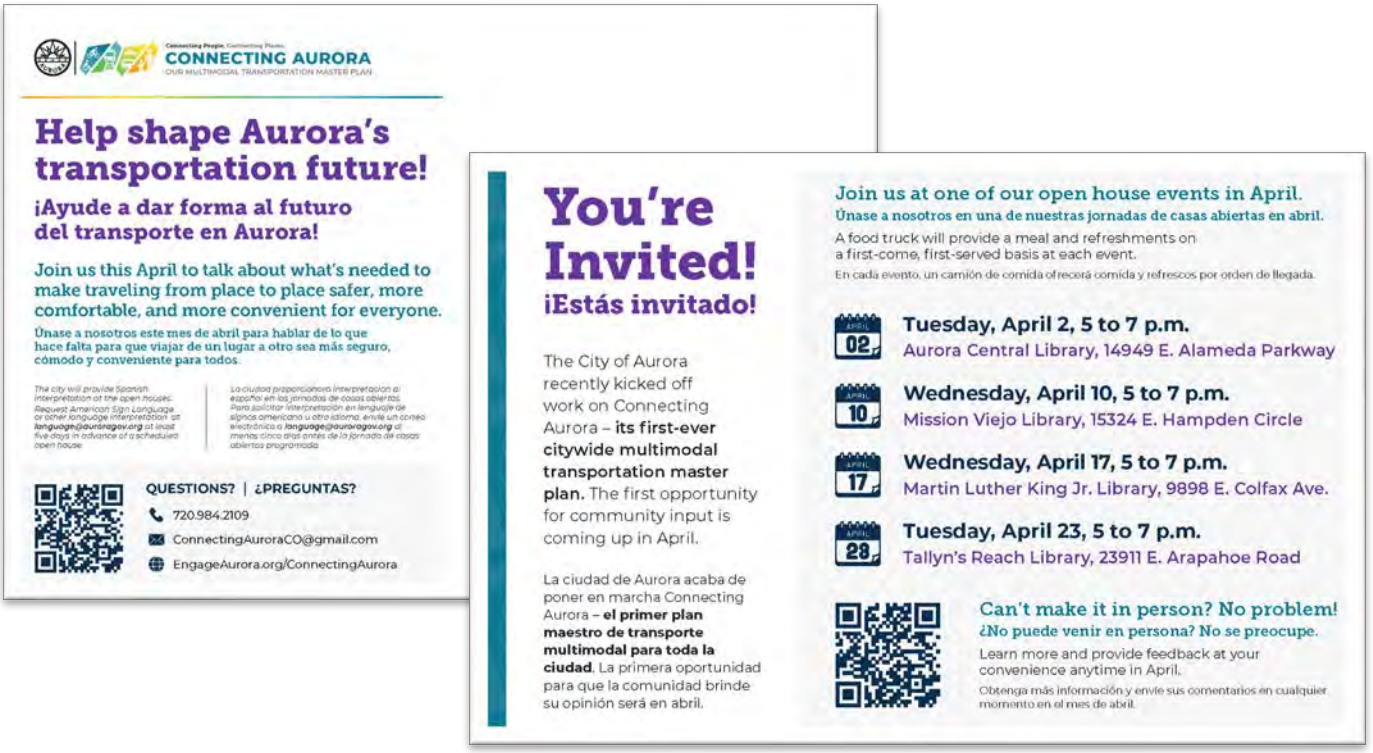
If you use public transit, what prevents you from using it more often? If you don't use transit, why not?

WHAT WE HEARD – FREIGHT

When asked about the biggest concerns pertaining to freight in Aurora, the wear and tear of roadways had the greatest percentage (27%) of responses, followed by 38% for crossings at major roadways and railroads should be grade-separated for smoother operations and safety purposes.

The movement of goods is an important economic driver in our city and region. What are important freight transport considerations that we should keep in mind as we work on this plan

CONSIDERATIONS FOR FUTURE ENGAGEMENT



During Milestone 1, the project team employed traditional engagement methods typical of pre-COVID practices, such as project-centered open houses. Moving forward, the project team should consider the following to address these shortcomings and enhance future stakeholder engagement:

  - Limit the number of open houses and focus in-person engagement in Original Aurora. Allocate more resources to participating in existing community events and functions throughout the city.
- Limit the number of display boards at the events at open houses. Several of the rooms at the libraries were too small for the number of boards.
- Shorten and simplify the survey. Condensing the survey to 5-minutes led to a substantial increase in responses. Most respondents skipped the table on page 2 of the survey. Remove overly complicated questions to garner more feedback.
- Continue using prize drawings as incentives. The gift card drawing was well received; however, consider smaller incentives that can be handed out at events.

Add a question about home address/location to the survey. To better interpret results, a question should be added that informs where the respondent generally lives (e.g., which ward do you reside in? If you do not know your ward, what is your zip code?).

APPENDIX A: MILESTONE 1 PROMOTIONAL MATERIALS

POSTCARDS TO MOBILE HOME PARKS AND MULTIFAMILY RESIDENTS

OPEN HOUSE FLYER

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Help shape Aurora's transportation future!

Be part of Aurora's first-ever citywide multimodal transportation master plan.

Connecting Aurora will look at the city as a whole and identify what's needed to make traveling from place to place safer, more comfortable, and more convenient for everyone. The plan will look at critical safety issues and mobility challenges for people walking, biking, driving a car, taking transit, or driving a delivery truck, and will create a vision for Aurora's transportation system and identify necessary projects, policies, standards, and programs for the city over the next five to 20 years and beyond.

Join us in April to learn more and provide initial feedback to get us started on the plan.

Provide feedback online!

Visit **EngageAurora.org/ConnectingAurora** throughout the month of April to review the open house materials and tell us what you think.

720.984.2109
ConnectingAuroraCO@gmail.com
EngageAurora.org/ConnectingAurora

ATTEND A 2024 OPEN HOUSE

Show up anytime during the two-hour period. A food truck will provide a meal and refreshments on a first-come, first-served basis at each event.

Tuesday, April 2, 5 to 7 p.m.
Aurora Central Library
14949 E. Alameda Parkway
Food truck: Shuggs BBQ

Wednesday, April 10, 5 to 7 p.m.
Mission Viejo Library
15324 E. Hampden Circle
Food truck: Just a Buck Truck

Wednesday, April 17, 5 to 7 p.m.
Martin Luther King Jr. Library
9898 E. Colfax Ave.
Food truck: Prieto's Catering

Tuesday, April 23, 5 to 7 p.m.
Tallyn's Reach Library
23911 E. Arapahoe Road
Food truck: Shuggs BBQ

*The city will provide Spanish interpretation at the open houses. To request American Sign Language or other language interpretation, at **language@auroragov.org** at least five days in advance of a scheduled open house.*

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

anos a dar forma al futuro ansporte en Aurora.

en el primer plan e transporte al de Aurora.

ora examinará la ciudad e identificará lo que se ajar de un lugar a otro cómodo y conveniente an examinará los os de seguridad y los ad para las personas que caminan, van en bicicleta, conducen un vehículo, toman el transporte público o conducen un camión de reparto, y creará una visión para el sistema de transporte de Aurora e identificará los proyectos, las políticas, las normas y los programas necesarios para la ciudad en los próximos cinco a 20 años y más adelante.

Visítenos en abril para obtener más información y hacernos llegar sus comentarios iniciales sobre el plan.

¡Envíenos sus comentarios en línea!

FACT SHEET

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2024

PROJECT OVERVIEW

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around. But this year, the city is launching Connecting Aurora – its first-ever citywide multimodal transportation master plan – to look holistically at the transportation needs of the entire city.

Connecting Aurora is a transportation plan that will identify projects, policies, and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees, and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

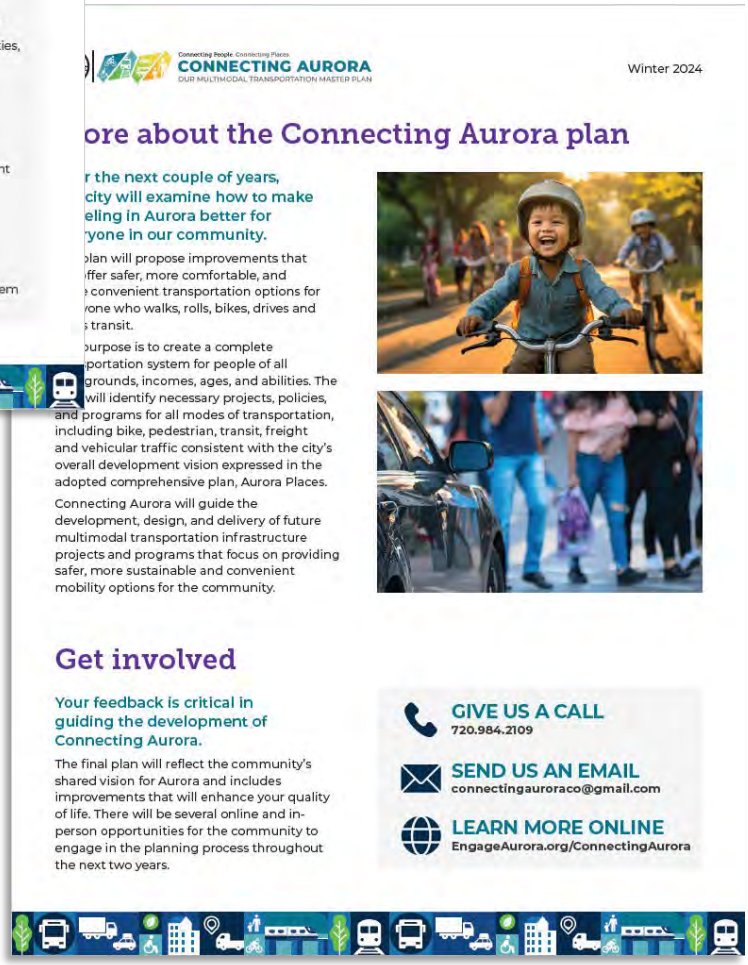
What does multimodal mean?

Multimodal is a transportation term that means all the different ways people travel. This could be your car, a bus or train, your feet or wheels, bicycle, scooter, skateboard, hoverboard, or box truck. You name it.

We want to make sure this plan considers all types of transportation modes.

PLANNING PROCESS AND TIMELINE

Connecting Aurora is being developed over the next two years and a final draft will be presented at the end of 2025. Throughout the process, we will work closely with you to make sure we are headed in the right direction and that the outcomes reflect the needs of our community.



Below is a timeline of the planning process.

Discover (Early 2024)
- Existing Conditions Analysis
- Future Trends Analysis

Synthesize (Mid-2024)
- Vision, Goals, Objectives, Values, Priorities
- Strength, Weakness, Opportunities, and Challenges Analysis
- Scenario Development
- Modeling and Testing

Visualize (Late 2024 to Mid-2025)
- Multimodal System Development and Evaluation

Realize (Late 2025)
- Policies and Programs
- Implementation Plan
- Final Report and citywide Transportation Information System

CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2024

ore about the Connecting Aurora plan

r the next couple of years, city will examine how to make eling in Aurora better for yone in our community.

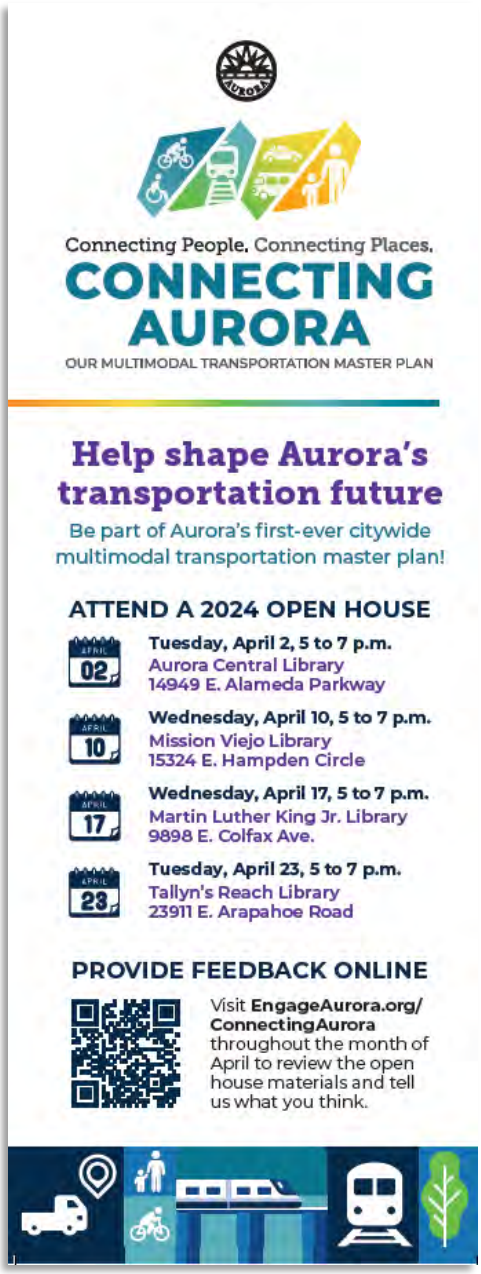
lan will propose improvements that ffer safer, more comfortable, and convenient transportation options for one who walks, rolls, bikes, drives and transit.

urpose is to create a complete portation system for people of all grounds, incomes, ages, and abilities. The will identify necessary projects, policies, and programs for all modes of transportation, including bike, pedestrian, transit, freight and vehicular traffic consistent with the city's overall development vision expressed in the adopted comprehensive plan, Aurora Places.

Connecting Aurora will guide the development, design, and delivery of future multimodal transportation infrastructure projects and programs that focus on providing safer, more sustainable and convenient mobility options for the community.

Get involved

Your feedback is critical in guiding the development of Connecting Aurora.



The final plan will reflect the community's shared vision for Aurora and includes improvements that will enhance your quality of life. There will be several online and in-person opportunities for the community to engage in the planning process throughout the next two years.

February 2024

Help shape our entire **transportation system**

What is your vision for the future of transportation in Aurora? What transportation improvements and options would you like to see?

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around. But this year, the city is launching Connecting Aurora--its first-ever citywide multimodal transportation master plan--to look holistically at the transportation needs of the entire city.

Over the next couple of years, the city will examine how to make traveling in Aurora better for everyone in our community, including people of all incomes and abilities. The plan will propose improvements to be implemented over the next five to 20 years and beyond to offer safer, more comfortable, and more convenient transportation options for everyone who walks, rolls, bikes, drives and takes transit.

Your feedback is critical in guiding the development of Connecting Aurora. Help us shape Aurora's transportation future and guide investment to enhance your quality of life.

Visit **EngageAurora.org/ConnectingAurora** to find out more about upcoming engagement opportunities. To ask questions, email connectingauroraco@gmail.com or call 720.984.2109.

The city will start gathering input this spring and continue throughout the year, and we look forward to partnering with our community on this important effort.

RTD lowers fares for all services

The Regional Transportation District (RTD) implemented a new systemwide fare structure on Jan. 1. This is the first time the agency has lowered fares for all RTD services. The change is a result of a yearlong fare study and equity analysis aimed at creating a fare structure that is more equitable, affordable, and simple. To find out details on the new fares, visit **RTD-Denver.com**.

Upcoming Aurora City Council Town Meetings

This publication went to print in early January. Please call 303.739.7015 or visit AuroraGov.org/TownMeetings to confirm details (hybrid meeting links are available on the webpage).

SURVEY

CONNECTING AURORA

Community survey.

Milestone 1: State of Aurora's transportation system.

The city of Aurora is gathering information from the community on our transportation system as part of Connecting Aurora, the city's first-ever multimodal transportation master plan. **If you walk, bike, roll, drive or take transit in Aurora, please complete the survey by April 30, 2024.**

Visit **EngageAurora.org/ConnectingAurora** or scan the QR code to find out more or take the digital survey. The website has Google Translate to translate project information into many languages. To request translation in another format, email **language@auroragov.org.**

TELL US ABOUT YOURSELF.

Do you live, work, visit or commute through Aurora?
- ☐ Live
- ☐ Work
- ☐ Commute through
- ☐ Visit

Enter the zip code(s) in Aurora where you live, work or visit most frequently: (Up to 3)

Please specify your race or ethnicity.
- ☐ White
- ☐ Hispanic or Latino
- ☐ Black or African American
- ☐ Native American or American Indian
- ☐ Asian / Pacific Islander
- ☐ One or more

What is your preferred speaking language?

What generation do you fit into?
- ☐ Gen Z — 10 to 24 years
- ☐ Millennial — 25 to 40 years
- ☐ Gen X — 41 to 56 years
- ☐ Baby Boomer — 57 to 75 years
- ☐ Greatest/Silent Generation — 75+ years

What gender do you identify with?
- ☐ Man
- ☐ Woman
- ☐ Non-binary
- ☐ Prefer to self-describe

How often do you participate in transportation or community plans?
- ☐ Often
- ☐ Sometimes
- ☐ Never / This is my first time

How would you like to continue to participate and stay engaged?
- ☐ Website
- ☐ Hearing through organizations I'm involved in
- ☐ At events or on the street
- ☐ Social media
- ☐ Email

How did you hear about this project?
- ☐ Website
- ☐ Social media
- ☐ Flyer
- ☐ Newsletter
- ☐ Word of mouth or community meeting/event
- ☐ TV / radio / newspaper
- ☐ Other _____

TRAVELING AROUND AURORA BY CAR.

How long are your typical car trips?

- ☐ Less than 15 minutes
- ☐ 15 minutes to 30 minutes
- ☐ 30 minutes to 1 hour
- ☐ 1 to 2 hours
- ☐ More than 2 hours
- ☐ I don't drive / own a car

Do you typically travel in the car alone or with others?

- ☐ Alone
- ☐ With other adults
- ☐ With children under age 16
- ☐ It depends on my trip
- ☐ I don't drive / own a car

What factors are most important to you when traveling by car? (Select all that apply)

- ☐ Comfort
- ☐ Speed
- ☐ Cost
- ☐ Scenery
- ☐ Convenience
- ☐ Environmental impact

What are the most significant challenges you face when driving around Aurora? (Select top 3)

- ☐ Sitting in heavy roadway traffic
- ☐ Long waits at intersections
- ☐ Finding parking
- ☐ Navigating poorly maintained roadways
- ☐ Driving after a significant weather event
- ☐ Staying safe

TRAVELING AROUND AURORA BY FOOT OR MOBILITY ASSISTIVE DEVICE.

What prevents or discourages you from walking or using a mobility assistive device in Aurora? (Select top 3)

- ☐ Gaps or disconnects in the sidewalk network
- ☐ Street crossings do not feel safe
- ☐ Pedestrian signal crossing times are too short
- ☐ Traffic signals take too long to turn green
- ☐ Poor sidewalk conditions
- ☐ Sidewalks are too narrow
- ☐ Difficult or not enough connections to transit
- ☐ Places where I go are too far to walk/travel
- ☐ Walking / traveling along busy roads does not feel safe
- ☐ Motor vehicle speeds are too high
- ☐ Insufficient lighting
- ☐ Poorly maintained sidewalks
- ☐ Not aware of safe walking/traveling routes in Aurora
- ☐ Concerns about crime
- ☐ Weather or related hazards

Which types of sidewalk improvements are most important to you? (Select top 3)

- ☐ Building new sidewalks where they don't exist
- ☐ Improving and widening existing sidewalks
- ☐ Providing new safe crossings on roadways
- ☐ Improving conditions for people walking at signalized intersections
- ☐ Creating better connections to transit
- ☐ Slowing down motor vehicle traffic and implementing more traffic-calming measures
- ☐ Providing more trees and shade
- ☐ Installing more pedestrian-scaled lighting

TRAVELING AROUND AURORA BY BICYCLE, SCOOTER, OR SIMILAR SMALL DEVICE.

What prevents or discourages you from biking or using a scooter in Aurora? (Select top 3)

- ☐ Gaps or disconnects in the bikeway network
- ☐ Street crossings too unsafe
- ☐ Poor pavement conditions
- ☐ Poorly maintained bikeways (e.g., bike lanes with debris)
- ☐ Bike lanes are too narrow / close to cars
- ☐ Traffic signals do not detect bicyclists or take too long to turn green
- ☐ Difficult or not enough connections to transit stops or stations
- ☐ Places are too far to bike or travel
- ☐ Bicycling in mixed traffic with cars feels unsafe
- ☐ Motor vehicle speeds are too high
- ☐ Poorly maintained sidewalks
- ☐ Not aware of safest bicycling routes in Aurora
- ☐ Concerns about crime
- ☐ I don't own or can't afford a bike
- ☐ Lack of secure bike or scooter parking
- ☐ Insufficient lighting
- ☐ Weather or related hazards

TRAVELING AROUND AURORA BY BICYCLE, SCOOTER, OR SIMILAR SMALL DEVICE.

What bicycling improvements are most important to you? (Select top 3)

- ☐ Expanding the bicycle network
- ☐ Improving existing bikeways
- ☐ Improving intersections and / or crossings of roadways
- ☐ Providing more separation between bicyclists and motor vehicles through protected bike lanes or shared use paths
- ☐ Building more underpasses or overpasses
- ☐ Creating better connections to transit
- ☐ Slowing down motor vehicle traffic and implementing more traffic-calming measures
- ☐ Providing more bicycle parking and "end-of-trip" facilities (e.g., showers, lockers)
- ☐ Expanding the e-bike / e-scooter program

TRAVELING AROUND AURORA BY BUS OR TRAIN.

Why do you use public transit?

- ☐ I don't have regular access to a vehicle
- ☐ I can't drive for health or legal reasons
- ☐ I prefer not to drive
- ☐ It is more affordable than driving a vehicle
- ☐ It is better for the environment
- ☐ I don't use transit

What transit improvements are most important to you? (Select top 3)

- ☐ Improved bus stops and bus stop amenities
- ☐ Improved transit operations (bus lanes, transit signal priority, etc.)
- ☐ Improved security on buses and at bus stops
- ☐ More frequent bus and train services
- ☐ Longer bus and train service hours, like early morning and late evening

If you use public transit, what prevents you from using it more often? If you don't use transit, why not?

- ☐ I don't know how to use transit
- ☐ Services don't run WHEN I need it
- ☐ Services don't run WHERE I need it
- ☐ It takes too long to get where I want to go
- ☐ I don't feel safe using transit
- ☐ It is too expensive to use transit more often
- ☐ Language barrier
- ☐ Not applicable for me

Thank you!

Your feedback is critical in guiding the development of Connecting Aurora. The final plan will reflect the community's shared vision for Aurora's Multimodal Transportation System and includes improvements that will enhance your quality of life. There will be several online and in-person opportunities for the community to engage in the planning process.

Please provide your email so we can keep you informed on project updates and enter you into a drawing for a gift card. *Your information will not be shared.*

PUBLIC MEETING BOARDS

OVERVIEW OF THE PROJECT

What is Connecting Aurora?

Connecting Aurora is the first-ever citywide multimodal transportation master plan to look holistically at the transportation needs throughout Aurora.

It aims to identify ways to better connect our residents, employees, and visitors to various destinations across the city.

- Create a vision for the city's transportation system (bikes, pedestrian, transit, freight, and vehicular traffic).
- Guide the development, design, and delivery of future multimodal transportation projects and programs.
- Improve safety and provide more convenient ways to travel for all people of Aurora.

WHAT'S A TRANSPORTATION MODE?

Transportation mode refers to the way in which passengers and/or goods can be transported.

WHAT DOES MULTIMODAL MEAN?

Multimodal is a transportation term that means all the different ways people move from point A to B. This could be your feet or wheels, bicycle, scooter, skateboard, hoverboard, car, bus, train, or box truck.

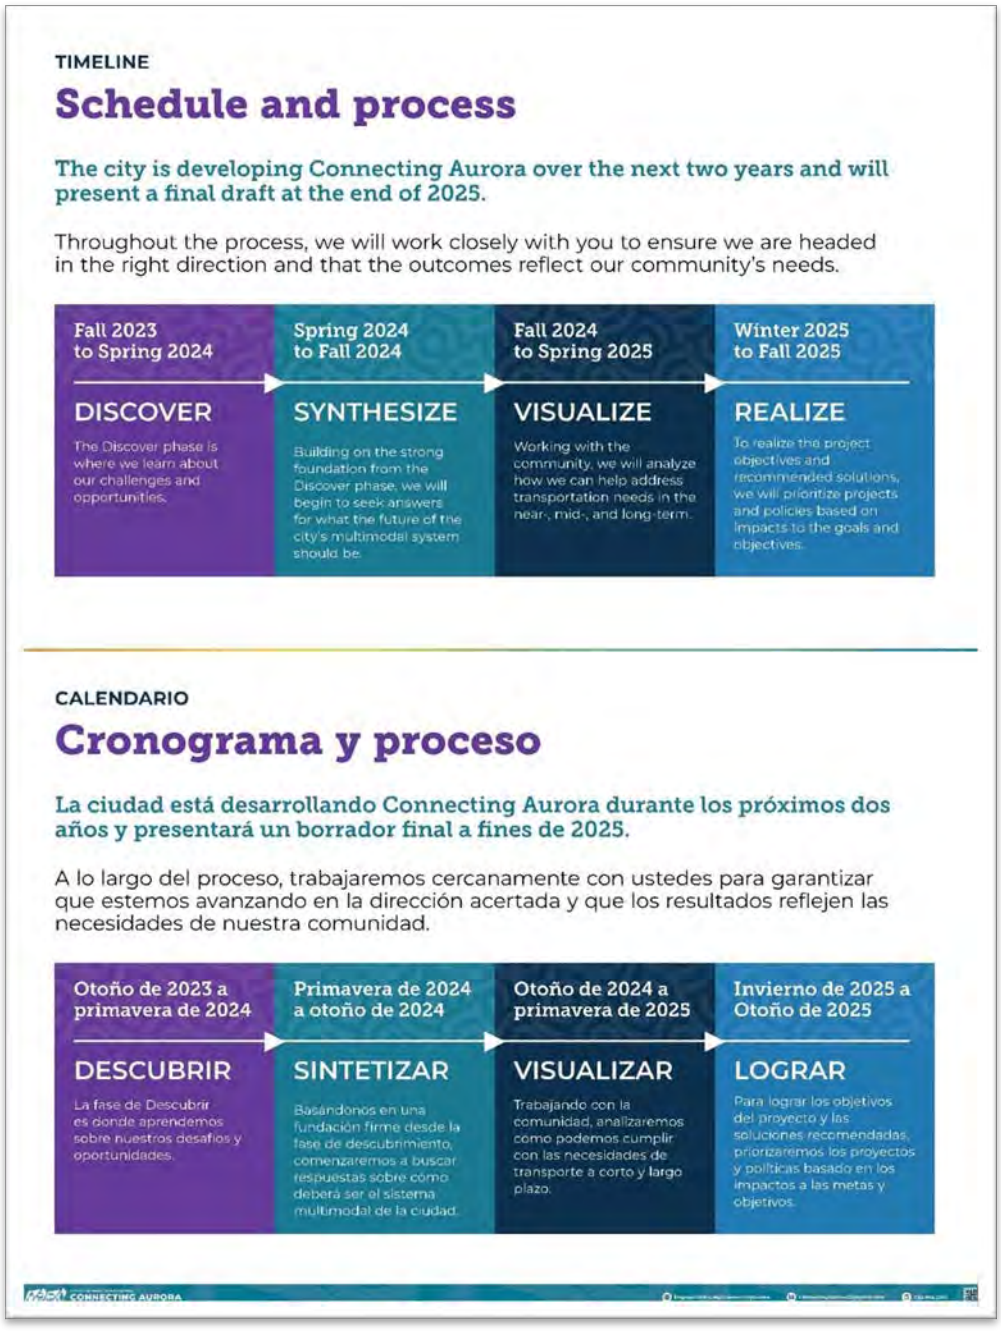
RESUMEN DEL PROYECTO

¿Qué es Connecting Aurora?

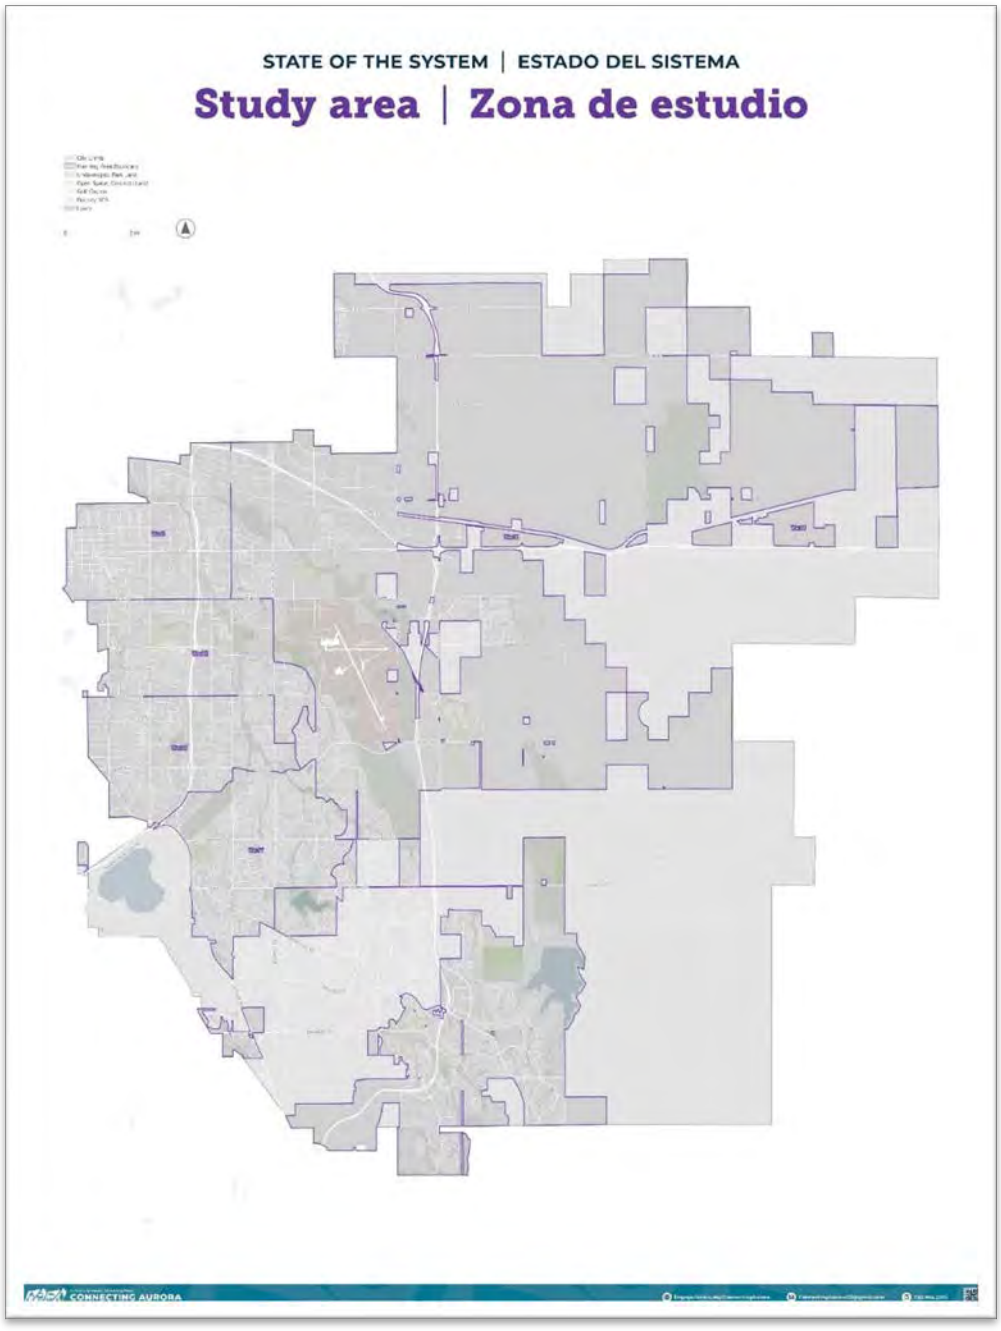
Connecting Aurora es el primer plan maestro de transporte multimodal diseñado para analizar holísticamente todas las necesidades de transporte en Aurora.

El objetivo del plan es identificar maneras para facilitar conexiones entre nuestros habitantes, empleados y visitas y los diversos destinos por toda la ciudad.

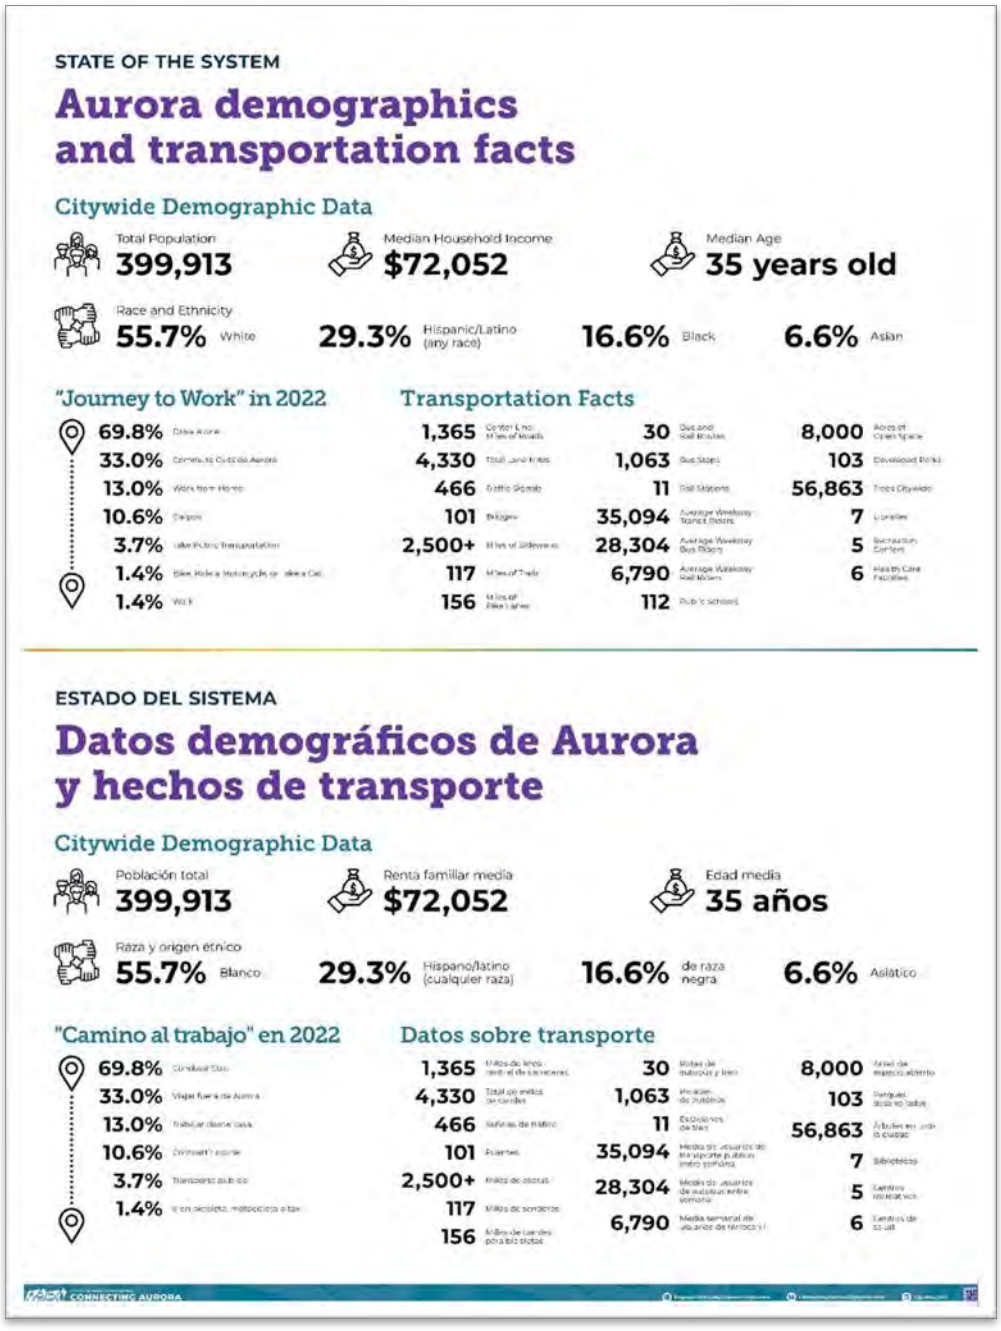
- Crear una visión del sistema de transporte de la ciudad (ciclistas, peatones, tránsito, mercancías, y tráfico vehicular).
- Guiar el desarrollo y diseño de futuros programas y proyectos de transporte multimodal.
- Mejorar la seguridad y ofrecer modalidades de transporte más convenientes para todos los habitantes de Aurora.



¿QUÉ ES UN MODO DE TRANSPORTE?



La frase modo de transporte se refiere a la manera cómo se puede transportar a los pasajeros y mercancía.



¿QUÉ SIGNIFICA MULTIMODAL?

La palabra multimodal es un término de transporte que significa todas las maneras como una persona se pueda mover desde un punto A hasta un punto B. Estas podrían incluir a pie, en ruedas, bicicleta, scooter, patineta, carro, autobús, tren o camión.

PROJECT NEED
Why do we need a multimodal transportation master plan?
The purpose of Connecting Aurora is to create a complete transportation system for people of all backgrounds, ages, abilities, and income levels.
A single, encompassing vision and plan for Aurora's multimodal transportation system is needed.
This transportation master plan will be the basis for the city's Capital Improvement Program.
Growth and diversification of Aurora needs to be supported by an evolving transportation network.
Safety improvements and connectivity enhancements can be proactively identified and built.
The city can plan for new technologies and transportation services.
Implementing performance metrics and tracking systems will help Aurora realize changes and monitor progress.
NECESIDAD DEL PROYECTO
¿Por qué necesitamos un plan maestro de transporte multimodal?
El propósito de Connecting Aurora es crear un Sistema de transporte completo para las personas de todo antecedente, edad, habilidad, y nivel de ingresos.
Se necesita un plan y visión singular e integral del sistema de transporte multimodal de Aurora.
Este plan maestro de transporte será la base del Programa de mejora de capital.
Se debe apoyar el crecimiento y diversificación de Aurora con una red de transporte en evolución.
Se pueden identificar y desarrollar proactivamente las mejoras de seguridad y conectividad.
La ciudad puede planificar para el uso de nuevas tecnologías y servicios de transporte.
Implementar medición de rendimiento y sistemas de seguimiento ayudarán a Aurora a realizar cambios y monitorear el progreso.
CONNECTING AURORA

TIMELINE
Schedule and process
The city is developing Connecting Aurora over the next two years and will present a final draft at the end of 2025.
Throughout the process, we will work closely with you to ensure we are headed in the right direction and that the outcomes reflect our community's needs.
Fall 2023 to Spring 2024
DISCOVER
The Discover phase is where we learn about our challenges and opportunities.
Spring 2024 to Fall 2024
SYNTHESIZE
Building on the strong foundation from the Discover phase, we will begin to seek answers for what the future of the city's multimodal system should be.
Fall 2024 to Spring 2025
VISUALIZE
Working with the community, we will analyze how we can help address transportation needs in the near-, mid-, and long-term.
Winter 2025 to Fall 2025
REALIZE
To realize the project objectives and recommended solutions, we will prioritize projects and policies based on impacts to the goals and objectives.
CALENDARIO
Cronograma y proceso
La ciudad está desarrollando Connecting Aurora durante los próximos dos años y presentará un borrador final a fines de 2025.
A lo largo del proceso, trabajaremos cercanamente con ustedes para garantizar que estemos avanzando en la dirección acertada y que los resultados reflejen las necesidades de nuestra comunidad.
Otoño de 2023 a primavera de 2024
DESCUBRIR
La fase de Descubrir es donde aprendemos sobre nuestros desafíos y oportunidades.
Primavera de 2024 a otoño de 2024
SINTETIZAR
Basándonos en una fundación firme desde la fase de descubrimiento, comenzaremos a buscar respuestas sobre cómo deberá ser el sistema multimodal de la ciudad.
Otoño de 2024 a primavera de 2025
VISUALIZAR
Trabajando con la comunidad, analizaremos cómo podemos cumplir con las necesidades de transporte a corto y largo plazo.
Invierno de 2025 a Otoño de 2025
LOGRAR
Para lograr los objetivos del proyecto y las soluciones recomendadas, priorizaremos los proyectos y políticas basado en los impactos a las metas y objetivos.

CONNECTING AURORA

HISTORY

Building on previous planning efforts

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around.

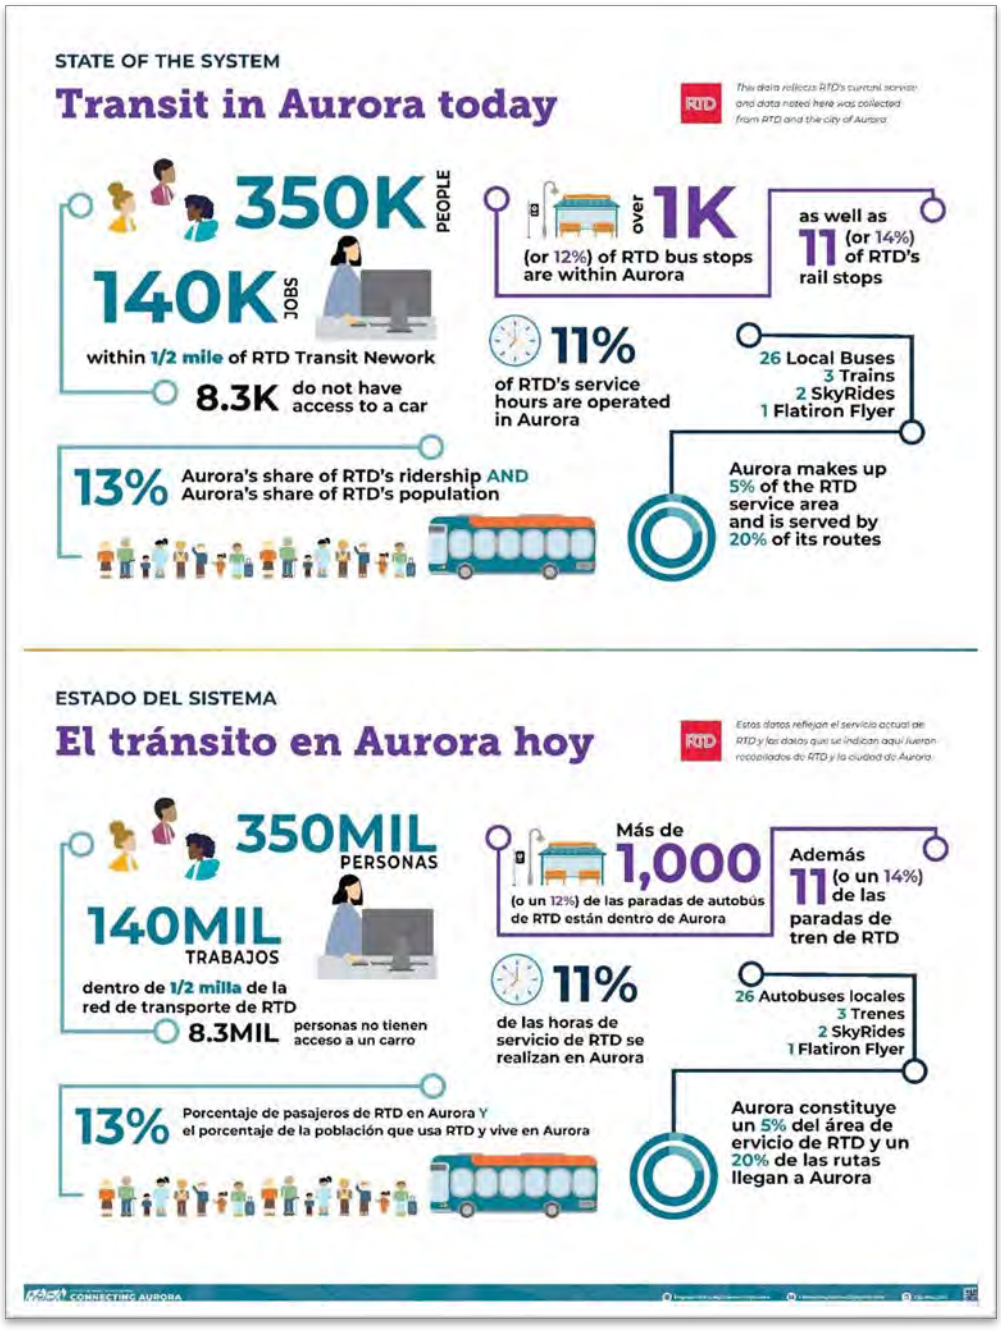
- The existing plans provide a starting point for Connecting Aurora.
- Safer and convenient multimodal options are important to the city and community.
- With significant growth and a long list of projects/ needs, Connecting Aurora will need to set priorities for a phased implementation strategy.
- Aurora has an opportunity to be a leader in the region.

Aurora Places presents a vision for the future of Aurora along with long-range goals and activities to address concerns and make aspirations a reality in the city. Guiding plan principles:

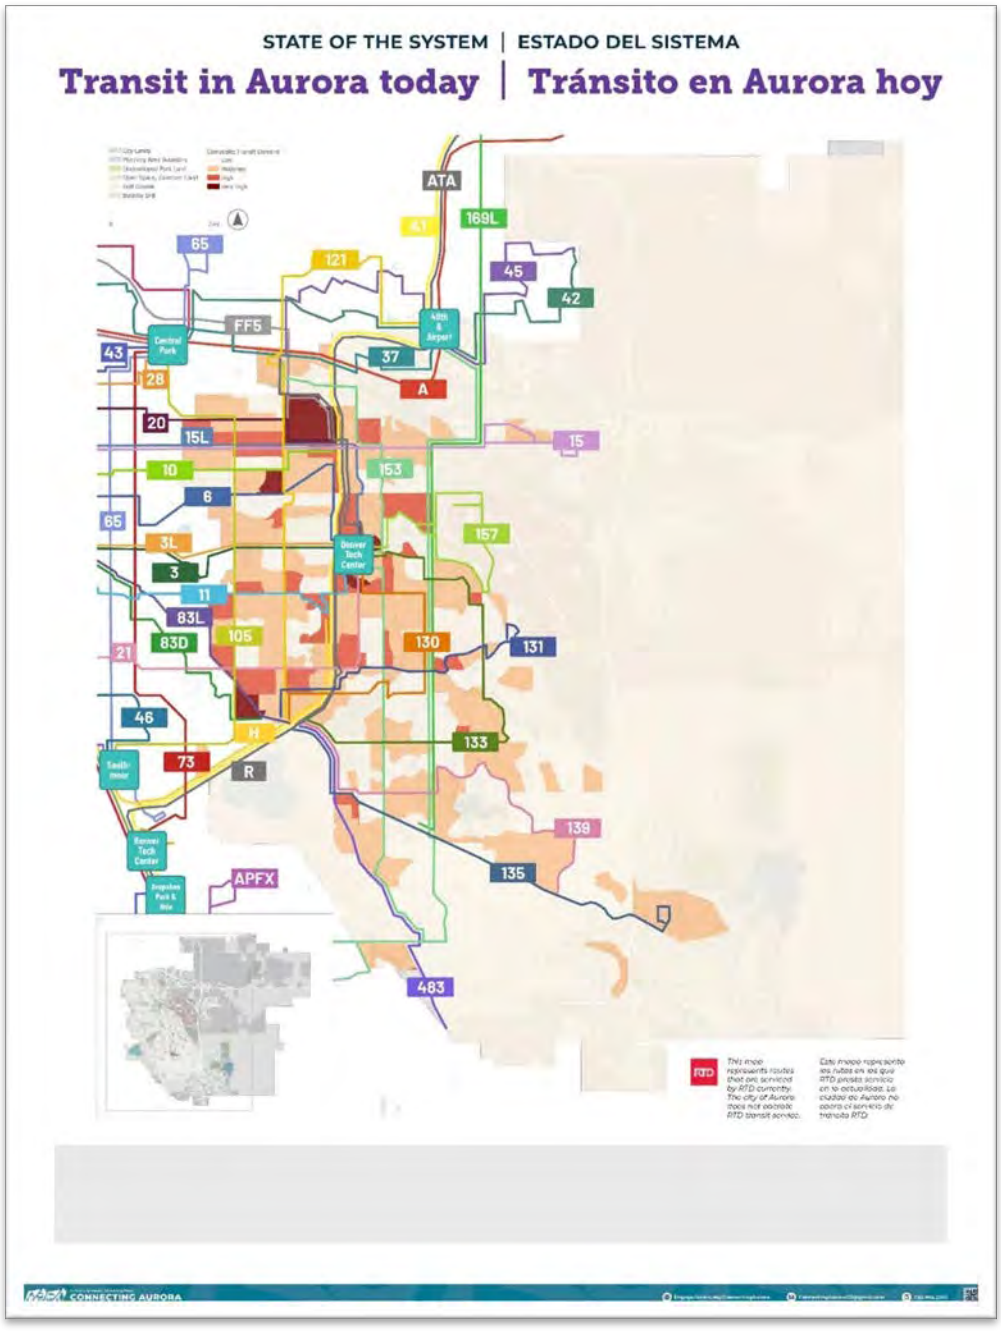
- ✓ Strong Economy
- ✓ Diverse and Equitable City
- ✓ Housing For All
- ✓ A Healthy Community
- ✓ A Thriving Environment
- ✓ Easy Mobility and Active Transportation
- ✓ Authentic Aurora

HISTORIA

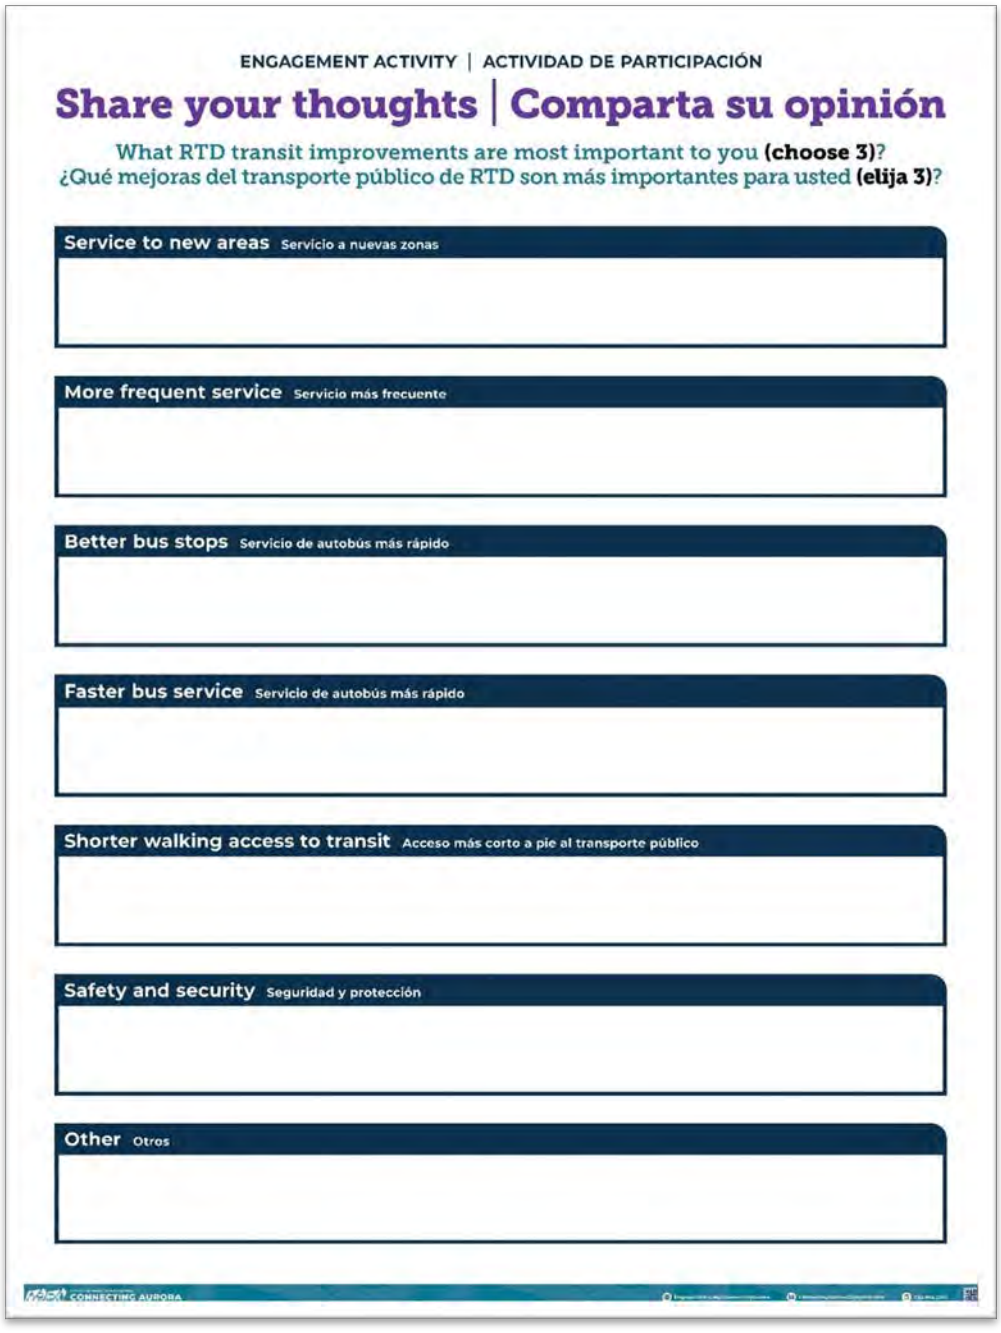
Previos esfuerzos de planificación como base



Muchos de los estudios realizados en el pasado en Aurora se han enfocado en áreas específicas para reunir comentarios públicos y proporcionar orientación para las necesidades de transporte, resultando en mejores modos transporte.



- El plan existente proporciona un punto de inicio para Connecting Aurora.
- Las opciones multimodales más seguras y convenientes son importantes para la ciudad y comunidad.
- Debido a crecimiento significante y una lista larga de proyectos / necesidades, Connecting Aurora deberá fijar prioridades para una estrategia de implementación en fases.
- Aurora tiene la oportunidad de ser un líder en la región.



Aurora Places presenta una visión del futuro de Aurora junto con metas y actividades a largo plazo para abordar las preocupaciones y cumplir con aspiraciones en la ciudad. Los principios del plan incluyen:

- ✓ Una economía sólida
- ✓ Una ciudad diversa y equitativa
- ✓ Vivienda para todos
- ✓ Una comunidad saludable
- ✓ Un entorno próspero
- ✓ Movilidad fácil y transporte activo
- ✓ Aurora auténtica

STATE OF THE SYSTEM
Transit in Aurora today
This data reflects RTD's current service and data noted here was collected from RTD and the city of Aurora.
350K PEOPLE
140K JOBS
within 1/2 mile of RTD Transit Nework
8.3K do not have access to a car
over 1K
(or 12%) of RTD bus stops are within Aurora
as well as 11 (or 14%) of RTD's rail stops
11%
of RTD's service hours are operated in Aurora
26 Local Buses
3 Trains
2 SkyRides
1 Flatiron Flyer
13% Aurora's share of RTD's ridership AND Aurora's share of RTD's population
Aurora makes up 5% of the RTD service area and is served by 20% of its routes
ESTADO DEL SISTEMA
El tránsito en Aurora hoy
Estos datos reflejan el servicio actual de RTD y los datos que se indican aquí fueron recopilados de RTD y la ciudad de Aurora.
350MIL PERSONAS
140MIL TRABAJOS
dentro de 1/2 milla de la red de transporte de RTD
8.3MIL personas no tienen acceso a un carro
Más de 1,000
(o un 12%) de las paradas de autobús de RTD están dentro de Aurora
Además 11 (o un 14%) de las paradas de tren de RTD
11%
de las horas de servicio de RTD se realizan en Aurora
26 Autobuses locales
3 Trenes
2 SkyRides
1 Flatiron Flyer
13% Porcentaje de pasajeros de RTD en Aurora Y el porcentaje de la población que usa RTD y vive en Aurora
Aurora constituye un 5% del área de ervicio de RTD y un 20% de las rutas llegan a Aurora

STATE OF THE SYSTEM

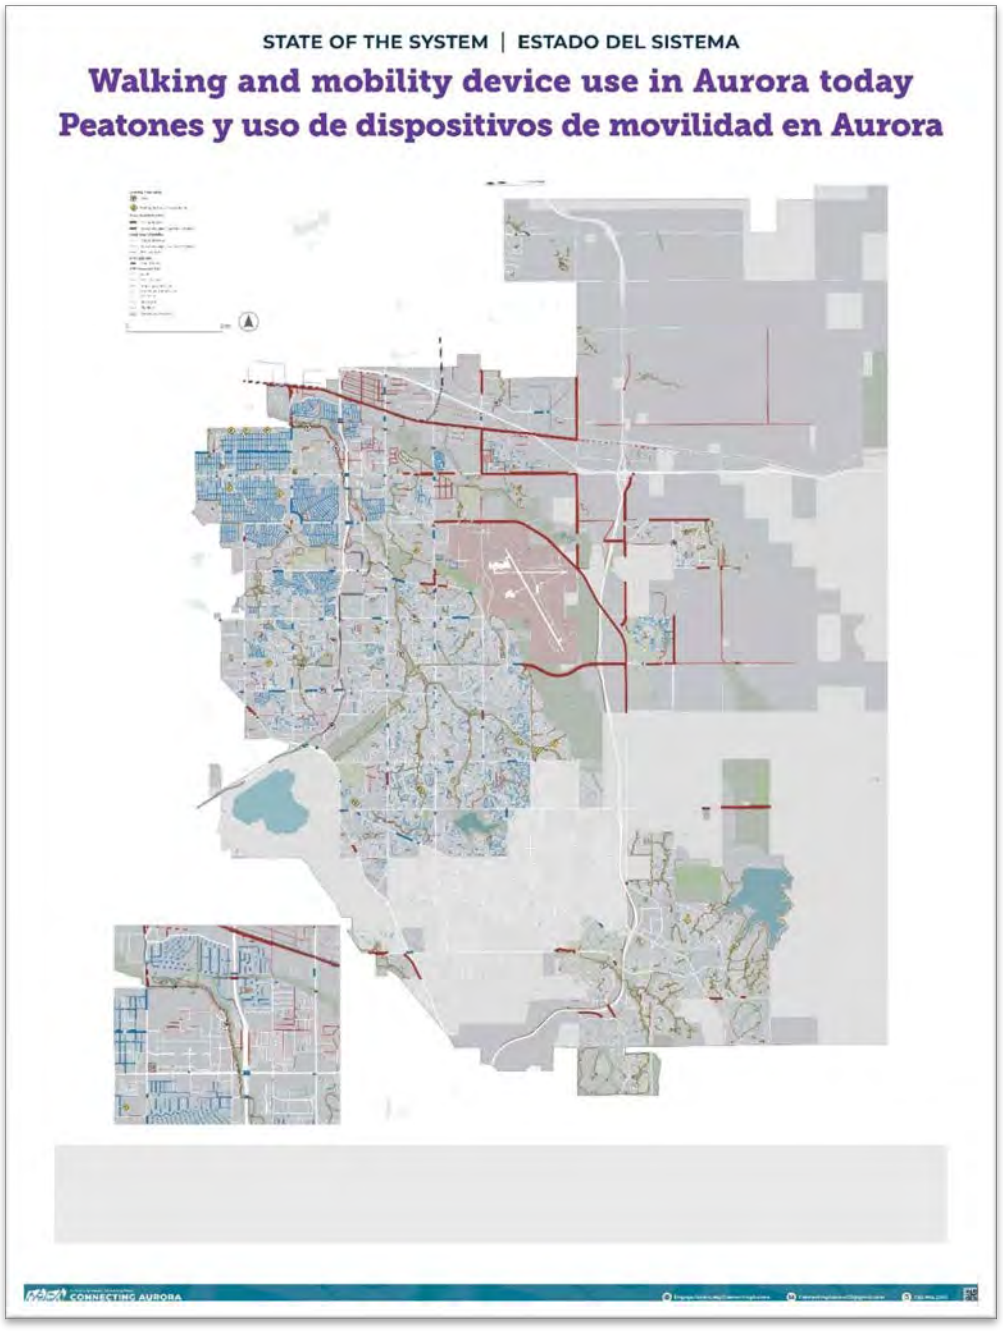
Walking and mobility device use today

- Missing sidewalks are more concentrated in northern Aurora.
- Narrow sidewalks (less than four feet wide) are more concentrated in northwestern Aurora.
- Most enhanced crossing opportunities are in central Aurora and at trail connections.
- Generally, there is good paved local and regional trail connectivity throughout Aurora, especially in southern Aurora.



ESTADO DEL SISTEMA

Peatones y uso de dispositivos de movilidad hoy

- Existe una mayor falta de aceras en el norte de Aurora
- La mayor cantidad de aceras estrechas (menos de cuatro pies de ancho) se encuentra en el noroeste de Aurora.
- Los mejores lugares para cruzar se encuentran en la región central de Aurora y en las conexiones de senderos.
- En general, existen buenas conexiones de senderos pavimentadas a nivel local y regional en todo Aurora, especialmente en el sur de Aurora.

What **five** sidewalk and pedestrian crossing improvements are most important to you?
¿Qué **cinco** mejoras en las aceras y pasos de peatones son más importantes para usted?

Building new sidewalks where they don't exist today Construir nuevas aceras donde hoy no existen

Improving and widening existing sidewalks Mejorar y ampliar las aceras existentes

Providing new safe crossings of major roadways Crear nuevos cruces seguros de las vías principales

Improving conditions at signalized intersections Mejorar las condiciones de los cruces señalizados

Creating better connections to transit Crear mejores conexiones con el transporte público

Slowing down motor vehicle traffic and implementing more traffic-calming measures
Reducir la velocidad del tráfico de vehículos de motor y aplicar más medidas de pacificación del tráfico

Providing more trees and shade Aumentar el número de árboles y la sombra

Installing more pedestrian-scaled lighting Instalar más iluminación a escala para peatones

STATE OF THE SYSTEM

Current biking facilities

BIKE LANE

Through striping, bike lanes delineate a separate, dedicated space for people bicycling.

SEPARATED BIKE LANE

Separated bike lanes are bike lanes that feature some form of vertical separation from motor vehicles.

BIKE ROUTES AND SHARED LANES

Bike routes and shared lanes utilize signage and pavement markings to indicate that bicyclists and motorists are intended to share the same space.

BUFFERED BIKE LANE

Buffered bike lanes are bike lanes with a striped buffer that provides horizontal space next to the bike lane.

PAVED TRAILS AND SHARED-USE PATHS

Both paved trails and shared-use paths are off-street facilities that facilitate two-way travel for people walking, rolling, and bicycling.

BIKE BOULEVARDS

Bike boulevards, also known as neighborhood bikeways, are low-stress corridors with slow speeds and low vehicle volumes. **Aurora's bicycle network does not yet include any bike boulevards.**

ESTADO DEL SISTEMA

Instalaciones para ciclistas actuales

CARRIL DE BICICLETAS

Las líneas de los carriles de bicicletas definen un espacio separado y dedicado para ciclistas.

CARRIL DE BICICLETAS SEPARADO

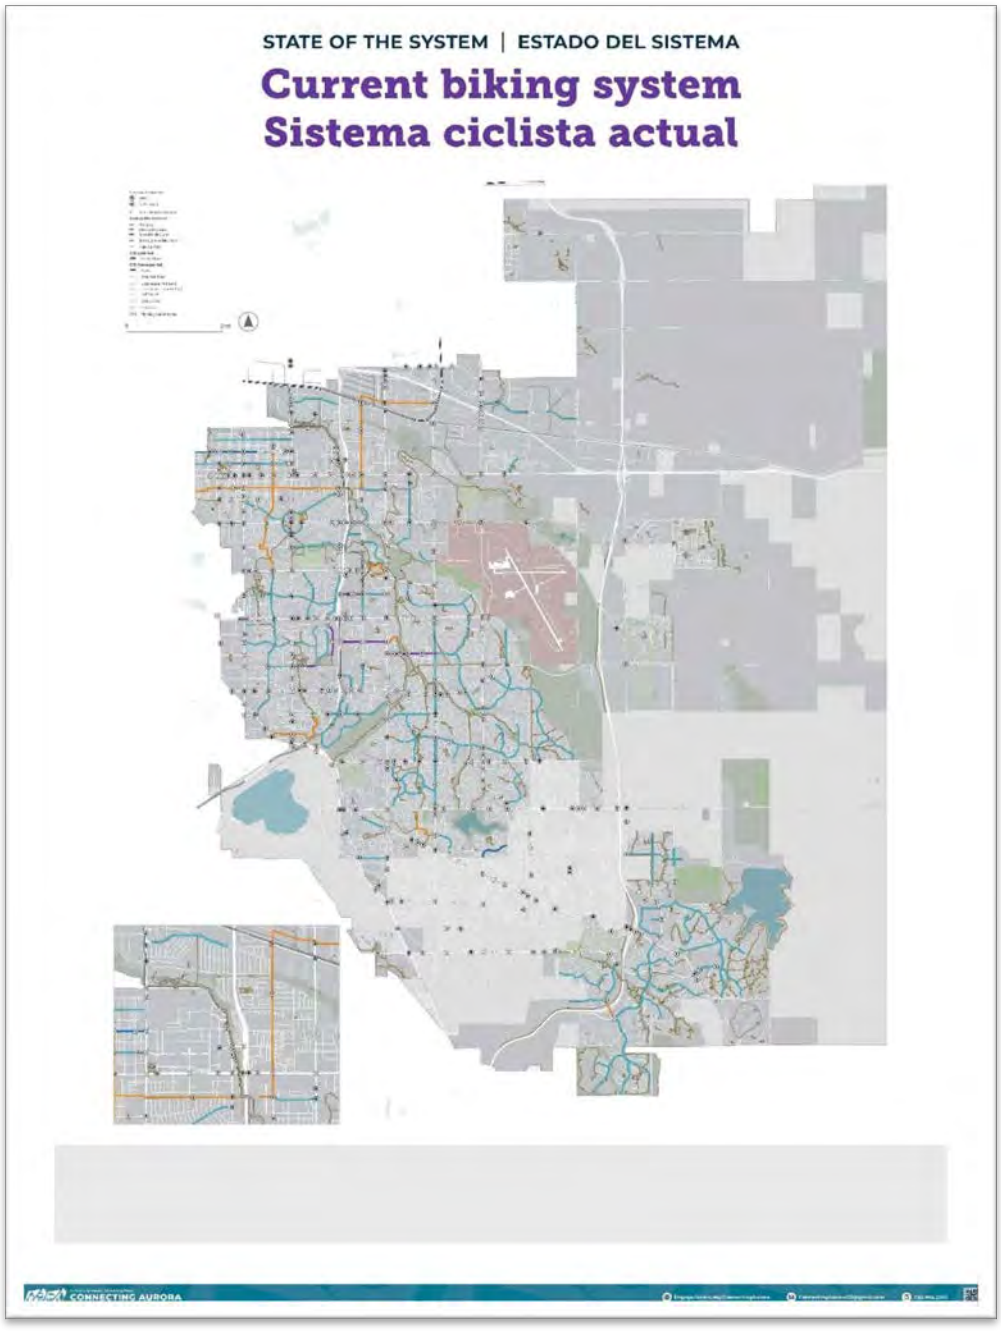
Los carriles para bicicletas separados son carriles que tienen alguna forma de separación vertical de los vehículos.

RUTAS DE BICICLETAS Y CARRILES COMPARTIDOS

Las rutas de bicicletas y los carriles compartidos tienen letreros y pintura en el pavimento que indican que el camino es para los ciclistas y motoristas.

CARRIL DE BICICLETAS PROTEGIDO

Los carriles para bicicletas protegidos son carriles con una línea protectora que proporciona un espacio horizontal al lado del carril para bicicletas.



SENDEROS PAVIMENTADOS Y CAMINOS DE USO COMPARTIDO

Tanto los senderos pavimentados como los caminos de uso compartido son instalaciones que facilitan transporte de dos vías para peatones, patinadores y ciclistas.

BOULEVARDS DE BICICLETAS

Los boulevards de bicicletas, también conocidos como ciclovías de vecindario, son corredores con velocidades bajas y bajos niveles de vehículos. **La red de bicicletas de Aurora todavía no incluye ningún boulevard de bicicletas.**

What **three** bikeway improvements are most important to you?
¿Qué **tres** mejoras del carril para bicicletas son más importantes para usted?

Expanding the bicycle network Ampliar la red ciclista

Improving existing bikeways Mejorar las intersecciones y/o cruces de las principales carreteras

Providing more separation between bicyclists and motor vehicles through separated bike lanes and shared-use paths
Mayor separación entre ciclistas y vehículos de motor mediante carriles bici separados y vías de uso compartido.

Building more safe and convenient crossings, such as underpasses, overpasses, or signalized at grade crossings, etc.
Construir cruces más seguros y cómodos, como pasos subterráneos, pasos elevados o cruces a nivel señalizados, etc.

Slowing down motor vehicle traffic and implementing more traffic-calming measures
Reducir la velocidad del tráfico de vehículos de motor y aplicar más medidas de pacificación del tráfico

Providing more bicycle parking and "end-of-trip" facilities (ex: showers, lockers)
Proporcionar más estacionamiento para bicicletas e instalaciones de "fin de trayecto" (por ejemplo, duchas, taquillas)

Expanding the e-bike / e-scooter program Ampliar el programa de bicicletas y scooters eléctricas

Developing a bike sharing program Desarrollar un programa de bicicletas compartidas

STATE OF THE SYSTEM

Emerging transportation technologies

Emerging transportation trends and technologies are resulting in new safe, efficient, reliable, equitable, sustainable, and accessible mobility options.

To achieve the benefits of these technologies, it is important to break down barriers to access and align technology-based strategies with specific needs and identified outcomes.

The following steps have been demonstrated to guide the identification, development, and deployment of emerging transportation trends:

- Define mobility needs and objectives.
- Outline the policies, infrastructure, systems, staffing, maintenance, operations, and timelines necessary to deploy and operate technology improvements.
- Identify technology-based mobility strategies that address needs and achieve objectives.
- Assess and refine technology-based mobility strategies based on defined objectives, adjust strategies if necessary to achieve outcomes.

CURRENT TRENDS IN TRANSPORTATION TECHNOLOGIES

Automated vehicles · Artificial intelligence to optimize efficiency and safety · Mobility as a service · Curbside management · Urban air mobility · Drones for deliveries · Electric/ alternative fuel vehicles

STATE OF THE SYSTEM

Tecnologías de transporte emergentes

Las tendencias y tecnologías de transporte emergentes están generando nuevas opciones de movilidad que son seguras, eficientes, fiables, equitativas, sustentables y accesibles.

Para aprovechar de los beneficios de estas tecnologías, es importante alinear y eliminar las barreras al acceso a las estrategias basadas en tecnología con necesidades específicas y resultados identificados.

Se ha demostrado que los siguientes pasos guían la identificación, desarrollo e implementación de tendencias de transporte emergentes:

- Definir las necesidades y objetivos de movilidad
- Describir las políticas, infraestructura, sistemas, dotación de personal, mantenimiento, operaciones y calendarios necesarios para implementar y operar mejoras de tecnología
- Identificar estrategias de movilidad basadas en tecnología que cumplan con las necesidades y logren los objetivos
- Evaluar y refinar las estrategias de movilidad basadas en tecnología en relación con los objetivos definidos, ajustar las estrategias como sea necesario para lograr los resultados

TENDENCIAS ACTUALES EN LAS TECNOLOGÍAS DE TRANSPORTE

Vehículos automatizados · Inteligencia artificial para optimizar la eficiencia y seguridad · Movilidad como servicio · Cesión en la banqueta · Movilidad de aire urbana · Drones para entregas · Vehículos eléctricos/de combustible alternativo

STATE OF THE SYSTEM

Vehicle traffic today

WHAT IS LEVEL OF SERVICE (LOS)?

LOS measures a driver's experience on the road and at intersections, based on the speed and number of cars using the road. The LOS of a road is designated by a letter grade of A (free flow) to F (near gridlock).

A designation of A, B, or C represents free-flowing conditions. F is stop-and-go traffic. These scores are based on the highest congestion level on that roadway, even if it only occurs a few minutes a day.

Levels of service

A: FREE FLOW
Low volumes and no delays

B: STABLE FLOW
Speeds restricted by travel conditions, minor delays

C: STABLE FLOW
Speeds and maneuverability closely controlled because of higher volumes

D: STABLE FLOW
Speeds considerably affected by change in operation conditions; high-density traffic restricts maneuverability, volume near capacity

E: UNSTABLE FLOW
Low speeds, considerable delays, volume at or slightly over capacity

F: FORCED FLOW
Very low speed, volumes exceed capacity, long delays with stop-and-go traffic

ESTADO DEL SISTEMA

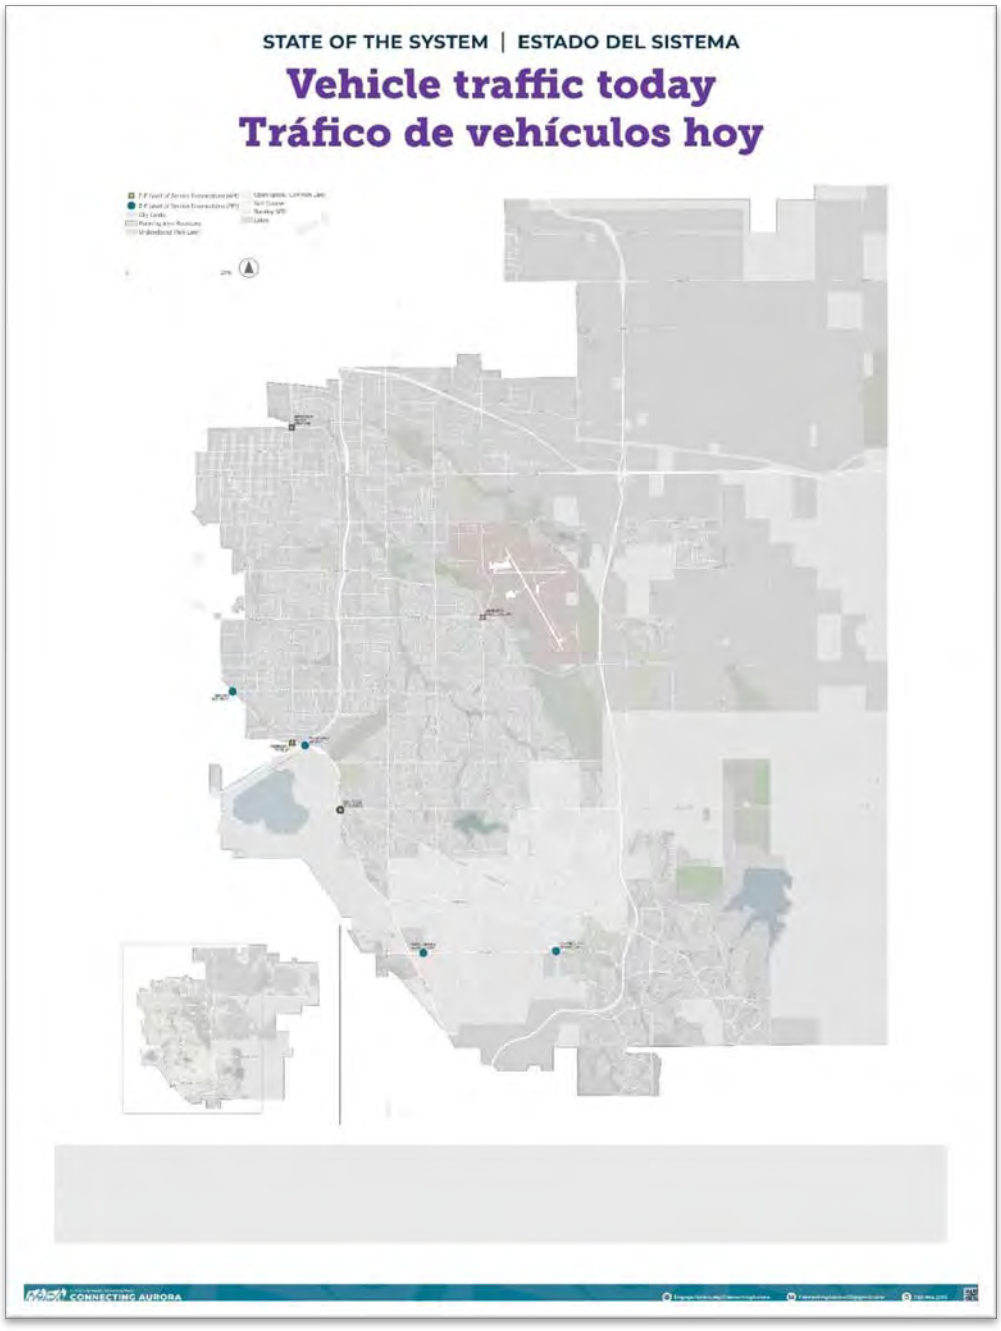
Tráfico de vehículos hoy

¿QUÉ ES EL NIVEL DE SERVICIO?

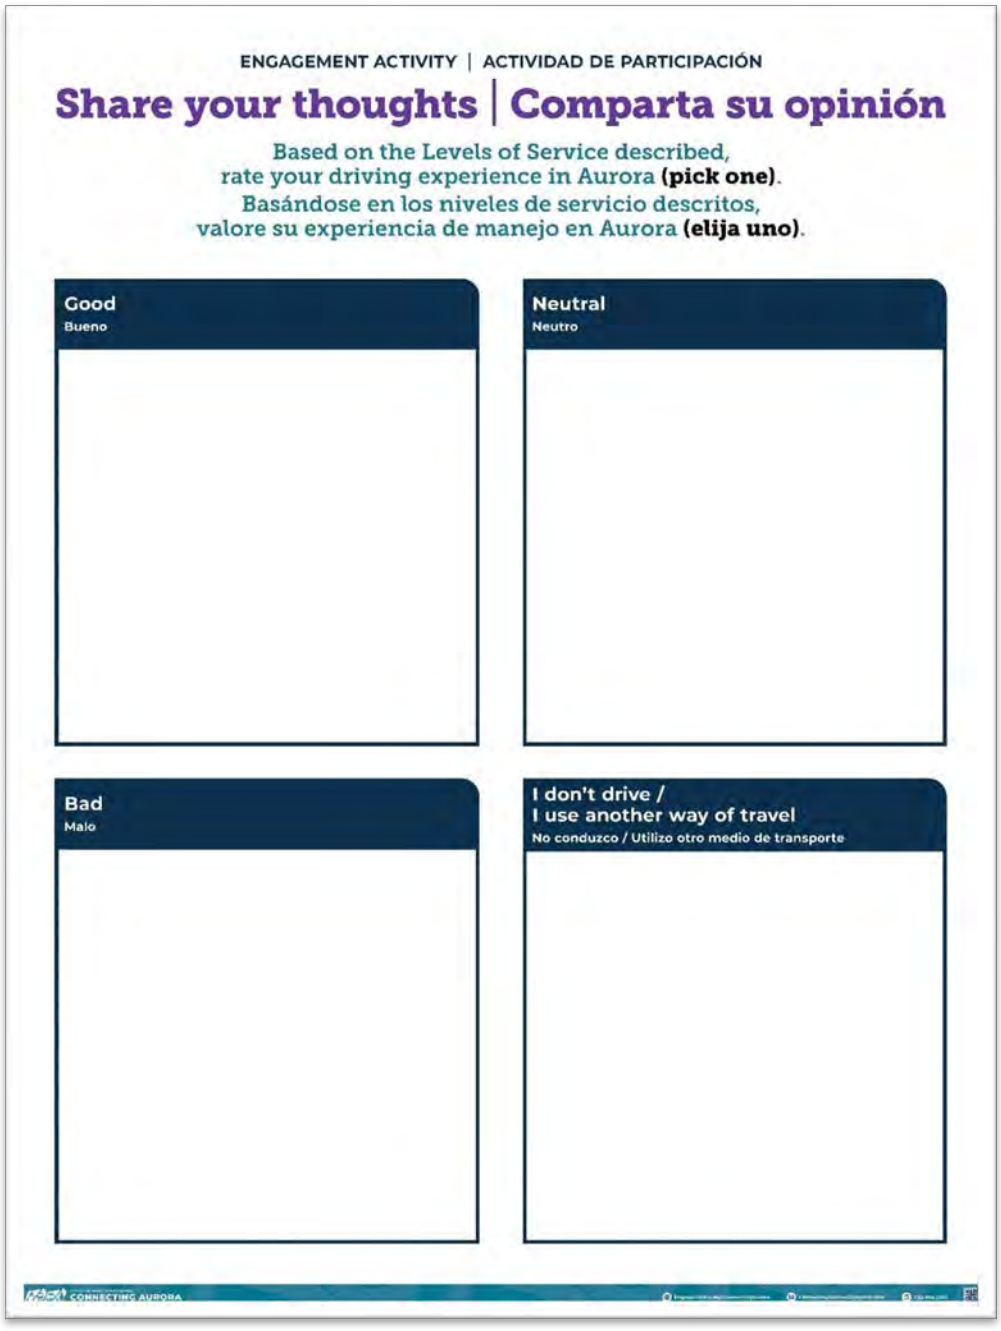
El Nivel de Servicio (LOS, por sus siglas en inglés) mide la experiencia del conductor en la calle y en las intersecciones, en base a la velocidad y número de carros en la calle. El Nivel de servicio de una calle tiene una calificación entre A (flujo libre) y F (congestionado). Una calificación de A, B o C representa condiciones de flujo libre. La calificación F significa tránsito congestionado. Estas calificaciones están basadas en el nivel de congestión más alto en esa calle, incluso si solamente ocurre por unos minutos cada día.

Niveles de servicios

A: FLUJO LIBRE
Volumen de tráfico bajo y sin retrasos



B: FLUJO ESTABLE
Velocidades restringidas por las condiciones de tránsito, retrasos menores



C: FLUJO ESTABLE
Velocidades y manejo altamente controlado debido a mayor volumen de tránsito

D: FLUJO ESTABLE
Velocidades afectadas considerablemente por cambios en condiciones de operación; una alta densidad de tráfico restringe el manejo, volumen casi al máximo

E: FLUJO INESTABLE
Velocidades bajas; retrasos considerables, volumen casi al máximo o al máximo

F: FLUJO FORZADO
Velocidades muy bajas, el volumen de tránsito es mayor que la capacidad, retrasos largos con el tráfico casi estancado

STATE OF THE SYSTEM | ESTADO DEL SISTEMA

STATE OF THE SYSTEM

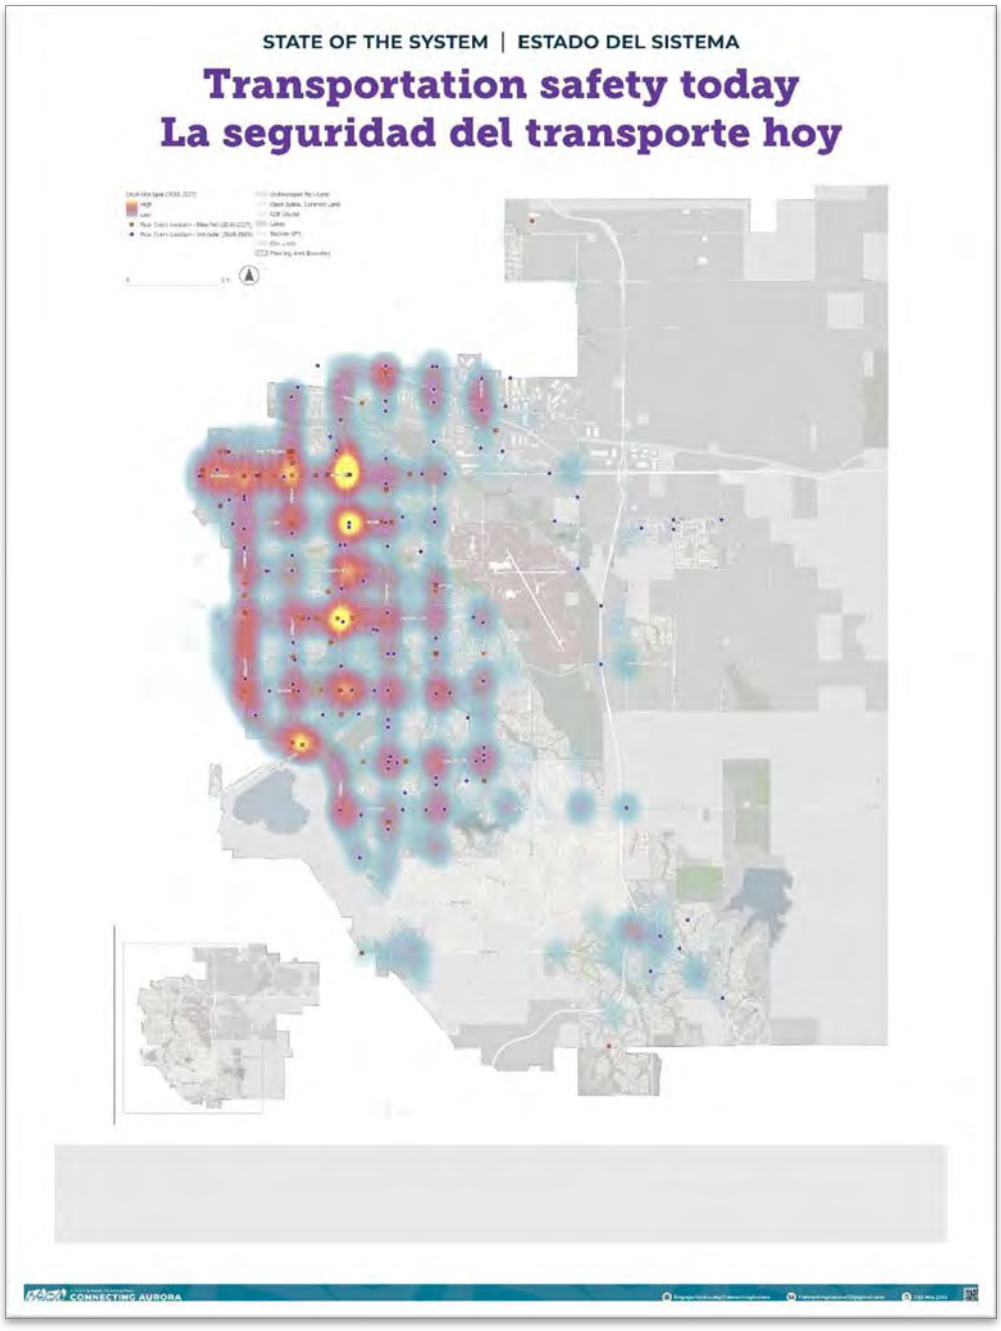
Transportation Safety

What is a Safe System Approach?

The U.S. Department of Transportation adopts a Safe System Approach as the guiding paradigm to address roadway safety. The transportation community has embraced the Safe System Approach as an effective way to address and manage the risks that are part of our enormous and complex transportation system. It works by building and reinforcing multiple layers of protection to both prevent crashes from happening in the first place and minimize the harm caused to those involved when crashes do occur. It is a holistic and comprehensive approach that provides a guiding framework to make places safer for people.

THIS IS A SHIFT FROM A CONVENTIONAL SAFETY APPROACH BECAUSE IT FOCUSES ON BOTH HUMAN MISTAKES AND HUMAN VULNERABILITY AND DESIGNS A SYSTEM WITH MANY REDUNDANCIES IN PLACE TO PROTECT EVERYONE.

ESTADO DEL SISTEMA



Seguridad de transporte

¿Qué es un Enfoque de sistema seguro?

El Departamento de transporte adopta un Enfoque de sistema seguro como el paradigma rector para tratar la seguridad vial. La comunidad de transporte ha adoptado el Enfoque de sistema seguro como una manera efectiva de tratar y gestionar los riesgos que son parte de nuestro sistema de transporte enorme y complejo. Funciona al crear y reforzar múltiples niveles de protección para tanto prevenir los choques en primer lugar como minimizar los daños causados a las personas involucradas cuando ocurren. Es un enfoque holístico e integral que proporciona un marco rector para lograr que los lugares sean más seguros para las personas.

ESTE ES UN CAMBIO DESDE UN ENFOQUE DE SEGURIDAD CONVENCIONAL PORQUE SE ENFOCA EN TANTO LOS ERRORES HUMANOS COMO LA VULNERABILIDAD HUMANA Y DISEÑA UN SISTEMA CON MUCHAS REDUNDANCIAS EN LUGAR PARA PROTEGER A TODAS LAS PERSONAS.

STATE OF THE SYSTEM

Aurora street network types and connectivity challenges

Aurora Places, the city's adopted comprehensive plan, identified 10 distinct place types in Aurora today and to be developed in the future. The place types capture the general character, various land uses, and street networks that help define each place.

- The street network and surrounding land use work together to help create spaces where people want to live, work, and visit.
- Aurora's existing layout creates some challenges to achieving multimodal connectivity and expansion of future identified places.

ESTADO DEL SISTEMA

Tipos de redes de calles y desafíos de conectividad

Aurora Places, el plan integral adoptado por la ciudad, identificó 10 tipos de lugares distintos en Aurora actualmente y para ser desarrollados a futuro. Los tipos de lugares capturan el carácter general, diversos usos de terreno y redes de calles que ayudan a definir a cada lugar.

- La red de calles y uso de terreno alrededor funcionan en conjunto para ayudar a crear espacios donde las personas desean vivir, trabajar y visitar.
- La configuración actual de Aurora genera algunos desafíos relacionados con lograr la conectividad multimodal y la expansión de lugares identificados para el futuro.

STATE OF THE SYSTEM
Aurora street network types and connectivity challenges
Urban Districts
Represent Aurora's existing and future activity centers that feature entertainment districts, civic institutions, retail and shopping, and multifamily housing. These places have high-intensity uses and development that can support a highly walkable and bikeable environment.
Features:
Continuous grid
Short urban blocks
Easy navigation/connection for pedestrians and cyclists
Lacks direct, comfortable connections to surrounding neighborhoods
Innovation Districts
Are places that generate new ideas and inspire creativity. Land uses are composed of light industrial, business parks, and medical and educational institutions that are designed like campus environments. There are gathering spaces to foster connection and a connected grid for easy navigation.
Features:
Connected grid
Walkable network
Campus layout
Auto-oriented designs with large parking lots
Industry Hubs
Support commercial and industrial uses that are critical to Aurora's economy. These are high-employment centers and often generate significant commercial truck traffic. Those hubs are located near highways and interstates for easy access.
Features:
Easy access to highway network
Streets can accommodate large trucks
Streets lack direct, comfortable pedestrian and bicycle connections
Original Aurora
It is the city's first neighborhood that blends historic residential neighborhoods, commercial corridors, and an arts district. The area features a traditional street grid that strengthens connections between key destinations.
Features:
Established traditional grid
Walkable/bikeable network
Short east – west blocks
Narrow sidewalks and lack of bicycling infrastructure
CONNECTING AURORA

STATE OF THE SYSTEM

Aurora street network types and connectivity challenges

Established Neighborhoods

Are places with predominantly low-density residential uses of single-family detached and attached homes. There are pockets of other uses such as schools, parks, and religious institutions. These neighborhoods were designed in a curvilinear pattern creating barriers to walking and biking to supporting land uses.

Features:

- Curvilinear street pattern
- Cul-de-sacs
- Wide and fast arterials with backyards facing the street creating fence canyons
- Indirect connections for pedestrians and bicyclists

Emerging Neighborhoods

Are recently built subdivisions that feature complete neighborhood elements such as diverse housing options, parks and open space, and pedestrian and bicycle infrastructure. They are designed with a more traditional grid pattern and are organized around a central gathering place.

Features:

- Traditional grid pattern
- Supports multimodal connectivity
- Easy access to commercial corridors
- Wide and fast arterials
- Still lacking comfortable bicycling connections

Commercial Hubs

Are located on the perimeter of established and emerging neighborhoods, providing easy access to services, shopping, and entertainment. These places should include gathering spaces to encourage social interaction and serve as key connectors for transit users, pedestrians, and cyclists.

Features:

- Connectivity to major commercial corridors from residential areas
- Convenient access to businesses
- Large parking lots create a disconnect between places
- Interior roadways are largely auto-oriented, sometimes lacking sidewalks

ESTADO DEL SISTEMA

Tipos de redes de calles y desafíos de conectividad

Distritos urbanos

Representan los centros de actividad existentes y futuros que incluyen distritos de entretención, instituciones cívicas, ventas al por menor y viviendas multifamiliares. Estos lugares son usados extensamente y la construcción facilita un entorno excelente para peatones y ciclistas.

Funciones:

- Red continua
- Cuadras urbanas cortas
- Navegación y conexiones fáciles para peatones y ciclistas
- Falta de conexiones directas y cómodas a los vecindarios adyacentes

Distritos de innovación

Son lugares que generan nuevas ideas o inspiran la creatividad. Los usos del terreno incluyen industria ligera, parques comerciales e instituciones médicas y educativas que están diseñados como entornos universitarios. Estos son espacios de reunión que fomentan las conexiones y una red interconectada para facilitar una navegación fácil.

Funciones:

- Red conectada
- Red apta para peatones
- Configuración universitaria
- Diseños orientados para carros con estacionamientos grandes

Centros industriales

Apoyan usos comerciales e industriales que son esenciales para la economía de Aurora. Estos son centros con altos niveles de empleos y, a menudo, generan mucho tránsito de camiones comerciales. Estos centros están ubicados cerca de carreteras para facilitar acceso fácil.

Funciones:

- Acceso fácil a la red de carreteras
- Las calles son aptas para camiones grandes
- Las calles no tienen conexiones directas y cómodas para peatones y ciclistas

Aurora original

Es el primer vecindario de la ciudad que mezcla vecindarios residenciales históricos, corredores comerciales y un distrito de arte. El área incluyo una red de calles tradicional que fortalece las conexiones entre destinos claves.

Funciones:

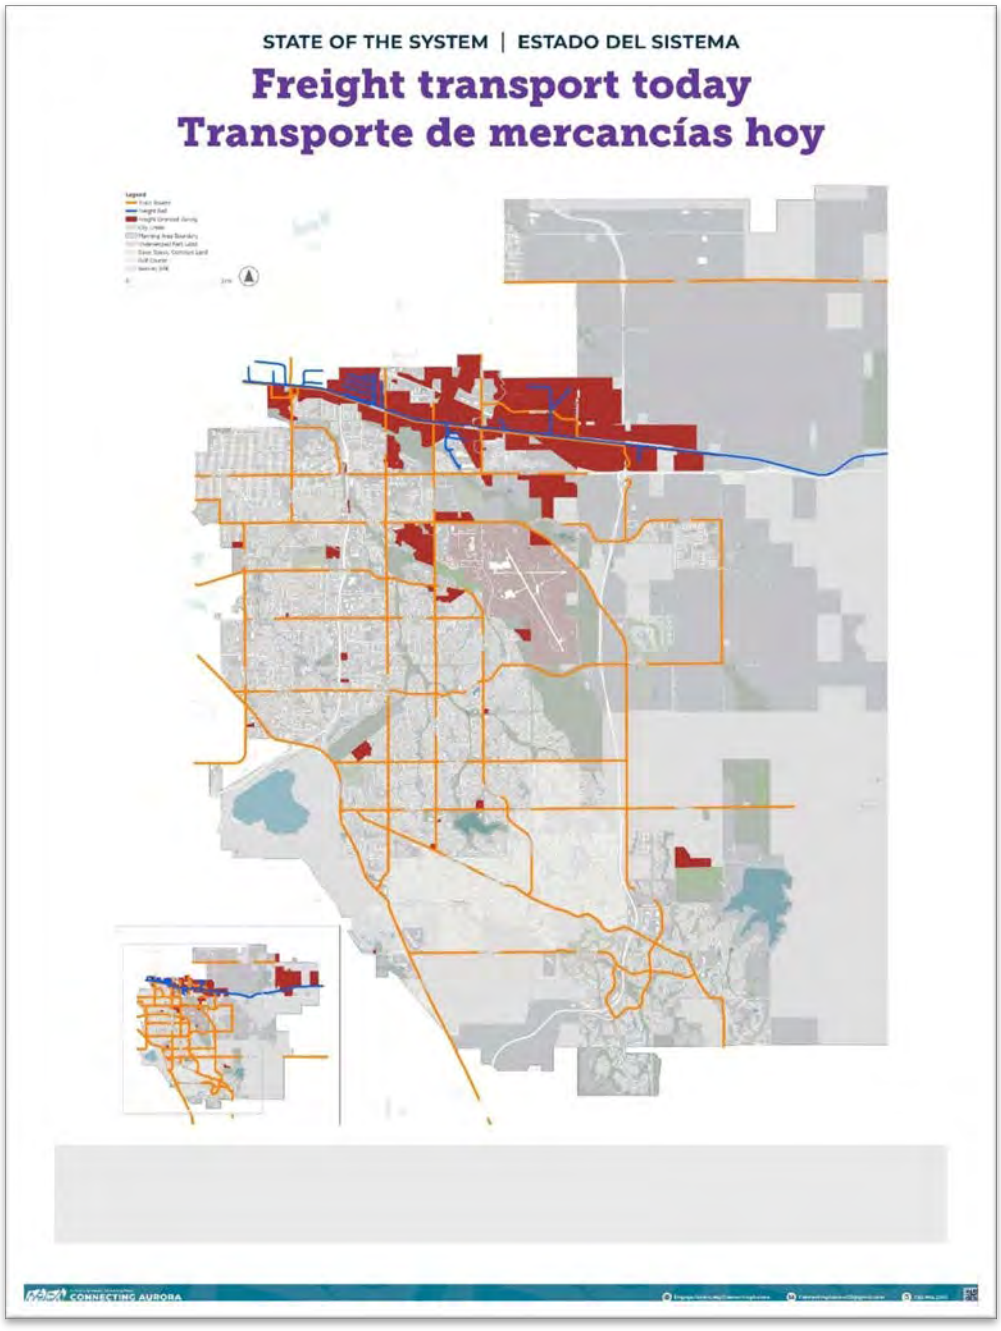
- Red tradicional establecida
- Red apta para peatones y ciclistas
- Cuadras de este a oeste cortas
- Aceras estrechas y falta de infraestructura para ciclistas

ESTADO DEL SISTEMA
Tipos de redes de calles y desafíos de conectividad
Vecindarios establecidos
Son lugares de uso principalmente residencial con casas unifamiliares adjuntas y no adjuntas y con baja densidad de habitantes. Existen secciones de otros usos, como escuelas, parques e instituciones religiosas. Estos vecindarios fueron diseñados con patrones de curvas, creando barreras para peatones y ciclistas para apoyar usos de terreno.
Funciones:
Patrones de calles con curvas
Calles sin salida
Calles principales anchas y rápidas con usos de terreno que no miran hacia la calle y crean cañones de cerca
Conexiones indirectas para peatones y ciclistas
Legend
Established Neighborhood
Vecindarios emergentes
Son subdivisiones recientemente construidos que incluyen elementos completos de vecindario, como opciones de viviendas diversas, parques y espacios abiertos e infraestructura para peatones y ciclistas. Están diseñados con un patrón de red más tradicional y están organizados en relación con un centro de reunión.
Funciones:
Patrón de red tradicional
Apoya la conectividad multimodal
Acceso fácil a corredores comerciales
Calles principales anchas y rápidas
Falta de conexiones cómodas para ciclistas
Legend
Emerging Neighborhoods
Centros comerciales
Están ubicados en los perímetros de vecindarios establecidos y emergentes, proporcionando acceso fácil a servicios, compras y entretención. Estos lugares deberían incluir espacios de reunión para alentar las interacciones sociales y servir como conectores claves para usuarios de tránsito, peatones y ciclistas.
Funciones:
Conectividad a corredores comerciales principales desde áreas residenciales
Acceso conveniente a negocios
Estacionamientos grandes crean una falta de conexión entre los lugares
Las calles interiores están principalmente orientadas para carros y a veces no tienen aceras
Legend
Commercial Hubs
CONNECTING AURORA

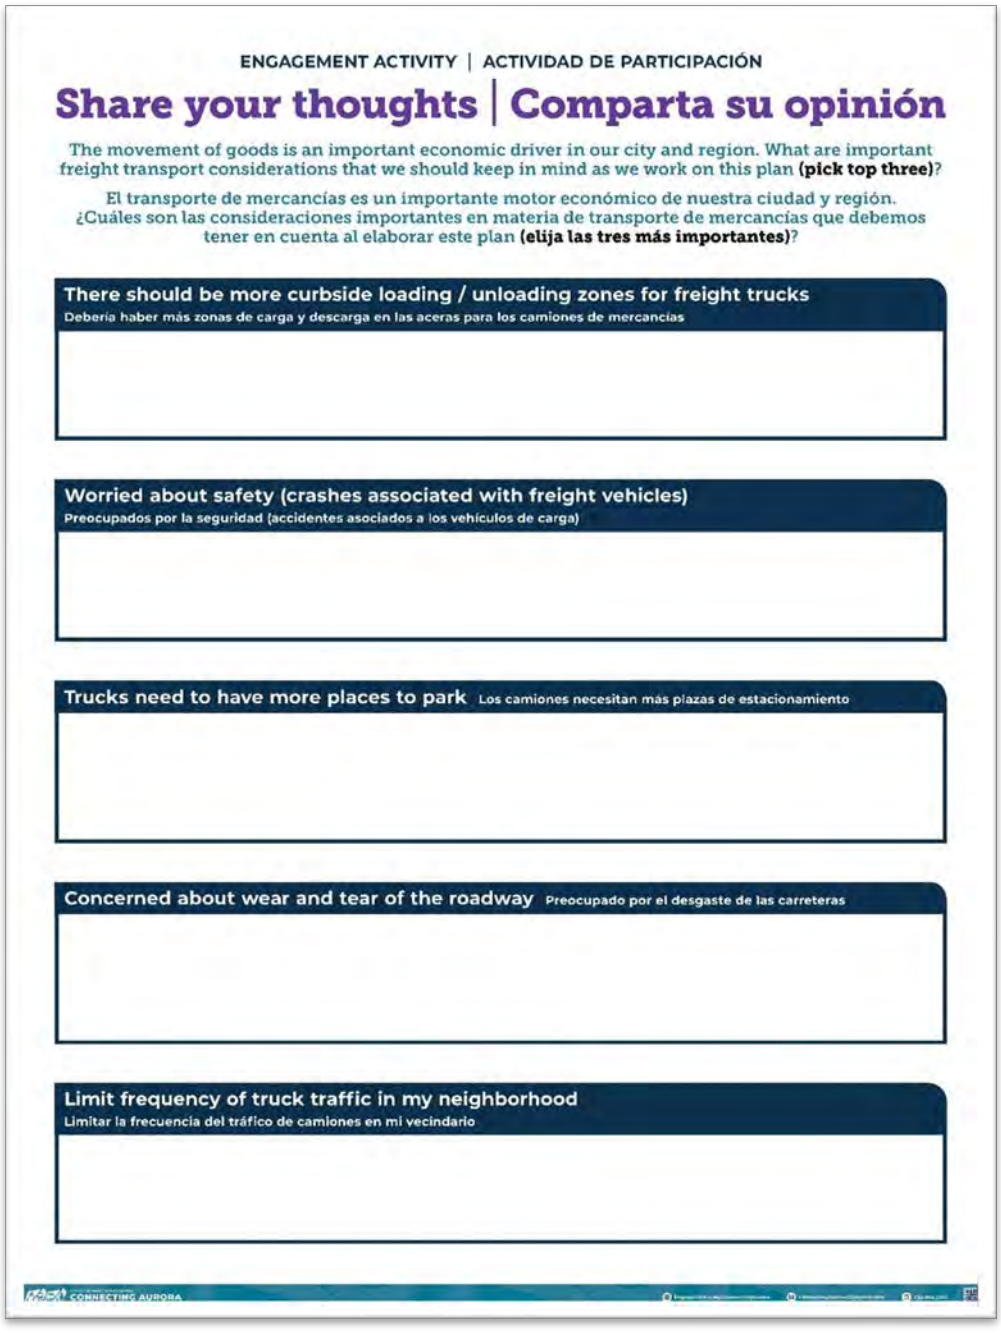
STATE OF THE SYSTEM

Freight transport today

- Freight is an integral part of transportation in the city.
- Aurora's industrial and commercial hubs are co-located along the I-70 and freight rail corridors providing efficiency and consistency to the mobility of freight.
- Approximately two-thirds of Colorado's freight traffic moves through the Denver-Aurora region.
- Various types of freight vehicles use city streets for different reasons:
  - To make deliveries to homes and businesses.
  - To haul garbage, fuel, and construction-related goods.
- Understanding the interactions of these vehicles with everyday road users is an important part of developing this plan.



ESTADO DEL SISTEMA



El transporte de mercancías hoy

- El transporte de mercancías es una parte integral de la ciudad.
- Los centros industriales y comerciales de Aurora están ubicados a lo largo de los corredores de la I-70 y de la vía férrea, proporcionado eficiencia y congruencia a la movilidad del transporte de mercancías.
- Aproximadamente dos tercios del tránsito de mercancías pasa por la región de Denver y Aurora.
- Diversos tipos de vehículos de transporte de mercancías usan las calles de la ciudad por diferentes razones:
  - Para hacer entregas a domicilios y negocios.
  - Para transportar basura, combustible, y materiales de construcción.
- Comprender las interacciones de estos vehículos con los usuarios cotidianos de las calles es una parte importante de desarrollar este plan.

El transporte de mercancías es un importante motor económico de nuestra ciudad y región. ¿Cuáles son las consideraciones importantes en materia de transporte de mercancías que debemos tener en cuenta al elaborar este plan **(elija las tres más importantes)**?

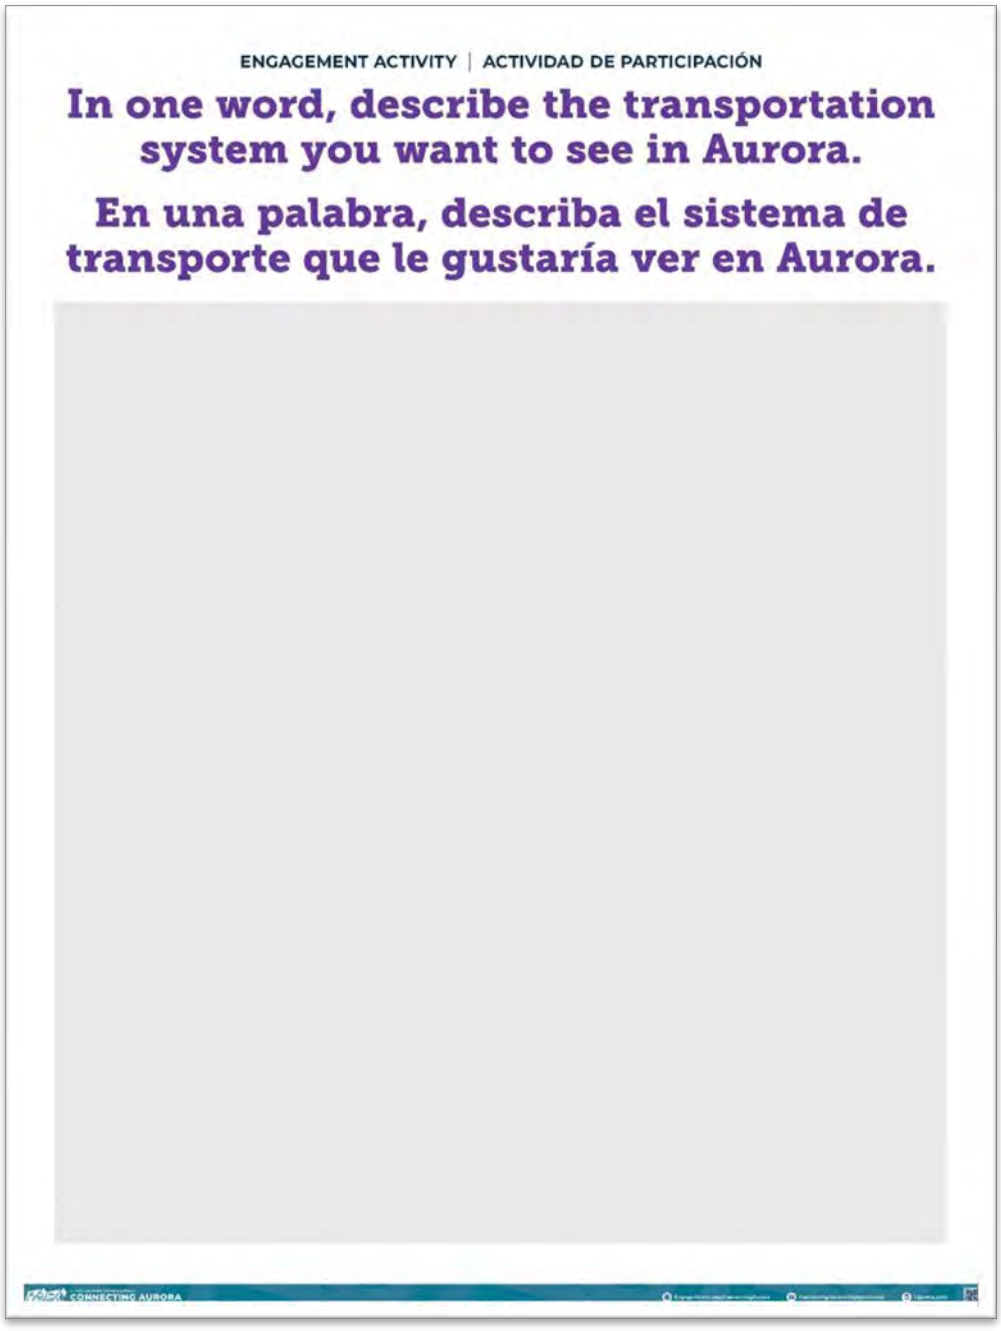
Crossings at major roadways and railroads should be grade-separated for smoother operations and safety purposes
Los cruces de las principales carreteras y vías férreas deberían separarse para facilitar las operaciones y garantizar la seguridad

Too many freight/truck restrictions on our roadways
Demasiadas restricciones al transporte de mercancías/camiones en nuestras carreteras

Concerns about railroads Preocupación por los ferrocarriles

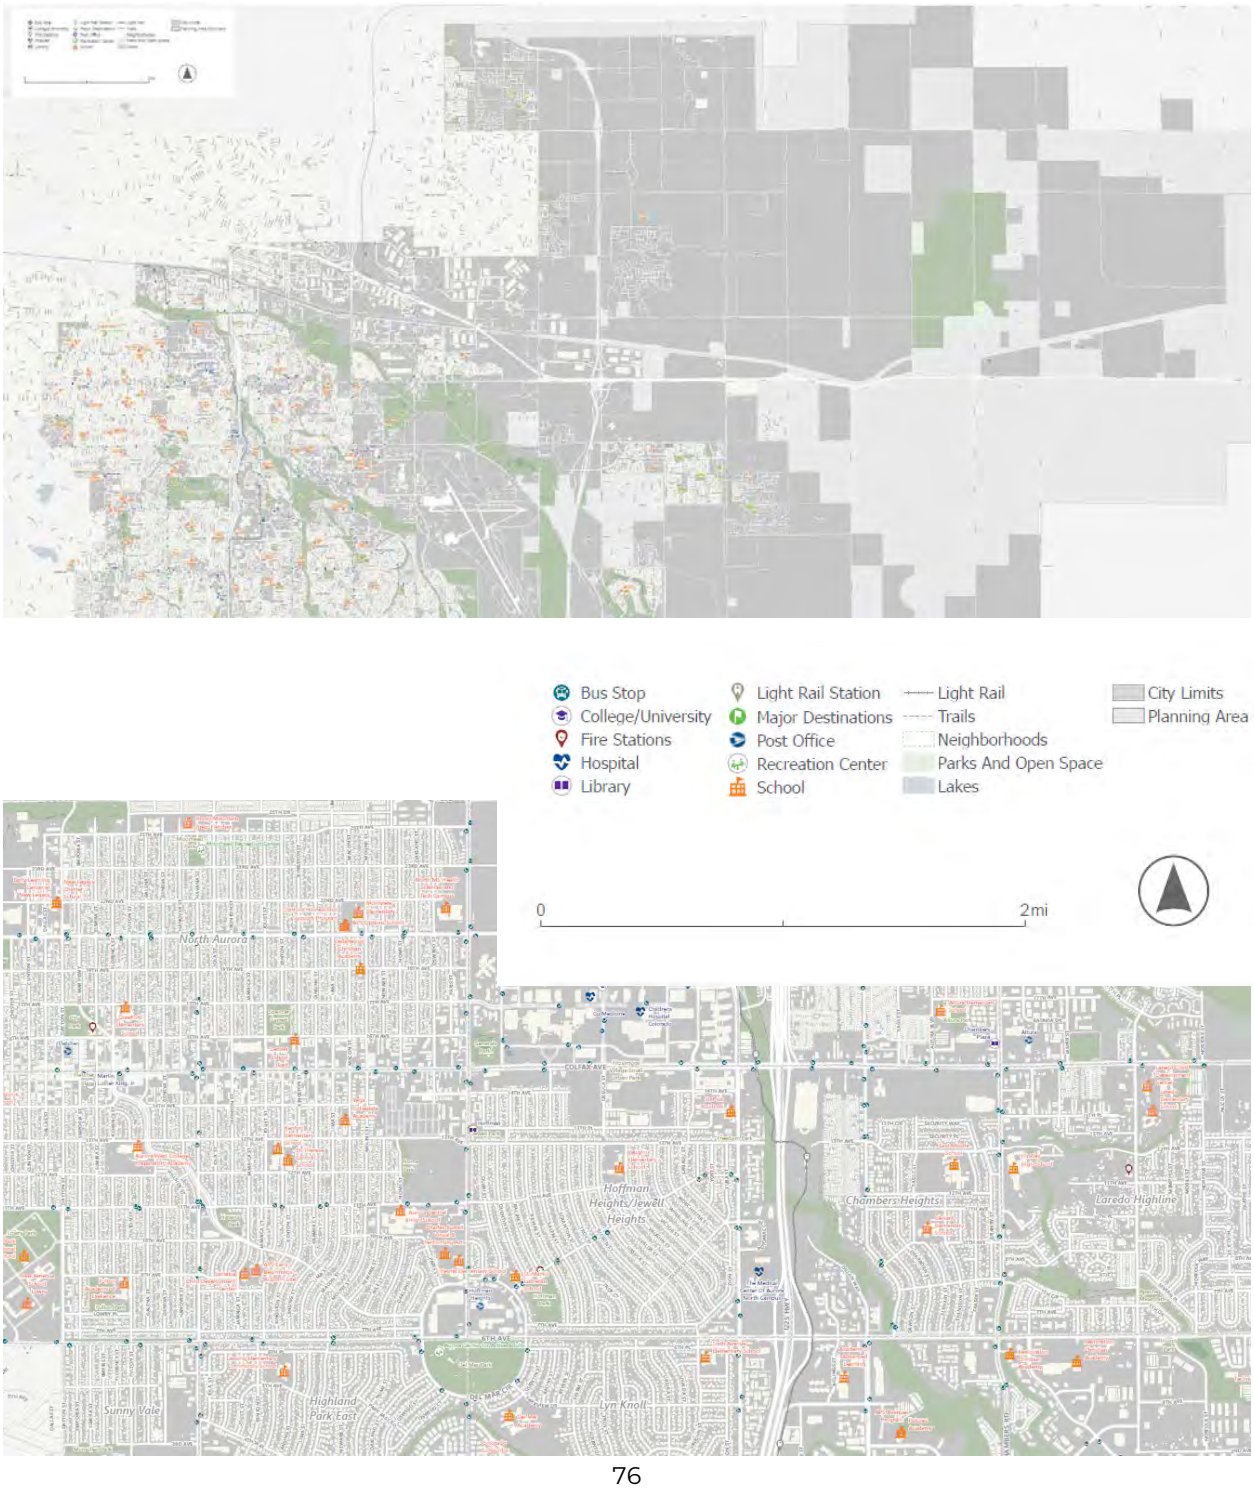
Concerns about pipelines Preocupación por los oleoductos



I don't have any concerns or recommendations related to freight
No tengo ninguna preocupación o recomendación relacionada con el transporte de mercancías

Other Otros

CONNECTING AURORA



STATE OF THE SYSTEM
Transportation's role in creating great places
Good urban design promotes a safe, welcoming, comfortable, equitable, and healthy public realm and streetscape.
PEDESTRIAN EXPERIENCE
Foster public life by providing distinct and inviting opportunities for people to sit, socialize, and linger.
Reimagine underused spaces to support community gathering and events, including additional outdoor dining.
MULTIMODAL SAFETY AND CONNECTIONS
Enhance connections between transportation modes with larger spaces for transit stops and amenities.
Provide well-lit and accessible spaces.
ECOLOGY, NATURE AND CLIMATE
Cool streets, reduce stormwater runoff, and decrease pollutants.
Increase habitat diversity through native vegetation.
COMMUNITY IDENTITY
Celebrate and honor Aurora's histories, cultures, and identities.
Create a sense of belonging for Aurora's diverse neighborhoods and residents.
LAND USE AND DEVELOPMENT
Ensure streets are context sensitive and reflect adjacent land uses and densities.
Increase activity levels and safety along commercial streets.
ESTADO DEL SISTEMA
El rol del transporte en crear lugares excelentes
El buen diseño urbano promociona calles y entornos públicos seguros, acogedores, cómodos, equitativos y saludables.
EXPERIENCIA PEATONAL
Fomentar la vida pública proporcionando oportunidades distintas e invitadores para que las personas se puedan sentar, socializar y pasar tiempo.
Volver a imaginar los espacios menos utilizados para apoyar reuniones y eventos públicos, incluyendo más espacios para comer al aire libre
SEGURIDAD Y CONEXIONES MULTIMODALES
Mejorar las conexiones entre los modos de transporte con espacios más grandes para paradas de tránsito y amenidades.
Proporcionar espacios bien alumbrados y accesibles.
ECOLOGÍA, NATURALEZA Y CLIMA
Bajar la temperatura en las calles, disminuir las escorrentías y reducir los contaminantes.
Aumentar la diversidad de hábitats por medio de la vegetación nativa.
IDENTIDAD COMUNITARIA
Celebrar y honrar la historia, culturas e identidades de Aurora.
Crear un sentido de pertenencia para los vecindarios y habitantes diversos de Aurora.
USO Y DESARROLLO DE TERRENO
Garantizar que las calles correspondan al contexto y que reflejen los usos y densidades adyacentes.
Aumentar los niveles de actividad y la seguridad en las calles comerciales.

What three bikeway improvements are most important to you?
¿Qué tres mejoras del carril para bicicletas son más importantes para usted?
Expanding the bicycle network Ampliar la red ciclista
Improving existing bikeways Mejorar las intersecciones y/o cruces de las principales carreteras
Providing more separation between bicyclists and motor vehicles through separated bike lanes and shared-use paths
Mayor separación entre ciclistas y vehículos de motor mediante carriles bici separados y vías de uso compartido.
Building more safe and convenient crossings, such as underpasses, overpasses, or signalized at grade crossings, etc.
Construir cruces más seguros y cómodos, como pasos subterráneos, pasos elevados o cruces a nivel señalizados, etc.
Slowing down motor vehicle traffic and implementing more traffic-calming measures
Reducir la velocidad del tráfico de vehículos de motor y aplicar más medidas de pacificación del tráfico
Providing more bicycle parking and "end-of-trip" facilities (ex: showers, lockers)
Proporcionar más estacionamiento para bicicletas e instalaciones de "fin de trayecto" (por ejemplo, duchas, taquillas)
Expanding the e-bike / e-scooter program Ampliar el programa de bicicletas y scooters eléctricos
Developing a bike sharing program Desarrollar un programa de bicicletas compartidas

05/30/24	Patricia B.	There were no questions regarding ACCESS to bus transportation. I do live in Aurora, but have no access to bus services. That question needs to be on your survey.
05/20/24	Lynette M.	Here are a few resources that may be informative for the transportation master plan: Info Brief: Creating Accessible, Equitable, Safe, and Complete Networks for Young Pedestrians (pedbikeinfo.org) **1 Equity in Roadway Safety webinar series** This Federal Highway Administration (FHWA) webinar series is designed to share equitable strategies and tools that can be integrated into transportation programs and projects to close disparities in roadway fatalities on the way to our shared goal of zero deaths. In these sessions, state, regional, and local transportation professionals share innovative examples to inspire transportation professionals to equitably implement transportation improvements. In 2024, the series will focus on equitable design strategies, dive deeper into equitable data analysis, and discuss roadway safety for people experiencing homelessness. Register for the next Equity in Roadway Safety webinar on May 22 at 11 a.m. **2 Active Transportation Infrastructure Investment Program** The Active Transportation Infrastructure Investment Program (ATIIP) is a new competitive grant program created by Section 11529 of the Bipartisan Infrastructure Law (enacted as the Infrastructure Investment and Jobs Act (Pub. L. 117-58) to construct projects to provide safe and connected active transportation facilities in active transportation networks or active transportation spines. **Applications are due on Monday, June 17.** **3 Safe Streets and Roads for All (SS4A) Grant Program** The Bipartisan Infrastructure Law (BIL) established the Safe Streets and Roads for All (SS4A) discretionary program with $5 billion in appropriated funds over 5 years, 2022 to 2026. The SS4A program funds regional, local, and Tribal initiatives through grants to prevent roadway deaths and serious injuries. Over $3 billion is still available for future funding rounds. The fiscal year (FY) 2024 Notice of Funding Opportunity (NOFO) for Safe Streets and Roads for All grants is open. The FY 2024 NOFO has multiple deadlines, depending on the grant type: · **May 16, 2024, 5 p.m. (EDT):** Sole deadline for Implementation Grants. Deadline #2 for Planning and Demonstration Grants. • **August 29, 2024, 5 p.m. (EDT):** Deadline #3 for Planning and Demonstration Grants. NOFO closes.
05/23/24	Mike R.	I have two inquiries following my attendance at a well-prepared Open House at the Tallyn's Reach Library on 23 April. First, I ride my bicycle on the trails frequently. In Segment 26, at the intersection of the High Line Canal Trail and

		N. Ensendada Street, an RV blocks the view of the trail intersection and the trail caution sign that alerts vehicle traffic to the trail. This may be a dangerous scenario. Photos attached. The other question I have relates to the proposed traffic signal light at Piccadily and 56th. I was told by the transportation engineer there is a concern by a pipeline owner about granting right-of-way to Aurora to develop the intersection for a traffic light. I'd like to learn more about this potential roadblock so I can be informed of the process necessary to move forward with a traffic safety measure.
04/15/24	Eric K.	Thank you for having this reach out to Aurora residents. The second meeting which I attended was very helpful. I failed to write down on the 2x2 notes a request to place on the voting ballot for the presidential election a return of the photo cameras. I recall the voting voted for the cameras to be removed. If you could provide for the people of Aurora the increase of accidents and deaths that have occured since their removal this information would be helpful.
04/08/24	Greg R.	I've been an Aurora resident for more than 50 years, and have lived in the Tower Triangle area for 37 years. I would like to provide my input on the severe traffic congestion we experience daily on Tower Road between E. Colfax Ave. and Smith Road. North of Smith Road, Tower has 2 lanes in each direction, but South of Smith Road, down to Colfax, Tower is still only one lane in each direction. This creates a lot of traffic congestion on Tower Road from Colfax up to Smith, in both directions. If the widening of Tower Road to 4 lanes in this area could be part of the future transportation plans Aurora is working toward with Connecting Aurora, everyone who travels that route would be extremely grateful for the eased congestion there. As this north-east section of the city continues to build more housing and retail infrastructure, the necessity of moving traffic through this area seems of utmost importance, so eliminating the log-jam of traffic south of Smith Road should be a city priority. Thank you for this opportunity to express my opinions.

GIFT CARD WINNERS

A random drawing of survey participants was conducted to select three gift card winners. The winners were each sent their gift card by mail. The winners are listed below.

1. Damian A.
2. James D.
3. Kelly O.

39.6582126407016	-104.84693118186235	SP+ Parking, 3179 S Parker Rd, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105333	Transit	Better light rail service from 9 Mile to Downtown and DEN is needed. It's absurd how lacking or downright bad it is currently
39.6728418811994	-104.82596397399904	13981 East Harvard Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105587	Pedestrian/Mobility Device	I really like that I live within a 15 minute walk of the iliff station. The 15 minute walk + 30 minutes between trains still makes driving a very attractive method of travel.
39.67530272410368	-104.82017040252687	2299 South Sable Boulevard, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105588	Bicycle	This bus stop and the one around the corner could be spruced up so folks find them a more attractive option, and so folks who have to take it don't feel bad about it.
39.58964195288511	-104.70867633819581	Tallyn's Reach Public Library, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105749	Bicycle	Please add a bus stop - walking up and down the hill to get to the library is difficult and inaccessible.
39.58167946295651	-104.67771291732788	26673 East Indore Avenue, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105811	Bicycle	There is no public transportation that comes near this area, bus or rail. It will be difficult to add a rail line here, but there should be busses to connect Southeast Aurora to a more central hub. There should also be an airport bus that stops in this area.
39.81501349954628	-104.68661785125734	25755 East 65th Avenue, Aurora, Colorado 80019, United States	Bicycle	It would be amazing to have a bus out here so we could

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-105818		take transit to work. There are a ton of projects planned out here and right now the only busses are privately owned by the parking space businesses out here.
39.752370218292256	-104.87711906433107	Clementine's Salon & Skincare, 2501 Dallas St Ste 269, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-106057	Transit	the stanley marketplace employs hundreds of people (and has 1000s of visitors!), but the nearest transit stop is a 15-minute walk to Montview that is poorly lit and doesn't have a continuous sidewalk. would be great to get a transit stop at the marketplace itself!
39.747629919887665	-104.87425803788939	9755 East Montview Boulevard, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-106060	Transit	Would love more bus service to NW Aurora! Lots of folks ride the bud in this area, but busses can run at difficult times or not often enough.

39.74017786514142	-104.86853599548341	10259 East Colfax Avenue, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108063	Pedestrian/Mobility Device	I am hoping Aurora will be working with Denver and RTD to align work/strategy on the Colfax rapid bus transit plan. It would be very disappointing if Aurora does not as this is such a great opportunity and easy win for alternative transportation. The rapid bus should extend to the hospital.
39.75197428943466	-104.8766040802002	2352 Dallas Street, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108065	Transit	A transit stop at Stanely would be great. Such a missed opportunity to not have a stop here.
39.72565641664996	-104.83197212219238	East 6th Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108073	Transit	A rapid bus transit connecting east Aurora, Del Mar, Lowry, and Cherry Creek, and Wash Park would be great. There is no quick and convenient transportation options connecting these economic and community hubs. I think this could be a big opportunity for an Aurora/Denver/RTD partnership. Also, 6th avenue has a huge median (lots of road real estate) from I25 to Dayton that would be perfect for putting in a dedicated bus lane.
39.68948802155259	-104.8282277584076	1490 South Abilene Street, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108435	Transit	This station seems to be underutilized even though it provides amazing options to get to more dense parts of the metro. I think the nearby neighborhoods would benefit from outreach and education about how to use it, where it can get you, and how it might

				be faster than driving at times.
39.6870937345545	-104.80982780456544	1660 South Chambers Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108439	Bicycle	Aurora is infamous for busy arterial roads like Chambers, with three lanes of traffic in each direction. I think some of these arterials with a bus route should change one of the car lanes in each direction into dedicated, bus-only lanes to incentivize bus travel. An example of this working well is Denver's Lincoln street bus lane between I-25 and the State Capitol
39.70376945677238	-104.82820630073549	700 South Abilene Street, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108441	Car	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete with the speed of car travel. It would be faster if the tracks were moved to Sable north of Illif station (and the location of Florida station moved to Sable and Florida).
39.716822414470805	-104.82600688934326	6 Abilene Street, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108442	Bicycle	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete with the speed of car travel.

39.722768263943166	-104.82586205005646	I 225, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108443	Pedestrian/Mobility Device	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete with the speed of car travel.
39.71073574340769	-104.81905460357666	291 South Sable Boulevard, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108444	Transit	I think the train should have the right of way at these intersections instead of having to wait at a stoplight like cars do. They only come every 15 mins or so, so why not activate the crossing signal as soon as a train approaches the intersection?
39.76652318000997	-104.84928846359254	3399 Peoria Crossing, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108445	Car	There are huge opportunities to develop the empty land near Peoria station into businesses, amenities, and housing for people using the trains. It would be especially useful to have here as people make connections between the buses and 2 rail lines.
39.74034905147275	-104.80115085840227	16051 East Colfax Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108702	Transit	No bus shelter

39.74017786514142	-104.86853599548341	10259 East Colfax Avenue, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108063	Pedestrian/Mobility Device	I am hoping Aurora will be working with Denver and RTD to align work/strategy on the Colfax rapid bus transit plan. It would be very disappointing if Aurora does not as this is such a great opportunity and easy win for alternative transportation. The rapid bus should extend to the hospital.
39.75197428943466	-104.8766040802002	2352 Dallas Street, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108065	Transit	A transit stop at Stanely would be great. Such a missed opportunity to not have a stop here.
39.72565641664996	-104.83197212219238	East 6th Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108073	Pedestrian/Mobility Device	A rapid bus transit connecting east Aurora, Del Mar, Lowry, and Cherry Creek, and Wash Park would be great. There is no quick and convenient transportation options connecting these economic and community hubs. I think

				this could be a big opportunity for an Aurora/Denver/RTD partnership. Also, 6th avenue has a huge median (lots of road real estate) from I25 to Dayton that would be perfect for putting in a dedicated bus lane.
39.68948802155259	-104.8282277584076	1490 South Abilene Street, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108435	Pedestrian/Mobility Device	This station seems to be underutilized even though it provides amazing options to get to more dense parts of the metro. I think the nearby neighborhoods would benefit from outreach and education about how to use it, where it can get you, and how it might be faster than driving at times.
39.6870937345545	-104.80982780456544	1660 South Chambers Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108439	Car	Aurora is infamous for busy arterial roads like Chambers, with three lanes of traffic in each direction. I think some of these arterials with a bus route should change one of the car lanes in each direction into dedicated, bus-only lanes to incentivize bus travel. An example of this working well is Denver's Lincoln street bus lane between I-25 and the State Capitol
39.70376945677238	-104.82820630073549	700 South Abilene Street, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108441	Car	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete

				with the speed of car travel. It would be faster if the tracks were moved to Sable north of Illif station (and the location of Florida station moved to Sable and Florida).
39.716822414470805	-104.82600688934326	6 Abilene Street, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108442	Car	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete with the speed of car travel.
39.722768263943166	-104.82586205005646	I 225, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108443	Bicycle	The 90 degree turns that the light rail has to take as it snakes through Aurora make the trip way slower than it needs to be. I know it's probably too expensive and unwieldy, but I think these turns should be undone to allow the train to compete with the speed of car travel.
39.71073574340769	-104.81905460357666	291 South Sable Boulevard, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108444	Bicycle	I think the train should have the right of way at these intersections instead of having to wait at a stoplight like cars do. They only come every 15 mins or so, so why not activate the crossing signal as soon as a train approaches the intersection?
39.76652318000997	-104.84928846359254	3399 Peoria Crossing, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108445	Bicycle	There are huge opportunities to develop the empty land near Peoria station into businesses, amenities, and housing for people using the trains. It would be especially useful to have here as people

				make connections between the buses and 2 rail lines.
39.74034905147275	-104.80115085840227	16051 East Colfax Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108702	Pedestrian/Mobility Device	No bus shelter

39.75470155946426	-104.8468923048969	2601 Peoria Street, Aurora, Colorado 80238, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-107899	Transit	There should be a light rail station here. (CU Anschutz Pop-up)
39.754929901167415	-104.84053728932113	2550 Fitzsimons Parkway, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-107913	Transit	15 should stop here again (Fitzsimons Station) (CU Anschutz Pop-Up)
39.74020257013021	-104.82703325700768	RTD Rail - Colfax Station, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-107930	Transit	Station doesn't feel safe (CU Anschutz Pop-Up)
39.740133912027325	-104.82695407010009	13750 East Colfax Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-107931	Transit	Stopped using this R line b/c of frequent cancelations (CU Anschutz Pop-Up)
39.74017786514142	-104.86853599548341	10259 East Colfax Avenue, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108063	Transit	I am hoping Aurora will be working with Denver and RTD to align work/strategy on the Colfax rapid bus transit plan. It would be very disappointing if Aurora does not as this is such a great opportunity and easy win for alternative transportation. The rapid bus should extend to the hospital.

39.75197428943466	-104.8766040802002	2352 Dallas Street, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108065	Transit	A transit stop at Stanely would be great. Such a missed opportunity to not have a stop here.
39.72565641664996	-104.83197212219238	East 6th Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-108073	Bicycle	A rapid bus transit connecting east Aurora, Del Mar, Lowry, and Cherry Creek, and Wash Park would be great. There is no quick and convenient transportation options connecting these economic and community hubs. I think this could be a big opportunity for an Aurora/Denver/RTD partnership. Also, 6th avenue has a huge median (lots of road real estate) from I25 to Dayton that would be perfect for putting in a dedicated bus lane.

Connecting People. Connecting Places.

OVERVIEW

In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan and builds upon previous study outcomes and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the summer months between Milestone 1 and Milestone 2. Summer Engagement was conducted June-September 2024 and involved further public outreach to gather information on transportation priorities. Community members were asked where they would most like to allocate limited resources (space, time, and budget) in accordance with what factors are most important to them.

ENGAGEMENT OVERVIEW

A variety of engagement efforts were used to gather feedback from the Aurora community about the current state of the transportation system, as outlined below. The numbers below are an estimate of how many people were informed about or engaged with the project through the various efforts.

Community Surveys	New Map Pins	Pop-Up Engagement
252	148	1,213

Community Pop-Up Events

Pop-ups were held at various community events to gather feedback on transportation priorities. Community members were presented with boards that listed different transportation improvements and were asked to place dots next to the improvements that were most important to them.

Event	Date	Total Number Engaged
Martin Luther King Jr. Library	6/7/24	25
Bike to Work Day (I-70 Bike/Ped Bridge)	6/26/24	16
Bike to Work Day (Chambers)	6/26/24	20
Havana Street Night Market	6/29/24	92
Summer Vibes (Wheel Park)	7/18/24	47
Havana Street Night Market	7/20/24	134
Arapahoe County Fair	7/27-7/28/24	125

National Night Out	8/1/24	75
Aurora Public Schools Kick-Off	8/3/24	107
Havana Street and Highline Canal	8/7/2024	20
Cherry Creek Trail and Arapahoe Road	8/13/2024	16
Global Fest	8/17/24	111
Havana Global Night Market	8/31/24	154
Agricultural Fest	9/14/24	143
Anschutz Block Party	9/18/24	128

Community Surveys

Following Milestone 1, a new online survey was made available to the public. The survey gathered feedback on which improvements should be prioritized moving forward and received **252** responses. For a full list of survey responses, go to Appendix C: Survey Results.

Map Comments and Pins

A map tool was available online where community members could place a pin and leave a comment.

- Total map pins since Milestone 1: **429**
- New map pins from June-September 2024: **147**
- Map comments from events: **67**

For a full list of map comments, go to Appendix C: Map Comments.

Toole Design Engagement Efforts

During the summer of 2024, Toole Design hosted two focus groups, four pop-up events, and three stakeholder interviews. This effort aimed to widen Connecting Aurora's community touchpoints by targeting outreach focused on walking, rolling, and biking and speaking to representatives of a more diverse audience of older adults, people with disabilities, and other underrepresented communities of people who bike. Our outreach strategy followed a new approach to Connecting Aurora engagement that emphasizes meeting people where they are through pop-ups and by attending existing events while de-emphasizing open houses.

Toole staff used HDR's meeting toolkit ("Meeting in a Box") to collect responses to standard questions during each outreach opportunity. Ultimately, we spoke to more than **80 individuals** in the community – both key stakeholders and members of the public at large. Focusing on quality over quantity, we had many thoughtful conversations during the summer and widened our audience to include more racially, ethnically, and economically diverse populations. Overall, the community members we spoke with were excited to provide their feedback and enthusiastic about the subject matter. This memorandum details the findings of Connecting Aurora engagement activities facilitated by Toole Design.

PROMOTION

Media Coverage

Over the course of the summer, one news article ran, as outlined in the table below.

Date	Media	Type
7/20/2024	CBS4 Denver	Colorado's third-largest city plans comprehensive transportation overhaul to enhance accessibility - CBS Colorado (cbsnews.com)

Flyer

A flyer was provided to direct people to the website to provide feedback. See Appendix for summer half-page leave behind flyer.

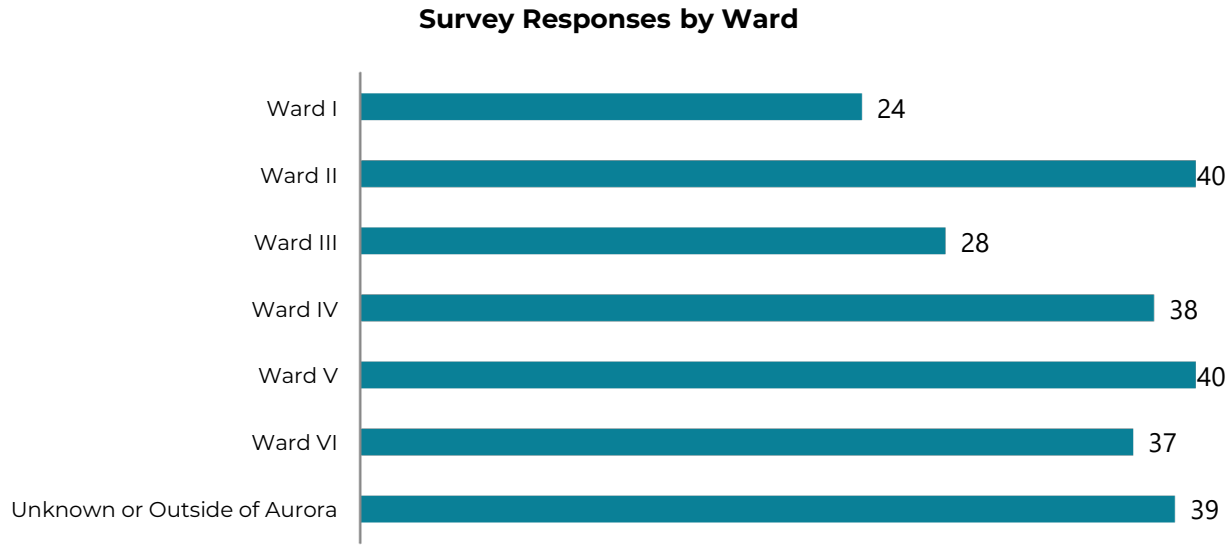
To view the flyer, go to Appendix A: Flyer.

FEEDBACK RESULTS

The results described below are a compilation of the various feedback tools, including the online survey, online map, dot boards at pop-up events, and Toole Design's engagement efforts.

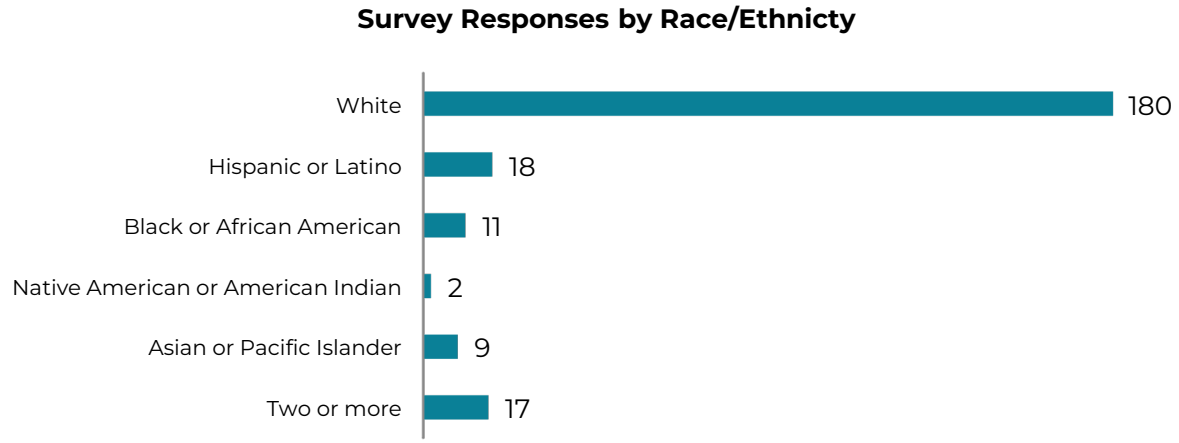
Who We Heard From

- A variety of people who live, work, commute through or visit Aurora.
- There was a diverse representation from all Wards.
- Individuals of all ages, from students to seniors.
- Individuals and families of varying backgrounds.
- There was a small representation from the ADA accessibility community.



DEMOGRAPHIC INFORMATION

Those who filled out the online survey had the opportunity to provide demographic information while filling out the survey.

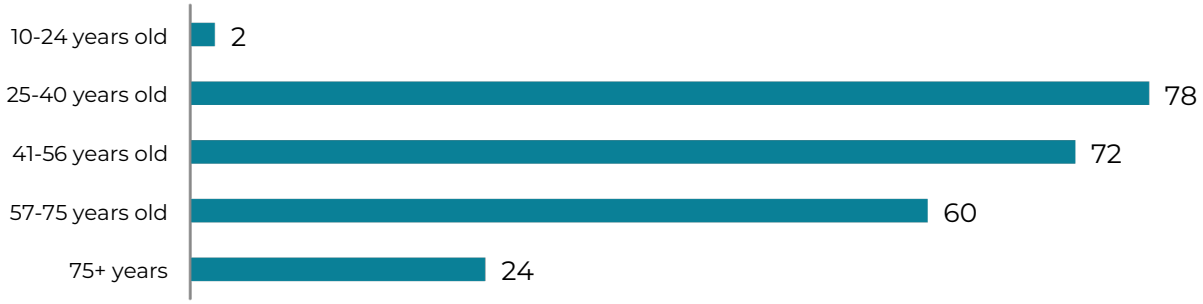


Wards

Of the 252 online surveys, 246 shared which Ward they lived in. Wards II, IV, V, VI all had similar representation, while Wards I and III were slightly less.

Race/Ethnicity

Of the 252 survey responses, 237 participants provided information about their race or ethnicity. Most survey respondents were primarily white with minorities represented by about 25% of the survey responses.



Age

Out of the 252 surveys, 236 respondents provided age information. A variety of ages are represented with the majority falling in between 25-75 years old.

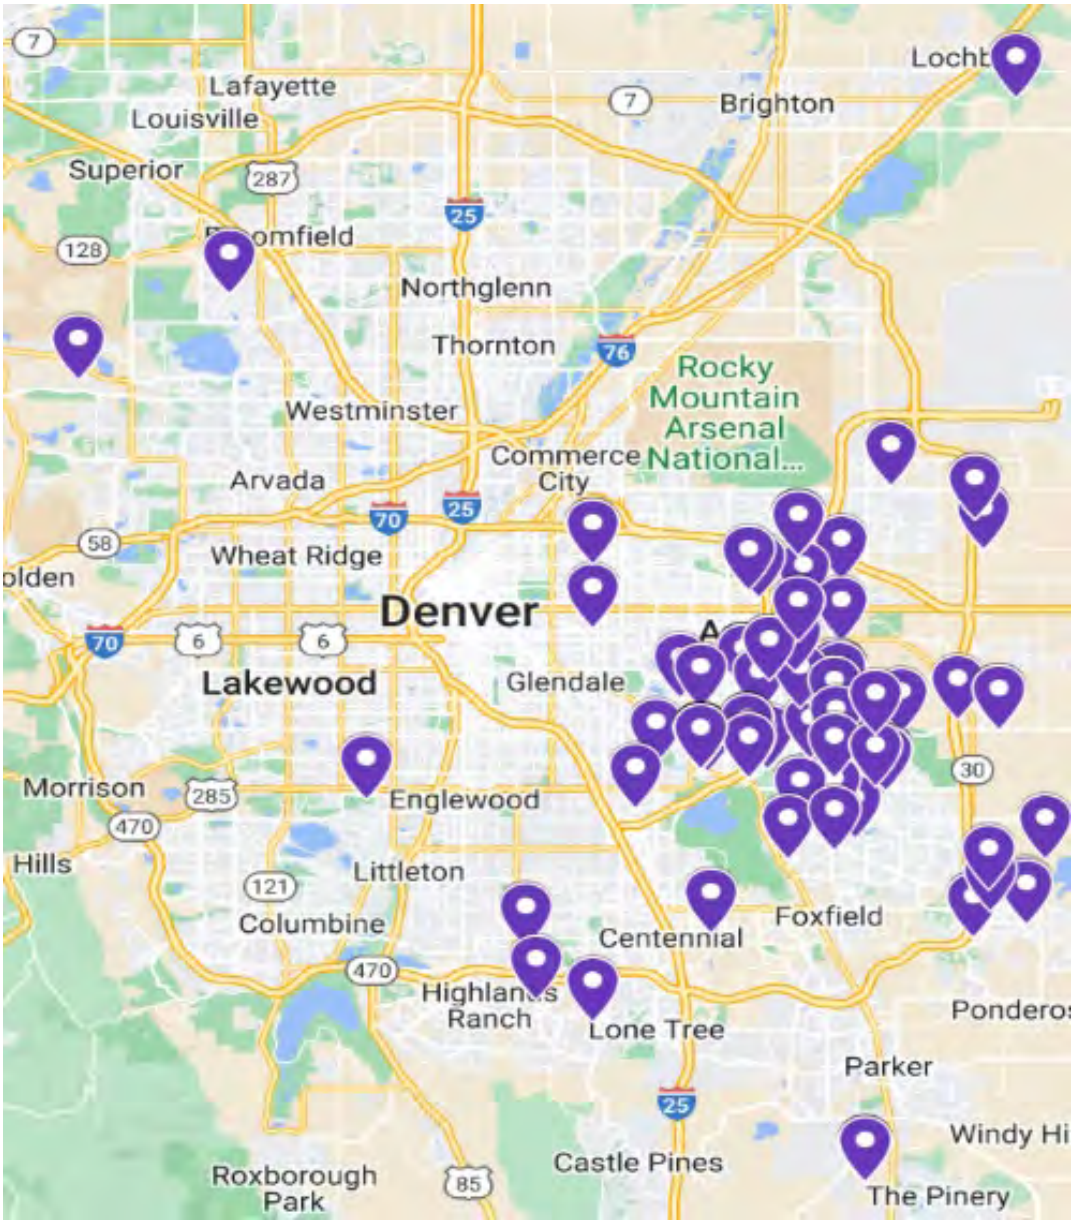
Survey Respondents by Age

Gender

Of the 252 survey responses, 229 provided gender information. More women than men responded to the survey.

Survey Responses by Gender

ADA Accessibility Community



Survey respondents were asked if they are part of the ADA accessibility community. Of the 252 responses, 245 responded to this question with 9% indicating they are part of the community.

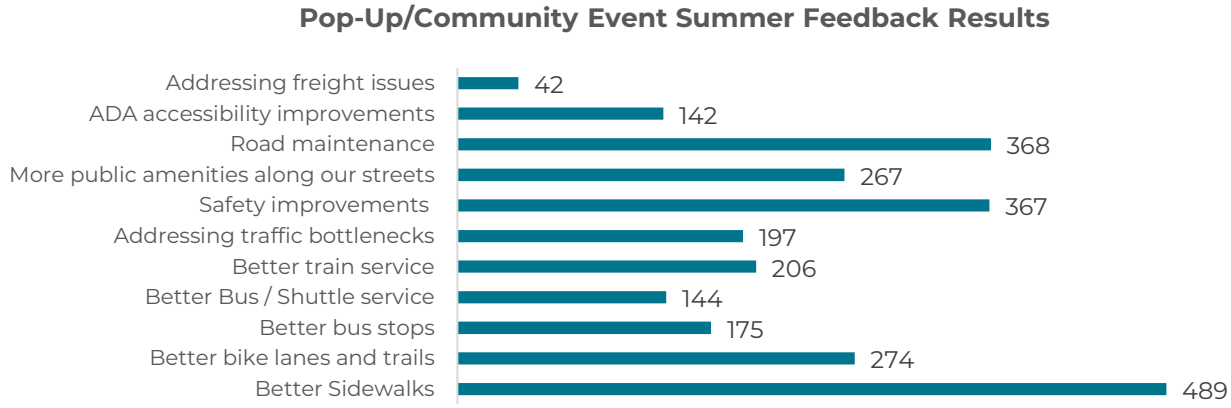
Online Survey Results

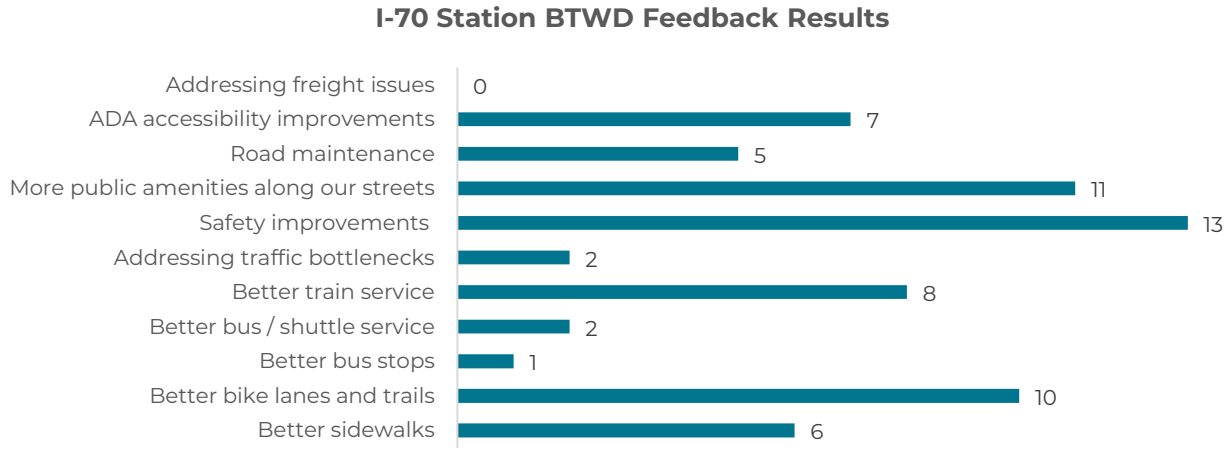


The 252 responses to the online survey are outlined below. The top priorities from the online survey include road maintenance, safety improvements, and addressing traffic bottlenecks.

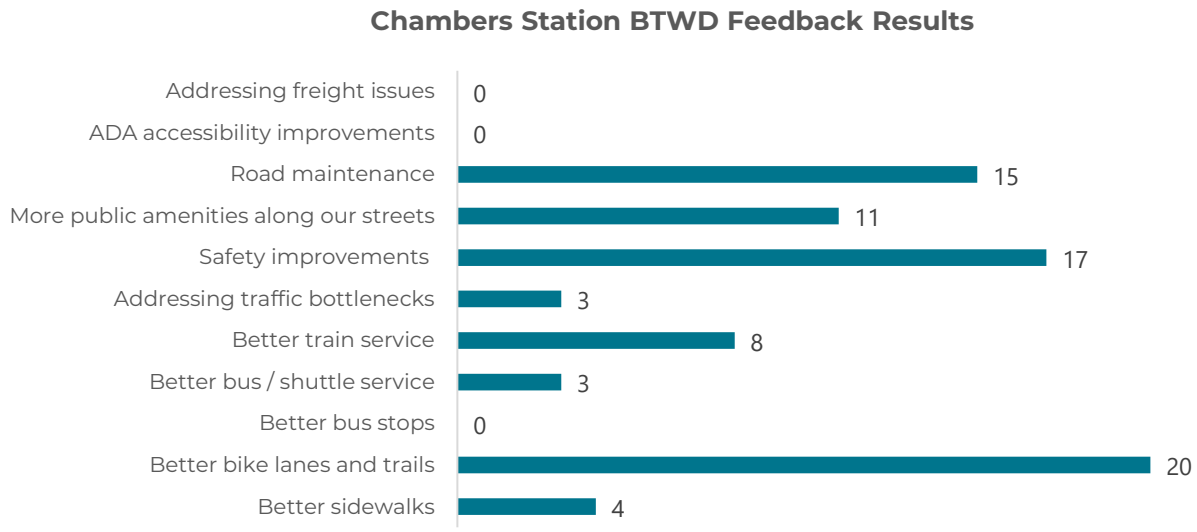
Pop-Up/Community Event Results

The information below outlines the individual results from each of the pop-up/community events hosted throughout the engagement period. Participants were asked to help identify transportation priorities for Aurora. Participants were given four dots to place wherever they wanted for their answer.

All total about 667 people participated through the pop-up/community events and top priorities included better sidewalks, road maintenance and safety improvements. Results from each event are detailed in the following pages.



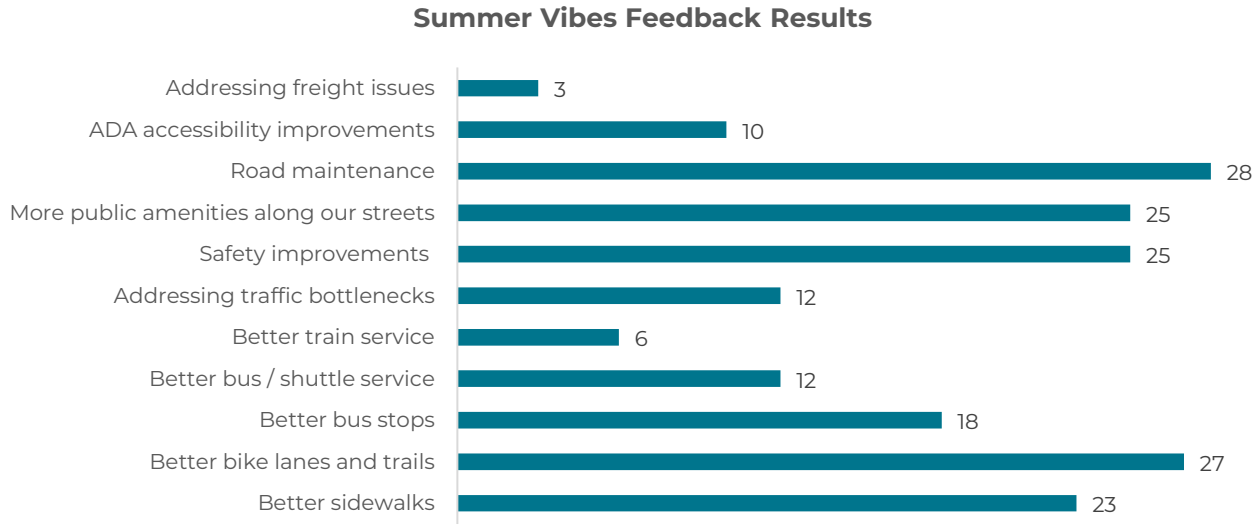
BIKE TO WORK DAY



I-70 Bike/Pedestrian Bridge Station

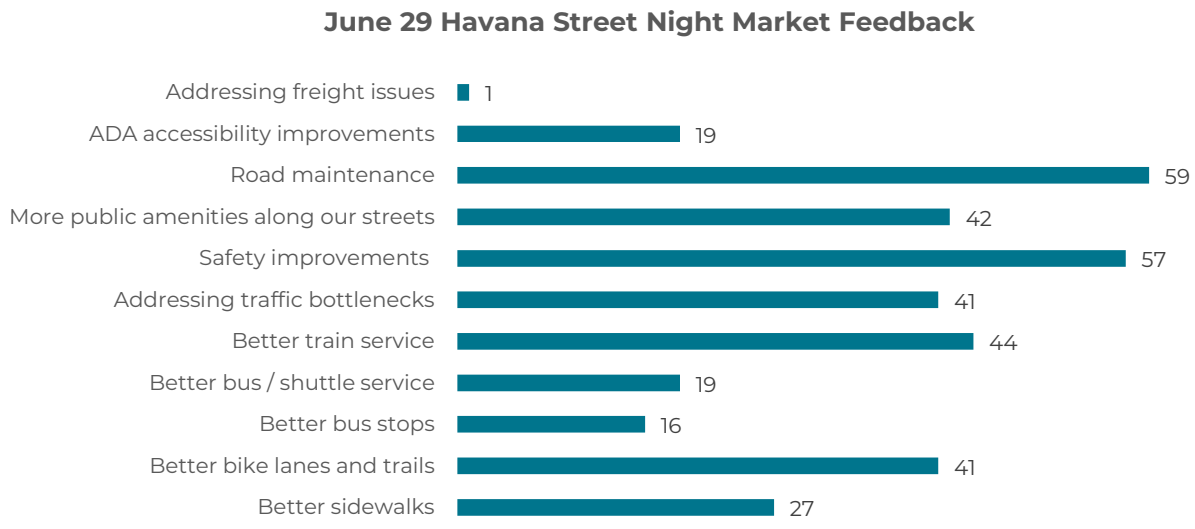
City representatives hosted a Bike to Work Day station at I-70 Bike/Pedestrian bridge. Sixteen people placed on the display board at this event. Respondents from this event prioritized safety improvements, more public amenities along the streets, and better bike lanes and trails.

Chambers Station



The client team also hosted a Bike to Work Day station at the Chambers and Highline Canal location. Twenty people provided feedback at this event. Top priorities included better bike lanes and trails and safety improvements.

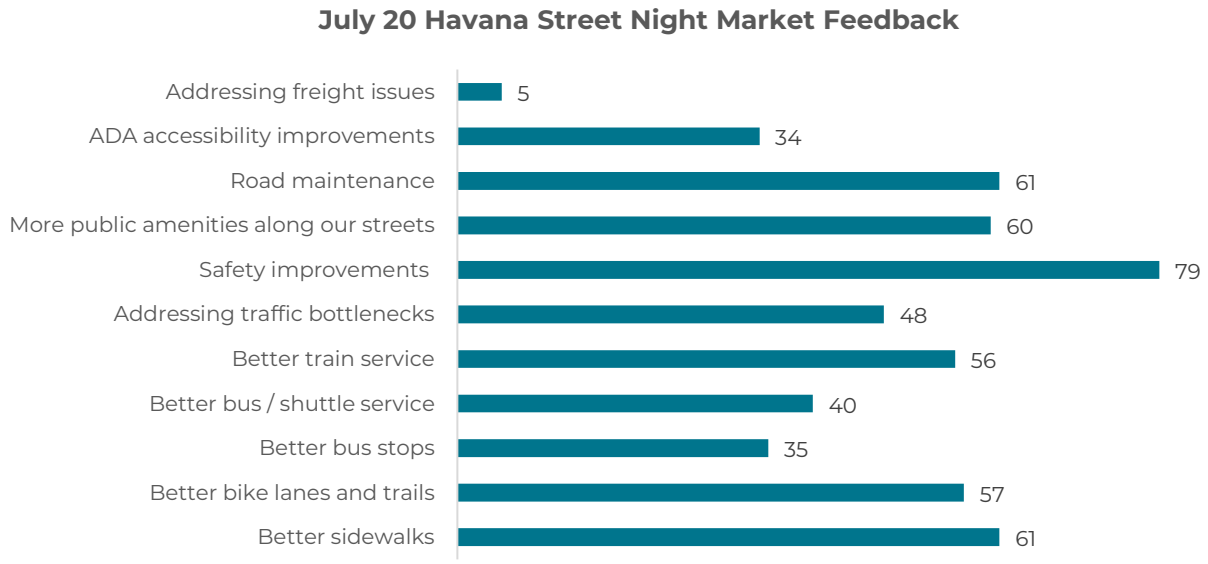
SUMMER VIBES



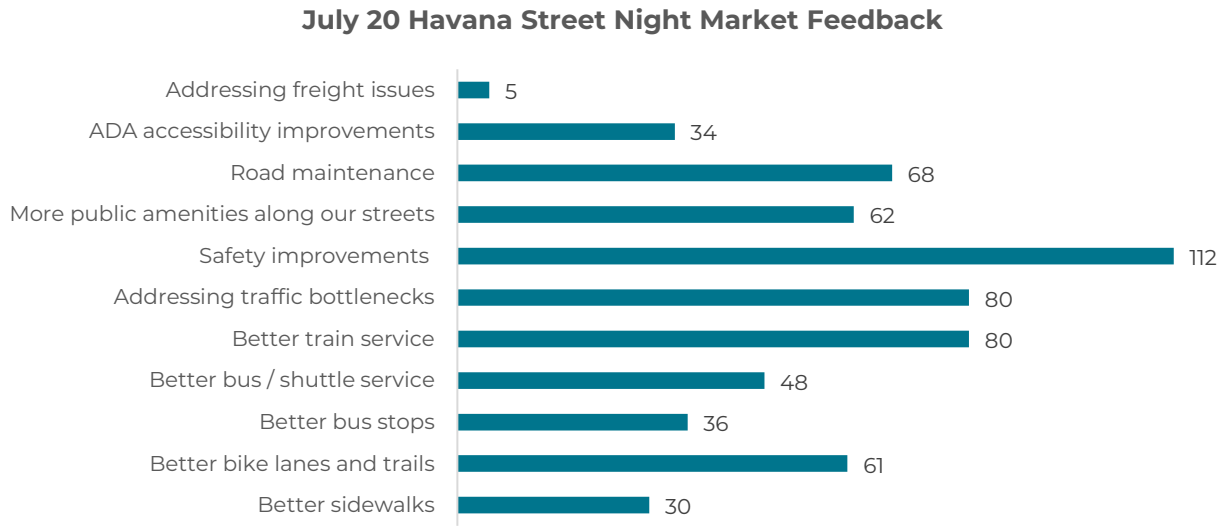
Forty-seven people provided input at the Summer Vibes event at Wheel Park. Top Priorities included road maintenance and better bike lanes and trails.

HAVANA STREET NIGHT MARKET

June 29, 2024



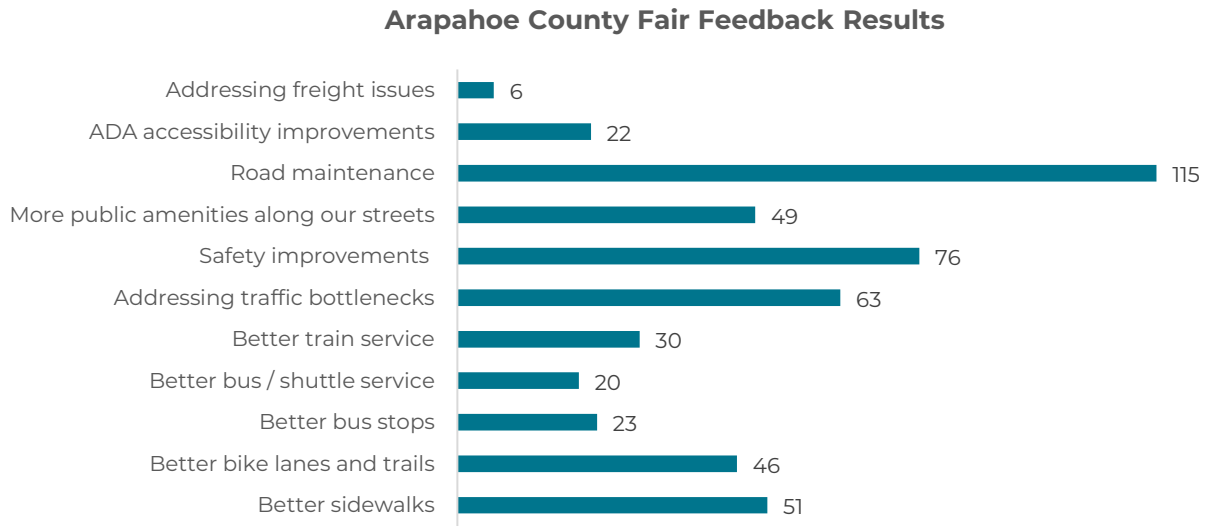
Ninety-one people participated in the feedback opportunity on June 29 at the Havana Street Night Market. Top priorities included road maintenance and safety improvements.



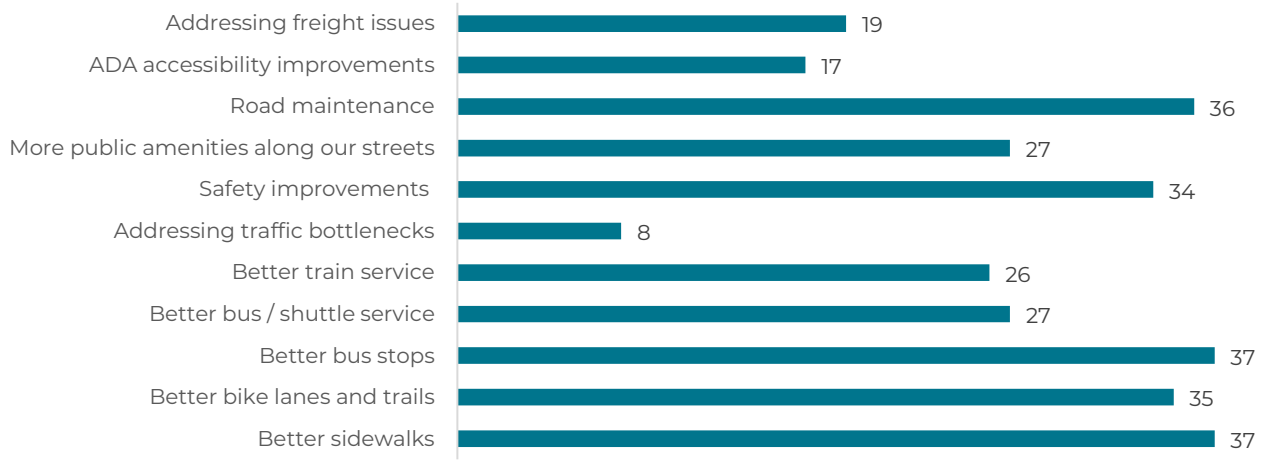
July 20, 2024

One hundred thirty-four people participated in the feedback opportunity on July 20 at the Havana Street Night Market. Top priorities included safety improvements, road maintenance, and better sidewalks.

Aug. 31, 2024



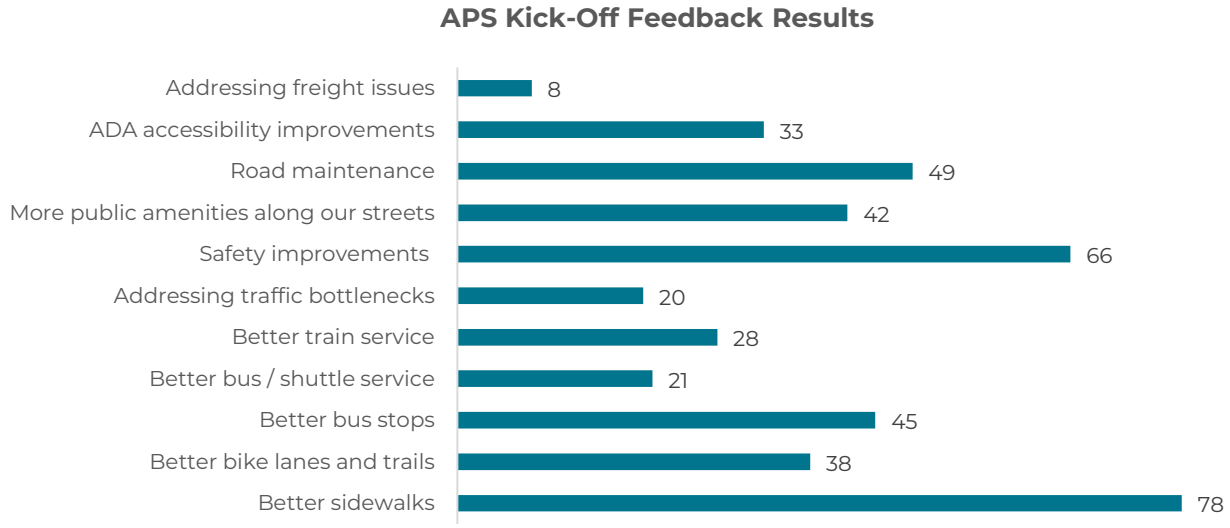
One hundred fifty-four people provided feedback at the Aug. 31 Havana Street Night Market. Top priorities included safety improvements followed by addressing traffic bottlenecks and better train service.



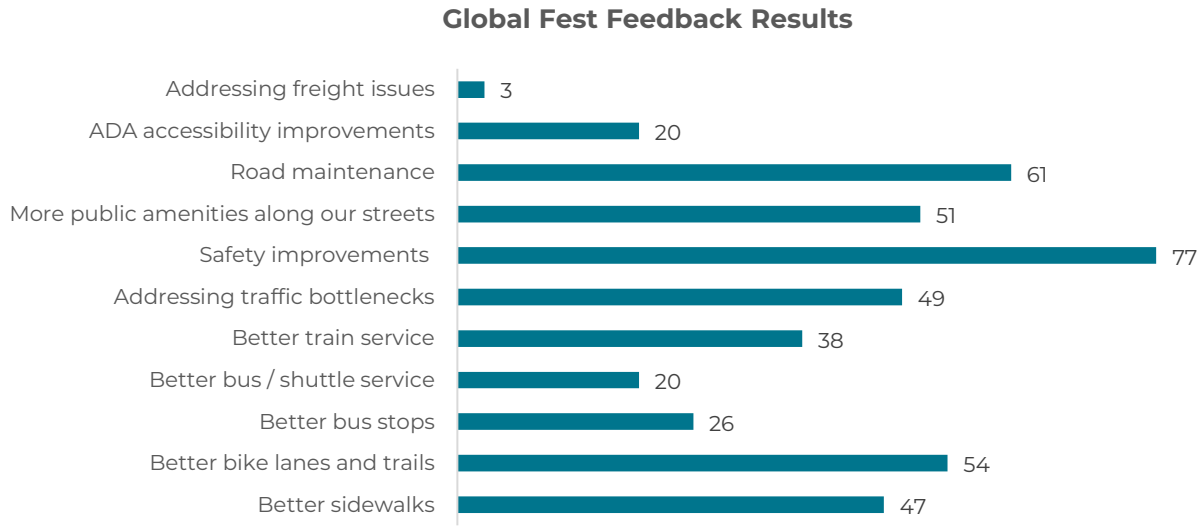
ARAPAHOE COUNTY FAIR

One hundred twenty-five people provided feedback over the course of two days at the Arapahoe County Fair. The top priority was road maintenance.

NATIONAL NIGHT OUT



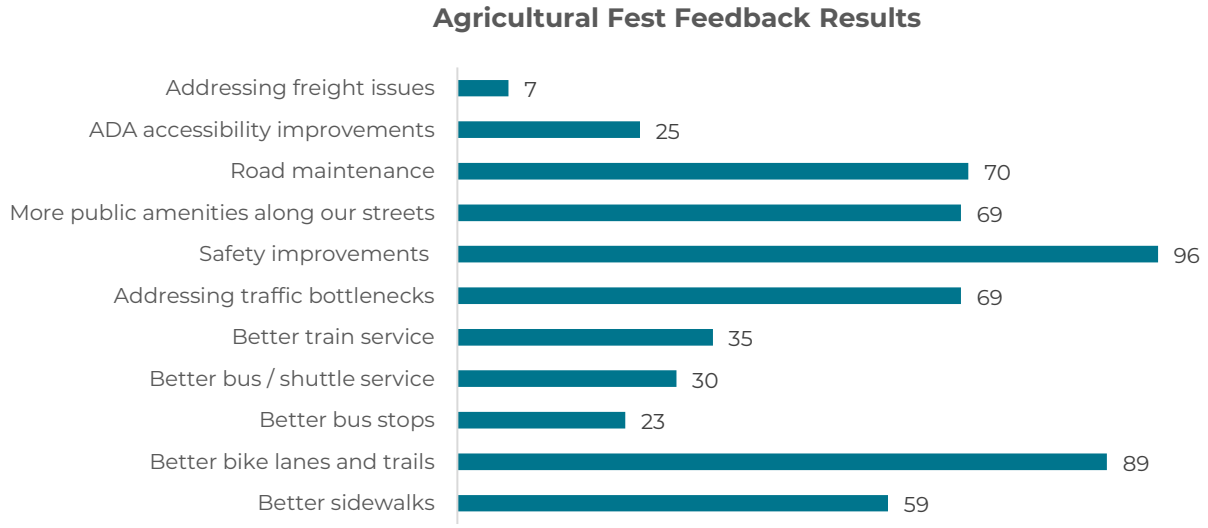
Seventy-six people provided feedback at the National Night Out event at the Martin Luther King Jr. Library. Top priorities included better bus stops, better sidewalks, and road maintenance.



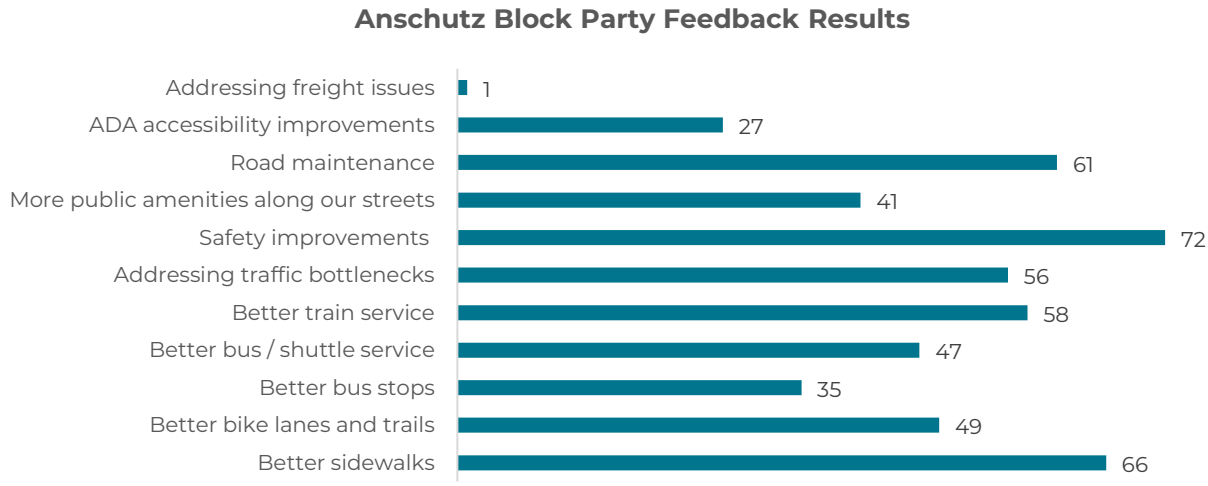
AURORA PUBLIC SCHOOLS KICK-OFF

One hundred seven people provided feedback at the APS kick-off event at the Aurora Town Center. Top priorities included better sidewalks and safety improvements.

GLOBAL FEST



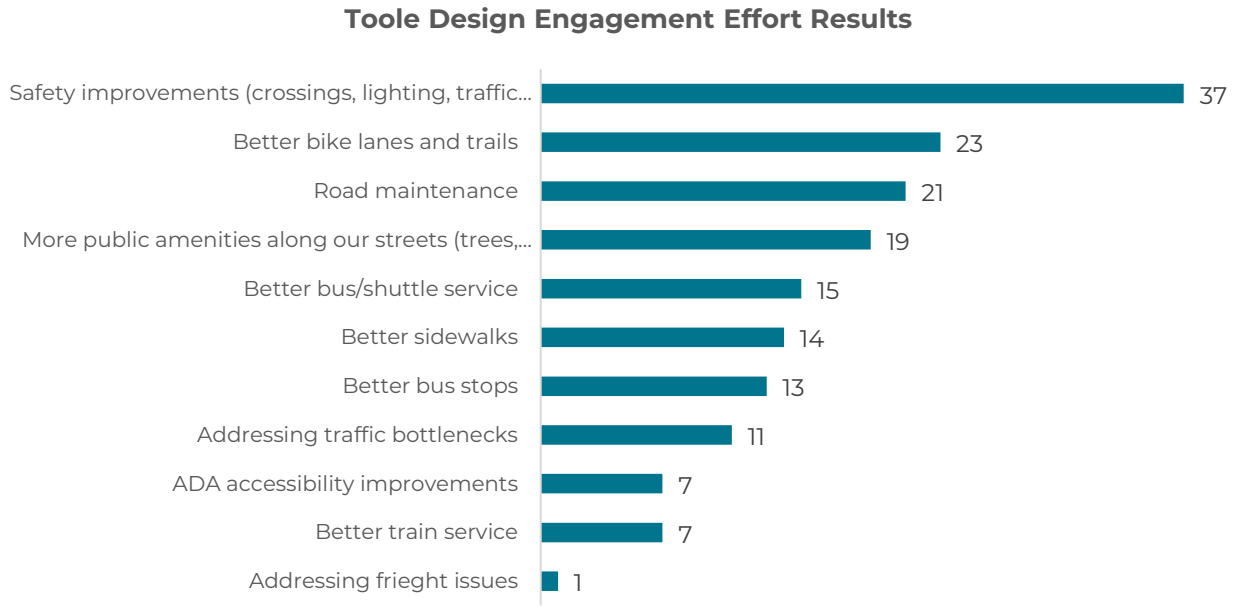
One hundred eleven people participated in the feedback opportunity at Global Fest. Top priorities included safety improvements and road maintenance.



AGRICULTURAL FEST

One hundred forty-three people participated in in the feedback opportunity at the Agricultural Fest. Top priorities included safety improvements and better bike lanes and trails.

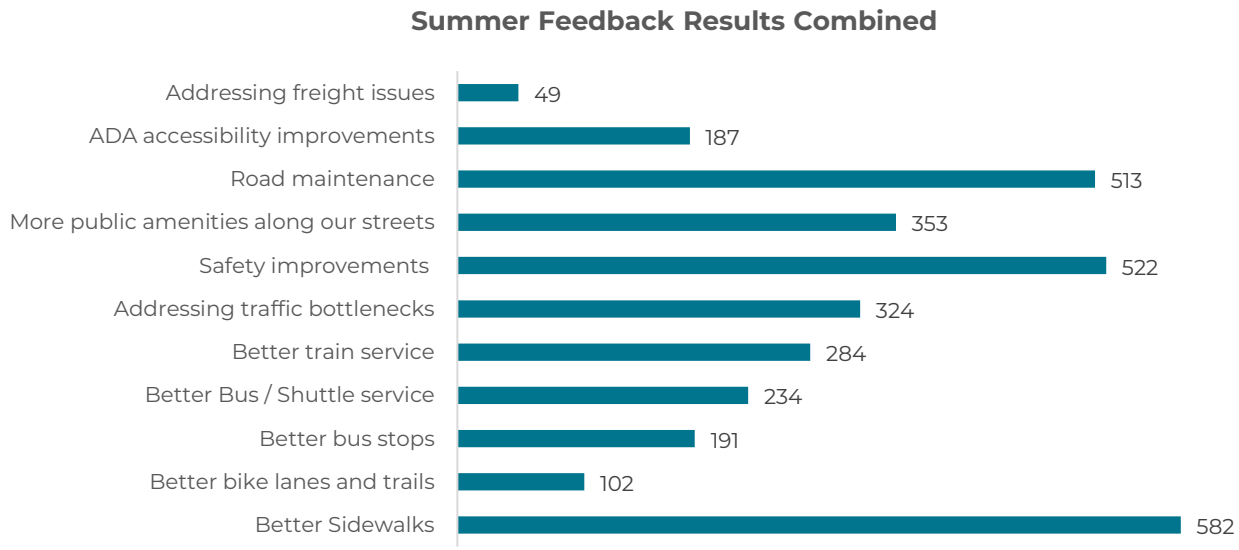
Anschutz Block Party



One hundred twenty-eight people provided feedback at the Anschutz Block Party. Top priorities included safety improvements, better sidewalks and road maintenance.

Summary of Toole Design Results

When asked the question, "What are your transportation priorities for Aurora" and given four votes out of 11 total options, most participants voted for safety improvements (37 votes), better bike lanes and trails (23 votes), road maintenance (21 votes), and public amenities along streets (19 votes). For full summary of Toole Design's efforts go to Appendix C: Toole Design Summary.



What We Heard – Overall

Based on the online survey responses, in-person engagement at pop-up events, and the results of Toole Design's engagement efforts, the top transportation priorities of Aurora's community members are as follows:

1. Better Sidewalks
2. Safety Improvements
3. Road Maintenance

Not that when combined together, the sum of the transit questions – better train service, better bus / shuttle service, better bus stops – is 709, greater than any other category.

On the online map, **148** new comments were added. The majority of comments were concentrated around three locations:

1. CU Anschutz
2. Community College of Aurora Campuses
3. Parker Road and I-225

Full map data can be found in the comprehensive data spreadsheet or online at https://engageaurora.org/connectingaurora/maps/add-feedback-by-location or in Appendix C: Map Comments.

The comments were broken into the following categories:

- Bike: 30%
- Vehicle: 26%
- Pedestrian: 19%
- Transit: 14%
- Other 12%
- Freight: 0%

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

What are your transportation priorities for Aurora?

¿Cuáles son sus prioridades en el sector del transporte para Aurora?

Thank you to those who participated in the first phase of engagement for Connecting Aurora this past spring. As we move to the next phase this fall, we'd like to hear about your priorities.

Gracias a todos los que participaron en la primera fase de compromiso para Connecting Aurora la pasada primavera. A medida que avanzamos hacia la siguiente fase este otoño, nos gustaría conocer sus prioridades.

Help us decide what improvements we should prioritize by allocating limited resources (budget, space and time) to the things that are most important to you. (Select up to 4 choices.)

Ayúdenos a decidir qué mejoras debemos priorizar asignando recursos limitados (presupuesto, espacio y tiempo) a las cosas que son más importantes para usted. (Seleccione hasta 4 opciones).

- Better sidewalks — Mejores aceras
- Safety improvements (crossings, lighting, traffic calming, etc.) — Mejoras de seguridad (cruces, iluminación, pacificación del tráfico, etc.)
- Better bike lanes and trails — Mejores carriles bici y senderos
- More public amenities along our streets (trees, greenspace, etc.) — Más servicios públicos en nuestras calles (árboles, zonas verdes, etc.)
- Better bus stops — Mejores paradas de autobús
- Road maintenance — Mantenimiento de las carreteras
- Better bus/shuttle service — Mejor servicio de autobuses y lanzaderas
- ADA accessibility improvements — Mejoras en la accesibilidad de la ADA
- Better train service — Mejor servicio de tren
- Addressing freight issues — soluciones para el transporte de mercancías
- Addressing traffic bottlenecks — solución de los cuellos de botella del tráfico

Connecting Aurora: Our Multimodal Transportation Master Plan

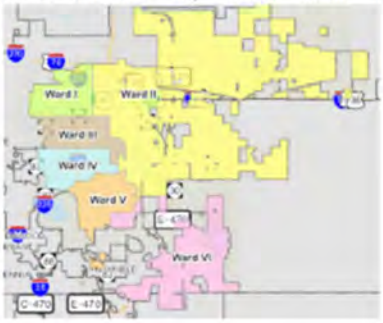
Engage Aurora

Summer 2024 Survey

Please take a moment to answer the question below.

Thank you to those who participated in the first phase of engagement for Connecting Aurora this past spring. As we move to the next phase this fall, we'd like to hear about your priorities.

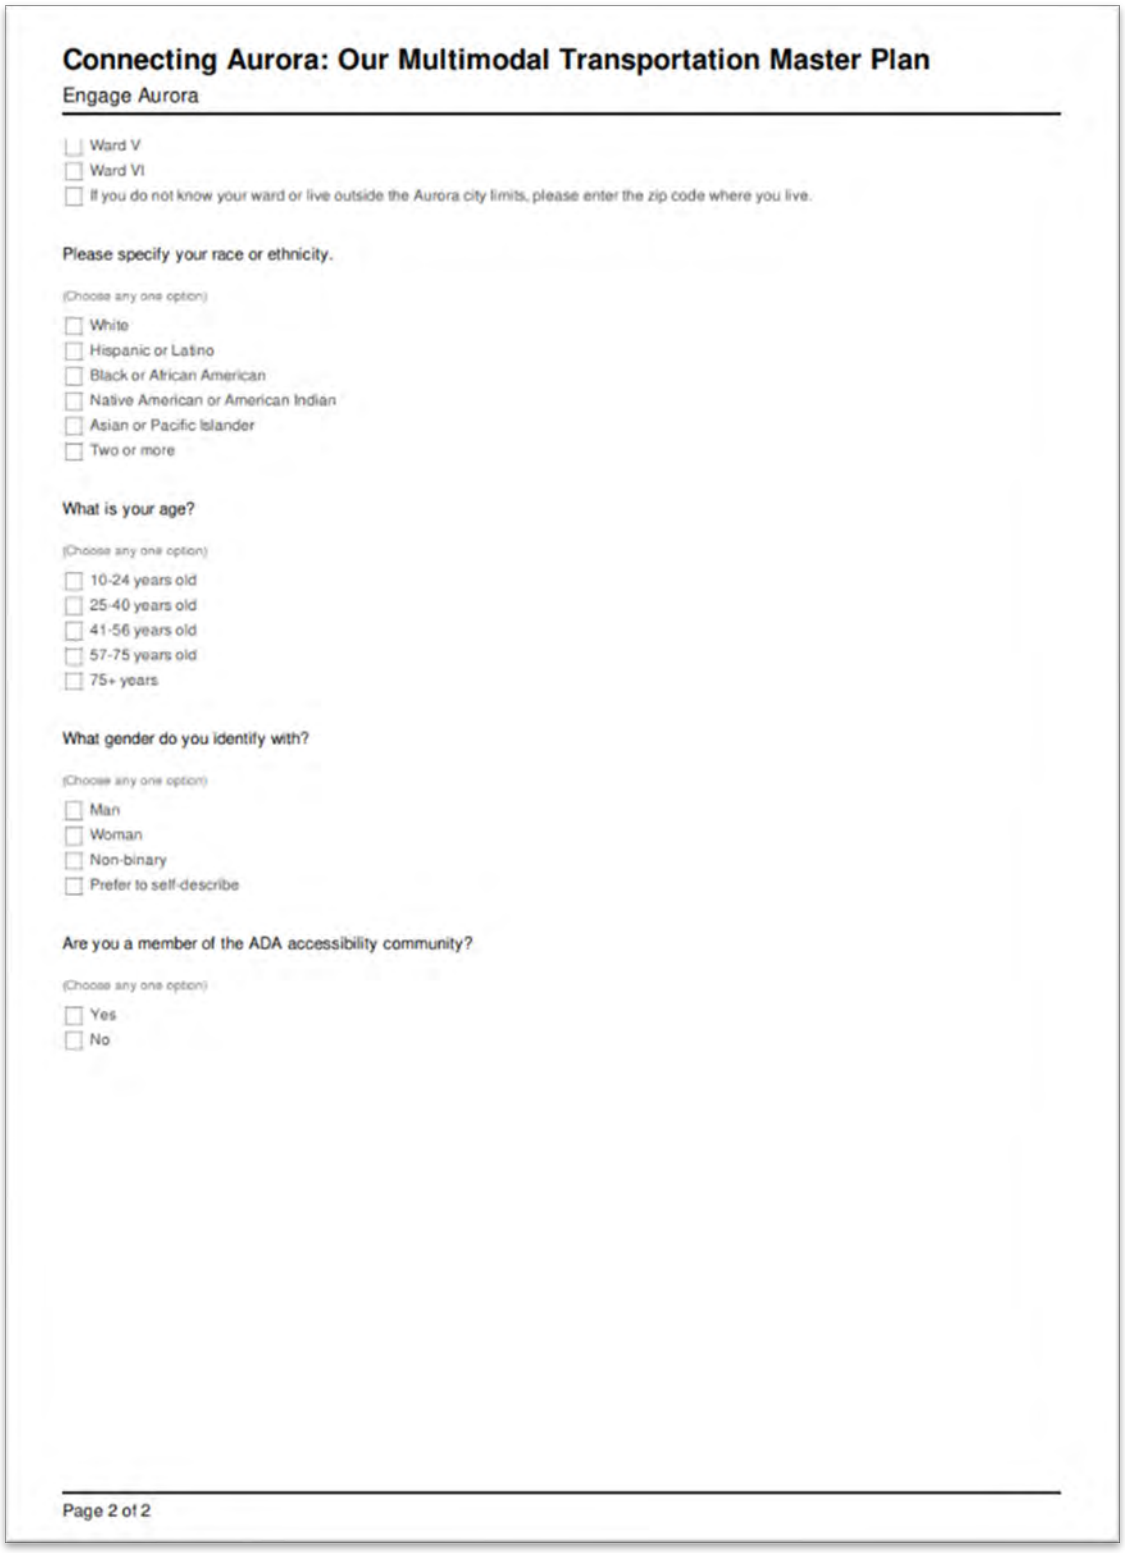
Help us decide what improvements we should prioritize by allocating limited resources (budget, space and time) to the things that are most important to you. **(Select up to 4 choices.)**



(Choose any 4 options)

- ☐ Better sidewalks
- ☐ Better bike lanes and trails
- ☐ Better bus stops
- ☐ Better bus/shuttle service
- ☐ Better train service
- ☐ Addressing traffic bottlenecks
- ☐ Safety improvements (crossings, lighting, traffic calming, etc.)
- ☐ More public amenities along our streets (trees, greenspace, etc.)
- ☐ Road maintenance
- ☐ ADA accessibility improvements
- ☐ Addressing freight issues

Help ensure we're reaching Aurora's diverse community.



Tell us more about yourself (optional).

Based on the map below, which ward do you live in? (Search our map by your address.)

(Choose any one option)

- ☐ Ward I
- ☐ Ward II
- ☐ Ward III
- ☐ Ward IV

Connecting Aurora: Our Multimodal Transportation Master Plan

Engage Aurora

- [ ] Ward V
- [ ] Ward VI
- [ ] If you do not know your ward or live outside the Aurora city limits, please enter the zip code where you live.

Please specify your race or ethnicity.

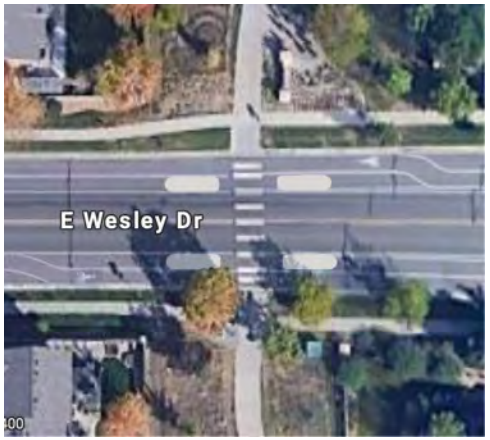
39.67054611649873	-104.74929571151735	South Conservatory Parkway, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-110055	Car	Please enforce speed on S Conservatory Parkway. We have bike lanes, children playing, people walking, cars trying to pull out safely, etc. I have lived in this neighborhood for almost ten years and I can't even count the amount of light poles and trees that have been wiped out. It's infuriating, APD/City Council.
39.67250159557339	-104.74959417002992	South Conservatory Parkway, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-110522	Transit	I believe it would be beneficial to add a bus stop here at the halfway point of Wesley Dr/Conservatory Pkwy to serve the Northeastern and Southeastern communities of Sterling Hills and the Conservatory. It is quite difficult to find a nearby bus station living here!
39.72998016771212	-104.82153296470644	809 Dillon Way, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-110524	Pedestrian/Mobility Device	Bridge is now missing planks of wood. Very unsafe for pedestrians and bikers!!!

39.745028667315665	-104.83761548995973	13003 East 17th Place, Aurora, Colorado 80045, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-110525	Bicycle	Anschutz really needs to put more effort into becoming bike-friendly. No bike lanes at all.
39.58787508939023	-104.69035135030977	25541 East Smoky Hill Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111641	Transit	Bring transit to King Soopers at Arapahoe Road and Smokey Hill (Aurora Reservoir Comment)
39.76520410194384	-104.84689166809552	3508 Peoria Street, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111642	Pedestrian/Mobility Device	Sidewalks in north Aurora (Aurora Reservoir Comment)
39.73880027841411	-104.71582868439283	Future Eb E470 Connector, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111643	Car	Very difficult to get to I70 from Gun Club Road. (Have to get on E470 for 1/4 mile.) (Aurora Reservoir Comment)
39.740589281413754	-104.79818341445447	16251 East Colfax Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111644	Transit	Don't feel safe riding Colfax bus (Aurora Reservoir Comment)
39.68235445271775	-104.72030639648438	East Jewell Avenue, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111757	Bicycle	Dangerous for bikes from the Jewell/gun club intersection to new trail access point of High plains trail. Recommend dedicated bike path or bike lane from intersection to high plains trail. OR for users east of 470 a dedicated bike path paralleling jewell to dunkirk for access to Buckley, a ton of users that commute to base would utilize this and it would minimize danger due to high traffic levels and little to no space for bikes past the high plains trail connection
39.725392361998416	-104.75571155548097	East 6th Avenue, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111758	Bicycle	For trail users coming from the east that may commute to Buckley, squeezing between the guard rail is mandatory to get to the proper side of the road. Another trail connection at this intersection with a dedicated bike path or lane from this intersection to the 6th Ave gate on Buckley would be utilized as well for Buckley commuters and those wishing to connect to the highline canal trail without having to take the greenway would be helpful and create a full loop around Aurora to the existing trail network
39.58778163995644	-104.68980431556703	25551 East Smoky Hill Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111946	Transit	Add transit stop to provide access to King Soopers shopping mall.



39.58123294110284	-104.71110105514528	South Aurora Parkway, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111948	Transit	Add transit stop to improve accessibility to Red Tail Hawk Park
39.61881339179453	-104.67863559722902	5360 South Powhaton Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-111950	Transit	Add transit stop for access to Aurora Reservoir. (Could be seasonal)
39.6747577127634	-104.75347995758057	East Wesley Drive, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114288	Bicycle	The Conservatory Trail crossing at Wesley Dr could use some form of traffic calming and better visibility due to the high speed of cars coming around the bend of Conservatory Parkway. Eliminating some parking spots on Wesley Dr and making part of the bicycle lane protected between Caspian Cir and Ireland Way would create a safer crossing and allow bicyclists turning onto the trail a place to wait to merge should the trail be busy. (Mockup of possible solution pictured)  Image link
39.66754003586197	-104.77187454700471	2684 South Tower Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114289	Pedestrian/Mobility Device	A neighborhood uses the utility road to access the bus stop and the Center Recreation Center, but the end of the utility road is littered with holes from the prairie dog coteire. Paving a portion of the access road leading to the sidewalk on Tower would be a boon. Moving the sidewalk back from the fast moving street creating a buffer area between cars and pedestrians would also make walking and riding a bike here much safer. (Proposed improvement pictured)

				 Image link
39.6686632021741	-104.77227687835693	2684 South Tower Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114302	Transit	This bus stop is near continuously sprayed with icy mud during and after heavy snows as cars and the bus kick up the sludge in the gutter. It would be great to move the benches and sidewalk a little further back from the street. (possible improvement implementations pictured)  Image link
39.65309828971951	-104.73538041114809	East Hampden Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114305	Bicycle	The sidewalk and cycle path end at Conservatory Parkway, extending both to and across the entrance, allowing access to the crosswalk across Hampden, would be marvelous. (Mockup of proposal pictured)

				 Image link
39.63971932790769	-104.79142785072328	4239 South Buckley Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114311	Car	Traffic from this light gets backed up across Quincy during high traffic times.
39.668977024791864	-104.77277576923372	2601 South Tower Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114315	Car	People often go straight from the right turn only lane headed east on Telluride. Needs better signage. Cars going straight also pull so far forward right turning cars need to pull dangerously far onto Tower in order to see if it's safe to turn, moving the crosswalk and stop limit line back may help with this visibility issue. (proposed improvement pictured)  Image link
39.6690100586687	-104.77238416671754	2684 South Tower Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114317	Bicycle	Despite bicycle lanes and paths approaching the Telluride and Tower intersection there is no bicycle infrastructure at the intersection itself, leaving bicycles in conflict with pedestrians and fast moving cars. (possible improvement pictured)

				 Image link
39.63833543450597	-104.79276895523073	16810 East Quincy Avenue, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114331	Car	I've seen eastbound speeding pickups on Quincy slow down just enough to drive over the curb onto the sidewalk in order to turn into the Buckley Square parking lot in order to cut the corner onto Buckley without having to stop with the rest of traffic for the light at Buckley. Please add a guardrail along this stretch of sidewalk.
39.641177549757835	-104.82687056064606	4100 South Parker Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114332	Other	The East Bank residential redevelopment plan is awesome, but should include incentives for future residents to use public transit including improving transit connections. Currently accessing the nearby 9 Mile Station on foot or bicycle from the location is a nightmare, which needs be addressed. The optimal (and prohibitively expensive) option would be some kind of people mover between this location and the station, but an improved bus connection could help. Would be nice if the ground floor permitted some small retail units as well.
39.638860077942596	-104.82747137546541	13750 East Quincy Avenue, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114333	Car	Speeding southbound traffic from Parker cuts through the East Bank parking lot, driving through the parking spots to avoid speed bumps, to race to and run the red light pulling onto Quincy. Maybe some planters by the speed bumps to make pulling around them impossible would prevent some of this.
39.63862047751252	-104.78216350078584	17700 East Quincy Avenue, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114334	Bicycle	If there is any feasible way to add a signal crossing or preferably an underpass so the mixed use path connects to the Quincy Reservoir and Grandview Dog Park it would improve the safety of bicycling and walking here immensely.
39.681553531529495	-104.75372672080995	20100 East Jewell Avenue, Aurora, Colorado 80013, United States	Bicycle	Some kind of pedestrian/bicycle underpass corresponding with the creek bed going under Jewel by the Great Plains

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114335		Park would greatly improve the connections around the area for those outside of a car.
39.681797111634445	-104.76278722286226	East Jewell Avenue, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114349	Bicycle	The Bicycle infrastructure at the intersection of Dunkirk and Jewell is essentially nonexistant despite a mixed use path crossing here. (Proposed improvement pictured)  Image link
39.681603073294156	-104.76302325725555	1831 South Dunkirk Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114351	Bicycle	Bicycle lanes on Dunkirk St. cut off before intersection with Jewell/Iliff leaving bicycles in conflict with pedestrians and cars through the intersection. There is plenty of room in the current street for bicycle lanes and the current number of lanes for cars all the way through. (proposed improvement pictured)

				S Dunkirk St S Dunkirk St S Dunkirk St S Dunkirk St S Dunkirk St S Dunkirk St Image link

39.680917742060515	-104.76292669773103	1831 South Dunkirk Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114362	Bicycle	Awkward and dangerous bicycle lane cutoff. Either extend bicycle lane to the intersection with Jewel or bump out the curb a bit and create a protected bicycle lane up next to the sidewalk.  Image link
39.77529721532602	-104.7000503540039	24620 East 42nd Avenue, Aurora, Colorado 80019, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114394	Transit	Why is there no transit plans for these new developments? It would be the perfect place to run a train through to access the airport that is easy for residents to access without needing to be a dedicated park and ride, yet no plans have been made to preserve space for one through this airport adjacent community ensuring anyone who works at the airport or has a flight has to drive there or take a privately owned bus even though they live right next to the thing and a space has been preserved at the airport station itself for another train entering from this direction.
39.68374572159572	-104.76306080818178	1801 South Dunkirk Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114518	Bicycle	Despite Side Creek Trail being one of the few Trails in the city poised to be used to commute to work on a bike it dead ends at the point of Dunkirk where the bike infrastructure degrades to a "Share the Road" sign. Daylighting the North and Southwest corners of Dunkirk and Colorado and then extending the shifted curb down the block to the intersection with Jewell would allow for a protected bicycle lane extending Side Creek Trail into a more usable feature, and connect it with Powerline Trail. (proposed improvement pictured)

				 Image link

39.65294134250844	-104.74092185497285	East Hampden Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114534	Car	Hampden is unnecessarily wide between Conservatory Parkway and Ceylon St, even at high traffic times having six lanes along this stretch only encourages speeding and trying to race around other drivers as there is never near enough traffic here to actually need six lanes. Cutting one through lane in each direction could make entering Hampden from side streets easier and cut down on people racing along at twice the posted speed limit.
39.62607747464777	-104.7740525007248	18299 East Grand Avenue, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114535	Pedestrian/Mobility Device	Would be nice to extend the path from Marina Park up through the greenway between the houses to Chenango Dr.
39.65343696401516	-104.76350069046022	South Ceylon Street, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114538	Bicycle	Would be nice to have a way to bike from the bike lane on Flanders Way/Ceylon Way to the path Ridgeview Trail without having to ride in the street or through people waiting for the bus on the sidewalk. There's also an annoying tendency for cars to end up parked right across the sidewalk ramp to cross Flanders to the bus stop on Ceylon. (Possible improvement pictured)  Image link

39.646080750306666	-104.79150295257568	South Buckley Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114540	Car	Cars frequently crash through sections of people's backyard fences along Buckley.
39.628730038360715	-104.78379964828491	17410 East Whitaker Drive, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114554	Pedestrian/Mobility Device	Differential settlement in the curb and gutter pans throughout Summer Valley has lead to perennial ponding. In the summer these ponds fill with trash and debris. In winter, the ponds freeze (creating serious safety issues).
39.634084436602954	-104.81472015380861	14995 East Stanford Drive, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114556	Pedestrian/Mobility Device	Southwest Aurora is plagued by over-sized arterial corridors which wholly lack any roadside vegetation. The typical section of these roads (from centerline out) is: dilapidated raised planter bed from 1970s/1980s lacking any vegetation, roadway (with 1-2 more lanes than needed at peak traffic), 4-6' attached sidewalk, dilapidated wood fence separating private property abutting right-of-way. Just look at typical sections of streets in neighboring Centennial for what we should be doing in Aurora.
39.63851720118651	-104.78238344192505	17700 East Quincy Avenue, Aurora, Colorado 80015, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114557	Pedestrian/Mobility Device	We second the neighboring comment regarding a pedestrian underpass here. It would also offer a great opportunity to reconnect tollgate creek to its natural channel bed here. Remove all these hideous concrete-lined channels found throughout Aurora and restore the creeks. These restored riparian corridors could also function as multimodal/non-motorized transportation corridors connecting the entire City.
39.64594857073592	-104.79147613048555	South Buckley Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114558	Pedestrian/Mobility Device	We second this neighboring comment. These old arterials were designed long before current AASHTO standards went into effect. There's no recoverable buffer (aside from the narrow sidewalks) separating edge of pavement from the Right-of-way Line. The section of these old arterials in Aurora is essentially the reverse of what you see in any modern City's development standards.
39.75508804351649	-104.84053373336793	2550 Fitzsimons Parkway, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114625	Pedestrian/Mobility Device	There is no direct way to go from the park to the RTD station. You have to go far out of your way with the current design.
39.6701910094139	-104.7761231660843	2537 South Truckee Way, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114660	Bicycle	Cars and motorcycles use the bicycle lane by the elementary school as a passing lane. Some traffic calming measures could make this stretch of Telluride safer for cars, pedestrians and bicycles and ought to be a priority given the school and rec center. (theoretical traffic calming adding a protected bicycle lane by the school pictured)

				 Image link
39.682127388351184	-104.80988144874574	1901 South Chambers Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114696	Pedestrian/Mobility Device	Would be nice to have a marked and signaled crossing for pedestrians and cyclists to get across Chambers to Tierra Park
39.667560682466274	-104.80380892753602	16001 East Yale Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114810	Car	Cars speed past the Elementary School on Yale and frequently run the stop sign at Laredo treating Yale as a high speed highway. Traffic calming is a must given the school and parks here. (Theoretical improvement pictured)

				 Image link

39.667593717012444	-104.80510711669922	16002 East Yale Avenue, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114811	Bicycle	Better bicycle connections for kids taking a bike to school & after school activities or people wanting to ride to Wheel Park from south of Yale would be appreciated. Theoretical improvement pictured.  Image link
39.660263788324855	-104.79107379913331	South Buckley Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-114814	Car	Cars turning right off of Dartmouth onto Buckley have terrible sight-lines due to the placement of fences, making it difficult to tell if it's safe to turn before being committed to that turn by pulling so far forward.
39.68985954140369	-104.7911274433136	South Buckley Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115073	Bicycle	The bike lane on Buckley is narrow, debris filled, and close to fast moving traffic that runs over it and the sidewalk to hit the fences lining the street too often for comfort. Narrowing the wide island in the middle of the street and shifting the southbound lanes over about a lane's width in sections over time would allow for a comfortable wide bike path along the street next to the sidewalk as well as a narrow verge (which could be planted with grass or as a rain garden) as a slight buffer from traffic. As an added bonus such a wide bike path would give emergency vehicles an optional route around stopped traffic on Buckley. (segment of proposed upgrade pictured)

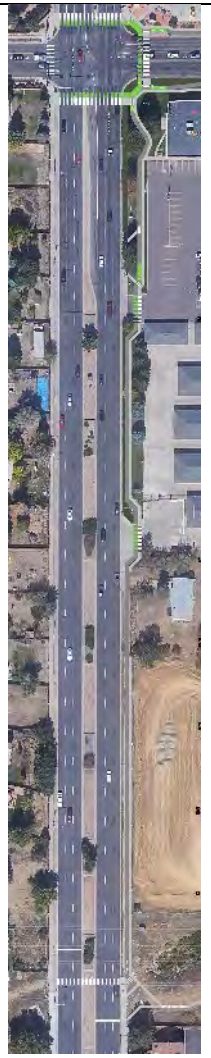
39.690193907560285	-104.79096651077272	South Buckley Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115074	Car	Not sure what can be done about the accident prone intersection here without backing traffic up across Arkansas Dr. The only solution I can think of is rather extreme; removing the Arkansas Pl. nub and instead connecting Pagosa St. to Buckley with a new street through where 1485 Pagosa St. currently sits to create a signaled four way intersection where Arkansas Dr. meets Buckley. A new home/duplex/pair of townhouses could be build where the small segment of Arkansas Pl currently lies. (A very rough mock-up of the proposal pictured.)  Image link
39.689896693278854	-104.8284637928009	1490 South Abilene Street, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115109	Bicycle	Secure bicycle parking for Florida Station would make both the train and the protected bicycle lane on Florida Ave much more usable. One of the reasons people opt to use a car instead of a bicycle for short trips is the concern that their bike may be stolen while parked.

39.690747052955196	-104.79207158088686	1456 South Olathe Way, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115137	Pedestrian/Mobility Device	It would be nice to add a paved mixed use path along Alta Vista Park, leading to the bus stop on one end and towards Rocky Ridge Park on the other so that there is a wheelchair friendly path in the park that doesn't get muddy in the rain and can be shoveled during winter. It would also help the "park" to feel more like a place for humans rather than just a nicely mowed rain catchment. (improvement pictured)  Image link

39.69008245235469	-104.79121863842012	South Buckley Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115138	Transit	Would be awesome to get the bench for this stop out of the sidewalk, add a trash can and have signalized crossing for pedestrians and cyclists to improve the bus stop. (proposed improvement pictured)  Image link
39.68976046963889	-104.82757329940797	13900 East Florida Avenue, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115178	Other	Some nicely lit transit oriented development in the empty lot across from Florida Station with good bicycle parking and pedestrian oriented businesses would make the station much more welcoming and the protected bike lanes more usable.



39.6914199029461	-104.79097723960878	South Buckley Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115179	Car	The fact that three intersections in a row on Buckley are for streets named after Arkansas likely contributes to driver confusion, distraction and irritation for those unfamiliar with the area. Consider renaming a couple, maybe after mountains in Colorado, nearby parks or some other theme, to reduce confusion for drivers.
39.66754829450443	-104.78484570980073	East Yale Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115180	Pedestrian/Mobility Device	The nice wide verge with occasional large shade trees giving pedestrians a buffer from traffic along this section of Yale is phenomenal.
39.68573555898796	-104.79102015495302	East Mexico Avenue, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115391	Bicycle	Please implement a protected intersection at Buckley and Mexico to reduce conflicts between cars, cyclists and pedestrians. Possible implementation pictured.  Image link
39.68535576043264	-104.79117572307588	1700 South Buckley Road, Aurora, Colorado 80017, United States	Transit	Improving the bus stop by moving the bike lane up by the sidewalk so that the bus doesn't have to pull over into the

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115417		bike lane when it stops to pick up passengers would make Buckley safer. Letting the bike lane up by the sidewalk be wide enough for emergency vehicles to use it to get around traffic would be an extra bonus.  Image link
39.74714047448986	-104.87119674682619	1980 Florence Street, Aurora, Colorado 80010, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115461	Bicycle	Aurora should increase the frequency of street sweeping along Montview. This is a major bike route and there is nearly always gravel, glass, and trash in the bike lane.

				Efforts should be made to better clear the bike lane from snow in the winter months.
39.68573143075404	-104.79261338710786	East Mexico Avenue, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115738	Bicycle	Creating a protected intersection at Mexico and Ouray would improve crossing for the school and extend the protected bike lanes on Mexico to the intersection with Buckley. Possible implementation pictured.  Image link
39.685739687221655	-104.79184627532959	East Mexico Avenue, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115739	Bicycle	Running the protected bicycle lane on Mexico through a protected intersection on Buckley would make those lanes far more functional. Possible implementation pictured.  Image link
39.6705213416119	-104.76734161380776	East Villanova Place, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115817	Bicycle	I've seen a disturbing number of near collisions between cars and bicycles at the intersection of Sterling Hills Pkwy and Villanova Pl, due to cyclists weaving in their lane as they peddle up the hill from Tower while cars dip a tire into the cycle lane and because of apparent confusion on the part of car drivers when merging through the cycle lane to turn right. Turning this into a protected intersection would help eliminate these conflicts and keep the

				sidewalks approaching the intersection from being overcrowded with dog walkers and cautious cyclists. Proposal pictured.  Image link
39.68565712250098	-104.8098921775818	15088 East Mexico Drive, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115892	Bicycle	Would be much safer having the protected bicycle lanes on Mexico run to the intersection with Chambers instead of petering out right before it. Putting them up above the curb by the sidewalk makes there be enough room for them without sacrificing a car lane. Proposed intersection pictured.

				 Image link
39.683914983875816	-104.80967760086061	1812 South Chambers Road, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115894	Bicycle	There is room for a protected bike lane up Chambers to the protected bike lanes on Mexico from the path under the powerlines, which would create connectivity and make the area far more accessible and safe to those outside of cars. Proposal pictured.

				 Image link

39.68559519889567	-104.80784296989442	15600 East Mexico Avenue, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115910	Bicycle	Extending the protected bike path on Mexico through Idalia St to Chambers by putting it up on the curb for this section would help eliminate cars running over and breaking the flex posts and reduce debris in the bike lane. Proposal pictured.  Image link
39.68569427663752	-104.80750501155855	15630 East Mexico Avenue, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115915	Pedestrian/Mobility Device	The right turn lane from Idalia St onto Mexico is shaped like a slip lane, and often treated as one, creating dangerous conflicts. Reshaping the corner for a shorter crossing and creating a protected intersection would make this much safer for all users. Possible implementation pictured.  Image link
39.685698404873655	-104.81024086475374	15088 East Mexico Drive, Aurora, Colorado 80012, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115916	Pedestrian/Mobility Device	Shortening the crosswalks at the Chambers / Mexico intersection would make it safer for pedestrians. Possible implementation pictured.

				 Image link
39.6675235185741	-104.80994045734407	2799 South Chambers Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-115945	Bicycle	A cycling and pedestrian bridge across Chambers Rd connecting the Spillway Trial would be marvelous.
39.668427834275306	-104.75896775722505	19712 East Villanova Place, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116084	Car	This intersection of Flanders Street/E Vassar Avenue and Villanova Place is only a two way stop sign. It is very difficult to see up (north) Vassar Avenue so that you can make it safely through that intersection. I would suggest that you make that intersection a 4-way stop.
39.67214407589875	-104.7909986972809	2351 South Buckley Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116310	Car	I've seen the turn lane for southbound traffic on Buckley to turn into Buckley Square (presumably) mistaken for a turn lane for northbound traffic to get to the gas stations in Iliff Plaza, leading to people driving the wrong way down it. Altering this turn lane to a more normal configuration would aid in eliminating such confusion. Since this would require reshaping the island on Buckley it would be a great opportunity to shift the southbound lanes over a bit to make room for a bike lane people would actually feel comfortable using with a buffer from the fast moving traffic along that side of the road. Possible implementation pictured.

				 Image link
39.66754829450443	-104.79100942611696	East Yale Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116531	Bicycle	Turning the gutter lanes on Buckley into cycle tracks and creating a protected intersection at Yale for connections to the Central Rec Center to the east and Toll Gate Creek Trail to the West would make this part of the city's bicycle facilities much more functional, as currently cyclists end up using the sidewalk. Possible implementation pictured, including transitions from proposed cycle track to existing cycle lane.

				 Image link
39.66863842664356	-104.79102015495302	2656 South Olathe Way, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116655	Bicycle	Creating a protected intersection with a marked crossing at Olathe Way and Buckley Rd would help eliminate confusion and conflicts between cars, pedestrians and bicycles. I would also recommend turning the gutter cycle lane on Buckley into a cycle track on at least one side of the street.

				Possible implementation pictured.  Image link
39.66968724966327	-104.79098796844484	South Buckley Road, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116669	Bicycle	Would much prefer Buckley with cycle tracks instead of the narrow existing cycle lanes due to high motor vehicle speed and volume. Possible implementation pictured.

				 Image link

39.66752764788066	-104.7927314043045	East Yale Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116871	Bicycle	Turning what is feasible of the existing cycle lanes on Yale into cycle tracks, and extending those tracks to a protected intersection on Buckley to connect to the bicycle facilities on that street would greatly improve connectivity and safety. Shifting one of the bus stops on Yale so that a stopped bus does not prevent those on the regional trail crossing Yale from seeing/being seen by approaching traffic would also be a major safety improvement. Shifting the bus stop would also create room at the stop to add a handful of bicycle lockers. Possible implementations pictured, one near eliminating conflicts between the bus and bicycles, the other not addressing that current conflict.  Image link
39.600352249555556	-104.70713675022127	6375 South Southlands Parkway, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116944	Car	The rate at which people fail to obey the stop sign at Central St & Southlands Pkwy is abysmal, and has been for years. People run the sign, act like they're being towed by the car in front to run the sign, and (less often) pull to a stop and then sit there like a deer in the headlights because they weren't paying any attention and have no clue who has priority. This likely correlates to how many outright ignore the speed limit on Central and how hurried people are as they pull into the shopping mall off of Aurora Pkwy. Not sure what the best way to address this is, but adding some traffic circles along Central St. at the various "intersections" with parking lot entrances would help slow some traffic, make driving here nicer for customers, and be an opportunity to add pedestrian and cyclist crossing treatments.
39.60817620903627	-104.71281766891481	E470, Aurora, Colorado 80019, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116949	Transit	Are there any future plans regarding transit, or leaving space for potential future transit projects, for all of the new housing at Southlands? Seems like the perfect spot to have a rail station with a route leading north along the E470 to other new Aurora developments and the airport.
39.65302807654813	-104.78436827659608	3451 South Telluride Street, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116953	Pedestrian/Mobility Device	At certain times the light at Telluride runs far too short for a pedestrian to get across Hampden without sprinting.

39.65342870368622	-104.79947984218599	3416 South Laredo Street, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116955	Bicycle	The way the cycle lane on Laredo ends is underwhelming. A similar treatment to the bicycle lane on Telluride as it approaches Hampden and turns to merge with the sidewalk would be preferable.
39.636910201930995	-104.71850395202638	E470, Aurora, Colorado 80019, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-116963	Transit	While the new apartment complexes in the Copperleaf development are not in Aurora, the traffic they are bound to generate due to lack of transit options will be. If there is a way for the city to encourage improvements in transit connections it would be great. Seems connecting this area with the new developments in Aurora along the E470 as well as Southlands mall and the Airport with rail could be an attractive alternate to driving for plenty of trips.
39.64279271146339	-104.77898240089418	17953 East Mansfield Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-117097	Bicycle	Mansfield Ave seems like a prime location for a bicycle lane buffered by car parking spots, with daylighted corners to make crossings safer for all users so that cars don't park on the corners and restrict sight lines.
39.65302394635936	-104.77243781089784	18501 East Hampden Avenue, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-117098	Car	In shorter vehicles it is very difficult to see oncoming southbound traffic on Tower while waiting to turn left onto Hampden. This may contribute to some of the accidents here, and regrading a portion of Tower approaching the intersection from the north would improve visibility.
39.66373682611574	-104.77160632610322	18511 E Bates Dr, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-117176	Pedestrian/Mobility Device	If the dirt trail along this narrow greenway through Seven Hills could be made a bit more wheelchair accessible it would make the neighborhood much better connected for those outside of cars, allowing better access to parks, public transit and the community center across Tower.
39.66756894110626	-104.75707411766054	19827 East Linvale Drive, Aurora, Colorado 80013, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-117177	Pedestrian/Mobility Device	As appreciated as a dirt trail like this is for running on the number of people who ride ATVs on it helps contribute to rapid erosion during spring, which can make sections up this hill difficult to navigate. Adding some kind of erosion mitigation could help, as would having it paved to the south side where the water usually runs while keeping the north side dirt/gravel.

Toole Design Summary Memo

SUMMARY

During the summer of 2024, Toole Design hosted two focus groups, four pop-up events, and three stakeholder interviews. This effort aimed to widen Connecting Aurora's community touchpoints by targeting outreach focused on walking, rolling, and biking and speaking to representatives of a more diverse audience of older adults, people with disabilities, and other underrepresented communities of people who bike. Our outreach strategy followed a new approach to Connecting Aurora engagement that emphasizes meeting people where they are through pop-ups and by attending existing events while de-emphasizing open houses.

Toole staff used HDR's meeting toolkit ("Meeting in a Box") to collect responses to standard questions during each outreach opportunity. Ultimately, we spoke to more than 80 individuals in the community – both key stakeholders and members of the public at large. Focusing on quality over quantity, we had many thoughtful conversations during the summer and widened our audience to include more racially, ethnically, and economically diverse populations. Overall, the community members we spoke with were excited to provide their feedback and enthusiastic about the subject matter. This memorandum details the findings of Connecting Aurora engagement activities facilitated by Toole Design.

FOCUS GROUPS (2)

PEDESTRIAN/ACCESSIBILITY

The goal of the first focus group was to learn about those who 1) face the greatest challenges walking, rolling, and navigating the pedestrian network in Aurora, such as older adults and people with disabilities, and 2) predominantly depend on the pedestrian network, such as youths and lower-income populations. We hosted this focus group in person at the Aurora Center for Active Adults on July 30th, 2024.

Reach – 6

Adrienne Razavi – Organizing Manager, Denver Streets Partnership

Caitlin Matthews – Executive Director, Food Justice NW Aurora

Daniel Taylor – President, Heather Gardens Metropolitan District President

Rosemarie Powell – Arapahoe County Senior Resources

Donna Hunt – Youth Superintendent, Aurora Youth Commission

Nicholas Leach – District Planner, Aurora Public Schools

Findings

1. **Sidewalk Safety Concerns:** Participants highlighted the need for wider sidewalks, buffers from traffic noise, and detached sidewalks for better safety and comfort. Issues with narrow sidewalks leading to incidents, such as falling into grass or roadways, were noted. Broken sidewalks and lack of plowing in the winter force pedestrians, including children, to walk in the streets, leading to crashes, serious injuries, and fatalities.

2. **Traffic and Pedestrian Safety**: High-speed traffic, lack of pedestrian signals, and vehicles blowing through stop signs or crosswalks during a red light were major concerns. Participants were particularly concerned about the safety of youth and older adults, when crossing the street.
3. **Accessibility and Inclusivity:** Wheelchair-accessible curbs and level sidewalks are needed, especially for older adults and children. Concerns were raised about personal safety, particularly on major streets like Colfax Ave, even with pedestrian signals and lighting.
4. **Community and Environmental Factors:** The focus group emphasized the importance of smart land use planning to create walkable communities with access to essential services like grocery stores, which are currently lacking in certain areas. Beyond this planning effort, there was a call for better community safety measures and addressing broader issues such as housing, employment, and transportation.
5. **Future Planning and Infrastructure Improvements:** Participants suggested various improvements, including more pedestrian signals, crosswalks, and programs to promote walking and biking. Discussions generated ideas for solutions, including coordinated traffic signals to slow traffic, lower speed limits, no right turn on red, and tactical urbanism projects like pop-up bike lanes. Participants were open to tradeoffs that deprioritized driving, such as lane removal, speed reduction, and banning right turn on red. They also voiced interest in securing additional funding for pedestrian improvements by collecting fees from new development.

BICYCLIST

The goal of the second focus group was to learn from those who navigate the bicycle network in Aurora today, interact frequently with cyclists (bike shops), and experience disproportionate impacts from the built environment. We hosted this focus group virtually using a Miro board on July 31. Despite several RSVPs, only one person attended the focus group. As a result, we subsequently scheduled and held additional stakeholder interviews.

Reach – 1

PJ Torney, Bicycle Aurora

Findings

Need for Enhanced Bicycle Infrastructure: PJ emphasized the importance of shifting focus from recreational cycling to cycling as a viable transportation option. He preferred a cycle track (a raised bike lane that is elevated from street level, whether at sidewalk height or intermediate height between the sidewalk and the roadway) for the greatest comfort on arterial roadways but acknowledged the likely expense. His second choice was a protected bike lane (a bike lane that is at street level and include horizontal separation via a buffer and vertical separation via elements like flex posts, planters, or curbs), with the caveat that these types of bikeways require attention to maintenance and upkeep (repainting, replacing flex posts, plowing, sweeping).

6. **Safety and Enforcement Concerns:** PJ identified high-speed, multi-lane roads (stroads) as significant barriers to safe cycling. He was emphatic about reducing speeds on these roads and enforcing stricter penalties for distracted driving and hitting cyclists. He highlighted the need for secure bicycle parking and storage to prevent theft as a major concern.
7. **Key Routes and Connectivity:** Important bicycle connections he mentioned included Smith Rd, 6th Ave, Hamden Ave, Havana St, Buckley Rd, Chambers Rd, Smokey Hill Rd, 38th Ave, and Jewell Ave. Better connections between these routes and the trail network were deemed necessary. He

noted the lack of direct connections between existing trails and advocated for integrating the on-street and off-street networks.

8. **Community and Cultural Shifts:** Encouraging a cultural shift towards viewing cycling as an exciting and viable mode of transportation for short trips (e.g., 3-5 miles) was considered essential. PJ suggested initiatives to challenge residents to use bikes for errands. Educating and introducing residents to the benefits of cycling could lead to happier, more active communities.
9. **Challenges and Trade-offs:** Budget constraints and potential community pushback were acknowledged as challenges to implementing better bicycle infrastructure. PJ stressed the importance of building a city that meets the needs of its people rather than just accommodating motor vehicles. Beyond pushing developers to complete pieces of the network on their property, he encouraged the City to create broader connections between these developments.

BICYCLIST STAKEHOLDER INTERVIEWS (3)

Due to limited attendance of the bicyclist focus group, Toole Design organized three additional virtual stakeholder interviews with key stakeholders in the local bicycling community from August 6th to September 5th, 2024.

MACKENZIE HARDT, HARDT FAMILY CYCLERY

Mackenzie Hardt owns Hardt Family Cyclery in northwest Aurora, and leads group rides with community members.

Reach – 1

Findings

Safety as a Primary Concern: Most cyclists Mackenzie has met bike frequently for daily activities, like commuting and school pick-ups. Safety, rather than convenience, is their primary concern. Mackenzie highlighted issues such as distracted driving and problematic intersections as significant deterrents. Specific areas of concern include the lack of safe north-south corridors and the need for better connections to schools and businesses.

10. **Infrastructure and Connectivity:** There is a strong preference for separated bike facilities, particularly cycle tracks (raised bike lanes that are elevated from street level, whether at sidewalk height or intermediate height between the sidewalk and the roadway). He was open to protected bike lanes (bike lanes that are at street level and include horizontal separation via a buffer and vertical separation via elements like flex posts, planters, or curbs) if done well. For example, he felt that the installation of protected bike lanes with flex posts on Central Park Boulevard in Denver was unsuccessful because most people still don't feel safe enough biking on such a wide street. He would like the city to invest in facilities that accommodate all ages and abilities and are comfortable and attractive enough to support riders. The current trail system is not well-connected to key destinations like grocery stores and schools, limiting its utility for daily errands. Suggested improvements include consolidating driveways, better intersection designs, and creating more neighborhood trail connections.
11. **Community and Educational Initiatives:** Mackenzie emphasized the importance of community initiatives like bike buses and safety in numbers for improving biking conditions. Educational

efforts are crucial, especially around Safe Routes to School (SRTS) programs and trail etiquette. Better wayfinding signage using pictographs could accommodate Aurora's diverse population.

12. **Specific Area Improvements:** Ward 1 is a more comfortable area to bike in today due to its gridded street network. Bike facilities on streets like 17th Ave, Dayton St, Jamaica St, and connecting to the Anschutz Medical Campus and children's hospital would improve connectivity. Crossing improvements of Colfax Ave and Havana St, including the High Line Canal Trail crossing, would significantly enhance usability and safety.
13. **Vision for Future Biking Infrastructure:** Well-planned biking infrastructure can deliver economic benefits and should be prioritized, especially in business districts. There is support for experimental and temporary infrastructure to test solutions before making them permanent. The focus should be on designing infrastructure that is safe and appealing for all ages, particularly families, to encourage a mode shift towards biking.

ALTON DILLARD, MAJOR TAYLOR CYCLING CLUB

Alton is one of the founders of the Denver chapter of the Major Taylor Cycling Club, a national cycling club formed in honor of the African American cyclist who overcame racial injustice to become the first world cycling champion of color.

Reach – 1

Findings

Connectivity is most important: He can ride 60 miles from his home just west of the Aurora city line in Denver to Chatfield Reservoir without crossing at grade. He would like to be able to do that in Aurora, such as along the Toll Gate Trail. He can't ride for miles without having to cross major intersections at grade. A safer way to cross arterials is by improving signalized intersections with things like bike signals or constructing underpasses, which would make him feel more comfortable. He repeatedly referenced the High Line Canal crossing at Havana St. and Exposition Ave as an uncomfortable crossing, with cyclists darting through traffic rather than waiting for the signal. He also referenced right turn slip lanes as a significant challenge for cyclists at crossings, noting that drivers who respect cyclists and allow them to cross risk being rear-ended. Better signage at at-grade crossings would also improve continuity so that people biking know that they are still following the regional trail (he gave the example of the Westerly Creek Trail crossing just south of Mississippi Ave, as it temporarily becomes a sidewalk).

14. **He and some members avoid the road network:** The primary focus of the Major Taylor Cycling Club of Denver is road cycling, but some members have begun gravel cycling due to roadway safety challenges. He avoids riding on-street and prefers paths like the regional trail along US 36 up to Boulder. He discussed the challenge of biking along striped shoulders like Tower Rd and "getting buzzed by cars" (drivers passing closer than the legal 3 ft), or worse, drivers "rolling coal". While mainly a recreational cyclist, he would ideally like to bike to commercial areas near Havana St and Florida Ave or Havana St and Mississippi Ave to run errands or shop. However, he feels these trips are already scary in a car, and he can't imagine completing them by bicycle. He cited the prevalence of driveways and conflict points with turning vehicles on arterials as a barrier to him or his members cycling on-street.
15. **He prefers more physical separation for bikeways:** He primarily rides side paths and trails due to their separation from vehicles. He also likes protected bike lanes, particularly the one in Denver

on 14th St with concrete curbs – but with the caveat that they need to be paired with protected intersections that give space for cyclists to wait at corners and that slow turning vehicles. He mentioned the tension that arises when the city installs bollards and removes parking but thinks we need to create a mindset that people need to share space. He feels paint is not protection. He also likes Denver's approach encouraging people to ride on quieter neighborhood streets. He felt the cycle track was "utopian" but worried about the optics to City Council and taxpayers of the financial investment if one were installed, but not many people used it.

16. **The design user should be a casual cyclist:** He thought the City should cater to residents who would be interested in casual riding but too scared to ride anywhere.
17. **Marketing and communications are key:** He stressed that to avoid the intense conversations around tradeoffs, the City should reach out to the community early, particularly business owners and historically underrepresented groups, to discuss overall benefits around health, environmental impacts, etc.

NICK GLENN, NORTHEAST TRANSPORTATION CONNECTIONS (NETC)

Nick Glenn is the Transportation Program Manager at NETC, a transportation management association that runs three e-bike libraries in the north Denver metro area. NETC is the Denver Connector micro transit operator in Globeville Elyria Swansea and Montbello and is in the process of installing secure bike parking at Central Park Station and Stanley Marketplace in Aurora.

Reach - 1

Findings

Possible Opportunities to Mimic NETC's Denver Programs: NETC has a skills course at the Montbello Recreation Center where they teach basic maintenance to middle school kids and other members of the community. They've found that teaching basic skills like how to fix a flat tire and other bicycle maintenance is key to preventing bikes from sitting behind the house. Their main goal is to 1) keep people riding and will even replace their bikes if needed and 2) get kids excited about biking to create lifelong cyclists. They have strong partnerships with Families Against Violent Acts (FAVA), Montbello Organizing Committee (MOC), Montbello Walks, the Boys and Girls Club, and other community-based organizations that help them connect with the broader community. They have also organized group rides with the Boys and Girls Club in Commerce City, which tends to keep older kids' attention better than skills courses with cones in a parking lot.

18. **Need for Funding, Grants, and Partnerships:** NETC wants to do more work in Aurora, but much of their grant funding comes from Denver departments like the Climate Office and Energy Office. NETC also has more limited relationships with community-based organizations in Aurora, than in Denver. Right now, NETC's main partners in Aurora are Stanley Marketplace and RTD from their work on the smart bike racks and bike lockers.
19. **Desired Trip Types Mainly for Work and Groceries:** Most of the people NETC works with via their bike libraries use the e-bikes mainly to access work and get groceries. E-bikes have proven useful for people who work the night shift at FedEx or UPS in early hours, like 3 or 4 am, since RTD doesn't run service at those times. Shift workers sometimes don't want to ride because they don't want to get sweaty – there may be an opportunity for more end-of-trip facilities such as

showers and lockers. They are starting to provide child seats with new cargo bikes. Breaking old habits of getting in the car and going to the grocery store is difficult. There need to be clearer solutions for getting groceries home, whether in baskets or panniers.

20. **Separated Bike Facilities with Buffers Critical:** Nick repeatedly emphasized the importance of barriers and separation from traffic. He preferred protected bike lanes or cycle tracks. He was less sure of the side path because he thought it might be unclear that people are allowed to bike there. Signage and markings indicating such would be important, and he would want it to be separated via a landscaped or hardscaped buffer from traffic, not attached. He thinks buffers are critical to avoid intimidating the average cyclist and to make biking more accessible. He referenced poor driving in Aurora, whether overly aggressive driving or drivers unaware of how their behavior affects those outside of a vehicle.
21. **Improved Wayfinding Important:** NETC unsuccessfully applied for a grant from the CDOT Innovative Mobility Office to install wayfinding between the trail system and the on-street network in Aurora. For new riders, he felt that constant reassurance that they're going in the right direction is important. He wanted the signs to indicate proximity to nearby destinations in terms of minutes rather than miles. QR codes could help provide the most up-to-date information to adjust to construction or updates.

POP-UPS (4)

Toole hosted pop-up events to meet people where they are and to reach a wider cross-section of users, including commuters, recreational cyclists, and those cycling for transportation.

SUMMER BIKE TO WORK DAY (JUNE 26)

The City of Aurora organized two stations along the Highline Canal: one just west of Chambers Road, and the other south of I-70 near Tower Road, as part of the grand opening of the High Line Canal bridge across I-70. Sixty people attended the city's Chambers Road station, and 25 people stopped by the I-70/Tower Road Station. A Toole staff member attended the station near Stanley Marketplace hosted by Northeast Transportation Connections (NETC). The Stanley Marketplace station was also well-attended.

Reach - ~100

Findings

Primary takeaway: Participants' top two priorities are 1) better bike lanes and trails and 2) safety improvements.

Figure 1: Bike to Work Day Participants at the Stanley Marketplace Station

HAVANA ST & HIGH LINE CANAL TRAIL (AUGUST 7)

Reach - ~20

Approximately:

- 70% male, 30% female
- 70% white, 30% people of color
- 80% people walking or biking on the trail, 20% people riding the bus (one biked to the stop)

Findings

Primary takeaway: This trail crossing is challenging for people walking and biking due to the long traffic signal cycle time and wait to cross Havana St. Numerous cyclists jetted through traffic against the signal to continue on their way more quickly. This group prioritized better bike lanes, trails, and safety improvements. Toole staff also spoke with several transit riders traveling to and from the southbound bus stop.

Figure 2: Cyclist Crossing Havana St Against the Signal

Figure 3: Visitors Voting at the Pop-Up

MARTIN LUTHER KING JR. LIBRARY ON COLFAX AVE (JUNE 7)

Reach - ~25

Approximately:

- 95% people of color
- 5 Spanish speakers
- 5 people with disabilities

Findings

Primary takeaway: Many individuals experiencing homelessness, Spanish speakers, and people with disabilities frequent the MLK Jr. Library and Fletcher Plaza. Compared to other groups, people we spoke with were much more concerned with improving transit service, bus stops, and safety compared to other groups. Having a Spanish interpreter present was useful for gathering more diverse feedback.

Figure 4: Library Visitor Providing Feedback

CHERRY CREEK TRAIL AND ARAPAHOE RD (AUGUST 13)

Reach – 16

Approximately:

- 95% white
- 25% female
- 75% male

Findings

Primary takeaway: This group of respondents consisted mainly of middle-aged recreational cyclists. Their priorities primarily related to better bike lanes and trails, addressing traffic bottlenecks, and road maintenance, while they generally were less interested in transit improvements.

Figure 5: Pop-Up on Cherry Creek Trail

OVERALL FINDINGS

When asked the question, "What are your transportation priorities for Aurora" and given four votes out of 11 total options, most participants voted for safety improvements (37 votes), better bike lanes and trails (23 votes), road maintenance (21 votes), and public amenities along streets (19 votes).

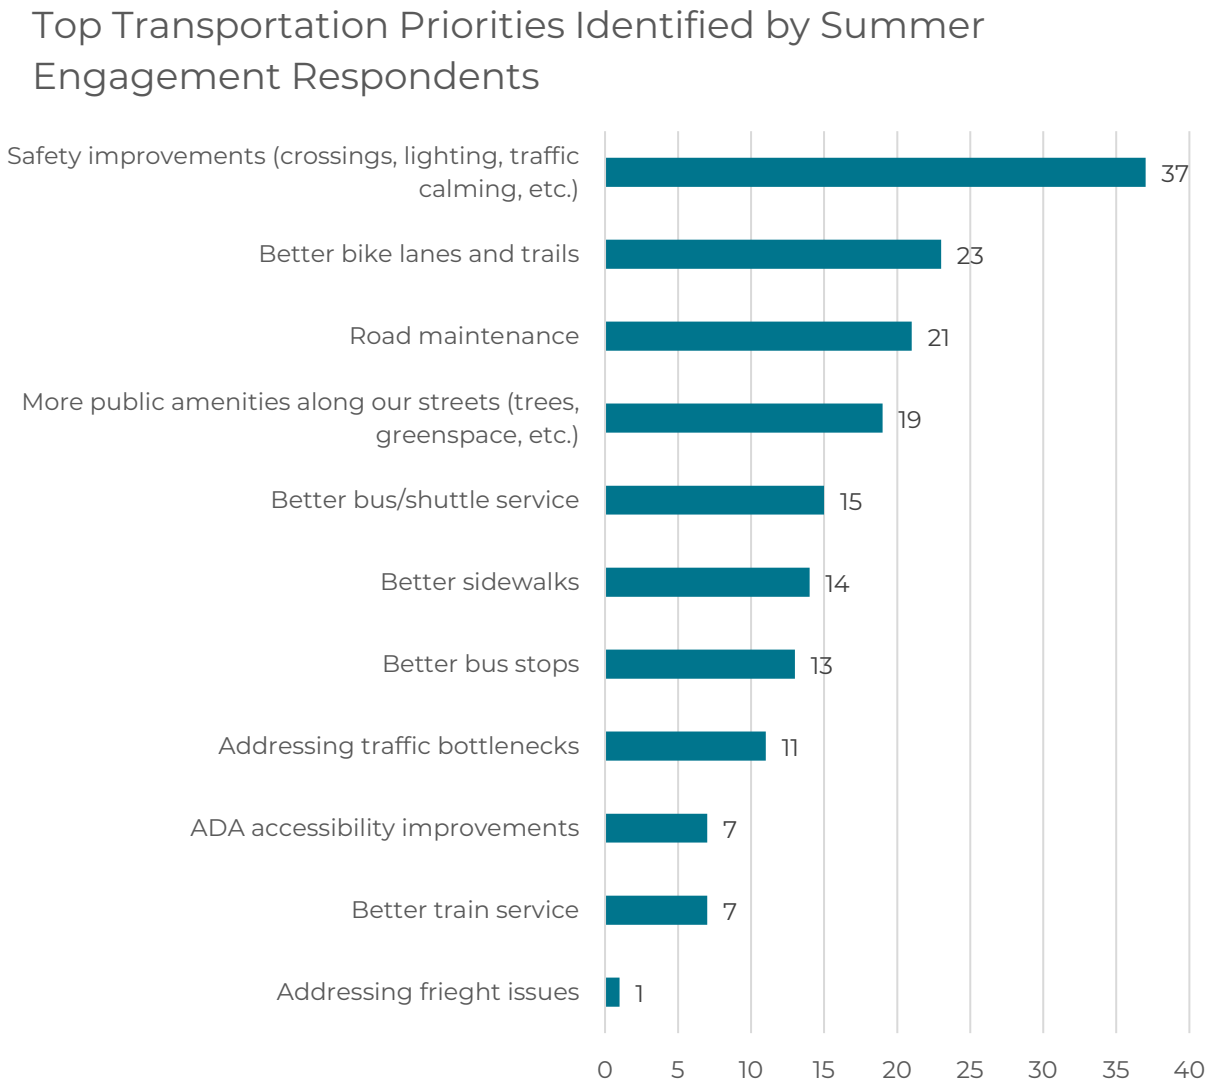

Figure 6: Transportation Priorities

During conversations with participants, some also mentioned specific issues or challenges they experience while navigating the transportation system in Aurora. Toole staff documented these comments on sticky notes and categorized them to provide additional detail on these priorities (**Table 1**).

TABLE 1: TRANSPORTATION PRIORITIES

Priority	Votes	Other related comments
Better sidewalks	14	**1.** Sidewalk maintenance
Better bike lanes and trails	23	**2.** Better connectivity between neighborhoods and trail system (2) **3.** Wayfinding and signage with mileage to key destinations (3) **4.** Experience getting lost/losing the trail **5.** Trash and maintenance issues/glass under bridges (3) **6.** Need for better trail etiquette **7.** More consistent trail connectivity (2) **8.** Wider side paths and trails **9.** Support more separated bike lanes even if with flex posts **10.** At-grade trail crossings are difficult **11.** Desire for more public amenities along trails like water fountains and bathrooms **12.** Poor winter maintenance
Better bus stops	13	**13.** More places to sit **14.** More covered areas to protect from weather
Better bus/shuttle service	15	**15.** More frequent service (3) **16.** Bus not reliable (2) **17.** Personal safety concerns/need for transit security (3)
Better train service	7	**18.** Particularly in south Aurora to Parker Main St and downtown Denver
Addressing traffic bottlenecks	11	**19.** Signal timing (2) **20.** Desire to improve response time for emergency services and fire
Safety improvements (crossings, lighting, traffic calming, etc.)	37	**21.** Long traffic signal cycle times, but walk times too short **22.** Must push pedestrian button even when light in desired direction is green **23.** Don't feel safe on-street due to driver behavior like speeding/distraction/disregard for those outside a car (4) **24.** Poor traffic enforcement (3) **25.** Tinted windows **26.** One person had been hit by a car five times in crosswalks or parking lot driveways, and another person had been struck in the crosswalk at the intersection of two arterials

More public amenities along our streets (trees, greenspace, etc.)	19	**27.** Tree maintenance in south Aurora **28.** More bike amenities like parking and lockers (3) **29.** E-bike charging stations **30.** Need for more services for houseless individuals to improve downtown/economic development/business
Road maintenance	21	**31.** Road condition on Colfax is poor, and too many potholes **32.** Winter weather can be challenging for drivers
ADA accessibility improvements	7	
Addressing freight issues	1	

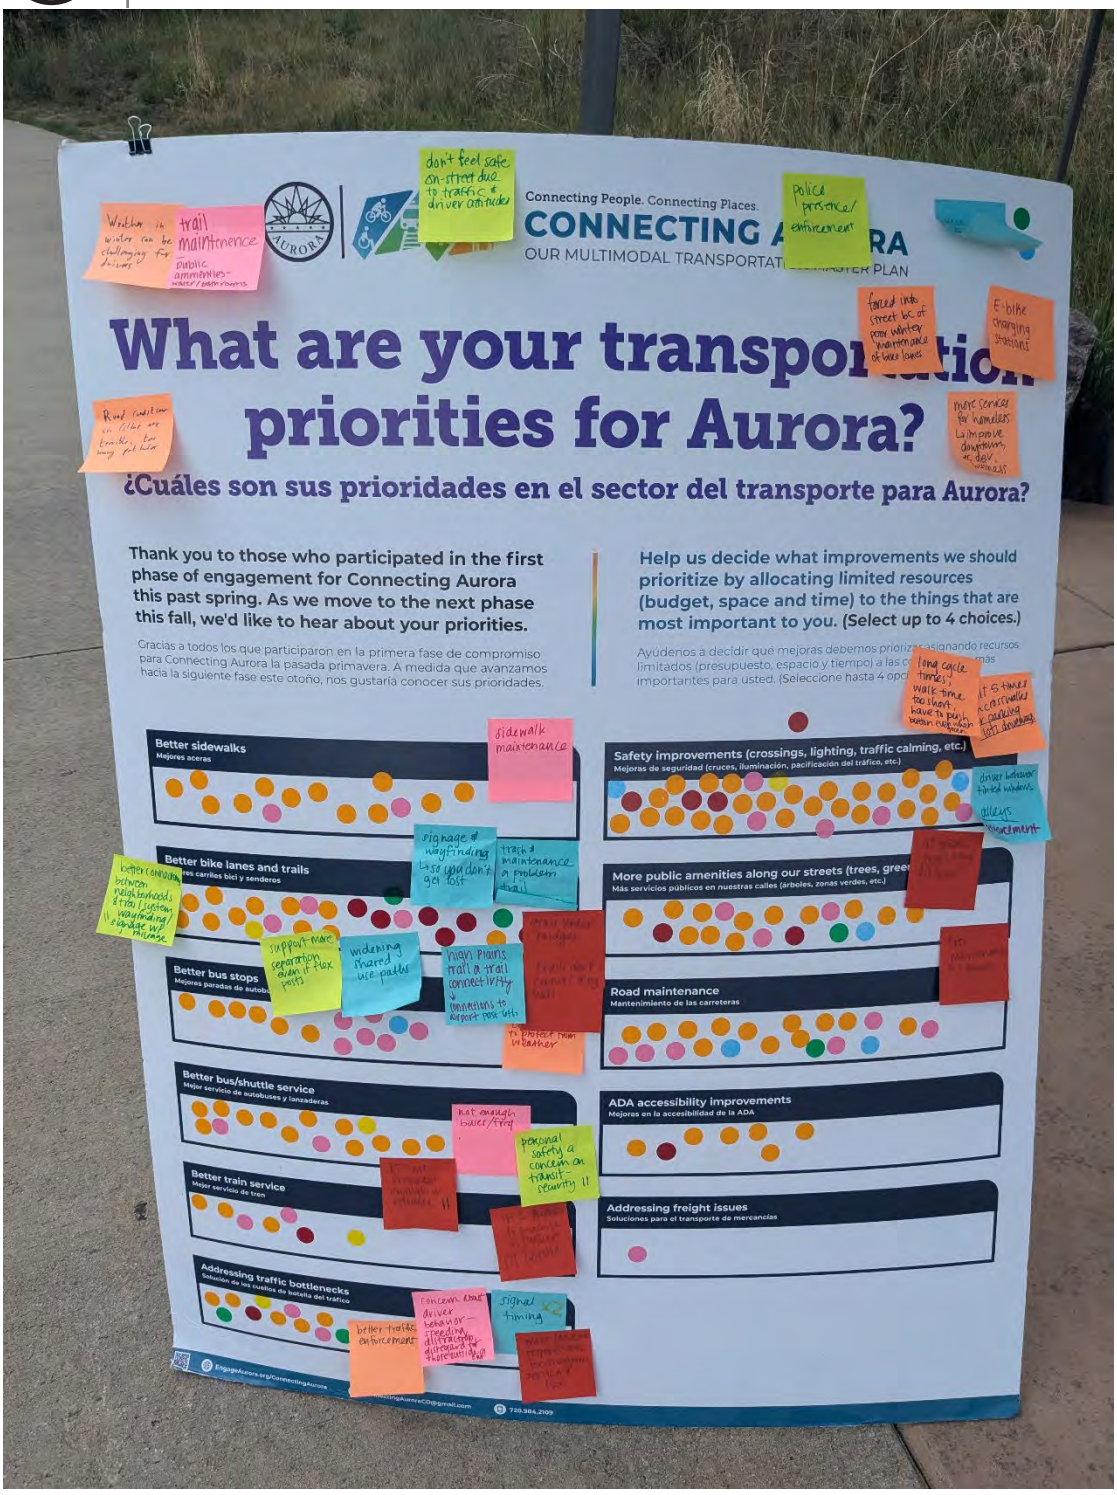

Figure 7: Transportation Priority Board Results

Toole staff also asked pop-up visitors, "What are the east-west and north-south connections that are the most important bicycle connections for you?" This could include roadways that do not currently have bikeways or roadways with bikeways that, if upgraded, would improve user comfort.

TABLE 2: SPECIFIC DESIRED LOCATIONS FOR BIKEWAY IMPROVEMENTS

Bikeway improvement	Votes	Other related comments
11th Ave	1	
17th Ave	3	
23rd Ave	1	
25th Ave	1	
6th Ave	2	
Alameda Ave	3	
Arapahoe Rd	1	
Buckley Rd	1	
Chambers Rd	1	
Cherry Creek Reservoir	1	Better connect trails around reservoir
Colfax Ave	9	Teacher on Colfax said his students always talk about almost getting hit on Colfax
Colfax Ave & Chambers Rd	1	
Colfax Ave & Dayton St	1	
Colfax Ave & Florence St	1	
Colfax Ave & Havana St	1	People don't even attempt this
Connection between E 38th Ave and High Line Canal Trail	1	New neighborhood - connect to trail system
Connection between High Line Canal Trail, Sable Blvd, and 2nd Ave	1	

Bikeway improvement	Votes	Other related comments
Connections to airport past 6th Ave	1	
Connections to Aurora Reservoir	3	Easy to bike from Cherry Creek to Chatfield, but need a better way to connect to Aurora Reservoir
Crossing Parker Rd	1	
Crossing Peoria St	1	
Dayton St	1	Would love PBL to connect businesses
Florida Ave	1	Access to commercial areas
Hamden Ave	1	
Havana St	6	Access to commercial areas
Havana St & Florida Ave	1	Access to commercial areas
Havana St & Mississippi Ave	2	Access to commercial areas
High Line Canal Trail & Havana St	2	
High Line Canal Trail connection to High Plains Trail	1	
High Line Canal Trail crossing of 225	1	
High Line Canal Trail south of Iliff Ave	1	Very crowded - widen
High Plains Trail	2	Continue east past High Plains Trail Bridge over Parker Rd - new bridge is great, but the trail ends!
Jamaica St	1	Wide older street with potential
Jewell Ave	1	Connection from new Murphy Creek neighborhood at Gun Club Rd
Mississippi Ave	4	

Bikeway improvement	Votes	Other related comments
Moline St	1	
Montview Blvd	2	
Parker Rd	1	
Parker Rd & Mississippi Ave	1	Right turn slip lanes pose a significant challenge for cyclists, since drivers who are respectful of cyclists and allow them to cross risk being rear-ended
Peoria St	4	North-south connections close to Anschutz Medical Campus, connection from Del Mar Circle to High Line Canal Trail
Quincy Ave	1	
Sand Creek Trail	1	
Smith Rd	1	
Smoky Hill Rd	2	
Syracuse St	1	
Toll Gate Creek Trail	1	
Tower Rd	1	
Westerly Creek Trail	1	Pops up then disappears, the Westerly Creek Trail crossing just south of Mississippi Ave temporarily becomes a sidewalk
Yale Ave	1	

Figure 8: Bike Connections Board Results

NEXT STEPS & USE OF RESULTS

The feedback Toole Design received during summer 2024 will inform Task 7: Multimodal Transportation System Analysis, Evaluation, and Development. Results from the bicycle connections map highlight the importance of creating comfortable bikeways on arterials, or lower-stress streets immediately parallel to arterials. These results will also inform recommended network spacing and density. During our development of primary and secondary routes in the bicycle network, streets frequently identified as key bicycle connections may weigh more heavily in our analysis.

Feedback on transportation network priorities will factor into scenario development and project prioritization. Feedback from the focus groups and stakeholder interviews will also factor into these stages of the project and help the project team develop programs and policies to accompany infrastructure recommendations.

Connecting People. Connecting Places.

CONNECTING AURORA

OUR MULTIMODAL TRANSPORTATION MASTER PLAN

MILESTONE 2
ENGAGEMENT SUMMARY

Nov. 6-Dec. 22, 2024

EXECUTIVE SUMMARY

During the engagement period for Milestone 2 of Connecting Aurora, the city's multimodal transportation plan, over 153k Aurora community members were reached through social media efforts, community pop-ups and presentations, in-person and online open houses, a roundtable discussion, a virtual town hall, and other various outreach modes. Over 1.3k community members were actively engaged throughout Milestone 2, meaning they attended and/or participated in an in-person or online feedback opportunity. 186 surveys, available in-person and online, were also gathered during this milestone to better understand the impacts of each imagined future of transportation in Aurora.

Feedback was received from community members in every ward of Aurora. Of those surveyed, 95% belonged to a household that owns a vehicle. The majority of survey respondents identified as female and were above 60% of the Area Median Income. Many pop-up event participants and roundtable discussion attendees expressed appreciation for the project as a whole and were glad to have an opportunity to have a voice in the process. In the survey and at every in-person and virtual event, community members were asked to rank the impact each imagined future (car-oriented, transit-oriented, and neighborhood-oriented) would have on their quality of life. Most Milestone 2 engagement participants, at both in-person and virtual feedback opportunities, favored either the transit-oriented or neighborhood-oriented future for Aurora. A car-oriented city, on the other hand, was widely viewed as either having no or a negative impact on quality of life. Participants similarly favored transit-oriented or neighborhood-oriented cities over a car-oriented city when surveyed about factors like accessibility, prosperity, mobility, and safety.

OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

This report summarizes the engagement efforts for the Synthesize Phase or Milestone 2, conducted Nov. 6, 2024-Dec. 22, 2024. The engagement period was extended slightly to present and collect feedback at City of Aurora employee facilities the week of January 6, 2025. The Synthesize Phase

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

involved extensive public outreach to gather feedback on three different transportation futures: car-oriented (status quo), transit-oriented, and neighborhood-oriented. In this phase, community members shared their thoughts on how each of these futures would impact quality of life; youth, older adults and those with mobility differences; prosperity; ability to travel places; and safety and comfort. This phase provided the project team vital information on the community's desired future of transportation in Aurora as the effort moves into its next phase of development and evaluation of multimodal networks.

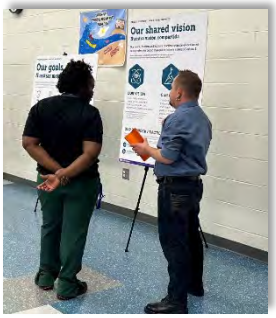
Key efforts and tasks for the Synthesize Phase include:

- Scenario development and testing
- Opportunities, challenges, and priorities analysis
- Continued in-depth engagement with stakeholders and the public

ENGAGEMENT OVERVIEW

A variety of engagement efforts were used to gather feedback from the Aurora community on imagined future scenarios for Aurora's transportation network. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers



TOUCHPOINTS	ONLINE VISITS	ACTIVELY ENGAGED
*153K+	*1.4K+	1.3k+

**The figure of 153,000+ touchpoints indicate the cumulative number of interactions or exposure to the project, including social media reach and pop-up event attendance. This is a broader measure compared to the 1,400+ online visits, which represent more direct engagement with the project's online presence.*

In-Person Open Houses

Three in-person open houses were planned at public schools in Aurora. One of the three open houses was canceled due to inclement weather. The remaining two open houses were similarly impacted by adverse weather, with a total of **40 people** attending the open houses. The school locations were chosen strategically to make sure feedback opportunities were dispersed across the city. Spanish interpretation was provided at each open house and materials were provided in English and Spanish. Project information sheets were also provided in Vietnamese, Chinese, Korean, and Amharic. Food trucks were on site to incentivize community participation and open house attendees received a voucher for a meal from the food truck after participating in the event. Interactive boards were used to garner feedback for each imagined transportation future. Additionally, hard-copy surveys were available for participants to fill out in English and Spanish.

OPEN HOUSE LOCATIONS, DATES, AND TIMES

CRAWFORD ELEMENTARY	JEWELL ELEMENTARY	AURORA HIGHLANDS P-8
Wednesday, Nov. 6 5:30-7:30 p.m.	Thursday, Nov. 7 5:30-7:30 p.m.	Thursday, Nov. 14 5:30-7:30 p.m.
22 ATTENDEES	**CANCELED**	**18 ATTENDEES**

Virtual Town Hall

A virtual town hall was hosted on Zoom the evening of Wednesday, Dec. 4, 2024, from 5:30-7:30 p.m., with **37 community members** attending. The town hall was open to the public and attendees could register via the Engage Aurora website. Throughout a presentation from the project team, attendees were asked to answer polling questions identical to the survey questions to gather their thoughts on the potential scenarios. Following the presentations, attendees were invited to ask questions and provide feedback on the three imagined futures via the Q&A function or verbally.

Online Open House

A self-guided online open house was hosted on the Engage Aurora website (engageaurora.org/ConnectingAurora). The information and feedback opportunities on this site were identical to the in-person open houses. The data below represents engagement between Nov. 6-Dec. 22, 2024.

- Total visits: 1.4K
- Survey responses: 155
- New map comments: 137
- Asked a question or contributed to newsfeeds: 10

A complete record of map comments can be found in Appendix C: Map Comments.

Community/Pop-Up Events and Presentations

Pop-up events were held at various locations across Aurora to gather feedback on the imagined futures using a dot board activity. These pop-ups leveraged existing community events or occurred at locations where members of the public frequent regularly. These locations were also identified so as to be widely dispersed across the city.

EVENT LOCATIONS, DATES, TIMES, AND PARTICIPATION

VILLAGE EXCHANGE CENTER FOOD BANK DRIVE	AURORA ANIMAL SHELTER VACCINE CLINIC	GO FUND THE CITY, AURORA MUNICIPAL CENTER	BECK RECREATION CENTER	SOUTHEAST RECREATION CENTER
Wednesday, Nov. 13, Noon-3 p.m.	Sunday, Nov. 17, 9 a.m.-noon	Thursday, Nov. 21, 12:30-2:30 p.m.	Saturday, Nov. 23, 8 a.m.-noon	Tuesday, Nov. 26, 8 a.m.-noon
13 PARTICIPANTS	**25 PARTICIPANTS**	**25 PARTICIPANTS**	**11 PARTICIPANTS**	**12 PARTICIPANTS**
Weekly food drive providing support to surrounding low income and immigrant communities.	Well publicized quarterly event offering low-cost pet vaccinations.	Part of an Aurora Chamber of Commerce event that invited local community and business leaders.	Spoke to gym goers in central Aurora during a weekend high-traffic time.	A high-traffic time due to regular gym goers and a weekly pickle ball tournament.

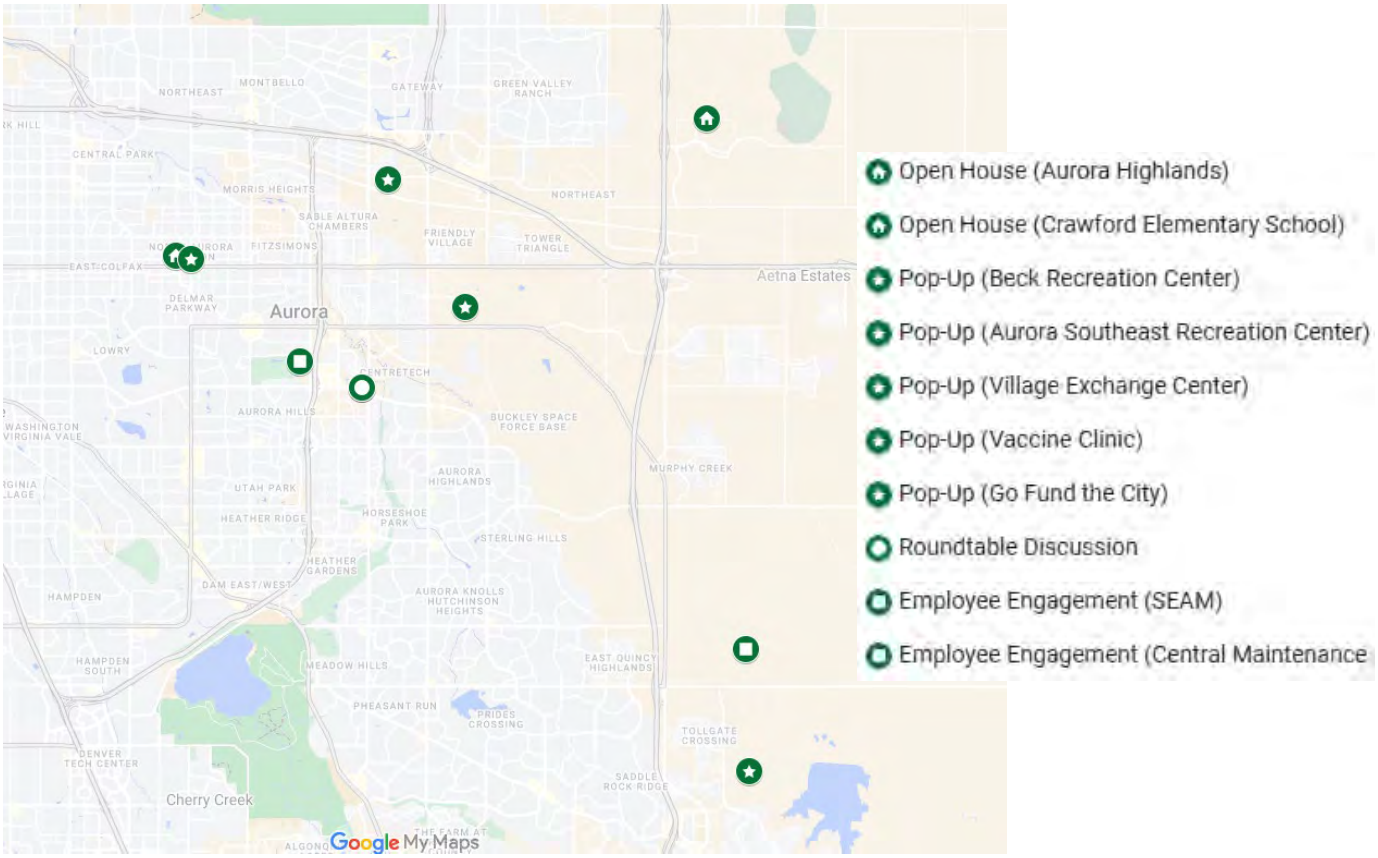
Roundtable Discussion

Following the weather cancelation of a planned third public open house, a roundtable discussion was held on Dec. 19, 2024, from 5:30 to 7:30 p.m. City of Aurora board and commission members were invited to attend, as was the general public. Attendees were asked to RSVP online and were provided dinner. Upon signing in, attendees were able to read over the project boards and provide feedback on the imagined scenarios' impact on their quality of life. The roundtable began with a presentation from the project team, followed by small group discussions. The **50 attendees** were also asked to fill out a poll at the end of the discussion made up of questions identical to the online survey.

Stakeholder Group

A virtual meeting with the Connecting Aurora Stakeholder Group was held the afternoon of Nov. 13, 2024, from noon to 1:30 p.m. The meeting was attended by **18 stakeholders** and began with a review of public engagement thus far. Stakeholders were then asked to review the three imagined futures and provide feedback on each via discussion and polling. Results of the polls can be found in the Results section. Full meeting notes can be found in Appendix C: Stakeholder Meeting Notes.

City of Aurora Employee Engagement



Presentations on Milestone 2 were given to employees across the city, including Parks, Recreation & Open Space (PROS) employees, Aurora Water employees, and employees at the Southeast Area Maintenance Facility and the Central Maintenance Facility, which included mechanics from the heavy maintenance division. Coffee and donuts were provided, and attendees were asked to provide feedback on each imagined future. About **170 employees** participated.

EVENT LOCATIONS, DATES, TIMES, AND PARTICIPATION

SOUTHEAST AREA MAINTENANCE FACILITY	CENTRAL FACILITIES: FLEET	CENTRAL FACILITIES: PROS & AURORA WATER
Monday, Jan. 6, 2025	Thursday, Jan. 9, 2025	Friday, Jan. 10, 2025
~60 EMPLOYEES	**~40 EMPLOYEES**	**~50 PROS EMPLOYEES** **~20 AURORA WATER EMPLOYEES**

Engagement Map

For a complete map that includes Milestone 1, Summer 2024, and Milestone 2 engagement locations, visit Connecting Aurora Outreach and Engagement Map.

Community Surveys

The self-guided online meeting included a survey about the impacts of each imagined transportation future. Paper copies of the survey were available at the open houses as well. The survey began with four pages of information on each possible scenario, similar to the information available on the project boards shown at the open houses, roundtable discussion, presentations, and pop-up events. Participants were then asked to rank each scenario on a scale of "Much Worse" to "Much Better" in relation to impacts on quality of life, accessibility, prosperity, mobility, and safety. Surveys were available in English and Spanish.

SURVEY ENGAGEMENT BY THE NUMBERS

TOTAL SURVEYS	ONLINE SURVEYS	OPEN HOUSE PAPER SURVEYS
186	131	55

PROMOTION

A variety of promotional materials were used throughout Milestone 2 to inform the community about the newest phase of Connecting Aurora and how to provide feedback, including leave-behind flyers and fact sheets.

For details and examples of materials used, go to Appendix A: Milestone 2 Promotional Materials.

News Release and Media Coverage

Three news releases were distributed to a comprehensive local media list, including media targeting non-English speakers. As a result, there were two news stories.

Outlet	Date	Link to Story
Denver Gazette	10/18/2024	Aurora seeking public feedback on transportation plan | Aurora | denvergazette.com
Denver Gazette	12/5/2024	Aurora Now Dec. 4, 2024 | Auroratv

Social Media

Extensive social media efforts were undertaken to promote the project and to engage public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Additionally, Facebook posts were boosted for the most common languages: English and Spanish. Each boosted post was $50, for a total of $100 spent on social media ads.

- Total posts (including ads): 24
- Total reach/impressions (views/shown): 71K
- Engagement (clicks/likes/comments): 775

E-Newsletters

Several city and community newsletters distributed the Milestone 2 project information.

- Engage Aurora emails: 3 emails were sent to 145 project subscribers on Engage Aurora
- City of Aurora Employee Newsletter
- This is Aurora City Newsletter
- News Aurora
- Aurora TV
- Aurora Road Construction Roundup

Bill Insert

An article was included in an issue of News Aurora, which was distributed in water bills in October. Approximately **68K homes** received each bill insert.

Bus Benches

Bus bench ads were placed at three locations throughout Aurora:

- 14875 E Colfax Av & Altura
- 17175 E Smoky Hill Rd & Wagon Trail Pkwy

Photos of bus bench ads can be found in Appendix A: Bus Bench Ads.

Outreach

Outreach was conducted with various community stakeholders as described in the following sections.

STAKEHOLDER GROUP

One email was sent to the Stakeholder Group with promotional materials for Milestone 2 engagement.

PRESENTATIONS

Presentations were provided to the following groups:

- Aurora Planning Commission, Tuesday, Nov. 26, 2024 – **6 attendees**
- Aurora Youth Commission, Thursday, Dec. 5, 2024 – **10 attendees**
- Aurora Veteran's Affairs Commission, Thursday, Dec. 12, 2024

STAKEHOLDER EMAILS

The project team sent emails to many stakeholders with the project information and ask them to share with members of their organizations.

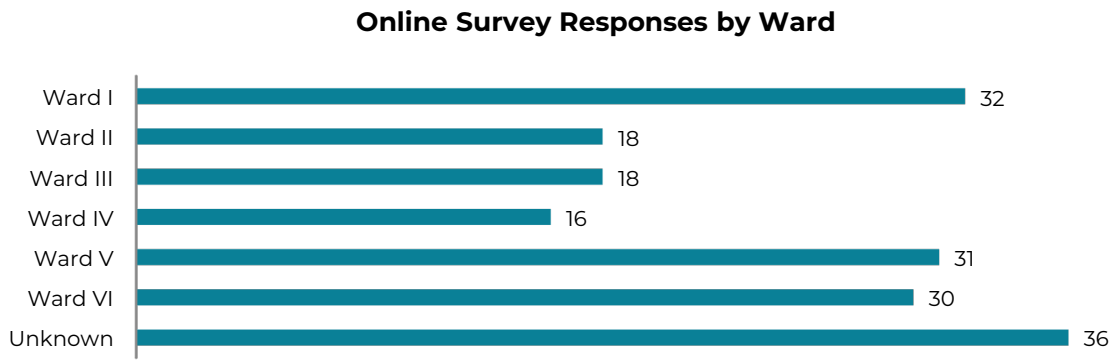
- Homeowner's Associations and Neighborhood groups: 281 groups/emails
- Aurora Boards and Commissions
- Department of Pediatrics, University of Colorado School of Medicine/Children's Hospital Colorado
- Project Worthmore
- Be Well
- Havana BID/On Havana Street
- Village Exchange Center
- Aurora Public Schools
- RISE Colorado
- Bicycle Aurora

FEEDBACK RESULTS

The results described below are a compilation of the various feedback tools. Sources for each chart or fact are indicated as well as the number of respondents.

Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

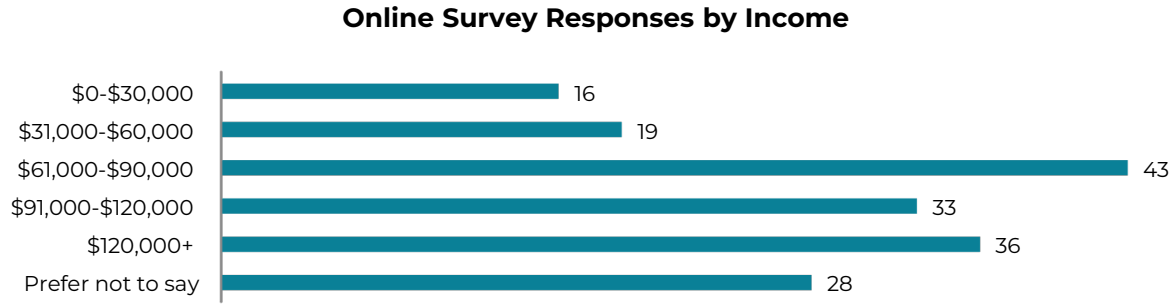
Who We Heard From



- A variety of people who live, work, commute through, or visit Aurora.
- Individuals of all ages, from students to seniors.
- Individuals and families of varying backgrounds.

DEMOGRAPHIC INFORMATION

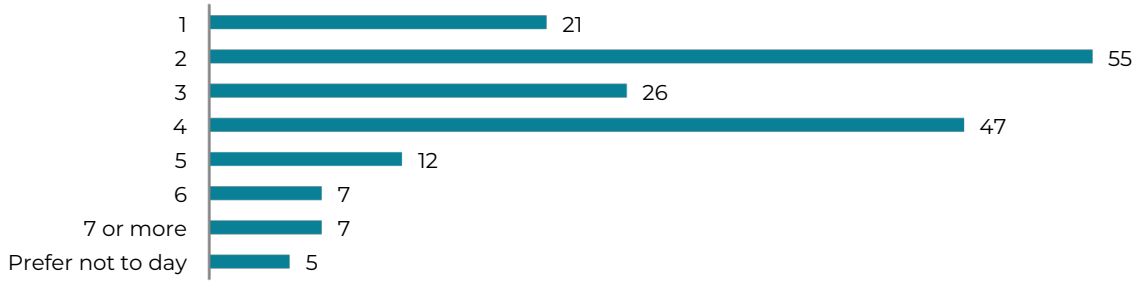
Demographic information was collected by online survey participants. A breakdown of the demographics is in the following charts. Entering demographic information was optional.



Wards

One hundred nineteen of the 186 survey takers provided information about which Ward they live in.

Income



One hundred seventy-five of the 186 survey takers provided information about their income.

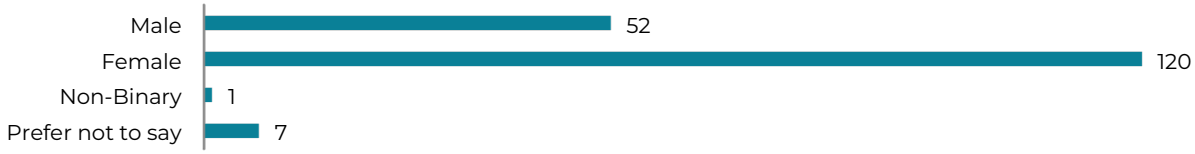
Household Size

One hundred eighty of the 186 survey takers provided information about their household size.

Online Survey Responses by Household Size

Area Median Income

Area Median Income was calculated based on household size compared to size. Sixty percent of AMI is widely considered as poverty level. The results in the chart below are approximated as income was presented in a range. The ranges often straddled the 60% AMI, in which case households were assumed to be above 60% AMI. AMI was calculated for 118 of the 155 survey responses.



Online Survey Responses by Area Median Income Level

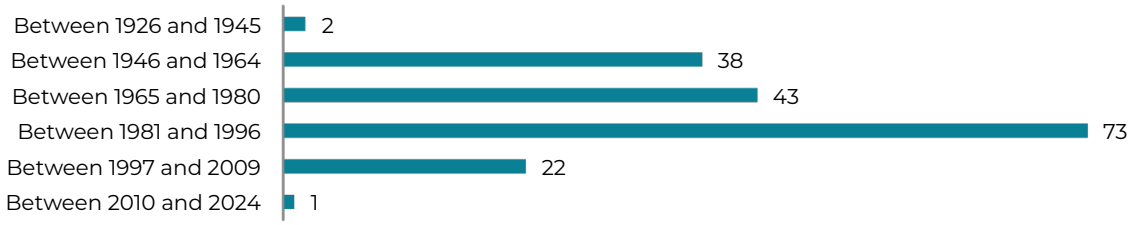
Gender

One hundred eighty of the 186 survey takers provided information about their gender.

Online Survey Responses by Gender

Vehicle Ownership

One hundred seventy-eight of the 186 survey takers provided information about their vehicle ownership.

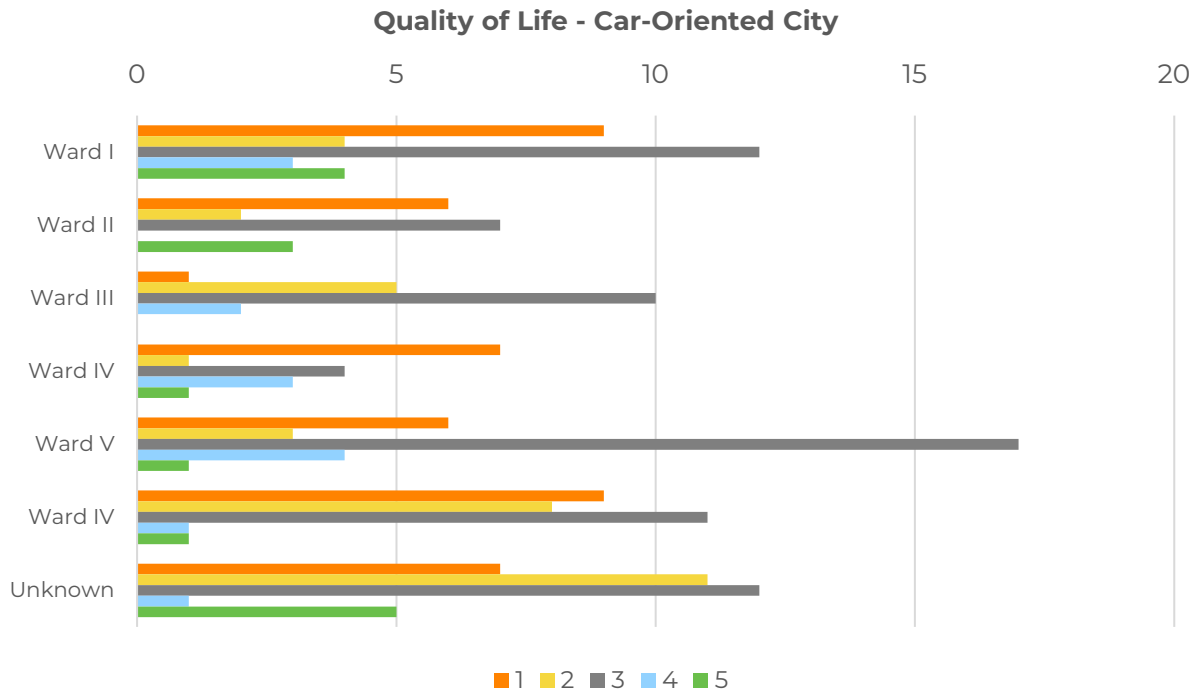


Online Survey Responses by Vehicle Ownership

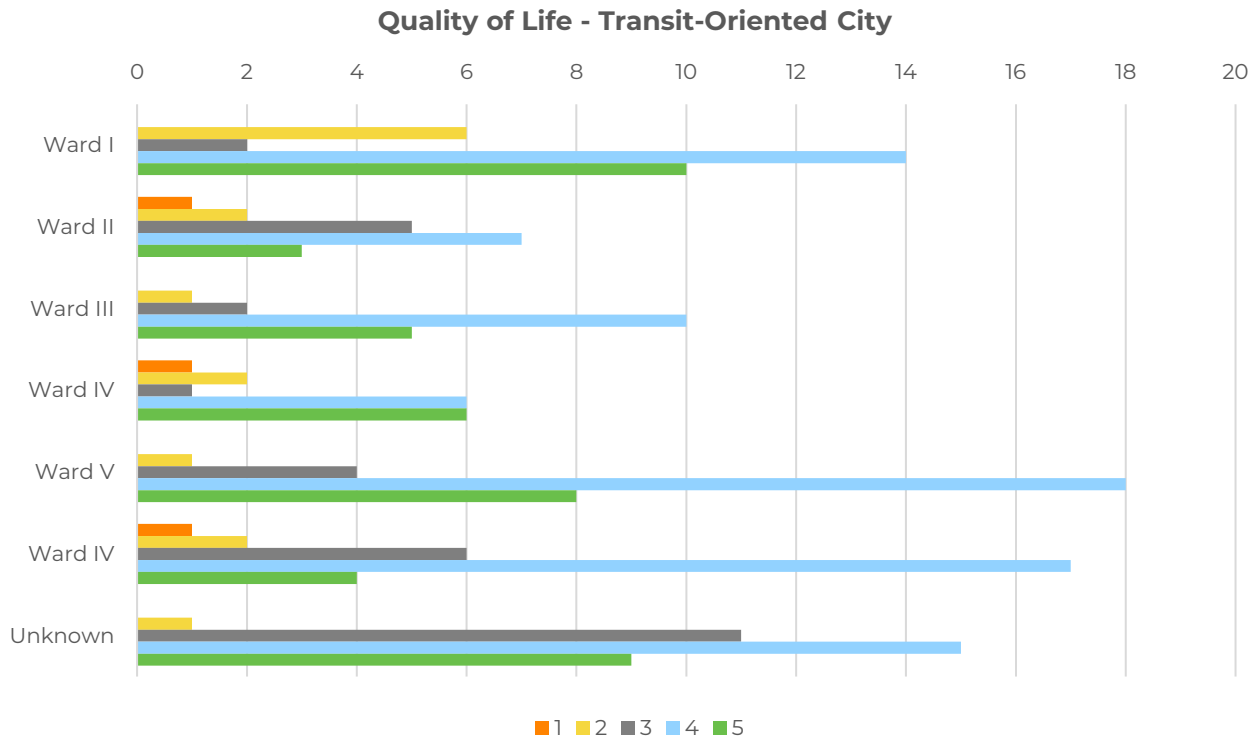
Age

One hundred seventy-nine of the 186 survey takers provided information about their age.

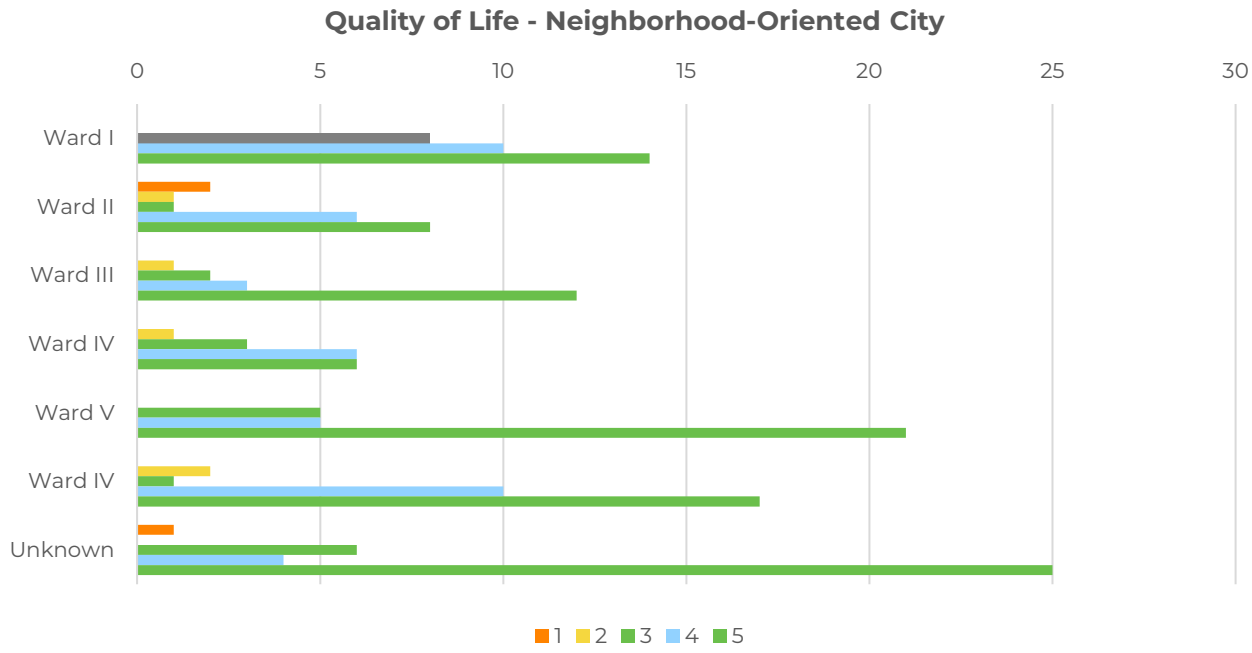
Online Survey Responses by Year Born



What We Heard



FEEDBACK BY WARDS



The online survey asked for information about which Wards participants lived in. The data in the following charts show's responses to the five survey questions based on Ward. Each of the five questions allowed participants to indicate if they felt like the community or indicated demographic would be better or worse for three imagined future scenarios. These three futures were Car-Oriented City (Status Quo), Transit-Oriented City and Neighborhood-Oriented City.

Quality of Life

Survey takers were asked "How do you think each of the three futures would impact your overall quality of life?" A ranking of five indicates much better with one being much worse.

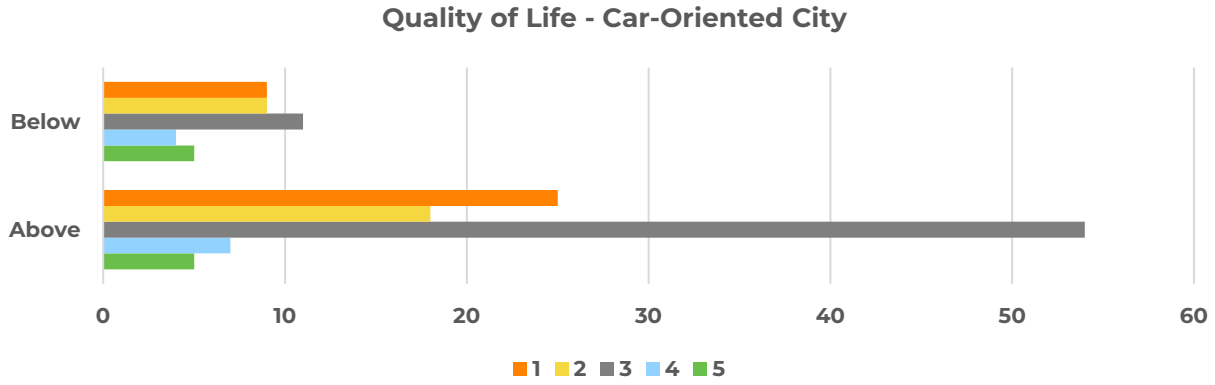
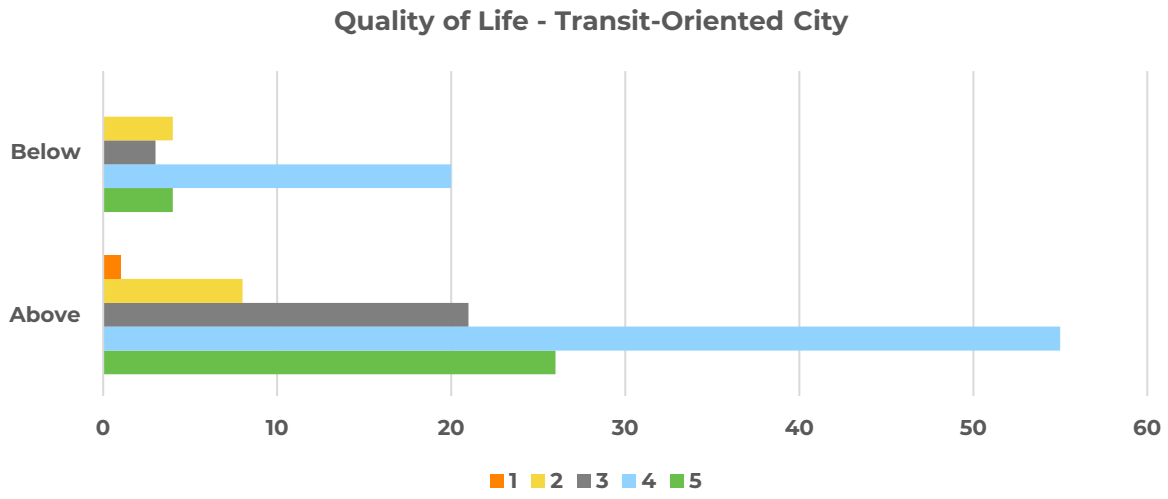
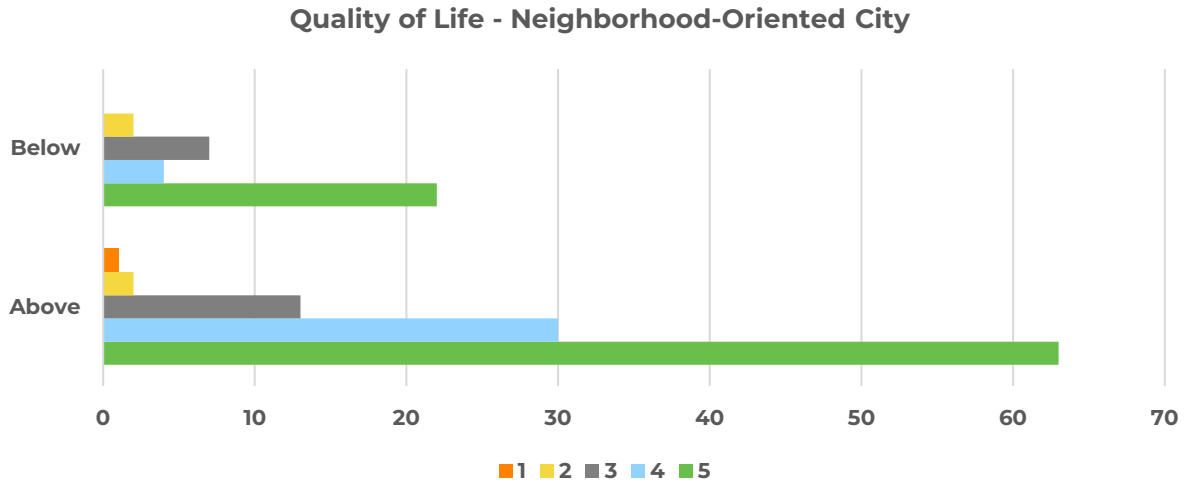
Safety and Comfort

Survey participants were asked "How do you think each of the three futures would impact your safety and personal comfort when you travel?" with five being much better and one being much worse.





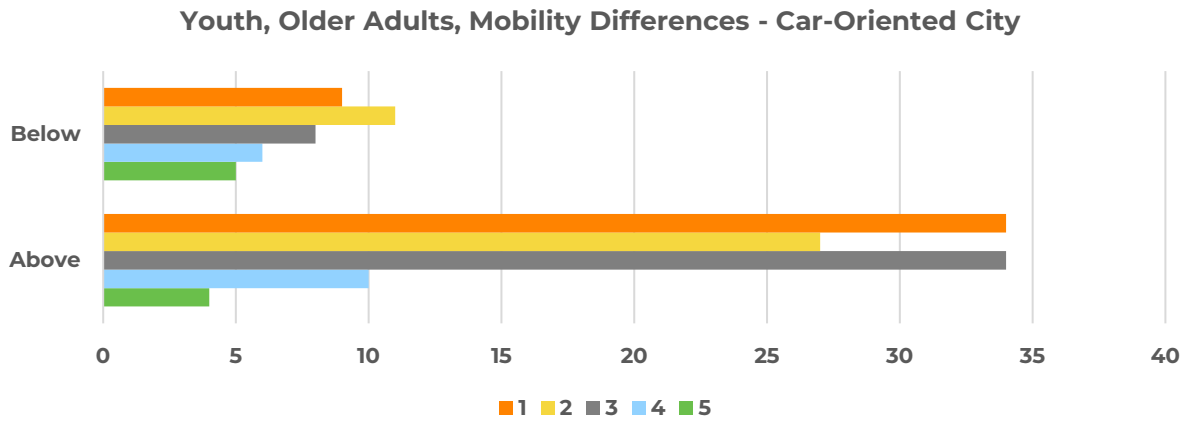
FEEDBACK BY POVERTY LEVEL

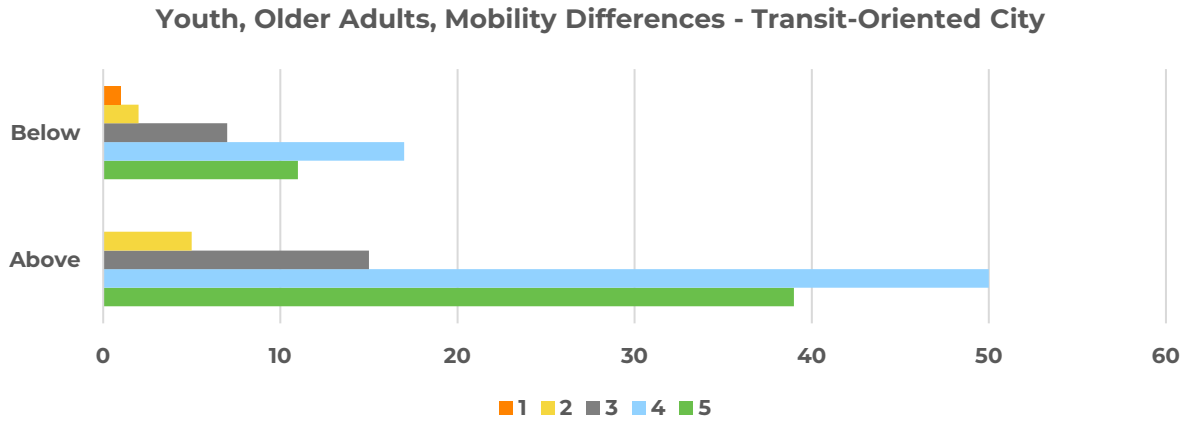


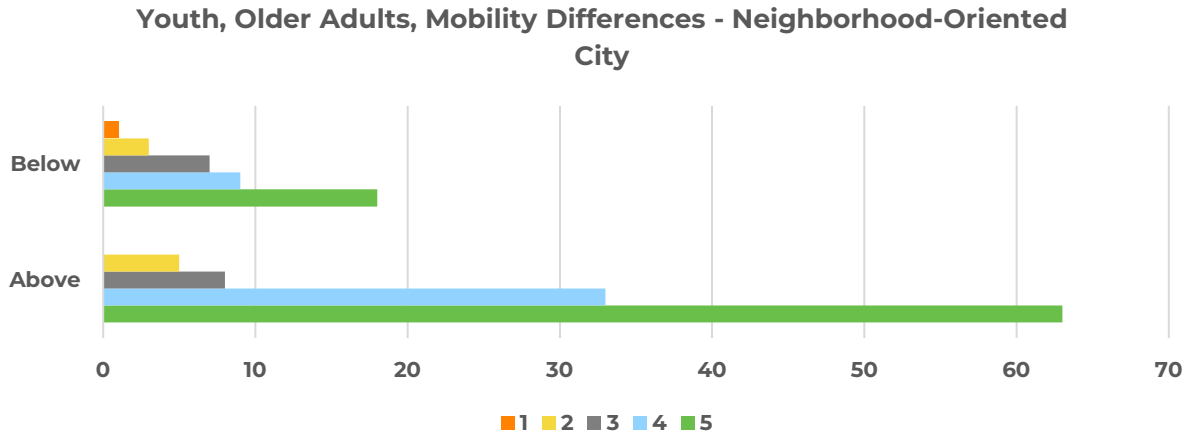
The online survey asked for information on income level and number of people per household. Based on these two questions, respondents were grouped into being either above or below 60% of the area median income. The data in the following charts show's responses to the five survey questions based on poverty level. Each of the five questions allowed participants to indicate if they felt like the community or indicated demographic would be better or worse for three imagined future scenarios. These three futures were Car-Oriented City (Status Quo), Transit-Oriented City and Neighborhood-Oriented City.

Quality of Life

Survey takers were asked "How do you think each of the three futures would impact your overall quality of life?" A ranking of five indicates much better with one being much worse. Generally, participants in both income groups thought a transit-oriented or neighborhood-oriented city would improve their quality of life.

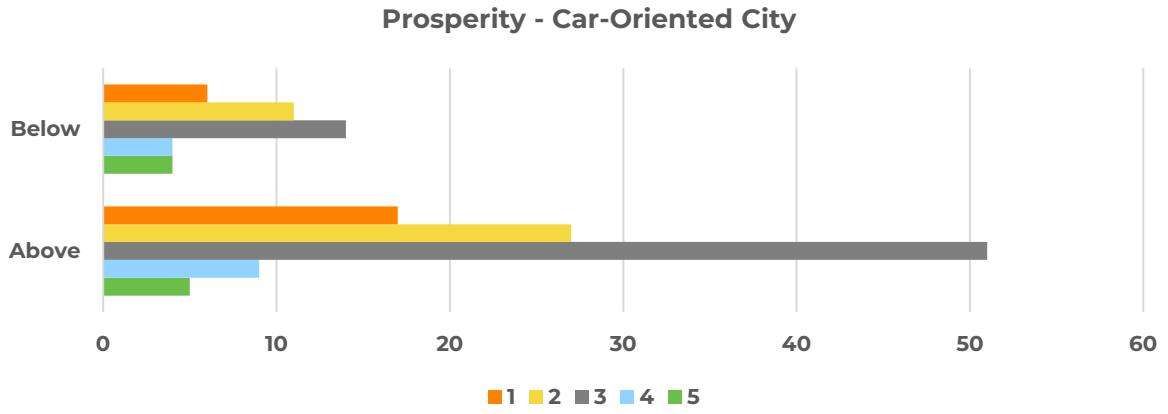


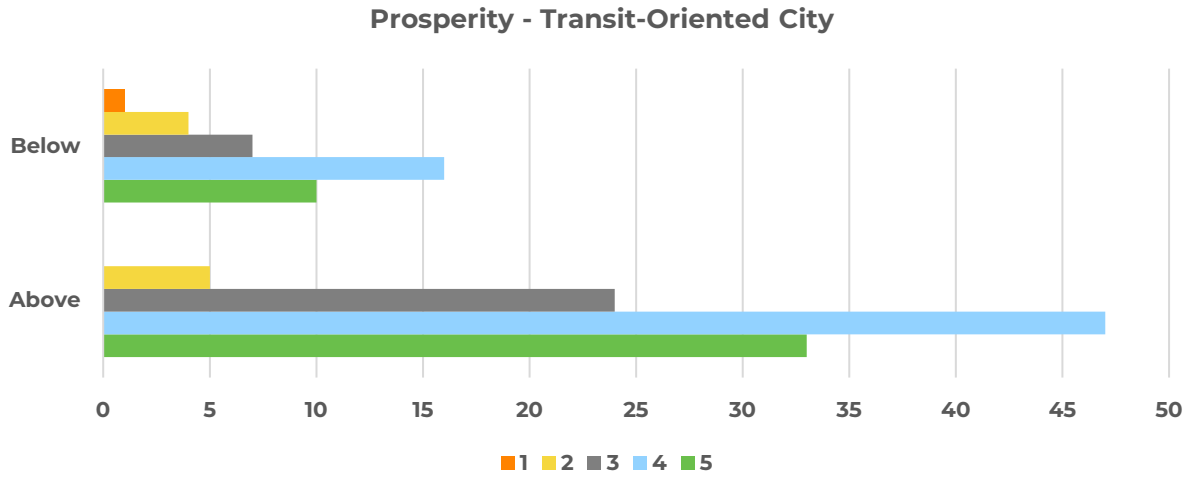


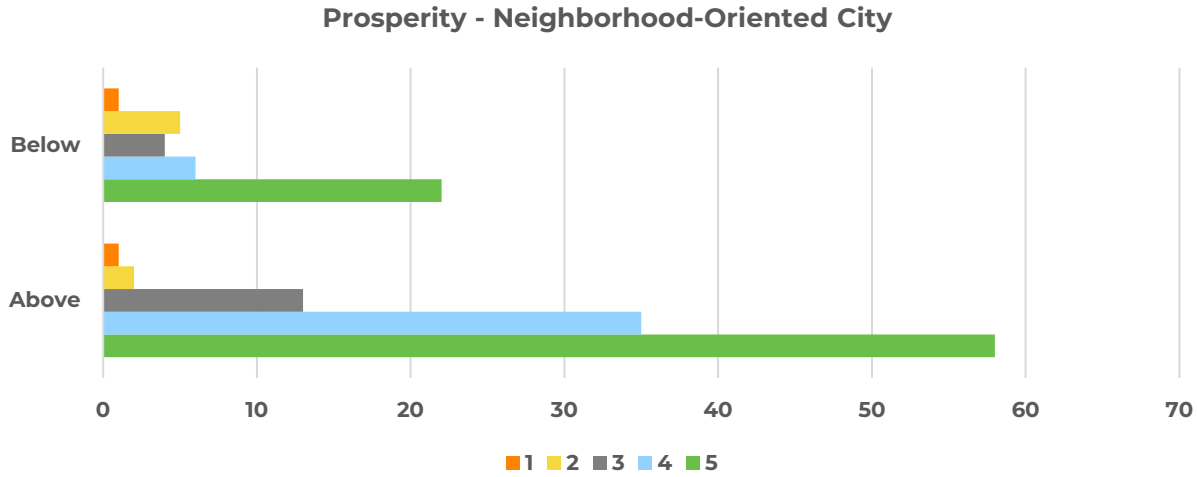


Impacts to Youth, Older Adults and Residents with Mobility Differences

Survey participants were asked "How do you think each of the three futures would impact youth, older adults and residents with mobility differences?" with five being much better and one being much worse. Generally, participants in both income groups thought a transit-oriented or neighborhood-oriented city would improve conditions for youth, older adults, and residents with mobility differences.



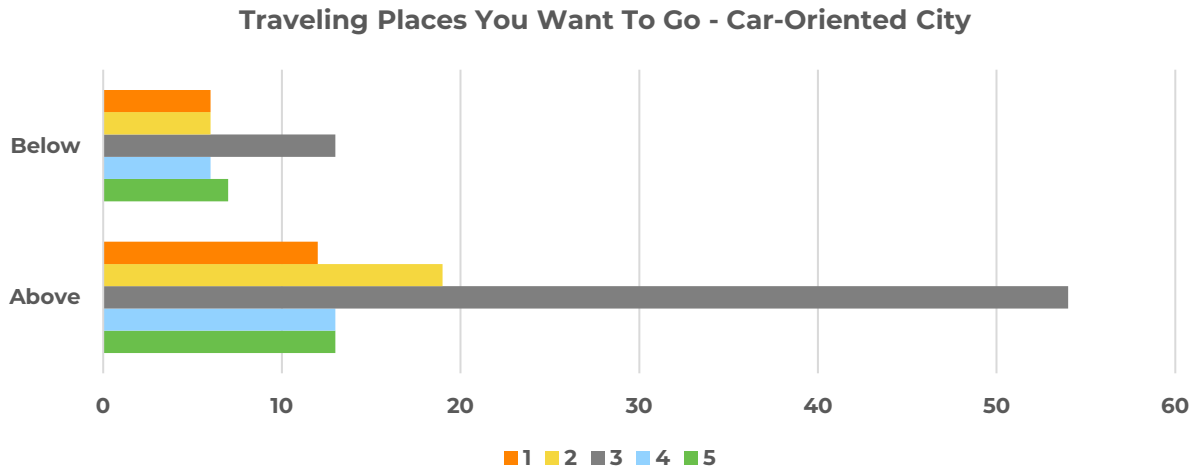


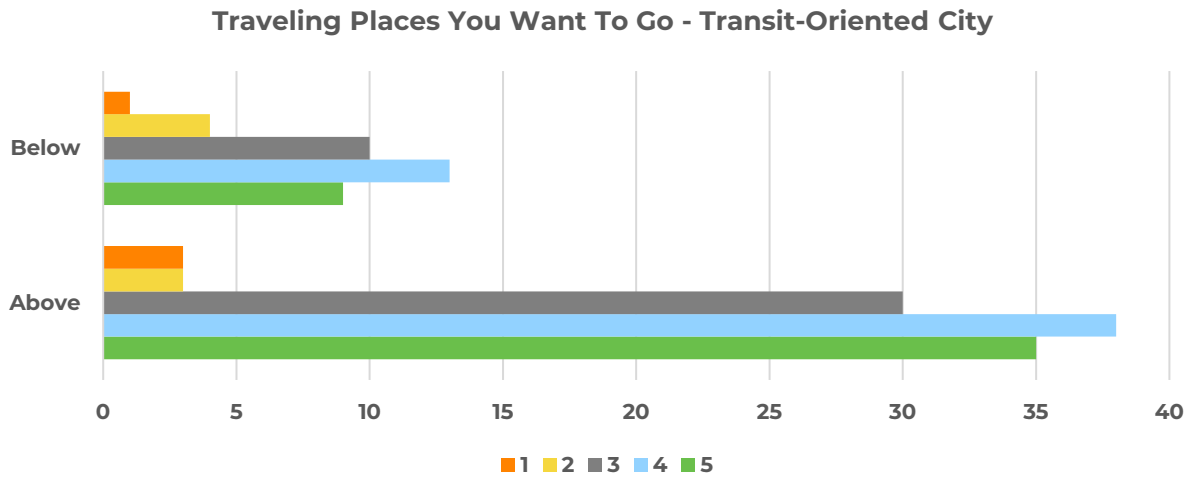


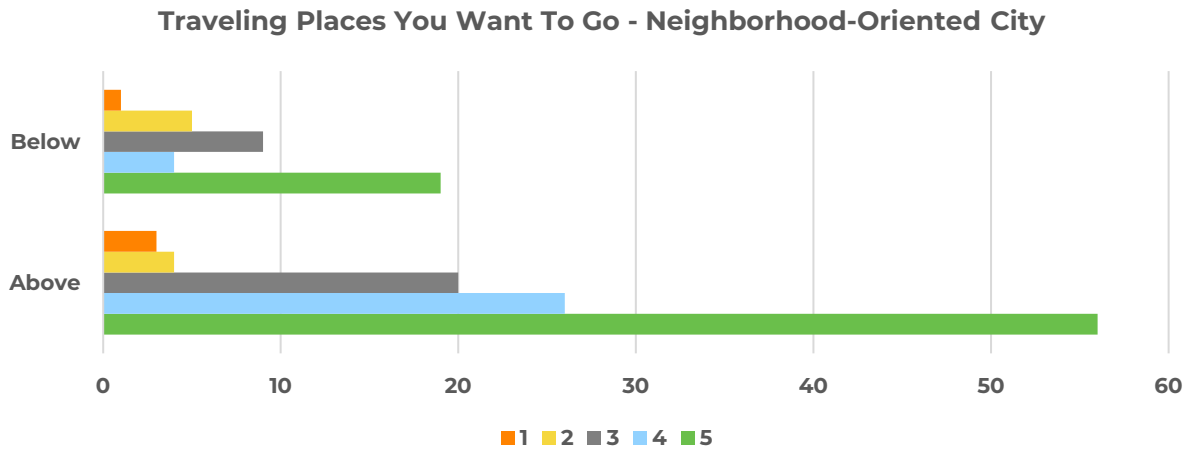
Prosperity

Survey participants were asked “How do you think each of three futures would impact our city’s prosperity?” with five being much better and one being much worse. Generally, participants in both

income groups thought a transit-oriented or neighborhood-oriented city would improve the city's prosperity.

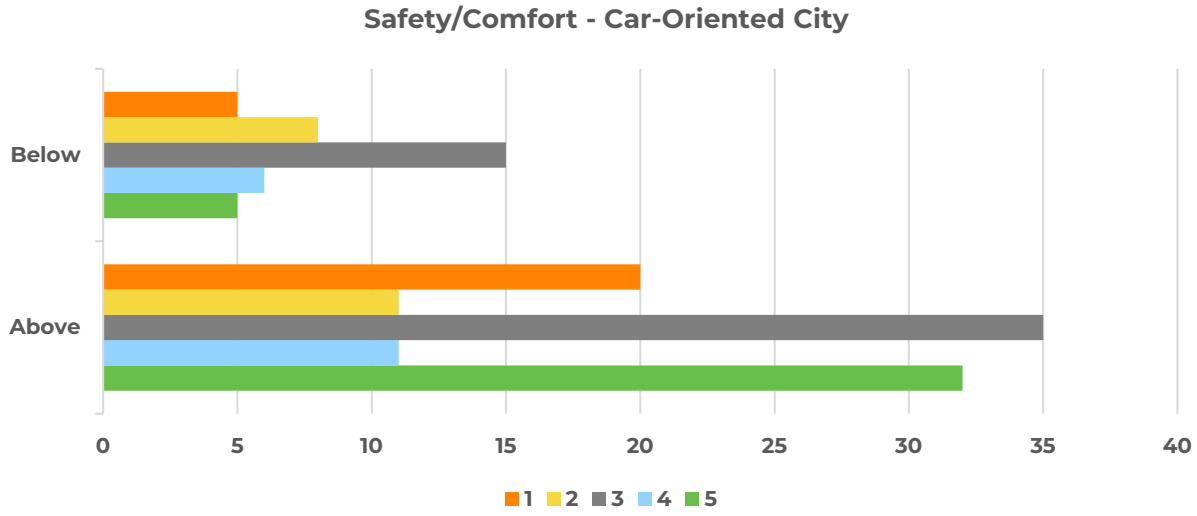


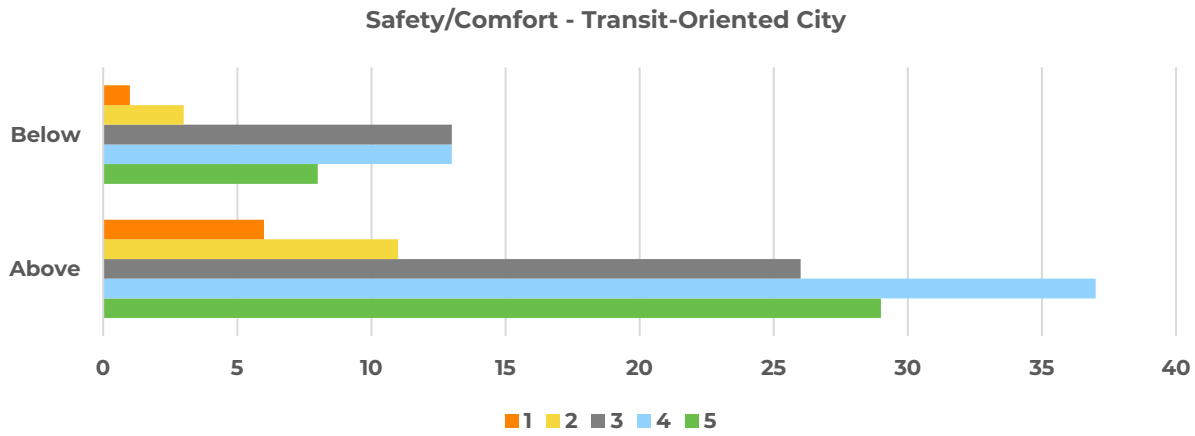


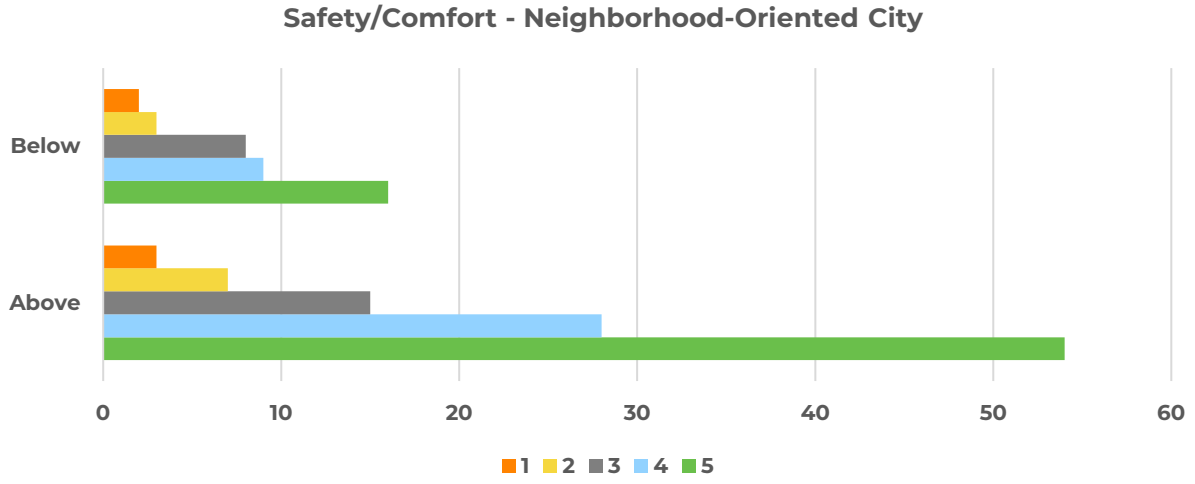


Traveling to Places You Want To Go

Survey participants were asked “How do you think each of the three futures would impact your ability to travel to the places you want to go?” with five being much better and one being much worse. Generally, participants in both income groups thought a transit-oriented or neighborhood-oriented city would improve their ability to travel to the places they want to go.

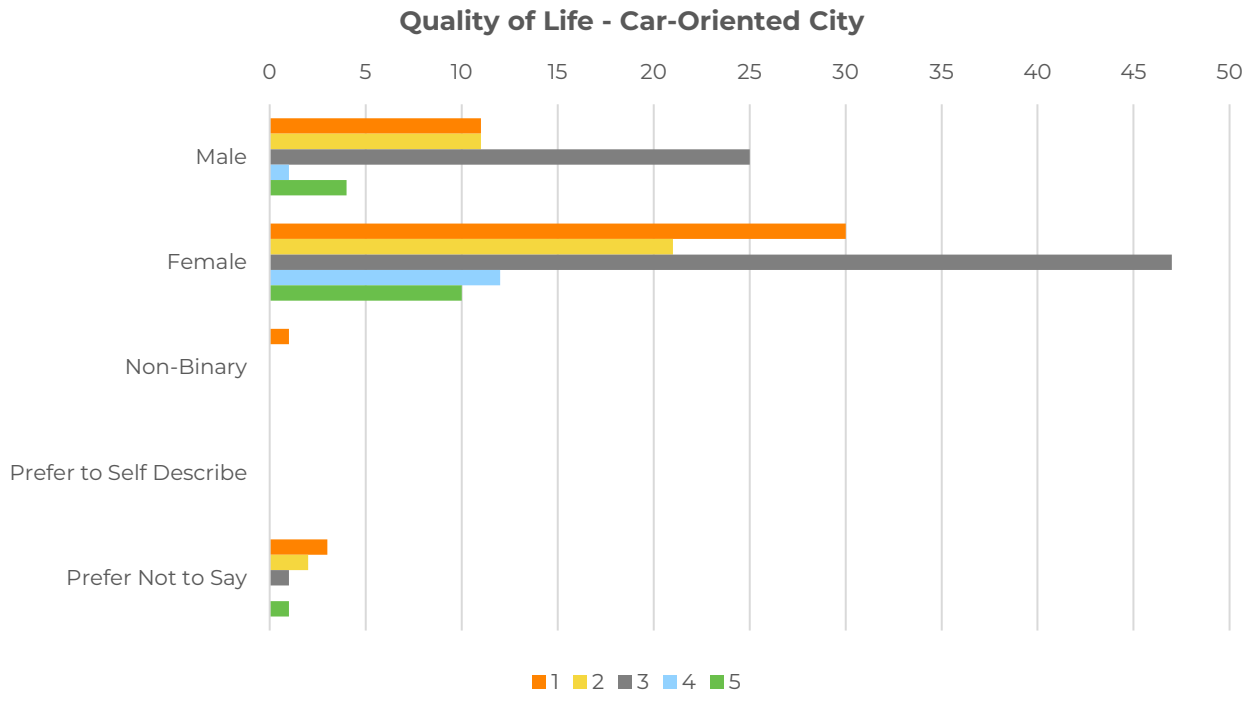


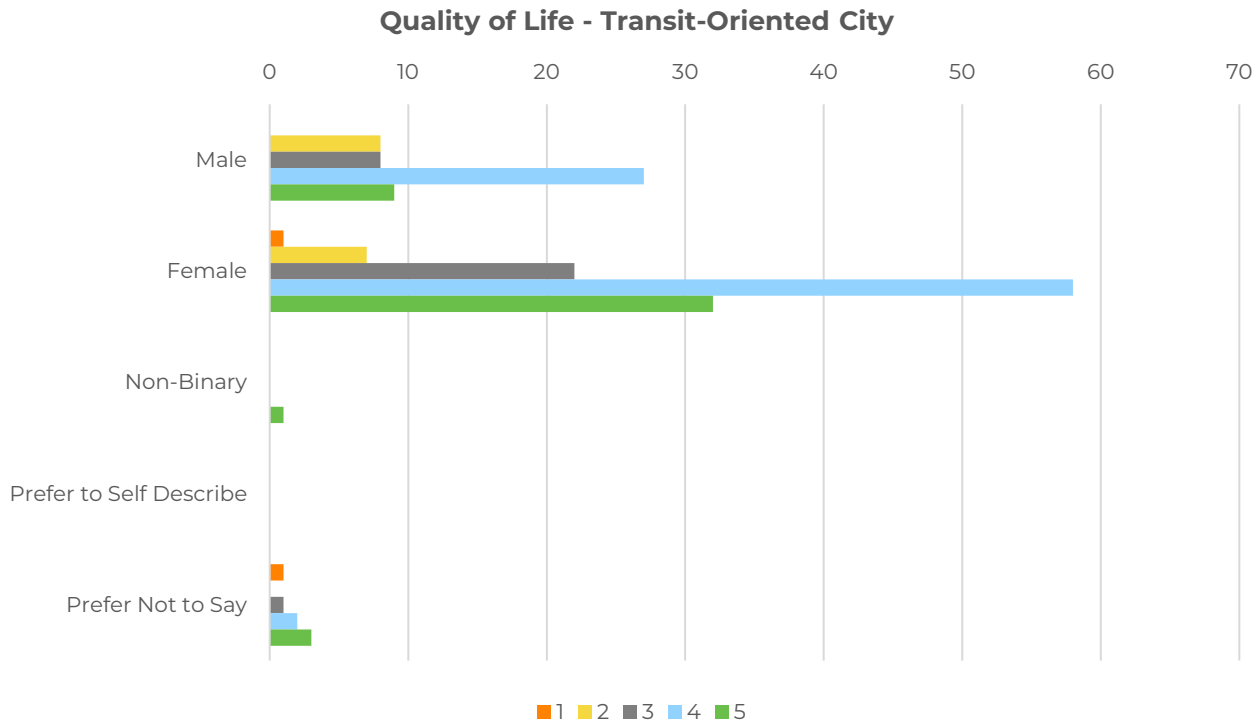




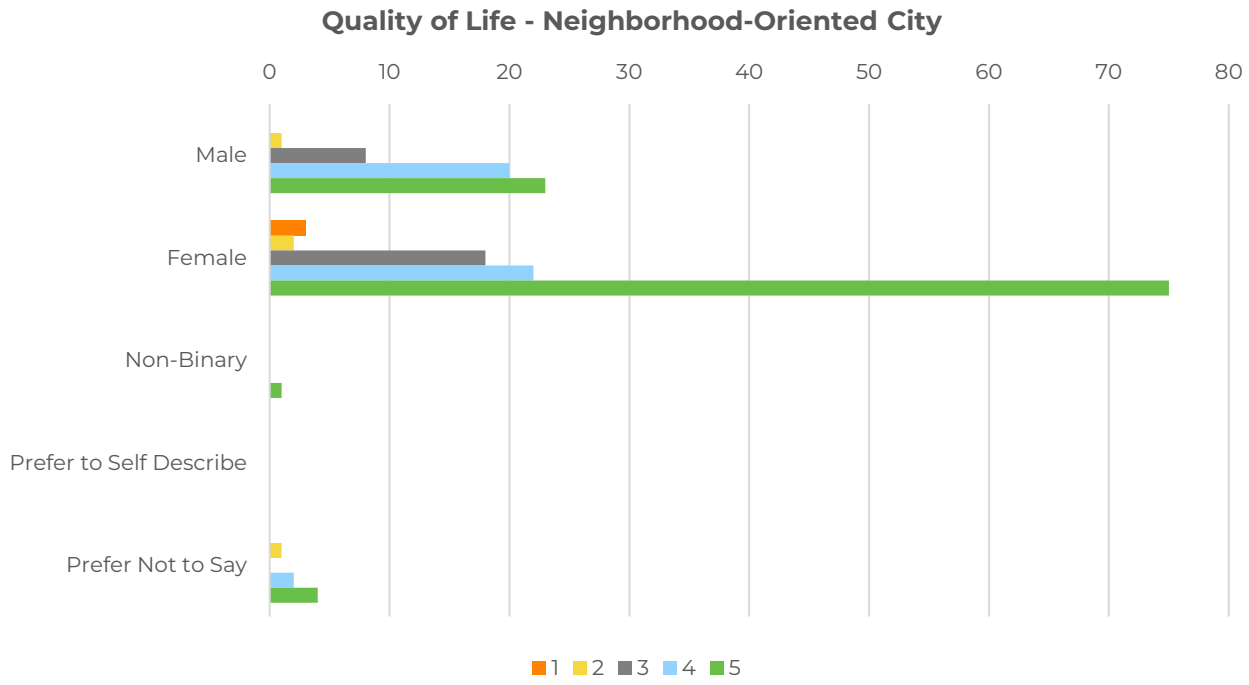
Safety and Comfort

Survey participants were asked “How do you think each of the three futures would impact your safety and personal comfort when you travel?” with five being much better and one being much worse. Generally, participants in both income groups thought a transit-oriented or neighborhood-oriented city would improve their safety and comfort.





FEEDBACK BY GENDER



The online survey asked participants to signify their gender. The data in the following charts show's responses to the five survey questions based on gender. Each of the five questions allowed participants to indicate if they felt like the community or indicated demographic would be better or worse for three imagined future scenarios. These three futures were Car-Oriented City (Status Quo), Transit-Oriented City and Neighborhood-Oriented City.

Quality of Life

Survey takers were asked "How do you think each of the three futures would impact your overall quality of life?" A ranking of five indicates much better with one being much worse. Generally, participants of all genders thought a transit-oriented or neighborhood-oriented city would improve their quality of life.

Safety and Comfort

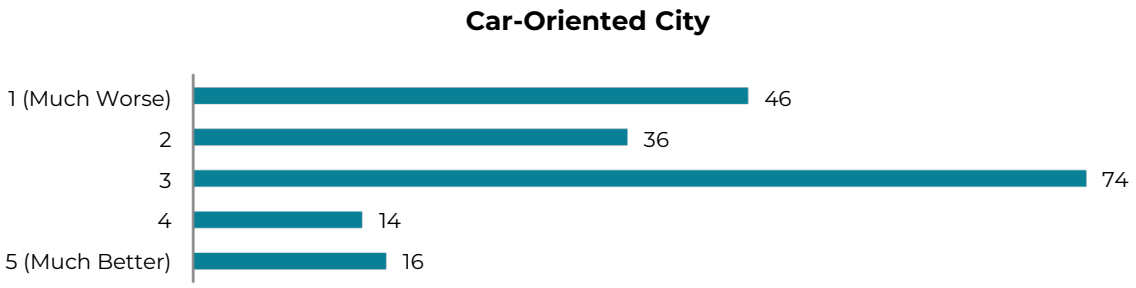
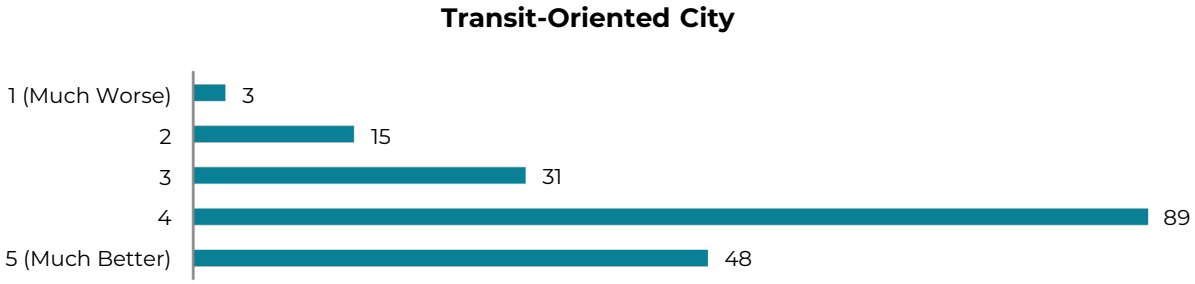
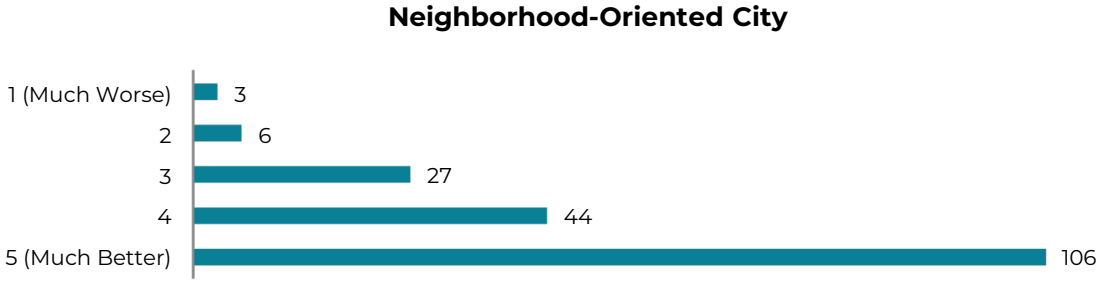
Survey participants were asked “How do you think each of the three futures would impact your safety and personal comfort when you travel?” with five being much better and one being much worse. Generally, participants born between 1965 and 2010 thought a transit-oriented or neighborhood-oriented city would improve their safety and comfort, while participants born between 1946 and 1964 preferred a car-oriented or neighborhood-oriented city to a transit-oriented city.



ONLINE SURVEY RESPONSES OVERALL



Throughout the course of Milestone 2, community members were invited to take a survey to gauge public opinion on the impacts of each imagined future. The survey was available online on Engage Aurora, as well as in paper form at the open houses. The survey consisted of five demographic questions and five questions about each scenario, focusing on quality of life, accessibility, prosperity, mobility, and safety.



As seen in the breakdown of each question below, a neighborhood-oriented city was most favored by respondents in improving quality of life, accessibility, prosperity, mobility, and safety. A car-oriented city, on the other hand, was consistently seen to either not have any impact or to worsen conditions.

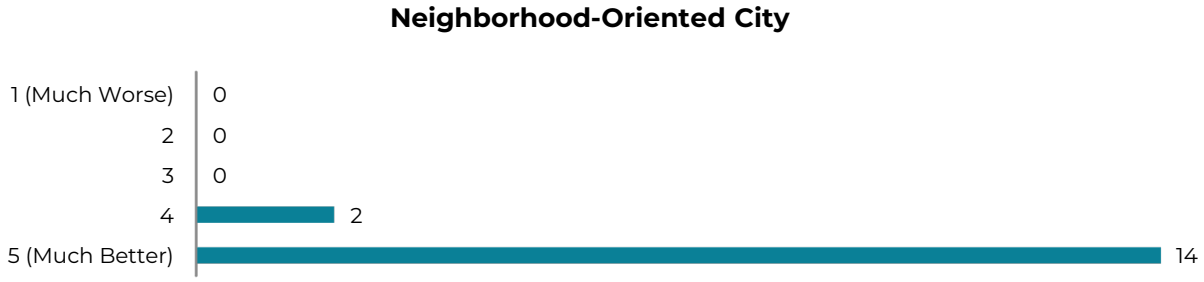
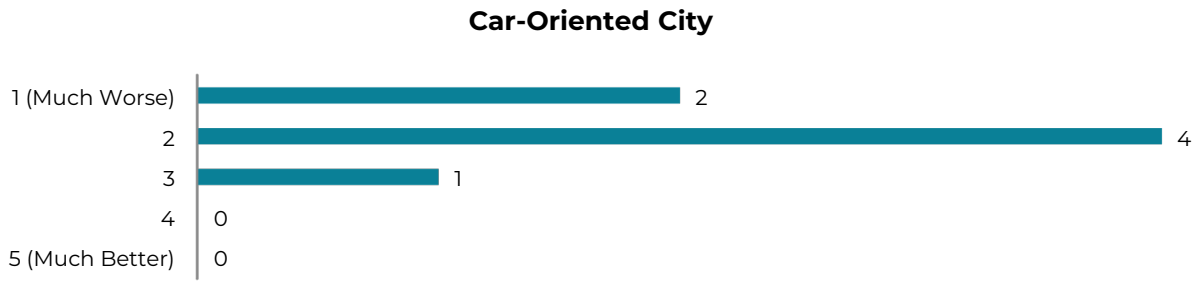
OPEN HOUSE #1 – CRAWFORD ELEMENTARY

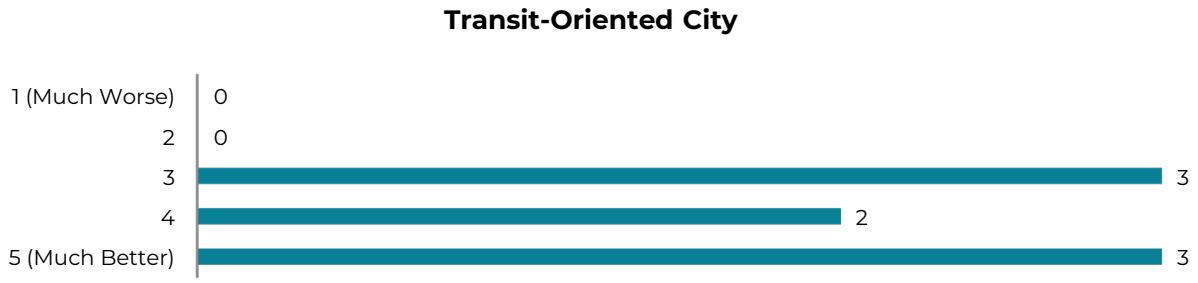


After learning more about each imagined future, open house attendees were invited to share their feedback by placing dots on a board to reflect how each scenario would impact their overall quality of life. Out of the 22 attendees, 14 participated in the dot board activity. As seen in the graphs below, the majority of participants were in favor of a transit-oriented or neighborhood-oriented city in relation to improved quality of life.

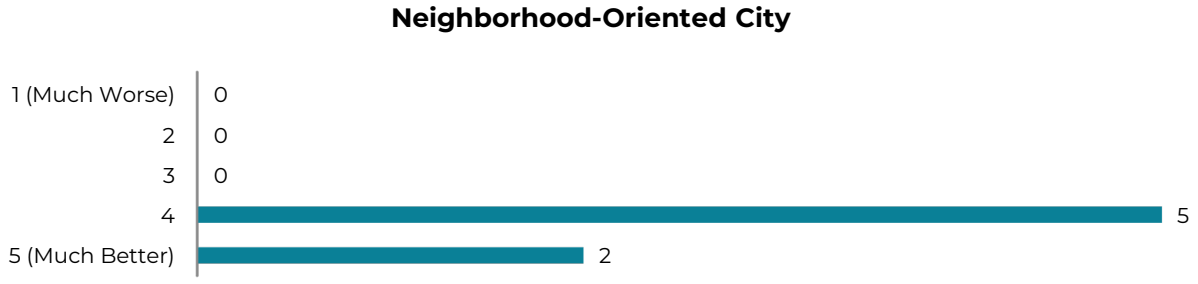
Quality of Life

How do you think each of the three futures would impact your overall quality of life?





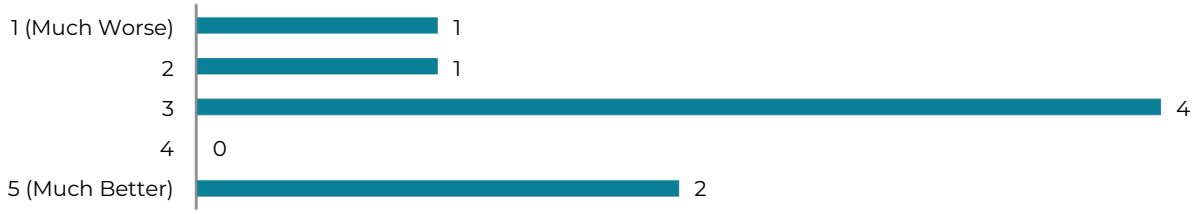
OPEN HOUSE #2 – AURORA HIGHLANDS P-8



After learning more about each imagined future, open house attendees were invited to share their feedback by placing dots on a board to reflect how each scenario would impact their overall quality of life. Out of the 18 attendees, 7 participated in the dot board activity. As seen in the graphs below, the majority of participants were in favor of a transit-oriented or neighborhood-oriented city in relation to improved quality of life.

Quality of Life

How do you think each of the three futures would impact your overall quality of life?



VIRTUAL TOWN HALL

Following the presentation during the virtual town hall, attendees were asked to participate in five polls. These polling questions were identical to the questions asked in the Milestone 2 survey. The town hall had a total of 37 attendees, and each poll question averaged around 13 respondents. As seen in the graphs below, the respondents during the virtual town hall showed more support for a car-oriented city than most other respondents at in-person events. Even so, transit-oriented and neighborhood-oriented cities also had positive support in this group.

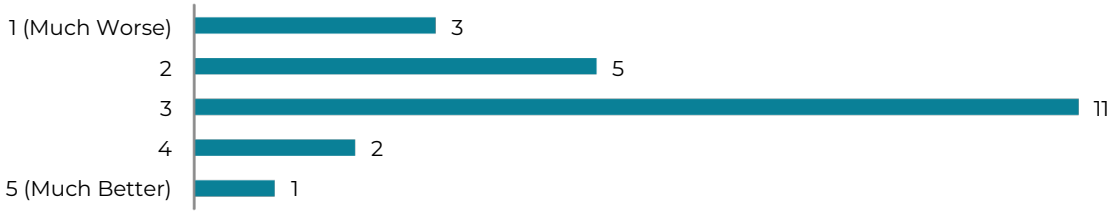
ROUNDTABLE DISCUSSION



To make up for an open house cancellation due to inclement weather, the Project Team hosted a roundtable discussion, inviting members of all City of Aurora boards and commissions. The evening was also open to the general public. Following a presentation and small group discussions, attendees were asked to answer five polls. The polling questions were identical to the questions in the Milestone 2 survey. Of the 50 attendees, 22 answered the polls.

Based on the evening's discussions and the polling results shown below, attendees showed a general support for moving toward a transit or neighborhood-oriented future. In the group discussions, they did, however, have concerns about accessibility, land use/zoning, political will, public buy-in, and safety when it comes to taking action to shift away from a car-oriented city. A complete transcript of the notes from the small group discussion can be found in Appendix C: Roundtable Small Group Discussion Notes.

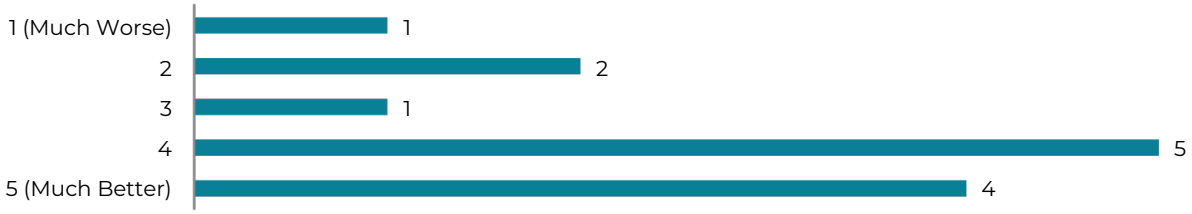
STAKEHOLDER MEETING



The Project Team hosted a virtual stakeholder meeting to discuss Milestone 2. Following a presentation on the project thus far and potential imagined futures, stakeholders were asked to respond to five polls. The polling questions were identical to the questions asked in the Milestone 2 survey. Overall, stakeholders tended to favor the transit-oriented and neighborhood-oriented futures.

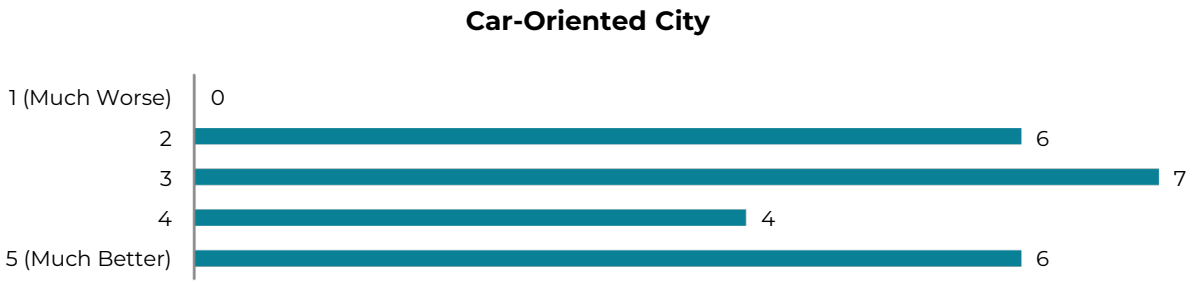
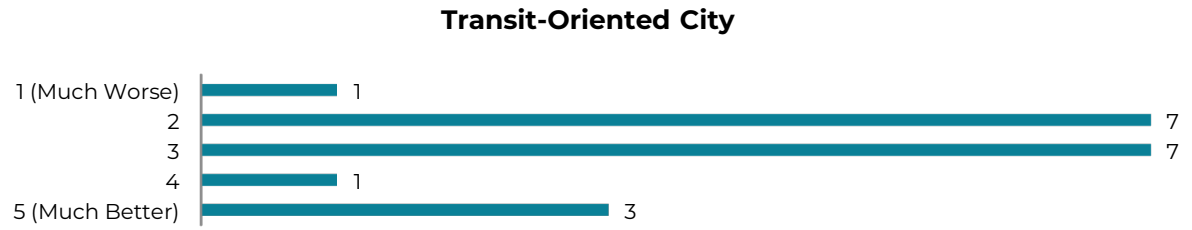
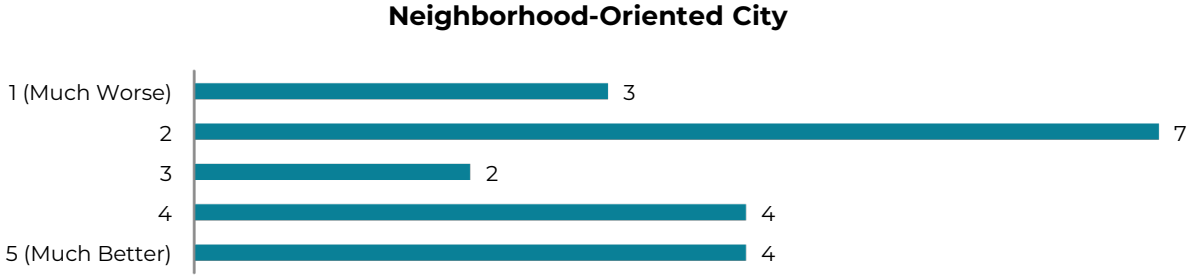
EMPLOYEE ENGAGEMENT – SEAM (JAN. 6, 2025)

Preferred Future



Due to printing constraints, employees at Southeast Aurora Maintenance Facility were asked which of the three futures they would prefer to see carried forward. Transit-Oriented came in at the lowest with Car-Oriented receiving the most votes. There was also strong support for a neighborhood-oriented city.

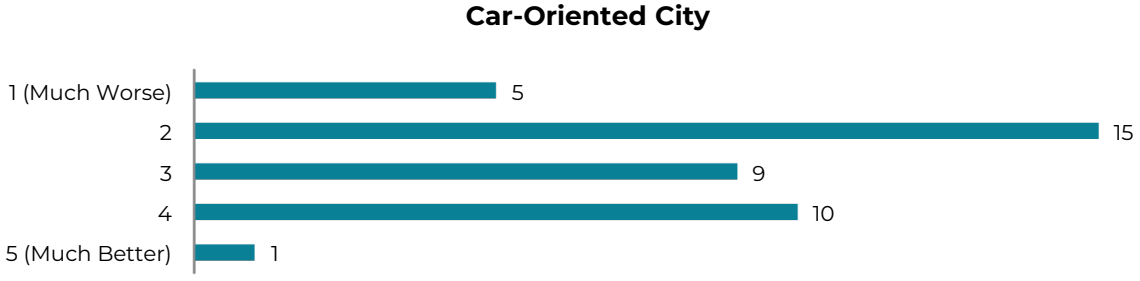


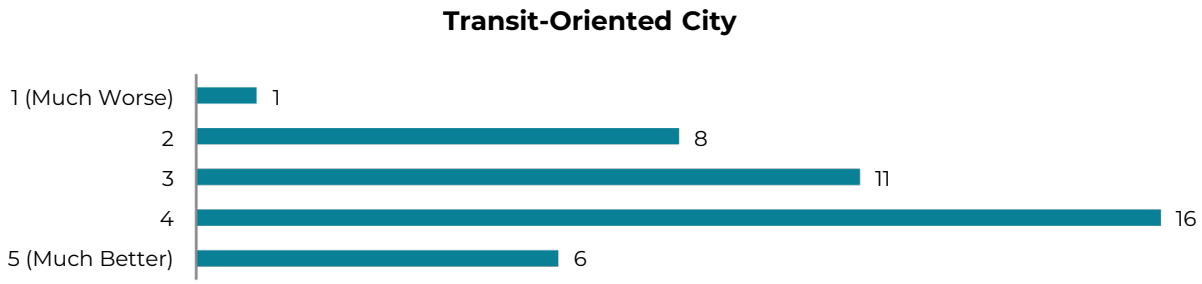


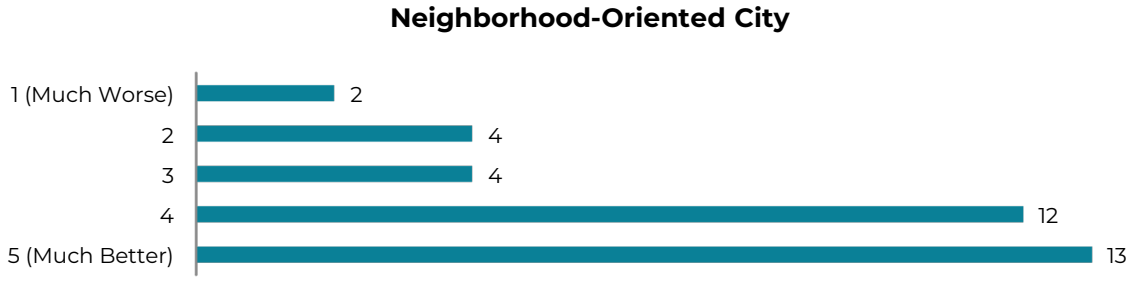
EMPLOYEE ENGAGEMENT – CENTRAL: FLEET (JAN. 9, 2025)

Quality of Life

Employees belonging to the fleet and heavy maintenance divisions at Aurora's Central Facility were asked "How do you think each of the three futures would impact your overall quality of life?". Generally, employees preferred the car-oriented city.



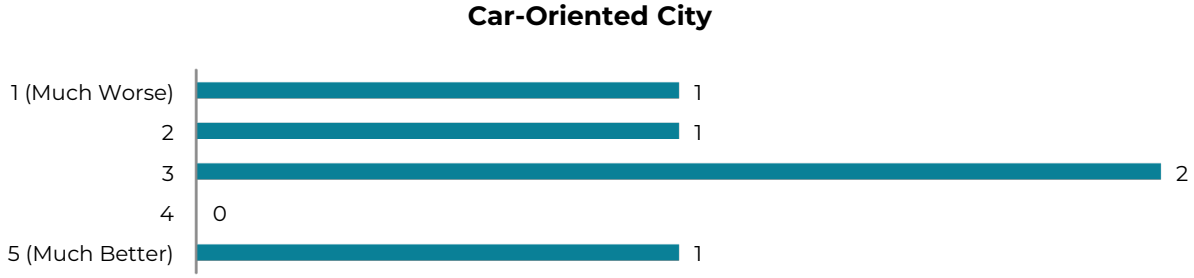


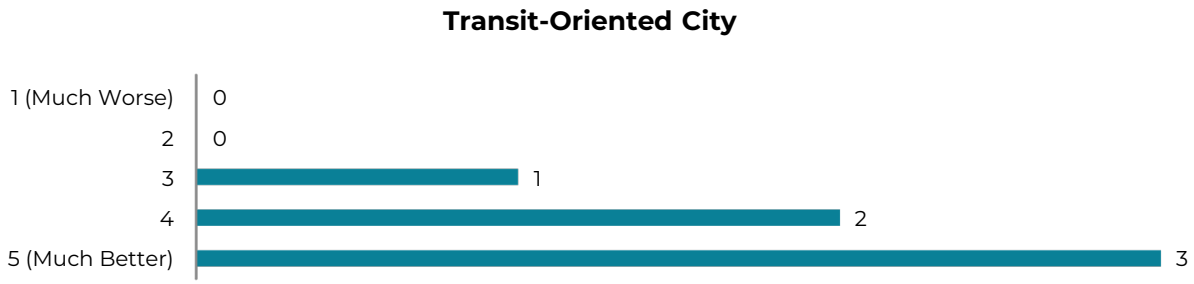


EMPLOYEE ENGAGEMENT – CENTRAL: PARKS, RECREATION & OPEN SPACE AND AURORA WATER (JAN. 10, 2025)

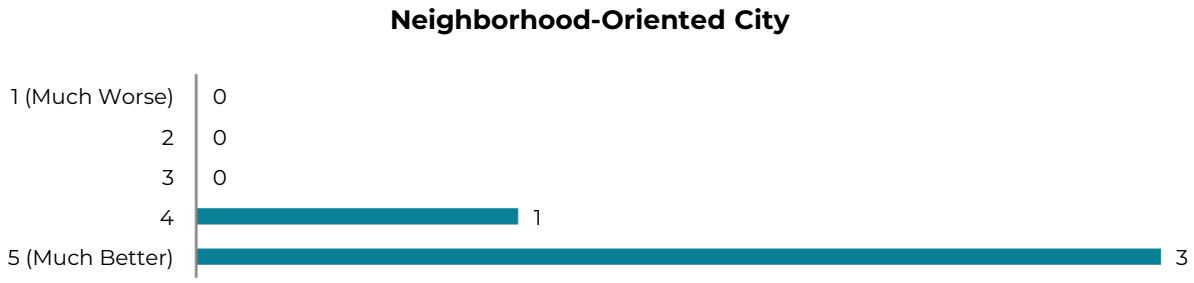
Quality of Life

Operations and maintenance employees at Aurora's Central Facility were asked "How do you think each of the three futures would impact your overall quality of life?". Generally, employees preferred the transit-oriented or neighborhood-oriented city.





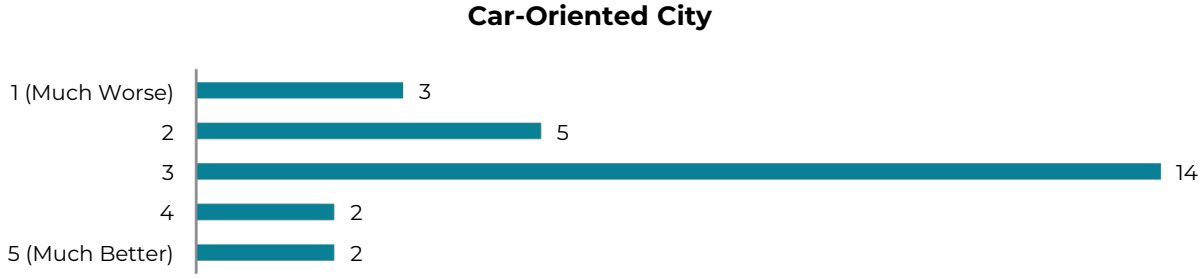
POP UP #1 – VILLAGE EXCHANGE CENTER (NOV. 11, 2024)

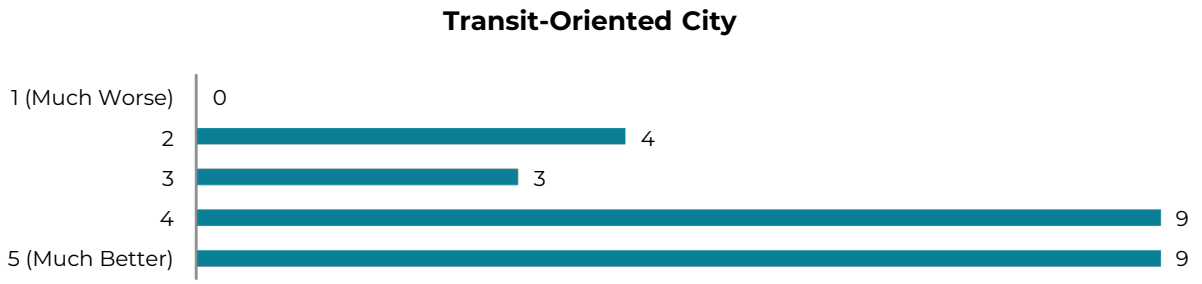


During a pop-up event hosted at the Village Exchange Center's monthly food bank drive, 13 families stopped to learn more about the project. Of those 13 families, 5 individuals participated in the dot board feedback activity largely due to a language barrier. Based on the conversations and dot board participation, the quality of life of attendees would be greatly improved by either a transit-oriented or neighborhood-oriented future.

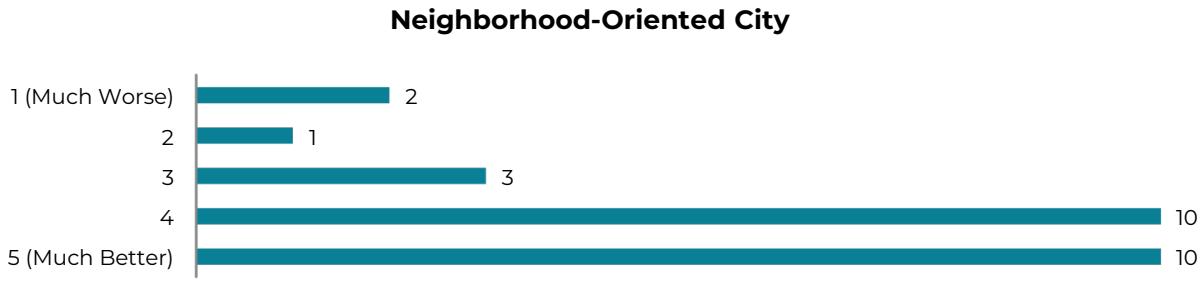
Quality of Life

How do you think each of the three futures would impact your overall quality of life?





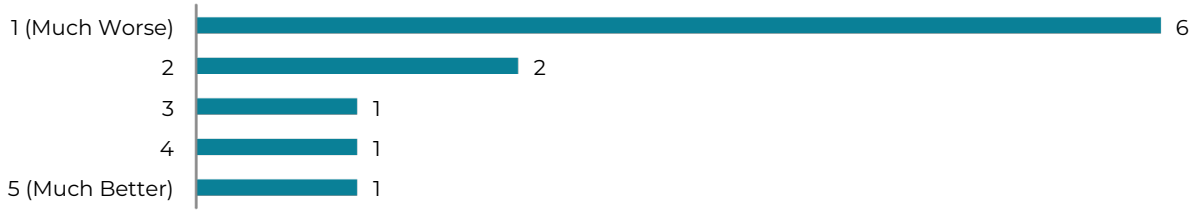
POP UP #2 – AURORA ANIMAL SHELTER VACCINE CLINIC (NOV. 17, 2024)



At the Aurora Animal Shelter's quarterly free vaccine clinic, the Project Team hosted a pop-up booth. 25 community members learned more about the project's imagined futures and participated in the dot board activity. As seen below, a car-oriented future would largely have either no or a negative impact on quality of life, while a transit-oriented or neighborhood-oriented city would improve quality of life.

Quality of Life

How do you think each of the three futures would impact your overall quality of life?



POP UP #3 – BECK RECREATION CENTER (NOV. 23, 2024)

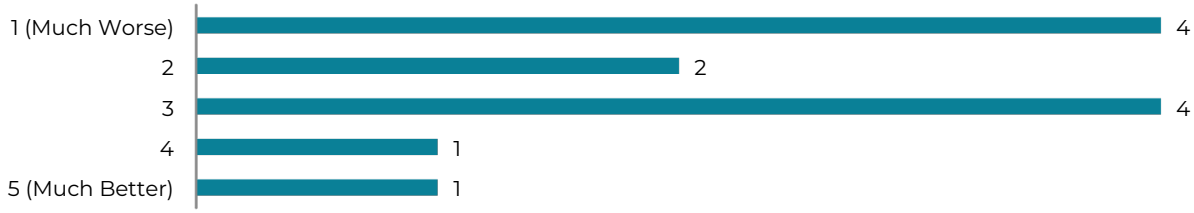
To reach community members in central Aurora, the Project Team hosted a pop-up event at Beck Recreation Center. A total of 11 community members who entered the rec center participated in the dot board activity about quality of life, the majority indicating that a car-oriented city would make their quality of life "much worse", and a transit-oriented or neighborhood-oriented city would make their quality of life "much better."

Quality of Life

How do you think each of the three futures would impact your overall quality of life?

Transit-Oriented City

Neighborhood-Oriented City

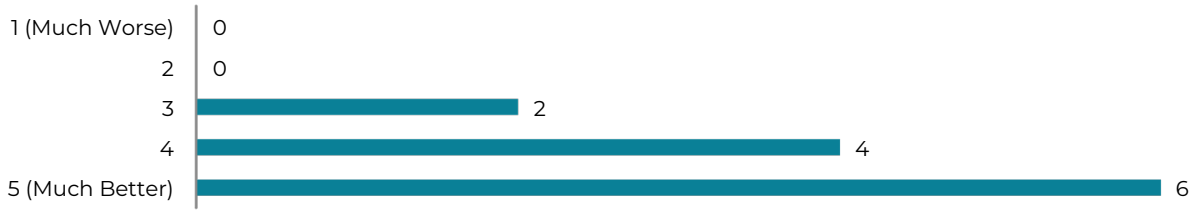


POP UP #4 – SOUTHEAST RECREATION CENTER (NOV. 26, 2024)

To reach community members in southeast Aurora, the Project Team hosted a pop-up event at Southeast Recreation Center. A dozen community members who entered the rec center participated in the dot board activity about quality of life. The majority indicated that a car-oriented city would make their quality of life either "much worse" or would remain "same as today," and a transit-oriented or neighborhood-oriented city would make their quality of life "better" or "much better."

Quality of Life

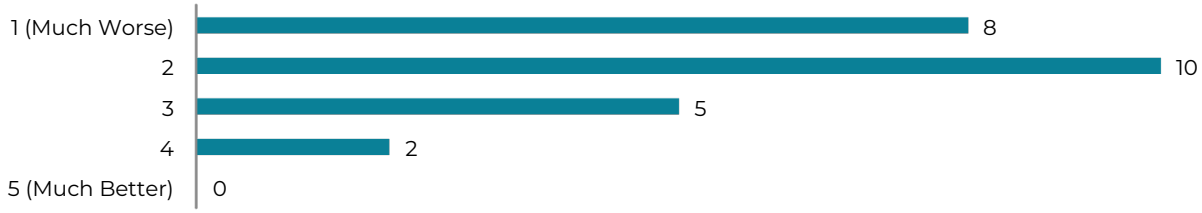
How do you think each of the three futures would impact your overall quality of life?



Car-Oriented City

Transit-Oriented City

Neighborhood-Oriented City



POP UP #5 – GO FUND THE CITY (NOV. 21, 2024)

Info?

Quality of Life

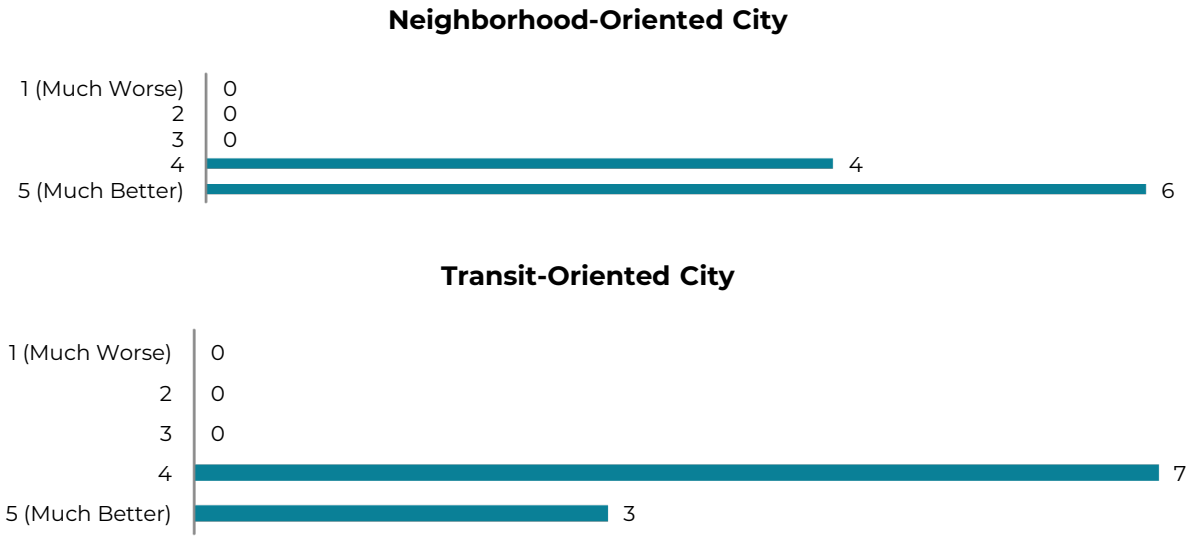
The Project Team asked attendees of Go Fund the City, part of the Aurora Chamber of Commerce "Leadership Aurora" event that invited local community and business leaders to city hall to learn about city government departments, to provide feedback on the three imagined futures. When asked “How do you think each of the three futures would impact your overall quality of life?” participants generally favored the transit or neighborhood-oriented city.

Car-Oriented City

Transit-Oriented City

Neighborhood-Oriented City

AURORA YOUTH COMMISSION PRESENTATION (DEC. 5, 2024)



At the Auora Youth Commission's monthly meeting, the Project Team presented information on the imagined futures and asked commissioners to participate in the "quality of life" dot board activity. As reflected below, the 10 commissioners present were largely in favor of a neighborhood-oriented city, showing strong support for a transit-oriented city as well.

Quality of Life

How do you think each of the three futures would impact your overall quality of life?

Car-Oriented City

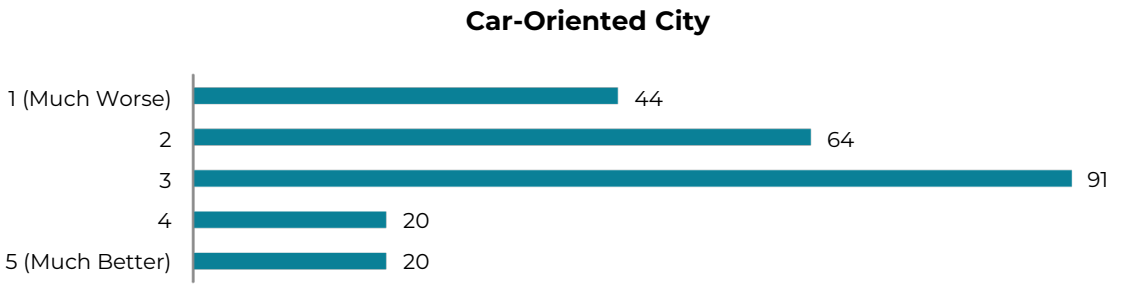
OVERALL RESULTS

- 95% of survey respondents belong to households that own a vehicle.
- The majority of survey respondents identify as female.
- Many pop-up event participants and roundtable discussion attendees expressed **appreciation for the project as a whole and were glad to have an opportunity to have a voice in the process.**
- Most participants, in both in-person and virtual engagement opportunities, favored either the transit-oriented or neighborhood-oriented future for Aurora.

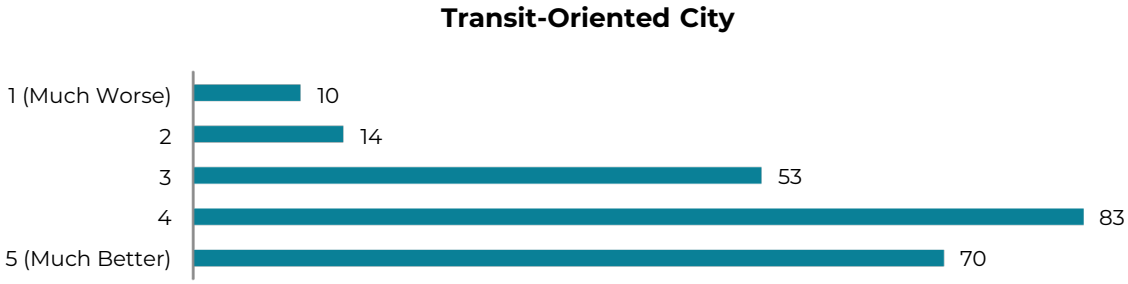
What We Heard Overall – Quality of Life

During all in-person and virtual events and in the survey, community members were asked to provide insight on how each imagined future would impact their quality of life on a scale of making it "Much Worse" to "Much Better." This was the only question that was asked at the pop-up events and open houses and was also included in the survey and in the polling at the stakeholder meeting, roundtable discussion, and virtual town hall.

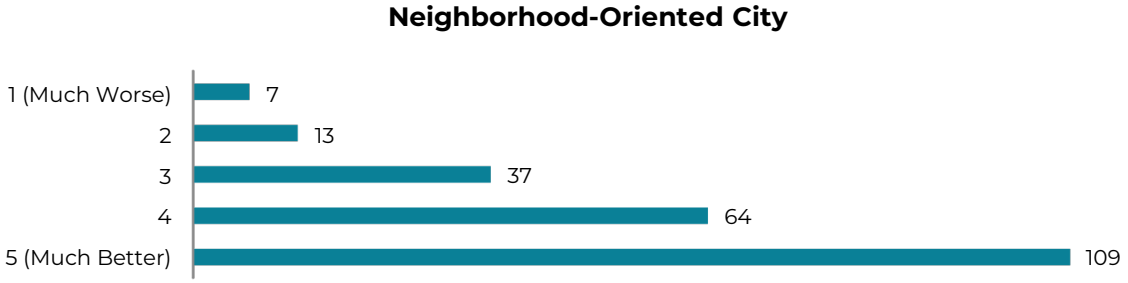
Of those surveyed, 85% said that their overall quality of life would be either the same as today or worse in a car-oriented city future. Seventy five percent of respondents said that a transit-oriented city would make their quality of life better or much better. When considering a neighborhood-oriented future, 77% of respondents said their quality of life would be either better or much better.



What We Heard Overall – Impacts to Youth, Older Adults and Residents with Mobility Differences



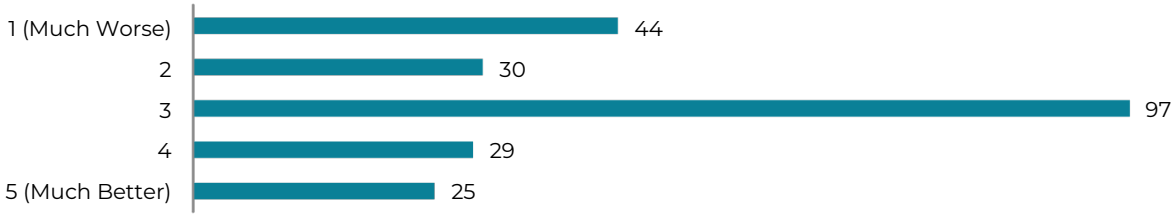
When asked how each of the three futures would impact youth, older adults and residents with mobility differences, 45% indicated a neighborhood-oriented city would make conditions "much better." This question was asked in the online/paper survey, during the stakeholder meeting and roundtable discussion, and at the virtual townhall.



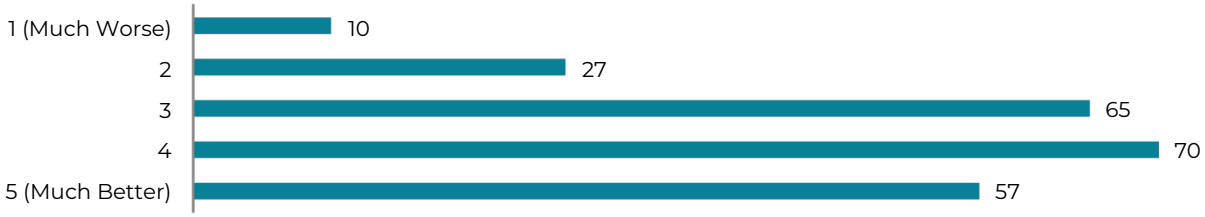
What We Heard Overall – Prosperity

Of those surveyed, the majority of respondents indicated that a car-oriented future would make things worse, much worse, or the same as today in regard to prosperity. 61% of respondents indicated that a transit-oriented future would make prosperity either “better” or “much better,” with 71% of respondents indicating the same of a neighborhood-oriented future. This question was asked in the online/paper survey, during the stakeholder meeting and roundtable discussion, and at the virtual townhall.

What We Heard Overall – Traveling to Places You Want To Go



When asked how each of the three futures would impact their ability to travel to the places they want to go, community members showed favor for a neighborhood-oriented future, with 33% of respondents saying a neighborhood-oriented city would make their mobility "much better." 37% of respondents indicated that a car-oriented city would cause their ability to travel to the places they want to go to be the same as today. 34% of respondents indicated a transit-oriented future would also cause their ability to travel to the places they want to go to be the same as today. This question was asked in the online/paper survey, during the stakeholder meeting and roundtable discussion, and at the virtual townhall.



What We Heard overall – Safety and Comfort

Community members were asked to provide feedback on how each future would impact their level or personal comfort and safety. Seventy two percent said a car-oriented city would cause their comfort and safety levels to be the same as today or worse, with 50% of respondents similarly saying a transit-oriented city would worsen or not impact their current level of safety and comfort. In contrast, 70% of respondents indicated that a neighborhood-oriented city would cause their comfort and safety levels to either be better or much better than today. This question was asked in the online/paper survey, during the stakeholder meeting and roundtable discussion, and at the virtual townhall.

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

More input needed on transportation in Aurora this fall!

¡Se necesitan más comentarios sobre el transporte en Aurora este otoño!

Participate in Milestone 2 of Connecting Aurora

Work continues on Aurora's first-ever citywide multimodal transportation master plan. Your next chance to provide input is this November.

This year, many people have taken our surveys, and talked to us at community events and open houses. The input gathered helped us better understand our community's transportation needs and priorities.

Now we need input on different transportation and land use scenarios and project priorities, and how we can meet Aurora's transportation goals.

Join us at an upcoming open house or online anytime from Nov. 6 to Dec. 6 to offer feedback and help us develop us identify potential projects for review in spring 2025.

Participe en el segunda fase de Connecting Aurora

Continúa el trabajo en el primer plan maestro de transporte multimodal de Aurora. La siguiente oportunidad para dar tu opinión es este mes de noviembre.

Este año, muchas personas han respondido a nuestras encuestas y han hablado con nosotros en eventos comunitarios y jornadas de puertas abiertas. Las aportaciones recogidas nos han ayudado a comprender mejor las necesidades y prioridades de transporte de nuestra comunidad.

Ahora necesitamos su opinión sobre los diferentes escenarios de transporte y uso de la propiedad y las prioridades de los proyectos, y cómo podemos alcanzar los objetivos de transporte de Aurora.

FACT SHEET

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Summer 2024

PROJECT OVERVIEW

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around. But this year, the city is launching Connecting Aurora – its first-ever citywide multimodal transportation master plan – to look holistically at the transportation needs of the entire city.

Connecting Aurora is a transportation plan that will identify projects, policies, and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees, and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

What does multimodal mean?

Multimodal is a transportation term that means all the different ways people travel. This could be your car, a bus or train, your feet or wheels, bicycle, scooter, skateboard, hoverboard, or box truck. You name it.

We want to make sure this plan considers all types of transportation modes.

PLANNING PROCESS AND TIMELINE

Connecting Aurora is being developed over the next two years and a final draft will be presented at the end of 2025. Throughout the process, we will work closely with you to make sure we are headed in the right direction and that the outcomes reflect the needs of our community.

Below is a timeline of the planning process.

CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Summer 2024

More about the Connecting Aurora plan

Over the next couple of years, the city will examine how to make traveling in Aurora better for everyone in our community.

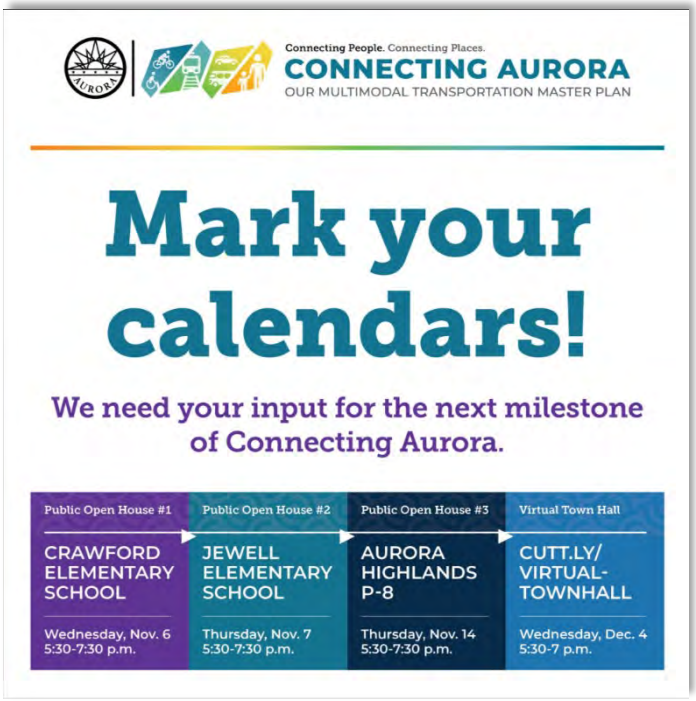
The plan will propose improvements that will offer safer, more comfortable, and more convenient transportation options for everyone who walks, rolls, bikes, drives and takes transit.

The purpose is to create a complete transportation system for people of all backgrounds, incomes, ages, and abilities. The plan will identify necessary projects, policies, and programs for all modes of transportation, including bike, pedestrian, transit, freight and vehicular traffic consistent with the city's overall development vision expressed in the adopted comprehensive plan, Aurora Places.

Connecting Aurora will guide the development, design, and delivery of future multimodal transportation infrastructure projects and programs that focus on providing safer, more sustainable and convenient mobility options for the community.

Get involved

Your feedback is critical in guiding the development of Connecting Aurora.



The final plan will reflect the community's shared vision for Aurora and includes improvements that will enhance your quality of life. There will be several online and in-person opportunities for the community to engage in the planning process throughout the next two years.

NEWS AURORA ARTICLE (OCT. 2025)

More transportation input is needed in November

The city is continuing its work on Aurora's first-ever citywide multimodal transportation master plan, and your next chance to provide input is coming up this November.

During the spring and summer months, many people took our surveys, went to our open houses and talked to us at community events. Based on what we heard, our community wants safer and more convenient transportation options. Overall, the input we gathered helped us better understand our community's transportation needs and priorities given our limited resources.

In November, the city wants you to weigh in on what the future of transportation will look like in Aurora. Based on the input received so far this year, the project team has crafted scenarios to consider for Aurora's transportation future. Several feedback opportunities related to these scenarios will be available online and in person. The project team will use the public input to identify potential projects and multimodal networks by spring 2025.

Visit **EngageAurora.org/ConnectingAurora** to find out the dates for open houses and other engagement opportunities or contact us at 720984.2109 or **ConnectingAuroraCO@gmail.com** anytime to offer input.

Last chance: Provide input on our Havana and Yale sidewalk project by Nov. 11

It's your last chance to provide input on the Havana and Yale Multimodal Access Project. Take our five-minute survey before Nov. 11 or view the roll plots and post your comments regarding our plans for filling sidewalk gaps, widening substandard sidewalks and improving multimodal access in three locations along Havana Street and Yale Avenue.

CONNECTING AURORA

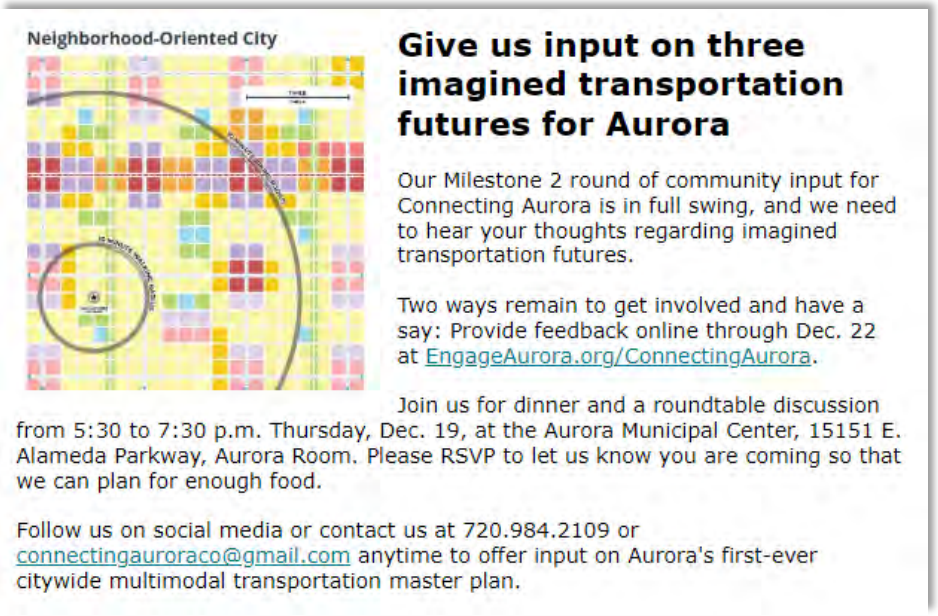
You're invited!

Your feedback during this new phase is important – join us in person or online!

More feedback needed on transportation

The work on Connecting Aurora, our first-ever citywide multimodal transportation master plan, continues. We need your input again for Milestone 2, when we will get your thoughts on how different transportation and land use scenarios can best meet Connecting Aurora's goals.

Join us for an open house or virtual town hall or provide feedback online starting Nov. 6 at EngageAurora.org/ConnectingAurora.



Open House No. 1
Wednesday, Nov. 6, 5:30 to 7:30 p.m.
Crawford Elementary School, 1600 Florence St.

Open House No. 2
Thursday, Nov. 7, 5:30 to 7:30 p.m.
Jewell Elementary School, 14601 E. Jewell Ave.

Open House No. 3
Thursday, Nov. 14, 5:30 to 7:30 p.m.
Aurora Highlands P-8, 24405 E. 42nd Ave.

Virtual Live Town Hall
Wednesday, Dec. 4, 5:30 to 7:30 p.m.
Zoom meeting link: cutt.ly/VirtualTownHall

THIS IS AURORA: CITY NEWSLETTER ARTICLES (NOV. 12 & DEC. 21, 2024)

Give us input on three imagined transportation futures for Aurora

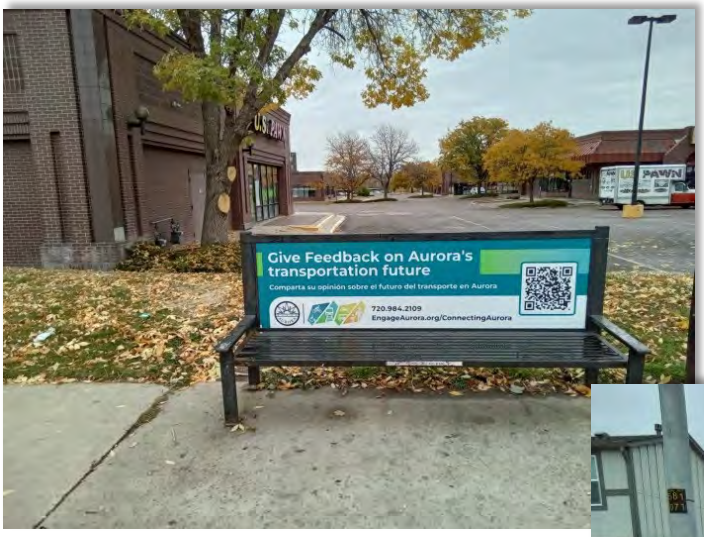
Our Milestone 2 round of community input for Connecting Aurora is in full swing, and we need to hear your thoughts regarding imagined transportation futures.

Two ways remain to get involved and have a say: Provide feedback online through Dec. 22 at EngageAurora.org/ConnectingAurora.

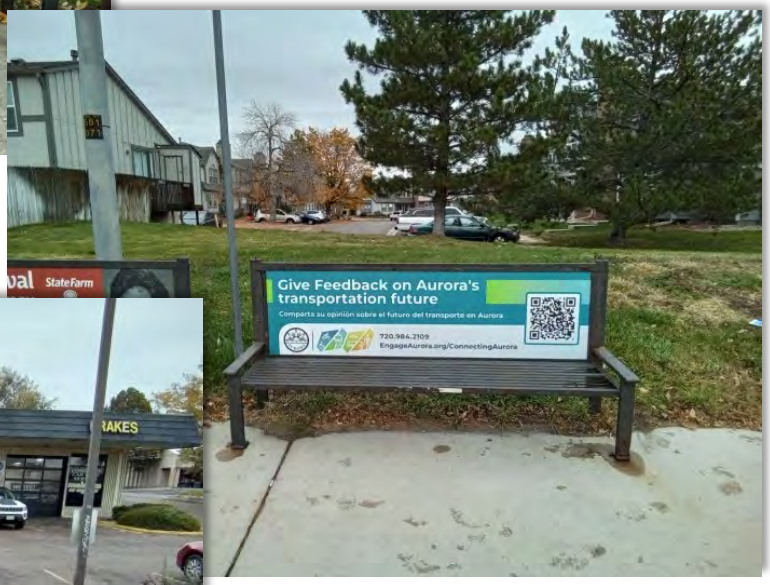
Join us for dinner and a roundtable discussion from 5:30 to 7:30 p.m. Thursday, Dec. 19, at the Aurora Municipal Center, 15151 E. Alameda Parkway, Aurora Room. Please RSVP to let us know you are coming so that we can plan for enough food.

Follow us on social media or contact us at 720.984.2109 or connectingauroraco@gmail.com anytime to offer input on Aurora's first-ever citywide multimodal transportation master plan.

Give us input on three imagined transportation futures for Aurora



The city is continuing to work on its first-ever citywide multimodal transportation master plan and is accepting community input for Milestone 2 of Connecting Aurora.



We want to hear your thoughts about imagined transportation futures, and there are three remaining ways to get involved:

- Provide feedback online through Dec. 22 at EngageAurora.org/ConnectingAurora.
- Talk with us directly at our Wednesday, Dec. 4, virtual live town hall on Zoom from 5:30 to 7:30 p.m. Anyone who attends and stays until the end will be entered into a drawing for a Target gift card that night.
- Join us for dinner and a roundtable discussion from 5:30 to 7:30 p.m. Thursday, Dec. 19, at the Aurora Municipal Center, 15151 E. Alameda Parkway, Aurora Room. Please RSVP to let us know you are coming so that we can plan for enough food.

Follow us on social media or contact us at 720.984.2109 or connectingauroraco@gmail.com anytime to offer input.

SURVEY

CONNECTING AURORA

Help continue to shape Aurora's transportation future:

Connecting Aurora Milestone 2 Survey

Aurora is committed to designing a transportation system that meets the needs of all residents. Share your desired potential future, as described on the other side of this survey, by answering the question below. (1=Much worse, 5=Much better)

		1				5
How do you think each of the three futures would impact your overall quality of life?	Car-Oriented City (Status Quo)	☐	☐	☐	☐	☐
	Transit-Oriented City	☐	☐	☐	☐	☐
	Neighborhood-Oriented City	☐	☐	☐	☐	☐
		1				5
How do you think each of the three futures would impact youth, older adults and residents with mobility differences?	Car-Oriented City (Status Quo)	☐	☐	☐	☐	☐
	Transit-Oriented City	☐	☐	☐	☐	☐
	Neighborhood-Oriented City	☐	☐	☐	☐	☐
		1				5
How do you think each of three futures would impact our city's prosperity?	Car-Oriented City (Status Quo)	☐	☐	☐	☐	☐
	Transit-Oriented City	☐	☐	☐	☐	☐
	Neighborhood-Oriented City	☐	☐	☐	☐	☐

Demographic Information

Answering the following questions helps us ensure we are reaching and hearing from as many people as possible. These questions are optional.

Which Ward do you live in? (Search our map by your address.)

☐ Ward I ☐ Ward III ☐ Wared V
☐ Ward II ☐ Ward IV ☐ Ward VI

If you don't know your Ward, please enter your zip code: _____

What is your annual household income level?

☐ $0-$30,000 ☐ $61,000-$90,000 ☐ $120,000+
☐ $31,000-$60,000 ☐ $91,000-$120,000 ☐ Prefer not to say

How many people are in your household?

☐ 1 ☐ 4 ☐ 7 or more
☐ 2 ☐ 5 ☐ Prefer not to say
☐ 3 ☐ 6

What is your gender?

☐ Male ☐ Non-Binary ☐ Prefer not to say
☐ Female ☐ Prefer to self-describe

What year were you born in?

☐ Greatest Generation: Born between 1901 and 1927
☐ Silent Generation: Born between 1926 and 1945
☐ Baby Boomers: Born between 1946 and 1964
☐ Generation X: Born between 1965 and 1980
☐ Millennial: Born between 1981 and 1996
☐ Generation Z: Born between 1997 and 2012
☐ Generation Alpha: Born between 2010 and 2024

CONNECTING AURORA

PUBLIC MEETING BOARDS

PROJECT OVERVIEW | RESUMEN DEL PROYECTO

What is Connecting Aurora?

¿Qué es Connecting Aurora?

Connecting Aurora is the first-ever citywide multimodal transportation master plan to look holistically at the transportation needs throughout Aurora.

Connecting Aurora es el primer plan maestro de transporte multimodal diseñado para analizar holísticamente todas las necesidades de transporte en Aurora.

LET'S BUILD THE FUTURE OF AURORA TRANSPORTATION TOGETHER!

¡CONSTRUYAMOS JUNTOS EL FUTURO DEL TRANSPORTE EN AURORA!

Connecting Aurora aims to identify ways to better connect our residents, employees, and visitors to various destinations across the city.

El objetivo del plan es identificar maneras para facilitar conexiones entre nuestros habitantes, empleados y visitas y los diversos destinos por toda la ciudad.

Creates a vision for the city's transportation system (bikes, pedestrian, transit, freight, and vehicular traffic).

Crear una visión del sistema de transporte de la ciudad (ciclistas, peatones, tránsito, mercancías, y tráfico vehicular).

Guides the development, design, and delivery of future multimodal transportation projects and programs.

Guiar el desarrollo y diseño de futuros programas y proyectos de transporte multimodal.

Strives to improve safety and provide more convenient ways to travel for all people of Aurora.

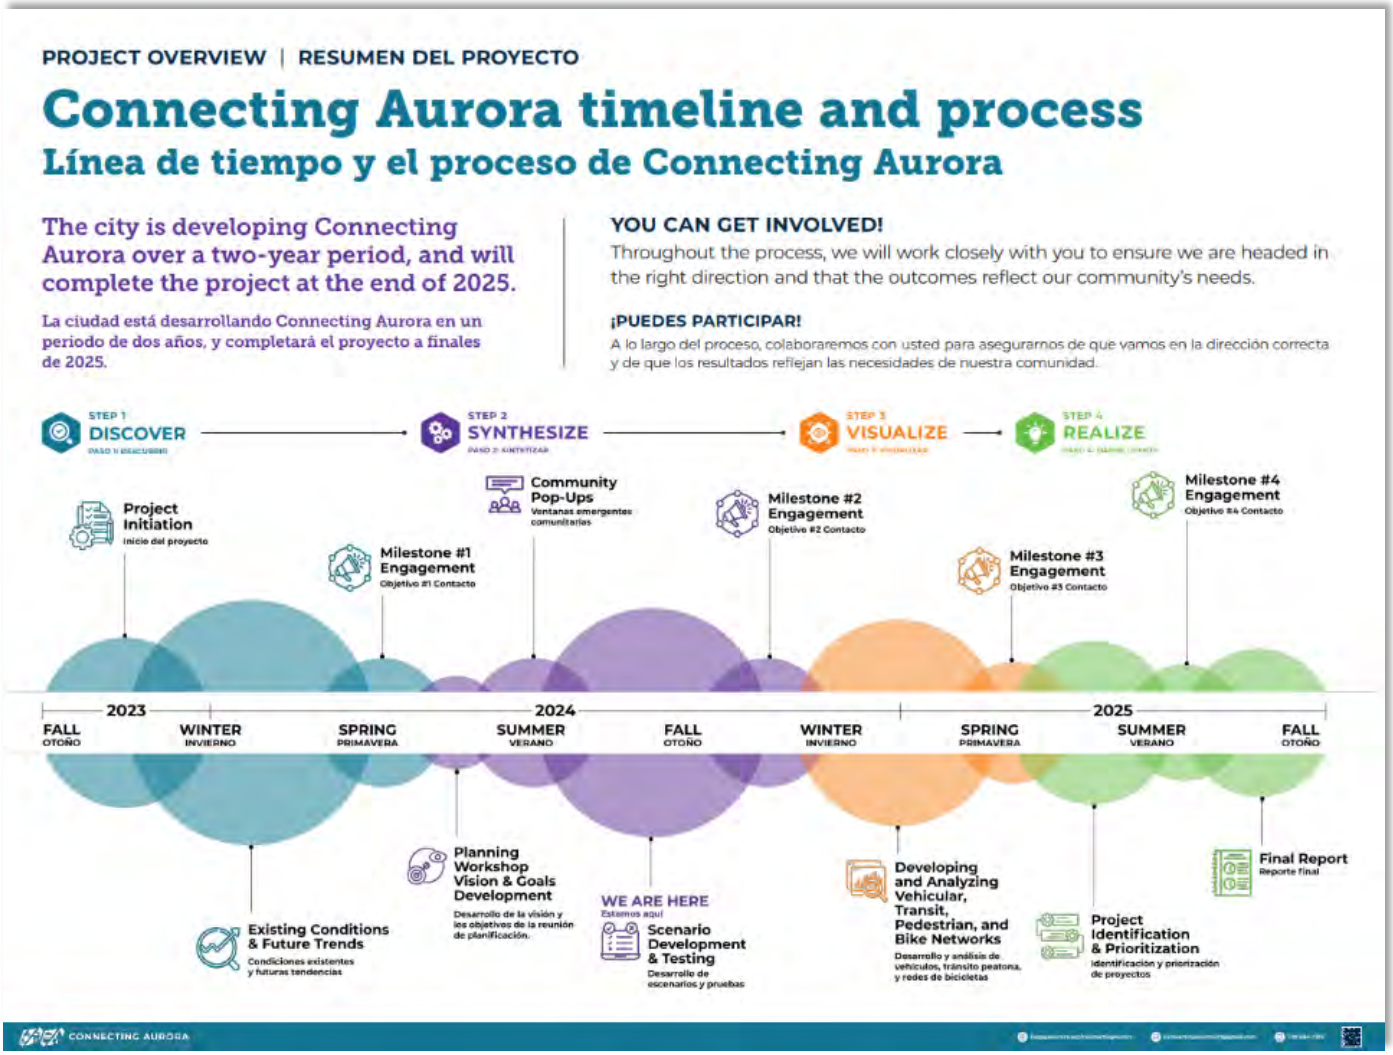
Se esfuerza por mejorar la seguridad y ofrecer formas más cómodas de viajar a todos los habitantes de Aurora.

WHAT'S A TRANSPORTATION MODE?

Transportation mode refers to the way in which passengers and/or goods can be transported.

¿QUÉ ES UN MODO DE TRANSPORTE?

La frase modo de transporte se refiere a la manera cómo se puede transportar a los pasajeros y mercancía.



WHAT DOES MULTIMODAL MEAN?

Multimodal is a transportation term that means all the different ways people move from point A to B. This could be your feet or wheels, bicycle, scooter, skateboard, hoverboard, car, bus, train, or box truck.

¿QUÉ SIGNIFICA MULTIMODAL?

Multimodal es un término de transporte que hace referencia a todas las formas diferentes en que las personas se desplazan del punto A al B. Pueden ser los pies o las ruedas, la bicicleta, el patinete, el monopatín, el hoverboard, el coche, el autobús, el tren o el camión.

COMMUNITY FEEDBACK | COMENTARIOS DE LA COMUNIDAD
What we've heard so far
Lo que hemos escuchado hasta ahora
In spring and summer 2024, we gathered feedback in person and online to better understand the challenges people face as they travel in Aurora.
En primavera y verano de 2024, recogimos opiniones en persona y en línea para comprender mejor los retos a los que se enfrenta la gente cuando viaja por Aurora.
YOUR TOP CONCERNS
TUS PRINCIPALES PREOCUPACIONES
Many people do not feel safe traveling outside their car.
Driving is hampered by bottlenecks. Speeding and unsafe driving behavior are key issues.
Walking and biking are uncomfortable, and the places people want to go are too far away.
Public transit security is an issue, and bus and train service is infrequent, unreliable, and too slow.
There is a desire to have higher quality streets/places.
It's difficult for people to get to key destinations and services without a car.

PROJECT OVERVIEW | RESUMEN DEL PROYECTO
Our shared vision
Nuestra visión compartida
Our vision, mission, and bedrock practices were developed based on our extensive public engagement efforts during Milestone 1.
Nuestra visión, misión, y prácticas fundamentales se desarrollaron en base a nuestros extensos esfuerzos de participación pública durante el objetivo 1.
OUR VISION
Aurora safely connects all people to our places for a healthy, sustainable, and economically strong community.
NUESTRA VISIÓN: Aurora conecta de forma segura a todas las personas con nuestros lugares para una comunidad saludable, sostenible y económicamente fuerte.
OUR MISSION
The city of Aurora will provide a complete transportation system to meet the needs of all people. The city will engage the public in the delivery of plans, programs, policies, standards, and projects.
NUESTRA MISIÓN: La ciudad de Aurora proporcionará un sistema de transporte completo para satisfacer las necesidades de todas las personas. La ciudad implicará al público en la elaboración de planes, programas, políticas, normas y proyectos.
OUR BEDROCK PRACTICES
These bedrock practices define the way the city plans to do business while implementing the plan. As new plans, programs, policies, standards, and projects are developed, city staff will commit to using these practices as the foundation for successful implementation.
NUESTRAS PRÁCTICAS FUNDAMENTALES: Estas prácticas fundamentales definen la forma en que la ciudad planea hacer negocios mientras implementa el plan. A medida que se desarrollen nuevos planes, programas, políticas, estándares y proyectos, el personal de la ciudad se comprometerá a utilizar estas prácticas como base para una implementación exitosa.

PROJECT OBJECTIVES | OBJETIVOS DEL PROYECTO
Our goals
Nuestras metas
Keep these in mind as you look at the rest of the boards that present possible futures for our city.
Tenga presentes estos objetivos al examinar el resto de los tableros que presentan posibles futuros para nuestra ciudad.
The following goals support the Connecting Aurora's vision and mission and provide more specific guidance on what the city plans to achieve through the implementation of this plan, for both individual travelers and for the community at large.
Los siguientes objetivos respaldan la visión y misión de Connecting Aurora y brindan orientación más específica sobre lo que la ciudad planea lograr mediante la implementación de este plan, tanto para los viajeros individuales como para la comunidad en general.
Safe
People are safe and feel safe traveling in our city.
Seguro
Reliable
People can depend on all forms of transportation.
Confiable
Convenient
People can move around our city efficiently and easily.
Conveniente
Connected
People are well-connected to the places they want to go however they choose to move.
Conectado
Sustainable
Infrastructure and services can be built, operated, and maintained at high levels, in a fiscally and environmentally sustainable way.
Sostenible
Economically Strong
The community's economic vitality is supported and enhanced by the transportation network.
Económicamente Fuerte
Healthy
The community is served by transportation that supports a healthy lifestyle and environment.
Saludable
Authentic
Infrastructure design contributes to the creation of great places and preservation of traditionally unique places.
Auténtico
Equitable
All people have viable transportation choices to meet their needs.
Equitativo
Integrated
People have easy access to a mix of places because land use and transportation are fully woven together.
Integrado

IMAGINED FUTURES | FUTUROS IMAGINADOS

What might our future hold?

¿Qué nos depara el futuro?

Your input and feedback is critical for the project team to develop the multimodal transportation network in the next phase of the project.

Sus aportes y comentarios son fundamentales para que el equipo del proyecto desarrolle la red de transporte multimodal en la siguiente fase del proyecto.

TO BETTER PLAN FOR OUR BEST FUTURE, THREE POSSIBLE FUTURES HAVE BEEN IMAGINED:

PARA PLANIFICAR MEJOR NUESTRO MEJOR FUTURO, SE HAN IMAGINADO TRES FUTUROS POSIBLES:

These imagined futures for Aurora each represent extreme outcomes based on the city making different transportation decisions, land use policy choices, and investment priorities. Understanding and analyzing the impacts on travel can help the city identify strategies to achieve the vision, mission, and goals created in the Milestone 1 public engagement process.

Cada uno de estos futuros imaginados para Aurora representa resultados extremos basados en que la ciudad tome diferentes decisiones de transporte, opciones de políticas de uso de la tierra y prioridades de inversión. Comprender y analizar los impactos en los viajes puede ayudar a la ciudad a identificar estrategias para lograr la visión, la misión y los objetivos creados en el proceso de participación pública del Hito 1

CONNECTING AURORA

IMAGINED FUTURES | FUTUROS IMAGINADOS
Car-Oriented City (Status Quo)
Ciudad-Orientada al Automóvil (Status Quo)
In this future, Aurora looks similar to today.
• Low density housing and commercial development.
• Commercial areas are concentrated at major intersections.
• Large surface parking fronts roadways.
• Wide streets and large blocks prioritize moving cars quickly.
• Most people must drive to reach destinations.
• Transit service is very limited.
En este futuro, Aurora se parece a la de hoy: Viviendas de baja densidad y desarrollo comercial. Las zonas comerciales se concentran en las principales intersecciones. Grandes áreas de estacionamiento en superficie frente a las calzadas. Las calles anchas y las cuadras grandes dan preferencia a la circulación rápida de los automóviles. La mayoría de la gente debe conducir para llegar a sus destinos. El servicio de transporte público es muy limitado.

How would this imagined future impact our goals?
¿Cómo impactaría este imaginando futuro en nuestros objetivos?
Safe
You are less safe moving around Aurora than today.
Reliable
Your commute may be less reliable than today.
Convenient
Your car is your preferred travel mode because it is easiest.
Connected
Driving is your best option to quickly reach destinations.
Sustainable
The city lacks funds to adequately maintain your street, and air quality is worse.
Economically Strong
You have less access to jobs and other destinations near your home.
Healthy
Less physical activity is built into your day.
Authentic
You have fewer unique places near your home to visit in your free time.
Equitable
You spend more of your income on transportation than today.
Integrated
The places where you live, work, and shop are farther apart from each other.

CONNECTING AURORA

IMAGINED FUTURES | FUTUROS IMAGINADOS

Transit-Oriented City

Ciudad Orientada al Transporte Público

In this future, Aurora invests heavily in its transit network.

- Most residents and workers are within a 5-minute walk or bike ride to free, frequent transit.
- Buses are given dedicated space on arterial streets increasing reliability.
- Multifamily housing and dense commercial development are concentrated along high frequency transit corridors.
- Traveling via transit is as fast and convenient as driving.
- Low density residential development is limited on the city's edge.

En este futuro, Aurora invierte fuertemente en su red de tránsito. La mayoría de los residentes y trabajadores están a menos de 5 minutos a pie o en bicicleta del transporte público gratuito y frecuente. Los autobuses disponen de espacio específico en las arterias, lo que aumenta su fiabilidad. Las viviendas multifamiliares y el desarrollo comercial denso se concentran a lo largo de corredores de tránsito de alta frecuencia. Viajar en transporte público es tan rápido y conveniente como conducir. El desarrollo residencial de baja densidad se limita a la zona límite de la ciudad.

CONNECTING AURORA

IMAGINED FUTURES | FUTUROS IMAGINADOS
Neighborhood-Oriented City
Ciudad Orientada al Vecindario
In this future, Aurora creates walkable and bikeable neighborhoods.
• Most residents can access daily needs within a 10-minute walk or bike.
• Neighborhoods are designed around town centers with a mix of uses and daily services.
• Affordable housing and multifamily homes are concentrated near town centers.
• Frequent, reliable, and convenient transit/micro-transit connects to other neighborhoods and town centers.
• Driving is slightly less convenient during rush hour.

How would each imagined future improve your Quality of Life?
Car-Oriented City (Status Quo)
Transit-Oriented City
Neighborhood-Oriented City

CITY OF AURORA EMPLOYEE ENGAGEMENT

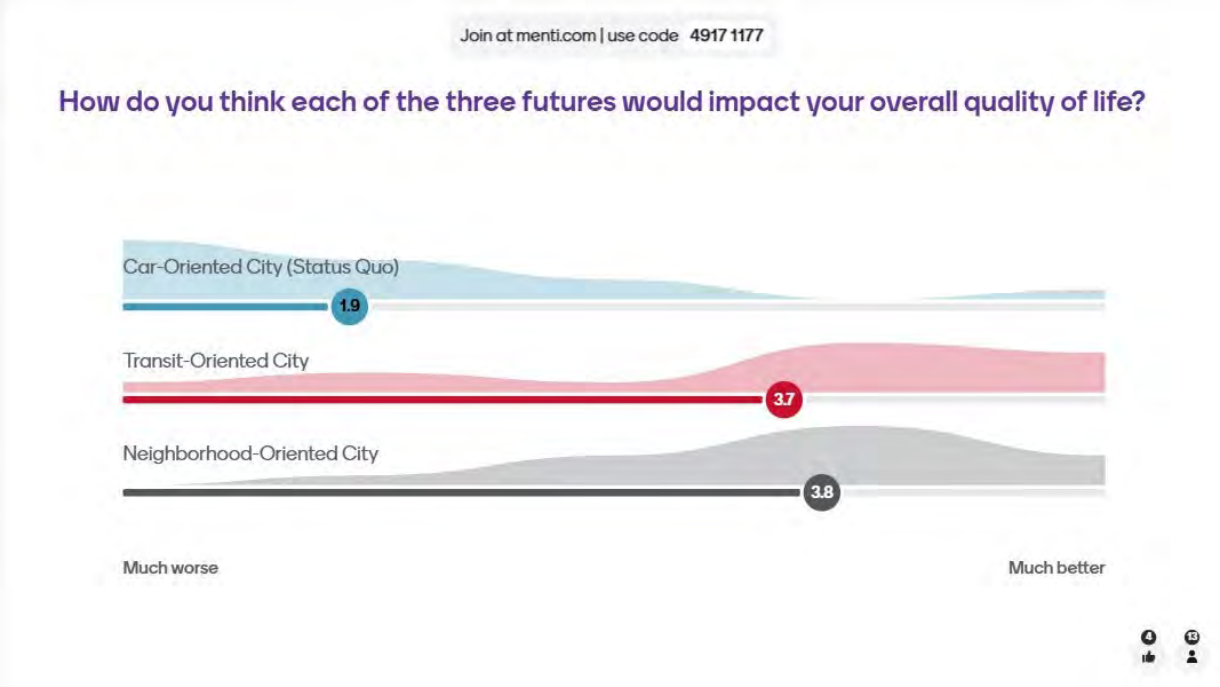
STAKEHOLDER MEETING NOTES

MEETING SUBJECT: Stakeholder Group – Meeting #5(?)

LOCATION: Virtual – MS Teams

DATE/TIME: Nov. 13, 2024 at 2 PM

---



1. Welcome and Introductions (5 minutes)
2. Schedule Overview (10 minutes)
3. Public Engagement Review (20 minutes)
   - Any additional upcoming opportunities for engagement?
4. Milestone 2 - Imagined Futures Input (45 minutes)
   - Review of three imagined futures and opportunity to provide feedback.
   - Question from John Hudgens: Under Transit-Oriented City, you state that it would be Safer due to lower volumes and speeds. Does this take into account projected population increases in the city?
     → Yes, it does. Also, the lower volumes and speeds are in comparison to Car Oriented City Scenario which will have higher volumes and speeds.
   - Question from Lyle Artz: For a lot of the communities in Aurora, a lot of the community centers, churches and neighborhoods are already established.
     → Aurora Comprehensive Plan Aurora Places identified various place types. This followed place types where places are already identified where the city wants to see increase in density/services. There are certain areas that have the possibility for building up commercial areas to be denser.
     → These are three extreme examples. These are what-if questions for us to understand the impacts of different land use and transportation policies and how these scenarios can help us achieve the 10 goals.

- Question from Tracy S: How does commercial freight traffic fit into each scenario?

  → These are extreme examples at higher level, so details about exact freight movement is not being dug into at this time. Freight will be factored in as we start to develop multimodal network, cross sections, design standards and projects.

  → Freight will be a part of the efforts in the next phase of the plan.

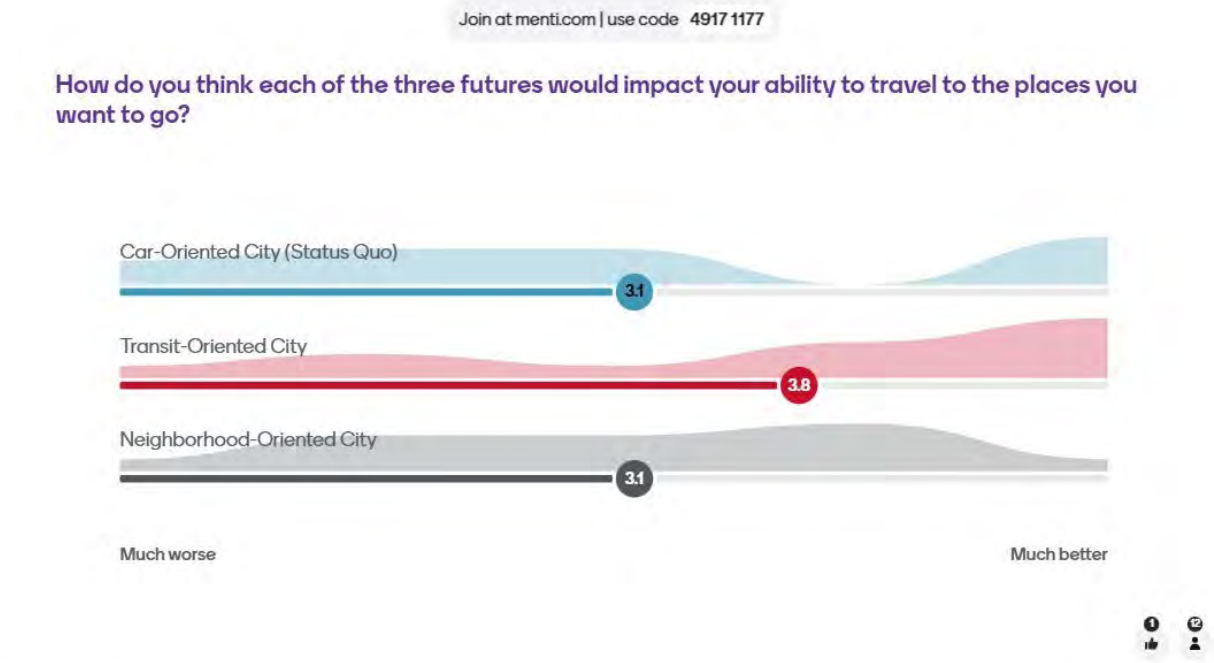
Quality of Life Question

Youth, Older Adults and Mobility Differences Question

- Ryan – Transit-oriented city would impact the mobility standpoint of having accessible transit.

  → Yarkenda agrees. They already have incentives for youth to use transit. She also accepted the same for neighborhood, except very careful about the impact of what this can mean for each neighborhood and how it can influence gentrification. An unintended outcome could mean pushing people out of neighborhoods.

- Lynette – Agrees. Thinking about the cost of building out a neighborhood or transit-oriented city seems expensive – who ends up paying for that. The groups (youth, older, residents with mobility differences) benefit the least from the status quo.

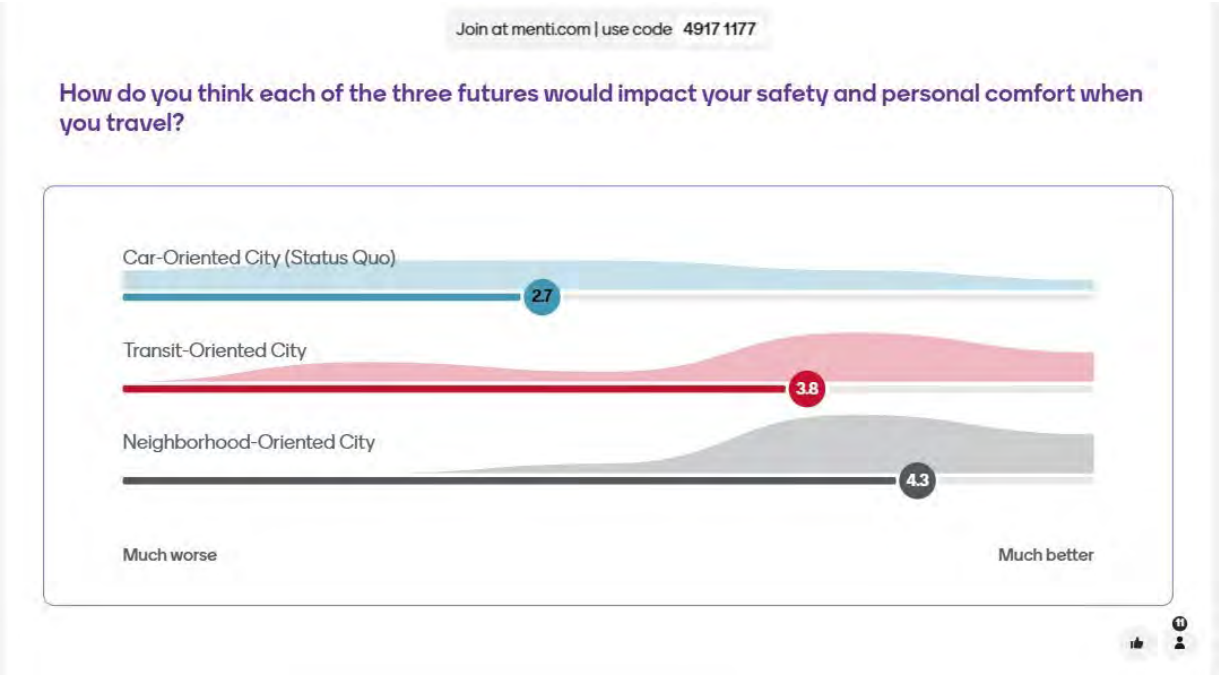


- Tracy – when you look at transit and neighborhood, sometimes you see more household deliveries because they can't leave the premises.

- Comment from John: There also a significant number of elderly that rely on friends / families to provide car transport to doctors appt. and other services.

Prosperity Question

Ability to Travel Question



- John: He and many employees with Children's Hospital use transit. Transit in the city limits doesn't help unless there's connectivity to other suburbs or cities. Transit often takes longer. Car-oriented helps him personally and the vast majority of his employees even though that's not the future that he wants to see.

- Modeling looks at the whole region

- Tracy – transit doesn't always go where I need it to go, especially in remote areas. In the extremes all of that would be in play

Safety and Personal Comfort

- John – Completely car-oriented would give maximum control of where you want to go and how you get there, but means a massive number of vehicles on the road. Can't control what others do in their vehicles – increase in congestion, accidents, fatalities, etc. Doesn't make you safer overall, but just your immediate bubble.

    - Leans to transit in the extremes.

- Lynette – Thinking of recent events and not having to drive in bad weather or deal with parking, would love to take transit to get away from those.

5. Milestone 2 Promotion Reminder (5 minutes)

6. Next Meeting – Jan. 8 - *Could shift based on Milestone 3 efforts* (5 minutes)

ROUNDTABLE DISCUSSION: SMALL GROUP DISCUSSION NOTES

Car-Oriented City

- What benefits do you see in a car-oriented transportation network for daily travel and economic activity?
- What are other considerations that should be considered if Aurora invests in this imagined future?
- Do you think the benefits of a car-oriented city outweigh the negatives?

Group 1:

Benefits:

- No waiting
- Leave whenever/schedule
- Packing your items with you
- Freedom/flexibility
- Privacy
- Longer distances?

Considerations:

- Age of driving
- Robo-taxis/AI
- Distance/proximity
- Limited land use
- Gas costs
- Maintenance
- Nighttime driving
- pollution

Group 2:

Benefits:

- Faster to move around
- Familiarity
- Ability to be spontaneous
- Convenient
- Independence
- Practical/Easy
- Already have the infrastructure

Considerations:

- Safety
- Congestion
- Emerging micro-mobility conflict
- Will need more parking
- Charging infrastructure

Benefits Outweigh Negatives?:

- No, not yet

Group 3:

Benefits:

- Autonomy to plan your own day
- Convenient and efficient if you have a car/carpool
- Easier to combine chain trips
- Take whenever you want
- Go beyond Auora
- Don't have to carry groceries
- Mix – park and ride still an option

Considerations:

- Safety measures and enforcement; plan for more vehicle volume
- Self-driving, future tech changes, charging for EV
- What would older adults choose? Self-driving cab, transit, accessi-ride
    - Voucher uber vs send bus for medical ride

Group 4:

Benefits:

- Control over schedules
- Self-centered model
- Bad for traffic environment
- Benefits for individual
- Convenience/Access
- Opportunities for innovation
    - Car sharing

Considerations:

- Disabled/cannot drive/older population
- Fear/hesitation
- Accessibility
- Combative driving
- Weather/bad sidewalks
- Increased populations

- Technology

Group 5:

Benefits:

- Control over transportation
- Feel safer than when on transit
- Control speed and get there faster

Considerations:

- Cost of upkeep
- Environmental impacts
- Density of land uses
- Growing population
- More congestion
- Need safer traffic laws

Benefits outweigh negatives?

- No
- Greenhouse gases
- Accessibility is a priority

Group 6:

Benefits:

- Cars are convenient and here to stay for older adults
- Accessibility concerns with transit

Benefits outweigh negatives?

- Yes
- Cars will be more energy efficient
- Need more bike and e-bike only areas
- Need to still design for all modes

Group 7:

Benefits:

- Faster speed/convenient
- Time/flexible
- Freedom
- Goes where buses don't

Considerations:

- Could take money away from transit
- Would need to update street systems
- Car tech rapidly evolving

- Suitable for less dense areas
- Carpooling with those who can't drive

Transit-Oriented City

- How could a transit-oriented approach improve or change your daily travel experience?
- What types of transit services or features would encourage you to use public transportation more often?
- What challenges might arise when trying to implement a robust transit network?

Group 1:

How could a transit-oriented approach improve or change your daily travel experience?

- Travel experience
- Slowing down
- No longer the driver

What types of transit services or features would encourage you to use public transportation more often?

- Accessibility
- Safety
- Free
- Build it underground
- Coffee shops/boutique stores
- 1 bus trip
- Events/concerts

Challenges:

- Strict time schedule
- Safety
- Homeless population
- Cleanliness
- Private highways (E-470) and rapid development

Group 2:

How could a transit-oriented approach improve or change your daily travel experience?

- In a better transit-oriented city, faster by transit than by car

What types of transit services or features would encourage you to use public transportation more often?

- Free is good
- Reliable
- Frequent

- Safe
- TOD
- Accessible
- Comfortable
- Stops/stations weather protection

Challenges:

- Language barrier
- Cost (construct & operate)
- System legibility
- Political will

Group 3:

How could a transit-oriented approach improve or change your daily travel experience?

- More set schedule, planning required, less spontaneous
- Large service caps now
- Free and how it is funded

What types of transit services or features would encourage you to use public transportation more often?

- Public safety
- Better destination options
- Media, education, tech to navigate 1st/last mile

Challenges:

- Cost
- Incentivize/shift use
- May be more viable than neighborhood oriented

Group 4:

How could a transit-oriented approach improve or change your daily travel experience?

- Disability/aging population
- Affordability/faster access (lane dedications, bike and bus lanes)
- Expanded train service will attract
- They have to go where people want to go
- Air quality
- Increased traffic on major streets
    - Contributing to poor air quality
    - Traffic type on roads

What types of transit services or features would encourage you to use public transportation more often?

- Rail

    - More comfortable
    - Climate controlled
    - Expanded transit for disabled
    - Wi-Fi
- Safety
    - Make people feel comfortable
    - Vulnerable populations
- Challenges
    - Community buy-in and engagement

Group 5:

How could a transit-oriented approach improve or change your daily travel experience?

- Avoid traffic
- Save money
- Cost of living
- More equal
- Increased access
- Decreased traffic

What types of transit services or features would encourage you to use public transportation more often?

- More privacy – rooms
- Stations more frequent and comfortable
- Cleaner
- Access to information

Challenges:

- Costs
- Drivers and maintenance
- Infrastructure to support

Group 6:

How could a transit-oriented approach improve or change your daily travel experience?

- Would help with downtown traffic
- Parking is confusing

What types of transit services or features would encourage you to use public transportation more often?

- Accessibility
- Less transfers
- Less stops/quicker

Challenges:

- Cost effective solutions are difficult out east

Group 7:

How could a transit-oriented approach improve or change your daily travel experience?

- Greater penetration of transit into neighborhoods

What types of transit services or features would encourage you to use public transportation more often?

- Need access to more places (open spaces and parks)

Challenges:

- High density housing (good and bad)
- Need to force developers to put in essential services

Neighborhood-Oriented City

- How would a neighborhood-oriented approach impact your travel behaviors?
- What amenities or infrastructure would you prioritize to support a neighborhood-oriented approach?
- How might this imagine future affect economic opportunities and housing affordability in different parts of Aurora?

Group 1:

Travel Behaviors:

- Walking more
- More community based, connecting with neighbors
- Bike more
- Shorter trips

Amenities:

- Small local shops
- Wi-fi use
- Creativity spaces (like Rino in Denver)
- Gardens for fresh produce
- Shopping
- Children playgrounds
- Music, parks

Future econ opportunities:

- Sustainable impacts (solar, less gas), more desirable to live
- Hot pocket cultural blocks (distinctive neighborhoods)

Group 2:

Travel Behaviors:

- Walk to restaurants
- See our neighbors
- Kids' freedom
- Organic sense of community

Amenities:

- Better walking/biking infrastructure
- Safer crossings
- Places/infrastructure that is not on major arteries
- Better zoning to encourage smaller businesses
- Common gardens
- Density supports economic investment

Group 3:

Travel Benefits:

- More apt to walk/bike with good priced fun – convenience
- More focus on local businesses
- Time savings, slow down, European model. Show public new model.

Amenities:

- Infill vs new development
- Wide sidewalks
- Green space
- Lighting, safety, comfort
- Seasonal use based on weather

Future econ opportunities:

- Housing, encourage density
- Community building land uses

Group 4:

Travel Behaviors:

- Walking more
- Increased community/socialization
    - Consider personal safety
- Disabled—how to get around

Amenities:

- Ice cream/food/fun
- Urgent care/safety

- Sidewalks are well lit and consistent
- Lighting/perceptions of safety
- Bike racks/small golf carts
- Public art

Future econ opportunities:

- Dense housing/less expensive
- Noise complaints rise
- Police enforcement/transit police
- Increased small businesses

Group 5:

Travel Behaviors:

- Reduce long distance
- Walk more
- Healthier
- Build community

Amenities:

- Wider sidewalks
- Smaller roads
- Redevelop areas
- Grocery stores and hospitals
- Recreation centers and parks
- Schools

Future econ opportunities:

- More affordable
- Get a job easier

Group 6:

- Need to maintain parking ability
- Concern taking out or repurposing lanes
- Market will drive conditions
- Like neighborhood feel
- Interest in areas that support events

Group 7:

- Services closer to where people live
- Easier to cross major streets

Final Round of Discussion

- Are there key elements from each scenario that you feel should be prioritized, regardless of the chosen direction?
- How might each imagined future impact the identity and character of Aurora?
- What potential unintended consequences should be considered for each imagined future?

Group 1:

Question 1:

- prioritize safety
- affordability
- centralized
- trustworthy transport

Question 2:

- unified community
- uniqueness
- friendliness

Question 3:

- weather disasters
- breakdowns of infrastructure
- language barriers

Group 2:

Question 1:

- Affordable housing
- Density that supports small/neighborhood-oriented businesses
- Construction defect reform
- Mixed use neighborhood
- Mix of housing types
- Walkable schools

Question 2:

- COC: no change
- TOC: attract younger people, make immigration transition easier
- NOC: more social, more vibrant

Question 3:

- Political Will

Group 3:

Question 1:

- Safety, accessibility, technology, community vision, buy-in

Question 2:

- Not under shadow of Denver
- Small town feel
- Protect quality of life
- Prevent overcrowding
- What are planned demographic change
- Protect environment, open space, air
- Integrate people, places, culture

Question 3:

- Too dense, but still want vertical
- Different desire across generations
- Where does funding go
- Affordability

Group 4:

Question 1:

- Safety
- Disability access
- Affordability/budget/cost
- Weather/sidewalk health
- Beautification/community art
    - Creativity through grants
- Open spaces

Question 2:

- How we define it
- Neighborhood/transit approach could change perception
- Big city operating as a small city
- Generational perception
- Better infrastructure will bring more transits
- Language barriers
- Driving intelligence and changes

Question 3:

- Cultural enclaves
    - Pockets of communities
- Increased population
- unaffordable

Group 5:

Question 1:

- community, equity, safety, timeliness, accessibility

Question 2:

- more unique
- more friendly and community-based
- more trust in transportation

Question 3:

- construction
- costs
- land impacts

Group 6:

- need to support all modes
- roundabouts
- crashes
- neighborhood feel would be improved w/ neighborhood scenario

Group 7:

- need a “main street” in Aurora where you could park once and walk/bus to a lot of different places
- require diversity of land use
    - one size doesn’t fit all
    - example: Fallbrook, Nebraska
- peaks and valleys of density (good)
- access to open space
- access to key needs close by
    - grocery store

GIFT CARD WINNER

A random drawing of survey participants was conducted to select a gift card winner at the end of the Virtual Town Hall. The winner was sent their gift card via email. The winner was Ella G.

MAP COMMENTS

Latitude	Longitude	Address	Category	Comment
39.6093210037681 4	- 104.711020588874 82	5850 South Southlands Parkway, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118492	Bicycle	Connecting the path along the new housing developments to the path along Southlands Parkway in the mall, and upgrading the cycle lane to a cycle track in the mall for safety would make taking a bicycle or walking to the mall a much more attractive option and make the mall fell more connected to the community. Possible implementation pictured.

				 Image link

39.6161356506790 1	-104.696883202123	5550 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118525	Car	This is a worthless and pointless intersection. Very little traffic on Alexander (which was NEVER supposed to be a major connector according to the original 2000-2005 master plans). The important intersection is Orchard/Harvest which according to that plan was supposed to be an important connector (2 lanes each way without residential neighborhood traffic) connecting Aurora Parkway and Harvest. This traffic light should be removed.
39.6090738657929 65	-104.696599948802 06	South Powhaton Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118526	Car	There should be a traffic light here. This was supposed to be a major intersection according to the 2000-2005 master plans and was supposed to connect to the entrance to the Aurora Reservoir on the east but was never done. The 3-way stop is dangerous and confusing. The road should be completed to the east to connect to the Aurora Reservoir entrance and a stop light put in to replace the 3-way stop signs.
39.6164001286210 2	-104.698144906433 3	5550 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118527	Bicycle	Original plan in 2005 was for bike paths from neighborhood trails to the west to connect to the Aurora Reservoir trails. 20 years later, nothing has been done. Need to complete the connection of bike paths to the Aurora Reservoir path.
39.6301951025618 1	-104.697540878987 65	4605 South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118528	Bicycle	Bike paths were supposed to be installed to connect east from the Tollgate Crossing paths to the Arapahoe County fairgrounds and the Aurora Reservoir. This still has not been done. Instead we have a worthless trail the County put in along the Xcel power lines from Gun Club to Quincy that doesn't connect well so no one uses it. High quality bike path needs to be installed to connect east to the Aurora Reservoir.

39.623699170449774	-104.71725083130879	5101 South Gun Club Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118529	Bicycle	Many years ago, the County and City planned for a bicycle/pedestrian overpass at E-470 and Belleview to allow trails to connect to the County bike path on the west side of E-470 and the Copperleaf subdivision. In the transportation master plan circa 2010 this was given high priority but nothing was ever done. If a bike/pedestrian overpass was put in, would allow much better bike transportation from neighborhoods east of E-470 with the trail along E-470 as well as access from neighborhoods to the west with the Aurora Reservoir, middle school, fairgrounds, etc. AND improve safety as Gun Club and Quincy are very dangerous for bike traffic.
39.616282765972887	-104.68944811807887	25400 East Alexander Drive, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118530	Car	The dead end here is really absurd - this should connect to the entrance to the Aurora Reservoir, as was originally planned (from Orchard/Harvest to the east). Neighborhoods to the south and west have to travel all the way north to Quincy and then around to Powhaton and then south again to enter the reservoir by car. This road was put in not for good planning or logic but just as a cheap fix. Spend some money to connect to the entrance and do it right, as you promised would be done nearly 20 years ago.
39.638386659826335	-104.69877254956374	24805 East Quincy Avenue, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-118531	Car	Quincy should have been widened to 4 lanes divided highway from Gun Club to at least the Aurora Reservoir entrance at Powhaton many years ago, especially when the Quincy/Gun Club interchange project was done. This narrowing of Quincy to 2 lanes is an embarrassment to Auroa as we saw when the 2015 Rocky Mountain Air Show disaster occurred. The traffic nightmare caused by poor city planning caused Aurora to lose millions of dollars in future revenue that we could have had... Time to do it now. People will die in accidents if you don't spend money to widen it NOW.
39.610178138575006	-104.68414592716728	25941 East Orchard Drive, Aurora, Colorado 80016, United States http://engageaurora.org/connect	Bicycle	Aurora reservoir bike path was supposed to be extended many years ago to connect to the west with Harvest/Orchard and then go north along Harvest to Belleview and the east again to connect back to the reservoir bike trail. This would provide a valuable recreational resource to the several thousand people

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-118532		living in the neighborhoods to the west of the Aurora Reservoir.
39.657083822481689	-104.84489011178314	I 225, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119281	Pedestrian/Mobility Device	The bike path connects to downtown Denver, Golden, commerce city. This it is very important that any bike path system in Aurora MUST connect to this already established network of bike paths that do not cross any roadways or highways
39.6577534039266 8	-104.84566211160134	I 225, Denver, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119282	Transit	The light rail connects to Golden, the airport, downtown denver. Any bike path or alternate transportation should connect to this already established railsystem. It would be great if one could exit a plane and take a train to Aurora southland or highlands or south Havana steet.
39.6676143636604 05	-104.86194494697195	11000 East Yale Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119368	Bicycle	This is a really terrible intersection or bicycles. I have been hit by a pickup truck while in the crosswalk by a pickup truck that was turning right from Yale westbound to Parker northbound. This is a really scary place and I try to cross in the car lanes when I can because the pedestrian crosswalk is so dangerous.
39.6675771997997 1	-104.86365066815787	2719 South Parker Road, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	The bushes overlap the sidewalk making it hard to ride a bike here

		location?reporting=true#marker-119369		
39.674753582835415	-104.82795408461627	14001 East Iliff Avenue, Aurora, Colorado 80014, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119375	Pedestrian/Mobility Device	Poor Visibility for pedestrians at and around the on ramps here
39.756886601928926	-104.81946229934694	2731 Sable Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119376	Car	Modifications to intersection increasing close calls and danger of intersection your ADA compliance does not imply make it worse for everyone else.
39.682639165962444	-104.783680560399	1853 South Sedalia Circle, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119757	Pedestrian/Mobility Device	There is no pathway at this location, although students from the nearby schools often use it to access the neighborhood. A fence blocks access to this area except for a 4 foot wide opening, which itself is blocked by a deep ravine (about 24" deep) that creates a hazard and prevents access for disabled people. This property is owned by the city of Aurora. This would be a perfect place for a paved pathway that would allow access to the Powerline Trail from the neighborhood to the north.
39.682372644312315	-104.78551824219124	1897 South Pitkin Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119758	Pedestrian/Mobility Device	This area is a mess. On the map it looks like there is a pathway from the Powerline Trail to the paved trail through the townhomes to the north, but in reality the pathway is blocked by high shrubbery. Students from the nearby middle school have worn a path in the dirt, and have completed access by creating an opening in a fence. This opening, however, isn't sufficient for a wheelchair to get through, and barely wide enough for a pedestrian. Completing this walkway with a

				paved surface would allow much easier access for pedestrians.
39.684115621047	-104.78541970252992	1842 South Quintero Way, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119759	Pedestrian/Mobility Device	The dotted line on this map is a pathway worn in the dirt, mostly by students from the nearby schools. It allows access from Mrachek Middle School to the neighborhoods to the north, but is not paved. This runs behind my house and is used quite often by pedestrians, mostly students and occasionally by bicyclists accessing the Powerline Trail from E Mexico Ave. A paved pedestrian/bicycle trail would be perfect here.
39.682247349766875	-104.78151975964605	1888 South Telluride Street, Aurora, Colorado 80017, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-119760	Bicycle	This is an odd situation. The Powerline Trail, which is heavily used by bicyclists and pedestrians, crosses S Telluride St at this point which is a fairly heavily used collector street. There is no marked crossing at this location. However, about 300 feet to the north there is a marked Abbey Road type crossing and signage. Presumably this crossing is for students at the nearby middle and high schools, but it's actually farther away from those schools than the Powerline Trail crossing. It would make much more sense to eliminate the marked crosswalk at the nearby intersection, and replace it with a marked crossing and signage at the Powerline Trail crossing.

		location?reporting=true#marker-123350		
39.741662840848511	-104.79136884212495	Airport Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123402	Bicycle	As the earlier comment states a lighted underpass where the High Line Canal trail crosses Airport Blvd would be an amazing safety improvement. If that's not financially feasible a traffic signal would improve this crossing too. Traffic is often fast moving and thick on Airport so the current uncontrolled crossing is unpleasant and dangerous.
39.748716038461744	-104.7917926311493	2150 Airport Boulevard, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123403	Other	This is the only area in Aurora I ever see people riding horses, adding modal filters to this trailhead on Sand Creek Trail for pedestrians, bicyclists and horseback riders should help keep most unauthorized users (offroading trucks/ATVs ect.) out of the this recreational area and make it more attractive to authorized users while reducing noise for those living nearby.
39.764733601328883	-104.79616999626161	16358 East 33rd Drive, Aurora, Colorado 80011, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123420	Pedestrian/Mobility Device	No sidewalks on the north side of 33rd Dr
39.6099037259467	-104.69732522964479	South Powhaton Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123440	Car	The cars on Harvest Road and Powhaton Road are consistently going far over the posted speed limit of 40 mph. The drivers in this area drive with no regard for anyone outside of their own vehicle, and the wide roads with no traffic calming measures reinforces this driving style.

39.6260196294302	-104.69769001007081	South Harvest Road, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123441	Bicycle	Improvements to bicycle facilities needed along Harvest Road as the current unbuffered painted lane is right next to traffic regularly going over 40mph and dipping tires into the bicycle lane. Crossing the street is also fraught for those outside of cars and trucks. The current bicycle lane only serves to make the road wider for cars and encourage speeding.
39.609655759661685	-104.69271183013916	5903 South Jamestown Court, Aurora, Colorado 80016, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123442	Bicycle	A cycle and pedestrian path connecting Orchard Rd to Aurora Reservoir would be a boon to the area and help reduce the current disconnected nature of the cycleways in Southeastern Aurora.
39.7523372243077	-104.67721939086915	East 26th Avenue, Aurora, Colorado 80019, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123443	Transit	Developing the remaining unpaved sections of Powhaton Rd into a straight line up to at least 64th Ave and maintaining at least one lane in each direction for transit could address Northeastern Aurora's gap in transit in a meaningful way. It could also ensure those in Aurora who live right next to the airport wouldn't be required to drive and find parking in order to use/work at the airport if that potential bus route then used Jackson Gap St to access the airport. It would also make it an attractive route for those cycling to the airport from these neighborhoods, as a straight shot without being a meandering cycleway that makes them have to go farther to go the same distance.
39.7291055376578	-104.6773910522461	26500 E 10th Ave, Aurora, Colorado 80018, United States http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Transit	Building the sections of Powhaton Rd that are being redeveloped into a straight line up to at least 64th Ave and maintaining at least one lane in each direction for transit could address Northeastern Aurora's transit gap in a meaningful way. It could also create transit to the Airport from neighborhoods that are currently restricted to driving.

		location?reporting=true#marker-123445		
39.685970867914336	-104.78307008743288	17591 E Oregon Pl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123533	Bicycle	The intersection of Mexico and Telluride is heavily trafficked by walking students and is an intersection of bike lanes. Creating safer intersection for all users and a buffered cycle track next to the sidewalk on the south side of Mexico/Uravan would reduce conflicts and make for a safer more pleasant environment. It could also be an education opportunity for interested students as Mrachek Middle and Rangeview High School on Telluride by inviting their input/involvement in the process.  Image link
39.650141014397773	-104.78551089763643	17292 E Jarvis Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123646	Pedestrian/Mobility Device	The sidewalk is overgrown on the west side of Richfield St north of Kenyon Dr.
39.607647200022222	-104.71147656440736	Best Buy, 5999 S Southlands Pkwy, Aurora, CO, 80016, USA	Transit	Best Buy's old location in Southlands seems like a good spot for a transit center for the underserved southern Aurora and northern Parker area. It has potential to allow for a grade separated route along

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123670		the tollroad connecting to the airport, is close to a lot of new development and could even serve as a location for a cycle and foot bridge across the E-470 connecting to the High Plains Trail and Saddle Rock Markeplace. As an further incentive for Southlands the old Office Depo and neighboring empty Southlands lots could be upzoned to TOD, allowing them to build a tall building with storefronts on the bottom level and apartments or lofts on the upper levels. Before RTD is ready to redevelop the site they could rent out the existing building (maybe to a bunch of small local vendors so that RTD can use parts of the building for itself still?) so that it brings them income in the meantime.
39.607105788174444	-104.70966875553131	23864-23894 E Orchard Rd, Aurora, CO, 80016, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123695	Bicycle	While there is a bicycle lane on Southlands Parkway it does not connect to most of the mall, and is a stripe of paint as protection from multiple lanes of traffic. Turning that bicycle lane into a cycle track and better connecting it to the rest of the mall while possibly adding some traffic calming along longer straight segments of the parking lots would be an improvement. Part of possible implementation pictured.  Image link
39.708569171563106	-104.81907337903979	14555 E Centrepoint Dr, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Transit	If there is ever funding available to grade separate the rail through the Aurora Transit Center such an opportunity should be jumped on. Not only would it reduce conflicts with cars and pedestrians it would also be a chance to making the turns less sharp so the train wouldn't have to to tip toe through this section and be an opportunity to make a better

		location?reporting=true#marker-123697		station for passengers with protection from the elements and some form of ticket gates. This would also create an opportunity to create better bicycle facilities along Exposition, Sable and Ellsworth by freeing up a bit of ground along the right of way.
39.7111979365952 9	-104.819094836711 91	E Alameda Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123698	Transit	As pedestrian crossing at Alameda and Sable is unpleasant enough just contending with cars having the train tracks grade separated at this intersection would be wonderful.
39.7033195953672 6	-104.828426241874 71	685-753 S Abilene St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123700	Transit	Grade separating this rail line to allow for a much more gradual tun (through the location of the Wallmart parking lot) would improve the train's speed and functionally in addition to eliminating conflicts with cars and pedestrians along this stretch.
39.7041656625533 86	-104.865934252738 97	S Havana St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123701	Pedestrian/Mobility Device	Havana is not a pleasant street to cross, and for those with mobility issues it is very difficult to cross. An underpass where the High Line Canal Trail crosses it would be appreciated.
39.6711613558891 2	-104.865869879722 61	S Havana St, Denver, CO, 80231, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	The slip lane connecting northbound traffic turning from Parker Rd to Havana is exceptionally fast, unnecessary and dangerous to pedestrians and cyclists. Replacing it with a turn lane would be an improvement.

		location?reporting=true#marker-123702		
39.675946822870 74	-104.780044555664 08	2209 S Telluride Ct, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123703	Bicycle	Creating a protected bicycle lane or cycle track along Telluride St from its intersection with Mexico Ave to the intersection with Tower including protected intersections at Iliff and Tower will create a safer environment for the students of the four schools along this stretch and better connect the schools to their surrounding neighborhoods and the nearby Recreation Center to which children already ride their bicycles and scooters despite the lack of a safe way to do so. Interested students could be involved in the process, possibly fundraising to speed up implementation of parts of the infrastructure. It would also be an opportunity to introduce traffic calming infrastructure along Telluride to slow the speeding traffic.
39.634828070249 66	-104.787704944610 61	S Pitkin St, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123704	Bicycle	Pitkin St between Quincy Ave and Wagontrail Parkway could use some bicycle lanes/cycle tracks and traffic calming as it is a wide street with room for bike lanes that connects two areas heavily used by those on bicycle, but is currently a magnet for speeding. The intersections along Pitkin could also use better lighting to ensure drivers can see pedestrians and cyclists.
39.638868340012 12	-104.797339439392 1	4257 S Naples Way, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123705	Bicycle	Please extend the West Toll Gate Creek Trail south to Pheasant Run Parkway, including an underpass at Quincy. This could be developed as a relation to the future park site along Quincy near the proposed underpass. As I have witnessed the aftermath of cyclists getting hit by cars along Quincy it is not a street I feel safe cycling alongside yet that is where the mixed use path ends.
39.638719622609 51	-104.825009107589 72	14055 E Quincy Ave, Aurora, CO, 80014, USA http://engageaurora.org/connect	Car	Quincy Ave's current wide straight design encourages speeding, and there is frequent speeding leading to cars crashing into fences, walls, and people. Whatever traffic calming measures are possible for this street should be implemented in

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-123706		addition to incentivizing and improving transit options in the area and safety for pedestrians and cyclists.
39.650739914168466	-104.77248072624208	S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123707	Bicycle	Please implement a protected intersection at the Jefferson Ave & Tower intersection as it is frequented by pedestrians, cyclists and skateboarders, especially shortly after Horizon Middle School gets out. This would also be an opportunity to involve students from Horizon Middle in the process since they are frequent users of the intersection.
39.650772956763422	-104.77119326591493	3594 S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123708	Bicycle	A protected bicycle lane on Jefferson Ave leading to Tower would be appreciated.
39.638694836344644	-104.78010356426244	17852 E Purdue Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123715	Pedestrian/Mobility Device	There is pretty much always debris on the stairs connecting the sidewalks of Quincy and Purdue just east of Uravan. The drainage ramp next to the stairs also invites cyclists and others on wheels but is at an angle that can create a speed issue when joining the Quincy sidewalk and trying to keep out of the street for some as there is no buffer between the sidewalk and car traffic.
39.638480021677008	-104.77693319320668	E Quincy Ave, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123717	Bicycle	Creating a buffered cycle track along Quincy at Quincy Reservoir (moving the fence back would make room for one) would be a huge safety improvement for the many cyclists in the area. It would also improve safety and comfort for pedestrians.

39.6385812325170 3	- 104.776694476604 48	E Quincy Ave, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123749	Pedestrian/Mobility Device	Improving the crossing on Quincy at Summit Elementary, moving the sidewalk back from the street and separating pedestrian and bicycle traffic into the sidewalk and a cycle track would greatly improve safety for students and their parents/guardians. Planting some trees in the verge created by buffering the sidewalk from the street may help slow down car traffic as it passes the school due to the visual indication that the way is narrower.  Image link

39.712724001531112	-104.86587626561987	160-170 S Havana St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123770	Pedestrian/Mobility Device	Close the short gap in the Westerly Creek Trail between Expo Park and Lowry Wetlands. Signage at both ends, improved crossing for Alameda and Havana, improved sidewalk (and plowing), and put a ped-friendly gate/passage in the fence -- if we can walk the perimeter trail from the inside, why can't we cross between the street and the trail? And why not close this short gap in an otherwise decent trail?
39.697149793284115	-104.86038170553574	11083 E Mississippi Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123771	Pedestrian/Mobility Device	Crossing Mississippi here is far more risky and difficult than it needs to be. Most of the other street crossings are off-grade (even if they need to be brought up to ADA standards), but this one is not. It is among the most dangerous/difficult streets to cross along Westerly Creek and is one of the only crossings that is at-grade. Why are neighborhood streets off-grade but this one is not, and how can we make it so all street crossings are off-grade?
39.689851376003745	-104.84712198779329	12102 E Florida Dr, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123772	Pedestrian/Mobility Device	The trail crossing at Florida/Peoria is at-grade, while most other crossings (except Mississippi) are either off-grade or on quieter streets. This intersection is a little 'easier' than the Mississippi crossing, but does need to be taken below-grade. Peoria is a busy street and Florida is no slouch. Having an off-grade option would greatly improve general safety, and would make it much more appealing for neighborhood residents to let kids walk/roll to Village East, would give older students a better way to get to/from the rec center and Overland High School, etc.
39.683448767150062	-104.83982852437917	12950-12978 E Colorado Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	This trail is marked as public on maps, but on the ground it is just an informal trail worn into the ground by foot traffic. It is not maintained in winter. Either it is or it is not a public trail. Move the trail to the north side of the ravine so the sun can help warm/clear it in winter, and improve it to

		location?reporting=true#marker-123773		standards for a 6' multi-use trail, and include a small trailhead / 'landing space' on both ends.
39.686060928688306	-104.83494743351831	1675 S Victor St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123774	Bicycle	I love Jewell Wetlands and want to keep it preserved as an intermittent wetland. It is a valuable double-duty green space and flood infrastructure. But there is an issue/question. What is the route we are suppose to take when moving between somewhere like Overland/Prairie, Utah Park, or adjacent areas and the train station at Florida Station? Or the Medical Center? A signed route around or through the wetlands would be fantastic, right now it's unclear and ad hoc and often feels a bit awkward if the Wetlands are part of your route rather than your destination.
39.6651454635855	-104.84059730622553	12432 E Amherst Cir, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123775	Transit	Two issues in this 'corner' of the city. How do neighborhood residents get to/from Nine-mile Station without a car? And how do people who need a bus/train from Nine-mile get to/from destinations on Westerly Creek Trail? If the trail can't continue as a trail, can it continue as a marked multi-use sidewalk between the current trail terminus at Yale and Nine-mile Station? There seem to be trails internal to each 'block' in this development/neighborhood. Can something similar be organized that would serve to move traffic from this neighborhood to the trail and to Nine-mile without having to take a circouitus run-around?
39.72068165739434	-104.81862732284624	291 N Dearborn Way, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	A ped/bike friendly improvement/connection between the trails here, with signage guiding people along the route where it runs along streets. Right now the walk/roll option to transit between these two options takes you a couple miles past city hall and around DeLaney Farms. Why not a marked multi-use sidewalk route between the two?

		location?reporting=true#marker-123777		
39.708745549062116	-104.8050576758265	High Line Canal Trl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123779	Pedestrian/Mobility Device	1 - the canal and creek trails have a terrible intersection insofar as signage and ADA are concerned, can we shift the Canal trail off-street (off the sidewalk) onto a separate bridge with a current-standards intersection to the creek trail? This mess is a trick even being able bodied and knowledgeable about the area, it needs improvements in the worst way. 2 - Connection to the trail/creek thing to the east (that is, can we connect Centrepointe Park, Global Village Academy, and the DeLaney Farm areas along the street here?
39.713159212493777	-104.80034538620073	High Line Canal Trl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123780	Pedestrian/Mobility Device	I don't remember off-hand if this creek segment is a trail. Why not close the gap across this space with a multi-use trail (if there isn't one already)?
39.683448218995866	-104.79903512325379	16206 E Utah Pl, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123781	Pedestrian/Mobility Device	Is there an option to use the greenspace adjacent to Jewell & Potomac & 225, and the T-intersection to the east (Jewell & Abilene) to put in a ped bridge or tunnel?
39.744615699654117	-104.8814922413785	1745 N Beeler St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	This short gap in the trail along Westerly Creek needs to be closed. If it can't be a proper trail, could we do some traffic calming circles or diverters, speed cushions, etc. to turn this into a signed/improved connection between the two longer trail segments? This would go a long

		location?reporting=true#marker-123782		way to improving multi-modal recreation and transportation in the neighborhood. This should cross Colfax in a way that is in proximity to a BRT station, that would be a proverbial "two birds with one stone". Right now, driving is the only practical option in the immediate area of Colfax/Montview and Westerly Creek. Improving a trail connection and making it accessible to the new BRT would retain the option to drive while empowering other modes in safe & practical ways.
39.762499076786 28	-104.852398089535 13	3251-3385 Nome St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123783	Pedestrian/Mobility Device	A walk/roll route between Peoria Station and Sand Creek Trail (and Anschutz) would be fantastic. Right now it's sketchy, both on street and getting from the street to/from the trail. And once on the trail you are routed a decent distance out of your way to cross the creek, if your destination is south of the creek.
39.757225161494 59	-104.830606390123 14	3008 N Wheeling St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123784	Bicycle	Walk/roll bridges across Sand Creek are desperately needed. What good is a trail if I can see it 100 meters away across a creek, but have to travel a mile or more to reach a destination only 100m away? The trail is great, but access points are desperately lacking.
39.757104340591 525	-104.819333561826 55	3000-3198 Sable Blvd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123785	Pedestrian/Mobility Device	Agreeing with the person who posted the orange 'car' pin. The intersection is crashes waiting to happen for cars and nearly unusable for anyone on the trail. For the intersection, a stoplight or all-way stop would help prevent backups on 29th that are tens of cars long. Left turns are particularly rough.

				For trail users, crossing Sable here is all but impossible with even modest traffic. There is ample space under the bridge (along the creek) for an underpass. Drop the trail crossing off-grade. Consider Sable Elementary just south of here, and running a trail spur or multi-use sidewalk south to the campus so parents and/or kids can walk or roll to school.
39.7545972757140 5	- 104.822681350244 18	2590 N Billings St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123786	Pedestrian/Mobility Device	Run a short trail or multi-use sidewalk between Cottonwood Park and the school campus, either between properties if homeowners are amenable, or along 25th and/or 26th. There is no reason someone living on Zion shouldn't be able to schooch down to the park, through the park on foot or bike, and then to school. And to do so without taking the risk of being on bike/foot along a busy street. Add a similar multi-use sidewalk connection along Billings between the ditch and the creek as well, with proper trailheads/ramps to/from the trails on both ends of this segment of Billings so families can close the last hundred-odd meters in an otherwise perfectly amenable walk-roll route to/from school and the park. Of course cars need to retain access, but it is silly that we would de facto require someone to drive when there are other options for such a short trip, building a safe and practical multi-use sidewalk along Billings and 25th/26th would be a very inexpensive way to turn this into a wonderful mutli-modal neighborhood without having to remove a single parking spot or do any sort of intrusive construction. A traffic circle or two along this bit of Billings would help discourage rat-runners trying to make a 'shortcut' and improve safety even further without hindering local vehicle or foot traffic.

39.754647194888 41	-104.775125968316 12	17953-18003 E Smith Rd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123787	Bicycle	How involved would it be to run a ped/roll underpass to carry the High Line Canal Trail under the tracks and under Smith Road? I'm not tagging most of the Canal street crossings as most are in a long-term plan by the Conservancy, but this particular stretch is not appropriate to have along Tower -- a challenge that is compounded by the combination of industrial land use, rough/dangerous street crossings or parallels, and the fact that the tracks are difficult to cross with most bikes and are private property to boot. A long trench with underpass portions at the streets and tracks would be a wild improvement. The wonderful new bridge to take the Canal across I-70 will increase walk/roll traffic in this Canal segment significantly. Note: an alternative to a trench-tunnel combo here would be another long pedestrian bridge similar to what is over 70. This (bridge) may be easier, and may be preferable: it would avoid disturbing the tracks and weight-related engineering for heavy trains, and it would allow design to bypass the private property concerns by placing the supports on Canal property outside the track ROW. Whether a tunnel or a bridge, place the on-ramps north of 28th and south of Smith.
39.744486921632685	-104.784676212206 86	17594 E 18th Pl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123788	Pedestrian/Mobility Device	Why: (1) is there no practical foot path between the two developments/properties here? And (2) Sand Creek Trail is on the north side of the creek here and these dozens of homes have zero access to it. That is ridiculous. If private property/ownership issues prevent a decent foot path between the two developments, can each at

				least get a walk/roll bridge across the creek to Sand Creek? Or, alternatively, a second segment of trail on the south side of the creek with at least one crossing to the north side?
39.740534331908485	-104.7890993740861	High Line Canal Trl, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123789	Pedestrian/Mobility Device	How do the homes north of Colfax here have no decent connection to the Canal? I believe improved crossings for the Canal to cross Airport / Colfax is in the mid-term future plans, but is there a safe multi-use path connection to/from the trail to the two developments that are literally adjacent and yet effectively risk their lives to access the trail? This is an easy fix, how is it still an issue decades later?
39.7729212227079	-104.82845074861191	I-70 W, Denver, CO, 80239, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123790	Pedestrian/Mobility Device	A walk/roll connection to move people across 225 and 70 would go a long way to making this area slightly better to live in and move through. Even a connection just between 32nd to 42nd and a way to cross east/west over 225 on each side of Smith would solve a lot of problems (eg. a ped/roll bridge connect 32nd, and another connecting 35th/39th). This area won't be a pedestrian haven anytime soon, but that doesn't mean we have to make it hell on earth, either.
39.693613235774606	-104.83145882350229	1300-1318 S Potomac St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123791	Bicycle	Going south of Florida Station on foot/bike isn't too bad, and east over 225 and along Florida is doable. But north to where the shops/etc are (at Mississippi & Potomac) is no fun, and there is no dice going west through/beyond the medical center.
39.68950514497286	-104.80675888076209	1415-1499 S Idalia St, Aurora, CO, 80017, USA	Pedestrian/Mobility Device	All the myriad neighbors along this stretch have no access to the creek trail. Why isn't there a walk/roll bridge (or several) providing access to the trail? Forcing people to walk/bike out to a busy street to get

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123792		on the trail is silly, especially considering everyone on the east side of the creek has several trailheads. If the city purchases just two properties in parallel to Florida when they go up for sale at some point (even if a decade or three from now) that would be a great additional trailhead for the neighborhood but, more importantly, a way to provide access across Chambers for the schools and parks there, and to connect that bike lane (on Florida) all the way from the light rail to the creek trail and points east. That said, there may be enough contiguous neighbors willing to sell 3-5 feet of their properties for a little footpath to close that bit of walk/roll opportunity along Florida.
39.6825694820689 2	-104.791051728573 65	S Buckley Rd, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123793	Pedestrian/Mobility Device	An underpass for walk/roll traffic to cross Buckley would be a massive boost to increasing multi-modal transportation as well as improving options for general recreation. Schools to the east and trails to the west, destinations along Buckley in the shopping center.
39.6825027139135 6	-104.800986809523 69	Horseshoe Park, Aurora, CO, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123794	Pedestrian/Mobility Device	There is literally a multi-use trail running east/west here on both sides of the creek...and no bridge over the creek. This is a stupidly simple fix, how did we go this long without having a bridge here?
39.7303579555221 94	-104.842269251111 49	875 N Revere St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	Hoffman Blvd is a very good potential walk/roll connection between Tollgate Creek and High Line Canal, as well as the high school /elementary school right here, Del Mar Park, etc. The current "bike lane" is not productive in its current form.

		location?reporting=true#marker-123795		And to the south of Del Mar Park, an improved connection to the High Line Canal is desperately needed.
39.726068728436076	-104.84690701950505	Metro by T-Mobile, 606 Peoria St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123796	Pedestrian/Mobility Device	Connecting the segments of neighborhood inside Del Mar Circle is needed. Being at the park, pool, etc. and want to walk over to grab a bite? Have fun crossing 6th and navigating along Peoria, across the sidewalk, etc. Or if you live in one of the homes/apartments inside the circle, why should you feel as though you have to drive for even something as simple as taking a walk in the park that is literally across the street, or the Canal immediately south of the park? Or over to Hoffman Park if you live in the s/e quadrant of this circle? Sure, people may need to drive to the King Soopers, etc; cars aren't going away -- but if I want lunch or something, the only 'safe' option right now is to drive literally across the street, and that's silly.
39.7493009069629	-104.8292048656231	2204-2254 N Fitzsimons Pkwy, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123797	Bicycle	Tollgate Creek Trail passes campus for a significant distance around the perimeter of the campus. Why no trailheads? And why no simple, safe connection between the Colfax Station and the Trail, and a simple/safe connection between Fitzsimmons station and the (Sand Creek) trail? Take the R to both stations and try to get on/off the trails, neither is practical. And neither is getting into/out of campus from either trail.
39.751166080327225	-104.82662948530313	I-225 N, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123798	Pedestrian/Mobility Device	Is there an option to cross I-225 here connecting the trails on both sides of the freeway? There is a corridor on both sides but no way to connect between them.

39.576395436622225	-104.73643183708192	State Highway 470, Aurora, CO, 80016, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123799	Bicycle	Please update the bicycle infrastructure guidelines so that new roads fit current best practices. With (new) roads that have more than two lanes or a speed limit over 40 requiring a setback cycle track and sidewalk at implementation to improve safety and connectivity for all future users. This also creates a verge which can be planted to create a more attractive streetscape.
39.740392363609666	-104.84566211700441	12111-12117 E Colfax Ave, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123866	Transit	Hope Aurora works with RTD to get the planned BRT line on Colfax to at least reach the Anschutz Medical Campus with a proper dedicated bus lane.
39.740429488276778	-104.84684228897096	1514 N Peoria St, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123867	Pedestrian/Mobility Device	The slip lane at Peoria and Colfax ought to be just fine as a turn lane, this would ensure cars are not zipping through the crosswalk at such high speeds while the pedestrians have the right of way, shorten the total crossing distance and be a chance to add a bicycle track on a section of Peoria.
39.754774612376586	-104.84689056873323	N Fitzsimons Pkwy, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123868	Pedestrian/Mobility Device	The dangerous slip lanes at the intersection of Peoria with Martin Luther King Blvd/Fitzsimons Pkwy really need to go. This entire intersection needs a redesign to make is safer for those outside of cars and seems to be an optimal spot for implementing a protected intersection given the proximity to mixed use trails and a light rail station.
39.761018221495118	-104.84694957733154	3114-3116 Peoria St, Aurora, CO, 80010, USA	Car	It's great that Peoria narrows down to two through lanes in each direction as it goes south over the bridge, having it be six through lanes would only serve to make this corner of Aurora more loud and

		http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123869		dangerous for everyone and encourage even more people to drive here as though it were a highway instead of a city street.
39.747445691266866	-104.84695225954057	Montview Blvd, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123870	Bicycle	Montview's paint buffered bicycle lane does not feel like sufficient protection from traffic along here. An upgrade to a cycle track with protected intersections would make the route safer and more inviting to more users.
39.740466612923991	-104.82861399650575	13681-13699 E Colfax Ave, Aurora, CO, 80045, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123892	Bicycle	A cycle track next to the sidewalk along the north side of Colfax from Peoria to Colfax station buffered from Colfax by a verge with protected intersection treatments at Fitzsimons Pkwy, Wheeling St, Aurora Ct, Quentin St and Peoria St would greatly improve the safety of cyclists. This would provide better transit connections, move pedestrian traffic that little bit further from car traffic, and reduce conflicts between pedestrians, bicycles and cars along this stretch making it more attractive to those who might otherwise be hesitant to ride a bicycle here.
39.738177222275334	-104.82825458049776	1368-1392 Potomac St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123893	Pedestrian/Mobility Device	A long stretch of Potomac St south of the substation appears to have room to buffer the sidewalk with a planted verge along the powerline easement, creating a much more pleasant environment for pedestrians than the current one. This sidewalk could be widened enough for use as a mixed use path or run alongside a bike track to provide improved and expanded access to Colfax station for everyone outside of a car.
39.648872981900375	-104.78234052658082	17800-17898 E Kent Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-	Pedestrian/Mobility Device	Please add a bridge connecting Toll Gate Creek Trail to Cimarron Elementary and Summer Valley Park for wheelchair and bicycle accessibility.

		by-location?reporting=true#marker-123897		
39.653383271859446	-104.73101377487184	22175-22497 E Hampden Ave, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123898	Bicycle	Paving a nice sidepath along Hampden at the Plains Conservation Center to connect to the High Plains Trail would make that trail accessible to more Aurora neighborhoods.
39.694251580109324	-104.81384038925171	14866 E Alabama Pl, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123899	Bicycle	A nice lighted mixed use path with grass or other plants on each side connecting Gateway High School to the Village Green Rec Center and Village Green Plaza would be a great connectivity and safety improvement for this neighborhood. Interested students from the school could be involved in the planning process and perhaps students could be involved in some trail maintenance long term as they are likely to be the trail's most frequent users and the first to notice any changes which may need to be addressed.
39.682428764524995	-104.80094432830812	Horseshoe Park, Aurora, CO, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123903	Bicycle	Please extend the finished portion of Powerline Trail across the creek, Chambers and Tierra Park.
39.689496277571002	-104.80492472648622	1451-1477 S Jasper St, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	Please add a bridge at Kingsborough Park connecting the two trails along Toll Gate Creek.

		location?reporting=true#marker-123904		
39.68353517530666	-104.8192584514618	1824-1856 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123957	Bicycle	Whatever can be done to add a bicycle lane on Sable between Mexico and Florida ought to be done for connectivity. This would be great for the students of Jewel Elementary & Gateway High, with the bike lane being a cycle track right at the schools to prevent people from parking or driving in it and make it safer for kids to actually use to get to and from school.
39.71843580806472	-104.80816483497621	15301-15413 E 1st Ave, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123958	Bicycle	Protected bicycle lanes or cycle tracks along 1st Ave to connect between the High Line Canal Trail and Toll Gate Creek Trail would help make the area more connected and accessible to those outside of cars.
39.7155638587384	-104.80957567691804	2-80 N Chambers Rd, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123959	Bicycle	Since DeLaney Farm is City property adding a cycle track to the east side of Chambers along it shouldn't have too many barriers, and such a cycle track would greatly improve connectivity around City Center and to the Municipal Center and Aurora Metro Station.
39.708152356604394	-104.81966614723207	423-499 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123960	Pedestrian/Mobility Device	A pedestrian walkway over Sable Blvd connecting the mall to Aurora Metro Station would make using transit a more attractive option here. Would be even better if the train tracks were elevated to allow for a station platform only accessible to those with a ticket and to create a more gradual curve above the parking lots so that the train could move at a more desirable speed to and from the station.

39.7105706736616 7	- 104.799474477767 94	S Memphis Way, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123963	Pedestrian/Mobility Device	Please create a pedestrian/cycle path connecting the High Line Canal Trail to Alameda Pkwy where it intersects with Norfolk Way along this stream/drainage so that the space can be better utilized and appreciated by the community.
39.6792167701131	- 104.740905761718 75	21059-22009 E Jewell Ave, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123964	Bicycle	Extending Powerline Trail along Jewel to the High Plains Trail would make High Plains Trail more accessible, and help cyclists who don't want to risk mixing with the high travel speed of cars on Jewel as this stretch currently indicates cyclists are meant to try and ride in car traffic. This would also connect to Conservatory West Trail, Great Plains Park, and Dunkirk St which currently has bicycle lanes.
39.7194673698659 95	- 104.847249984741 23	Peoria St, Aurora, CO, 80011, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123968	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections, from Fitzsimons Pkwy, through Del Mar Park to Parker Rd at 9 Mile Station would create a safer and ore attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. This would also make it safer for students at Overland High and Prairie Middle School who commute by bicycle. In places where implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions to at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route more functional.
39.6968685079059 4	- 104.847174882888 81	1085-1101 S Peoria St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections, from Fitzsimons Pkwy, through Del Mar Park to Parker Rd at 9 Mile Station would create a safer and ore attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. In places where

		location?reporting=true#marker-123969		implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions for at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route even more functional.
39.68156178846517	-104.84723925590517	S Peoria St, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123970	Bicycle	Bicycle tracks along the sidewalks down Peoria with protected intersections at major intersections would create a safer and more attractive way for many to go to the grocery store and run other errands by bike while creating a better buffer from car traffic for pedestrians. This would also make it safer for students at Overland High and Prairie Middle School who commute by bicycle. In places where implementation would require acquiring a few feet of people's back yards perhaps some kind of perk could be offered, like lightening up on the restrictions to at home businesses to allow them to run a pedestrian oriented business if the homeowners are interested as this would also make this route far more interesting and a boon to private property owners along its route.
39.709724685014045	-104.82834577560426	359-359 S Potomac St, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123971	Bicycle	Instead of having the bicycle lanes on Potomac peter out just north of Nevada Pl they could transfer to cycle tracks that run up by the sidewalks through a protected intersection at Alameda, along Bicentennial Park and up to connect with the High Line Canal Trail where it crosses Potomac. This may require widening the ROW a little bit into some existing parking lots, but at least along the park the land required to make this upgrade is already in city hands.
39.711055564916634	-104.82681959867479	E Alameda Ave, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-	Pedestrian/Mobility Device	Crossing the bridge over the 225 on Alameda is a deeply unpleasant and unsafe feeling experience outside of a car. Creating a dedicated pedestrian and cycle bridge next to the Alameda Ave bridge on at least one side would make for a safer and less uncomfortable crossing experience.

		location?reporting=true#marker-123972		
39.6385874290942 65	-104.788187742233 29	4267-4309 S Pitkin St, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123973	Bicycle	The Pitkin & Quincy intersection is frequented by bicyclists and pedestrians and could use some alterations to make both more visible to cars as they approach. If possible creating a protected intersection to limit conflicts between users here would be preferred, though it may require extending the ROW on Quincy into two existing backyards and/or the grassy strip between the sidewalk and some signage by several feet.
39.6241892169988 9	-104.783982038497 94	17532 E Bellewood Cir, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123974	Pedestrian/Mobility Device	Making the sliver of path connecting the Smoky Hill & Richfield Bus Stop to Telluride St wheelchair accessible would be great.
39.6268955658792 95	-104.780511260032 65	4928 S Sedalia Way, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123975	Other	This dirt path along the drainage behind Meadow Point Elementary is frequented by motorcycle users, kicking up dust and making a racket for nearby homeowners. Some form of modal filtering to reduce this usage would be great, and paving the section of path between the existing paved path leading to the school and the point at which the path crosses the stream/drain would cut down on the dust issues.
39.6279243638688 5	-104.780371785163 9	17577 E Chenango Dr, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123976	Pedestrian/Mobility Device	The trees and bushes along this corner of Chenago & Sedalia are very overgrown, making the sidewalk completely inaccessible.

39.661341646323443	-104.75939154624939	Flanders Park, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123977	Other	There are many places (mostly in parks) where existing mixed use paths are not marked on the Aurora Bike Map, discouraging potential users. Updating the map to include smaller paths instead of only "regional" ones as well as keeping it up to date with new bike lanes may make more people feel comfortable riding as they can see more places where there is infrastructure for them when they check online.
39.657678512532044	-104.84508275985719	Nine Mile Station, Aurora, CO, 80014, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123978	Transit	If the city could annex the rest of the 9 Mile Station grounds and enforce rules to keep encampments out of those grounds it would make the station a much more appealing option for many.
39.668105750588112	-104.7590160369873	19712 E Villanova Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123979	Car	When people are parked on the curve of Flanders street leading to the intersection of Flanders, Vassar & Villanova it is very difficult for those headed west on Villanova to see when it is safe to cross the intersection, especially since it tends to be larger vehicles like trash trucks and a car hauler parked there. Perhaps extend the no parking zone along this side of Flanders street.
39.669223746178005	-104.77066218852998	18602 E Water Dr, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123980	Bicycle	There is a fence instead of a gate across this path. This seems to be a place where the city approved building a path that would connect to the sidewalk and bicycle path on Sterling Hills leading to the Rec Center, and then the property manager made it unusable. If this can be addressed it ought to. This would also be a good location to shift the bicycle lane to a bicycle track leading to the intersection with Tower for better cyclist safety through the busy intersection and connecting to the path under the powerlines along Tower.

39.672622011354896	-104.75428193807603	20089 E Dickenson Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123981	Pedestrian/Mobility Device	Please widen the paved path connecting Dickenson Place to Halifax Way by about a foot or so. It is currently to narrow to walk next to a wheelchair or pass bicycle going in the other direction without stepping off the path.
39.667763018861822	-104.765625	19053 E Linvale Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123982	Pedestrian/Mobility Device	Please pave and light the path between Tower and Flanders for wheelchair accessibility to the Unnamed Creek Trail pedestrian crossing to the Rec Center and the bus stop at Tower & Telluride. The current path runs through a bunch of prairie dog coteries and has many holes in it, turning it into a mixed use path would make it much more functional. A gravel or dirt path could run alongside it for the dog walkers and runners that use the current holey path due to liking a softer trail.
39.696645618867564	-104.77781295776369	S Uravan St, Aurora, CO, 80017, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123983	Bicycle	Please create a protected intersection at Uravan & Mississippi to bring the bike lanes through the intersection more safely. With the current set up cars regularly use the bike lane as a turn lane, moving bicyclists away from the cars as they approach the intersection would stop this from happening.
39.706311737665324	-104.81920480728151	520-658 S Sable Blvd, Aurora, CO, 80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123986	Pedestrian/Mobility Device	Better lighting needed on Sable sidewalk between Exposition and Centerpoint Dr. Eventually grade separating the rail line through this busy section of town would also make for a more pleasant pedestrian experience since RTD could rent the space out to small pedestrian oriented stalls, widen the sidewalk, put in a cycle track or put greenery there instead of pedestrians being sandwiched between heavy traffic and a metal fence.
39.709708177815311	-104.81481134891511	Aurora City Government Cultural Services, 15051 E Alameda Ave, Aurora, CO,	Car	While it is apparent that only one lane is straight only when exiting the Municipal Center on Alameda Dr the signage is incredibly poor and appears at first glance

		80012, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123987		to indicate all lanes are straight only, through the intersection with Alameda Ave. This kind of poor signage results in drivers having to spend time sorting out the reality of the lanes available to them that should be spent looking for pedestrians, cyclists and other things on the roadway.
39.67756530095637	-104.7724485397339	S Tower Rd, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123988	Transit	Tower really doesn't need 3 through lanes in each direction, and the current configuration encourages speeding. If it's possible to turn the curb lanes into bus & bicycle only lanes with personal vehicles only allowed to enter those lanes right before a right turn it may alleviate some speeding and make the street safer.
39.631758464202626	-104.7950702905655	16550 E Pheasant Run Pkwy, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123989	Bicycle	Please widen the path through Wagon Trail Park so that it is functional as a mixed use pat/add a cycle path alongside the footpath, especially since there is no sidewalk on the other side of the street and this is the only approach for walking or bicycle riding students of Independence Elementary from the east and a route for students of Smokey Hill High.
39.630700802574445	-104.79148685932161	S Buckley Rd, Aurora, CO, 80015, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123990	Bicycle	Please create a protected intersection at Buckley & Wagontrial Parkway instead of having the bicycle lanes peter on on approach. This would make crossing Buckley safer for pedestrians and cyclists.
39.750992705994285	-104.8764216899872	2277-2299 Dallas St, Aurora, CO, 80010, USA http://engageaurora.org/connect	Bicycle	A well lit separated bicycle track up the west side of Dallas St to connect Stanley Marketplace to the Arts District on Colfax would make North Aurora safer and easier to transverse by bicycle.

		ingaurora/maps/add-feedback-by-location?reporting=true#marker-123991		
39.729798641632215	-104.87553119659425	ATM at John Dollar Mini Mart, 818 N Dayton St, Aurora, CO, 80010, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-123992	Bicycle	Improve sidewalk on the west side of Dayton to include a dedicated bike lane along Lowry to make the area more accessible to those on a bicycle and reduce conflicts between bicyclists, pedestrians and cars.
39.675269693235784	-104.76243853569032	19298 E Caspian Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-124020	Bicycle	Creating a protected intersection at the Wesley Dr and Dunkirk St intersection would improve safety for pedestrians and cyclists.
39.667587523042663	-104.79434877634005	16594 E Yale Pl, Aurora, CO, 80013, USA http://engageaurora.org/connectingaurora/maps/add-feedback-by-location?reporting=true#marker-124021	Pedestrian/Mobility Device	The West Toll Gate Creek trail crossing on Yale Ave needs some serious safety upgrades, and Yale itself could use a road diet by getting rid of a continuous through lane in each direction, possibly by turning the curb lane into a bus only lane with personal vehicles only allowed to enter right before a right turn, or at the more extreme end by eliminating the curb lane altogether to create a verge buffered bicycle track and sidewalk. Pictured with bus lane on westbound Yale & verge buffered cycle track on eastbound Yale.

OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the Visualize Phase or Milestone 3, conducted April 1-May 2, 2025. The engagement period was extended by one week to allow community members more time to provide feedback. The Visualize Phase involved extensive public outreach to gather feedback on four visionary networks (Transit, Bikeway, Sidewalk, and Streets) and 10 investment categories (Complete Streets, Street Capacity Improvements, Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, High-Capacity Transit, Pedestrian Improvements, Bikeways & Trails, Traffic Technology, Streetscape Enhancements, and Infrastructure Maintenance). In this phase, community members shared whether they supported or opposed the visionary networks and how they would disperse limited funding across the investment categories. This phase provided the planning team more clarity on how the community wants Aurora to prioritize its transportation investment in the future. Their input informs the final stage of the plan including project prioritization, policies and programs, and implementation.

ENGAGEMENT OVERVIEW

A variety of engagement tactics were used to gather feedback from the Aurora community on proposed visionary networks and investment categories. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers

TOUCHPOINTS	ONLINE VISITS	ACTIVELY ENGAGED
*366K+	*2.2K+	1.6K+

**The figure of 366,000+ touchpoints indicate the cumulative number of interactions or exposure to the project. This is a broader measure compared to the 1,400+ online visits, which represent more direct engagement with the project's online presence.*

Engagement Activities

Throughout Milestone #3 the project team used several different activities during the community pop-up events, roundtable table discussion, Engage Aurora Live, the virtual public meeting, and online open

house to gather input from the public. Some variation was made to fit the meeting context which is noted in the summaries below.

Comment Map

Participants were able to provide detailed comments on the visionary network maps both in-person and virtually. At Engage Aurora Live and the Roundtable Discussion, roll plots of each network were available to make comments. The online meeting featured a comment map for each visionary network to collect input.

How would you invest $100 across the investment categories?

In Person: Participants were given 10 jellybeans to represent a total of $100 and asked to distribute them however they liked across 10 investment categories. Each category included a description of the types of investments being considered. The purpose of this exercise was to better understand how much the community wants funds allocated for transportation projects.

- Complete Streets
- Street Capacity Improvements
- Transit Service Expansion
- Transit Amenity Upgrades & Personal Safety
- High-Capacity Transit
- Pedestrian Improvements
- Bikeways & Trails
- Traffic Technology
- Streetscape Enhancements
- Infrastructure Maintenance

Online: Participants were asked how much they would invest across the 10 investment categories in increments of $5 using a sliding scale.

Investment category descriptions and full activity instructions can be found in Appendix B: Jellybean Funding Activity.

Level of Support for the Visionary Networks

In Person Events: Participants were asked whether they believed the visionary network would improve their quality of life. They could answer “yes” or “no” using sticky dots.

Online Meeting: Participants were asked to rank each visionary network (Transit, Bikeway, Sidewalk, and Streets) on a scale from “Strongly Oppose” to “Strongly Support,” with options of “Oppose,” “Neutral,” and “Support” between the two end options.

Engagement Events

ROUNDTABLE DISCUSSION | APRIL 22, 6:30-8:30 P.M

A roundtable discussion was held on April 22, from 6:30-8:30 p.m. All City of Aurora board and commission members were invited to attend, as was the general public. There were **30 people** in attendance. Attendees were asked to RSVP online and were provided dinner. The roundtable began with a presentation from the project team, followed by breakout sessions focused on each visionary network. Attendees learned more about each network from a project team member and were encouraged to provide location-specific comments on each network map.

ENGAGE AURORA LIVE!

On Saturday, April 19, the City of Aurora hosted Engage Aurora Live!, a family friendly event designed to gather feedback on multiple critical projects impacting Aurora's future, with food and activities available for attendees. As part of this citywide open house, Connecting Aurora gathered feedback from many of the **150 to 200 event attendees** on the visionary networks and investment categories

VIRTUAL TOWN HALL

A virtual town hall was hosted on Zoom the evening of Wednesday, April 9, from 5:30-7:30 p.m. **97 community members** attended. The town hall was open to the public and attendees could register via the Engage Aurora website. Throughout a presentation from the project team, attendees were asked to answer polling questions identical to the survey questions to gather their thoughts on the visionary networks and investment categories. Following the presentations, attendees were invited to ask questions and provide feedback via the Q&A function or verbally.

ONLINE OPEN HOUSE

A self-guided online open house was hosted on ArcGIS StoryMaps, linked via the Engage Aurora website (engageaurora.org/ConnectingAurora). Community members could learn more about the project, make comments directly on the visionary network maps, and take the survey. The survey gathered feedback to gauge support for the visionary networks and how community members would like to see limited funding dispersed across potential investment categories. The data below represents engagement between April 1-May 2.

- Total visits: 2,292
- Survey responses: 203
- StoryMap comments: 126

A complete record of map comments can be found in Appendix C: Map Comments.

ONLINE COMMUNITY SURVEY

The StoryMap included a survey to gather feedback from community members after they explored the different network and improvement areas. The survey gauged support for the four visionary networks and 10 potential investment categories and received **203 responses**. The survey was available in English and Spanish and other languages upon request. A copy of the complete survey can be found in Appendix B: Survey.

COMMUNITY POP-UP EVENTS

Pop-up events were held at various locations across Aurora to gather feedback on the visionary networks and investment categories. Events were spread across Aurora to reach as many populations and communities as possible. **200 community members** were engaged over the course of these pop-up events.

STAKEHOLDER GROUP

A virtual meeting with the Connecting Aurora Stakeholder Group was held the afternoon of March 26. The meeting was attended by **13 stakeholders** and began with a review of public engagement thus far. Stakeholders were then asked to review the four visionary networks and provide feedback on each via verbal discussion or the chat function. Because this meeting took place prior to the engagement period, the stakeholders were asked to promote the Milestone 3 events, online StoryMap, and survey to their communities.

CITY OF AURORA EMPLOYEE ENGAGEMENT

Presentations on Milestone 3 were given to employees across the city at maintenance facilities and during an employee town hall. Coffee and donuts were provided, and attendees were asked to provide feedback on the visionary networks and investment categories. About **133 employees** participated.

FOCUS GROUPS & SPECIAL PRESENTATIONS

Throughout the engagement period, specialty presentations and focus groups were held for two organizations in Aurora: Project Worthmore and Developmental Pathways. The Connecting Aurora project team presented to four English learning classes of different levels, adjusting the content to fit the needs of each class. Attendees participated in a simplified version of the investment categories jellybean funding activity. The project team also hosted several focus groups with Developmental Pathways, a local organization that provides support and services to individuals with disabilities and their families. Attendees of these focus groups were guided to the online survey following the meetings.

PROMOTION

A variety of promotional materials were used throughout Milestone 3 to inform the community about the newest phase of Connecting Aurora and how to provide feedback. For details and examples of materials used, go to Appendix A: Milestone 3 Promotional Materials.

News Releases and Media Coverage

Three news releases were distributed to a comprehensive local media list, including media targeting non-English speakers. As a result, there were four news stories. For a list of news stories, go to Appendix A: Media Coverage.

Social Media

Extensive social media efforts were undertaken to promote the project and to engage the public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Additionally, Facebook posts were boosted for the most common languages: English and Spanish. Each boosted post was $50, for a total of $100 spent on social media ads.

- Total posts (including ads): 31
- Total reach/impressions (views/shown): 93K+
- Engagement (clicks/likes/comments): 1.3k

Newsletters

Several city and community newsletters distributed Milestone 3 project information, reaching over 182k community members.

- Engage Aurora emails: 3 emails were sent to the 181 Connecting Aurora project subscribers on Engage Aurora, one of which was sent to all 2,388 registered participants on Engage Aurora.
  - City of Aurora Employee Newsletter (5,001)
  - This is Aurora City Newsletter (+7,000 subscribers, 7 articles and/or mentions)
  - News Aurora (68,000 recipients)
  - Aurora TV Weekly News Program Newsletter (+1,500 subscribers, 2 stories)
  - Road Construction Roundup (490 subscribers)
- Aurora Library Branch Newsletters: Information on Connecting Aurora Milestone 3's online feedback opportunities were included in branch newsletters across the city, reaching a total of 97,470 subscribers.
  - Central: 60,683 subscribers
  - Chambers Plaza: 512 subscribers
  - Hoffman Heights: 4,275 subscribers
  - Iliff: 3,258 subscribers
  - MLK: 6,884 subscribers
  - Mission Viejo: 12,539 subscribers
  - Tallyn's Reach: 16,203 subscribers

Website Traffic

Below is a breakdown of traffic on EngageAurora.org throughout the engagement period. Visitors to the website were directed to follow a link to the interactive Milestone 3 StoryMap, where they could provide comments on a map of Aurora, learn more about the networks and investment categories, and take the survey to provide feedback.

Bill Insert

An article was included in two News Aurora issues, which was distributed in water bills in March. Approximately **80K homes** received each bill insert.

Bus Benches

Bus bench ads were placed at three locations throughout Aurora:

- 14875 E. Colfax Ave. & Altura
- 17175 E. Smoky Hill Road & Wagon Trail Parkway
- 00280 S. Chambers Road & Alameda

Photos of bus bench ads can be found in Appendix A: Bus Bench Ads.

Outreach

Outreach was conducted with various community stakeholders as described in the following sections.

STAKEHOLDER GROUP

One email was sent to the Stakeholder Group with promotional materials for Milestone 3 engagement.

STAKEHOLDER EMAILS

The project team sent emails to many stakeholders with the project information and ask them to share with members of their organizations.

  - Homeowner's Associations/Neighborhood Leader Newsletter: +1,150 subscribers
- Aurora Boards and Commissions
  - Department of Pediatrics, University of Colorado School of Medicine/Children's Hospital Colorado
  - Aurora Chamber of Commerce
- Project Worthmore
- Developmental Pathways
- Be Well
- Havana BID/On Havana Street
- Village Exchange Center
- Aurora Public Schools
- Community College of Aurora
- RISE Colorado
- Bicycle Aurora
- Painted Prairie Neighborhood
- Aurora Highlands Neighborhood

FEEDBACK RESULTS

The results described below are a compilation of the various feedback tools. Sources for each chart or fact are indicated as well as the number of respondents.

Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

Who We Heard From

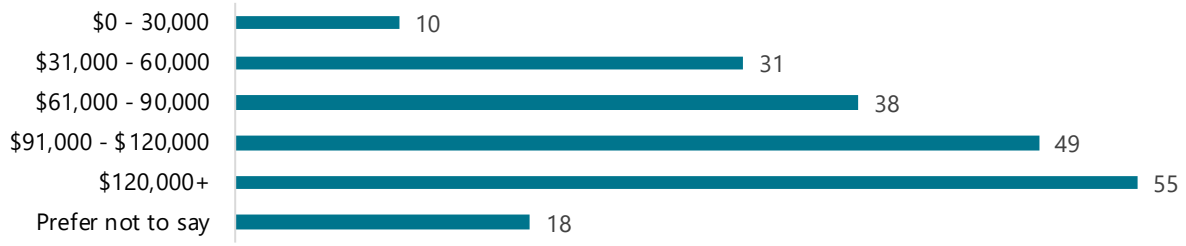
- A variety of people who live, work, commute through, or visit Aurora.
- Individuals of all ages, from students to seniors.
- Individuals and families of varying backgrounds.

DEMOGRAPHIC INFORMATION

Demographic information was collected by online survey participants. A breakdown of the demographics is in the following charts. Entering demographic information was optional.

Wards

One hundred ninety-five of the 203 survey takers provided information about which Ward they live in. The engagement by Ward was generally evenly split; however, a large share of participants did not know their Ward or were not a resident of Aurora.



Online Survey Participants by Ward

Income

Two hundred and one of the 203 surveys takers provided information about their income. Most participants earn more than $120,000 per year.

Online Survey Participants by Income Level

Area Median Income

Area Median Income was calculated based on household size compared to size. Sixty percent of AMI is widely considered as poverty level. The results in the chart below are approximate as income was presented in a range. The ranges often fell in between the 60% AMI, in which case households were assumed to be above 60% AMI. AMI was calculated for 183 of the 203 survey responses.

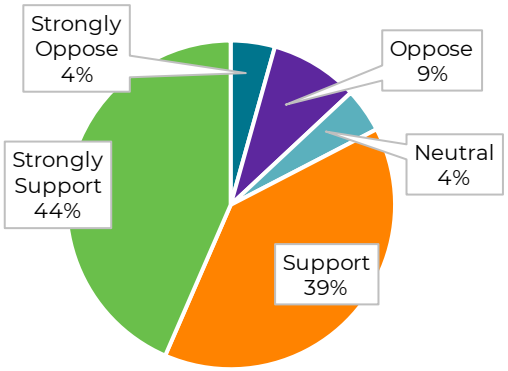
Online Survey Participants by Approximate Area Median Income

Gender

Two hundred and one of the 203 survey takers provided information about their gender.

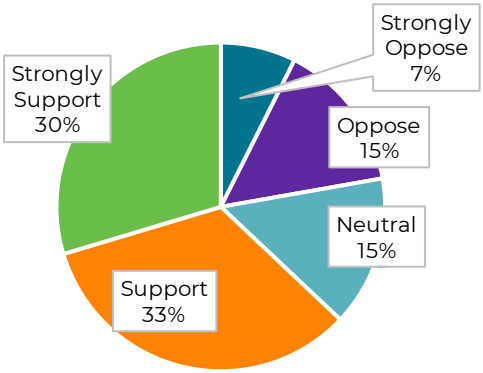
Online Survey Participants by Gender

Feedback by Demographic



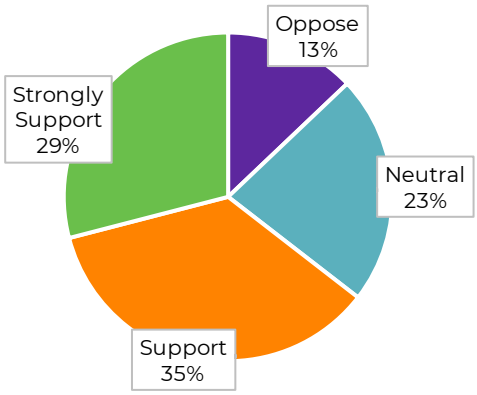
FEEDBACK BY WARDS

The online survey asked for information about which Wards participants lived in. The data in the following charts shows responses to the five survey questions based on Ward. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate $100 worth of funding to the investment categories they wanted to see most prioritized in the future. The investment Categories graphs show the average amount of money allocated to each category based on Ward.

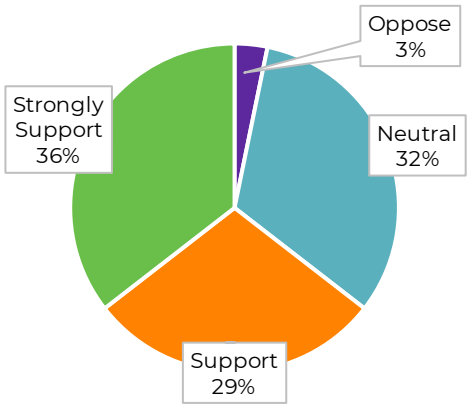


Bikeway Network

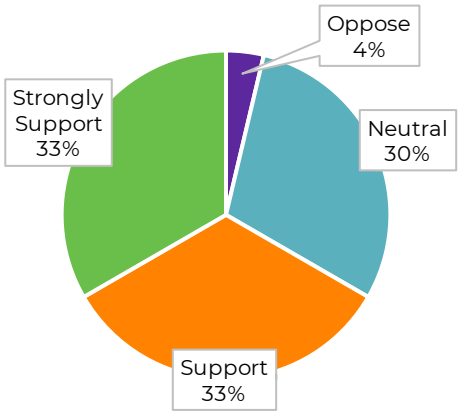
Do you support the visionary bikeway network?



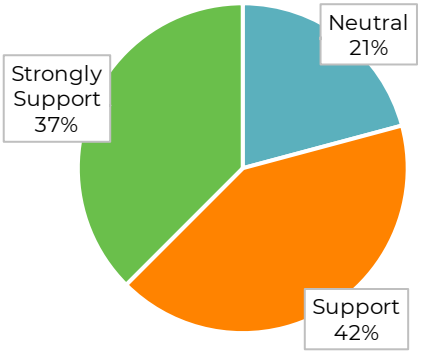
Ward I - Bikeway Network



Ward II - Bikeway Network

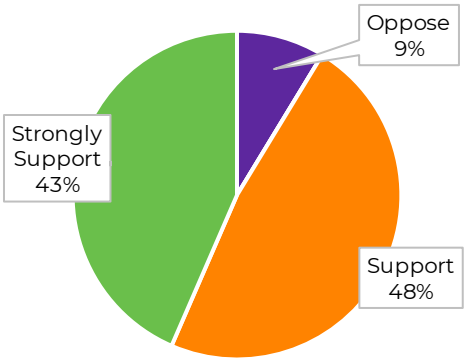


Ward III - Bikeway Network

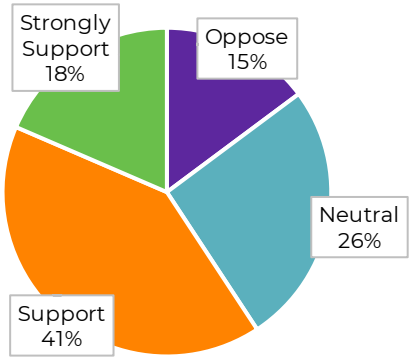


Ward IV - Bikeway Network

Ward V - Bikeway Network

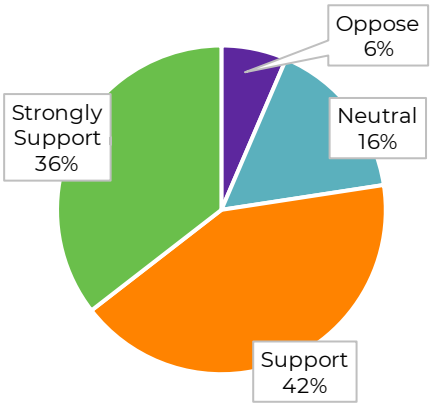


Ward VI - Bikeway Network

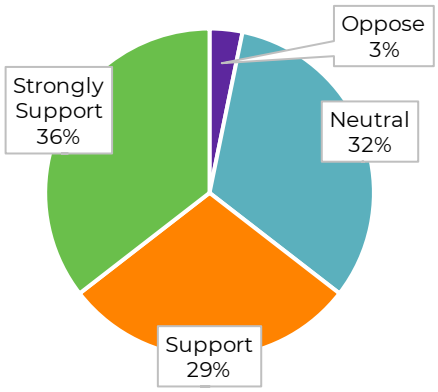


Transit Network

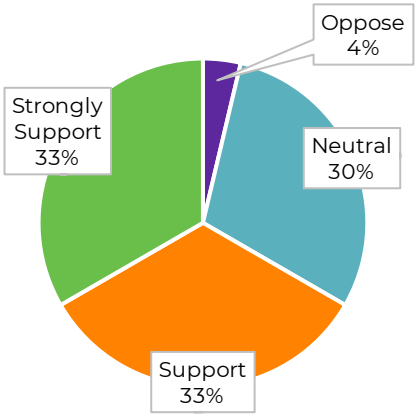
Do you support the visionary transit network?



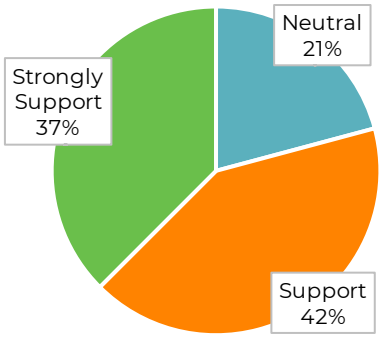
Ward I - Transit Network



Ward II- Transit Network

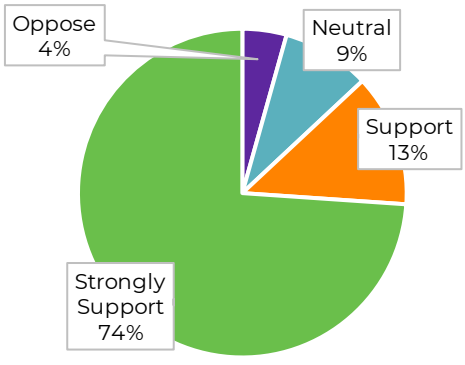


Ward III - Transit Network

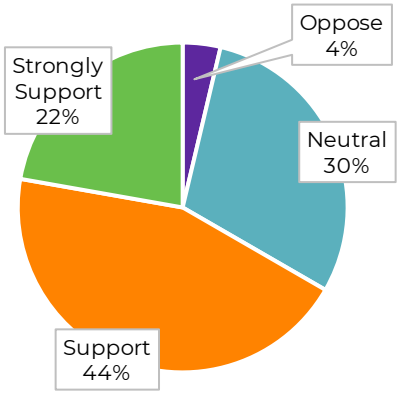


Ward IV - Transit Network

Ward V - Transit Network

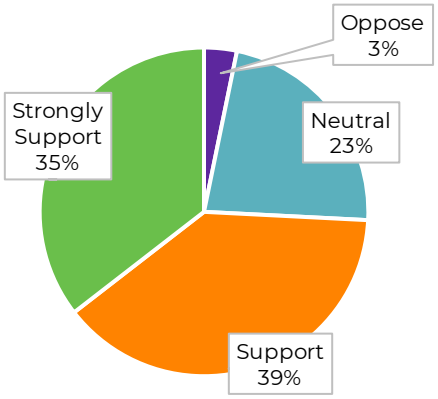


Ward VI - Transit Network

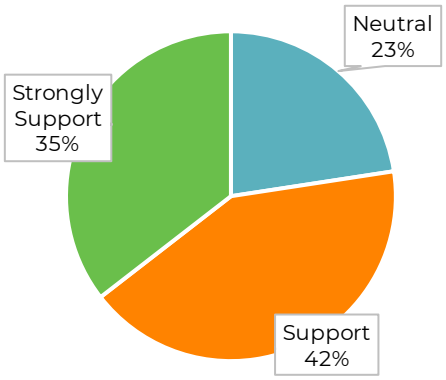


Sidewalk Improvement Areas

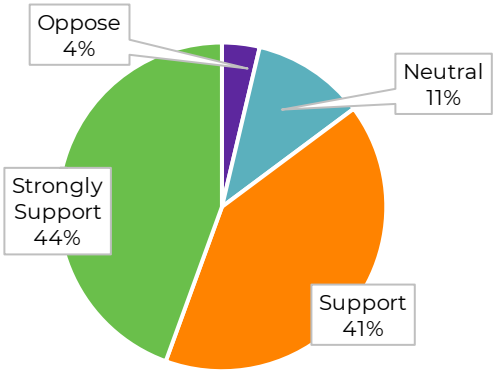
Do you support the sidewalk improvements areas?



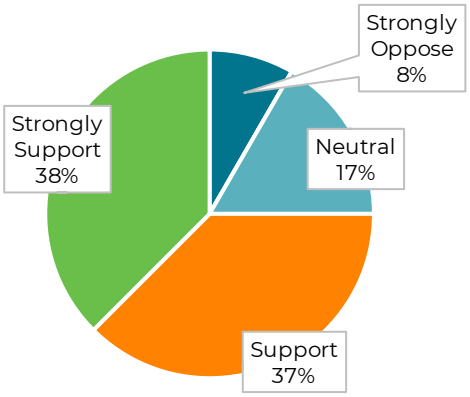
Ward I - Sidewalk Improvements



Ward II - Sidewalk Improvements

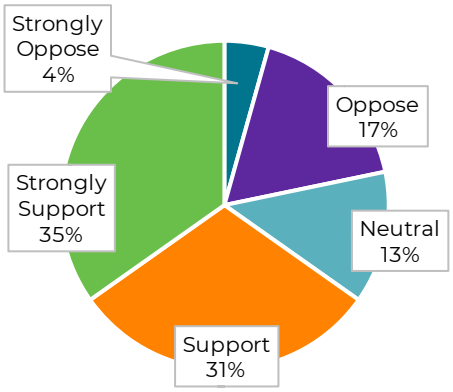


Ward III - Sidewalk Improvements

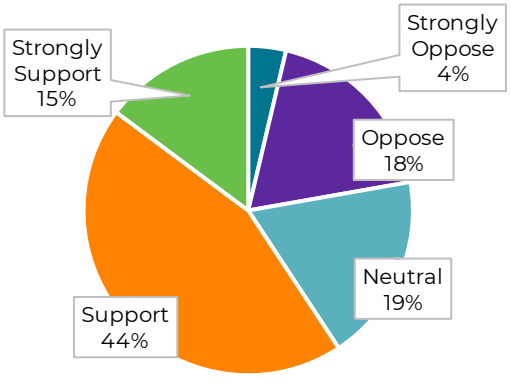


Ward IV - Sidewalk Improvements

Ward V - Sidewalk Improvements

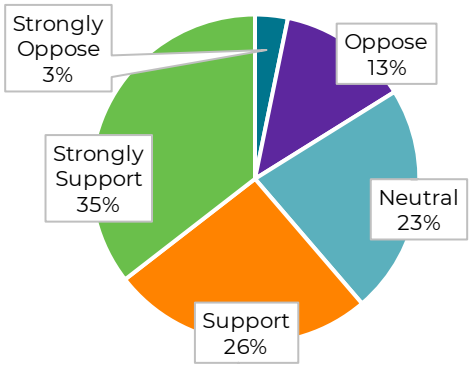


Ward VI - Sidewalk Improvements

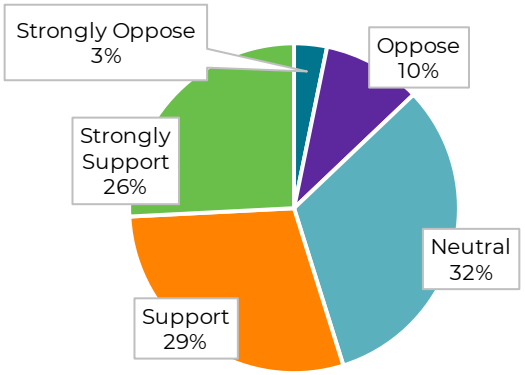


Street Improvement Areas

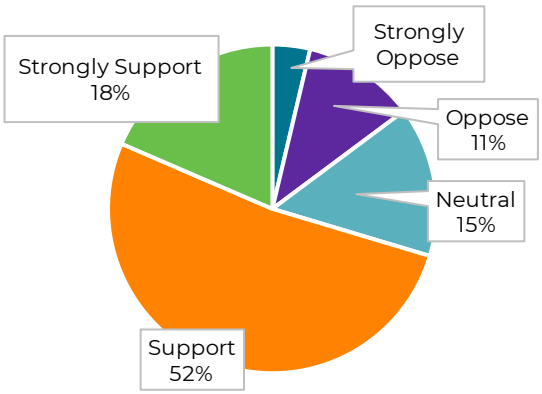
Do you support the street improvements areas?



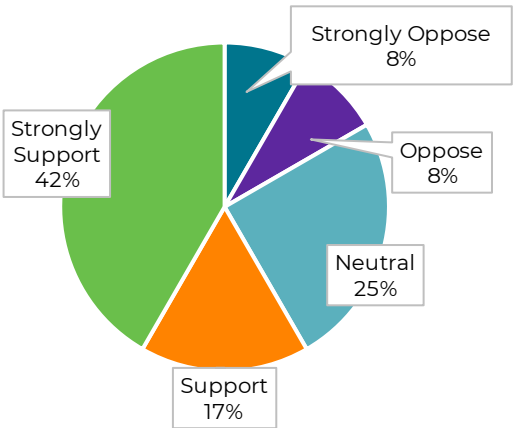
Ward I - Street Improvements



Ward II - Street Imrpovements

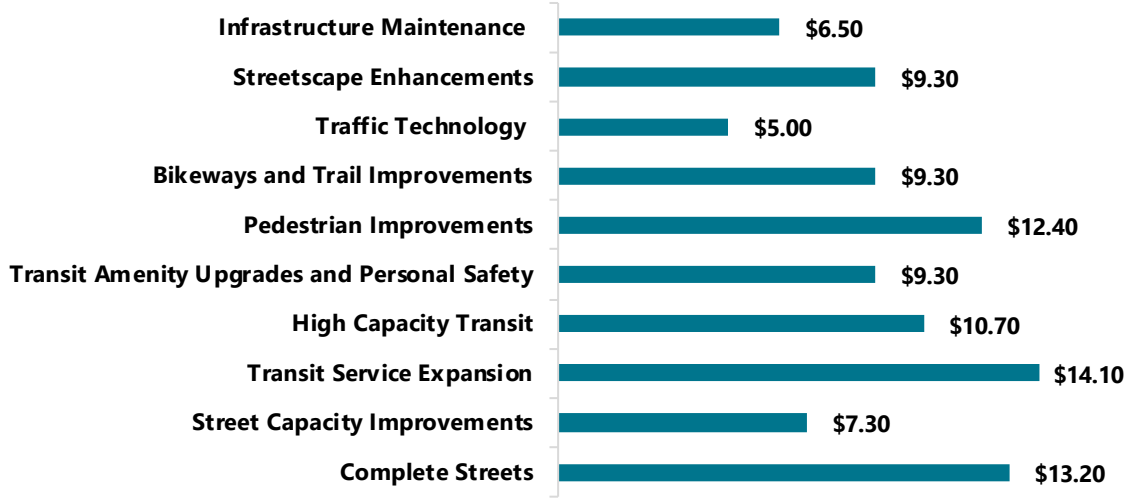


Ward III - Street Improvements

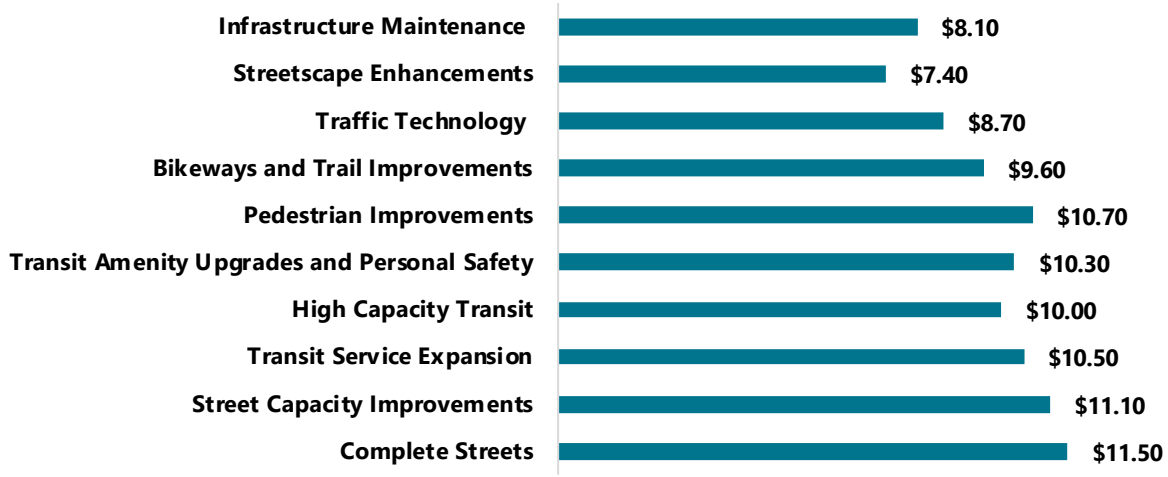


Ward IV - Street Improvements

Ward V - Street Improvements

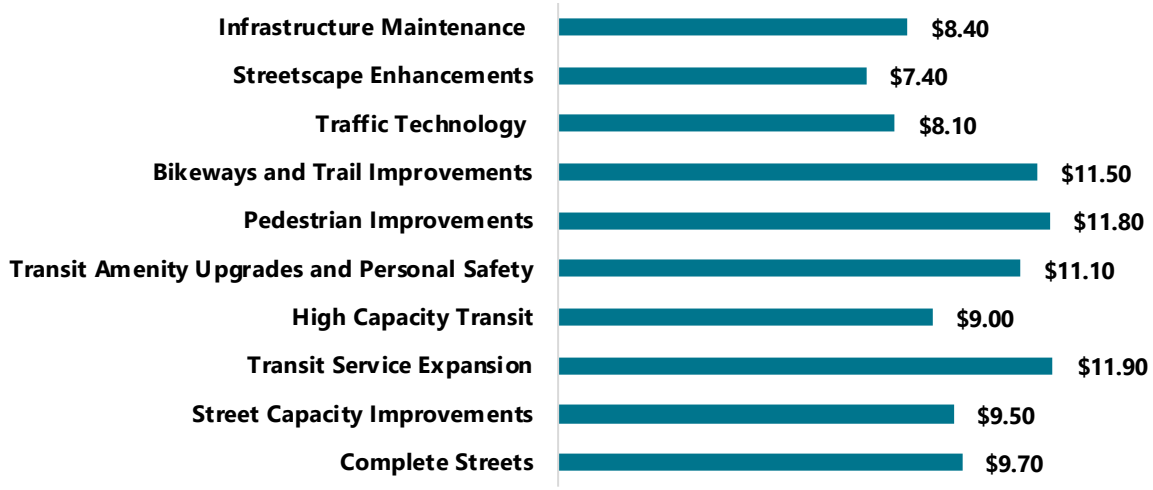


Ward VI - Street Improvements

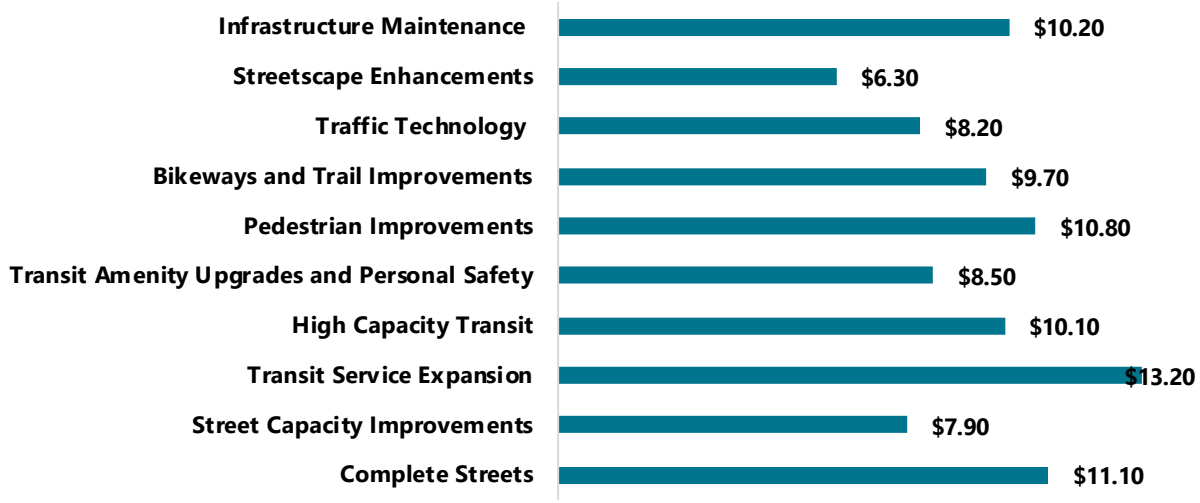


Investment Categories

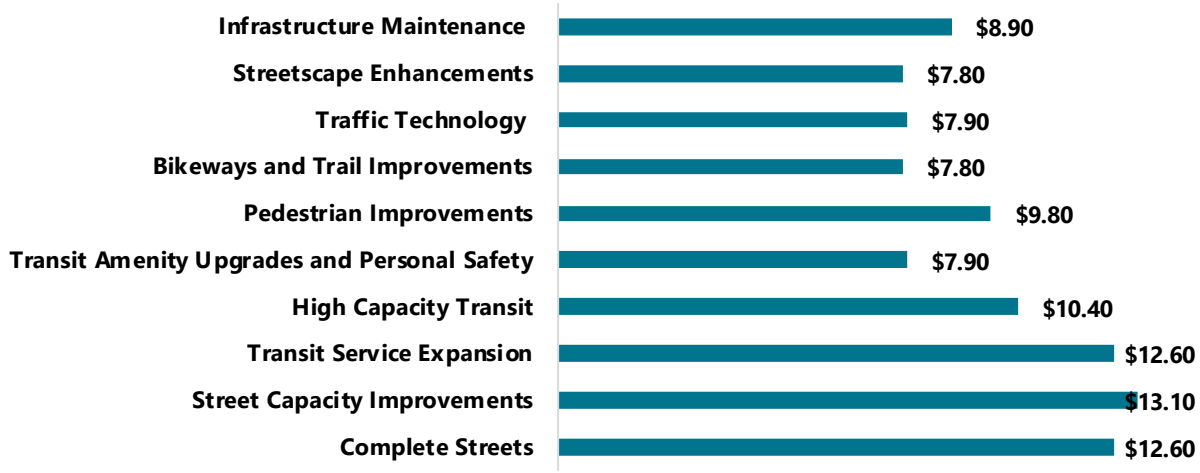
The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."



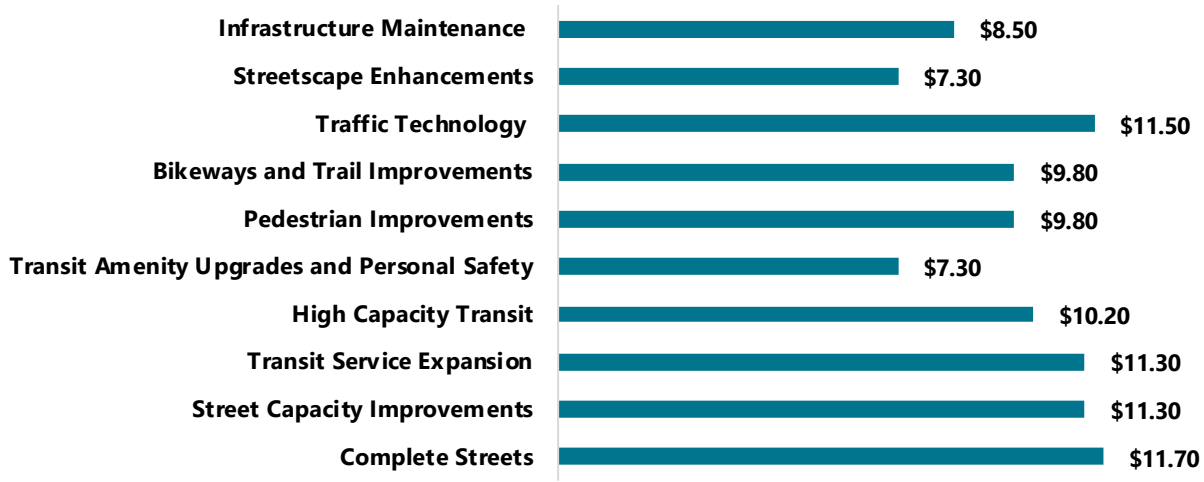
Ward I - Investment Categories



Ward II - Investment Categories

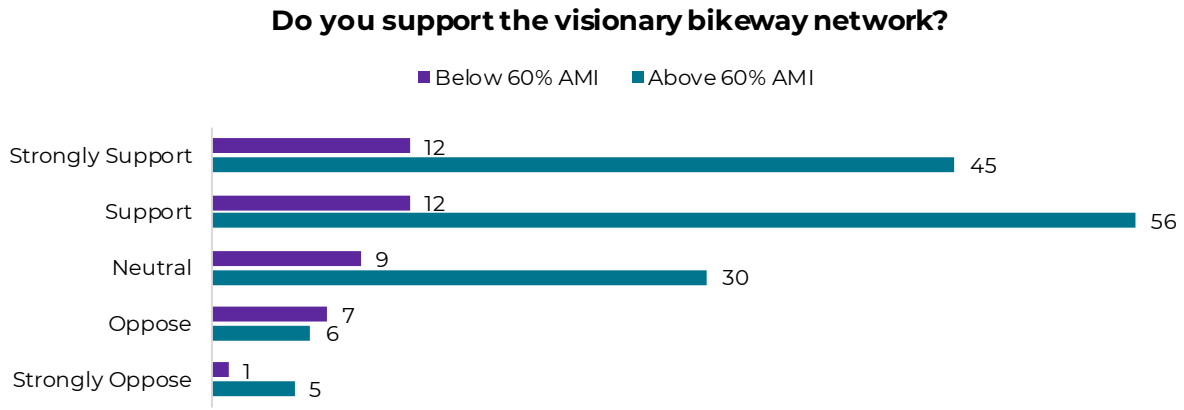


Ward III - Investment Categories

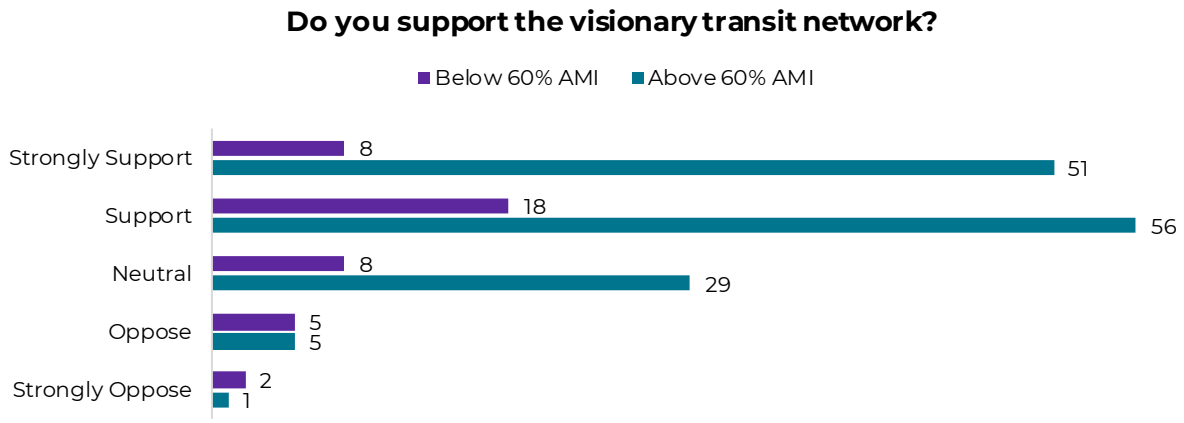


Ward IV - Investment Categories

Ward V - Investment Categories

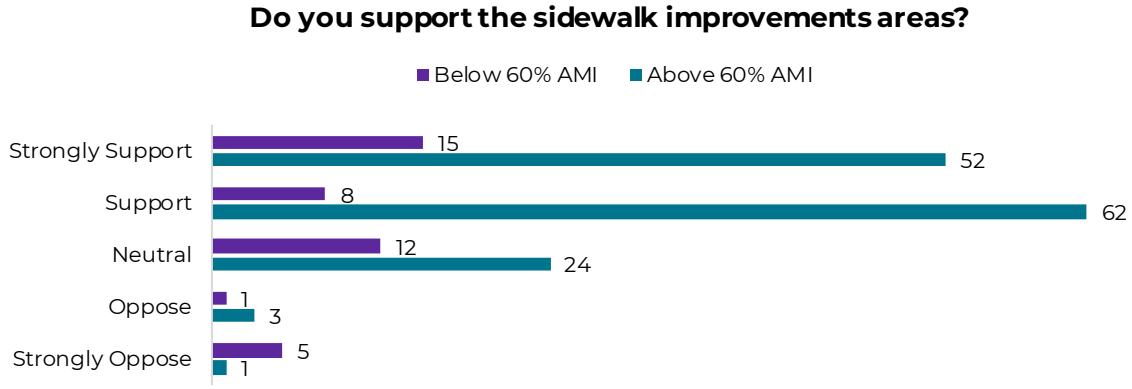


Ward VI - Investment Categories

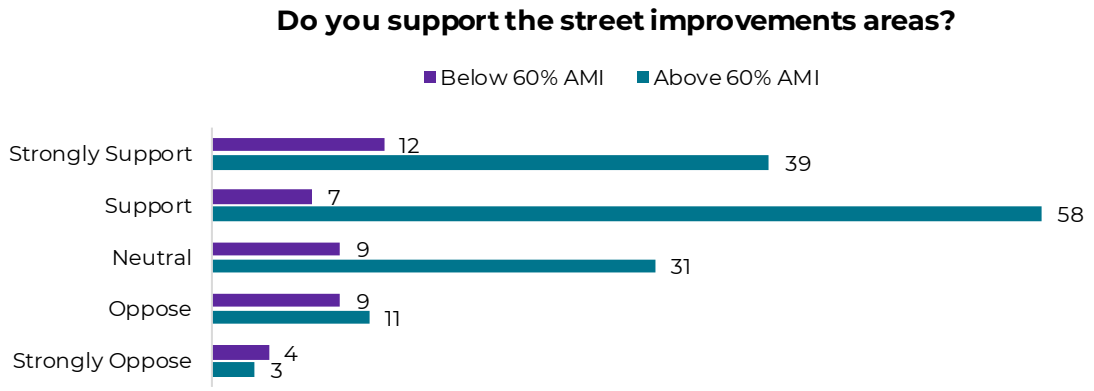


FEEDBACK BY POVERTY LEVEL

The online survey asked for information on income level and number of people per household. Based on these two questions, respondents were grouped into being either above or below 60% of the area median income. The data in the following charts show responses to the five survey questions based on poverty level. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate funding to the investment categories they wanted to see most prioritized in the future.

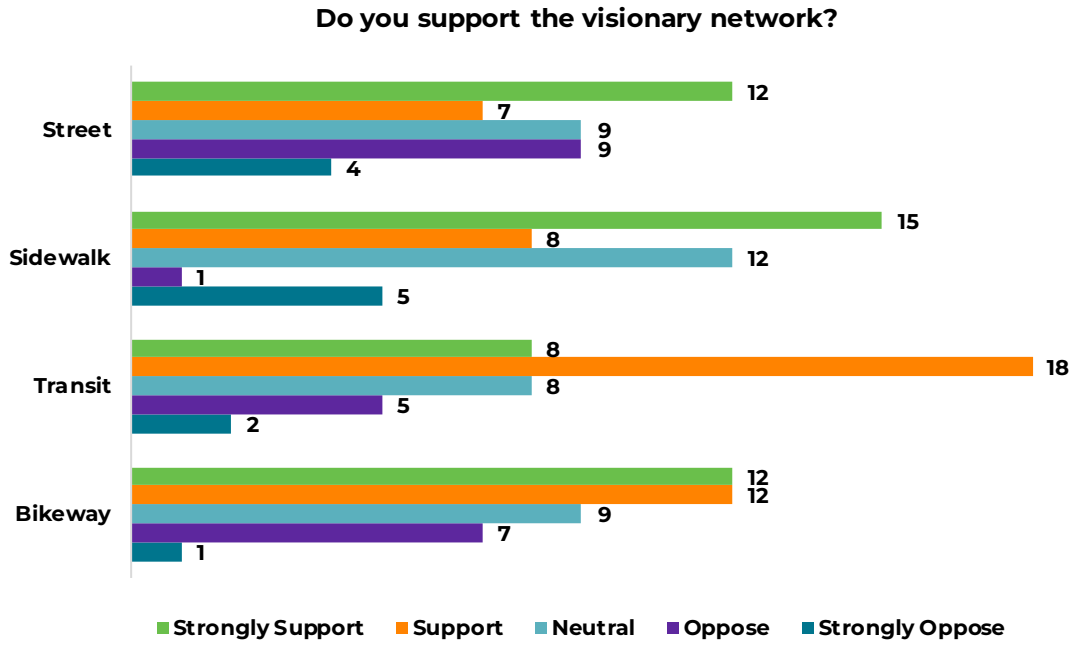


Bikeway Network

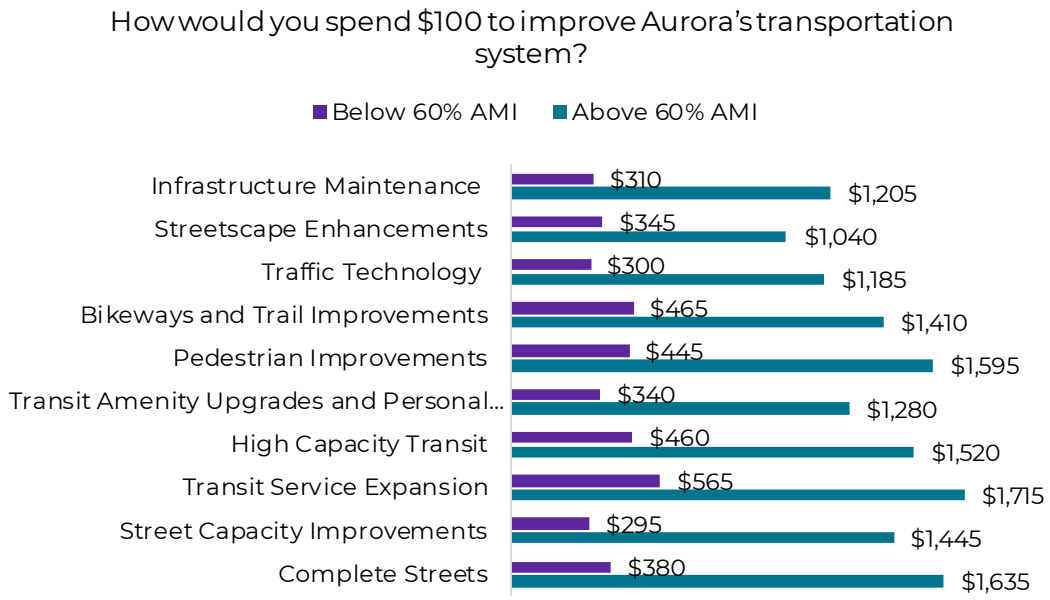


Transit Network

Sidewalk Improvement Areas



Street Improvement Areas

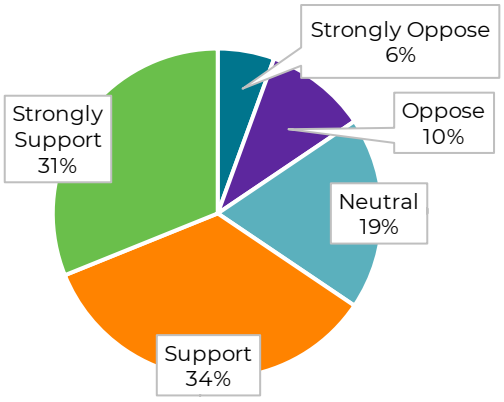


Visionary Networks – Below 60% AMI

In a closer look at the data above, participants below 60% AMI showed general support for each network, with the most support shown for the transit and bikeway networks and the most opposition shown for the street and sidewalk networks.

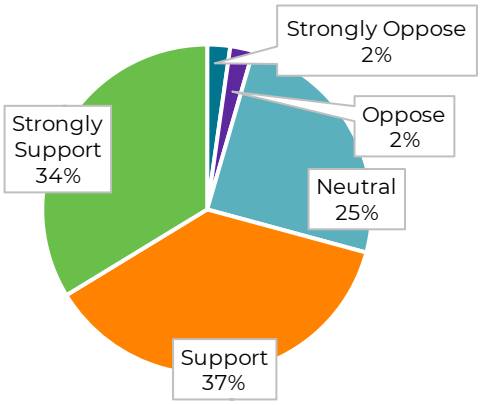
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



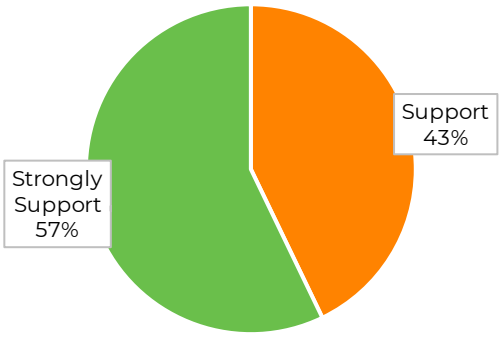
FEEDBACK BY GENDER

The online survey asked participants to signify their gender. The data in the following charts show responses to the five survey questions based on gender. The first four questions allowed participants to indicate their support or opposition for each visionary network (Bikeway, Transit, Sidewalk, Street). The fifth question asked them to allocate funding to the investment categories they wanted to see most prioritized in the future. The investment Categories graphs show the average amount of money allocated to each category based on gender.

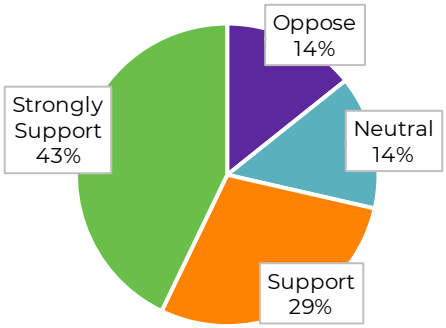


Bikeway Network

Do you support the visionary bikeway network?

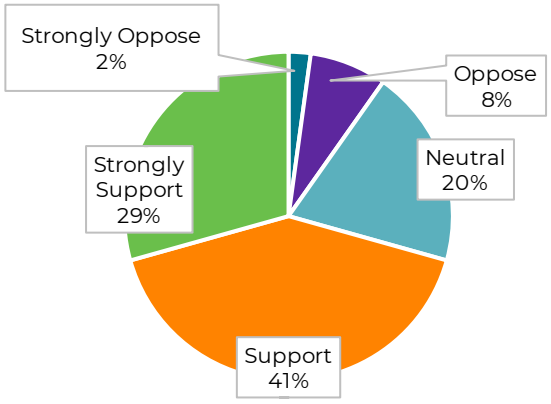


Female - Bikeway Network

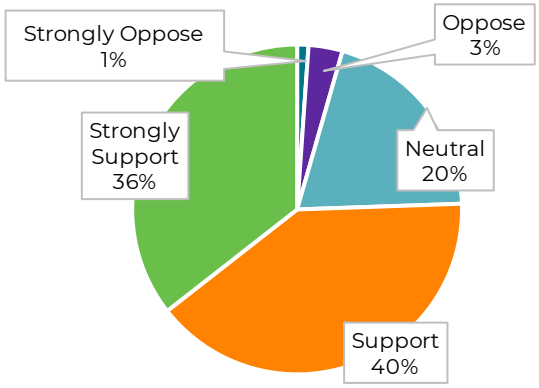


Male - Bikeway Network

Non-Binary -Bikeway Network

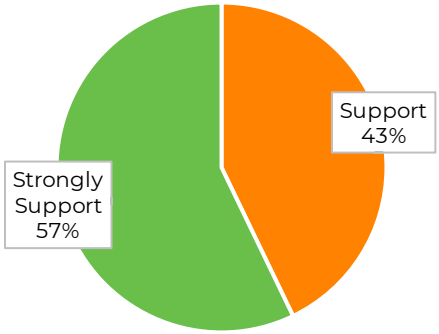


Prefer to Self-Describe/Prefer Not to Say - Bikeway Network

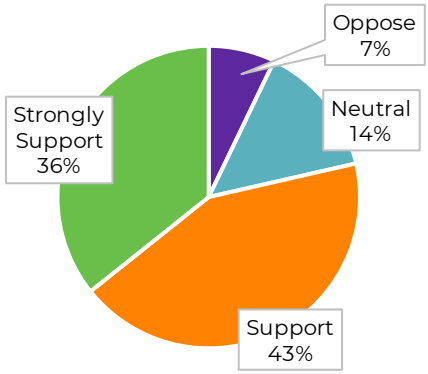


Transit Network

Do you support the visionary transit network?



Female - Transit Network



Male - Transit Network

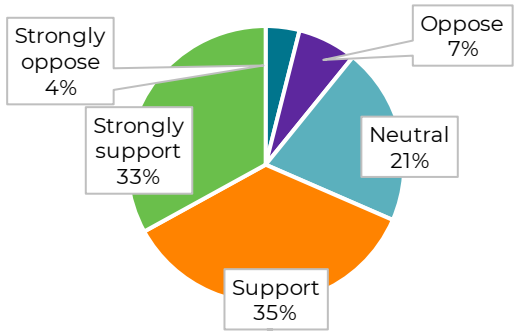
Online Feedback

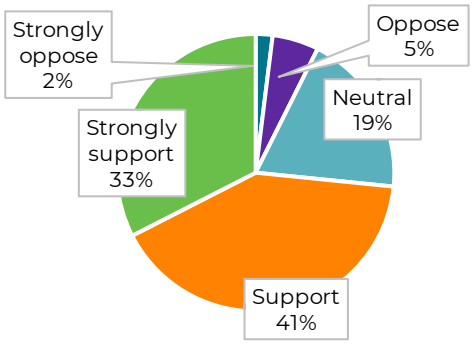
ONLINE SURVEY RESPONSES OVERALL



Throughout the course of Milestone 3, community members were invited to take a survey to gauge public opinion on the visionary networks and investment categories. The survey was available online on the StoryMap site via Engage Aurora. The survey consisted of three demographic questions, four visionary network questions, and one question that asked participants to allocate funding to the different investment categories. The fifth graph shows the average amount of funding allocated to each investment category.

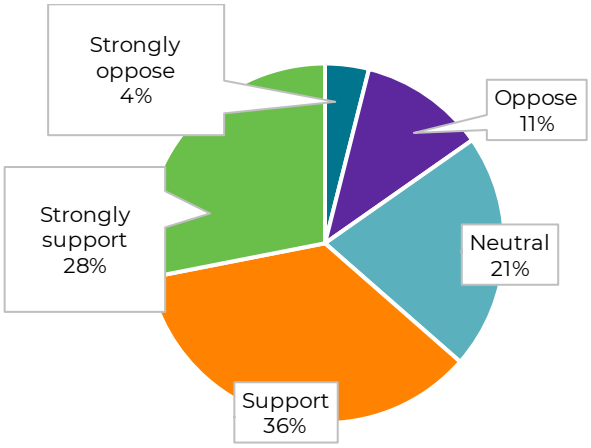
As seen in the breakdown of each question below, the majority of participants either "support" or "strongly support" all four visionary networks, with the most support for the Sidewalk and Transit networks by a narrow margin.

The top three highest funded investment categories by participants were **Transit Service Expansion, Complete Streets, Bikeways & Trails, with Pedestrian Improvements** coming in close as the fourth highest funded category.



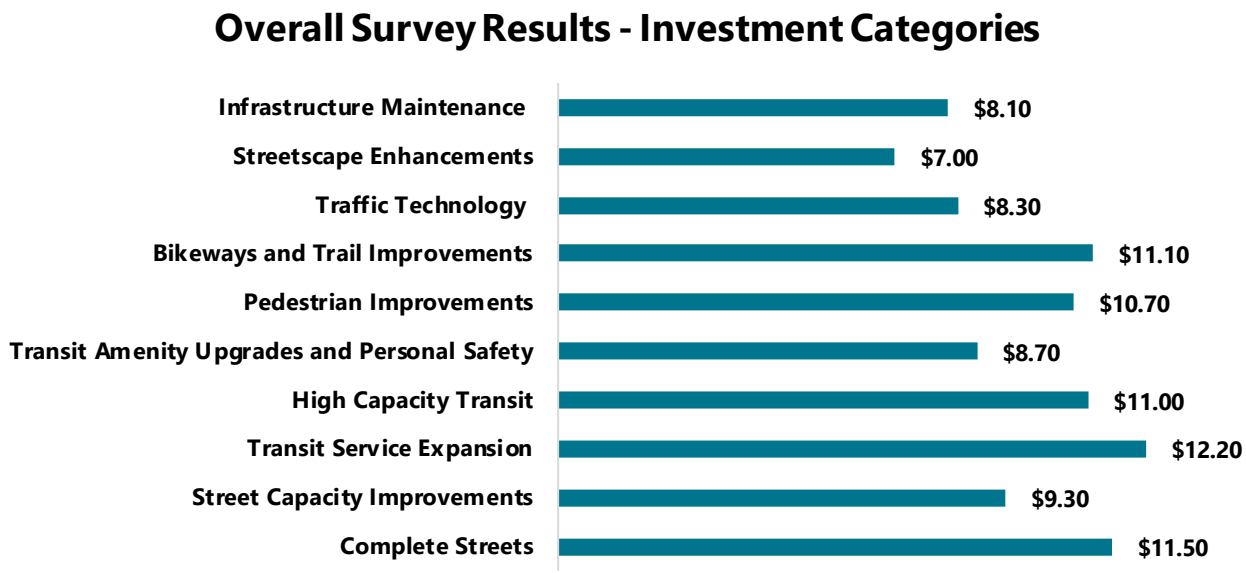
Bikeway Network

Do you support the visionary bikeway network?



Transit Network

Do you support the visionary transit network?

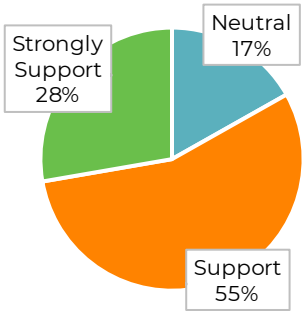


Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?

Investment Categories

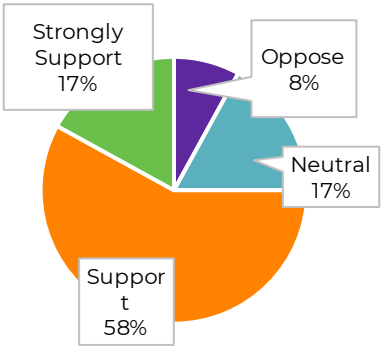
The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."



VIRTUAL TOWN HALL

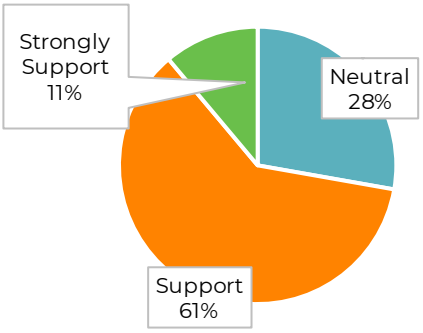
- Wednesday, April 9, 2025
- Zoom
- 97 attendees
- Top 3 Investment Categories:
    1. Infrastructure Maintenance
    2. Complete Streets
    3. Pedestrian Improvements

Throughout the virtual town hall, attendees were asked to participate in four polls. These polling questions were identical to the questions asked in the Milestone 3 survey regarding support for the visionary networks. Attendess were then directed to fill out a brief survey identical to the investment category portion of the Milestone 3 survey. The town hall had a total of 97 attendees, and each poll question averaged around 17 respondents. As seen in the graphs below, most respondents during the virtual town hall showed support for all four visionary networks. The three highest funded investment categories were Infrastructure Maintenance, Complete Streets, and Pedestrian Improvements.



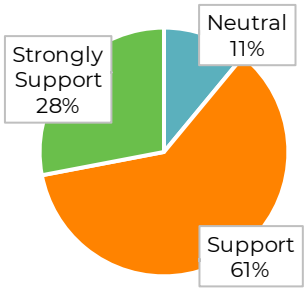
Bikeway Network

Do you support the visionary bikeway network?



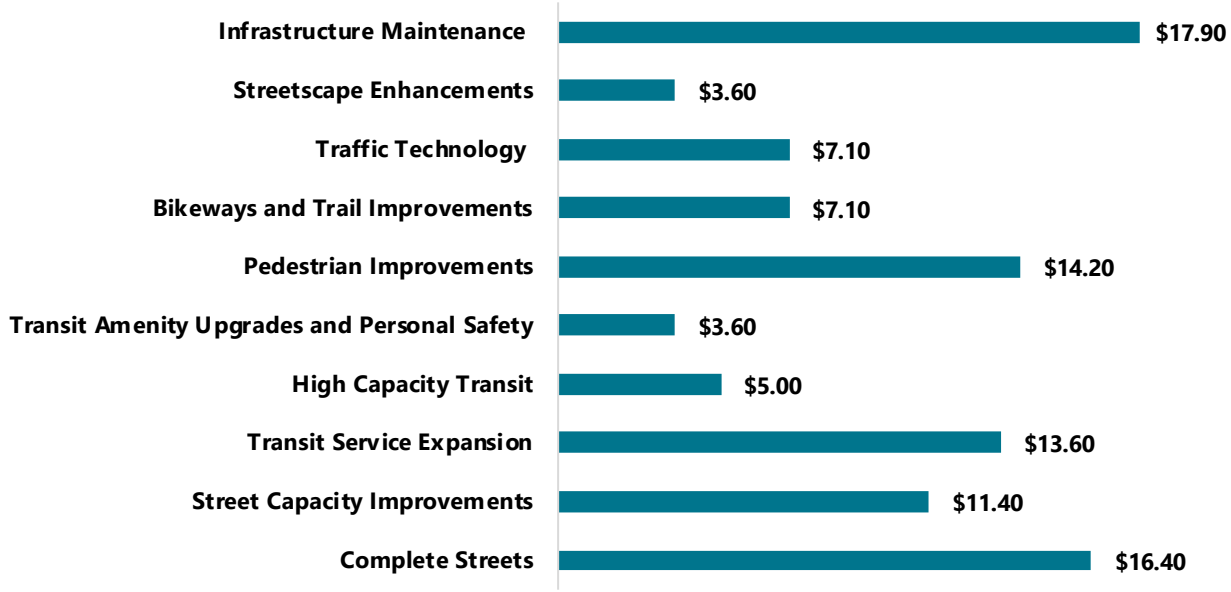
Transit Network

Do you support the visionary transit network?



Street Improvement Areas

Do you support the street improvements areas?



Sidewalk Improvement Areas

Do you support the sidewalk improvements areas?

Investment Categories

The graph below shows the average amount of funding allocated to each investment category. Attendees were prompted with the question: "How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future."

Feedback by Event

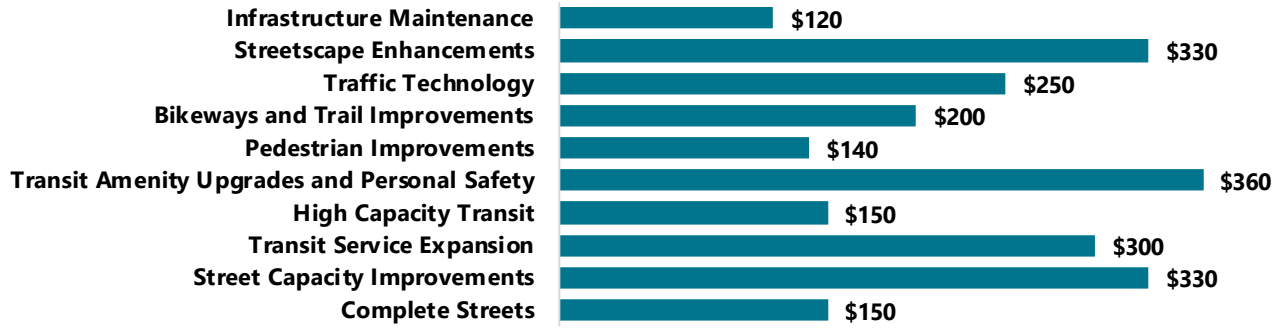
ROUNDTABLE DISCUSSION

- Tuesday, April 22, 2025
- Aurora Central Library
- 30 attendees
- Top 3 Investment Categories
    1. Transit Amenity Upgrades & Personal Safety
    2. Complete Streets
    3. Traffic Technology

During the Roundtable Discussion, attendees were asked to provide their feedback on the visionary networks and investment categories through two different activities. Attendees provided feedback on their support or opposition of each visionary network through a dot board activity that prompted them to answer "yes" or "no" as to whether the network would improve their quality of life. They also voted on investment categories by dispersing ten jellybeans across investment category jars to represent how they would spend $100 of funding. Of the 30 attendees, 23 participated in the jellybean activity and 16 participated in the dot activity. The graph below shows the funding totals for each category.

Based on the evening's discussions and the polling results shown below, attendees showed support for all four visionary networks. The top three highest funded investment categories were Transit Amenity Upgrades & Personal Safety, Complete Streets, and Traffic Technology.

Attendees were also provided with an opportunity to leave comments on the visionary network maps using sticky notes. A complete transcription and photos of handwritten map comments can be found in Appendix C: Roundtable Discussion Map Comments.

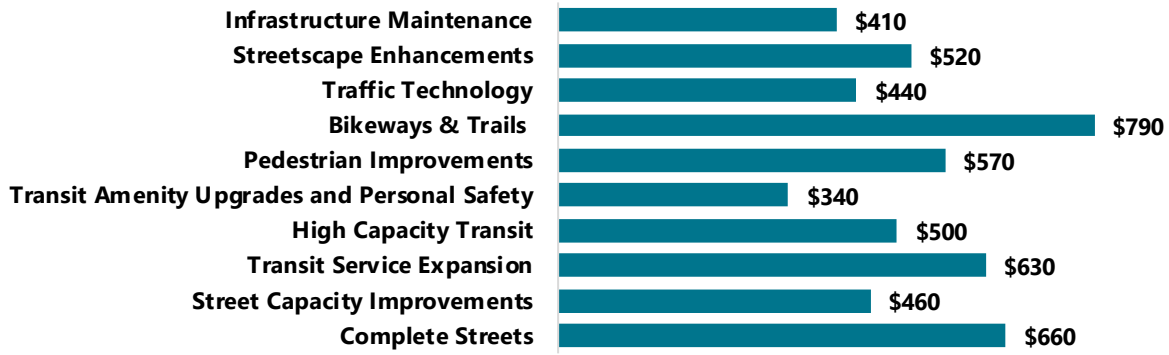


Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



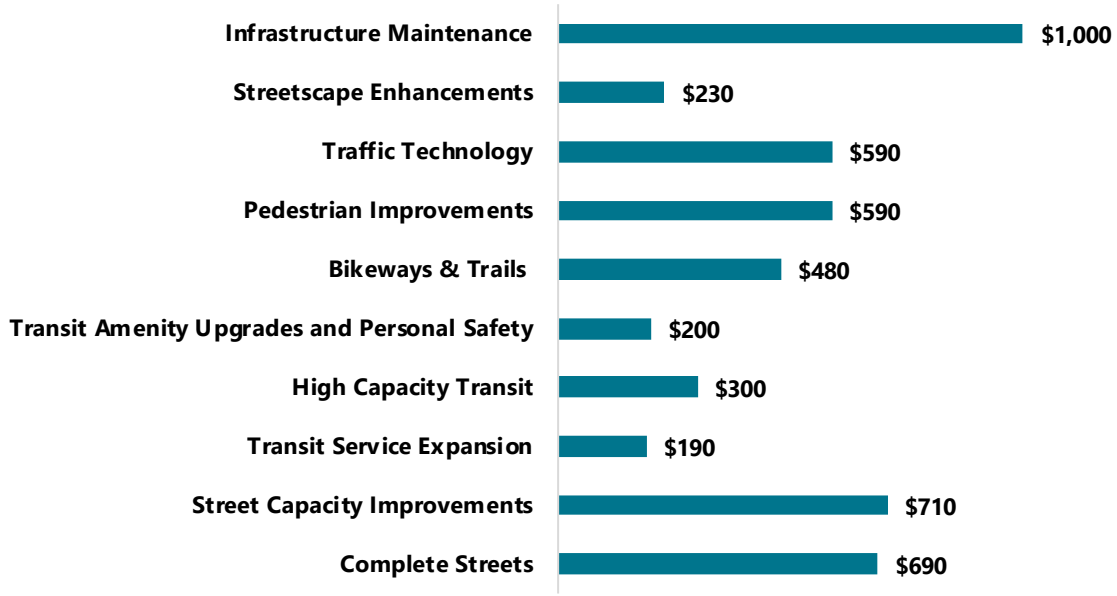
ENGAGE AURORA LIVE!

- Saturday, April 19, 2025
- Aurora Municipal Center
- 200 attendees
- Top 3 Investment Categories
    1. Traffic Technology
    2. Complete Streets
    3. Transit Service Expansion

Attendees of Engage Aurora Live!, a family friendly event designed to gather feedback on multiple critical projects impacting Aurora's future, were asked to provide feedback on the visionary networks and investment categories. Of the event's 200 attendees, 53 participated in the investment category jellybean funding activity. The graph below shows the funding totals for each category. The top three most funded categories by participants were Traffic Technology, Complete Streets, and Transit Service Expansion.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



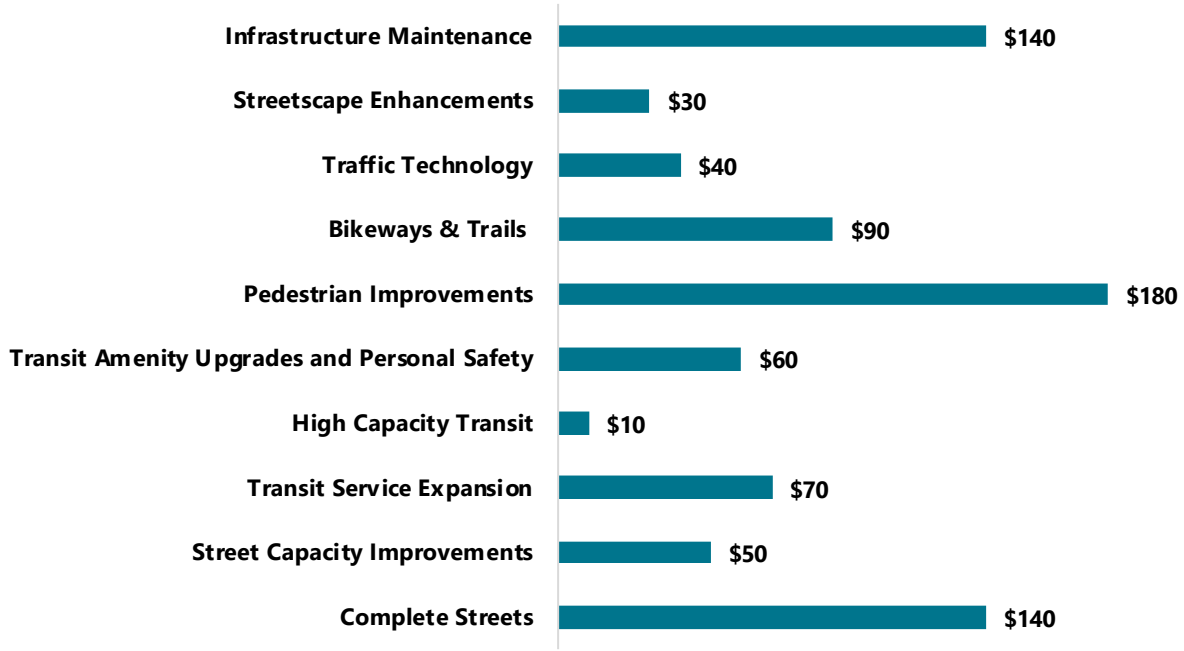
EMPLOYEE ENGAGEMENT – EMPLOYEE TOWN HALL

- Tuesday, April 8, 2025
- Aurora Municipal Center
- 50 attendees
- Top 3 Investment Categories
    - Infrastructure Maintenance
    - Street Capacity Improvements
    - Complete Streets

City of Aurora employees in attendance at the Employee Town Hall were asked to participate in the jellybean funding activity. The Connecting Aurora project team also passed out flyers directing town hall attendees to the StoryMap via Engage Aurora where they were encouraged to make comments and provide feedback on the visionary networks. The graph below shows the funding totals for each category. The top three highest funded categories were Infrastructure Maintenance, Street Capacity Improvements, and Complete Streets.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



EMPLOYEE ENGAGEMENT – BLOCK CAPTAINS

- Wednesday, April 16, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Pedestrian Improvements
    2. Complete Streets
    3. Infrastructure Maintenance

In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Pedestrian Improvements, Complete Streets, and Infrastructure Maintenance.

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

    2. Infrastructure Maintenance
    3. Pedestrian Improvements

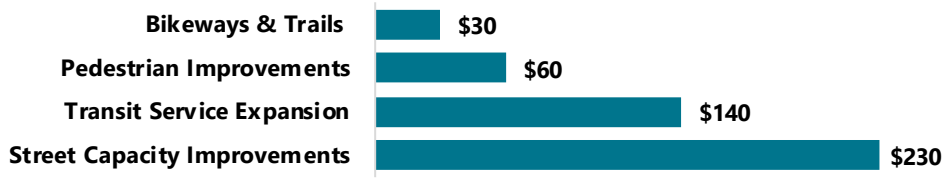
In addition to leaving comments on the visionary networks, employees were asked to provide feedback on the investment categories by participating in the jellybean funding activity. The graph below shows the funding totals for each category. The top three highest funded categories were Street Capacity Improvements, Infrastructure Maintenance, and Pedestrian Improvements.

Investment Categories

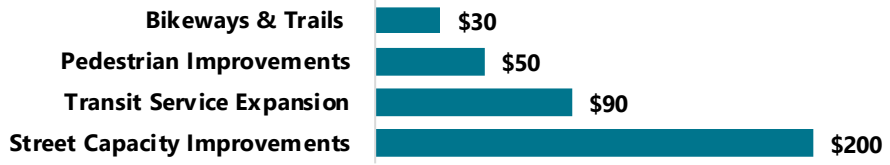
How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



PROJECT WORTHMORE

- Monday, April 14, 2025-Wednesday, April 16, 2025
- Southeast Maintenance
- ~35 attendees

Following three specialized presentations, the Connecting Aurora project team gathered feedback from English classes at Project Worthmore. Each presentation was adjusted according to English level, and the feedback activity was simplified down to four investment categories instead of 10, focusing on streets, transit, pedestrian, and bikeway improvements. Participants were still given 10 jellybeans to represent $100 worth of funding and asked to disperse them across the categories of Street Capacity Improvements, Transit Service Expansion, Pedestrian Improvements, and Bikeways & Trails.



Investment Categories – English Class #1 (April 14, 2025)

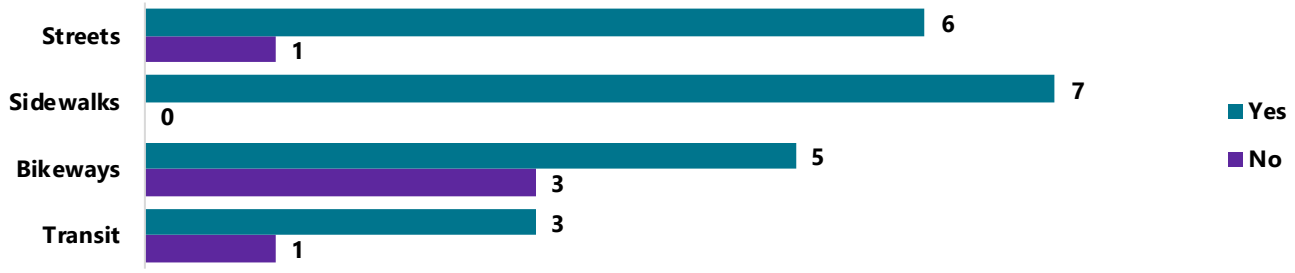
How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.

Investment Categories – English Class #2 (April 15, 2025)

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.

Investment Categories – English Class #3 (April 16, 2025)

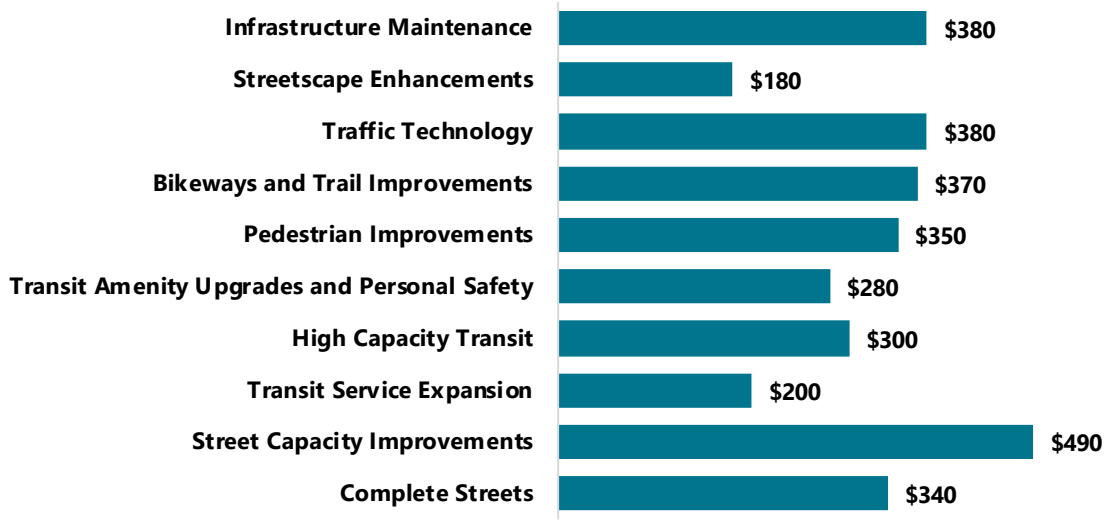
How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the four investment categories based on what you believe will make our transportation system better in the future.



POP UP #1 – AURORA CENTER FOR ACTIVE ADULTS

- Wednesday, April 2, 2025
- 35 attendees
- Top 3 Investment Categories
    1. Street Capacity
    2. Infrastructure Maintenance
    3. Traffic Technology

The Connecting Aurora Project team hosted a pop-up event at the Aurora Center for Active Adults and gathered feedback from 35 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network receiving only slightly lower levels of support than the rest of the networks. The top three highest funded investment categories were Street Capacity, Infrastructure Maintenance, and Traffic Technology.

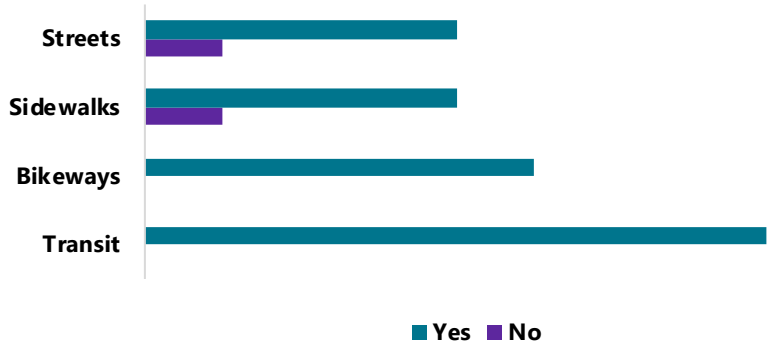


Visionary Networks

Does this network improve your quality of life?

Investment Categories

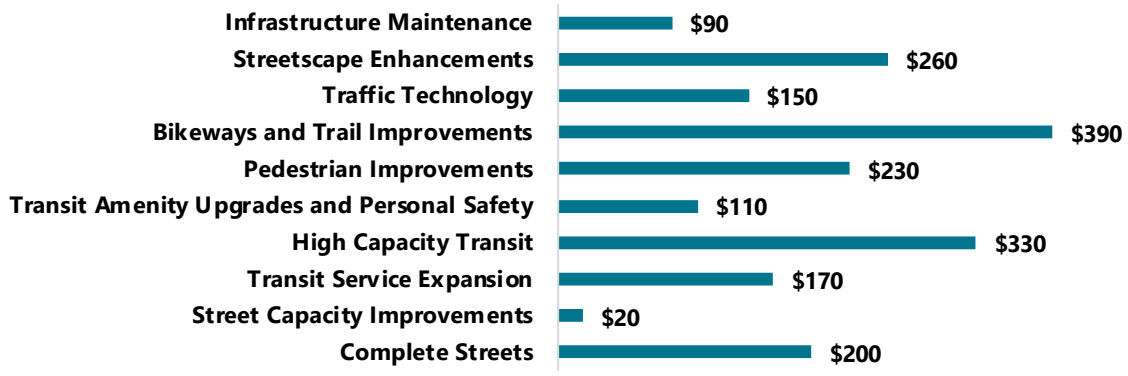
How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.



POP UP #2 – STANLEY MARKETPLACE FIRST FRIDAY

- Friday, April 4, 2025
- 32 attendees
- Top 3 Investment Categories
    1. Bikeways
    2. High-Capacity Transit
    3. Streetscape Enhancements

The Connecting Aurora Project team hosted a pop-up booth at the Stanley Marketplace First Friday in April and gathered feedback from 32 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network and Transit Network receiving 100% support. The top three highest funded investment categories were Bikeways, High-Capacity Transit, and Streetscape Enhancements.



Visionary Networks

Does this network improve your quality of life?

Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #3 – HOFFMAN HEIGHTS LIBRARY

- Saturday, April 5, 2025
- 6 attendees
- Top 3 Investment Categories
    1. High-Capacity Transit
    2. Pedestrian Improvements
    3. Transit Service Expansion/Infrastructure Maintenance

The Connecting Aurora Project team hosted a pop-up event at the Hoffman Heights and gathered feedback from six participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were High-Capacity Transit, Pedestrian Improvements, and Transit Service Expansion and Infrastructure Maintenance tied for third

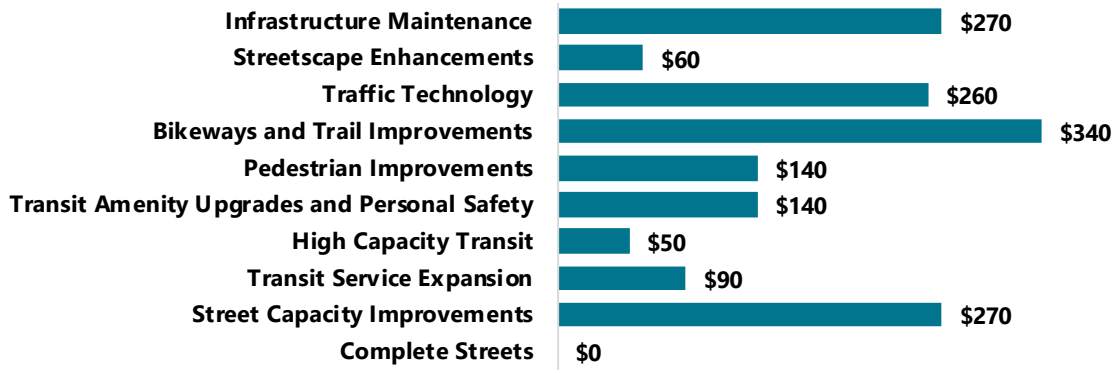
POP UP #4 – SOUTHEAST RECREATION CENTER

- Tuesday, April 8, 2025
- 20 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Street Capacity Improvements
    3. Infrastructure Maintenance

The Connecting Aurora Project team hosted a pop-up event at the Southeast Recreation Center and gathered feedback from 20 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks, with the Bikeway Network receiving only slightly lower levels of support than the rest of the networks. The top three highest funded investment categories were Bikeways & Trails, Street Capacity Improvements, and Infrastructure Maintenance.



Visionary Networks

Does this network improve your quality of life?

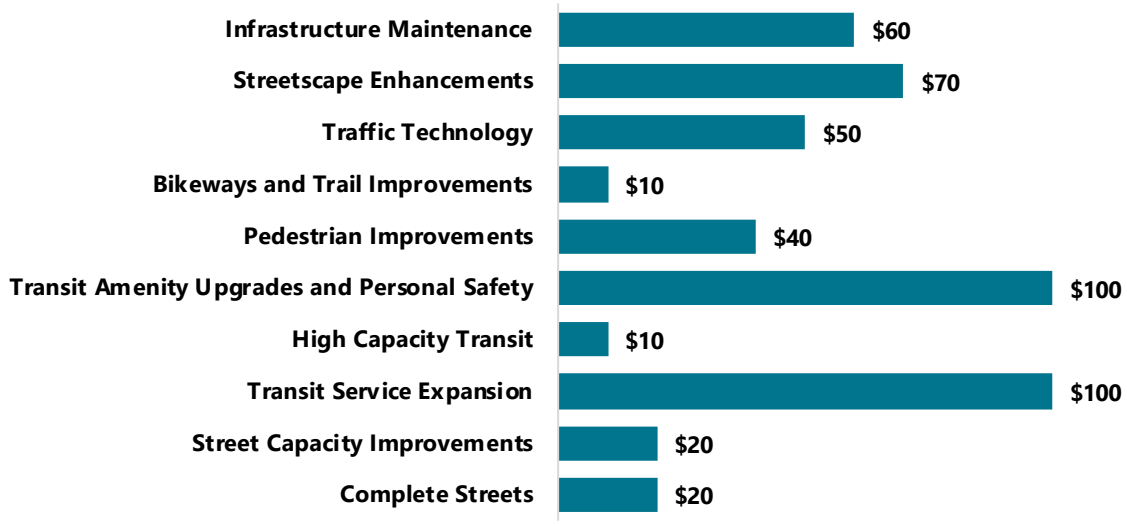
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #5 – MISSION VIEJO LIBRARY

- Wednesday, April 9, 2025
- 5 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Transit Amenity Upgrades & Personal Safety
    3. Streetscape Enhancements

The Connecting Aurora Project team hosted a pop-up event at the Mission Viejo Library and gathered feedback from five participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, and Streetscape Enhancements.



Visionary Networks

Does this network improve your quality of life?

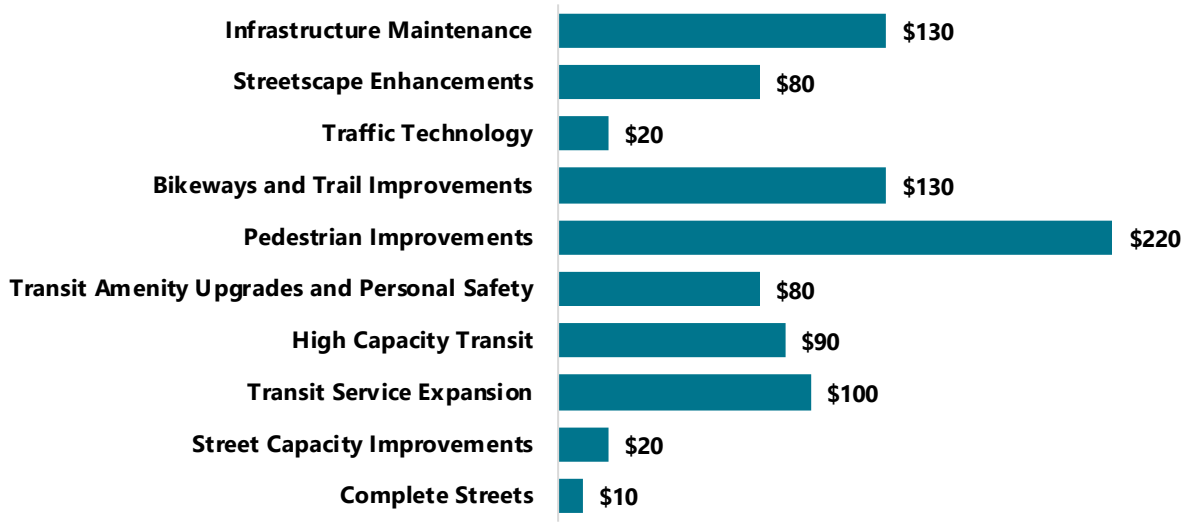
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #6 – AURORA ANIMAL SHELTER

- Saturday, April 12, 2025
- 9 attendees
- Top 3 Investment Categories
    1. Pedestrian Improvements
    2. Bikeways & Trails
    3. Infrastructure Maintenance

The Connecting Aurora Project team hosted a pop-up event at the Aurora Animal Shelter and gathered feedback from nine participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Pedestrian Improvements, Bikeways & Trails, and Infrastructure Maintenance.



Visionary Networks

Does this network improve your quality of life?

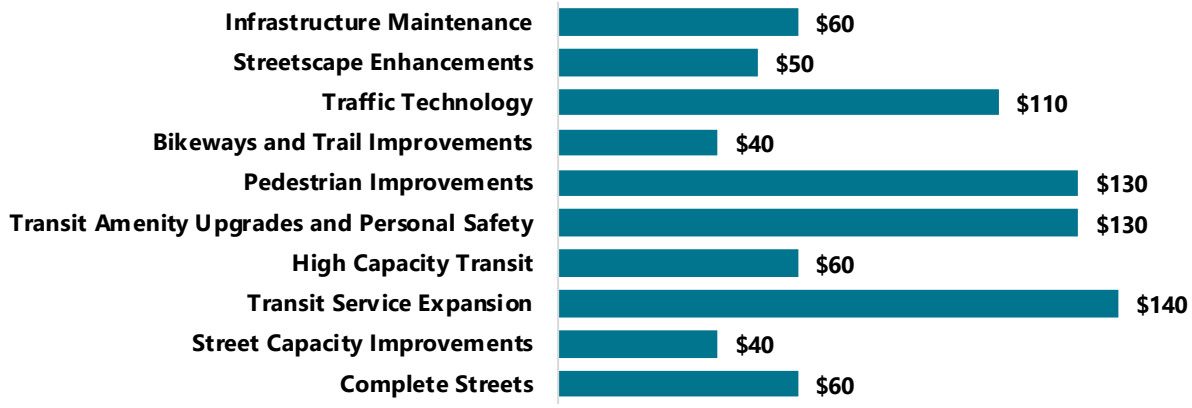
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #7 – COMMUNITY COLLEGE OF AURORA

- Wednesday, April 16, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Transit Amenity Upgrades & Personal Safety
    3. Pedestrian Improvements

The Connecting Aurora Project team hosted a pop-up event at the Community College of Aurora and gathered feedback from 10 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the majority of participants supported the visionary networks. The top three highest funded investment categories were Transit Service Expansion, Transit Amenity Upgrades & Personal Safety, and Pedestrian Improvements.



Visionary Network

Does this network improve your quality of life?

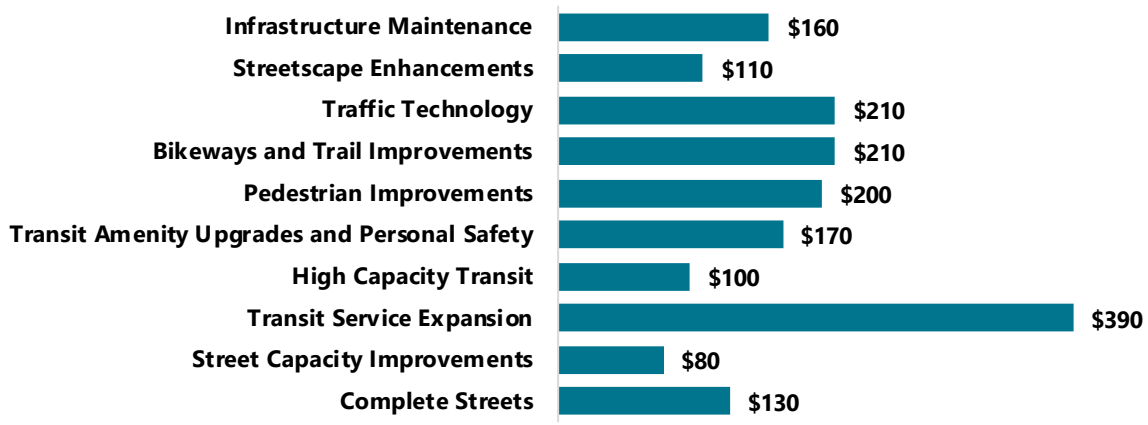
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #8 – MLK LIBRARY

- Wednesday, April 16, 2025
- 17 attendees
- Top 3 Investment Categories
    1. Transit Service Expansion
    2. Bikeways & Trails
    3. Traffic Technology

The Connecting Aurora Project team hosted a pop-up event at the MLK Library and gathered feedback from 17 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, Transit, Sidewalk, and Street networks received 100% support, while the Bikeway network received 64%. The top three highest funded investment categories were Transit Service Expansion, Bikeways & Trails, and Traffic Technology, with Transit Service Expansion leading in funding significantly.



Visionary Networks

Does this network improve your quality of life?

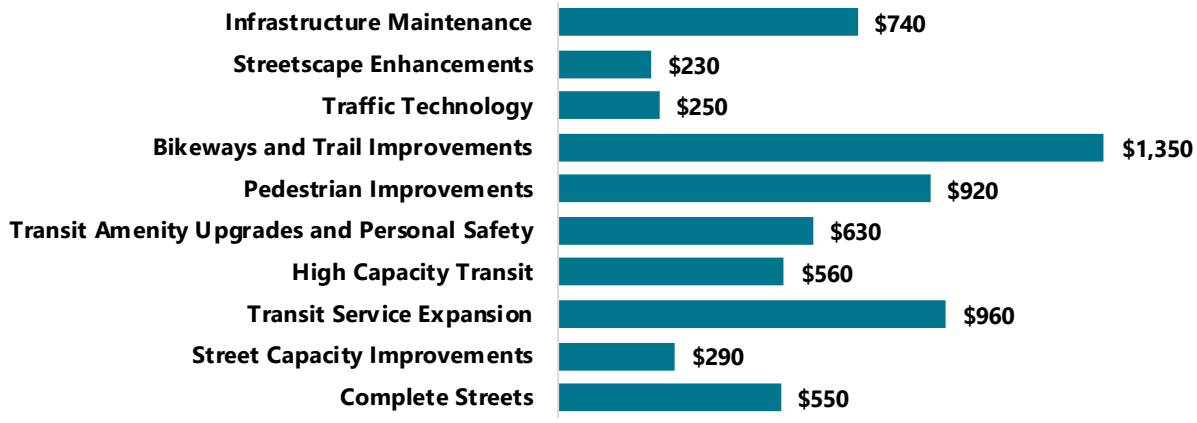
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #9 – CU ANSCHUTZ EARTH DAY

- Wednesday, April 23, 2025
- 56 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Transit Service Expansion
    3. Pedestrian Improvements

The Connecting Aurora Project team hosted a pop-up booth at the CU Anschutz Medical Campus Earth Day event and gathered feedback from 56 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the Bikeway, Transit, and Sidewalk networks received 100% support, while the Streets network received 64%. The top three highest funded investment categories were Bikeways & Trails, Transit Service Expansion, and Pedestrian Improvements.



Visionary Networks

Does this network improve your quality of life?

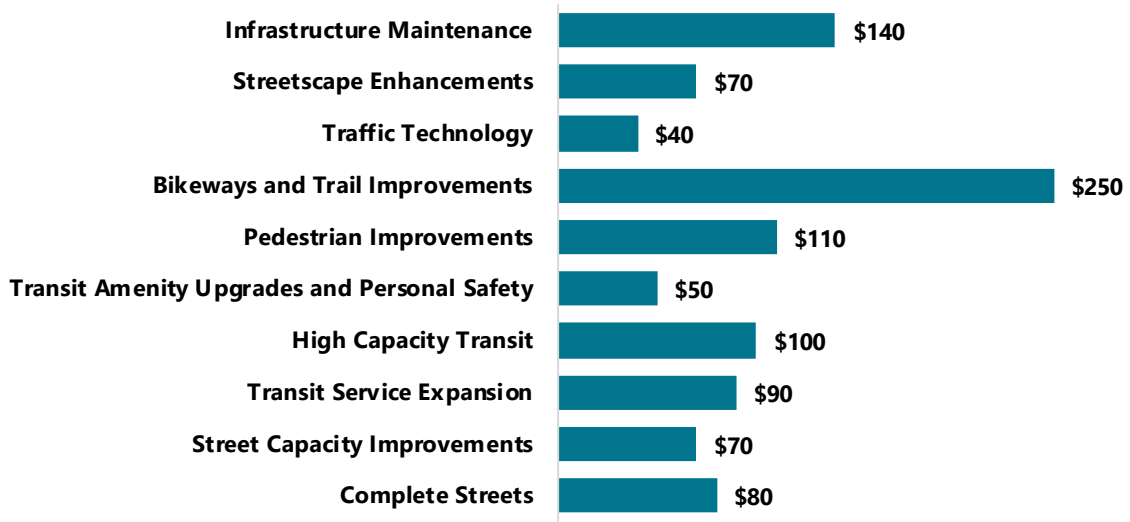
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

POP UP #10 – CENTRAL RECREATION CENTER

- Thursday, April 24, 2025
- 10 attendees
- Top 3 Investment Categories
    1. Bikeways & Trails
    2. Infrastructure Maintenance
    3. Pedestrian Improvements

The Connecting Aurora Project team hosted a pop-up event at the Central Recreation Center and gathered feedback from 10 participants on the visionary networks through a dot board activity and on the investment categories through the jellybean funding activity. As seen in the graphs below, the visionary networks received 100% support. The top three highest funded investment categories were Bikeways & Trails, Infrastructure Maintenance, and Pedestrian Improvements.



Visionary Networks

Does this network improve your quality of life?

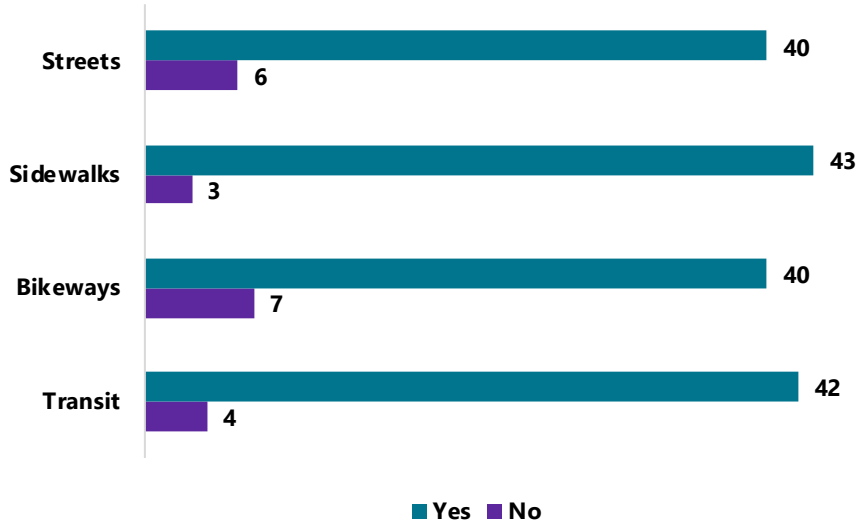
Investment Categories

How would you spend $100 to improve Aurora's transportation system? Allocate $100 across the 10 investment categories based on what you believe will make our transportation system better in the future.

ADDITIONAL COMMENTS & FEEDBACK

At the end of the online survey, participants were asked to provide any outstanding feedback on the networks in an open-ended question: "Please share any additional thoughts or comments you would like the city to know about the proposed networks." A complete record of these responses can be found in Appendix C: Survey: Additional Feedback.

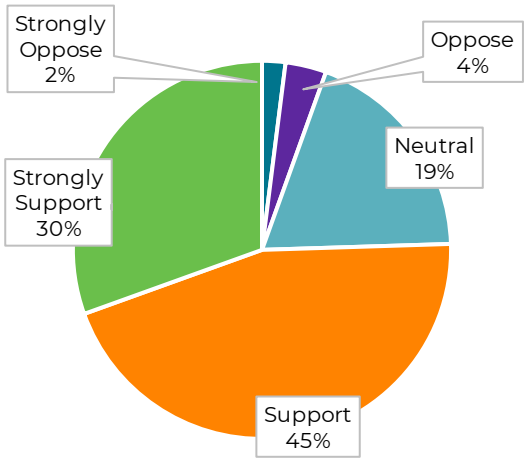
Shortly before and during the beginning of the Milestone 3 Engagement period, the city gathered feedback on Aurora's future in the Build Up Aurora survey. Some of the questions related to transportation and their responses were deemed relevant to Connecting Aurora. A complete record of those responses can be found in Appendix C: Build Up Aurora: Related Survey Comments.



OVERALL RESULTS

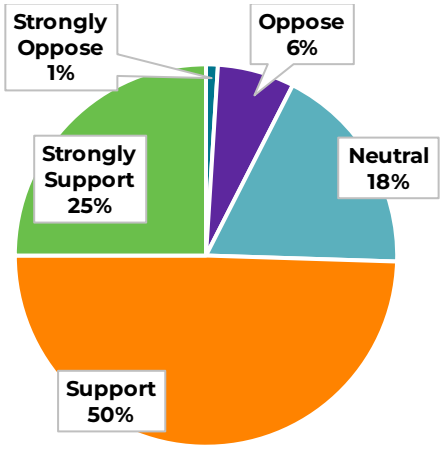
- Feedback was fairly evenly distributed across all Wards.
- There were equal number of responses from those who identify as female and those who identify as male.
- The income bracket with the most responses was $120,000+ per year.
- Many pop-up event participants and roundtable discussion attendees expressed **appreciation for the project as a whole and were glad to have an opportunity to have a voice in the process.**
- Most participants, in both in-person and virtual engagement opportunities, **showed support for all four visionary networks**.
- The three consistently highest funded investment categories by in-persona and virtual participants:
    1. **Bikeways & Trail Improvements**
    2. **Transit Service Expansion**
    3. **Pedestrian Improvements**.

What We Heard Overall – Visionary Networks



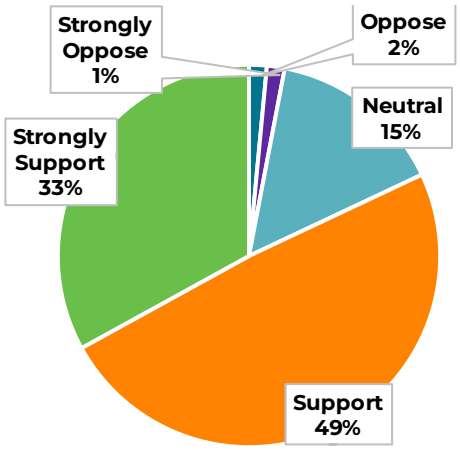
Based on data from the in-person events, 89% of community members agreed that the visionary networks would improve their quality of life.

Does this network improve your quality of life?



WHAT WE HEARD OVERALL – BIKEWAY NETWORK

Based on data from the online survey and the virtual town hall, 85% of community members support or strongly support the Bikeway Network.

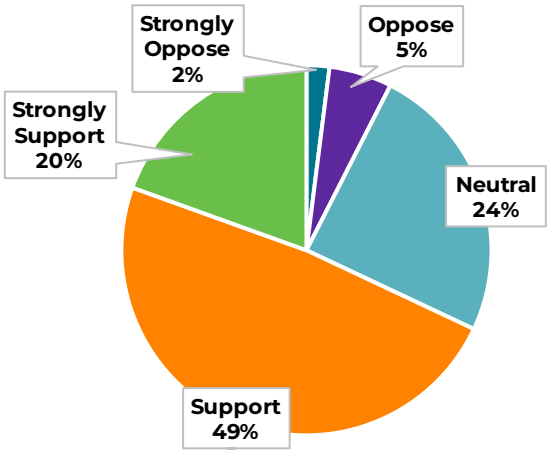


WHAT WE HEARD OVERALL – TRANSIT NETWORK

Based on data from the online survey and the virtual town hall, 75% of community members support or strongly support the Transit Network.

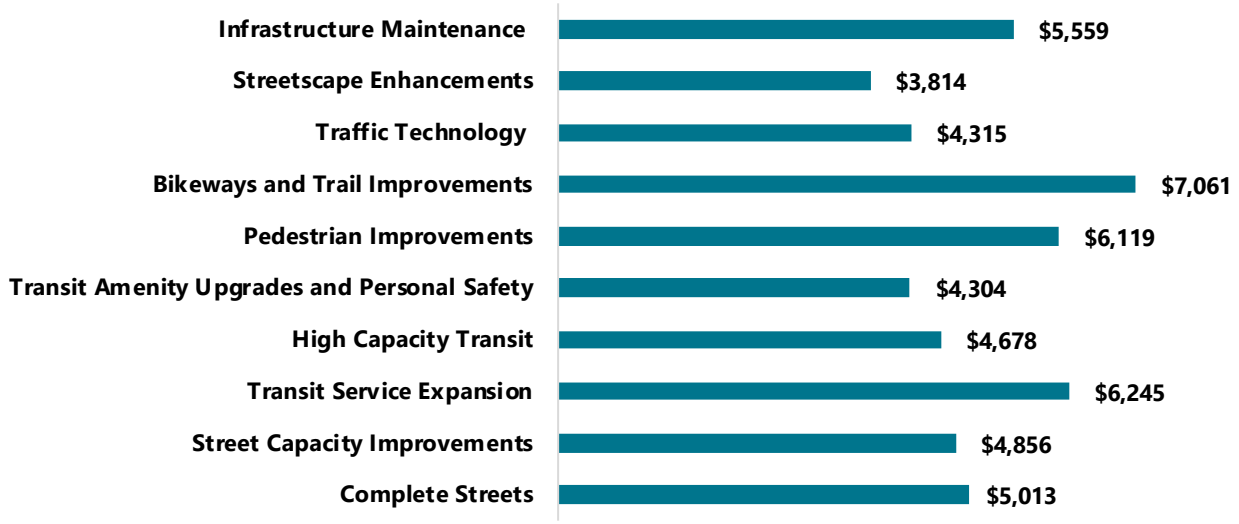
WHAT WE HEARD OVERALL – SIDEWALK NETWORK

Based on data from the online survey and the virtual town hall, 82% of community members support or strongly support the Sidewalk Network.



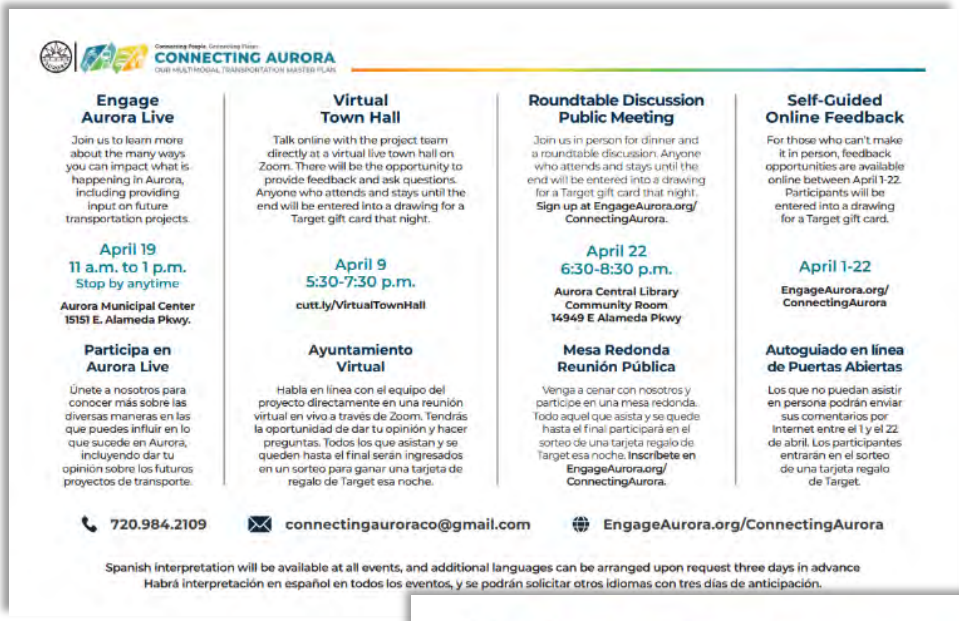
Based on data from the in-person events, 93% of community members agreed that the sidewalk network would improve their quality of life.

WHAT WE HEARD OVERALL – STREET NETWORK



Based on data from the online survey and the virtual town hall, 69% of community members support or strongly support the Street Network.

Do you support the visionary streets improvements areas?



What We Heard Overall – Investment Categories

After combining the data from the online survey and from the jellybean funding activity that took place at nearly every in-person event, the top three most supported investment categories were Bikeways & Trail Improvements, Transit Service Expansion, and Pedestrian Improvements. Infrastructure Maintenance trailed closely behind in fourth place.

Infrastructure Maintenance
$5,559
Streetscape Enhancements
$3,814
Traffic Technology
$4,315
Bikeways and Trail Improvements
$7,061
Pedestrian Improvements
$6,119
Transit Amenity Upgrades and Personal Safety
$4,304
High Capacity Transit
$4,678
Transit Service Expansion
$6,245
Street Capacity Improvements
$4,856
Complete Streets
$5,013

Help Prioritize Future Transportation Projects

Ayude a Priorizar los Futuros Proyectos de Transporte

Final Opportunity to Provide Input

The final opportunity to offer feedback for Connecting Aurora, the city's first-ever multimodal transportation master plan, is coming up in April. Your input will help inform the final multimodal network for Aurora and what traffic, bicycle, pedestrian, and transit projects, programs, and policies we should prioritize in the coming years.

Provide feedback online from April 1-22 or join us at one of our virtual or in-person events.

Última oportunidad para hacer comentarios

En abril se acerca la última oportunidad para dar su opinión sobre Connecting Aurora, el primer plan maestro de transporte multimodal de la ciudad. Sus aportaciones ayudarán a definir la red multimodal definitiva de Aurora y los proyectos, programas y políticas de tráfico, ciclismo, peatones y tránsito a los que debemos dar prioridad en los próximos años.

Envíe sus comentarios en línea del 1 al 22 de abril o participe en uno de nuestros eventos virtuales o en persona.

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2025

More about the Connecting Aurora plan

Over the next couple of years, the city will examine how to make traveling in Aurora better for everyone in our community.

The plan will propose improvements that will offer safer, more comfortable, and more convenient transportation options for everyone who walks, rolls, bikes, drives and takes transit.

The purpose is to create a complete transportation system for people of all backgrounds, incomes, ages, and abilities. The plan will identify necessary projects, policies, and programs for all modes of transportation, including bike, pedestrian, transit, freight and vehicular traffic consistent with the city's overall development vision expressed in the adopted comprehensive plan, Aurora Places.

Connecting Aurora will guide the development, design, and delivery of future multimodal transportation infrastructure projects and programs that focus on providing safer, more sustainable and convenient mobility options for the community.

Get involved

Your feedback is critical in guiding the development of Connecting Aurora.

The final plan will reflect the community's shared vision for Aurora and includes improvements that will enhance your quality of life. There will be several online and in-person opportunities for the community to engage in the planning process throughout the next two years.

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Winter 2025

Project overview

Many studies conducted over the years in Aurora have targeted specific areas of the city to gather public input and provide guidance for transportation needs, resulting in new or improved ways to get around. But this year, the city is launching Connecting Aurora – its first-ever citywide multimodal transportation master plan – to look holistically at the transportation needs of the entire city.

Connecting Aurora is a transportation plan that will identify projects, policies, and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees, and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

What does multimodal mean?

Multimodal is a transportation term that means all the different ways people travel. This could be your car, a bus or train, your feet or wheels, bicycle, scooter, skateboard, hoverboard, or box truck. You name it.

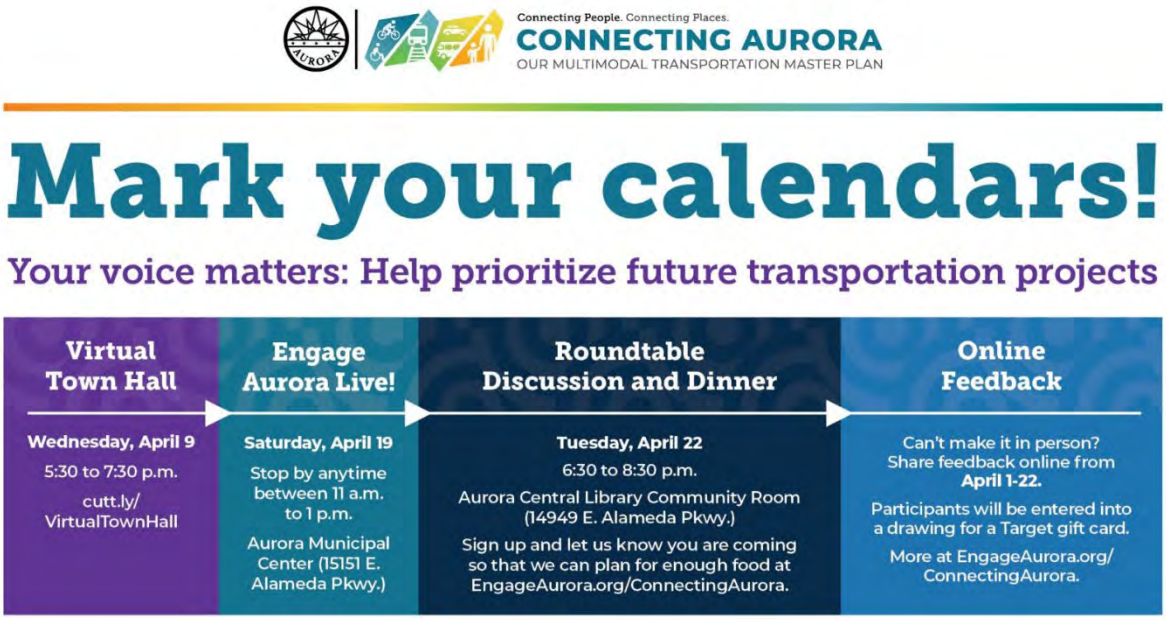
We want to make sure this plan considers all types of transportation modes.

PLANNING PROCESS AND TIMELINE

Connecting Aurora is being developed over the next two years and a final draft will be presented at the end of 2025. Throughout the process, we will work closely with you to make sure we are headed in the right direction and that the outcomes reflect the needs of our community.

Below is a timeline of the planning process.

Discover (Early 2024)
- Existing Conditions Analysis
- Future Trends Analysis



Synthesize (Late-2024)
- Vision, Goals, Objectives, Values, Priorities
- Strength, Weakness, Opportunities, and Challenges Analysis
- Scenario Development
- Modeling and Testing

Visualize (Early 2025 to Mid-2025)
- Multimodal System Development and Evaluation

Realize (Mid-2025)
- Policies and Programs
- Implementation Plan
- Final Report and citywide Transportation Information System

AuroraGov.org

Join us and share with your neighbors

Dear HOA and neighborhood leader,

For those of you who attended our first-ever Engage Aurora Live! over the weekend or recently participated in providing input on some of the critical city projects we have going on, we thank you!

Connecting Aurora Multimodal Transportation Master Plan: Milestone 3

If you haven't yet reviewed our proposed visionary transportation networks for streets, sidewalks, transit and bikeways, we encourage you to explore the maps online, post comments and respond to other people's comments.

Then take our short survey to let us know if we are on the right track and also let us know how you would prioritize transportation projects if you had $100 to spend. Everyone who participates will be entered into a drawing for a Target gift card. **We have extended the deadline for feedback to May 2.**

We also invite you to join us **tomorrow, April 22**, for a roundtable discussion and dinner from 6:30 to 8:30 p.m. at the Central Library, 14949 E. Alameda Parkway, Community Room. We will have large, printed copies of the network maps for you to review and add comments, and talk with us in person. Please RSVP if you plan to attend so we have enough food for everyone.

THIS IS AURORA: CITY NEWSLETTER ARTICLES/MENTIONS

Connecting Aurora Milestone 3 Map Comments and Survey

Deadline: Saturday, May 2

Anyone who travels in Aurora is invited to review the proposed visionary transportation networks (streets, transit, sidewalks and bikeways) developed as part of our citywide multimodal transportation master plan. The deadline has been extended to allow more time to review the maps online, drop pins on the maps, make comments and take the 5-minute project priority survey. Anyone who participates will be entered into a drawing for a Target gift card.

Map link available at EngageAurora.org/ConnectingAurora

Engage Aurora Live! coming this Saturday for resident input and family fun

You are invited to share your thoughts on critical projects, enjoy family friendly activities and free food from 11 a.m. to 1 p.m. this Saturday, April 19, at the Aurora Municipal Center, 15151 E. Alameda Parkway (park on the west side).

The city's first-ever Engage Aurora Live! will offer indoor stations to provide input on city infrastructure, transportation, libraries, Colfax transit services, community services federal funding plan and more. A spring gardening craft for all ages and free food will be available while supplies last.

Tour the AuroraTV studios at 11:30 a.m. and 12:30 p.m. Find out more about city jobs, boards and commissions, and how to get more involved in your local government.

Outside, explore our Touch-A-Truck area with vehicles from the Aurora Police Department, Aurora Fire Rescue, Falck Rocky Mountain, the Public Works Department and AuroraTV. Check out the Aurora Public Library Bookmobile.

When you arrive, stop at our tent to pick up an event passport to get stamped. Visit the designated stations to be entered into a drawing for a gift basket.

Spanish interpretation will be available on site.

To find out more, visit EngageAurora.org/EngageAuroraLive.

Connecting Aurora Milestone 3 Survey

Through April 23

Review the latest information and give feedback for Milestone 3 of this citywide multimodal transportation planning effort. Anyone who takes the survey will be entered into a drawing for a Target gift card.

EngageAurora.org/ConnectingAurora

Connecting Aurora Roundtable Discussion and Dinner

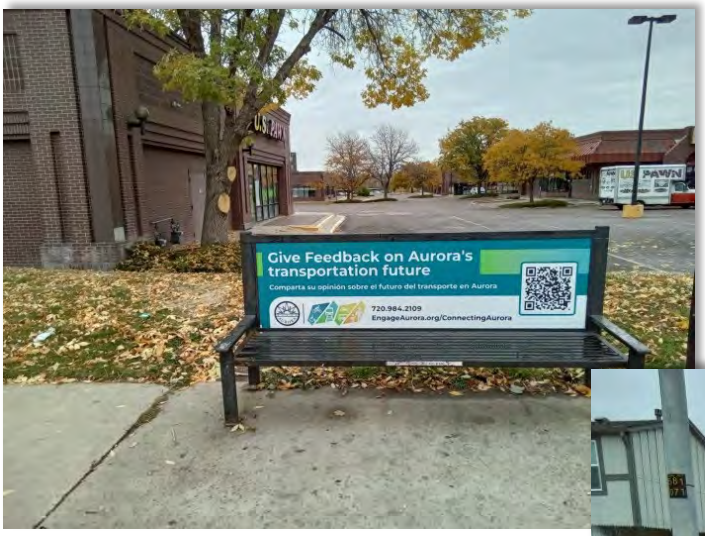
Tuesday, April 22, 6:30 to 8:30 p.m.

Join us in person for dinner and a roundtable discussion to give feedback for Milestone 3 of this citywide multimodal transportation planning effort. Spanish interpretation will be available, and additional languages can be arranged on request at least three days in advance. Anyone who attends and stays until the end will be entered into a drawing that night for a Target gift card.

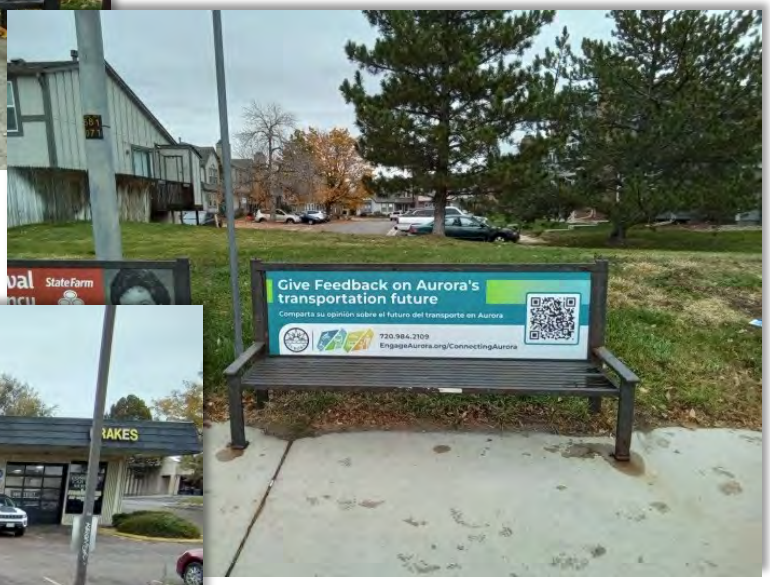
Central Library Community Room, 14949 E. Alameda Parkway

Sign up (so we can plan for food): EngageAurora.org/ConnectingAurora

Engage Aurora Live!



Saturday, April 19, 11 a.m. to 1 p.m.



Provide input on some critical projects impacting Aurora's future, and enjoy food and family friendly activities like Touch-A-Truck. Park on the west side to access the event. When you arrive, stop at our tent to pick up an event passport to get stamped and be entered into a drawing for a gift basket. Offer feedback on projects like Build Up Aurora infrastructure planning, Connecting Aurora multimodal transportation master plan, Colfax BRT Next bus rapid transit east of I-225, and Radiating Possibilities library master plan.

CONNECTING AURORA

JELLYBEAN FUNDING ACTIVITY

Instructional Sign

Investment Category Cards

Complete Streets

Complete street investments focus on designing streets to safely accommodate cars, bikes, transit, and pedestrians. It is specific to streets that need multimodal improvements.

Project Types

- Traffic Calming Measures
  - Speed Bumps
  - Curb Extensions
- Sidewalk expansion
- Bike lanes or shared-use path
- Transit signal priority

Street Capacity Improvements

Street Capacity Improvements focus on increasing the ability of roadways to accommodate more vehicles and reduce congestion, improving overall traffic flow and shortening travel times. These projects aim to enhance the efficiency and capacity of existing streets or add new capacity to support increased demand.

Project Types

- Adding travel lanes
- Adding turn lanes or through lanes at intersections
- Constructing new streets
- Freight corridor improvements
- Improving intersections

Transit Service Expansion

Transit Service Expansion focuses on increasing the reach, frequency, and coverage of public transit services to improve access and connectivity for more users. These projects aim to enhance mobility options and reduce reliance on single-occupancy vehicles.

Project Types

- New bus routes to underserved areas
- Increased bus and train frequency
- Microtransit service (on-demand shuttles)
- Extended service hours

Transit Amenity Upgrades and Personal Safety

Transit Amenity Upgrades and Personal Safety focus on improving the comfort, convenience, and security of transit facilities and services to enhance the overall rider experience and encourage transit use. These projects aim to make transit more accessible, user-friendly, and safe for all passengers.

Project Types

- Enhanced bus stops (shelter, seating, etc.)
- Improved lighting
- Security measures (cameras, call boxes, etc.)
- ADA compliant boarding areas
- Pedestrian and bicycle access

High Capacity Transit

High-Capacity Transit focuses on developing and expanding transit services that can move large numbers of passengers efficiently and reliably, typically along regionally significant corridors. These projects aim to provide faster, more frequent, and higher-volume transit options to reduce congestion and improve regional connectivity.

Project Types

- Light rail and commuter rail extensions
- Bus Rapid Transit (dedicated bus lanes and supporting infrastructure)
- Express bus service (limited stops)
- Dedicated transit lanes
- Transit signal priority
- Mobility Hubs

Pedestrian Improvements

Sidewalk Projects focus on improving and expanding pedestrian infrastructure to enhance safety, accessibility, and walkability. These projects aim to create a more connected and comfortable pedestrian network.

Project Types

- New sidewalks to fill network gaps
- Sidewalk widening in areas with higher pedestrian volumes
- ADA compliant sidewalks (ramps and paving)
- Buffer areas to separate people from traffic
- Enhanced pedestrian crossings

Streetscape Enhancements

Streetscape Enhancements focus on improving the visual appeal, functionality, and comfort of streets and public spaces to create more inviting and pedestrian-friendly environments. These projects aim to support vibrant, accessible, and safe streetscapes.

Project Types

- Street furniture (benches, trash cans)
- Public art and murals
- Decorative lighting
- Landscaping and street trees

Infrastructure Maintenance

Infrastructure Maintenance focuses on preserving and maintaining existing transportation infrastructure to extend its lifespan, improve safety, and maintain functionality. These projects aim to prevent deterioration and reduce long-term repair costs.

Project Types

- Pavement resurfacing
- Pothole filling and crack sealing
- Bridge and overpass repairs
- Sidewalk and curb repairs
- Stormwater drainage repairs
- Traffic signal and streetlight repairs
- Guardrail and barrier replacements

STAKEHOLDER MEETING NOTES

MEETING SUBJECT: Stakeholder Group – Meeting #6
LOCATION: Virtual – MS Teams
DATE/TIME: March 26, 2025, at 2 PM

1. Attendees:

1. Tara Bettale, HDR
2. Shaida Libhart, HDR
3. Ambriel Speagle, HDR
4. Carlie Campuzano, City of Aurora
5. Huiliang Liu, City of Aurora
6. Julie Patterson, City of Aurora
7. Tom Worker-Braddock, City of Aurora
8. Nick Leach, Aurora Public Schools Planning Department
9. Courtney Stryker, Arapahoe County Council on Aging/ Arapahoe County Senior Resources
10. Eugenia Titterington, Village Exchange Center
11. John Hudgens, Children's Hospital Colorado
12. Lyle Artz, Fitzsimmons Redevelopment Authority
13. Ryan Billings, Nelson Nygaard
14. Desiree Banka, Sunny Homes and Associates
15. Matt Schaefer, Cherry Creek School District
16. Ryan Shaaban, Tryba Architects (FRA Master Plan)
17. Yarkenda Payne, Foundation for Sustainable Urban Communities
18. Erik Balsley, Anschutz Medical Campus
19. Sam Valeriano, Foundation for Sustainable Urban Communities
20. Tom Tobiassen, Bicycle Aurora

2. Presentation & Discussion:

1. Welcome and Introductions (5 minutes)

2. Schedule Overview (10 minutes)

3. Public Engagement Review (20 minutes)

- What we heard during Milestone 2

4. Milestone 3 – Multimodal Network Development Input (45 minutes)

- Review of multimodal network categories and opportunity to provide input

5. Discussion of Networks

- **Tom Tobiassen**: I am vacationing in Tucson, AZ and I'm astounded by the increase in e-bikes on the bikeways and trails. People are traveling much longer distances on less expensive e-bikes.
- **Tom Tobiassen**: I think e-bikes will evolve and provide more transportation options in the future.
- **Shaida Libhart**: We are seeing more and more use of e-bikes, so we are trying to be thoughtful of how the network can accommodate that
- **Tom Tobiassen**: Netherlands is a great model for separated lanes for each mode.

- **Lyle Artz**: You are showing maps of only different parts of Aurora for each slide. Recommend you show the entire City of Aurora in the different maps."
- **Tara Bettale**: Thanks for the comment! The full city will be showed - for the sake of readability, we wanted to zoom in
- **Tom Worker-Braddock**: We recognize the map snapshots we showed are very limited, so we are looking for general feedback at this point. We hope that everyone can plan some time to sit down in the coming weeks and provide feedback on the networks.
- **John Hudgens**: Recognizing that this is a City of Aurora project, to what extent will RTD be involved. For example, is Aurora going to provide funding to RTD to increase / change public transit within the city limits?
- **Shaida Libhart**: We have been thoughtful about coordinating with RTD. Part of the approach is to understand where there are opportunities and where there are other models or implementation strategies to address any issues.
- **Ryan Billings**: The goal is to understand the need for increased transit, align the needs with potential solutions related to new routes, increased service, & improved infrastructure, and understand the costs of those solutions. Then we must have internal conversations about which projects are most important. RTD is an essential partner in working through transit needs and how we can potentially fund those solutions, and what might those projects look like in the first place.
- **Shaida Libhart**: It is important to consider the future corridor and what that might look like. We want to make it easier on ourselves for the future. There may be priorities listed here that might not actually happen, but we want to be prepared. Things like population and needs can change, but we want to make sure we are thinking things through now.
- **Tom Worker-Braddock**: RTD and the City have a good relationship. Before this, we did not have a citywide plan. Now that we have a masterplan, we can point to what the City has agreed to be important when meeting with RTD in the future. This process has also identified areas of the City where bus routes are delayed due to infrastructure issues. Traditionally, the City is responsible for the roads RTD buses use, and RTD is responsible for the actual service. So, the City does have the power to increase service reliability by improving infrastructure. We do also want to consider what the capacity of the City is to self-fund additional transit service. This plan allows us to at least begin that conversation.
- **Tara Bettale**: RTD is also part of our Technical Advisory Committee and will be present at our Roundtable Discussion on April 22.
- **Yarkenda Payne**: Is RTD on the call? They are currently doing a transit equity study to see where the gaps in service are. This could be a great opportunity for collaboration or at least convo (if this isn't happening already). This work seems similar, so it might be a good idea to have a conversation with RTD.
- **Ryan Billings**: We've been chatting with RTD about this—once we finalize the networks on the service side, we can make sure the service is serving folks in the appropriate way. We need to consider more than just geography when it comes to this.

- **John Hudgens**: On a completely different line of thought, is the city looking into building out the EV charging station infrastructure to encourage the transition to EVs. It can be a huge barrier to people transitioning over to EVs.
- **Tara Bettale**: Cities have been mobilizing to increase these efforts through rolling out EV readiness plans in the recent years. Politics can impact this of course, but that type of effort could come out of this plan.
- **Shaida Libhart**: The policies are the underlying structure that help the infrastructure investments get built. Programmatic piece that helps leverage these investments. We haven't figured out the level of the need/scope of EV infrastructure yet. Once we get into policy and programmatic phase, we will know more. There could be a recommended policy or program that is related to EVs that come out of this plan. Either way, there would need to be follow up to put those into place by the City.
- **John Hudgens**: So, EV are not part of this study, but it could be an outgrowth of it?
- **Huiliang Liu**: This project includes a phase of policy and programs—so EV could be part of that phase.
- **Lyle Artz**: We are now installing 2 new electric Car charging stations with a State Grant that was available. There is a program that ends in June that you can get state funding for charging stations.
- **Lyle Artz**: I will have to leave at 3:10 for another meeting. Will you be sending out info/tasks to us to accomplish?
- **Tara Bettale**: Yes, Lyle! We'll send these materials as well as instructions, next step needs, etc.

5. Milestone 3 Promotion Reminder (5 minutes)

6. Next Meeting – May 14 - *Could shift based on Milestone 4 efforts* (5 minutes)

MAP COMMENTS

Figure 1. Visionary Transit Network Comment Map

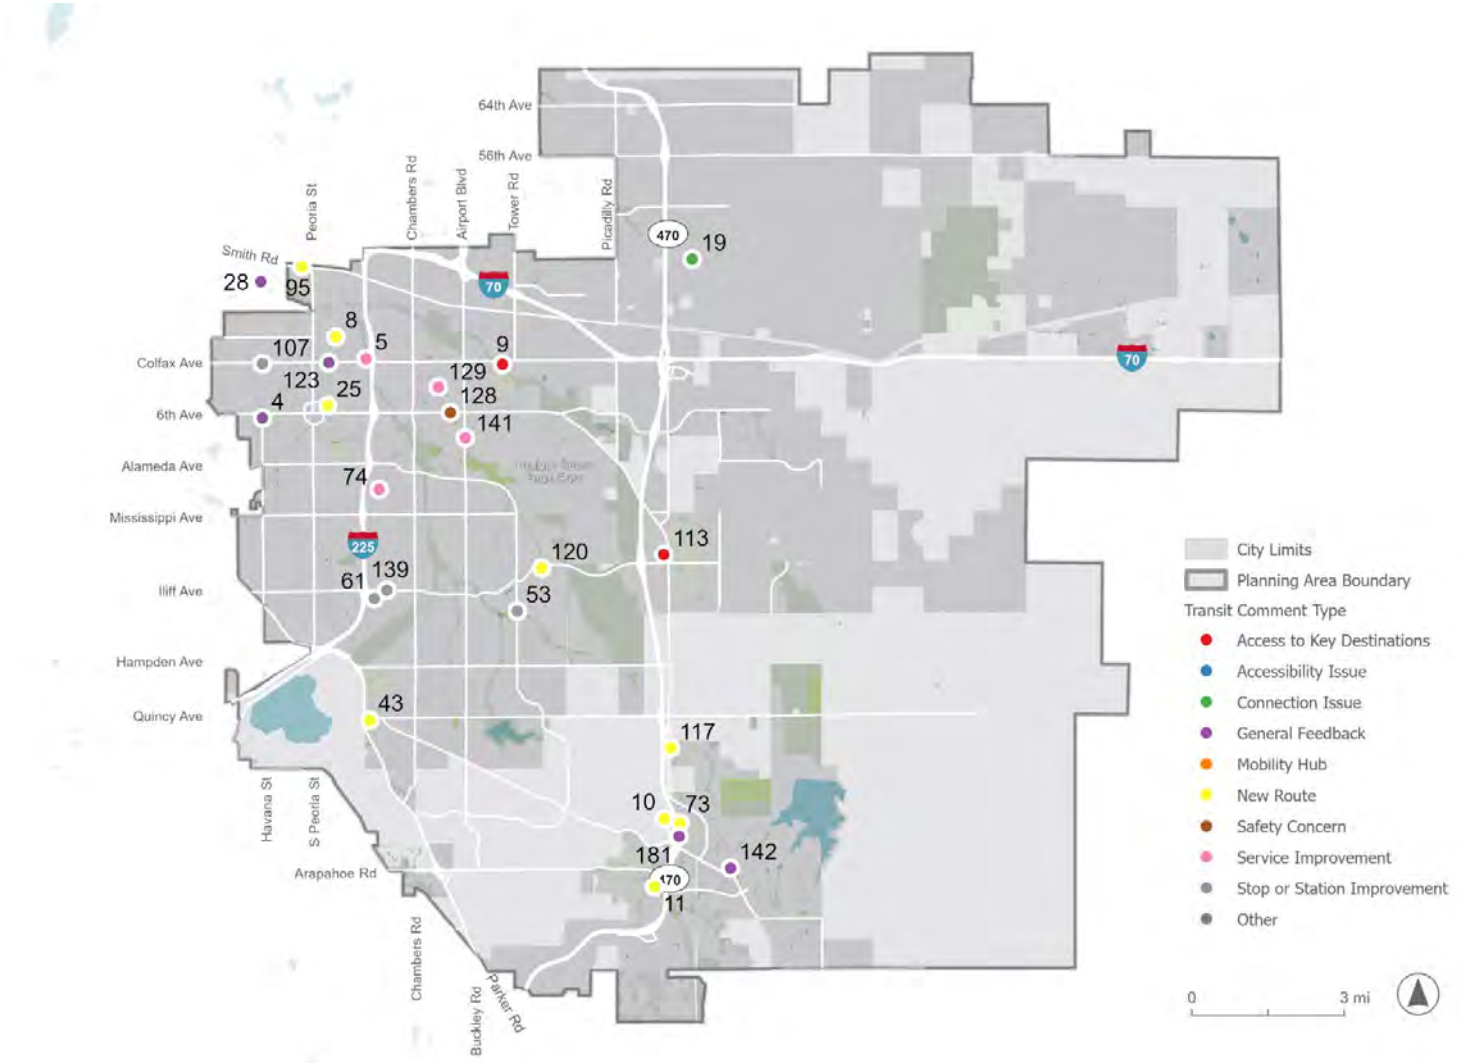

Table 1. Transit Map Comments

ID	Type	Impact	Comment	Like	Dislike
4	General Feedback	High - This issue significantly impacts my ability to take transit.	TWB Test	1	
5	Service Improvements	High - This issue significantly impacts my ability to take transit.	Need a minimum of 15 minute service frequency	6	
8	New Route	High - This issue significantly impacts my ability to take transit.	Need RTD Bus service to Run on Montview from Peoria to The Fitzsimons parkway thru the Fitzsimons Anschutz Campus	2	
9	Access to Key Destinations	Medium - This issue somewhat impacts my ability to take transit.	Triple Creek Trailhead at 18000 E Colfax Ave, Aurora, CO 80011 is slated for improvements. There is an unlit bus stop with no shelter, just a bench. Additionally, the parking lot is not lit. Improvements potentially include a shelter, bike skills course, and public art. How can collaborative funding an site design for this project account for more appealing multi-modal bike / ped / transit connectivity in an area potentially slated for future BRT. Potential partners in include City of Aurora PROS, City of Aurora Art in Public Places, RTD, High Line Canal Conservancy, Sand Creek Regional Greenway Partnership	2	
10	New Route	High - This issue significantly impacts my ability to take transit.	Would love to get a light rail out in this area that easily goes to Anschutz Medical Campus. The one at Parker and 225 is so far I just drive, would take longer to take the train from the Parker station	4	
11	New Route	High - This issue significantly impacts my ability to take transit.	Would love a train stop close to here. Huge residential area - could cut down on traffic	4	
19	Connection Issue	Low – This issue is a minor inconvenience or suggestion.	As the city builds out to the north east, there is a an opportunity to build rail or at least set aside right-of-way to build rail. It is WAY more expensive to add rail once the city is built up. As neighborhoods and large city places (eg The Aurora Highlands) are built, additional conference centers, future additions to the Air & Space Port, entertainment venues, etc. are added, we need to think about adding rail connections. There would be a huge benefit to people moving to Aurora on the east I-70	9	

ID	Type	Impact	Comment	Like	Dislike
			corridor if they could take a commuter rail train into Denver rather than commuting by car or bus.		
25	New Route	High - This issue significantly impacts my ability to take transit.	TWB 4/11/25 Transit test. Confirm and delete.		
28	General Feedback	High - This issue significantly impacts my ability to take transit.	TWB 4/11/25 Chrome test. Confirm and delete.		
43	New Route	Medium - This issue somewhat impacts my ability to take transit.	Allowing for a future rail station at the East Bank development for rail (probably underground) to lead north to Nine Mile Station & up Havana and southeast to Southlands would really help connect the city.	4	
53	Stop or Station Improvement	High - This issue significantly impacts my ability to take transit.	The bus stop at Tower and Sterling Hills Parkway is miserable on days after snow or rain as the sludge and muck is sprayed all over the sidewalk and bench by passing drivers. Please move the sidewalk and bench further from the street. Would be nice if there was also a delineated part of the sidepath for bicycles so they aren't crossing right where people are waiting for the bus.	4	
61	Stop or Station Improvement	Low – This issue is a minor inconvenience or suggestion.	The parking garage at the Iliff light rail station is paid, even for same-day transit. This discourages daily travel via light rail and can cause confusion compared to other Park-n-Ride facilities. Removing the fee for same-day parking would likely improve ridership.	4	1
73	New Route	High - This issue significantly impacts my ability to take transit.	Planning for a train station for the Southlands area to connect north to the airport and new developments near the airport and northwest towards Denver would be amazing. Even if such high capacity is not in the cards for the near future planning ahead to ensure it's possible when the funds are available would be great. Grade separated rail is high capacity without the drawbacks of getting stuck in traffic or possible pedestrian collisions. With well planned stations areas can be restricted to those with tickets and platform screen doors can be installed to make it even safer.	5	
74	Service Improvements	Medium - This issue somewhat impacts my ability to take transit.	If there is any way to grade separate the rail leading to the Aurora Transit Center to smooth out the current sharp corners and aviod conflicts with cars such a plan ought to be considered, even if gathering the funds would take some time.	6	

ID	Type	Impact	Comment	Like	Dislike
			This would also create an opportunity to upgrade the stations at the Transit Center and 2nd Ave & Abilene Station. By elevating or burying the tracks it would allow for a convenience store/coffee shop/other amenities & restrooms on the ground floor while making it easier to have fare gates leading to the platform, which could be widened and better protected from the elements.		
95	New Route	High - This issue significantly impacts my ability to take transit.	I live close to Nine Mile Station, but would never consider taking transit again to the airport because it's inconvenient and takes too long. There needs to be a train that goes from Nine Mile directly to the airport without requiring a transfer at Peoria Station, where train schedules don't line up very well. It takes too long and the system is just too unreliable.	4	
107	Stop or Station Improvement	High - This issue significantly impacts my ability to take transit.	Colfax is the most direct way to get to downtown from near this area. A lightrail down Colfax connecting Aurora to Downtown would be so beneficial.	2	
113	Access to Key Destinations	High - This issue significantly impacts my ability to take transit.	The time to plan for, budget, and build a light rail line going straight south from DIA is now. E470 and Jewell is expected to be the center if Aurora in the next 15 years. If there were a light rail hub at Southlands with a line that went along 470 or even farther East where the roads are not as complete, it would make transportation to the airport so much easier, would decrease traffic along E470, Tower Road, and Pecos.	5	
117	New Route	High - This issue significantly impacts my ability to take transit.	A future rail route along the E470 with stations at the airport, new Aurora Highlands development, Jewel, Quincy (to serve Copperleaf) and at Southlands would be a great amenity for the city, and would improve traffic along Aurora Parkway, Quincy, Airport Blvd/Buckley and other streets. It would also be an attractive option in general by giving people a way to ge to the airport without having to park there.	6	
120	New Route		I hope I'm out of Aurora and Colorado before you libtards build a rail line right in my backyard to bring more gang members, car theifs and drug addicts within yards of my house. Why would you want to bring more of Denver into Aurora? Oh,so it's convenient for Denver high rollers to cruise through my backyard on their way to the airport!	2	

ID	Type	Impact	Comment	Like	Dislike
123	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	Glad to see that Aurora has plans to have the BRT on Colfax continue along the Aurora segment of the street.	3	
128	Safety Concern	High - This issue significantly impacts my ability to take transit.	HALP		
129	Service Improvements	High - This issue significantly impacts my ability to take transit.	TWB test		
135	General Feedback	High - This issue significantly impacts my ability to take transit.	I'd like to see more robust community outreach. Signs in the ground, tables at local shops, speaking at community centers. Realistically, how many people know about this, provide feedback, etc?		
139	Stop or Station Improvement	Low – This issue is a minor inconvenience or suggestion.	Beatutify all stops. Benches that are cleaned. Add drought tolerant plants like ice plants. Getting more people to ride transit means changing how people perceive it, and that includes the stops.	1	
141	Service Improvements	High - This issue significantly impacts my ability to take transit.	There are 6 schools and 3 APS department buildings on Airport between Centerpoint and 6th. 5 of these programs serve all of APS, making bus systems important. The 169 runs every 60 minutes. We need more frequent routes during the school year. In general, Aurora is lacking E-W routes. Since Covid, we lost the 157, 131 and the frequency of the 15 and the 169 has decreased. It seems like RTD is decreasing service throughout the center of your map. We need accessible stops that feel safe for all.	2	
142	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	It might be worth addressing transit in far southeast Aurora with a micromobility solution to connect far-flung newer neighborhoods with existing but limited RTD regional connections and also facilitate local travel. I also wonder if there is a consideration about a micromobility solution that could connect far southeast Aurora with Parker as many far southeast Aurora residents travel often to Parker and likely many Parker residents go to Southlands for shopping. Is multi-jurisdictional collaboration a consideration?	1	
181	General Feedback	Medium - This issue somewhat impacts my ability to take transit.	Appreciate the future transit corridor marked along the E-470. Hope it can be a fully grade separated rail segment for optimal functionality and safety.	1	

Figure 2. Visionary Bicycle Network Comment Map

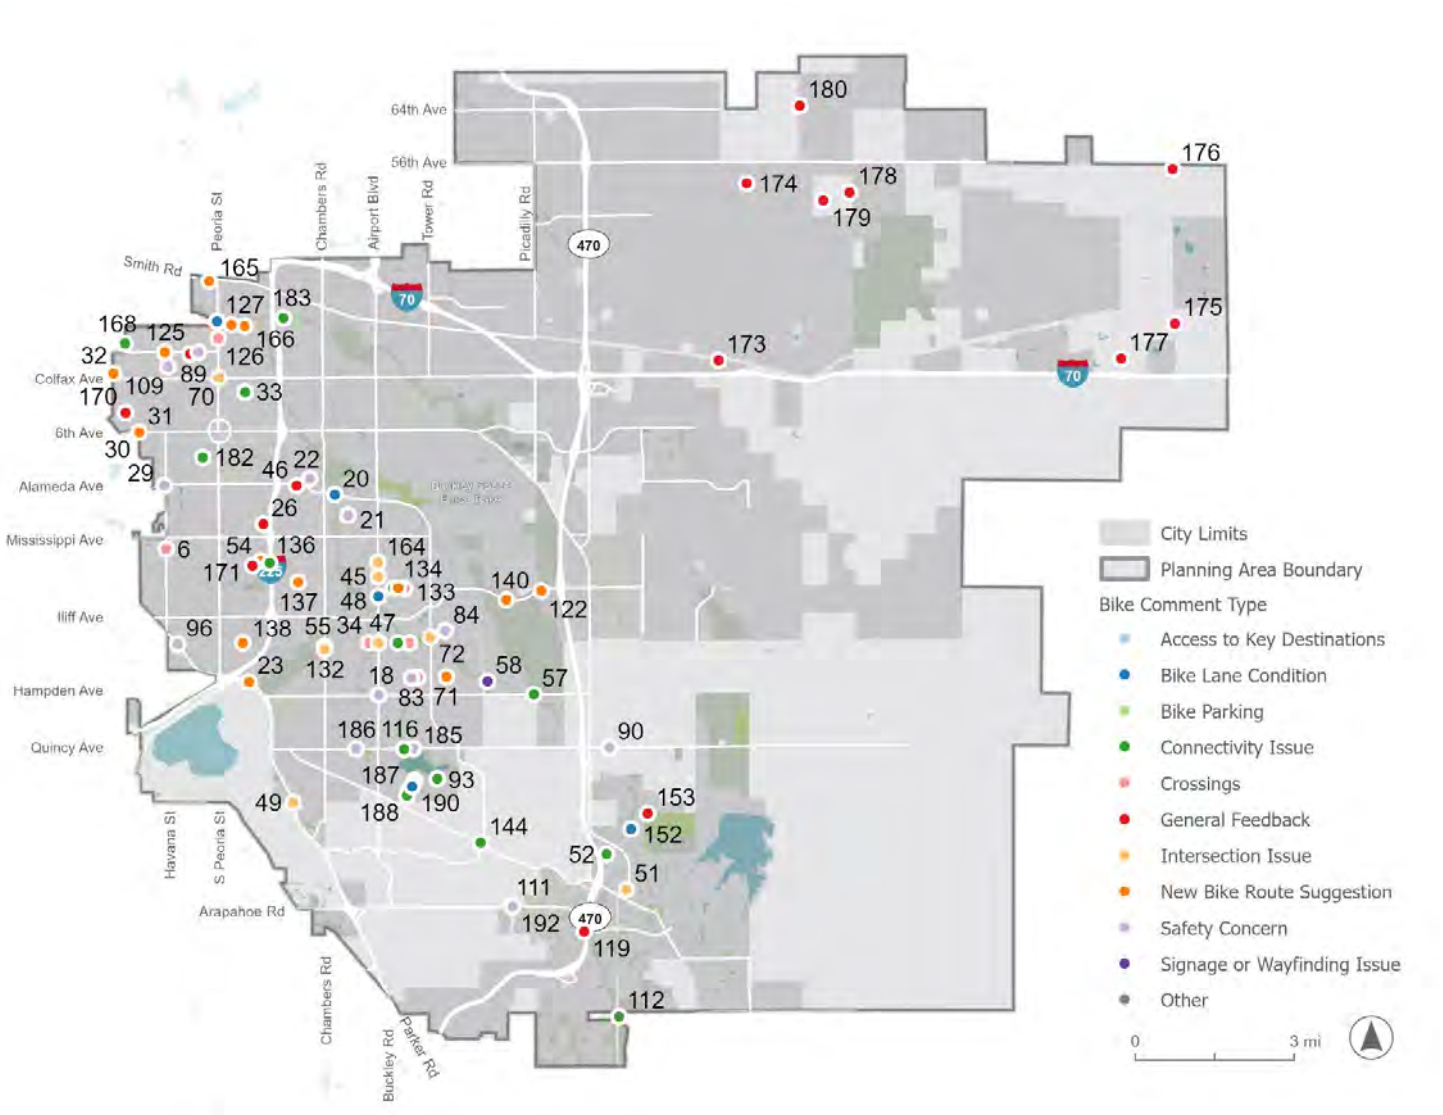

Table 2. Visionary Bicycle Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
6	Crossings	High - This issue significantly impacts my ability to safely bike.	need a signal protected crossing	2	
18	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Buckley rd. is designated a bike route to the right of the right driving lane. Very unsafe in current condition. . Cars are going 50+ mph. Not safe to bike on this "bike route"	9	
20	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	During colder months, water drips from the bridge above and creates a massive sheet of ice on the incline to the North. Even walking there is dangerous during that time.	4	
21	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	I have a lot of issues crossing the street with my bike here, mostly parents speeding to drop off their kids at the school and not paying attention. I've been almost hit by a car three times in the last year: Cars swerving into the bike lane to park, cars parking in the bike lane where there is no parking, and cars turning into the parking lot and not looking for bikes)	2	
22	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	There is no crosswalk here and all the police officers speed on this road to get to work on time, making it dangerous to cross over and get to work. I also walk here and have trouble with cars speeding around the corner. Speed bumps would help.	2	
23	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	I'd love to be able to bike to work instead of driving. To do that I'd need to bike on Parker and as it is that is not an option with the speed of traffic. A sidepath or separated bike lane would be ideal.	6	
26	General Feedback	High - This issue significantly impacts my ability to safely bike.	TWB 4/11/25 Bikeway test. Confirm and delete.		
29	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Slip lane from Havana onto Alameda makes the Off-street Shared-use Bikeway (sidepath) feel dangerous ESPECIALLY when heading East since drivers are often looking over their shoulder for drivers heading West. Would be ideal to eliminate the slip lane, or give it a signal like Leetsdale at CO Blvd.	3	

ID	Type	Impact	Comment	Likes	Dislikes
30	Crossings	Medium - This issue somewhat impacts my ability to safely bike.	Drivers don't stop at this signal when turning right. They pull forward blocking the crosswalk which is also the crossing for the Off-Street, Shared-Use Bikeway (Side Path). At minimum, we need a No Turn on Red & ideally a right on green arrow only signal like 9th at CO Blvd (though drivers often ignore that as well.)	2	
31	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	This Off-street, Shared-use Bikeway (Side path) needs to be continued & connected by Denver. Seems like it comes to a dead-end at Monaco Pkwy.		
32	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	16th Ave is a planned Neighborhood Bikeway in Denver. Would be good to connect into Aurora especially with the coming Colfax BRT.	3	
33	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This is a short connection that needs a Shared-use Bikeway (Trail) connecting Ursula to 13th Ave only for Bikes & Pedestrians. It is currently difficult to navigate with any amount of speed.	2	
34	Crossings	High - This issue significantly impacts my ability to safely bike.	Median refuge island needed here	4	
35	Crossings	High - This issue significantly impacts my ability to safely bike.	Median refuge island/protected ped-bike crossing needed here	2	
36	Crossings	High - This issue significantly impacts my ability to safely bike.	Signalized pedestrian crossing needed here	1	
45	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	The intersection of Buckley and Mexico needs significant improvements for cyclists. The bike lanes on Buckley are narrow, full of debris and dangerous while the bike lanes on Mexico peter out on approach to the intersection. A protected intersection would be better for cyclists and pedestrians and make cyclists more predictable and visible for drivers as well.	2	
46	General Feedback		TWB test - delete		
47	Intersection Issue (e.g. crossing	High - This issue significantly impacts my ability to safely bike.	This intersection is a connection point between the end of Unnamed Creek Trail at the Center Rec Center & future park, the West Tollgate Creek trail and the bike lanes on	2	

ID	Type	Impact	Comment	Likes	Dislikes
	difficulty, signal timing)		Buckley. Currently there is no bicycle infrastructure, it ought to be upgraded to a protected intersection. This would improve safety for pedestrians and cyclists, and visibility and predictability of cyclists for drivers.		
48	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	The Buckley bike lane would be a convenient bicycle route, but the current narrow lane filled with cracks, holes and debris right next to fast moving traffic with no barrier or buffer is not something I'm willing to risk my life using. Please upgrade this route to give cyclists their own designated space that is protected from car traffic by a curb at the very least.	4	
49	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	Crossing Parker Road at Belleview on bike is extremely unsafe feeling. Upgrading the intersection to a protected intersection to improve visibility of pedestrians and cyclists, reduce crossing distance and conflicts and move the stop limit line back a bit to make it easier to tell which drivers are just going to run the red light would be nice.	3	
50	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There is currently no designated space for bicycles on the small segment of Yale between the terminus of Unnamed Creek Trail at Center Rec Park and West Toll Gate Creek Trail.	1	
51	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	The Southlands Parkway & Aurora Parkway intersection could use an upgrade to a protected intersection to make those on a bicycle waiting to cross here have to spend less time having to leap onto the sidewalk to avoid cars cutting the corner. This would reduce conflicts with pedestrians at the intersection too.	1	
52	Connectivity Issue (e.g. missing link, difficult connection)	Low – This issue is a minor inconvenience or suggestion.	There ought to be pedestrian and cycle paths up the hill connecting the sidepath of the Southlands Parkway segment through the new apartment complexes to the Southlands Parkway segment in Southlands Mall, and its bike lanes.	2	
54	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	The current "Visionary Bikeway" network map shows a bike route going straight through the hospital at The Medical Center of Aurora. This wouldn't work without tearing down the hospital so a protected bike path along Arkansas Dr. seems preferable.	2	

ID	Type	Impact	Comment	Likes	Dislikes
55	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Would be really nice to have a cycle and pedestrian bridge over Chambers on the Cherry Creek Spillway Trail.	3	
57	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Please connect the bike lanes on Conservatory Parkway to the entrance of the Plains Conservation Center via a sidepath along Hampden with a designated bicycle section/lane.	4	
58	Signage or Wayfinding Issue	Low – This issue is a minor inconvenience or suggestion.	Would be nice to have some signage along the paths near the skills field. Not even sure which path is Unnamed Creek Trail at this point where several paths converge.	1	
70	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please get rid of the slip lane from Colfax onto Peoria. This just endangers everyone outside of a car and encourages speeding.	4	1
71	New Bike Route Suggestion	Low – This issue is a minor inconvenience or suggestion.	The current Visionary Map shows a path through a Catholic church and several private yards, when instead it would be easy to route it to Floyd and then down Ceylon to cross Hampden in a way that makes more sense.	2	
72	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please implement a protected intersection at Tower and Sterling Hills Parkway. This would increase safety for all users as currently the bike lanes disappear on approach to the intersection and the wide sidewalk on the east side of Tower gets overcrowded in this area between cyclists and pedestrians on nice days. A protected intersection would separate cycle and foot traffic at the intersection, giving each mode its own designated section, and make it easier for drivers to see pedestrians and cyclists.	3	
83	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Please upgrade the westbound bike lane on Dartmouth leading uphill to the schools to a cycle-track/designated side path as the uphill nature of this segment leads to bicycles weaving in the lane and this segment of road has a bunch of signs on gates begging drivers not to park across their access. Getting rid of street parking on this side of this segment of Dartmouth to add a cycle path	2	

ID	Type	Impact	Comment	Likes	Dislikes
			would benefit residents as well as students and other cyclists.		
84	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Please upgrade the bicycle infrastructure at the intersection of Sterling Hills Parkway and Villanova Place to a protected intersection. Drivers rarely actually give the right of way to cyclists who currently have to cross the right hand turn lane for cars to go straight. The sidewalks in this area are already crowded with dog walkers and other pedestrians making it best that cyclists, pedestrians and cars each have their own dedicated space at the intersection, without cars being able to cut across the bike lane.	2	
89	General Feedback	High - This issue significantly impacts my ability to safely bike.	Making Montview have a fully protected/seperated bike path from Yosemite to Fitzsimons Parkway as is planned on the Visionary Bikeway Map would be amazing.	3	
90	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	There is no Sidepath along Quincy, this is 2 lane road with little room for both bikes and cars to share the road.	2	
93	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There needs to be a connection point to quincy reservoir trail from this park. Only limited to pedestrians and bikes. This would increase our usability of the trails	2	
96	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	I would like to bike from my neighborhood around Eastridge-Ptarmigan Park/Heather Ridge over to the Cherry Creek Trail. However, there is no safe way to access the Cherry Creek Trail near Dartmouth and Havana due to a lack of sidewalks or other infrastructure for bikes and peds. I wouldn't feel safe biking down Yale (or Iliff, or Dartmouth) and crossing Parker Road. Separated bike lanes and signalized crossings at those intersections might help.	3	
109	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Having safer bike paths would encourage people to drive less and use alternative transportation for quick trips to the store, to the library, or rec center.	4	

ID	Type	Impact	Comment	Likes	Dislikes
111	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Please do not close off this tunnel underneath Arapahoe. The cars do not stop for bikers/pedestrians in the crosswalks.	4	
112	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Please complete this small connector between the Inspiration neighborhood and the Piney Creek Trail. The existing connectors are through locked gated communities.	2	
116	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	An underpass under Quincy connecting West Tollgate Creek Trail to Quincy Reservoir would be nice.	1	
119	General Feedback	Medium - This issue somewhat impacts my ability to safely bike.	Color coding of the Legend makes if very difficult to distinguish between a "Sidepath" and a "Trail or Path", which are very different - e.g., High Plains Trail versus a sidepath on Arapahoe Road. Determining safe cycling routes (and commenting on them) would be easier if these types of routes were more easily distinguished.		
122	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is no bike infrastructure whatsoever from Jewell and. Gun club, there is trail access after 470, however it's quite some distance to get to anything of value unless you are ready to lock in for a minimum of 15 miles. On top of that getting from the jewell/gun club intersection to the HPT access or beyond is too treacherous to attempt for most folks. Even with the decent wide berm it's always filled with debris including broken glass, screws and other puncture type items. A dedicated trail leading from the intersection to all the way to dunkirk would be helpful in reaching businesses. In addition to this I'm part of a large group of folks who want/do occasionally ride into Buckley SFB from the Murphy creek neighborhood which is now surrounded by 5 more developments that would utilize this heavily but currently don't ride in at all or often due to the unsafe conditions from east of 470/ gun club	3	

ID	Type	Impact	Comment	Likes	Dislikes
124	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	The bike lane on Montview needs to be protected, similar to what was done along Central park blvd (in denver) this is a 2 lane road with a lot of traffic from the neiboorhood. Regarding Moline, Outside of a few signs and a share the road bike marker, we need a dedicated bike lane.	2	
125	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	A North South connection would be very useful, especially if it is a protected bike lane.	1	
126	Crossings	High - This issue significantly impacts my ability to safely bike.	Cars turning right on Peoria st on to 23 ave are going too fast and will swing wide into the opositle side of traffic. Bikes waiting to cross Peoria have to sit in the Right turn lane where cars behind them cant turn right untill the bikers move. Feels safer to just sit on the sitewalk and use the crossing on a bike instead of going in the road.	1	
127	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	Have this be paved, as right now its dirt and in winter months it turns to deep mud on the slope up. Paving this would also connect to the other paved part.	1	
131	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	There is no connection between the bike paths here. It appears there was originally a connection planned, but the bike path on private property - where I placed the marker - ends at the boundary of the property. There is a fence and shrubbery completely blocking access. Students from Mracheck middle school have worn a path through the dirt between the marked paths, and have created access through a hole in the fence next to my marker. This could be a completed path with only aboug 200 feet of pavement.	2	
132	Intersection Issue (e.g. crossing difficulty, signal timing)	Medium - This issue somewhat impacts my ability to safely bike.	Traffic signal at this location is very slow to respond to cross Chambers rd to get from East/West . Pedestrians and bikes have to wait a very long time to get the single to change after pressing cross button. Would be nice to get faster response time. Also, turning crosswalk sign to green prior to cars signal going green would be helpful. There are 2 lanes on Yale turning right onto N. Chambers. Often one lane of cars let peds/bikes on green while other keep turning making this a safety	1	

ID	Type	Impact	Comment	Likes	Dislikes
			hazard. If single can be adjust to let peds / bikes go first before cars turn green that ?may? help.		
133	Crossings	High - This issue significantly impacts my ability to safely bike.	There is no marked crossing at this point, although the Powerline Trail is a main walking/biking trail and crossed a wide, moderately used street, and is directly next to and frquently used by students from Mrachek middle school. There are no street markings, no signs and no crossing lights. There is a marked crossing and signage about 300 feet north of this crossing at E Bails Place, but that crossing is rarely used. Moving that marked crossing to the Powerline Trail would be a huge improvement in crossing safety.		
134	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	This is city property and is undeveloped. It gets overgorwn with grass and weeds during the summer, and there is a fairly deep, narrow ravine running through it from erosion. Students from Mrachek middle school use it often to access the neighborhood to the north, but there is no paved trail. There is a chain-link fence on the south end of this property with an opening about 4 feet wide, and the ravine runs through that gate, making it very difficult to walk through and impossible to ride a bike through. A pathway from S Salida Cir to the Powerline Trail would be great.	2	
136	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	Connect this spot with Florida so folks don't have to go up to mississippi or iliff.		
137	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	Extend the sable bike path that stops at jewell north so it becomes a main "bike friendly" path in aurora. there are schools, trains, retail, & residential on sable. it just makes sense.	2	
138	New Bike Route Suggestion	Medium - This issue somewhat impacts my ability to safely bike.	Bike route ends here & with safe riding ability if you need to go further West on Yale. If we can add safe bike passage from here to Hampden, that would be great. Only one side of yale has a sidewalk wehn going west and it is not safe to peds / bikes.	2	
140	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is no pathway between Great Plains Park and the pathway along E470. To get to the E470 pathway, you would have to ride along E Jewell Ave which is very dangerous due to high speeds, heavy traffic and a narrow	3	

ID	Type	Impact	Comment	Likes	Dislikes
			shoulder. Only a crazy, suicidal person would do this. Ultimately I would like to see E Jewell Ave widened and a seperate bike path included in the design, but for now a seperate bike path away from traffic would be great.		
144	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	It's hard to comment on the visionary bikeway network for far southeast Aurora when there is a lack of context for how our network will work with all of the space in between our city boundaries between island Aurora and mainland Aurora. If I work in far southeast Aurora and want to ride my bike to mainland Aurora, how do the two parts connect through non-Aurora?		
152	Bike Lane Condition (e.g. pavement quality, debris)	Low – This issue is a minor inconvenience or suggestion.	This section of the trail along Murphy Creek between Tollgate Crossing and Sorrel Ranch is currently not paved. Paving would help the trail dry and not be as muddy following rain and snow.	1	
153	General Feedback	Medium - This issue somewhat impacts my ability to safely bike.	Glad to see plans for a path connection between Harvest and Aurora Reservoir near the SE rec center - this would be safer than the current solution of utilizing neighborhood streets through Beacon Point.	1	
164	Intersection Issue (e.g. crossing difficulty, signal timing)	High - This issue significantly impacts my ability to safely bike.	Not sure if the places where the purple trail/path level street routes on the visionary map intersect are intended to be interpreted as protected intersections, but hope they are as most of these intersections would be much safer for all users if they could be upgraded to protected intersections.	2	
165	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	The bike path should be extended to Peoria Station HL		
166	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There is an existing 12-foot side path between Fitz Pkwy and 23rd Ave on Ursula Street and between Ursula Street and Pitz LRT Station along south side of Fitz Parkway. Also, there is existing bike lanes on Ursula Street between 23rd Avenue and Moutview Blvd. Therefore, Ursula Street between 23rd and Fitz Parkway and Fitz Parkway between Ursula and Fitz LRT Station should be marked as Sidepath. Ursula between 23rd and Montview should be depicted as a bike lane.		
167	New Bike Route Suggestion	High - This issue significantly impacts my ability to safely bike.	There should be a sidepath on the south or east side of Fitz Parkway between Peoria and Colfax HL		
168	Connectivity Issue (e.g. missing link,	High - This issue significantly impacts my ability to safely bike.	Why do we have a missing link here? HL	1	

ID	Type	Impact	Comment	Likes	Dislikes
	difficult connection)				
170	General Feedback	High - This issue significantly impacts my ability to safely bike.	This area needs more work. The segmented sidepaths should be removed or revised. HL		
171	General Feedback	High - This issue significantly impacts my ability to safely bike.	Adjust the line work to align with the ground configuration HL	1	
173	General Feedback		Smith between Powhaton and Monaghan is also identified as part of a primary route HL	1	
174	General Feedback		As a primary route, Monaghan should be a side path or SBL HL	1	
175	General Feedback		This needs to somehow connect back to the overall network HL		
176	General Feedback		Bike facility on Peterson Road should be extended to 56th HL	1	
177	General Feedback		Bike facility on Manila should be extended to 6th Ave HL		
178	General Feedback		Missing segment HL		
179	General Feedback		Missing segment HL		
180	General Feedback		Missing segment HL	1	
182	Connectivity Issue (e.g. missing link, difficult connection)	Medium - This issue somewhat impacts my ability to safely bike.	a bridge over the High Line Canal near where 1st Ave dead ends at it would connect the bicycle facilities on 1st Ave, 2nd Ave and the High Lind Canal Trail.	1	
183	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This bridge is marked as an existing bicycle bridge, but can only be accessed by a set of stairs on both ends. It is not accessible to bicycles or wheelchair users in its current configuration.	1	
184	Bike Lane Condition (e.g.	High - This issue significantly impacts my ability to safely bike.	This supposed existing connection between Marina Park and Quincy Reservoir does not exist. There is a fence topped with barbed wire here. Having a gate here for	1	

ID	Type	Impact	Comment	Likes	Dislikes
	pavement quality, debris)		pedestrians and cyclists that is open during the day time would greatly improve connectivity and safety in the area.		
185	Safety Concern (e.g. conflict with cars, visibility)	Medium - This issue somewhat impacts my ability to safely bike.	Please upgrade the portion of the Quincy Reservoir Loop trail that uses the sidewalk to a two way cycle path next to a walking path, currently it gets crowded and is next to fast dangerous traffic.	1	
186	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	Please upgrade the intersection of Memphis and Quincy to a protected intersection for improved safety and visibility of cyclists and pedestrians.	1	
187	General Feedback	Low – This issue is a minor inconvenience or suggestion.	This "existing" bicycle path is a long staircase. Should not be marked as a bike path.		
188	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	This "existing" bicycle path segment is completley fenced off from the public. Would be great if there actually was a mixed use path along this drainage.		
189	Connectivity Issue (e.g. missing link, difficult connection)		This "existing" bicycle path connecting to Quincy Reservoir has a fence across it instead of a gate.		
190	Bike Lane Condition (e.g. pavement quality, debris)	High - This issue significantly impacts my ability to safely bike.	This "existing" bicycle & pedestrian path is blocked by fallen trees and brush.		
191	Connectivity Issue (e.g. missing link, difficult connection)	High - This issue significantly impacts my ability to safely bike.	Would love for the trail along West Toll Gate Creek to cross Quincy to Quincy Reservoir with an underpass.	1	
192	Safety Concern (e.g. conflict with cars, visibility)	High - This issue significantly impacts my ability to safely bike.	This underpass has a bunch of signs marking it as closed. Please reopen it.	1	

Figure 3. Visionary Pedestrian Network Comment Map

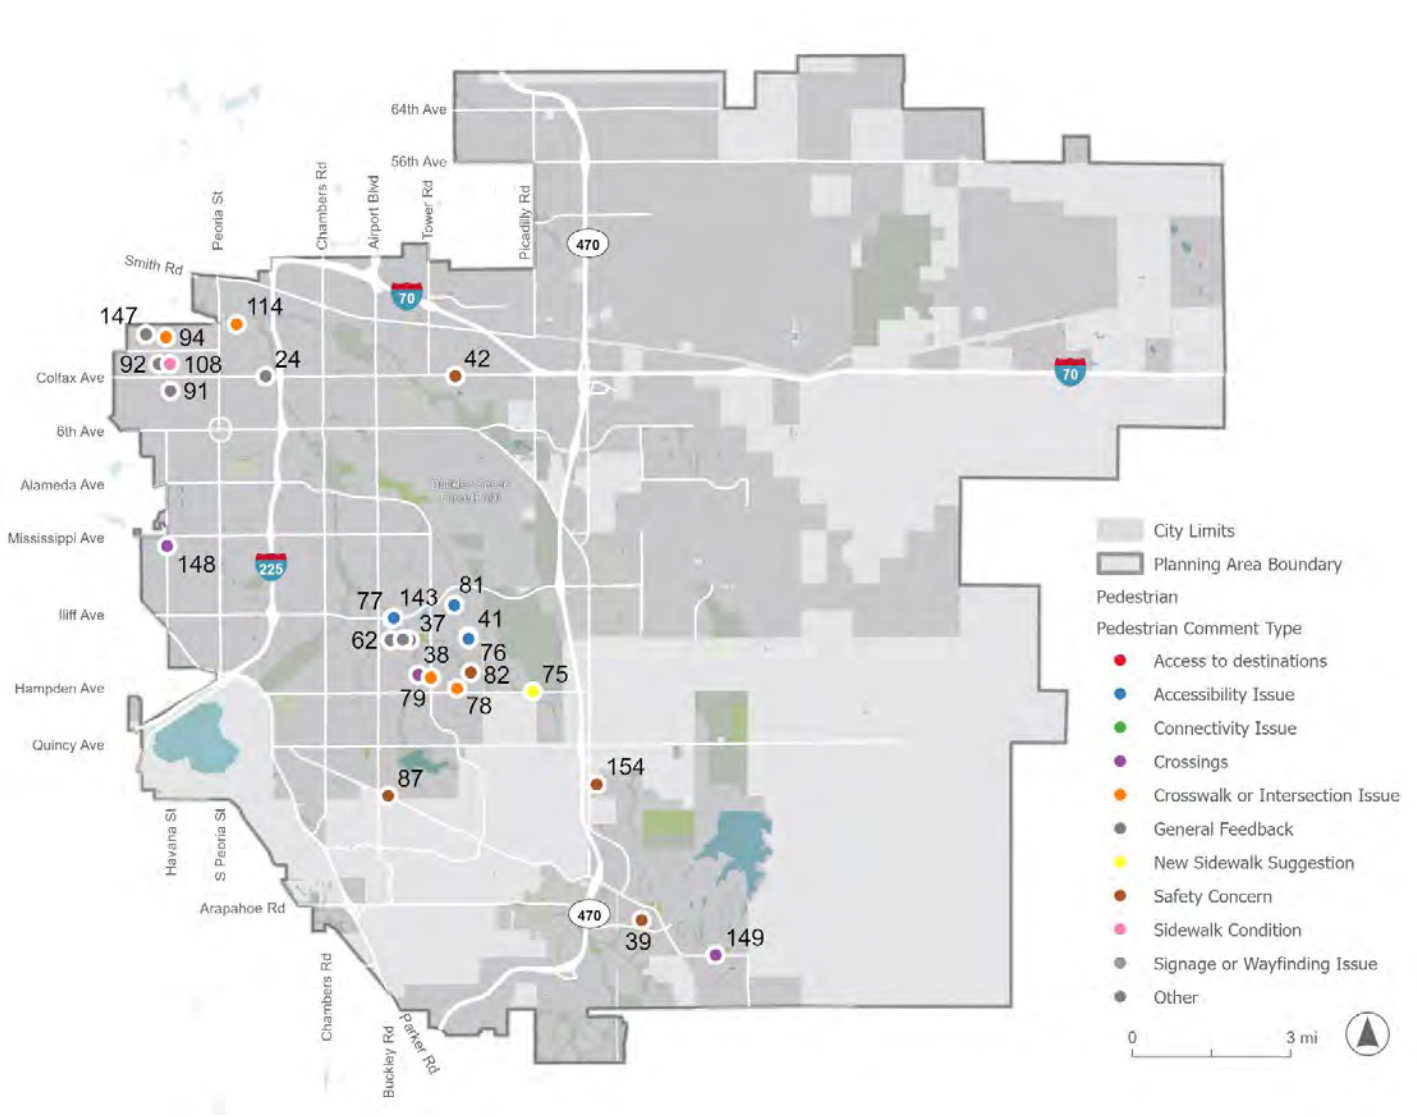

Table 3. Visionary Pedestrian Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
24	General Feedback	High - This issue significantly impacts my ability to safely walk.	TWB 4/11/25 test. Confirm and delete.		
37	Crossings	High - This issue significantly impacts my ability to safely walk.	Protected pedestrian crossing needed here	1	
38	Crossings	High - This issue significantly impacts my ability to safely walk.	enhanced pedestrian crossing needed here		
39	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	This is an extremely dangerous area to cross due to visibility issues and traffic speeding along Tallyn's Reach Parkway. It is in need of traffic calming and other measures.	1	
41	Crossings	Low – This issue is a minor inconvenience or suggestion.	The Villanova and Flanders intersection can be dangerous to cross due to speeding drivers, especially those who run the stop sign. Since this is a way to access a park with kids and is in a popular dog walking area anything that can be done to slow down drivers through this intersection like a traffic circle would be a boon. Cars parking close the the intersection also causes visibility issues, which would be prevented by the narrowing of lanes on the approach to a traffic circle..	1	
42	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	High - This issue significantly impacts my ability to safely walk.	The Slip lanes at the entrance to the Sports Park are designed to encourage drivers to turn quickly without stoping or slowing down, making crossing the entrance to this park unnecicarily The Slip lanes at the entrance to the Sports Park are designed to encourage drivers to turn quickly without stoping or slowing down, making crossing the entrance to this park unnecessarily dangerous.	2	

ID	Type	Impact	Comment	Likes	Dislikes
62	General Feedback	Low – This issue is a minor inconvenience or suggestion.	Sidewalks along Yale feel very awkward and don't make good use of the space between the sidewalk and the curb. This results in feeling uncomfortable when walking along it.		1
75	New Sidewalk Suggestion	Low – This issue is a minor inconvenience or suggestion.	A sidewalk and bike path connecting to the entrance of the Plains Conservation Center would be nice.	1	
76	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Medium - This issue somewhat impacts my ability to to safely walk.	Curb bump outs with ramps at the place where the power-line access road--which is also used as a walking and mountain biking path--crosses the street would make it more accessible, and make is safer and easier to cross the street.		
77	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Low – This issue is a minor inconvenience or suggestion.	The sidewalk where Ilif crosses West Tollgate Creek is narrow and can be difficult to use during busy times due to the barriers on either side.		
78	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	Low – This issue is a minor inconvenience or suggestion.	People sometimes park across the crossing from Flanders to Ceylon, making the ramp inaccessible. A curb bump out, perhaps accommodating the bike lane by having the bike lane closer to the sidewalk and the ramp on the other side of it closer to the street, would be nice to prevent this.	1	
79	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	High - This issue significantly impacts my ability to safely walk.	Drivers turning right off of Dartmouth onto Tower regularly drive right through the crosswalk without ever even looking for a pedestrian, only looking in one direction at the traffic they want to merge into. This is a regular spot for near misses.		
80	General Feedback		Really appreciate the wide verges on Yale giving a large buffer from traffic. Would be nice to have more verges that provide such separation from cars.		

ID	Type	Impact	Comment	Likes	Dislikes
81	Accessibility Issue (e.g., missing curb ramps, blocked paths)	Medium - This issue somewhat impacts my ability to to safely walk.	A piece of fence has been installed across this path.	1	
82	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Low – This issue is a minor inconvenience or suggestion.	Better lighting along Flanders where it crosses Unnamed Creek would make it easer to see and be seen, even with the very bright headlights some cars have these days.		
87	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	At night crossing Wagontrail along Smokey Hill is dangerous due to low lighting.	2	
91	General Feedback	Medium - This issue somewhat impacts my ability to to safely walk.	What happened to the 13th Ave Multimodal study? Why are no sidewalk/pedestrian improvements along 13th ave shown here? This is a great project and would improve pedestrian access to many spaces, reduce speeds along 13th ave, and provide a safe route for kids to walk to and from school and nearby amenities. Please bring this project back if it has been reduced/put on the back burner.		
92	General Feedback	High - This issue significantly impacts my ability to safely walk.	Please widen the sidewalks and improve pedestrian access along 17th ave from Yosemite St to Peoria St. Situated midway between Montview and Colfax, this is a great spot for improving walkability and accessibility. 17th Ave also connects multiple parks (Spencer Garrett Park, City of Aurora Park, and Montview Park, intersects Del Mar Parkway, and crosses Crawford Elementary school and Project Worthmore. This is also a very good route for folks looking to walk to MLK library and the shopping on Colfax, to Stanley Martketplace, or to other neighborhood shopping (Spicy 9 Thai, Taco River).	1	

ID	Type	Impact	Comment	Likes	Dislikes
			Many apartment complexes and churches connect to 17th as well. The sidewalks are narrow and broken, and cars drive very fast down the street. Widening sidewalks and adding lighting would be a huge boon for this neighborhood. Thank you for your consideration.		
94	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	High - This issue significantly impacts my ability to safely walk.	There is a 3-way stop here, but you regularly see cars disregard this going east-west on 23rd. This is one of the major crossing sections next to a recreation center that has a lot of kids on a day to day basis. Seeing some sort of blinking red light, blinking stop signs, better signage and a cross walk would all be better visual cues to make this a safe intersection to cross.	1	
108	Sidwalk Condition (e.g. cracks, uneven surface)	Medium - This issue somewhat impacts my ability to to safely walk.	The sidewalks in my neighborhood are narrow and in poor condition. It would be easier and safer to walk to places like the library, rec center, and stores if these were improved and widened. Also on busy streets like Havana, people often park their cars on the sidewalk blocking the pedestrian walkways. Wider sidewalks would help discourage this.	2	
114	Crosswalk or Intersection Issue (e.g. missing crosswalk, signal timing)	Medium - This issue somewhat impacts my ability to to safely walk.	The crossing at this intersection needs the correct signage for drivers. It's missing the statement that "when flashing, stop, then proceed when clear". This is how this crossing is supposed to be labled.		
143	Accessibility Issue (e.g., missing curb ramps, blocked paths)	High - This issue significantly impacts my ability to safely walk.	This intersect of Salida and Iliff needs an audible crossing button on all 4 corners. Students who are walking to Rangeview are not able to access the Illiff crossing to the north. I am a mobility teacher of Students with Visual Impairments and in order to cross north on Salida the students would have to walk westbound on Salida across the bridge to the street crossing then walk westbound all the way back to the school.	1	

ID	Type	Impact	Comment	Likes	Dislikes
147	General Feedback	High - This issue significantly impacts my ability to safely walk.	The sidewalks in the northwest Aurora area are narrow and substandard. They should be widened overtime as resource becomes available. HL	1	
148	Crossings	High - This issue significantly impacts my ability to safely walk.	A protected ped crossing is needed for this 1700' + stretch with bus stops on both sides of the street. HL	1	
149	Crossings	Medium - This issue somewhat impacts my ability to to safely walk.	Please add a crosswalk on Smoky Hill between Southshore and Blackstone. Perhaps at S Titus Way. Childeren who live in Southshore are zoned for Woodland Elementary School in Blackstone. Currently the only crosswalk is located at Smoky Hill and Powhaton	1	
154	Safety Concern (e.g., poor lighting, lack of pedestrian refuge)	Medium - This issue somewhat impacts my ability to to safely walk.	The sidewalk along E. Chenango Pl where it crosses Tollgate Creek has sunken significantly. The city repaired a portion of the sidewalk but cones have remained and have fallen down in the last few months.	1	

Figure 4. Visionary Street Network Comment Map

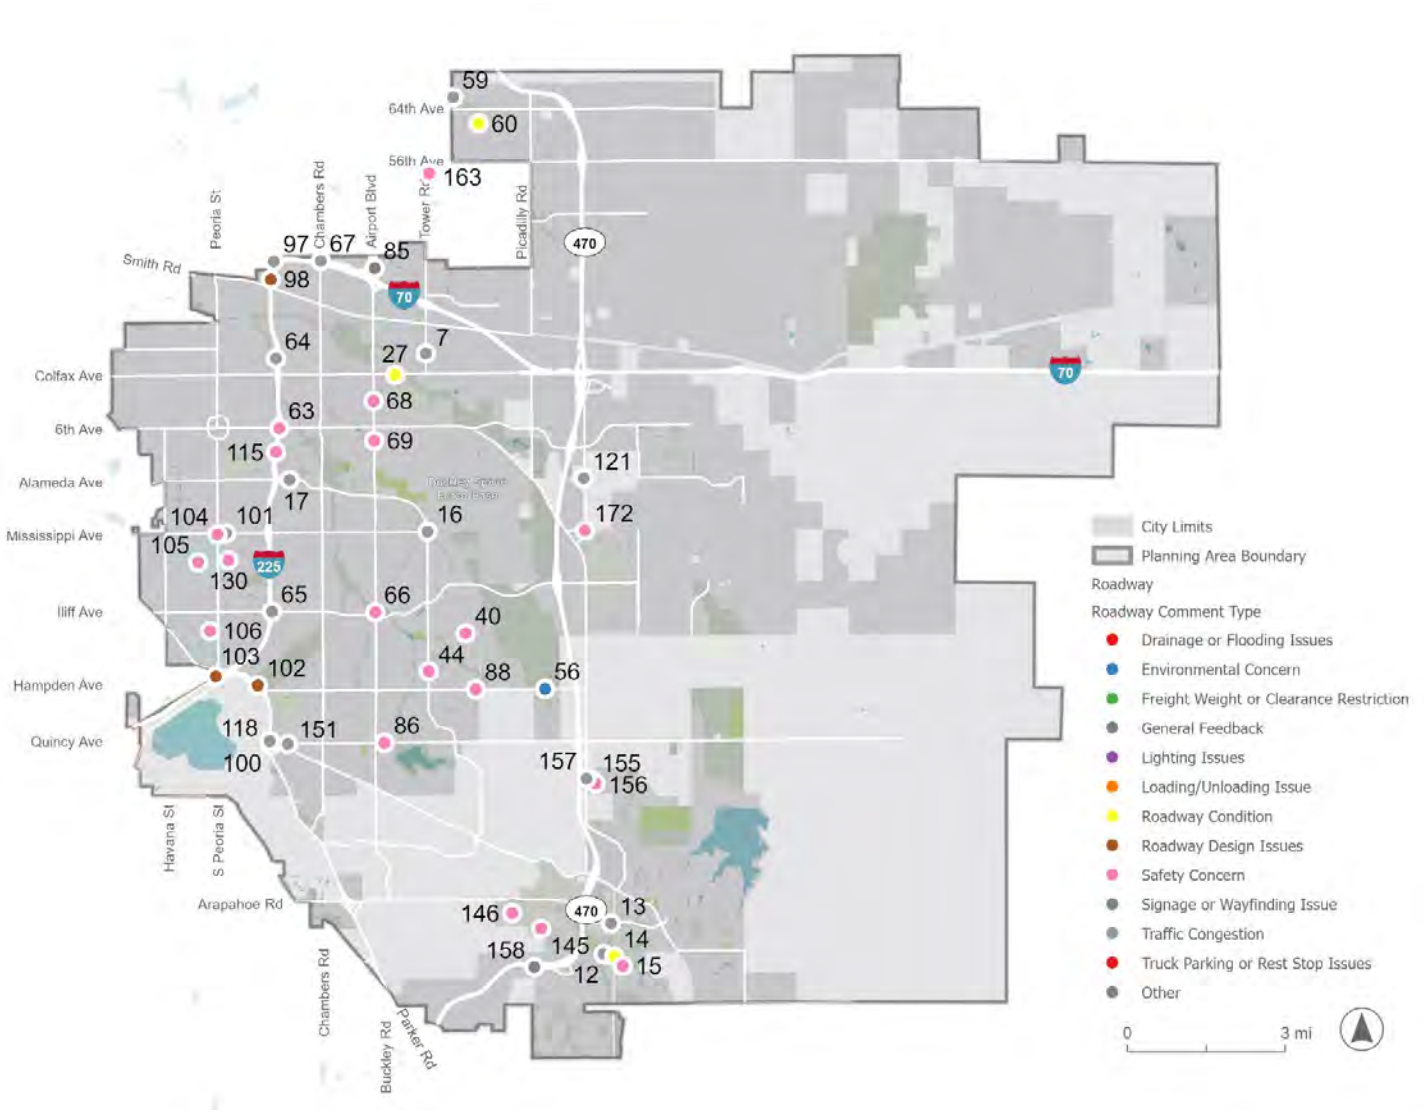

Table 4. Visionary Street Network Map Comments

ID	Type	Impact	Comment	Likes	Dislikes
7	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Because Tower Road between Colfax Ave. and Smith Road is still only two lanes (one lane each direction) it becomes quite congested, especially during the busy commute times. North of Smith Road, Tower is 4 to 6 lanes, as is Colfax at the south. These multi-lane roads dump all of their traffic into the two lanes of Tower Road south of Smith Road to create huge bottlenecks. This section of Tower needs to be widened to 4 lanes to accommodate the 4 lanes of traffic coming from Colfax Ave and Tower north of Smith. I've lived in this area for 38 years and would love to see this issue finally addressed. Thank you for any progress that can be made toward solving this increasingly frustrating problem.		
12	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Low – This issue is a minor inconvenience or suggestion.	Would love a designated right turn lane here if possible		
13	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	really need a right turn lane here from Arapahoe onto southbound Aurora Parkway. Many people just cut through the immediate neighborhood to avoid that light and it feels unsafe for people living in that area. People race through the neighborhood to beat the light and pulling out from the neighborhood is limited visibility since cars come flying south down the hill after the light turns green. lots of accidents there.		
14	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	Road is getting torn up from all the construction trucks. Many drive through here to avoid all the lights on smoky hill - this should not be a thoroughfare for construction trucks just to avoid smoky hill. Road is completely trashed all the time.		
15	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	People drive insane on Irish between Aurora Parkway and the Whispering Pines neighborhood - many are cutting through the neighborhoods to get on 470. Speed limit is 30 - I see people driving upwards of 50 mph on this road. There are bike lanes along this road and kids along it all the time. It is ridiculous. Can we please install speed bumps here to make people slow down so no one gets killed from people driving insane? It really has gotten ridiculous and unsafe.		
16	Traffic Congestion	Medium - This issue somewhat	The traffic signals at Louisiana & Tower and Mississippi & Alameda tends to be very, very poorly timed during rush hour, resulting in backed up traffic nearly every morning. If the		

	(e.g., bottlenecks, poor signal timing)	impacts my ability to safely drive.	signals were timed more appropriately for northbound traffic in the morning, which is the great majority, traffic would flow much better here.		
17	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	The way traffic lights are staggered on westbound Alameda between Sable & 225 always causes traffic jams in the morning and evening, and due to the poor timing it seems like it encourages people to run red lights so they don't get stuck behind what will inevitably be several red lights.		
27	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	TWB 4/11/25 Streets comment test. Confirm and delete.		
40	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	The intersection of Flanders & Villanova is a two way stop with very poor visibility due to the curve of the road, which is often reduced to nearly no visibility due to parked cars. Cars frequently run the stop sign, illegally split the lane on the approach to the intersection or stop when they don't have a stop sign out of caution for the frequent stop sign runners. If at all possible this would be an optimal location for a traffic circle to control the unpredictable driving on the approach and force speeding drivers to at least slow down through the intersection. The current problem is only going to get worse with the two new apartment complexes due to be built on Villanova without modifying the current intersection.		
44	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	A road diet along Tower to reduce speeding would not be remiss, perhaps turning the curbside through lanes into turn only lanes. Tower is also popular with cyclists who are sometimes forced into the driving lanes due to busy sidewalks which feels very dangerous and unpredictable as a driver. Giving cyclists a designated space seperate from the roadway would be great.		
56	Environmental Concern (e.g., noise, air quality)	Medium - This issue somewhat impacts my ability to safely drive.	When Hampden just south of the Plains Conservation center is upgraded please make it a bridge so that the pronghorns which frequently cross here will go under the bridge instead of across the road. This would also allow for the construction of a safe pedestrian underpass.		

59	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Tower road should be 6 lanes with sidewalks, crosswalks and designated right turn lanes to avoid slowing traffic flow. There are so many businesses you have to stop every block for right turns.		
60	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	Fix pot holes and add a speed bump or 2 to assist neighbor hood trafffic.		
63	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	The most recommended way to access Aurora City Place from southbound I-225 is to exit to westbound 6th, then take a left on Potomac. With only a single right turn lane, this lane either backs up from traffic or encourages drivers to cross three lanes in under 600 feet, which creates a considerable risk of accidents.		
64	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Every day, the southbound corridor on I-225 between I-70 and 6th Avenue experiences substantial congestion. As speeds pick up after the Colfax on-ramp, it appears that most congestion is caused by the rapid merging of both 17th Pl and Colfax within a quarter-mile of each other. Closing the southbound on-ramp on 17th, or otherwise redirecting it to be coincident with the Colfax merge, would reduce the slowdowns that then ripple out into the Colfax ramp.		
65	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	Westbound Iliff traffic shares one lane to turn onto Abilene, northbound I-225, and southbound I-225, with two of those three dependent on the Abilene light being green to proceed. This creates a large backup in the fourth (rightmost) lane, and a gamble for those intending to travel southbound on whether they could merge from the 3rd lane in time to take the clover-leaf exit. Changing the northbound I-225 on-ramp to an exit-only and creating a new lane for southbound traffic to enter into from the third lane would help balance this disparity and help improve flow.		
66	Safety Concern (e.g., conflicts with other modes, sightline	Medium - This issue somewhat impacts my ability to safely drive.	There are a lot of drivers exiting from the shopping center at the northwest corner of Iliff and Buckley that are intending to turn left (eastbound) onto Iliff, causing them to cut in front of multiple lanes of traffic to make it into the turn lanes directly across from the entrance. Changing this to an entrance-only ramp would push these drivers to use the light at Pagosa Way to the north, giving a more reasonable distance for lane changing.		

	issues, speeding)				
67	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	The timing of the lights northbound on Chambers at I-70 causes frequent backups for semis turning onto the westbound on-ramp. Because so many semis are in this space, traffic turning north from the westbound I-70 off-ramp frequently get stuck in the intersections, creating a lot of split-second decisions that result in cars getting cut off or maneuvered around, which substantially elevates the risk of accidents.		
68	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	Some traffic treats the northbound stretch of Airport Blvd between 6th Ave and Colfax as a 45 speed limit, but the area is zoned as 40 (it increases to 45 at Colfax). This creates a conflict between drivers wanting to comply with the speed limit or matching traffic to reduce aggressive driving/road rage incidents. Rezoning to 45 would alleviate this conflict and align to how drivers operate today.		
69	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	On Airport Blvd, there is a light supporting traffic in and out of Pickens Technical College, but only an unprotected intersection for WIlliam Smith High School. This creates traffic problems when cars try to turn left into the school or in either direction out of it. Recommend adding another light for William Smith to reduce the need for drivers to guess when all lanes of traffic are stopped/empty, as morning traffic frequently backs up beyond this intersection during the morning commute.		
85	Signage or Wayfinding Issue	Low – This issue is a minor inconvenience or suggestion.	The sign leading to 40th Ave/Pena Blvd on NB Airport Blvd shows that the middle lane is a straight-only, but the light itself allows both straight and left turns. Sign prior to the light needs to be updated.		
86	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Pitkin & Quincy intersection has fences that block sightlines on the north side of Quincy and and people often turning left in front of oncoming traffic that is going straight.		
88	Safety Concern (e.g., conflicts	Medium - This issue somewhat impacts my	Fences create poor sightlines at Greenwood & Hampden.		

	with other modes, sightline issues, speeding)	ability to safely drive.			
97	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Medium - This issue somewhat impacts my ability to safely drive.	If the I-70/I-225 junction is ever reworked, separate lanes should be designated from both I-70 and 225 to a Pena Blvd ramp, perhaps a flyover that allows Chambers Rd traffic to be separate from the Pena Blvd exit. Separate access directly to HOT lanes would be beneficial as well.		
98	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	If the I-225 NB to I-70 ramp is ever redesigned, there should be no split lanes (like the second lane). Given the current traffic flow, this could have two lanes for I-70 W and two lanes for I-70 E instead of the current 2 to 70W 1 split and 1 to 70E.		
99	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Poor signal timing on Parker Road makes me hate going that way. The signals are timed very poorly and at times you can end up stopping at every single traffic light all the way down. The same goes almost all of the other major routes nearby such as Hampden, Quincy, Chambers, Buckley, etc. This causes unnecessary traffic buildup and a lot of stop/go conditions, which lead to crashes and a lot of people merging to go around slower traffic after every stop.		
100	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	The intersection of Parker and Quincy needs a major overhaul, perhaps something similar to Parker and Hampden or a DDI to help move the large volumes of traffic from Parker to Quincy, especially at high road use times.		
101	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Poor signal timing on Mississippi causes a lot of traffic issues, especially around the I-225 interchange. Stopping at several signals between Havana and I-225 is often required, rendering this overused corridor even slower. Additionally, there are too many possible turns. Reducing intersections with left turns and removing traffic lights where possible should be a goal.		
102	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	On the rare occasion of flash flooding or rapid snowmelt, there are some locations in the curves on Parker Road where water pools against the retaining wall in the center, often leading to flooding in the inside lanes.		

103	Roadway Design Issues (e.g., land width, curve radius)	Medium - This issue somewhat impacts my ability to safely drive.	On the rare occasion of flash flooding or rapid snowmelt, there are some locations in the curve on the ramp from Peoria to I-225 where water pools causing the roadway to flood.
104	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	What is likely the world's shortest center turn lane is at this marker. There are way too many turns taking place immediately near the intersection. Removing the center turn lane and placing a barrier that goes far enough back to accommodate the intersection's typical traffic storage would be beneficial.
105	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Low – This issue is a minor inconvenience or suggestion.	Many of the neighborhood intersections in Aurora could benefit from having their stop signs changed to roundabouts. With proper design, this could help slow traffic down and make these intersections safer. It could also reduce emissions/pollution from vehicles having to stop and go every few hundred feet between stop signs.
106	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	The intersection of E Harvard Ave and S Oswego St has a stop sign for S Oswego St. This causes confusion for drivers. The route to Eastridge Elementary is (incorrectly) designated as E Harvard Ave between S Peoria St and S Oswego St, then S Oswego St between E Harvard Ave and E Iliff Ave. There are often conflicts as this stop sign where drivers on E Harvard Ave stop even though they have no stop sign, or drivers on S Oswego St fail to yield becuase they assume it is a four way stop. A roundabout or four way stop would improve safety for this intersection.
115	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	This intersection really needs traffic signal control. Right now it has some stop signs. each direction should have a stop sign (all ways stop) because there is too much confusion and it causes backup of traffic and unsafe crossings.
118	Traffic Congestion	High - This issue	There is a large (300 plus unit) apartment complex approved to be built at Parker Rd and Quincy in the Eastbank shopping center. The neighborhood of Pier Point and Olive Glen

	(e.g., bottlenecks, poor signal timing)	significantly impacts my ability to safely drive.	Villas on S Achison Way already have difficult access to Parker Rd and Quincy, how does the coty or state highway department plan to mitigate the extra 500 plus cars a day from the new apartment complex getting onto Parker Rd or Quincy?
121	Traffic Congestion (e.g., bottlenecks, poor signal timing)	High - This issue significantly impacts my ability to safely drive.	Gun club needs to be for lanes all the way from 6th to Quincy. The new apartments and housing going up by Murphy creek is only going to make traffic on gun club worse and there needs to be a solution.
130	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	Please add speed humps on this side of the park, too. This is the side with the playground, plus a near blind curve. Speed humps were recently constructed on the opposite end of the park. Thanks!
145	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Easter Ave needs roundabouts or speed bumps to slow down the speed of traffic. This is a school bus stop route and is dangerous. This road also becomes a raceway after dark.
146	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Grandview High School kids cross here but there is no crosswalk or caution lights. Heavy traffic during school pickup times.
151	Traffic Congestion (e.g., bottlenecks,	Medium - This issue somewhat impacts my ability to safely drive.	Travelling Westbound on Quincy towards Parker Road during high traffic times will often see significant backups at Smoky Hill. The timing of the lights between smoky hill, the shopping center and parker road combined with traffic merging onto Quincy from Smoky HIll can make it impossible for traffic travelling west on Quincy to move forward more than 1 or 2 cars per light cycle.

	poor signal timing)		
155	Roadway Condition (e.g., potholes, uneven pavement)	Medium - This issue somewhat impacts my ability to safely drive.	E. Chenango Pl. between Gun Club and S. Biloxi Way has very uneven pavement and areas that collect water turning to significant ice areas in winter due to the uneven pavement. The road is in significantly poorer condition than the surrounding roads.
156	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	Medium - This issue somewhat impacts my ability to safely drive.	There is a significant amount of speeding along S. Biloxi Way between E. Chenango Pl and E. Bellewood Dr. Suggest adding speed humps between Chenango and Whitaker and between Whitaker and Grand to address the issue (similar to what was done on E. Chenango Pl. a few years ago.
157	Traffic Congestion (e.g., bottlenecks, poor signal timing)	Low – This issue is a minor inconvenience or suggestion.	As the lot to the west of Gun Club in unincorporated Arapahoe county may become developed and Gun Club is widened, there have been proposals to turn intersection of S. Gun Club and E. Chenango Pl. into a 3/4 access or possibly signalized. Suggest community involvement and updated traffic study to determine neighborhood traffic impacts to Tollgate Crossing
158	General Feedback		Connecting Aurora Parkway to Parker Rd. as proposed here would be much more convenient than utilizing Inspiration
161	Roadway Condition (e.g., potholes, uneven pavement)	High - This issue significantly impacts my ability to safely drive.	With such high taxes on transportation, it seems as though roads could be better maintained.
163	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Reservoir Road is unsafe due to cars & motorcycles constantly speeding and racing. Would like to see traffic slowed by speed bumps, police actively patrolling, or some more efficient system to control the traffic between Quincy and Flanders.

172	Safety Concern (e.g., conflicts with other modes, sightline issues, speeding)	High - This issue significantly impacts my ability to safely drive.	Gun Club road from Quincy to 6th Ave is currently significantly over-capacity and needs to be two lanes in each direction. This intersection at Mississippi and Gun Club needs to be signalized since it is unsafe for turning movements most times of the day, primarily WB to SB and SB to EB, due to long cue times and a large speed differential. With new apartments, neighborhoods, and shopping developments planned and currently being constructed in this immediate area, the transportation system needs to catch up with the existing demand and rapid current and future development. If not, Gun Club will only become more unsafe and the accident rate at this intersection will only get worse.

SURVEY: ADDITIONAL FEEDBACK

Please share any additional thoughts or comments you would like the city to know about the proposed networks.

The proposed networks promise enhanced connectivity and economic growth, but careful planning for infrastructure scalability and equitable access is crucial to ensure long-term efficiency and inclusion.
THIS NETWORK PLAN IS A GAME-CHANGER! Faster speeds and wider coverage will supercharge businesses, education, and daily life—let's build a future where the city thrives digitally, connecting every neighborhood with innovation!
The networks show potential for improving accessibility, though concerns about cost, environmental impact, and technical implementation require transparent communication and community input to address effectively.
Love the idea of super-fast Wi-Fi everywhere—just please don't let it become the "urban legend" of coffee shops with passwords harder than solving a Rubik's cube. Smooth, reliable connections for all? Sign me up!
While I support the idea, we need more public input on the proposed networks.
I'm concerned about implementation costs. The city should thoroughly assess the proposed networks.
I wholeheartedly back the proposed networks! They'll boost connectivity and truly benefit our city.
The dual system of "ecological corridor + sponge city" is planned, and a self-purifying water circulation network is built by using rivers and green spaces, and rain gardens and ecological detention ponds are set up at nodes, which not only reduces the risk of flooding, but also forms a water-friendly space for citizens

Sensors are embedded in green belts to monitor the amount of carbon sequestration by vegetation in real time, and plant allocation is optimized through data feedback, so that green spaces can become quantifiable "urban carbon accounts".
Vehicle-road collaboration technology is used to automatically adjust tidal lanes during peak commuting hours, and dispatch instructions are sent to bike-sharing stations to alleviate "last mile" congestion.
Establish a real-time simulation model for key urban areas, so that policymakers can pre-infer the impact of decisions such as road closures and commercial layout adjustments on the surrounding areas.
Citizens can earn points for participating in community proposals, garbage sorting supervision, etc., and redeem them for public services
When designing the network, priority should be given to the needs of residents. For instance, improving the quality of life through digital convenience services (such as medical appointment scheduling and traffic navigation) rather than merely pursuing technological advancement.
Clarify the boundaries of data collection, establish a transparent privacy protection mechanism, and prevent public networks from becoming a breeding ground for information leakage. It is suggested to introduce third-party security audits.
Ensure that the network coverage reaches low-income communities and elderly groups, offer low-cost or free options for selection, and avoid exacerbating the digital divide.
Adopt energy-saving infrastructure (such as low-power sensors, renewable energy power supply), and utilize network to optimize urban energy consumption (such as intelligent street lamps, garbage management).
Adopt energy-saving infrastructure (such as low-power sensors, renewable energy power supply), and utilize network to optimize urban energy consumption (such as intelligent street lamps, garbage management).
The network should possess the ability to withstand disasters (such as extreme weather conditions and cyber attacks), and key nodes should have backup systems to ensure smooth communication in emergency situations.
Make non-sensitive data available for enterprises and developers to use, promote local innovation (such as traffic optimization apps, business analysis tools), and stimulate economic vitality.
Governments, enterprises, communities and academic institutions should jointly participate in planning and supervision, avoiding technological monopolies or decisions that deviate from actual needs.
The network architecture should be designed with an upgrade margin reserved to accommodate future technologies (such as 6G, quantum communication) and unanticipated demands (such as response to sudden public events).

Utilize the Internet to enhance urban cultural identity, for instance, by means of virtual museums, local content platforms, or augmented reality guided tours to improve tourism experiences.
Avoid excessive reliance on short-term capital investment, and plan a clear business model or public-private partnership (PPP) mechanism to ensure the sustainability of operation and maintenance funds.
The proposed networks must prioritize equitable access and cybersecurity, ensuring reliable connectivity for all neighborhoods while safeguarding resident data from potential threats.
Prioritize expanding broadband access to underserved communities
Partner with manufacturers or nonprofits to provide low-cost devices (laptops, tablets) for residents who cannot afford them.
The proposed networks seem promising. I hope the city speeds up implementation for quicker connectivity gains.
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
From "functional connectivity" to "ecological symbiosis" : Reconstructing the network value proposition
It is suggested to establish a real-time traffic data monitoring system, integrating GPS, cameras and citizen feedback. Through AI analysis, it can identify congestion patterns, accident hotspots and travel demands. The data should be transparent and made public, and be used to dynamically adjust traffic signals, bus schedules and infrastructure investment priorities, ensuring that resources are allocated to the most beneficial projects.
The planning should focus on covering low-income communities and people with disabilities, and avoid "traffic deserts". For instance, additional measures such as installing barrier-free buses and providing subsidies for low-income passengers should be taken. Moreover, it is necessary to ensure that new bike lanes or bus routes benefit under-served areas rather than merely connecting affluent communities.
When designing hub stations, integrate public transportation, bicycles, shared micro-mobility (electric scooters/bicycles), and pedestrian paths. For instance, at railway stations, add bicycle parking racks and shared vehicle zones, and provide real-time transfer information to reduce transfer time and costs.

All infrastructure needs to be prepared for extreme weather conditions: raise flood-prone sections, use permeable paving materials, and install sun-shading canopies and cooling designs for bus stops. Long-term planning should reduce asphalt pavement and increase green belts to mitigate the heat island effect.
I think it's fine to keep things as they are.
I am neutral towards improving all kinds of transportation. However, this method can be used to test the effectiveness. Before each project is launched, an "Open Street Day" is held to temporarily renovate the pilot area for citizens to experience and provide feedback. For instance, temporary flower pots are used to demarcate the bicycle lanes, and after collecting opinions, a permanent plan will be decided.
Regarding the improvement of transportation and traffic. Plan dedicated nighttime freight transportation periods and urban micro distribution centers to reduce the traffic volume of trucks during the day. Encourage the use of electric freight bicycles for last-mile deliveries to reduce noise and pollution.
Regarding children's safety on the roads. Build a "safe walking circle" around the school, install speed bumps, widen the sidewalks and set up volunteer security posts. Promote the "walking school bus" program, where adults lead children in teams to walk to and from school together.
Initiate congestion pricing or low-emission zones, and regulate traffic flow through time-based pricing. The revenue should be directly used to subsidize public transportation to form a virtuous cycle. Public consultation should be conducted in advance to ensure the fairness and transparency of the plan.
Regulation of shared mobility. Standardize the parking areas for shared bikes and scooters, and require operators to provide service quotas for low-income communities. Use electronic fence technology to prevent random parking and impose fines on enterprises that over-provide.
Special evacuation routes and bus priority lanes for disasters should be formulated and regular drills should be conducted. It is necessary to ensure that key routes can be quickly converted into corridors for transporting relief supplies in the event of an earthquake or flood.
Design linear parks along the main thoroughfares, integrating bike lanes, walking paths and greenery (like Singapore's "Park Connectors" model). This will enhance the commuting experience while promoting ecological connectivity.
Analyze the commuting pain points of major employment centers (such as science and technology parks, hospitals), and launch peak-hour direct buses or corporate cooperation shuttle buses. Commuting allowances can be provided to encourage employees to give up driving by themselves.

Open up specific areas to test new technologies such as autonomous shuttle buses and intelligent street lamps. Cooperate with enterprises and universities to turn Aurora into a smart transportation laboratory, and attract investment and talents.
Adding cultural elements is what we should do. Incorporating local artistic elements (such as murals and sculptures) into facilities like stations and bike lanes can enhance citizens' sense of belonging. For instance, the bike lane painting in Portland significantly reduced the rate of violations.
Promote the "Green Commuting Points" APP. Users can exchange points for discounts on goods or quotas for public welfare donations by walking or cycling. Cooperate with insurance companies to offer health insurance premium discounts to active users.
Explore diversified financing: Land value-added gains from TOD (Transit-Oriented Development) model, corporate naming sponsorship for stations, carbon trading funds, etc., to reduce reliance on traditional fiscal resources.
All newly-built roads should reserve space for future upgrades (such as BRT lanes and expansion of underground pipelines) to avoid repeated excavation. A special fund for traffic should be established to ensure that the funds for long-term maintenance are not misappropriated.
I prefer to ride a bike. It's easy to get around and I don't have to get stuck in traffic jams. It saves me a lot of time and exercise
Strengthen road construction
Increasing the proportion of bicycle trips helps to reduce vehicle exhaust emissions, reduce energy consumption, and play a positive role in environmental protection and sustainable development of cities. Optimizing the transport network can improve the efficiency of public transport operations, encourage people to use public transport, reduce the use of private cars, and thus reduce carbon emissions. Through street improvement, urban green space and public facilities can be increased, urban ecological environment quality can be improved, and livable cities can be built. Personally, I think it's okay
The improvement of the bicycle lane network and the encouragement of bicycle travel will help reduce the use of motor vehicles, thereby reducing exhaust emissions and noise pollution, and improving the ecological environment quality of the streets. At the same time, a good sidewalk environment can increase the green space and landscape facilities of the street, and enhance the aesthetics and comfort of the street.
1. Significant help: the improvement of bicycle lanes, traffic networks and sidewalks can optimize street space in an all-round way and significantly improve street quality. 2. Organic linkage: Improving the three types of channels can make street traffic more orderly and more active, which is an important driving force for street improvement.

3. Fit the trend: Their upgrading is in line with the needs of green travel and livable city construction, injecting new vitality into street development.
I hope the proposed transportation network can have more bike lanes to encourage green travel. Also, it would be great if there are more convenient transfer points between different types of public transportation, like buses and trains. And better signage and information systems at stations would be very helpful for both locals and tourists to navigate easily. Additionally, integrating more smart technologies to manage traffic flow would improve the overall efficiency of the network.
Smooth access: The three make street traffic more orderly, of course, support street improvement. Perfect bicycle lanes, transportation networks and sidewalks, suitable for multiple travel, for the street "extra points". They improve access conditions, reshape street functions, and contribute to street improvement. I support improving bike lane networks, transit networks and sidewalks. These improvements contribute to improving traffic safety, promoting green travel, optimizing urban space use and enhancing street vitality, which has a positive impact on the sustainable development of cities and the improvement of residents' quality of life.
In my opinion, the optimization of bicycle lane networks, transportation networks and sidewalk improvements have a positive and important supporting effect on street improvement. They can improve the traffic efficiency of streets, ensure the safety of pedestrians and cyclists, green travel, enhance the vitality and livability of streets, and make streets more in line with people's needs for a better living environment.
1. Incorporate more bike lanes for eco-friendly commuting. 2. Ensure real-time traffic info available at stations. 3. Plan for seamless transfer between different modes. 4. Consider noise reduction measures near residential areas. 5. Have emergency response plans for transport disruptions.
The optimization of bicycle lane network, traffic network and sidewalk improvement play a vital supporting role in street improvement. First, a well-developed network of bike lanes encourages green travel, reduces vehicle congestion, provides safe Spaces for cyclists, and improves street traffic diversity. Secondly, optimizing the traffic network can make the vehicle pass more smoothly. Through reasonable planning of traffic flow lines and setting up intelligent traffic facilities, the traffic efficiency of the whole street can be improved and traffic accidents can be reduced. Finally, improving sidewalks can guarantee the right of pedestrians to walk, provide a

comfortable and safe walking environment for pedestrians, increase the pedestrian-friendliness of streets, make streets more dynamic and attractive, and thus promote the overall improvement and sustainable development of streets. Very supportive
Optimizing the transportation network can reduce congestion, allow vehicles, pedestrians and bicycles to move in different directions, reduce mutual interference, and make traffic flow on the streets smoother. Improving the network of bike lanes will encourage more people to cycle and reduce motor vehicle use, which will help reduce carbon emissions and improve the urban environment.
Sure,here are some brief thoughts: 1. Ensure better connectivity between suburbs and city centers to facilitate daily commutes. 2. Prioritize pedestrian safety with more crosswalks and protected walkways. 3. Consider dedicated lanes for electric vehicles to encourage eco-friendly transport. 4. Improve signage and navigation to make it easier for drivers and tourists. 5. Plan for future growth and potential expansion of the network.
Separating pedestrians and vehicles is more effective.
These are all meaningful and worthy of support. The improvement of the bicycle lane network and traffic network will help optimize the travel structure of the city, improve traffic efficiency, and reduce congestion and environmental pollution. Improving sidewalks can enhance the safety and comfort of pedestrians and reflect the care for pedestrians. Street improvement can take into account various factors, such as aesthetics, functions, etc., to create a more livable and navigable urban environment and promote sustainable urban development. They play an important role in improving the quality of cities, meeting the diversified travel needs of residents and promoting green travel.
For the proposed network, cities should focus on balanced coverage of the network between different regions to avoid weak signal or no network in remote areas. At the same time, it is necessary to ensure the integration of network construction and urban landscape, such as the design of communication base stations to be more beautiful and hidden, and reduce the damage to the urban style. In addition, network security should be fully considered during construction to prevent data leakage and protect the privacy of citizens.
It is hoped that the city will take compatibility seriously as it moves forward with the proposed network. Ensure that the new network can be seamlessly connected with the existing equipment and systems, and reduce the replacement cost of citizens and enterprises.

At the same time, it is necessary to plan the network expansion space in advance to cope with the future population growth and the demand for explosive rise in data volume, and avoid network overload and performance degradation in the short term.
The proposed network should be able to withstand traffic shocks such as extreme weather and large events to ensure that it does not drop at critical times. Actively integrate 5G and Internet of Things technologies to make urban smart management and citizens' lives more convenient. In combination with the steady progress of urban development, do not be too ahead or behind, and match the actual needs
It is recommended that cities focus on the convenience of network upgrades to ensure that the proposed network can be iterated with low cost and high efficiency in the future and adapt to constantly changing technologies and requirements. Pay attention to the impact of network construction on the surrounding ecology, and adopt environmentally friendly materials and construction methods to reduce the interference to the urban ecological environment. It is hoped that the proposed network will be built with interfaces to integrate with future emerging technologies, such as quantum communication, to lay the foundation for the long-term development of the city
The proposed network construction should consider combining with community services, such as providing exclusive online assistance for the elderly and disabled, such as telemedicine assistance and online living guidance. It is necessary to pay attention to the control of pollution such as noise and dust in the process of network construction, and reduce the interference to the daily life of urban residents. It is hoped that the city will promote the linkage between network construction and cultural industry, use the network to spread city characteristics culture, and help promote cultural and creative products
It is hoped that the city will attach importance to network security supervision, set up a strict protection mechanism for the proposed network, prevent hackers and malware intrusion, and ensure the information security of citizens. The proposed network construction should be adapted to the different architectural styles of the city, and the design of facilities such as base stations can be integrated into the surrounding environment without damaging the coordination of the urban landscape. Promote the coordination between network construction and education, and use the network to build online learning resources for schools and enrich education channels
When the city promotes the proposed network, it needs to build a user feedback platform simultaneously, so that citizens can feedback network problems and use needs at any time, and optimize and adjust in time. Pay attention to the applicability of network construction to vulnerable groups, such as the design of easy-to-operate network terminals and interfaces to help the elderly and visually impaired groups easily access. It is suggested that the proposed network be deeply integrated with the urban emergency warning system, so that alerts can be pushed quickly and accurately when disasters come, and the safety of people's lives can be guaranteed.

The proposed network construction should pay attention to cross-regional coordination, break administrative boundaries, ensure the smooth flow of inter-city networks, and promote regional integration. Cities should encourage innovation in network construction and introduce new technologies to improve network performance, such as edge computing, and reduce data transmission latency.
It is hoped that when the city plans the proposed network, it can combine the layout of public space and set up free high-speed Internet hotspots in parks, squares and other places to enhance leisure experience.
It is hoped that when the city promotes the construction of the proposed network, it will make full use of idle space, such as abandoned buildings and lampposts, to reduce construction costs and footprint. It is necessary to pay attention to the protection of wildlife habitat in network construction, rationally plan routes, and avoid interfering with ecological balance. It is suggested that the proposed network be integrated with the urban tourism industry to provide tourists with convenient network services such as scenic spot tour and intelligent translation
In the proposed network construction, the city is expected to customize exclusive network services for different scenarios (such as hospitals and schools) to meet special needs. Pay attention to the compatibility of network construction with existing infrastructure, avoid repeated construction, reduce construction costs and impact on citizens' lives. Promote the proposed network to help urban environmental monitoring, and use the network to transmit environmental data in real time to provide strong support for ecological governance.
Bike lane network: Supported. It helps to encourage green travel, reduce traffic congestion and environmental pollution, and improve the health of urban residents. Transportation network: Continuous improvement is necessary. Efficient transport networks are key to the functioning of cities, promoting economic development and facilitating the movement of people and goods. Improving sidewalks: Very supportive. It can ensure the safety of pedestrians, improve the comfort and convenience of walking, and enhance the livability of the city. Street Improvement: Overall support. Street improvement can enhance the image of the city, optimize public space, provide residents with a better living and social environment, and also benefit business development.
Convenient transportation is convenient for commuting to work
Well-developed road traffic is more suitable for living

Propose adding more bike lane connections to commercial areas, such as solar-powered lighting and 24/7 surveillance near shopping centers to enhance nighttime safety. Public transit should prioritize coverage in low-income neighborhoods for equitable access. Sidewalk improvements must focus on universal design, including tactile paving and voice navigation for the visually impaired.
Propose adding e-bike charging stations and expanding bike-sharing systems in the bikeway network to reduce short-distance car trips. Public transit should integrate real-time arrival apps and collaborate with communities to design safe nighttime waiting zones. Sidewalk improvements should prioritize school zones with colored anti-slip surfaces and child-friendly signage.
Propose integrating "green cycling corridors" into the bikeway network, such as eco-friendly paths along rivers or parks. Public transit should adopt zero-emission electric buses and optimize seamless transfers at hubs. Sidewalk improvements must mandate slip-resistant permeable materials to reduce puddles and add temporary rest seats for people with disabilities.
Propose smart sensor-activated lighting in bike lanes to adjust brightness based on rider traffic for energy efficiency. Public transit should partner with ride-sharing platforms to offer "last-mile" connectivity. Sidewalks in commercial areas should pilot retractable shade structures to combat extreme weather. Street improvements should prioritize smart signal optimization over lane expansion to reduce congestion.
Propose integrating community art projects into sidewalk upgrades, such as locally-designed tile patterns or interactive installations to foster cultural identity. Public transit should add multilingual signage at hubs to serve immigrant populations. Street improvements should adopt "shared space" designs (e.g., blended pedestrian/vehicle zones) instead of widening lanes to enhance safety and neighborhood vibrancy.
Propose solar-powered charging stations and self-service repair kiosks along bike lanes for long-distance cyclists. Public transit should integrate real-time crowding data via apps and provide accessibility navigation for disabled passengers. Sidewalk upgrades in senior-heavy areas need gradual-slope benches and emergency call posts. Street improvements should prioritize pedestrian crossing efficiency over one-way conversions.
Propose dynamic speed limit signs in bike lanes that adjust based on weather and traffic for 24/7 safety. Public transit should integrate a cross-platform ticketing system (e.g., unified passes for subway, buses, and bike-sharing) with flexible pricing for students and seniors. Sidewalks near medical facilities need guide dog rest areas and emergency kits to build barrier-free lifelines.
Propose AI-powered traffic prediction in bike lanes to dynamically adjust width during peak hours. Public transit should partner with remote-work companies to offer "flexible commuter passes" for off-peak travel. Sidewalks should pilot community co-design programs where residents maintain local walkways. Street improvements must eliminate lane expansions and use vertical green barriers to absorb vehicle emissions.

Propose using recycled plastic composite materials for bike lane surfaces to enhance sustainability. Public transit should collaborate with local businesses to sponsor amenities like free Wi-Fi and charging ports at stations. Sidewalks in tourist zones should integrate QR codes for historical landmark tours. Street improvements must reject lane additions and adopt congestion pricing to reduce private vehicle use.
Propose modular bike lanes that can be temporarily reconfigured for events or emergencies, enhancing public space flexibility. Public transit should integrate carbon footprint tracking, allowing riders to view their environmental impact per trip via apps to incentivize green travel. Sidewalks should feature "community hubs" at neighborhood entrances with seating, public art, and mini-libraries to blend mobility with social interaction. Street improvements must prioritize AI-powered traffic signal optimization over physical lane expansions.
Propose integrating solar-powered pavement lighting in bike lanes to enhance nighttime safety and feed clean energy into the grid. Public transit should adopt dynamic scheduling algorithms to adjust vehicle frequency based on real-time demand, reducing empty runs. Sidewalks in commercial zones need smart anti-slip tiles with sensors to detect and melt ice automatically. Street improvements should prioritize upgrading aging drainage systems over lane expansions to prevent flooding during rainy seasons.
Propose recycled rubber composite materials for bike lanes to reduce carbon footprint and enhance comfort. Public transit should adopt data-driven "demand-responsive routes" that adapt to real-time commuter patterns. Sidewalks need "multi-functional hubs" in neighborhoods with charging ports, drinking fountains, and first-aid kits. Street improvements should deploy smart dynamic lanes with LED markers to optimize space without physical expansion.
In our daily life, traffic safety is always around us. As soon as you set out, you will inevitably encounter traffic safety issues. A momentary distraction while walking, a momentary侥幸 when crossing the road, or a single violation while driving - even a minor oversight like these can cause a life to slip away in an instant.
For everyone, life is only one chance. For yourself and for those you care about, please abide by traffic rules and strive to achieve "Safe Travel with Us". Let's plant the four words "Safe Travel" deeply in our hearts forever!
Propose smart solar-powered streetlights in bike lanes with air quality sensors to provide real-time environmental data. Public transit should launch a "Green Points Program" where riders earn rewards for low-carbon travel. Sidewalks near parks and schools need "rain garden pathways" using permeable materials to manage stormwater and enhance aesthetics. Street improvements must reject lane expansions and adopt "shared space" designs with traffic calming and multi-functional zones.
Propose dynamic bike lane barriers that expand during rush hour and convert to public space off-peak. Public transit should partner with schools to deploy "student shuttle algorithms" matching commute routes. Sidewalks in aging communities need AI-powered fall

prevention systems with pressure sensors and cameras. Street improvements must prioritize all-way pedestrian signals to reduce wait times and enhance walkability.
Propose piloting solar-kinetic bike lanes that harvest energy from rider motion and sunlight to power streetlights, creating carbon-neutral corridors. Public transit should launch inter-suburban micro-shuttles to seamlessly connect outskirts with downtown hubs, reducing cross-region private car use. Sidewalks near transit hubs need smart LED-guided tiles to direct tourists to attractions. Street improvements must adopt adaptive curbs that adjust height based on traffic flow to optimize parking and cycling space, eliminating lane expansions.
Propose a community co-design platform for bike lanes, enabling residents to participate in route planning via apps. Public transit should pilot a carbon-credit ticketing system where riders earn discounts on city services for low-carbon travel. Sidewalks near industrial zones need "eco-noise reduction paths" with sound-absorbing plants and materials. Street improvements must adopt dynamic lane allocation technology to adjust functions (e.g., temporary bus priority lanes) based on real-time data, avoiding physical expansion.
Propose smart temperature-regulated bike lane surfaces that melt snow in winter and cool in summer for year-round safety. Public transit should implement an accessibility booking system where disabled riders reserve station assistance via apps. Sidewalks in commercial areas need retractable shade structures that deploy during peak hours. Street improvements must adopt mini-roundabouts with adaptive signals to optimize intersections without lane expansions.
Propose solar-powered bike lane canopies for shade and nighttime lighting. Public transit should test tidal bus lanes that adjust width during rush hours. Sidewalks near hospitals need emergency medical corridors with ramps and AEDs. Street improvements must prioritize smart drainage systems with flood sensors over lane expansions.
Propose wireless charging stations for e-bikes along bike lanes to extend range. Public transit should create dynamic micro-routes with temporary stops based on real-time demand. Sidewalks need AR-enhanced cultural walls to showcase local heritage. Street improvements must replace physical barriers with holographic lane markers for adaptive space use.
Propose air-purifying plant barriers in bike lanes to absorb traffic pollutants while enhancing rider experience. Public transit should pilot hydrogen-powered buses on industrial-residential corridors. Sidewalks at transit hubs need multilingual smart signs with voice assistance for tourists. Street improvements must adopt modular curbs that adapt for parking, cycling, or events through elevation control.
I do not support bike riders. They do NOT follow the road rules and cause accidents. Bike lanes are stupid. They cut you off and pedel thru red lights. THEY cause accidents. If you can make roadways better to enforce PROPER biking, I might change my mind. And the motorcyles that pop wheelies going down Iliff btwn Kitteridge and chambers

I think overhead walk ways would be better and safer for pedestrians and allow traffic to flow better.
Increase the use of electric busses.
Aurora has a huge opportunity to really improve the bike-walk-run areas of the city by connecting them better, there are gaps (sharing lanes with cars, trucks don't work, and most drivers are angry, rude, and seldom follow the law when it comes to pedestrian right of ways, and APD doesn't do anything about it), and a straight stretch from Anschutz to Denver City Park without stop signs would be awesome. Another example the Highline Canal I-70 crossing is very urban, filthy, and not really a "bike" or "run" and instead a path to nowhere, this could be improved with a real pedestrian bridge and extension of the trails (Rocky Mountain Arsenal anyone). Sand creek trail, Toll Gate Creek, side creek, Aurora and Quincy Reservoir, C470 Trail, there is opportunity here, and for running, I'd like to propose a parallel and or established and connected dirt trail, 5K, 10K, half marathon, full marathon distances loops are a plus. Whose idea was it to detour the RTD R line to Sable (impractical).
Wide streets promote unsafe driving, don't expand them!
Reduce residential speed to 20 please - this is how ped lives our saved - and as we all know - Aurora is doing a terrible job keeping pedestrians safe -
I am really in favor of the bikeway network in particular and love the idea of decentering cars in our communities and recentering pedestrians, bikes, and buses, and people in general instead of cars.
Adding more travel lanes for cars is a mistake and will only see the worst aspects of current Aurora spread further into the city. Fixing traffic light timing is a better use of resources without needlessly endangering the populace and making areas unpleasant and uncomfortable to be in. If certain streets and corridors are expected to need more capacity in the future then improving public transit is the optimal way to do so.
Your visionary network maps are terrible. In the bikeways map, there was too much attention paid to color-coordinating and so its hard to tell the difference between the two blue options and between the two purple options. The in-browser app is clunky and hard to use. The sidewalk improvement plan is not dense enough for real improvement. Cars go way too fast down small, neighborhood streets in North Aurora and regularly go through stop signs. None of the places I've nearly been hit by cars are covered by the proposed improvements.
The use of overpasses/bridges to cross major thoroughfares (Havana, Chambers, Colfax, etc) would be really helpful to reduce pedestrian collisions and injuries

There is an opportunity to include future rail networks into the north east part of the city as it expands and this should be included in development plans. I enjoy the off-road trails and bike connections as these are safer and generally more enjoyable to take places, keep those up and expand as possible.
I think Aurora needs protected bike lanes on the major roads. Drivers are not aware of bicyclists and even on the smaller roads, I've almost been hit by cars multiple times. People use the bike lane as a turn lane. They cross the bike lane to park without looking. They go well above the 25 mph speed limit. And they don't look for bikes when crossing streets, which makes it very dangerous during rush hour, never knowing if a car at an intersection is going to pull out without seeing you. Protected bike lanes would make it much safer.
The website didn't explain what any of the projects involved, what the timelines were or what division really entails. This was a strange survey.
Great trails but the lack of protected median refuge islands makes crossing these 4-6 lane arterials, collectors, etc., very challenging and difficult. Concerned that the City has previously chosen to raise speed limits and now want to add lanes - these types of 'improvements' only lead to people dying on the street while walking or biking, or worse yet, just more speeding vehicles and weaving/crashing.
Sidewalks along bus routes are important since people in wheelchairs rely on sidewalks to get to bus stops. Riding a wheelchair on a 4 lane arterial is totally unacceptable and probably against the ADA. Aurora needs to adopt a "people first" priority when designing infrastructure. Count bellybuttons, not cars!
This is awesome! Keep up the good work!
If winter didn't exist I would bike or scoot everywhere! But when it's cold, icy, or I'm sick, the transit network is really important to me. Also, I would add that snow and ice removal to the sidewalk network should be part of the vision if we want it to be usable all the time and by everyone. Many of the main paths are cleared, but many in neighborhoods are not
I strongly oppose the visionary bikeway network. The city is installing bike lanes which are blocked off from vehicles. This is taking away car lanes and there is never anyone in these bike lanes. I'm hoping the city will come to their senses and take these out. The bike lanes only collect debris and aren't used. It would be nice to see money being put into repairing/resurfacing the streets we already have instead of worrying about sidewalk improvements.
The big issue most cities have when addressing ideas to connect citizens to their surroundings is they invest in bigger, better streets. These streets just fill up and need to be improved/expanded even further. If a concentrated effort is not made to lesson the need for

bigger/more roads in Aurora at this stage in its development, alternatives to driving is always going to be an afterthought. If the city expands with these alternatives in mind as the primary, rather than as a secondary goal, all this investment will actually be worth it.
Network improvements aren't valuable unless people feel safe to use them - please consider incorporating safety features to increase comfort with alternate forms of transportation. Increasing the frequency of public transit would also help reduce how long people are left in the open, which would assist with safety and also make it more appealing than it is today. Also, for changes impacting major arteries, please make efforts to limit lane closures to one as much as possible. Losing two of three lanes in a single direction of travel is enough to double some commute times, and they create ripples across the entire road network.
what would really help most HOAs the most would be if Aurora PD or Code Enforcement could enforce the current laws. We need cars towed with expired/missing tags/plates. We need speed limits enforced, etc. I don't need more stuff for the city to maintain to make my HOA better - just get the current stuff working correctly. I was an intern at Stantec when Aurora paid for Traffic light timing. Once thing I know was true then and is still true today is NONE of your pedestrian crossing traffic signals are linked to your overall system. Meaning when someone calls to cross at Iliff&tollway trail, but Illiff at Chambers just turned green, the ped signal will turn red a hose traffic timing - this really is absurd this wasn't fixed years ago
Better lighting and sight lines at intersections so that pedestrians can be seen at night.
Please encourage more bike riding with the bike plan!!
At E-470 North and Smoky Hill Rd, there are two lanes, one for Smoky Hill east, governed by the traffic light, to get to Southlands and turning left on Smoky Hill. The other lane is for Smoky Hill traffic turning right. Traffic for both lanes generally ignore the reason for the two lanes and turn right in the right hand lane and cross 2 lanes of traffic, not stopped, to try to get in the left turn lane for Southlands. I have missed many of these cars through the years as they bull their way through the cars to turn left in in 500 feet. Poor design as the right turn lane should have no choice but to continue on the right lane on Smoky Hill with no option to get to Southlands.
The maps are very difficult to interpret and don't give a good impression of the improvements that are planned. I'm not confident that the planned improvements will ultimately be useful in the long run, and I'd like to see a better overview of them. I'm not confident that the planned improvements will make things safer and better for my use cases.
With what ever proposed work going to be done please be mindful with Colorado weather snow / ice upkeep
I would like to see a balance of resources and doing our best with water conservation so that water is not wasted on unnecessary or water heavy flora.

Having safer bike paths and sidewalks and more frequent and reliable transit will encourage people to take these forms of transportation. Many people would like to take advantage of these forms of transportation, but are forced to drive because of the amount of time it takes, the limited routes, or unsafe areas where they do not feel comfortable taking the train/bus. Well lit, sidewalks and frequent transit will help this.
More emphasis on off-road bike trails or widened multi-use sidewalks rather than share-the-road lanes. Drivers don't respect them.
It is unsafe to travel in something other than a car. People run red lights all the time, speed and it's scary traveling in a bike knowing you could be injured at anytime. Also if I travel to the store I have to worry about my bike getting stolen. We should invest in more lights when building new apartments or new stores
1. Gun Club road needs widening to two lanes in each direction between S Aurora Pkwy and I-70. 2. There should be a ramp from NB E-470 to EB I-70.
We need more light rail lines from Aurora to major destinations: DIA, DPAC, Ball Arena, Stadiums, Southland, Northfield, and 9-Mile station
Adding lanes doesn't reduce congestion, there have been studies proving this basic fact for decades. Roundabouts are good, proper signage is a necessity as many folks seem to be very confused by them.
Would like covered bus stops again. Summer is coming and it gets hot.
Aurora doesn't have roads, it has stroads. Just look at Alameda. There are 6 large lanes along most of it. That's a highway. -Change one of each of the lanes on 4-6 lane roads into a rail or bus-only lane. It increases ridership by keeping buses from getting stuck in traffic and builds revenue for more transit projects. -Make lanes thinner and include protected bike lanes along high traffic areas. Thinner lanes make cars go slower. Protected bike lanes make it feel safer to bike. -Include roundabouts in low traffic areas first so people get used to them -Change zoning to include multi-use commercial areas on the corners in R1 residential zoned areas so people can get to places without having to go far -People mostly don't care How they get somewhere. They care about how Fast they get somewhere. Less cars will make that happen. But it means a lot of people will have to get fed up with traffic and see buses pass them before they switch to buses.
No more six through lane wide arterial roads please.

With regards to the transit vision, as an older adult, it is important that the community understands how to use the rail transit. I have been here for 6 months and cannot figure to schedule out to get from one city to the next.
Unless the transit system is affordable people won't use it. Aurora isn't Boulder. Please don't congest current roads to build and add bike lanes that do NOT get used. Look at GVR. There are zero bikes on the bike lanes yet they add a bike lane instead of help with the car congestion??? Please don't waste our tax funds. We can't afford more useless projects. If you need something to spend money on, try looking at the addiction and mental health crisis instead of the sidewalks they are standing on.
Need to improve the quality of roads and update the timing of some lights.
Gun club really needs to be wider than two lanes to support all the new houses and businesses being built.
Thank you for working on Aurora. I really appreciate it!
keep all folks with all types of disabilities in mind when making changes. Who are those that will be using these services and are the changes realistic.
Multimodal transportation will always be an ongoing effort. Thanks for continuing to evolve and gather feedback.
Unfortunately I'm unable to figure out how to comment on the maps directly. Hopefully this is part of the plan, but traffic enforcement needs to be a key part of this effort, particularly speeding and running red lights. I live behind the Costco and I won't walk to the shopping center on the other side of Havana bc I feel so unsafe crossing Havana. As a result I take my car which feels really wasteful and silly given how close I live to Target, Sprouts, etc.
Aurora currently has no great E-W routes for transit. Airport is the middle of your map, but the N-S route there is every 60 min. Chambers is every 30, Peoria 15, Havana 20. Getting to a transfer station can take 2 buses from Airport Blvd, making the process of getting to Aurora Metro Station long. Consideration for people who don't drive to get to these places needs to happen ASAP. Also, a path to ensuring that roads/stops being created by builders are accessible is important. Giving citizens a clear path to make adjustments is hard as RTD says they don't own the stops and the city says it is private property. Also, if the beautification, resurfacing and upgrades could be coordinated ... Airport Blvd has been ripped up every year for 3 years. In the first month of school, in a zone affecting Pickens, WSHS, Transportation, Warehouse, Mosely, Quest, Crossroads. It seems wasteful and unplanned. These are things to work on...
The city should already be on board with Colfax BRT. Aurora should also look at BRT along Havana and a city run e-scooter/bike program with docking stations. The current bike trail system is great for getting to different parts of the city.

Please work on easy access to 470 bike path. NO entry point (parking) at the Jewell entrance and no easy (safe) way to bike to the trail from Murphy Creek and for the love of all things FIX GUN CLUB!! Widen it!! This is beyond acceptable. It needs to be 4 lanes.
Generally Aurora seems to keep sidewalks in good condition and have a decent network. Bike path connections between Harvest Rd. and Aurora Reservoir as well as improvements to S. Gun Club Rd. would be very welcome to SE Aurora
impressed with the work that has gone into this visioning thus far

BUILD UP AURORA: RELATED SURVEY COMMENTS

Does your neighborhood offer safe streets, adequate lighting and pedestrian-friendly roads? If no, please describe what investments are needed.
3/13/2025 My immediate neighborhood offers these things. The access roads to my neighborhood do not. They are too small to service the population and there is no curb and gutter.
3/17/2025 - Never EVER allowing attached sidewalks, ONLY detached, adopting better road marking standards, they are currently OUTRIGHT INSANELY AWFUL(turn arrows/ONLY message are never painted in turn lanes when they should be, bike lanes are almost never marked across intersections, crosswalks are barely painted at stop signs, stop bars are NEVER painted and it causes so much issues like people stopping in crosswalks or literally not knowing where to stop due to someone at Aurora's incompetence - yall are literally the only city that doesn't paint stop bars), more streetlights. Upgrading every single streetlight in Aurora to LED in the next 2 years. It's beyond embarrassing and completely disgusting that Aurora is cheap and still has sodium streetlights in 2025..... Denver was able to replace every single one of 44000 streetlights to LED within 3 years tops, boulder is currently replacing every single sodium light with LED as we speak. Stop with excuses, led streetlights are needed for safety and there should be a single sodium light within Aurora past 2026. Also NEVER allowing bike lanes that aren't buffered. They need to be buffered with GREEN PAINT at every single intersection. Roundabouts need to be evaluated first ALWAYS way before a signal is considered. Every intersection should ALWAYS have four streetlights no matter what, there are so many intersections without streetlights or the public works department refuses to install streetlights on the mast arm that's missing a fixture.
3/26/2025 - Sidewalks are incredibly narrow, very limited street lights (or they are old wooden posts that are leaning), there is constant glass and debris on the sidewalk, and no sidewalks present on the west side of potomac street in hoffman heights. We would greatly appreciate a sidewalk on potomac and brick fencing along the homes off of potomac to decrease the risk of accidents in residential yards (This is fairly common).
3/26/2025 - There is not adequate lighting for safely using the sidewalks in the early morning and evening

3/26/2025 -There are many missing sidewalks. Potomac street has missing chunks. very few street lights. Lots of homeless people. Not enough street sweeping.
3/27/2025 - Sidewalks stop or are very narrow. They are not well maintained by residents - shoveled or bushes trimmed back so you have to walk on the street
3/27/2025 - My community needs better sidewalks that are repaired & maintained. In many areas, people who must travel via wheelchair are forced into roadways because of uneven sidewalks & damaged access points.
3/30/2025 - Delmar parkway & Aurora cultural arts neighborhood saw a flood of crime in the past few years which made people scared to walk the streets especially at night. We need to prioritize continuous patrolling of this area. Faster police response times. More speed bumps and lighting on the streets and alleys. Especially down main roads like 11th & 13th where people often speed and drive recklessly. And clean up the abandoned, stolen, and expired plate cars off the streets. Ticket people for doing car work in the streets and getting trash and oil everywhere while taking up parking spots.
3/31/2025 - Southshore Drive goes from 2 lanes to 1. The road striping makes no sense as drives race down the road to cut each other off. The inner East bound should be a left turn only at Shady Grove. This would help avoid the unsafe merge. Just last week a major accident occurred in the area. Should be completely avoided with restriping the lanes.
3/31/2025 - 1. Car racing within meadowwood neighborhood (darmouth) streets and along chambers. 2. Trying to walk across dartmouth from one side to the next feels people will run you over.
4/2/2025 - No, our curb ramps do not meet ADA standards, not do our sidewalks (we live in an older neighborhood). Littering and dumping is a huge problem especially now that new developments of apartment complexes have gone up. While urban camping is down, the littering and trash in the parks and open space is not down. We do not have adequate lighting, or sufficient numbers of stop signs and warning signals in our neighborhood and as such speeding is also a safety issue.
4/3/2025 - Speed control and other measures to greatly increase pedestrian safety on sable blvd, especially between Mississippi and exposition, and Mississippi/alameda between Buckley and 225. It is incredibly dangerous for pedestrians to cross an intersection with a walk sign at a intersection which has two flashing yellow turn lanes face two other flashing yellow turn lanes with three more active lanes of traffic's going each direction. Turning cars are trying to see oncoming speeding traffic (which is blocked by the opposing vehicles) and are not looking for pedestrians. The whole immediate area around sable/missippi/chambers is very unsafe for pedestrians due to traffic and lack of street lighting.
4/4/2025 - I live right off of 17th and Hanover. Sidewalks in my neighborhood are very narrow and not lit well. I have two kids, one 3.5 years old and one 10 months old. Taking them out in the stroller for walks is very difficult. The sidewalks are so narrow and cars or bushes are often blocking the walkway. The sidewalks dip with every driveway, and cars race by much too fast. I often go for walks in the Denver neighborhoods close to me instead. The sidewalks north of Moorhead rec center are now very wide, beautifully lit, and comfortable. Everything to the north of that is very pleasant, as is everything over by Stanley marketplace. I prefer to walk these areas but would love for my neighborhood to be more pedestrian-

friendly. Walking west along 19th is quite nice, and 19th or 17th would both be wonderful possibilities for better pedestrian infrastructure. I have heard there are plans to widen the sidewalks along Havana up to Montview, which is a big help. Please at least consider making some pedestrian friendly walking routes in the neighborhood and add more lighting. There is so much happening around us, but everything needs to be better connected and safer for those not in cars. I do have a car and we drive, but that should not be the only option. Montview may also be a fantastic road for public transportation. Please also make intersections safer and more accessible for those on foot. Finally, please consider paving more the alleys behind the homes in my area. There is an alley plan, but only 5-6 sections are selected per year. There are over 100 sections still to be developed. At the rate the city is currently going, it will take over 22 years to finish. Please look along Central Park Blvd for inspiration for pleasant, walkable areas. The sidewalks that were recently widened in front of Rocky Mountain Prep School are also a wonderful example. Places I have walked to from my home include Moorhead Rec Center, Glissade coffee shop (with a bike shop and kids theatre company in the same small plaza), Judi's House (a new center for kids experiencing the loss of a sibling), new affordable townhomes, Stanley marketplace, the shops and King Soopers at MLK Blvd and Havana, Westerly Creek trail up along Central Park Blvd, to Montview Park, and even to the Bluff Lake Nature Center. I have walked to other nearby locations, such as Spencer Garrett Park, Taco River at Peoria and 17th Ave, and even to General's Park beyond that. I have also walked to the MLK library and Aurora City Park. I used to, on occasion, walk to the Walgreens and Walmart near Colfax and Havana (though both have since closed). What I have found is that walking to the north, west, and northwest are my favorite routes. The sidewalks feel more pleasant and the roads safer on the north side of Montview. While MLK library is close to me and Aurora City Park is beautiful, I do not feel safe walking there with all the cars whizzing by along Colfax, Del Mar, etc. The parks feel exposed, with traffic on all sides. Spencer Garrett is a little better, but is not as close to other amenities. Time and time again, I find myself drawn towards Montview Park, the Westerly Creek trails, Stanley marketplace, and all the lovely pathways along 25th and 26th ave. I walk these areas because they are safe, have interesting destinations, and are pleasant and comfortable. Please check out the Youtube channels NotJustBikes and CityNerd for some inspiration. Thank you for reading!!!
4/7/2025 - Street lamps aren't enough and they are too dim. Sidewalks are too narrow and hazardous in many places. Protected bike lanes would also be helpful.
4/7/2025 - There are no sidewalks on many streets in my neighborhood. Trash debris broken glass and dumped items litter the walkable dirt area where a sidewalk should be
4/7/2025 - So much traffic, streets are too wide and busy to cross safely, not enough trees or greenery. There are 20 gas stations within 2 miles of my house, it's ridiculous how car centric everything is. I would love for Aurora to be more pleasant to walk around.
4/7/2025 - more lights for sure. better protection for instersection located at Iliff & Kitteridge.
4/7/2025 - Many roads are still missing sidewalks, and Xcel does a poor job of managing lighting. Some parks and open spaces lack safe pedestrian or bicycle access, like the Cherry Creek Trail
4/8/2025 - Pedestrian friendly roads... I would not walk on Parker parkway because I would fear being hit by speeding cars. Rarely do police monitor speeding. Street racers at night makes it dangerous to drive or walk on Parker Parkway.

4/8/2025 - Especially around 225 and Parker, the street and sidewalks need a lot of cement work, pot holes, dirt, trash, everywhere you look just about.
4/8/2025 - I am an APS educator working with students at Crossroads Transition Center. A large part of our program is helping our disabled young adult students access the community. We frequently encounter streets that are either inaccessible or unsafe. For example, most recently, we were at Parker and Yale and there was no sidewalk from the bus stop to the intersection, just stretches of river rock, parking lot entrances, and curbs. More accessible sidewalks should be a priority so that everyone can access all of our community.
4/8/2025 - Aurora is not a pedestrian safe city.
4/8/2025 - Being a pedestrian on south Buckley Road doesn't feel safe. There is a lot of trash and speeding cars.
4/8/2025 - I work and live off Fitzsimons and Colfax the Median makes it difficult to get to my location safely. I run the Storage facility and my 350+ tenants feel the same. Turn in access to the business is not possible without a U-turn at Colfax with is a risk or making circles around town to come back down Fitzsimons. A trun in off the road would be amazing!
4/8/2025 - The sidewalks are dirty and covered in trash and the roads are busy with fast and aggressive cars and the public transport stations dont feel safe
4/8/2025 - No lighting, no sidewalks on 6th Ave east of Picadilly
4/8/2025 - It's awful. 1) Cars parked in front of stop signs, limiting sight of roads/ oncoming traffic 2) sidewalks are narrow, end abruptly, or are generally not bike friendly. (Highline trail is fantastic) 3) pot holes galore. I'm afraid I'll wreck my car on one
4/8/2025 - raised intersections and speed bumps, and stop signs through main neighborhood roads, especially in the vicinity of parks and schools where children need to cross
4/8/2025 - E Mansfield Ave is a very wide road in our neighborhood that promotes speeding. Need more speed bumps that actually slow people down. Unsafe especially with a local school nearby and lots of kids walking to get there
4/8/2025 - Lightning is poor. Roads are maintained pretty well. Speeding and distracted drivers are the biggest risk. There’s only one crosswalk on E. Mansfield Avenue.
4/8/2025 - No protected bike lanes, no speed bumps to discourage speeding vehicles, very few options for public transit.
4/8/2025 - Within my neighborhood, it's fine. However, the intersection of Gun Club and Alameda could use turn lanes or maybe a roundabout. Honestly, the lack of lanes causes a lot of frustration, especially when a slow driver holds others back. I've seen lots of red lights run and I think people are so frustrated, trying to get to their destinations that they run lights.
4/9/2025 - More streetlights on the roadway/sidewalks, it's too dark most of the time; pothole maintenance; sidewalks fit for ADA; in Australia, they have walk signs that beep for those who are visually impaired, while we don't have anything to alert that it is safe for them to walk.

4/9/2025 - Speed deterrents on Powhatan and Southshore Parkway
4/9/2025 - Additional lightening in Southshore Mead District near pocket parks. Traffic lights and four way blinking sign at stoplights. Too much speeding in the neighborhood.
4/10/2025 - Xcel does not properly maintain the streetlights in Ward VI. There are not enough crosswalks or speed enforcement to make it safe to cross the road. Even at crosswalks, folks turning right on red or left don't stop for pedestrians and bikes. The speeding and racing on our public roads is disgraceful.
4/11/2025 - Crosswalk/pedestrian light at Evanston/Smoky Hill; traffic light Chambers/Pheasant Run; sidewalk cleaning along Chambers and Smoky Hill (dirt, broken glass) and also Quincy (in season no ice/snow piled on south sidewalk) and sidewalk repairs; enforce citizen/resident compliance with sidewalk maintenance adjacent to property (bushes cut back, swept, snow removal)
4/11/2025 - Speed humps to prevent drivers from literally drag racing, gunshot and all, on east Kentucky Ave. just east of Havana.
4/11/2025 - Conservatory Parkway curves and becomes Wesley. The crosswalks on Conservatory Parkway have flashing lights to warn cars to slow down and stop. We need the crosswalks on Wesley to have those same features.
4/11/2025 - Perhaps a stop sign midway between Havana and Moline at Kentucky and Kenton or a road hump. There is an elementary school just north of us (11055 E Kentucky Ave) and children walk and possibly cross Kentucky while walking home.
4/12/2025 - The emphasis is entirely on cars, I fully believe that sections of the city should be cordoned off for walking only, and emphasis given to accessibility transit with parking garages further away.
4/14/2025 - We have multiple intersections without even crosswalk lights. You kind of have to guess when to cross. Sidewalks are constantly blocked by cars or construction projects without any signage for ped detours. Pedestrians are clearly NOT a part of the process when planning improvement projects, and enforcement of blocked sidewalks is lacking.
4/14/2025 - Road diets to narrow all non-highway roads, but especially in neighborhoods and near community gathering places. Less street space devoted to vehicles, including taxpayer-subsidized car storage. Wider sidewalks away from the road and protected bike lanes, but also bus-only lanes to improve transit times, make transit more appealing than driving, and to decrease the pollution and noise from 6-lane arterials that have become the norm for almost every street in "new" Aurora. More opportunities for non-car travelers to cross major streets, including full lights (not just the flashing ones that drivers don't stop for) with speed bumps to force drivers to slow down and stop for people.
4/14/2025 - We are at Bayaud and Sable. The traffic from the Colfax bus stops at this intersection, and then people hide behind the brick wall, leaving behind a lot of trash. I think widening the sidewalk, adding more lighting, and some kind of trash cans that have covers/hard to get into would be a good place to start. I think people are used to coming over here like this and I am hoping the Colfax improvement plans reduce the traffic.
4/15/2025 - Wider sidewalks and walking bridges over major roads like Havana, Peoria, Sable, Chambers.

4/16/2025 - Not enough sidewalks/ bike paths. No crosswalks at 56th and Himalaya or 64th and Himalaya to get to Gaylord. Painted prairie was supposed to have shopping and a lake/pond…pedestrian brides.
4/17/2025 - 56th and Dunkirk needs line fixing on North lane after intersection
4/18/2025 - Better lighting at night for crossing streets, more ADA accessible crossing times, more public transportation
4/19/2025 - mexico between chambers and sable is a raceway. it is a wide road encouraging faster speeds past houses. adding painted parking lines would give the illusion of a narrower road.
4/19/2025 - Cars speed on the roads. Narrowing the streets, adding bike lanes, adding raised crosswalks would help slow car traffic and make the streets safer for pedestrians. Sidewalks need to be moved further away from the roads. Trees and other vertical visual barriers need to be placed between the sidewalks and roads to provide a sense of safety for pedestrians. I often see broken glass on sidewalks and in crosswalks.
4/22/2025 - Reduce the speed limit on westbound Hampden between Eagle and Hamilton so people stop running the red light at the Churchill subdivision entrance.
4/22/2025 - I live on Florida between Havana and Peoria. There is lots of speeding, passing in the bike lane, etc. I think speed humps are the only solution that will help the problem the full length of Florida.
4/27/2025 - The roads are not pedestrian-friendly. Or, more specifically, the drivers aren't. We need to force drivers to drive more safely and accommodate bikes/pedestrians, and upgrading streets/roads can be part of that.
Are there any types of facilities or services that you think are missing in your community? If yes, please specify.
3/13/2025 - Buckley road is designated as a bike lane. However, riding a bike is completely not safe on it. Lane is not protected and people go 55+ MPH. Please develop realistic bike lanes so people can use them safely.
4/2/2025 - protected bike lanes, pedestrian friendly crossings
4/4/2025 - Covered bus stops with seating
4/4/2025 - Moorhead Park is a prime candidate for larger picnic shelters and more outdoor programming. The playgrounds there are lovely but it can certainly be more utilized. A library/nature center in the area would be nice, perhaps right next to Judi's house. Would love to see the Dayton street become a revitalized, thriving walkable shopping area (it may be moving towards that already? Hard to tell). Development is occurring all around and the area has such huge potential. Please make it more walkable and pedestrian-friendly, develop better crossings and safer intersections, employ traffic calming measures and bike lanes, create shade corridors and connect green spaces to one another, and fill in the vacant lots with housing and even businesses! So much exciting work is happening along Havana, Colfax, at Fitzsimons, near Stanley Marketplace, and along Montview Blvd. Please continue that reinvestment in northwest, original Aurora while also keeping the character of the neighborhood alive (allowing food trucks, unique small business, people selling oranges off the corners, etc).

4/7/2025 - Colorado 30 from Gun Club to Southlands is an outdated pothole ridden highway. It serves thousands of people daily, is always bumper-to-bumper, and dangerous! It needs to be rebuilt urgently.
4/8/2025 - Shoulders and more lanes on Gun Club road.. No one wants to use e470 because it is so expensive. Give us at least a shoulder on Gun Club so it will be safer. Connect South East Aurora to Parker safely. Going through neighborhoods to get to Inspiration that has no shoulder is not safe and is very crowded. With more housing and houses being built there are no expansions to support the extra infrastructure. We need more lanes on roads and better access to Parker.
4/8/2025 - Further bike paths and connections between bike paths
4/8/2025 - While it seems like a bizarre idea, I think we should take multi-lane roads and establish a trolley system to exclusively use some of the lanes. It would dramatically improve public transit, reduce road width which makes for safer streets, and be completely unique to Aurora.
4/8/2025 - better access to public transit
4/8/2025 - Protected bike lanes, narrower roads to slow down drivers.
4/8/2025 - Safe and convenient bus shelters with lites, accompanying wider and complete sidewalk access and bicycle paths (sidewalk paths and dedicated trails/paths) are needed. Street intersections have got to be improved to be much more pedestrian and bicyclist friendly. Transit bus bypass and que jumps are needed on a variety of major streets throughout the city.
4/10/2025 - I live in Denver just blocks from North Aurora. I wish the sidewalks along Montview and Colfax were wider and supported more local retail.
4/11/2025 - While there is a train station not too far from me, it still takes over an hour to get into downtown Denver. That seems ridiculous to me. It's faster to take a car than it is to take the train, which makes taking the train a non-starter. Aurora and Denver should resolve these issues and improve the transit network so people who live in Aurora but work in Denver don't have to choose between horrible car congestion or horrible, long train rides.

PROJECT OVERVIEW

The city of Aurora has conducted numerous studies and planning efforts over the years that have helped guide transportation-related infrastructure projects across the city. In 2018, the Aurora City Council adopted the Aurora Places comprehensive plan to serve as a foundation for decision-making related to growth and development. In fall 2023, Aurora launched Connecting Aurora, a holistic transportation planning process that evaluates and identifies transportation needs of all people for the city's entire transportation network. Connecting Aurora will be the city's first-ever multimodal transportation master plan, building upon previous study outcomes, the city's Comprehensive Plan, and Aurora Place's adopted vision and relevant transportation goals and strategies to enhance mobility choices throughout the city.

The development of Connecting Aurora is distilled into four phases:

1. Discover
2. Synthesize
3. Visualize
4. Realize

This report summarizes the engagement efforts for the Realize Phase or Milestone 4, conducted October 7-20, 2025. The Visualize Phase involved extensive public outreach to gather feedback on programs, policies and projects. In this phase, community members were asked to gauge their general support for the proposed programs, policies and projects, and were encouraged to add any location-specific feedback to a comment map. This phase provided the planning team valuable insight as they wrote the Connecting Aurora Final Report, which will be made available for public review in early 2026.

ENGAGEMENT OVERVIEW

A variety of engagement tactics were used to gather feedback from the Aurora community on proposed visionary networks and investment categories. The numbers on the following pages are an estimate of how many people were informed about or engaged with the project through the various efforts. Engagement survey results from these efforts are shared later in this document.

Engagement by the Numbers

TOUCHPOINTS	ONLINE VISITS	ACTIVELY ENGAGED
*125K+	*578	600+

**The figure of 821k+ touchpoints indicate the cumulative number of interactions or exposure to the project. This is a broader measure compared to the 578 online visits, which represent more direct engagement with the project's online presence.*

Engagement Activities

Throughout Milestone #4 the project team used several different activities during the engagement period to gather input from the public. The main tool used to gather feedback was an Online Open House that included a survey and comment map. The project team also hosted a Virtual Town Hall and In-Person Office Hours to enable community members to share their feedback in a face-to-face manner.

ONLINE OPEN HOUSE

A self-guided online open house was hosted on ArcGIS StoryMaps, linked via the Engage Aurora website (engageaurora.org/ConnectingAurora). Community members could learn more about the project, make comments directly on the map of proposed projects, and take the survey. The survey gathered feedback to gauge support for the proposed programs, policies and projects that will be presented in the Final Plan. The data below represents engagement between April 1-May 2.

- Total visits: 578
- Survey responses: 24
- StoryMap comments: 70

A complete record of map comments can be found in Appendix C: Map Comments.

ONLINE COMMUNITY SURVEY

The StoryMap included a survey to gather feedback from community members after they learned about the proposed programs and policies and explored the map of proposed projects. The survey gauged general support for the proposed programs, policies and projects and received **24 responses**. The survey was available in English and Spanish and other languages upon request. A copy of the complete survey can be found in Appendix B: Survey.

ONLINE COMMENT MAP

Participants were able to provide detailed comments on a map of the proposed projects virtually via the Online Open House. The projects map received **70 pins** throughout the Milestone #4 engagement period.

VIRTUAL TOWN HALL

A virtual town hall was hosted on Zoom the evening of Wednesday, October 8, from 6-7:30 p.m. **12 community members** attended. The town hall was open to the public and attendees could register via the Engage Aurora website. Information on the current phase of the project was shared, and the project team walked through the online open house forum to encourage community members to provide their feedback. Following the presentation, attendees were invited to ask questions and provide feedback via the Q&A function or verbally.

IN-PERSON OFFICE HOURS

The project team hosted in-person office hours at the Aurora Municipal Center on Thursday, October 9 from 4-7 p.m. Community members were encouraged to stop by to learn more about the proposed programs, policies and projects that will be presented in the Final Plan and provide their feedback on physical project maps.

STAKEHOLDER GROUP

A virtual meeting with the Connecting Aurora Stakeholder Group was held on the afternoon of October 15. The meeting was attended by **14 stakeholders** and began with a review of public engagement thus far. The project team then gave a brief overview of planned programs, policies, and projects, and encouraged stakeholders and their communities to provide detailed feedback via the online open house forum.

PROMOTION

A variety of promotional materials were used throughout Milestone 4 to inform the community about the newest phase of Connecting Aurora and how to provide feedback. For details and examples of materials used, go to Appendix A: Milestone 4 Promotional Materials.

News Releases and Media Coverage

One news release was distributed to a comprehensive local media list, including media targeting non-English speakers. A public service announcement about the project aired on Aurora TV the week of September 25. The project was also promoted in an October 2 newscast on **Aurora TV**'s Aurora Now Weekly on cable channels 8 and 880, AuroraTV.org and the AuroraTV mobile app. For a list of news stories, go to Appendix A: Media Coverage.

Social Media

Extensive social media efforts were undertaken to promote the project and to engage the public. A variety of posts and platforms were used, including LinkedIn, Nextdoor, Facebook, Instagram and X (formerly Twitter). Additionally, one Facebook post was boosted for the most common languages: English and Spanish.

- Total posts (including ads): 23
- Total reach/impressions (views/shown): 34K+
- Engagement (clicks/likes/comments): 598

Newsletters and Flyers

Multiple city and community newsletters distributed Milestone 4 project information, reaching over 77k community members.

This is Aurora weekly electronic city newsletter (8,160 subscribers)

- Oct. 2 issue
- Oct. 9 issue
- Oct. 16 issue

Road Construction Roundup weekly electronic newsletter (660 subscribers)

- Oct. 3 issue

On Havana Street email blast

- Oct. 2 issue

HOA Leaders electronic newsblast (1,173 recipients)

- -Oct. 5 distribution

Engage Aurora Connecting Aurora project page newsletter blast (192 recipients)

- Aug. 1
- Aug. 22
- Oct. 2

Engage Aurora all registered platform participants newsletter blast (2,567 recipient)

- Sept. 15

An article was included in three News Aurora issues, which were distributed in water bills in July, August and September. Approximately **63K homes** received each bill insert each month.

Flyers were made available at Central Recreation Center, Southeast Recreation Center, Moorhead Recreation Center and the Center for Active Adults as well as the Aurora Central Library, Martin Luther King Jr. Library, Mission Viejo Library and Tallyn's Reach Library.

A Milestone #4 promotional email was sent to the **400+ City of Aurora Boards and Commissions Members** on October 8.

Bus Benches

Bus bench ads were placed at three locations throughout Aurora:

- 14875 E Colfax Av & Altura
- 17175 E Smoky Hill Rd & Wagon Trail Pkwy
- 00280 S Chambers Rd & Alameda

Photos of bus bench ads can be found in Appendix A: Bus Bench Ads.

Outreach

Outreach was conducted with various community stakeholders as described in the following sections.

STAKEHOLDER GROUP

One email was sent to the Stakeholder Group with promotional materials for Milestone 4 engagement.

STAKEHOLDER EMAILS

The project team sent emails to many stakeholders with the project information and asked them to share with members of their organizations.

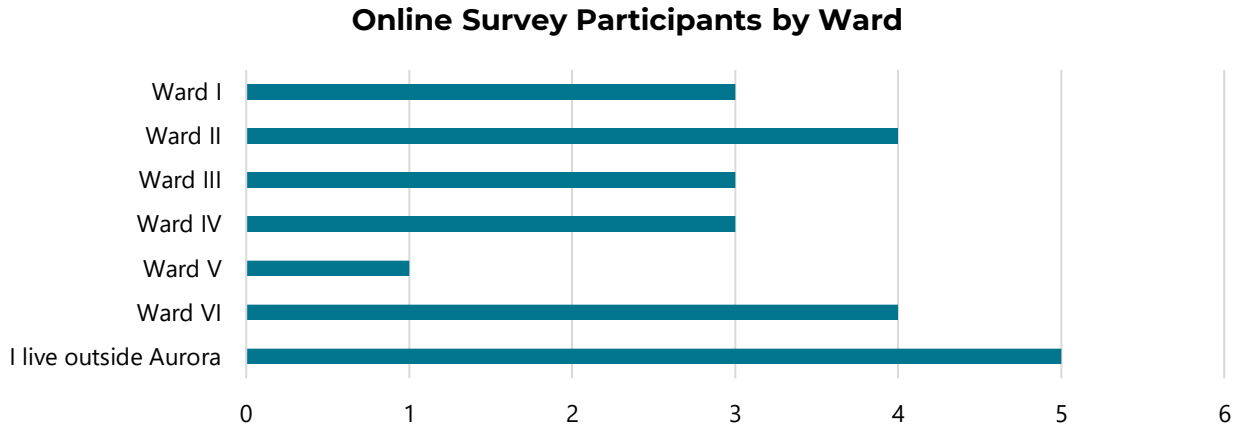
- Project Worthmore

FEEDBACK RESULTS

The results described below are a compilation of the feedback gathered via the online open house survey.



Results from the survey and all other forms of feedback can be found in Appendix C: Engagement Results.

Who We Heard From

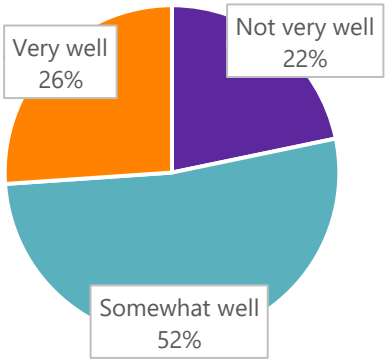
DEMOGRAPHIC INFORMATION

Wards

Survey participants were asked to share the Ward they live in. The engagement by Ward was generally evenly split, with the lowest participation from Ward V.

Online Survey Responses: Overall Results

Throughout the course of Milestone 4, community members were invited to take a survey to gauge public opinion on the proposed programs, policies and projects. The survey was available online on the StoryMap site via Engage Aurora. The survey consisted of one demographic question; three multiple choice questions to gauge general support of the programs, policies and projects; three open-ended questions to share thoughts about the programs, policies and projects; and one question that asked participants to share any other thoughts with the project team.

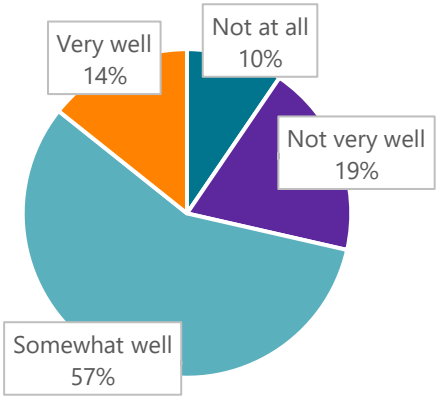


As seen in the breakdown of each question below, the majority of participants agree that the proposed programs, policies and projects reflect the needs of their community "somewhat well," with the lowest levels of support shown for the proposed projects.

PROGRAMS

When asked how well the proposed programs reflect the needs of their community, **over 75% of respondents said "somewhat well" or "very well."** In the open-ended response about programs, most participants showed support for the direction of the programs, especially when it came to bus priority, sidewalk retrofits, bicycle-friendly infrastructure, and bus stop improvements. Several noted the programs are well thought out and aligned with current and future needs. Several respondents emphasized that public safety and cleanliness should be addressed before or alongside transportation

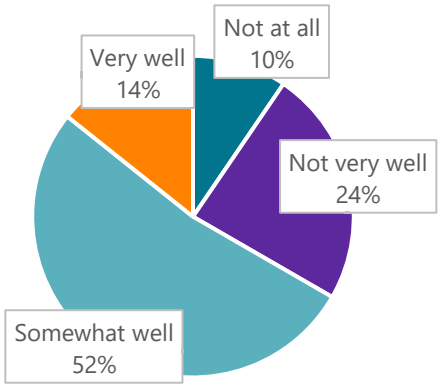
improvements. Concerns about crime, homelessness, and violence were repeated. Some supported reducing car convenience to promote transit and active transportation. Others are reluctant to lose driving lanes, especially without improved safety and security on public transit. A few suggested adding dedicated bus lanes only if they don't reduce car lanes. There were also calls for microtransit and better BRT connections to RTD rail lines.



After reviewing Connecting Aurora's programs, how well do you feel they reflect the needs and priorities of your community?

POLICIES

When asked how well the proposed programs reflect the needs of their community, **over 70% of respondents said "somewhat well" or "very well."** In the open-ended question about the proposed policies, many respondents showed support for multimodal transportation, including bike lanes, sidewalks, and public transit improvements. Designing streets for safer speeds and improving pedestrian infrastructure were frequently praised. Several emphasized the importance of wheelchair accessibility and sidewalk maintenance, especially in winter. Another major theme was that public safety must come first. Some felt that transportation improvements are meaningless without addressing safety first. Some support reducing car lanes for bikes/buses, especially if they improve safety and transit flow. Others oppose removing driving lanes, citing increased congestion and underused bike lanes. There was also some criticism of car-centric development and lack of mixed-use, walkable neighborhoods, with suggestions to enforce stronger development guidelines and increase density to support transit and walkability.



After reviewing Connecting Aurora's policies, how well do you feel they reflect the needs and priorities of your community?

PROJECTS

When asked how well the proposed programs reflect the needs of their community, **over 65% of respondents said "somewhat well" or "very well."** In the open-ended question about the proposed projects, respondents emphasized that safety must be addressed first before investing in new transportation features. Several respondents felt the proposed projects are too limited, additionally calling for more detailed project lists, not just maps, to improve transparency and accessibility. Many supported the holistic, multimodal vision, including microtransit accessibility improvements, and safe infrastructure for e-bikes and scooters. There was enthusiasm for reducing car dependency and revising speed limits to make roads safer for all users. Respondents also noted concerns over a lack of bike/walk infrastructure and transit access in growing areas, like Northeast Aurora. There was a general emphasis on shared funding responsibility between the city and developers to avoid overburdening new communities.

After reviewing Connecting Aurora's policies, how well do you feel they reflect the needs and priorities of your community?

Connecting People. Connecting Places.
CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Fall 2025

Final Feedback Opportunity

Projects, programs and policies now ready for your review

This October is your last chance to provide feedback on Connecting Aurora, the city's first ever multimodal transportation master plan. From Oct. 7 to 20, explore our online open house, take the survey, join us for a virtual town hall, or drop in for office hours to provide your input on future transportation projects, programs and policies before they are incorporated into the final plan.

The proposed improvements aim to make traveling in Aurora safer and more convenient for everyone who walks, rolls, bikes, drives or takes transit.

MAKE YOUR VOICE HEARD ONE LAST TIME!

Learn more and take the survey:

Virtual Town Hall:
Wednesday, Oct. 8
6 to 7:30 p.m., online via Zoom
bit.ly/ConnectingAuroraTownHall

In-Person Office Hours:
Thursday, Oct. 9, 4 to 7 p.m.
Aurora Municipal Center - Aurora Room

Feedback open Oct. 7 to 20

Since early 2024, the city has gathered community feedback on existing conditions, imagined futures, visionary networks and investment priorities. **Input to date helped inform the projects, programs and policies that will be posted for public review this October.**

THANK YOU TO EVERYONE WHO HAS PARTICIPATED SO FAR!

OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Fall 2025

GET READY FOR MILESTONE 4

Project Overview

Launched in early 2024, Connecting Aurora is a transportation plan that will identify projects, policies and programs to be implemented over the next five to 20 years and beyond. This plan aims to better connect our residents, employees and visitors to various destinations across the city. This plan will also help to create more interesting and safer places for our city through better and innovative transportation design and improvements.

CONNECTING AURORA
OUR MULTIMODAL TRANSPORTATION MASTER PLAN

Fall 2025

What We've Heard

Connecting Aurora has been built upon the public engagement efforts of previous transportation projects in recent years and the city's commitment to inclusive public engagement. The plan will reflect meaningful feedback from diverse communities throughout the city's neighborhoods and business centers, especially those who are historically underrepresented.

Since early 2024, we've gathered community input and relied heavily on public feedback in building the final plan. Our promise to the public is to make sure the plan reflects the community's priorities and illustrates how public input influenced the plan's outcomes.

Spring 2024 Community Feedback

During the project's first milestone in Spring 2024, **many community members shared that they do not feel safe driving, walking and biking is an uncomfortable form of transportation, public transit is unreliable and often poses security risks, and there is a strong desire to have higher quality streets and places.**

Fall 2024 Community Feedback

In Fall 2024, community members were asked to provide input on three imagined transportation futures: car-oriented, transit-oriented, and neighborhood-oriented. Most participants **favored either the transit-oriented or neighborhood-oriented future for Aurora when surveyed about factors like accessibility, prosperity, mobility and safety.** A car-oriented city, on the other hand, was widely viewed as either having no or a negative impact on quality of life.

Spring 2025 Community Feedback

Earlier this year, we collected input on future investments and four visionary networks: bikeway, sidewalk, transit and streets. **The majority of community members showed support for all four networks, and the three consistently highest funded investment categories were bikeways & trail improvements, transit service expansion and pedestrian improvements.**

LOCATION:	ZOOM
ATTENDEES:	12 non-project attendees

Notes

SLIDES:

RECORDING:

COUNCILMEMBERS PRESENT:
Councilmember Hancock

PRESENTATION:
Question from Drew Davidge: East Colfax resident here! Please speak more about how the Connecting Aurora plan bridges the Westerly Creek Trail link between both communities for pedestrian and bicycle transportation modes. NANO, Del Mar, and East Colfax (Denver) neighborhoods are some of the most underserved in the metro and priority for improved transportation modalities.

> Answer: Key finding is the need to improve major crossings for our trails systems. Over 300 different improvements have been identified. Westerly Creek is a very important question, and Colfax is a barrier to that transportation. Recommend going to online open house to make comments about suggestions. Westerly Creek is identified as an improvement. With a project/plan of this nature, it's tough to present all 1000 projects in a single webinar. For Original Aurora, a significant amount of streetway improvements are planned.

Question from Maitri Lazaroff: is there a funding plan in place, or are projects planned to be funded along the way?

> Answer: Transportation funding can be hard to come by and a key outcome of the plan is to identify what the key funding opportunities are. There are many opportunities for funding. The city is in the midst of reviewing funding opportunities to make sure the city has appropriate funding in place to pay for services needed. Strategic planning process underway, which includes this plan. Will explore options and partnerships. Build Up Aurora is the city's planning process. Connecting Aurora identifies which projects are important to the city, assigns costs and the information can be used it identify necessary funding mechanisms.

RANDOM DRAWING WINNER:
Drew D.

STAKEHOLDER MEETING NOTES

NOTES

MEETING SUBJECT: Stakeholder Group – Meeting #8

LOCATION: Virtual – MS Teams

DATE/TIME: Oct. 15, 2025 at 2 PM

---

1. Welcome and Introductions (5 minutes)

   - Erik Balsley, University of CO Anschutz
   - Lyle Artz, Fitzsimmons Redevelopment Authority
   - Kelly Brough, Fitzsimons Innovation Communtiy
   - Ryan Shaaban, Tryba Architects, Fitzsimons Innovation Community Master Plan Consultant
   - Sam Valeriano, Be Well Health and Wellness Initiative
   - Tracy Sakaguchi, Colorado Motor Carriers Association
   - Lisa Romero, Kaiser Permanente
   - Matt Schaefer, Cherry Creek Schools
   - Kenneth Ho, FIC
   - Adam Spears, Anschutz Facility Management
   - Courtney Stryker, Arapahoe County Senior Resources
   - Chance Horiuchi, BID

   - Keith Borsheim, HDR
   - Ambriel Speagle, HDR

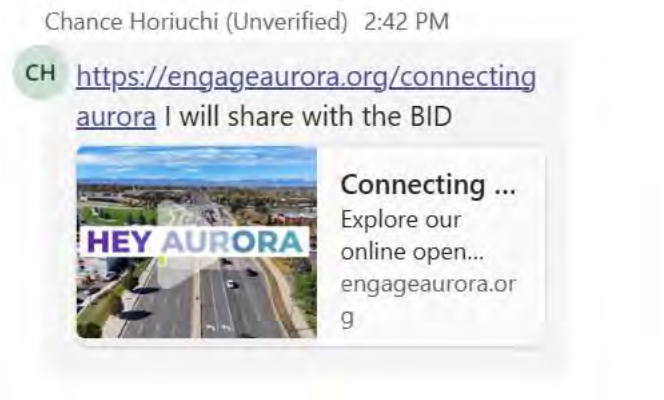
2. Milestone 4 Presentation – Programs, policies, and projects (45 minutes)

Chance Horiuchi (chat): engageaurora.org/connectingaurora - I will share with the BID

3. Discussion (20 minutes)

Lyle Artz: I know I'm preaching to the choir here, but one of the most critical and frustrating issues for me is RTD. Frequency and reliability for both buses and light rail are huge issues. Frequency of service decreased during Covid and has not fully recovered since. I don't know how we can fix this, but it's very important in my book.

Keith: RTD is a partner, part of our Technical Advisory Committee, and are generally supportive. Transit is at an interesting moment in the country, making expansion difficult for any transit provider right now. The city will look into its role in expanding transit (funding to RTD, providing capital improvements to allow for greater efficiency, etc.). Better access to transit services (first mile, last mile, etc.) will also improve these issues to some degree.



Kelly Brough: For the Fitzsimmons and Anschutz campuses, could transit service frequency just be shifted to accommodate start/end of shifts if service frequency expansion is not possible? This wouldn't require more funding.

Keith: Great recommendation, that can apply to more than just the campus areas as well, such as Northeast Aurora.

Desiree Banka (chat): Great idea Kelly!

4. Next Steps – (5 minutes)

SURVEY OPEN RESPONSES

Share your thoughts on Connecting Aurora's recommended policies.	Share your thoughts on Connecting Aurora's recommended programs.	Share your thoughts on Connecting Aurora's recommended projects.	Is there anything else you would like to share with the project team?
Safety should be the main concern and our city is filled with crime, theft, cartels, gangs, and homelessness. Our children do not feel safe in this city! They are no longer safe to walk to school.Public transportation is occupied drug addicts and homeless. Spend the money and time on improving our safety. None of these transportation ideas will do any good if your community does not feel safe.	Money and time should be spent on safety and cleaning up the city. Aurora has become similar to a third world country with crime, violence, and homelessness!	The community wants to feel safe from all the crime, gangs, and homelessness not new paint on sidewalks and more useless bike lanes.	End this project. It is a waste of time and money. These people making these decisions need to live where I live and in the areas most affected by gangs, crime, and homelessness!
The policies are good- multimodal streets and designing streets for safer speeds are particularly strong.	The programs are good and there is good variety. Bus priority and sidewalk retrofit are great. Resurfacing is necessary, bicycle	The specific projects are lacking. The only sidewalk improvements are to major arterial roads, nothing to make residential	Thank you for your efforts in creating this plan. Just to get this far is great. Please continue to bring

New development guidelines are improtant and should be both strong and enforced (not waived).	friendly, bus stop improvement, and safe routes to school are innovative. Programs could be more specific as to how they will achieve policies (which of these programs will change road design to encourage slower speeds? None include making roads more winding/narrow, adding in street trees, etc). Multimodal counts is a start in making streets multimodal, but only a baby step in that direction. We are missing things like raised crosswalks, installing more roundabouts, removing slip lanes, shortening crosswalk length at intersections, adding medians, curb extensions, and adding car free zones or streets! The programs fall a bit short of what they could be, especially for informing the next 20 years.	sidewalks wider/more accessible in the next 20 years? There are plenty more individual projects that need to be included in this plan. 13th Ave multimodal plan is a great project that needs to be brought back/expanded, Havana St improvements, Montview improvements (Montview would be great for fast transit options like a tram, raised crosswalks, policies to reduce speeds, etc). 17th ave or 19th ave both great options to go multimodal. The proposed projects barely scratch the surface of what needs to be done.	more innovative projects. Walkability is increasingly popular and beneficial for all (health, accessibility, business, safety, connection, families).
I think all the projects proposed are good ones, but there are many other places where changes could be made. For instance there are many 2 lane strodes that are not commuter friendly for anyone and if we could block off more of the second lanes as bus and bike only that would be great,	I think that progress is being made, but there are still feelings that traffic is being prioritized over making our roads more pedestrian/bicycle friendly. I would prefer we make commuting by car harder and less convenient while simultaneously making bus and other forms of	Again, this is good progress and I am really excited to see these projects, but I know for instance that the move to push Yale west of Parker from a two lane road to a single lane was nixed because there was too much car use during peak hours. That use is likely induced demand since the road is there and too wide already. I wish we could move	I would love to see the price of bus and train tickets drop. I know it's not much now, but with concerns around reliability and frequency, having the cost be very low would incentivize use.

especially if they were protected from the traffic.	transit easier and more convenient.	more two lanes roads to single lanes and find different ways to discourage car commuting while encouraging other transit use.	
	I like the programs. They seem to be helping Aurora become more connected and multimodal, which is a plus!	The map function made it very difficult to see what projects were being proposed and it could be a bit glitchy, especially on a phone. While it's nice to see everything mapped by location, it would also benefit to have a list of projects and their description, especially, for those unfamiliar with transportation improvements.	A breakdown of all projects by the various timelines in addition to type of project so people can have a true understanding of what will be done in the near term vs. long term.
Widen narrow sidewalks on local streets for wheelchair users, and add new sidewalks to local streets where no sidewalks exist. Pay attention to surface for wheelchair accessibility and mobility. I like the whole idea of the multimodal transportation planning, and more frequent transit and BRT.	We need microtransit in central Aurora east of I-225.	Encouraged by holistic view. Likes microtransit and multimodal, and recognition of accessibility.	
I think it looks good. I would like to see public art incorporated into these projects.	I think it looks good. I would like to see public art incorporated into these projects.	I think it looks good. I would like to see public art incorporated into these projects.	I would like to see public art incorporated into these projects.

Very well thought out and focused on current needs and future growth & developments.	Very well thought out and focused on current needs and future growth & developments.	Very well thought out and focused on current needs and future growth & developments.	I would like to see more art and culture in these projects to show that the city of Aurora is contemporary, fostering community identity, enhancing public areas..
Roads need to be maintained and lanes added. Money spent on bike and walking paths are a waste of money.			
There's a lot of info to take in. If I understood everything, it seems like it makes sense. I'd still like to make sure pedestrian-friendly infrastructure is prioritized on a timeline, new bus routes (maybe via a bus trial program) are added, and there is a snow shoveling program for sidewalks (shaded sidewalks around me - iliff & sable - don't get shoveling).			1) The area bordered by Iliff (south), Chambers (west), Airport (east) doesn't have much walking, bikeways, or transit. Why not? 2) Mandatory bike lanes on streets extending 2 blocks from the school.
More bus routes are needed to connect aurora to light rail and major city areas. Including along 64 - if it is to be an artery for aerotropolis.			
Perhaps it's my phone but I can't see the specific policies		I am unable to see specific projects. May i strongly recommend a light at 56th Ave	

		and Piccadilly. I have a child who has to cross this intersection daily to catch the RTD bus. Drivers are not prioritizing pedestrians. While we're at it, why not an RTD bus stop closer to Painted Prairie	
While I agree with the vision of these, Aurora has allowed developers to build communities in a way that don't really mesh with these utopian ideas of walking, biking, public transport. Take a look north and east of 56th and tower, and you'll see proof of hotel and gas station galore continuing to be placed, cars prioritized as well as parking lots primarily for those two, then restaurants if we're lucky secondarily and/or medical, finally getting more grocery. Out East more commercial. It just doesn't seem to mesh with how everything is built around our area for residential. It kind of begs the question as to how your vision and what you allow the developers to do can be so far apart and how these two opposing forces are going to align.	Ignoring our community needs and the name doesnt really match newer communities and how we are connecting them in our area.	Nothing is really being planned/done for our Painted Prairie community. It seems mostly ignored in the current plans with next to nothing really making it more bike, walkable in the current design and only a few major considerations in 20+ years time frame for anything really close by. Someone needs to take a look again at this and other expanding areas north of 56th. It looks like we've mostly been forgotten.	

Land density needs to be incorporated in the policy. City is sprawling in a big way and maintaining the infrastructure or sustainability will be challenge in the near future.Denser walk able or non-motorized accessible neighborhoods should be incorporated in the policy.	Jobs/acre or density/acre needs to be included in the policy and mass transportation, non-motorized mode of transportation projects should get higher priority. BRT on major main roads feeding to the RTD rail lines can create residents to use mass transit than driving alone which will have both direct and indirect impact to our community and region.	There is a high tendency you kids using e-bikes, scooters etc. and also technology is also in favor. creating a safe infrastructure for non-motorized modes can help to build on such momentum. Vehicle speed is scary and city has to revise speed limit and road diet approach so that roads will be for all users not only drivers!	Aurora Land use policy needs big amendment, sprawling city with limited resources could be a challange looking forward.
			Stop forgetting about east of E470. I know we don't exist to you all but we actually do.
			The sidewalks in my neighborhood (Sunnyvale, near 6th & Fulton) are ridiculously narrow. I and others often walk in the street if I am walking with someone else, because we cannot walk side-by-side otherwise. I wish these sidewalks were wider.
We need a bus line for Piccadilly that takes people to the Pena Station train. The bus lines do not reach in a highly dense and populated area. Kids, citizens that need or want public transportation do not have any	I am worried that my area will not benefit from these plans.		

options. I couldn't tell if there was a widening of Pena to I-70? I couldn't tell. That area is getting worse and worse.			
While it is good to improve walkways and bike lanes, please don't take away driving lanes — like was done on the northwest side of Del Mar Circle and Peoria a few years ago where we lost a drive lane to make a bike lane that is rarely used and now us locals have to deal with back ups in traffic at certain times of the day that doesn't used to exist when there were two driving lanes. I also LOATHE the way bike lanes are sectioned off in Denver, please do not follow their model.	Until RTD improves security and safety on public transportation, I won't ride public transportation and am not keen to lose driving lanes to dedicated bus lanes. If dedicated bus lanes can be added without losing driving lanes, go for it!	I found the informal given here too broad and generalized to be able to comment. The maps were too small to be easily read.	
I appreciate the policies for multimodal being a priority and designing streets to be safer. The cross-sections in NEATS should be reevaluated to ensure they are actually promoting safety to cross the most vulnerable users. And phasing roadway widenings to not have unsafe designs for a 20-30 year potential need.	I appreciate the desire to have "good" data, as this can be the foundation for all the programs and implementation of policies. The review process should take into account more current data that is sometimes better than previously forecasted data since the land plans and roadway network are on a micro level versus macro level. There should be flexibility in cross-sections,	It appears the projects are mostly within existing areas of the City. And it seems that the infrastructure in the NE developing area is assumed to be the responsibility of developments instead of the City. There is a need for many regional improvements in the developing area that should also become a priority to the City to obtain affordable and attainable	Prioritize education to all road users for interactions with cyclist. There was great info for the new motorcycle law, but never an informational campaign for new bicycle laws. Drivers are frustrated when they don't realize cyclists are within the law.

	phasing, and connectivity from NEATS once more thorough data is available and evaluated.	housing and development. Without regional or municipal funding, the cost to build communities increases and ultimately impacts residents and business owners. It should be a shared cost, not just assuming developments will afford to pay all infrastructure nearby. For the safety improvements at Powhaton and the railroad crossing, this should remain at-grade with the widened road since there are many limiting factors to an affordable grade separated bridge. There will be two nearby grade separated bridges with the near-term interchanges coming to the east (Monaghan) and west (Aerotropolis). Thank you for your consideration.	
No Comments	No Commenst	NEATS currently shows this as a separated grade crossing at Powhaton Road & Smith Road/Union Pacific RR. With the planned Aerotropolis Parkway (Interchange at I-70; separated grade crossing of Smith Rd & UPRR, and interchange with 26th Ave.) and the Monaghan Road/I-70 interchange being planned by the County, having another major infrastructure project at	

		this location on a Collector road crossing (Powhaton Road & UPRR)) should be re-evaluated. Based on the other road improvements planned in this area, this planned separated grade crossing should be eliminated from NEATS. The development in this area cannot support this amount of infrastructure through only their Metro Districts and ARTA.	
I haven't had time to review in detail.	I haven't had time to review in detail.	The proposed major bridge on Powhathon Road would impose a significant infrastructure cost on the region, adding to the existing financial burden created by the bridges on Aerotropolis Parkway and Monaghan Road. Given the proximity of multiple nearby interchanges, projected traffic volumes on Powhathon Road may not justify a grade-separated crossing. It is recommended that the City take a closer look at this segment to evaluate whether a more cost-effective at-grade solution could adequately serve anticipated demand.	Additional engagement with the development community recommended, including local civil engineers, traffic engineers, and planning firms.
I believe the policies listed really focus on the short and mid term needs of the city during this		Please continue to focus on how north and south Aurora can connect better, via multi modal	Heavy lifting in the project, great job to Tom, Huang,

incredible growth period. I also believe perhaps the E470 corridor may need its own policy in the NE area of the city due to how it is building out.		and micromobility. I feel it needs to be listed, so it is not forgotten about, from not only a business perspective but citizen connection perspective also.	and Rick/Amber! This wasn't easy.
			RTD is not efficient or cost effective. Not a big fan of it expanding into east Aurora

MISC. ADDITIONAL FEEDBACK

Additional feedback following Milestone 4 Office Hours was sent to the project team by one of the attendees:

Resident's Initial Input on the Connecting Aurora Transportation Plan

Particular Points-of-Interest Re: Info Gleaned from Connecting Aurora's Staff/Website

● Multi-Modal Transportation Planning

- Holistically (and inclusively) hope-full!

● BRT = Bus Rapid Transit

- This plan's a plus (to help resolve RTD-route transit-times) ★

● Aurora Rides

- Happy to hear …but wish it were here (extended to additional areas and to <60yo riders with mobility issues)!!

Potential Proposal(s)

(Pt 1: Senior and Mobility Transportation)

● Q: Could a Rapid-Expansion of On-Demand Rides Programs be combined with business-opportunities and lowered program-costs?

Visionary Network Idea(s): What if the upcoming **Aurora Rides** program were to somehow be more-rapidly expanded to serve both additional geographical-areas and additional age-/mobility-challenged demographics, while simultaneously creating more win-wins, for budgets (eg. those of City of Aurora, RTD, local NPO's/NGO's and various businesses) and perhaps added profits, as well, by integrating and utilizing multiple currently-established systems, entities and vehicles?

Current Insights:

- Using Access-a-Ride types of short-buses seems especially expensive (as much or more than a plane ticket?)

- The planned initial program for Aurora Rides is for a limited area, and for persons aged 60 and above

- Initial phase is planned for a 3yr period, before possible expansions

- Younger disabled/mobility-challenged persons are also facing gaps in their ability to find affordable, accessible transportation on an on-demand (or even on a reliable plan-ahead) basis.

Suggestions for Synergistic Solutions

● Could smaller wheelchair-accessible vans be added to the Aurora Rides program, to assist with transporting individual mobility-challenged disabled persons and Seniors door-to-door (and thereby also reduce the per-ride costs to the city and RTD)?

● Instead of purchasing additional vehicles for the program itself, might those being used by various other nonprofits and businesses already be utilized within their off-times by the program, somehow (bringing additional profits for those entities plus lowered costs for the city of Aurora and RTD)?

● Could current programs such as Access on Demand (esp. in collaboration with Uber's and Lyft's WAV programs) and RTD's Flexride and Access-a-Ride arms become Transportation dance partners with the Aurora Rides program (and areas/agencies beyond), while still offering free, On-Demand ridership to those who need it most (mobility-challenged, seniors and other adults) …and also integrate (pre-trained) vehicles from the point above (similar to Uber/Lyft drivers, but drawn from trained professional para transit drivers, vehicles and organizations)?

● Would there be any way to also integrate current Medicaid and other medical-insurance-covered rides programs (eg. TransDev and perhaps individual programs connected with Living Centers and/or veterans' benefits…) in order to create a more centralized, profitable, cost-saving and mutually-beneficial, efficient system of providing rides for those who need them for medical reasons?

Pt. 2 (and beyond?):

While additional ideas (in regards to both seniors / disabled persons and overall Transportation issues and inspirations and situations) have also percolated, in response to the processing of your information about the City's Connecting Aurora Plan, this resident is currently bumping into various tech issues (incl. unstable internet/wonky devices), plus the deadline for community input, so additional submissions are yet to be determined, at this point (and thought it might be best to at least try to get this part to you).

Thank you to all of the City of Aurora planning department staff members and leaders for your work in visualizing and creating better future connections for all who are living in, delivering things to or visiting Aurora (and areas which we want to travel to/from).

Connecting Aurora Community Input

(Pt 1a/addendum: Potential Supplemental Funding Sources?)

Aurora Rides / Free Shuttle Service Funding Ideas

For some reason, when the Lone Tree Link (On Demand Free Shuttle Service) comes to mind, it's with the thought that there had been some original articles saying that it was being funded by local businesses there. At any rate (whether accurate or

not), it has sparked additional ideas and questions about potential supplemental funding sources for the Aurora Rides services:

● Could something be set up so that various local destinations (eg. from businesses such as retail places, grocery stores and malls to hospitals and clinics, rehabs and senior living centers, theaters and churches, parks and rec, workplaces and/or government agencies) might contribute towards funding the service by purchasing annual memberships for being designated (or prioritized/advertised?) destination-points? Bringing more people to them might be a worthwhile win-win of bringing them higher profits, payments, memberships, visits and attendance/usage while helping to financially support the Aurora Rides program.

● Might there be a way to have certain contributing members / destinations also contribute smaller micro-payments for each rider who is dropped off at (and who spends a minimal amount of time at) their location; and have these micro-payments automatically-calculate and accrue via an app which tracks precise locations of the riders who are utilizing the Aurora Rides service?

● Perhaps a nominal (or even sliding-scale) fee could also be considered for people using Aurora rides who are not disabled/mobility-challenged and/or who are over a specific (non-poverty) income-level. Maybe they could also receive some sort of automatic-credit applied (via the app's scheduling and precise-location-services) to their Aurora Rides account/next-rides, if they choose (and spend time at) one of the location-destinations which is an annual/paid program-member?

AURORA PLACES

planning tomorrow's city

The Comprehensive Plan
for the City of Aurora, Colorado
Adopted by Ordinance 2018-37
Effective October 27, 2018

Connecting Aurora Update - March 2026
Adoption Draft

Acknowledgments

Aurora Places would not have been possible without generous participation from the Aurora community. The unprecedented diversity of community stakeholders were integral to developing the city's vision and planning for its future. Additional information about public input into Aurora Places can be found in Chapter 3.

Aurora Places in the Region and Nation

Aurora Details

- 374,154 residents (2018)
- Third most populous city in Colorado
- 54th most populous city in the U.S.
- Part of the Denver-Aurora-Lakewood Metropolitan Statistical Area (19th largest in the U.S.)
- Approximately 160 square miles and only partially built out

Highly Accessible to Regional Transportation Corridors

- Interstate 70 (east to west through northern Aurora)
- Interstate 225 (north to south through central Aurora)
- E-470 (north to south through central Aurora)
- Denver International Airport (DEN) and the Colorado Space Port (adjacent to Aurora's northeastern boundary)
- Regional Transportation District (RTD) Aurora Line (R Line) with 10 stations in Aurora
- RTD University of Colorado A Line, connecting to Denver International Airport and downtown Denver, with service through Aurora's Peoria Station and 40th / Airport - Gateway Park Station

THE RIGHT PLAN AT THE RIGHT TIME

Much has happened in Aurora since the city's last comprehensive plan was adopted in 2009. The population has grown by 15 percent or 47,384 people, and the city has become even more diverse, with thousands of residents hailing from over 50 different countries. The Anschutz Medical Campus experienced recent exponential growth, becoming the most prominent academic health center in the Rocky Mountain region. The Regional Transportation District (RTD) opened the R Line light rail–our Aurora Line–adding seven new stations in Aurora, increasing mobility in the city and connecting the region to Aurora. Stanley Marketplace, Stapleton Aurora, the Gaylord Rockies Resort and Convention Center, the Hyatt Regency Aurora-Denver Conference Center, and numerous new projects at rail stations and on the eastern plains have been completed or are underway.

Together, these changes–and many yet to come–offer opportunities and challenges as Aurora rapidly evolves from a mid-size, suburban community to a large city. Aurora Places will provide the foundation for these efforts by describing a general path forward and identifying and addressing trends, needs and opportunities broadly and comprehensively. Aurora Places includes the following:

Chapter 1. The Right Place at the Right Time

What is Aurora Places and how is it used? It is a foundation for decision-making and focuses on planning and connecting places.

Chapter 2. A City in Transition

How is Aurora changing, and what are some of the key issues that need to be addressed? It describes challenges associated with the economy, housing, population and natural resources.

Chapter 3. A Community Conversation

What did we hear from the community? Aurora Places engaged residents, businesses, officials and city staff in an extended conversation concerning important matters in the city and ways to successfully move forward. The conversation provided ideas concerning a strong economy, population diversity, housing variety, health, the environment, improved mobility, and an improved and authentic reputation.

Chapter 4. Placetypes

What types of places need to be planned and developed or improved in Aurora? Aurora Places describes types of places and principles to be employed in planning and developing these places. It includes a map showing the proposed general locations for these placetypes.

Chapter 5. Connecting Places

How does the city connect the different places? This chapter describes concepts for city form, transportation, water, parks and open space, cultural resources, strategic areas and other means for providing connection and choice in the community.

Chapter 6. Goals and Policies

What are the detailed goals and recommended practices for Aurora? Both were formulated based on an understanding of issues facing the city, what we heard during the community conversation and a grasp of placetypes and connections.

Chapter 7. Action Strategies

What are the immediate action steps that should be taken to implement the goals and policies in the plan? It describes some of the tools that can be used immediately, along with specific strategies and measurements for success.

What is AURORA PLACES?

Aurora Places is the plan for our city's future.

It is designed to serve as a foundation for decision-making related to growth and development in Aurora. It presents a vision for the future, with long-range goals and recommended actions for a variety of public activities. The vision identified in Aurora Places is based on a public engagement and outreach process more extensive than that of any previous planning initiative. The information that residents, business owners, subject matter experts, city officials, staff and other stakeholders provided was critical to understanding the community's concerns, aspirations and priorities.

The plan emphasizes the importance of creating and improving the variety and types of places throughout the city. These placetypes include urban districts, neighborhoods, commercial and industrial areas and areas for innovation. Aurora Places also describes the systems that connect places citywide, including transportation, water and parks and open space.

Public outreach and engagement was key to the creation of Aurora Places. The information and feedback collected from residents, business owners, subject-matter experts and community stakeholders was critical in both understanding the community's concerns, aspirations and priorities and responding effectively to the city's needs. In addition, the city and its consultants conducted extensive inventory, analysis, research and assessment to fully understand the impact of the various conditions that influence planning and the context of the city as it exists today. This extensive inventory, outreach and engagement program also provided the feedback necessary to identify and establish a community vision and community principles.

COMMUNITY PRINCIPLES

A Strong Economy Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

A Diverse and Equitable City Principle: Diversity and equity are assets to be nurtured and promoted by the city.

Housing for All Principle: High-quality housing options enable people across all socioeconomic levels, cultural practices and stages of life to establish and manage households.

A Healthy Community Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans.

A Thriving Environment Principle: Stewardship of water, energy and natural open spaces is essential to the well-being and success of residents and the community.

Easy Mobility and Active Transportation Principle: An easy-to-use transportation network with multiple choices for travel supports a strong economy, healthy community and flourishing environment.

An Authentic Aurora Principle: The creation of great places, the preservation of traditionally unique places, and effective marketing and promotion are essential to improving Aurora's image.

A COMMUNITY VISION

Aurora is a welcoming and safe community and a city of opportunities where people of all backgrounds can prosper. Aurora is known for its unique places, strong economy, community involvement, quality and attainable housing, integrated and healthy neighborhoods, smart ways to get around and a thriving natural and cultural environment.

How to Use AURORA PLACES

Aurora Places is general in nature–it cannot tackle every issue in sufficient detail to determine every type of necessary action. The plan's intent is to identify key areas of focus, define a vision for future growth and development, and provide guidance for city actions and investments over the next 10 to 20 years. In areas where more detailed information and recommendations are needed, the plan may identify additional steps or actions to address those needs. The plan serves the following key functions:

Telling Aurora's Story and Sharing Its Vision

At its core, the plan should serve as a powerful statement of the community's vision for how it grows and changes in the coming years. The plan identifies the city's priorities and charts a path for the city's long-term growth.

Evaluate and Inform Development Proposals

The plan should guide and assist in the evaluation of public and private development proposals and help ensure that proposed developments support the city's long-term objectives.

Regulatory Framework

The plan should serve as a foundation for zoning regulations, subdivision regulations, the official zoning map, water planning and policy, flood hazard regulations, annexation decisions and other decisions guided by these regulations. Amendments to these regulations should be made as needed to support the long-term objectives of the plan.

Coordinate Local and Regional Initiatives

The plan should inform and coordinate local and regional planning initiatives at the city, county and regional levels. The plan may aid and inform efforts related to housing, transportation, transit, trails, water and natural resources, economic development, annexation, conservation and more.

CIP and Budgeting

The plan should inform the development of the city's capital improvement program and budgeting process and help establish priority expenditures and the sequence of capital improvement programming.

Identify Future Studies

The plan establishes a path forward, but cannot address every issue in sufficient detail. It should help identify additional studies and future action steps to address specific needs.

Inform and Educate

The plan is a valuable source of information for policy makers, local boards and commissions, organizations, businesses and residents. This broad spectrum of interests should use the plan to inform members and stakeholders and provide important information that can assist with future initiatives.

A CITY IN TRANSITION

Situated on prairie grasslands, rolling hills and the Black Forest's northern tip, Aurora, Colorado started as a small collection of subdivisions that incorporated initially as the town of Fletcher in 1891. In 1907, the town was renamed Aurora and was officially incorporated as the City of Aurora in 1928. The city grew steadily throughout the 20th century as the largest city adjacent to Denver's eastern border. Today, with more than 361,000 people, Aurora is among the nation's largest cities–bigger than more well-known cities like St. Louis, Pittsburgh and Cincinnati.

Aurora welcomes and celebrates the growing diversity of its population. As an emerging economic leader within the Colorado Front Range, it is a city that supports and promotes the entrepreneurial spirit of its residents. Aurora forms the eastern edge of the metropolitan area, is conveniently located next to Denver International Airport and serves as a major transportation hub. Its residents enjoy a comfortable way of life and a wealth of opportunity, with access to quality education, family friendly neighborhoods and a strong job market. Aurora has the potential to become a global destination for residents and businesses because of its diversity, location and economic opportunity.

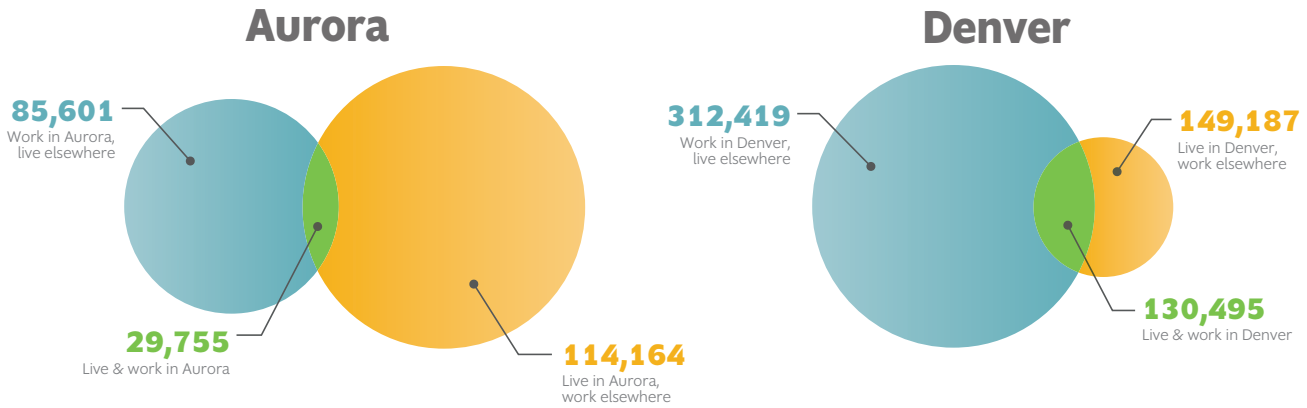
It is a critical time for Aurora–a time that calls for bold planning and strategic thinking.

The city's history as a suburb has resulted in obstacles that must be overcome. The city generally lacks urban places that will attract 21st-century jobs and the people who want to work in them. Housing options are not as diverse as other large cities and transportation options are increasing but need to expand citywide. Water is a critical resource that requires a strategy of planning, acquisition and conservation in order to meet future demands. The plan's name, Aurora Places, captures the essence of what Aurora needs most in its future-more options, high-quality public spaces and new urban places.

Building on a community conversation that engaged thousands of Aurorans, Aurora Places describes strategies for overcoming obstacles and forging a clear path to reach the city's full potential. This comprehensive plan will serve as a guide for decision making as the city navigates through this transitional period.

1844

Economy



Our city needs new types of urban places and a greater variety of neighborhood experiences to attract employers and support new, higher-paid jobs and to draw the most talented workforce to fill those jobs.

For much of its history, the public viewed Aurora as a bedroom community and a suburb of Denver. But with the ever-growing prominence of key economic assets like the Anschutz Medical Campus, Buckley Space Force Base and related aerospace industries and recent additions such as Stanley Marketplace, the Amazon fulfillment center, and the Gaylord Rockies Resort and Conference Center, the city continues to be attractive to businesses and investment. Still, the majority of workers who live in our city commute to other communities to work.

Also, a majority (74 percent) of those who work in Aurora do not live in the city. Aurora is heavily dependent on its retail sales tax for revenues to support city services. In general, attracting more of its workers to live in Aurora will increase city revenues and boost the local economy.

Inflow / Outflow

Most workers who live in Aurora work elsewhere, likewise, most people who work in Denver live elsewhere.

Relative Median Income

In comparison with the metropolitan area, Aurora's incomes have been low.

Source: Colorado Department of Labor and Employment

It is projected that the healthcare industry will continue to provide the greatest number of jobs in Aurora, followed by education services, retail trade and professional services. All together, these sectors account for over half the jobs in the city. While these sectors do offer some above-average and high-wage jobs–like doctors, researchers and professors–a large portion of the jobs in these fields tend to pay less. Average household and family incomes in our city are relatively low compared to neighboring communities. Families are sometimes challenged to meet their basic needs–including housing and transportation–leaving little extra spending money, which reduces the city's sales tax revenues. Since the city of Aurora is primarily dependent on sales tax revenues to support basic services such as public safety and street maintenance, increasing average family incomes is critically important.

Aurora is home to many talented and hard-working residents, but to stay competitive in the regional and national employment markets, it is essential that Aurora's workforce be equipped with the education, training and credentials needed in tomorrow's economy. The quality and readiness of Aurora's workforce can be a significant advantage in attracting and retaining growing businesses to the community.

Increasingly, the quality of life and authentic, unique places in a community dictate where both employers and employees choose to locate. Our city needs new types of urban places and a greater variety of neighborhood experiences to attract employers and support new, higher-paid jobs and to draw the most talented workforce to fill those jobs. In addition, Aurora must continue to attract primary employers and higher-income jobs to complement the current workforce and grow Aurora's economic base.

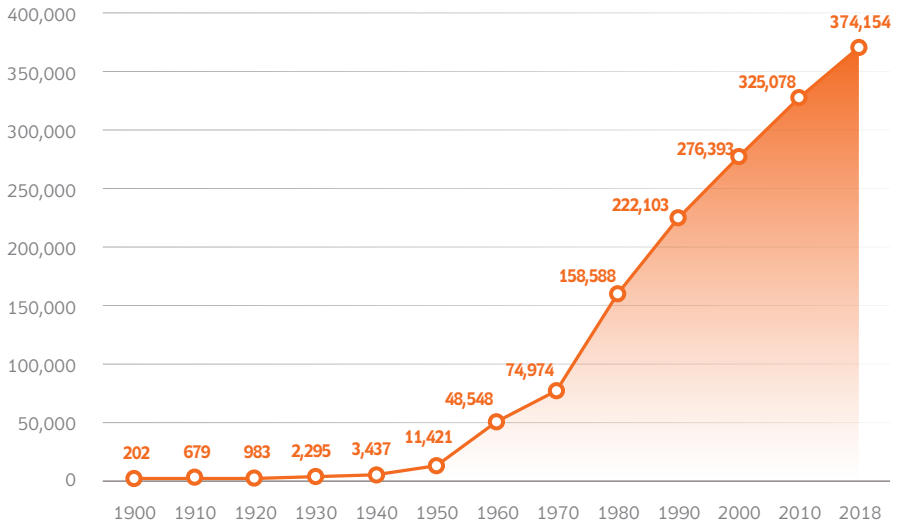
Population

The increasingly diverse population offers the opportunity for our city to grow its economy by developing a unique identity and culture within the metropolitan area.

While the city has seen a steady increase in population throughout its history, a long period of rapid growth began in 1950. Establishment of Aurora's own water utility in 1949 significantly expanded the water supply available to serve the community, allowing for substantial growth in the following decades. Aurora experienced its most dramatic population growth in the 1970s and 1980s when it added almost 150,000 people–tripling the population of the city. Although the population growth rate has slowed in recent decades, our city continues to add an average of 5,000 people each year–or roughly 50,000 people per decade–bringing the current population to over 360,000.

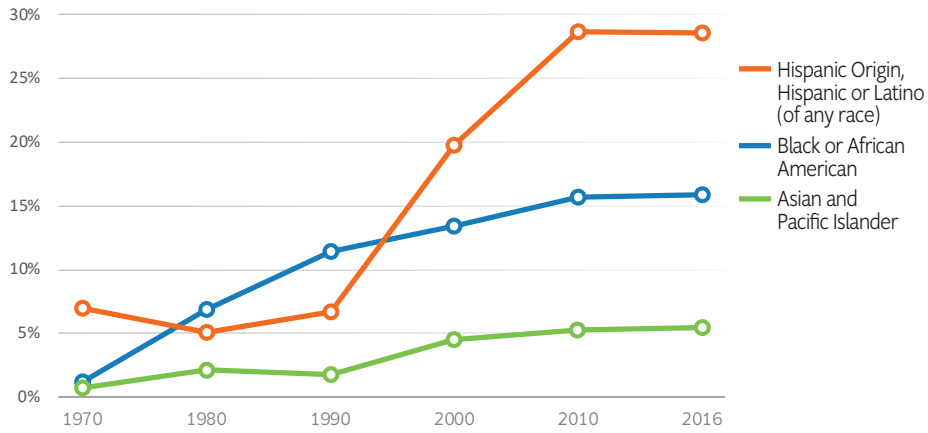


Aurora has become more culturally diverse and has become a majority-minority community. A fifth of Aurora's population was born in a foreign country, a number that has grown substantially over the past couple of decades. But Aurora isn't just known for being a place of many cultures. The city is also recognized for its racially and culturally integrated neighborhoods. Brown University research cited Aurora as the 9th most diverse at the neighborhood level and the 10th most integrated community among the 100 most populous cities in the United States.

Like other communities in the nation, Aurora is aging with a growing population of seniors. This life stage can usher in changes to housing and transportation needs, shopping habits, recreation and entertainment preferences, and health care and social service needs. New types of places will allow more residents to, "age in place" as their needs and preferences change, and continue to call Aurora their home.

Diversity extends beyond age, race or ethnicity, however. Aurora is home to households with very diverse incomes, employment, sizes and compositions. Single-person households, extended families, educational attainment, income levels and other unique personal situations can significantly affect a household's needs for housing, transportation, and other aspects.

Population



The population of Aurora has grown steadily with more recent periods of rapid growth.

Race / Ethnicity

The Hispanic, African American and Asian ethnic populations have been growing at a relatively rapid rate.

Source: Who is Aurora Report

Being home to a diverse and inclusive community has broadened the city's cultural understanding, educational offerings and community life. As the city continues to welcome newcomers and adapt to meet the changing needs of long-time residents, it is challenged with ensuring that they can all enjoy everything that Aurora offers. That includes access to quality jobs and a local economy that rewards entrepreneurship and supports small-business success, safe neighborhoods, access to quality schools and ample opportunity to be active in civic life. The increasingly diverse population offers the opportunity for our city to develop a unique identity and culture within the metropolitan area, grow its economy and meet the changing needs of its residents.

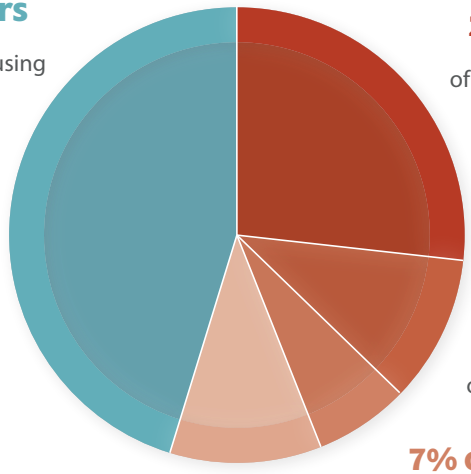
Source: Who is Aurora Report

Housing

By expanding the types of housing and neighborhoods that Aurora offers, the city can better meet the diverse preferences and needs of residents across the income spectrum.



Moderately priced, single-family homes and smaller-scale apartment buildings have dominated housing construction in Aurora. Aurora now needs a much broader range of housing options. While our city contains a variety of housing products at various prices (both for-sale and rental), there is a supply-and-demand gap at many price levels. This discrepancy between supply and demand is strongest for both the lowest-and highest-income households.

Although Aurora's single-family housing values are increasing at a rate similar to that of the metropolitan area, Aurora remains one of the most affordable communities in the region. According to Zillow, Aurora has one of the lowest median sale prices in the region, even though the median price is higher than the country's median. However, for-sale housing is less affordable than in the past. Additionally, there is minimal higher-end, luxury housing in Aurora.

Aurora's median rent is similar to the metropolitan area's, yet, the city has fewer rentals below $1,000 and more above $1,000 than the region. Comparatively, in 2000 almost 60 percent of rentals in Aurora were priced lower than $750 per month. Many renters in our city are being pushed out, becoming cost burdened, or are being forced to house together to afford to stay in their homes.

The Percentage of Renter Households

The majority of renters in Aurora are burdened by high housing costs.

45% of Renters
Spend under 30%
of their income on housing

27% of Renters
Spend 50%+
of their income on housing

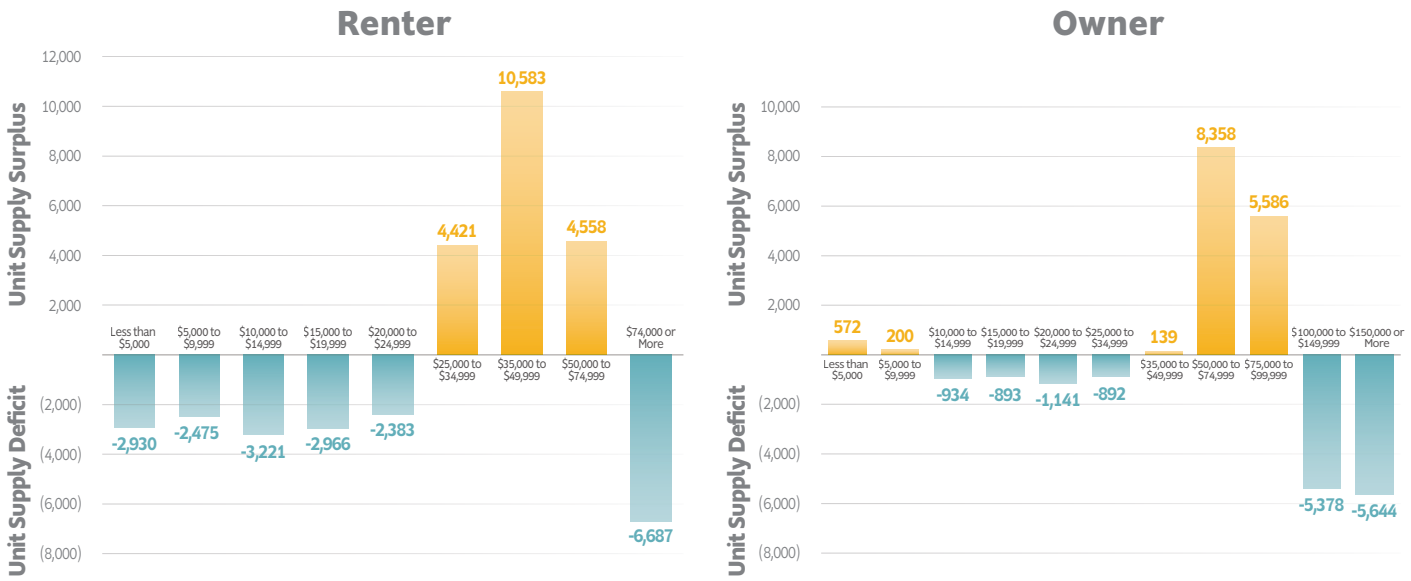
NOTE: *Cost burdened is defined as spending more than 30% of annual income on housing costs*

10% of Renters
Spend 40-49.9%
of their income on housing

7% of Renters
Spend 35-39.9%
of their income on housing

11% of Renters
Spend 30-34.9%
of their income on housing

Source: American Community Survey (ACS)



Renter/Owner Unit Supply Discrepancy

Housing is available to meet the needs of moderate income households but is not adequately available for lower and higher income households.

Housing for low-income households in demand in Aurora. Currently, Aurora has an insufficient number of rental properties that low-income households can afford without experiencing a cost burden or spending more than 30 percent of annual income on housing. This forces potential disposable income to instead be spent on housing.

At the other end of the housing market, our city lacks sufficient higher-value units to meet the needs of higher-income households looking to live in Aurora. As the number of higher-income professional jobs increases, upper-end housing will be needed to accommodate these households within the city.

Expanding both affordable and higher-value housing will prevent the need for workers to look for a home in a neighboring community.

**This chart measures the discrepancy between available supply of renter-occupied housing units and the households that earn incomes that can afford them comfortably, as measured by spending less than 30 percent of total annual income.*

Source: American Community Survey (ACS)

Natural Resources

Careful stewardship of water, energy and natural resources not only represents a commitment to protecting the natural environment, but is also essential to our city's ability to meet the growing needs of its residents and businesses as the city develops.

Aurora's natural environment contributes to the city's high quality of life by providing recreational opportunities, transportation and neighborhood connections, a unique identity, ecosystem preservation, and highly cost effective solutions for stormwater runoff and water conservation. As Aurora continues to grow, it will need to expand its outdoor and recreational opportunities and to conserve its valuable natural resources in order to balance future community needs.

With an incorporated land area of 164 square miles, Aurora is located in the rolling hills and high plains grasslands of Colorado, just to the east of the Rocky Mountain foothills.

WATER-WISE LANDSCAPING

Water-wise landscaping (also known as xeriscaping) is sustainable and drought tolerant due to the low-water plants and specific techniques used to maximize water efficiency. When compared to grass, which requires about 28 inches of supplemental water annually, water-wise landscaping can thrive on 15 inches or less and weathers longer periods without water. Additionally, this type of landscape often requires less maintenance. The city operates a number of programs to promote the use of these techniques, including design assistance, plant suggestions, rebates, educational resources and a recognition program.

Aurora is more than a mile high at its lowest point of 5,285 feet above sea level. But then the city's elevation increases to more than 6,200 feet above sea level at its highest point in the southeast. Surface water in Aurora flows into several streams that eventually adjoin the South Platte River. Aurora enjoys a mild, semi-arid climate with an average annual precipitation of only 15 inches and an average of 300 sunny days per year. Its sweeping views of the Front Range mountains and its mild climate make it a pleasant place to live. The well-developed park and trail systems, coupled with large open space areas like the Plains Conservation Center and Aurora Reservoir, provide significant outdoor places for the community.

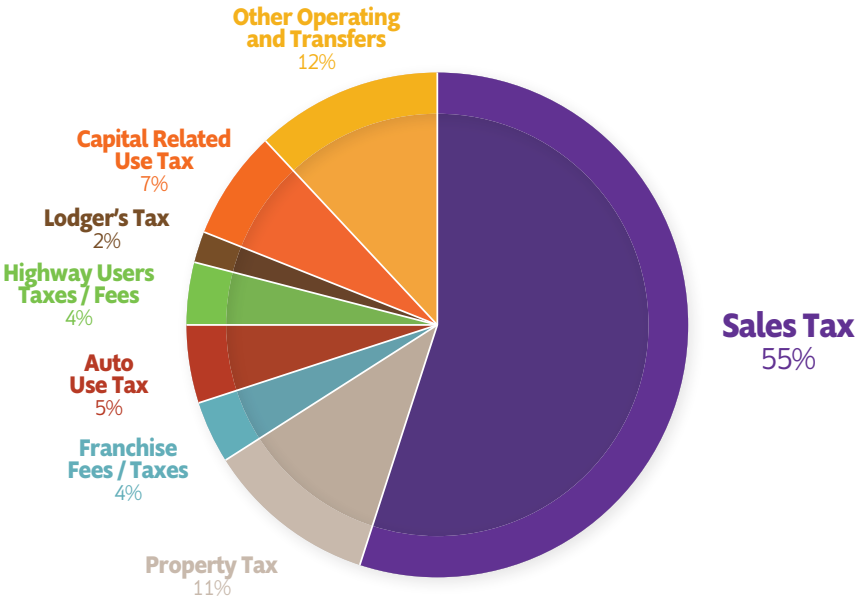
Water supply is critical to Aurora's future. Currently, our city's water supply comes from the Colorado River Basin, Arkansas River Basin, and Upper South Platte Basin. According to the 2016 Integrated Water Master Plan, the city's water demand is projected to more than double by 2070. In accordance, the city plans to obtain additional water supply and expand storage capacity.

The city's strong conservation program is crucial in addressing its water-supply challenges such as limiting outdoor watering to three days a week, water-wise landscaping rebates, and other programs. Conservation, water efficiency and demand management practices are incorporated into Aurora's land use planning and development standards. These programs have saved 528 million gallons of water between 2014 and 2016.

Aurora has undertaken several energy conservation efforts. The city has worked with partners to create the country's largest solar-technology test facility. The 74-acre Solar Technology Acceleration Center (SolarTAC) is located at the Aurora Campus for Renewable Energy (ACRE).

XCEL Energy operates six acres of community solar gardens that allow Aurora customers to buy renewable energy credits for their homes and businesses. The city also has photovoltaic systems at three of its public facilities. Aurora has sponsored several educational and outreach programs for schools and businesses to help them improve their energy efficiency. These initiatives provide an opportunity to integrate energy efficiency and economic development.

Careful stewardship of water, energy and natural resources represents a commitment to protecting the natural environment. The integration of water and land use planning will enable our city to conserve its resources and make strategic, cost-effective infrastructure with the highest level of reliability. As Aurora continues to evolve into a major city, stewardship of these natural assets becomes increasingly important to maintain Aurora's quality of life and provide both functional and environmental benefits.



Fiscal Health

The city's long-term fiscal health is strongly tied to how the city chooses to grow. All types of development and redevelopment have associated positive or negative fiscal impacts. It is critical to understand these implications when weighing growth decisions. Revenue is driven largely by consumer demographics and the type and intensity of development constructed in the city. The spending power of Aurora households or outside visitors who shop in the city drives sales tax revenues while the type of development drives both property tax revenue and required city services. Many of the city's largest budget appropriations are directly related to the growth and development of the city, such as transportation improvements, water and wastewater utilities, police and fire services, and parks and recreation.

Aurora is deeply dependent on local sales tax to support its budget. In the 2018 Adopted Budget, sales tax revenue is the largest operating source of revenue, contributing 55 percent of General Fund sources. This source of revenue is largely driven by population demographics the availability of disposable income of Aurora households. Consumer spending by daytime Aurora-based employees and spending by visitors to the city are other sales tax contributors. Aurora residents shopping outside the city, or "retail leakage"; growing popularity of online shopping; and a shifting proportion of spending on taxable goods toward non-taxable services can have a negative effect.

Adopted General Fund

Sales provides the majority of revenues in the city of Aurora.

Source: City of Aurora 2018 Adopted Budget

Overall consumer spending is often cyclical, in large part based on regional or national economic trends; however, the city can take actions to capture its fair share–or more–of sales tax revenue in both strong and challenging economic times. One strategy is to create unique places that draw shoppers to Aurora and keep resident spending in the city is one strategy. These Aurora places can offer desirable experiences and retail and restaurant options that respond to changing consumer preferences.

The second largest revenue source is local property taxes, which comprises 11 percent of the General Fund revenue. The property tax revenue from new development will vary based on the type, quality and density of housing, and value of non-residential development. In large part, these factors are established when a new development is planned and built.

Furthermore, the city will continue to work within state legislative constraints, such as the TABOR (Tax Payer's Bill of Rights) and Gallagher Amendments, as they affect the growth and balance of commercial and residential property-tax revenues.

The 2006 Study of Revenues report found that the city will face budget challenges under various scenarios of growth and expenditure. This is described as the "structural gap" between ongoing service needs and the city's revenue capacity. Periods of strong revenue growth delay or reduce the size of the gap, while recessions cause the gap to grow.

In response to the study, the city has taken steps toward reducing the structural gap, such as judiciously funding service level needs with ongoing revenue, using one-time funds for one-time needs, and indexing service fees annually. The long-term General Fund financial outlook scenarios confirm a gap remains a risk. Closing the gap will likely require measures that address both expenditures and revenue.

Aurora Places aims to address the role of development and economic development in the city's overall health. The fundamental goal of the plan is to create a strong and stable city that meets the needs and desires of residents and continues to be attractive to investors and employers. Placemaking plays a unifying role in creating great destinations to live, work, invest, shop and play. This is an essential part of the community's future economic and fiscal success.

COMMUNITY CONVERSATION

Aurora Places is the community's plan.

The Aurora Places team engaged in in-depth conversations with the community to create a plan based on the aspirations of the people who live and work in Aurora. Aurora's diverse population made it even more essential to listen to the community's broad range of perspectives, including:

- Aurora City Council
- Residents and neighborhood organizations
- Business owners and major employers
- Local school districts and higher education providers
- Local advocacy organizations
- City boards and commissions
- City administration and staff

Community Vision Statement

Aurora is a welcoming and safe community and a city of opportunities where people of all backgrounds can prosper. Aurora is known for its unique places, strong economy, community involvement, quality and attainable housing, integrated and healthy neighborhoods, smart ways to get around and a thriving natural and cultural environment.

COMMUNITY CONVERSATION

Aurora Places is built on a foundation of community input resulting from an ambitious outreach campaign.

The community and planning team collaborated in person and online, at events, in small groups, and community-wide workshops. In 2016 and 2017, the planning team interviewed individuals, held focus groups and community workshops, conducted online surveys, hosted the sMap interactive mapping tool, and distributed do-it-yourself (DIY) workshop kits to local outreach teams. To ensure that the city's non-English-speaking community had an opportunity to participate, the Aurora Places team conducted outreach in six languages.

In January 2017, local experts, representing a variety of community topics, participated in focus group discussions. In spring 2017, the Aurora Places team hosted community workshops focused on creating a vision for Aurora's future. The issues, opportunities and desired actions expressed in this chapter reflect the opinions and feedback from community residents and stakeholders. The discussions and comments from these groups were used to inform the planning process and develop insights into the key issues facing the Aurora community.

3,200+

Aurora Places team has engaged more than 3,200 residents, businesses and city staff in the making of this plan.

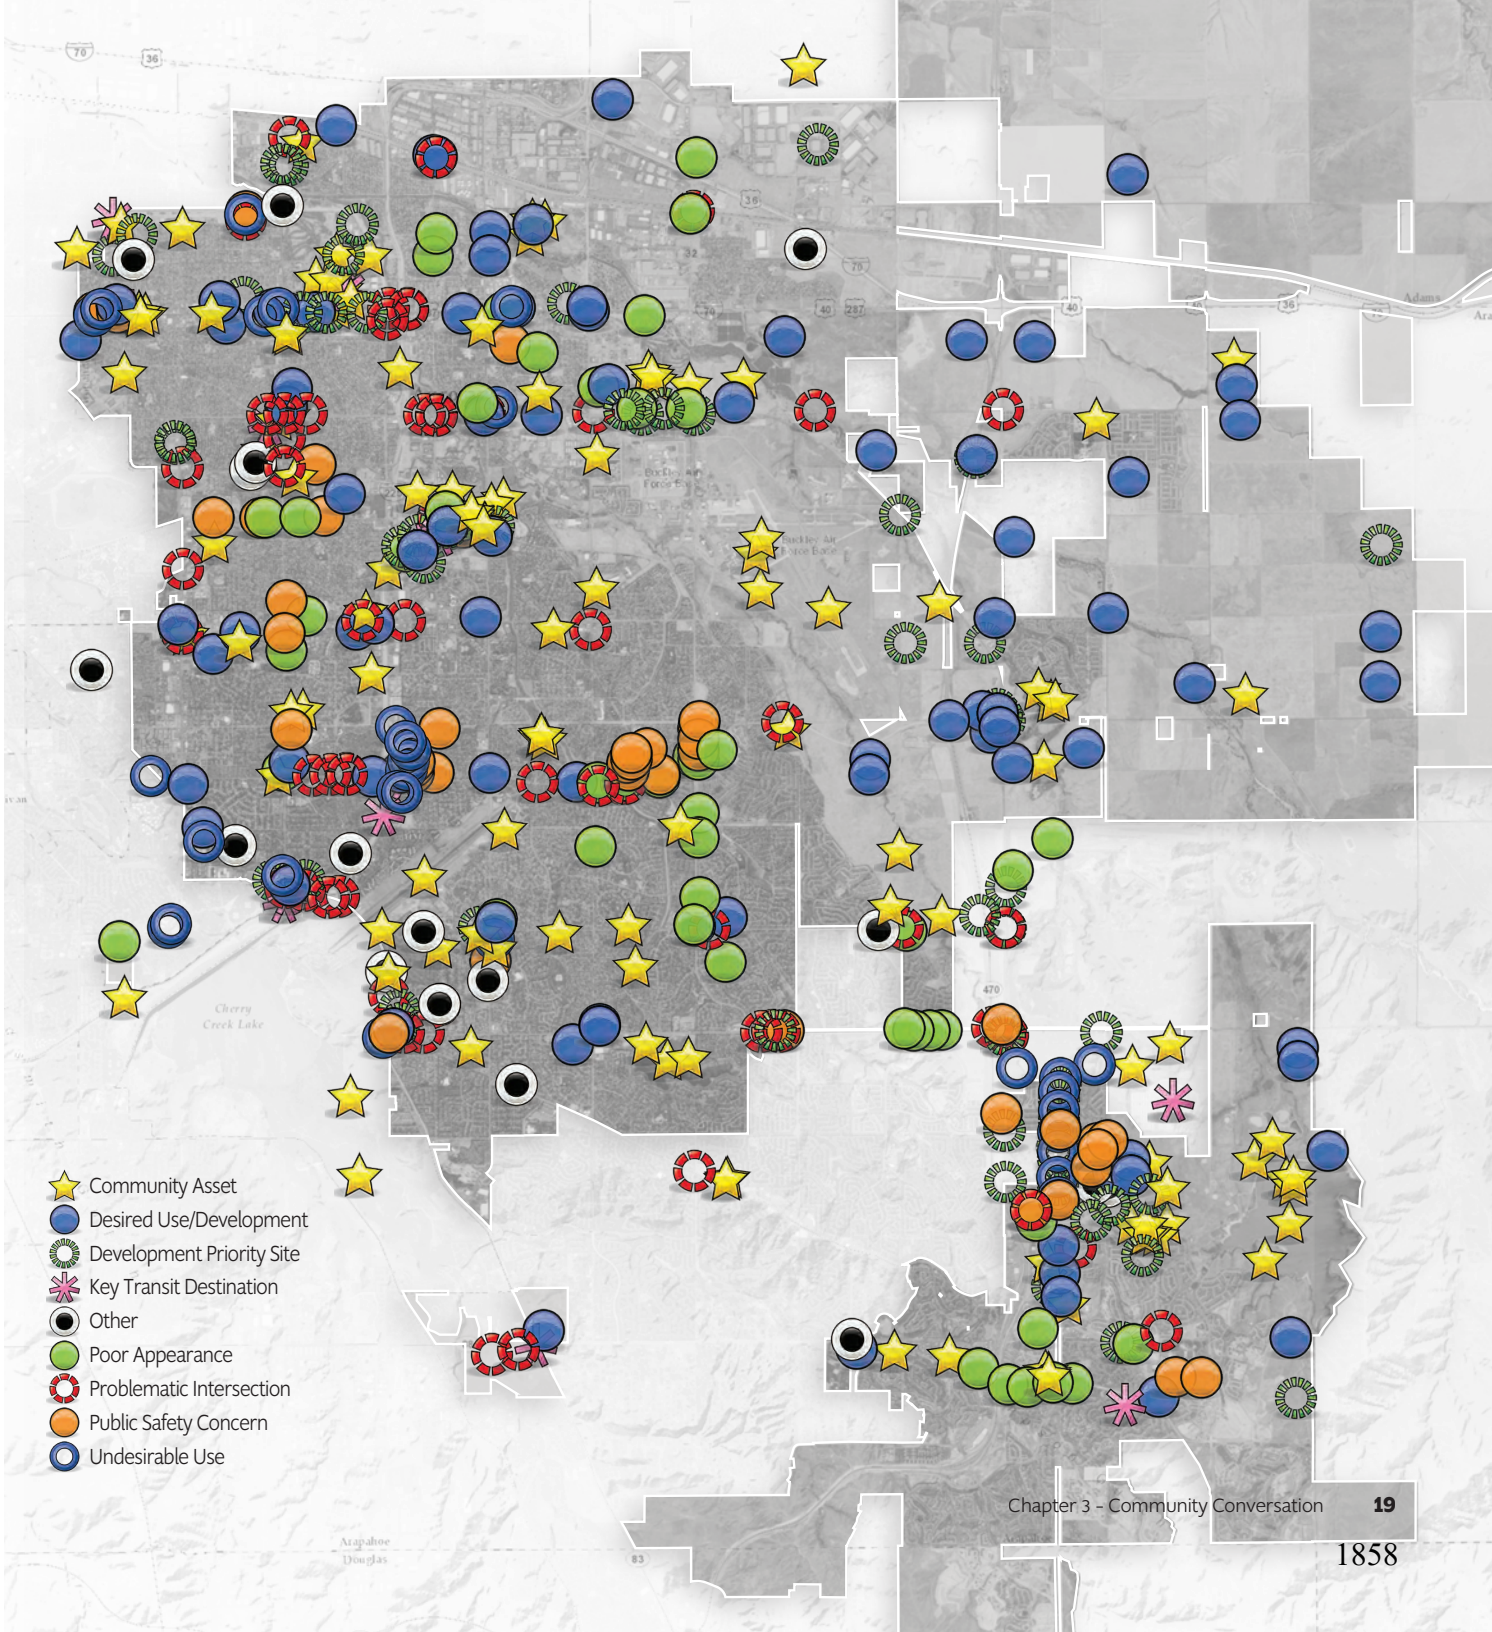
800
RESPONSES

The online surveys generated almost 800 responses.

500
MAP POINTS

The community mapped more than 500 assets, issues and concerns using sMap; a web-based application developed by Houseal Lavigne Associates.

6
LANGUAGES



Outreach was conducted in English, Spanish, Korean, Amheric, Somali and Burmese.

55
DIY + LOT

Do-it-Yourself (DIY) workshop kits distributed to local outreach teams (LOT) resulted input from 1,000+ residents.

SMAP

As part of the planning process, sMap, a web-based outreach and engagement platform, was used by residents across Aurora to gather input on issues, concerns, opportunities and aspirations. In a later round of community outreach, sMap was used to prioritize the most important components related to community health, diversity, mobility, sense of place, local economy, housing and sustainability. Input provided helped to shape the vision, core principles and goals included in Aurora Places.

1858

WHAT WE **HEARD...**

COMMUNITY PRINCIPLES

Community members identified many issues and actions to make Aurora better. They described what they considered to be Aurora's most important assets and voiced concerns that will help determine how to best plan for our city's continued development. Through the community conversation, the Aurora Places team assisted the community in identifying and defining seven topic areas as priorities for Aurorans. These seven community principles served as the foundation for the development of the Aurora Places.

A Strong Economy

The participants in the community conversation stressed the importance of economic growth for Aurora. The city has several community assets that provide a foundation for growing the local economy, including a major research center at the Anschutz Medical Campus, the Buckley Space Force Base and a new light rail line. According to participants, job creation and access to workforce training resources are very important. There is a strong desire to improve support for small and local businesses. There is also a need for unique urban places for employment, together with housing, daycare and locally grown businesses. Multiple modes of transportation should connect these urban places. Partnerships with institutions and the private sector will be critical for the economy, especially in relation to training and education.

A Diverse and Equitable City

The population of Aurora is diverse in every way. Aurorans wanted to celebrate this diversity and make sure that services are provided to the people of Aurora, regardless of background, age, income or ability. Diverse populations should enjoy all of the opportunities and amenities that Aurora offers. Improved intercultural communication is needed, along with enhanced services for immigrants, people with disabilities, seniors and low-income families. Displacement of people from their homes and neighborhoods as development occurs around them is a critical issue to address. Participants also called for the city to continue to engage diverse communities and provide information and services in multiple languages.

Housing for All

Participants described the need for more high-quality housing in a range of types and prices, including affordable housing. The lack of affordable housing options for low-income families, particularly for renters, must be addressed. Participants emphasized the need to end homelessness. There is a need for more housing choices and options, and existing affordable housing should be preserved and direct assistance should be provided to low-income families. Development regulations and processes should be improved to make housing development more efficient and less costly. Affordable housing should be located at accessible places such as at transit stations and close to job centers.

Healthy Community

Participants identified the need for additional recreational opportunities and better access to healthy food. Participants also expressed desire for improved public safety and mental health resources. They also expressed interest in smoking cessation programs. There was strong support for community gardens, urban agriculture, and fresh and healthy food options available in every neighborhood. Our city should support health promotion events, inventory sidewalks and crossings and invest in street improvements to allow residents to walk and bike safely in their neighborhoods and across the city.

Thriving Environment

Participants described the need for more water and energy conservation and improved recycling options and opportunities. They expressed concern for improving air quality to protect health and the environment, and preserving, enhancing and connecting open spaces, trails and waterways. They understood that planning for growth and water supply are inextricably connected and emphasized the need for water conservation education, the use of native vegetation, water-wise landscaping and green infrastructure. The city should promote construction of energy-efficient buildings, and educate the public about energy-efficient practices.

Improved Mobility and Active Transportation

Aurora has significantly improved the mobility of Aurorans by providing new travel options for cyclists, pedestrians, drivers and public-transit users. Participants wanted to continue to increase and improve all types of travel connections. Aurorans are concerned about traffic congestion, safety, road maintenance and the need for additional bike routes. Improved walkability, public transit and transportation technology are needed. Participants expressed strong concerns for meeting the travel needs of the disabled, the elderly and families.

Authentic Aurora

Participants frequently stated that Aurora's reputation does not reflect its actual high quality of life. In addition, participants wanted to make improvements to the city that will reflect well on it, particularly through the creation of new downtown areas as locations for jobs, entertainment and the arts.

Aurorans want to improve the community's image and perception. Part of that improvement will involve the creation of unique urban places where people can come together to work and enjoy entertainment, art and community events. Our city needs an improved image, reputation and appearance, along with more distinctive destinations for both residents and visitors. They were also concerned with eastward growth and its impact on city services and fiscal health.

PLACETYPES

From the Havana District to Colfax Avenue to southeast Aurora and the northeast plains, Aurora is a city of individual places joined into a unified community. Like most large cities, Aurora has places with different histories and characters, separated by significant distances. Aurora currently has fewer types of places compared to cities of similar size. For instance, Aurora lacks an established central business district or downtown. If the city wants to build on its diversity and continue balancing growth and success, it is critical that it creates these and other places throughout Aurora.

In vibrant cities, great places most often take the form of unique neighborhoods and active mixed-use districts, designed around parks, plazas and main streets, with distinctive architecture and a diverse mix of activities. Such places allow people to meet, conduct business, exchange ideas and interact with one another. During the 20th century, most American city plans placed a focus on individual land uses, such as single-family homes, apartments, shopping centers and industry, without fully recognizing the dependency each of the uses had on the others. The most successful, sustainable and vibrant cities have recognized and organized their uses to create complete places.

Great cities are composed of great places.

1862

PLACE-BASED APPROACH

Placetypes define Aurora's neighborhoods and destinations by creating unique places with their own characteristics.

This plan describes future development and land use in terms of "placetypes". They characterize specific areas of the city based on defining qualities, scale, form and function. Aurora's ten placetypes constitute well-defined, unique and desirable places. The vision described by these placetypes should direct or regulate new development areas as well as guide the evolution of an established place through redevelopment, infill development, or planning of new public improvements.

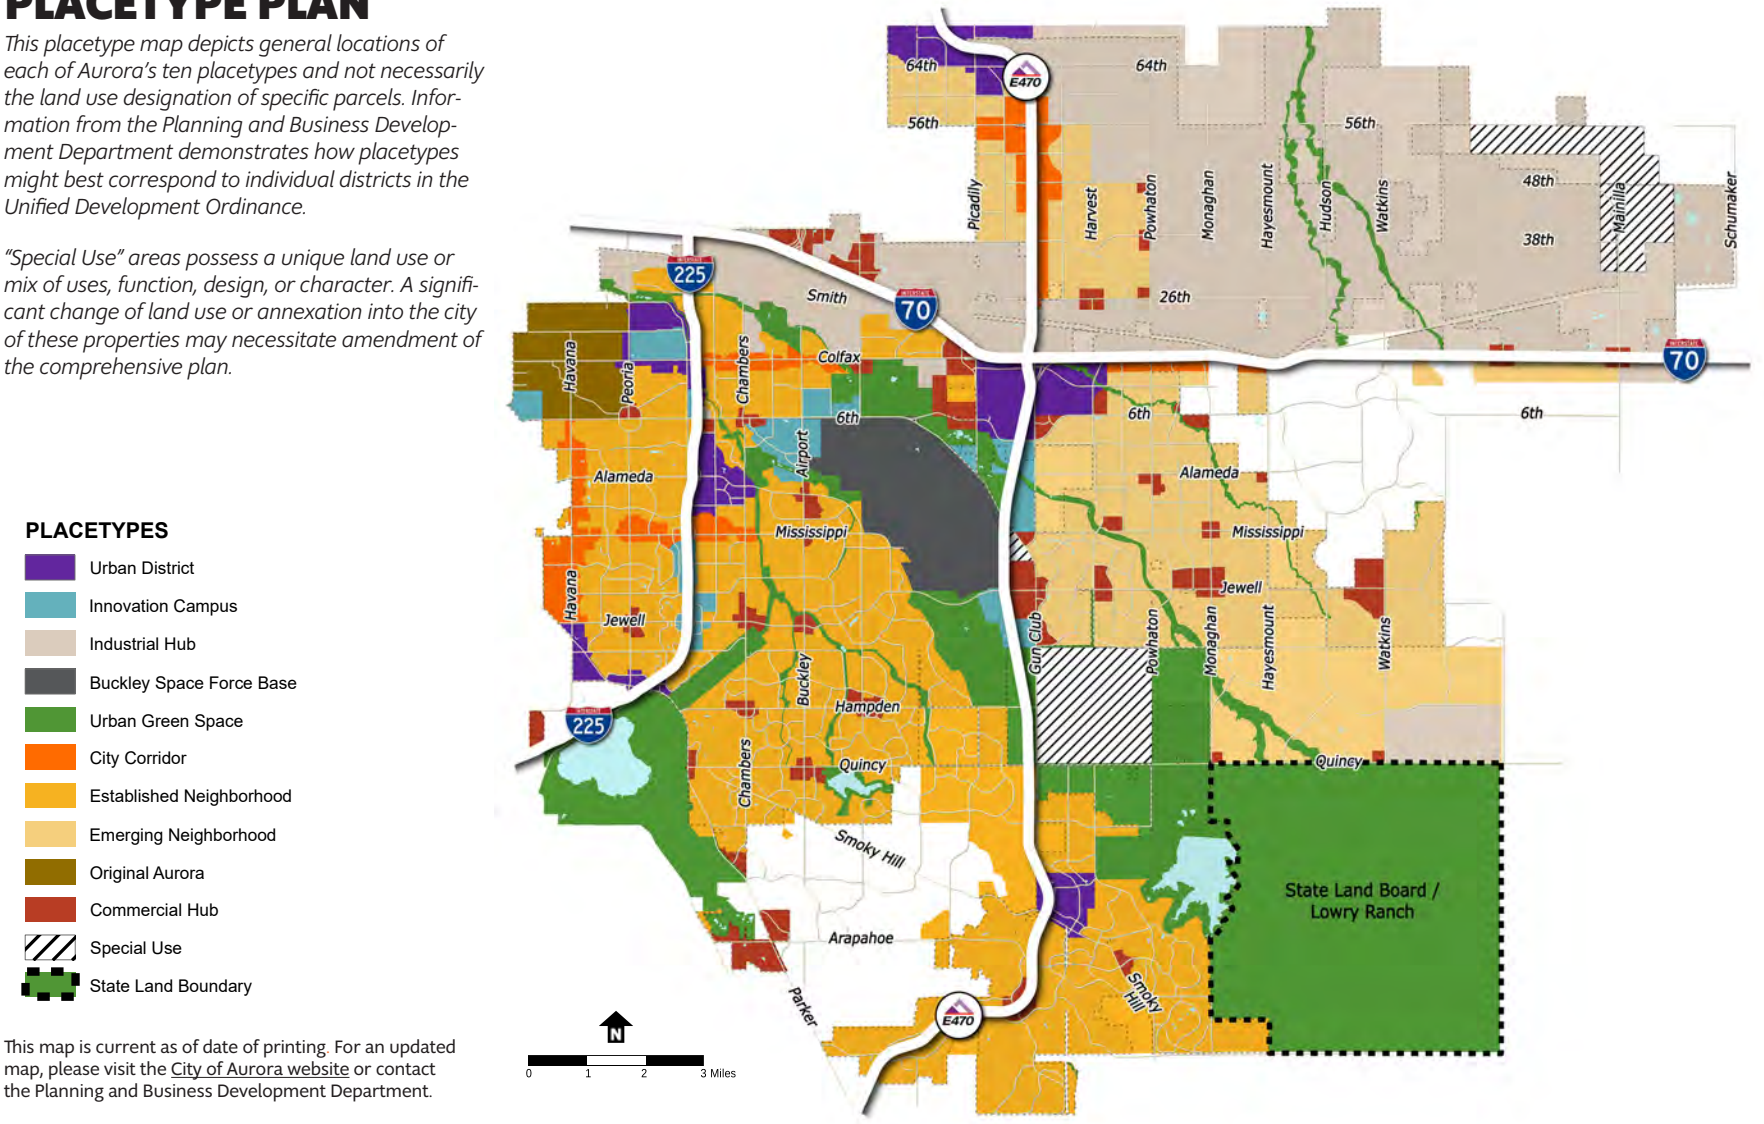
Placetypes are created and strengthened through community stewardship, neighborhood planning, land-use regulation, public improvements and public-private partnerships. Places are built through many decisions and investments, anchored in vision, and working toward a common outcome.

Each placetype incorporates flexibility and potential for innovation, evolution, or reinvention. The creation of places not only depends on land uses but also on design, functionality and access to infrastructure. Employing these placetypes foster more inclusive, accessible and economically successful places that implement the seven community priorities described in Chapter 3.

UNIQUE AURORA PLACES

While locations or districts of the same placetype generally share defining features, each individual place defines its own unique character and specific mix of uses to meet local needs and desires. For example, the Anschutz Campus, City Center area and Southlands Town Center are all designated as Urban Districts.

While those examples may share general characteristics or defining features, each offers a unique mix of uses and experiences. Placetypes are descriptive, not prescriptive. Diversity of places and experiences is a strength of Aurora.



This chapter outlines Aurora's ten placetypes by describing what each looks like, compatible land uses mix, and best practices in urban design and function. The use of placetypes approach envisions an Aurora that is full of unique, desirable places that encourage cohesive communities, commerce, and connections.

A cohesive community experience forms when placetypes appropriately connect to each other. Where placetypes adjoin, a transition area that integrate each one's character is formed. Adjacent uses should be designed for connection where patterns are complementary, but appropriately buffered where uses might conflict.

PLACETYPE PLAN

This placetype map depicts general locations of each of Aurora's ten placetypes and not necessarily the land use designation of specific parcels. Information from the Planning and Business Development Department demonstrates how placetypes might best correspond to individual districts in the Unified Development Ordinance.

"Special Use" areas possess a unique land use or mix of uses, function, design, or character. A significant change of land use or annexation into the city of these properties may necessitate amendment of the comprehensive plan.

This map is current as of date of printing. For an updated map, please visit the City of Aurora website or contact the Planning and Business Development Department.

This map identifies current placetype designations for all areas within the City of Aurora's adopted planning and annexation boundary. See Chapter 5 for additional information about this boundary. Placetype designations for areas outside of the city limits are for long-range planning purposes only. These properties are subject to the rules and regulations of their appropriate jurisdiction(s).

PLACETYPES AND LAND USE

The 10 placetypes consist of several typical land uses. Primary land uses are prominent and play a pivotal role in characterizing the placetype. Supporting land uses are less prominent but strengthen the primary land uses. For example, an Established Neighborhood primarily consists of various residential housing types, like single-family homes; however, the neighborhood also supports housing with schools and parks. The following pages note typical land uses, their descriptions and whether they are primary or supporting uses.

Placetypes describe the overall character of a place including typical land uses mix, key urban design features, the mobility network, and other physical and functional elements. Zoning is a regulatory tool used to implement the vision described by the placetypes. The Aurora Zoning Code defines land uses, regulations, and development standards for all land within the city.

Typical Land Uses

Placetypes	Single-Family Detached Residential	Single-Family Attached Residential	Multifamily Residential	Restaurant	Commercial Retail	Commercial Service	Entertainment and Arts District	Office	Light Industrial / Business Parks	Heavy Industrial	Buckley Air Force Base	Institutional (educational, religious, cultural)	Parks and Open Space	Urban Agriculture	Community Garden
Urban District	○	●	●	●	●	●	●	●				○	○		
Innovation District	○	○	○	○	○	○		●	●			●	○	○	
Industry Hub				○	○	○		○	●	●				●

Buckley Space Force Base

Urban Green Space

TYPICAL LAND USES

Single-Family Detached Residential

Single-family detached residential areas consist primarily of homes on lots subdivided in an organized and planned manner. Single-family detached homes are the most prevalent residential building type in the city.

Single-Family Attached Residential

Single-family attached structures include townhomes and row-houses. Single-family attached structures contain multiple units divided by common or shared walls, with each unit having their own direct access to outside.

Multifamily Residential

Multifamily residential structures contain multiple housing units and are usually stacked vertically and attached horizontally, with each unit having its entrance on a common hallway or lobby. Examples of multifamily residential developments include apartments, condominiums, student housing, and senior housing.

Commercial Services, Restaurants and Retail

All these areas permit "commercial" uses and include places where people shop, eat, work and receive professional and personal services. The uses can be low-intensity and small in scale, such as those found within a neighborhood. They also can be large and intense, like those found in regional shopping areas, or part of mixed-use environments such as a downtown.

Light Industrial/ Business Parks

Light Industrial, Business Parks, and office space cover a wide range of uses that include storage, warehouse, research, light processing or assembly, office parks and others.

Heavy Industrial

Heavy Industrial uses consist of large-scale industrial uses, including manufacturing, construction, waste and recycling services, and intense automobile repair and salvage services.

Religious Institutions

Religious Institutions include churches, synagogues, mosques, other houses of worship and their related facilities. These institutions can be a key component of quality of life and tend to stabilize and help define individual neighborhoods.

Parks and Schools

Parks and schools are located throughout the city and contribute significantly to the community's overall quality of life. Parks can include small neighborhood parks with playgrounds, as well as larger community-wide parks with ball fields and recreation programs.

Urban Agriculture and Community Gardens

These two land uses are related, but represent varying levels of intensity and compatibility. Urban agriculture is more intense and can include agricultural activities intended for the commercial-level production of crops and produce.

Civic and Cultural

These land uses are publicly accessible places utilized by community members on a daily basis either directly or indirectly. They include necessary services such as utilities, police and fire as well as desired amenities like libraries and other municipal services.

Aurora Placetypes

Urban District

Urban Districts are Aurora's signature destinations that offer a unique, vibrant urban experience.

Urban Districts are critical to the economic and fiscal health of the city because they centralize employment, culture and activity. This District is the city's most intensely developed area with land dedicated to mixed-use, entertainment, institutional, retail, restaurant and multifamily residential. In the absence of a single "Downtown Aurora," this placetype provides a unique mix of uses in a relatively dense, pedestrian-friendly urban fabric of places to live, work, shop, dine, recreate and more. It is distinguished from other placetypes by density and the prioritization of multimodal transportation.

Multifamily housing and employment opportunities abound. Predominantly mixed-use developments accompanied by a small amount of stand-alone commercial and multifamily uses characterize the Urban District. Public facilities and institutions may be strategically located within the Urban District to anchor or support these diverse and active places. Urban parks serve as locations for activities of residents and workers. This mix and intensity of uses offers around-the-clock activity. Transit, pedestrian and bike connections are essential to its development and success.

Primary Land Use

- Multifamily Residential
- Restaurant
- Commercial Retail
- Commercial Service
- Entertainment and Arts District
- Office

Supporting Land Use

- Single-Family Attached Residential
- Institutional
- Parks and Open Space

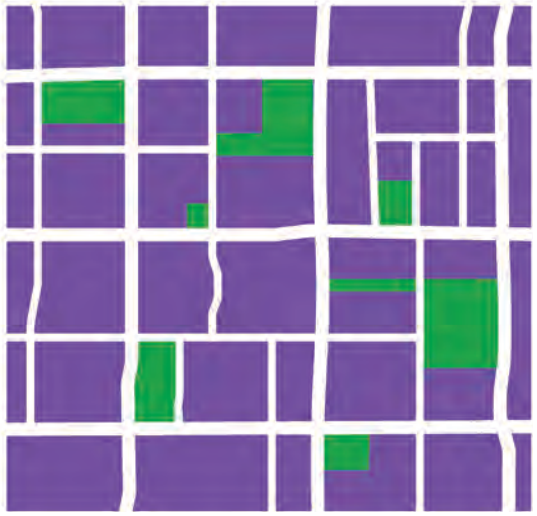
Mobility in Urban Districts

In mixed-use placetypes like Urban Districts, streets function as active, public spaces, organized around walkable blocks and tightly-connected street networks desighed to prioritize walking, cycling, and frequent transit use.

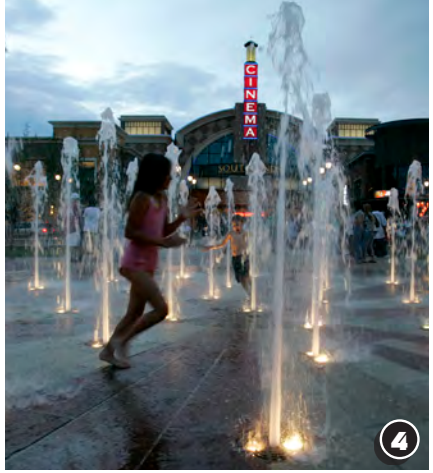
Prioritization of walking, biking, and transit users is critical in urban districts, especially along main streets and arterial streets. These are places for human interaction, the most diverse mix of uses, and commerce to thrive. New development should integrate these modal priorities into plan and in established areas, opportunities to re-establish or enhance these networks and connections should be identified and implemented.

Freight and delivery movement must be accommodated, but should be balanced with other curbside needs and not interrupt pedestrian and bicycle users. For this reason, district and site design are especially important to get right to achieve this balance.

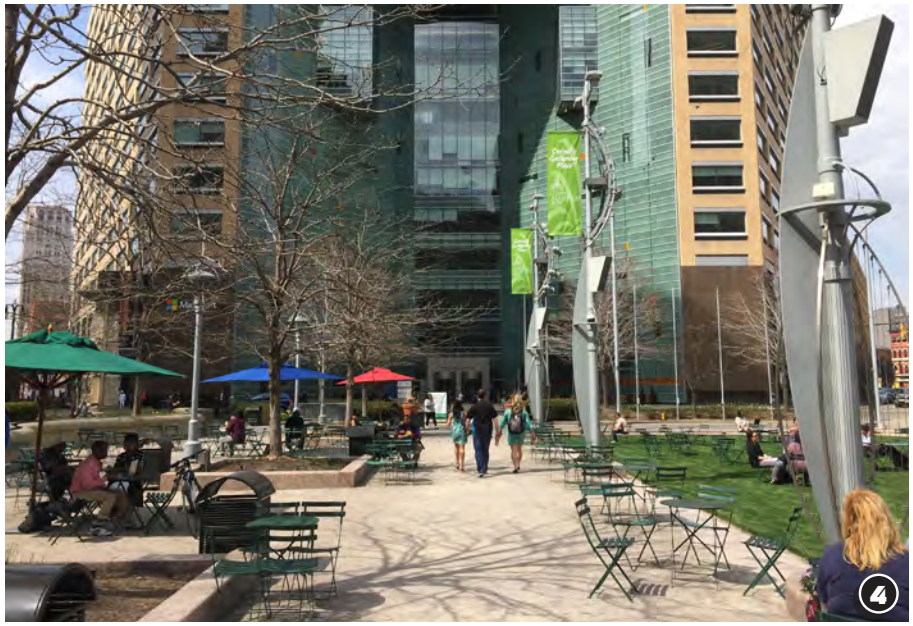
Continued infill and redevelopment in urban districts will add more residents and jobs to these areas. These trends will generate more daily trips, not only for commuting but also for shopping, school, recreation and freight movement. Providing mobility options is essential to the well-being and functionality of these mixed-use districts.



Street and Open Space Network

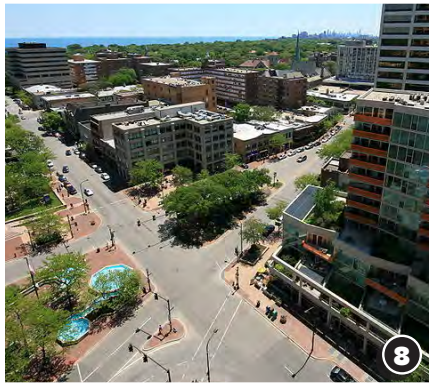


Urban Districts should have a complete grid of streets that form relatively small urban blocks. Easy, short pedestrian and bicycle path connect to surrounding districts and neighborhoods.

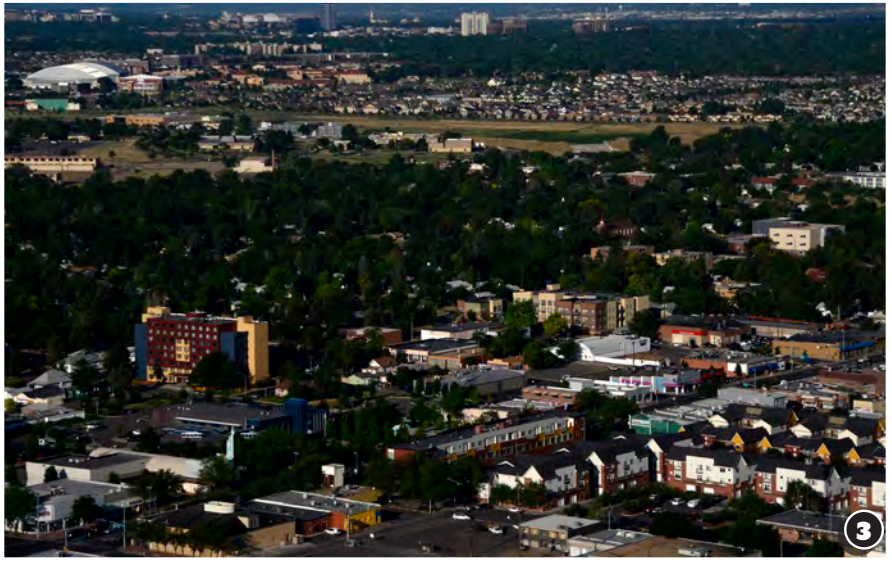


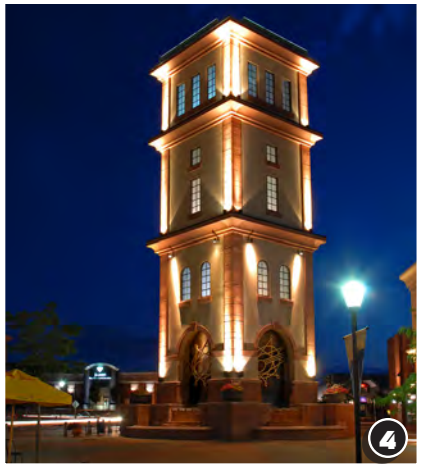
Open Space/Park

Developed Blocks



Streets





Defining Features

1. Urban Districts can define Aurora's image and aesthetic through high-quality design and architecture supporting active places and distinctive destinations.
2. Prioritize mixed-use buildings with ground-floor commercial and multistory residential housing above to bolster commercial and social activity.
3. Use attractive, connected and well-designed urban streetscapes throughout the district. Place buildings at or near the sidewalk to maintain a traditional streetwall effect.
4. Utilize civic plazas, courtyards, and parks and open space as gathering places for residents, employees and visitors.

Defining Features

5. Provide easy, short pedestrian and bicycle connections to surrounding districts, neighborhoods, and destinations.

6. Integrate "water-wise" practices including water-efficient fixtures, native xeric landscaping, water efficient streetscapes and medians and low-impact development.

7. Incorporate an accessible, well-connected transit hub to link Urban Districts to the rest of the city and region.

8. Develop urban districts with complete grids of streets forming relatively small urban blocks.

Aurora Placetypes

Innovation District

Innovation Districts foster new ideas and enterprises by bringing together people, companies, and institutions.

The Innovation District is where leading-edge anchor institutions and businesses connect with start-ups and other emerging businesses. This placetype fosters new ideas and enterprises by facilitating collaboration between companies and institutions and are key to increasing employment within the city. Such Districts will foster creativity and horizontal integration through proximity of light industrial and business parks with educational and medical institutions.

A robust, tech-centric space, with meeting sites that encourage people and organizaitons to collaborate and exchange, is critical to this placetype's success. Co-locating office space with housing will augment efficiency and convenience. Urban agriculture and community gardens serve as secondary uses, particularly for research in biological sectors. Transit, pedestrian, and bicycle accessibility to and through the Innovation District is also critical.

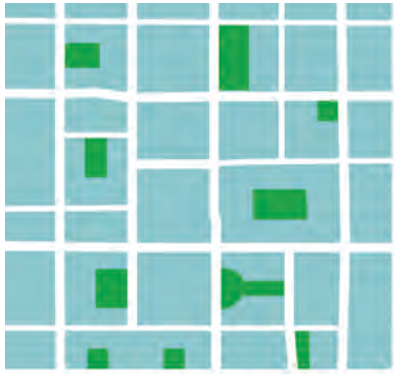
Mobility in Innovation Districts

In mixed-use placetypes like Innovation District, streets function as active, public spaces, organized around walkable blocks and tightly-connected street networks desighed to prioritize walking, cycling, and frequent transit use.

Prioritization of walking, biking, and transit users is critical in urban districts, especially along main streets and arterial streets. These are places for human interaction, the most diverse mix of uses, and commerce to thrive. New development should integrate these modal priorities into plan and in established areas, opportunities to re-establish or enhance these networks and connections should be identified and implemented.

Freight and delivery movement must be accommodated, but should be balanced with other curbside needs and not interrupt pedestrian and bicycle users. For this reason, district and site design are especially important to get right to achieve this balance.



Continued infill and redevelopment in urban districts will add more residents and jobs to these areas. These trends will generate more daily trips, not only for commuting but also for shopping, school, recreation and freight movement. Providing mobility options is essential to the well-being and functionality of these mixed-use districts.

Street and Open Space Network

Connect the district through a highly-connected and walkable network of streets. Cluster buildings around gathering places or within a campus layout.

Open Space/Park

Developed Blocks

Streets

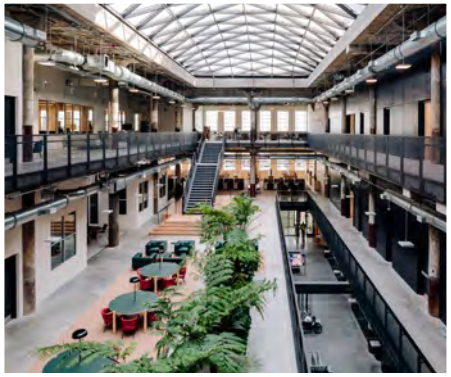
1872

2

4

3

Defining Features



1. Demonstrate innovative approaches to design and development through architecture, lighting, infrastructure, greenery, and meeting/gathering spaces indoors and outdoors.
2. Cluster or connect buildings around gathering places or within a campus layout to promote idea sharing and business collaboration.
3. Integrate affordable single-family attached and multifamily residential housing to support students and employees.
4. Develop a fully connected network of sidewalks and bike paths to ensure safe and efficient pedestrian access from nearby neighborhoods and adjacent placetypes.

Defining Features

5. Construct gateway treatments and wayfinding signs at key entrances to better direct residents, workers, and visitors to numerous cultural and educational facilities.

6. Include establishments such as coffee shops, restaurants, bars, plazas, libraries, conference centers, relevant retail, and shared working spaces to facilitate collaboration and exchange of ideas.

7. Integrate "water-wise" practices including water-efficient fixtures, native landscaping, water efficient streetscapes and medians and low-impact development best management practices (BMPs).

8. Identify opportunities for joint nonpotable cooling water reuse and passive heating.

Aurora Placetypes

Industry Hub

Industry Hubs are primarily dedicated to a mix of commercial and industrial uses and can be large employment centers.

The Industry Hub includes areas dedicated to manufacturing, warehousing, distribution, fulfillment centers, freight operations and renewable energy enterprises. This placetype plays an important role in the city's employment and economy, but can sometimes create outdoor activities and operations which should be appropriately buffered from residential and commercial areas. It can generate high volumes of traffic from both employees and associated freight movements.

Adjoining roadways should accommodate traffic without negatively impacting quieter placetypes or traffic on local streets serving residential areas. Large-scale alternative energy facilities may also fit into this placetype. Uses permitted only in Industry Hubs are manufacturing plants, factories, large open-air operations and heavy-equipment storage.

Primary Land Use

- ● Light Industrial
- ● Heavy Industrial
- ● Urban Agriculture

Supporting Land Use

- ○ Restaurant
- ○ Commercial Retail
- ○ Commercial Service
- ○ Office

Mobility in Industry Hubs

Large-format warehousing, manufacturing, logistics yards and energy or utility uses are the primary uses in Industry Hubs. These uses typically require wide streets that are suitable for frequent heavy truck traffic. Intersections are limited, but prioritize heavy-vehicle throughput and safe separation from neighborhood traffic. Corridors are intended as primary routes for goods movement, as well as connect major streets.

Given the impacts and prevalence industrial traffic in this placetype, off-street truck parking is an important element. The city should work with major employers in the area to explore models and opportunities for the provision of this vehicle infrastructure.

However, these industrial uses are also important destinations for employees and commerce. For this reason, truck traffic must be balanced with the needs of employees and customers driving, taking public transit, biking, or even walking to job sites and local services. Transit and/or microtransit services can these industrial areas.

Street and Open Space Network

Locate Industrial Hubs near major highways. Configure a street grid sufficient to accommodate large industrial facilities and truck traffic.

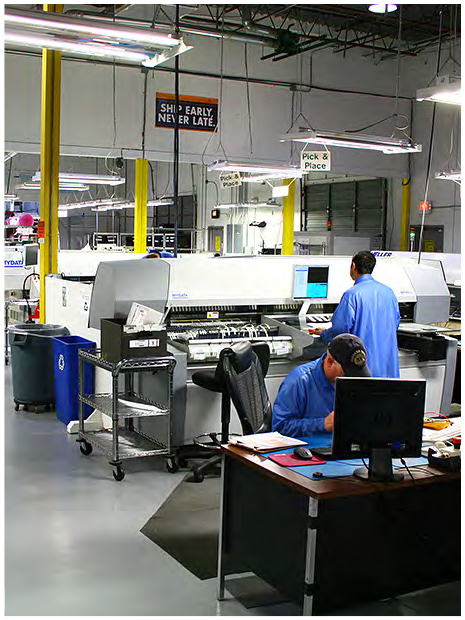
Open Space/Park

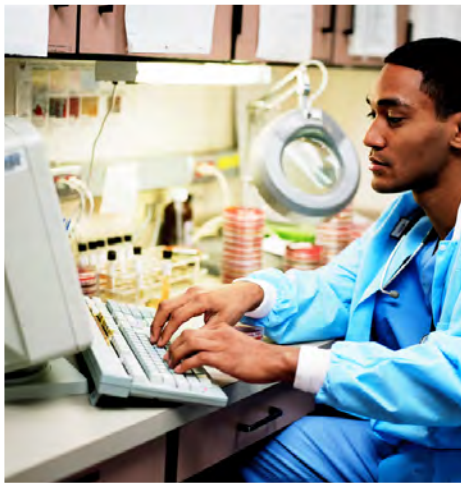
Developed Blocks

Streets

Defining Features

1. Configure a street grid and roadway design of a width and layout sufficient to accommodate the safe and efficient circulation and access of a high volume of large-truck traffic.
2. Develop sites to accommodate large storage buildings and large paved areas required to facilitate the on-site maneuvering and loading of tractor trailers.
3. Utilize sustainable best practices to mitigate negative environmental impacts.





Defining Features

4. Locate Industrial Hubs near major highways and commercial rail lines to provide fast and convenient freight access. Avoid mixing industrial traffic with quieter neighborhood placetypes.

5. Integrate "water-wise" practices including water-efficient fixtures, native landscaping, water efficient streets-capes and medians and low-impact development BMPs.

6. Identify opportunities for joint nonpotable cooling water reuse.

7. Use attractive and durable architecture and landscape to help maintain the value of industry hubs over time.

Aurora Placetypes

Buckley Space Force Base

The continued success and viability of Buckley Space Force Base is a critical priority to Aurora.

Buckley Space Force Base (SFB), host unit of the 460th Space Wing, includes all areas directly involved in base operations. Buckley SFB is a United States Space Force Space Command base that serves more than 92,000 active-duty, National Guard, Reserve, retired military personnel, contractors, and other related tenants throughout Colorado's Front Range. Buckley SFB has air operations, space-based missile warning capabilities, space surveillance, communications operations, and support functions. The base contributes an estimated $2.6 billion annually to the local economy.

Buckley SFB is the most unique placetype as it essentially functions like a town unto itself with residential uses and all necessary commercial uses, including restaurants, retail and services, in addition to its core military functions. Residential uses are prohibited in key adjoining areas, and a range of uses are prohibited below flight paths. Noise mitigation measures are required for new buildings in a large area around the base. The city continues to partner with Buckley SFB to maintain a compatible use buffer adjacent to the base through open space protection and development restrictions.The continued success and viability of Buckley Space Force Base is a critical priority to Aurora.

Primary Land Use

- Buckley Space Force Base
- Light Industrial
- Heavy Industrial
- Office

Supporting Land Use

- Multifamily Residential
- Commercial Retail
- Commercial Service
- Parks and Open Space

Street and Open Space Network

Open space acquisitions protect the base from urban encroachment and buffer surrounding neighborhoods.While the base itself is fairly self-contained, access to the base by employees is important.

- Open Space/Park
- Developed Blocks
- Streets

Defining Features

1. Encourage development of commercial or supporting services near the base to serve people that work or live on the base.
2. Work with Buckley SFB to mitigate its impacts on the surrounding neighborhoods, including noise pollution, air quality and visual appearance.
3. Upgrade public transportation routes to improve access to the base.
4. Support or collaborate on water conservation measures in partnership with Buckley SFB.
5. Continue to collaborate with Buckley SFB to buffer the base from urban encroachment.

Aurora Placetypes

Urban Green Space

Regionally significant areas of nature environments and developed parks define the Urban Green Space placetype.

Various forms of green space are integrated into all placetypes as supporting elements. What defines the Urban Green Space placetype is the regional importance, connectivity and scale of these signature parks, trails and open space assets. Aurora's Urban Green Spaces include large areas, such as the Plains Conservation Center and Aurora Reservoir, and smaller ones, such as Quincy Reservoir and the undeveloped land adjoining Aurora's major creeks and drainage ways. They include undeveloped areas with significant ecological value as well as programmed parks accommodating passive and active recreation, both of which may also function as stormwater-management facilities.

The Urban Green Space placetype is largely defined by three land uses: parks, trails and open space. These uses may be of many types, from developed and programmed parks, to protected natural areas. Recreational facilities, services and programming of green spaces activate these public gathering places.

Primary Land Use

● Parks and Open Space

Supporting Land Use

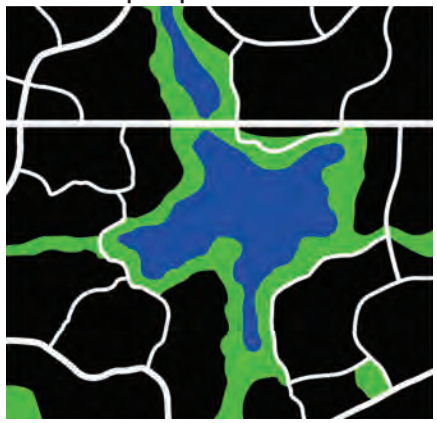
○ Community Garden

Mobility in Urban Green Spaces

The Urban Green Space placetype is dominated by large community parks, habitat preserves, major greenway corridors, and active recreation fields. While many of these properties are used by local residents, larger destinations, such as the Aurora Sports Park, Plains Conservation Center, Aurora Reservoir, and others, draw visitors from beyond the immediate area and require higher levels of access through driving, biking, walking, and transit.

The trails system is also a critical primary circulation network for park users, neighborhood residents, and even commuters. Trails supplement the on- and off-street pedestrian and bicycle networks, so connections between these facilities and the larger mobility network are important to consider in planning and design.

Freight traffic, with some exceptions (such as maintenance and events logistics), is typically restricted from these places.



Street and Open Space Network

Parks, trails, and open space amenities are highly valued by local residents, attract visitors to the community, and supplement connectivity throughout Aurora.

Open Space/Park
Streets
Developed Blocks
Water

Defining Features

1. Locate Urban Green Spaces within walkable distances of all neighborhoods to provide opportunities for all of Aurora's residents.
2. Establish recreation opportunities throughout the city with playgrounds, sports fields and large open spaces.
3. Preserve significant wooded areas, grasslands, and waterbodies to help enhance environmental services and Aurora's natural beauty.
4. Consider the impact of non-local traffic in adjacent neighborhoods when building parking lots and access points for community parks and promot less environmentally-hazardous forms of transportation.

Defining Features

5. Connect residents to parks and open spaces through a comprehensive network of trails, parks, bicycle routes and sidewalks. Where appropriate, install streets and bus routes on green space edges for public views and access.

6. Buffer creek and drainage corridors to protect private property from flood or erosion hazards, as well as to preserve opportunities for trails and recreation.

7. Activate Urban Green Spaces for community gathering places through well-maintained facilities and engaging programming.

8. Use water-wise practices, including limiting turf to active recreation uses, xeriscaping and identify opportunities for nonpotable water supply.

Aurora Placetypes

Original Aurora

Original Aurora is a traditional city neighborhood that retains its character, diversity and form, even as it continues to evolve.

Original Aurora, the city's first neighborhood, is characterized by a street grid, commercial corridors, established residential areas and an active arts district. It represents traditional neighborhood development. It includes East Colfax Avenue, a major commercial and transit corridor connecting the Anschutz campus to central Denver, and the emerging Westerly Creek area, anchored by the Stanley Marketplace.

The city seeks to maintain and strengthen the traditional character of Original Aurora, targeting reinvestment through infill, redevelopment and adaptive reuse. The Colfax, Dayton, and Montview corridors offer a growing mix of restaurants, retail, entertainment and services.

The predominantly residential portions of the neighborhood offer a balanced mix of housing options and convenient, neighborhood-scaled services for residents. Tree canopy should be improved to benefit this placetype.

Arts venues, civic buildings and dining and entertainment options in the Arts District reinforce the area's tradition as a gathering place for the community and visitors. Mixed-use development along key corridors can help support the neighborhood, adding a new dimension of vitality to the area, and stimulating entrepreneurial growth and jobs. A walkable network of streets and ample transit service offer mobility options throughout the placetype.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

Supporting Land Use

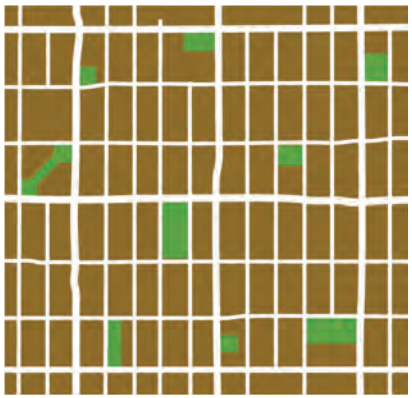
1885

Mobility in Original Aurora

In mixed-use placetypes like Original Aurora, streets function as civic rooms–slow, tightly-gridded corridors that prioritize walking, cycling, frequent transit, deliveries and rideshare pick-ups. A fine-grained street grid and shared plazas promote easy "door-to-door" connectivity of all modes for public gatherings.

As Aurora embraces more mixed-use, walkable development, street designs must integrate multimodal infrastructure for safe and convenient access for people walking, biking or riding transit. While this placetype will not experience as much new development as others, road improvements should encompass parts of Original Aurora, and should facilitate transportation into other placetypes from this one.



Sidewalk improvements are a focus for this part of the city, where many are missing and existing ones may not meet accessibility standards. Enhancing these facilities to meet contemporary standards and user needs is a priority.

Original Aurora is home to many households that are especially transit-reliant and may not have other options to accessing jobs, schools, shopping, and services. Ensuring safe, convenient access to frequent, reliable transit services in the area are critical in serving this community.

Freight movement, which is not prioritized in mixed-use settings, must compete with other curbside needs, especially in these placetypes. The city has introduced Transit-Oriented Development (TOD) and Original Aurora (OA) zoning districts and development standards and should continue to evolve standards to facilitate compact, mixed-use development along transit priority corridors. Mixed-use areas are highly suitable for high-frequency transit on the primary network.

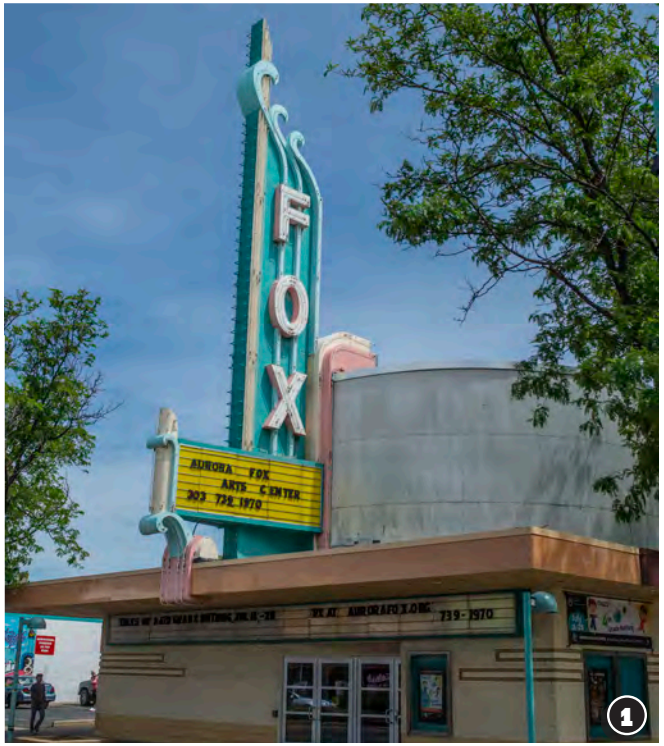
Street and Open Space Network

Maintain or re-establish the traditional street grid network to maximize connectivity throughout the neighborhood.

Open Space/Park

Developed Blocks

Streets



Defining Features

1. Blend new residential and mixed-use developments with the mid-20th-century commercial storefronts and residential areas.
2. Preserve, improve and augment existing housing stock retaining community character while encouraging investment and upgrading homes to meet current household and homebuyer preferences and codes.
3. Support thriving cultural, restaurant, and entertainment scenes by creating gathering places, like Stanley Marketplace and Arts Districts, that serve residents, Anschutz campus employees, arts patrons and visitors.
4. Strategically employ landscape features, including street trees, to highlight Original Aurora's grid system and improve the appearance, air quality and general health.

Defining Features

5. Augment MLK Jr. Library and Fletcher Plaza as a center of community events and gathering, public services and Aurora pride. Actively program events at the library and plaza to supplement activity in the Arts District and entertainment corridor.

6. Improve walking and bicycling connections throughout the neighborhood, including widening sidewalks and upgrading street crossings where necessary to meet ADA standards.

7. Protect and highlight Aurora's unique cultural and historic resources within the neighborhood.

8. Incorporate low-impact development and water quality practices and use appropriate systems to direct rainwater onto green spaces.

Aurora Placetypes

Established Neighborhood

Established Neighborhoods are predominantly residential, but supported by retail, services, multifamily and office uses along perimeter streets and intersections.

The Established Neighborhood placetype is characterized by predominantly residential areas with a variety of unit types, such as single-family detached and attached, and multifamily, typically constructed between 1950 and 1990. This placetype often deviates from the traditional grid pattern of streets with more curvilinear pattern. Although primarily residential, this placetype may also support smaller-scale retail, services and offices uses located at intersections or along major perimeter streets.

Established Neighborhood primary land uses include: single-family detached and attached and multifamily residential of various densities, along with schools, parks and religious institutions. Supporting uses can include appropriately-scaled and located restaurants, retail, commercial services, community gardens and other neighborhood-serving gathering places.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

Supporting Land Use

- ○ Restaurant
- ○ Commercial Retail
- ○ Office
- ○ Institutional
- ○ Parks and Open Space
- ○ Community Garden

Mobility in Established Neighborhoods

In many Established Neighborhood placetypes, Aurora's suburban patterns are apparent in networks for short, calm, wide, often winding networks of local residential streets, connecting to the wider community through limited collector and arterial streets. Adapting these preexisting networks into a more connected, multimodal environment is an important, if not challenging, goal.

Transit access is typically available only at the neighborhood's edges, along major arterial streets, or in more rare cases, along collector streets. Access to transit from the interior of neighborhoods can inconvnient or confusing without thoughtful connectivity retrofits, micormobility options, or adjusted service routes.

Infill redevelopment in established neighborhoods will add more residents, jobs and destinations within the existing urbanized area, often along major arterials and intersections, but some neighborhoods may offer other opportunities for infill or redevelopment in interior blocks. New development offers opportunities to establish or enhance the connectivity between blocks and to the shopping, services, and transit at the neighborhood's edge.

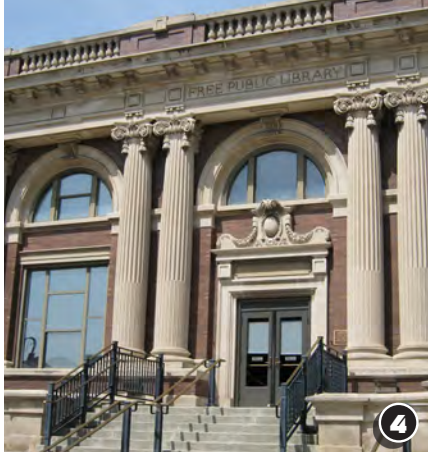
Street and Open Space Network

These neighborhoods typically feature complex curvilinear streets. Established Neighborhoods should feature convenient, safe and protected bicycle and pedestrian routes throughout the neighborhood that connect to adjacent placetypes.

Open Space/Park

Developed Blocks

Streets



Defining Features

1. Appropriately connect Established Neighborhoods to surrounding placetypes of all kinds with convenient, safe, highly protected and attractive bicycle and pedestrian routes.

2. Pioritize single-family detached and attached housing to establish the character of this placetype. Multifamily housing is another accepted housing type in Established Neighborhoods but is not as prominent and is often located along main streets or the edge of neighborhoods.

3. Locate full-service grocery stores and personal services in areas that are conveniently accessible from Established Neighborhoods to for healthy foods and daily needs. Enhance pedestrian, bicycle and transit access to these important services.

Defining Features

4 Develop neighborhood gathering places, such as schools, parks, recreation centers and religious institutions, as many community events are centered around their activities.

5 Integrate "water-wise" practices including water-efficient fixtures streetscapes, and medians, alongside native landscaping and low-impact development BMPs.

Aurora Placetypes

Emerging Neighborhood

Emerging Neighborhoods offer opportunities for Aurora to redefine itself through appealing, connected, and complete neighborhoods.

An Emerging Neighborhood placetype is a newer largely residential neighborhood in previously undeveloped areas. Such neighborhoods have typically been built in the past 25 years, and present diverse neighborhood choices. This placetype includes residential subdivisions that are complete neighborhoods of mixed housing types and pedestrian and bicycle infrastructure. They are walkable and well-connected internally and externally, integrating highly accessible parks and open space.

This placetype is similar to Established Neighborhoods with some important differences. These neighborhoods offer a mix of housing types at various densities. Restaurants, retail and commercial services support residential uses in this placetype and should be conveniently connected and accessible to the neighborhood's residents. Other supporting uses are institutions and gathering places. Commercial uses should be located along main or perimeter streets rather than within primary residential areas.

Primary Land Use

- ● Single-Family Detached Residential
- ● Single-Family Attached Residential
- ● Multifamily Residential

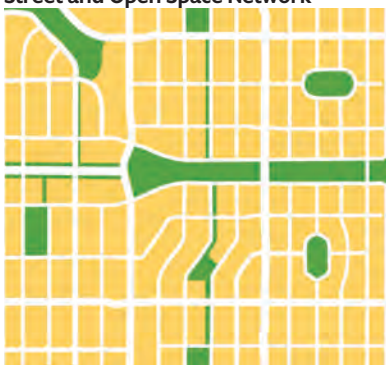
.

Mobility in Emerging Neighborhoods

IUnlike more 20th Century suburban development patterns, neighborhoods in many Emerging Neighborhood placetypes provide an opportunity to build int walkability, connectivity, and mobility convenicne from the inital design.

Transit access is typically available only at the neighborhood's edges, along major arterial streets, or in more rare cases, along collector streets. Access to transit from the interior of neighborhoods can inconvnient or confusing without thoughtful connectivity retrofits, micormobility options, or adjusted service routes.



Emerging neighborhoods will add more residents, jobs and destinations within the existing urbanized area, or outlying areas, often along major arterials and intersections, but also within neighborhood centers and activity nodes strategically place in interior blocks. New development offers opportunities to establish the connectivity between blocks and to the shopping, services, and transit within these neighborhood centers and active corridors.

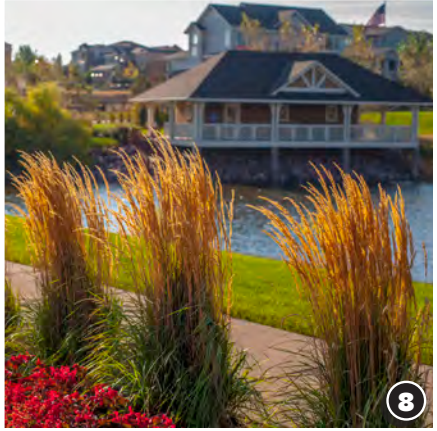
Street and Open Space Network

The street pattern should balance vehicle, bicycle and pedestrian connectivity. Design new neighborhoods around a central organizing or gathering feature, such as a park.

Open Space/Park

Developed Blocks

Streets



Defining Features

1. Place supporting retail, restaurants, commercial services and small offices along main streets or perimeters of neighborhoods. These supporting uses should be directly accessible from the residential areas of the neighborhood by drivers, pedestrians, bicyclists and transit riders.
2. Intersperse a variety of housing types, sizes and prices throughout the neighborhood. Higher-density multifamily units should be located on main streets or along neighborhood edges, yet still be integrated into the neighborhood street pattern.
3. Design new neighborhoods around a central organizing feature, such as a park, natural feature, school, or other neighborhood gathering place.
4. Install ADA-compliant sidewalks, crosswalks, and lighting, that help residents safely traverse their community.

Defining Features

5. Design a street pattern that balances traffic flow with pedestrian and bicycle connectivity, convenience and safety. Limit cul-de-sacs and dead ends and provide multiple connections to main streets and adjacent placetypes.

6. Integrate water-wise practices including water-efficient fixtures, native landscaping, water-efficient streetscapes and medians and low-impact development BMPs.

7. Limit turf to low-water varieties, and only in active recreation areas.

8. Encourage incorporation of nonpotable water systems in new development where appropriate and feasible.

Aurora Placetypes
City Corridor

The City Corridor's focus is commercial activity along the main street, with connected mixed residential types supporting this vibrant district.

City Corridors are a placetype that will contribute to the economic and fiscal success of the city. They are centered along the city's major roadways, home to a wide range of uses, including commercial, retail, institutional, service and some residential. This placetype is generally auto-oriented, but also accommodates pedestrians, bicyclists and transit service. City Corridors should include amenities such as sidewalks, crosswalks, benches, lighting and landscaping that make it easy for pedestrians to safely and comfortably navigate.

Green space is typically limited within this placetype, but outdoor gathering areas–like pocket parks, common greens and plazas–enhance the experience. Integration of these amenities varies among the City Corridors throughout Aurora. The focus of the City Corridor placetype is commercial activity: its primary uses include restaurants, retail, and commercial services. Office and institutional uses are secondary, allowing for the development of mixed-use projects. Single-family attached residential is a secondary use appropriate in areas not prioritized for commercial development.

Primary Land Use

- Multifamily Residential
- Restaurant
- Commercial Retail
- Commercial Service

Supporting Land Use

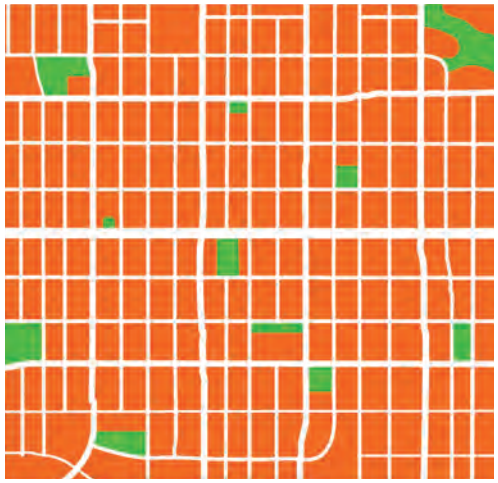
- Single-Family Attached Residential
- Office
- Institutional

Mobility in City Corridors

In commercial placetypes like City Corridors, streets act as access spines, moving cars efficiently along arterials along with major transit routes. Pedestrian and bicycle access has historically been under-prioritized in these car-dominated enviorments.

The retail, services and restaurant industries are undergoing an evolution, given the contnued growth and popularity of online shopping, "pick up" retail and restaurant service, and post-Covid household habits. Furthermore, due to housing demand and the city's efforts to provide more mixed-use areas, more non-retail and service uses are being introduced into City Corridors.

These realities have influenced who, how, and why people access City Corridors, and mobility options need to evolve to meet these new patterns and preferences.



Main Streets in these areas should prioritize the greatest mix of walking, biking, transit, and driving access - even as temporary event or community spaces. Arterial and collector streets must still serve drivers, but should evolve into more organized, interconnected networks and better integrate and improve crossings, sidewalks, and pedestrian and bicycle facilities.

Curbside management for a mix of retail, service, and residedntial uses should be thoughtfully planned. Freight deliveries to and from commercial properties should take into account current and evolving retail habits These mixed-use areas are good hubs for micromobility services and will be essential in spreading and supporting multimodal success.

Street and Open Space Network

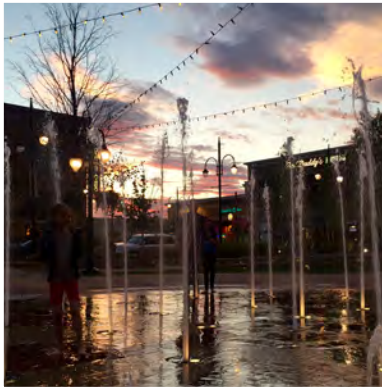
Design a street network along the primary commercial corridor to provide access for area residents and visitors to the area. Provide safe and convenient access to businesses by drivers, pedestrians, bicyclists and transit users.

Open Space/Park

Developed Blocks

Streets

1898



Defining Features

1. Wherever possible, front commercial buildings along primary streets to ensure visibility and accessibility. Avoid street frontages dominated by parking lots or buildings set back large distances from the street
2. Use single-family attached units where the City Corridor abuts a residential placetype to promote an appropriate transition between the two placetypes.
3. Develop a road network along the City Corridor to provide quick and easy access to businesses for drivers, cyclists, transit riders and pedestrians.
4. Reposition or redevelop aging or obsolete shopping centers to more effectively compete in current and future retail markets, and deliver goods and services to the local community.

Defining Features

5 Design centers around a central organizing feature or gathering space, like a common green or plaza, promenade, natural feature, or other shared space. Programmed common spaces surrounded by active uses and buildings attract or retain customers and convey a sense of community.

6 Incorporate drainage swales, rain gardens, xeriscaping and water-efficient streetscapes and medians.

7 Size primary parking lots for typical and reasonable demand and provide for peak parking in overflow areas away from primary street frontages. Promote shared parking opportunities.

Aurora Placetypes

Commercial Hub

Commercial Hubs center activity that supports adjacent neighborhoods with shopping, services, entertainment and community life.

Commercial Hubs are critical to Aurora's future economic and fiscal health. This placetype's uses are primarily goods and services for nearby Established and Emerging Neighborhoods, but it also serves other adjacent placetypes. This placetype is characterized by shopping centers and clusters of compatible businesses. It may be located along the city's corridors, often at the intersection of two arterial streets. These hubs vary in size and density, but are larger than neighborhood-scale. These centers should be improved by better connecting them to surrounding neighborhoods and establishing broader arrays of services and experiences.

The Commercial Hub's primary uses are retail, commercial service and restaurant. They are important employment centers. Smaller community parks, trails, plazas, common greens and outdoor areas facilitate social gathering spaces as well. The Commercial Hub should serve multiple nearby neighborhoods. Transit, pedestrian and bicycle connections should safely and conveniently link this placetype to others.

Primary Land Use

- ● Restaurant
- ● Commercial Retail
- ● Commercial Service

Supporting Land Use

- ○ Single-Family Attached Residential
- ○ Multifamily Residential
- ○ Office
- ○ Institutional

Mobility in Commercial Hubs

In commercial placetypes like City Corridors, streets act as access spines, moving cars efficiently along arterials along with major transit routes. Pedestrian and bicycle access has historically been under-prioritized in these car-dominated enviorments.

The retail, services and restaurant industries are undergoing an evolution, given the contnued growth and popularity of online shopping, "pick up" retail and restaurant service, and post-Covid household habits. Furthermore, due to housing demand and the city's efforts to provide more mixed-use areas, more non-retail and service uses are being introduced into City Corridors.

These realities have influenced who, how, and why people access City Corridors, and mobility options need to evolve to meet these new patterns and preferences.

Main Streets in these areas should prioritize the greatest mix of walking, biking, transit, and driving access - even as temporary event or community spaces. Arterial and collector streets must still serve drivers, but should evolve into more organized, interconnected networks that better integrate and improve crossings, sidewalks, and pedestrian and bicycle facilities.

Curbside management for a mix of retail, service, and residedntial uses should be thoughtfully planned. Freight deliveries to and from commercial properties should take into account current and evolving retail habits These mixed-use areas are good hubs for micromobility services and will be essential in spreading and supporting multimodal success.

Street and Open Space Network

Connect Commercial Hubs to surrounding neighborhoods with safe and convenient pedestrian and bicycle connections. Improve street crossings to enhance walkability.

- Open Space/Park
- Developed Blocks
- Streets

Defining Features

1. Include medium- or high-density housing to expand the local customer base. Use mixed-use buildings to create an active and diverse experience.
2. Provide a wide range of neighborhood-serving retail uses, such as a pharmacy, grocery store, home goods, personal services and restaurants, among others.
3. Celebrate and promote local businesses owned by diverse populations from adjacent residential neighborhoods in the Commercial Hub.
4. Locate Commercial Hubs at the intersection of two arterial streets to be more accessible to the neighborhoods they serve, particularly by public transit.

Defining Features

5. Incorporate drainage swales, rain gardens, xeriscaping, water-efficient streetscapes and medians and nonpotable water systems in new development.

6. Connect Commercial Hubs to surrounding neighborhoods with safe and convenient pedestrian and bicycle connections. Improve street crossings to enhance walkability.

7. Design centers around a central organizing feature or gathering space, like a common green, plaza, promenade, natural feature or other shared space. Programmed common spaces surrounded by active uses and buildings attract or retain customers and convey a sense of community.

CONNECTING PLACES

Chapter 4 describes the placetypes that serve as the building blocks for Aurora, but the city is more than just a collection of individual locations. Aurora is a connected community of people and places working together to create a cohesive and connected community.

This chapter identifies the policies, infrastructure and external organizations that help shape and define the varied places that make up the city. These are key components or building blocks of how the city grows, the quality and experience of different placetypes and how different parts of the city are integrated and connected to each other.

Aurora is an intersection of people and places working together to create a cohesive and connected community.

Places are physically connected by the streets, sidewalks, open space, waterways, rail, trails and utilities that serve them. Residents and visitors rely on a safe and convenient way to move throughout the community–from home, work and school to shopping, services and entertainment. Likewise, businesses need an effective mobility network to move both people and goods. Cost-effective, efficient and reliable utilities are essential to all activity in Aurora. The community is also connected through a network of city services, including parks, public safety, recreation facilities, transit and libraries. Shared assets, highlighted by public art, distinct neighborhoods, historic places and cultural events, also work together to create a cohesive community.

The local economy links all parts of Aurora, and joins the city with the rest of the region. Private-sector investment is often based on factors beyond municipal boundaries or individual properties. Employers consider many factors in locating their operations, including the availability of skilled local workforce, convenient access to the region's transportation network, desirable neighborhoods for their employees and vibrant mixed-use districts to locate their facilities. No single placetype can meet all of these needs, but the network of places Aurora offers can. A strong local economy is defined by the network of people and places within a community.

1906

CITY FORM

Each neighborhood has its own unique population and needs.

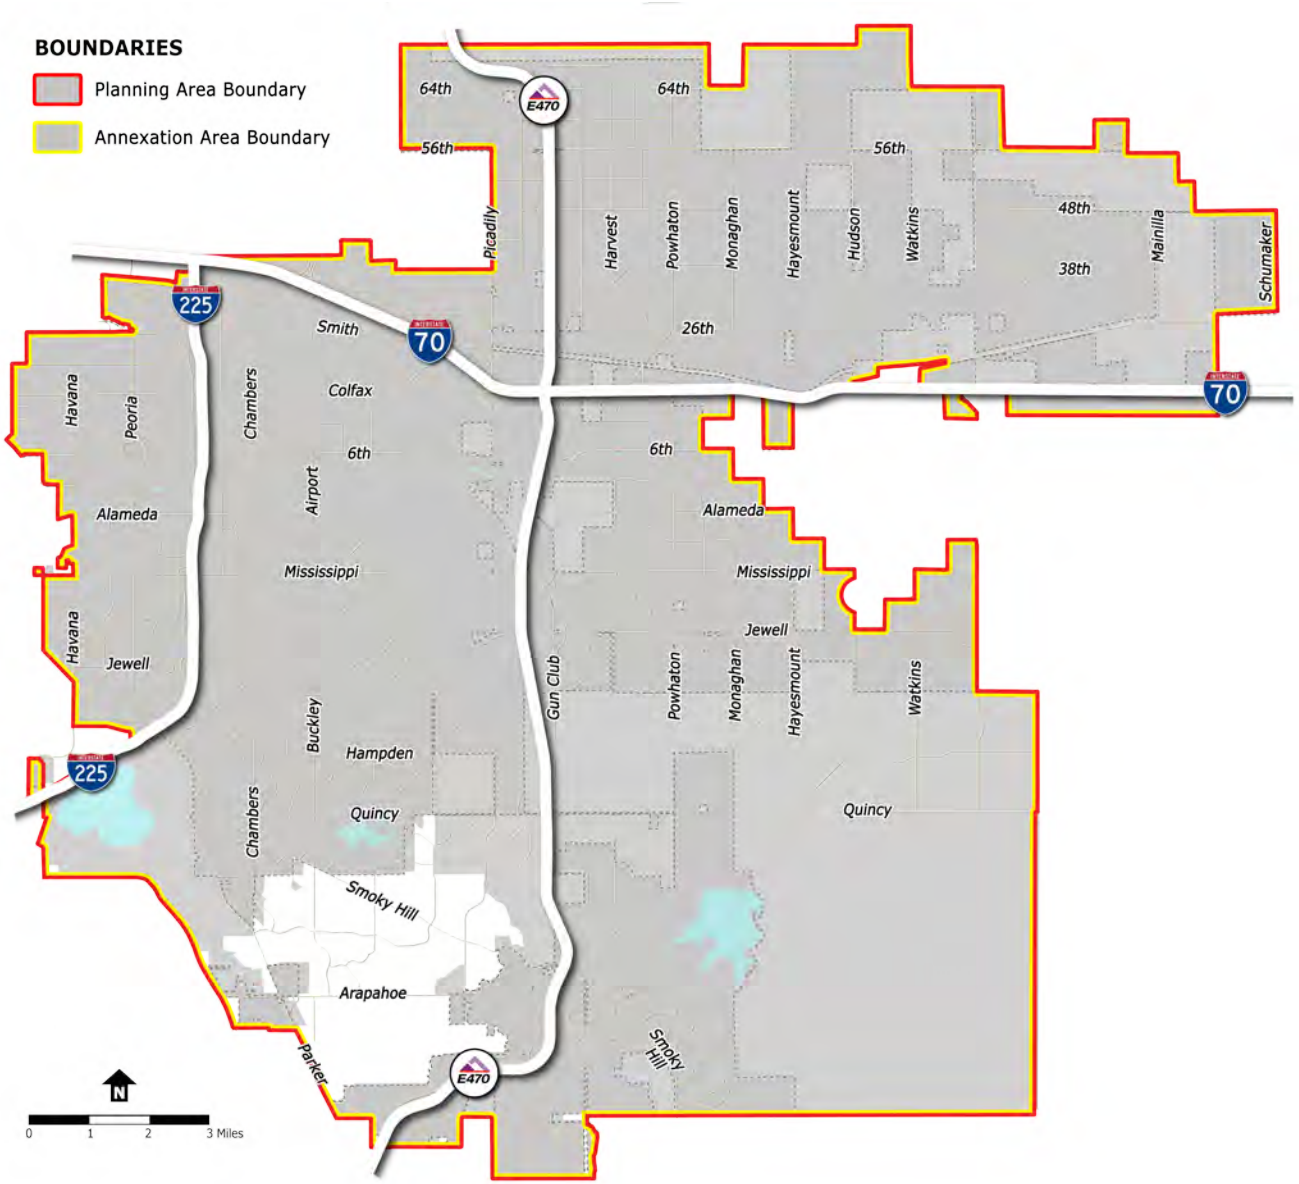
Aurora was founded in 1891 as the town of Fletcher on four square miles of prairie bounded by Yosemite and Peoria Streets and Sixth and 26th Avenues. The beginnings of a water system and 14 new brick homes made up its earliest neighborhood. Much of Aurora is located on prairie grasslands with few topographic or natural obstacles to development. As a result, the city has expanded substantially to the east and southeast over the last few decades.

Over the decades, Aurora has grown to encompass 163.5 square miles although significant areas are still undeveloped. The city provides adequate and sustainable public services and infrastructure to these areas of future development, most of which are on the city's eastern edge. The city's future revenue, cost to provide services and long-term maintenance, among other impacts, is greatly affected by how the areas are developed. Planning for this development is vital for balancing the costs of providing these essential services with the continuation of the city's and region's projected growth.

Neighborhoods

Aurora's neighborhoods have diverse forms, from the traditional urban blocks in Original Aurora and the winding streets of central Aurora's more suburban neighborhoods, to the golf courses and hilltop views of the city's southeastern neighborhoods. As Aurora continues to develop, new neighborhoods and urban mixed-use districts will further diversify the options available to current and future Aurora residents. There is a great opportunity for each neighborhood to take on its own image and identity.

Each neighborhood has its own unique population and needs. Neighborhood-level planning can help address the service and development needs of its residents by engaging them in the development process and creating conversation to determine their vision and priorities.



Planning and Annexation Boundaries

The city has traditionally built its Comprehensive Plan around a geographic area referred to as the "Planning and Annexation Boundary". This boundary encompasses the area within the city's municipal city limits as well as select and adjacent land outside of the city limits. Aurora's boundaries, particularly on the eastern edges, are not always coherent and substantial acerage lies between city boundaries. The city has an interest in planning for ordered and wells-erved development in these outlying areas.

Property within the boundary is eligible to be considered for future annexation, in accordance with all applicable city codes and state laws. City Council will consider whether to approve such annexation requests based on its established procedures and policies on a case-by-case basis.

The Aurora Places Comprehensive Plan, including this Planning and Annexation Boundary, and all applicable plans, policies, and codes included by reference within the plan, or otherwise adopted or approved by the City of Aurora, are intended to meet therequirements of Colorado Revised Statutes (C.R.S.) 31-12-105(1)(e).

This map is current as of 03/01/2026. For an official or updated map, please visit the City of Aurora Maps Library or contact the Planning and Development Services Department.

REGIONAL GROWTH AND DEVELOPMENT

Aurora will play an instrumental role in achieving regional goals and participating in regional benefits.

The Denver-Aurora-Lakewood metropolitan region has a long history of cooperation and coordination regarding regional growth and development and has experienced unprecedented change in recent years. The region has been among the nation's fastest growing, with the population increasing from 2.1 million in 2000 to 2.7 million in 2016. This expansion has brought opportunities and challenges to its metro-area communities.

While rapid population growth can strain local services, transportation infrastructure and housing, it also presents opportunities for cities to offer a greater diversity of jobs, neighborhoods and experiences to both current and future residents. Rapid growth presents both challenges and opportunities for regional coordination.

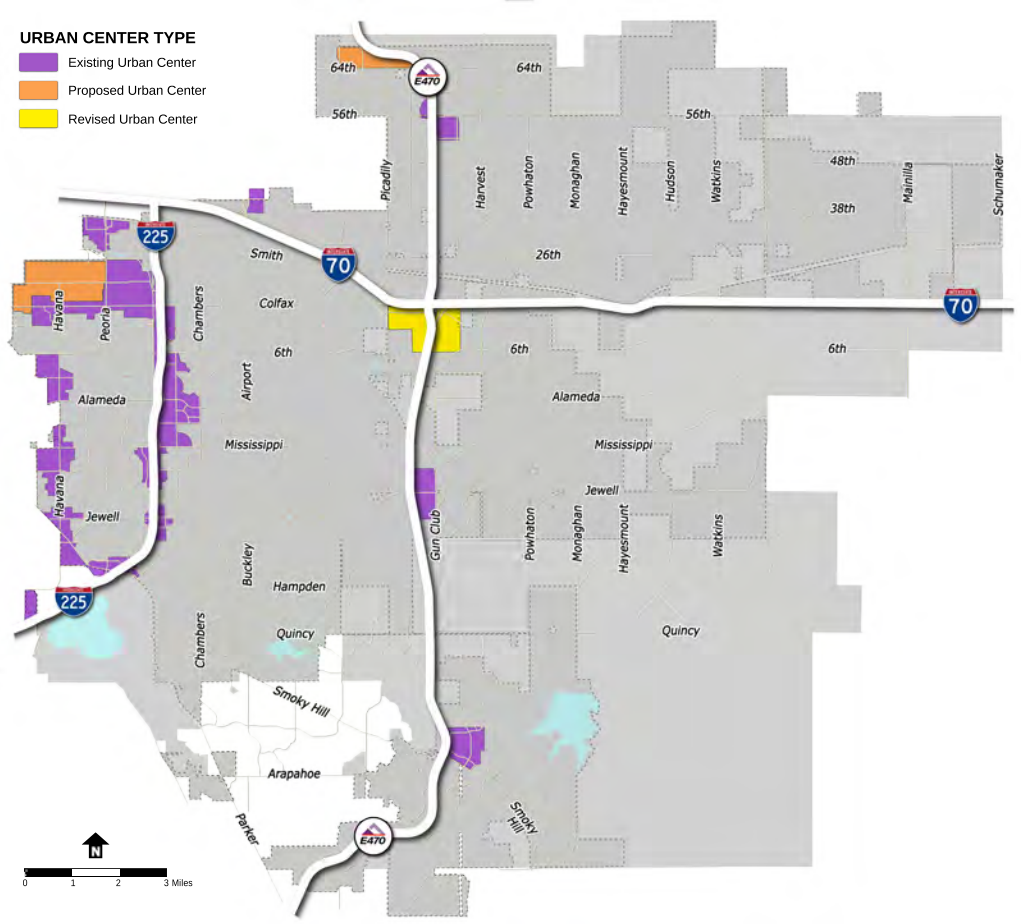
Aurora is the region's second largest city (374,154 people), home to 133,595 jobs spanning 163.5 square miles. The city recognizes that many future challenges must be addressed through regional cooperation. Aurora will play an instrumental role in achieving regional goals and participate in regional benefits, which can have significant positive impact on the quality of life within Aurora and the metro region.

DRCOG Mile High Compact and Metro Vision

Aurora is a signatory of the Mile High Compact, an intergovernmental agreement to manage and coordinate metro-area growth in accordance with the regional Metro Vision plan. This includes the most recent Metro Vision 2040 plan that the Denver Regional Council of Governments (DRCOG) adopted in 2017. The city reaffirms its support of the Mile High Compact and adopted Metro Vision plan and will continue to serve in influential and leadership roles within DRCOG to provide a leading voice on important regional issues.

The Metro Vision plan describes the future extent of urban development and regional support for efficient use of available land and existing and planned infrastructure, especially on the edges of the metro area. The city will continue to develop ongoing population and employment forecasts to support capital planning and funding programs and use these forecasts to assess the city's appropriate share of regional growth under Metro Vision.

Urban Growth Area



To implement this regional growth policy, DRCOG developed the Urban Growth Boundary/Area (UGB/A) program which periodically allocates growth area to all municipalities and counties in the region. Local jurisdictions designate and manage the specific location of their allocations.

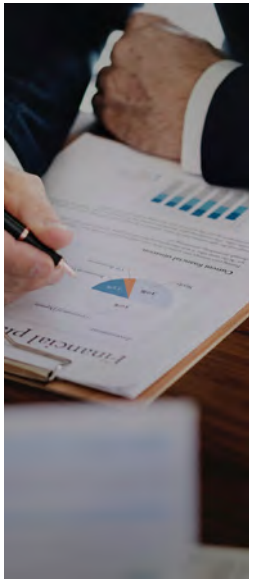
Aurora's undeveloped area is vast, including thousands of acres stretching from Denver International Airport and the Colorado Air and Space Port (formerly Front Range Airport) to Douglas County. The sequence and timing of development of this area is unpredictable, so Aurora has chosen to identify areas of future growth and designate portions of the city's allocation of development under the UGB/A program. In Aurora, this allocation is distributed among nine subareas and is used by property owners on a first-come, first-served basis. The urban growth allocation in the UGA is only considered to have been used when land is subdivided or new construction has occurred.

Designated Urban Centers

DRCOG's Metro Vision plan also describes the "urban centers" concept as a model for healthy, livable communities. These designated centers are intended to feature a multimodal travel network within a mixed-use, urban district with diverse housing, employment and service opportunities accessible without sole reliance on automobiles. Metro Vision establishes a goal of having 25 percent of new housing and 50 percent of new employment in urban centers by 2040. By focusing growth into strategic areas, the city can capitalize on valuable development opportunities and build upon existing transportation networks and infrastructure.

Urban centers are identified by local decision-makers and submitted to DRCOG for formal review and approval. There are currently 18 designated centers in Aurora. The adjacent map shows the city's designated urban centers.

This map is current as of 02/01/2026 For an official or updated map, please visit the City of Aurora Maps Library or contact the Planning and Development Services Department.



City Connections

To create great places in Aurora, it is critical that these systems be well planned and developed.

Chapter 4 identifies the different placetypes that define the development pattern of Aurora. Public systems and networks, including multimodal transportation, parks and open space and water utilities (water, wastewater and stormwater), connect these placetypes. Cultural resources, including libraries, public art and art venues, connect the community through shared culture and pride. To create great places in Aurora, it is critical that these systems be well planned and developed.

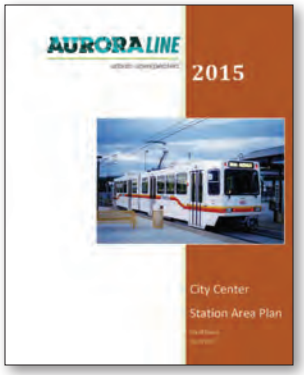
  Florida Station Area Plan, 2011 (Ord. 2011-44)
  Nine Mile Station Area Plan, 2012 (Ord. 2013-01)
  City Center Station Area Plan, 2015 (Ord. 2015-16)
  Fitzsimons Station Area Plan, 2016 (Ord. 2016-40)
  Colfax and 13th Avenue Station Area Plan, 2025 (Ord. 2025-84)



Economic Development System

Building a vibrant, successful local economy is a shared effort and economic development embodies this pursuit.

Economic growth is spurred by all businesses, residents and organizations that bring money into the city of Aurora. Any and all contributors to the economy share resources both intentionally and unintentionally to prosper individually and holistically as a city. As such, they all must work together to create a fully functional economic development system.

Partners and Partnerships

Building a vibrant, successful local economy is a shared effort and economic development embodies this pursuit. More jobs and more investment within a community means more opportunities and increased choices. Economic development practices are growing more comprehensive. It is not only about attracting corporate headquarters, but addressing the growth and expansion needs of existing businesses, engaging with firms across the globe, encouraging entrepreneurship and small business development, supporting the surrounding community as a place for employees and companies to call home, and aligning education and training to meet current and future workforce trends.

Partners with important roles to play in Aurora's economic growth and success include:

- Adams County Economic Development (ACED)
- Adams County Workforce and Business Center
- Arapahoe/Douglas Works! Workforce Development Center
- Aurora Chamber of Commerce
- Aurora Economic Development Council (AEDC)
- Aurora Public Schools
- Aurora-South Metro Small Business Development Center (SBDC)
- Aurora Urban Renewal Authority (AURA)
- City of Aurora
- Colorado Office of Economic Development and International Trade (OEDIT)
- Community College of Aurora and other higher education providers
- Major local employers and institutions, including Buckley SFB and Anschutz Medical Campus
- Public School Districts
- U.S. Small Business Administration
- Visit Aurora

Small Business Development and Entrepreneurship

The SBDC's mission is to help existing and new businesses grow and prosper.

The Aurora Municipal Center is home to the Aurora-South Metro Small Business Development Center (SBDC). The center is one of 14 SBDCs statewide, and serves not only Aurora, but also all of Arapahoe County, portions of Douglas County and southern parts of Jefferson and Adams counties.

The SBDC's mission is to help existing and new businesses grow and prosper. The center offers high-quality, confidential and no-cost, one-on-one consulting with business experts, niche programs and free or low-cost business workshops. The city of Aurora serves as host to the SBDC, offering services five days a week during regular business hours. Additionally, several programs are offered either during the evening or on weekends. In addition to the main office at the Aurora Municipal Center, the Aurora-South Metro SBDC has satellite offices at Innovation Pavilion in Centennial and the Englewood Civic Center.

The SBDC systematically tracks its quality of service through a variety of methods, including citizen evaluations after each consulting session and workshop and evaluating economic impact in terms of jobs created, jobs retained and business starts. Capital formation, contracts awarded, and the involvement with cluster industries like retail, restaurant, energy and bioscience also provide measurement metrics for SBDC.

Aurora uses the resources provided by the SBDC to leverage small business development and expansion and foster vitality in the development of all placetypes.

Redevelopment and Reinvestment

Like many communities that developed substantially since the mid-20th century, Aurora's aging neighborhoods and commercial centers face a growing need for revitalization. Housing, commercial buildings, infrastructure and public facilities are aging and in need of repair or replacement to return those areas to a place of vibrancy and desirability. While most of this reinvestment will come from the private sector, the city has an active role to play in planning, initiating and supporting reinvestment in key areas and projects.

Urban Renewal

This tool is intended to help guide public and private investment toward catalytic development projects.

Urban Renewal is one tool that has been used to address blighted areas by initiating and supporting private reinvestment and redevelopment of aging and obsolete properties and returning them to an active, revenue-generating space. The City of Aurora established the Aurora Urban Renewal Authority to pursue and facilitate redevelopment of blighted and strategically located properties within the city. The authority serves as a governmental entity under state law separate from the city of Aurora. While being a legal entity separate from the city, the authority's board of directors is primarily comprised of the mayor and city council members. Three additional members representing the school districts, county governments and other property taxing entities will likely join the board in the near future to bring it into compliance with current state law.

The authority's mission is to plan for, recruit, promote and support development and redevelopment projects that revitalize blighted, strategic and economically challenged areas, and provide technical assistance and financial resources to make projects viable. Each area has a plan that offers a vision and framework for future development and includes mechanisms by which the Authority will achieve high priority goals, including:

- Pursuit of higher density development and redevelopment within designated TOD areas and urban centers
- Pursuit of redevelopment and revitalization projects within the oldest sections of Aurora
- Enhancement of funding capabilities to better assist small-site, infill development and neighborhood supporting businesses in economically challenged neighborhoods

The authority's primary means of meeting these goals is through the creation of urban renewal and tax increment areas that generate tax increments resulting from increased property tax, sales tax and other local taxes generated from redevelopment activity. As a result of tax increment revenue generation, significant funding can be made available to provide needed public improvements and to help make projects financially viable to the public sector by helping close financial gaps.

Urban renewal areas have been identified and prioritized, with plans to address land use, transportation, infrastructure, recreational facilities and urban design. They are intended to help guide public and private investment toward catalytic development projects. New areas may be established as needs and opportunities arise.

Federally Designed Investment Zones

Aurora is home to a number of federally-designed investment zones under the Enterprise Zone, Foreign Trade Zone, and Opportunity Zones programs. While these are federal programs, the benefits are intended to support local communities, like Aurora. The purpose of these zones is to encourage private investment and job creation.

While the specific function and benefits from these zones are unique to each program, generally these zones aim to attract private investment into targeted areas by offering some type of tax incentive. The zones offer tax credits, deferrals or other benefits to private investors who commit to funding employment growth, real estate projects or infrastructure improvements.

Employment

A skilled and educated workforce is critical to economic growth.

The majority of Aurora's eligible workers leave the city every day to work in another community. Community outreach and research determined that Aurora companies, as well as those outside the city, note that the local skilled workforce does not fully match their evolving business needs. A skilled and educated workforce is critical to economic growth, necessary to attract large-scale, well-paying employers and imperative to diversifying our economy. Significant efforts must be made to expand the city's workforce and retain at least a portion of its existing workers by leveraging its existing businesses, strong industries and other assets.

Targeted Industries

The city and its partners work to attract and expand key industries in order to broaden and deepen the diverse local economy. These businesses may be growth industries with a strong long-term outlook, complementary or support industries to existing job sectors, or emerging industries in which Aurora offers a competitive advantage. However, Aurora's employment is diverse, and opportunities in other sectors will be pursued as well. Targeted industries include:

- Advanced manufacturing
- Aerospace and defense
- Bioscience
- Creative industries
- Healthcare
- Hospitality
- Energy
- Transportation and logistics

Retail Strategy

A robust local retail economy is especially important in a community like Aurora, which receives over half of its revenue from sales and use taxes. Changing consumer preferences, competition from adjacent communities, and continued growth in online shopping will continue to reshape the local retail environment. Identifying growth sectors, marketing the city to the retail community, keeping up with industry trends and encouraging reinvestment in aging retail destinations are part of the city's retail strategy and need to be supported.

The retail sector is constantly evolving. The continued growth of online commerce is reshaping how people shop, with direct impacts on brick-and-mortar stores and the city's tax revenue. Retailers are rethinking the role of their physical stores and in many cases decreasing their footprints and seamlessly connecting their stores with their online services.

As an approach, placemaking adds value to the retail environment. Increasingly, consumers are seeking diverse experiences as part of their shopping preferences, not simply a one-store-and-done trip. Aurora can offer places with unique identity and at various scales–from a bustling "downtown" experience to a neighborhood center that serves as a true gathering place for area residents. Mixing shopping with housing, entertainment, dining, recreation, services, events and employment in a comfortable, safe and conveniently accessible place is a strategy that will draw and keep customers in Aurora.

Education and Workforce Development

An educated and talented workforce is a critical asset to Aurora and essential to a growing local economy.

This talent can either be acquired by attracting educated and trained residents to relocate to Aurora, or it can be "home-grown" by equipping local residents with the skills and certifications needed to compete for stable and well-paying jobs. Aurora's strategy is to pursue both opportunities.

A strong local workforce provides two-fold benefits to the community. A stable and well-paying job is foundational to a family's ability to provide for itself. Many positions in the competitive and changing economy over the next two decades will require both a solid educational foundation and job-specific skills, training or certifications. If residents are able to access appropriate education and training locally, they will be well-equipped to meet the needs of the local job market, and in turn, meet the needs of their own family to rent or purchase a home, purchase everyday goods and services, and provide a stable and comfortable lifestyle.

Secondly, employers need qualified and skilled employees to fill jobs. The strength and stability of the local economy is in large part built upon a company's ability to acquire and retain talented employees to succeed and grow in their industry. Additionally, firms seeking to relocate or expand their operations will weigh their location decisions based in large part on the availability and readiness of the workforce pool available to them in a community.

Education

A strong education system, from K-12 through higher education and career training, is essential to creating a steady and continuous pipeline of talent to local employers and providing opportunities for Aurora residents to earn and maintain stable and well-paying jobs.

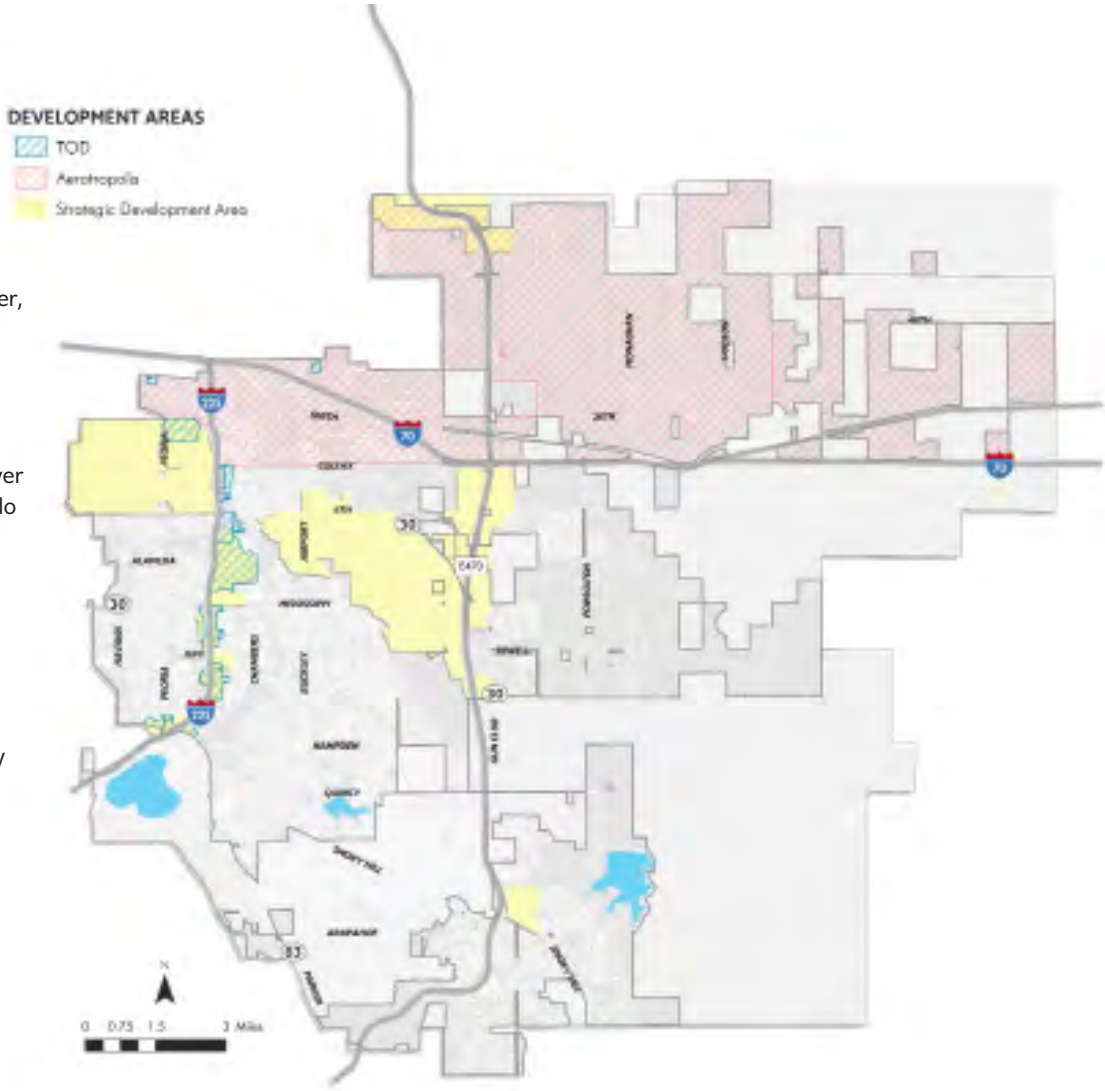
Aurora is served with a continuum of education and training providers. The majority of Aurora is served by Aurora Public Schools and Cherry Creek School District, while small portions of the city fall within the Brighton, Bennett and Douglas County school districts. The Aurora and Cherry Creek districts operate K-12 schools, as well as preschool, charter, magnet, vocational, gifted and talented schools and other support programs. The districts emphasize career and college readiness through concurrent credit courses with the Community College of Aurora and other local colleges, career and technical education opportunities and college preparation resources.

Aurora is also well-served by a variety of higher education institutions. The University of Colorado Anschutz Medical Campus, Pima Medical Institute and Concorde Career College offer a spectrum of medical education and health care training programs. The Community College of Aurora offers a diversity of degree programs at two campuses and online. Pickens Technical College provides classes in variety of fields, including engineering and technology, health, transportation, business technologies and human services. Both CCA and Pickens have associations with Aurora's school districts to provide concurrent education and joint programs.

Aurora is also home to Platt College, Colorado Technical University South Denver Campus and the Ecotech Institute, the first college entirely focused on preparing graduates for careers in the fields of renewable energy and energy efficiency, and other educational institutions.

Workforce Development

Aurora is served by the Arapahoe/Douglas Works! workforce center and the Adams County Workforce and Business Center. Both offer a variety of free services to individual job seekers, including those looking for training or retraining, new employment and employment counseling. Youth programs offer assistance with obtaining a high school diploma or GED, training and support services through the Workforce Innovation and Opportunity Act. The centers also provide services for employers seeking skilled and trained employees through hiring events, job listings, and connecting employees with training and certification programs.



The city cooperates on programs with all these agencies and supports cooperative efforts that improve the economic well-being of Aurora and its residents.

STRATEGIC DEVELOPMENT AREAS

While the city provides services and encourages investment and job creation across the community, Aurora Places identifies locations within Aurora that have been identified as particularly suitable for significant investment or needing ongoing focus and intervention. Each has its own unique conditions, opportunities and challenges to be addressed through a set of strategies specific to the area. Strategic areas include:

- Urban Districts placetypes (City Center, Anschutz/Fitzsimons, I-225/Parker/Havana, Southlands, I-70/E-470, and Gaylord/Far North E-470)
- Innovation Districts placetypes
- Aerotropolis area supported by Denver International Airport and the Colorado Air and Space Port (formerly Front Range Airport)
- Station area transit-oriented development
- Original Aurora, including the Arts District and Colfax Avenue corridor
- Buckley Space Force Base and nearby employment areas

These strategic areas often have additional plans, including station area, neighborhood, transportation or urban renewal plans that outline strategies specific to that area.

Conceptual Rendering of the Space Port
Courtesy HDR in association with Luis Vidal + Architects

AEROTROPOLIS

Aurora's close proximity to the Denver International Airport (DEN), one of the busiest and fastest growing airports in the country, and several main transportation corridors in Colorado, positions it to take advantage of a key opportunity in the region. Furthermore, the future Colorado Air and Space Port (formerly Front Range Airport) offers even more opportunities for transportation, research and development. An aerotropolis, which includes thousands of acres of land on and around DEN in multiple jurisdictions, including Aurora, will demonstrate how collaborative, responsible development enhances Aurora's ability to compete for world-class companies who will create jobs, invest in the community and strengthen the economy.

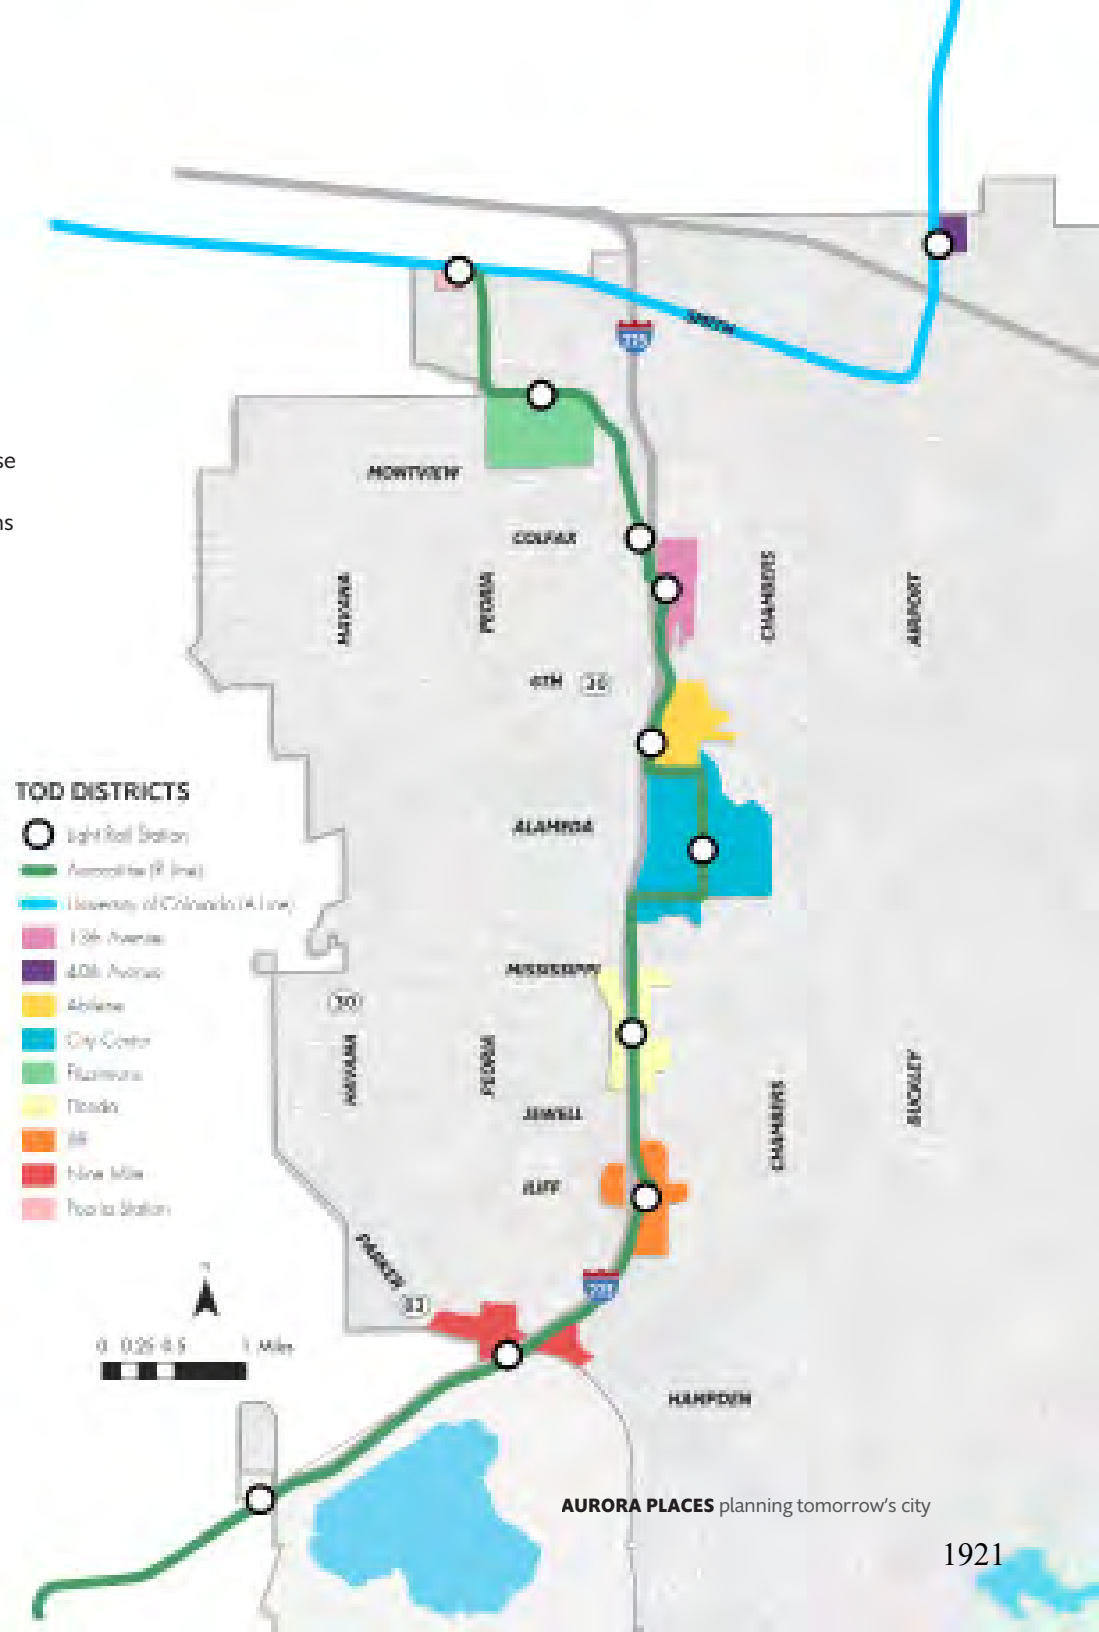
An aerotropolis is a dynamic, urban place in which the layout, infrastructure, and economy center around the airports. An aerotropolis is more than any single development, it is largely characterized by a collection of transportation-linked businesses and supporting industrial and commercial development. However, appropriately-located residential, retail and restaurants will also be included.

Airport-centered development seeks to take advantage of the connectivity and synergy created by the people and industries in the area. Within its boundaries, it will deliver the opportunity for innovation to flourish, drive a forward-looking strategy for important planning, like infrastructure and transportation, and bring together the public and private sectors to grow existing and new industries.

Best Practices

- Develop cooperative partnerships between the public and private sectors, ensuring strategic planning and development.
- Focus on prioritized infrastructure and transportation opportunities that will benefit the area's development..
- Leverage key anchor assets within the aerotropolis' influence areas that are already spurring activity and prioritize catalytic projects that will do the same.
- Continue to support efforts related to the Colorado Air and Space Port. Explore transportation, employment and development opportunities related to the establishment of this unique facility.
- Balance job creation with residential, commercial services and entertainment uses in the area.

Photographs provided courtesy of Denver International Airport.



TRANSIT-ORIENTED DEVELOPMENT (TOD)

The Aurora Line, RTD's R Line, opened service in early 2017, connecting nine stations from Dayton Station in the south to Peoria Station in the north. Two stations on the University of Colorado A Line are located in Aurora, connecting to Downtown Denver and Denver International Airport. RTD's H Line serves four stations: Florida Station, iliff Station, Nine Mile Station and Dayton Station, ensuring important transit connections between Aurora and Downtown Denver. These station areas represent a unique and valuable opportunity for significant investment surrounding transit.

Beginning in 2006, the city initiated planning for the light rail stations in anticipation of transit service and interest from the private sector. These plans are promote TOD by identifying opportunities for compact, mixed-use development that is transit-supportive and to develop public-private strategies to implement a shared vision.

While the plans offer a vision and land use framework that is powerful yet flexible, these plans may be updated as conditions change or opportunities materialize. Adopted station area plans include:

- Nine Mile Station Area Plan
- Iliff Station Area Plan
- Florida Station Area Plan
- Fitzsimons Station Area Plan
- City Center Station Area Plan
- Abilene Station Area Plan
- 40th Avenue and Airport Boulevard Gateway Station Area Plan
- 13th Avenue and Fitzsimons-Colfax Station Area Plan
- Peoria Station Area Plan

This mixed-use, pedestrian-oriented development type is a compact, walkable and bikeable area positioned around a transit station. They focus on providing visibility and accessibility to transit users and connecting them to developments near the transit center. Although varying in size and intensity, this overlay contains higher residential densities; niche retail, dining, and entertainment opportunities; office spaces and service uses; and gathering spaces. Although the mix, intensity, and makeup of uses in this overlay may vary, the intent is to create a condensed mixed-use area that provides a place for urban living, employment and necessary and convenient access to transit, all in a pedestrian-friendly environment.

Transit-Oriented Development (TOD) best practices include:

- Include areas that are within reasonable walking distance (within ½ mile) of transit stations that also include high-quality cyclist connections.
- Provide density and intensity of development that promotes high levels of activity and transit ridership and is appropriate in relation to Aurora's evolving real estate market.
- Integrate public art and creative architecture so that transit-oriented developments have a unique characters.
- Ensure an appropriate mix of housing, employment, entertainment and services focused around gathering places, such as a central plaza or main street.
- Conform development in TOD areas to the adopted station area plans.

Transportation and Mobility System

CONNECTING AURORA MULTIMODAL TRANSPORTATION PLAN

Connecting Aurora is the city of Aurora's first multimodal transportation master plan–a bold, community driven roadmap to create safe, connected, and sustainable multimodal options for everyone, no matter how they travel.

Connecting Aurora creates a vision for the city's multimodal transportation system that serves pedestrians, people using mobility assistance devices, bikes, transit, cars and freight. This vision will guide the planning, design and delivery of future multimodal transportation policies, programs and projects that are based on community values and needs. The plan includes tools, implementation strategies and actions for achieving Aurora's vision to expand mobility choices for safe and seamless movement of people and goods throughout the city.

Connecting Aurora is forward thinking and innovative, and it is fundamentally focused on achieving the stated vision and goals for the city's multimodal transportation system. The plan supports an integrated multimodal transportation system that is safe, convenient, reliable, connected, efficient and sustainable for all. Walking, rolling and biking will be safer and more convenient, and transit will be an attractive way to travel for many more residents and visitors. The plan proposes a street network that preserves and creates unique places throughout Aurora, supporting economic vitality and a high quality of life for people of all backgrounds.

Connecting Aurora will guide the city's transportation investments and decisions that are crucial to actualize the plan's vision, mission and goals. Ultimately, Aurora's strengthened transportation system will support a thriving and competitive city for generations to come.

OUR VISION

Aurora safely connects all people to our places for a healthy, sustainable and economically strong community.

Our Mission

The city of Aurora will provide a complete transportation system to meet the needs of all people. The city will engage the public in the delivery of plans, programs, policies, standards and projects.

OUR GOALS

Our goals represent specific and measurable outcomes for the transportation system, to help us stay focused on actions that help to achieve the vision.

A Transportation System Serving People

Safe

People are safe and feel safe traveling in our city.

Reliable

People can depend on all forms of transportation.

Convenient

People can move around Aurora efficiently and easily.

Connected

People are well-connected to the places they want to go, however they choose to move.

A Transportation System Supporting Overall City Aspirations

Sustainable

Infrastructure and services can be built, operated and maintained at high levels, in a fiscally and environmentally sustainable way.

Economically Strong

The community's economic vitality s supported and enhanced by the transportation network.

Healthy

The community is served by transportation that supports a healthy lifestyle and environment.

A Transportation System Strengthening Community

Authentic

Infrastructure design contributes to the creation of great places and preservation of traditionally unique places.

Equitable

All people have viable transportation choices to mee their needs.

Integrated

People have easy access to a mix of placetypes because land use and transportation are fully integrated.

INNOVATIONS, TECHNOLOGIES AND EMERGING TRENDS

Aurora should prepare for an entirely new era in transportation.

Artificial intelligence and recent innovations in information and communication technologies will significantly impact transportation and travel infrastructure. Aurora should prepare for an entirely new era in transportation. The city should be a regional and national leader in exploring partnership opportunities for potential pilot projects involving autonomous and connected vehicles, data sharing, and other related applied-technology initiatives.

Growth of Shared Mobility

Shared mobility refers to forms of transportation that are shared among users such as transit, taxis, car-sharing, and bike shares.

Transportation network companies (TNCs) like Uber and Lyft have risen in popularity across the country. These services connect people to rides on demand. These services can offer riders with greater convenience and coverage than traditional taxis. Rideshare models have been replicated by public transportation providers when providing service to people with disabilities and in areas with lower population density.

Micromobility, like shared bikes, e-bikes, and scooters, can improve access to Aurora's greater transportation network by allowing people to more easily make first-mile and last-mile connections. These mobility options are often low-cost and can decrease GHG emissions if used in place of a car.

Travel Demand Management

Due to limited financial resources and environmental constraints, it is more difficult and takes longer to add new infrastructure to meet the significant growth in passenger and freight travel demand. Therefore, strategies to manage travel demand are more critical to transportation operations than strategies to increase capacity.

With the advancement of technologies, managing demand should use more comprehensive approaches, beyond merely encouraging single-occupancy vehicle commuters to use carpool, vanpool or public transit for their commute. The focus of contemporary travel demand management (TDM) is to optimize the transportation system performance by providing real-time information on incidents, congestion and weather conditions to all travelers to help them make smart decisions about location, route, travel time and mode.

Impact of Delivery Services and Growth of E-commerce

The increasing use of transportation services like Uber and Lyft, e-commerce, AV self-parking and on-demand delivery is creating increased demand for temporary uses of curb space. Freight movement and the ability of trucks to park and easily deliver goods to businesses is an essential factor for the success of Aurora's economy.

Freight movement must be balanced and prioritized among the competing curbside needs, especially in commercial and mixed-use areas of Aurora. Curbsides can be managed with static signing that designates uses by time of day and day of week, or it can be done dynamically via changeable message signs that define regulations based on various thresholds.

While static signing is predictable for users, dynamic signing provides greater flexibility for agencies to manage curb space based on changing needs.

Electric and Autonomous Vehicles

Electric vehicles (EV) are rising in popularity. As of November 2024, there were more than 156,000 electric vehicles registered in Colorado, making the state a leader in EV adoption. Aurora's current electric vehicle infrastructure lags behind neighboring cities. Aurora has about 240 public charging station ports for EVs, or about one charger for every 1,650 people. This is substantially fewer chargers per capita than Denver (one charger for every 680 people) and Boulder (one charger for every 255 people).

Autonomous vehicles (AV) use radar, global positioning systems (GPS), cameras and light detection and ranging (LiDAR) to partially or fully replace the need for human drivers. The timeline for full AV adoption is unknown; however, some research predicts that by 2035, between 17% and 57% of new passenger cars sold will have some level of autonomy. If deployed strategically, AVs are believed to drastically improve safety on roadways by eliminating human error.

TRANSPORTATION INFRASTRUCTURE AND FISCAL CHALLENGES

Aurora's transportation system is a complex mix of public and private facilities that require maintenance and upkeep, as well as continued investment, to maintain in a state of good repair.

Aurora's population and employment growth, and increasing construction and infrastructure needs require a sustainable and diversified financial approach to support the city's long-term transportation goals. There are several dynamics that challenge the long-term financial investment in the city's transportation infrastructure.

Mismatched Development Patterns

Suburban development patterns common across U.S. cities can complicate how transportation infrastructure is planned, delivered and maintained. Lower-density, car-oriented development often requires more infrastructure, increasing both the upfront construction costs and long term maintenance obligations. When development occurs over time, infrastructure investments may be fragmented, resulting in gaps in connectivity and limited multimodal options.

In Aurora, similarly to other growing communities, transportation infrastructure is frequently delivered in response to development. This tendency can create timing mismatches between when travel demand exists and where infrastructure is built. Incomplete networks, indirect travel routes and delayed improvements can result.

Limited Funding Dedicated to Transportation

While the city does receive transportation funding through regional, state and federal grants, these contributions are relatively modest in comparison to the amount of dollars needed for annual upkeep, new development and retrofit capital improvements, and future maintenance obligations. Aurora primarily funds transportation infrastructure projects through general fund allocations, state Highway User Tax Fund (HUTF) distributions and limited development impact fees.

Aurora's capital program outlays for transportation are low compared to peer cities. Without dedicated funds, the city's CIP relies heavily on general funds and HUTF distributions, both of which are subject to volatility. Outside of development, metro districts, and authorities, Aurora's reliance on general funds and formula funds limits the city's ability to finance large, multiyear projects essential for meeting long-term infrastructure demands. Other large cities in Colorado, while also struggling with infrastructure demand, have made policy decisions to implement supplemental revenue sources to substantially augment transportation funding.

AURORA AS A PLACE-ORIENTED CITY

The Connecting Aurora plan is built upon an Aurora that is a "place-oriented city". This emphasis on a community of great places aims to improve the quality of life for Aurorans by increasing the number of convenient, affordable and safe mobility options. Choice is fundamental to this scenario.

Aurora Places serves as the foundation for this scenario as it emphasizes designing and building the transportation system around what best fits different placetypes.

In addition to making improvements to the city's transportation network, the place-oriented city emphasizes the need to simultaneously concentrate the destinations within and near neighborhoods so that people can access daily destinations within a short walk, bike ride, transit ride or car trip. In this scenario, the city of Aurora makes significant investments in walking, biking and transit infrastructure with a focus on making these modes of transportation safer, more connected and more accessible.

The Place-Oriented City uses land efficiently and productively. It balances providing opportunities for parking with opportunities for additional shops, services, parks and other land uses, within and near neighborhoods so that people can access daily destinations within a short walk, bike ride, transit ride or car trip.

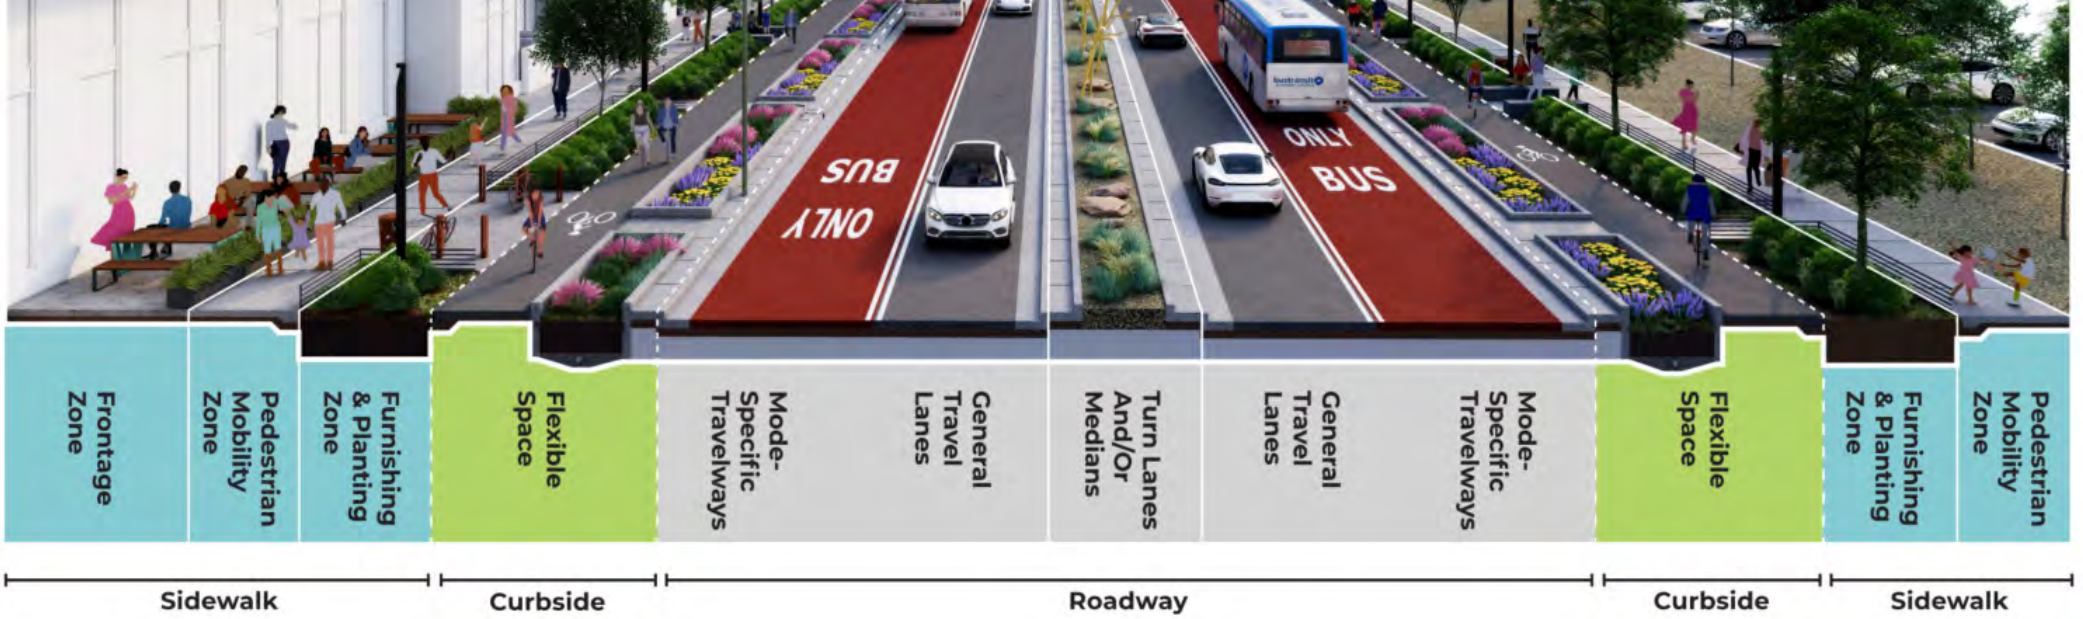


Illustration of common complete streets concepts and features. Refer to city codes for applicable design standards.

COMPLETE STREETS FRAMEWORK

Aurora will develop and implement a "complete streets" framework to support Connecting Aurora's vision and reinforce the city's commitment to inclusive mobility, public health, sustainability and community vitality. It will help ensure that Aurora's transportation investments contribute to a connected, multimodal street network and enhance public space.

The framework will integrate multimodal principles into the fabric of transportation decision-making–from initial planning to long-term maintenance. Its purpose is to safely connect all people, whether they walk, bike, roll, drive or ride transit, to the places they live, work and play.

Establishing Modal Priority

The framework will define modal priority and coordinate with street types and placetypes to account for the surrounding context while maintaining consistency for users. This will allow the city to tailor multimodal features and curbside amenities according to corridor type and community input. This approach will ensure strategic trade-offs and investments align with corridor function and community goals.

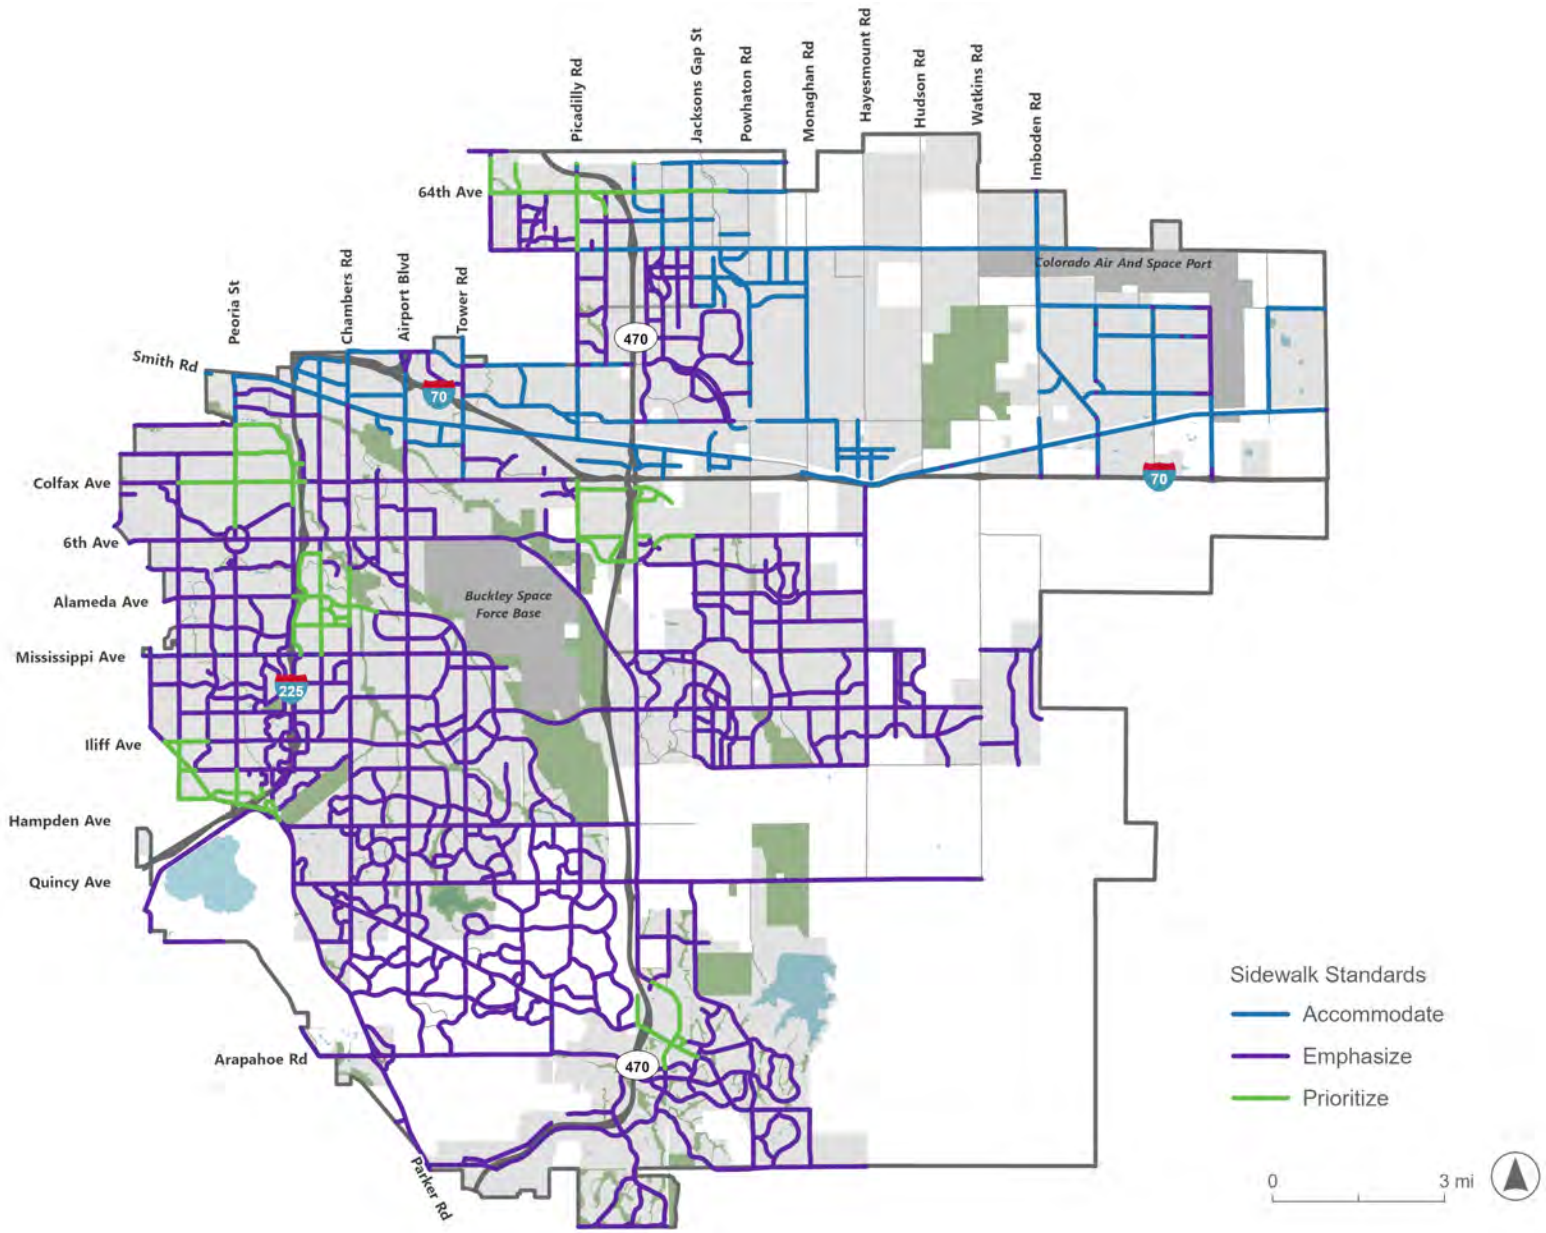
The three modal priority levels described by Connecting Aurora (from highest to lowest) are Prioritize, Emphasize and Accommodate.

These priority levels help clarify the role of each mode in the design and operation of individual streets and networks of streets and allow for multiple modes to share priority levels to meet goals and development outcomes. This approach supports balanced, context-sensitive street design that reflects community goals and transportation needs.

People Walking

Aurora's suburban, car-centric land use patterns and infrastructure priorities have resulted in a city that are difficult or uncomfortable navigate on foot.

People who walk in Aurora rely on the existing network of sidewalks, crossings and trails; however, walking to everyday destinations in Aurora can be difficult and dangerous. Often, sidewalks are narrow or without buffers from traffic. This is especially problematic for sidewalks on high-speed, high-traffic arterials, like Peoria Street and Chambers Road. Limited or a lack of separation between people walking and people driving creates a pedestrian environment that feels unsafe and uncomfortable.



Furthermore, many of Aurora's streets, especially wide arterials, have long distances between traffic signals or marked crossings. These large gaps force people walking to go far out of their way to safely cross the road at marked locations or to make unsafe crossings at unmarked locations.

The visionary walking network will create a safe, comfortable and connected environment for people walking in Aurora. The goals of this network are to expand the city's "low stress" pedestrian network, provide more safe crossing opportunities, and improve destination access for people walking.

The visionary network will have a connected system of spacious sidewalks and safe crossings that advance the Connecting Aurora goals. It will include improvements to busier roads (collectors and arterials) and local streets with missing or narrow sidewalks that do not meet ADA standards. Options for improving conditions on local streets are presented in the policies and programs described later in this chapter.

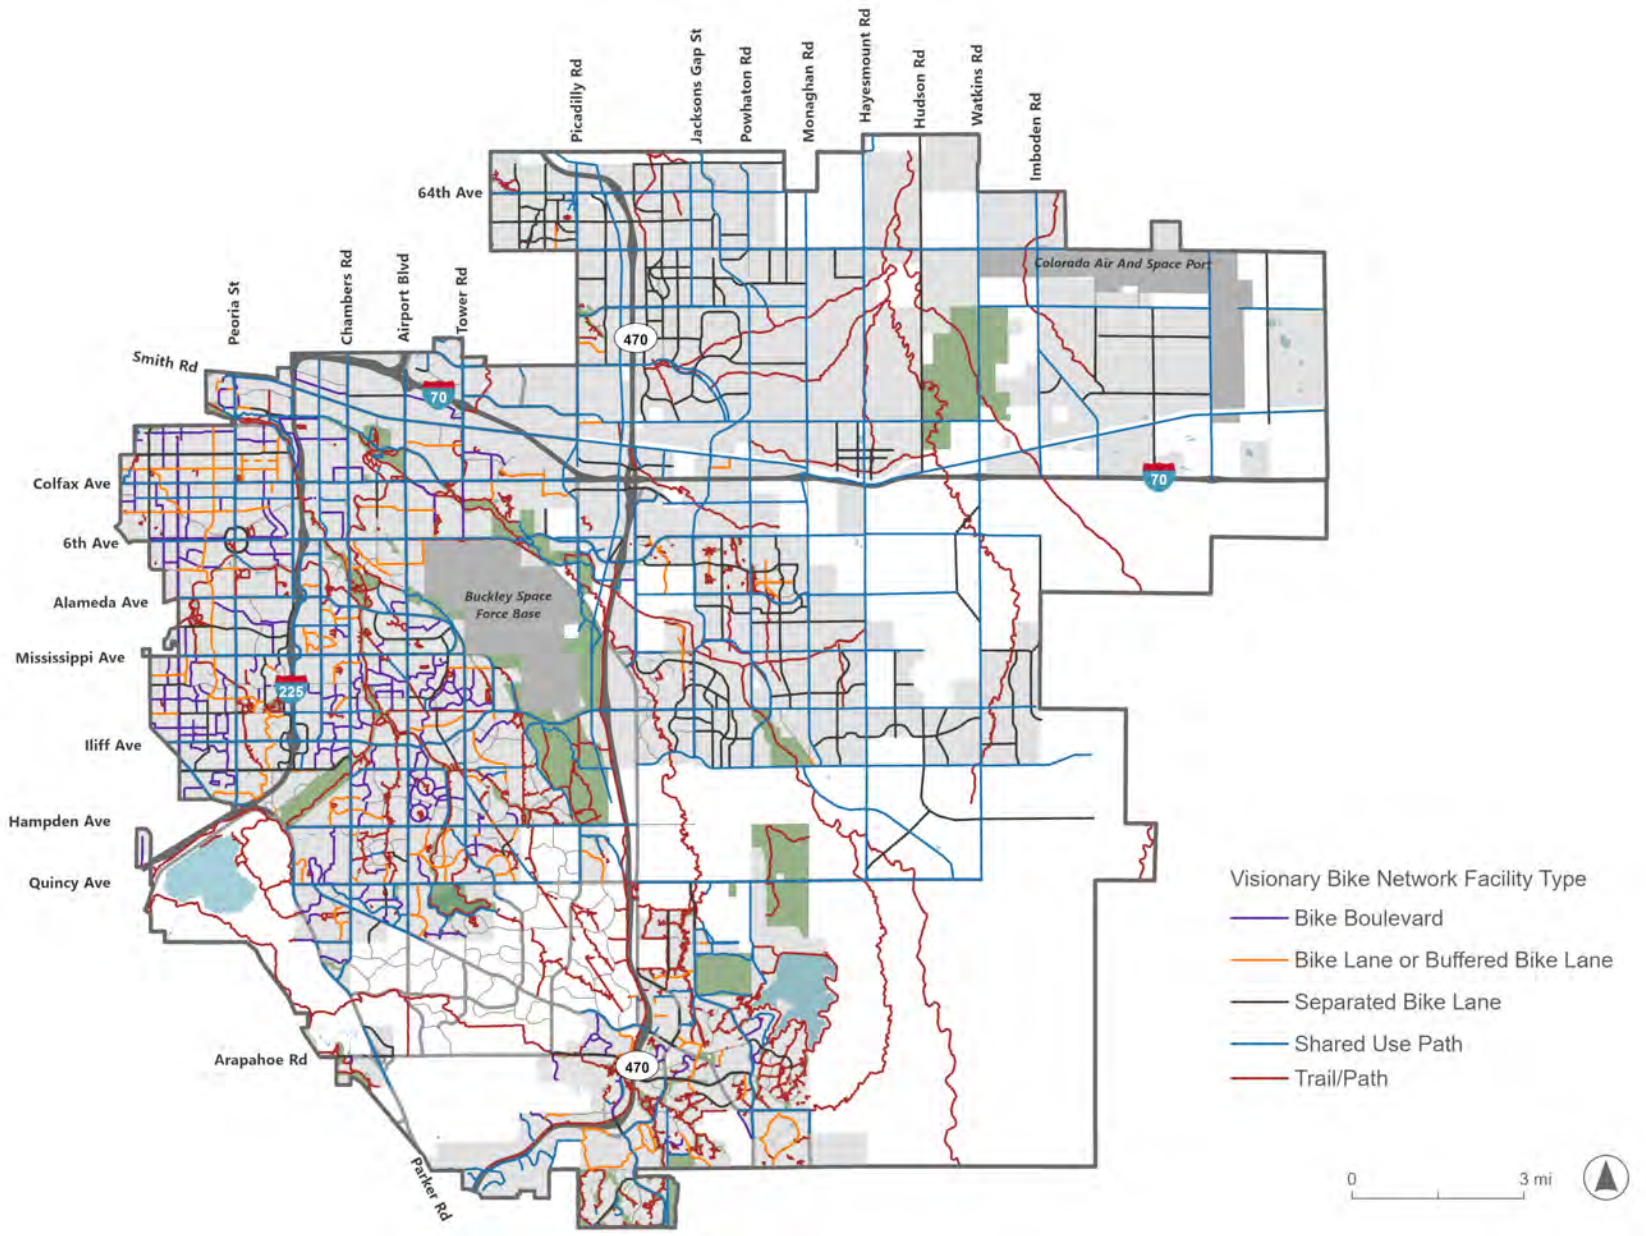
To guide the vision for Aurora's pedestrian network, the Connecting Aurora Multimodal Streets Design Guidelines differentiate among three walking priorities: Accommodate, Emphasize, and Prioritize. These categories determine what kind of walking experience is expected based on street type and surrounding land uses.

VISIONARY WALKING NETWORK (CLASSIFICATIONS)

People Biking

Aurora maintains a robust recreational trail network that is enjoyed by residents and visitors alike, but the current on-street biking network is fragmented, which discourages biking for commuting and everyday trips.

The visionary biking network will be a safe and low-stress connected network for Aurorans to use every day. To fully realize the recognized benefits of biking and to achieve Connecting Aurora's vision, the city, developers, special districts, and others must work together to design, build, maintain, and operate a bikeway network that is safe and connected. This bikeway network should attract bicyclists who are "interested, but concerned" in regard to riding on Aurora's streets. This group makes up the vast majority of potential bicyclists; they are interested in biking but concerned about real and perceived safety risks.



A core visionary network goal is to create a low-stress network that encourages more people to ride bikes. Not all bikeways feel equally safe and comfortable. Missing on-street bikeways and insufficient separation between bicyclists and cars create stressful biking conditions.

Improved access to destinations is a second core goal. Biking is most useful when it connects people to where they need to go on a regular basis (schools, parks, grocery stores, and transit). Evaluating ease and directness of access to destinations helps indicate how well the network supports short trips.

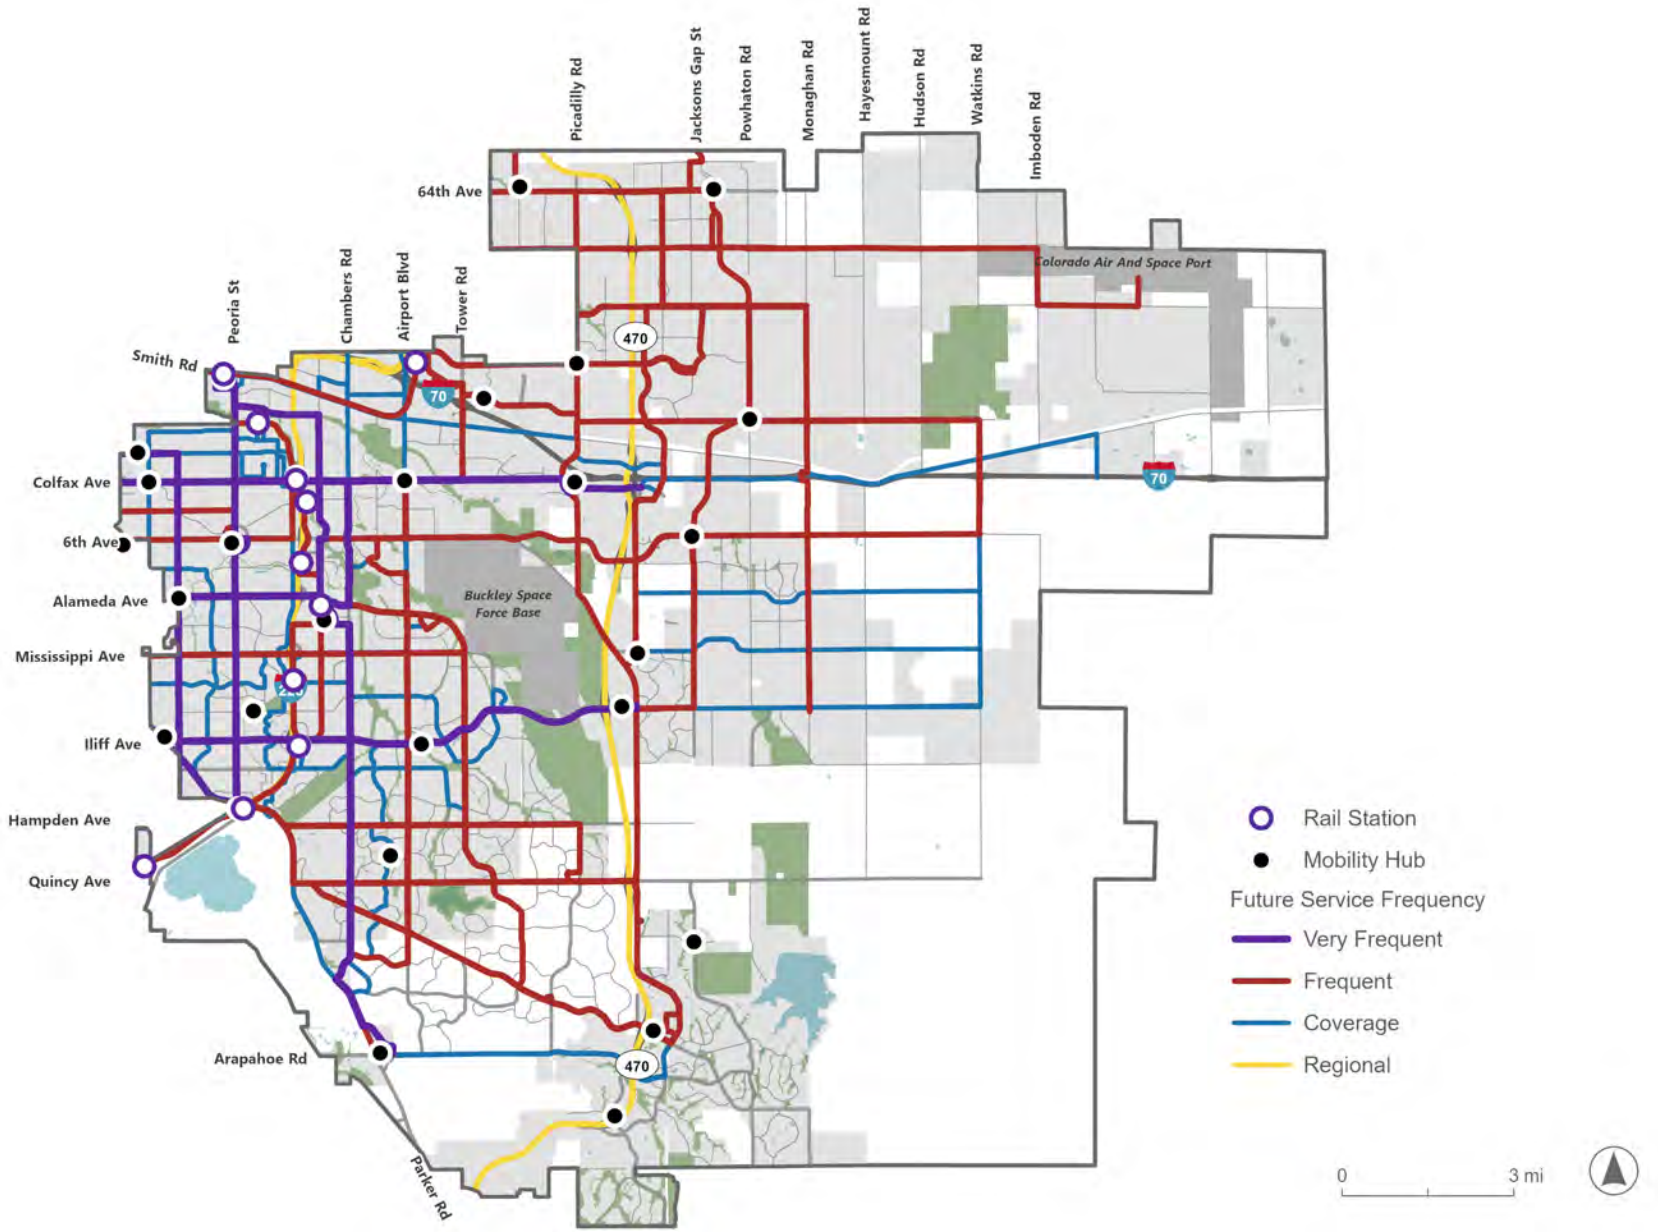
The city should also be responsive to trends in biking, such as e-bikes and micromobility programs. Because micromobility programs depend on private operators, citywide efforts and initiatives must balance meeting the city's needs with requirements, while making them attractive for micromobility companies to operate. This balance requires that enough residents, visitors, and workforce members consider shared micromobility a viable option and that they select that option.

The visionary biking network is comprised of three classifications: primary routes, secondary routes, and local routes. The network is critical to connecting to and through neighborhoods, as well as regional corridors and destinations.

VISIONARY BIKING NETWORK (FACILITY TYPES)

People Riding Transit

Transit is a critical function of Aurora's transportation system, connecting residents and employees within the city and across the metropolitan area.



RTD has delivered public transit in Aurora since 1972. Around 13% of RTD's more than 3 million annual customers in the Denver metro area live in Aurora. 30 RTD bus and rail routes serve Aurora, including 24 local bus routes, three light-rail or commuter rail lines, and several other routes. Transit service is generally concentrated in established parts of west and central Aurora. The developing areas of the city to the east and northeast are underserved or unserved. As residents and jobs fill out these areas, service must be extended to serve these new riders and destinations.

Most Aurora transit routes run every 30 to 60 minutes, with limited evening and weekend service hours. Only 9% of Aurora residents live within walking distance of transit that comes every 15 minutes or less. Of the 27 bus routes, only four operate at 15-minute or less headways. Consequently, the system is difficult to use for commuting purposes, such as school, healthcare or shift work, particularly in populations with higher transit dependence, such as school-age children, households with lower incomes, one- or zero-vehicle households, individuals with disabilities and seniors. For example, Northwest and Central Aurora are home to transit-reliant populations but there are no frequent, all-day connections to job centers across the metropolitan area.

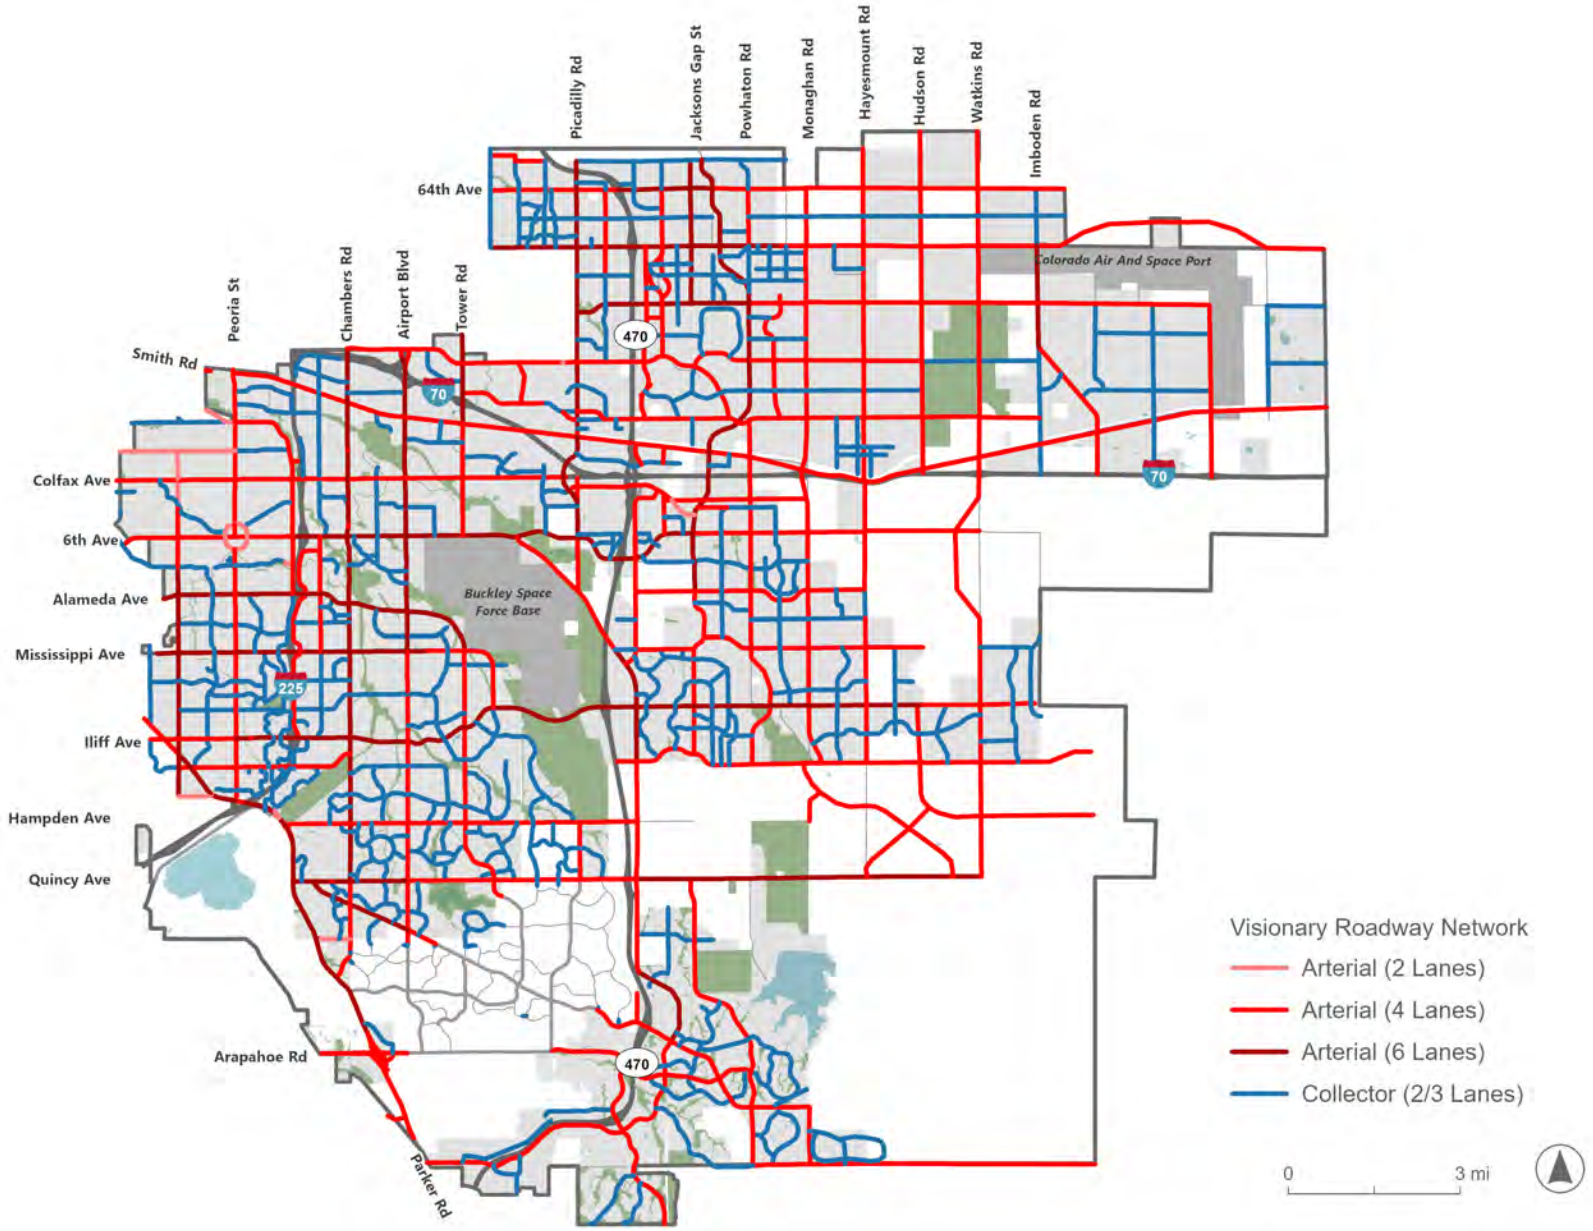
The visionary network for public transit includes widespread, convenient transit service for nearly everyone in the city. Infrastructure alone will not transform mobility in Aurora – frequent, accessible transit services matters. How often buses run, how long they operate each day and how well they connect people to jobs and daily needs all constitute transit's usefulness and convenience.

The network is defined by service frequency: frequent transit network routes (typically 10 to 15 minute service intervals) and the coverage network (typically 30 minute intervals and circulators or crosstown routes). It also includes infrastructure in the form of rail stations, mobility hubs, park-and-ride, and other enhanced transit facilities and services.

VISIONARY TRANSIT NETWORK

1934

People Driving



Aurora's development has long prioritized travel by car, with a traditional suburban street layout dominated by large, high-volume, arterials spaced every mile.

Many areas of the city are low-density, single-family neighborhoods and car-oriented shopping centers set back from the street fronted with large parking lots. Sidewalks and bikeways along these large, heavy-traffic arterials, are often uncomfortable and limited. Demand on Aurora's streets is steadily increasing as the city's population grows and development expands. Aurora's population is expected to rise by approximately 160,000 residents between 2025 and 2050, bringing the total population well over 500,000.

A significant share of the growth will occur on the city's eastern edge, where large undeveloped areas are slated for new housing and employment centers. At the same time, infill redevelopment in established neighborhoods and mixed-use centers will add more residents and jobs within the existing urbanized area. These trends will generate more daily trips only for commuting as well as shopping, school, recreation and freight movement.

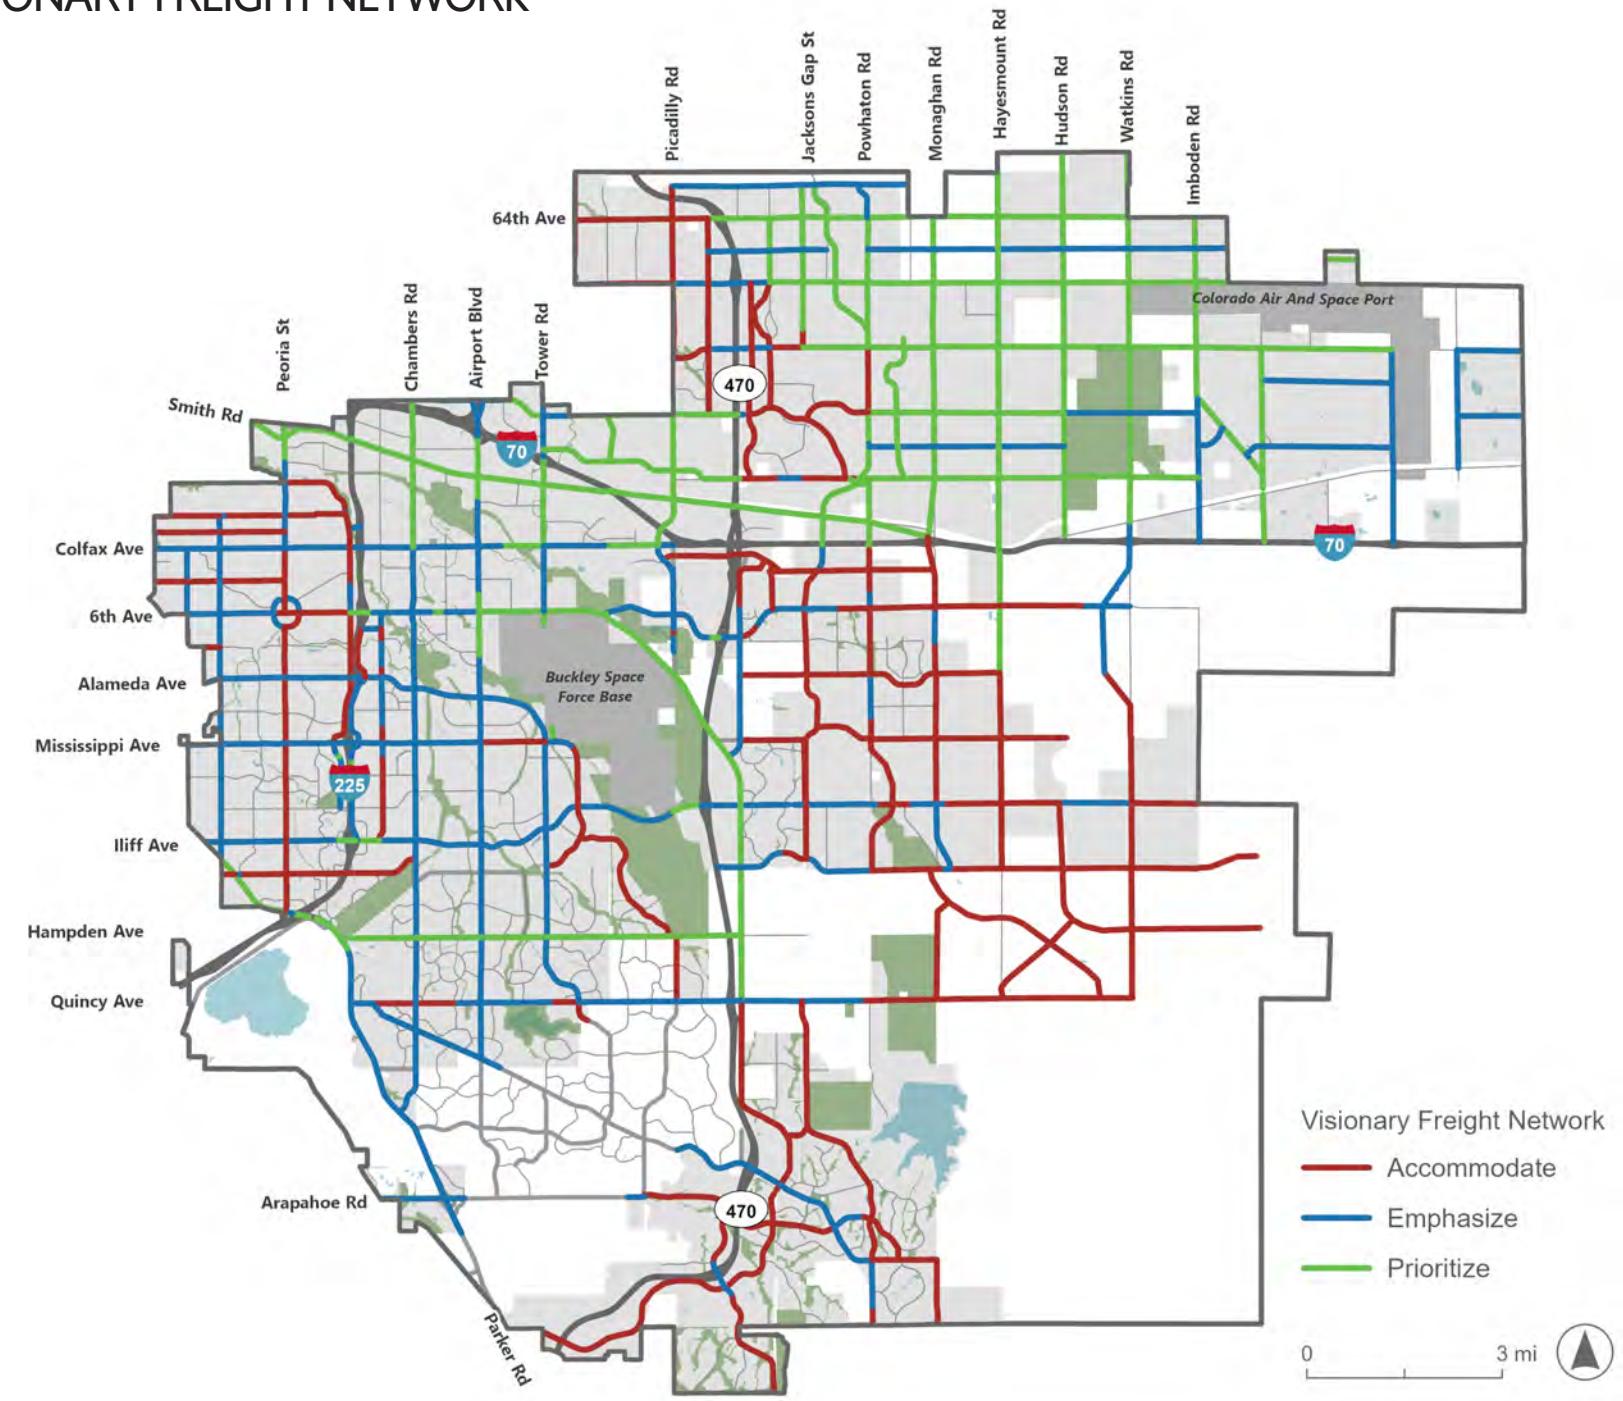
As Aurora solidifies itself as a "place-oriented city," the city should more fully support multiple ways of moving around on our streets. Maintaining acceptable travel times for drivers is important; however, speed and efficiency must be balanced with design features that make streets safer and integrate multimodal options. Recognizing that all streets have different modal priorities depending on the context, streets must be designed for flexibility and modal balance. They must continue to accommodate private cars while ensuring safe and welcoming facilities for pedestrians, bicyclists and transit riders.

VISIONARY ROADWAY NETWORK

1936

Moving Goods

As an established regional freight hub, the visionary network will support safe and efficient movement of goods through the city on a hierarchy of designated truck routes.



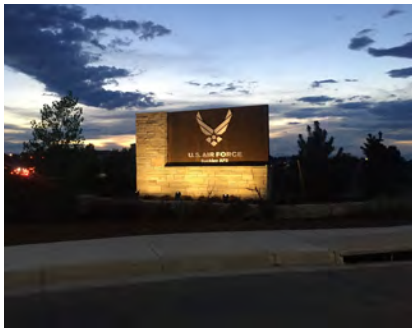
Aurora is an established regional freight hub that includes highway and rail infrastructure. Northeast Aurora, particularly north of I-70, is the primary hub for freight activity. DRCOG's 2019 Regional Multimodal Freight Plan identified this area as a regional freight focus area because of its concentration of industrial land uses, availability of large undeveloped parcels and its future role in the Aerotropolis development vision.

The visionary freight network will support safe and efficient movement of goods through the city on a hierarchy of designated truck routes. Freight routes are assigned by modal priority to accommodate, emphasize or prioritize freight access based on land use and development context.

These designations will help the city identify what improvements are needed to accommodate trucks and that they are appropriate for the surrounding context and use of the street. The visionary network will align truck route designations with infrastructure investments, land use planning and operational policies.

It will offer clarity on trasportation routes for private freight operators, developers and community stakeholders so that the benefits of freight movement are shared equitably while minimizing conflicts and environmental impacts.

VISIONARY FREIGHT NETWORK

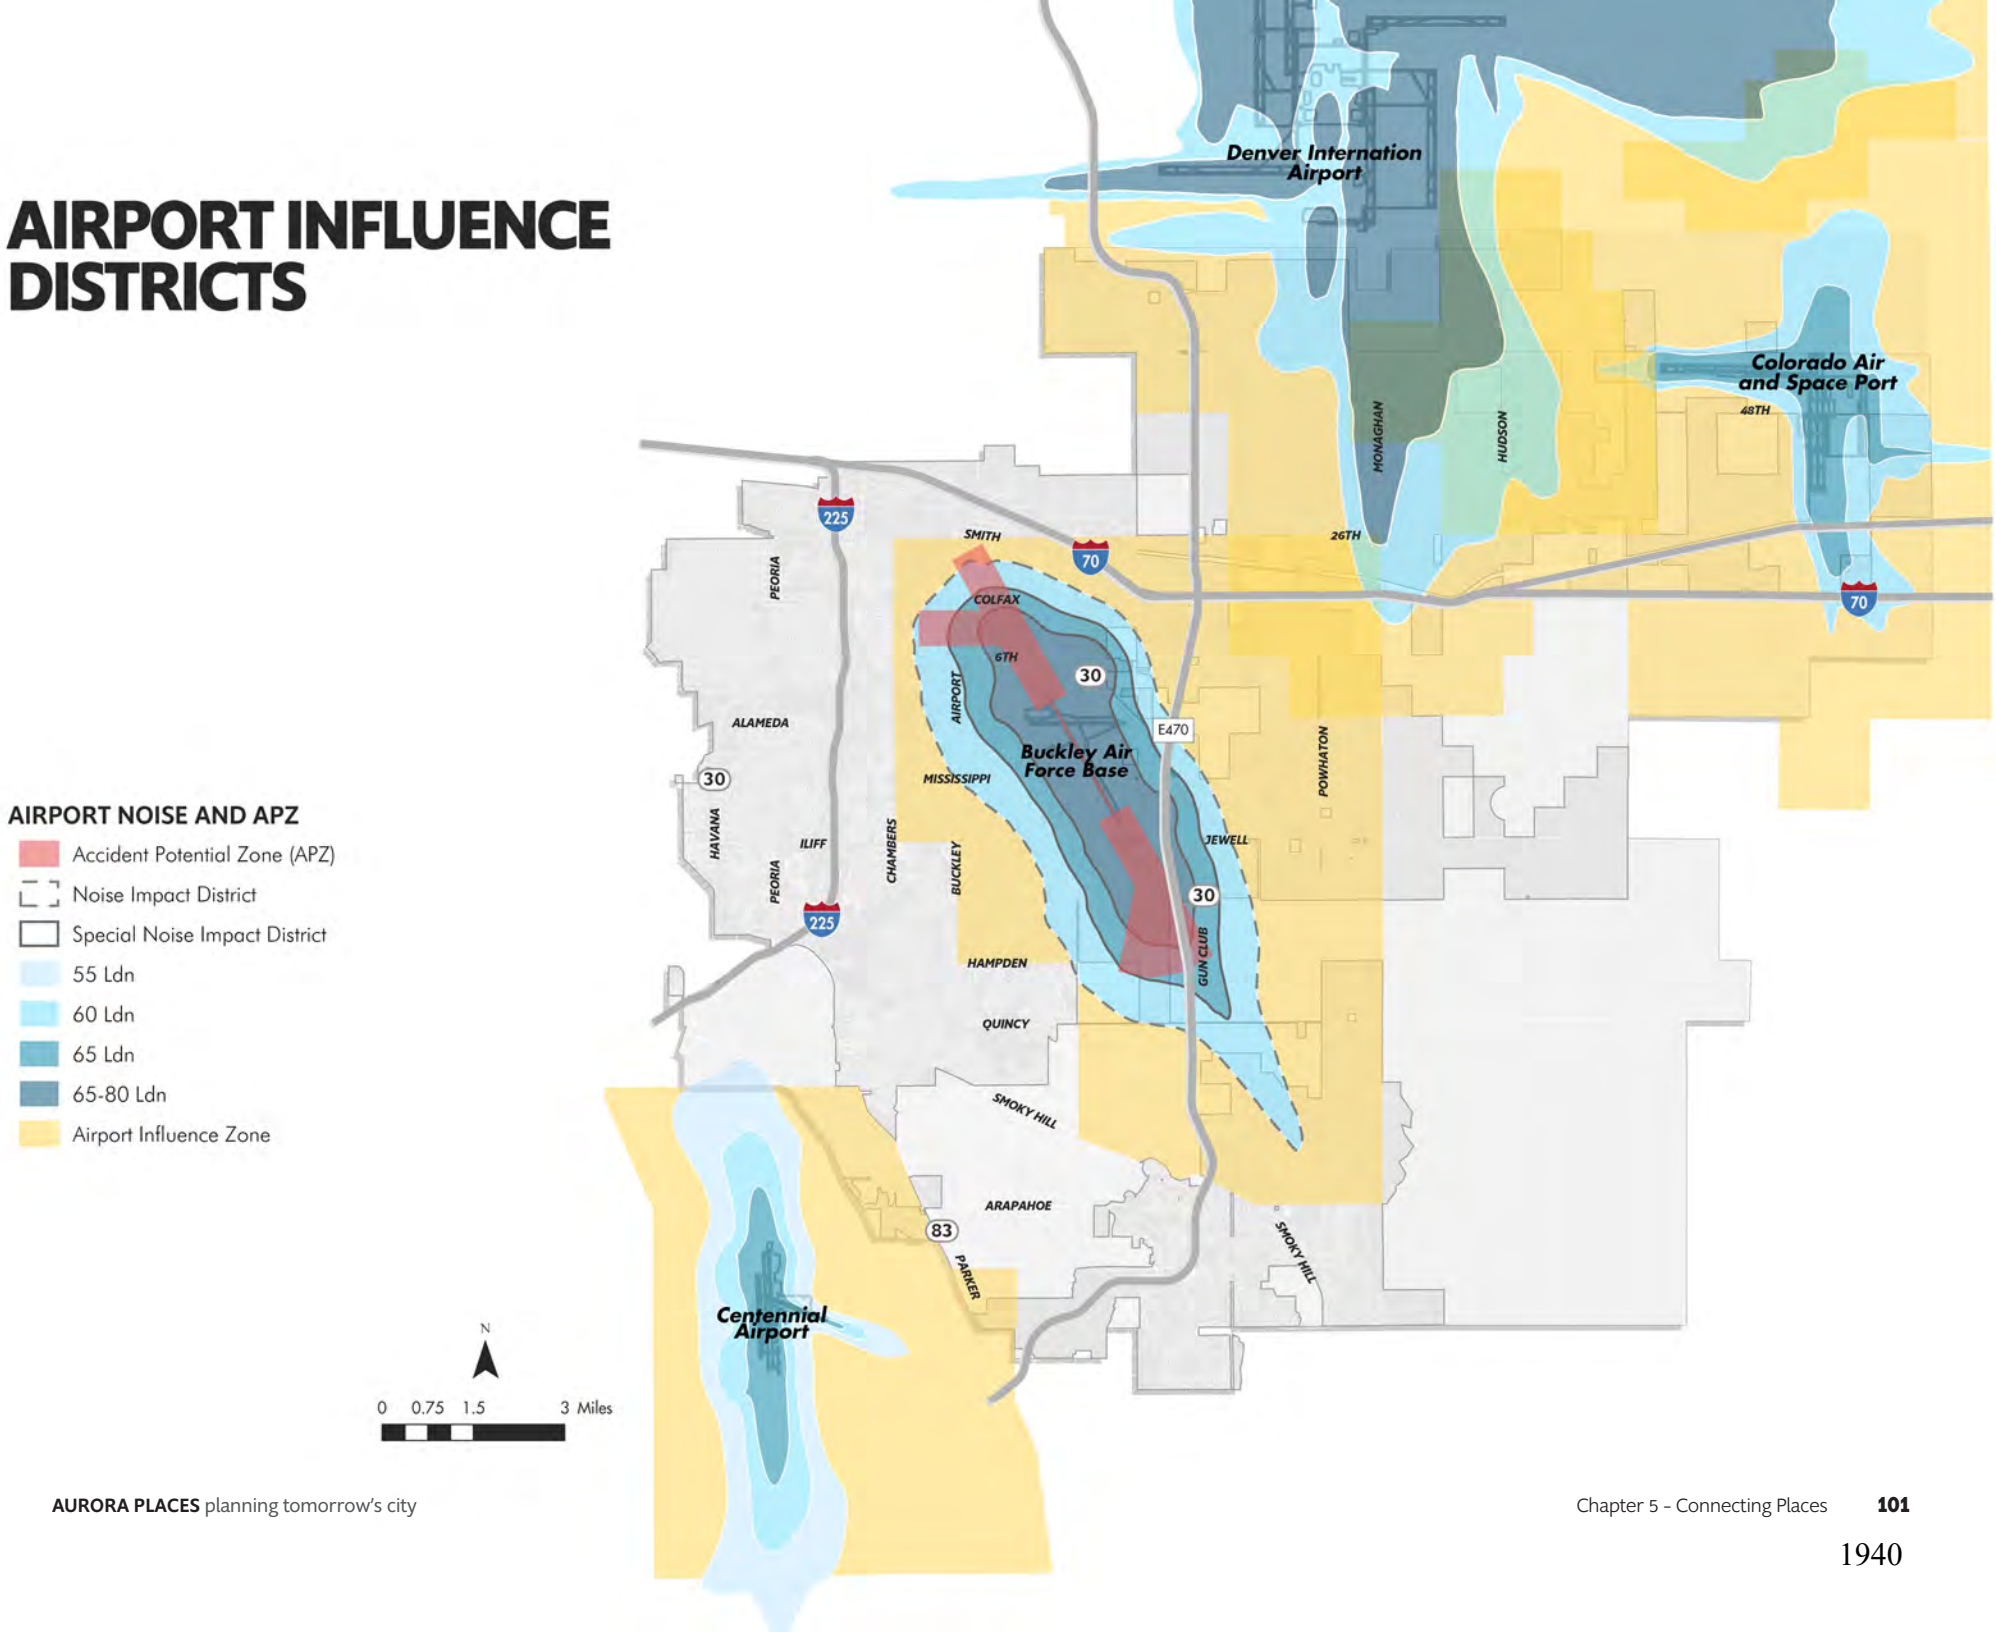


AIRPORT INFLUENCE DISTRICTS

Growth and development in Aurora is significantly shaped by the location and operation of four airports.

These include Denver International Airport, Buckley Space Force Base and the two general aviation facilities, the Colorado Air and Space Port (formerly Front Range Airport) and Centennial Airport. Each airport has an Airport Influence District that reflects operations specific to that airport and which may prohibit or limit certain types of development. Planning and zoning tools are implemented to assure that development proposed around airports is compatible with airport operations and reduces environmental impacts.

The city has taken a proactive approach to reduce impacts from aircraft noise by implementing zoning restrictions that are more protective than federal standards. Although federal standards specify that residential uses are compatible with the 60 day-night average sound level (DNL) for Federal Aviation Administration (FAA) airports and the 65 DNL noise contour for Department of Defense airports, Aurora requires that compatible residential uses only be constructed with noise mitigation in the 55 DNL contour. In addition, the city continues to work closely with Buckley Space Force Base to ensure proposed land uses are compatible with the Accident Potential Zone.



The zoning ordinance defines various areas subject to development restrictions because of their proximity to airport noise corridors. The following map illustrates airport noise contours for the airports located in and around Aurora, as well as the Accident Potential Zones near Buckley Space Force Base.

AIRPORT INFLUENCE DISTRICTS

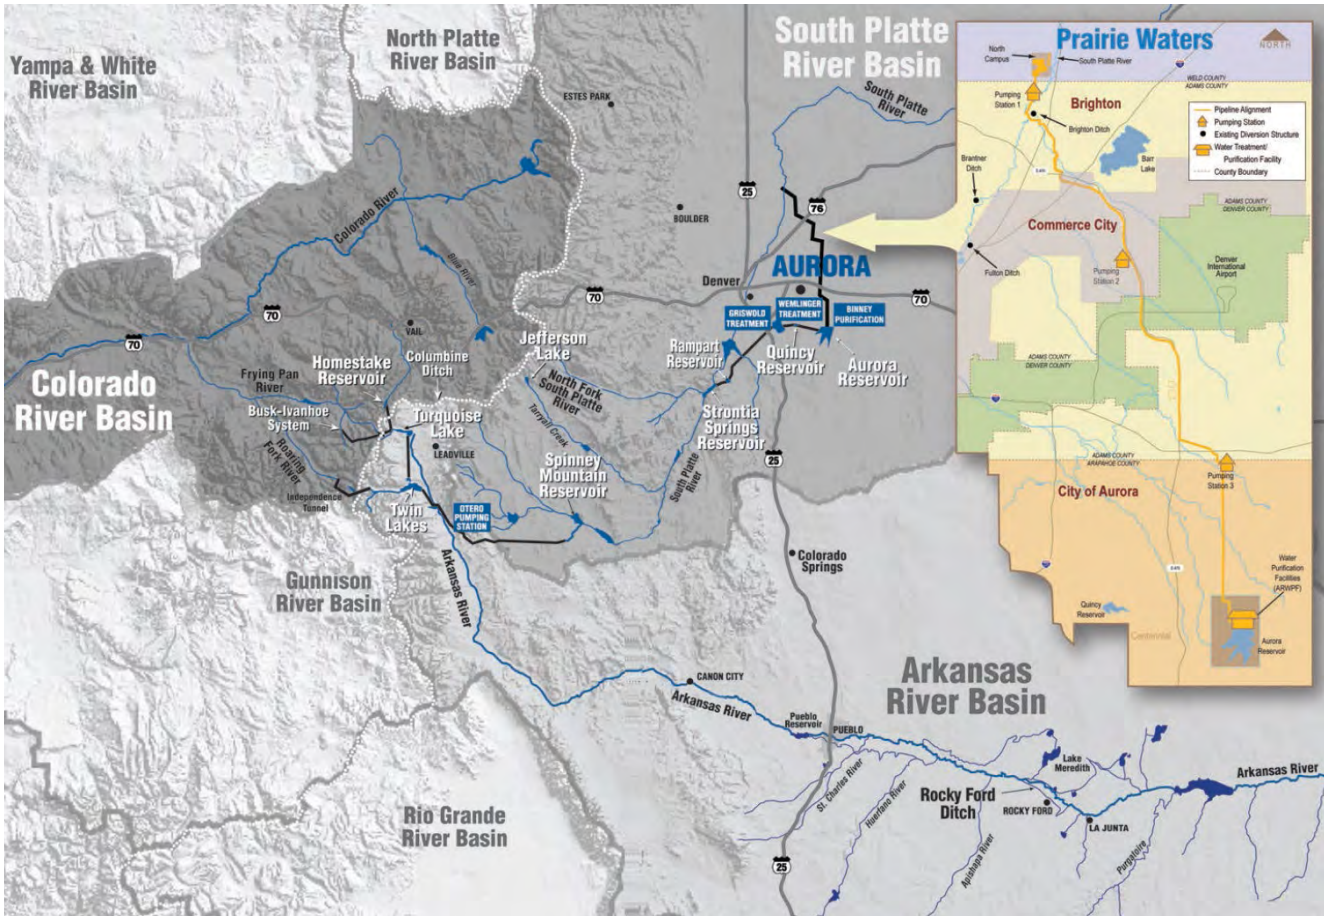
Water, Wastewater and Stormwater Systems

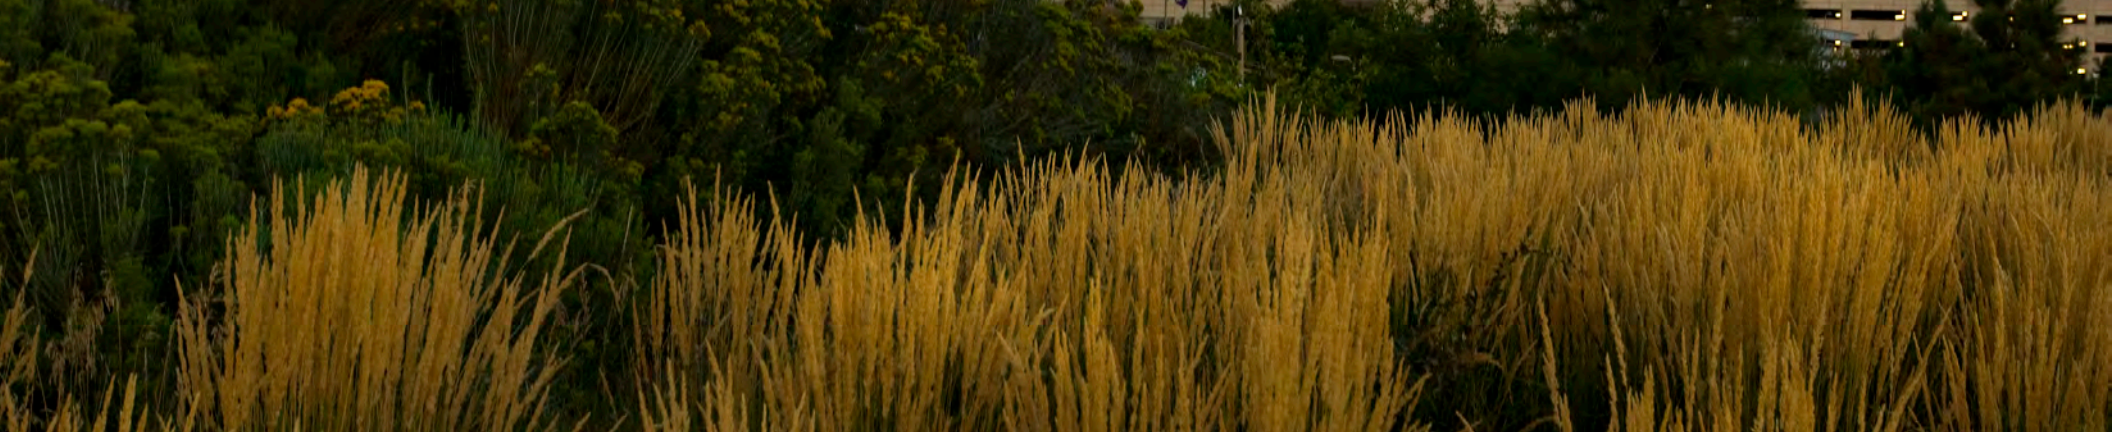
WATER SUPPLY

Water supply is paramount to the continued prosperity and future growth of Aurora.

Safe, convenient and affordable water and wastewater services are a core public utility for homeowners, businesses, visitors and others in the community. The city's capacity for continued growth and development is tied to its ability to continue to provide high-quality water service, through a strategy of acquisition, reuse and conservation, as well as wastewater and stormwater management services.

Aurora Water provides full-service water, wastewater and stormwater utility services to the community. The water utility department relies largely on renewable surface water sources to meet needs and continues to identify and acquire new water resources to meet growing demand. The scale of cost and complexity of managing such a system requires planning, budgeting and thoughtful coordination with regional partners. As the city continues to evolve through easterly growth and new urban infill development and redevelopment, Aurora Water is challenged to continue to meet rising demands, retain regionally competitive utility rates and remain a leader in the development of water policy in Colorado.





AURORA'S WATER AND WASTEWATER SYSTEMS

Aurora's water is supplied largely by snowmelt and transported through an extensive system to the city and storage facilities. The city's raw water is collected and stored in 12 reservoirs, including the Aurora Reservoir, Quincy Reservoir and others outside of Aurora, which when filled to capacity can store more than 156,000-acre feet of water.

Aurora Water operates a distribution system that includes over 1,600 miles of pipe and 12 potable water pump stations. Three drinking water treatment facilities have a capacity of 210 million gallons per day. The Sand Creek Water Reuse Facility has received national awards and can process five million gallons per day while the new and innovative Prairie Waters facility has extended Aurora's water supply. There are 1,050 miles of wastewater pipeline in Aurora. The city's stormwater system includes 384 miles of pipe, 76.4 miles of open channel, 98 city-owned ponds and three stormwater pump stations.

Source: Illustration from the Aurora Water (2040 Water Plan)

INFRASTRUCTURE AND SERVICE PLANNING

Aurora Water has adopted a strong water conservation ethic for local water use.

Water and Wastewater Master Plans

To prepare for future growth, Aurora maintains an Integrated Water Master Plan (IWMP) which projects the future city water demands and identifies near-term and long-term water supply, treatment and transmission pipeline capital projects. The IWMP planning horizon is 2070, and the plan is updated every five years.

Like water planning, Aurora maintains a citywide Wastewater Master Plan to project future wastewater loading, identify undersized pipes and locate and define pipeline diameters for future growth. Because wastewater conveyance is predominantly a gravity-based system, it is important to plan on a drainage basin level and coordinate across multiple developments.

Stormwater Master Plan

The city also maintains a comprehensive Stormwater Master Plan that combines the results of over 20 master drainage plans and outfall system plans. These plans are typically completed with assistance from the Urban Drainage and Flood Control District (UDFCD). They identify projects that alleviate or reduce flooding risk and enhance water quality throughout the city.

The city's preferred approach is to maintain open drainage systems serving multiple public purposes, including flood protection, stormwater management, recreation, open space, habitat, parks and trails. However, where the development placetype or challenging physical conditions warrant a more mixed approach, other techniques and technologies may be used. Aurora Water maintains a digital stormwater master plan that combines all the projects identified in various basin master plans and prioritizes them based on criteria for incorporation into the 20-year capital improvement program.

Urban Drainage and Flood Control District

The city coordinates with the UDFCD to plan for future growth in the stormwater system. The district manages basin-wide master plans (which often cross multiple jurisdictions), maintains criteria manuals for design and water quality, manages some stormwater construction and design projects and works directly with state and federal agencies on behalf of its members. The city, in conjunction with UDFCD, has studied the Aurora stormwater basins to identify future floodplains and related detention and water quality needs.

Colorado Water Plan

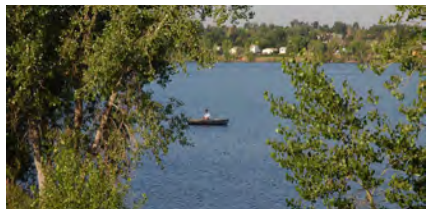
In 2015, the state completed the Colorado Water Plan, a statewide strategy that sets forth measurable goals, objectives and actions to address projected water needs. The plan's objectives include reducing the municipal and industrial water supply-demand gap, initiating conservation measures to supplement supply, supporting local efforts to incorporate water-saving actions into land use planning, adding storage capacity, protecting watersheds, and securing financial resources to support these actions. Collaboration between the state and local jurisdictions is critical to achieving these goals.

The Role of Water Conservation

As the costs and complexity of acquiring new water sources continues to grow, stretching existing supply becomes more essential to meeting Aurora's growing demand. Conservation efforts can mitigate the public costs of water and infrastructure, as well as provide homeowners and businesses savings on their water bills.

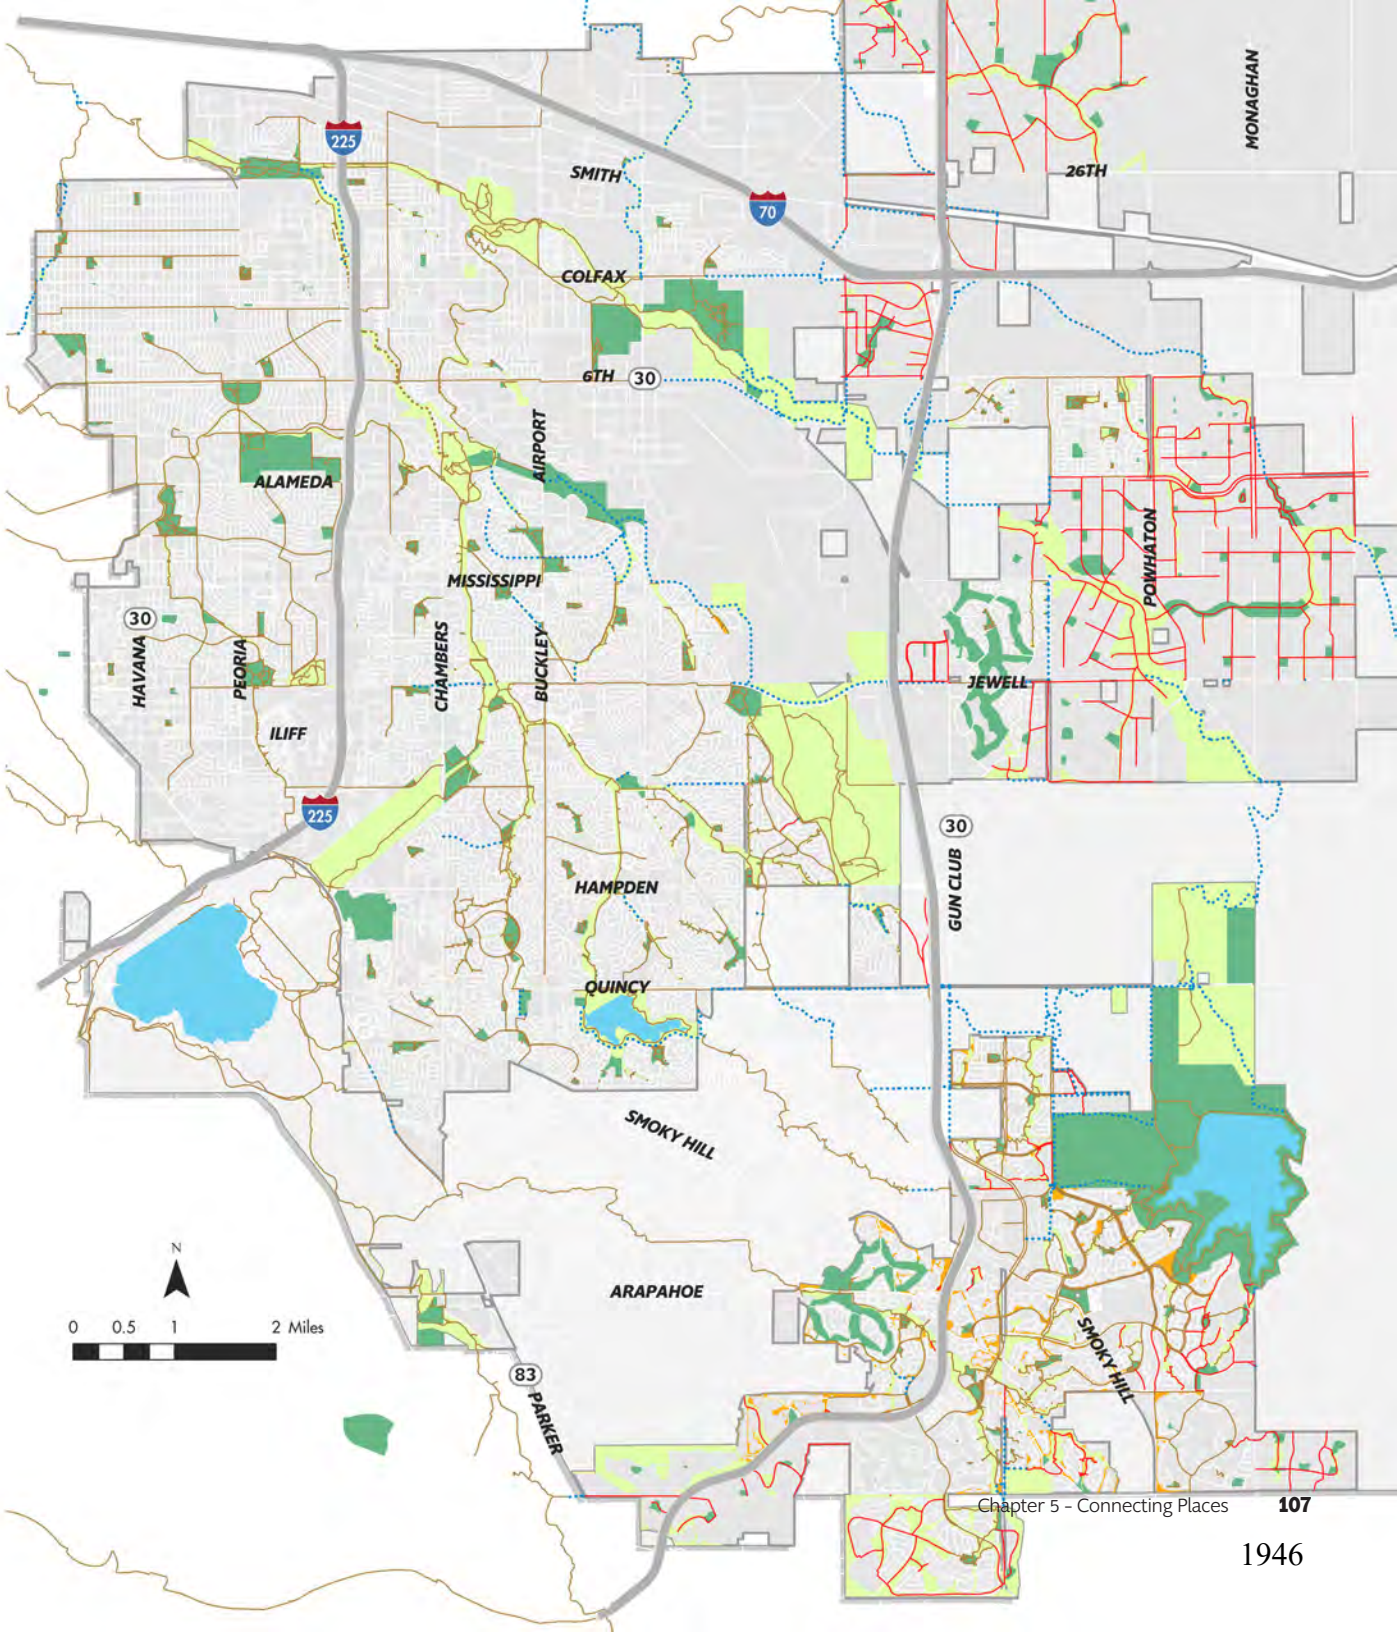
Aurora Water has adopted a strong water conservation ethic for local water use, which they have supported through a range of planning, programs, and innovative projects. Programs include conservation education and outreach, water-wise demonstration gardens, water budgets and conservation pricing, financial rebates and incentives and collaboration and coordination with peer agencies. The Long Range Conservation Plan provides guidance for future water conservation programs so that as water supply planning progresses, decision-makers can determine the best programs for the community.

Parks, Trails, Recreation and Open Space System



Parks and recreation facilities can serve as centers of neighborhood activity.

There are few physical features more essential to quality of life and the appearance of a community than parks, trails, open spaces and the recreation system. Parks and recreation facilities can serve as centers of neighborhood activity and as places for sports, exercise, community events and gathering places. Protected open spaces support healthy living by connecting residents and visitors to Aurora's natural amenities, while a robust and interconnected network of trails and bicycle ways serve commuters and recreational users alike.



The city of Aurora maintains 97 developed parks and over 5,000 acres of open space. The system includes a broad range of facilities including parks, recreation centers, golf courses, dog parks, park shelters, playgrounds, sports fields, nature centers, swimming pools and a variety of outdoor activities at Quincy and Aurora reservoirs. The city provides over 90 miles of local and regional trails across Aurora, many of which connect to the larger regional network and provide access connecting neighborhoods, mixed-use districts and other destinations. The city also supports those with mobility disabilities by enabling use of assistive technologies and services in its parks, trails and open space system.

Arts and Cultural Resources System

A sense of community is defined by the connections among people and shaped by shared culture, experiences and history.

The city's urban history began in Original Aurora, in the city's far northwest, with a small town that has since grown to become the state's third largest city. Aurora's recent history is in many ways defined by a growing diversity of people, cultures and experiences. The city's art, historic places and cultural resources are one way this rich history is expressed and experienced. Arts and cultural facilities are important elements of the fabric of a vibrant city and can anchor community activity and support economic activity and development.

Libraries and Museums

The Aurora Public Library system offers an opportunity to serve as a center of neighborhood or community life, a place for all ages to gather and interact. The city operates six library locations, including the large main library and satellite libraries, and offers computer lab and pick-up/drop-off services at other facilities around the city. The Aurora History Museum collects and exhibits artifacts and documents pertaining to the history of Aurora and Colorado. It provides in-house research and educational programs and oversees the city's historic preservation program. The libraries and museum also collaborate with other agencies and organizations, including local school districts, to provide access to a growing number of educational resources and develop exhibits of interest to the community.

Historic Resources and Preservation

The city recognizes that preservation of its historic and cultural resources is important to the community at large, and that the city should play an active role in the protection and preservation of Aurora's heritage through education, advocacy, training and partnerships. The Historic Preservation Ordinance, first adopted in 1985, creates a process for establishing historic landmarks, both historical and archeological.

Historic preservation is achieved through a partnership among the City Council, the Historic Preservation Commission, various city departments, the Aurora History Museum, the Aurora Historical Society, private property owners and others in the community. These partnerships provide shared cultural and economic benefits to the Aurora community.

Many of the city's designated historic resources can be found in Original Aurora and contribute to that neighborhood's unique character and local interest. The city values protection of these resources, even as revitalization or redevelopment occurs in the area. However, historic sites and landmarks are located throughout the city. These include DeLaney Farm and Round Barn adjacent to the Aurora Municipal Center, the Smoky Hill Trail landmark and Melvin School in south Aurora, and Centennial House and Lowry Building 880 in northwest Aurora.

Arts in Aurora

The Arts District draws talented artists and visitors to the area and contributes to the overall vitality of Original Aurora.

The Aurora Cultural Arts District is located in Original Aurora along Colfax Avenue and is home to visual and performing arts facilities and festivals. The city has invested in programming, facilities and attracting visitors to the area. The district's goals are to support arts and creative businesses, create a vibrant arts destination, and embrace the urban context of Original Aurora. The Aurora Fox Theater and recently renovated People's Building are among the city-owned arts venues in the area. Theater, dance, visual arts and other creative endeavors can be found in the district.

The Arts District draws talented artists and visitors to the area, which in itself is a source of community pride and an economic asset; however, the district also contributes to the overall vitality of the greater Colfax Avenue corridor and Original Aurora neighborhood. Fletcher Plaza offers a public venue for community events, interaction and recreation, and potential for even more. The adjacent Martin Luther King Jr. Library and Municipal Services Center is an important community asset for learning and services for diverse nearby neighborhoods. Public and private development of new housing in the area has grown the area, while growing choices of new restaurants, shopping and entertainment options complement the arts scene.

However, the arts in Aurora extend well beyond the Arts District. The city's Art in Public Places program has selected, funded and installed art throughout the city in parks, commercial centers and public facilities. The Art in Public Places Commission governs the program and a robust public participation process supports it. The city's zoning code requires dedication of construction project fees for projects in Metro Districts. The city's transit stations feature a variety of amazing works by diverse artists.

SUMMARY

Different types of networks connect people and places across the city of Aurora. From transportation to arts and entertainment to strategic economic opportunities to water, every person is connected to one another and every neighborhood both directly and indirectly. To achieve sustainable growth and continued success the city must support these systems through targeted planning efforts and supplemental support of private and nonprofit stakeholders. Ensuring that all three sectors work together is the key to connecting places in Aurora.

1949

GOALS, POLICIES AND PRACTICES

Goals, Policies and Practices incorporate the main ideas and recurring themes discussed throughout the planning process. They are centered on the seven Core Principles identified through the community engagement activities. Each principle sets forth a standard for Aurora within its specific topic area. The goals are statements of the community's aspirations and the recommended practices are the means to realize those goals. The practices should be used by city staff, the business community and the public on a daily basis to guide the implementation of Aurora Places.

A Strong Economy

Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

A Diverse and Equitable City

Principle: Diversity and equity are assets to be nurtured and promoted by the city.

Housing for All

Principle: High-quality housing options enable people across all socioeconomic levels, cultural identities and stages of life to establish and manage households.

A Healthy Community

Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans and contributes to a stable community.

A Thriving Environment

Principle: A thriving natural environment – including stewardship of water, energy and natural resources – is essential to the physical and mental wellbeing of residents and the city's ability to support future growth.

An Authentic Aurora

Principle: The creation of great places, the preservation of traditionally unique places and effective marketing and promotion are essential to improving Aurora's image.

Easy Mobility and Active Transportation

Principle: An easy-to-use transportation network with multiple travel choices supports a strong economy, healthy community and flourishing environment.

1950

A **STRONG** ECONOMY

Principle: A strong economy with active urban places is essential for the wellbeing of residents, businesses and the community.

GOALS:

1. Support a growing availability of job opportunities for people with a variety of skill levels and experience.
2. Achieve greater balance between the number of residents and jobs in Aurora.
3. Continue to support the growth of primary employment to bolster the local economy.
4. Create new and unique retail areas that match changing trends.
5. Create partnerships with major institutions and businesses to encourage economic growth.
6. Support locally grown businesses along with business startups and expansions.
7. Continue to provide high-quality and reliable city and utility services throughout the city.

RECOMMENDED PRACTICES:

Placetypes

- Create highly active urban districts as locations for knowledge-based businesses, desired retail, unique entertainment and local entrepreneurs and for people who desire convenient urban areas to live and work. Create these areas as intensely developed, mixed-use places to attract talented workers and higher-paying jobs.
- Work with the development community to encourage construction of high-quality office space in urban districts, innovation districts and other placetypes.
- Partner with institutions, such as the Fitzsimons Redevelopment Authority and the Community College of Aurora to create innovation districts where new ideas and enterprises can flourish, leading to economic innovation and growth.
- Identify and reserve ideal locations for significant and strategic commercial and employment uses in Urban District, Innovation District, City Corridor, Commercial Hub and Industry Hub placetypes.
- Continue to use zoning designations to locate industry hubs, particularly along the I-70 corridor and in the Aerotropolis area, in large land areas well-suited for industrial and distribution operations.
- Continue to support Buckley Space Force Base's success as a major employer in Aurora.
- Develop and redevelop city corridors and commercial hubs as places for retail, services, offices and entertainment.
- Create transit-oriented development (TOD) to provide better access to employment centers, particularly for residents that do not have easy access to a personal vehicle.
- Support quality urban design through capital improvement projects and special districts to create stronger and more attractive business environments.
- Strengthen city zoning and development standards to improve the quality of commercial and office development for redeveloping and reinvesting in targeted locations while also providing appropriate flexibility.

Connecting Places

- Provide complete car, transit, pedestrian and bicycle connections between and within urban districts, as well as to residential neighborhoods, including short, interconnected urban blocks, to promote better access to businesses and employment to benefit employers, employees, and customers.

Partnerships

- Work with community partners to promote Aurora as a creative, efficient and productive international business hub.
- Coordinate efforts among potential public, private and nonprofit partners based on shared priorities and strategies.
- Share data and information within the city's partnership network to help inform decisions based on a shared understanding of the current and projected economy.
- Support the use of business improvement districts (BIDs) and similar development tools to engage the community.

Economic Growth and Sustainability

- Adaptively reuse underutilized properties and strive to retain low-cost commercial properties to provide affordable space for local businesses and maintain community character.
- Continue to nurture a culture of customer service to represent Aurora as one of the best cities in which to conduct business.
- Support Aurora's multicultural and global influences to strengthen and expand the city's economy.
- Serve as a resource for up-to-date and relevant demographic, real estate and economic data to support public- and private-sector decision-makers.
- Evaluate comprehensive economic indicators to identify economic strengths and challenges and measure the city's progress toward economic development goals.
- Support political, legal and legislative efforts to provide and protect important revitalization tools and funding sources.
- Integrate land use and water planning and policies in order to meet the needs of future growth and development.

Business Attraction, Retention and Expansion

- Attract businesses that connect Aurora to the global marketplace with an emphasis on science, technology, research and healthcare.
- Encourage and support growth and expansion of existing businesses, including major employers and institutions, smaller businesses and other employers.
- Take advantage of Aurora's proximity to Denver International Airport for new economic opportunities. Focus on job creation and industrial development opportunities in those areas.
- Work with existing and potential businesses to support a vibrant local economy with increasing numbers and a diversity of high-quality, high-paying jobs at all skill levels, particularly at employment centers.

Small Business and Entrepreneurship

- Encourage targeted, systematic financing approaches for startup enterprises.
- Continue to provide assistance and incentives for the creation of local and small businesses and support of existing ones.
- Promote affordable and appropriate work and meeting spaces to encourage startup enterprises.
- Promote and support the success of immigrant- and refugee-owned businesses. Actively connect these diverse communities with small business and entrepreneurship resources.
- Support the creation of local job opportunities within businesses owned or led by people of historically marginalized or disadvantaged groups.

Workforce Development

- Collaborate with the private sector on job creation and training, including training and jobs for Aurora residents who are underemployed, with an emphasis on technology and job readiness in industries with high-growth potential.
- Connect immigrant and diverse ethnic communities to education, training resources and accepted credentials to integrate their skills and ambitions into the local workforce.
- Identify opportunities for seniors or recently retired individuals to contribute to the local business environment, including as mentors, leaders, volunteers or other roles that capitalize on their skills and experience.

Development and Redevelopment

- Continue to use urban renewal for infill and redevelopment in targeted areas. Explore additional funding mechanisms for development and supporting infrastructure improvements.
- Proactively attract developers who will provide innovative, urban, infill development at key sites.
- Effectively use a capital improvement program (CIP) to strategically provide appropriate infrastructure to major employment centers and redevelopment areas.
- Create comprehensive redevelopment plans that consider and mitigate impacts on housing supply.

A **DIVERSE** AND **EQUITABLE** CITY

Principle: Diversity and equity are assets to be nurtured and promoted by the city.

GOALS:

1. City services should be available and accessible to all residents.
2. Create safe and welcoming public spaces throughout the city that are designed to increase communication and understanding and reduce conflict among cultures.
3. Embrace and promote multiculturalism in education, communication, celebration, and commerce.
4. Further strengthen Aurora's reputation as an international city that recognizes the value and contributions of immigrants and refugees and supports opportunities for these communities to thrive.

RECOMMENDED PRACTICES:

Placetypes

- Locate libraries, recreation centers and other public facilities in urban districts to act as anchors and to ensure that such facilities are well connected to neighborhoods for all residents to use.
- Provide public spaces in urban districts and other placetypes for celebration and to bring people of different backgrounds and cultures together. Design and program these spaces to increase interaction between people and encourage the creation of new ideas by them.

Connecting Places

- Serve neighborhoods with public transit, bicycle and pedestrian routes.
- Develop transportation programs for those who are disabled, aging or who do not have easy access to cars.

Government Services

- Monitor changing socioeconomic trends to understand population and economic changes of the city to adjust programs to effectively adapt to those trends.
- Use equity measures to evaluate city programs' availability and effectiveness in serving residents in diverse communities across the city.
- Engage residents, neighborhood organizations, and diverse communities in planning and development efforts and decision-making.
- Promote educational opportunities designed to address cross-cultural communication, discrimination, language learning, history, citizenship and job training to promote cultural understanding.
- Evaluate the extent to which new development, redevelopment and capital projects result in the displacement of current residents and develop and refine a set of proactive strategies to mitigate such impacts.
- Communicate planning, development and city services matters in multiple languages and manners to promote accessibility by all Aurorans.
- Strengthen trust between the city and diverse communities by promoting inclusion and the celebration of cultural differences.
- The city will continue to expand its efforts focused on immigrant and refugee integration into the Aurora community.

Aging Population

- Provide recreation services and facilities for active adults throughout the city.
- Work with community partners, including the Anschutz Medical Campus, to provide services for seniors.
- Encourage "Meals on Wheels" type programs, county programs and other types of programs for seniors.
- Improve the communication and timeliness of information to seniors regarding programs and services.
- Work with educational institutions to provide opportunities for continuous learning among seniors.
- Provide or encourage volunteer and service opportunities for seniors.
- Encourage service providers that aid senior immigrants and refugees to operate in Aurora.

HOUSING FOR ALL

Principle: High-quality housing options enable people across all socioeconomic levels, cultural practices and stages of life to establish and manage households.

GOALS:

1. Increase high-quality housing options of all types and at all price levels throughout the city through ongoing collaboration with the development community.
2. Work with partners to better understand specific needs for affordable housing and to develop new, creative housing options.
3. Locate affordable and senior housing throughout the city and at locations with a variety of transportation options.
4. Address barriers to the development of diverse housing variety and neighborhood choices across the city.
5. Decrease barriers to homeownership.

RECOMMENDED PRACTICES:

Placetypes

- Provide appropriate locations for multiple housing types in urban districts, including both affordable and luxury options, because the concentration of services, retail, entertainment and employment and the multiple transportation choices are desired by households of all incomes.
- Integrate housing of varying types and prices into placetypes throughout the city to create lively and diverse neighborhoods.
- Create vibrant and highly desirable neighborhoods through superior housing design and neighborhood layout, with varied design along streets and quality landscaping and architecture throughout.
- Focus primarily residential placetypes around neighborhood gathering places, such as parks, trails, neighborhood-serving commercial centers or other spaces.
- Apply planning processes in individual neighborhoods to invite resident involvement and address neighborhood needs.
- Encourage and support renovation or rehabilitation of existing housing stock to meet minimum standards and appeal to changing household needs and preferences.

Diverse Housing

- Enforce fair housing policies and practices and code compliance.
- Work with partners to identify demand and development opportunities for affordable housing throughout Aurora.
- Provide homeless and low-income housing programs to address housing security.
- Preserve and improve existing housing to retain community character and meet housing demand.
- Proactively attract developers to provide innovative neighborhood designs that feature diverse housing options.
- Allow accessory dwellings to accommodate extended family arrangements or generate income to accommodate rising housing prices.
- Consider all household costs, including acquisition or move-in costs and ongoing costs, such as utilities and home maintenance, when evaluating affordable housing needs.
- Continue to assess zoning and development regulations and processes to reduce ineffective regulations or unnecessary barriers to quality development.
- Create comprehensive redevelopment plans that consider and mitigate impact on housing supply.

Connecting Places

- Ensure that neighborhoods are effectively connected to safe, attractive pedestrian, bicycle and public transit routes, especially those with affordable and senior housing.

Aging Population

- Work with the Aurora Housing Authority, the private sector and others to ensure that sufficient, affordable housing is available for seniors throughout the city.
- Use CDBG and other funding to improve existing housing for use by seniors and work with partners to develop programs to support home maintenance.
- Encourage the construction or rehabilitation of homes for downsizing households, including single-story, shared housing, multigenerational and other senior-friendly housing types.
- Encourage local organizations to support seniors living in mobile homes, including maintenance assistance, legal rights and relocation.
- Use neighborhood and area plans to support the construction or rehabilitation of senior housing throughout Aurora.

A **HEALTHY** COMMUNITY

Principle: Eating healthy food, walking and exercising, living in a clean and safe environment and having access to medical care improves the lives of all Aurorans.

GOALS:

1. Make active transportation, such as walking and biking, a viable alternative to driving.
2. Maintain, improve and expand parks, open space, trails and recreation facilities throughout Aurora.
3. Neighborhoods should have safe and convenient access to retail outlets that offer healthy and/or fresh food choices.
4. Support the expansion of healthcare facilities to locations that conveniently serve neighborhoods throughout the city.
5. Ensure that Aurora is a safe environment for all community members.
6. Provide safe, effective and high-quality water, wastewater and stormwater services.

RECOMMENDED PRACTICES:

Placetypes

- Support the establishment of retail outlets that provide healthy and/or fresh foods that are conveniently accessible to neighborhoods across the city.
- Provide sufficient parks, open space and recreation facilities safely and conveniently accessible to neighborhoods.
- Retrofit existing neighborhoods with parks, trail connections and access to public and private recreation facilities.

Connecting Places

- Ensure that neighborhoods are well connected by enjoyable pedestrian and bicycle routes to urban districts, commercial hubs and other placetypes.
- Prioritize multimodal options and reliable access to destinations that are critical to resident health, such as medical facilities, recreation facilities, and essential shopping and services.

Community Health

- Enhance Aurora's quality of life by increasing access to natural areas and incorporating vegetation and natural features in streetscapes and buildings.
- Encourage grocery stores and healthcare facilities to locate at easily accessible locations and provide goods and services to meet local needs and preferences.
- Support programs that improve access to healthy food systems and food security such as HEAL Cities and LiveWell Colorado.
- Increase opportunities for neighborhood gardening and urban agriculture.
- Partner with medical institutions and related organizations to provide better access to healthcare and education concerning healthy lifestyles and better health outcomes.
- Work with partners to identify and address public health problems.
- Partner with healthcare providers, including those at the Anschutz Campus, to promote health and fitness.
- Support community events and activities that foster community building and enhance the quality of life for Aurorans.

Public Safety

- Continue to support public safety through responsive police, fire and code enforcement services.
- Improve safety through neighborhood planning, resident involvement and enforcement of city codes and ordinances.
- Consider public safety and health when designing public spaces, facilities or other community gathering places.
- Maintain a high level of community resilience by planning and preparing for natural and manmade disasters or events.

A **THRIVING** ENVIRONMENT

Principle: A thriving natural environment – including stewardship of water, energy and natural area resources – is essential to the physical and mental wellbeing of residents and the city's ability to support future growth.

GOALS:

1. Implement water supply and storage projects, as well as conserve and protect existing water resources.
2. Conserve and efficiently use energy resources.
3. Protect valuable open space and natural areas.
4. Require that new development or redevelopment provides and maintains attractive, healthy and water-efficient landscaping.
5. Implement water-wise land use practices in new development.

RECOMMENDED PRACTICES:

Placetypes

- Pursue opportunities to use district-wide approaches to water and energy conservation in all placetypes.
- Encourage transit-oriented development to provide alternatives to auto traffic and improve air quality.

Connecting Places

- Concentrate development and provide walking, bicycling and transit choices to reduce distances between destinations and mitigate automobile traffic.
- Preserve, enhance and connect open space corridors to increase green space, connect habitats, enhance the trail system and improve drainage.
- Use trails and linear parks to connect placetypes.

Environmental Improvement

- Improve the community's understanding and acknowledgment of the role a healthy environment plays in creating a successful community.
- Protect sensitive lands, wildlife habitats, and unique natural areas, such as Black Forest in southeast Aurora.
- Use neighborhood- or district-wide approaches for energy, water, and resource conservation.
- Promote resource-efficient development by incorporating energy and water conservation and renewable energy.
- Utilize innovative environmental practices to reduce the amount of water used for landscaping while providing quality landscaping and shade trees.
- Use green stormwater infrastructure to slow and clean stormwater while providing the benefit of green drainage facilities and corridors.
- Encourage net-zero approaches to development. In net-zero development, the energy used after development does not exceed the energy used before development.
- Incentivize renewable energy generation, storage and efficiency in new buildings, neighborhoods and development. The city can lead by example by integrating these best practices into public facilities.
- Plant water-wise shade trees to provide shade to people and property.

AN **AUTHENTIC** AURORA

Principle: The creation of great places, the preservation of traditionally unique places and effective marketing and promotion are essential to improving Aurora's image.

GOALS:

1. **Create distinctive destinations that attract people from around the region and the world.**
2. **Protect the character and quality of established neighborhoods and districts throughout Aurora. Proactively prevent decay, decline or disinvestment within the community.**
3. **Use high-quality community design to create vibrant and active places where people choose to live and work.**
4. **Promote Aurora's welcoming, diverse neighborhoods and parks and open space system as key reasons to live in or visit Aurora.**
5. **Use Aurora's heritage and historic resources as a basis for community events, urban design and community pride.**
6. **Use diverse cultural resources and the arts in urban districts and other placetypes to create destinations.**

RECOMMENDED PRACTICES:

Placetypes

- Create intensively developed urban districts with a mix of residential and commercial uses focused around great public spaces where people can live, work and come together.
- In urban districts, innovation districts, commercial hubs and city corridors, use coffee shops, restaurants, outdoor spaces, recreation centers, shared work spaces and community gathering places to promote natural interaction between people.
- In urban districts, commercial hubs and other placetypes create outdoor spaces that are appropriately sized and surrounded by active uses to create around-the-clock places.
- In urban districts, innovation districts and other placetypes, create design themes based on diverse culture, art or other themes in order to create recognizable identity.
- Program community events and entertainment in public spaces.
- Emphasize the unique character of neighborhoods with community spaces, neighborhood commercial centers, art and design.
- Treat TOD areas as key entry points to the city with quality urban design, public art and innovative businesses.
- Use high-quality and innovative architecture and design to create interesting and valuable places.
- Create active destinations and districts in Aurora for arts, high-quality entertainment and nightlife. Pursue opportunities to attract or enhance regionally recognized public or private venues for arts, culture, recreation and entertainment.
- Support and celebrate Aurora's strong international and cultural restaurants and shopping districts. Protect and leverage these unique resources to support reinvestment and development within Urban Districts, Commercial Hubs and City Corridors.
- Protect and highlight Aurora's cultural and historic resources and places.
- Continue to support the inclusion of public art throughout the community. Incorporate distinctive art and design as a defining feature of community gathering places.

Connecting Places

- Enact standards that require streets that are safe, comfortable and attractive by including quality landscaping and pedestrian design.
- Continue to limit the numbers of signs on major streets to avoid a cluttered appearance and continue to require quality design for sign structures.
- Locate buildings close to streets and public spaces to create high levels of pedestrian activity.

The Image of the City

- Build upon the city's successful marketing campaign touting Aurora's superior quality of life to attract businesses, new residents, professionals, developers and investors.
- Promote the parks and open space system as a great reason to live, work and play in Aurora.
- Attract major regional sports, entertainment or tourism destinations to Aurora.
- Promote and encourage local and independent businesses that reflect Aurora's unique community identity.
- Support and partner with Aurora's school districts, institutions of higher education and other education providers to assist with the provision of high-quality education.
- Survey, evaluate, preserve and enhance historical resources to add special character to urban districts, neighborhoods and other districts.
- Encourage high-quality public events throughout the city.

1958

EASY **MOBILITY** AND **ACTIVE** TRANSPORTATION

Principle: An easy-to-use transportation network with multiple choices for travel supports a strong economy, healthy community and flourishing environment.

GOALS:

1. **Deliver a multimodal transportation system that serves the diversity of people that live, work, and visit Aurora. This system should serve people with safe, connected, reliable, and convenient mobility choices.**
2. **Create a transportation system that supports overall city goals, including fiscal sustainability, economic impact, community health and environmental goals.**
3. **Strengthen the community with transportation choices to meet its diverse needs. Integrate the land use and transportation planning and design to create a place-oriented city in which people can readily access jobs, housing, services, and recreation.**
4. **Design infrastructure that contributes to the creation of these great places.**
5. **Successfully balance and integrate the various modes of transportation in a context-sensitive way. Establish plans, codes, policies, and practices that prioritize desired outcomes for network users and development types.**

RECOMMENDED PRACTICES:

Placetypes

- Plan and deliver a multimodal transportationsystem that is context-sensitive and balances modal priorities according to placetype designations. This applies equally to new development, redevelopment, or retrofitting established areas to improve mobility.
- Strategically focus transportation investments in urban districts, transit-oriented development areas, and other walkable,-mixed-use districts.
- Promote transit-oriented development (TOD) and prioritize intense development along high frequency transit corridors.
- Emphasize walkability, mixed land uses, and higher densities near stations and transit corridors. Ensure that private development and public improvements in these areas conform with adopted station area plans.
- Prioritize walking and biking through design and improvements in urban and mixed-use districts and along main streets in all placetypes. Ensure that neighborhoods and other commercial districts provide safe, convenient options for walking and biking.
- Locate industry hubs near major highways, rail lines, and street networks that can accommodate trailer trucks for quick and easy shipping that does not disrupt non-commercial traffic.
- Locate industry hubs in the Aerotropolis area to capitalize on immediate access to the airports.

Connecting Places

- Connect urban and mixed-use districts to neighborhoods using transit and safe and comfortable pedestrian and bicycle routes.
- Develop street grids with blocks small enough to encourage walking and to maximize the potential for development, particularly in urban districts and transit-oriented development (TOD) areas.
- Design street networks to separate industrial traffic from local traffic.
- Incorporate vehicle, pedestrian and bicycle connections within and connecting to between adjacent placetypes. Provide alternative routes for local traffic other than through major roads and intersections.
- Enhance walking and biking connections between neighborhood placetypes and parks, trails, open space, and recreation facilities.
- Support the "Our Parks, Our Places" plan's priority recommendation to achieve a 10-minute walk standard connecting neighborhoods and parks and open spaces.

Transportation and Development

- Apply a complete streets framework to guide design of streets and street networks to prioritize safe, convenient, and comfortable travel for all users.
- Require that new development provides complete street connections with frequent connections to major streets. In cases of redevelopment, connectivity should be improved as retrofit opportunities are identified.
- Align land use codes and other relevant design standards and documents to ensure that development is designed to support multimodal transportation and connectivity. These codes should include context-sensitive design principles and support complete neighborhoods and mixed-use districts.

- Support the installation of enhanced public lighting and technologies in select commercial or mixed-use districts, especially urban districts and transit-oriented development (TOD) areas.
- Integrate traffic calming design improvements into new development or redevelopment as part of its original construction to mitigate the needs for expensive or challenging post-development installation.
- Consider impacts of private and/or limited-access streets on overall street connectivity goals.

Parking

- Discourage or disallow parking lots along major street frontages, particularly in city corridors, commercial hubs and urban districts.
- Utilize parking best practices, such as shared parking, lot sizing and peak parking overflow areas to conserve valuable land and reduce development costs.
- Require that parking lots are attractive and efficient by including walkways, landscaping and appropriate lighting.
- Continue to maintain strong partnerships with the Regional Transportation District (RTD) and the Colorado Department of Transportation (CDOT).

Planning and Maintenance

- Integrate land use and transportation in planning, design, construction, and operation of mobility infrastructure and services.
- Incorporate multimodal safety and convenience best practices into traffic analyses and standards. Integrate multimodal level of service considerations into policies and practices.
- Develop citywide transportation plans that include analytical approaches to identifying the most critical investments that can be made to improve the function of the overall transportation system.
- Support transportation demand management (TDM) to shift travel behavior away from single-occupancy vehicle use towards more sustainable modes such as transit, biking, walking, or carpooling.
- Consider innovative partnerships with non-traditional transit providers, such as major employers or public agencies, to provide expanded services.
- Administer a program for annual maintenance funding of new and existing city-owned transportation infrastructure, as well as replace cost funding. Identify and adopt dependable revenue sources for transportation maintenance and improvements.
- Research and prepare for technological advances in transportation, including autonomous vehicles, intelligent transportation systems, microtransit, shared ride, on-demand services and continued growth of EV use.
- Collect and analyze multimodal data and use it to shape future investments in infrastructure and services.
- Monitor and evaluate progress toward Connecting Aurora plan implementation and desired community outcomes. Compile relevant data into a dashboard for periodic assessment.

Motor Vehicles

- Update best practices, guidelines, and metrics related to street and traffic design.
- Use context-sensitive approaches and data to set speed limits, particularly on pedestrian-priority streets.

Pedestrians and Bicycle Users

- Provide regularly located, safe and comfortable crossings on major streets and in proximity to key destinations.
- Install new sidewalks and widen existing sidewalks as part of redevelopment or capital improvement projects. Pursue grant funding to support these improvements.
- Add or upgrade bike lanes to appropriate streets, separated from automobiles, to create a fully connected bicycle system. Utilize trail connections to augment the city's bicycle network.
- Expand the city's "low stress" bicycle network.
- Continue to explore implementation of micromobility opportunities.

Transit Services

- Expand the city's frequent transit network through investments in transit service frequency, facilities, and transit-supportive land use and design.
- Work with RTD to improve bus speed, reliability, and user experience. Support expansion of transit services to unserved or underserved areas of Aurora.
- Advocate for affordable fares, refined transit connection timings, adequate bus shelters, and other transit improvements.
- Provide a range of economically viable transit and shuttle services, such as those with flexible routes and schedules, for high-activity areas and employment centers.
- Improve first and last mile connections to transit stations and corridors.
- Expand transit-supportive land use and zoning to support transit ridership and investments.
- Expand transit access to and from east and northeast Aurora as the area fills out with housing and employment.

Freight Transportation

- Administer best practices and appropriate codes and standards to regulate vehicle access to destinations, on-street loading zones in high-demand areas and accommodate deliveries to commercial and residential properties.
- Build freight-focused mobility hubs with truck parking and services to serve industrial centers. Ensure industrial development provides adequate short- and long-term truck parking.

Interagency Coordination

- Continue to maintain strong partnerships with the Regional Transportation District (RTD), the Colorado Department of Transportation (CDOT), and County transportation departments.
- Work closely with local school districts to create safe routes to schools.
- Comply with applicable local, State, and Federal laws related to disability rights and accessibility as they pertain to the city's mobility services, programs, activities, and infrastructure.

Aging Population

- Develop incremental programs for the improvement of deficient sidewalks. Ensure that sidewalks can accommodate wheelchairs, walkers, and other mobility devices.
- Identify street crossings that are difficult for seniors and prioritize improving sidewalks, signal timing, and crossing design. Prioritize enhanced connections that provide direct access to transit or in proximity to destinations or services frequently used by older adults.
- Provide improved transit stations and bus stops that meet the needs of seniors with appropriate seating, and shelter, and safety improvements.
- Support targeted transportation services to serve older adults, connecting them with the destinations and services they regularly need.

1962

1963

ACTION STRATEGIES

It is not sufficient to simply prepare and adopt a new plan for our city. Actions and procedures need to be established to ensure that the plan's recommendations are carried out and the community's the vision is realized. An actions program should be created and trends should be measured over time to ensure that it achieves the desired results.

City staff within appropriate departments should provide regular reports to city management, the Planning and Zoning Commission, City Council and the community describing trends and program results. Based on these reports the Commission and City Council may direct changes in policies and programs.

Our city continues to change as it grows and develops. Plans, recommendations and strategies will need to be adjusted over time. City staff will accept the responsibility to undertake the recommended actions and policies, evaluate results and recommend adjustments to strategies. This chapter describes tools that can be used to implement the recommendations of Aurora Places and a specific program of actions to be undertaken immediately.

TOOLS

Aurora Places is the policy guidebook for growth and development throughout the city for the next 20 years. Chapter 6 outlines recommended policies and practices to achieve the goals outlined in the plan. This chapter lays out a framework that can be used as a first step in implementing the policies.

This chapter also defines tools the city and its partners can use to implement the plan and realize the community's vision for Aurora.

Capital Improvements Planning

To ensure that the city is planning ahead for its infrastructure and facility needs, it is common practice for cities to maintain a five-year capital improvement plan (CIP). The CIP provides the basis for capital expenditures in the current budget. The plan should be reviewed and updated annually to assess changing conditions, priorities and how the identified projects address the vision and goals of the comprehensive plan. According to the Aurora City Charter, the Planning and Zoning Commissions should review and provide recommendations regarding the CIP to ensure it supports the goals and recommendations of the comprehensive plan.

In Aurora, the Capital Projects Fund (CPF) provides support for general government capital projects. Additionally, an enterprise fund for water, wastewater and stormwater funds some utility infrastructure projects.

Partnerships

There are limits to what the city can afford to finance. At the same time, there are often special costs associated with the types of development that the city needs to attract. Targeting a variety of new types of development to provide job growth, revenue-generating retail, affordable housing, renewable energy and transportation improvements will help create urban places. The special costs associated with these beneficial projects can include transportation improvements, land acquisition, building rehabilitation, environmental work or special aesthetic enhancement. The city can more effectively meet its goals by leveraging capital improvement funding, urban renewal financing, grants and other sources with private funding. The city should pursue and maintain special partnerships with property owners, developers, businesses, nonprofit organizations, government agencies, large institutions and other parties.

Neighborhood and Area Planning

Aurora continues to plan for smaller areas of the city, including neighborhoods, urban centers and mixed-use districts, strategic urban renewal areas and transit station areas. By creating neighborhood and area plans, the city can address more specific or local issues associated with particular neighborhoods and areas. Using this method, goals and programs can address the needs of specific areas.

Neighborhood and area planning will include more methods to involve residents and businesses of all cultures and backgrounds in planning for their locations. This involvement may be through workshops, local events or the establishment of local committees. Such methods can support continued citizen involvement in development processes and in programs for the areas. The city should continue to initiate plans in areas that do not currently have a plan and regularly review and update existing plans.

Land Use Regulation

Like other cities, Aurora regulates the use and development of land. The city's zoning code includes the zoning designations that describe which uses of land are allowed in different portions of the city. The code also includes standards governing various aspects of development, including building heights and spacing, street construction, the design of public spaces, and overall site or neighborhood layout. Additional codes and regulations also govern the construction of buildings or integrate water or energy best practices with land use planning and development review.

The ordinance should be used to implement the goals and policies described in the Aurora Places plan, including the availability of urban places for job creation, increasingly diverse housing options, resource conservation, improved transportation, an attractive appearance and an improved image. Building regulations require that structures are safe, durable and energy efficient.

Technology and Data Solutions

The city will leverage data and technology solutions to achieve goals and efficiently meet policy objectives. Aurora is a "smart city" that uses data strategically to inform decisions, understand challenges, and effectively identify solutions in the areas of transportation, engineering, communication, public services and economic development. Advanced technology offers new opportunities for managing the city's key functions, delivering services to the community and connecting with residents.

Infrastructure Planning

The city is responsible for providing adequate streets, water and sewer facilities, parks and open space and other public facilities. In many cases, this responsibility is assigned by land use regulations to new developments. Aurora can use the provision of infrastructure to support the goals and policies in this plan.

Urban Renewal

Aurora creates urban renewal areas in the city to eliminate blight and plan to prevent its reoccurrence in identified locations throughout the city. Urban renewal plans are created for each area describing how blight conditions will be alleviated and creating a neighborhood vision to guide future development. The Aurora Urban Renewal Authority, primarily composed of the mayor and Aurora City Council members, governs urban renewal efforts in Aurora. Three additional members representing the school districts, county governments and other property taxing entities are expected to be added in the near future to bring the board into compliance with current state law.

An urban renewal project is a public/private partnership intended to stimulate a development project that would not otherwise happen without public support. The private sector funds the majority of the investments required to redevelop urban renewal areas. Funding for public investment comes from tax increment financing (TIF) revenue, which is the increased amount of property tax or municipal sales tax revenue collected within the Urban Renewal Area resulting from redevelopment projects. This public financing is used to address particular needs associated with redevelopment such as infrastructure improvements, public spaces and parking.

Aurora Places Report and Review

The Planning and Development Services Department will regularly prepare a report for the Planning and Zoning Commission, city management and the Aurora City Council outlining progress toward the goals and aspirations of the plan. The report should include the following:

- Information on key community trends and changing conditions.
- A progress report on each of the key actions below, including improvements in the related measurements.
- Identification of new actions to be undertaken.
- Recommendations on amendments to the Aurora Places Plan.

Measurements

To effectively meet the goals, the city will need to monitor various performance measurements concerning the state of the city and adjust its policies and programs in accordance with changing conditions and trends. These measurements should be employed to determine whether the actions recommended are effective in achieving the goals of the city. It will be increasingly critical to measure trends, including average incomes, job growth, development, the composition of the population, energy and water use, traffic safety and congestion. Each project employed to achieve the goals of this plan should include recommended measurements.

IMPLEMENTATION ACTION MATRIX

The following Implementation Action Matrix suggests actions and projects that may be taken in the near term to implement Aurora Places recommendations. The matrix recommends specific actions and projects to be undertaken in the next several years. This matrix should be reviewed, updated and revised periodically as a part of the annual Aurora Places report. Most of the actions described will be multi-departmental.

Priorities identified during the planning process are focused around key topics:

- Strong Economy
- Diverse and Equitable City
- Housing for All
- Healthy Community
- Thriving Environment
- Improved Mobility and Active Transportation
- Authentic Aurora

Principle	Action Title	Action Description
All	**Aurora Indicators**	Develop and monitor a system of community indicators concerning changes in demographics, the economy, health, transportation, the environment and other issues described in the comprehensive plan. Use the indicators to measure overall success and to refine strategies when necessary. Include this information in the Aurora Places Comprehensive Plan update report.
All	**Area Planning Program**	Enhance Area Planning Programs. Develop studies, analysis and plans for neighborhoods, urban districts, commercial corridors, employment centers and other subareas of the city where plans do not currently exist. Existing area plans should be updated to account for changes in conditions and opportunities. Each program will identify and prioritize target areas for future planning and development based on agreed upon criteria.
Strong Economy	**Economic Development Strategic Plan**	Work with economic development partners to develop a strategic plan to further refine the city's economic development policies and practices and to pursue the goals of the Aurora Places plan. The plan may incorporate market analyses; assessment of development capacity; available sites and targeted areas and economic sectors; retail strategies; best practices in coordinated or cooperative partnerships; incentives tools and policies; and other critical considerations.
Strong Economy	**Fiscal Impact Analysis Modeling Tool**	Update the city's tools for providing fiscal impact analyses for use by City Council to evaluate requests for annexation, zoning changes, development incentives or other development proposals. Evaluate inclusion of a housing impact element as part of the analysis.
Housing for All; Strong Economy	**Aurora Housing Strategy**	Update the 2020 Aurora Housing Strategy. Reassess the comprehensive set of recommendations and strategies to address the short- and long-term housing needs of the community, including, but not limited to: homelessness, displacement, transitional housing, workforce housing, mobile or manufactured housing, condominium development, mixed-income housing and other homeownership opportunities. Integrate opportunities in future neighborhood or area plans.
Improved Mobility and Active Transportation	**AuroraLine (R Line) Transportation Management Association**	Work with DRCOG, RTD and major businesses along the Aurora Line (R Line) to evaluate the establishment of a corridor-wide Transportation Management Association (TMA). Focus on promoting the R Line, including marketing the service, reducing congestion, fine tuning service and connection times, increasing transit ridership and providing first-mile, last-mile mobility options such as bike sharing and car sharing to various stations along the line.
Improved Mobility and Active Transportation	**Northeast Area Mobility and Accessibility Program**	Identify and pursue funding sources for improving mobility and accessibility in the northeast area, with a specific focus on connectivity. Construction of the I-70/Picadilly interchange to support the economic activities of e-commerce, fulfillment centers, warehousing and logistic industries in the area.
Improved Mobility and Active Transportation	**Complete Streets Framework**	Adopt a Complete Streets Framework and create a complete streets design guide to prioritize safe, convenient, and comfortable travel for all users–regardless of age, ability, or mode of travel. This includes incorporating sidewalks, bicycle lanes, protected crossings, accessible transit stops, and traffic calming measures in all projects. The framework guides all phases of project delivery, including planning, design, construction, and maintenance.
Improved Mobility and Active Transportation	**Transportation Impact Study (TIS) Guidelines**	Update current TIS Guidelines to incorporate multimodal safety and convenience best practices. In the future, consider alternative methods for measuring multimodal level of service. The policy supports project evaluation across modes.
Improved Mobility and Active Transportation	**New Development and Redevelopment Requirements**	Update the Unified Development Ordinance (UDO) and other city land use codes / relevant documents to ensure that new developments and redevelopments are designed to support multimodal transportation, connectivity and maximize transit investments. The policy includes context-sensitive design principles and supports complete neighborhoods.
Improved Mobility and Active Transportation	**Designing Streets for Safe Speeds**	Where appropriate, use context-sensitive approaches and data to consider setting speed limits, particularly on pedestrian priority-streets. It aims to reduce crash frequency and severity, particularly, but not only for people walking and biking.

NOTE: *Items listed above are recommended actions. Prioritization, funding, and initiation of these activities are subject to future direction by City Council or city management.*

Principle	Action Title	Action Description
Improved Mobility and Active Transportation	**High Frequency Transit Corridors & Transit-Oriented Development**	Encourage transit-oriented development along high-frequency transit corridors, emphasizing walkability, mixed land uses, and higher densities near stations. It aims to maximize the benefits of transit investments by increasing ridership and supporting economic development. Tools may include zoning changes, and/or financial incentives.
All	**Aurora Places Review and Report**	Prepare a report for the Planning and Zoning Commission, city management and the Aurora City Council outlining progress in plan implementation. The report should include the following: information on key community trends and changing conditions; a progress report on each of the key actions in Chapter 6, including improvements in the related measurements; identification of new actions to be undertaken and recommendations on amendments to the Aurora Places Plan.

NOTE: *Items listed above are recommended actions. Prioritization, funding, and initiation of these activities are subject to future direction by City Council or city management.*

CM Horton asked if there are mechanisms being designed into the infrastructure for people to navigate physical disabilities.

C. Campuzano stated there will be tactile strips for the visually impaired to note where they are entering the roadway, but she was not sure about any other audible indications RTD may have. She said they would look into that.

CM Horton inquired if there was opportunity to include the "World in a City" branding on the Aurora side.

L. Perry stated they would absolutely look into doing that.

CM Horton clarified they are not having two bus lanes.

C. Campuzano explained there are still two lanes of traffic in each direction, but it depends on the stop. She stated some areas have a space for a bus pullout, but they have on-street parking through a lot of their area in Aurora, so there will basically be two travel lanes and then buses will typically be in their pullout space.

CM Horton asked if there will be a breaking ground ceremony.

C. Campuzano answered yes, but they need to nail down a date.

Outcome:
The Committee recommended the item be presented to Council at Study Session.

Follow-up Action:
The item will be presented at the next available Study Session.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Overview

Summary of Issue and Discussion:
Keith Borsheim, Project Manager for HDR, lead consultant on the Connecting Aurora Multimodal Transportation Master Plan, stated that this is the city's first opportunity to create an overall citywide multimodal transportation master plan. It will align and support the goals of Aurora Places and is intended to be adopted as part of the city's comprehensive plan through an amendment. He said the key goals for the project are to be innovative and adapt to a changing transportation landscape. He noted this is a long-term plan and many projects have been identified throughout this plan and process. The project team took a four-phased approach to develop the plan and recommendations, which included discovery, synthesize, visualize, and realize phases. He went over the timeline and process for the master plan, the engagement activities, and the overall engagement results. He discussed the state of the system reports, with the top outcome being the identification of safety challenges, as well as mobility challenges. He noted that certain demographic groups have a higher propensity to use transit, and the top transportation concerns they heard from people were they feel it is unsafe to travel outside of a car, bottlenecks and dangerous driving behaviors, destinations in Aurora are too far apart to reach comfortably by walking and biking, lack of connection to services and destinations, desire to have higher quality streets and places, and transit is too slow, infrequent, unreliable, and feels unsafe.

K. Borsheim went over the vision and mission statements, as well as the ten goals developed by Connecting Aurora. He stated that the project team analyzed three possible futures for Aurora, which include a car-oriented city, a transit-oriented city, and a neighborhood-oriented city. The public expressed that transit-oriented and neighborhood-oriented cities were preferred to improve quality of life, and a car-oriented city would keep the quality of life either the same as today or worse. He voiced that the analysis and public input led to a fourth scenario, called the place-oriented city, which includes key aspects of transit-oriented and neighborhood-oriented scenarios. The place-oriented city is Aurora's desired future, and consists of increasing the number of convenient, affordable, and safe mobility options, emphasizing the need to concentrate on the destinations within and near neighborhoods, imagining investments in walking, biking, and transit infrastructure, and focusing on making those modes of transportation safer and more accessible, and using land efficiently and productively. He explained they used that model to help develop visionary networks, which include pedestrian, bike, transit, auto, and freight networks. He stated that the completion of all projects recommended by the plan will be expensive, and the city will need to fund them through active participation and partnerships over many years, which is a key aspect of this plan. He shared that the plan also includes five new or updated policies, 12 new or updated programs, and over 900 individual project elements.

K. Borsheim went over the short-term projects, including Microtransit, intersection upgrades, complete street projects, bikeway projects, closing missing sidewalk gaps, and safety and technology improvements. He added that the total investment is $45 to $65 million per year for the next 10 years, not including maintenance. He stated they plan to submit the final plan to City Council for adoption in April.

Committee Discussion:

CM Coombs commented that, in looking at the short-term projects, the majority of them are road projects and not bikeway, pedestrian, or transit projects, and the definition of roadway projects was primarily capacity projects.

K. Borsheim responded that it is generally correct; however, he would put many of the roadway projects into the Complete Streets category, as they are planning to include the construction of adjacent sidewalks to go with those projects in many of them.

CM Coombs noted one of the main priorities from the public engagement was slowing down the traffic. She asked if that was part of these projects.

C. Colip answered on the Complete Streets portion, they are looking at a variety of areas where they only have half a street built and no sidewalk on the other side, but the goal is to make that a complete street that could be a function of both sidewalks adjacent to both sides and bikeway parking.

CM Coombs inquired if they do or do not slow down traffic.

C. Colip responded it should slow down traffic because they would have narrow lanes to drive in, as long as people obey the rules.

C. Campuzano added the scope is different for each project. She said there are a lot of constraints in the built-out areas of the city where their right-of-way is and how much width they have. However, she expressed that most of the street projects do not include lane expansion, with the exception of Gun club Road.

CM Coombs asked if they include sharrows and single painted shoulders of roads when they say Complete Streets or if they are talking about the protected bike lanes.

C. Colip shared their goal is to put in separate bikeways with possibly a curb, but there are some locations where they may not be able to do that due to right-of-way constraints. The goal is to repurpose that portion of the road, so it is safe for all modes of travel.

C. Campuzano noted all the projects have a shared use path that is meant to be shared. However, she said they have gotten a lot of negative feedback from residents about sharrows, so there are no sharrow projects.

K. Borsheim said they are slowing vehicles down, and a key outcome of this process is the Complete Streets Design Guidelines, where they have identified updates, they want to include in the city's design standards, and most of those updates are focused on slowing things down. He expressed that bikeway design is really dependent on speed of the roadway and the volume of traffic they see on a road, and the higher the speeds and volume, the more separation of protection they need for cyclists.

CM Coombs stated the images shown related to neighborhood or place-based design seemed to be gridded blocked streets, but the vast majority of Aurora streets are not gridded and blocked. She asked how they are looking to navigate connectivity in their roadway network and what future development and roadway design looks like in addressing that.

K. Borsheim answered generally a grid system provides a greater level of connectivity and more options for people and designers of the roadway network to provide bikeways not along arterials, so the desire for the city moving forward is to provide more of a grid system. He said there will be greater connectivity for pedestrians and bicyclists, and there may be some places where street connectivity does not go through an area, but pedestrian and bicycle connectivity does.

J. Rustad added that parallel with this project, they are working on analyzing small lots and their zoning codes, and few of their guiding principles have been connectivity. She stated that as they are building smaller lots and more houses, they want to make sure people have connectivity and protection along the public route. She said they are currently looking at creative ways that currently are not in code to allow for that.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

---

5. MISCELLANEOUS MATTERS

K. Muehlemeyer explained they overlapped with the Management and Finance Policy Committee by half an hour. He gave the committee the options to keep the meeting the same day but either move it up to 12-1:30 p.m. or move it later from 3-4 p.m.

winter of 2026, and construction to start spring of 2027 and completed by end of 2027.

Does the Committee support moving forward with the Resolution for the Intergovernmental Agreement between the City of Aurora and the E-470 Public Highway Authority regarding funding, design, construction and maintenance of temporary traffic signals at Stephen D. Hogan Parkway and E-470 to the next available Study Session.

Committee Discussion:
None.

Outcome:
The Committee recommended the item move forward to Study Session.

Follow-up Action:
Staff will move the item forward.

4.b. CONNECTING AURORA - AURORA CITYWIDE MULTIMODAL TRANSPORTATION MASTER PLAN UPDATE

Summary of Issue and Discussion:

Huiliang Liu, Principal Transportation Planner, stated that this will be the last project update on Connecting Aurora before it is presented to the TAPS Committee for the adoption process. Keith Borsheim, HDR Project Manager, presented the project update, which included a public engagement update; proposed policies, programs and projects; and the final plan adoption timeline. The Connecting Aurora project started two years ago. The project team started by studying existing challenges in the City and how those might change in the future. The project team then explored possible futures for the City through scenario planning, and identified a preferred place-oriented future for the city. The place-oriented city was analyzed, and visionary networks were created for each travel mode, which include biking, walking, transit, driving, and freight.

The bulk of this year was spent drafting policies, programs, and project recommendations. There were four rounds of major engagement milestones throughout the process with the public, which included over 800,000 touchpoints. Over 10,000 people visited the website, including 1,500 in October. 2,500 people filled out surveys, including 700 comments on online maps. There were over 500 attendees at open houses and public roundtables, and 150 people attended virtual town halls. There were also 580 touchpoints during various community and pop-up events.

The engagement process showed that people feel unsafe traveling outside of their cars. When driving, they experience bottlenecks and observe dangerous driving behavior. People feel destinations in Aurora are too far to walk or bike to, and that there is a lack of connections to those destinations. There is a desire to have higher-quality places and streets. Public transit is too infrequent, unreliable, and sometimes feels unsafe.

The most recent round of public engagement showed there was general support for the draft policies and programs. Map comments were received from all over the City. Survey responses varied from 65% to 75% support for the policies, programs, and projects that were presented to the public.

The policies and frameworks include a complete streets framework, which is a way for the City to ensure streets serve everyone, no matter how they choose to move throughout the City. Staff is also recommending an update to the Transportation Impact Study Guidelines to align with industry best practices. Other recommendations include updating requirements for new development and redevelopment which may take the form of updates to

the Unified Development Ordinance; designing streets for lower speeds; and focusing on high-frequency transit corridor development and improvements.
There are 12 new or updated programs, which include maintaining and updating Geographic Information Systems; transit programs such as bus stop amenity improvements and making sure buses move efficiently; safe sidewalk and bike programs; expansion of the resurfacing programs; and expanding the maintenance program. The programs are explained in detail in the final plan.

To build the visionary networks that were created, over 1,000 individual project elements have been identified, which include over 70 intersection improvements, 27 bridge and interchange projects, over 100 new or upgraded signals, 31 street widening and traffic calming or safety projects, over 350 miles of bikeways including trails, 111 miles of sidewalk upgrades, over 300 bike and pedestrian crossings, and 23 multimodal transit corridors. The narrow sidewalks in many older neighborhoods are not included in the 111 miles of sidewalk projects. Many of the recommended projects will be paid for by others as development occurs.

Maps of street projects, sidewalks projects, bikeway and trail connection projects and transit projects were shown and reviewed.

The plan adoption timeline was presented. Staff are currently going through review cycles of the final plan draft and addressing comments received. The plan will then be posted for public comment early next year. The final plan will be submitted to TAPS and the Planning Commission in the March/April timeframe for City Council adoption.

Committee Discussion:

Councilmember A. Lawson asked how these things are going to be implemented and wants to make sure that it is not just a document sitting on a shelf and asked if it is a living document that can be updated. K. Borsheim responded that they have taken the project list and created project packages and prioritized the projects into short-term, medium-term and long-term that aligns with the City's other master plans. There are around 400-million-dollars' worth of projects on the short-term, 0-to-10-year timeframe. There are several projects identified for the medium, 10-to-15-year timeframe. It is a recommendation of the plan that the City regularly updates the plan and revisits the recommendations from the plan on a periodic basis.

Deputy City Manager L. Perry stated that all of the work on Connecting Aurora will bleed into the Build-Up Aurora conversation. The Infrastructure Task Force will hear a presentation on transportation needs at its meeting tomorrow. This master plan will serve as a framework for capital planning for their annual budget, for grant pursuits and for bond programs. They are longstanding documents that evolve with the City, and require updates. There is the city's Comprehensive Plan and master plans for development and other documents that govern what is constructed in a development and the construction requirements.

Councilmember Lawson stated that when they did the Northeast Aurora Transportation Study (NEATS), she remembers that that was a big study that cost over $500,000 and she has not seen a lot of utilization of that. She wants to make sure when they do these studies and this work that it is implemented not only now but in the future.

Chair Hancock agreed with Councilmember Lawson and added that she wants to see the fruits of their labor and hard work. She asked if people were leaving comments online. K. Borsheim responded, yes, that 700 comments were received, and one interesting thing about those comments is that they are really focused.

Senior Transportation Planner Tom Worker- Braddock, stated that staff and the development community regularly use the NEATS study to guide development in northeast Aurora and it provides a lot of information on what roadways and trail connections they expect to see, and Connecting Aurora will do a similar thing but on a

broader City level.

J. Rustad, Director of Planning and Business Development, stated that this will be adopted as part of the Comprehensive Plan, and in addition to the Roadway Manual Updates, there will be UDO updates to ensure implementation of the plan.

Councilmember Lawson responded that, during the NEATS study, there was a lot of controversy regarding the cost of the study, and she is glad that some things have been implemented and thinks more things should be implemented.

Chair Hancock commented that one thing unique about Aurora is they have so many highways that cut the City up into slices, and they are trying to pull that all together to make it feel like the connectivity is there, but it is a challenge.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

4.C. 2025 TRANSPORTATION, AIRPORTS AND PUBLIC WORKS COMMITTEE RECAP

Summary of Issue and Discussion:

Chair Hancock wanted to highlight the biggest accomplishments over the last year as a Committee. Carlie Campuzano, Deputy Director, Transportation Mobility, Public Works Department, responded they have gotten a lot done this year and a lot of things were completed through partnerships with other agencies. RTD was mentioned. Chair Hancock suggested having an annual update from RTD.

Senior Planner H. Liu responded that the Master Plan update is the most important project but there have also been a lot of collaborations and partnerships with agencies, such as RTD, CDOT and neighboring jurisdictions. T. Worker-Braddock mentioned the Older Adult Transportation System where they partnered with RTD. The program is called Aurora Rides and will launch in December and will be a free service for people 60 years of age and older. Chair Hancock thanked Councilmember Lawson and noted her work with the Center for Older Adults and that project was her baby. Councilmember Lawson responded that she hopes to continue to be on the Committee, and she hopes that they can get updates about how things are going and working. Chair Hancock thanked Deputy Director C. Colip regarding sidewalks. C. Colip gave an update on future sidewalk projects.

The Committee thanked Vice-Chair and Councilmember A. Kassaw for his service on the Committee and to the City.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

CM Lawson, CM Kassaw, and CM Hancock approved moving the resolution forward.

Outcome:
The Committee recommended the item move forward.

Follow-up Action:
Staff will move the item forward.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:
Huiliang Liu, Principal Transportation Planner, Co-project manager, introduced Keith Borsheim, with HDR Consulting, the consultant Project Manager, to provide an update on Connecting Aurora, the city's Multimodal Transportation Master Plan. K. Borsheim gave a reminder of the vision, mission, and goals of the plan. He went over the April engagement activities conducted by the project team, including four main public events, a virtual town hall, Engage Aurora Live! a roundtable discussion, and an online open house. He added that they also had over 10 popup events, including four city employee-specific engagement events, and a persons with disabilities and their caretakers focus group. He presented what they heard from the public during the engagement activities. He stated that the visionary network, including bikeway, sidewalk, transit, and street networks, are generally supported by the public. He explained that they also presented 10 investment categories, which is where the public was asked where the city should put its money over the next 30 years. The top three supported by the public were bikeways & trails, pedestrian infrastructure, and street capacity. He provided an overview of the visionary network, which is a long-term network with a complete street's emphasis intended to address mobility needs, drive network design and project development, and reflect the city's overall vision. The visionary pedestrian network reflects the need that every city street must safely and comfortably accommodate pedestrian movement particularly near schools, transit stops, and commercial areas, and will include filling gaps in sidewalks, widening sidewalks where needed, and providing safe crossings particularly along major roads. The visionary bike network includes improvements like separated bike lanes, shared use paths, new crossings to make biking safer, more viable, and a more attractive transportation option, and bikeway benefits also include a healthier and most sustainable community. The visionary transit network prioritizes service expansion, higher frequency, infrastructure improvements, and high-capacity transit investments, which could include dedicated bus lanes on major arterials and providing nicer transit stops or mobility hubs. Regarding the visionary auto and freight network, the city will continue providing safe and convenient automobile travel, and this plan will continue to prioritize safety and connectivity improvements and acknowledge where freight enhancements throughout the city may be needed. K. Borsheim went over next steps, which include turning networks into projects and prioritizing projects into short-, medium- and long-term projects, identifying potential funding sources that might be associated with the projects, developing programs and policies to go along with the projects, having a draft plan available this summer, and moving towards council adoption in the fall.

Committee Discussion:
CM Hancock pointed out that it was stated there were 750 respondents, which is dismal in the city of our size. She asked what they could do to get the word out more, because it would have been great to have more participation. She suggested utilizing Aurora TV station to get the word out. She said it is important for people to know about what we are doing, as it directly impacts their life.

C. Campuzano stated the engagement was extensive on this project, and the 750 number was just for a specific exercise they did where participants used jellybeans to indicate where they'd spend funding. She said K. Borsheim's team has a lot of strategies they have been employing, and city staff have spent a lot of

time going to existing events and getting feedback, so they have heard from thousands of people from different backgrounds.

K. Borsheim added that one thing they try to do when measuring their engagement approach is to measure process as well as outcomes. He noted that the engagement period ended on May 2nd, so they are still summarizing all the various touchpoints, and that will be included in their summary of the milestone engagement. He expressed one of his frustrations of being a planner is that when you do a citywide plan, it is abstract to folks and it is harder for them to take that step higher and provide that level of feedback, which a lot of times results in people looking at the information but not providing the feedback.

CM Kassaw commented that he liked the idea of going out and meeting with the people, so people feel empowered. He asked if they ever use an email data system that sends mass emails to reach out to people.

K. Borsheim responded that they do, but only people that have opted into it, receive the emails.

J. Patterson, Senior Communications Strategist, expressed they have had multiple stories on Aurora TV, in the water bill newsletter, in the weekly electronic newsletter 'This is Aurora', through all social media channels, and news media coverage.

CM Hancock said she would love to get those numbers.

K. Borsheim responded they can provide that summary as soon as it is compiled and said it will be a chapter of the plan.

CM Lawson asked if it is possible to see how many residents in each ward participated.

K. Borsheim answered that they can provide that information for the people who filled out the surveys, but they do not track that data on the touchpoints.

CM Lawson stated that she would like to see how much outreach the project team has done to each ward and how many residents participate. She suggested getting that for a future meeting.

CM Hancock agreed that she would be interested to know how well they did.

K. Borsheim responded that they would provide the summary of all three milestones.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

6. ANTICIPATED TOPICS FOR NEXT MEETING

- Agreement for review for the 9 Mile Pedestrian Bridge Project with the Aurora Urban Renewal Authority (AURA) for funding

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

February 20, 2025

Members Present:	Council Member (CM) Stephanie Hancock, Chair; Council Member (CM) Amsalu Kassaw, Vice-Chair; Council Member (CM) Angela Lawson, Member
Others Present:	Laura Perry, Cathy Valencia, Brian Rulla, Julie Patterson, Traci Burton, Mac Callison, Haley Busch Johansen, Tom Worker-Braddock, Cindy Colip, Kurt Muehlemeyer, Scott Bauman, Adrian Morris, Nicholas Johnson, Huiliang Liu, Earl Wilkinson, Mark Smith, Leah Langerman, Krista Orloff, Heath Walter, Jeannine Rustad, Jacob Cox, Leticia Callanen, Mindy Parnes, Elly Watson
Guest:	Keith Borsheim, HDR Engineering; James Katzer, David Evans and Associates; Stacy Tschuor, David Evans and Associates

1. WELCOME AND INTRODUCTION

2. APPROVAL OF JANUARY 23, 2025 MEETING MINUTES

3. CONSENT ITEMS (None)

4. GENERAL BUSINESS

4.a Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Huiliang Liu, Principal Transportation Planner, gave a summary update on Connecting Aurora, the city's Multimodal Transportation Master Plan. He expressed that they are halfway through the project and are in the middle of Milestone 3.

Keith Borsheim, Transportation Planner and Project Manager with HDR Engineering, provided a overview of the project, stating that Connecting Aurora is the first ever citywide multimodal transportation master plan, and they are aiming to identify ways to better connect people to places that they need and want to go, and are aiming to improve safety and convenience for everyone moving around Aurora. He spoke about the mission, vision, and goals for the plan. He gave a brief overview of the timeline and process, stating

that they have made it through the first two phases of the project, which they call the "Discover" and "Synthesize" phases of the project, with the next two phases being "Visualize" and "Realize". He discussed scenarios they developed to analyze what might happen in Aurora, and investments and policy decisions that might be made by the city to help shape how trends impact the city. K. Borsheim voiced that they presented three imagined futures of Aurora to the public through many ways and different settings. The three imagined figures were car-oriented city, transit-oriented city, and neighborhood-oriented city. He discussed the survey demographics and what they heard overall on how each future would impact the community's quality of life. He noted that a transit-oriented city and neighborhood-oriented city received much more positive feedback than the car-oriented city. After gathering input and conducting the analysis, they are now moving forward with identifying recommended projects and multimodal transportation networks that are resilient and would best reflect those potential futures. He said they will also be drafting policies and program recommendations to reflect the values they heard throughout the outreach and will present them in the next couple of months. K. Borsheim said they will continue to check in with the Committee throughout the rest of the project to confirm the approaches they are taking and will share a draft of the plan with the Committee and City Council for the adoption in late fall of this year.

Committee Discussion:

CM Lawson stated that more people would take transit if it was on time and safer and that should be a question, but she does not see that in the presentations. She added that there are some realities with the current transit system that should be told to the people who may want to take transit. She said regarding Bus Rapid Transit (BRT), it will be important for the city to ensure they are engaging with the business and not losing businesses in the city as they are building out the transit network and grid. She thanked them for the presentation and added that it is good to have a vision, but some realities are not being pointed out.

K. Borsheim responded that one of the key aspects of the goals they have developed is a goal for safety, and people feeling safe using their transportation system. He said that it is an important thing that they have heard from the community, and that is top of mind, and they need to emphasize that more in the presentations and in the plan. He noted that the Regional Transportation District (RTD) has struggled over the last few years with funding, and a key aspect of this plan is to identify potential funding strategies to help mitigate funding shortfalls that RTD has experienced. He stated that there is a lack of drivers and the ability to hire and retain drivers has been severely impacted over the last decade, so they are trying to come up with strategies to address that. He added that even though the city does not tell RTD how to run their business, there are opportunities for the city to jump in.

CM Lawson voiced that she sat on the RTD Reimagine Committee for many years and knows what those issues are, but in these presentations, there has to be realities, and she does not see that.

H. Liu shared that they are developing the network right now, which includes a transit network, and there will be projects and programs for transit that will focus on safety, reliability, improvements and connectivity to other destinations; and how to work together with RTD for funding and safety. During Milestones 1 surveys and pop-ups, the project team did ask people what improvements are needed. The project team heard a lot, especially in Ward 1 at MLK and Fletcher Plaza where there were boards where people could place a dot, that transit has been a major concern for a lot of people.

CM Hancock commented that she would like to see more detailed analysis. She said that when she takes the train, it should not take half the day to get where she needs to go. She pointed out that they are using buses to go from the Nine Mile Station to the Florida Station, when they should be getting on the train. She added that there is no notification of when transit issues happen so people can prepare. She shared that they want people to take public transport and know that it is accessible and reliable, that they have staff,

and are consistent with scheduling, so it is important to detail that and be top of mind. She voiced that she likes intent, ambition, and what they are doing, but they need to deal in reality.

J. Rustad added that they have a quarterly standing meeting with RTD and have asked them to help by giving the notice ahead of time and work with our communications to help get the word out for any cancellations. She said if anyone experiences difficulties, please reach out to her, L. Perry, or C. Colip.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

4.b 2025 Roadway Maintenance Program Update

Summary of Issue and Discussion:
Nicholas Johnson, Engineering Supervisor, gave an update on the 2025 Roadway Maintenance Program. He said that Aurora has 1,379 miles of road responsibility, a population of 404,219, spans 165 square miles and the roadway network has grown 78.8% since 1986. He explained that local roads take up a large portion of their network, but arterials tend to take up the bulk of their budget, as they impact quality of life for citizens the most. He stated that they use a pavement management system to decide where they do roadway maintenance to provide the best quality program for the budget that they have. He added that the pavement condition system is what guides them, as it has a grade scale from 0 to 100 on how well a road rides, and the goal is to be 60 and above. N. Johnson said that they are getting a roadway assessment this year, which will help form the next five-year plan and focus budget dollars as they move forward. He discussed pavement life cycle, street maintenance history, program history, and pavement maintenance strategies. He stated they are starting to apply the appropriate strategies at the appropriate time, stretching maintenance dollars and making their network the best that they can. Currently, they have shifted to the Transportation Maintenance Fund and consolidated several programs and financial lines into three core groups, which are concrete repair, street maintenance and reconstruction. He added that they are using the Transportation Maintenance Fund to push them toward the PCI of 73 of the entire networks and are hoping to get there in the next year or two. N. Johnson discussed pavement maintenance strategies within the Rehabilitation Program, which total $31.5 million, and a couple of concrete programs that will come to the Council in the next month or so. Then staff will start with the surface treatment and asphalt work.

Committee Discussion:
CM Lawson asked if they factor in new development when looking at road maintenance and what needs to be done.

N. Johnson answered a little bit. He explained that they have very robust road building requirements, so any development going in with road work will have a good solid foundation, so they only must take care of the surface or just a little below on arterials. He noted they do coordinate with Development Review, Planning and several departments across the city when doing these projects to avoid conflict of activities.

Outcome:
Information only.

Follow-up Action:
No follow-up action needed.

public transit due to unavailable services where they need to go, and most people that use transit do it because of health/legal reasons, because it is more affordable, and/or it is better for the environment. Regarding freight, they heard concerns of wear and tear on the road, desire for grade separated railroad crossings, safety, and curbside loading and unloading. They also heard that the top urban design features people like included bus stop amenities and multimodal connections, shared streets and event spaces and green gutters along protected bike facilities. K. Borsheim noted that overall, they learned that personal and transportation safety is a focus; driving is viewed as relatively safe; walking and biking feels unsafe; everything is too far away; and transit is also unsafe, too slow, and limited. He discussed the next steps, including attendance and engagement efforts at community events during the summer and applying what they learned to develop a plan for Milestone 2 engagement efforts, which starts early fall 2024. He talked about the framework for the vision, mission, and goals; who they have talked to; and other activities in developing the vision, mission and goals. K. Borsheim presented the draft vision, mission and goals and bedrock practices. K. Borsheim summarized the ten goals that support the city's vision and mission and discussed next steps which includes finalizing the vision, goals, mission and objectives after presenting to City Council.

Committee Discussion:

CM Bergan commented that it was surprising to see that most people said they drive once or twice a week, especially when a lot of people work outside of the city.

K. Borsheim believed it should say at least once or twice a week, but he would doublecheck the data.

CM Lawson said she was surprised to see comfort being the number one factor instead of convenience when traveling by car, and asked what comfort really means.

K. Borsheim explained it was hard to determine how people determined the survey question.

C. Campuzano added that they chose a lot of different adjectives to try and capture how different people feel, and it could be having air conditioning when it's hot as opposed to walking or biking.

CM Bergan asked why the police was not on their list of who they talked to considering police deal a lot with traffic.

K. Borsheim answered that they attempted to talk to the police and were unsuccessful in getting it scheduled, but it is still on their list of follow-up items.

CM Bergan inquired if they would be looking at some commonalities in the applications in the Traffic Calming Program.

K. Borsheim responded that yes, they are working to identify all the technical data available and like the idea of digging deep into the Traffic Calming, so he will work with C. Campuzano to do that.

CM Hancock asked that when looking at the transportation all over the city, what is the role and how will they coordinate with RTD to expand transportation access to other wards.

K. Borsheim stated transit planning efforts are starting to kick off, from which they want to see what an impact on transit availability, transit usage, and transit convenience will have to help them develop strategies and work with RTD to implement them.

L. Perry added that RTD is at the table on this and are very interested in this work.

CM Hancock commented that she wants to make sure it stays top of mind that if they want people to utilize services it must be convenient, accessible, and safe.

K. Borsheim noted they have a Technical Advisory Committee meeting today and RTD, CDOT, and DRCOG are all a part of that meeting and involved throughout the process.

CM Lawson asked where the previous work in the past years with RTD went on the regionality of transit.

K. Borsheim stated they were building on that and not starting from scratch.

CM Bergan asked if Reimagine was the analysis study for efficiency; by looking at ridership per corridor, how many people ride in a certain area, and if they can recoup money if no one is riding in a particular area.

K. Borsheim agreed that is correct and stated it was the system optimization goal.

Outcome: Information only.

Follow-up Action: No follow-up action needed.

4.d. Consideration to Approve a Resolution for the Intergovernmental Agreement between Aurora, E-470 Authority, and Windler District regarding the operations and maintenance for 48th Avenue

Summary of Issue and Discussion:
Haley Johansen, City Engineer, asked for consideration and approval for a resolution for the Intergovernmental Agreement between Aurora, E-470 Authority, and Windler District regarding the operation and maintenance for 48th Avenue. Aurora standards will be used for 48th Avenue, a six-lane arterial, and the city will maintain all the standard roadway items, including pavement, the road and bridge pavement markings, lights and electrical, snowplowing and sweeping, signage, and traffic signals. Windler will maintain the decorative elements, including concrete sidewalk and median special patterns, pedestrian bridge rail, concrete pattern, finish on the parapet walls and bridge columns, enhanced landscaping in the interchange area, and maintain the weeds and debris along the E-470 right of way line. E-470 will be responsible for the bridge structure, approach slabs, underdeck lighting, on/off ramps, fencing, two water quality ponds, and drainage infrastructure.

Committee Discussion: None.

Outcome: The Committee recommended the item move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

4.e. Kings Point Way IGA Between Aurora and Parker For Snow Removal and Street Sweeping

Summary of Issue and Discussion:
Marc Tamburro, Manager of Street Operations, discussed the Kings Point Way IGA between Aurora and Parker for snow removal and street sweeping. Aurora and Parker entered into an original IGA 1/28/2019

Committee Discussion:

CM Hancock asked if there was typically a drastic difference in how Aurora and Denver do things.

H. Johansen stated she did not know the specific difference between Aurora standards versus Denver, but it will follow Aurora's standard for the plan, even in the northern parts.

CM Hancock inquired if there would be any traffic calming or bike lanes or just a flat road.

H. Johansen stated she would have to see if bike lanes were proposed, but the road would be a typical collector section the city sees in its industrial or larger commercial areas.

CM Hancock asked if it would be two or four lanes.

H. Johansen said the section in the interim is a 2 lane with turn lanes. H. Johansen indicated in the long term, she thought the sections would be a collector in the east half and 4-lane arterial on the western half.

Outcome: The Committee recommended the item move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

4.b Connecting Aurora - Aurora Citywide Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Keith Borsheim, HDR Consulting Team Project Manager, provided an update on the Connecting Aurora Project. He stated they started last fall and are now in the synthesize phase. He noted they did analysis on conditions in the network and conducted the vision, goals, and objective workshop to present to the committee and Council in June for feedback and approval. He explained how high-quality transportation leads to individual and societal benefits through implementation of the plan. Mr. Borsheim discussed safety challenges; mobility challenges; demographic trends; bikeway infrastructure and level of traffic stress; and the transit propensity analysis to look at different demographics that lead to people deciding or needing to use transit. He went over what they heard in their engagement process, and said most people, when asked to describe in one word the transportation system they wanted to see in used the words safe, fast, convenient, frequent, efficient, seamless, and clean. He stated they also discussed areas of congestion and safety concerns, and the key issues were safety for all modes of transportation and increased frequency and access to transit. He also noted next steps, including the state of the system analysis and report; development of a transportation information system; continued public engagement; draft vision, goals, and objectives; and future scenario evaluation and network development.

Committee Discussion:

CM Hancock said the updated numbers meant people were taking advantage of the extension for comments and participating.

CM Bergan stated it did not look like Gun Club Rd was identified on the Denver Regional Council of Government's (DRCOG) congestion slide and urged them to go during rush hours and see it for themselves, because it is extremely congested.

Mr. Borsheim said it is planned to widen Gun Club Road in the future DRCOG network, but they do not have the funding to construct that yet.

CM Bergan asked if they could get their ward results from surveys and open houses.

Mr. Borsheim said yes, but only for people who chose to provide demographic information.

CM Lawson inquired if she could get the sum of the results in Ward 5. She said she did not know how accurate the survey was without the aging community's input, because most of the aging people in her ward did not complete the survey.

L. Perry assured they would make sure the efforts are very well coordinated with the older adults needs assessment currently being completed by Parks, Recreation and Open Sace in collaboration with the Older Adults Commission.

CM Hancock explained it was important to get the older people's input and appreciated the effort. She also asked if they were coordinating with the senior centers to get that data input.

L. Perry stated she would check in on the full engagement plan and would report back to the Committee.

CM Lawson asked if they were capturing and reaching out to the older adult communities and explained she had been hearing about transportation issues in those areas.

L. Perry commented she would get more information on that and follow up.

D. Krzyzanowski added there was Planning staff on both projects and the older adults assessment is being shared with the transportation team.

CM Hancock voiced they did not want the seniors to be left out and need to know they are being heard.

H. Liu added they are in the process of laying out some additional outreach efforts and will reach out to Heather Gardens and other senior centers.

K. Borsheim noted they have information and surveys they can take to their town halls.

CM Lawson agreed that would be helpful.

Outcome: Information only.

Follow-up Action: No follow-up needed.

---

4. GENERAL BUSINESS

4.a Connecting Aurora - Aurora Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Keith Borsheim, consultant Project Manager from HDR, updated the committee on the City-wide Multimodal Transportation Master Plan, and reiterated that the goal of the project is to develop a citywide vision for the transportation system, as well as goals for the next 20 years that are consistent with the values developed in the Aurora Places Comprehensive Planning process. He explained the outcome will be an integrated multimodal system with Complete Streets concept, and the project will be focused on engagement with residents, businesses, and key stakeholders. He went over a flow chart for the project overview and milestones. Mr. Borsheim also provided an overview

of the engagement plan. He emphasized to the Committee that the project team is committed to engaging with the public in meaningful ways throughout the process with transparency and honesty at the forefront, and they would be listening throughout the process to the community voice. He stated the primary goal of the engagement plan is to gather meaningful input from stakeholders, policy makers, and the public to build a foundation for support and develop integrated mobility visions and solutions. He talked about objectives and outcomes for the engagement, including building upon previous and existing public engagement efforts; listening first; educating local stakeholders, civic and community groups on benefits; being reflective of the community's needs, goals, and values; developing partnerships throughout the community; reaching out to underrepresented communities; and sharing data points and goals during the process. Mr. Borsheim discussed the co-creation of the engagement plan, including 10 to 15 interviews, with key community groups and representatives on ways to engage with audiences in the city. Some of the input received through the co-creation process was to perform outreach by ward; include consideration of new platforms; address transit service gaps; use community leaders as translators; conduct a family night activity; and go to where stakeholders are instead of having meetings in city buildings.

He discussed the key audience they are trying to reach and various engagement tactics to be deployed in the engagement process. He also provided schedules for the four open houses to be held throughout April.

Committee Discussion:

CM Bergan asked if the business and development community were included in the 10 to 15 interviews with key stakeholders.

K. Borsheim answered that several people within the business and development community are invited to the stakeholder group but none of them were able to attend the first one. He said they were reaching out to those that could not attend to follow up and schedule separate one on one interviews.

CM Bergan stated there are already transportation plans in place so there is a need to make sure it is all well connected. She asked if when they do the public forums with residents, will cost limitations be communicated if the community is asking for very expensive things.

K. Borsheim said yes, and tradeoffs will be considered. He added they will have Regional Transportation District (RTD) representation at the open houses to help the public to understand who is responsible for what.

CM Hancock asked if it would be valuable to have some of the open house information available at Councilmember town halls going forward since, they are doing them through the end of April.

K. Borsheim answered yes, they would be providing a packet to council members to use at town halls that has the same information and a link to the open house available online.

CM Lawson stated she hoped they get to the residents of the new developments of the Transit Oriented Developments (TOD). She also said when talking about RTD and transit, she hopes that category could be broken out, because there's a lot of different issues when it comes to safety with those.

K. Borsheim explained that this is a plan for transit, biking, walking, and traffic, and the public open houses will be set up for each category in addition to the RTD station.

Outcome:
Information only.

Follow-up Action:
No follow-up needed.

4.b.Neighborhood Traffic Calming Program Update 2024

Summary of Issue and Discussion:

Carl Harline, Principal Engineer, updated the progress on the Neighborhood Traffic Calming Program (NTCP) to help mitigate neighborhood speeding concerns. He noted that arterial roadways were not eligible due to those roadways being designed for more traffic at higher speeds. He explained that a resident needs to fill out an application and petition for the program. The city then will schedule an evaluation and collect data as well as perform mitigation, installation, and do any follow up studies to confirm effectiveness. He talked about what the traffic calming toolbox consisted of including flashing radar speed signs, speed cushions, chicanes, roundabouts, roadway striping, improved pedestrian crossings, curb extensions at intersections, and road diets. He discussed the NTCP applications they have received to-date, with five of those pending decision; program totals; mitigation overview; and gave a brief history and breakdown of the budget, with $642,500 allocated for this year and the same projected for next year. Mr. Harline said that they were accepting and evaluating additional applications that come in, and they are prioritized according to criteria they evaluate on and based on the annual budget. He said they were beginning to scope out the before/after study to get a good picture of what the first five years of implementation has looked like as it relates to effectiveness in reducing travel speeds, so they can adjust as needed. A presentation on the results of the study is expected to be presented Fall 2024.

Committee Discussion:
CM Bergan asked how they explain needing a roundabout but cannot afford it when they analyze traffic calming applications and looking at what would work. She noted she only saw one roundabout.

C. Harline explained they are currently constructing two this summer, one that went in late summer/early fall 2023, and three are currently under design. He said they are prioritized in the budget to ensure that the roundabout will address the root cause of the speeding issue. Roundabouts are tricky due to limited funding.

CM Bergan asked if they need one that is too much for the budget, was there another budget it could come out of.

C. Colip stated that sometimes they supplement small overages with the miscellaneous streets fund but would end up coming to Council to ask for approval through the budget process to add or include a roundabout.

Mayor Coffman asked if there was a way to download a form or if they just do it online.

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

February 15, 2024

Members Present:	Council Member (CM) Stephanie Hancock, Chair; Council Member (CM) Francoise Bergan, Vice-Chair; Council Member (CM) Angela Lawson, Member
Others Present:	Mayor Michael Coffman, Carlie Campuzano, Elly Watson, Julie Patterson, Lynne Center, Ryan Germeroth, Mac Callison, Huiliang Liu, Haley Busch- Johansen, Michelle Gardner, Cindy Colip, Laura Perry, Scott Bauman, Cathy Valencia, Mindy Parnes, Rachel Allen, Leticia Callanen, Mark Smith, Jeannine Rustad, Tom Worker-Braddock, Stephanie Sinclair, Brian Rulla, Nicholas Johnson
Guest:	Keith Borsheim; Project Manager, HDR

1. WELCOME AND INTRODUCTION

---

2. CONSENT ITEMS (None)

---

3. GENERAL BUSINESS

3.a Connecting Aurora - Aurora Multimodal Transportation Master Plan Update

Summary of Issue and Discussion:

Mr. Huiliang Liu, Principal Transportation Planner stated that this is the first update on the city's Multimodal Transportation Master Plan to the committee. The project is co-managed by the Planning & Development Services and Public Works Departments. He and Carlie Campuzano, Traffic Manager, are the co-project managers of the project. Mr. Liu then introduced Keith Borsheim, consultant Project Manager, with HDR. Mr. Borsheim gave an update on the Aurora Multimodal Transportation Master Plan. He stated the project was funded through the Denver Regional Council of Governments (DRCOG) Transportation Improvement Program (TIP) grant award with a $3.224 million budget and $644,000 of that coming from the city. He explained they kicked off the project in September and got under way in October to create the project identity, logo, existing conditions analysis, and engagement framework. He displayed the logo and identity, Connecting Aurora. He discussed the main purpose and goals of the project, including creating a city-wide vision, be forward looking and innovative, adaptable, and responsive, creating an integrated multimodal system, focus on providing complete streets for people of all ages, background, abilities and income levels, engaging residents, businesses, and stakeholders, create a unified mechanism to guide policies, programs, standards, and guidelines, and 1reating a capital improvement program. Mr. Borsheim then discussed the scope of the project and

the four phases of the project, including the discovery phase, synthesize phase, visualize phase, and realize phase. He said they were in the discovery phase right now and will be creating a state of the system report to incorporate all the existing conditions analysis, including vehicular traffic, safety, bike and pedestrian, and transit. He stated the state of the system report will also be looking at future trends and analysis. He discussed what would be happening in the next phases, such as creating a citywide vision in goals and objectives and shared values and priorities of the city in the synthesize phase, development of multimodal networks and projects in the visualize phase and creating the policies and programs to implement the plan and a transportation information system in the realize phase. Mr. Borsheim discussed public and stakeholder engagement efforts planned throughout this project. Mr. Borsheim also mentioned a Charrette or workshop included in the project scope to develop vision, goals, and objectives for Aurora's transportation system. He stated that a scenario planning effort, which will include several different scenarios based on the values developed through the engagement process and the Charrette will be undertaken, and they will ultimately present an evaluation of the scenarios on how they impact they city fiscally and their overall quality of life. He said they would also be coordinating with the Adams County safety action plan and incorporate those recommendations into this plan and update the current city practices and standards to reflect the outcomes from this plan. He explained this will all lead to an update to the Capital Improvement Program and discussed other next steps.

Huiliang Liu, Principal Transportation Planner, added it will be a very intensive and complex two-year project process and they will be providing frequent updates to the committee.

Committee Discussion:

CM Lawson asked if they would be looking at wards specifically on the way people move, because different wards move differently. She suggested focusing on that so the public in each ward can see what their challenges are instead of just with the city overall.

H. Liu answered that this project is context sensitive, meaning different areas have different needs, characteristics, and demands. He said from the engagement perspective, they specifically scheduled meeting locations in different areas, because they know different areas have different needs and wants and their consultant will conduct a detailed analysis for different areas. He also stated staff are prepared to go to ward meetings to give presentations and collect input upon request.

CM Lawson said going to the different town halls still did not get to specific people living in the wards because not everyone attends those. She suggested maybe having a communication plan to give out. She said she wanted to make sure they were covering how things are transcending from development and how they are moving in general from ward to ward and overall.

H. Liu explained that from the engagement point, they work very closely with the city's Communications Department and identify various ways to try to outreach to everybody in the city.

C. Colip said the scope and RFP was specifically put together so they could address the different issues within the different areas of the city to address.

CM Bergan asked if they included the developer taskforce they have in the stakeholder advisory committees.

K. Borsheim answered he thinks it does. L. Perry added they will make sure the development committee is heavily engaged in this due to its impacting requirements and specifications.

CM Bergan recommended it would be good to have their input before doing any kind of plan because it may impact them specifically from a planning and cost perspective. She asked if they would integrate adjacent communities.

K. Borsheim explained the adjacent communities were identified on the Technical Advisory Committee and incorporating their recommendations and other projects going on into their plan will be an important consideration. He added one of the key outcomes would be how to better work as a city with adjacent communities and establish policies and frameworks to work with them for those projects.

L. Perry said they recognize community engagement is important, so they will come back with more details on outreach, strategies, location, and when so they can all see the outreach in the community.

CM Hancock expressed people's main concern is getting the nuts and bolts of how they are moving forward in the project to articulate it where people can understand it.

H. Liu stated they were still in the process of co-creation of the engagement plan.

Outcome:
Information only.

Follow-up Action:
No follow-up needed.

3.b 2024 Roadway Maintenance Program

Summary of Issue and Discussion:
Nicholas Johnson, Engineering Supervisor for Public Works, discussed the 2024 Roadway Infrastructure Program. He gave some quick facts about the city. He explained they have 1,365 center line miles of roadway responsibility that they need to keep in good condition for everyone. He stated their roadway network has grown considerably and showed different ways they look at that.

Lynne Center, Deputy Director of Operations for Public Works, stated she was originally hired with the city as a pavement maintenance engineer and has a lot of experience in that area. She talked about their philosophy around pavement management and how they arrive at the list of roads to do every year, including using a computerized system using objective and reputable data. She expressed the goal of the program is to apply the appropriate strategy at the appropriate time, look at many other different factors, work with partners to make sure they are not on the same stretch of road at the same time to minimize opportunities for pavement to be cut into right after it is paved, and all decisions are based on a pavement condition index (PCI). She explained a PCI is made up of a surface condition number and a structural condition number and the scale for PCIs are excellent. She then displayed photos of PCIs and discussed past and current PCIs. She discussed the four major categories of maintenance strategies, including routine maintenance, preventive maintenance, rehabilitation maintenance, and reconstruction maintenance. L. Center stated reconstruction is very expensive and showed a cost comparison between the different strategies and reconstruction.

the designation is official, projects could begin to receive NEVI funds. CDOT is working with Colorado Energy Office to set up a specific grant program and all its criteria. Grant solicitation will be done in Q1 of 2023. The NEVI plan will be updated on an annual basis and will be an ongoing program for at least five years.

Committee Discussion:
CM Murillo asked if Colfax would be an eligible roadway. M. King said yes since Colfax is part of the national highway system. CM Murillo said that she would be open to exploring what this program would look like for the Colfax Corridor. CM Marcano highlighted that Colfax and Havana are state highways that run through impacted communities in Aurora. He advocated for the corridors to be flagged through the NEVI or Charge Ahead Colorado Programs. CM Marcano asked if the corridors would be better suited for Charge Ahead or if they should aim for NEVI designation. M. King said that he will work with staff and other stakeholders on talking about I-225, Havana, or Colfax for the next round. He said that the project comes down to the location and the intended user. He explained that DC fast charging would be better to put in existing fueling stations or retail areas while Level 2 chargers would be a better fit for housing, work areas, community areas, etc. He added that the Level 2 chargers would be more affordable and would not have as many federal requirements. He mentioned that Colorado Energy and Xcel Energy have grants and programs to help communities develop an EV readiness plan which provides a roadmap for what funds will be pursued.

CM Marcano commented that Havana has a large shopping center where people spend a lot of time but there is only one rapid charging station. He mentioned that Havana BID may be interested in the conversation and it could bring more business to them. M. King mentioned that the Charge Ahead Colorado Grant Program has rounds three times a year. CM Coombs requested flagging Parker Road. CM Marcano mentioned getting high-voltage chargers in small-town restaurants and museums to general positive economic impact and increase the likelihood that people will adopt EVs.

Outcome: Information only.

Follow-up Action: No follow-up needed.

4.f. Grant Updates- DRCOG FY2022-2027 Transportation Improvement Program and Infrastructure Investment and Jobs Act Discretionary Grant Programs
Summary of Issue and Discussion:
Victor Rachael and Mac Callison presented an update on applications for the DRCOG FY2022-2027 TIP Calls #1-4. Call #1 represented a regional project focus for approximately $40 million. The DRCOG Board approved the project recommendations which were solely directed for multimodal and transit projects in May 2022. Additionally, the Board approved the Forum(s) recommendations for Call #2, Sub regional Share projects at the September 21st Board Meeting. Call #2 has a total of approximately $173 million for the entire region focused on multimodal and transit projects. The Forums received funding based on their proportional share of population, employment and vehicle miles traveled. Staff submitted three project applications 2 on this Call. Call #4, Sub regional Share Projects, will open on November 28th and applications are due on January 27, 2023. Total funding across all Forums is approximately$193 million for multimodal, bridge, safety, and street projects. The Adams Forum is apportioned approximately $30 million and the Arapahoe Forum funding level is estimated at $36 million.

The six projects in Call #1 were brought into the FY2022 to 2025 TIP. Approved Call #1 projects includes the Denver-sponsored Colfax BRT Project which requested $18 million and was awarded $15 million to support the National Environmental Policy Act (NEPA) process and design activities for the project. Call #2 recommended projects were recently approved at the September 21st DRCOG Board meeting, including the Aurora Multimodal Transportation Master Plan programmed to start in FY 2023. Staff members are currently developing the scope for the RFP with recommendations coming to Council in Q1 of 2023. The notice to proceed is aimed at April 2023. Also moving forward is the Aurora Multimodal Access Improvements Design and Construction for locations on Havana Street, Colfax Avenue, and Yale Avenue focusing on sidewalk connections to bus stops. The Smith Road Multimodal Improvements – Design will also move forward to bring deliver a 60 percent design, including the multimodal side path. All these projects were successful in being awarded full funding as requested.

A total of 19 projects were submitted for Call #3 Regional Share Projects with 13 for the Surface Transportation Block Grant funding track and 6 for the Air Quality and Multimodal Grant funding track. These projects far exceed the available funding. The public comment period has been completed and all proposed project applications will be advancing to DRCOG for scoring. The scores provided are non-binding but serve an informational role. The project review panel is comprised of representatives from all 8 Transportation Forums, CDOT and RTD representatives and will convene on October 31st. The panel will ultimately make recommendations that will be forwarded to the DRCOG Board for approval on November 16th. Prior to Board action, the Call #3, Regional Projects assessment and recommendations will be brought to the Transportation Advisory Committee on November 14th and the Regional Transportation Committee on November 15th.

City staff compiled the Peoria Bridge over Sand Creek Replacement project application which aims to clear it through NEPA and produce a final design. The preliminary design concept at the 25 to 30% will be completed by a consultant team by years end. The project NEPA and final design activities is estimated to cost $3 million with Aurora providing a 40% local match of $1.2 million and the remainder, $1.8 million being requested from available federal TIP funds. The Peoria Bridge has become aged and inadequate and is also a pinch point for traffic. It was constructed in 1996 and carries volumes of over 33,000 vehicles per day including freight traffic. There are concerns about it being structurally deficient, and it also does not provide adequate multimodal pedestrian and bicyclist passage and connectivity.

The Surface Transportation Block Grant funding category for which this proposed project is seeking funding has approximately a total of $27.7 million apportioned to the Adams Transportation Forum. However, there are a total of $121 million in applications. Call 4 has approximately $192 million with a 55-45 split for surface transportation (STP) and Air Quality Multimodal projects. The project package recommendation will advance to the Executive Committee and then Adams County Transportation Forum. Those will be ported to the DRCOG Committees, Transportation Committee, Advisory Committee, RTC, and the DRCOG Board for consideration in March or April 2023. These recommendations will require policy and program changes to the overall TIP.

Call #4, Sub regional Share Projects, applications are anticipated to be e made for the 13th Avenue Multimodal Study for NEPA clearance and 60% design. The High Line Canal Trail Underpass at Colfax Avenue, west of Airport Boulevard, a joint project of the PROS Department and Arapahoe County will be assessed for design and construction activities. Alameda Bridge over I-225 is contemplated as a proposed bridge replacement project with focus on NEPA clearance and design activities. In addition, bike/pedestrian facilities and turn lanes on the bridge must be brought to proper

and current standards. Staff may also propose design and potential construction activities for multimodal access improvements for segments of Havana, and other locations throughout the city. and Gun Club Road for NEPA and final design activities.

Potential projects for the IIJA US DOT Discretionary Grant Programs include Montview Boulevard within the Anschutz/Fitzsimons Innovation Community for construction, Alameda Bridge over I-225 – depending on outcome of Call #4, the Chambers Road at Smith Road/A Line/UPRR Grade Separation, a clear freight category project. Gun Club Road NEPA/design/construction, a Citywide Transportation Safety Study, and the ADA Transition Plan Implementation related to the existence of substantial sidewalk gaps and ADA ramp deficiencies within known right of way. An addition, a city Traffic Management Center/Fiber Optic Communications infrastructure – design and construction.

Committee Discussion:
CM Murillo expressed support for seeking additional funding resources for future projects. CM Coombs expressed appreciation for the presentation and is excited to see how funding can be received to address infrastructure needs. CM Marcano thanked the presenters for providing proper context of how much funding comes through DRCOG and the regional transportation forums.

Outcome: Information only.

Follow-up Action: No follow-up needed.

---

5. MISCELLANEOUS MATTERS
Traffic and Safety Issues in Havana
Carlie Campuzano presented a brief overview of the incidents in Havana. In October 2020, staff received resident outreach regarding a fence crash and a request to repair object marker signs. CDOT assisted in doing a crash review to see if any patterns could be corrected by engineering measures. Signing and striping improvements were then made at 4th and Havana in December 2020. Additional outreach was received in February 2022 for a fence crash at the same corner. Staff worked with CDOT to get another crash history and did additional signing and striping improvements. In the corner, vehicles use the right turn lane to go straight, get across, and cut the queue of traffic. Staff modified the road and emphasized the right-turn lane. In June 2022, a council request was received from CM Medina. A public meeting was held with the residents with CDOT in attendance. All questions were answered thoroughly. More recent requests have been received to look at the area. Staff and CDOT are discussing additional improvements and are setting a meeting with CM Medina.

CM Marcano suggested using a concrete guide or a physical obstruction to change the built environment and eventually change driver behavior. C. Campuzano said that they are collecting a survey and discussing the next steps with CDOT. Signing and striping are the fastest and least expensive ways to address the problem. She also mentioned that there isn't a high or frequent crash pattern. She added that CDOT has extended the lane, added markings, and added signs. They are discussing putting physical barriers. CM Marcano stressed the importance of being proactive as opposed to waiting for a significant pattern to emerge which puts people's lives at risk due to dangerous situations. C. Campuzano explained that they try to be proactive but are also concerned about unintended consequences such as people hitting or swerving more to avoid physical barriers that are put right away.

Transportation, Airports and Public Works (TAPS) Policy Committee Meeting

June 2, 2022

Members Present: Council Member (CM) Juan Marcano, Chair; Council Member (CM) Alison Coombs, Vice-Chair; Council Member (CM) Crystal Murillo (absent)

Others Present: Jack Bajorek, Daniel Brotzman, Traci Burton, Mac Callison, Carlie Campuzano, Lynne Center, Cindy Colip, Michelle Gardner, Karen Hancock, Huiliang Liu, Matthew Kozakowski, Daniel Krzyzanowski, Julie Patterson, Mindy Parnes, Victor Rachael, Jeannine Rustad, Elly Watson, Tom Worker-Braddock

1. WELCOME AND INTRODUCTION

---

2. APPROVAL OF MINUTES

The minutes for the April 28, 2022 TAPS meeting were approved as written.

---

4. GENERAL BUSINESS

4.a. DRCOG 20222-2027 Transportation Improvement Program (TIP) Project Application Update and Infrastructure Investment & Jobs Act Overview

Summary of Issue and Discussion:

Mac Callison, Matt Kozakowski, Cindy Colip, and Huiliang Liu presented an update on the Denver Regional Council of Governments (DRCOG) 2022 to 2027 TIP Project application and an overview of the Infrastructure Investment and Jobs Act (IIJA). For Call 2, the TIP is providing $451 million from varying sources from both state and federal funding for transportation projects in the Metroplex. It provides regional funding for regionally and sub-regionally significant projects. Aurora is within the Adams County and Arapahoe County Subregions.

The Infrastructure Investment and Jobs Acct (IIJA) created 25% additional funding from the prior authorization act. This bill is a five-year authorization bill with annual appropriation bills attached to it. There are additional discretionary grant opportunities available at two regional agencies, the State Department of Transportation (DOT), and local jurisdictions. Adams County represents 15.5% of the total regional shares with $23.9 million available and Arapahoe County covers 18.5% with $28.9 million in available funding. The funding amounts will ebb and flow slightly as additional formula finalization of numbers from the US DOT come through to the Colorado Department of Transportation (CDOT) and CDOT disseminates those to the Metropolitan Planning Organizations (MPOs) such as DRCOG. Call 2 projects need to be submitted because the Congestion Mitigation and Air Quality Improvement Program (CMAQ) and Senate Bill 21-260 multimodal transportation and mitigation options fund (MTMOF) have a completion date of 2026.

Call 2 consists of four selection criteria: sub regional impact for 30%, Metro Vision Regional Transportation Plan (RTP) priorities for 50%, leveraging for 10%, and project readiness for 10%. Sub regional impact addresses environmental justice, marginalized populations, jurisdictions, beneficiaries, and shared outcomes. The Metro Vision RTP priorities include multimodal options, air quality outcomes, transit system support, safety, freight systems, goods movements, and active transportation infrastructure and programs. There is a higher criterion point award for projects matched above the minimum 10% for the Multimodal Options Fund and 20% for the Surface Transportation Block Grant (STBG) Funding. Project readiness accounts for design and construction projects with National Environmental Policy Act (NEPA) clearance, railroad, waters, wetland involvement, etc. Applications for Call 2 are due on June 24, 2022. Once they are submitted, DRCOG will review them in terms of project eligibility and provide a scoring. The DRCOG scoring is advisory. Then, it will be placed within the Arapahoe and Adams County Forums. The forums will then render a recommendation to the DRCOG Committees and present the projects to the Transportation Advisory Committee, the Regional Transportation Committee, and the DRCOG Board.

Call 1 was a regional project call for $40.3 million from the CMAQ and MTMOF. Through this call, the Denver East Colfax Bus Rapid Transit (BRT) was awarded $12 million to support continued NEPA clearance and design. Call 3 will allocate $47.5 million for regional projects. For Call 4, Adams County will have $29.5 million, and Arapahoe County will allocate $35.4 million. Calls 3 and 4 have multiple funding sources compared to Calls 1 and 2 which are sourced from CMAQ and MTMOF. For Calls 3 and 4, the 40% from CMAQ and MTMOF requires a 10% match while the 60% will be from STBG with a 20% match.

Call 3 is expected to open in August or September 2022 while Call 4 will open in December 2022

Call 2 focuses on multimodal transit and supportive projects, transportation demand management, transportation management associations and organizations (TMA/TMO), and greenhouse gas mitigation projects. CDOT Policy Directive 1610.0 talks about the greenhouse gas mitigation action plans. A presentation will be coming to the board for consideration of possible actions focused on local agencies relative to zoning density regarding parking considerations and policies.

Aurora has three projects that are qualified for Call 2 which are the City-wide Multimodal Transportation Master Plan, the Sidewalk Multimodal Access Improvements, and Smith Road Bicycle/Pedestrian Multi-use Path.

The City-wide Multimodal Transportation Master Plan will define the city's goals in terms of transportation, mobility networks, policies, and programs with prioritized projects and phasing levels. This will be an interdepartmental effort with the support of the city council and city management. There will be an emphasis on a multimodal transit, bike/ped, and vehicular transportation system which will provide an array of choices for mobility and provide safe environments for constituents. A citywide safety study is also recommended. Freight transport systems and the vision zero safety element will also be addressed in addition to mobility hubs and TMA/TMOs. New technology autonomous vehicles will be studied for safety aspects as well as future trends. There will be a focus on implementation strategies, funding opportunities, partnerships with adjacent jurisdictions and federal and state partners, and identifying priorities in terms of phasing. Systemic performance metrics and monitoring systems will be put in place. Staff is looking into providing mobility annual or biannual reports that will present the trends, benefits, and return of investments. The master plan will link

mobility modes and provide residents with community clarity and consistency. Community engagement programs will be done through surveys, focus groups, and other outreach platforms. The plan will continue to be updated to be relevant in terms of investment and meeting goals and objectives.

The Sidewalk Multimodal Access Improvements project will be a continuation of efforts to enhance pedestrian and bicycle access. This is in conjunction with the current Sidewalk Gap Closure TIP project which emphasized missing or substandard sidewalks. In the Havana Corridor Transportation Study, multiple areas were identified that needed improvements for transit. Havana Street, Yale Avenue, Chambers Road, and Colfax Avenue were identified as areas in need of transit stop connectivity. This project will serve vulnerable populations, provide safer access to all users, and implement ADA compliance. On the east side of Havana, there are no sidewalks that people who need wheelchairs can navigate safely. In the area, there are obstructions, unpaved sidewalks, and high-speed and high-volume traffic. North of Colfax Ave, locations were identified to improve access to transit stops at 13th Avenue, 17th Avenue, and Montview. In the southern part of Yale Avenue, there is no sidewalk. Bus access will also be a focus on the segment east of Peoria. Bus stops are standing in the middle of grassy areas which causes difficulty to access. On Chambers Road, there is also an area with bus stops serviced by Bus 153 in the middle of grassy areas which causes safety and accessibility concerns. In the area serviced by Bus 15, the segment of the corridor is unpaved. The city staff is in the process of developing cost estimates for the upcoming grant application.

The Smith Road Corridor is approximately eight miles long and is an important corridor for transit and jobs. There is a large presence of logistics-driven businesses that have lower-wage jobs that rely on transit. The project will produce a safe multimodal facility to allow for connections along the corridor. It proposes to install regional protected and separated bike and pedestrian facilities. Staff is looking into a varied approach for different segments of the 9-mile corridor due to the heavy rail & commuter rail presence as well as high volume of traffic and turning movements associated with the logistics uses. The installation of drainage infrastructure is also being considered. This varied approach with context-sensitivity throughout the corridor will drive construction costs. The proposed application in Call 2 is to utilize the federal funding and the 10% MMOF funding match to develop a 60% design effort for the entire corridor to address different factors that will affect the design and cost. This will allow the city to better prepare and move forward with future projects and applications with accurate costs. The 60% design allows the city to untether the bike and pedestrian facilities from the road. From this, different areas will be prioritized according to what needs to be improved first.

Staff is also proposing potential projects for Calls 3 and 4. The 13th Avenue Study will be used to identify constraints and opportunities and conduct NEPA preparations to have the 13th Avenue Multimodal Improvements queued for construction. Arapahoe County is fostering an initiative to look at Highline Canal Underpass crossing opportunities with one at Sable and another location on Colfax Avenue west of Airport Boulevard. The Alameda Bridge over I-225 is also proposed for an enhanced bridge replacement to advance the concept design and conduct NEPA preparations to be competitive for federal funding in the future. Concept design and NEPA preparations are also needed for the Chambers Road Grade Separation over Smith Road and Union Pacific Railroad where tanker trucks and semis frequently cross. The Peoria Bridge over Sand Creek is functionally and structurally at its limits and lacks sufficient bike/ped facilities. This bridge is urgently needed to be replaced and enhanced. Assessments will be done relative to discretionary grant opportunities as well as Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Grants. The Montview Boulevard on the Anschutz Medical Campus's final design is close to being completed. The next step is advancing it with partners on the campus for implementation. This project is a multimodal corridor improvement to serve the entire campus.

For discretionary grants, there is a match ratio of 30 to 50% in terms of the local match versus the federal share. For the RAISE Grant, there is funding from $10 million to upwards of $25 million. The next notice of funding (NOFO) for this is estimated to be in Q1 of 2023. The Peoria Bridge Project, Alameda Bridge Project, and Montview Boulevard Project are great candidates for this grant. The Chambers Grade Separation will be a candidate for the INFRA Grant Program geared toward freight and regionally significant projects that enhance goods movement. The NOFOs for the Citywide Traffic Transportation Safety Study came out in May with due dates in September 2022. This is a prerequisite to competing for actual design and construction project improvements and the next rounds of funding. Locations in Aurora that need safety improvements have been identified. Requests for funding to address those locations will be seen in the 2023 budget process. This will be supplemented by the safety study and implementation grant.

Committee Discussion:

Council Member (CM) Marcano asked if the grants for reducing vehicle miles traveled (VMT) only include infrastructure improvements or if they could also apply to the redevelopment of certain areas to reduce VMT. M. Callison said that they are principally focused on initiatives that will realize a mode shift in trip making such as fuel-efficient and sustainable energy transit, micro-transit, or human- powered active transportation options. He added that DRCOG briefed the board on what may be considered to meet greenhouse emission targets. DRCOG believes that the increasing densification around transit stations and telework will be quantified in the emissions estimation process as per the 2050 Regional Transportation Plan (RTP). However, he added that there is still a 20 to 30% gap, which calls into play the Greenhouse Gas Rule and the CDOT policy directive 1610.0 (Greenhouse Gas Mitigation Measures). The directive offers choices. One is that the region identifies resources in the current RTP and directs those in capacity or operational improvement projects into advancing and bringing BRT corridors sooner and reprogramming funds. Another option is to develop a regional mitigation action plan. M. Callison added that the board will have further conversations regarding what credits and reductions in emissions can be reasonably accounted for by the management parking system, actions, policies, and programs. He mentioned that they will assess allowing density bonuses in areas near fixed guideway transit, BRT lines, high-frequent transit, and bus lines. In addition, they will also assess the ability to move the needle from an emissions perspective and how they will fit within the plan.

CM Marcano asked for clarification on whether there is potential given that that is the direction that DRCOG is taking. M. Callison confirmed this. He mentioned that it must be context and jurisdictional-sensitive. CM Marcano said that he hopes that they will be able to densify underperforming commercial areas and use those to create transit hubs and walkable and bikeable environments. Over the long term, this will create a network throughout the city while preserving existing housing stock.

CM Marcano asked for clarification regarding Smith Road. He asked if they can pre-design a portion of the corridor to get a better idea of where to put the separated protected bike infrastructure. M. Kozakowski clarified that it would go through the entire strip and not just a portion. CM Marcano expressed that he is happy to have that separated. He thanked staff for including Yale in the sidewalk multi-modal access improvements.

CM Coombs thanked staff for including Chambers in the sidewalk improvement. She highlighted areas near bus transit that are difficult to access for people in wheelchairs and areas along Peoria that have narrow sidewalks. CM Coombs stressed the importance of sidewalks that provide access to people

with mobility impairments or those that need mobility devices. She asked what financial contributions the Anschutz Medical Campus is making for the project. M. Callison said that they participated in the cost of the design effort. C. Colip said that there has not been any contribution to date, but they are working with city management to start those discussions. CM Coombs said that it's important for them to be contributing financially given that they have more resources than the city in some cases.

CM Coombs asked if they could get funding support if they wanted to design a city-level version of the Employer Based Trip Reduction Program (ETRP) for the city of Aurora employees and in partnership with large employers within the city. M. Callison said that they have a Transportation Demand Management (TDM) study that is about to start as the Federal Highway Administration is reviewing the scope and the city was awarded a grant from DRCOG in 2021. The study will focus on the I-70 corridor, the Aerotropolis Area, Smith Road, and logistics and distribution centers. They would be in partnership with the Northeast Transportation Connections (NETC) or TMA/TMO. He said that it would be competitive in Call 4 for sub regional. He added that there is an almost equal mix between Surface Transportation Block Grant and Air Quality and Mitigation Funds in Call 4. He said that it makes sense to have a focused TMA/TMO whose business is to address alternative opportunities in the I-225 Corridor. He mentioned that they will learn from the Smith Road I-70 East Corridor perspective regarding scalability and use those learnings moving forward. CM Coombs said that she would like to have more conversations about it specifically for city employees and other opportunities for TMA/TMO. She added that she hopes that many or all projects will get funded. CM Marcano agreed with CM Coombs.

Outcome: The Committee approved the item to move forward to Study Session.

Follow-up Action: Staff will move the item forward to Study Session.

5. MISCELLANEOUS MATTERS (None)

---

6. ANTICIPATED TOPICS FOR NEXT MEETING

- 13th Avenue Study Update
- 2021 to 2022 Snow and Ice Report

Karen Hancock mentioned that Centennial Airport requested to make a presentation to the TAPS Committee. She said that they could put it on the agenda for the July or August meeting. CM Marcano said that he is happy to accommodate them for the next month's agenda if possible. K. Hancock said that she will work with C. Colip and V. Rachael regarding the scheduling.

---

7. CONFIRM NEXT MEETING

The next meeting was confirmed for June 30, 2022, at 1:00 PM. It will be a virtual meeting.

Approved: _____ 07.01.2021

CM Juan Marcano, Committee Chair **Date**

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING THE 2018 COMPREHENSIVE PLAN TO ADOPT BY REFERENCE CONNECTING AURORA, THE CITY OF AURORA'S MULTIMODAL TRANSPORTATION MASTER PLAN (CONNECTING AURORA PLAN)

WHEREAS, Section 146-5.4.1.A of the Unified Development Ordinance provides for the adoption of a Comprehensive Plan for the orderly development and redevelopment of the City of Aurora, Colorado (the "City"), and that this plan shall serve to guide the City Council and the Planning and Zoning Commission in their decisions and recommendations in all land use decisions within the City; and

WHEREAS, on October 8th, 2018, the City Council passed Ordinance 2018-37 adopting the 2018 Aurora Comprehensive Plan (the "Comprehensive Plan"); and

WHEREAS, the Comprehensive Plan establishes a land use map providing varying placetypes for City design; and

WHEREAS, the purpose of this amendment is to update the Comprehensive Plan to reflect community needs and based on significant public input; and

WHEREAS, the purpose of this amendment to the Comprehensive Plan is to build on past investments, continue planning for development and growth, and to identify new opportunities to improve transit service and multimodal access throughout the city; and

WHEREAS, on _____, following a public hearing, the Planning and Zoning Commission voted to recommend approval of an amendment to the Comprehensive Plan to adopt by reference the Connecting Aurora, Multimodal Transportation Master Plan; and

WHEREAS, Section 146-5.4.1.A of the Unified Development Ordinance provides that City Council amends the Comprehensive Plan by an ordinance approved by a vote of not less than two-thirds of the entire membership of the City Council, provided the amendment promotes the long term economic, social, and environmental health of the City, and that it protects the public health, safety and welfare of the citizens of Aurora.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The Aurora Comprehensive Plan is hereby amended to adopt by reference to the Connecting Aurora, the City of Aurora's Comprehensive Multimodal Master Plan as shown in the attached Exhibit A.

Section 2. The amendment to the Comprehensive Plan shall be in the form as filed with the Office of the City Clerk and presented to the City Council at tonight's meeting.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

INTRODUCED, READ AND ORDERED PUBLISHED this _____ day of _____, 2026.

PASSED AND ORDERED PUBLISHED this _____ day of _____, 2026.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the R-2 District (Medium Density Residential) to the MU-A District (Mixed-Use Airport) for approximately 104 acres. The undeveloped property is located east of the future Harvest Road, north of the future 12th Avenue, west of Powhaton Road, and south of Interstate 70. The property is within the Tributary development and is designated for commercial and multi-family uses on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from R-2 to MU-A to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, R-2, primarily allows low-to-medium density residential uses. Changing the zoning to MU-A will allow commercial and higher-density residential uses in this location to take advantage of its proximity to the Harvest Road-Interstate 70 interchange that is under construction.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to MU-A. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include responses to approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as a "City Corridor," which promotes commercial buildings oriented toward primary streets, an accessible and attractive street network, and development organized around green spaces or plazas to foster a sense of community. This placetype supports both medium and high-density residential uses. The MU-A District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☒ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to MU-A?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. (UDO §146-5.4.1.C.3.a.ii) (McClelland)

Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

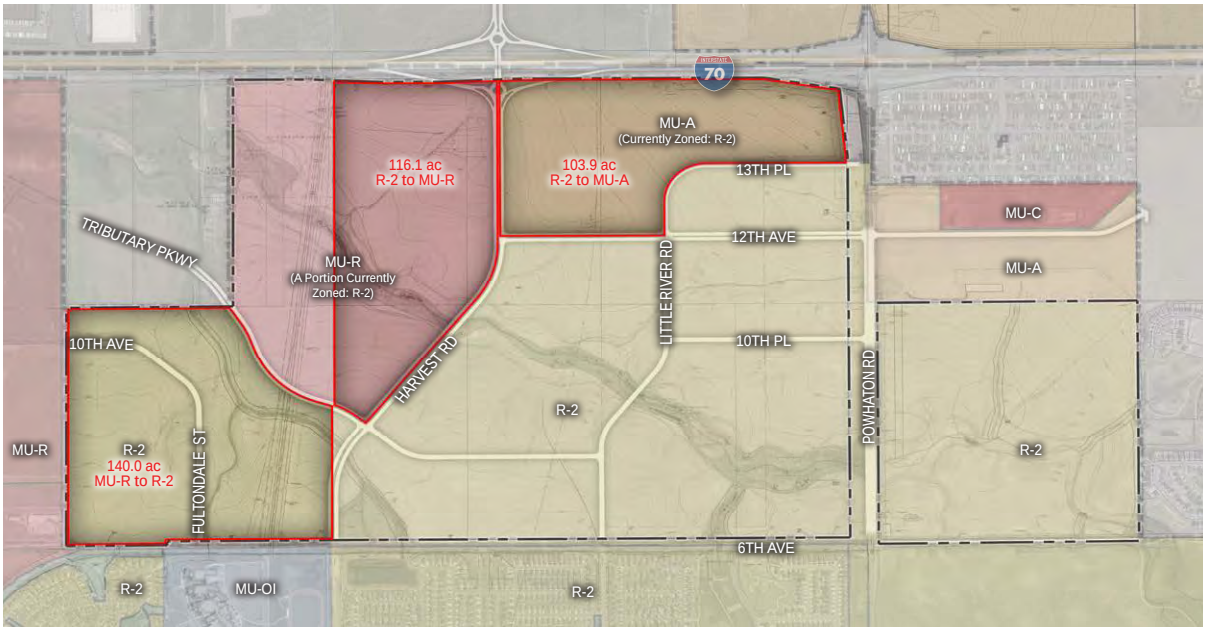
Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

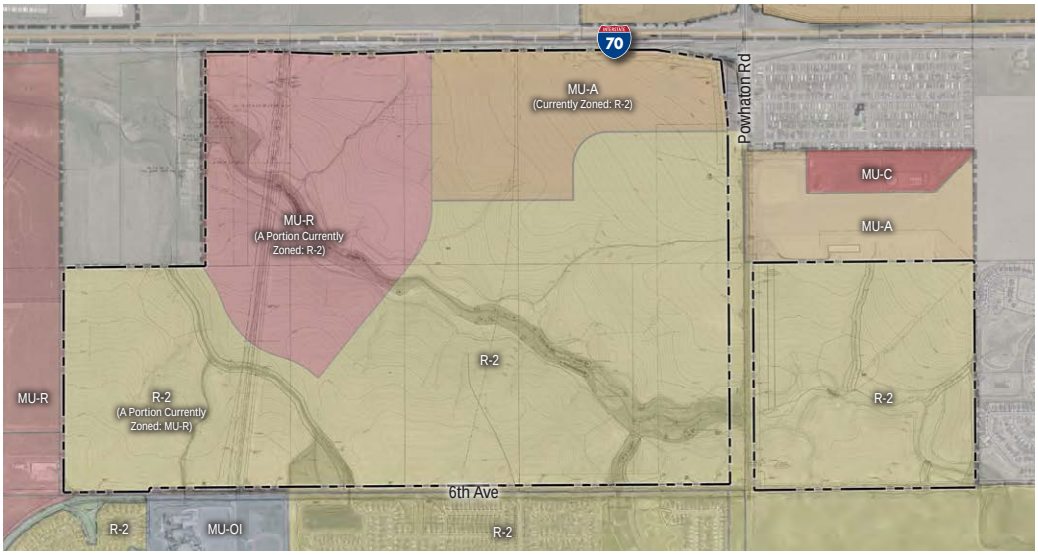


Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

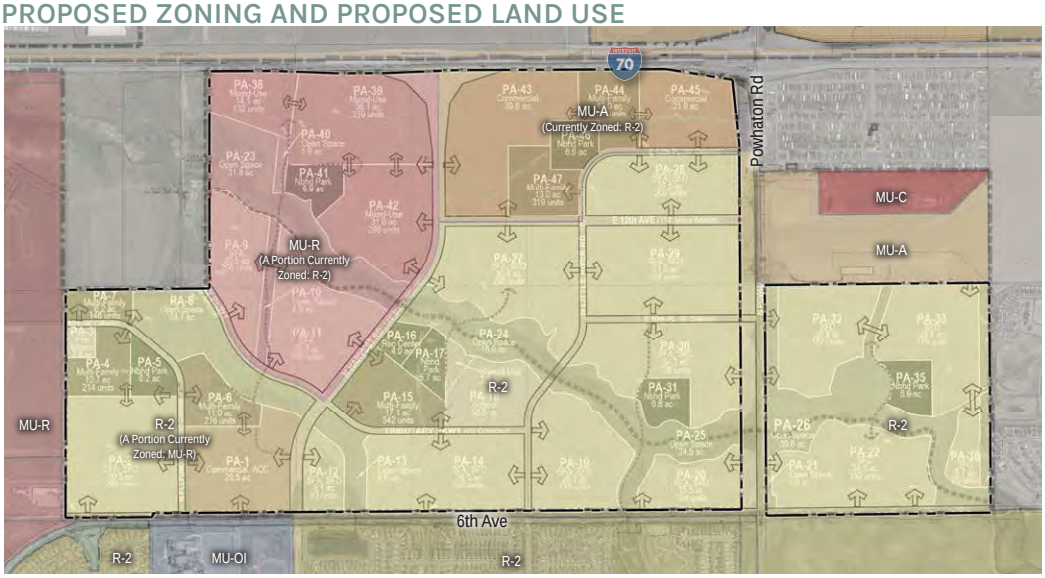
MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.



PROPOSED ZONE MAP AMENDMENTS



EXISTING ZONING

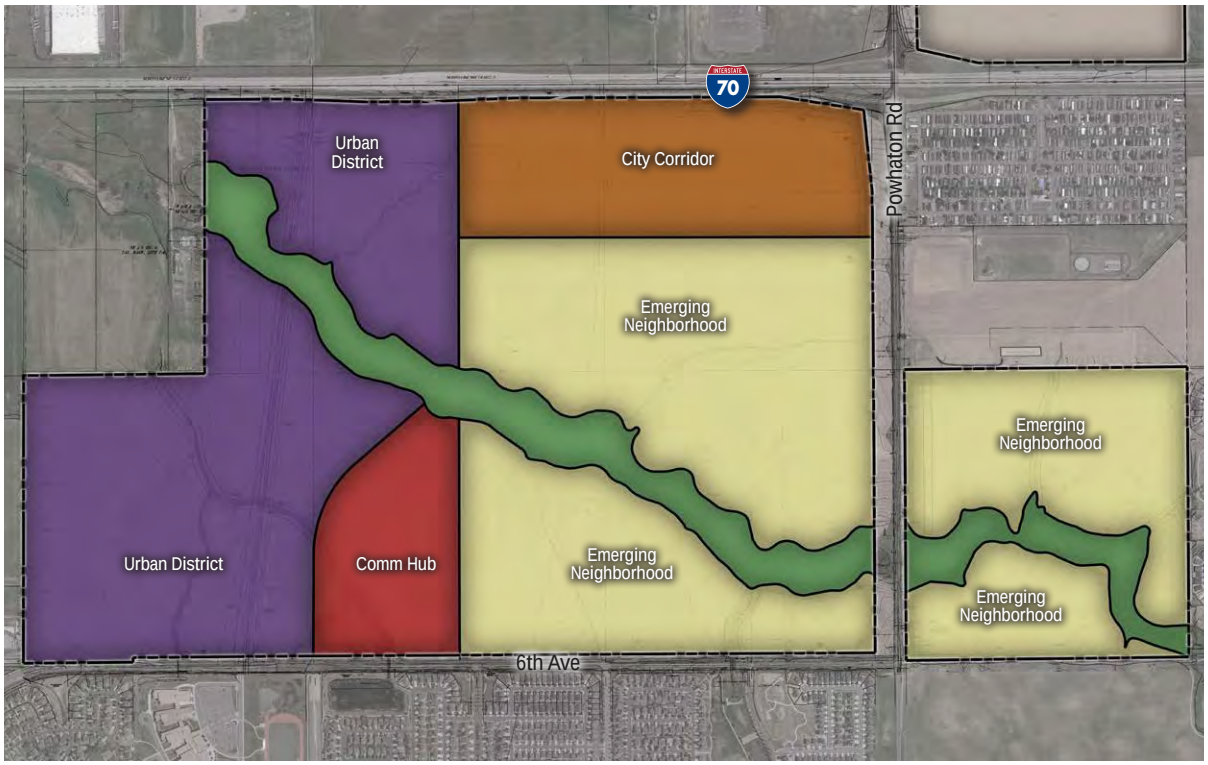
PROPOSED ZONING

PROPOSED ZONING AND PROPOSED LAND USE

APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.



Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP

APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

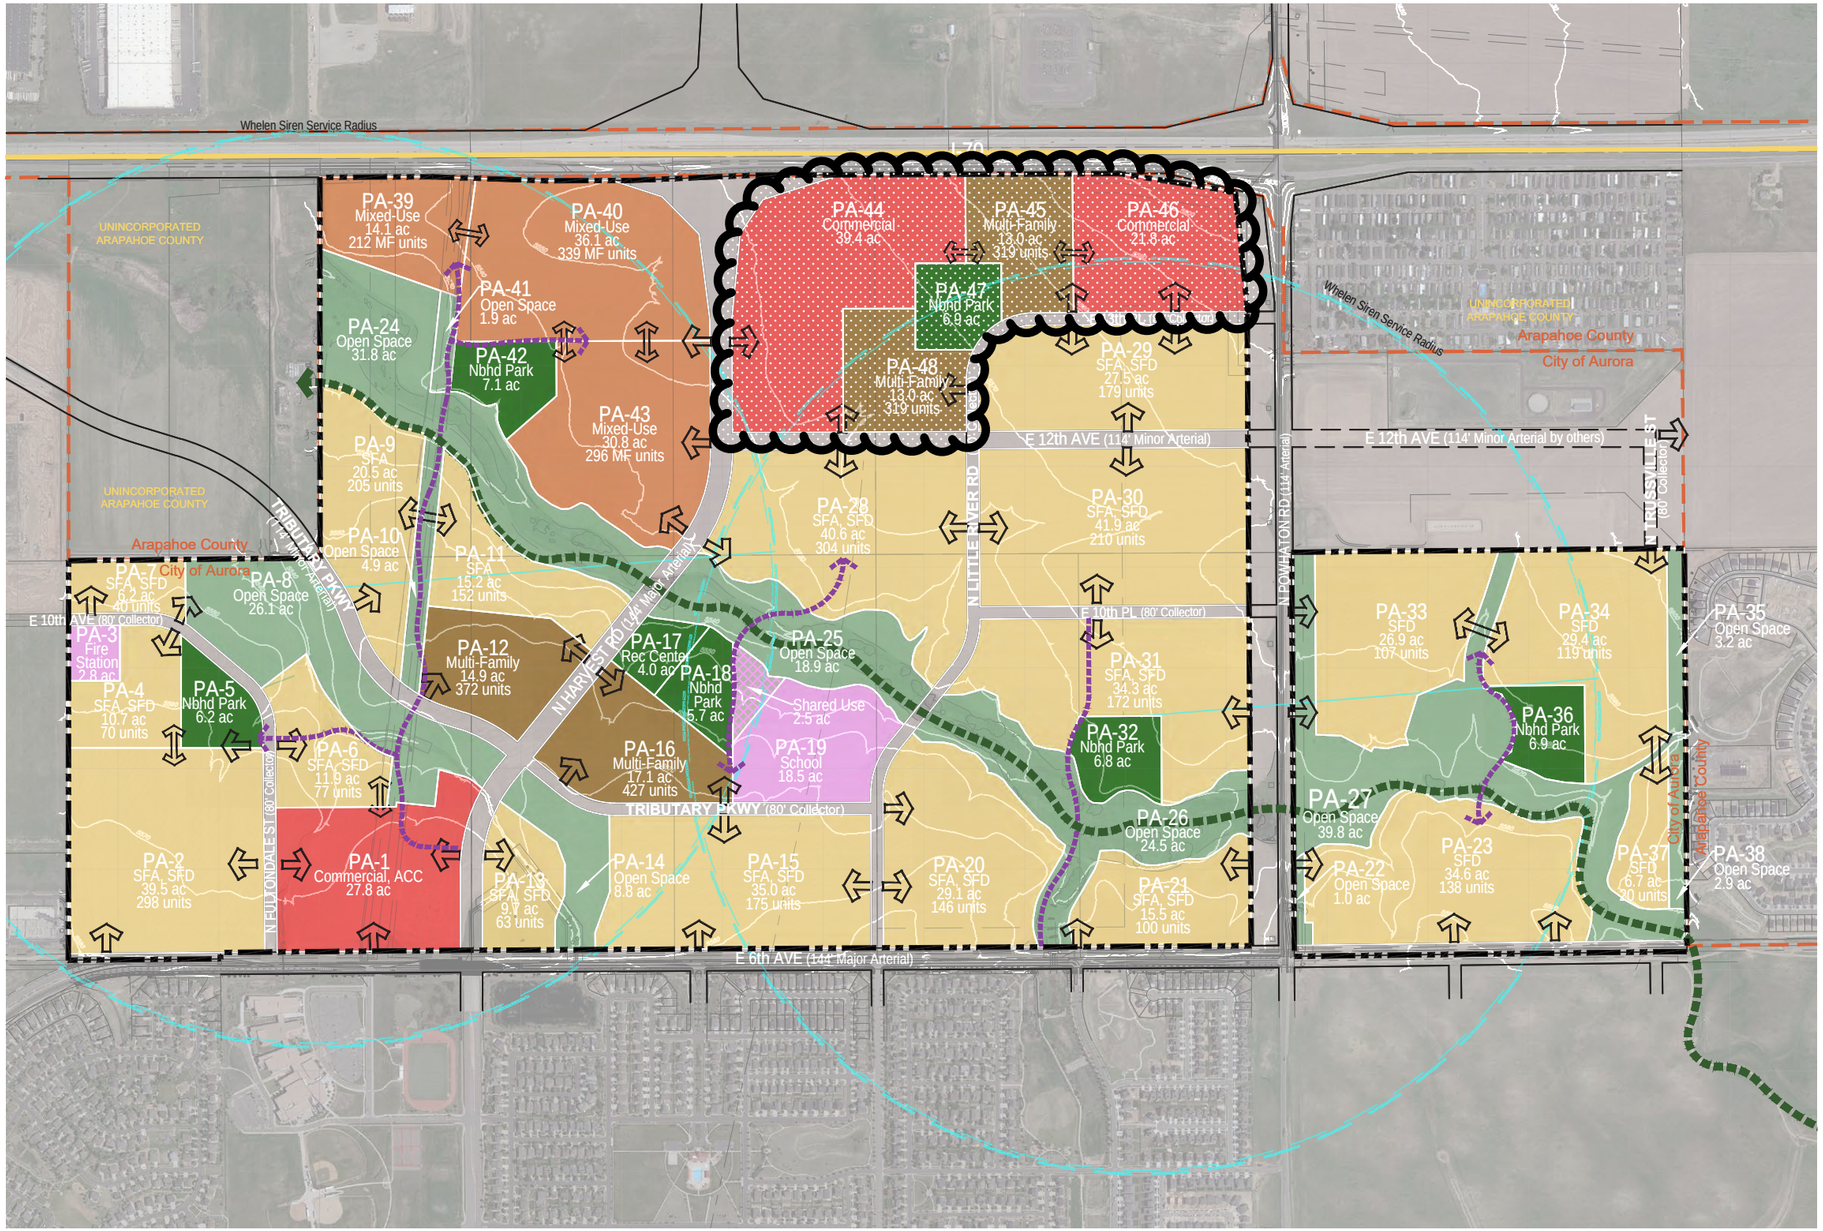
The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.



The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results
AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:
1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:
1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

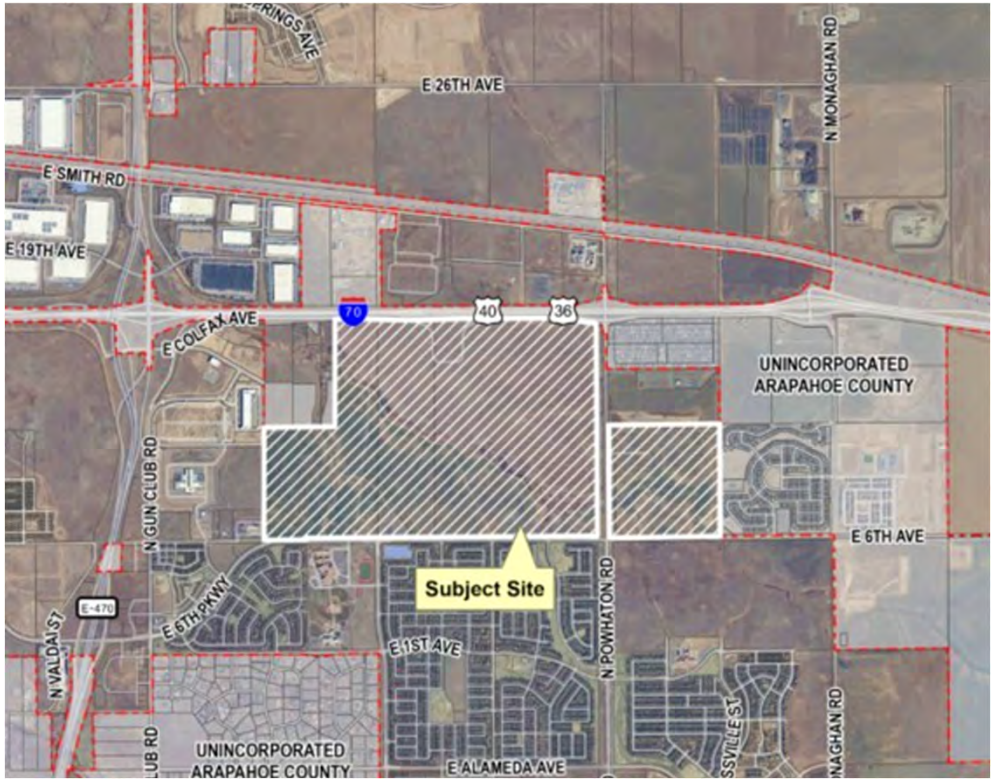
A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.



Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

Zoning Map Amendment Approval Criteria

City of Aurora Unified Development Ordinance, Section 146-5.4.1.C.3:

An application for changes to the Zoning Map for individual parcels shall only be recommended if the Planning Director and the Planning and Zoning Commission finds that the following criteria have been met, and shall only be approved if City Council finds that the following criteria have been met:

1. *The change to the Zoning Map is needed to correct an error (change in the character of surrounding areas does not constitute an error in the map); or*

2. *The change to the Zoning Map is required because of changed conditions or circumstances on the property or in the surrounding area and:*

a) The applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, with other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district;
b) The applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible with surrounding development through development conditions; and
c) The applicant demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application.

- Recommended approval (6-0) of the Zoning Map Amendment for 104 acres from the R-2 District to the MU-A District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 189 acres from the R-2 District to the MU-R District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 143 acres from the MU-R District to the R-2 District to City Council

Planning and Zoning Commission Recommendations

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 104 ACRES OF LAND TO MIXED-USE AIRPORT (MU-A), LOCATED EAST OF FUTURE HARVEST ROAD, WEST OF POWHATON ROAD AND NORTH OF FUTURE 12TH AVENUE (MU-A TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 104 acres of land located east of Harvest Road, west of Powhaton Road and north of 12th Avenue, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Medium-Density Residential District (R-2) to Mixed-Use Airport (MU-A); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Mixed-Use Airport District (MU-A) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the R-2 District (Medium Density Residential) to the MU-R District (Mixed-Use Regional) for approximately 189 acres. The undeveloped property is located west of the future Harvest Road, north of the future Tributary Parkway, east of the future Fultondale Street, and south of Interstate 70. The property is within the Tributary development and is designated for mixed-use, multi-family, and single-family attached on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from R-2 to MU-R to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, R-2, primarily allows low-to-medium density residential uses. Changing the zoning to MU-R will allow mixed-use, commercial, and medium-to-high density residential uses in this location to take advantage of its proximity to the Harvest Road-Interstate 70 interchange that is under construction.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to MU-R. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include the Planning and Zoning Commission's responses to the Zoning Map Amendment approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as an "Urban District," which represents the city's most intensely developed areas and is characterized by a relatively dense urban form, pedestrian-friendly environments, and a diverse mix of uses. This placetype also supports both medium and high-density residential uses that are well-integrated with commercial areas. The MU-R District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☒ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to MU-R?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

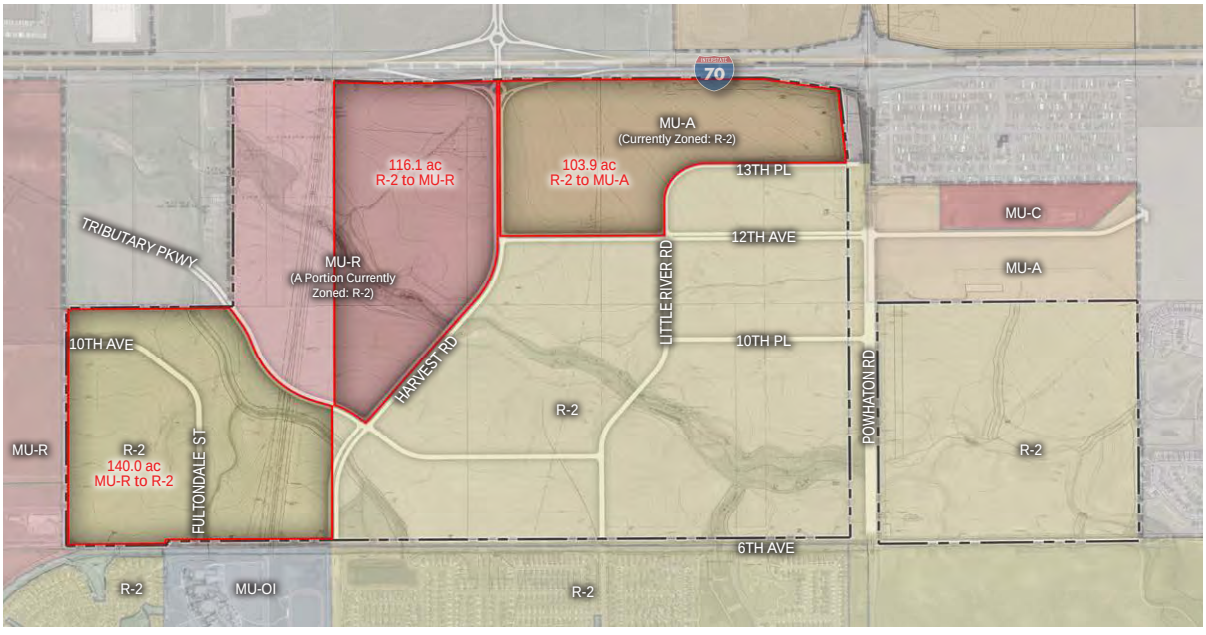
Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

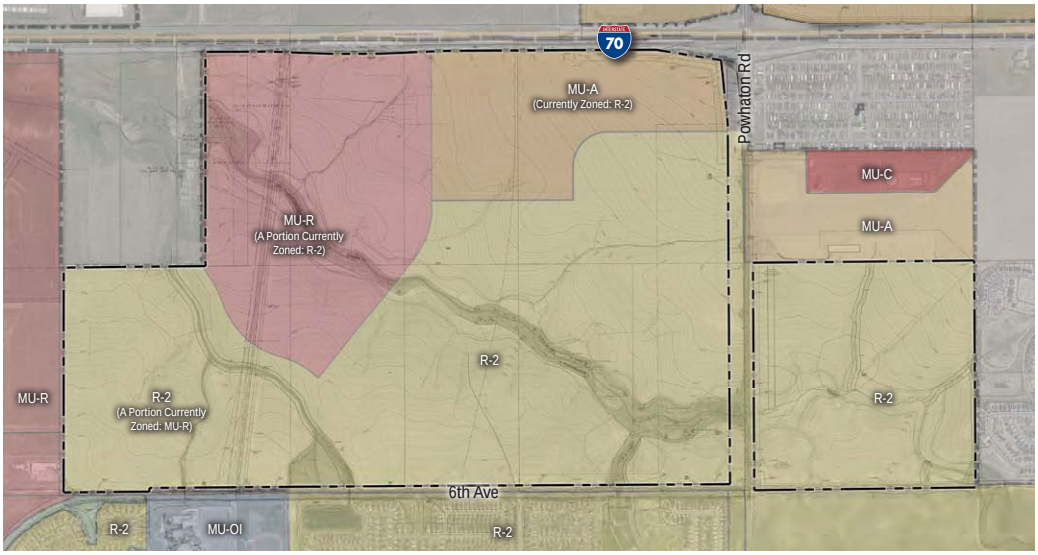


Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

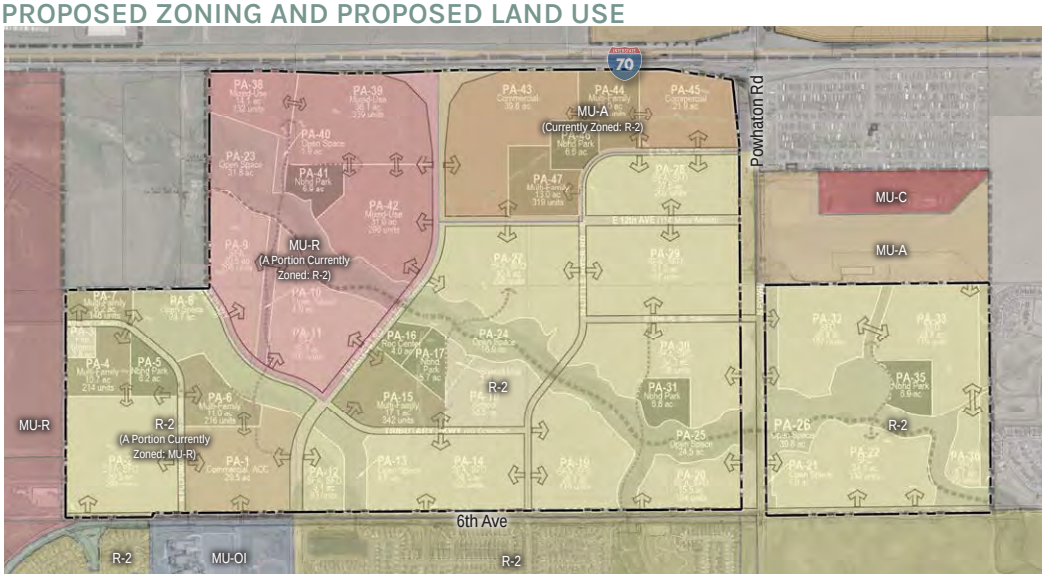
MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.



PROPOSED ZONE MAP AMENDMENTS



EXISTING ZONING

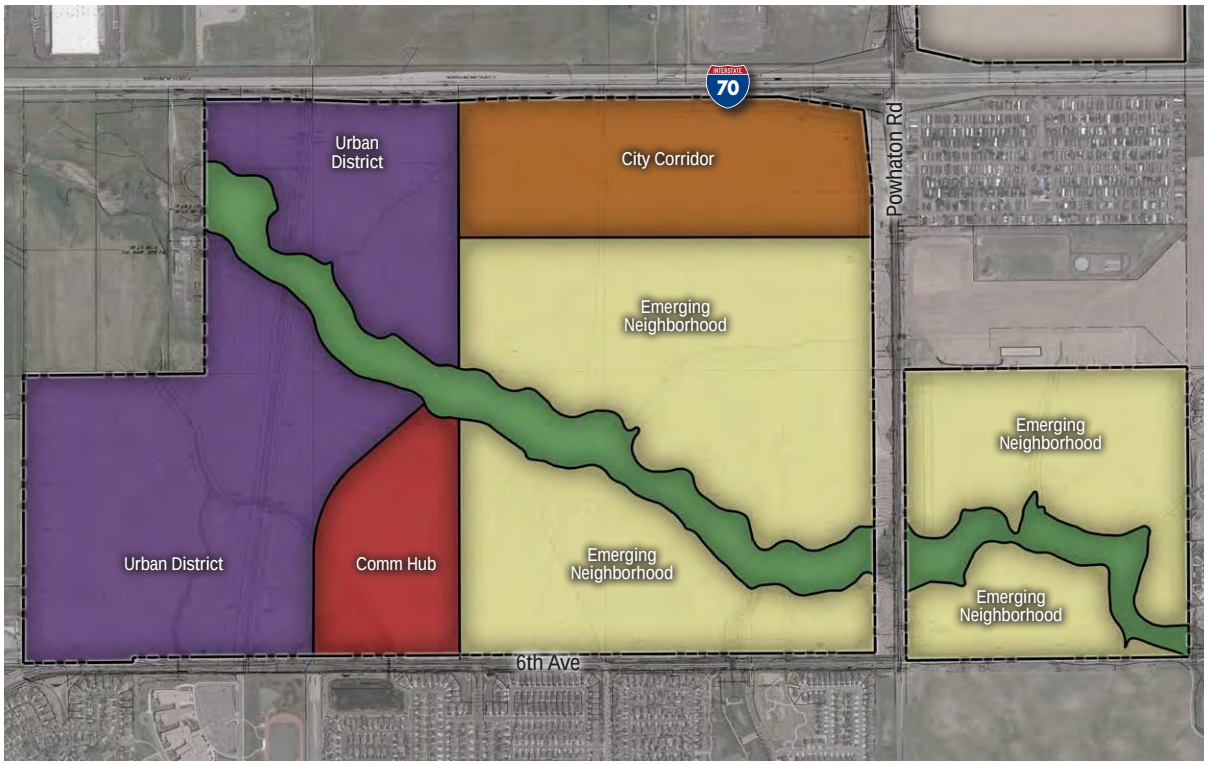
PROPOSED ZONING

PROPOSED ZONING AND PROPOSED LAND USE

APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.



Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP

APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

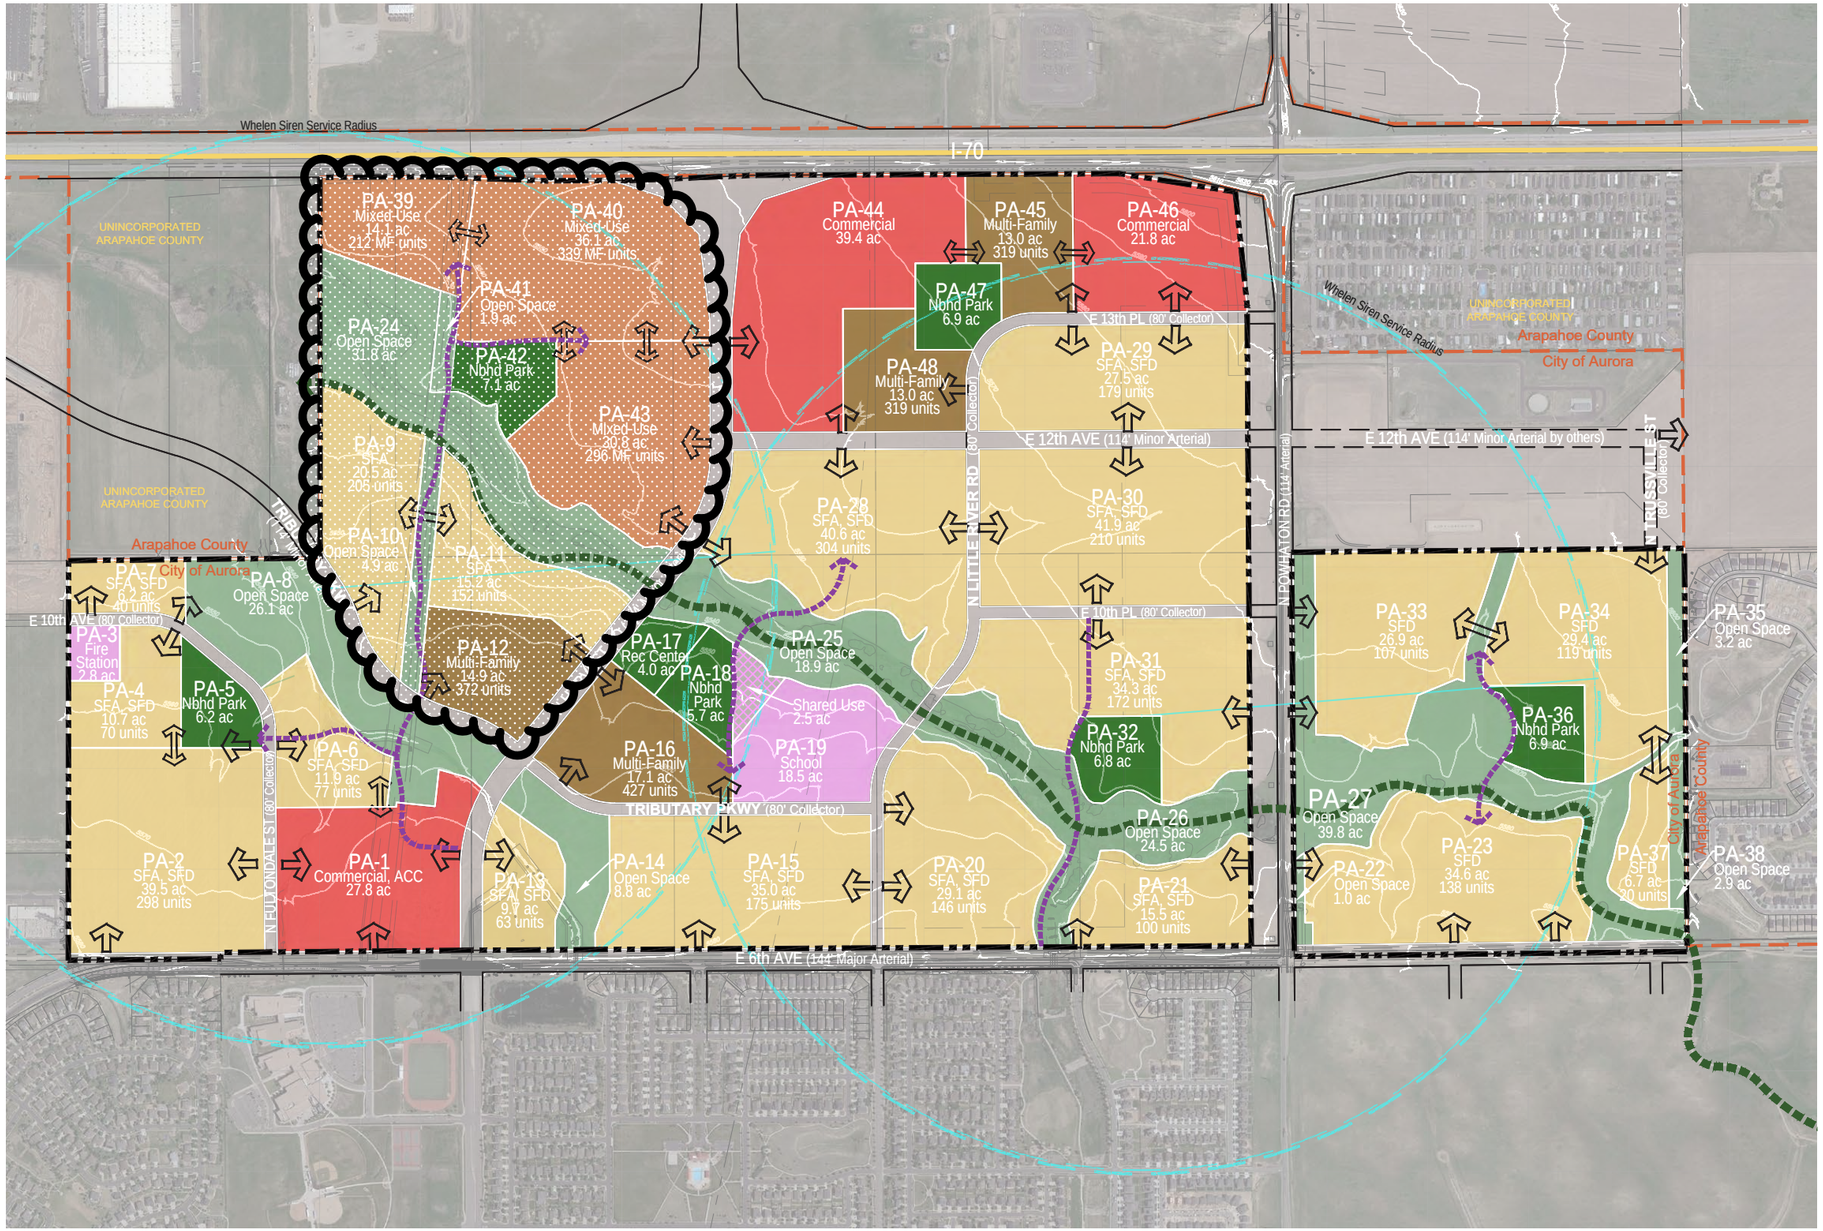
The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.



The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results

AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 189 ACRES OF LAND TO MIXED-USE REGIONAL (MU-R), LOCATED WEST OF FUTURE HARVEST ROAD AND NORTH OF FUTURE TRIBUTARY PARKWAY (MU-R TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 189 acres of land located west of Harvest Road and north of Tributary Parkway, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Medium-Density Residential District (R-2) to Mixed-Use Regional (MU-R); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Mixed-Use Regional District (MU-R) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

EXHIBIT B
REZONING (MU-R) DESCRIPTION

A PORTION OF THE EAST HALF OF SECTION 6 AND THE WEST HALF OF SECTION 5, BOTH IN TOWNSHIP 4 SOUTH, RANGE 65 WEST OF THE SIXTH PRINCIPAL MERIDIAN, CITY OF AURORA, COUNTY OF ARAPAHOE, STATE OF COLORADO, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE CENTER QUARTER CORNER OF SAID SECTION 6, WHENCE THE NORTH LINE OF THE SOUTHEAST QUARTER OF SAID SECTION 6, BEARS NORTH 89°24’14” EAST, A DISTANCE OF 2636.70 FEET, WITH ALL BEARINGS REFERENCED HEREIN BEING RELATIVE THERETO;

THENCE ALONG SAID NORTH LINE NORTH 89°24'14" EAST, A DISTANCE OF 1,615.55 FEET TO THE **POINT OF BEGINNING**;

THENCE CONTINUING ALONG SAID NORTH LINE, NORTH 89°24'14" EAST, A DISTANCE OF 32.39 FEET TO THE SOUTHEAST CORNER OF LOT 1, BLOCK 1, MCENIRY SUBDIVISION, RECORDED JUNE 11, 2008, AT RECEPTION NO. B8066656, IN THE OFFICIAL RECORDS OF ARAPAHOE COUNTY, COLORADO;

THENCE ALONG THE EASTERLY LINE OF SAID LOT 1, BLOCK 1, AND THE SOUTHERLY RIGHT-OF-WAY OF E-470, DESCRIBED IN SPECIAL WARRANTY DEED RECORDED JUNE 19, 1996 AT RECEPTION NO. A6077434, IN SAID OFFICIAL RECORDS, NORTH 00°01'47" WEST, A DISTANCE OF 2,494.31 FEET TO THE SOUTHERLY RIGHT-OF-WAY OF I-70 FRONTAGE ROAD, DESCRIBED IN SPECIAL WARRANTY DEEDS RECORDED MARCH 30, 1956 IN BOOK 960, PAGE 478, IN SAID OFFICIAL RECORDS;

THENCE ALONG SAID SOUTHERLY RIGHT-OF-WAY AND THE SOUTHERLY RIGHT-OF-WAY OF SAID I-70 FRONTAGE ROAD DESRICED IN SPECIAL WARRANTY DEED RECORDED JUNE 15, 1956 IN BOOK 972, PAGE 40 AND SPECIAL WARRANTY DEED RECORDED APRIL 9, 1956, IN BOOK 961, PAGE 519, BOTH IN SAID OFFICIAL RECORDS, NORTH 89°43'21" EAST, A DISTANCE OF 738.93 FEET TO THE SOUTHERLY RIGHT-OF-WAY OF I-70 FRONTAGE ROAD DESCRIBED IN SPECIAL WARRANTY DEED RECORDED JANUARY 16, 1976 IN BOOK 2411, PAGE 120, SAID OFFICIAL RECORDS;

THENCE ALONG SAID LAST DESCRIBED SOUTHERLY RIGHT-OF-WAY THE FOLLOWING 4 COURSES:

1. SOUTH 87°58'12" EAST, A DISTANCE OF 248.37 FEET;
2. SOUTH 87°58'45" EAST, A DISTANCE OF 502.20 FEET;
3. NORTH 89°44'16" EAST, A DISTANCE OF 549.99 FEET;
4. NORTH 87°35'35" EAST, A DISTANCE OF 584.00 FEET;

THENCE DEPARTING SAID SOUTHERLY RIGHT-OF-WAY, SOUTH 00°14'46" EAST, A DISTANCE OF 1,801.79 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE WESTERLY HAVING A RADIUS OF 1,000.00 FEET;

THENCE SOUTHERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 39°00'35", AN ARC LENGTH OF 680.85 FEET;

THENCE TANGENT TO SAID CURVE, SOUTH 38°53'09" WEST, A DISTANCE OF 1,745.41 FEET;

THENCE NORTH 51°06'51" WEST, A DISTANCE OF 100.00 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 930.00 FEET;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 21°20'55", AN ARC LENGTH OF 346.52 FEET;

THENCE TANGENT TO SAID CURVE, NORTH 72°35'10" WEST, A DISTANCE OF 125.55 FEET TO THE BEGINNING OF A TANGENT CURVE CONCAVE NORTHEASTERLY HAVING A RADIUS OF 930.03 FEET;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 51°58'00", AN ARC LENGTH OF 843.53 FEET;

THENCE NON-TANGENT TO SAID CURVE, NORTH 20°37'06" WEST, A DISTANCE OF 111.21 FEET TO THE BEGINNING OF A NON-TANGENT CURVE CONCAVE SOUTHWESTERLY HAVING A RADIUS OF 927.10 FEET, THE RADIUS POINT OF SAID CURVE BEARS SOUTH 69°23'09" WEST;

THENCE NORTHWESTERLY ALONG SAID CURVE THROUGH A CENTRAL ANGLE OF 12°47'23", AN ARC LENGTH OF 206.95 FEET;

THENCE NON-TANGENT TO SAID CURVE, NORTH 33°21'12" WEST, A DISTANCE OF 216.52 FEET TO THE **POINT OF BEGINNING**.

CONTAINING AN AREA OF 8,258,643 SQUARE FEET OR 189.592 ACRES, MORE OR LESS.

☒ Minutes Attached

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The applicant and property owner, PRI, is requesting approval of a Zoning Map Amendment from the MU-R District (Mixed-Use Regional) to the R-2 District (Medium Density Residential) for approximately 143 acres. The undeveloped property is located west of the future Harvest Road, north of 6th Avenue, east of the future Fultondale Street, and south of Tributary Parkway. The property is within the Tributary development and is designated for single-family detached, two-family, single-family attached, and commercial on the Master Plan's Land Use Map, which is included in the agenda packet for reference.

A Zoning Map Amendment is proposed from MU-R to R-2 to align the proposed uses in the Master Plan with a compatible zone district. The current zone district, MU-R, primarily allows commercial and medium-to-high density residential. Changing the zoning to R-2 will allow more residential uses in this area to provide a better transition between the existing residential uses in Cross Creek and Adonea to the south. The applicant will designate a 27-acre Administrative Activity Center (AAC) at the northwest corner of the future Harvest Road and 6th Avenue to provide commercial development for Tributary and the surrounding neighborhoods.

At the Planning and Zoning Commission (PC) public hearing on May 13, 2026 the commission recommended approval (6-0, with one commissioner absent) of the Zoning Map Amendment to R-2. There were no public comments and the draft minutes from the meeting are included in the agenda packet. The minutes include responses to approval criteria. The associated Tributary Master Plan was also approved unanimously at this meeting.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Aurora Places, the city's Comprehensive Plan, is the guiding document for any changes to the Zoning Map. The Aurora Places Placetype Map identifies this area as an "Urban District" and "Commercial Hub," which both encourage a diverse mix of uses, an accessible and attractive street network, and commercial and residential development organized around green spaces to foster a sense of community. With the inclusion of the proposed Administrative Activity Center, the R-2 District land uses align with the vision of this placetype and will create compatibility with the proposed uses in the Master Plan.

FISCAL IMPACT

QUESTIONS FOR COUNCIL

Does the City Council wish to approve the ordinance to amend the City of Aurora Zoning Map to R-2?

LEGAL COMMENTS

The City Council is the governing body of the City and has the authority to approve the Official Zoning Map and amendments to that map. (UDO §146-5.1.1.B)
The City Council shall conduct a public hearing on the application. (UDO §146-5.4.1.C.2.c)
Changes to the Zoning Map for individual parcels shall only be approved if City Council finds that the change to the Zoning Map is required because of changed conditions or circumstances on the property or the surrounding area and (a) the applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, the other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district(s); (b) the applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible through approval conditions; and (c) the application demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application. (UDO §146-5.4.1.C.3.a.ii) (McClelland)

Zone Map Amendment

NARRATIVE & EXHIBITS

2056

ON BEHALF OF PRI, we are pleased to submit this Zone Map Amendment application for the Tributary community. The following team of professionals has been assembled to help bring this community to life.

Tributary is a mixed-use community that draws inspiration and its namesake from First Creek and the many tributaries that contribute to it. Just as the tributaries find their way to First Creek, the master plan aspires to create an environment in which residents, retailers, and nature will flow together to create a community that is greater than the sum of its parts. With a proposal for Mixed Use and Commercial land, Residential planning areas, and ~200 acres of Parks and Open Space, Tributary will be a full-service community in which people can live, work, shop, and play.

Tributary is comprised of ~960 acres and is bisected by First Creek, running from southeast to northwest. The surrounding area is currently a patchwork of agricultural land, suburban development, and entitled but unbuilt Master Plans that create an urban framework near the crossing of I-70 and E-470.

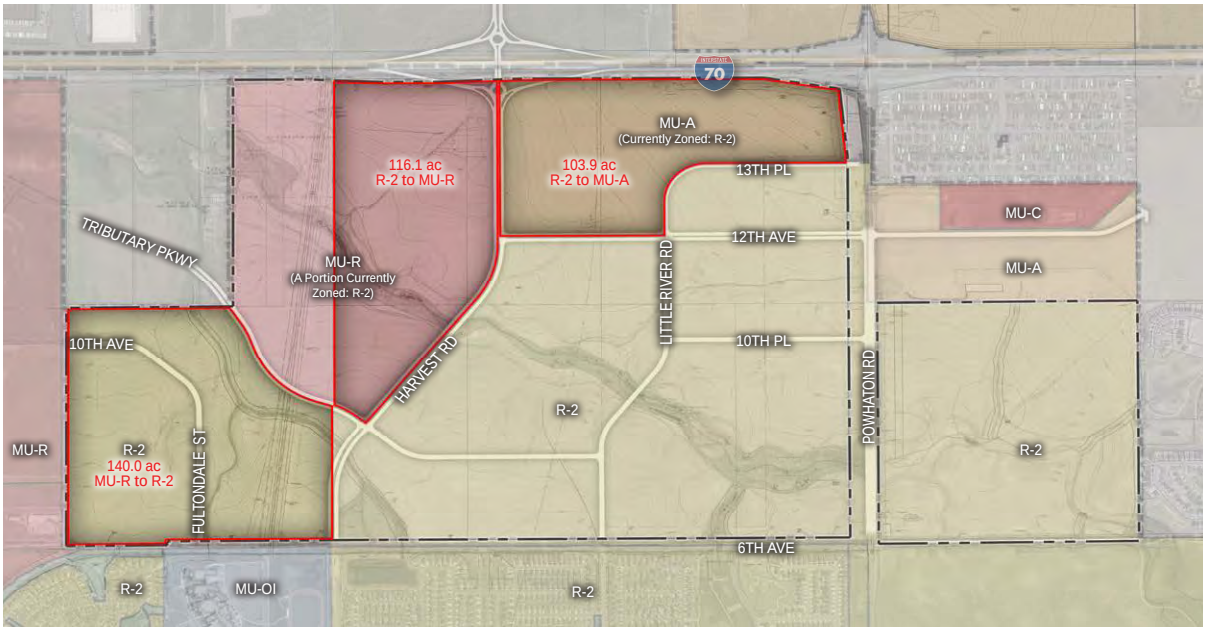
Tributary will require several zone map amendments to provide the highest and best uses of the land, as envisioned in the Aurora Places Comprehensive Plan. Proposed zone map amendments are detailed in the following pages and summarized in the table below.

	Existing Zoning (AC)	Proposed Zoning (AC)	Net Change (AC)
Mixed Use Airport (MU-A)	0.0	103.9	+103.9
Mixed Use Regional (MU-R)	213.6	189.6	-24.0
Medium Density District (R-2)	745.8	665.9	-79.9

Note: Land areas listed above include land for ROW dedications, easements, open spaces, etc. These numbers are greater than the net-areas listed in the Master Plan Land Use tab.

Rezone land east of Harvest Road, and north of the proposed E 12th Avenue and E 13th Place, and west of Powhaton Road from Medium Density District (R-2) to Mixed-Use Airport (MU-A).

As a mixed-use master-planned community directly south of the airport, MU-A zoning will allow the site to be developed with the mix of uses desired by both the city and the development team. The I-70 and Harvest Road interchange will provide high visibility and ease of access for future commercial uses concentrated along the interstate frontage.

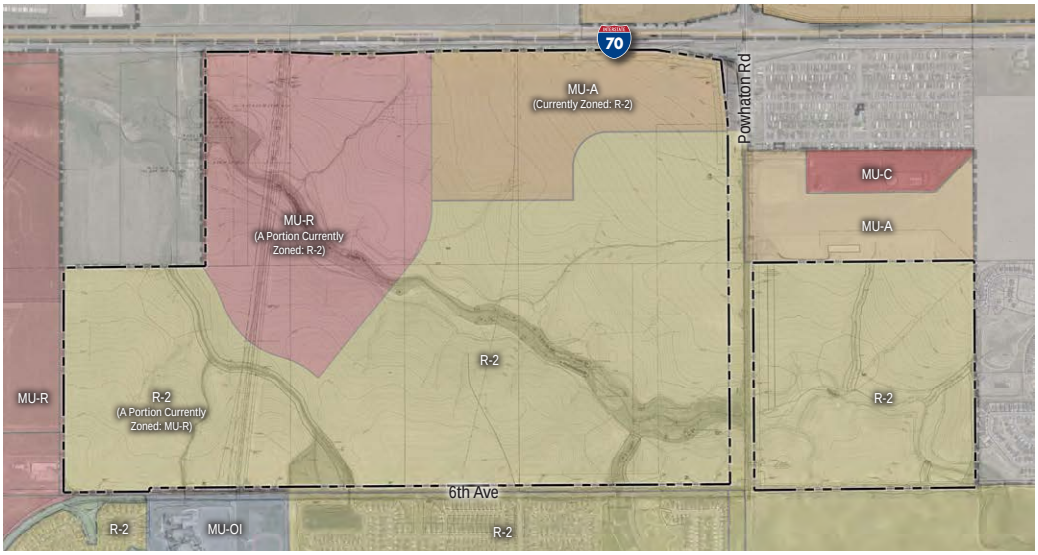


Rezone land west of Harvest Road and north of Tributary Parkway from Medium Density District (R-2) to Mixed-Use Regional District (MU-R)

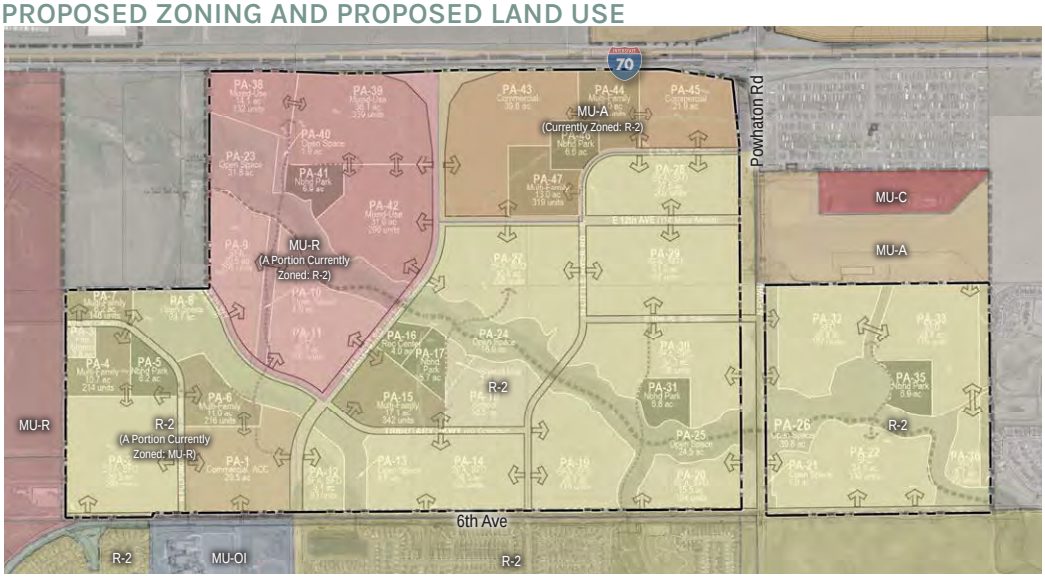
MU-R allows a mix of residential and commercial land uses at major intersections and regional activity centers. Shifting this zoning designation to the proposed Harvest Road alignment in the northern portion of the site will enable a comprehensive development of the land as was intended with the initial, partial MU-R designation, near the interstate. With this, the applicant proposes to remove the MU-R zoning along E 6th Avenue, to provide a more smooth transition of land uses from the R-2 neighborhood south of E 6th Avenue, to more intense land uses located near the interstate.

Rezone land west of Harvest Road and south of Tributary Parkway from Mixed-Use Regional (MU-R) to Medium Density Residential (R-2)

R-2 in this area allows the full site to mirror zoning across E 6th Avenue, providing a smooth transition from existing land uses. The Administrative Activity Center provision within the UDO enables the intended Commercial Hub at the intersection of Harvest Road and E 6th Avenue with R-2 zoning to become MU-C zoning.



PROPOSED ZONE MAP AMENDMENTS



EXISTING ZONING

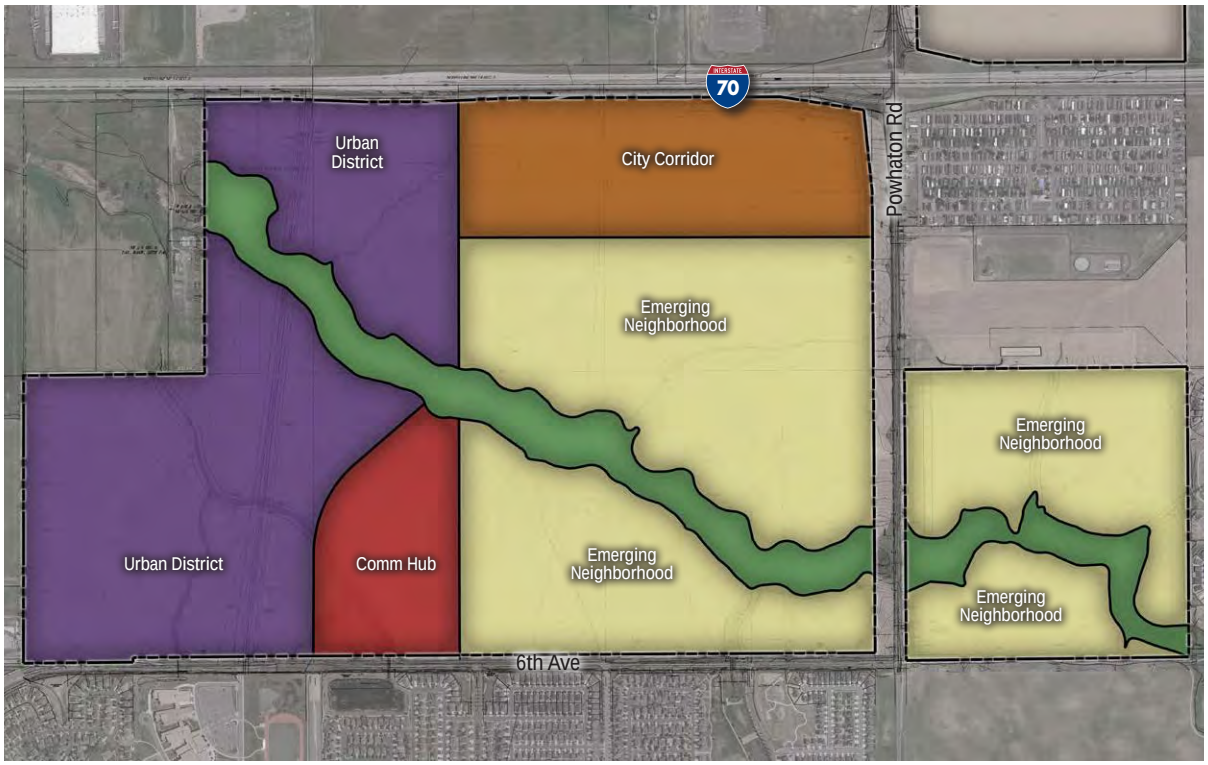
PROPOSED ZONING

PROPOSED ZONING AND PROPOSED LAND USE

APPROVAL CRITERIA

i. The applicant has demonstrated that the proposed Ordinance amendment is consistent with the spirit and intent of the Comprehensive Plan and with other policies and plans adopted by the City Council; and

The proposed zone map amendment is consistent with the City's Comprehensive Plan "Aurora Places" as Master Plan land uses have been laid out to generally align with the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood Placetypes designated by the plan.



Proposed zoning and Existing Placetypes designations align as follows:

Mixed Use Regional (MU-R) generally aligns with the Urban District Placetype.

Mixed Use Airport (MU-A) generally aligns with the City Corridor Placetype.

Medium-Density District (R-2) generally aligns with Commercial Hub and Emerging Neighborhood Placetypes; it is proposed to extend into the Urban District Placetype south of Tributary Parkway and Planning Area 8 (where E 10th Avenue turns south, becoming Fultondale Street.)

EXISTING PLACETYPES MAP

APPROVAL CRITERIA (CONTINUED)

(a) The change to the Ordinance text is required because of changed conditions or circumstances in all or a portion of the City; or

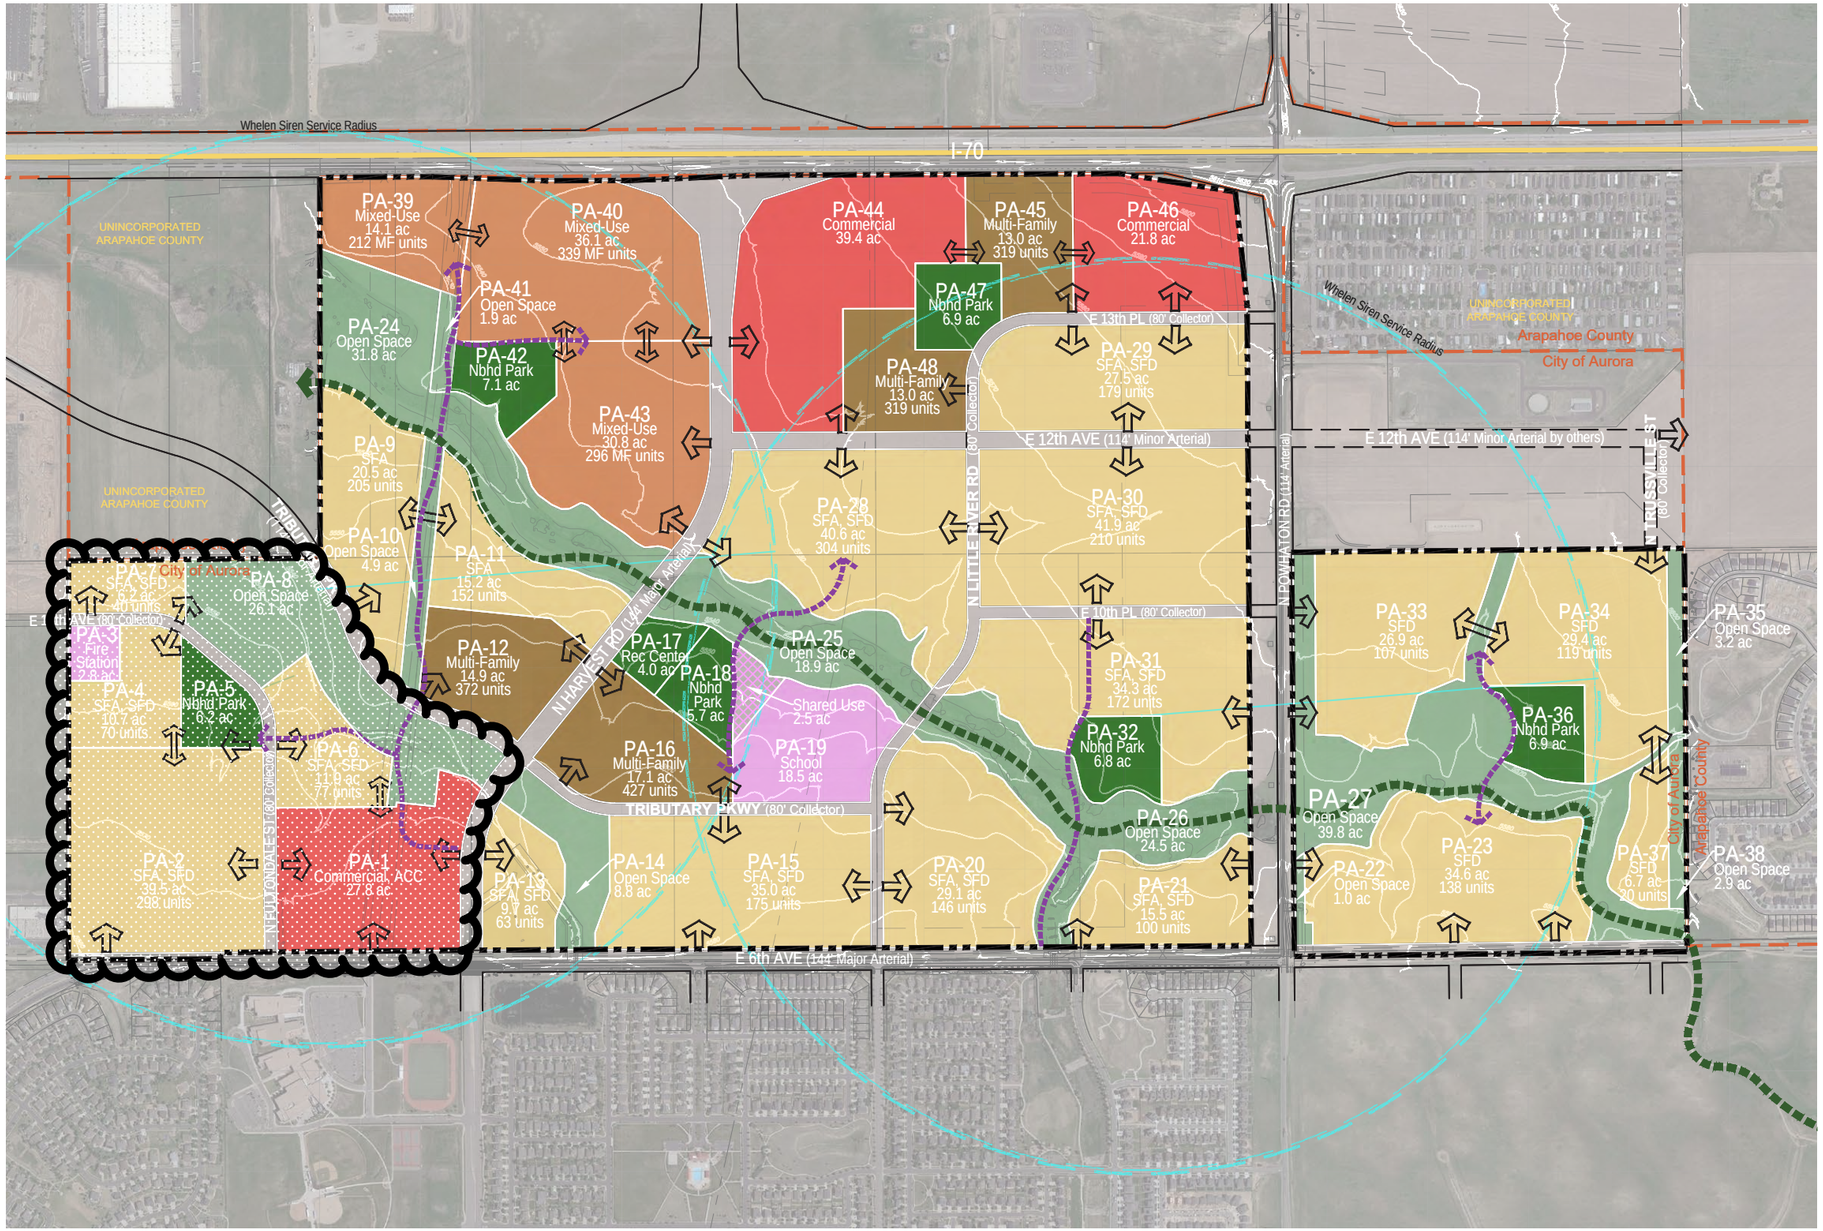
The proposed changes to the zoning map reflect multiple changes in circumstances and conditions. Primarily, the confirmed alignment of Harvest Road differs from the straight north-south alignment of the existing MU-R zone district boundary, necessitating a revision the will reflect the land patterns upon build-out.

(b) The change to the Ordinance text is required to address a new or unforeseen threat to the public health, safety, and welfare; or

Not applicable.

(c) The change to the Ordinance text is required to promote economic growth and investment that will not create material risks to the public health, safety, and welfare.

The Mixed-Use Airport zone district was created to "enable the development of master planned developments that allow for a mix of uses, located and designed in accordance with the Comprehensive Plan, and that will allow Aurora to leverage the economic opportunities created by Denver International Airport." A revision to the map to zone land immediately south of I-70 as "Mixed Use – Airport" will allow for a mix of flexible land uses to support of economic growth and investment directly south of the airport.



The Mixed-Use Regional zone district serves to allow a mix of residential and commercial land uses at major intersections and regional activity centers. Expansion of this zoning designation to the proposed Harvest Road alignment will enable a comprehensive development of the land as was intended with its initial zoning to MU-R.

For many years, residents in this area have been outspoken in requests for commercial services near their homes; an overall expansion of mixed-use zoning throughout the Tributary community will provide the flexibility to support the development of land uses that meet the demands of the area.

Finally, reallocation of R-2 zoned land, along the full southern boundary will help to maintain the land uses anticipated during the 2019 zone map update, while providing a more gradual transition of land uses, from the primarily single family detached R-2 neighborhood to the south, to the higher density and eventually mixed use areas along I-70.

8abcd. TRIBUTARY – ZONING MAP AMENDMENTS AND MASTER PLAN WITH ADJUSTMENTS

The applicant and property owner, PRI, is requesting approval of a new Master Plan and three Zoning Map Amendments for the Tributary development. The approximately 960-acre site is bounded by Interstate 70 to the north, Trussville Street to the east, 6th Avenue to the south, and De Gaulle Street to the west. The property is currently undeveloped and is bisected by First Creek, which flows from the southeast to the northwest through the site. The property is zoned Mixed-Use Airport (MU-A), Mixed-Use Regional (MU-R), and Medium Residential (R-2) within Subarea C. Surrounding land uses include single-family residential to the south and east, data centers to the west, and industrial uses to the north across Interstate 70. The site is identified within the Urban District, Commercial Hub, City Corridor, and Emerging Neighborhood placetypes in the Aurora Places Comprehensive Plan.

The proposed Master Plan includes a mix of land uses, including single-family detached, two-family, single-family attached, and multi-family residential, as well as commercial uses, a recreation center, a school, and parks and open space. The northern portion of the site is planned for commercial, mixed-use, and multi-family development to take advantage of the visibility and access provided by the new Interstate 70 and Harvest Road interchange currently under construction. The southern portion of the site is primarily planned for residential development, with the exception of a 27-acre commercial parcel located at the northwest corner of 6th Avenue and Harvest Road, which is designated as an Administrative Activity Center (AAC). Six neighborhood parks are proposed and are connected through a network of open spaces and trails, including the First Creek corridor.

As part of the Master Plan submittal, the applicant provided a Land Use Map, Public Art Plan, Open Space and Circulation Plan, Design Standards, a Public Improvements Plan, a Master Traffic Impact Study, a Master Drainage Report, and a Master Utility Study. At full build-out, the Tributary Master Plan is anticipated to include approximately 493 acres of residential development, 81 acres of commercial development, 40 acres of parks, and 168 acres of open space, including floodplain areas. The development would allow up to 4,859 dwelling units, with an estimated population of 12,534 residents. Two adjustments are requested as part of the application: one to increase the allowance for Small Residential Lots within the R-2 district from 50 percent to 65 percent of residential lots, and another to increase the height, number, and square footage of multi-tenant monument signs along Interstate 70. Following coordination with the applicant during the review process and the incorporation of additional design mitigation measures, staff supports both adjustment requests.

In conjunction with the Master Plan, three Zoning Map Amendments are proposed to better align the zoning districts with the planned land uses. The area located east of Harvest Road, west of Powhaton Road, and north of 12th Avenue is proposed to be rezoned from R-2 to MU-A to allow commercial and higher-density residential uses closer to Interstate 70. The area located west of Harvest Road and north of Tributary Parkway is proposed to be rezoned from R-2 to MU-R to encourage mixed-use development. The area west of Harvest Road and south of Tributary Parkway is proposed to be rezoned from MU-R to R-2 to allow additional residential development. Staff finds that the proposed Master Plan and Zoning Map Amendments are consistent with the applicable approval criteria in the UDO.

One hundred twenty-two (122) adjacent property owners and nine registered neighborhood organizations were notified of the application. With the first submittal of the application in May 2024, three written comments were received that expressed potential concerns regarding traffic increases, environmental impacts, residential density, and the need for more commercial uses. Staff requested that the applicant host a neighborhood meeting. A virtual meeting was held on September 24, 2024. One resident attended the meeting, and no concerns were raised. No additional comments were received throughout the review process.

Testimony Given at the Hearing:
Commissioners Hogan, Riley, Banka, Becker, Jetchick, and Bush visited the site.

Sarah Wile, Case Manager, gave a presentation of the item, including the staff recommendation.

Commissioner Riley asked for clarification regarding the slide showing percentages of small lots. S Wile explained that the slide was breaking down how many potential residential lots are in each neighborhood and how many small lots would be permitted with the 50% small residential lot percentage maximum that is currently code, versus how many small lots would be permitted with the 65% small residential lot adjustment that they are requesting.

Commissioner Riley asked for clarification regarding a statement in the staff report about generally preserving placemaking for the commercial areas. S Wile responded that there have been changes to the design standards since the March 25, 2026, meeting, and that a lot has transpired between then and now. The current design standards do contain key placemaking elements as far as ensuring that drive-throughs won't be too much along the street frontage, emphasizing the importance of plazas, walkability, and other elements, while also ensuring that the commercial development will be viable and will not require adjustments from the design standards.

Commissioner Jetchick asked about the completion of the Harvest Road interchange and if it will be finished before or during this project. S Wile responded that the construction for that has already commenced and will likely be completed before the first phase of development.

Commissioner Hogan asked if there is an agreement between the city and the developer regarding water service for the area. S Wile answered that Aurora Water has agreed to provide water service for the development. There were some limitations on density that they had to meet, and they did meet those as part of the master utility study to ensure that they would be able to serve all of the residents within this development.

Commissioner Banka asked about natural gas service for the area. Dane Hill, Property Reserve, Inc., the applicant, answered that the intent is to have natural gas serve the site. An application for this utility was submitted to Xcel Energy at the end of 2024.

Elyse Applegate Klink, Norris Design, agent representing the applicant, gave a presentation of the item.

Sean Malone, Norris Design, agent representing the applicant, gave a presentation of the item.

Commissioner Hogan asked if any of the signage for the site would have electronic messaging boards. S Malone responded yes, there is a provision in the design guidelines for a certain amount.

Commissioner Riley asked if the neighborhood comments in Exhibit O were addressed and if Fire, Rescue and Police services will be provided. E Applegate Klink responded that the neighborhood comments that were received in the first round of review were directly addressed in the second submission and a neighborhood meeting was held because of the comments that were received. Only one neighbor attended the meeting. E Applegate Klink added that a fire station is planned at 10th Avenue in the western portion of the development. The applicant has also been working with the Aurora Police Department to determine which district the development is in.

Commissioner Riley asked if what was presented at this meeting was the complete project. E Applegate Klink confirmed it was.

Diana Rael, Norris Design, agent representing the applicant, was available for questions.

Mark Cevaal, Reland, agent representing the applicant, was available for questions.

Cassie Slade, Fox Tuttle Transportation Group, agent representing the applicant, was available for questions.

Planning Commission Results

AGENDA ITEM 8a – ZONING MAP AMENDMENT FROM R-2 TO MU-A

A MOTION WAS MADE BY COMMISSIONER BUSH AND SECONDED BY COMMISSIONER RILEY.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-A DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE CITY CORRIDOR PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8b – ZONING MAP AMENDMENT FROM R-2 TO MU-R

A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE R-2 DISTRICT TO THE MU-R DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT PLACETYPE; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8c – ZONING MAP AMENDMENT FROM MU-R TO R-2

A MOTION WAS MADE BY COMMISSIONER BECKER AND SECONDED BY COMMISSIONER BUSH.

MOVE TO RECOMMEND APPROVAL OF THE ZONING MAP AMENDMENT FROM THE MU-R DISTRICT TO THE R-2 DISTRICT TO CITY COUNCIL BECAUSE THE PROPOSAL COMPLIES WITH THE CRITERIA IN SECTION 146-5.4.1.C.3 FOR THE FOLLOWING REASONS:

1. THE ZONING MAP AMENDMENT IS CONSISTENT WITH THE SPIRIT AND INTENT OF THE COMPREHENSIVE PLAN AND THE URBAN DISTRICT AND COMMERCIAL HUB PLACETYPES; AND
2. THE ZONING MAP AMENDMENT IS COMPATIBLE WITH THE SURROUNDING DEVELOPMENTS AND PROPOSED USES IN THE TRIBUTARY MASTER PLAN.

Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

AGENDA ITEM 8d – MASTER PLAN WITH ADJUSTMENTS

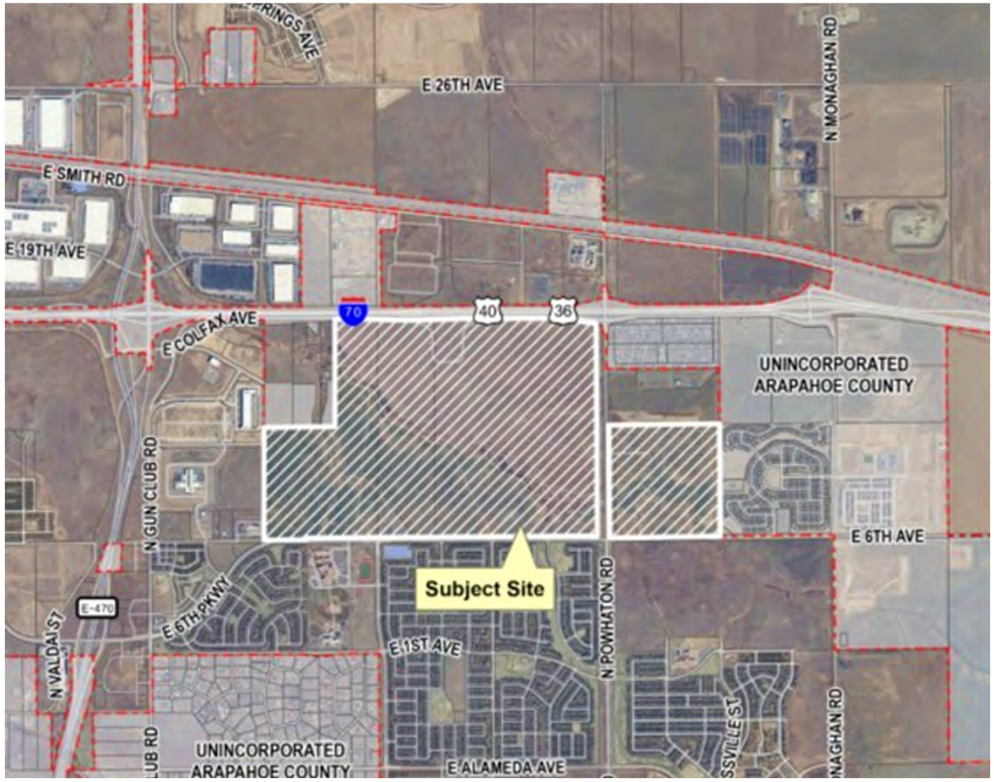
A MOTION WAS MADE BY COMMISSIONER RILEY AND SECONDED BY COMMISSIONER BANKA.

MOVE TO APPROVE, WITH TWO CONDITIONS, THE MASTER PLAN WITH TWO ADJUSTMENTS FOR SMALL RESIDENTIAL LOT PERCENTAGE AND MULTI-TENANT MONUMENT SIGN ALLOWANCES BECAUSE THE PROPOSAL COMPLIES WITH THE REQUIREMENTS OF SECTION 146-5.4.1.E.3 FOR THE FOLLOWING REASONS:

1. IT IS CONSISTENT WITH THE DESIGNATED PLACETYPES (URBAN DISTRICT, CITY CORRIDOR, COMMERCIAL HUB, AND EMERGING NEIGHBORHOOD) IN THE AURORA PLACES COMPREHENSIVE PLAN;
2. IT COMPLIES WITH THE REGULATIONS AND STANDARDS IN THE UNIFIED DEVELOPMENT ORDINANCE, EXCEPT FOR THE REQUESTED ADJUSTMENTS; AND
3. IT PROVIDES A DIVERSE MIX OF USES THAT ARE CONNECTED THROUGH INTERNAL STREETS, PARKS, AND OPEN SPACES; AND
4. IT PROMOTES QUALITY URBAN DESIGN, LANDSCAPE DESIGN, AND ARCHITECTURAL DESIGN.

APPROVAL TO BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. APPROVAL OF THE MASTER PLAN IS CONTINGENT ON THE THREE ASSOCIATED ZONING MAP AMENDMENTS BEING APPROVED BY THE CITY COUNCIL.
2. OUTSTANDING TECHNICAL ISSUES MUST BE RESOLVED PRIOR TO SUBMITTAL AND RECORDATION OF THE MASTER PLAN.



Further Discussion:
No further discussion occurred.

MOTION PASSED UNANIMOUSLY.

Zoning Map Amendment Approval Criteria

City of Aurora Unified Development Ordinance, Section 146-5.4.1.C.3:

An application for changes to the Zoning Map for individual parcels shall only be recommended if the Planning Director and the Planning and Zoning Commission finds that the following criteria have been met, and shall only be approved if City Council finds that the following criteria have been met:

1. *The change to the Zoning Map is needed to correct an error (change in the character of surrounding areas does not constitute an error in the map); or*

2. *The change to the Zoning Map is required because of changed conditions or circumstances on the property or in the surrounding area and:*

a) The applicant has demonstrated that the proposed rezoning is consistent with the spirit and intent of the Comprehensive Plan, with other policies and plans adopted by the City Council, and with the purpose statement of the proposed new zone district;
b) The applicant has demonstrated that the size, scale, height, density, and multi-modal traffic impacts of the proposed rezoning are compatible with surrounding development or can be made compatible with surrounding development through development conditions; and
c) The applicant demonstrates that the change in zoning will not create significant dislocations of tenants or occupants of the property, or that any impacts are outweighed by other public benefits or progress toward other Comprehensive Plan goals that would be achieved by approval of the application.

- Recommended approval (6-0) of the Zoning Map Amendment for 104 acres from the R-2 District to the MU-A District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 189 acres from the R-2 District to the MU-R District to City Council

- Recommended approval (6-0) of the Zoning Map Amendment for 143 acres from the MU-R District to the R-2 District to City Council

Planning and Zoning Commission Recommendations

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FOR A ZONING MAP AMENDMENT TO REZONE APPROXIMATELY 143 ACRES OF LAND TO MEDIUM-DENSITY RESIDENTIAL DISTRICT (R-2), LOCATED WEST OF FUTURE HARVEST ROAD AND SOUTH OF FUTURE TRIBUTARY PARKWAY (R-2 TRIBUTARY REZONE)

WHEREAS, the applicant has requested that approximately 143 acres of land located west of Harvest Road and south of Tributary Parkway, County of Arapahoe, State of Colorado (the "Property"), be rezoned from Mixed-Use Regional (MU-R) to Medium-Density Residential District (R-2); and

WHEREAS, Section 146-5.4.1.C.3 of the Uniform Development Ordinance provides that all applications for the rezoning of property within the City of Aurora, Colorado (the "City"), shall be presented for a public hearing, both to the Planning and Zoning Commission, who shall render a recommendation to City Council, and to City Council for final decision; and

WHEREAS, on May 14, 2026, following a public hearing, the Planning and Zoning Commission voted to recommend the rezoning of the Property.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. Based on the evidence presented at tonight's public hearing, City Council finds and determines that: the rezoning is consistent with the spirit and intent of the Comprehensive Plan, is compatible with surrounding development, and would not result in a significant dislocation of tenants or occupants of the Property.

Section 2. The Property, as more particularly described in "Exhibit B" attached hereto and incorporated herein, is zoned Medium-Density Residential District (R-2) and the zoning map is hereby amended in accordance with said zoning.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 4. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the

extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

Ordinance amending Chapter 22 of the City Code related to Periodic Code Inspections of Detention Facilities

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

The proposed ordinance calls for quarterly and annual inspections of detention facilities for occupancy and habitability standards. Development of occupancy standards will take approximately 40 hours of staff time to research, draft, benchmark, and consult with subject detention facilities. Existing staff and resources will be utilized to develop the occupancy standards. Similarly, development of the habitability requirements will take approximately 40 hours of staff time to research, draft, benchmark, and consult with subject detention facilities. The quarterly and annual inspections of occupancy and habitability standards will take approximately 2 hours each for 4 staff members, or 8 staff hours per inspection. Existing staff and resources will be utilized to conduct the inspections. Since existing staff will be utilized for this work there is not an impact to the annual budget, but there is a workload impact as previously indicated.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does City Council approve of moving the ordinance forward to a regular City Council meeting?

LEGAL COMMENTS

Council has the power to make and publish ordinances consistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the State Constitution, State Statute, or City Charter and such as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city and the inhabitants thereof. (City Code, sec. 2-32 and C.R.S., sec. 31-15-103). City Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of an ordinance. (City Charter, Art. 5-1). (Garcia)

ORDINANCE NO. 2026- ___

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING CHAPTER 22 OF THE CODE OF THE CITY OF AURORA COLORADO, RELATED TO PERIODIC INSPECTIONS, OCCUPANCY STANDARDS, AND HABITABILITY REQUIREMENTS FOR DETENTION FACILITIES.

WHEREAS, the City Council recognizes the importance of maintaining detention facilities in a safe, sanitary, and humane condition for detainees and staff; and

WHEREAS, detention facilities should be held to the same reasonable expectations, standards of conduct, and obligations applicable to any other business or property occupant including but not limited to compliance with health, safety, and sanitation standards to maintain community standards; and

WHEREAS, establishing clear inspection protocols, occupancy limits, and habitability standards for detention facilities promotes accountability, operational transparency, and risk management; and

WHEREAS, municipalities have a legal obligation to ensure that conditions of confinement do not violate constitutional protections recognized under the Eighth Amendment to the United States Constitution.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by adding a Division to Article XV, to be numbered 4, which Division shall read as follows:

DIVISION 4. INSPECTION, OCCUPANCY, AND HABITABILITY STANDARDS FOR DETENTION FACILITIES

Sec. 22-671. Declaration of purpose.
Sec. 22-672. Definitions.
Sec. 22-673. Systematic Inspections.
Sec. 22-674. Occupancy Standards.
Sec. 22-675. Habitability Requirements.
Sec. 22-676. Penalties.

Sec. 22-671. – Declaration of purpose.

***Purpose*. The purpose of this division is to ensure that detention facilities are**

maintained in a safe, sanitary, and humane condition through periodic inspections, defined occupancy standards, and minimum habitability requirements.

Sec. 22-672. – Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly requires otherwise:

(a) *Detention facility* means a secured institution under the supervision of the judiciary, correctional departments of any local, state, or federal governments, or any law enforcement agency, in which persons are or may be lawfully held in custody after arrest or as a result of conviction of a crime or in which a person or person are restrained and unable to freely leave the facility on their own accord.

(b) *Director* means the director of housing and community services or the director's designee.

(c) *Occupancy capacity* means the maximum number of detainees permitted in a housing area based on square footage, safety requirements, and supervision capacity.

(d) *Habitability standards* means minimum standards related to space requirements, furnishing requirements, prevention of the spread of communicable disease, housing and environmental conditions related to sanitation, lighting, ventilation, and temperature.

Sec. 22-673. – Periodic Inspections.

(a) The detention facility shall be subject to periodic inspections including random, unannounced inspections to ensure compliance with safety, sanitation, and operational standards.

(b) Periodic inspections shall include:

i. Daily operational inspections conducted by the on-duty supervisor.

ii. Quarterly inspections conducted by the city manager or his or her authorized representatives.

iii. Annual inspections conducted by the city manager or his or her authorized representatives.

iv. Inspection records shall be maintained for no less than seven (7) years.

(c) Any detention facilities built after the effective date of this ordinance shall comply with the standards in Chapter 22, Article XV of the Code.

Sec. 22-674. – Occupancy Standards.

(a) Occupancy limits shall be established for each holding cell or housing unit based upon:

i. Square footage

ii. Availability of beds or seating

iii. Access to sanitary facilities

iv. Staff supervision capacity

(b) Occupancy levels shall not exceed limits established by the Director.

Sec. 22-675. – Habitability Requirements.

The detention facility shall maintain minimum conditions including:

(a) Sanitation

i. Cells and common areas shall be cleaned and disinfected regularly.

ii. Detainees shall have access to functioning toilets and handwashing facilities.

iii. Continuous access to potable drinking water.

iv. Proper sewage and waste disposal systems.

(b) Lighting and Noise

i. Detention facilities shall provide adequate light and noise regulation based on the size of the detention facility, prioritizing the use of natural lighting.

ii. Adequate lighting for safety and sanitation.

(c) Air and Temperature

i. Heating and cooling systems sufficient to maintain consistently reasonable indoor temperatures.

ii. Natural or mechanical ventilation which admits fresh air and is sufficient to prevent the accumulation of odors, smoke, dust, harmful gases, and other contaminants.

Sec. 22-676. – Penalties.

Any person, firm or corporation violating any provision of this division or failing to

comply with any provisions of this division shall, upon conviction thereof, be punished as provided in section 1-13 of the City Code.

Section 2. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 3. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

QUESTIONS FOR COUNCIL

Does Council approve of moving the item forward to a regular City Council meeting?

LEGAL COMMENTS

Council has the power to make and publish ordinances consistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the State Constitution, State Statute, or City Charter and such as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city and the inhabitants thereof. (City Code Sec. 2-32 and C.R.S. Sec. 31-15-103). City Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of an ordinance. (City Charter Art. 5-1). (Garcia)

ORDINANCE NO. 2026- ___

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, AMENDING SECTIONS 26-246 AND 26-247 OF THE CITY CODE OF THE CITY OF AURORA COLORADO, AND ADDING SECTIONS 26-248 AND 26-249 TO THE CITY CODE OF THE CITY OF AURORA COLORADO, REGARDING DETENTION FACILITIES NOTIFICATION REQUIREMENTS.

WHEREAS, City Council has a compelling interest in protecting the public health, safety, and welfare of the City's residents, visitors, and employees; and

WHEREAS, reportable diseases present a significant risk of transmission in congregate settings including detention facilities; and

WHEREAS, timely notification of reportable disease outbreaks is essential to enable the City to take appropriate public health measures to prevent further spread and protect the broader community; and

WHEREAS, the City requires accurate and prompt information regarding reportable diseases or outbreaks occurring within detention facilities to coordinate with local and state public health authorities; and

WHEREAS, the failure to provide timely notice of reportable diseases may hinder the City's ability to respond effectively and may increase the risk of widespread transmission.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by amending section 26-246 which section shall read as follows:

Sec. 26-246. Definitions

Except as otherwise indicated by the context, the following words, terms and phrases, shall have the following meanings for purposes of this article:

Agent means an individual designated by a private or publicly-held corporation or a government to act on behalf of the corporation or governmental entity under this article. An agent shall be a bona fide resident of Colorado, a citizen or legal resident of the United States, or otherwise authorized to work in the United States.

Detention facility means a facility that a person, corporation or government, owns, rents, leases or has otherwise lawful possession, dedicated to maintaining inmates or detainees imprisoned or otherwise confined whether under contract with a government agency or not, excluding half way houses and other facilities where residents have freedom of movement.

Employee means any person who performs any service at a detention facility whether public or private on a full-time, part-time, or on contract basis. Employee does not include a person exclusively engaged in the repair or maintenance of the detention facility, or for the delivery of goods to the detention facility. For purpose of this article the term "employee" shall not include federal agents or employees of the federal government.

~~*Notification* means a written or electronic communication from the detention facility to the fire chief or designee advising the fire department of the existence of a communicable disease or pathogen. The communication shall not include any personal identifiable information as required under the Health Insurance Portability and Accountability Act (HIPAA).~~

Person shall have the meaning as defined in section 86-26.

Reportable disease or Reportable diseases **shall have the same meaning and requirements defined and outlined in 6 CCR 1009-1.**

Respond or Response **means a certified mailing or electronic communication from the detention facility to the fire chief or designee providing the fire department all information about reportable disease cases or pathogens in the facility upon request. The communication shall not include any personal identifiable information as required under the Health Insurance Portability and Accountability Act (HIPAA).**

Section 2. The City Code of the City of Aurora, Colorado, is hereby amended by amending section 26-247 which section shall read as follows:

Sec. 26-247. ~~Notification required.~~ **Response required.**

Every detention facility shall be required to:

(1) Request and maintain available at the detention facility and accessible to all employees the contact information of the city fire chief or designee for the notification purposes required in subsection (2).

(2) ~~Within 48 hours, notify in writing or by electronic means to the fire chief or designee, any health hazards existing in the premises, including but not limited to contagious disease, that may affect fire rescue personnel or other city personnel responding to the facility provided that all personal identifiable information is removed as required under the Health Insurance Portability and Accountability Act (HIPAA). The obligations contained in this subsection are in addition to any state or federal law requirement and do not supersede the need to~~

~~report notifiable conditions in accordance with Regulation 6 CCR 1009-1.~~ **Within 48 hours, detention facility shall respond in writing by means of a certified mailing or by electronic means to the fire chief or designee, any health hazards existing in the premises, including but not limited to reportable diseases, that may affect fire rescue personnel or other city personnel responding to the facility, or any other information upon request that the fire chief or designee believe may impact health, safety, or welfare provided that all personal identifiable information is removed as required under the Health Insurance Portability and Accountability Act (HIPAA). The obligations contained in this subsection are in addition to any state or federal law requirement and do not supersede the need to report notifiable conditions in accordance with Regulation 6 CCR 1009-1.**

(3) The fire chief or designee shall request information in subsection (2) monthly.

(4) The fire chief or designee shall report any information provided by the detention facility in accordance with this section to the Arapahoe, Adams, or Douglas County health department.

Section 3. The City Code of the City of Aurora, Colorado, is hereby amended by adding a new section to Article VI, Chapter 26, that shall be numbered 26-248, which section shall read as follows:

Sec. 26-248. Emergency Response.

(1) The Aurora Police Department shall be granted access to the detention facility to respond to calls for service and to conduct state and local criminal investigations.

(2) Aurora Fire Rescue shall be granted access to the detention facility to respond to calls for service and to conduct state and local criminal investigations.

Section 4. The City Code of the City of Aurora, Colorado, is hereby amended by adding a new section to Article VI, Chapter 26, that shall be numbered 26-249, which section shall read as follows:

Sec. 26-249. Penalties.

Any person, firm or corporation violating any provision of Chapter 26 of Article VI or failing to comply with any provisions of Chapter 26 of Article VI shall upon conviction thereof, be punished as provided in section 1-13 of the City Code.

Section 5. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the city clerk.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The 2026 Spring Supplemental Ordinance includes appropriations for various operating expenditures, capital projects, and interfund transfers that impact the 2025 and 2026 budget years. Items for 2025 represent financial activities that have already occurred.

Many of the requests in this supplemental process are technical in nature, such as budget lapses (reductions), reallocations, zero-dollar amendments where appropriations are offset by revenue, or accounting and other adjustments. These items are indicated by including "technical" in the title and may or may not have been reviewed by City Council. Items that were previously reviewed include those in the 2025 projection used in the 2026 Adopted Budget, as well as items discussed in Council Committees or City Council meetings. Council review details are included in the narrative for the supplemental request.

The attachments included for this agenda item reflect summary and detailed information regarding the requested appropriation changes for each fund and department. Transfers reflect the movement of funding from one fund to another. The details of these appropriation amendments can be found in:

- **Attachment A:** 2025 Amendment Summary
- **Attachment B:** 2026 Amendment Summary
- **Attachment C:** 2025 Amendment Detail
- **Attachment D:** 2026 Amendment Detail

The following discussion highlights significant changes by fund for each budget year, rather than listing all amendments. Please refer to Attachments C and D for full details on each request.

2025 Supplemental Amendment Requests

One-time appropriations in the General Fund total **$19.5 million** offset by $1.1 million in additional revenue. Most items are technical or are included in the 2025 projection. Significant supplemental items in the General Fund include:

- The appropriation of **$6.0 million** in the Police Department to cover costs in excess of budget for personnel-related expenditures. These include costs for overtime, shift differential, standby pay, and paid time off (PTO) year-end payouts. These overages allowed the department to meet its goals and was projected for 2025 in the 2026 budget.
- A technical supplemental to appropriate **$5.1 million** in Non-Departmental to create a transfer budget to move funds collected in the General Fund to the Designated Revenues Fund to cover incentive payouts. There is a related amendment in the Designated Revenues Fund to receive this transfer-in and create appropriation to cover 2025 payments of $3.0 million.

- The appropriation of **$3.2 million** for Aurora Fire Rescue to cover costs in excess of budget for personnel-related expenditures. These include costs for overtime and acting pay which allowed the department to adhere to the mandated staffing model. This overage was projected for 2025 in the 2026 budget.
- The appropriation of **$1.5 million** for the Public Works Department to cover costs in excess of budget for the Facilities Operations division. Additional expenditures were required as the division experienced unprecedented demand for repairs and maintenance while staffing shortages required more expensive contracted services. The need for this supplemental was not able to be projected for 2025 in the 2026 budget due to the timing of the needs.
- The appropriation of **$1.1 million** for Aurora Fire Rescue to cover personnel and travel costs related to wildland fire events in Colorado and other states. These expenditures are fully offset by reimbursement revenue. The need for this supplemental was projected for 2025 in the 2026 budget.

Significant supplemental items in other funds include:

- The net appropriation of **$7.6 million** in the **Gifts and Grants Fund** to cover the costs associated with several grants covered by newly granted funds or existing grant fund balances. Significant technical appropriations include:
    - Fuels Impact Reduction Grant at $4.0 million
    - USDA Tree Planting Grant at $2.5 million
    - American Rescue Plan Act at $1.0 million
- The appropriation of **$8.4** million in the **Capital Projects Fund** for taxes and fees collected to be returned to the Aerotropolis Regional Transportation District (ARTA) per the agreement.
- **$1.8** million in appropriation in the **Capital Projects Fund** for the Police Drone First Responder program. This project was not included in the 2025 projection in the 2026 budget as plans were not finalized.
- The total appropriation of **$1.9 million** in the **Development Review Fund** to cover costs in excess of budget across multiple departments. Credit card fees, drainage review contracted services, and fewer vacancies than expected drove this overage. The need for this supplemental was mostly reflected in the 2025 projection as part of the 2026 Adopted Budget due to timing.
- The appropriation of **$1.5 million** in the **Enhanced E-911 Fund** to cover overtime costs incurred to address service demands in the Aurora911 Department. Current fund balance is able to cover this additional cost. The need for this supplemental was included in the 2025 projection.
- The lapse of **$73.0 million** in the **Water and Wastewater funds** combined to release funds for completed projects. This supplemental was not included in the 2025 projection due to the uncertainty of project spending and timing.

2026 Supplemental Amendment Requests

New appropriation in the **General Fund** totals $383,700 offset by $244,700 in new revenue for a total impact to the fund of $139,000. Although the General Fund requests incorporate the net addition of just 0.5 FTE, there are several amendments affecting FTE as follows:

- **Add 1.0 FTE** to Finance for the Tobacco and Age Restricted Psychoactive Product Retail Licensure Program. Additional revenue of $200,000 generated by the program more than offsets the new appropriation of $164,000 in the initial year. This program was approved by Council.
- The **reduction of 0.5 FTE** in HR. The existing budget for this part-time FTE will be combined with budget for an existing vacant position to create a new Assistant Director of Human Resources at no additional cost to the General Fund.
- Transfer **7.0 FTE** and associated budgets for Access Aurora from Aurora Water to General Management.
- Transfer **3.0 FTE** and associated budgets for the Transportation Team from Planning and Business Development to Public Works.
- Transfer **3.0 FTE** Public Defender positions added to Non-Departmental in the 2023 Adopted Budget by City Council to the Office of the Public Defender. The positions have been held vacant since 2023 with vacancy savings for use by the Public Defender as needed for weekend court and other workload needs.

Other significant supplemental items in all funds include:

- A technical supplemental of **$2.0 million** in the **Gifts and Grants Fund** to appropriate grant funding for the DRCOG Climate Pollution Reduction Grant to help develop a Building Decarbonization Program.
- A technical supplemental in Aurora Water for **$9.5 million** in the **Water Fund** for PFAS MDL Litigation. This appropriation is completely offset by settlement revenue.
- The lapse of **$70.0 million** in the **Water and Wastewater funds** combined to release funds for completed projects.
- Aurora Water is requesting to add a total of **10.0 FTE** funded by the **Water and Wastewater funds** for a total of **$1.6 million**. The addition of these FTE has not previously been reviewed by Council.
    - 6.0 FTE for a 5th Construction and Repair Crew will require $1.4 million in total appropriation. The addition of this crew will help the group to stay ahead of infrastructure needs by allowing for increased in-house line replacement efforts and system improvements, an area that has had a shortage of staff.
    - 4.0 FTE are requested at a total cost of $121,000. The department provided reductions to the variable hour pay budget to reduce the cost to convert current variable hour staffing to authorized FTE to include:
        - 1.0 FTE Flow Control Technician
        - 1.0FTE GIS Technician
        - 1.0 FTE Project Manager
        - 1.0 FTE Water Conservation Specialist

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Revenue will be adjusted in 2025 and 2026 for grant funds and other agreements or policy.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

These supplemental requests will make adjustments to the 2025 and 2026 budgets.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

QUESTIONS FOR COUNCIL

Does Council wish to forward this supplemental ordinance to the regular meeting?

LEGAL COMMENTS

The City Council may make appropriations in addition to those contained in the budget upon recommendation of the City Manager, provided that the Finance Director certifies there are sufficient funds available to meet such appropriations. (*See*, City Charter Art. 11-16). (Hernandez)

Department \ Description - Reason for Appropriation

Aurora Water

2025 Technical: Wastewater Fund Lapses

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Wastewater Fund	0.00	0	-25,980,000	-25,980,000	0	25,980,000
Total Appropriation Impact	0.00	0	-25,980,000	-25,980,000	0	25,980,000

This supplemental will reduce (lapse) appropriation in the amount of $26.0 million in the Wastewater Fund for capital projects as shown below. Some lapses are offset by re-appropriations for the 2026-2030 capital plan.

* SCADA - Sewer ($400,000)
* Maintenance Facility-Sewer ($80,000)
* Maintenance Facility-Storm ($37,000)
* First Creek Interceptor Segment Zero ($653,357)
* Second Creek Lift Station ($10,000)
* Senac Creek Interceptor - Sewer ($2,095,420)
* Misc Lift Stat/Force Main Rehab-SS ($2,950,000)
* Interceptor Rehab-SS ($1,000,000)
* New Sewer Line Construction ($3,491,223)
* Crossing Structure Projects (Bridge/Culverts) ($8,291,196)
* Upper 1st Creek Det Pond-DV ($651,093)
* Miscellaneous Stream Restoration-SD ($304,761)
* Peninsula Townhomes ($278,239)
* Storm Drainage System Improvement ($1,860,919)
* Detention Ponds/Improvements ($376,792)
* Misc Stormwater Development Projects ($3,500,000)

This supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget due to the uncertainty of the timing of capital project spending. Because capital projects often span multiple years, an unspent capital appropriation will systematically carry forward to the next budget year until the appropriation is either spent, reassigned within the same program, or lapsed.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Aurora Water	Wastewater Fund	-25,980,000	0	Lapse of Appropriation

This supplemental will reduce (lapse) appropriation in the amount of $47.0 million in the Water Fund for capital projects as shown below. Some lapses are offset by re-appropriations for the 2026-2030 capital plan.

* PW North Campus Well Field Expansion ($8,724,397)
* Rampart Delivery System Expansion ($1,626,816)
* Water Delivery Infrastructure ($665,902)
* Rampart Tunnel Rehab ($71,885)
* Well Field Land Acquisition ($500,000)
* LSP Storage/Walker-WA ($3,880,006)
* 021/019 Kirby-Dersham Gravel Pit/Challenger ($1,261,000)
* Wetlands-Water ($152,203)
* 018-Lower South Platte Storage/Clare-WA ($6,500,000)
* Homestake Capital Projects (Aurora Share Only) ($3,851,580)
* 001-Eagle River MOU Project ($83,785)
* 203-Arkansas Basin Land Acquisition ($65,267)
* Water Rights Acquisition-WA ($3,091,159)
* New T&D Water Mains ($3,037,261)
* Line Replacement ($4,000,000)
* Kings Pointe Pump Station Zone 7 ($2,000,000)
* 210-PWP Raw Water Pump Station Expansion ($1,271,648)
* Reimbursements - T&D ($1,641,091)
* Energy Projects ($1,500,000)
* SCADA - Water ($1,000,000)
* Automated Meter Reading System-WA ($1,880,000)
* Maintenance Facility - Water ($216,000)

This supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget due to the uncertainty of the timing of capital project spending. Because capital projects often span multiple years, an unspent capital appropriation will systematically carry forward to the next budget year until the appropriation is either spent, reassigned within the same program, or lapsed.

2025: Drainage Review Contract Expenses

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Development Review Fund	0.00	624,775	0	624,775	0	-624,775
Total Appropriation Impact	0.00	624,775	0	624,775	0	-624,775

This supplemental will provide appropriation to cover actual expenses for the Drainage Review team managed by Aurora Water. These costs are primarily one-time and are associated with drainage review support contracts that were not previously budgeted.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget. Due to the timing of hiring FTEs to replace the drainage contracts as planned, the supplemental is $430,300 more than projected.

Total Appropriation Impact (Does not include offset impact)

Aurora911

2025: Aurora911 Overtime Costs

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Enhanced E-911 Fund	0.00	1,536,888	0	1,536,888	0	-1,536,888
Total Appropriation Impact	0.00	1,536,888	0	1,536,888	0	-1,536,888

This supplemental will provide appropriation to cover costs incurred by Aurora911 to address service demands. Since the opening of a third communications channel in 2023, operational needs have steadily increased. Call volume has also been increasing as the city continues to grow. Despite improved staffing and retention, Aurora911 staff, Police, and Fire overtime helped to cover call taking and dispatching duties as it takes roughly two years to fully cross-train new staff members. The combination of these factors led to 2025 expenditures that exceeded budget in the E-911 Fund. The fund has sufficient funds available to cover these expenses.

This supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Aurora911	Enhanced E-911 Fund	0	1,536,888	New Appropriation

Total Appropriation Impact	0.00	110,225	0	110,225	110,225	0

This supplemental will appropriate additional funds for grant awards associated with Fire Emergency Operations. This was not projected; however, expenditures are fully offset by equivalent grant reimbursement revenue.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Fire	Gifts & Grants Fund	0	110,225	New Appropriation

2025 Technical: Wildland Fire

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	1,140,244	0	1,140,244	1,140,244	0
Total Appropriation Impact	0.00	1,140,244	0	1,140,244	1,140,244	0

This supplemental request will provide appropriation to cover personnel costs, overtime, and travel costs for personnel deployed to wildland fire events in Colorado and other states. These expenditures are fully offset by reimbursement revenue. The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Fire	General Fund	0	1,140,244	New Appropriation

2025: Ambulance CAD Integration and Telehealth Provider

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	280,250	0	280,250	0	-280,250
Total Appropriation Impact	0.00	280,250	0	280,250	0	-280,250

Aurora Fire Rescue contracted with a telehealth provider to support its right response model by reducing unnecessary transports and improving unit reliability for high-priority calls. The implementation was intentionally aligned with the integration of the contracted ambulance provider into the city's Computer Aided Dispatch (CAD) system, allowing for more streamlined workflows, including better identification of appropriate call types and improved sharing and use of CAD data across agencies. The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Fire	General Fund	0	280,250	New Appropriation

Total Appropriation Impact	0.00	3,156,635	0	3,156,635	0	-3,156,635

This supplemental request will provide appropriation to cover overtime and acting pay costs related to Aurora Fire Rescue's mandated staffing model. Overtime needs fluctuate throughout the year due to unexpected absences, turnover, and prolonged periods of heightened activity. An increased reliance on overtime is needed to maintain operational readiness. The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Fire	General Fund	0	3,156,635	New Appropriation

Attachment C
2026 Spring Amendment Ordinance
2025 Appropriation Amendment Requests

Department \ Description - Reason for Appropriation

General Management

2025 Technical: Additional Appropriation for Aurora Fest Expenditures

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	39,300	0	39,300	68,000	28,700
Total Appropriation Impact	0.00	39,300	0	39,300	68,000	28,700

This technical supplemental will provide additional appropriation to cover 2025 Aurora Fest expenditures in excess of the annual baseline budget of $10,000. Total city expenditures in this fund for the event were $49,300, while funding raised through sponsorships plus interest totaled $68,000. The unspent funds will remain in the Aurora Fest account to be used for future events.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
General Management	Gifts & Grants Fund	0	39,300	New Appropriation

2025: Fleet Sublet Expenses

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Fleet Management Fund	0.00	434,159	0	434,159	434,159	0
General Fund	0.00	311,400	0	311,400	0	-311,400
Total Appropriation Impact	0.00	745,559	0	745,559	434,159	-311,400

This supplemental appropriates funding for sublet expenses in excess of budget in the Fleet Management Fund, as well as a transfer from the General Fund to maintain an ending fund balance in line with 2025 projections. Revenue came in lower than the 2025 projection, and expenses came in higher, therefore an increase to the General Fund transfer was needed to bring the fund balance in line with the 2025 projection. The expense overage was projected for 2025 in the 2026 budget but the revenue shortfall and the needed increase in the General Fund transfer was not expected.

Total Appropriation Impact (Does not include offset impact)

Housing and Community Services

2025 Technical: Adjust Federal HOME Grant and Program Income

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	830	0	830	830	0
General Fund	0.00	-26,469	0	-26,469	0	26,469
Total Appropriation Impact	0.00	-25,639	0	-25,639	830	26,469

This technical adjustment will align the Home Investment Partnership (HOME) grant appropriation for the final award and to match final 2025 program income collections. It will also set the General Fund grant match to the 2025 actual award amount. The city is required to provide a match to the HOME grant equal to 22.5 percent of the annual award. With this adjustment, the General Fund match will be $241,445. The need for this supplemental was identified and included in the 2025 projection as part of the 2026 Adopted Budget.

HOME program income consists primarily of loan payoffs from the Home Ownership Assistance Program (HOAP) and the Housing Rehabilitation Program. The strong real estate market has led program participants to sell their homes or refinance home loans with a cash out of equity resulting in the requirement to repay the loan.

HOME programs are funded by annual grants from the United States Department of Housing and Urban Development (HUD). HOAP provides zero interest, deferred loans to first-time homebuyers. The loans do not exceed $10,000 and repayment is deferred until title transfers or if a refinance results in a cash out of equity. The Housing Rehabilitation Program provided zero-interest deferred loans to income qualifying owner-occupied homeowners to rehabilitate their homes and making them more energy efficient which in turn keeps the home more affordable for the homeowner. Payment is deferred until transfer of title or if a refinance results in a cash out of equity.

Housing and Community Services

2025 Technical: Appropriate Broncos Funds to City Council Designated Youth Programs

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	293,679	0	293,679	0	-293,679
Total Appropriation Impact	0.00	293,679	0	293,679	0	-293,679

This technical one-time adjustment will appropriate $293,700 for 2025 expenditures associated with three of the Housing and Community Services Broncos Funding projects. Aurora received $3.8 million in revenue in 2023 when the sale of the Denver Broncos took place. These projects were approved for the use of those funds during the City Council meeting on September 11, 2023.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Department	Fund	Capital	Operating	Type
Housing and Community Services	Designated Revenues Fund	0	293,679	New Appropriation

2025 Technical: Appropriate Program Income for Neighborhood Stabilization

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	19,165	0	19,165	19,165	0
Total Appropriation Impact	0.00	19,165	0	19,165	19,165	0

This technical adjustment for the Neighborhood Stabilization Program (NSP1 and NSP3) will set the 2025 appropriation of program income to match final 2025 collections.

The City of Aurora was awarded NSP funding of $6.9 million from the United States Department of Housing and Urban Development (HUD) over two years (2009 and 2011). NSP projects were developed to address the high foreclosure problem resulting from the market crash and recession. The city bought, rehabbed, and sold homes to households whose incomes did not exceed 120 percent of the area median income as established by HUD. The program also provided soft second mortgages in the form of deferred loans to the qualified buyers. As the market rebounded, some of the NSP buyers either sold their homes or refinanced with a cash out of equity, requiring loan repayment, resulting in NSP program income.

Aurora's NSP program is effectively complete at this time. All grant money has been spent and there are no future NSP projects planned. Each year NSP program income collected typically declines as there are fewer remaining loans to be paid. In 2025, there were small payoffs of existing NSP loans, necessitating this budget adjustment in NSP program income.

Housing and Community Services

2025 Technical: Community Development Block Grant Adjustments

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Community Development Fund	0.00	57,376	0	57,376	57,376	0
Total Appropriation Impact	0.00	57,376	0	57,376	57,376	0

This technical adjustment will align the budget for the Community Development Block Grant (CDBG) to the 2025 actual award amount. The final 2025 CDBG award received from the U.S. Department of Housing and Urban Development (HUD) was $1,000 higher than anticipated. Additionally, this technical one-time adjustment will set the 2025 appropriation of program income to match final 2025 collections. CDBG program income consists of loan payoffs from the original Home Ownership Assistance Program (HOAP) and the Commercial Renovation Program. The need for this supplemental was identified and included in the 2025 projection as part of the 2026 Adopted Budget.

CDBG programs are funded by annual grant from the United States Department of Housing and Urban Development (HUD). The Commercial Renovation Program provided ten-year amortized loans to commercial building owners to renovate and improve building facades.

Total Appropriation Impact	0.00	538,339	0	538,339	0	-538,339

This supplemental provides one-time appropriation of $538,300 to cover the abatement and security costs associated with the Nome, Hannover, and Dallas properties in northwest Aurora. These properties required complex and extensive abatement activities.

The need for additional funding was projected for 2025 in the 2026 Adopted Budget, however at a lower amount than what was finalized. The approved budget indicated a $254,600 overage for the department and the final expenditure was $538,300 which was an increase of $283,700.

2025: 911 Call Management System

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Enhanced E-911 Fund	0.00	0	242,628	242,628	0	-242,628
Total Appropriation Impact	0.00	0	242,628	242,628	0	-242,628

This supplemental will appropriate additional funds to complete the implementation of the new 911 Call Management System utilized by Aurora911. This next generation system will move Aurora911 forward with capabilities to answer 911 calls from any location, provide advanced information for 911 calls, and provide reliability for data storage as it is in the cloud. Additional funds are needed for the addition of managed services provided by the vendor and technical services required for the delivery of 911 calls.

The need for this supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget, as we were notified of the additional costs and services needed after the 2026 Budget was adopted.

2025: Contracted Services and Communication Upgrades for Major Citywide Systems

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	758,329	0	758,329	0	-758,329
Total Appropriation Impact	0.00	758,329	0	758,329	0	-758,329

This supplemental covers expenditures in excess of the 2025 budget stemming from the use of contracted services to meet the demands of the Information Technology (IT) department's requirements and new and improved communication services to enhance network reliability, security and performance across departments. The majority of the contracted services were used in the upgrade and implementation of major citywide systems as the portfolio modernization continues. These efforts included staffing for the IT service desk, contract networking and solutions delivery, upgrades to city audiovisual equipment, and information and cyber security services. The upgrades in the communication services include costs associated with the connection of the consolidated data center and modernization of the city's IT infrastructure.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget, but this request is $390,500 higher than the original projections. This is due to several unanticipated factors required of IT to meet requirements for software system implementations, expanded information security services, and modernization of the city's IT network and infrastructure.

2025 Technical: American Rescue Plan Act Spending

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	1,020,400	0	1,020,400	0	-1,020,400
Total Appropriation Impact	0.00	1,020,400	0	1,020,400	0	-1,020,400

In 2021 the City of Aurora received $65.4 million in American Rescue Plan Act (ARPA) funds. This supplemental covers 2025 ARPA spending for various projects including park renovations, fire station improvements, the homeless navigation campus, safe outdoor spaces, and housing gap financing. With this supplemental, the ARPA funds are fully expended or encumbered in compliance with federal government deadlines.

The need for this supplemental was included in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Non-Departmental	Gifts & Grants Fund	0	1,020,400	New Appropriation

2025 Technical: Budget for Additional ARTA Revenue

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	8,362,000	8,362,000	8,362,000	0
Total Appropriation Impact	0.00	0	8,362,000	8,362,000	8,362,000	0

The city has an agreement with the Aerotropolis Regional Transportation District (ARTA) district to return building material use taxes and fees collected in the district. In 2025, the amount returned was higher than originally budgeted. This is net-zero as the additional budget is being covered by additional revenue.

Due to timing, this was not projected in the 2025 projection for the 2026 Adopted Budget.

2025 Technical: Incentive Payouts

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	3,007,000	0	3,007,000	5,132,000	2,125,000
General Fund	0.00	5,132,000	0	5,132,000	0	-5,132,000
Total Appropriation Impact	0.00	8,139,000	0	8,139,000	5,132,000	-3,007,000

The city has several agreements with companies or areas under which it collects sales tax, building materials use tax, and equipment use tax. Upon fulfillment of the agreement terms, such as business establishment or job creation, the city reimburses a portion of the funds.

This supplemental includes three incentive payments. Two have been transferred from the General Fund to the Designated Revenues Fund and have been disbursed to the respective companies. The third has also been transferred from the General Fund but has not yet been paid, to ensure those funds are reserved and not inadvertently used for other purposes.

A portion of this supplemental is connected to the lapse in Public Works seen later.

The majority of this supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget due to the uncertainty in timing of incentive agreement completion, which triggers the associated payments.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Non-Departmental	General Fund	0	5,132,000	Operating Transfer Out
Non-Departmental	Designated Revenues Fund	0	3,007,000	New Appropriation

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	1,800,000	1,800,000	0	-1,800,000
Total Appropriation Impact	0.00	0	1,800,000	1,800,000	0	-1,800,000

This 2025 supplemental will appropriate $1.8 million for the Drone First Responder capital project. The Police Department is implementing a Drone as First Responder (DFR) program that enables Real Time Information Center (RTIC) personnel to deploy and operate drones in support of field operations. This program provides immediate aerial situational awareness to first responders, improving response effectiveness, enhancing safety, and supporting proactive public safety strategies. This will be spent over three years.

This supplemental was not included in the 2025 projection as part of the 2026 Adopted Budget because it was not known at the time. This is a capital improvement project.

Total Appropriation Impact (Does not include offset impact)

2025 Technical: Fuels Impact Reduction Grant Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	0	4,000,000	4,000,000	4,000,000	0
Total Appropriation Impact	0.00	0	4,000,000	4,000,000	4,000,000	0

This supplemental will appropriate $4.0 million for 2025 and 2026 funding received for the Fuels Impact Reduction (FIR) grant program. The FIR program was created by the State of Colorado to provide grants to critically impacted communities for the improvement of their hazardous mitigation corridor infrastructure. Aurora will receive a total amount of $10,000,000 for 2025 through 2029. The grant funds must be used for the improvement of hazardous mitigation corridors such as Smith Road, Tower Road, Airport Boulevard, and Chambers Road, in Aurora's jurisdiction; prioritizing uses related to safety and environmental impacts. The Intergovernmental Agreement (IGA) with the Colorado Department of Transportation for the grant was approved at the August 11, 2025, regular City Council meeting.

The receipt of these funds was not known in time to be included in the 2025 projection for the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Works	Gifts & Grants Fund	4,000,000	0	New Appropriation

2025 Technical: Lapse 64th Avenue ARI Incentive

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	-2,818,320	-2,818,320	0	2,818,320
Total Appropriation Impact	0.00	0	-2,818,320	-2,818,320	0	2,818,320

In 2025, a budget was created to fund the agreement with the 64th Ave ARI Authority, which aims to support an intergovernmental initiative to repay the authority's debt incurred from improvements to the 64th Avenue bridge over E-470 and the extension of 64th Avenue to Jackson Gap Street. Aurora's payment for 2025 was paid out of the Designated Revenues Fund requiring that the original budget be lapsed.

This ties to a companion supplemental in Non-Departmental regarding incentives.

2025 Technical: Transfer Funding to Grant Projects

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This technical supplemental shifts previously appropriated funds to the project cost centers:

1. $68,900 in match funding to the 13th Ave Multimodal grant project. This project will design multimodal improvements needed along 13th Avenue Road between Yosemite Street and the High Line Canal Trail.
2. $365,300 in match funding to the Phase 1 Missing Sidewalks grant project. This project will fill 2.4 miles of gaps in the existing sidewalk network in Adams and Arapahoe County.
3. $1.3 million in federal funding for the construction phase of the Northwest Aurora Pedestrian Safety Enhancements grant project. The project has identified improvements at eight Northwest Aurora intersections to improve pedestrian safety. The project includes design and construction of permanent raised concrete bulb outs at two intersections and rapid implementation (striped) bulb outs at six intersections. Along with the bulb outs, striping improvements to improve pedestrian crossings will take place at all eight intersections.

The need for this supplemental was not anticipated in the 2025 projection as part of the 2026 Adopted Budget.

Total Appropriation Impact (Does not include offset impact)

2025: Operations Budget Adjustment for Overspend

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	1,537,900	0	1,537,900	0	-1,537,900
Total Appropriation Impact	0.00	1,537,900	0	1,537,900	0	-1,537,900

This supplemental appropriation covers over-budget expenditures in the General Fund for the Facilities Operations division. The division experienced an unprecedented demand for repairs and maintenance. Some of these situations required unbudgeted rentals of temporary heating and air conditioning equipment while awaiting repair and replacement of permanent equipment. Additionally, staffing shortages resulted in the use of more expensive contracted services to deal with emergency situations. Due to the timing of the additional expenditures, the need for this supplemental was not anticipated in the 2025 projection as part of the 2026 Adopted Budget.

Aurora Water

2026: Add 1.0 FTE Water Conservation Specialist

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Water Fund	1.00	31,173	0	31,173	0	-31,173
Total Appropriation Impact	1.00	31,173	0	31,173	0	-31,173

This supplemental will add 1.0 FTE Program Specialist for the Water Conservation Program. The reduction of the current Variable Hour Benefit Eligible (VHBE) cost of $87,300 will partially offset the cost of adding this position.

Aurora Water is requesting to reclassify a Variable Hour Benefited Employee (VHBE) into a Full Time Employee (FTE). This position performs duties for multiple water efficiency programs and Water Shortage Response Plan (WSRP) enforcement. During prolonged drought, this FTE conversion would position us to handle the additional associated workload. Responsive, professional, and accurate customer service, now more important than ever, requires detailed training and an in-depth understanding of programs and processes.

Finance

2026: Tobacco and Age Restricted Psychoactive Product Retail Licensure Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	1.00	163,966	0	163,966	200,000	36,034
Total Appropriation Impact	1.00	163,966	0	163,966	200,000	36,034

This supplemental serves as a request to implement the Tobacco Age Restricted Psychoactive Product Retail Licensure Program related to ordinance 2026-05. The program consists of the addition of 1.0 FTE Licensing Supervisor, salary for variable hour compliance agents and additional associated program costs. Ongoing costs total $200,000 per year, although will be somewhat less ($164,000) in the first year since the employee that is hired will only work part of the year. These costs and the addition of the FTE were disclosed as part of the ordinance approval process for ordinance 2026-05 approved by City Council on March 9, 2026.

The expenses are fully offset by additional revenue to include a $500 license paid up-front fee applied to approximately 340 businesses expected to need the license. This results in $170,000 in fee revenue. Additional expenses are covered by anticipated fines from the program, estimated at a minimum of $30,000 per year for a total revenue of $200,000 per year. Fees can be adjusted in future years based on program expenses and revenues received whether higher or lower than anticipated.

2026 Reorganization: Transfer the Transportation Team from Planning to Public Works

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplement transfers 3.0 FTE and associated appropriation from Planning and Business Development to Public Works. The purpose of this reorganization is to align transportation staffing costs and responsibilites to the correct department. The transportation team currently supports the operations and objectives that are in Public Works with regards to Connecting Aurora and the focus shifting to Build Up Aurora. This change will streamline project timelines, improve interdepartment communication, and ensure that our city transportation goals are met with both visionary insight and technical precision.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Planning and Business Development	General Fund	0	-525,247	Lapse of Appropriation
Public Works	General Fund	0	525,247	New Appropriation

2026 Technical: DRCOG Climate Pollution Reduction Grant

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Gifts & Grants Fund	0.00	1,999,936	0	1,999,936	1,999,936	0
Total Appropriation Impact	0.00	1,999,936	0	1,999,936	1,999,936	0

This supplemental will appropriate funding from the Denver Regional Council of Governments (DRCOG) which received a $199.7 million Climate Pollution Reduction Grant from the Environmental Protection Agency (EPA) to develop a Building Decarbonization Program focused on reducing climate pollution from the building sector. This project addresses staff capacity constraints in the city and supports the goals of the Building Policy Collaboration (BPC) by strengthening the city's ability to implement building decarbonization policies and reduce emissions. It will expand staffing and provide technical assistance to develop a citywide greenhouse gas inventory, update building codes in alignment with state standards, and implement energy benchmarking for low-income housing.

Department \ Description - Reason for Appropriation

Police

2026: Police Photo Enforcement Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Designated Revenues Fund	0.00	289,000	0	289,000	289,000	0
Total Appropriation Impact	0.00	289,000	0	289,000	289,000	0

This supplemental establishes an ongoing appropriation in the Designated Revenues Fund for the Police Department's photo enforcement program. The funding will cover the annual costs for rental equipment, a variable hour employee to operate the program, and other services. This program is funded by offsetting revenue generated from speeding tickets and is cost neutral to the fund.

Aurora saw a significant increase in speeding, dangerous driving, and street racing over the last few years. A pilot program to address those issues using speed vans and personnel was presented to the Public Safety Committee on 4/14/22 and then approved in Study Session on 6/13/22 by Resolution. That pilot program was unsuccessful due to the difficulty hiring personnel and operating the speed vans, but there was still a significant need to address dangerous driving in Aurora. As part of a regular discussion in the Public Safety Committee, Police conducted a request for proposal (RFP) to bring in a better solution to address speeding throughout Aurora. This updated version of the pilot program from 2022 went live in late 2025.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Police	Designated Revenues Fund	0	289,000	New Appropriation

2026: Police Secondary Employment Program

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	44,709	0	44,709	44,709	0
Total Appropriation Impact	0.00	44,709	0	44,709	44,709	0

This 2026 supplemental will appropriate $44,700 of ongoing revenue that is generated from the Police Department's Secondary Employment program. The revenue is collected as a fee charged by the city when a private vendor hires off-duty police officers for private security. The appropriation will increase funding for Police equipment, including new vehicle purchases. This additional expense is entirely offset by the new revenue source with no impact to fund balance.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Police	General Fund	0	44,709	New Appropriation

Total Appropriation Impact	0.00	44,168	0	44,168	0	-44,168

This supplemental request for ongoing appropriation will cover compensation increases approved by the Aurora Public Defender Office Commission pursuant to the city's compensation policies and procedures for five employees for various reasons per established policies, internal equity, and Colorado's Equal Pay for Equal Work Act. Calculations have incorporated the expected effective date of April 6 for four out of five of the adjustments. One position adjustment has an effective date of January 10 because it encompasses both the 2025 merit pay adjustment and an equity adjustment.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Defender	General Fund	0	-2,443	Lapse of Appropriation
Public Defender	General Fund	0	46,611	New Appropriation

2026: Transfer 3.0 FTE Public Defenders from Non-Departmental to Public Defender

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplemental will transfer 3.0 FTE and appropriation for Deputy Public Defender Attorney positions from Non-Departmental to the Public Defender's Office.

The 2023 Proposed Budget included two amendments to add a total of 3.0 FTE Deputy Public Defender Attorneys supported by an external workload study and to accommodate the state mandated weekend court. At the 2023 Budget Workshop, City Council moved the FTE and appropriations to Non-Departmental. These positions have been held vacant to-date and the vacancy savings are used to offset Public Defender costs associated with legal services for the weekend court mandate as well as to address workload issues as needed.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Non-Departmental	General Fund	0	-384,015	Lapse of Appropriation
Public Defender	General Fund	0	384,015	New Appropriation

Public Works

2026 Technical: Appropriate Developer Reimbursement

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
Capital Projects Fund	0.00	0	486,473	486,473	486,473	0
Total Appropriation Impact	0.00	0	486,473	486,473	486,473	0

This supplemental will appropriate design funds reimbursed to the city by Southeast Aurora Regional Improvement Authority (SARIA) for the Gartrell Bridge project. This project, in partnership with SARIA and the E-470 Public Highway Authority, will expand the existing two-lane bridge to a four-lane section with turn lanes. Construction is anticipated to begin in summer 2026.

The intergovernmental agreements for design and construction of the Gartrell project were approved at the August 5, 2019 and March 24, 2025 Regular City Council Meetings, respectively.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Works	Capital Projects Fund	486,473	0	New Appropriation

2026 Technical: Transfer Budget to Housing And Community Services from Public Works

Fund Impact	FTE	Operating Approp.	CIP Approp.	Approp. Total	Revenue Offset	Inc. / (Dec.) in Fund Bal.
General Fund	0.00	0	0	0	0	0
Total Appropriation Impact	0.00	0	0	0	0	0

This supplemental lapses $22,500 from Public Works with a corresponding $22,500 appropriation to Housing and Community Services (HCS), resulting in a net-zero impact to the General Fund. The budget transfer reflects a shift in operational responsibility, as HCS now performs large animal carcass removal from roadways in addition to its existing small animal removal responsibility.

Total Appropriation Impact (Does not include offset impact)

Department	Fund	Capital	Operating	Type
Public Works	General Fund	0	-22,500	Lapse of Appropriation
Housing and Community Services	General Fund	0	22,500	New Appropriation

ORDINANCE NO. 2026-

A BILL

FOR AN ORDINANCE OF THE CITY OF AURORA, COLORADO APPROPRIATING SUMS OF MONEY IN ADDITION TO THOSE APPROPRIATED IN ORDINANCE NOS. 2024-72, 2025-43, AND 2025-106 FOR THE 2025 FISCAL YEAR AND ORDINANCE NO. 2025-96 FOR THE 2026 FISCAL YEAR

WHEREAS, pursuant to Ordinance Nos. 2024-72, 2025-43, and 2025-106 the Aurora City Council (the "Council") has appropriated funds for the fiscal year beginning January 1, 2025, and ending December 31, 2025 ("Fiscal Year 2025"); and

WHEREAS, pursuant to Ordinance No. 2025-96 the Council has appropriated funds for the fiscal year beginning January 1, 2026, and ending December 31, 2026 ("Fiscal Year 2026"); and

WHEREAS, additional appropriations are needed to fund new expenditures for which revenues have recently become available; and

WHEREAS, the Director of Finance has certified that unappropriated reserves and additional funding sources and revenues are available for appropriation in the various funds; and

WHEREAS, the City Manager has recommended that the various appropriations enumerated in this Ordinance be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. Appropriations in addition to those made in Ordinance Nos. 2024-72, 2025-43, and 2025-106 shall be made for Fiscal Year 2025 for the purposes enumerated in Attachment A to the document entitled 2026 Spring Amendment Ordinance Appropriation Summaries by Fund, such document being in the form as filed with the Office of the City Clerk and presented to the Council at this meeting (the "2025 Amendment Summary"), all as follows:

a. From the unappropriated fund balance and/or additional revenues of the General Fund, the net amount of Nineteen Million Four Hundred Forty-Eight Thousand Thirty-One Dollars ($19,448,031).

b. From the unappropriated fund balance and/or additional revenues of the Capital Projects Fund, the net amount of Seven Million Seven Hundred Fifty-Six Thousand Nine Hundred Thirty-Five Dollars ($7,756,935).

c. From the unappropriated fund balance and/or additional revenues of the Community Development Fund, the net amount of Seventy-Seven Thousand Three Hundred Seventy-One Dollars ($77,371).

d. From the unappropriated fund balance and/or additional revenues of the Conservation Trust Fund, the net amount of Nine Hundred Seventy Dollars ($970).

e. From the unappropriated fund balance and/or additional revenues of the Cultural Services Fund, the net amount of Three Hundred Nine Thousand Six Hundred Fifteen Dollars ($309,615).

f. From the unappropriated fund balance and/or additional revenues of the Designated Revenues Fund, the net amount of Three Million Three Hundred Two Thousand Five Hundred Thirty-Six Dollars ($3,302,536).

g. From the unappropriated fund balance and/or additional revenues of the Development Review Fund, the net amount of One Million Nine Hundred Thirty-Two Thousand Three Hundred Seventy-Five Dollars ($1,932,375).

h. From the unappropriated fund balance and/or additional revenues of the Enhanced E-911 Fund, the net amount of One Million Seven Hundred Seventy-Nine Thousand Five Hundred Sixteen Dollars ($1,779,516).

i. From the unappropriated fund balance and/or additional revenues of the Fleet Management Fund, the net amount of Four Hundred Thirty-Four Thousand One Hundred Fifty-Nine Dollars ($434,159).

j. From the unappropriated fund balance and/or additional revenues of the Gifts and Grants Fund, the net amount of Seven Million Six Hundred Forty-Five Thousand Eight Hundred Seventy-Six Dollars ($7,645,876).

k. From the unappropriated fund balance and/or additional revenues of the Golf Courses Fund, the net amount of Two Hundred Nineteen Thousand Three Hundred Twenty Dollars ($219,320).

l. From the unappropriated fund balance and/or additional revenues of the Open Space Fund, the net amount of Thirty-Three Thousand Four Hundred Thirty-Five Dollars ($33,435).

m. From the unappropriated fund balance and/or additional revenues of the Parking and Mobility Fund, the net amount of One Hundred Ninety-Two Thousand Seven Hundred Thirty-Six Dollars ($192,736).

Section 2. Appropriations made in Ordinance Nos. 2024-72, 2025-43, and 2025-106 shall be made for Fiscal Year 2025 shall be adjusted for the reasons enumerated in the 2025 Amendment Summary, all as follows:

a. From the Wastewater Fund, the net amount of Twenty-Five Million Nine Hundred Eighty Thousand Dollars ($25,980,000) shall be deemed lapsed.

b. From the Water Fund, the net amount of Forty-Seven Million Twenty Thousand Dollars ($47,020,000) shall be deemed lapsed.

Section 3. Appropriations in addition to those made in Ordinance No. 2025-96 shall be made for Fiscal Year 2026 for the purposes enumerated in Attachment B to the document entitled

2026 Spring Amendment Ordinance Appropriation Summaries by Fund, such document being in the form as filed with the Office of the City Clerk and presented to the Council at this meeting (the "2026 Amendment Summary"), all as follows:

a. From the unappropriated fund balance and/or additional revenues of the General Fund, the net amount Three Hundred Eighty-Three Thousand Six Hundred Sixty Dollars ($383,660).

b. From the unappropriated fund balance and/or additional revenues of the Capital Projects Fund, the net amount of Five Hundred Eighty-Six Thousand Four Hundred Seventy-Three Dollars ($586,473).

c. From the unappropriated fund balance and/or additional revenues of the Conservation Trust Fund, the net amount of Zero Dollars ($0).

d. From the unappropriated fund balance and/or additional revenues of the Cultural Services Fund, the net amount of Twenty-Four Thousand Five Hundred Dollars ($24,500).

e. From the unappropriated fund balance and/or additional revenues of the Designated Revenues Fund, the net amount of Two Hundred Eighty-Nine Thousand Dollars ($289,000).

f. From the unappropriated fund balance and/or additional revenues of the Gifts and Grants Fund, the net amount of Two Million Three Hundred Twenty-Four Thousand Five Hundred Thirty-Nine Dollars ($2,324,539).

g. From the unappropriated fund balance and/or additional revenues of the Golf Courses Fund, the net amount of Forty-Nine Thousand Five Hundred Dollars ($49,500).

h. From the unappropriated fund balance and/or additional revenues of the Parks Development Fund, the net amount of Zero Dollars ($0).

Section 4. Appropriations made in Ordinance No. 2025-96 shall be made for Fiscal Year 2026 shall be adjusted for the reasons enumerated in the 2026 Amendment Summary, all as follows:

a. From the Wastewater Fund, the net amount of Nine Million Eight Hundred Sixty-Two Thousand Six Hundred Twenty-One Dollars ($9,862,621) shall be deemed lapsed.

b. From the Water Fund, the net amount of Forty-Nine Million Thirty-Seven Thousand Six Hundred Thirty-Nine Dollars ($49,037,639) shall be deemed lapsed.

Section 5. Inter-fund and inter-departmental transfers shall be made as enumerated in the 2025 Amendment Detail for Fiscal Year 2025 and the 2026 Amendment Detail for Fiscal Year 2026.

Section 6. The City Manager and the Finance Director are hereby directed and authorized

to expend so much of the said funds as are necessary to pay for the projects and acquisitions referenced herein.

Section 7. All ordinances or parts of ordinances of the City in conflict herewith are expressly repealed.

Section 8. Pursuant to Section 5-5 of the City Charter, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the City Clerk.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

This ordinance will repeal the changes introduced by council related to the Aurora Houing Authority "AHA"). Council changed the qualifications and appointment process in 2024. After the changes were approved the AHA challenged ordinance 2024-29 and the district court and court of appeals of the state ruled in favor of the AHA. In consequence, staff is recommending to council repealing the ordinance.

QUESTIONS FOR COUNCIL

Does council wish to approve an Ordinance to repeal the Aurora Housing Authority changes?

LEGAL COMMENTS

The City of Aurora is a home rule municipality, organized and existing under and Article XX, Section 6 of the Colorado Constitution. Article XX Section 6 grants the city and its citizens the right to self-government in matters of local affairs not preempted by the State legislature. The City Council shall have and shall exercise the powers, privileges and duties granted and conferred by the state constitution, statute, or city Charter. The City Council has the power to make and publish from time to time ordinances, pass resolutions and motions not inconsistent with the laws of the state for carrying into effect or discharging the powers and duties conferred by the state constitution, statute or City Charter as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort, and convenience of the city. City Code Section 2-32. As a home rule city, the City Council has the inherent power to pass ordinances and repeal any prior ordinances. This action is legislative in nature and will amend the Aurora City Code therefore it must be taken in the form of an ordinance. *See,* Article 5-1 Aurora City Charter. (Hernandez).

ORDINANCE NO. 2026-____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, REPEALING ORDINANCE 2024-29, AND OTHER RELATED MATTERS

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and under Article XX Section 6 of the Colorado Constitution, the City has authority over matters of local concern; and

WHEREAS, the City Council (the "Council") has the power to make and publish from time-to-time ordinances as it shall deem necessary and proper to provide for the safety; preserve the health; promote the prosperity; and improve the morals, order, comfort and convenience of the city; and

WHEREAS, the City passed Ordinance 2024-29 amending the composition and qualifications of the Board of Directors of the Aurora Housing Authority (the "Authority"), and the Authority instituted proceedings challenging the amendments; and

WHEREAS, the Colorado Court of Appeals reached an unfavorable decision for the City, and the ordinance is now likely moot; and

WHEREAS, the Council has found and determined that repealing Ordinance 2024-29 is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO.

Section 1. Ordinance 2024-29 is hereby repealed in its entirety.

Section 2. The City Manager and the City Attorney or their respective designees are hereby authorized to take any necessary steps to effectuate the repeal contained in this ordinance, and to collaborate with the City of Aurora Codifier to correct the Aurora City Code as needed.

Section 3. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

Section 4. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

QUESTIONS FOR COUNCIL

Does Council wish to support the ordinance to establish the Office of Public Safety Accountability? (PSA)

LEGAL COMMENTS

Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (Section 5-1, Aurora City Charter) (Platt)

ORDINANCE NO. 2026- ____

A BILL

FOR AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, ADDING SECTION 2-68 OF THE CITY CODE TO CREATE THE OFFICE OF PUBLIC SAFETY ACCOUNTABILITY

WHEREAS, the City entered into a Consent Decree with the Colorado Attorney General's Office in 2021 to address issues identified in a patterns and practice investigation authorized by C.R.S. § 24-31-113; and

WHEREAS, the City engaged an independent consent decree monitor, IntegrAssure, to oversee the Consent Decree and assist the City with meeting the mandates of the Decree; and

WHEREAS, many mandates of the Consent Decree are now in substantial compliance, and the City seeks to establish an independent public safety oversight office to continue this function after the conclusion of IntegrAssure's engagement and completion of all remaining mandates; and

WHEREAS, the Office of Public Safety Accountability's mission will be the furtherance of the reforms achieved under the Consent Decree and culture of continuous improvement of the City's public safety departments; and

WHEREAS, the Office of Public Safety Accountability will conduct proactive and ongoing community outreach across Aurora, with particular focus on highly impacted communities, to better understand and respond to the diverse needs, and experiences

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The City Code of the City of Aurora, Colorado, is hereby amended by adding Section 2-68 which section reads as follows:

"Sec. 2-68. Office of Public Safety Accountability.

(a) *Organizational independence*. The office of public safety accountability (hereinafter "PSA"), overseen by the manager of public safety accountability (hereinafter "manager"), is an independent function reporting administratively to the city manager and functionally to the public safety policy committee. The manager has the authority to discuss significant and sensitive matters with city council members, including concerns with the interference of duties, without city management present.

(b) *Powers and duties; scope of review*. The manager shall have the authority to conduct oversight and review of all public safety functions including all council appointees, offices, boards, activities, agencies, and programs. This includes, but is not limited to, police, fire, 911, and detention.

(c) *Oversight methodology*. PSA shall conduct ongoing review, monitoring, and participation in public safety processes, policies, and performance reporting. This includes, but is not limited to, use of force reviews, policy development, and department operations and performance meetings.

(d) *Critical Incidents*. Any city public safety agency that has a critical incident, defined as an incident resulting in death or serious bodily injury, shall notify PSA within thirty minutes of the incident. The manager or designated staff shall report to the site of the critical incident and have access to pertinent information and personnel involved in the incident. The manager shall have access to monitor any investigations or reviews under the purview of the city associated with critical incidents. The manager shall issue a report of findings contemporaneous with the release of other city investigations or reviews.

(e) *Family Communication and Transparency*. PSA shall assign a liaison to the family of any individual killed or injured in any critical incident within forty-eight hours of the incident. The liaison shall be the primary point of contact for the family. The liaison shall have training in trauma informed response and training in investigative processes as required under state law. The liaison is responsible for informing the family of the investigative processes required under state law. The liaison shall reach out to the investigating agency and judicial district attorney and request updates for the family at least every thirty (30) days and upon reasonable requests by the family. The liaison shall coordinate with the police department to ensure the family has access to viewing all body worn camera footage and other evidence as required by state law.

(f) *Funding*. Sufficient funds shall be proposed and approved to fulfill the responsibilities specified herein in accordance with the city policies and procedures. Sufficient resources shall be available to the manager of PSA and staff to ensure appropriate professional development, continuing professional education, and compliance with applicable professional certification requirements. The city council must approve any budget or resource reductions that impact the office of PSA's ability to fulfill its responsibilities.

(g) *Manager hiring and evaluation*. The city manager shall seek input from the city council Public Safety policy committee when hiring and removing the manager and evaluating the manager's performance, including remuneration. The manager shall be selected based on experience and education suitable for the professional performance of civilian oversight of law enforcement.

(h) *Appointment of employees*. The manager shall have the power to appoint, employ, and remove employees as deemed necessary to administrate the office's affairs and to prescribe their duties, scope of authority, and qualifications in accordance with all city policies, rules, and regulations.

(i) *Annual review plan*. The manager shall coordinate with the city manager in creating an annual review plan. The manager shall coordinate with the city auditor to coordinate each of their respective annual plans to identify areas of cooperation and interest. The manager shall annually present the proposed plan to the city council public safety policy committee for their review by the beginning of each calendar or fiscal year. The annual review plan should include the proposed reviews and identify potential objectives, the general nature of the reviews, and any special projects. The manager of PSA shall have final authority to select the reviews planned. The manager may modify the annual review plan as necessary during the fiscal year and will notify the city manager and the city council public safety policy committee of such modifications.

(j) *Access to employees, records, and property*. All officers and employees of Aurora shall provide to PSA unrestricted access to employees, information, records (including electronic data), body worn camera videos, property, equipment, and facilities required for the office to conduct reviews and oversight. If such officers or employees fail to produce access and/or information, the manager shall notify the city manager or applicable council appointee unless there is a concern about the loss or destruction of records. The manager then has the authority to initiate a search to obtain the needed information from any such official or employee, outside contractor, or subcontractor, except as governed by Colorado law. Additionally, during a review or related oversight duties, city officers and employees shall fully cooperate and fully disclose all known information to PSA.

(k) *Review reports*. Each annual review conducted in accordance with subsection (i) or subsection (d) will result in a report, electronically and publicly available, in accordance with state or federal law. A final draft of the review report will be shared with the reviewed program and the department director or chief for their review and to obtain management responses. The manager shall communicate the final results to city management, the city council public safety policy committee and the public. Information legally protected by state or federal law will be withheld from public release in accordance with applicable open records laws.

(l) *Annual reports*. The manager shall submit an annual report to the city council public safety policy committee indicating reviews completed, reports on internal performance measures, and significant issues management has not fully addressed.

(m) *Report on irregularities*. If the manager becomes aware of abuse or illegal acts or indications of such acts that could affect the city, the manager shall report the irregularities to the city manager, the city council public safety policy committee, or city attorney. In the

case that the city manager or a council appointee is believed to be a party to abuse or illegal acts, the manager shall report the acts directly to the city council.

(n) *Complaints and Commendations*. PSA shall take complaints against city employees of public safety agencies. The complaints shall be relayed to the appropriate department for action in accordance with that department's policies and procedures. PSA shall have the ability to monitor the investigative process to include providing feedback to the department on the process. PSA shall raise any concerns or issues associated with the investigative process with the appropriate department director or chief. PSA may facilitate communication between the complaining party and the appropriate department as needed.

(o) *Community Engagement.* PSA shall lead at least two community listening sessions yearly and be a liaison between community stakeholders, public safety departments, and city management."

Section 3. Severability. The provisions of this Ordinance are hereby declared to be severable. If any section, paragraph, clause, or provision of this Ordinance shall, for any reason, be held to be invalid or unenforceable by a court of competent jurisdiction, the invalidity or unenforceability of such section, paragraph, clause, or provision shall not affect any of the remaining provisions of this Ordinance.

Section 4. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 5. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

APPROVED AS TO FORM:

PETER A. SCHULTE, CITY ATTORNEY

By: Megan Platt
(MEGAN PLATT, DEPUTY CITY ATTORNEY)

CITY OF AURORA
Late Submission Approval for Agenda Item

Item Title: Build Up Aurora - Community Facilities Ballot Language (Ordinance)

Item Initiator: Laura Perry, Deputy City Manager

Staff Source/Legal Source: Laura Perry, Deputy City Manager/Rachel Allen Deputy City Atorney

Outside Speaker: N/A

Strategic Outcome: Well Managed: High Performing organization, committed to great customer service, innovation, continuous improvement, fiscal stewardship, and maintaining critical infrastructure.

CRITERIA - PLEASE CONSIDER ITEM FOR LATE SUBMISSION FOR THE FOLLOWING REASON:

☐ There is a time-sensitive legal requirement that must be met and cannot be met by a future meeting date

☐ The delay will result in an adverse financial impact to the city

☐ The item is related to a disaster and must be addressed before the next available meeting

COUNCIL MEETING DATES FOR LATE SUBMISSION:

Study Session: 5/18/2026

Regular Meeting: 6/8/2026

EXPLANATION: *(Please provide a detailed explanation as to why the item falls into one or more of the above criteria and why it may not be set for a future meeting date.)*

I understand the agenda item will not be added to the agenda without submitting this completed form as an attachment in e-Scribe. The agenda item will not be added to the agenda if the workflow is not completed by the WORKFLOW COMPLETED date indicated on the agenda deadline calendar.

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $105,000,000 and increase the sales and use tax rate by 0.129% for 30 years to provide for libraries, recreation, and community centers facilities needs, including without limitation the operation

of and repair, maintenance, and improvements to community facilities. Planned capital projects to be funded from bond proceeds include neighborhood park renovations, Aurora Center for Active Adults renovation, recreation facilities capital improvements, new Northeast Aurora Recreation Center, master planned parks construction, Central Library branch remodel, Mission Viejo Library branch remodel, and new Northeast Aurora Library branch

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.129% increase is anticipated to be $12,640,000 annually.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to community facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Community Facilities ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

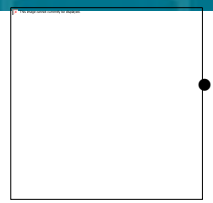
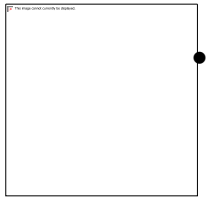
Study Session
May 18, 2026



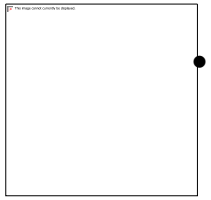
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

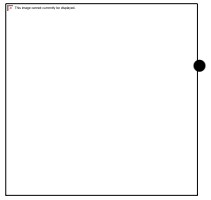


Members

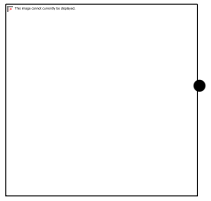
Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council



Infrastructure Task Force



- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.

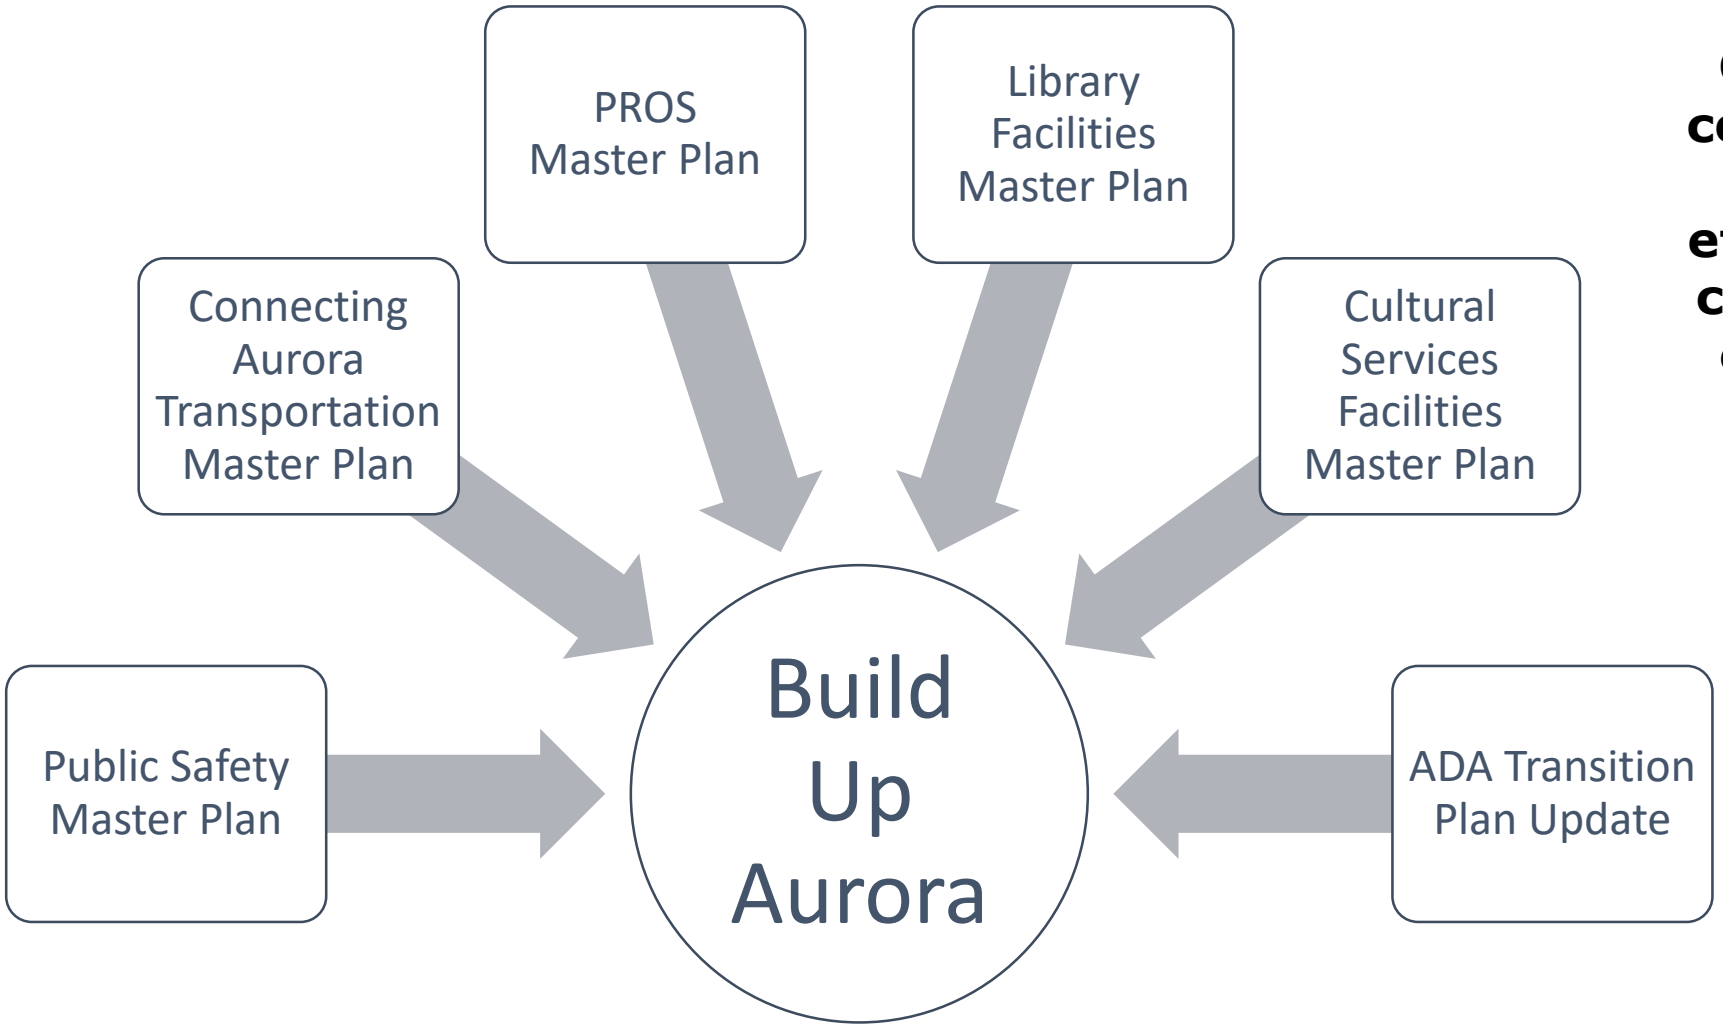
- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.

- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.

- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning



Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts

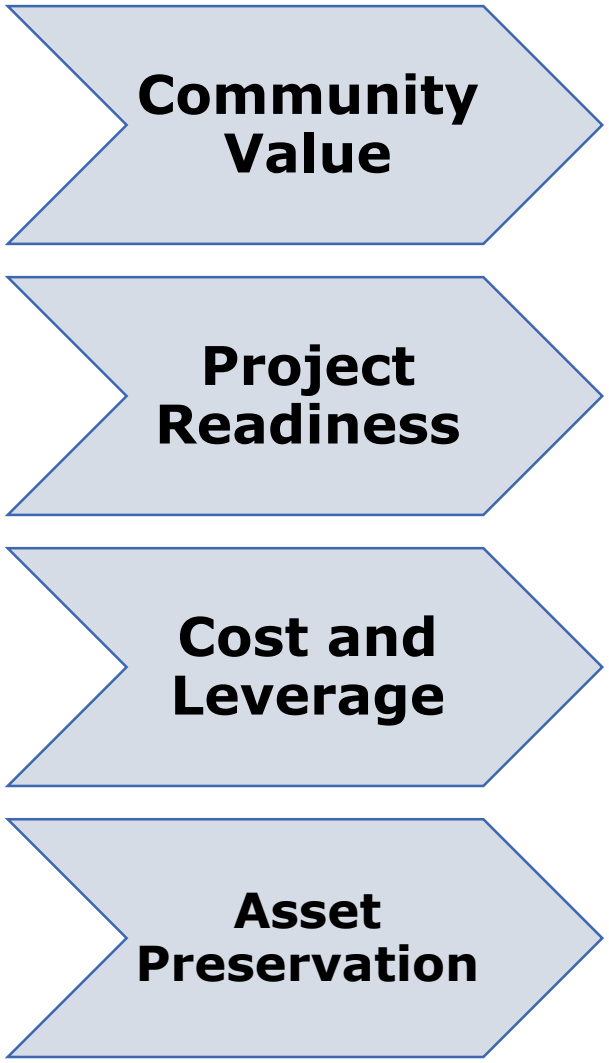
City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M



Other City Facilities $246.5M

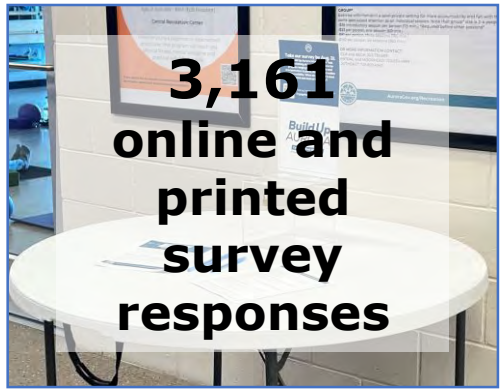
Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

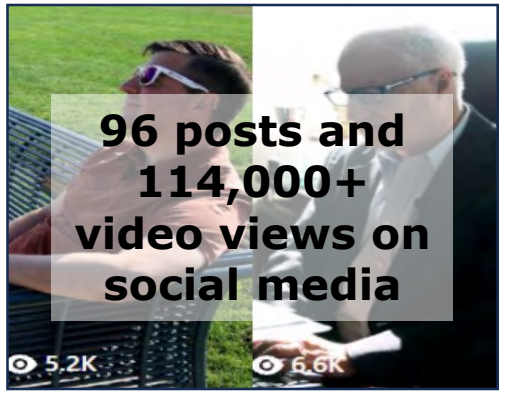
Capital Project Prioritization Framework: Community Informed and Technically Sound

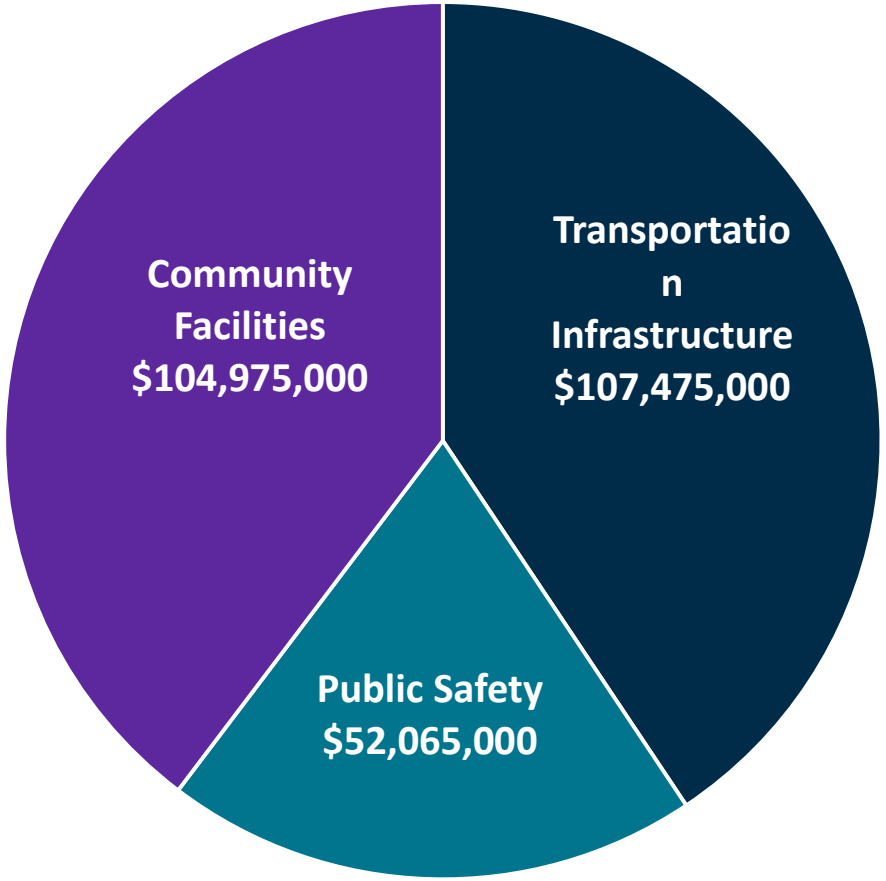
Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:



- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview





Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals

- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATING TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO COMMUNITY FACILITIES SUCH AS LIBRARIES, RECREATION, AND COMMUNITY CENTERS

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for community facilities, including without limitation the operation of and repair, maintenance, and improvements to libraries, recreation centers, and community centers; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR COMMUNITY FACILITIES

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,640,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.129% SALES AND USE TAX (THAT EQUALS 12.9 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO COMMUNITY FACILITIES, INCLUDING WITHOUT LIMITATION LIBRARIES, RECREATION AND COMMUNITY CENTERS;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $105,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $204,870,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- PARK RENOVATIONS AND NEW PARK CONSTRUCTION;
- RECREATION CENTER IMPROVEMENTS AND NEW RECREATION CENTER CONSTRUCTION;
- LIBRARY BRANCH IMPROVEMENTS AND NEW LIBRARY CONSTRUCTION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.129% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

INTRODUCED, READ AND ORDERED PUBLISHED this _____ day of _____, 2026.

CITY OF AURORA
Late Submission Approval for Agenda Item

Item Title: Build Up Aurora - Public Safety Ballot Language (Ordinance)
Item Initiator: Laura Perry, Deputy City Manager
Staff Source/Legal Source: Laura Perry, Deputy City Manager/Rachel Allen Deputy City Atorney
Outside Speaker: N/A
Strategic Outcome: Well Managed: High Performing organization, committed to great customer service, innovation, continuous improvement, fiscal stewardship, and maintaining critical infrastructure.

CRITERIA - PLEASE CONSIDER ITEM FOR LATE SUBMISSION FOR THE FOLLOWING REASON:

☐ There is a time-sensitive legal requirement that must be met and cannot be met by a future meeting date

☐ The delay will result in an adverse financial impact to the city

☐ The item is related to a disaster and must be addressed before the next available meeting

---

COUNCIL MEETING DATES FOR LATE SUBMISSION:

Study Session: 5/18/2026

Regular Meeting: 6/8/2026

EXPLANATION: *(Please provide a detailed explanation as to why the item falls into one or more of the above criteria and why it may not be set for a future meeting date.)*

I understand the agenda item will not be added to the agenda without submitting this completed form as an attachment in e-Scribe. The agenda item will not be added to the agenda if the workflow is not completed by the WORKFLOW COMPLETED date indicated on the agenda deadline calendar.

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $53,000,000 and increase the sales and use tax rate by 0.064% for 30 years to provide for public safety needs, including without limitation the operation of and repair, maintenance, and

improvements to police, fire, and other public safety infrastructure and facililies. Planned capital projects to be funded from bond proceeds include police station facility capital improvements, Aurora 911 facility capital improvements, Fire Station 19 construction, Fire Station 2 renovation, Fire Station facility capital improvements, and Fire Station 3 renovation.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.064% increase is anticipated to be $6,270,000 annually.

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to city public safety infrastructure and facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT
Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT
Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Public Safety infrastructure and facilities ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

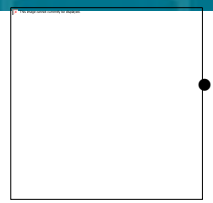
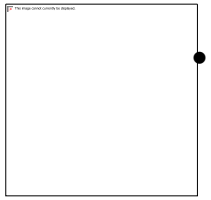
Study Session
May 18, 2026



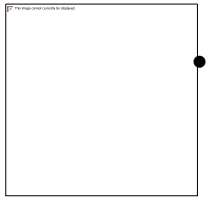
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

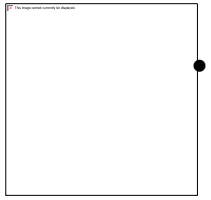


Members

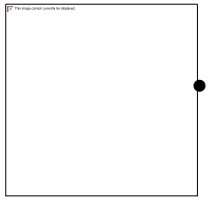
Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council



Infrastructure Task Force



- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.

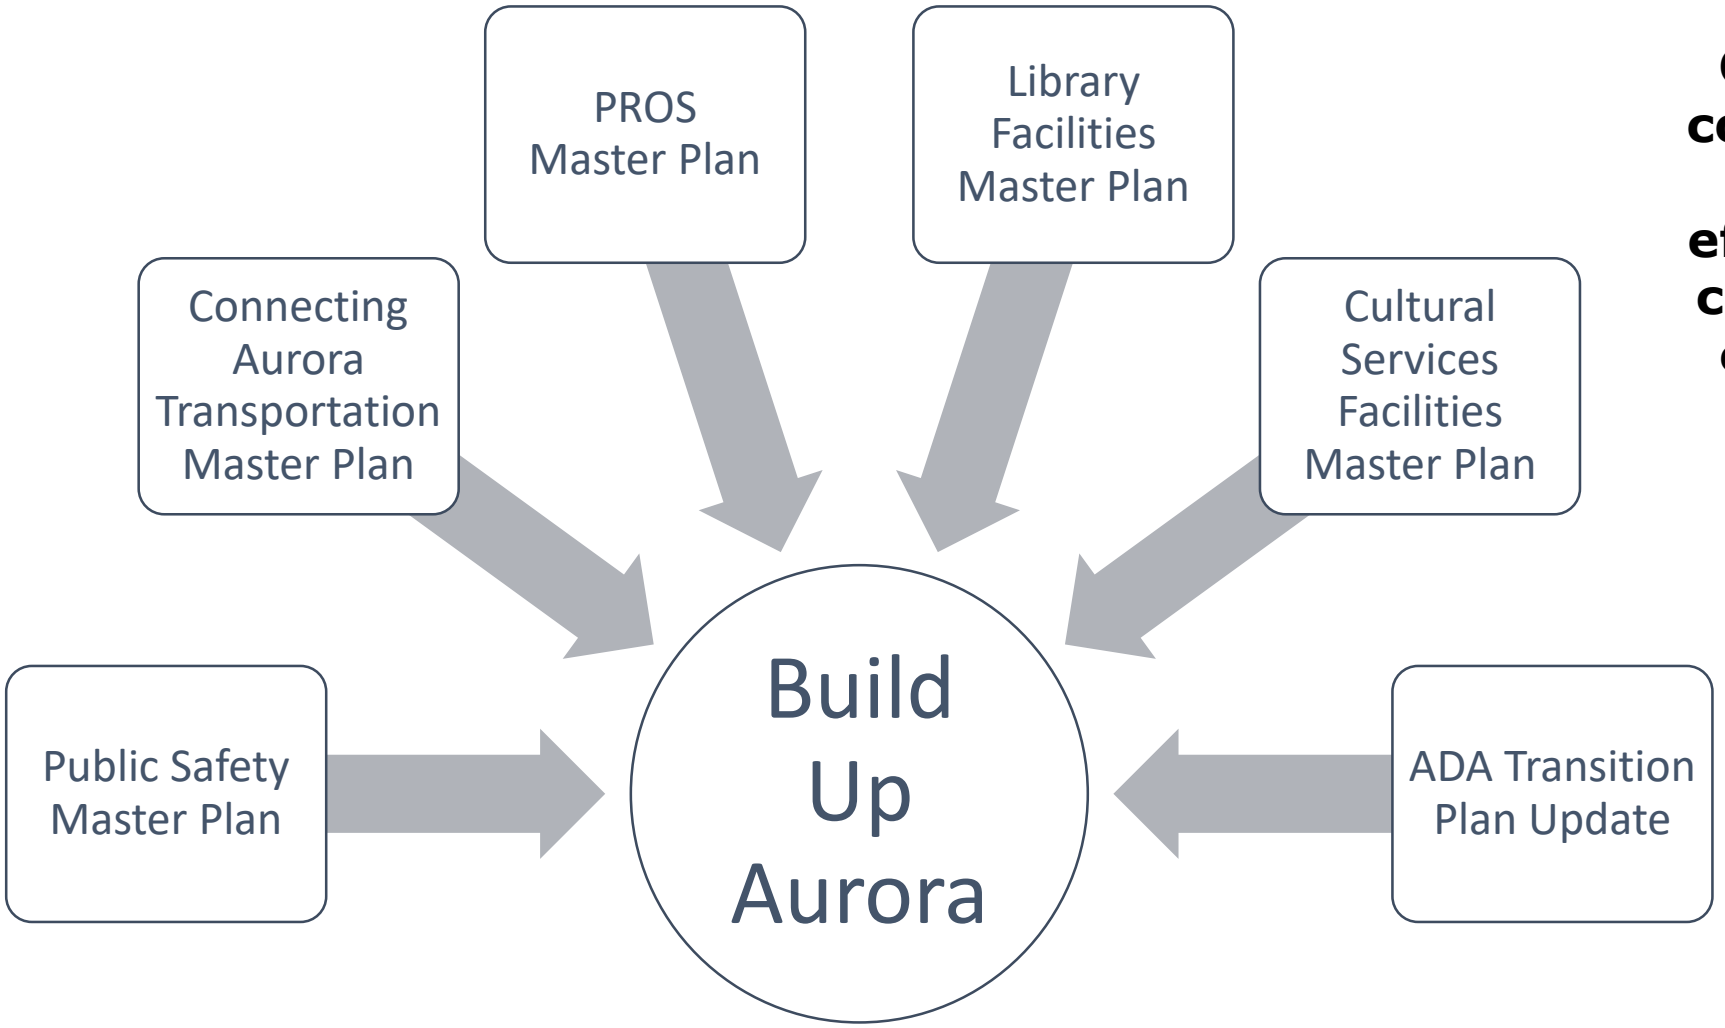
- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.

- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.

- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning



Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts

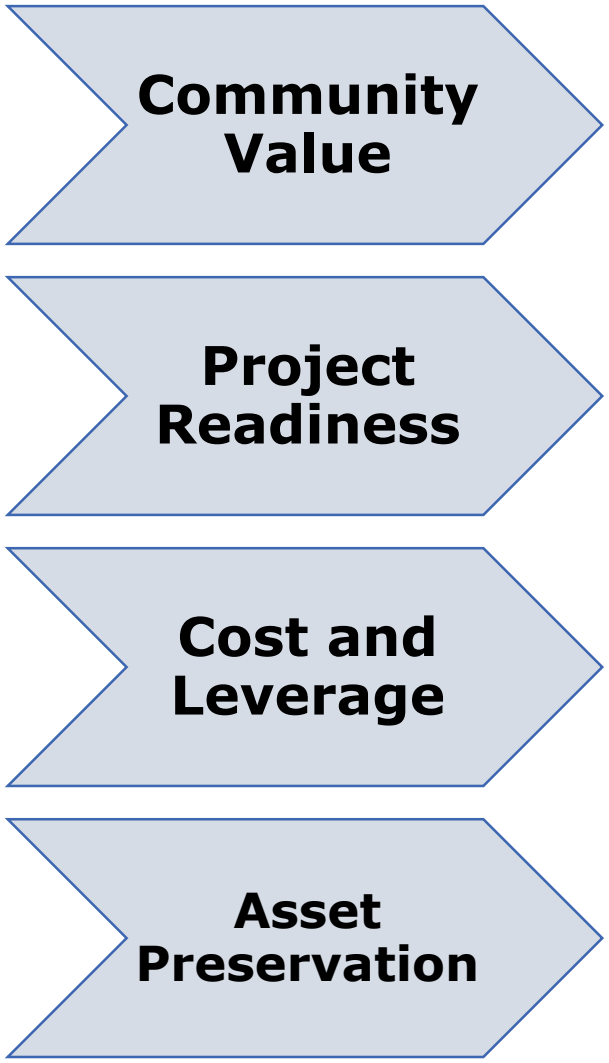
City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M



Other City Facilities $246.5M

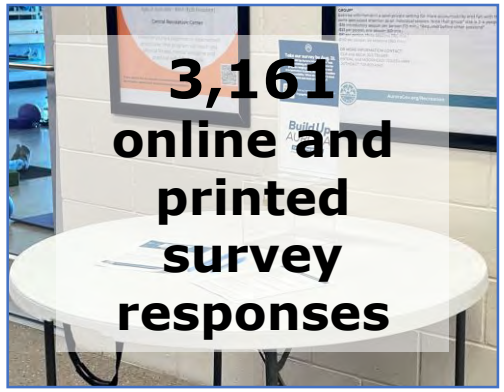
Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

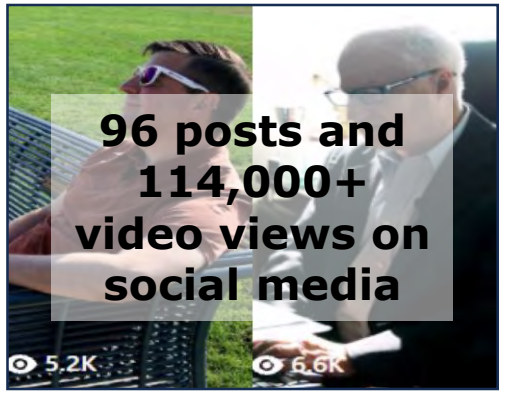
Capital Project Prioritization Framework: Community Informed and Technically Sound

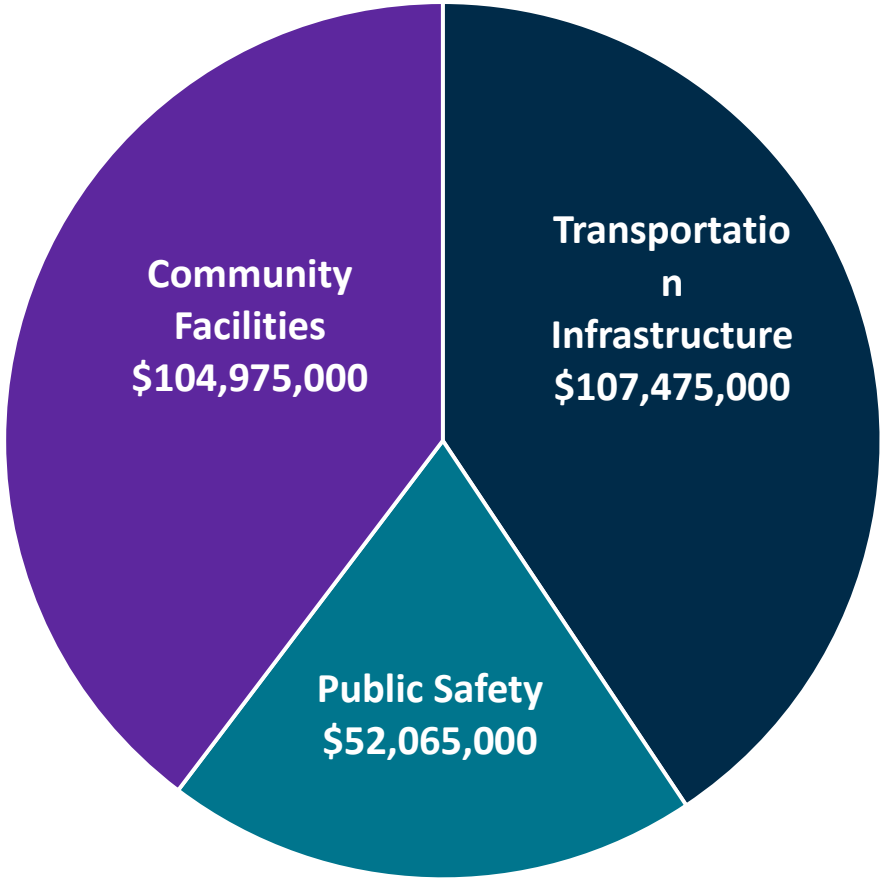
Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:



- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview





Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals

- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

Transportation Infrastructure

Project Name	Funding Amount	Ward
Transportation Infrastructure		
Transportation Safety Improvements	$ 25,000,000	All Wards
Gun Club Road (Quincy to Aurora Parkway)	$ 34,000,000	VI
Peoria over Sand Creek Bridge Replacement	$ 37,000,000	I
High Priority Sidewalk Improvements	$ 7,000,000	I, II, III, IV
Aurora Reservoir Transportation Improvements	$ 1,000,000	VI
Purpose Contingency	*$ 3,475,000*	
Transportation Infrastructure Total	**$ 107,475,000**	

Key Project Facts

- **47 distinct capital projects**
- 30 traffic, intersection, and pedestrian safety projects across the city
- 13 high priority missing sidewalks
- Replacement of the city's oldest bridge built in 1966
- New improvements at the Aurora Reservoir to improve access

Public Safety

Project Name	Funding Amount	Ward
Public Safety		
Police Station Facility Capital Improvements	$ 8,500,000	I, II, VI
Aurora 911 Facility Capital Improvements	$ 2,000,000	VI
Fire Station 19 Construction	$ 13,700,000	VI
Fire Station 2 Renovation	$ 8,020,000	I
Fire Station Facility Capital Improvements	$ 8,500,000	IV, V
Fire Station 3 Renovation	$ 10,000,000	I
Purpose Contingency	*$ 1,345,000*	
Public Safety Total	**$ 52,065,000**	

Key Project Facts

- Improvements at all police and fire stations
- Improvements and renovations at the Aurora 911 Tallyns Reach facility
- 2 fire station renovations
- New fire station to address response times in southeast Aurora

Community Facilities

Project Name	Funding Amount	Ward
Community Facilities		
Neighborhood Park Renovations	$ 28,000,000	All Wards
Aurora Center for Active Adults Renovation	$ 5,000,000	III
Recreation Facilities Capital Improvements	$ 3,700,000	I, IV, V, VI
New Northeast Aurora Recreation Center	$ 36,500,000	II
Master Planned Parks Construction	$ 5,000,000	V
Central Library Branch Remodel	$ 4,000,000	III
Mission Viejo Library Branch Remodel	$ 5,000,000	V
New Northeast Aurora Library Branch	$ 15,000,000	II
Purpose Contingency	*$ 2,775,000*	
Community Facilities Total	**$ 104,975,000**	

Key Project Facts

- 7 neighborhood park renovations
- Renovation of the Aurora Center for Active Adults built in 1980
- Construction of Central Community Park (Phase 1)
- 2 library branch renovations
- Construction of a new recreation center and library to serve northeast Aurora

Proposed 2026 Ballot Questions

Total Project Value*: $264,515,000

- More than **65 distinct projects**
- Companion resolution will designate projects and level of funding to be undertaken with proceeds of bonds if authorized by voters
- 0.325% sales and use tax increase recommended (prorated across three categories) to provide financial capacity to issue bonds

Ballot Question/Purpose	Est. Par Amount (Principal)	Total Repayment Cost (Principal + Interest)*	Sales and Use Tax Rate	
Transportation Infrastructure	$107,475,000	$209,733,000	0.132%	*1.3 cents/$10*
Public Safety	$52,065,000	$101,600,000	0.064%	*0.6 cents/$10*
Community Facilities	$104,975,000	$204,870,000	0.129%	*1.3 cents/$10*
Aggregate of Three Questions/Issuances*	**$264,515,000**	**$516,203,000**	**0.325%**	*3.25 cents/$10*

**Estimated repayment cost includes additional capacity to support interest rate volatility*

Build Up AURORA
Care for What We Have
Provide for What We Need

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATING TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO POLICE, FIRE AND OTHER PUBLIC SAFETY INFRASTRUCTURE AND FACILITIES

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for public safety, including without limitation the operation of and repair, maintenance, and improvements to police, fire, and other public safety infrastructure and facilities; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR PUBLIC SAFETY

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $6,270,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.064% SALES AND USE TAX (THAT EQUALS 6.4 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027 AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR PUBLIC SAFETY NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO POLICE, FIRE, AND OTHER PUBLIC SAFETY INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $53,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $101,600,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- FIRE STATION RENOVATIONS AND REMODELS;
- AURORA 911 AND POLICE FACILITIES IMPROVEMENTS;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.064% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

CITY OF AURORA
Late Submission Approval for Agenda Item

Item Title: Build Up Aurora - Transportation Ballot Language (Ordinance)

Item Initiator: Laura Perry, Deputy City Manager

Staff Source/Legal Source: Laura Perry, Deputy City Manager/Rachel Allen Deputy City Atorney

Outside Speaker: N/A

Strategic Outcome: Well Managed: High Performing organization, committed to great customer service, innovation, continuous improvement, fiscal stewardship, and maintaining critical infrastructure.

CRITERIA - PLEASE CONSIDER ITEM FOR LATE SUBMISSION FOR THE FOLLOWING REASON:

☐ There is a time-sensitive legal requirement that must be met and cannot be met by a future meeting date

☐ The delay will result in an adverse financial impact to the city

☐ The item is related to a disaster and must be addressed before the next available meeting

COUNCIL MEETING DATES FOR LATE SUBMISSION:

Study Session: 5/18/2026

Regular Meeting: 6/8/2026

EXPLANATION: *(Please provide a detailed explanation as to why the item falls into one or more of the above criteria and why it may not be set for a future meeting date.)*

I understand the agenda item will not be added to the agenda without submitting this completed form as an attachment in e-Scribe. The agenda item will not be added to the agenda if the workflow is not completed by the WORKFLOW COMPLETED date indicated on the agenda deadline calendar.

Many of Aurora's streets, facilities, and systems built in earlier decades now require significant reinvestment and replacement. The result is a growing gap between what it will cost to maintain, modernize and construct the city's infrastructure and the funding that is currently available.

The city has completed additional capital master plans and facility assessments and have refined project scopes and costs. Detailed capital master planning efforts undertaken over the last three years identifies a focused list of priority projects with preliminary estimated capital costs of about $2 billion.

In 2024, City Council unanimously created the Build Up Aurora Infrastructure Task Force to evaluate these needs and develop a long-range plan for capital investment. Members were appointed by City Council from across the community, including business, economic development, construction, hospitality and tourism, and public safety. The task force's responsibilities included reviewing the updated capital project lists, developing criteria for prioritizing projects based on urgency, risk, and community benefit, recommending a phased approach to capital investment over a ten-year period, considering sustainable funding options that match project scale and timeline, and incorporating public feedback into final recommendations.

In 2025 and 2026 substantial community engagement was undertaken to understand which capital projects the community cares about most. Departments met regularly with the Infrastructure Task Force to review project needs, while at the same time engaging residents to understand their priorities and perspectives. Over the last year, the City hosted over 54 events, received over 5,800 infrastructure ideas, facilited 22 discussions with over 357 participants, and conducted two surveys resulting in over 3,100 online and princted survey responses.

The Infrastructure Task Force has finalized a short-term, mid-term, and long-term recommendation for the efficient allocation of resources to support city capital improvement needs that incorporated community feedback. The Task Force's short-term recommendation is to pursue voter authorization in November for a $264,515,000 bond program and supporting combined sales and use tax rate increase of 0.325% with a 30 year sunset which is allocated by purpose/ballot question as follows:

1. Transportation Infrastructure ($107,475,000);0.132% sales and use tax rate increase
2. Public Safety ($52,065,000);0.064% sales and use tax rate increase
3. Community Facilities ($104,975,000);0.129% sales and use tax rate increase

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The proposed ordinance is for a ballot question to be placed on the November 3, 2026 ballot to seek voter authorization to increase debt by $108,000,000 and increase the sales and use tax rate by 0.132% for 30 years to provide for transportation infrastructure needs, including without limitation the operation of and repair, maintenance, and improvements to city transportation infrastructure and facilities. Planned capital projects to be

funded from bond proceeds include transportation safety improvements, Gun Club Road (Quincy to Aurora Parkway), Peoria over Sand Creek Bridge replacement, high priority sidewalk improvements, and Aurora Reservoir transportation improvements.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☒ Revenue Impact ☐ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☒ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT

Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

Additional sales and use tax revenue generated from the 0.132% increase is anticipated to be $12,940,000 annually.

BUDGETED EXPENDITURE IMPACT

Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Increased sales and use tax revenues will fund annual debt service for bonds within the repayment costs outlined in the ballot question as well as additional operation, repairs, maintenance and improvements to city transportation infrastructure and facilties. It is also planned that additional revenues will pay for bond and program management expenses to ensure the successful delivery of the bond program.

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

The $264.5 million bond program will result in additional projects to be delivered by city staff with the support of external consultants. In addition to project management needs, the city will also experience an increased workload in budgeting, accounting, plan review, and public improvement inspections.

QUESTIONS FOR COUNCIL

Does City Council approve referring the Transportation Infrastructure ballot question to the November 3, 2026 ballot?

LEGAL COMMENTS

Taxpayer's Bill of Rights requires voter approval of all tax increases and debt obligations that exceed one year. (Colo. Constitution Article X, Sec. 20). Council is seeking approval to increase the sales and use tax rate as well as authorization to incur in indebtedness, therefore Coucil is required to submit this for approval by the voters. Council shall act only by ordinance, resolution or motion. All legislative enactments must be in the form of ordinances; all other actions, except as herein provided, may be in the form of resolutions or motions. (City Charter Section 5-1). (Allen)

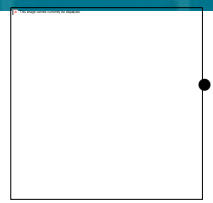
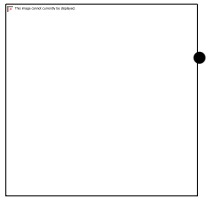
Study Session
May 18, 2026



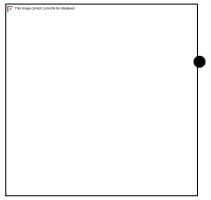
Infrastructure Task Force

Approved unanimously by City Council in July 2024, the Build Up Aurora Infrastructure Task Force looked at long-term solutions for projects ranging from public safety and transportation to parks, libraries, recreation and accessibility, and it will continue to seek community input and support.

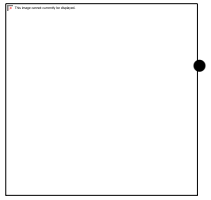


Members

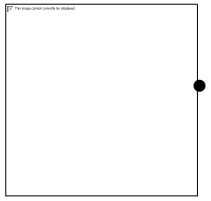
Council Member Curtis Gardner, co-chair
Council Member Françoise Bergan, co-chair
Ray Barnes, former Aurora Fire Rescue Chief
Joel Boyd, Town Center at Aurora
Steve Coffin, Steve Coffin Strategies
Naomi Colwell, Aurora Chamber of Commerce
Rita Connerly, Fairfield and Wood, P.C.
Bruce Dalton, Visit Aurora
Ryan Frazier, Frazier Global
Jeff Knight, Hispanic Contractors of Colorado (HCC)/ JKS Industries
Wendy Mitchell, Aurora Economic Development Council
Jason Wardrip, Colorado Building and Construction Trades Council



Infrastructure Task Force



- Develop a **short-term, mid-term, and long-term phased strategic plan** for the efficient allocation of resources to support city capital improvement needs.



- Establish **criteria for prioritizing city infrastructure needs** based on factors such as urgency, impact, feasibility, alignment with strategic goals and prioritization based on community needs.

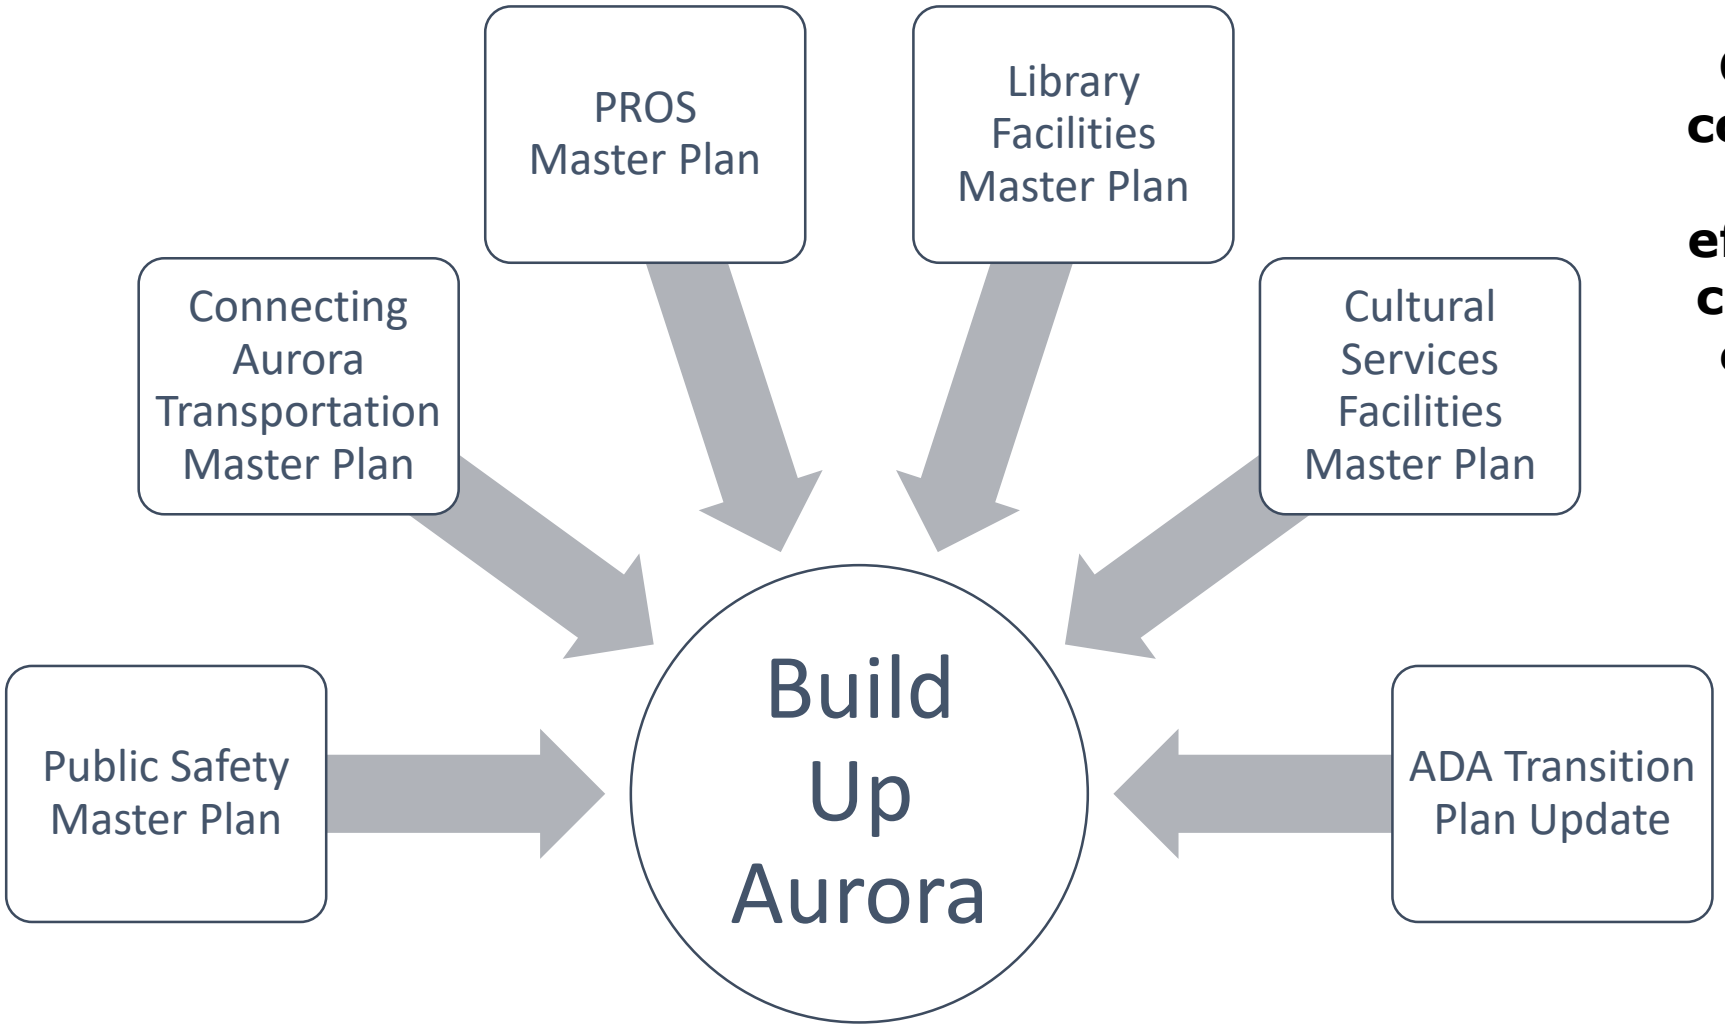
- Foster **effective communication and collaboration** with internal and external stakeholders, including business and community groups, industry partners, and the public.

- **Engage with Aurora residents** through a variety of methods to understand their infrastructure needs, preferences, and concerns, and incorporate their input into recommendations.

- **Review funding options** that support sustainable infrastructure development and ongoing capital maintenance.

Build Up Aurora Process – Core Tenets

Strategic Capital Planning



Public Engagement

Transparency

Fiscal Responsibility

- ✓ Incorporated recommendations of capital master planning efforts that included community engagement.
- ✓ Two years of public and stakeholder engagement to understand what capital projects the community cares about most.
- ✓ Review of existing funding sources to understand capacity to fund priority capital needs.
- ✓ Citywide technical project evaluation (scope, schedule, budget)
- ✓ Information shared publicly through each stage of process (EngageAurora.org/BuildUpAurora)

Capital Master Planning Efforts

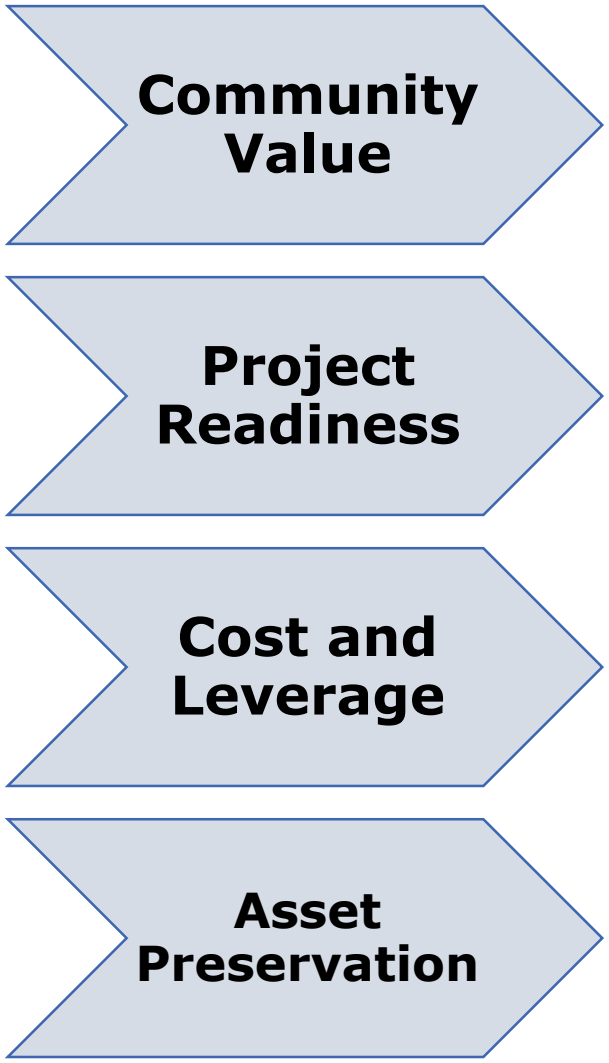
City has undertaken comprehensive capital master planning efforts to evaluate the city's capital needs to enhance capital and financial planning.

Draft 10-Year Capital Improvement Master Plan

Transportation Infrastructure $596.2M

Parks, Recreation and Open Space $255.7M

Libraries, Arts and Culture $84.0M



Other City Facilities $246.5M

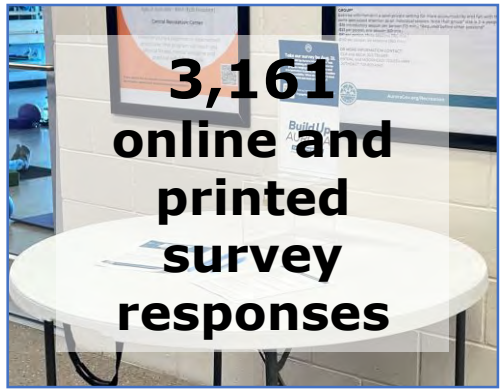
Public Safety $900M

- **$2.08 billion in capital needs identified in draft 10-Year Capital Improvement Master Plan***
- **Consists of projects that exceed what the city can afford to complete in its annual budget**

**Estimated project cost subject to change. Estimated costs represent total cost (not including land acquisition where applicable) and do not represent phasing options.*

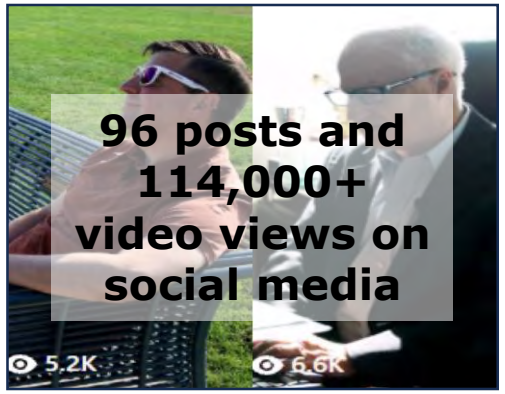
Capital Project Prioritization Framework: Community Informed and Technically Sound

Prioritization of capital project needs help ensure capital resources are invested responsibly, focusing first on projects that:



- Deliver the greatest public benefit
- Are ready to move forward
- Address the most critical needs
- Plan thoughtfully for future city needs

2025-26 Public Outreach Overview



Build Up AURORA

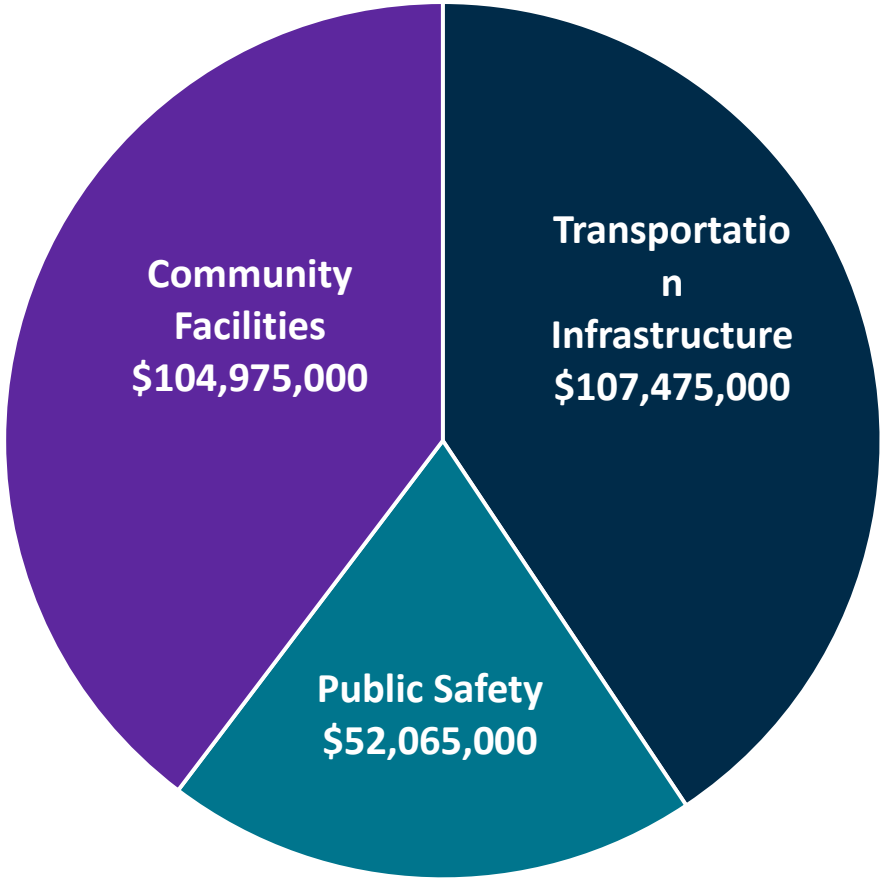
2232



Bond Program Parameters

- Address key infrastructure needs and service gaps valued by the community
- Fund critical projects now to avoid higher future costs
- Maximize existing funding to reduce borrowing needs
- Balance operating costs and affordability of new facilities
- Create a flexible financial plan to meet ongoing capital needs.

Proposed 2026 Bond Program

2026 Bond Proposed Project Totals

- **Total Project Value*: $264,515,000**
- More than **65 distinct projects**
- Provides comprehensive funding approach to address capital improvements and repairs in each purpose.
- Leverages over **$44M** in existing capital funding

Bond Purpose	Amount	Sales and Use Tax Rate
Transportation Infrastructure	$107,475,000	0.132%
Public Safety	$52,065,000	0.064%
Community Facilities	$104,975,000	0.129%
	$264,515,000	**0.325%**

**Includes $7.595M in purpose contingency funding*

Proposed 2026 Financing Structure

- Debt authorized under the 2026 bond program will be issued over time
  - *Each bond issuance requires approval by City Council*

- Proposed key terms for 2026 bond program:
  - Bonds will be secured by dedicated sales and use tax
  - Allows future bonding capacity without raising taxes (potential 2031/2032 authorization)
  - Max term for bonds and sales and use tax increases not to exceed 30-years
  - Reserves

- Strong credit rating supports favorable financing terms

- Sales and use tax increases are forecasted to exceed annual debt service, with surplus funding purposed to fund:
  - Additional capital improvements and repairs
  - Bond program and project management services

ORDINANCE NO. 2026-_____

A BILL

FOR AN ORDINANCE SUBMITTING TO A VOTE OF THE REGISTERED ELECTORS OF THE CITY OF AURORA, COLORADO, AT THE GENERAL ELECTION OF NOVEMBER 3, 2026, A QUESTION RELATED TO THE ISSUANCE OF REVENUE BONDS AND INCREASING TAXES FOR THE PURPOSE OF OPERATION, REPAIR, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES

WHEREAS, the City of Aurora, Colorado, (the "City"), is a home rule municipality, organized and existing under and by virtue of Article XX, Section 6 of the Colorado Constitution, and it has the power to regulate matters of local concern; and

WHEREAS, the City Council (the "Council") unanimously created the Build Up Aurora Infrastructure Task Force (the "Task Force") in 2024 to develop a phased strategic plan for the efficient allocation of resources to support city capital improvement needs; and

WHEREAS, the Task Force engaged with Aurora residents through a variety of methods to understand their capital improvement needs, preferences, and concerns, and incorporate their input into recommendations; and

WHEREAS, after receiving public input and recommendations from the Task Force, the City Council of the City of Aurora, Colorado, has carefully considered the capital improvement needs of the City; and

WHEREAS, the Council recognizes the need to provide for transportation infrastructure needs, including without limitation the operation of and repair, maintenance, and improvements to city transportation infrastructure and facilities; and

WHEREAS, because the City does not have sufficient funds in its treasury, the Council finds and determines that it is necessary to issue revenue bonds to finance the costs associated with providing for such needs; and

WHEREAS, the Council further finds and determines that an increase in the City's sales and use tax is required to fund the debt service on the bonds, and that authorization from the voters is necessary to secure additional funding through debt mechanisms available to the City; and

WHEREAS, the Council deems it appropriate to submit the question of issuing such bonds and increasing such taxes to the registered electors of the City at the November 3, 2026, general election; and .

WHEREAS, the Council hereby finds that the question to the voters contained in this Ordinance is in the best interest of the City and its citizens.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL· OF THE CITY OF AURORA, COLORADO:

Section 1. The following question shall be submitted to a vote of the registered electors of the City at the general election on November 3, 2026:

DEDICATED SALES TAX FOR TRANSPORTATION

SHALL CITY OF AURORA TAXES BE INCREASED UP TO $12,940,000 AND AS MAY BE GENERATED ANNUALLY THEREAFTER BY THE IMPOSITION OF A NEW 0.132% SALES AND USE TAX (THAT EQUALS 13.2 CENTS ON EVERY ONE HUNDRED DOLLAR PURCHASE) FOR A PERIOD BEGINNING ON JANUARY 1, 2027, AND ENDING ON DECEMBER 31, 2057, TO PROVIDE FOR TRANSPORTATION INFRASTRUCTURE NEEDS, INCLUDING WITHOUT LIMITATION THE OPERATION OF AND REPAIRS, MAINTENANCE, AND IMPROVEMENTS TO CITY TRANSPORTATION INFRASTRUCTURE AND FACILITIES;

AND SHALL CITY OF AURORA DEBT BE INCREASED BY AN AMOUNT NOT TO EXCEED $108,000,000 WITH A MAXIMUM REPAYMENT COST OF UP TO $209,733,000 TO ACCOMPLISH THE PURPOSES STATED ABOVE, INCLUDING BUT NOT LIMITED TO:

- TRAFFIC, INTERSECTION, AND PEDESTRIAN SAFETY IMPROVEMENTS;
- MAJOR BRIDGE REPLACEMENTS;
- ROADWAY IMPROVEMENTS AND EXPANSION;

SUCH DEBT TO CONSIST OF REVENUE BONDS WHICH SHALL BEAR INTEREST, MATURE, BE SUBJECT TO REDEMPTION, WITH OR WITHOUT PREMIUM, AND BE ISSUED, DATED AND SOLD (AT, ABOVE OR BELOW PAR) IN SUCH MANNER AND CONTAINING SUCH OTHER TERMS, NOT INCONSISTENT HEREWITH, AS THE CITY COUNCIL MAY DETERMINE; SHALL THE CITY OF AURORA BE AUTHORIZED TO PAY SUCH BONDS FROM, AND TO SECURE SUCH PAYMENT BY A PLEDGE OF, THE NEW 0.132% SALES AND USE TAX AND OTHER LEGALLY AVAILABLE FUNDS;

AND SHALL THE CITY OF AURORA BE ENTITLED TO COLLECT, RETAIN, AND SPEND THE FULL REVENUES FROM SUCH TAX INCREASE AND THE PROCEEDS OF ANY INVESTMENT THEREOF NOTWITHSTANDING ANY LIMITATION IN THE STATE CONSTITUTION, STATE LAW OR THE CITY HOME RULE CHARTER?

YES _____ NO _____

Section 2. Pursuant to Article XX, Sections 5 and 6 of the Colorado Constitution, the City Clerk shall publish, with the Clerk's official certification, three (3) times, a week apart, in a newspaper of general circulation within the City, the full text of the ballot issue. The first publication of the ballot issue shall be made together with notice of the date and time of the election.

Section 3. The City Clerk shall secure from each county the votes in favor of, and opposed to the ballot issue, and shall report the same to the City Council within seven (7) days following the election.

Section 4. In the event the ballot issue is approved by a majority of the registered electors voting thereon, the City Clerk shall publish once, in the same newspaper, within ten (10) days following the election the results. At such time, the City Clerk shall also file with the Secretary of State two (2) copies of the ballot issue along with the official tally of the vote for and against, as certified by the City Clerk.

Section 5. The provisions of this ordinance and the question authorized to be submitted hereby are severable. If any portion of this Ordinance or the question shall be judicially determined to be invalid or unenforceable, such determination shall not affect the remaining provisions of such ordinance or question.

Section 6. Pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this Ordinance shall be by reference, utilizing the ordinance title. Copies of this Ordinance are available at the Office of the City Clerk.

Section 7. Repealer. All orders, resolutions, or ordinances in conflict with this Ordinance or with any of the documents hereby approved, are hereby repealed only to the extent of such conflict. This repealer shall not be construed as reviving any resolution, ordinance, or part thereof, heretofore repealed.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

The City of Aurora ("Aurora") is advancing with construction of the Aurora Multimodal Access Improvements Project ("Project") as depicted on the attached maps. Havana Street is a vital commercial, residential, and commuter corridor that connects the City of Aurora to its surrounding communities and the eastern part of the metropolitan area. To continue serving the transportation needs of Aurora's rapidly growing population, the Havana Corridor Study was completed in 2021 to identify the areas that are most in need of these improvements. To safely construct this new multi-use path, acquisition of certain property interests from 94 property owners is necessary.

In 2025, the Project land acquisition plans were approved by CDOT and Aurora's Real Property & Survey Services Division ("RPSS") issued the requisite Notice of Intent to Acquire ("NOIA"), made offers and initiated negotiations with all affected property owners in accordance with C.R.S. Title 38, Article 1 (Section 38-1-101 et seq.). C.R.S. Title 38, Article 1 sets forth the uniform policy for fair and equitable treatment of property owners during the acquisition of real property interests and includes a provision of residential/business relocation assistance, if necessary. Appraisal reports have been completed by an independent state certified appraiser and were used as the basis for the fair market value offering to the property owner(s) of the specific land interests to be acquired. Aurora has also paid for landowner's independent appraisals in accordance with C.R.S. 38-1-121.

The Project requires the acquisition of 153 temporary construction easements and 16 permanent easements from the 94 property owners. The properties are located along Havana St., located in Adams & Arapahoe County as legally described in Exhibit A and depicted on the attachments. Presently, the City has acquired the necessary property rights from approximately 40 property owners. To avoid incurring additional construction costs due to acquisition delays, City staff is requesting Council authorize an ordinance allowing eminent domain, if it becomes necessary to use, to meet the Project's schedule. City staff would utilize the legal services of Don Ostrander, outside counsel, to file any court action, such as petitions for immediate possession. The authorization of the use of eminent domain by Council will allow the City to obtain possession of the property interests needed and will ensure that property acquisitions do not delay the Project's construction schedule. Condemnation is always used as a last resort when negotiations between the condemning authority and the property owner regarding valuation of the property have reached an impasse. As part of the condemnation process and in the event City staff negotiations fail, obtaining immediate possession will allow the Project to proceed on schedule. The attached Exhibit B is an overview of the eminent domain process for informational purposes.

City staff will continue using best efforts to acquire the real property interests needed by further negotiating with the property owners. City staff recommends the passage of an ordinance authorizing the use of eminent domain for the acquisition of the necessary land interests to avoid delays in the Project schedule. If Council authorizes the ordinance and it becomes necessary to act beyond obtaining immediate possession, City staff will update Council.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☒ Budgeted Expenditure Impact ☐ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT

Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

Funding will come from the Aurora Multimodal Access Improvments Project

The estimated cost for the permanent and temporary easements = $248,000
Estimated maximum legal fess = $100,000
Grand total = $348,000

Org No.: 49658

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

N/A

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does Council approve the ordinance authorizing the use of eminent domain, pursuant to Aurora City Code Section 10-10, in order to acquire the necessary property interests for the construction of the Aurora Multimodal Access Improvements Project?

LEGAL COMMENTS

Council has the legal authority and power to act by ordinance to use eminent domain pursuant to Section 10-10 of the Aurora Charter, Article XX Sections 1 and 6 of the State Constitution, C.R.S. Section 38-1-101 C.R.S., et seq. (Michelle Gardner)

ORDINANCE NO. 2026-31

AN ORDINANCE AUTHORIZING THE CITY OF AURORA, COLORADO, TO EXERCISE THE POWER OF EMINENT DOMAIN FOR ACQUISITION OF CERTAIN REAL PROPERTY INTERESTS NECESSARY FOR THE AURORA MULTIMODAL ACCESS IMPROVEMENTS PROJECT

WHEREAS, the City of Aurora is a Colorado municipal corporation and home rule city ("City") of the Counties of Adams, Arapahoe, and Douglas of the State of Colorado and it has the legal authority and power of eminent domain per Article XX Sections 1 and 6 of the State Constitution, Section 10-10 of the City's Home Rule Charter, C.R.S. 38-1-101 et seq.; and

WHEREAS, the City of Aurora, through its Public Works Department, requires construction of the Aurora Multimodal Access Improvements Project ("Project"); and

WHEREAS, the primary objective of the Project is to improve the multi-use path and access along Havana Street in Adams & Arapahoe County within the City; and

WHEREAS, as part of the Project, acquisition of 153 temporary construction easements and 16 permanent easements from 94 property owners are needed to make the Project improvements; and

WHEREAS, the City has determined it necessary to acquire the easement interests identified in this Ordinance for the construction of the Project, and that acquisition of these easement interests serves the public purpose by providing greater health, safety, and welfare; and

WHEREAS, the City has determined that these easement interests are necessary for the Project and said interests and their purported landowners are as described in the attached Exhibit A ("Properties").

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. That the City Council hereby finds and determines that it is in the interest of the health, safety, and general welfare of the public, and serves a necessary public purpose, to acquire real property interests in the Properties described in Exhibit A for the construction of the Project and hereby declares a public need and necessity for the same.

Section 2. The Real Property Services Division, through its staff, agents, or consultants, is authorized to engage in good faith negotiations for acquisition of the interests in the Properties, as a precondition to initiating proceedings in eminent domain. Eminent domain will only be used if good faith negotiations are unsuccessful. If the interests in the Properties cannot be obtained voluntarily, the City is authorized to commence condemnation proceedings to acquire the Properties and prosecute the proceedings to their conclusion.

Section 3. The City Council hereby authorizes itself to exercise the power of eminent domain for the purpose of acquiring interests in the Properties. The City is authorized to exercise the power of eminent domain pursuant to Section 10-10 of the City Charter in the manner provided by Article I of Title 38, Colorado Revised Statutes. The City is authorized to employ all necessary persons for this purpose, including special condemnation counsel, if necessary, and appraisers, surveyors, engineers, and other experts.

Section 4. The City Council has determined there is an immediate public need and necessity to acquire the Properties for the City of Aurora to proceed with the Project. To ensure timely possession of or title to the Properties, it may be necessary for the City to obtain immediate possession of the Properties.

Section 5. That the City Council hereby authorizes the expenditure of that amount of money which is determined by an appropriate tribunal to constitute just compensation necessary for the acquisition of the interests in the Properties. The City Council hereby authorizes the City's Director of Finance to pay all awards, legal expenses, court costs, and any other expenses of eminent domain lawfully found to be just compensation, as determined by a court of competent jurisdiction.

Section 6. The City or its staff, designee, agents, or representatives shall have the authority to amend the legal descriptions of and the interests sought in the Properties or to add additional properties as deemed necessary in the course of acquiring the Properties for the Project, and any such amendments shall be included in the definition of the Properties contained herein.

Section 7. That, nothing contained in this ordinance shall be construed as precluding or preventing negotiations by the City Attorney, or duly authorized representatives, from purchasing interests in the Properties at private sale, nor shall anything herein be construed as preventing the City of Aurora, upon the acquisition of said interests in the Properties, from terminating the eminent domain proceedings.

Section 8. That, pursuant to Section 5-5 of the Charter of the City of Aurora, Colorado, the second publication of this ordinance shall be by reference, utilizing the ordinance title. Copies of this ordinance are available at the office of the City Clerk.

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-1
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 1, Block 1, Walgreens at Aurora Subdivision Filing No. 1, the plat of said subdivision being recorded on August 18, 1995, at Rec. No. 1995030099455 (C0099455) in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the SW corner of said Section (from whence the W 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N07°45’35”E, a distance of 249.80 feet to a point on the westerly line of said Lot 1, said point being the **Point of Beginning**;

Thence coincident with the easterly line of a sidewalk easement dedicated by the plat of said subdivision the following two (2) courses:

1. Thence N34°36'03"E, a distance of 17.48 feet;
2. Thence N00°17'41"W, a distance of 37.68 feet;

Thence S10°39'17"E, a distance of 38.39 feet;

Thence S21°38'33"W, a distance of 11.30 feet;

Thence S00°17'41"E, a distance of 8.07 feet;

Thence S89°42'19"W, a distance of 9.68 feet;

Thence S00°17'41"E, a distance of 92.44 feet;

Thence N89°42'19"E, a distance of 5.00 feet;

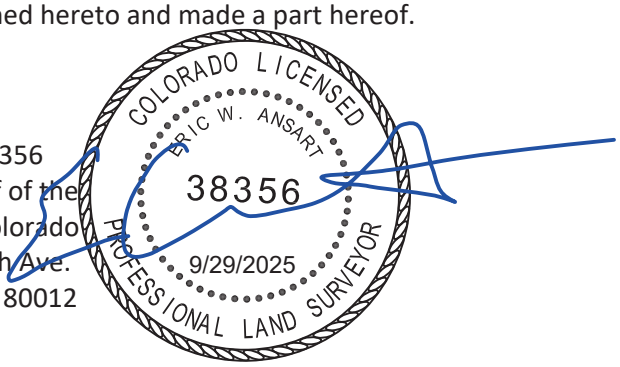
Thence S00°17'41"E, a distance of 65.00 feet;

Thence S89°42'19"W, a distance of 5.00 feet;

Thence S00°17'41"E, a distance of 22.35 feet to a point on the westerly line of said Lot 1, said point also being a point of non-tangent curvature;

(continued)

Thence coincident with said westerly line the following two (2) courses:



1. Thence along said curve to the right (whose chord bears N14°28'25"W, a distance of 12.25 feet) having a radius of 25.00 feet, and a central angle of 28°21'27", an arc distance of 12.37 feet to a point of tangency;
2. Thence N00°17'41"W, a distance of 172.22 feet to the **Point of Beginning**.

The above-described parcel containing 1,170 square feet (0.027 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Thence N10°57’37”W, a distance of 203.63 feet to a point on the southerly line of that parcel of land described in that Quit Claim Deed recorded on May 11, 2017, at Rec. No. 2017000040912 in said office, said point being the **Point of Beginning**;

Thence N03°00'46"E, a distance of 4.70 feet;

Thence N14°19'21"E, a distance of 13.46 feet;

Thence N75°40'39"W, a distance of 3.00 feet;

Thence N14°19'21"E, a distance of 6.00 feet;

Thence S75°40'39"E, a distance of 3.00 feet;

Thence N14°19'21"E, a distance of 0.93 feet;

Thence N03°00'46"E, a distance of 33.31 feet;

Thence N86°59'14"W, a distance of 3.00 feet;

Thence N03°00'46"E, a distance of 6.00 feet;

Thence S86°59'14"E, a distance of 3.00 feet to a point on the easterly line of said parcel;

Thence coincident with the easterly and southerly lines of said parcel the following two (2) courses:

1. Thence S00°17'41"E, a distance of 63.67 feet;
2. Thence S89°38'08"W, a distance of 7.69 feet to the **Point of Beginning**.

The above-described parcel containing 211 square feet (0.005 acres) more or less.

The purpose of the above-described parcel is for the construction and maintenance of a sidewalk and the relocation and maintenance of adjacent utilities.

(continued)

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

PARCEL NUMBER: TE-7A
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 39, Block 17, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

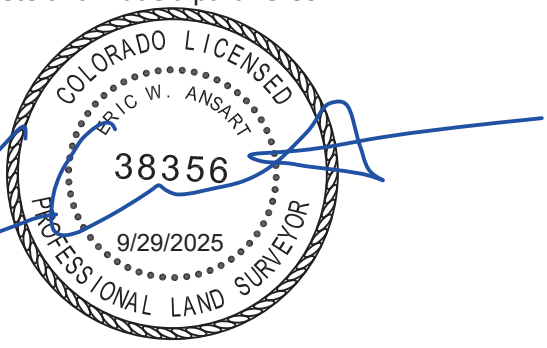
Commencing at the SE corner of said Section (from whence the E 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N04°09’29”W, a distance of 445.27 feet to a point on the easterly line of said lot, said point being the **Point of Beginning**;

Thence S89°42'19"W, a distance of 5.50 feet;

Thence N00°17'41"W, a distance of 10.00 feet;

Thence N89°42'19"E, a distance of 5.50 feet to a point on said easterly line;



Thence S00°17'41"E, coincident with said easterly line, a distance of 10.00 feet to the **Point of Beginning**.

The above-described parcel containing 55 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A PARCEL OF LAND SITUATED IN THE SE 1/4 OF SEC. 34, T3S, R67W, 6TH P.M., CITY OF AURORA, COUNTY OF ADAMS, STATE OF COLORADO

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-10
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 31, Block 48, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

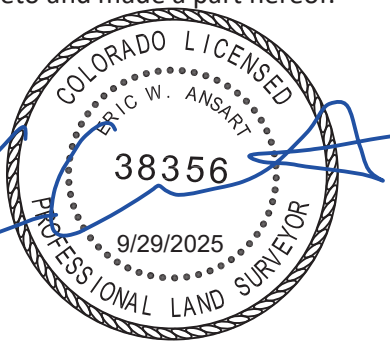
Commencing at the SE corner of said Section (from whence the E 1/4 corner of said section bears N00°17’41”W, a distance of 2655.85 feet);

Thence N02°20’12”W, a distance of 842.02 feet to the southeasterly corner of said lot, said corner being the **Point of Beginning**;

Thence S89°36'54"W, coincident with the southerly line of said lot, a distance of 7.50 feet;

Thence N00°17'41"W, a distance of 14.74 feet;

Thence N89°42'19"E, a distance of 7.50 feet to a point on the easterly line of said lot;



Thence S00°17'41"E, coincident with said easterly line, a distance of 14.73 feet to the **Point of Beginning**.

The above-described parcel containing 110 square feet (0.002 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being N00°17’41”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-24B
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 1, Block 7, Gateway Park Addition, the plat of said subdivision being recorded on May 6, 1946, at Rec. No. 302386 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

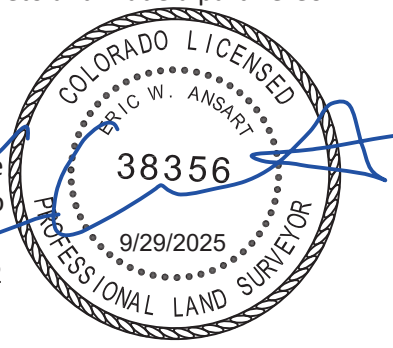
Commencing at the W 1/4 corner of said Section (from whence the SW corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S02°39’07”E, a distance of 729.45 feet to a point on the westerly line of said Lot 1, said point being the **Point of Beginning**;

Thence N89°42'19"E, a distance of 5.00 feet;

Thence S00°17'41"E, a distance of 6.00 feet;

Thence S89°42'19"W, a distance of 5.00 feet to a point on the westerly line of said Lot 1;



Thence N00°17'41"W, coincident with said westerly line, a distance of 6.00 feet to the **Point of Beginning**.

The above-described parcel containing 30 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 35, Block 49, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the E 1/4 corner of said Section (from whence the SE corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S01°22’23”W, a distance of 1030.79 feet to a point on the easterly line of said Lot 35, said point being the **Point of Beginning**;

Thence S00°17'41"E, coincident with said easterly line, a distance of 18.00 feet;

Thence S89°42'19"W, a distance of 5.50 feet;

Thence N00°17'41"W, a distance of 18.00 feet;

Thence N89°42'19"E, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 99 square feet (0.002 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

PARCEL NUMBER: TE-34
DATE: SEPT. 29, 2025

A temporary construction easement situated in the SE 1/4 of Section 34, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 45, Block 49, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

Commencing at the E 1/4 corner of said Section (from whence the SE corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S01°54’35”W, a distance of 779.89 feet to a point on the easterly line of said Lot 45, said point being the **Point of Beginning**;

Thence S00°17'41"E, coincident with said easterly line, a distance of 10.00 feet;

Thence S89°42'19"W, a distance of 6.50 feet;

Thence N00°17'41"W, a distance of 10.00 feet;

Thence N89°42'19"E, a distance of 6.50 feet to the **Point of Beginning**.

The above-described parcel containing 65 square feet (0.002 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the SE 1/4 of Section 34, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

DATE: SEPT. 29, 2025

A temporary construction easement situated in the SW 1/4 of Section 35, Township 3 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Adams, State of Colorado, being a part of Lot 3, Block 6, Gateway Park Addition, the plat of said subdivision being recorded on May 6, 1946, at Rec. No. 302386 in the office of the Adams County Clerk and Recorder, being more particularly described as follows:

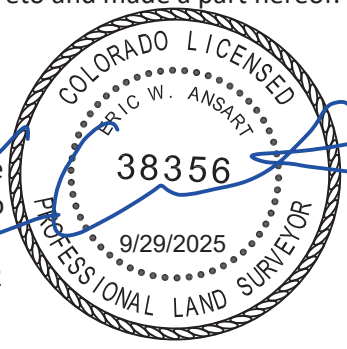
Commencing at the W 1/4 corner of said Section (from whence the SW corner of said section bears S00°17’41”E, a distance of 2655.85 feet);

Thence S08°03’28”E, a distance of 222.10 feet to a point on the westerly line of said Lot 3, said point being the **Point of Beginning**;

Thence N89°42'19"E, a distance of 5.50 feet;

Thence S00°17'41"E, a distance of 21.14 feet;

Thence S89°38'16"W, a distance of 5.50 feet to a point on the westerly line of said Lot 3;



Thence N00°17'41"W, coincident with said westerly line, a distance of 21.14 feet to the **Point of Beginning**.

The above-described parcel containing 116 square feet (0.003 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the SW 1/4 of Section 35, T3S, R67W, 6th P.M., being S00°17’41”E, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the north end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A permanent easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lots 1 through 8, Block 16, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S07°49’50”E, a distance of 252.11 feet to a point on the southerly line of said Lot 8, said point being the **Point of Beginning**;

Thence S89°35'51"W, coincident with said southerly line, a distance of 1.93 feet to the southeasterly corner of that parcel of land described in that Warranty Deed in Book 3556 at Page 693 in the office of the Arapahoe County Clerk and Recorder;

Thence coincident with the easterly line of said parcel the following two (2) courses:

1. Thence N00°05'43"W, a distance of 175.13 feet to a point of tangent curvature;
2. Thence along said curve to the right (whose chord bears N12°33'32"E, a distance of 10.95 feet) having a radius of 25.00 feet, and a central angle of 25°18'30", an arc distance of 11.04 feet to a point of non-tangency;

Thence S82°14'33"E, a distance of 7.14 feet;

Thence S00°05'43"E, a distance of 9.35 feet;

Thence S89°54'17"W, a distance of 7.54 feet to a point being 1.93 feet east of said easterly line when measured perpendicular thereto;

Thence S00°05'43"E, parallel with and 1.93 feet east of said easterly line, a distance of 175.48 feet to the **Point of Beginning**.

The above-described parcel containing 425 square feet (0.010 acres) more or less.

The purpose of the above-described parcel is for the construction and maintenance of a sidewalk and the relocation and maintenance of adjacent utilities.

(continued)

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

DATE: SEPT. 29, 2025

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lots 1 through 8, Block 16, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S07°49’50”E, a distance of 252.11 feet to a point on the southerly line of said Lot 8, said point being the **Point of Beginning**;

Thence N00°05'43"W, a distance of 175.48 feet;

Thence N89°54'17"E, a distance of 3.00 feet;

Thence S00°05'43"E, a distance of 60.81 feet;

Thence S89°43'35"E, a distance of 12.28 feet;

Thence S00°16'25"W, a distance of 51.60 feet;

Thence S89°54'17"W, a distance of 12.00 feet;

Thence S00°11'09"E, a distance of 62.98 feet to a point on said southerly line;

Thence S89°35'51"W, coincident with said southerly line, a distance of 3.05 feet to the **Point of Beginning**.

The above-described parcel containing 1,151 square feet (0.026 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

(continued)

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

A PARCEL OF LAND SITUATED IN THE NW 1/4 OF SEC. 2, T4S, R67W, 6TH P.M., CITY OF AURORA, COUNTY OF ARAPAHOE, STATE OF COLORADO

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: PE-105
DATE: SEPT. 29, 2025

A permanent easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lots 16, 17, & 18, Block 16, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S03°50’16”E, a distance of 497.90 feet to a point on the southerly line of that parcel of land described in that Special Warranty Deed recorded on March 20, 2020, at Rec. No. E0034677 in the office of the Arapahoe County Clerk and Recorder, said point being the **Point of Beginning**;

Thence coincident with the southerly, westerly and northerly lines of said parcel the following three (3) courses:

1. Thence S89°36'03"W, a distance of 2.50 feet;
2. Thence N00°05'44"W, a distance of 47.98 feet;
3. Thence N89°36'03"E, a distance of 2.50 feet;

Thence S00°05'43"E, a distance of 31.44 feet;

Thence N89°54'17"E, a distance of 3.00 feet;

Thence S00°05'43"E, a distance of 6.00 feet;

Thence S89°54'17"W, a distance of 3.00 feet;

Thence S00°05'43"E, a distance of 10.54 feet to the **Point of Beginning**.

The above-described parcel containing 138 square feet (0.003 acres) more or less.

The purpose of the above-described parcel is for the construction and maintenance of a sidewalk and the relocation and maintenance of adjacent utilities.

(continued)

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

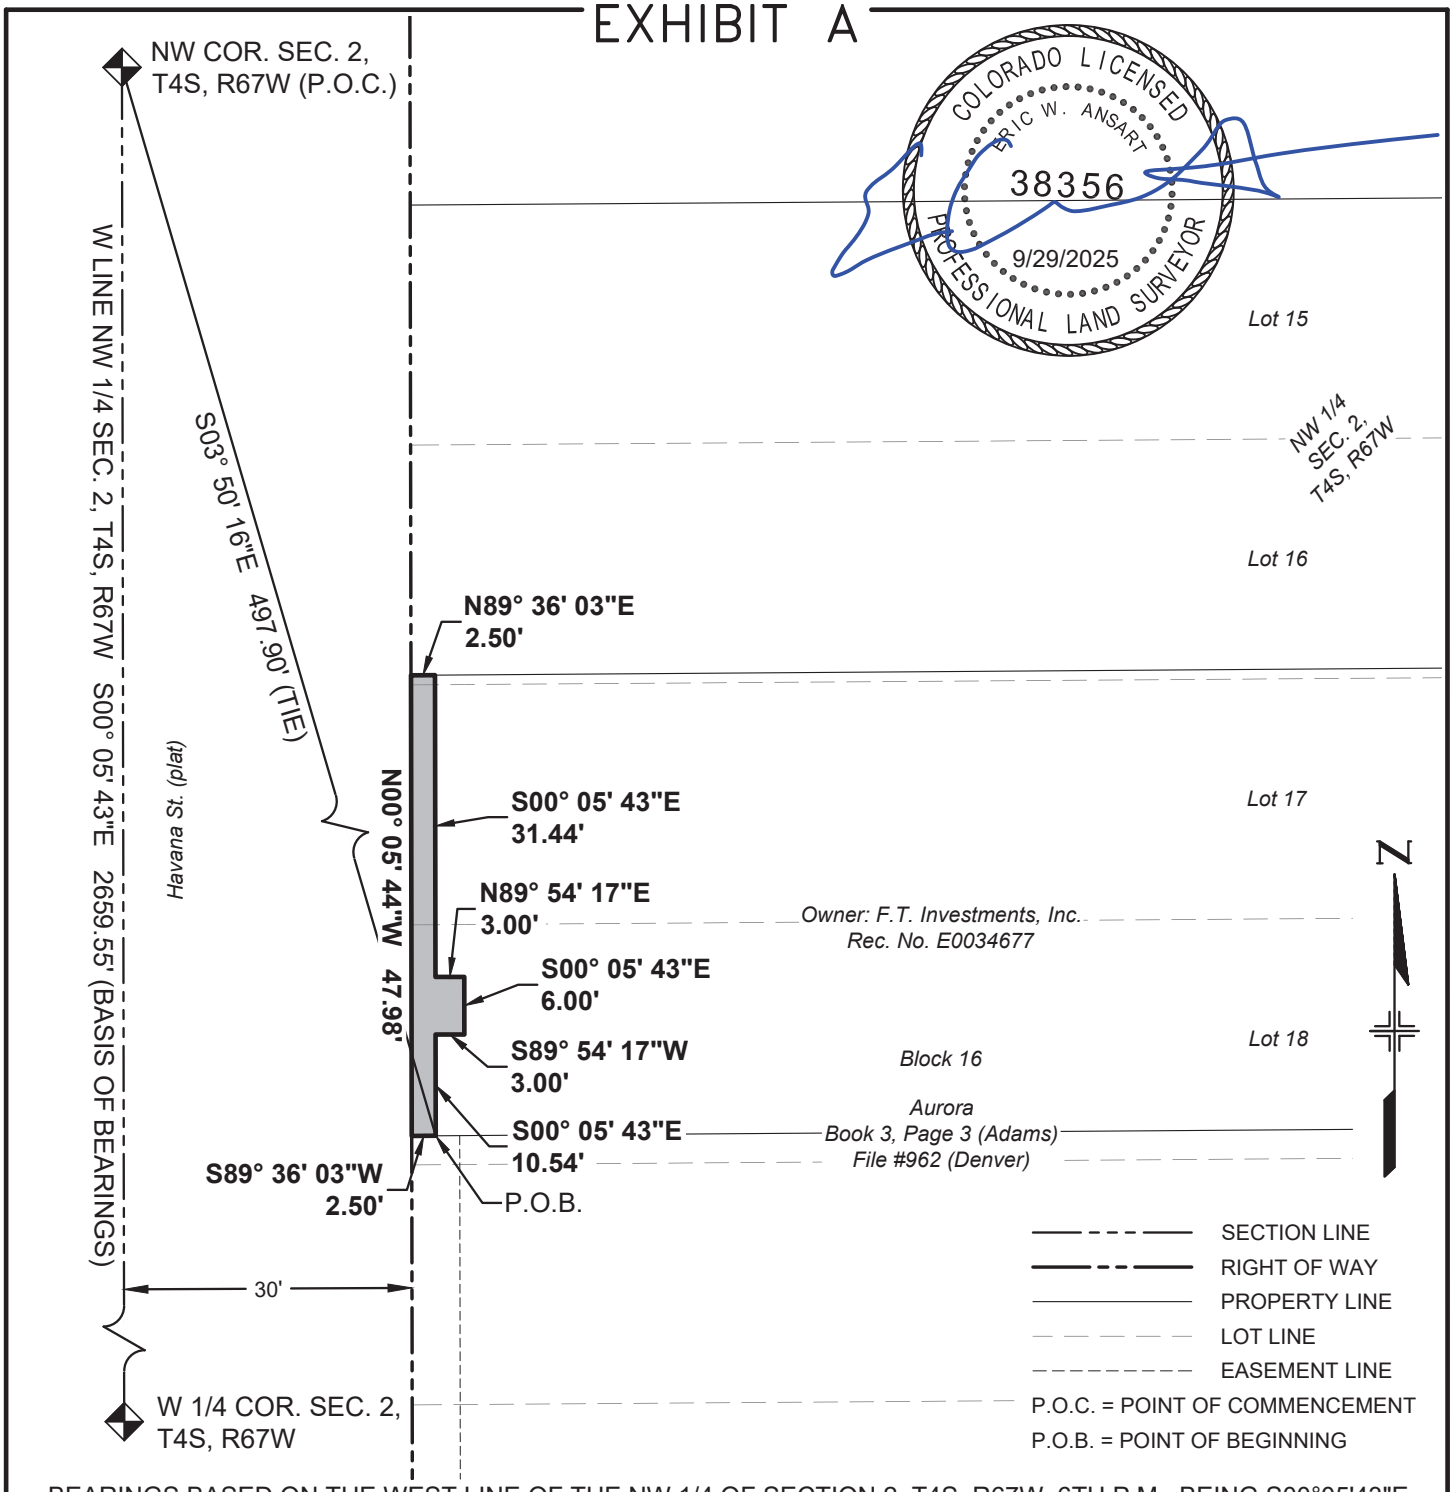

Illustration attached hereto and made a part hereof.

PARCEL NUMBER: TE-112B
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 3, Block 9, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

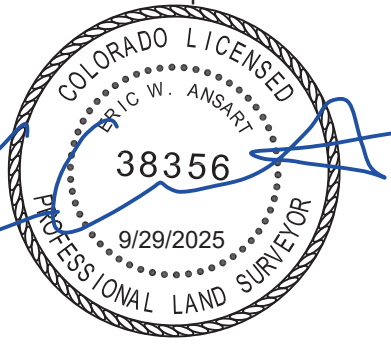
Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S02°17’54”E, a distance of 780.43 feet to the southwesterly corner of that parcel of land described in that Personal Representative’s Deed recorded November 6, 2023, at Rec. No. E3075764, said corner being the **Point of Beginning**;

Thence N00°05'43"W, coincident with the westerly line of said parcel, a distance of 19.70 feet;

Thence N89°54'17"E, a distance of 5.50 feet;

Thence S00°05'43"E, a distance of 19.67 feet to a point on the southerly line of said parcel;



Thence S89°36'03"W, coincident with said southerly line, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 108 square feet (0.002 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

PARCEL NUMBER: TE-117A
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NW 1/4 of Section 2, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lots 13 and 14, Block 9, Aurora, the plat of said subdivision being recorded on September 22, 1926, in Book 3 at Page 3 in the office of the Adams County Clerk and Recorder, and under File #962 in the office of the City and County of Denver Clerk and Recorder, being more particularly described as follows:

Commencing at the NW corner of said Section (from whence the W 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S01°45’55”E, a distance of 1029.31 feet to a point on the westerly line of said Lot 13, said point being the **Point of Beginning**;

Thence N89°54'17"E, a distance of 5.50 feet;

Thence S00°05'43"E, a distance of 10.00 feet;

Thence S89°54'17"W, a distance of 5.50 feet to a point on the westerly line of said Lot 14;

Thence N00°05'43"W, coincident with the westerly line of said Lot 14 and the westerly line of said Lot 13, a distance of 10.00 feet to the **Point of Beginning**.

The above-described parcel containing 55 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 2, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

Commencing at the NE corner of said Section (from whence the E 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S02°16’22”W, a distance of 726.05 feet to a point on the easterly line of said Lot 12, said point being the **Point of Beginning**;

Thence S00°05'43"E, coincident with said easterly line, a distance of 10.00 feet;

Thence S89°54'17"W, a distance of 5.50 feet;

Thence N00°05'43"W, a distance of 10.00 feet;

Thence N89°54'17"E, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 55 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the NE 1/4 of Section 3, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

A PARCEL OF LAND SITUATED IN THE NE 1/4 OF SEC. 3, T4S, R67W, 6TH P.M., CITY OF AURORA, COUNTY OF ARAPAHOE, STATE OF COLORADO

EXHIBIT A

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-129
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NE 1/4 of Section 3, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 6, Block 1, Havana Subdivision, Amended Map, the plat of said subdivision being recorded on May 22, 1940, at Rec. No. 264203 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

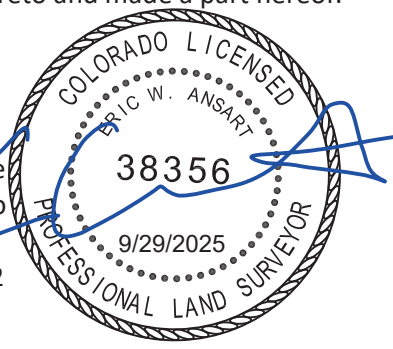
Commencing at the NE corner of said Section (from whence the E 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S01°34’46”W, a distance of 1026.60 feet to the northeasterly corner of said Lot 6, said corner being the **Point of Beginning**;

Thence S00°05'43"E, coincident with the easterly line of said Lot 6, a distance of 3.00 feet;

Thence S89°58'33"W, a distance of 5.50 feet;

Thence N00°05'43"W, a distance of 3.00 feet to a point on the northerly line of said Lot 6;



Thence N89°58'33"E, coincident with said northerly line, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 17 square feet (0.000 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the NE 1/4 of Section 3, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

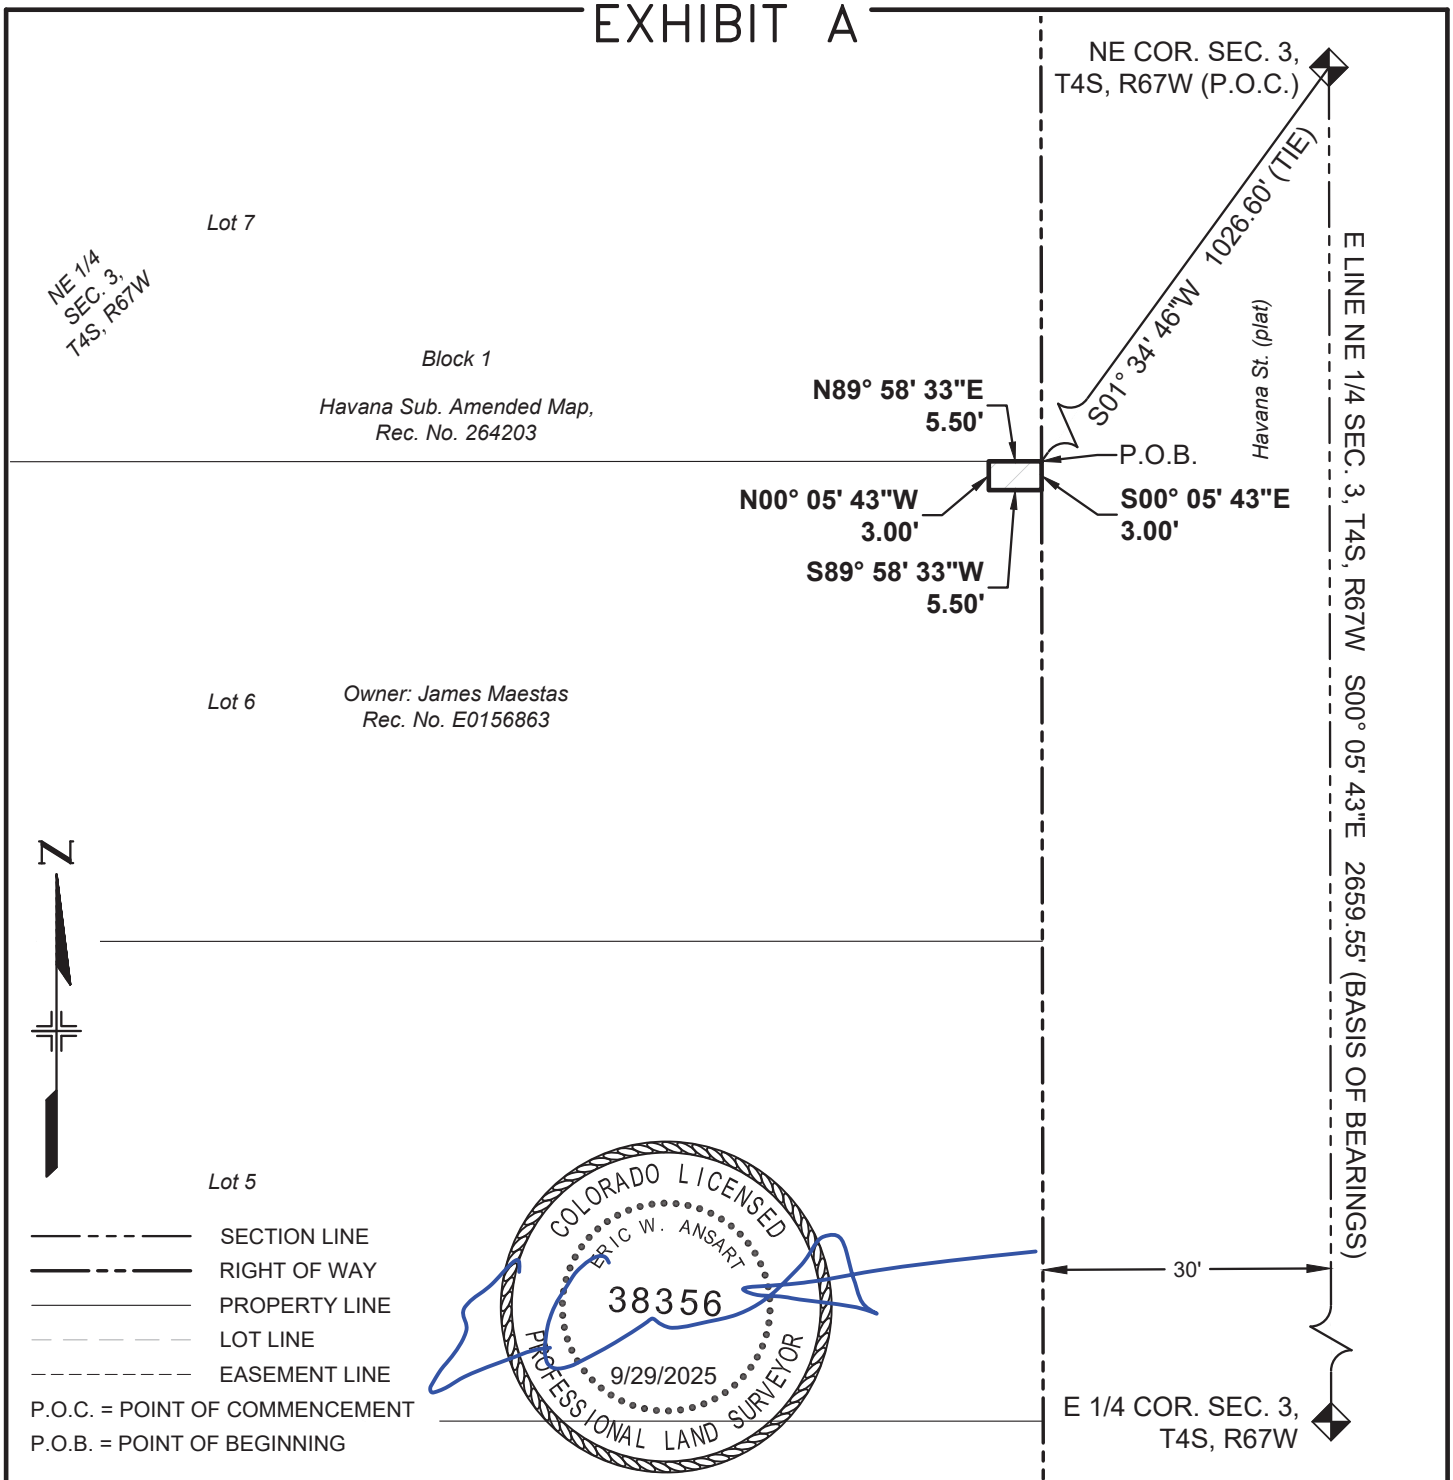


Illustration attached hereto and made a part hereof.

EXHIBIT C

PROJECT CODE: 25503
PROJECT NUMBER: CRP M055-063
PARCEL NUMBER: TE-132B
DATE: SEPT. 29, 2025

A temporary construction easement situated in the NE 1/4 of Section 3, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of Lot 3, Block 1, Havana Subdivision, Amended Map, the plat of said subdivision being recorded on May 22, 1940, at Rec. No. 264203 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the NE corner of said Section (from whence the E 1/4 corner of said section bears S00°05’43”E, a distance of 2659.55 feet);

Thence S01°19’58”W, a distance of 1203.91 feet to a point on the easterly line of said Lot 3, said point being the **Point of Beginning**;

Thence S00°05'43"E, coincident with said easterly line, a distance of 6.00 feet;

Thence S89°54'17"W, a distance of 5.00 feet;

Thence N00°05'43"W, a distance of 6.00 feet;

Thence N89°54'17"E, a distance of 5.00 feet to the **Point of Beginning**.

The above-described parcel containing 30 square feet (0.001 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the east line of the NE 1/4 of Section 3, T4S, R67W, 6th P.M., being S00°05’43”E, being monumented on the north end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16848 1987” and on the south end by a 3" brass cap in a range box “CITY OF AURORA LS 16419 1989”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

Illustration attached hereto and made a part hereof.

A temporary construction easement situated in the NW 1/4 of Section 11, Township 4 South, Range 67 West of the 6th Principal Meridian, City of Aurora, County of Arapahoe, State of Colorado, being a part of that parcel of land described in that Warranty Deed recorded on March 31, 1972, in Book 2005 at Page 742 in the office of the Arapahoe County Clerk and Recorder, being more particularly described as follows:

Commencing at the W 1/4 corner of said Section 11 (from whence the NW corner of said section bears N00°12’05”W, a distance of 2645.10 feet);

Thence N03°26’20”E, a distance of 866.25 feet to a point on the westerly line of said parcel, said point being the **Point of Beginning**;

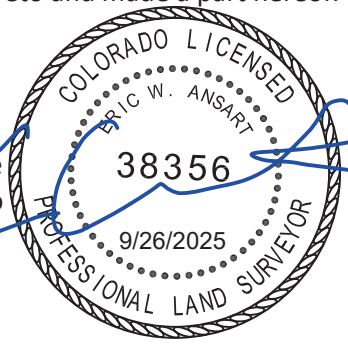
Thence coincident with the westerly and northerly lines of said parcel the following two (2) courses:

1. Thence N00°12'05"W, a distance of 55.13 feet;
2. Thence N89°47'55"E, a distance of 3.00 feet;

Thence S00°12'05"E, a distance of 17.13 feet;

Thence N89°47'55"E, a distance of 2.50 feet;

Thence S00°12'05"E, a distance of 38.00 feet;



Thence S89°47'55"W, a distance of 5.50 feet to the **Point of Beginning**.

The above-described parcel containing 260 square feet (0.006 acres) more or less.

The purpose of the above-described parcel is for the construction of a sidewalk and associated appurtenances.

Bearings based on the west line of the NW 1/4 of Section 11, T4S, R67W, 6th P.M., being N00°12’05”W, being monumented on the south end of said line by a 3” brass cap in a range box “CITY OF AURORA LS 16419 1989” and on the north end by a 3 1/4" aluminum cap in a range box “COLO DEPT OF HIGHWAYS 1988 PLS No 22571”, said bearing being a grid bearing of the NAD 1983(1992) State Plane Coordinate System of Colorado, Central Zone, and all lineal units are represented in US Survey Feet.

CONDEMNATION PROCEDURES

see C.R.S. Title 38, Article 1 (§ 38-1-101 et seq.)

I. PRE-PETITION STEPS

A. Obtain a Legal Description of the property, sufficiently clear and definite to enable the property to be located without difficulty, so that the landowner can assess the effects upon his/her/its property.

B. Pass a Legislative Declaration (an ordinance) identifying the condemnation project, declaring that the project is for a "public use", and finding that the acquisition of the property is necessary for the project.

C. Obtain an Appraisal from a licensed appraiser of the "reasonable market value" of the property to be condemned, and conduct a Title Search in order to identify all persons with record interests in the property.

D. Conduct Good Faith Negotiations with the Landowner, including, at a bare minimum, one reasonable offer to purchase, and allowing a reasonable period of time (e.g., two weeks) for the landowner to respond.

E. Obtain a Current Title Commitment, including the Legal Description and the Status of all Encumbrances on the property.

F. Send a formal Notice of Intent to Acquire the Property to every person with a record interest in the property.

[Note: If the value of the property to be condemned exceeds $5,000, the notice of intent to acquire must advise the landowner that the condemnor will pay for the reasonable cost of an appraisal for the landowner if the landowner provides a copy of such appraisal to the condemnor within ninety days after the notice of intent to acquire. The valuation trial may not take place until the ninety days have passed or the condemnor has received the landowner's appraisal, whichever occurs first. However, the condemnor may initiate condemnation proceedings (i.e., file suit) and may obtain possession of the property pursuant to a court order at an "immediate possession hearing" before the passage of the ninety days.]

II. FILING THE CONDEMNATION CASE

A. Summons

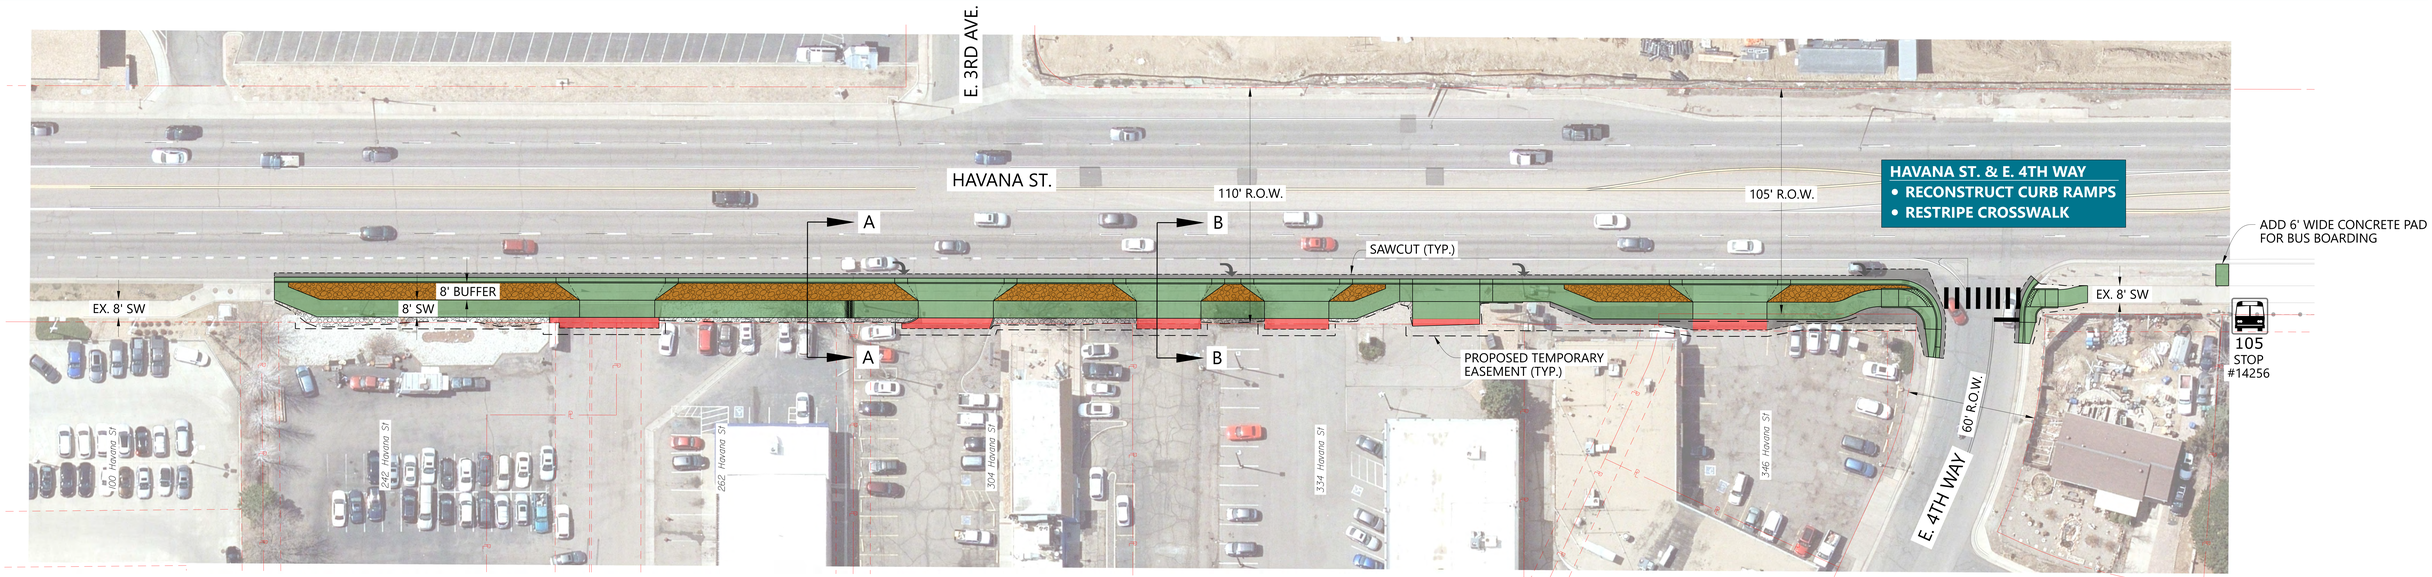
B. Petition in Condemnation
   (1) Citation of Constitutional and Statutory Authority to Condemn
   (2) Reference to Legislative Declaration that Project is for Public Use and that Acquisition of the Property is Necessary for the Project
   (3) Legal Description of the Property to be Condemned, and the Nature of the Property Interests to be Acquired
   (4) Identification of all Persons who have or may have an Interest in the Property
   (5) Statement that Good Faith Negotiations have Failed
   (6) Prayer for Immediate Possession
   (7) Reminder of Landowner's Duty to Mitigate Damage Claims

C. Notice of Lis Pendens

D. Notice of Immediate Possession Hearing

III. POST-FILING PROCEDURES

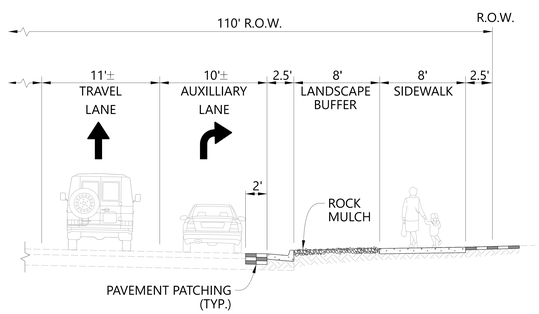
A. Immediate Possession Hearing on Condemnor's Motion
   -- takes place approximately 30-60 days after filing of petition
   -- is often stipulated, leaving only "just compensation" to be determined
   -- is accompanied by condemnor's deposit into court of funds equal to appraised value of property (according to condemnor's appraisal)



B. Trial to Determine the Value of the Property Interests Condemned
   -- the date of valuation is usually the date when the condemnor is first authorized to take possession of the property; interest added therefrom
   -- the burden of proving fair market value is on the landowner

C. Rule and Order Issued by the Court
   -- this is the court's judgment, and has the same legal effect as a deed

D. Hearing on Landowner's Bill of Costs (if these cannot be stipulated)
   -- the landowner's reasonable costs, appraisal fees, and expert witness fees (but not attorney fees) are recoverable, from the condemnor, as part of the landowner's "just compensation" for the taking



E. Hearing on Apportionment of Award among Condemned Landowners
   -- a tenant, for example, is not entitled to a separate award from the condemnor for the value (if any) of the tenant's leasehold interest; rather, the tenant must seek recovery out of the landowner's award
   -- the condemnor is not involved

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The City Council has adopted the Aurora Places Comprehensive Plan to guide future growth and development within the city. This plan has established the City's Annexation Area which is the boundary within which the City will consider annexation requests. This property is located within the City's Annexation Area.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

A petition for annexation was filed with the City Clerk for annexation of two parcels totalling 46.6 acres owned by PCG Holdings. This parcel is located at the SEC of South Gun Glub Road and East Bayaud Avenue, on both the east and west side of South Gun Club Road. (see attached vicinity map).

The two parcels fall within the City's Annexation Boundary and meets contiguity requirements. This is the second in a series of two annexations.

There will be a Development Application submitted for the property following annexation, indicating residential land uses.
The Initial Zoning Ordinance will be presented to City Council concurrently with the Annexation Ordinance. The initial zoning shall follow the City's Comprehensive Plan.

The annexation process follows state law, and this annexation will be considered over three City Council meetings. Consideration of this resolution is item #1 listed below:
1) City Council considers approval of a Resolution making a finding that the Petition is in substantial compliance with statutory requirements and sets the Public Hearing date.
2) City Council conducts the Public Hearing, considers approval of a Resolution making a finding that the land is eligible for annexation, and considers Introduction of the Annexation Ordinance.
3) City Council considers the Annexation Ordinance on final reading and the Annexation Agreement will be presented for Council consideration.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☒ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT
Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT
Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

Public Fiscal Impact: Annexation obligates the City to provide municipal services and utilities upon development. The fiscal impact of this development will be offset by various development fees paid at time of development, as well as future taxes generated by the expected development of commercial uses on this property.

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does City Council wish to approve the resolution as proposed and set the date for a public hearing on the proposed annexation?

LEGAL COMMENTS

According to the Colorado Municipal Annexation Act, a resolution is necessary to make a finding that the petition is compliance with Section 31-12-107(1). The resolution also establishes a date for a public hearing on the proposed annexation. The hearing is scheduled for June 22, 2026.
A petition is in substantial compliance if it is filed with the City Clerk and contains the following:

1) an allegation that it is desirable and necessary that the area be annexed
2) an allegation that the required contiguity exists
3) an allegation that the signers of the petition comprise more than 50 percent of the owners owning more than 50 percent of the property
4) a request that the City approve the annexation of the area proposed
5) a signature and address of the landowner
6) a legal description of the land owned
7) date of signature
8) an affidavit of the circulator of the petition
9) four copies of the annexation map.

This petition complies with the statutory requirements. (Rulla)

RESOLUTION NO. R2026____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FINDING A PETITION FOR ANNEXATION OF THREE PARCELS OF LAND LOCATED IN THE SW 1/4 SECTION 7, TOWNSHIP 4 SOUTH, RANGE 65 WEST OF THE 6TH P.M. AND THE SOUTH 1/2 OF THE SE 1/4 SECTION 12, TOWNSHIP 4 SOUTH, RANGE 66 WEST OF THE 6TH P.M., COUNTY OF ARAPAHOE, STATE OF COLORADO, TO BE IN SUBSTANTIAL COMPLIANCE WITH SECTION 31-12-107(1), C.R.S., AND GIVING NOTICE OF A PUBLIC HEARING ON THE PROPOSED ANNEXATION (222 GUN CLUB ANNEXATION) 46.6 ACRES

WHEREAS, a petition for annexation of a certain parcels of land, described herein in Exhibit A attached hereto, has been filed with the City Clerk of the City of Aurora, Colorado (the "City"); and

WHEREAS, the petition has been referred to the City Council of the City for a determination of substantial compliance with requirements of Section 31-12-107(1), C.R.S.; and

WHEREAS, the City Council has been advised by staff, and has taken official notice of all maps, records, and other information and materials on file with the City regarding said petition.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The petition for annexation of certain land more particularly described in Exhibit A, attached hereto and incorporated herein, is hereby determined to be in substantial compliance with Section 31-12-107(1), C.R.S.

Section 2. The City Council shall hold a public hearing on the proposed annexation on July 13, 2026, at 6:00 p.m., in the City Council Chambers, Aurora Municipal Center, 15151 East Alameda Parkway, Aurora, Colorado, or, if the hearing is not held in person, then by such telephonic or electronic means accessed as described on the City's website Auroragov.org, to determine if the proposed annexation complies with Sections 31-12-104 and 31-12-105, C.R.S., or such parts thereof as may be required to establish eligibility for annexation.

Section 3. The City Clerk is hereby directed to publish this Resolution and a Notice of Public Hearing once each week for four consecutive weeks in a newspaper of general circulation in the area proposed to be annexed.

RESOLVED AND PASSED this _____ day of _____ 2026.

PETITION FOR ANNEXATION

PARCELS: 1975-12-4-00-004 & 1977-07-3-00-001

TO: THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

The undersigned (the "Petitioners"), being the owners of more than fifty percent (50%) of the property proposed to be annexed, exclusive of public streets and alleys, which property is described in Exhibit A attached hereto and incorporated herein by this reference (the "Property") , hereby petitions the City Council (the "Council") of the City of Aurora, Colorado (the "City"), for annexation of the Property in accordance with the provisions of Title 31, Article 12, Part 1, C.R.S., as amended.

In support of this petition, the Petitioners state the following:

1. It is desirable and necessary that the Property be annexed to the City.

2. The requirements of Sections 31-12-104 and 31-12-105, C.R.S., exist or have been met:

a. Not less than one sixth (1/6) of the perimeter of the Property is contiguous with the existing boundaries of the City.

b. Contiguity with the City is not established by: (i) use of any boundary of an area: previously annexed to the City that, at the time of its annexation, was not contiguous at any point with the boundary of the City , was not otherwise in compliance with Section 31-12-104(1)(a), C.R.S., and was located more than three miles from the nearest boundary of the City ("Non-Contiguous Area"); or
(ii) use of any boundary of territory subsequently annexed directly to, or indirectly connected through subsequent annexations to, a Non-Contiguous Area.

c. A community of interest exists between the Property and the City.

d. The Property is urban or will be urbanized in the near future.

e. The Property is integrated or is capable of being integrated with the City.

f. In establishing the boundaries of the Property, no land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, has been divided into separate parts or parcels without the written consent of the landowner unless separated by a dedicated street, road, or other public way.

g. No land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, comprising twenty acres or more which, together with the buildings and improvements situated thereon, has a valuation for assessment in excess of $200,000 for the preceding tax year has been included in the Property without the written consent of the landowner.

h. No annexation proceedings have been commenced for the annexation of

all or any portion of the Property to another municipality.

i. The annexation of the Property shall not result in the detachment of area from any school district or the attachment of area to another school district.

j. No portion of the Property is more than three miles in any direction from any point of the City boundary as such was established more than one year before this annexation will become effective.

k. If a portion of a platted street or alley is to be annexed, the entire width of said street or alley is included within the boundaries of the Property.

l. The Property is not presently a part of any incorporated town, city and county, or city.

3. The petitioners comprise more than fifty percent (50%) of the landowners owning more than fifty percent (50%) of the territory included in the area proposed to be annexed, exclusive of streets and alleys. A legal description of the land owned by each Petitioner is set forth in Exhibit B attached hereto and incorporated herein by this reference.

4. Accompanying this Petition are four copies of an annexation map showing the seal of a registered engineer or land surveyor, containing the following information:

a. A written legal description of the boundaries of the Property;

b. A showing of the boundary of the Property;

c. A showing of the location of each ownership tract in unplatted land and, if part or all of the Property is platted, the boundaries and the plat numbers of plots or of lots and blocks;

d. Next to the boundary of the Property, a drawing of the contiguous boundary of the City and any other municipality abutting the Property.

5. Accompanying this Petition is a copy of the Special Warranty Deed(s) for the non-tributary and not nontributary water within the Dawson-Arkose, Denver, Arapahoe, and Laramie-Fox Hills aquifers that lie beneath the Property. It is not required that the deed(s) be executed at the time of the Petition, but to the extent that the Petitioners do not deliver original executed Special Warranty Deeds for any said ground water underlying the Property, accompanying this Petition is an affidavit(s) stating that original executed deed(s) can and will be delivered to Aurora prior to approval of the annexation. An original executed Special Warranty Deed(s) for any and all said ground water underlying the Property will be delivered to Aurora prior to scheduling of the final reading and annexation approval before the City Council. To the extent Petitioners cannot deliver the original executed Special Warranty Deed(s) for the non-tributary and not non-tributary water within the Dawson-Arkose, Denver, Arapahoe, and Laramie-Fox Hills aquifers that lie beneath the Property, accompanying this Petition is an affidavit by Petitioners stating Petitioners' current knowledge of the ownership of said water. Prior to scheduling of the final reading and annexation

approval before the City Council, Petitioners shall pay to the City the monetary value of that portion of said water beneath the Property not to be deeded to the City. Said deed(s) and monies paid to the City will be held in escrow to be returned to the Petitioners in the event the annexation is not approved by City Council.

6. Prior to the hearing before the City Council on whether to annex the Property, the Petitioners and the City shall have entered into an annexation agreement which shall govern and control the development of the Property within the City (the "Annexation Agreement"). Annexation of the Property shall be conditioned upon the City Council's approval of the Annexation Agreement. Upon the effective date of the ordinance annexing the Property and approving the Annexation Agreement ("Annexation Ordinance"), the Property shall be subject to all of the terms and provisions of the Annexation Agreement.

7. In the event that an Annexation Agreement satisfactory to both the Petitioners and the City is not agreed to on or before the date of the second reading of the Annexation Ordinance, the Petitioners shall have the right to withdraw this Petition at their option and this Petition shall be deemed to be null and void as of the date of this Petition and of no force and effect as if it had never been executed and filed with the City. In such event, no filing fees shall be refunded to the Petitioners by the City.

8. No vested rights to use or develop the Property in any particular way, as defined in Section 24-68-101, et seq., C.R.S., have been requested by the Petitioners from any governmental entity, other than those requested and included in the Annexation Agreement

9. The Petitioners signed this Petition no more than one hundred eighty (180) days prior to the date of filing.

10. The Petitioners shall pay all fees and costs incurred by the City in processing this Petition through the annexation hearing before the City Council.

11. Except as modified by the terms and provisions of the Annexation Agreement, upon the effective date of the Annexation Ordinance, the Property shall become subject to the Charter and all ordinances, resolutions, rules, and regulations of the City, except for general property taxes of the City which shall become effective on January 1 of the next succeeding year following the effective date of the Annexation Ordinance.

12. The Petitioners acknowledge that, upon the effective date of the Annexation Ordinance and subject to the terms and provisions of the Annexation Agreement, the Property, the owners thereof, and the uses thereon shall be subject to all taxes and fees imposed by the City. The Property, the owners thereof, and the uses thereon are also bound by any taxes imposed and voter authorization obtained pursuant to Article X, Section 20 of the Colorado Constitution prior to the annexation of the Property. The Petitioners hereby waive any claims they may have under Article X, Section 20 of the Colorado Constitution related to such taxes and voter authorization.

WHEREFORE, the Petitioners respectfully request that the City Council approve the annexation of the Property.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The City Council has adopted the Aurora Places Comprehensive Plan to guide future growth and development within the city. This plan has established the City's Annexation Area which is the boundary within which the City will consider annexation requests. This property is located within the City's Annexation Area.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

A petition for annexation was filed with the City Clerk for annexation of two parcels totalling 20.491 acres owned by 7N, LLC. These parcels are located at the SWC of South Gun Glub Road and East Bayaud Avenue. (see attached vicinity map).

The two parcels fall within the City's Annexation Boundary and meet contiguity requirements. This is the first in a series of two annexations. The annexing of these parcels of land establish the required contiguity for an additional annexation at 222 Gun Club Road.

There will be a Development Application submitted for the property following annexation, indicating residential land uses.
The Initial Zoning Ordinance will be presented to City Council concurrently with the Annexation Ordinance. The initial zoning shall follow the City's Comprehensive Plan.

The annexation process follows state law, and this annexation will be considered over three City Council meetings. Consideration of this resolution is item #1 listed below:
1) City Council considers approval of a Resolution making a finding that the Petition is in substantial compliance with statutory requirements and sets the Public Hearing date.
2) City Council conducts the Public Hearing, considers approval of a Resolution making a finding that the land is eligible for annexation, and considers Introduction of the Annexation Ordinance.
3) City Council considers the Annexation Ordinance on final reading and the Annexation Agreement will be presented for Council consideration.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☒ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT

Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT

Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

Public Fiscal Impact: Annexation obligates the City to provide municipal services and utilities upon development. The fiscal impact of this development will be offset by various development fees paid at time of development, as well as future taxes generated by the expected development of commercial uses on this property.

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does City Council wish to approve the resolution as proposed and set the date for a public hearing on the proposed annexation?

LEGAL COMMENTS

According to the Colorado Municipal Annexation Act, a resolution is necessary to make a finding that the petition is compliance with Section 31-12-107(1). The resolution also establishes a date for a public hearing on the proposed annexation. The hearing is scheduled for June 22, 2026.
A petition is in substantial compliance if it is filed with the City Clerk and contains the following:

1) an allegation that it is desirable and necessary that the area be annexed
2) an allegation that the required contiguity exists
3) an allegation that the signers of the petition comprise more than 50 percent of the owners owning more than 50 percent of the property
4) a request that the City approve the annexation of the area proposed
5) a signature and address of the landowner
6) a legal description of the land owned
7) date of signature
8) an affidavit of the circulator of the petition
9) four copies of the annexation map.

This petition complies with the statutory requirements. (Rulla)

RESOLUTION NO. R2026____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FINDING A PETITION FOR ANNEXATION OF TWO PARCELS OF LAND LOCATED IN THE SOUTH HALF OF THE SOUTHEAST QUARTER OF SECTION 12, TOWNSHIP 4 SOUTH, RANGE 66 WEST OF THE 6TH PRINCIPLE MERIDIAN, ARAPAHOE COUNTY, COLORADO, TO BE IN SUBSTANTIAL COMPLIANCE WITH SECTION 31-12-107(1), C.R.S., AND GIVING NOTICE OF A PUBLIC HEARING ON THE PROPOSED ANNEXATION (161 and 121 GUN CLUB ANNEXATION) 20.491 ACRES

WHEREAS, a petition for annexation of a certain parcels of land, described herein in Exhibit A attached hereto, has been filed with the City Clerk of the City of Aurora, Colorado (the "City"); and

WHEREAS, the petition has been referred to the City Council of the City for a determination of substantial compliance with requirements of Section 31-12-107(1), C.R.S.; and

WHEREAS, the City Council has been advised by staff, and has taken official notice of all maps, records, and other information and materials on file with the City regarding said petition.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The petition for annexation of certain land more particularly described in Exhibit A, attached hereto and incorporated herein, is hereby determined to be in substantial compliance with Section 31-12-107(1), C.R.S.

Section 2. The City Council shall hold a public hearing on the proposed annexation on July 13, 2026, at 6:00 p.m., in the City Council Chambers, Aurora Municipal Center, 15151 East Alameda Parkway, Aurora, Colorado, or, if the hearing is not held in person, then by such telephonic or electronic means accessed as described on the City's website Auroragov.org, to determine if the proposed annexation complies with Sections 31-12-104 and 31-12-105, C.R.S., or such parts thereof as may be required to establish eligibility for annexation.

Section 3. The City Clerk is hereby directed to publish this Resolution and a Notice of Public Hearing once each week for four consecutive weeks in a newspaper of general circulation in the area proposed to be annexed.

RESOLVED AND PASSED this _____ day of _____ 2026.

PETITION FOR ANNEXATION

PARCEL 1975-12-4-00-005 AND 1975-12-4-00-012

TO: THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

The undersigned (the "Petitioners"), being the owners of more than fifty percent (50%) of the property proposed to be annexed, exclusive of public streets and alleys, which property is described in Exhibit A attached hereto and incorporated herein by this reference (the "Property") , hereby petitions the City Council (the "Council") of the City of Aurora, Colorado (the "City"), for annexation of the Property in accordance with the provisions of Title 31, Article 12, Part 1, C.R.S., as amended.

In support of this petition, the Petitioners state the following:

1. It is desirable and necessary that the Property be annexed to the City.

2. The requirements of Sections 31-12-104 and 31-12-105, C.R.S., exist or have been met:

   a. Not less than one sixth (1/6) of the perimeter of the Property is contiguous with the existing boundaries of the City.

   b. Contiguity with the City is not established by: (i) use of any boundary of an area: previously annexed to the City that, at the time of its annexation, was not contiguous at any point with the boundary of the City , was not otherwise in compliance with Section 31-12-104(1)(a), C.R.S., and was located more than three miles from the nearest boundary of the City ("Non-Contiguous Area"); or (ii) use of any boundary of territory subsequently annexed directly to, or indirectly connected through subsequent annexations to, a Non-Contiguous Area.

   c. A community of interest exists between the Property and the City.

   d. The Property is urban or will be urbanized in the near future.

   e. The Property is integrated or is capable of being integrated with the City.

   f. In establishing the boundaries of the Property, no land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, has been divided into separate parts or parcels without the written consent of the landowner unless separated by a dedicated street, road, or other public way.

   g. No land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, comprising twenty acres or more which, together with the buildings and improvements situated thereon, has a valuation for assessment in excess of $200,000 for the preceding tax year has been included in the Property without the written consent of the landowner.

   h. No annexation proceedings have been commenced for the annexation of all or any portion of the Property to another municipality.

   i. The annexation of the Property shall not result in the detachment of area from any school district or the attachment of area to another school district.

j. No portion of the Property is more than three miles in any direction from any point of the City boundary as such was established more than one year before this annexation will become effective.

k. If a portion of a platted street or alley is to be annexed, the entire width of said street or alley is included within the boundaries of the Property.

l. The Property is not presently a part of any incorporated town, city and county, or city.

3. The petitioners comprise more than fifty percent (50%) of the landowners owning more than fifty percent (50%) of the territory included in the area proposed to be annexed, exclusive of streets and alleys. A legal description of the land owned by each Petitioner is set forth in Exhibit B attached hereto and incorporated herein by this reference.

4. Accompanying this Petition are four copies of an annexation map showing the seal of a registered engineer or land surveyor, containing the following information:

a. A written legal description of the boundaries of the Property;

b. A showing of the boundary of the Property;

c. A showing of the location of each ownership tract in unplatted land and, if part or all of the Property is platted, the boundaries and the plat numbers of plots or of lots and blocks;

d. Next to the boundary of the Property, a drawing of the contiguous boundary of the City and any other municipality abutting the Property.

5. Accompanying this Petition is a copy of the Special Warranty Deed(s) for the non-tributary and not nontributary water within the Dawson-Arkose, Denver, Arapahoe, and Laramie-Fox Hills aquifers that lie beneath the Property. It is not required that the deed(s) be executed at the time of the Petition, but to the extent that the Petitioners do not deliver original executed Special Warranty Deeds for any said ground water underlying the Property, accompanying this Petition is an affidavit(s) stating that original executed deed(s) can and will be delivered to Aurora prior to approval of the annexation. An original executed Special Warranty Deed(s) for any and all said ground water underlying the Property will be delivered to Aurora prior to scheduling of the final reading and annexation approval before the City Council. To the extent Petitioners cannot deliver the original executed Special Warranty Deed(s) for the non-tributary and not non-tributary water within the Dawson-Arkose, Denver, Arapahoe, and Laramie-Fox Hills aquifers that lie beneath the Property, accompanying this Petition is an affidavit by Petitioners stating Petitioners' current knowledge of the ownership of said water. Prior to scheduling of the final reading and annexation approval before the City Council, Petitioners shall pay to the City the monetary value of that portion of said water beneath the Property not to be deeded to the City. Said deed(s) and monies paid to the City will be held in escrow to be returned to the Petitioners in the event the annexation is not approved by City Council.

6. Prior to the hearing before the City Council on whether to annex the Property, the Petitioners and the City shall have entered into an annexation agreement which shall govern and control the development of the Property within the City (the "Annexation Agreement"). Annexation of the Property shall be conditioned upon the City Council's approval of the Annexation Agreement. Upon the effective date of the ordinance annexing the Property and approving the Annexation Agreement ("Annexation Ordinance"), the Property shall be subject to all of the terms and provisions of the Annexation Agreement.

7. In the event that an Annexation Agreement satisfactory to both the Petitioners and the City is not agreed to on or before the date of the second reading of the Annexation Ordinance, the Petitioners shall have the right to withdraw this Petition at their option and this Petition shall be deemed to be null and void as of the date of this Petition and of no force and effect as if it had never been executed and filed with the City. In such event, no filing fees shall be refunded to the Petitioners by the City.

8. No vested rights to use or develop the Property in any particular way, as defined in Section 24-68-101, et seq., C.R.S., have been requested by the Petitioners from any governmental entity, other than those requested and included in the Annexation Agreement

9. The Petitioners signed this Petition no more than one hundred eighty (180) days prior to the date of filing.

10. The Petitioners shall pay all fees and costs incurred by the City in processing this Petition through the annexation hearing before the City Council.

11. Except as modified by the terms and provisions of the Annexation Agreement, upon the effective date of the Annexation Ordinance, the Property shall become subject to the Charter and all ordinances, resolutions, rules, and regulations of the City, except for general property taxes of the City which shall become effective on January 1 of the next succeeding year following the effective date of the Annexation Ordinance.

12. The Petitioners acknowledge that, upon the effective date of the Annexation Ordinance and subject to the terms and provisions of the Annexation Agreement, the Property, the owners thereof, and the uses thereon shall be subject to all taxes and fees imposed by the City. The Property, the owners thereof, and the uses thereon are also bound by any taxes imposed and voter authorization obtained pursuant to Article X, Section 20 of the Colorado Constitution prior to the annexation of the Property. The Petitioners hereby waive any claims they may have under Article X, Section 20 of the Colorado Constitution related to such taxes and voter authorization.

WHEREFORE, the Petitioners respectfully request that the City Council approve the annexation of the Property.

SPECIAL WARRANTY DEED

This Deed is made this _____ day of _____, 20___, between 7N LLC, whose address is 5551 7th Street, Suite 3700, Denver County, Colorado 80202 ("Grantor") and the City of Aurora, Colorado, a Colorado municipal corporation of the State of Colorado, acting by and through its Utility Enterprise, whose address is 15151 East Alameda Parkway, Suite 3600, Aurora, Arapahoe County, Colorado 80012 ("Aurora").

WITNESSETH

That Grantor for and in consideration of the sum of One Dollar ($1.00) and other good and valuable consideration, in hand paid by Aurora, the receipt, adequacy, and sufficiency of which is hereby acknowledged, hereby sells and conveys to Aurora the following real property, being water rights and rights to water that are located in the County of Arapahoe, State of Colorado, to wit:

All ground water from non-tributary and not non-tributary sources in the Dawson (A.K.A. Dawson-Arkose), Denver, Arapahoe and Laramie-Fox Hills Aquifers, including but not limited to water and water rights in any upper and lower aquifers, if any such aquifers are so subdivided, lying under approximately 20.491 acres of land owned by the Grantor, being more particularly described in Exhibit A attached hereto and made a part hereof. This grant includes any water and water rights decreed in Water Division 1, Case No. _____ or water permitted under Well Permit No. _____ or Ground Water Commission Permit No. _____. [References to Water Court Case No.s, Well Permit No.s. or Ground Water Commission Permit No.s should be included if applicable].

Together with all appurtenances and the Grantor warrants the title to the same against all persons claiming under it, forever, provided; however, Grantor does not warrant the quantity or quality of water available through the exercise of the above conveyed water rights and rights to water. Grantor further specifically warrants that it has not divested itself of the subject non-tributary and not non-tributary water rights and right to water prior to its conveyance to the City.

In witness hereof, the Grantor has executed this Deed on the date set forth herein above.

GRANTOR:

7N LLC _____

STATE OF Colorado)
)ss
COUNTY OF Denver)

The foregoing Special Warranty Deed was acknowledged before me by Gabriel Findlay, Grantor.

Witness my hand and seal affixed on this day of May 20, 2025.

HISTORY *(Dates reviewed by City council, Policy Committees, Boards and Commissions, or Staff. Summarize pertinent comments. ATTACH MINUTES OF COUNCIL MEETINGS, POLICY COMMITTEES AND BOARDS AND COMMISSIONS.)*

The City Council has adopted the Aurora Places Comprehensive Plan to guide future growth and development within the city. This plan has established the City's Annexation Area which is the boundary within which the City will consider annexation requests. This property is located within the City's Annexation Area.

ITEM SUMMARY *(Brief description of item, discussion, key points, recommendations, etc.)*

A petition for annexation was filed with the City Clerk for annexation of a 165 acre parcel owned by Park Hill JV VII LLC. This parcel is located at the NWC and NEC of E 56th Avenue and Valleyhead Street (see attached vicinity map).

The parcel falls within the City's Annexation Boundary and meets contiguity requirements. There will be a site plan submitted for the property following annexation, indicating commercial land uses.

The Initial Zoning Ordinance will be presented to City Council concurrently with the Annexation Ordinance. The initial zoning shall follow the City's Comprehensive Plan.

The annexation process follows state law, and this annexation will be considered over three City Council meetings. Consideration of this resolution is item #1 listed below:
1) City Council considers approval of a Resolution making a finding that the Petition is in substantial compliance with statutory requirements and sets the Public Hearing date.
2) City Council conducts the Public Hearing, considers approval of a Resolution making a finding that the land is eligible for annexation, and considers Introduction of the Annexation Ordinance.
3) City Council considers the Annexation Ordinance on final reading and the Annexation Agreement will be presented for Council consideration.

FISCAL IMPACT

Select all that apply. (If no fiscal impact, click that box and skip to "Questions for Council")

☐ Revenue Impact ☐ Budgeted Expenditure Impact ☒ Non-Budgeted Expenditure Impact
☐ Workload Impact ☐ No Fiscal Impact

REVENUE IMPACT

Provide the revenue impact or N/A if no impact. (What is the estimated impact on revenue? What funds would be impacted? Provide additional detail as necessary.)

N/A

BUDGETED EXPENDITURE IMPACT

Provide the budgeted expenditure impact or N/A if no impact. (List Org/Account # and fund. What is the amount of budget to be used? Does this shift existing budget away from existing programs/services? Provide additional detail as necessary.)

N/A

NON-BUDGETED EXPENDITURE IMPACT

Provide the non-budgeted expenditure impact or N/A if no impact. (Provide information on non-budgeted costs. Include Personal Services, Supplies and Services, Interfund Charges, and Capital needs. Provide additional detail as necessary.)

Public Fiscal Impact: Annexation obligates the City to provide municipal services and utilities upon development. The fiscal impact of this development will be offset by various development fees paid at time of development, as well as future taxes generated by the expected development of commercial/industrial uses on this property.

WORKLOAD IMPACT

Provide the workload impact or N/A if no impact. (Will more staff be needed or is the change absorbable? If new FTE(s) are needed, provide numbers and types of positions, and a duty summary. Provide additional detail as necessary.)

N/A

QUESTIONS FOR COUNCIL

Does City Council wish to approve the resolution as proposed and set the date for a public hearing on the proposed annexation?

LEGAL COMMENTS

A resolution is necessary to make a finding that the petition is compliance with the Colorado Municipal Annexation Act. (C.R.S. Section 31-12-107(1)). The resolution also establishes a date for a public hearing on the proposed annexation. The hearing is scheduled for July 13, 2026.
A petition is in substantial compliance if it is filed with the City Clerk and contains the following:

1) an allegation that it is desirable and necessary that the area be annexed
2) an allegation that the required contiguity exists
3) an allegation that the signers of the petition comprise more than 50 percent of the owners owning more than 50 percent of the property
4) a request that the City approve the annexation of the area proposed
5) a signature and address of the landowner
6) a legal description of the land owned
7) date of signature
8) an affidavit of the circulator of the petition
9) four copies of the annexation map.

This petition complies with the statutory requirements. (Rulla)

RESOLUTION NO. R2026____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO, FINDING A PETITION FOR ANNEXATION OF A PARCEL OF LAND BEING A PORTION OF THE EAST HALF OF SECTION 9, TOWNSHIP 3 SOUTH, RANGE 65 WEST OF THE SIXTH PRINCIPAL MERIDIAN, COUNTY OF ADAMS, STATE OF COLORADO, TO BE IN SUBSTANTIAL COMPLIANCE WITH SECTION 31-12-107(1), C.R.S., AND GIVING NOTICE OF A PUBLIC HEARING ON THE PROPOSED ANNEXATION (VALLEY HEAD ANNEXATION) 165 ACRES

WHEREAS, a petition for annexation of a certain parcels of land, described herein in Exhibit A attached hereto, has been filed with the City Clerk of the City of Aurora, Colorado (the "City"); and

WHEREAS, the petition has been referred to the City Council of the City for a determination of substantial compliance with requirements of Section 31-12-107(1), C.R.S.; and

WHEREAS, the City Council has been advised by staff, and has taken official notice of all maps, records, and other information and materials on file with the City regarding said petition.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

Section 1. The petition for annexation of certain land more particularly described in Exhibit A, attached hereto and incorporated herein, is hereby determined to be in substantial compliance with Section 31-12-107(1), C.R.S.

Section 2. The City Council shall hold a public hearing on the proposed annexation on July 13, 2026, at 6:00 p.m., in the City Council Chambers, Aurora Municipal Center, 15151 East Alameda Parkway, Aurora, Colorado, or, if the hearing is not held in person, then by such telephonic or electronic means accessed as described on the City's website Auroragov.org, to determine if the proposed annexation complies with Sections 31-12-104 and 31-12-105, C.R.S., or such parts thereof as may be required to establish eligibility for annexation.

Section 3. The City Clerk is hereby directed to publish this Resolution and a Notice of Public Hearing once each week for four consecutive weeks in a newspaper of general circulation in the area proposed to be annexed.

RESOLVED AND PASSED this _____ day of _____ 2026.

SAID PARCEL CONTAINS 165.0000 ACRES OR 7,187,400 SQUARE FEET MORE OR LESS.

PETITION FOR ANNEXATION

TO: THE CITY COUNCIL OF THE CITY OF AURORA, COLORADO:

The undersigned (the "Petitioners"), being the owners of more than fifty percent (50%) of the property proposed to be annexed, exclusive of public streets and alleys, which property is described in Exhibit A attached hereto and incorporated herein by this reference (the "Property") , hereby petitions the City Council (the "Council") of the City of Aurora, Colorado (the "City"), for annexation of the Property in accordance with the provisions of Title 31, Article 12, Part 1, C.R.S., as amended.

In support of this petition, the Petitioners state the following:

1. It is desirable and necessary that the Property be annexed to the City.

2. The requirements of Sections 31-12-104 and 31-12-105, C.R.S., exist or have been met:

   a. Not less than one sixth (1/6) of the perimeter of the Property is contiguous with the existing boundaries of the City.

   b. Contiguity with the City is not established by: (i) use of any boundary of an area: previously annexed to the City that, at the time of its annexation, was not contiguous at any point with the boundary of the City , was not otherwise in compliance with Section 31-12-104(1)(a), C.R.S., and was located more than three miles from the nearest boundary of the City ("Non-Contiguous Area"); or (ii) use of any boundary of territory subsequently annexed directly to, or indirectly connected through subsequent annexations to, a Non-Contiguous Area.

   c. A community of interest exists between the Property and the City.

   d. The Property is urban or will be urbanized in the near future.

   e. The Property is integrated or is capable of being integrated with the City.

   f. In establishing the boundaries of the Property, no land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, has been divided into separate parts or parcels without the written consent of the landowner unless separated by a dedicated street, road, or other public way.

   g. No land held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, comprising twenty acres or more which, together with the buildings and improvements situated thereon, has a valuation for assessment in excess of $200,000 for the preceding tax year has been included in the Property without the written consent of the landowner.

   h. No annexation proceedings have been commenced for the annexation of all or any portion of the Property to another municipality.

   i. The annexation of the Property shall not result in the detachment of area from any school district or the attachment of area to another school district.

   j. No portion of the Property is more than three miles in any direction from any point of the City boundary as such was established more than one year before this annexation will become effective.

k. If a portion of a platted street or alley is to be annexed, the entire width of said street or alley is included within the boundaries of the Property.

l. The Property is not presently a part of any incorporated town, city and county, or city.

3. The petitioners comprise more than fifty percent (50%) of the landowners owning more than fifty percent (50%) of the territory included in the area proposed to be annexed, exclusive of streets and alleys. A legal description of the land owned by each Petitioner is set forth in Exhibit B attached hereto and incorporated herein by this reference.

4. Accompanying this Petition are four copies of an annexation map showing the seal of a registered engineer or land surveyor, containing the following information:

a. A written legal description of the boundaries of the Property;

b. A showing of the boundary of the Property;

c. A showing of the location of each ownership tract in unplatted land and, if part or all of the Property is platted, the boundaries and the plat numbers of plots or of lots and blocks;

d. Next to the boundary of the Property, a drawing of the contiguous boundary of the City and any other municipality abutting the Property.

5. Accompanying this Petition is a copy of the Special Warranty Deed(s) for the non-tributary and not nontributary water within the Denver Basin that lies beneath the Property. It is not required that the deed(s) be executed at the time of the Petition, but to the extent that the Petitioners do not deliver original executed Special Warranty Deeds for any said ground water underlying the Property, accompanying this Petition is an affidavit(s) stating that original executed deed(s) can and will be delivered to Aurora prior to approval of the annexation. An original executed Special Warranty Deed(s) for any and all said ground water underlying the Property will be delivered to Aurora prior to scheduling of the final reading and annexation approval before the City Council. To the extent Petitioners cannot deliver the original executed Special Warranty Deed(s) for the non-tributary and not non-tributary water within the Denver Basin that lies beneath the Property, accompanying this Petition is an affidavit by Petitioners stating Petitioners' current knowledge of the ownership of said water. Prior to scheduling of the final reading and annexation approval before the City Council, Petitioners shall pay to the City the monetary value of that portion of said water beneath the Property not to be deeded to the City. Said deed(s) and monies paid to the City will be held in escrow to be returned to the Petitioners in the event the annexation is not approved by City Council.

6. Prior to the hearing before the City Council on whether to annex the Property, the Petitioners and the City shall have entered into an annexation agreement which shall govern and control the development of the Property within the City (the "Annexation Agreement"). Annexation of the Property shall be conditioned upon the City Council's approval of the Annexation Agreement. Upon the effective date of the ordinance annexing the Property and approving the Annexation Agreement ("Annexation Ordinance"), the Property shall be subject to all of the terms and provisions of the Annexation Agreement.

7. In the event that an Annexation Agreement satisfactory to both the Petitioners and the City is not agreed to on or before the date of the second reading of the Annexation Ordinance, the Petitioners shall have the right to withdraw this Petition at their option and this Petition shall be deemed to be null and void as of the date of this Petition and of no force and effect as if it had never been executed and filed with the City. In such event, no filing fees shall be refunded to the Petitioners by the City.

8. No vested rights to use or develop the Property in any particular way, as defined in Section 24-68-101, et seq., C.R.S., have been requested by the Petitioners from any governmental entity, other than those requested and included in the Annexation Agreement

9. The Petitioners signed this Petition no more than one hundred eighty (180) days prior to the date of filing.

10. The Petitioners shall pay all fees and costs incurred by the City in processing this Petition through the annexation hearing before the City Council.

11. Except as modified by the terms and provisions of the Annexation Agreement, upon the effective date of the Annexation Ordinance, the Property shall become subject to the Charter and all ordinances, resolutions, rules, and regulations of the City, except for general property taxes of the City which shall become effective on January 1 of the next succeeding year following the effective date of the Annexation Ordinance.

12. The Petitioners acknowledge that, upon the effective date of the Annexation Ordinance and subject to the terms and provisions of the Annexation Agreement, the Property, the owners thereof, and the uses thereon shall be subject to all taxes and fees imposed by the City. The Property, the owners thereof, and the uses thereon are also bound by any taxes imposed and voter authorization obtained pursuant to Article X, Section 20 of the Colorado Constitution prior to the annexation of the Property. The Petitioners hereby waive any claims they may have under Article X, Section 20 of the Colorado Constitution related to such taxes and voter authorization.

WHEREFORE, the Petitioners respectfully request that the City Council approve the annexation of the Property.
